

Finance and Capital Committee

Action Item III-A

April 8, 2021

**Approval of Public Hearing Staff Report and
Title VI Equity Analysis and Adoption of
FY2022 Operating and Capital Budgets and
FY2022-2027 Capital Improvement Program**

Washington Metropolitan Area Transit Authority

Board Action/Information Summary

☒ Action ☐ Information

MEAD Number:
202258

Resolution:
☒ Yes ☐ No

TITLE:

Adopt FY2022 Budget and FY2022-2027 CIP

PRESENTATION SUMMARY:

Review feedback from the public participation and equity analysis on the FY2022 Proposed Budget and request approval of Public Outreach and Input Report, FY2022 Proposed Budgets and FY2022-2027 Capital Improvement Program (CIP).

PURPOSE:

Seek Board acceptance and approval of the Public Outreach and Input Report, Title VI equity analysis, FY2022 Operating and Capital Budgets and FY2022-2027 CIP.

DESCRIPTION:

Identification of Parties with an interest in Metro's budget:

The following list includes Metro's top non-personnel multi-year contractors through FY2021 and to date (\$500 million) as well as the Metropolitan Washington Airports Authority. Some vendors have contracts spanning through FY2022 as well.

- Kiewit Infrastructure Company
- Kawasaki Rail Car Inc.
- PNC Bank National Association
- SunTrust Bank
- C3M Power Systems, LLC
- Transdev Services, Inc.
- Gannett Fleming-Parsons Joint Venture II
- Mott MacDonald I&E, LLC
- New Flyer of America, Inc.
- Bank of America NA
- Wells Fargo Commercial Services
- Clerk, U.S. Court
- Motorola Solutions Inc.
- M.C. Dean, Inc.
- Mythics, Inc.
- Potomac Yard Constructors
- First Transit, Inc.
- Diamond Transportation Service, Inc.
- Dell Marketing LP
- HNTB Corporation

- Metropolitan Washington Airports Authority (MWAA)

A full list of Procurement Awards is available at:

<https://www.wmata.com/business/procurement/solicitations/index.cfm#main-content>

Furthermore, Metro has labor agreements with the following collective bargaining units:

- Fraternal Order of Police/Metro Transit Police Labor Committee, Inc. (FOP)
- The Office and Professional Employees International Union Local No.2, AFL-CIO (Local 2)
- Local 639, International Brotherhood of Teamsters Law Enforcement Division (Local 639)
- Local Union 689 of the Amalgamated Transit Union, AFL-CIO (Local 689)
- Local 922, International Brotherhood of Teamsters (Local 922)

Key Highlights:

- The Proposed FY2022 Operating Budget totals \$2.07 billion, including \$722.9 million in federal relief funding, with \$193.4 million from the American Rescue Plan Act needed to close the operating funding gap
- With the additional federal funding, Metro will be able to support the region's recovery with approximately 80-85% of pre-pandemic service levels, and eliminate previously proposed service cuts and related position reductions from the recommended budget
- The proposed budget continues Metro's operational efficiency efforts with \$29.3 million in new management actions
- The CIP continues at an accelerated pace – addressing overdue, current, and imminent safety, reliability, and state of good repair needs. The FY2022 proposed Capital Budget investments total \$2.6 billion and the Six-Year CIP investments total \$12.3 billion
- Metro's outreach and public participation program on the proposed budget received more than 22,400 responses – highest level of participation in the past 10 years – from the public, elected officials and other stakeholders
- Staff seeks Board adoption, acceptance, and approval of the Public Outreach and Input Report, FY2022 Budget and FY2022-27 Capital Improvement Program

Background and History:

On January 14, 2020, the Board of Directors authorized Metro's Proposed FY2022 Budget of \$1.9 billion for public input. As the funding landscape has changed, Metro has revised its proposal to take advantage of additional federal relief funding.

The Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA) passed by Congress and signed into law in December 2020 is estimated to provide \$625 million of relief funding to Metro. In January, the Board of Directors amended the FY2021 Budget to utilize \$95.6 million in CRRSAA funds to close the FY2021 Budget funding gap, leaving \$529 million available for FY2022 Budget. On March 11, 2021, the American Rescue Plan Act (ARPA) was signed into law, providing additional federal relief to Metro.

Over the past four years, Metro invested more than \$5 billion through the capital

program. Capital delivery has improved, with Metro meeting and exceeding its performance metric of delivering 95 percent of the Capital Budget each year.

Discussion:

The Proposed FY2022 Operating Budget totals \$2.07 billion includes \$722.9 million in federal relief. The Relief funding will enable Metro to eliminate proposed services cuts, employee lay-offs, limit subsidy growth from jurisdictional partners, incentivize ridership growth and support the regional economy. Key changes in the recommended operating budget include:

- Maintaining current Metrorail service levels for full year with no service reductions or station closures
- Continuing current Metrobus service levels including improvements effective June 2021 with no reductions in Q3 and Q4
- Postponing Silver Line Phase 2 revenue service start date to January 2022, based on the Metropolitan Washington Airports Authority current expected substantial completion by Labor Day weekend 2021
- Deferring additional Silver Line Phase 2 subsidy contribution of \$43.1 million until FY2023, while maintaining \$20.0 million to mitigate Silver Line Phase 2 service equity impacts
- Adding \$0.5 million to operate Potomac Yard Station beginning in late FY2022
- Reducing Metrobus operating subsidy requirements by \$0.8 million for Fairfax Connectors assumption of 3A route operations
- Revising management actions to \$29.3 million by eliminating the deferment of employee wage increases

Outreach Results

In January, the Board authorized a revised public hearing docket based on a then estimated need to make service reductions totaling \$171.4 million to close the budget gap that existed before the passage of the ARPA.

Metro received more than 22,400 responses – highest number in the past 10 years - to the proposed budget, including:

- 5,400 comments from minority respondents
- 1,100 comments from low-income respondents
- 3,700 comments from active Metrobus riders
- 8,200 comments from active Metrorail riders

Full details are included in the attached draft Public Outreach and Input Report.

Operating Budget Initiatives

While recent national and regional guidance has provided greater optimism, continued questions around the pandemic, rider sentiment, and travel patterns remain. The proposed budget assumes 106 million trips or 34 percent of pre-pandemic levels in FY2022; representing a modest increase from the January proposal of 96 million trips due to the elimination of previously proposed service reductions.

Revenue from passenger fares will be impacted by ridership and trip mix. Metrorail

ridership, which typically accounts for a greater percentage of revenue, is recovering at a slower pace than Metrobus ridership, resulting in lower average fare.

Recommended Rail Service

The budget recommendation maintains the current Metrorail service level (80 percent of pre-pandemic) throughout FY2022 and eliminates previously proposed Metrorail service reductions and station closures that would have taken effect January 2022.

The recommended budget includes funding for Silver Line Phase 2 revenue service as early as January 2022, although the revenue service date will be established after all identified deficiencies have been resolved to meet acceptance standards.

In addition, the recommended budget funds the Potomac Yard Station opening in Alexandria, VA, in the fourth quarter of FY2022.

Recommended Bus Service

The proposed budget recommends retaining, throughout FY2022, previously approved Metrobus service improvements scheduled to go into effect in June 2021; providing approximately 85 percent of pre-pandemic bus service levels throughout FY2022 and eliminating previously proposed Metrobus service reductions that would have taken effect January 2022.

Parking Rate Adjustment

Consistent with the elimination of jurisdictional parking surcharge and harmonization of parking rate across Metro parking garages, a daily commuter parking fee of \$4.95 at all Prince George's County Metrorail Stations is recommended except at 1) Addison Road and Prince George's Plaza where the daily commuter parking fee is recommended to be \$4.45 and 2) Landover where the daily commuter parking fee will remain at \$3.00

Title VI Analysis

In accordance with Federal Transit Administration regulations, the proposed FY2022 Budget does not trigger a disparate impact (DI) on minority populations nor a disproportionate burden (DB) on low-income populations based on the Title VI equity analysis conducted by staff on the final Metro operating budget proposal.

Capital Budget

Metro's Capital Budget is implemented across six investment categories, and funding is aligned in these categories as follows:

- Railcar and Rail Facilities
- Rail Systems
- Track and Structure Rehabilitation
- Stations and Passenger Facilities
- Bus, Bus Facilities and Paratransit
- Business and Operations Support

In addition, several Jurisdictional priorities, approved as part of Metro's reimbursable projects program, are moving forward as well. These projects include the Silver Line Metrorail extension and the Potomac Yard infill station.

In addition to the capital investment categories, the capital program includes expenses for revenue loss from capital projects and debt service for dedicated funding debt. These expenses are budgeted at \$17 million and \$0 for FY2022 and \$67 million and \$1,226 million for the six-year period. These expenses are funded in the capital budget and are transferred to the operating budget as required to cover the identified expenses.

Risks and Opportunities

The Covid-19 pandemic continues to pose significant risks to the operating and capital budgets. Impacting ridership and revenue, creating additional health and safety compliance costs, and has the potential to disrupt supply chain and manufacturing as was experienced in 2020. Additional capital funding uncertainty exists around the federal reauthorization of Passenger Rail Investment and Improvement Act funding and operating uncertainty remains around the timing of regional economic recovery and the start date of Silver Line Phase 2, which remains subject to the Metropolitan Washington Airports Authority achieving substantial completion by Labor Day.

While additional federal relief funding removes much of the immediate risks to Metro's operating budget; uncertainty exists around rider sentiment, telework, commuter preferences amongst a changing transportation landscape, and the durability or lack thereof for funding transit operations in a way that is less dependent on the farebox.

While the pandemic has created many challenges, there is also opportunity to see a greater than anticipated recovery across the region, driving additional ridership and revenue to enable future customer-focused enhancements. Furthermore, the currently proposed federal infrastructure bill could provide additional funding for capital improvements to the system.

FUNDING IMPACT:

Board action is required to approve the FY2022 Operating and Capital Budgets and the FY2022-2027 CIP.

TIMELINE:

| | |
|---|---|
| Previous Actions | December 2020 – GM/CEO presented, and Board authorized public hearings on, the Proposed FY2022 Operating Budget and FY2022-2027 Capital Improvement Program January 2021 - Board authorized changes to FY2022 public hearing docket February – March 2021 – Budget deliberations, public outreach and public comment period |
| Anticipated actions after presentation | April 2021 – Submit Federal grant applications and budget implementation July 2021 – Fiscal Year 2022 begins |

RECOMMENDATION:

Acceptance and approval of the Public Outreach and Input Report, Title VI equity analysis, FY2022 Operating and Capital Budgets and FY2022-2027 CIP. Budget adoption enables timely submission of FTA grant applications and awards, which help to ensure state of good repair capital projects proceed as scheduled and operations continue to serve Metro customers.

Proposed FY2022 Budget and FY2022-2027 Capital Improvement Program

Finance and Capital Committee

April 8, 2021

Purpose

- Review new Proposed FY2022 budget incorporating federal relief
- Present staff report summarizing the results of public outreach process
- Recommend approval of Title VI Equity Analysis
- Recommend adoption of FY2022 Operating and Capital Budgets and FY2022-2027 Capital Improvement Program

Background

- January 2021 budget proposed for FY2022 assumed
 - Ridership at 34% pre-pandemic levels
 - No new federal relief
 - Constrained jurisdictional subsidies
 - Operating gap of \$209 million
- Board approved docket for public comment including severe service impacts effective January 2022
- Record number of riders and stakeholders gave feedback in February and March 2021
- The American Rescue Plan was signed into law on March 11, 2021

Revised FY2022 Operating Budget Proposal

- Maintain Metrobus and Metrorail services for full year with no service or frontline staff reduction
- No rail station closures or turnbacks
- Retain Collective Bargaining Agreement / Pay for Performance
- Revise Silver Line Phase 2 revenue service date to begin Q3 FY2022 based on Metropolitan Washington Airports Authority's current expected substantial completion by Labor Day weekend 2021
- Include Potomac Yard Station opening in Q4 FY2022

Federal Relief Funding and SVL2 delay funds service add backs, CBA and decreased jurisdictional subsidies

\$ in Millions

| | Expense Impact | Revenue Impact | Operating Deficit |
|--------------------------------|----------------|----------------|-------------------|
| Service Reductions Addback | \$189.4 | \$18.0 | \$171.4 |
| Silver Line Phase 2 Delay | (\$45.8) | (\$2.7) | (\$43.1) |
| Potomac Yard Station | \$0.6 | \$0.1 | \$0.5 |
| Bus Route 3A to Fairfax County | (\$1.0) | (\$0.2) | (\$0.8) |
| CBA / Pay for Performance | \$29.1 | - | \$29.1 |
| Insurance Premium | \$7.9 | - | \$7.9 |
| Subtotal | \$180.2 | \$15.2 | \$165.0 |
| CRRSAA Funding Increase | - | \$15.0 | (\$15.0) |
| ARPA Funding | - | \$193.4 | (\$193.4) |
| Subtotal | - | \$208.4 | (\$208.4) |
| Subsidy Change | \$180.2 | \$223.6 | (\$43.4) |

Note: Amounts are rounded for presentation purposes and may not sum

Proposed FY2022 Year-Round Service

Metrorail 80% of pre Covid-19 service

Maintain existing service levels

Span: Close 11 pm, 7 days

Frequency:

Weekdays: 12 min BL/OR/GR/YL/SV / 6 min RD

Weekends: 15 min BL/OR/GR/YL/SV / 12 min RD

Evenings: 20 min BL/OR/GR/YL/SV / 20 min RD

No station closures, no turnbacks

Metrobus 85% of pre Covid-19 service

Maintain existing service levels and improvements effective June 2021

Extend to 2 am on 34 lines 7 days

6 lines/restore weekday peak coverage

4 lines with full or partial restoration of all-day service

10 lines with restoration of Saturday service

9 lines with restoration of Sunday service

Total FTE Reduction: 0

Impact: \$171.4M

Current Service Continues in Addition to Enhancements Effective June 2021 Throughout FY2022

| | District of Columbia | Maryland | Virginia |
|-------------------------|--|---------------------------------------|---------------------------------|

* Neighborhood coverage restored by extending another route

Results of Public Participation

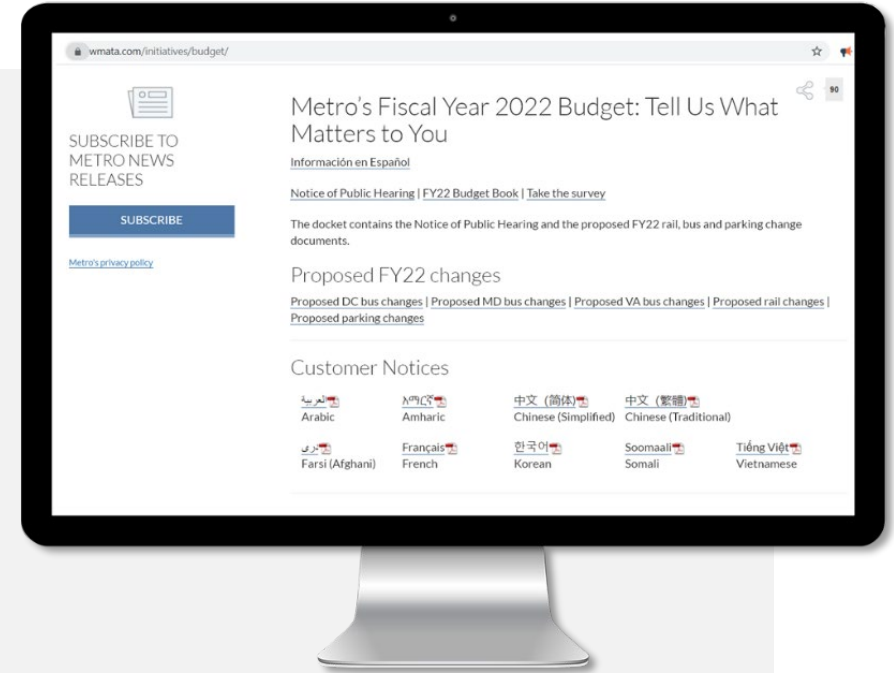

Public input received

- More than 22,400 comments – highest number in the past 10 years
- 5,400 comments from minority respondents
- 1,100 comments from low-income respondents
- 3,700 comments from active Metrobus riders
- 8,200 comments from active Metrorail riders

FY22 budget webpage

- More than 26,000 unique visitors to **wmata.com/budget**
- Page translated to Spanish & customer information posted in nine languages
- Half of visitors accessed from mobile devices

Four virtual public hearings

- New virtual platform designed for accessibility, ease of participation
- 1,123 viewers, 175 audio-only listeners
- 90 public speakers and recorded audio submissions

System signage

- Paper and digital signage:
 - All 91 Metrorail stations
 - Onboard Metrobus and MetroAccess vehicles
 - At approximately 700 bus stops where routes were proposed to be eliminated

In-person outreach

- "Street teams" at all 91 Metrorail stations and high rail-to-bus transfers bus loops
- In total, street teams spoke with 43,000+ customers – nearly one in five in Spanish

Print and digital ads, social media & direct mail

- Pandora and Extravision radio ads
- Push notifications via Transit app
- Facebook, Twitter, Instagram, YouTube and Nextdoor
- Ads in multi-language publications including: *The Washington Post*, *The AFRO*, *El Tiempo Latino*, *Washington Hispanic*, *Atref*, *Doi Nay*, *Epoch Times*, *Iran Times* and *Korean Times*
- Direct mailings sent to approx. 20,000 using targeted zip codes to encourage minority and low-income participation

Deje comentarios sobre los cambios en el servicio propuestos

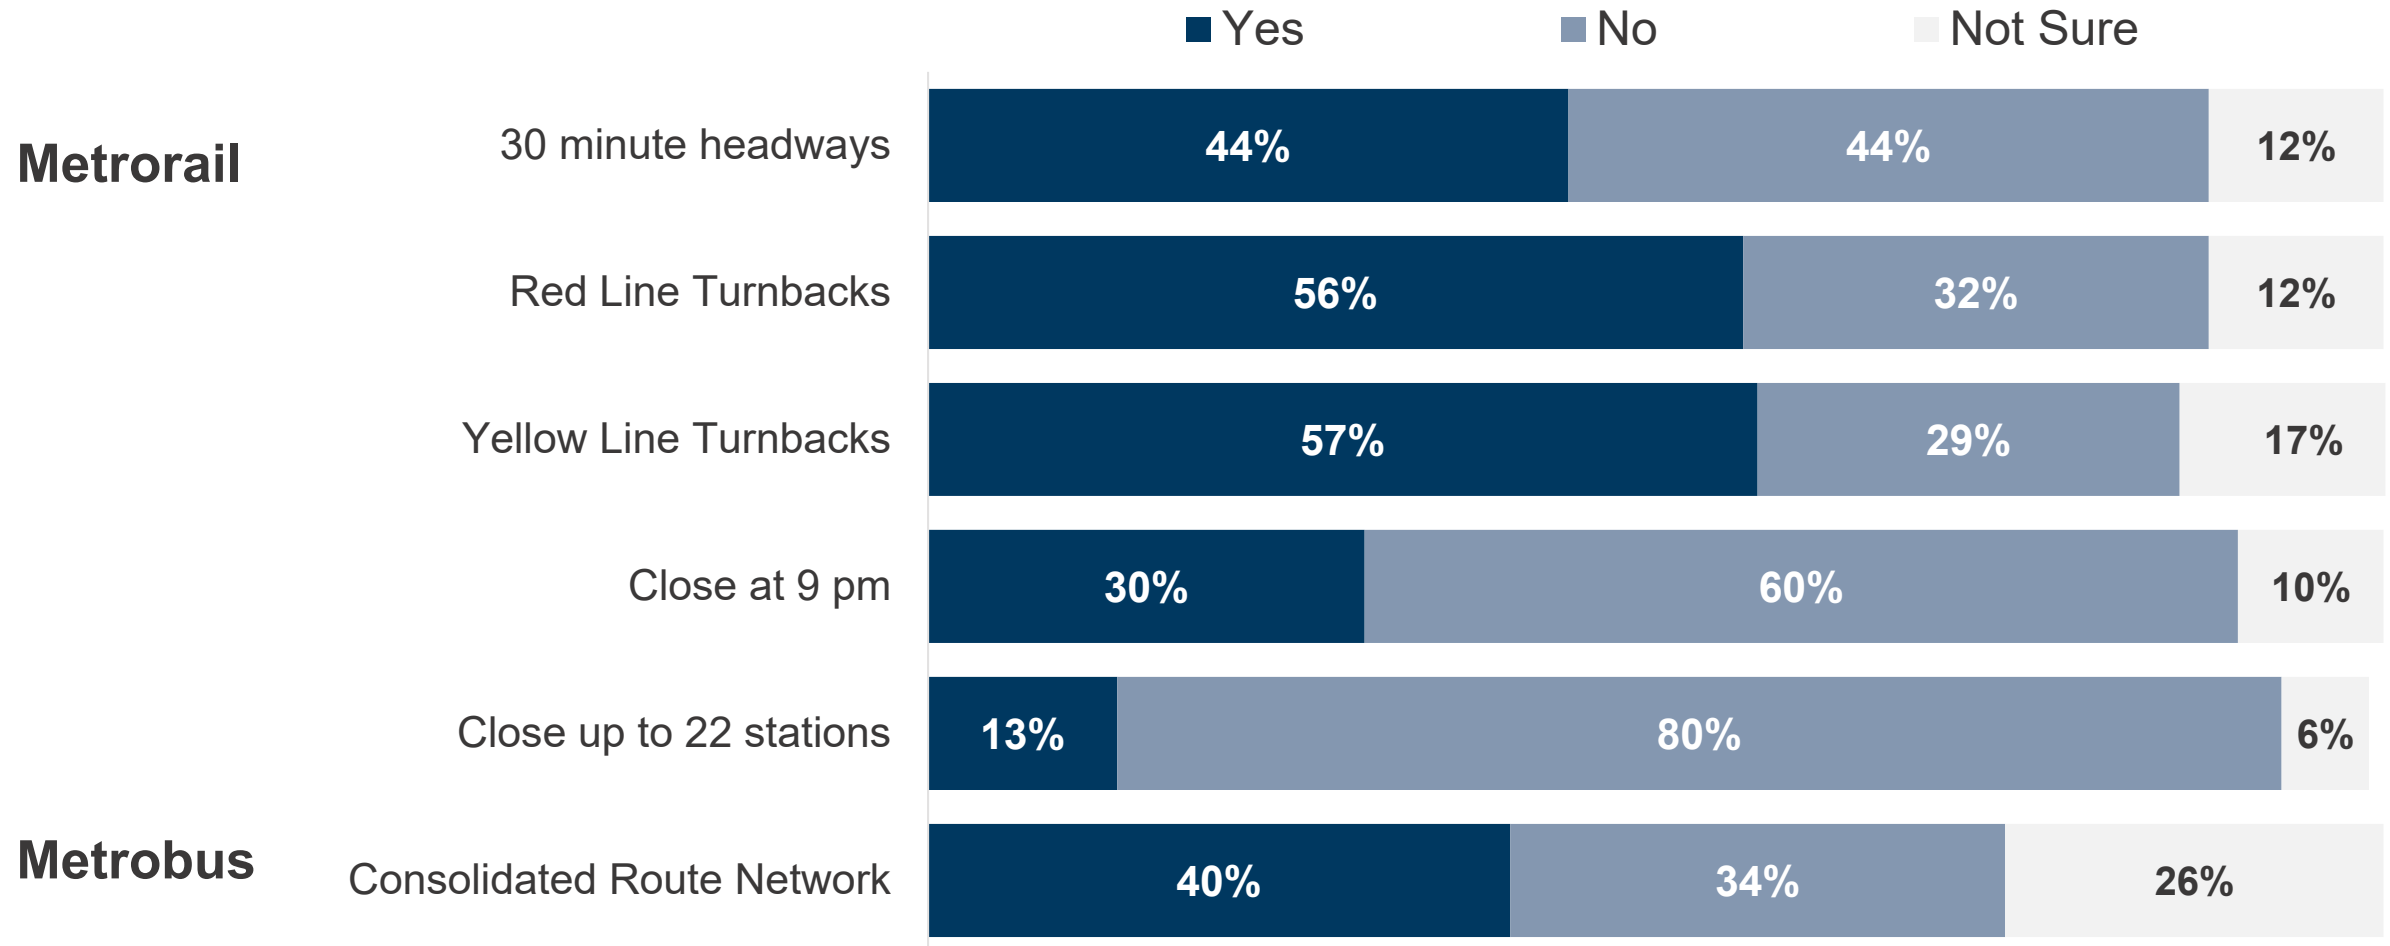

Stakeholder meetings & communications

- Stakeholder emails to 3,900+ individuals
- Communications “toolkit” with social media graphics, customer information flyers, and other budget information
- Virtual information sessions with 100+

1. In addition to deferred subsidy, FY2022 Base subsidy reduced by \$6.6M for delay of Silver Line Phase 2 and \$0.8M for Bus Route 3A to be operated by Fairfax County effective July 2021

2. Gross Revenue Bond Debt Service

Title VI Equity Analysis of New Proposed Plan

- Required for major service changes by mode (individually)
 - Is there a disparate impact (DI) on minority populations?
 - Is there a disproportionate burden (DB) on low-income populations?
- Analysis completed for bus and rail changes
 - No disparate impact (DI) for minority populations for either mode
 - No disproportionate burden (DB) for low-income populations for either mode
- Analysis conducted relative to pre-pandemic service and demographics
- Silver Line Phase II analysis will be conducted separately within six months of commencement of revenue service
- Additional detail and analysis in memorandum attached to resolution

Risks and Opportunities

Covid-19 Pandemic

- Supply delays
- Managing projects safely
- Operating impacts
- Telework policies and travel behavior

Federal and Regional Uncertainty

- Reauthorization of the Passenger Rail Investment and Improvement Act (PRIIA) and federal formula programs
- Regional economic recovery
- Federal, State, Local regulatory changes to address sustainability and equity
- Infrastructure bill

Emerging Needs

- Safety and state of good repair
- Emergency response
- Safety/regulatory mandates

Non-WMATA Risks

- Permitting, litigation, third-party

Silver Line Phase 2

- Schedule, ridership and cost recovery

Service Levels – FY2022 & Future

- Fleet size, facilities
- Rehabilitation & Maintenance Impacts

Recommendation

- Accept staff report summarizing public participation
- Approve Title VI Equity Analysis on proposed service changes
- Approve FY2022 Operating and Capital Budgets and FY2022-2027 Capital Improvement Program

SUBJECT: APPROVAL OF FISCAL YEAR 2022 OPERATING BUDGET AND CAPITAL BUDGET, 2022-2027 CAPITAL IMPROVEMENT PLAN, PARKING RATES AND SERVICE CHANGES AND PUBLIC PARTICIPATION REPORT

RESOLUTION
OF THE
BOARD OF DIRECTORS
OF THE
WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, Metro continues to play a critical role providing transportation to essential health workers, first responders, and residents who are dependent on transit services during the pandemic; and

WHEREAS, WMATA Compact §§ 23 and 24 require the Board of Directors to adopt a balanced capital budget and a balanced operating budget each year; and

WHEREAS, The Board has reviewed and considered the General Manager and Chief Executive Officer's proposed fiscal year (FY) 2022 Operating Budget and FY 2022-2027 Capital Improvement Program (CIP); and

WHEREAS, Pursuant to the Public Participation Plan, the Board held four public hearings on March 8, 9, and 10, 2021 (of which one was held in an area served by the Northern Virginia Transportation Commission), on the proposed FY 2022 Operating Budget, service and parking rate proposals, and the FY 2022-2027 CIP; and

WHEREAS, Following Board authorization on January 14, 2021 (Res. 2021-02), staff prepared a Public Hearing Staff Report (Attachment A) and Title VI Equity Analysis (Attachment B) on proposed fare and service changes presented at the public hearing, and determined that the proposed changes do not result in a disparate impact (DI) on minority populations or a disproportionate burden (DB) on low-income populations; and

WHEREAS, The WMATA Dedicated Funding Grant Agreement with the District of Columbia requires the Board to consider whether the most recent approved Federal Transit Administration (FTA) Indirect Cost Rates described in Attachment H are appropriate to apply to jurisdictional capital contributions; and

WHEREAS, The WMATA Dedicated Capital Funding Agreement with the State of Maryland requires the Board to review and approve WMATA's Debt Management Policy annually; and

WHEREAS, In June 2010, the Board adopted a $\frac{3}{4}$ mile zone from fixed route service for the provision of MetroAccess Service (Res. 2010-31);

NOW, THEREFORE, be it

RESOLVED, That the Board of Directors approves the Public Participation Report on the proposed FY 2022 Operating Budget and FY 2022-2027 CIP, set forth in Attachment A, and the Title VI equity analysis set forth in Attachment B; and be it further

RESOLVED, That the Board of Directors adopts the FY 2022 Operating Budget of \$2.08 billion set forth in Attachments C and D; and be it further

RESOLVED, That the Board of Directors adopts the service changes and parking rates set forth in Attachments E and F; and be it further

RESOLVED, That Resolution 2010-31 is suspended until June 30, 2022 in regards to the $\frac{3}{4}$ mile service area limitation and freezing the existing paratransit service area as it exists to allow staff to evaluate the impact of Metrobus service changes on paratransit service and to report to the Board of Directors on or before April 30, 2022; and be it further

RESOLVED, That the Board of Directors adopts the FY 2022 Capital Budget of \$2.61 billion and the FY 2022-2027 CIP of \$13.63 billion as summarized in Attachment G; and be it further

RESOLVED, That the Board of Directors approves the use of FTA grant and local matching funds in the amount of \$60 million for eligible preventive maintenance expenditures through the FY 2022 Capital Budget; and be it further

RESOLVED, That the Board of Directors has considered the use of the most recently FTA-approved Indirect Cost Rate and directs staff to apply an Indirect Cost Rate that does not exceed the FTA-approved departmental rates as described in Attachment H to projects funded by jurisdictional capital contributions in the FY 2022 Capital Budget; and be it further

RESOLVED, That the Board of Directors authorizes the General Manager and Chief Executive Officer to reprogram up to \$17 million in capital funding to support operating revenue losses caused by service disruptions associated with major capital projects with any unused capital funds returned to the FY 2022 capital budget; and be it further

RESOLVED, That the Board of Directors has reviewed the WMATA Debt Management Policy as described in and attached to Resolution 2020-04 (Attachment I) and approves its use for FY 2022; and be it further

RESOLVED, That \$72.17 million of debt service payments resulting from the issuance of Series 2017A, 2017B, and 2018 bonds are due from and allocated to the participating jurisdictions as set forth in Attachment D; and be it further

RESOLVED, That in order to implement the FY 2022 Capital Budget or the FY 2022 Operating Budget, the General Manager and Chief Executive Officer, the Executive Vice President and Chief Financial Officer, or their designees are authorized to: (1) file and execute grant applications and accept grants on behalf of WMATA for funds from the federal government and any other public or private entity regardless of whether a local match is required without further Board action, so long as the acceptance of such grant does not result in the increase in expenditures above the approved FY 2022-2027 CIP or the approved FY 2022 Operating Budget; (2) conduct public hearings at any time during FY 2022 in furtherance of the implementation of the FY 2022-2027 CIP; and (3) execute and file the annual FTA Certifications and Assurances as a prerequisite to the submission of federal grant applications; and be it further

RESOLVED, That the Board of Directors acknowledges that, in accordance with the terms of the Capital Funding Agreement (CFA), if any projects are started during the term of the CFA or any bonds or other financial instruments are issued pursuant to the CFA, the Contributing Jurisdictions have agreed to continue to make their Allocated Contributions for those projects or debt service until the conclusion of the projects or the final maturity of the bonds or other financial instruments; and be it finally

RESOLVED, That to allow staff to timely apply for the coming fiscal year's grants, this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

Introduction

As public engagement began for Metro's Fiscal Year 2022 budget, the Authority faced a significant budget shortfall due to low ridership caused by the Covid-19 pandemic.

While federal funding had sustained Metro through the first year of the pandemic, a significant budget gap was identified for the Fiscal Year set to begin on July 1, 2021. Because the WMATA Compact requires the Board of Directors to adopt a balanced budget for the coming fiscal year by June 30, Metro moved forward with collecting public feedback on an FY22 budget that considered drastic service cuts and workforce reductions beginning in January 2022 if additional federal funding was not received.

Knowing that public feedback would be vital in helping Metro's Board of Directors and management make decisions about pandemic recovery, Metro staff launched a robust communications and outreach effort to ensure the public received thorough and timely information about proposed changes and had multiple ways to submit feedback. As a result, more than 22,400 individuals and organizations provided feedback on the FY22 budget during the public comment period, which spanned from February 20 – March 16, 2021.

Thanks to the efforts of Metro's Board of Directors and the region's Congressional delegation, Metro received word on March 10, 2021 that federal relief was on the way as part of the American Rescue Plan. Despite anticipated changes, Metro staff completed the public outreach effort to provide the Board with feedback that would be valuable in the decision-making process for this budget and future pandemic recovery efforts.

The additional federal relief will allow Metro to avert many, if not all, of the proposed service reductions and layoffs presented to the public during this outreach period. A revised FY22 budget reflecting the additional federal funding will be considered by the Board of Directors in April 2021; however, additional public outreach around the revised budget is not required.

Details about the proposed service changes can be found in the FY22 Budget Staff Report, as well as in WMATA Docket B21-01, which is posted online at wmata.com/budget.

The following report includes an overview of the communications and outreach efforts, as well as a summary of the public feedback received.

Communications and outreach overview

Public feedback is vital in helping Metro’s Board of Directors and management make decisions about pandemic recovery.

The communications and outreach effort was designed to encourage public feedback on the proposed systemwide service changes, as well as to fulfill the Board-approved Public Participation Plan and Metro Compact. Communications and outreach tactics were planned to ensure that customers and community members – especially those from low-income, minority and Limited English Proficient (LEP) populations – received high-quality information, communication and feedback opportunities.

With many customers no longer regularly using the system, the FY22 budget communications and outreach effort required more extensive and creative tactics than in previous years. In addition to region-wide communication efforts, special attention was paid to soliciting feedback from customers who were still riding during the pandemic. A demographic overview of the impacted customers can be viewed in the Title VI equity analysis report.

Many of the communications and outreach tactics occurred during the official public comment period timeframe, Saturday, February 20 through Tuesday, March 16, 2021.

The final communications and outreach plan included the following efforts:

- **Stakeholder engagement**
- **Targeted marketing and media**
- **In-person outreach**
- **Virtual Compact Public Hearings**

Communications and outreach goals were established to ensure that Metro provided open and transparent communications that led to public understanding of:

- What the proposed changes were
- When the changes could go into effect
- Why proposed changes were necessary
- How the public could comment on the proposed changes

Feedback was collected through the following sources during the public comment period:

- **Online and phone surveys**
- **Oral testimony and recorded messages received at the Virtual Public Hearings**
- **Written comments received online and by the Board Secretary’s Office**

A summary of the more than 22,400 comments received can be found in the Public Input Results section at the end of this document.

Stakeholder engagement

Stakeholders were key to helping Metro spread the word about the FY22 budget, and their support allowed the Authority to collect as much feedback as possible from a wide variety of individuals across the region.

A comprehensive outreach effort was made to inform and connect with elected officials, jurisdictional partner staff, business leaders, transit advocates and Community Based Organizations (CBOs). New tactics, including virtual information sessions and a “communications toolkit,” were implemented this year to make sure stakeholders had the information they needed.

VIRTUAL INFORMATION SESSIONS

Metro hosted four virtual information sessions to provide budget briefings to elected officials, jurisdictional partner staff, and leaders from Business Improvement Districts (BIDs), Advisory Neighborhood Commissions (ANCs) and CBOs.

The virtual information sessions were designed as “train the trainer” events to bring attendees up to speed on the budget proposals impacting their local communities and the overall service area, and enlist their help soliciting feedback from their constituents and communities. More than 100 individuals participated in the online events, with more than 30 questions and comments submitted.

STAKEHOLDER EMAILS

Over 3,900 individuals – including elected officials, jurisdictional staff, CBOs, community partners, places of worship, event venues, business improvement districts, apartment and residences, schools, shopping areas, social service organizations and more – received email communications from Metro to inform them about FY22 budget and proposed service changes.

The first email communications were sent on February 8 to inform stakeholders of the budget situation and provide a look-ahead timeline of key milestones, including when and how the public could provide feedback.

Following the initial email, a follow-up communication was sent to stakeholders on February 22 to remind them that the public comment period had opened and encourage them to share the information via their channels. Additionally, Metro staff followed up by answering emails and phone calls from stakeholders.

COMMUNICATIONS TOOLKIT

As part of the stakeholder emails mentioned above, stakeholders received a “toolkit” containing budget information designed to be shared with their constituents and communities, including messaging, maps, graphics and customer information flyers in multiple languages.

Metro also provided sample social media posts encouraging the public to comment on the budget. These posts were designed as cut-and-paste solutions that regional partners could easily share through their social media channels (i.e., Twitter, Facebook and Instagram) to encourage people to share their thoughts on the proposals. **The link to the social media graphics was accessed more than 800 times by stakeholders.**

Several jurisdictional partners shared the messaging from the communications toolkit on their social media channels.

ELECTED OFFICIAL AND JURISDICTIONAL PARTNER OUTREACH

District of Columbia

Update emails were provided to various District officials, and the communications toolkit was provided to the Executive Office of the Mayor community outreach specialists who serve all eight wards. Information was also provided to the DC Main Streets Program to share with the local business community. Further, Metro staff responded to numerous emails and calls from stakeholders, including Advisory Neighborhood Commissions (ANCs) and Councilmembers, about the budget and process for submitting comments on the proposals.

Maryland

Budget update emails and the communications toolkit were provided to state, local and municipal officials. Additionally, General Manager/CEO Paul Wiedefeld provided a briefing on the FY22 budget to the Prince George's County Council and participated in the annual budget process for the Maryland General Assembly.

Virginia

Budget update emails and the communications toolkit were provided to state and local officials, community and business stakeholders and various transportation groups. General Manager/CEO Paul Wiedefeld gave a presentation about the FY22 budget to the Northern Virginia Transportation Commission (NVTC). Metro staff also provided updates to various groups including the NVTC, Tysons Partnership, Transportation Association of Greater Springfield (TAGS) and Fairfax Hunter Mill Transportation Advisory Council.

COMMITTEE BRIEFINGS AND MEETINGS

The **Riders Advisory Council (RAC)** received briefings on the FY22 budget situation and public comment period at its December 2020, and January and March 2021 meetings. The **Accessibility Advisory Committee (AAC)** received regular updates and throughout the budget process, including briefings at its December 2020 and March 2021 meetings. Additionally, the **Joint Coordinating Committee (JCC)**, comprised of staff from regional jurisdictions, participated in multiple meetings to discuss the budget proposals with Metro staff.

EMPLOYEE COMMUNICATIONS

Metro employees are important stakeholders and brand ambassadors, and numerous efforts were made to ensure they were informed about the Authority's FY22 budget and encouraged to participate in the feedback process. Regular email updates about Metro's FY22 budget were sent from the General Manager to keep employees informed about the funding situation, proposed service changes and federal relief efforts. In total, five emails about the budget were sent to employees between November 2020 and March 2021.

Employee message from Metro Employee News email.

In addition to email communications, several *Metro Voices* Facebook Live events were held, and the *Metro Voices* podcast released two episodes that focused on the budget. Information about the proposed

budget was also included in Metrorail, Metrobus and Grounds Maintenance & Custodial Services “hot sheet” newsletters.

General Manager/CEO Paul J. Wiedefeld joined the Metro Voices podcast several times to provide employees with periodic updates on the budget situation.

Targeted marketing and media

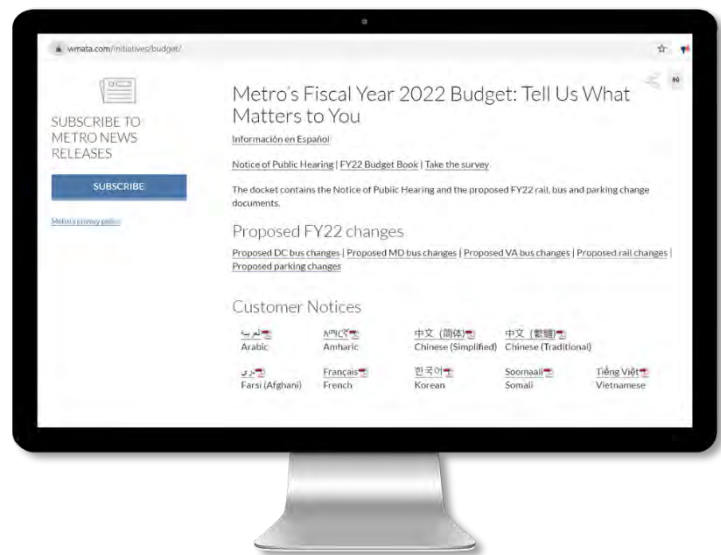

Metro used targeted marketing and media strategies to increase awareness and encourage feedback on the proposed budget.

WEBSITE

The budget webpage (wmata.com/budget) served as the main clearinghouse for information on the budget proposal and opportunities for submitting comments. The landing page provided an overview of Metro's budget situation, as well as the various service proposals under consideration. The page was fully translated into Spanish, and customer information notices were posted on the site in nine additional languages: Amharic, Arabic, Chinese (Simplified and Traditional), English, Farsi, French, Korean, Somali and Vietnamese.

A variety of content was available for the public to review, including the FY22 Budget Book, detailed maps of proposed bus and rail service changes and the notice of public hearing. The website also was the primary channel for submitting feedback, and customers could access the online survey in English and Spanish, as well as submit written comments and upload letters. All four Virtual Public Hearings were streamed live on wmata.com/budget, as well as on Metro's YouTube page.

During the public comment period, wmata.com/budget received over 30,100 views and 26,000 individual visitors. The average time spent by a viewer on the page was just under five minutes. Half of the viewers accessed the site from their desktop computers, and the other half accessed the site from their mobile devices.

The budget webpage featured links to customer brochures in multiple languages.

SURVEY TOOL

The survey tool, which was available in English and Spanish via wmata.com/budget, provided members of the public a way to provide feedback by answering the survey questions, submit open-ended comments or upload documents. A call-in survey option was also offered for the first time to increase participation from individuals who required additional help or did not have access to a computer. Individuals could call in to

A screenshot of the Metro's 2022 Budget survey tool. The page has a white background with a blue header containing the Metro logo and the title 'Metro's 2022 Budget'. The main content area explains the need for additional funding due to the decline in ridership during the COVID-19 pandemic. It then asks for user input and provides three options for how to provide feedback: 'Take a survey and provide comments (preferred)', 'Provide written comments only', and 'Upload a document only'. Each option is preceded by a radio button.

The survey tool offered respondents several ways to submit feedback online.

take the survey or provide comments, with language support provided in Arabic, Amharic, Chinese (Mandarin, Cantonese), Farsi, Korean, Somali, Spanish and Vietnamese.

In total, nearly 21,900 surveys were received. Over 21,800 of those surveys were received via wmata.com/budget, and over 90 surveys were completed via phone. More than 275 surveys were completed in Spanish and none in other languages. **A full report on the comments received through the survey tool is available in Appendix B.**

DIGITAL AND PRINT COMMUNICATIONS

A mix of paid advertising and earned media was used to spread the word about the budget and public comment opportunities. Metro distributed a press release marking the start of the public comment period and used its Twitter, Instagram, Facebook and Nextdoor accounts to promote public comment opportunities.

SOCIAL MEDIA

Because many customers were no longer riding the system, Metro leveraged its social media channels to amplify budget messaging and reach customers in their homes through a variety of posts. In total, social media posts resulted in more than 670,000 impressions and more than 2,900 engagements (likes, comments, shares) across all platforms. In addition to organic social media posts, paid Facebook advertisements promoting the Public Hearings were run in English and Spanish.

SOCIAL MEDIA EXAMPLES

DIGITAL ADVERTISING

Targeted English and Spanish-language advertisements were placed so app users would receive advertisements on their smartphones and mobile devices directing them to wmata.com/budget. Additionally, ads were run on Pandora radio and Extravision (Spanish-language digital radio). Push notifications were also sent via the Transit app, which is known to have high Spanish language usage. **More than 780 respondents took the budget survey because of the Transit app notifications, with 26% of those surveys completed in Spanish.**

| Media | Language | Run Dates | Details |
|--|---------------------|-------------------|---|
| Pandora (Digital radio ads) | English | 2/27 – 3/16/21 | <ul style="list-style-type: none"> Total impressions: 660,458 Reach: 270,065 <i>English:</i> Total impressions: 440,403 Reach: 196,784 <i>Spanish:</i> Total impressions: 220,055 Reach: 63,832 While not an objective for streaming audio, both the minority and Spanish-speaking audiences saw a slightly higher click-through rate Delivery was evenly split across all audience targeting |

女孩公開發帖微笑回應霸凌

「這不應該發生在任何人身上 如果你看到一些事情發生 卻不出聲反對 你同樣有罪」

一名十歲女孩在社交媒體上被霸凌，她公開發帖微笑回應。她說：「這不應該發生在任何人身上。如果你看到一些事情發生，卻不出聲反對，你同樣有罪。」

這名女孩名叫諾拉·泰勒（Nora Taylor），現年十歲，住在加利福尼亞州。她最近被一名年長女孩在社交媒體上霸凌，諾拉在網上發帖回應，表示她不會被嚇倒，並呼籲其他孩子團結起來，共同抵制霸凌。

諾拉的帖子在網上引起了廣泛關注，許多人都為她的勇氣和成熟感到欽佩。她的父母表示，他們對女兒的處理方式感到自豪，並感謝她勇敢站出來。

專家表示，兒童霸凌是一個嚴重的問題，需要家長、學校和社會共同努力來解決。諾拉的故事為其他孩子提供了一個積極的榜樣，告訴他們在面對困難時要保持冷靜和勇敢。

跟川普做鄰居要多少錢 海湖莊園旁一豪宅開賣

位於海湖莊園（Mar-a-Lago）旁的一棟豪宅，目前正以 1.2 億美元的價格開賣。這棟豪宅擁有 10 多間臥室，裝修豪華，環境優美，是許多名流和富豪的住所。

這棟豪宅位於海湖莊園的後方，佔地 10 英畝，擁有私人海灘和游泳池。豪宅內部裝修極其豪華，包括大理石地板、水晶吊燈和名畫收藏。此外，還設有健身房、桑拿房和私人影院。

據悉，這棟豪宅的買家是一位來自亞洲的富豪。這棟豪宅的開賣也反映了海湖莊園作為一個高檔度假勝地的地位。

Information about Metro's budget proposal in the Epoch Times.

DIRECT MAILING

A letter about the budget survey was mailed to approximately 20,000 residents in targeted zip codes throughout the region to encourage low-income and minority participation. The letter was sent in English and Spanish and had statements in multiple languages providing information about how participants could take the survey in their language.

- 10,000 mailings were sent to Southeast DC (Wards 7 and 8; zip codes 20020, 20032 and 20019).
- 10,000 mailings were sent to 71 census tracts across the WMATA compact area in DC, MD, and VA with high incidence rates of Title VI and ADA populations.
- **More than 550 respondents accessed the survey via the link in the letter and 410 respondents completed the survey.**

PRINT AND DIGITAL SIGN POSTINGS

Information was posted in English and Spanish throughout the system to communicate the budget situation and encourage feedback from customers regionwide.

- Signs were posted in the mezzanines at all 91 Metrorail stations.
- Digital screens throughout the Metrorail system displayed information about the budget, including information display screens at all station manager kiosks, digital advertising screens, and new digital passenger information screens in mezzanines and on platforms at selected stations.
- Signs were posted in the bus information centers onboard Metrobuses.
- Approximately 700 signs were posted at the top ridership bus stops of Metrobus routes that were proposed to be eliminated.
- Signs were posted onboard MetroAccess vehicles.

Signs were posted throughout the system, including on digital passenger information screens (left), at bus stops with high ridership levels (middle) and in station mezzanines (right).

MEDIA RELATIONS

To highlight the significance of the FY22 budget proposal, Metro relied on traditional media relations tactics, such as press releases, to generate earned media coverage to reach a region-wide audience.

In-person outreach

An extensive in-person outreach effort was deployed due to the scope of the proposed changes and the importance of reaching customers who were still riding the system during the pandemic.

Multilingual street teams conducted Covid-safe outreach activities at all 91 Metrorail stations as well as at impacted bus stops between Tuesday, February 23, and Thursday, March 4. The teams worked 5-hour shifts covering either the morning or evening rush hours and were at the stations on Tuesdays, Wednesdays and Thursdays, which remain the highest ridership days. Additionally, street teams were stationed at bus stops with higher rail-to-bus transfers and high numbers of low-income, minority and limited English proficient customers.

Street team staff were equipped with their recognizable yellow Metro-branded aprons, and bilingual staff wore large pins that identified the languages they spoke. At a minimum, half of all street teams featured fluent Spanish speakers, and some teams also had staff fluent in American Sign Language, Amharic, Chinese, French Korean and Vietnamese.

To ensure that outreach was conducted safely for street team staff and customers, street team members wore masks and maintained social distancing when interacting with customers. Street teams were equipped with Outreach Information Booths, including large signs and handheld information sheets to communicate information to customers from a distance. Customers who felt comfortable approaching the booths could choose to take brochures as well as use tablets to complete surveys on-site.

In total, street teams spoke with over 43,000 customers and handed out more than 37,000 brochures. Nearly one in five customer interactions were in languages other than English. 17% of all interactions were in Spanish, followed by Amharic (0.3%), Korean (0.1%), Mandarin (<0.1%) and French (<0.1%). More information can be found in Appendix C: Additional in-person outreach details.

Street teams were stationed at Outreach Information Booths featuring handheld signs, brochures and tablets for customers to take the survey.

STREET TEAM CUSTOMER ENGAGEMENTS – TOP 10 STATIONS (2/23 – 3/4/21)

STREET TEAM NON-ENGLISH LANGUAGE ENGAGEMENTS (2/23 – 3/4/21)

Virtual Compact Public Hearings

Because of the ongoing pandemic, all Compact Public Hearings were held virtually. A new virtual platform was used to streamline the process, ensure accessibility and make participation easier for the public.

The public had multiple options to watch and listen to the hearings live at wmata.com/budget, youtube.com/MetroForward, or by calling a toll-free number. Those who wished to submit oral testimony had the option to call in and be placed in a queue or leave a recorded message.

In total, the hearings had 1,123 views and 225 audio-only listeners, with 111 public speakers and recorded audio submissions.

The virtual Public Hearings were hosted by members of Metro's Board of Directors.

A prerecorded overview video was created in English and Spanish and available on the budget webpage one week before the first hearing. This provided an interactive way for viewers to learn about the budget situation before the hearings.

The FY22 budget overview video was available in English and Spanish.

PUBLIC HEARING DETAILS

All Public Hearings were open to the public, and three of the hearings were focused on impacts to specific jurisdictions.

| Event Details | Public Hearing Speakers | Public Hearing Metro Board Member Representatives | Public Hearing Metro Executive Representatives |
|--|--|---|--|
| Public Hearing #634 Monday, March 8 (11 a.m.) View archive of meeting here. | 17 10 speakers 7 recorded messages | Paul Smedberg | Jennifer Ellison |
| Public Hearing #635 DC focus Monday, March 8 (6 p.m.) View archive of meeting here. | 44 33 speakers 11 recorded messages | Stephanie Gidigbi-Jenkins | Jennifer Ellison |
| Public Hearing #636 Maryland focus Tuesday, March 9 (6 p.m.) View archive of meeting here. | 33 22 speakers 11 recorded messages | Michael Goldman | Jennifer Ellison |
| Public Hearing #637 Virginia focus Wednesday, March 10 (6 p.m.) View archive of meeting here. | 17 12 speakers 5 recorded messages | Paul Smedberg and Walter Alcorn | Jennifer Ellison |

Public input results

Metro collected public input during the public comment period through online and phone surveys, written comments (uploaded through the survey tool or letters sent to the Board Secretary's Office) and oral testimony at the virtual Public Hearings. The public comment period was open for more than three weeks, from Saturday, February 20 through 5 p.m. Tuesday, March 16, 2021. **In total, Metro received over 22,400 responses to the proposed budget.**

More than 97% of the input received came in using the survey tool. Analysis of public input collected through responses to survey questions can be found in Appendix B: FY2022 budget – customer feedback on proposals. Another 2% of the input received was written comment, with the majority being provided through the survey tool via the upload or “provide written comment only” choice. Written comments and oral testimony can be reviewed in Appendix A: Written comments and oral testimony.

APPENDIX A:

Written Comments and Oral Testimony

FISCAL YEAR 2022 BUDGET

Public Outreach and Input Report

Docket B21-01

Appendix A: Written comments and oral testimony

This appendix includes the written comments and testimony received during the public comment period, either through the online survey tool, letters to the Board Secretary's Office or transcripts from oral testimony submitted at the Public Hearings.

Pages 3-84: 111 individuals provided comments at the virtual Public Hearings. To listen and watch the oral testimony from the virtual Public Hearings, visit Metro's YouTube channel at youtube.com/MetroForward.

Pages 85-371: 414 written comments were received through the survey tool via the upload or the "Provide written comments only" choice.

Pages 372-1746: 21,808 comments received on individual proposals through the survey tool. Translations for comments provided in Spanish are provided at the end of each section.

- o Pages 372-407: Comments on proposed 2021 Metrobus service changes
- o Pages 408-482: Comments on proposed 2021 Metrobus service changes
- o Pages 483-902: Comments on proposal to close 22 Metrorail stations
- o Pages 903-1171: Comments on proposal to operate Metrorail every 30 minutes
- o Pages 1172-1414: Comments on proposal to close Metrorail at 9 p.m. instead of 11 p.m.
- o Pages 1415-1520: Comments on proposal to adjust where Red Line trains begin/end (turnbacks)
- o Pages 1521-1620: Comments on proposal to adjust where Red Line trains begin/end (turnbacks) with station closures
- o Pages 1621-1692: Comments on proposal to adjust where Yellow Line trains begin/end (turnbacks)
- o Pages 1693-1746: Comments on proposal to adjust where Yellow Line trains begin/end (turnbacks) with station closures

Metro Hearing No. 634
Monday, March 8, 2021 – 11 a.m.

MR. SMEDBERG: Good morning, everyone, and welcome to the Metro Board of Directors' Fiscal Year 2022 public hearing. I'm Metro Board Member Paul Smedberg and I represent the Commonwealth of Virginia. Also joining me today is Thomas Bulger, who represents the District of Columbia on the Board. Welcome to the first of our four virtual public hearings on Metro's Proposed Fiscal Year 2022 budget. This hearing is convened by the Metro Board of Directors to gather public comments on two dockets: First, Docket 21-01, on Metro's Proposed Fiscal Year 2022 through 2027 Capital Improvement Program, and Strategic Plan, and second, Docket B21-02 on Metro's Proposed Fiscal Year 2022 Operating Budget and related service and fare proposals and changes to parking rates at some of Prince George's County's stations. Notice of this hearing was made, was made by publication in the Washington Post and ads were placed in the Afro, Aref, Doi Nay, El Tiempo, Latino, the Epoch Times, the Iran Times, the Korean Times, the Washington Hispanic, as well as through social media and radio. And signs were placed in all Metro rail stations, on buses, MetroAccess vehicles and Metro bus information centers, and over 300 bus stops.

Since we're doing this hearing virtually, the hearing is going to look and feel a little different than it has in the past, with the in-person hearings. We would normally have a presentation from our chief financial Officer, but in order to get right to your comments and testimony, we have instead posted a video at wmata.com/budget, Again, wmata.com/budget, that provides an overview of this year's proposed budget. In short, Metro will be able to maintain operations and increase service to meet demand through December, 2021, but without additional federal funding we project that we will need to significantly reduce service beginning in January 2022, to close a \$210 million budget gap. Details about the proposed service reductions can be found again at the WMATA website at wmata.com/budget.

Those of you wishing provide testimony should call (512) 580-8850. (512) 580-8850. After calling in, you will need to enter a four-digit meeting code. This morning's meeting code is 9-4-7-6. Again, the code for the meeting once you call in to the number is 9-4-7-6. Once you're in the meeting, you will be able to listen over the phone by pressing star one. If you would like to provide testimony, you can press star three and you will be put in the speakers' queue. You'll be able to message, or you will get a message when it's your turn to speak. Again, to enter and just listen in, it's star one. And if you would like to provide testimony or comments, press star three. If you're watching the live hearing on a different device, please make sure you mute the device so that there is not any feedback. You will be able to listen to the hearing while you wait in the phone queue.

If you would like to provide oral testimony, but we're unable to wait until you come up in the queue, you can press star two to leave a voicemail. Your voicemail will be transmitted or, transcribed, and included in the budget hearing record. In order for the public record to accurately reflect who's providing testimony, I ask that you please state your name and any organization you represent, before beginning your testimony.

Elected public officials will be allowed five minutes and everyone else will be allowed three minutes each. Extra time will be given for translation, if needed. We ask that you stay within your three-minute limit because we want to make sure everyone who wants to speak has a chance to do so. I also want to note that each speaker is only able to speak once at each hearing, while you

may have the option to rejoin the speakers' queue, please note that we cannot accept additional testimony at this hearing.

I want to take a moment to recognize that this is where we listen to you. The board is very much interested in hearing your comments. This is your opportunity to comment on the proposals and we are here to listen. We will not be able to answer questions during your testimony. Before you begin your remarks, again, we ask that you please state your name and any organization you represent.

Please note that all statements, including any personal information, such as name, email address, address, or phone number you provide in the statement are releasable to the public upon request and maybe posted on WMATA's website without change, including any personal information provided. Further testimony may be submitted and must be received by 5:00 PM on Tuesday, March 16th. Again, we must receive your testimony, if you submit in writing by 5:00 PM on Tuesday, March 16th. Testimony can be provided online, again at wmata.com/budget. Online, you have the option to complete a survey, write free-form comments, upload a letter, petition or other documents.

You can also mail testimony to the Office of the Secretary, WMATA 600 5th Street, Northwest Washington, DC, 20001. Again, Office of the Secretary WMATA, 600 5th Street, Northwest, Washington, DC one, or I'm sorry, 20001. Again, all testimony must be received by 5:00 PM on March 16th. Due to the pandemic and the slowdown in mail service, we encourage everyone to submit comments online, if possible, of course. Your comments will become part of the public record and will be reviewed by the Metro Board of Directors. Changes to the options presented here today may be proposed, may be proposed in response to testimony received and subsequent staff analysis.

And now it's time to take our first call. Our first call is caller 8-1-5-1. Welcome. The caller ending, last four digits of your phone 8-1-5-1. Okay, we can come back to that please, Eleanor.

Okay, our next caller in the queue. Our next caller in the queue last four digits, 2-4-0-3. Welcome.

MR. PEDOWITZ: Good morning, thank you, Mr. Chair and Members of the Board. I am Scott Pedowitz, the Government Affairs Director at the Arlington County Chamber of Commerce. The Chamber encourages WMATA not to follow through with the proposed service reductions starting in January 2022. The pace of vaccination continues to increase, and we anticipate similar increases in returning to the workplace. According to a survey by the Greater Washington Partnership, three-quarters of the workforce expect to be back in the workplace by year-end. Sharply reducing transit service to levels seen after last year's initial shutdown risks curtailing this recovery just as it gains momentum. Moreover, the proposed cuts will fall most heavily on those who can least absorb them. Many in our service workforce have jobs that run past nine in the evening, rely on buses for all or part of their commute, or both. Closing Metrorail at 9 o'clock p.m. and halving Metrobus service will burden these riders disproportionately and inequitably. We appreciate the financial challenges facing WMATA, but cutting off transit services to balance the budget could cut off the very recovery that will restore WMATA's revenues to a healthy level. We thus encourage the Board to reconsider this proposal. Thank you.

MR. SMEDBERG: Thank you. Is caller 8-1-5-1 – are you with us? OK, Eleanor, the next caller in the queue? Our next speaker is 9-5-1-9.

MS. MEYERS: Hello? Yes, my name is Gloria Meyers and I live at 6th and Edgewood, a huge apartment complex and reducing the service of, of the D as in David 8 bus line is really detrimental to a lot of people that's here. That's the Washington Hospital Center bus. That takes most of the seniors straight to the hospital and also takes us to Union Station and various shopping areas. Taking that bus line away really would hinder transportation for the elderly. I'm hoping that you can keep the bus line, the D8 like D in David and continue to run along Edgewood corridor, from, uh, Edgewood to Washington Hospital center or to union station. Thank you so much for hearing me.

MR. SMEDBERG: Thanks. Thank you, Ms. Meyers. Appreciate that. All right. We'll try caller 8-1-5-1 again. Are you with us?

MR. ZLOTH Yes, sir. Hi, my name is William. I live in Fairfax County and my common is somewhat general.

MR. SMEDBERG: William, what's your last name?

MR. ZLOTH: It's Zloth. Z-L-O-T-H. I live at the Dunn Loring Metro and I've taken Metro a lot since I've moved here within the last 10 years. And one thing I don't, I don't, I'm disappointed that the Metro Board doesn't seem to really take large steps to get rid of the waste and everything with Metro. I think if they did that, they wouldn't have any cutbacks. Let me give it a good example: over the past number of years, I see frequent cheating, people not paying their fares at every station. Some stations I go to the station, people is walking through the gate, like they do it routinely. I mentioned this to the station people. And one suggestion I would have to deal with that and to get more revenue is to have the Metro Police more prevalent at the stations. I see Metro Police driving around in big, expensive SUVs all over where I live and I don't understand why they're driving around and those big vehicles that cost Metro a lot. Instead if they were at the stations, they could cut back more on the fare evasion.

Um, and I've also heard from people who work in Metro, this is just hearsay, that many of the people who work there, um, sleep on the job, this and that, and they don't do their job. I will say the bus drivers and the operators do a really good job. So, they do really good, but a lot of other people, there's a lot of waste. And in addition to the fare evasion, my station, Dunn Loring, was closed all summer. And during the summer, every 10 minutes, there was a gigantic bus tour bus with one or two people on it, probably 200 seats, every 10 minutes, driving up and back from Dunn Loring, that was a complete waste of money. So my general, just to sum up what I'm saying, I think if Metro has more, but dealt more with these issues, they would not need, they would not be at such a financial crisis. So that's pretty much it.

MR. SMEDBERG: Okay. Thank you Mr. Zloth. Eleanor, our next caller. Is there anyone else in the queue? Okay. Color 7-4-4-7. Welcome. Okay, that person appeared to drop. Eleanor the next caller in the queue? Okay. Our next caller is 4-2-0-1. Caller 4-2-0-1. Welcome.

MR. GARSON: Hello, I don't understand why you want to cut back so much service on the Red Line.

MR. SMEDBERG: Sir, sorry, we didn't hear your name please. For the record.

MR. GARSON: My name is Jerry Garson. I'm speaking on behalf of the Red Line. I do not quite understand why you're trying to have a 30-minute headway on everything, basically north of

Medical Center and north of Silver Spring. You have a significant number of parking lots such as at White Flint, at Rockville, at Shady Grove and at Twinbrook, and if you're going to have the trains run only every half hour at these locations, it makes no sense. It also makes no sense why you're trying to, uh, only have the trains turn around at Grosvenor-Strathmore, but yet you can't even get on and off the train. In the past before COVID-19 a huge number of people used to park at Grosvenor-Strathmore when you did the turnarounds and basically fill up the parking lot that on many days you could not even get a parking spot. If you're looking to get rid of almost all revenue from all your parking lots, this makes sense. Sounds like you're trying to basically get rid of the entire transit system and bus system from all these changes that you're proposing. 30-minute headways are not really mass transit, they're just an occasional transit. They're more like the MARC rail system. And I hope you don't consider making all these drastic changes. Thank you.

MR. SMEDBERG: Okay. Thank you, Mr. Garson. We'll try caller, 7-4-4-7. Are you with us? Okay, Eleanor, our next call.

MR. KAFFEN: Hello. Can you hear me my name? Yes. My name is Steve Kaffen, and I've been a DC resident for about 18 years. I'm a member of the Accessibility Advisory Committee and the Bus/Rail subcommittee of WMATA, and also served on the Bus Transformation project. However, the comments are my own and I'm going to summarize what I have and then I'll submit comments by the end of the week.

My comments envision funding to support the restoration of service. However, the first two comments, uh, can be implemented now without, without any, additional funding. And the first one is to restore bus number 42, which runs along Connecticut Avenue, to its normal frequency. This was substantially reduced in August, by about 50%, and riders are now waiting up to 30 minutes for the bus, at Dupont Circle. This is an area that probably has the largest concentration of seniors, and of course, embassy employees who use the bus and persons with disabilities that use the elevator, which is right next to the bus stop at Dupont Circle north. It's also the major connection point for people transferring from bus to rail and as commutation increases, it's going to be increasingly important that the 42, has adequate service.

The second is to restore weekend service on bus G2. This was cut in August. Bus G2 down P Street serves, uh, the Jewish community center, several of the churches there, Scientology and the Carnegie Institution, and these will be opening soon. And, that bus line has a, has a busy weekend contingent of people using those facilities. And it should be increased; the weekend service should be restored.

Another thing I'd like for us, for you to consider is to redesign the digital displays in the bus kiosks to have more lines and double the speed. Of course, funding has to be, you know, has to come, but these currently just have two lines and they move very slowly for the people who need to rely upon them to find out their next bus status. Additionally, at Dupont Circle, there are presently several out of town buses that actually block the entrance into the Circle. And, also the lights need to be recalibrated if that could be worked on between, between WMATA and DDOT, I think the traffic flow would be substantially increased, especially for the buses that go through the Circle as well as the traffic. Thank you very much. Thanks for listening.

MR. SMEDBERG: Thanks, Steve. Mr. Bulger is on the line, so I'm sure he can take that to the District.

MR. BULGER: I got it.

MR. KAFFEN: OK. Thanks very much.

MR. SMEDBERG: Okay, just checking here just to make sure, Eleanor, do we have any other callers? (Pause) Okay, we do not have any other callers at this time. So, I want to thank you. I'm told there are no other speakers in the queue. I'm going to give one last call for testimony. If you haven't already spoken and you would like to do so, please press star three on your phone to be put in the speakers' queue. We'll wait 30 seconds here. And while we're waiting, on behalf of Mr. Bulger and myself, I want to thank everyone for participating here today, whether they spoke or simply listened, it's very much appreciated. We do take these comments, like we said earlier, very seriously, so I appreciate your time very much.

Okay, it looks like we have another caller. Caller 3-6-3-3. Welcome. Caller 3-6-3-3, three. (Pause) Okay, Eleanor, I know we have a few others that joined. Who's up next after that? Okay, caller 4-2-0-1. Are you with us? Caller 4-2-0-1? Okay, next in the queue, Eleanor? Who is this?

MS. MORRIS: Hello. Hi. Hello. Can you hear me?

MR. SMEDBERG: I can.

MS. MORRIS: Well, my name is Patricia Morris. I live in North Bethesda, Maryland at the Stony Brook townhouse complex at Tuckerman and Rockville Pike. Our townhouse complex has about 125 houses. We're bordering the Parkside apartment complex, which I don't know how many apartments, but it's a huge, sort of garden apartment complex all within 5-10 minutes' walking distance of the Grosvenor Metro station. There are at least five other apartment complexes within 10 to 15-minute walk of the Metro station. Our station is proposed to be closed for this, during this fiscal year, which I thought begins on July 21st, 2021. I don't know if I'm confused on that. I hear some people saying that these changes are going to take place in January. I thought I read on your site that it was starting this July. The ridership at Grosvenor Metro is higher than at least 15 stations, which are not being proposed to be closed.

As I said, because of all the walking traffic, and we have the huge parking lot. Also, the Strathmore Music Center is here, a five-minute walk from the Grosvenor Metro center. And as the pandemic winds down, and there are more concerts, I'm sure that that kind of, Metro ridership is also going to be increasing to come back to concerts here at the Strathmore Music Center. So, I'm very concerned about this and I know that many of my neighbors are also extremely concerned about this closure of our Metro station, which is a very important one on the Red Line. And it was already closed for a few months early in the pandemic and that affected people greatly. Thank you very much.

MR. SMEDBERG: Okay. Thank you, Ms. Morris. Appreciate your comments. Eleanor? Is there anyone else in the queue?

MR. POSNER: This is Philip Posner from Arlington, Virginia.

MR. SMEDBERG: Excuse me, sir, before you begin, could you state your name again, please?

MR. POSNER: Yes, Phillip Posner from Arlington Virginia.

MR. SMEDBERG: Oh, hey Phil.

MR. POSNER: Good morning. I tried to get in earlier, but they muted me. Anyway, good morning and wanted to thank you for maintaining the MetroAccess service area and the time during the current budget and hope that you're going to be able to continue that policy through the 2022 budget. I know that the draconian budgets like the one from 2021 is based on a worst-case scenario, for ridership and federal funding. And I hope that it will not be necessary to implement that based upon the current progress for transit funding and Congress and COVID vaccinations. If service reductions do become essential, I hope that safety and smart use of WMATA and jurisdictional bus and rail service redundancies will guide decisions so that transportation deserts will be avoided. There's also the hope that WMATA and the jurisdictions will find support from partners in the private and government sectors to help transport their essential workers and patients through potential WMATA service reductions.

MR. SMEDBERG: Phil, Phil, could I just have you stop for one second? There's someone on the line, could you put yourself on mute, please? OK, Phil, go ahead, I'm sorry about that. I apologize.

MR. POSNER: Oh, not to worry. Uh, I don't know where you stopped hearing, but basically it was to ask you to support, from partners in the private and government sectors, to help transport essential workers and patients during potential WMATA service reductions. And finally, just to continue the essential work that you're doing in funding for safety and accessibility projects such as the wayfinding project, the lighting project, and usable benches. And thank you so much for your time.

MR. SMEDBERG: Hey Phil, what are the last four digits of your phone number? I just want to make sure I'm capturing everyone.

MR. POSNER: 5-9-1-1. I was the first in the queue but didn't speak up because I was muted.

MR. SMEDBERG: And we're getting feedback from an interpretation machine if we could, uh, if staff could look at that and quiet that. Okay. Next, Eleanor who's next in the queue? Okay. Caller 4-2-0-1.

MS. THOMPSON: Yes, hello everyone. My name is Corietta Thompson and I'm calling to urge the WMATA Board to ensure that Metro still has enough funding to ensure that all the buses, the trains and the MetroAccess is still running. I'm a member of the National Federation of the Blind, and I'm representing the blind organization because I, too myself am blind. And I just think it's very crucial that we have all the services working and on time, because a lot of us live by ourselves and have multiple disabilities, and that's our main form of transportation. So that would really hurt a lot of populations who are disabled, who are elderly and just people in general that need to take the bus or train to the doctors, to work, to friends, to family, wherever they need to go. That's what they use is public transportation. I'm just urging the Board to keep in consideration of some of the special needs populations to ensure that they still have their form of transportation to still keep their independence. But you know, the less riders, the less, the more that's going to hurt the budget, I think. So, I'm just urging everyone to just keep in consideration some of the special needs populations and keeping the services running.

MR. SMEDBERG: Absolutely. All right. Thank you, Ms. Thompson. Appreciate those comments.

MS. THOMPSON: You're welcome.

MR. SMEDBERG: Eleanor, do we have other speakers? (Pause) Okay. We'll go back to speaker, 3-6-3-3. Are you with us? Again, the last four digits of your phone number 3-6-3-3. Okay, Eleanor, any others in the queue? Okay, we'll give it just another 20 seconds here, if anyone would like to make some comments...again, push star three on your phone.

MR. STOCKMAN: Hello?

MR. SMEDBERG: Yes. How are you? Is this 0-0-1-2?

MR. STOCKMAN: Yes, my name is Jake Stockman. I'm calling from the District of Columbia. The particular aspect of the plan that I find to be most objectionable is the service cuts after 9:00 PM. This is something that is going to disproportionately hurt workers in the city's restaurants and hospitality sectors. These are some of the sectors that have been hardest hit by the pandemic in the first place.

And these people, in many cases, don't have the flexibility to change their, their shifts to different times. They also tend to be lower income and disproportionately young people, people of color, and it's important that these people's needs are continued to be met. By cutting the transit hours down to 9:00 PM, it would effectively make anyone who's working dinner shifts, unable to access the network.

And another thing that, that worries me about that is that there could be an increase in drunk driving and more cars on the road when visibility is poor at night, creating unsafe conditions for pedestrians and other motorists. Thank you for your time.

MR. SMEDBERG: Mr. Stockman, are you speaking on your own behalf or are you with the organization?

Okay, Eleanor, do we have another speaker? Okay, speaker 0-6-3-4. Welcome. Okay, that just dropped. We'll give it another 10 seconds.

MS. FORD: Hi, my name is Jessica Ford. I'm a MetroAccess customer who uses regular Metrobus and Metrorail to get to my doctor's appointments and basically anywhere else I need to go because MetroAccess is so unreliable and costs so much more, with being on a limited budget. And the W14 is the only bus in my neighborhood. And if that gets taken away, I have no way of getting to Metro at all. And no way of getting to my doctor's appointments, no way of getting to any volunteering I'm doing, nothing. And if you take the bus away, they will also end up cutting the MetroAccess because you have to be within three-quarters of a mile of a Metrobus station or stop, with the way MetroAccess is currently, to have MetroAccess service. And I'm not just talking for myself personally, but other MetroAccess customers, I'm sure are in the same position with the other bus routes that are being looked at to being cut.

And I really need to be able to get to my doctor's appointments and, and everything. I mean, and eventually once I get my vaccine shot, I will start using Metro again, I mean, because Metro was my number one form of transportation. Yes, I have a few backups, but not many. So the 7H that's in Virginia is one of the buses, or 7M, whichever one it is, that you're all looking at cut is one of the ones to get to one of my doctors. So I would really appreciate it if you would not cut the buses. I mean, I understand you have financial reasons and everything, but the impact to the disabled community and regular commuters that use Metro to get to work all the time are going to be

significantly impacted if that happens, which is only going to decrease ridership on Metro, which is only going to make your financial situation worse. So, if you could please not take away the service, I would truly appreciate it. I'm just speaking for myself. As, like I said, a MetroAccess customer, but I also use Metrobus and Metrorail to get a ton of places.

MR. SMEDBERG: Okay, thank you, Ms. Ford. Appreciate that very much. And that was our last speaker. The hearing is now concluded. Testimony, again, can be submitted online or via U.S. mail as long as it is received by, you know, to Metro by 5:00 PM on Monday, March 16. Again, I want to thank everyone for joining us this morning and taking the time to provide your testimony and comments. Thank you very much.

Voicemails received as part of the hearing record:

Received 3/7/2021, 8:40 a.m.

Corietta Thompson. My comment is, I'm hoping that Metro is still able to contribute to providing services for the general public, especially the low-income populations and the disabled populations, because without transportation, we are totally isolated and that cuts our independence short.

Received 3/8/2021, 8:43 a.m.

Yes, my name is William. I live in Northern Virginia and I take the Metro, and one comment I have is that Metro does not seem to deal well with... I've noticed that there's a lot of cheating people that don't pay their fares and Metro stations. And Metro does not seem to have a modus operandi to deal with that. I see people walking through the gates, um, and they walk such that they know that nothing will happen or people double going out, you know, with a friend going out of the exit. So they, they double up. I see lots and lots of, lots of cheating. I've mentioned this to many attendants at the stations and gotten different answers. One suggestion would be to have Metro police at every station, or as much as possible.

And on the trains, I see a lot of stuff on the trains, people not wearing masks. I see people that look like they live in the train. They walk between the cars. If Metro wants people to resume going on, on the trains, they need to make sure that that's dealt with; people want to feel that it's hygienic to go with the train. So, I would recommend that the Metro police be more on the trains, more at the stations as much as possible. Unless... I see a lot of Metro police driving around these big, expensive vehicles, which probably cost Metro which seems not to be the effective use of the Metro police. The Metro police should be more on site, preventing people from cheating and also ensuring that there's nothing against protocol going on on the train. That'd be my suggestion, but Metro seems to not deal well with cheating, and they lose money that way.

I know that you know, that the fares people pay may not be the main source of Metro revenue, but nonetheless, it is part of it. And I think if people ride Metro and they see people cheating, that makes for, um, the type of thought, that's not good. People lose faith in Metro. That's a big suggestion. Again, Metro needs to deal with the cheating, um, for all the jurisdictions and have more onsite Metro police present at the stations, on the train, as much as possible. I know that you cannot have every police at all times and have the Metro police not be so much involved with, they seem to be driving around in big expensive vehicles. And I don't understand why that, um, that's done in a few of the situation I just mentioned.

In addition, Metro seems to have a problem with waste of money, which never seems to be dealt with. My station, Dunn Loring, Virginia probably was closed all summer long and the escalators still break down. So, I think waste of money.

In addition, another thing I noticed that during the closure of my station, Dunn Loring, and how these gigantic DC tour buses that were going up and back every 15 minutes. Complete waste of money. There was one or two people on a bus there are probably 200 seats on the bus. Complete waste of money, I don't understand that. Doesn't make any sense to me.

Um, in addition, at least you know, starting going on and on, I've heard that from people that work at Metro, that there's a lack of accountability and all the time. I will say that the people, the people that drive the buses and the trains are very hard workers, from I noticed. The bus operators have a very difficult job and they should be commended. Same with the train operators.

But I've heard off the comment for people that work at Metro, that supervisors sleep sometimes at the stations in the back rooms. I don't know if that's true. I've heard that that workers that clean bathrooms, some workers are assigned to one bathroom a day. This is just hearsay. That kind of stuff needs to be dealt with. Metro really needs to get their act together. Again, the train operators, the bus drivers are exceptional and they do a great job and they work very well. But the others, sometimes perhaps it's station attendants and the others behind the scenes, Metro needs to ensure there's complete efficiency.

Metro constantly asks for the jurisdictions to kick out more millions of dollars. Well, if they want to do that, then you need to make sure that the workers behind the scenes at stations are all working efficiently and hard. That's pretty much it. I guess you get the gist of my comments.

One other comment, too. I hope I'm not going on too long. I think it's a mistake for Metro to close on weekends, beginning in 2022, at 9:00 PM every day. I know, perhaps some of the cost cutting measures that I just said perhaps could arise because of my suggestions could allow Metro to close at 11, on Friday and Saturday, at least. It's particularly hard on the workers of restaurants and bars. And Metro should close, no earlier in my opinion, at 11:00 PM on Friday and Saturday night, at least, hopefully other nights too, but at least Friday and Saturday. Perhaps have less

frequent train service on Friday and Saturday. But some way you accommodate that, particularly by 2022, the, our society should be more open, people should be going to bars, restaurants, more particular weekends, and that's something they really need to be sure that they can close at 11:00 PM at the earliest on Friday and Saturday nights. Other nights too, but at least Friday and Saturday. Thank you for listening to my comments and I appreciate you taking them into consideration. Thank you.

Received 3/8/2021, 10:52 a.m.

Phillip Posner, Arlington, Virginia. Good morning. Thank you for maintaining the MetroAccess service area and time. Please continue this policy through 2022. I know that this draconian budget like the one for 2021 is based on a worst-case scenario for ridership and federal funding. We hope that it will not be necessary to implement this budget based upon the current progress for transit funding and Congress and COVID vaccinations. If service reductions do become essential, I hope that safety and smart use of WMATA and jurisdictional bus and rail service redundancies will guide decisions so that transportation deserts will be avoided. There is hope that WMATA and the jurisdictions will find support from partners in the private and government sectors to help transport their essential workers and patients during potential WMATA service reductions. Finally, please continue the essential work and funding for safety and accessibility projects such as wayfinding lighting and usable benches. Thank you for listening and have a good day.

Received 3/8/2021, 11:24 a.m.

This is Daniel Anixt. I'm president of the Board of Directors of the Townes at Cameron Park. I appeared at the March 8th meeting, but I was not called upon, but I want to enter my comments for the record. I'm president of the Townes of Cameron Park homeowners' association. We represent the residents of the Townes of Cameron Park neighborhood in Alexandria, Virginia. We submitted written comments to Metro on the proposed close use of Eisenhower Avenue and Van Dorn Metro stations on February 23rd. These comments are in addition to those comments.

Closing both stations will damage our community and the Valley, the Eisenhower Valley writ large. There's been a massive amount of transit-oriented development in this Valley that was dependent on these stations remaining open. With their closure, I believe that will have a terrible impact on the economy of our Valley. Speaking for my community specifically, we have many residents in the military and civilian and government employees who bought in this neighborhood rented in this neighborhood who depend on Metro. They bought here for that reason. They played a premium to live here and myself as a homeowner and several of the other homeowners here also paid a premium on our homes when we bought them based on the value of being in close proximity to those stations. Closing these stations is a penny-wise, pound foolish move. It will affect a lot of us who will probably turn to our cars and congest some already congested streets, particularly Van Dorn and Telegraph Road at rush hour impassable at the moment.

Adding more cars to an already strained infrastructure is going to make matters considerably worse. Also, I might add that we all are taxpayers here. We paid into Metro via our federal taxes, via our Virginia and Alexandria taxes, and to take two stations, not just one away from us is very, very, detrimental to our community and not the proper way that Metro should be filling its budget gaps.

We have the Eisenhower Metro station is only one and a half miles east of us. The Van Dorn Metro station is two miles west of us. And yes, there are other stations further up and further down the line north to south that aren't that far apart, north and south, but east to west, they are further apart and for us to lose it, both of those stations will be disastrous to our community. I wish you

would seriously reconsider putting it, taking both of those stations off the list, or at the very least taking Eisenhower Avenue Metro off the list, which is densely built around and having more and more buildings being built with more and more passengers that are going to potentially ride it.

Please do not make these cuts. I do understand that Metro is under budget pressure, but they are getting federal funding and they should be getting even some more soon. And we should not be the ones to bear the brunt of this. Again, my name is Daniel Anixt. A-N-I-X-T. And I am president of the Townes of Cameron Park. My written comments were submitted on February 23rd, 2021. We hope that you will seriously reconsider this very awful proposal. Thank you very much for your time and consideration.

Received 3/8/2021, 11:36 a.m.

My name is Elisa Smith. I'm calling to ask, are you are going to consider, having MetroAccess customers who use bus and rail to pay some type of fee instead of them getting free rides.

Received 3/8/2021, 11:37 a.m.

My name is Cara Carter and I'm on the A6 bus line. And I would appreciate if you all, please do not cut the A6 line. That's the only transportation that I have that can get me to Anacostia station to my doctor appointments and to my dental appointments, all the appointments that I need. So please do not cut the A6. It would be very detrimental. I need, that's the only line that can get to take me to where I need to go. Thank you.

Received 3/8/2021, 11:37 a.m.

I have a problem with shutting down certain routes on the Metro. I'd like for the Metro to keep running. Whatever funding you can possibly do to create more bus service, because the routes gets you're cutting off leave people all over stranded. Thank you for listening to my comment. This is James Ross adding my comment to the meeting. Thank you. Hopefully we will have full service sometime in the future. Bye-bye.

Metro Hearing No. 635
Monday, March 8, 2021 – 6 p.m.

MS. GIDIGBI-JENKINS: Good evening, everyone. I am Metro Board Member Stephanie Gidigbi-Jenkins and I represent the District of Columbia on the Metro Board of Directors. Welcome to the second of four virtual public hearings on Metro's Proposed Fiscal Year FY2022 budget. This hearing is convened by the Metro Board of Directors to gather public comment on two dockets: B21-01 on Metro's Proposed Fiscal Year 2022 through 2027 Capital Improvement Program and Strategic Plan, and second, Docket B21-02 on Metro's Proposed FY2022 Operating Budget and related service and fare proposals, and changes to parking rates at some Prince George's County stations.

Notice of this hearing was made by publication in the Washington Post and ads were placed in the Afro, Atref, Doi Nay, El Tiempo Latino, the Epoch Times, the Iran Times, Korean Times and the Washington Hispanic, and as well through social media and radio. And signs were placed in all rail stations, on Metrobuses, MetroAccess vehicles, at Metrobus info centers and at over 300 bus stops.

Since we're doing this hearing virtually, the hearing is going to look and feel a little different than usual in-person hearings. We would normally have a presentation from our Chief Financial Officer, but in order to get right to your comments and testimony, we have instead posted a video at wmata.com/budget that provides an overview of next year's proposed budget.

In short, Metro is proposing to maintain operations and increase service to meet demand through December 2021, with the need for severe service reductions beginning in 2022 without additional federal funding.

However, this weekend, the Senate passed another COVID relief bill. While this bill still needs to be approved by the House and signed by the president, and it will take some time to calculate exactly how much funding Metro will receive, we are encouraged that a significant amount of relief for transit is expected to be included in the bill. This will help us minimize service reductions in FY22. We'd like to thank our Congressional delegation for championing these issues with us, in addition to the region. We will likely be able to the worst of the service cuts that were on the table when took this budget proposal out to the public.

With that good news, I'd like to turn to the portion of this evening, where we hear from speakers. Those of you wishing to provide testimony should call (512) 580-8850. I will repeat: (512) 580-8850. After calling in you will need to enter a four-digit meeting code. For this evening's meeting, the code is 3-8-1-1. Again that's 3-8-1-1. Once you're in the meeting, you will be able to listen over the phone by pressing star one. If you would like to provide testimony, you can press star three and you'll be put in a speakers' queue. You'll get a message when it is your turn to speak. For those of you on the line now, if you want to speak, go ahead and press star three to get in the queue.

If you're watching the livestream on a different device, please make sure to mute this device, so that there isn't feedback. You'll be able to listen to the hearing while you wait on the phone queue. If you would like to provide oral testimony, but aren't able to wait until you come up in the queue, you can press star two to leave a voicemail. Your voicemail will be transcribed and included in the hearing recording.

In order for the public record to accurately reflect who's providing the testimony, I'd ask that you please state your name and any organization you represent before beginning your testimony. Elected officials will be allowed five minutes and non-electeds or anyone else will be allowed three minutes. Extra time will be given for translation, if needed. We ask that you stay within your time limit because we want to make sure everyone who wants to speak has a chance to be heard.

I also want to note that each speaker is only able to speak once at each hearing. While you may have the option to rejoin the speakers' queue, please note that we cannot accept additional testimony at this hearing.

I want to also take a moment to recognize that this is where we listen to you. This is your opportunity to comment on the proposals and we are here to listen. We will not be able to answer questions during your testimony. Before you begin your remarks, please state your name and the organization you represent, if any. Please note that all statements, including any personal information, such as a name, email address, mailing address or telephone number you provide in the statement are releasable to the public upon request, and may be posted on WMATA's website without change, including any personal information provided. Further, testimony may be submitted and must be received by 5:00 PM, Eastern Standard Time, on Tuesday, March 16th.

Testimony can be submitted online at wmata.com/budget. Online, you have the option to do three things: complete a survey, write a free-form comment, and upload, and/or upload a letter, petition or other documents. You can also mail testimony to: Office of the Secretary, WMATA, 600 5th Street, Northwest, Washington, DC, 20001. Again, all testimony must be received by 5:00 PM on March 16th.

Due to the pandemic and the slowdown in mail service, we encourage everyone to submit comments online, if possible. Your comments will be part of the public record that will be reviewed by the Board of Directors. Changes to the options presented here tonight may be proposed in response to testimony received and subsequent staff analysis.

And now, it's time to call the first witness. As a reminder, please tell us your name and any organization you represent before you start speaking. Staff will then un-mute the speaker by-one from the speakers' queue.

MR. DANCY (via ASL interpreter): Hello, my name is Rico Dancy. I'm from Washington, DC. I'm the president of the Black Lives Matter, for the Deaf Chapter. And the reason why disabled people have monthly pay, we live on a fixed income, typically given by the state. We live on a limited fixed income, so we have limited money for travel. So, I'm curious, if people who collect Social Security or Social Security Disability Insurance, who are on a monthly budget, why don't we have a more stable cost for transportation. I was just curious about that. And that's the only comment that I had, thank you.

MS. GIDIGBI-JENKINS: Thank you Mr. Rico Dancy. Good to see you.

MR. DANCY: Good to see you, too. Take care.

MR. GOLASH: Hi, this is Michael Golash. I'm a Ward Four resident. I'm a former employee of the transit authority and a member of ATU, Amalgamated Transit Union, Local 689. I'm opposed to all the cuts in Metro service. The numbers of individual trips that people have been taking has

decreased. The number of trips have taken, but the number of people that riding the transit system, I think is more or less the same. It's just that people instead of going to work five days a week, are only going one day a week, but they still want to get to work in a timely fashion. They don't want to have to wait half an hour for a train and then take 45 minutes to an hour to get to work. That will only discourage people from continuing riding the transit system. So, an alternative is to simply reduce the size of the trains, whether it's have two car trains, have four car trains have six car trains. You don't have to run all eight car trains when you have a reduced ridership. That will save some money, but of course, you'll still have to have the same number of drivers and you'll prevent any layoffs.

The second thing about saving money is Metro is simply transferring costs. Other words, instead of Metro paying, it's train operators, now the DC government will pay them unemployment insurance and we'll pay for their health insurance through Medicaid. So, Metro saves some money, but it winds up costing the DC government money. It's better to just have the DC government give Metro more money to continue the current levels of service and the current levels of employment.

I'd also like to say that many of Metro's policies and terms of cutting service affect the most vulnerable people in our community. African-American workers, Hispanic workers, who are really dependent upon the transit system to get them to work in a timely fashion. When you cut back trains and cut back bus service, you inevitably create a lot of harm for people who don't have easy access to automobiles or more expensive modes of transportation. So, the system is very, very important to many, many people in this region. And we, Metro, often claims to be involved in this struggle against racism. Well, let's put your words, your money, where your words are.

So, the other question of course, is where's the money going to come from? Well, one, the local governments should put more money in. That means the businesses and the developers, some who've literally become billionaires over the last five, ten, fifteen years because of the services Metro provides, they don't pay their fair share for the services that Metro provides them. That issue has to be addressed. Second of all, the federal government, separate from the question of stimulus money, should provide a subsidy for Metro, for a payment, for the services we provide for this region. They give their employees a pass to ride the train to a certain number of times, but that pass does not account for the actual cost of the train service. So, Metro should demand the federal government pay for the difference between the real cost of providing the service and the money that's provided on the trip passes or rider passes, they provide to federal employees.

So, I think that in summary, the issue of racism is extremely central to this whole discussion. If we are truly trying to build an anti-racist movement in this country, dealing with issues of public transportation in a fair and equitable way is central to that focus. To threaten a predominantly African-American workforce with a loss of jobs and benefits is a serious racist maneuver, which we should take every effort that we have, have to try and stop that. Thank you very much.

MS. GIDIGBI-JENKINS: Thank you, Mr. Golash. Appreciate your comments. (Pause) Next caller?

ABI: Hi.

MS. GIDIGBI-JENKINS: Hi. Can you introduce yourself?

ABI: Good. Yes, my name is Abi and I live in Fairfax County. I want to call in to strongly oppose the measures that WMATA is thinking of taking as well. We already had Metrobus service reduced

in the Annandale community, in the past, so, seeing this was really eye-opening that WMATA is not really caring about the passengers they have, you know, all over the DMV area. I work in DC, so I rely on the Metro heavily to get to work. And if things were different during these times, and there wasn't the coronavirus pandemic going on, I would still continue to be taking the Metro, but of course now I can't. So, these proposed changes could really affect, for me getting to work and also a lot of my peers as well.

And by reducing service, you will force me, you will be forcing a lot of people to, you know, find another mode of transportation or use their cars again. And I don't think that's a good idea because there's already enough traffic and a lot of accidents in DC going on right now. So, adding more people on the road doesn't seem like a very positive change, especially with all the environmental stuff going on as well. Using cars, it's just not, you know, the best for our environment. So, I just wanted to call in to strongly oppose that. Thank you.

MS. GIDIGBI-JENKINS: Thank you, Abby. Next caller.

MS. SMART: Good evening. My name is Jan Smart. I live in Foxhall Village and I'm calling in on behalf of the Foxhall Community Citizens' Association. We have a number of concerns on the D6 bus route. This is a bus route that starts off in Ward Eight and ends up in Ward Three. It passes three hospitals: GW, MedStar Georgetown, and Sibley. Workers' shifts start and end very early and very late. And those workers need access to get from Ward Eight across to Ward Three, without having to change or hope that there might be a bus somewhere.

There are also very many students who commute to Duke Ellington, Georgetown University, Washington International School, Georgetown Day, Hardy, Wilson and other schools in Ward Three. And now the District is talking about adding to another school, another school on the Hardy campus. There are also students who live on the campus at GW's Mount Vernon, and they have no, they would have no access to food stores or anything at all. There's also the M4 bus which goes to Wilson and Tenleytown. And that would mean that all of the students who'd currently commute from across Ward Three would have no way to get to their school.

There's another issue here regarding low-income housing in Ward Three. I know that there's been some attempt to integrate more affordable housing in Ward Three. If you look at MacArthur Boulevard below the Georgetown Reservoir, there's a number of affordable buildings that the D6 services. Many of those people would have no private cars or other ways to get into the city or to their jobs elsewhere. So basically, this would cut off access, both for health at the three hospitals, and for jobs at the three hospitals, for people who are in greatest need, those living in Ward Eight. And, of course, it would also affect all of the people who live in the Palisades and Foxhall Village, who commute to Washington DC on their jobs when their jobs open back up again. We strongly protest that you eliminate D6 or M4. I thank you for your time.

MS. GIDIGBI-JENKINS: Thank you, Ms. Smart. Next caller?

MS. MORRIS-FLORES: Hi, my name is Gabi Morris Flores. I'm a lifelong resident of the DC Metro area and a member of Sunrise DC, a local community organization that is part of the climate justice movement. I grew up in Rockville, Maryland, and I currently live in Petworth and I have relied on the DC Metro system my whole life. I am completely appalled and horrified by the cuts to the Metro system proposed by WMATA. These cuts will most affect the people that the DC government claims that they want to protect. They will disproportionately affect low-income

communities, senior citizens, disabled people, DC students, essential workers, and Latino and Black communities in the DMV. And for this reason, I firmly oppose these cuts.

The cost of living in DC is so high that it is more affordable for many low-income essential workers to work in DC and live in the suburbs of Maryland. These cuts will severely impact these essential workers, including those who live in the low- to moderate-income housing surrounding the Grosvenor Metro station, where I grew up. The Grosvenor Metro station's one of the stations slated to be shut down. People chose to move into these neighborhoods specifically because they were walking distance of a Metro station, and now they will be stranded from the public transportation that they relied on.

Similarly, affordable housing units in DC and Maryland are built with accessibility to public transportation in mind. I work on the affordable housing sector and I know that it's required for new affordable housing projects in DC to be built within half a mile from public transportation service. This is required so these residents have the mobility to reach critical services that everyone needs access to, like food and medical care. And WMATA's proposing to close the Mount Vernon Square Metro station, which will eliminate Metro access for the people living in 766 affordable housing units, protecting low-income elderly and disabled residents.

Beyond the inequities that these cuts would exacerbate, the cuts are also financially and environmentally unsound on a macro scale. These cuts are being proposed because low ridership caused by the pandemic has created a revenue shortfall. However, further service cuts will only result in a declining spiral of ridership and revenue that will leave Metro in an even more difficult position. The elimination of stations and bus lines, and the increased wait times for workers, residents, and students needing to commute, will push those who are able to, to seek other methods of transportation. Cuts will encourage the use of personal or for-hire vehicles, and thus WMATA will bring an even less revenue. For a Metro system that relies so heavily on passenger fares to fund its operation budget, cutting service is a death sentence. And for a city that has pretty lofty climate goals, as vowing to cut emissions by half by 2032, decimating its Metro system does not make any sense, Ms. Gidigbi, I know that you work for NRDC and are committed to addressing the climate crisis and doing so in an equitable way. A robust public transportation system is critical to any equitable climate plan. And I know for a fact that it's a part of DC's Clean Energy Amendment Act of 201. Cutting service will only decrease future ridership, disproportionately impact marginalized communities, and leave DC in a precarious position in regards to its climate commitments. Thank you for your time.

MS.GIDIGBI-JENKINS: Thank you, Ms. Gabi. Next caller?

MR. ISREAL: Hi, this is Zachary Israel. I'm an elected Advisory Neighborhood Commissioner for Single Member District 4D04 in the District of Columbia, representing parts of Petworth and Brightwood Park in Ward Four. I would like to read part of the resolution that ANC 4D passed unanimously on January 27th, 2021, regarding WMATA's proposed bus cuts and changes for Fiscal Year 2022, with a specific focus on the proposed elimination of these 62 and 63 bus routes, beginning on January 1st, 2022. And this is especially in light of the fact that according to Congresswoman Eleanor Holmes Norton, WMATA should receive an estimated \$1.4 billion from the upcoming COVID relief law, of the \$30 billion that will be going to public transit. So WMATA is getting a lot of money in the next weeks and months, and it should use some of that money, to save the 62 and 63 bus routes.

So this is part of the resolution that we passed in January: Whereas the location of the Ward Four short-term family housing facility at 5505 Fifth Street Northwest, which first opened in September 2018, was specifically chosen in part along the Route 62, 63 bus corridor to allow working parents, the vast majority of whom do not have cars to utilize the affordable 62 and 63 bus routes to get to and from work, including transferring at the Takoma and Georgia Avenue - Petworth Metrorail stations, and to take their children to, and from the facility to other parts of the DC Metro region; Whereas the 62 and 63 bus routes provide essential transportation for many Advisory Neighborhood Commission 4D residents who commute to and from jobs near Takoma, Brightwood, Brightwood Park, Petworth, Columbia Heights, Park View, Shaw Logan Circle, Penn Quarter, and Federal Triangle, and parents rely on these bus routes to drop their children off at daycare would be adversely impacted by these cuts; Whereas students who utilize the 62 and 63 bus routes to get to and from school will be adversely impacted by these proposed cuts, given that in-person instruction will very likely be back to normal during Fiscal Year 2022; Whereas the 62 and 63 bus routes offer a safe and economical way for ANC 4D residents to get to and from home late at night and early in the morning; Whereas the Fiscal Year 2022, Proposed Metrobus Consolidated Route Network Service Plan utilizes an equity-essential travel criteria on which is supposed to take into account the low-income rely on Metro for essential travel to groceries, medical appointments, and daily necessities, and also support access to jobs and healthcare, hospitals, and other sectors, and yet this very criterion ignores the very group of people who will be adversely impacted by the elimination of the 62 and 63 bus routes; Whereas, WMATA's final Framework for Transit Equity Metrobus Service Guidelines publicly unveiled in December 2020, and based on data from July 2019 to February 2020 indicates that Route 62 and 63 meets to propose service guidelines, including availability, route design, reliability, comfort, productivity, and cost effectiveness; Whereas, WMATA should take into consideration estimated ridership demand levels during Fiscal Year 2022, when the COVID pandemic will be coming to an end and many more ANC 4D residents will return to work in-person, significantly increasing ridership on the 62 and 63 bus lines; you know, Whereas, climate change poses an existential threat to the planet and automobile emissions are one the, one of the main sources of greenhouse gas emissions that cause climate change; Whereas, DC residents use mass transit as a critical way to reduce automobile traffic and emissions; And Whereas, DC's comprehensive plan calls for providing more commuting alternatives besides personal vehicles, therefore be it resolved that ANC 4D opposes WMATA's proposed cuts to the 62 and 63 bus lines in Fiscal Year 2022, and urges WMATA to preserve the 62 and 63 bus routes on weekdays and weekends for the entirety of Fiscal Year 2022.

Again, I would just mention that this resolution passed unanimously by ANC 4D on January 27th, 2021. Our ANC represents over 12,000 residents in Ward Four, many of whom really rely on these two bus routes. And so again, I just urge the WMATA Board of Directors in the coming weeks and months, to save these two bus lines. Thank you very much.

MS. GIDIGBI-JENKINS: Thank you, Mr. Israel, for your comments. Next speaker?

MS. MLADINOV: I'm Ann Mladinov, I'm a commissioner in ANC 3B Glover Park/Cathedral Heights. Our area is heavily dependent on Metrobus because we don't have Metrorail service. And we also have a densely-settled neighborhood of apartments and row houses, about 300 people per bus stop, with quite a few seniors, zero-car households, and about 13% individuals at the poverty level. We are like many neighborhoods around the District who really need and depend on bus service to get people to work and school and other activities avert congestion and

meet environmental goals. Metrorail may be the premier transit service, but buses are the workhorses. Metrobus has had about 50% of normal ridership in the pandemic, while Metrorail is down to only about 10%. That's because so many essential workers ride the bus that need the bus.

We'll be watching to see as a new COVID relief bill has enough money to cover key WMATA services. But I know the planning team and the Board do not want to see reductions in service any more than customers do. We need the system to maintain services and expand operations as riders return. Keep the buses going, make sure you get the word out that you are taking all steps necessary to make sure transit riders are safe, and you have enough service for customers to return.

Beyond those general points, I want to mention specifically the routes my area needs. I also underline the importance of service to neighborhoods like ours, not downtown, but toward the edges, up the hills with a lot of narrow residential streets winding around and up and down. It's not the best territory for buses to operate, especially in winter weather, but that's the area where tens of thousands of your customers live. Look at Marshall Heights, Congress Heights, Benning Heights, Fort Lincoln, all the Heights like Knollwood, Palisades, Cathedral Heights, and Glover Park - our routes are on the list, year after year, for reductions when the budget is squeezed. All these neighborhoods have grown and been able to thrive, partly because they have transit service. Please do not turn your back on this fundamental part of your base.

The Metrobus is the lifeblood of the community. The trunk of the transit system will be weaker if you cut off the arms. In our ANC we've seen major reductions in service over the past few years, and of course, also during this year, due to the virus. Several routes were eliminated totally, including peak-hour service on the D1 and the 37. We are supporting and looking for continuing service on the D1 and D2, the N2, N4, and N6, and the 30 bus series, including the 30N and 30S. The current proposal for the second half of FY2022 would cut out all the bus service on the D2 serving the interior of Glover Park west-southwest of Tunlaw and leave 25% of the riders on that route without any bus service at their stops.

That all-day service is essential to the community. It's just barely getting back to seven-day service this month. The D1 peak-hour weekday service has been discontinued, but WMATA says it will start, D1 again if the number of riders on D2 gets beyond safe limits. We need those buses. We hope those routes can both be continued through FY2022.

Riders in Cathedral Heights and further northwest also depend on the N-buses on Mass Ave west of Dupont Circle. The only service right now is N6 which previously operated only in evenings and on weekends. The proposed budget would retain just the N6, but for the second half of FY2022 would combine that one remaining N-line with the D2 and M4, leaving the vital Mass Ave. corridor with basically no bus service. Of the nearly 4,000 weekday riders on the N-buses pre-COVID, that proposal would leave 39% without any service at the bus stops they use.

The other key routes are the 30 line buses on Wisconsin Avenue, including the 30N and 30S cross-town between Friendship Heights and Naylor Road or Southern Avenue. That route got more comments a year ago about saving the service than any other route that I saw. It's a mainstay for many essential workers riding in early morning, or going home late at night. People that currently use the crosstown ride would have to transfer at the National Mall, adding time and inconvenience. It looks like about 20 people per bus at peak hour might have to make that transfer. Just doesn't make sense. Please think about the people relying on those buses for late hours,

early hours. Their trip is already nearly an hour. Those employees really need that service. It's just as important today as it was in the 1970s, when WMATA made a commitment to keep up across town service and connections between distant parts of the city, even if there are alternate services on Metrorail.

Equity, diversity and inclusion demand that we pay attention to maintaining those services. If WMATA is going to cut back or restructure, we ask you to please include community leaders and residents in your assessments. Your passenger base wants to work with you to find the good ideas, choose lines where people live and work and go to school and stores and tie them together in a way that works for the people who need to ride. Where businesses and schools are reopening, who is riding, who wants to ride, who could be attracted to use our services, this is a time when we have to be really informed and smart because we can't afford to lose the value of the systems this region has developed and nurtured and supported. We have to be able to get the best use out of our investments. Give people good alternatives to turning to private motor vehicles, reduce greenhouse gas emissions, and keep up the quality of life. Our environmental policy, transportation policy and economic policy, all depends on a healthy, safe, efficient, and well-used public transportation system. Thank you very much.

MS. GIDIGBI-JENKINS: Thank you for your time. I'd also like to take this time to acknowledge WMATA Board Chair Paul Smedberg who's on the line.... And we will take the next...oh, from Virginia. And we will now take the next caller.

MR. DAMIANA: Good evening. My name is Christian Damiana, and I am the commissioner for ANC Single Member District 3D07. I have been designated to testify to WMATA on behalf of ANC 3D about our many concerns regarding the proposed budget for Fiscal Year 22. On March 3rd, ANC 3D unanimously passed a resolution opposing the proposed service reductions to Metrobus routes within our jurisdiction. We urge WMATA to reconsider its plans and find a way to maintain public transit and expand it within our commission's boundaries and across the District. If you've not yet reviewed our resolution, we hope you will do so soon. Our ANC includes the neighborhood of Palisades Foxhall Village, Spring Valley, Wesley Heights, American University, and residents in all of these areas rely heavily on Metrobus service to get to school, work, medical appointments and more.

We're extraordinarily concerned by the proposal elimination of the D6, M4, N2, and N4 routes. If WMATA follows through with the cuts, there will be a devastating impact in our community. Because there are no Metrorail stations in our jurisdiction, it is absolutely imperative that access to these key Metrobus routes is preserved as we approach a gradual return to pre-pandemic life. Put another way, Metrobus is effectively the only public transportation option available to us and our constituents. We fear that if Metrobus service in our neighborhoods is slashed, as proposed, we will see many residents abandon public transit and choose to rely on personal cars or ride share services instead. Although WMATA has identified alternative service that users of eliminated or reduced Metrobus lines can use, we note that the proposed cuts will leave large swaths of our community without any Metrobus service in 2022. According to WMATA's own analysis, the alternative service options will also be highly disruptive for riders of the Metrobus routes, as many will be forced to travel to different bus stops in order to access a functioning bus route.

We believe that the proposed Metro bus service reductions would surely exacerbate traffic, lead to increased carbon emissions and reverse the positive commuter adaptation towards public

transit that we've seen in recent years. Our concerns are not just about increased congestion, though. The proposed elimination of these routes will lead to massive transportation inequity, something that is already a major issue within our community. These cuts will disproportionately impact a variety of key constituencies like students, the elderly and late-night and early-morning commuters. ANC 3D urges WMATA to prioritize Metrobus service to routes that serve these communities as well as to those that service central facilities and institutions.

The D6 route, in particular, plays a unique role in getting essential workers to their jobs at Sibley and Georgetown hospitals, as well as schools like Key, Hardy and Duke Ellington. The current D6 route going to MacArthur also allows for multi-family, relatively affordable housing below the Georgetown Reservoir. This advances priority initiatives for integrating affordable housing in Ward Three. The proposed route alterations would leave this large swath of mixed-income, carless residents unserved by public transportation and unnecessarily complicate a priority initiative for DC and the region. After the D6 route is eliminated, bus service will not exist and will not be replaced by alternative routes on MacArthur Boulevard, on Foxhall Road and at MedStar Georgetown University Hospital. Also, after this elimination, residents in the Palisades and Foxhall Village will no longer be able to directly access Georgetown by public transportation. After the M4 and N2 routes are eliminated, there will be no Metrobus service on Nebraska Avenue. And after the N6 route is changed, residents will no longer be able to use Mass Ave. to reach bus stops in the core of the District's business district.

It's clear that the proposed service reductions will devastate the individuals in our community that rely on public transportation the most. Accordingly, ANC 3D opposes the proposed cuts to the D5, D6, N2, N4 and M4 routes. Furthermore, ANC 3D urges WMATA to adopt a budget for Fiscal Year 2022 that aims to maintain and expand public transit within the boundaries of ANC 3D and across the District. WMATA's revised FY22 Proposed operating budget undoubtedly fails to accomplish this goal at this moment. Thank you.

MS.GIDIGBI-JENKINS: Thank you. And just a reminder, for those that wish to provide testimony, you should call (512) 580-5580. Again that's (512) 580-5580. After calling in, you will need to enter a four-digit meeting code. For this evening, the code is 3-8-1-1. Again, that's 3-8-1-1. Once you're in the meeting, you will be able to listen to the meeting over the phone by pressing star one. If you'd like to provide testimony, you can press star three and you'll be put in the speakers' queue. You'll get a message when it is your time to speak. For those of you on the line now, if you want to speak, go ahead and press star three to get in the queue. We will now have our next speaker.

COUNCILMEMBER PINTO: Hi, I'm calling in from the District of Columbia. My name is Brooke Pinto. I'm the Councilmember representing Ward Two on the DC Council, and thank you for hosting this opportunity tonight to hear from the community. I think it's been very clear from everyone that we've heard from about major concerns for the proposed cuts. I, too, am deeply concerned about the vast proposed cuts to WMATA train and bus service across the city. Ward Two is the geographic center of our city. And not only do thousands of residents live in the neighborhoods and rely upon these bus routes, but many more students and professionals attending public school, colleges or otherwise pursuing an advanced degree or professional development within Ward Two. And a large portion of residents from across the District of Columbia, as well as Maryland and Virginia utilize the Metro stations and bus routes to get to work each day.

These individuals work in our local and federal government, in our retail and dining establishments, work in our hotels and our entertainment, cultural and tourism venues. And they breathe necessary life into our vibrant local economy and help to make the District of Columbia the melting pot we know it to be, and we know is crucial to our recovery moving forward. Plainly stated, WMATA service and full service helps to make our neighborhoods more livable, education more attainable, and it helps to get us to work more easily. It helps prop up our local economy.

While I understand WMATA is currently facing major budget constraints due to low ridership during the pandemic, I know it would be a dire mistake to significantly cut our bus lines and close transit stations. With a third COVID-19 vaccination approved, a flood of innovative ideas that are allowing to keep our small businesses open and residents and visitors safe, and the returned to in-person learning for more students throughout the city, we are very hopeful that we are indeed beginning to get the pandemic under control, and there is light at the end of this tunnel. We must not forget that while many ride Metro and Metrobus for convenience, many individuals and neighbors rely on these services for extremely important affairs like arriving at medical appointments on time and getting to work.

And as a city, we must be committed to not only increasing equitable transportation, but also with the concerns, concerns about the environment and continuing to significantly reduce our carbon emissions as we face the climate crisis. We know that when we make public transportation more reliable and easier to use, more people opt to use it rather than their personal cars. And when this happens, our streets are safer for pedestrians and bikers and our air quality improves. While we are lucky to live in a city with a Metrorail system, many of our neighborhoods are left out and therefore rely completely on service to get around.

I'm deeply concerned that cuts in these neighborhoods, like in Georgetown, will make those areas more car congested and less accessible to all District residents. In Georgetown, the 30N, 30S, 37, D1, D2, D5, D6 G2 and 38 will all be eliminated under the proposed cuts. And respectfully, it's really difficult to comprehend how a model could have come to this decision. Many of the routes that are not cut altogether will be significantly shortened and require riders to transfer buses. In some cases, cuts require riders to transfer from WMATA buses to other transportation services altogether like the Kennedy Center shuttle or the Circulator. And the barriers that this creates for riders is unacceptable. It makes it more difficult for students to travel safely to school across the city and for workers to get to work. So lastly, the District is about to receive \$2.2 billion in federal funding, and I expect us to receive additional support in President Biden's next infrastructure bill. I strongly encourage WMATA to reconsider these cuts until we are fully able to understand available funding for Fiscal Year 2022. We should be aggressively expanding public transportation options, not cutting them. And I pledge as the Councilmember representing Ward Two to work, to help supply and identify additional funding to support WMATA. And I hope that you will revisit your plans moving forward so that we do not cut these important service lines. Thank you very much.

MS. GIDIGBI-JENKINS: Thank you Councilwoman Pinto for your remarks and for your participation. Next caller?

MR. SAUCEDA-GUZMAN: Yes, my name is Salvador Saucedo-Guzman. I'm a commissioner of ANC 5D, specifically SMD 5D02. I am an advocate for the residents of Trinidad, Mt. Olivet and Ivy city, and would like to share these words as testimony requesting to keep public transportation available for the many hardworking men and women that live in my neighborhood. The D4 and

D8 bus lines are essential methods of transportation for the working people in the Mount Olivet area. And its entire elimination is a slap in the face to what many consider our home as the last stand against poverty and gentrification. Due to the current pandemic, we understand that ridership demand has been low and the cost to keep our buses running has been high. This, however, is not an excuse to take away forms of attaining equity amongst those needing to work.

My home is primarily low-income and we need bus services to work. A majority of us still are, are essential workers and do not have the privilege to stay home and work remotely. Many of us depend on the bus service to get around the district, whether it's cleaning offices downtown or having get to Sibley or Washington Hospital Center. Currently, no other alternatives exist within the Mt Olivet area and removing our last method of public transportation completely creates an acceleration of poverty as it costs to get to where you need to go. And with those rises in costs, some people will be out of jobs and need to move out of the area. Budget actions, such as, such as these, make it seem like the, that WMATA is intentionally trying to make it harder for the working poor.

As a Latino elected in, as a Latino elected official in Washington, DC, I know I have to speak on, on part of, on part of just being, someone that understands that we represent a large portion of essential workers in and around the city. We ride these buses every day. And I ask that you all do not eliminate these bus routes, as it will eventually affect my community and those around me. With no trans, with no transportation means no jobs, and with no jobs means no food on the table. The Mount Olivet area's full of good and hardworking people that cannot afford these eliminations of public services. The budget cuts will negatively impact our community and make it more difficult for us than it already is. Thank you for allowing me to share these words.

MS. GIDIGBI-JENKINS: Thank you, Commissioner Guzman. Next caller?

COUNCILMEMBER LEWIS GEORGE: Hi, this is Councilmember Janeese Lewis George, from Ward Four. Can you hear me?

MS. GIDIGBI-JENKINS: Yes, we can hear you well. Thank you, Councilwoman. Welcome.

COUNCILMEMBER LEWIS GEORGE: Awesome. Thank you so much. I want to thank you for the opportunity to talk about the impact of WMATA's proposed budget on my community, in Ward Four and the DC region as a whole. The proposals to reduce, merge or altogether eliminate many bus lines that serve our community are alarming and pose some equity issues. Our office has heard from countless constituents and stakeholders about the risks posed by these changes. These risks include making it harder for students to get to school, limiting access to childcare medical care and other services, cutting off customers from local businesses, compromising accessibility for residents with limited mobility, especially Ward Four's large population of seniors, increasing reliance on cars and that's contributing to climate change and making it harder, longer and more expensive for workers to commute to their workplace.

I urge WMATA to preserve the 62 and 63 bus routes that provide essential transportation from Takoma and several Ward Four neighborhoods all the way down to the Federal Triangle. The proposed alternative route would significantly reduce the frequency of transit options and force many Ward Four residents to walk more than half a mile further for the same commute. Eliminating the 62 and 63 lines would also isolate families in short-term family housing facilities on 5th and Kennedy Streets Northwest from public transit.

I also urge the Board to preserve the in M4 bus, which is a key mode of transit for a huge number of Ward Four students at Alice Deal Middle School and Woodrow Wilson High School, as well as several other schools west of Rock Creek Park. While M4 ridership has been low during virtual learning, we expect it to surge back to its pre-pandemic heights and continue to grow as enrollment at these schools continue to increase. In addition, I encourage you to stop the elimination of the 59 express bus and reductions in service along the S2 and S9 bus lines that move across the heart of our city. These routes were overcrowded before COVID, and will become even more packed and slower moving when we return to pre-pandemic normal without the same capacity or limited stop service.

I also want to register our concerns about the proposed service reductions or elimination for the K2 line that connects Takoma to Fort Totten. The F1, F2 and R1 bus lines that link the District with our neighbors in Prince George's County and the H8, 60 and 64 bus lines that serve residents in the eastern part of Ward Four, which is already underserved by public transit. On a positive note, I am pleased that WMATA plans to sustain the E4, 52 and 54 bus lines at current levels. And I am also grateful for the return of late-night service for the 70 and 79 bus routes along Georgia Avenue, a critical corridor for hospitality businesses whose workers and customers rely on late night service can make it home safely.

I want to highlight the detrimental impact of WMATA's proposal to rail service starting in January. Closing Metro at nine would be devastating for businesses that are already struggling and will leave countless workers stranded at the end of their Workday. Meanwhile, the drastically reduced frequency and trains could discourage even the most loyal riders from using Metro. Lastly, the proposed closure of 22 Metro stations across the region would be harmful for our communities. Metro is successful when its services are reliable, convenient, and meet the needs of our residents. These proposed changes undermine those goals. In addition, I'm troubled that this budget would lead to layoff for more than 2,500 of WMATA's devoted employees who provide rail and bus services. These layoffs would be catastrophic for workers and their families.

Because the layoffs are scheduled to go into effect in January 2022, these massive job losses would also have a painful ripple effect across the DC region, further strain our unemployment benefit system, and threaten our economic recovery. The good news is that these sweeping service reductions and layoffs can be avoided. The American Rescue Plan is expected to deliver \$1.4 billion in federal aid to WMATA to sustain public transit in our region. These funds are in addition to the more than \$1.5 WMATA received from the last two stimulus packages. This is a time to deepen our commitment to mass transit so we can ensure that Metrobus and Metro rail are a key component of the long-term future of our region. Despite the obstacles we face, I believe that we can finalize a budget that does right by its riders, workers, our community, and our climate. Thank you for the chance of voice, these concerns.

MS. GIDIGBI-JENKINS: Thank you, Councilwoman Janeese Lewis George for your comments and your feedback. Next caller?

MS. FLOY: Hello. I am Judy Floy, ANC commissioner for 1B06, which is the area around Cardozo School in Ward One. Professionally, I've been a licensed tour guide in Washington DC for the last eighteen years. This evening, I'm concerned about two issues. First, I address the thought of even closing Arlington National Cemetery Metro stop. The cemetery is our nation's most sacred ground honoring our nation's heroes and historical figures. Arlington National Cemetery is a major tourist site and not easily accessible from other Metro stops. What more? There's no bus service to the

cemetery. Closing Arlington National Cemetery stop based solely upon passenger count is just simply silly. This stop is closed in the evening. What more, in the morning, the cemetery does not open until 8:00 AM, further skewing the rider statistics.

Think about this: A tourist who gets off and Rosslyn would have to walk an unmarked uphill route through urban streets, cross the Iwo Jima Memorial, Netherland Carillon and enter the cemetery at the north gate. From there, it's an uphill walk with steps to the visitor center. The route for strollers and wheelchairs is even harder. If you came from the Pentagon Metro stop, you'd have to cross the George Washington Memorial Highway without a stoplight. Tourists who would walk from Foggy Bottom would have a long trek across the Memorial Bridge, and then that maze of traffic circles. Please let us honor our nation's most sacred ground by keeping that Metro stop open. Arlington National Cemetery Metro stop must be measured in ways beyond passenger count.

The second issue I'd like to speak about is the proposed closing of the Metro trains at 9:00 PM. The even thought of this sends shivers up my spine. For Washington DC, memorials are a huge tourist attraction. Evening illuminated tours are very popular with tourists, the lighting is so wonderful. To make evening tours practical, tour guides need a way to get home after working these hours and guides depend upon public transportation in the evening hours. Remember also please the many cleaning, maintenance and security workers who depend upon evening transportation to make our illuminated tours work. Hardworking people who keep our city humming and some for very modest wages. Closing Metro at 9:00 PM would be a huge hardship for tourists, for tour guides and for worker bees alike. Surely as our nation's capital city, we can do better. Thank you.

MS. GIDIGBI-JENKINS: Thank you for your comments, Mrs. Floy. Next speaker?

MR. ROTHOLT: Hello. My name is Jeffrey Rothholt and I'm a resident of Landover, Maryland. So, my approach is a little bit different. I'm new to the area; I moved here from Woodbridge where there's no mass transit. Mass transit is something I depended on living in New York City all my life. And I just can't fathom, after hearing many of the speakers tonight, some of the cuts are unimaginable. We should be in a, in a situation before the pandemic where we're expanding mass transit, and buses, as well as rail. I was really looking forward to the Purple Line, being built as quickly as possible, considering I wouldn't have to travel, if I was looking for an employment opportunity, traveling all the way from Landover down to DC, back into some area like Silver Spring or Rockville. So, that was very disappointing. People who, closing the Metro at nine o'clock, seems to me, irrational when people are using services like going to the gym, working, the hard, and you know, the hard people that work in hospitality and the Black and Brown people and other people of limited means need mass transit and more buses.

I am really shocked at this area being a major metropolitan area not expanding mass transit. I feel that many of the people of this area, I don't know, outside of DC in Virginia and Maryland, are just selfish and not having Metro, having been from what I've heard about the Silver Line, which should have been done a long time ago. We need more mass transit. Mass transit rail needs to be expanded to areas like Bowie, Laurel, Woodbridge, Lorton, and other areas in the DMV area. This is just with the American Rescue bill about to be passed on Wednesday and an infrastructure bill, I really hope that these cuts need to be stopped. These are essential services and need to be expanded. With the car culture in this, causing economic inequity, as well as climate disasters, it just seems like we need to have, it's just disappointing that more people I'm not speaking out

about these issues. I think it's very important that we expand mass transit extensively rather than being a car culture. Thank you very much.

MS. GIDIGBI-JENKINS: Thank you for your participation. Next speaker?

MS. NAVARRO: Hi. Can you hear me okay?

MS. GIDIGBI-JENKINS: Yes, I can hear you well. Can you introduce yourself?

MS. NAVARRO: Yes. Good evening. My name is Marissa Navarro. I'm a DC resident and a member of Sunrise DC. Although I'm not originally from DC, the one thing that has always stood out to me about the city is accessibility of transportation, which is unheard of from where I come from. I share many of the same concerns already voiced and want to emphasize the huge reliance people of color, low-income, disabled, elderly, and other communities have on this public transportation system. To gut these services directly harms these communities. I want to also remind that the COVID-19 pandemic is still raging on. The health and well-being of residents do not need to be risked. With these cuts there will be longer waits and fewer routes, leading to crowded trains and buses.

This will create a greater risk for the pandemic, regardless of mandated preventative measures. Essential workers like myself need to go to work every day of the week, not just Mondays to Fridays. WMATA's proposals to cut weekend rail service will prevent us from getting to our essential jobs and we need to be there in order to make a living and to put food on our table for our families. Please consider all of these concerns put forth and do not cut the budget. Thank you for your time.

MS. GIDIGBI-JENKINS: Thank you for your participation.

MR. ROTHOLT: Yes, this is Jeffrey talking again. One other thing I want to add to, many of us, some of us have disabilities and, I do not drive. So, we need to get to our jobs and enjoy activities, maybe at the Arlington Cemetery, the monuments or the museums. This is just so unfair. And I honestly feel that there is another alternative. We, like once again, I want to see Metro expand bus service and rail service as we become, this is the 21st century and this area is very behind in this issue. And I, I believe with the federal government involved and, this should not be happening.

MS. GIDIGBI-JENKINS: Thank you for your comments. (Pause) Just a reminder, for those wishing to provide testimony, you should call (512) 580-8850. Again, that's (512) 580-8850. After calling in, you'll need to enter a four-digit meeting code. The meeting code is 3-8-1-1. Again, 3-8-1-1. Once you're in the meeting, you'll be able to listen over the phone by pressing star one. If you'd like to provide testimony, you can press star three and you'll be put in the speakers' queue. You'll get a message when it is your turn to speak. For those of you on the line now, if you want to speak, go ahead and press star three, and you'll get put into the speakers' queue. If you'd like to provide oral testimony, but aren't able to wait until you come up into the queue, you can press star two to leave a voicemail. Your voicemail be transcribed and included in the hearing record. We'll take our next speaker. Hello? Can you introduce yourself?

MR. GREEN: Hello, can you hear me?

MS. GIDIGBI-JENKINS: Yes. Can you introduce yourself?

MR. GREEN: Yes, absolutely. My name is Anthony Lorenzo Green. I am an Advisory Neighborhood Commissioner for Single Member District 7C04, representing part of the

Deanwood community in Ward Seven, and I also am a core organizer with Black Lives Matter DC. I testify tonight in opposition to the proposed FY22 budget, in particular the proposed elimination of the U4 bus route that runs in a loop from Deanwood to River Terrace. Of course I have been following the COVID-19 relief, federal relief, just like everyone else. And you know, of course we do see that is moving through Congress and that will provide some additional support for WMATA. And, of course, there are additional negotiations in upcoming infrastructure bill.

However, we must be very intentional in not putting a budget on the table that basically throws equity out the window. Reduction of public transportation in Black and Brown communities is a form of racist policy that's violent to marginalized communities. To ensure equity is at the forefront, WMATA must resist the urge to make massive cuts that will have a direct impact on our families trying their best to push through this pandemic. I am a DC native. I grew up in the Deanwood community. I have essentially rode the U4 my entire life. I am one of the people that used to hop on it just to go to the Boys and Girls Club up on Benning Road or to hop on it, just to get to the Minnesota Avenue Metro station.

And many folks who have been in the Deanwood community would know that our community is known for a lot of our green spaces and our steep hills. The highest point, one of the highest points in our community, it's J street. Sheriff Road is just a street over from, from J street. So, eliminating the U4 bus line from Sheriff Road... Sheriff Road, which has been very intentional in our community, playing in having families with special needs or disabilities, our population who are veterans who have been looking for specific housing in our neighborhood. We have new units coming online at the end of this year and early next year that will have permanent supportive housing, making sure that we are doing our part as a community, that there is enough resources and amenities and transportation access points for all the growth that we're experiencing and the future growth that will come to the Deanwood community, we cannot tolerate any cuts of service and our neighborhood, especially the U4.

We cannot just move forward with a plan, of course with hopes that federal support will prevent this from happening in the first place, but the fact that this was even thought of, is what's alarming for a community that has had to fight and it's in our history, had to fight for every bit of resource in the city: the last to get infrastructure, the last to get transportation, the last to get everything, but we are the first to stand up and say we live here, we pay taxes and we deserve everything that we have been contributing to the city as a whole.

So, it is my, my urging to WMATA to really focus on working with local, regional, and federal partners to increase investments in public transit. You know, steering clear of efforts to privatize future services of WMATA, making sure that you're negotiating fairly through collective bargaining to ensure the essential workers throughout WMATA that have held us down through this pandemic are getting fair wages and benefits and making sure that we are making a real commitment to address climate change.

We should have a fully electrified bus route, and that is something that, bus fleet, that is something that WMATA should be deeply investing in and ensure that in the future years we're making the right savings from how we are expanding our public transportation options. Making sure that we are improving our bus routes so that families can make the connections necessary, so they're not spending two, three hours just to get across town and back. This is the focus that Metro needs to be putting their attention and their money at. And also making sure, I must add on my voice, and pushing back on closing the Metro at 9:00 PM. This will be devastating to working class families

in my community who don't typically work in nine to five job. We are a community of resilient people that travel across this region to work jobs, to feed our families from service, to bartenders, to security guards, teachers, you name it. We have so many people in our community that depend on Metro, especially at night, to make sure that they are doing what's necessary to survive in the city that's not affordable for any of us. So, it's my hope that Metro goes back to the table and put the right investments that are necessary, putting equity at the forefront, and making sure that we are not eliminating the U4 bus route in a Black, thriving community as Deanwood. Thank you.

MS. GIDIGBI-JENKINS: Thank you, Commissioner Green. Next caller?

MR. HOFFMAN: Hello?

MS. GIDIGBI-JENKINS: Hi, can you introduce yourself?

MR. HOFFMAN: Hi. Yes, this is AMC commissioner, Zachary Hoffman. I represent ANC 5D06. I would like to speak on the elimination of the D4 and D8 bus lines that are critical to the Trinidad neighborhood's access to transportation resources. Eliminating these bus routes would be detrimental to our communities as we do not have access to Metro stations. And these buses actually are our way to access the Metro. Many members of the community have made it very clear to me that they depend on these bus routes to get to work, to access medical resources at the hospitals that they service and just to get around the city. We absolutely do not want to see these bus routes eliminated and we need to not consistently propose cutting bus routes that only service areas that don't have any other means of transportation. This was.... these bus routes were proposed to be eliminated the last go-round in the budget, and thankfully they were not.

We also need to address closing the Metro at 9:00 PM. That is absolutely not something that bar and restaurant workers need to, get to and from work, especially when we are, bars and restaurants can be open until midnight. And, in Trinidad, we have a high proportion of bar and restaurant workers and people that work in the hospital, the Washington Hospital Center. So, I asked WMATA to please not eliminate those bus routes and to keep the Metro open past 9:00 PM. And hopefully we can get to a point where Metro runs 24/7, which I know most residents would agree with is a good plan.

MS. GIDIGBI-JENKINS: Thank you, Commissioner Hoffman. We'll now have our next speaker. (Pause) Hi, can you introduce yourself?

MR. JACOB: Hi, can you hear me?

MS. GIDIGBI-JENKINS: Yes, I can hear you. Go ahead, please introduce yourself.

MR. JACOB: Hi, my name is Lukin Jacob and I am a DC resident and a member of Sunrise DC. When I first came to DC, its public transportation was one of the first things I noticed. The subways and buses are reliable, clean, and are critical to residents' abilities to earn a living, receive an education and travel safely. I'm deeply troubled by the proposed cuts to Metro and bus service for several reasons. Service cuts that are purely informed by demand levels overlook real differences in need for public transportation. WMATA must consider not only how many people are using their services, but also whether riders have alternative options. Given the proposed budget cuts, it's clear that WMATA has not done its due diligence, if these cuts are made thousands of Black, Latino, elderly, disabled, and low-income residents, many of whom are the most consistent users of public transportation in the DMV, will be without any service and left stranded, with few alternate means of transportation.

Promises and mission statements of quote, equity, reliability, and affordability ring hollow when WMATA's proposed service changes are on the table. These cuts to service are fundamentally racist and will harm the groups of people that DC claims to serve, many of whom are also essential workers who've continued to work on the front lines throughout the pandemic. WMATA's proposed cuts are not only callous, but also incredibly short-sighted. DC's divestment in transit, or from transit, will bring us longer wait times, even less reliability and a continued decline in service. Since the current operating budget largely depends on passenger fares for the service cuts could be a death blow to our bus and Metro systems. Budget cuts will significantly reduce ridership and revenue leaving WMATA in an even more difficult position. Cuts will also encourage the use of personal vehicles, taxis ride sharing, et cetera, which are not available to many residents who currently rely on WMATA services and will significantly raise costs for anyone else who wishes to travel within the area. We cannot tolerate these changes.

Lastly, with the looming climate crisis and ever-widening levels of inequality, the DMV and WMATA are at a crossroads and the path we take will have long-term consequences. We have roughly a decade to cut DC's emissions in half, and it's clear that investment in affordable, clean, convenient public transportation must be a part of the solution. When we cut our bus lines, eliminate our Metro stations or cutting our lifeline to a more livable future for everyone. We must protect our public trends at all costs and invest in a more equitable future. I urge WMATA to reconsider its proposed cuts to essential services.

MS. GIDIGBI-JENKINS: Thank you for your feedback. Next speaker.

MR. HOLCOMB: Thank you for the opportunity to testify today. My name is Tyrell Holcomb, Commissioner for 7F01 and the chairperson of ANC 7F, which includes the Minnesota Avenue Metro station. I'm concerned about the impact WMATA's proposed budget cuts will have on our community. As a native Washingtonian, I learned how to navigate the city by my family's use of public transportation when I was young. I know firsthand the U4, U5, U6 bus routes are the means of transportation for many of our families, seniors, school-aged young people, and let's not forget our essential workers who depend on public transportation. While the U5, U6 route will be replaced by the U7, there are immediate safety concerns had by community members and anticipated longer commute times. Furthermore, the U4 route would, the U4 route will eliminate bus service to residents of Carver Terrace and a large portion of Deanwood. These proposed service cuts will only create more transportation inequity here in Ward Seven.

Additionally, WMATA closing at 9:00 PM will greatly impact our families, essential workers, hospitality, restaurant workers, local businesses, and ultimately our city's economy. And I can only imagine the negative impact it will have on future opportunities for growth here, East of the River. While we recognize the budget constraints WMATA is facing due to ridership being down as a result of the, of the pandemic, I can't help, as many of us can't help, but to believe that better days are ahead. Therefore, I urge you to not be hasty in making a decision that will only create further transportation inequity, and create havoc for many of those, the folks here in Ward Seven who rely on public transportation. Additionally, many families in Ward Seven and Eight do not own vehicles, and they solely depend on public transportation. So, I ask that as you're making this decision, please don't leave out those that are the last, the least, or considered to be the lost. Thank you so very much.

MS. GIDIGBI-JENKINS: Thank you, commissioner, for your comments and feedback. Next speaker? (Pause) Next speaker?

Okay, just, just as a reminder, for those of you wishing to provide testimony, you should call (512) 580-8850. After calling in you'll need to enter a four-digit meeting code. For this evening, the meeting code is 3-8-1-1. Once you're in the meeting, you'll be able to listen over the phone by pressing star one. If you'd like to provide testimony, you can provide star three, and you'll be put in the speakers' queue. You'll get a message when it is your turn to speak. I think we have our next speaker.

MS. SINGLETON: Hello?

MS. GIDIGIBI-JENKINS: Hi, can you introduce yourself?

MS. SINGLETON: Yeah, I'm sorry. I'm just trying again. I thought I was initially told I was the twelfth speaker, so it's been a little confusing.

Good evening, everyone. Thank you for the opportunity to testify. My name is Patience Singleton. I'm actually an Advisory Neighborhood Commissioner representing Single Member District 4A04, and I'm the current chair of ANC 4A, which represents more than 16,000 residents in upper Northwest Washington. It's the neighborhoods of Brightwood, Colonial Village, Crestwood, North Portal Estates, 16th Street Heights and Shepherd Park.

Public bus transportation is important to the residents of my neighborhood, Brightwood, because the closest Metro stations to my SMD are approximately one-and-a-half to two-and-a-half miles away. Many of my constituents depend on bus lines on a daily basis, some to commute to and from work, others rely on public transit as their sole means to navigate the city. I'm testifying today in opposition to proposed cuts to Metrobus service, specifically the elimination of the 59 limited bus that runs between Federal Triangle, up the 14th Street corridor, passing through Brightwood and 16th Street Heights, and then moving over to Takoma Park, as well as the cuts to the S1 bus, which starts in Brightwood and follows 16th Street downtown, across K Street, over to Potomac Park.

The buses along 14th Street, Georgia Avenue and 16th Street are some of the heaviest, heavily-utilized and often-overcrowded. Because of this, in 2017, I worked with other ANC commissioners and members of the general public to advocate for the addition of a limited-stop bus line from downtown up 14th Street to Takoma Park. I was delighted that WMATA announced the addition of the 59-limited bus route to begin operating in January 2018. Due to its less frequent stops, the route allows commuters along this priority corridor to get downtown DC faster using buses and further set of improves transit accessibility in the district. It also provides additional capacity to relieve crowding on routes 52 and 54. I'm very disappointed that WMATA is now proposing to eliminate the limited-stop 59 bus along a corridor that's desperately needed, and in need of increased public transit capacity. It will disproportionately impact lower-income, immigrants, the disabled, the elderly and persons living farthest from a Metrorail station. I can't stress enough that the northwest portion of Washington, given increased density and population needs more, not fewer, transportation options. Overcrowded buses or long wait times had been a fixture for the 14th and 16th Street buses, which pass through blocks of ANC 4A. During rush hour, which often extends between 4:00 and 7:00 PM, the buses are crowded and persons are not allowed to board because the buses have reached capacity at stops near Columbia Heights.

Increased Metrobus service and improved infrastructure is essential in a growing city to relieve congestion. For example, the development at the former Walter Reed Army Medical Center will soon bring thousands of new residents, workers and shoppers in addition to students who

currently attend DCI School, who utilize the 59 bus. The city must think about how to best accommodate this influx of people without flooding the streets with thousands of additional cars. Maintaining the 59 bus could be helpful in reducing congestion, addressing climate change, and ensuring the district's resiliency. In closing, I recognize that WMATA has to make a number of decisions to improve efficiencies and rein in the costs in the system, particularly in light of the revenue losses associated with the COVID-19 pandemic. However, it seems that the cost associated with eliminating important bus lines, including the 59 and 61 will be disproportionately borne by the elderly, lower-income, disabled, and those individuals living farthest away from Metro lines and others with fewer resources, such as immigrants. I urge WMATA to reconsider these cuts and develop a plan that is fair and more equitable. Thank you.

MS. GIDIGBI-JENKINS: Thank you for your comments, commissioner. Next caller? (Pause) If you're on the line, please... Good afternoon, good evening, can you introduce yourself?

MR. HIGGINS: Hello, can you hear me?

MS. GIDIGBI-JENKINS: Hi... can you introduce yourself? Yes, I can hear you.

MR. HIGGINS: Hello, can you hear me?

MS. GIDIGBI-JENKINS: Yes, I can hear you. Can you introduce yourself?

MR. HIGGINS: Yes, I am John Higgins. I am a commissioner with the ANC 3/4G representing Chevy Chase, Hawthorne and Barnaby Woods. I want to thank WMATA for the opportunity to speak today with these brief remarks, and we ask that our full written testimony be included for the, for the record. WMATA is proposing temporary curtailment of service on the E6 and M4 routes and permanent elimination of these routes in the spring of 2022. The position of our ANC is that these bus lines should be restored to their original full-service, pre-pandemic status on a permanent basis.

Our ANC and the DC Office of Planning are just now embarking on a small area plan designed to retain and enhance the vitality of our neighborhood for the long term. It is acknowledged that robust public transit will be a key element in achieving these goals, according to the DC Office of Planning Report of April 2019. Both the M4 and E6 bus routes support the communities affected by the ANC small area plan. Under WMATA's proposed, proposal, students would lose bus access to Lafayette Elementary School. Some parents report they ride the E6 with their children to Lafayette, and then continue by bus to the Friendship Metro. The principal at Lafayette has said we would definitely feel the E6 if it were missing. The E6 bus service is particularly important for seniors who live at the Knollwood Life Plan community on Oregon Avenue. Knollwood and other area residents rely on the E6 to get to the Chevy Chase Community Center, the public library, the Safeway, the CVS pharmacy and medical services. This bus service is a lifeline for our seniors. Commuters in the neighborhood also use it to get to the Metro. And DC frontline healthcare employees at senior facilities of Knollwood and Ingleside are among the critical users of both the M4 and the E6 public transit routes.

WMATA on the record for recognizing the importance of the M4 for students, which makes the proposal to eliminate the service at Woodrow Wilson and Alice Deal particularly questionable. The timetable published by WMATA shows to a special student runs at Tenley Circle at 3:20 PM and 3:25 PM daily, terminating at Pinehurst Circle. The timetable notes that this trip operates only on days when public school is open. How can WMATA recognize the public school need, and

then propose to eliminate the service? Rather than being cut, student runs should be expanded to accommodate other school activities, to help students get home. According to one resident, when school is in session in the morning, the afternoon, my children have had to wait for almost three buses sometimes because the buses have no room to let them board. Meanwhile, the population is exploding. Deal had 800 students ten years ago, and now has 1700, with forecasts of more than 2000 in a few years. In the view of ANC 3/4G, it is almost incomprehensible that WMATA will propose elimination of both of these routes. And generally speaking, WMATA cannot shrink itself to prosperity. We urge WMATA to reconsider the proposed changes and restore full, original and pre-pandemic service of the M4 and E6 public transit routes in our community. Thank you very much.

MS. GIDIGBI-JENKINS: Thank you, commissioner. Next speaker? (Pause) Next speaker? Hi... can you introduce yourself? (Pause) Can you hear me?

MS. FLOY: I have already spoken. I'm just listening at this point, thank you.

MS. GIDIGBI-JENKINS: No problem, thank you. Thank you all for our patience. I know we have several more speakers on the line who are hoping to share their feedback... and we're looking forward to hearing it.

MS. BROWN: Hello? Can you hear me? OK?

MS. GIDIGBI-JENKINS: Yes, can you introduce yourself?

MS. BROWN: Sure, my name is Tiffany L. Brown and I'm the ANC Commissioner of 7B02. And I'm the chair of ANC 7B, which is home to Hillcrest, Fairfax Village, Dupont Park, Twining's, Penn Branch, Randall Highlands and Naylor Gardens. I am here to inform you what matters to my community. We oppose the changes proposed in the FY22 WMATA budget.

ANC 7B is home to several bus lines. We do not have a Metro station within our community. The closest rail service to our community is across the Sousa Bridge at Potomac Avenue, thereby making the Metrobus a necessity for us. Based on the changes outlined, we oppose the elimination of service on the 30N, 30S, M6, and V7, as it has, as it will have an adverse effect on our community. Our area has many residents and students who either depend or prefer to use WMATA bus service or transportation. Our students will need reliable transportation for in-person learning or when school is fully open. Our seniors enjoy hopping on the bus to attend medical appointments or shopping. Removing our options and asking us to walk further to reach bus stops or to reach another bus will have an adverse effect on us. If residents who can are forced to drive because public transportation is no longer an option, this will have a negative effect on our carbon footprint, further contributing to our community's traffic congestion problem. Removing that access will leave our residents stranded. During this time, we need more access to public transportation, not less. Again, the community strongly opposes the elimination service on the 30N, 30S, M6 and V7. Thank you for the opportunity to speak.

MS. GIDIGBI-JENKINS: Thank you, commissioner. Next speaker? (Pause) Thank you for all of those who are still waiting to speak, for your patience. Next speaker?

MS. MORRIS: Hello?

MS. GIDIGBI-JENKINS: Hi, how are you?

MS. MORRIS: Yes, my name is...

MS. GIDIGBI-JENKINS: Yes, can you introduce yourself?

MS. MORRIS: Which...? Is it my turn?

MS. GIDIGBI-JENKINS: Yes.

MS. MORRIS: OK, I'm sorry, I heard another voice. My name is Rebecca Morris, I'm the commissioner of 7D06, which is the area, the Deanwood-Monroe area. I'm testifying to keep the U6 and the U5 bus stops, the U6 and U5 bus routes, as-is. I've been a rider U6 and U5 for about 15 years. It has been a bus that has saved many lives in the Benning Park and Lincoln Heights area. Those are huge areas that contain citizens who work service jobs or work security, which can be night jobs. Having no bus around puts people at risk to get robbed, shot or killed. We also have disabled and elderly populations who utilize those buses in those areas, as well as students. Taking away those buses and making them walk to Benning Road or East Capitol Street is just wrong. I just want you guys to keep the bus lines as is.

And so, because that is one of the only ways that people can get to the grocery store as well, in a large, which is the only grocery store in a large, in miles away, I will also like to see the train stay open, in the light, in the late-night. For many essential workers, Ubers and Lyft are expensive for those who East of the River. Forcing people to pay \$15 to \$30 to get home would truly place families in a bind.

If we want to move towards a carless city and want restaurants, restaurants to go on a late night, for their late-night leisure, please consider them when they have no way to go home. I strongly, I strongly suggest that we keep things open.

MS. GIDIGBI-JENKINS: Thank you, Commissioner Morris. And it sounded like there was someone else on the line. Do you want to speak up, sir?

MS. JONES: Good evening. And thank you for the opportunity. My name is Carol Jones. I'm also calling on behalf, to implore Metro to salvage the U5, U6 bus line. The U5, U6 bus goes to Lincoln Heights, Marshall Heights. There are several senior citizen buildings, only one grocery store in this neck of the woods, and it will be a hardship and a devastating event to eradicate the U5, U6 line. Thank you.

MS. GIDIGBI-JENKINS: Thank you for your feedback. Next speaker?

MR. JOHNSON: Hi, good evening, can you hear me?

MS. GIDIGBI-JENKINS: Yes.

MR. JOHNSON: Hi, this is Cortez Johnson calling from Fairfax Village over in Southeast Washington, DC, in Ward Seven. And I am, thankful for the opportunity to actually just voice some concern. Specific, of my concern is an opposition to the proposed WMATA 2022 cuts, specifically for the M6 bus line that actually runs throughout the Pennsylvania Avenue corridor, in specific to Fairfax Village. I live in Fairfax Village, I've served in this community for fifteen-plus years, and I've grown up in this community as well. Removing that particular bus line, you know, is, is completely detrimental to the residents, including myself, in this community. We have elderly residents. We have kids that go to school and we have a lot of people who actually, you know, they, they do take public transportation. We don't have access to a lot of amenities, essentials, basically such as grocery stores, health care facilities. You name it, we probably don't have it.

And so, really, really, just concerned about the, the proposed cuts. We should not be eliminating the M6 line because that's essentially what would happen under this proposal. We had two bus routes before, in the last 10 years, the V5 L'Enfant Plaza to Fairfax Village, that was cut; the M2, Naylor Road to Fairfax Village was cut. So that's leaving us basically with a single point of failure, which is the M6, which now is proposed to be completely eliminated.

So, in any event, in closing, I just want to say that I think there's a better way to do this, and I'm glad that a lot of people are speaking out in opposition. I think that our voices, collectively, will be heard. And I really, really encourage WMATA to reconsider the cut of the M6 line, specifically for those people that are disadvantaged in this particular community. Thank you.

MS. GIDIGBI-JENKINS: Thank you for your feedback. Next speaker? (Pause) Next speaker, if you want to introduce yourself? (Pause) If you haven't already spoken and you'd like to be added to the speakers' queue, press star three on your phone to be added to the speakers' queue. (Pause)

Because we want to hear from you, we will wait until we can. I know that there are a few other folks who are having a little bit of technical difficulties. Again, I want to remind you that if you're wishing to provide testimony tonight, please call (512) 580-8850. Again, that's (512) 580-8850. After calling in you'll need to enter a four-digit meeting code. For this evening's meeting code, the code is 3-8-1-1, again, that's 3-8-1-1. Once you're in the meeting, you'll be able to listen over the phone by pressing star one. If you'd like to provide testimony, you can press star three and you'll be put in the speakers. You you'll get a message when it is your turn to speak.

For those of you on the line now who want to speak, go ahead and press star three to get in the queue. Next speaker. (Pause) Okay, well, I'm being told that there's no one else in the speakers' queue. I'm going to give one last call for testimony...looks like one last person has come through.

If you haven't already spoken and would like to speak, please press star three on your phone to be put in the speakers' queue. (Pause) Okay, well, if you'd like to provide oral testimony, but aren't able to wait until you come up in the queue, you can press star two to leave a voicemail. Your voicemail will be transcribed and included in the hearing record. In order for the public record to accurately reflect who's providing testimony, I'd ask that you just state your name and any organization you represent before your testimony. (Pause)

MR. PASTERNAK: Hello, this is Mo Pasternak, I'm the ANC Commissioner for Dupont Circle, ANC 2D04. Can you hear me?

MS. GIDIGBI-JENKINS: I can hear you. Welcome, commissioner. Thank you.

MR. PASTERNAK: Wonderful. Thank you so much. We've had about an hour and forty-five minutes of comments and, unsurprisingly, nobody has supported the cuts. A couple other speakers have noted the broad opposition and that's really unsurprising. Part of my frustration is also that there's no understanding of what things cost. So, obviously everybody's opposed to cuts, but it's, it's unclear how much you saved by closing twenty-two stations, how much is closed by cutting the G2 service, eliminating the G2 service, how much is saved by various bus and rail cuts? So, it's kind of tough to, to really provide any constructive feedback other than saying cuts are bad. But it, it is telling that, you know, for example, eliminating the G2, WMATA says there's no alternative service available. So, that's obviously a concern.

And I just want to share that, you know, if you're just going to look at where comments are heard, as far as opposition to a, to a bus cut, that's historically going to hurt underserved communities, so hopefully there's, there's some other elements, but because this is just sort of speaking into a black box, there's no way of knowing how this testimony is being factored into the decision.

And I think it's also frustrating that there isn't really an update as far, as far as what the budget situation looks like with the expected passage of federal relief. You're, you're focusing on a lot of cuts and then say they might not even happen, but still just entirely unclear. And I hope that you provide updates and extend the public comment period once you can present a more realistic plan. And lastly, I'm especially disappointed that we're talking about all these cuts and you're still proposing a \$36 million increase for the Metro Transit Police Department, as opposed to providing more services to riders, which is the real mission of WMATA. Thank you.

MS. GIDIGBI-JENKINS: Thank you, commissioner. And just a reminder, since we're doing this hearing virtually, this hearing is going to look and feel different. We would normally have a presentation from our Chief Financial Officer, but in order to get to your comments and testimony, we have instead posted a video at wmata.com/budget that provides an overview of next year's proposed budget.

Also, this evening, I was able to share that, in short, Metro is proposing to maintain operations and increase service to meet demand through December 2021, with the need for severe service reductions, beginning in 2022, without additional federal funding. However, this weekend the Senate did pass another COVID relief bill. And while the bill is still being approved by the House, and hopefully it will be signed by the President, it will take some time to calculate exactly how much funding Metro will receive. We're encouraged that this, that a significant amount of relief for transit is expected to be included in the final bill. This will help us to minimize the service reductions in 2021. We will likely be able to avoid the worst of the service cuts that were on the table when we took this budget proposal out to the public. With that bit of good news, I still want to turn back to any speakers who are still on the line. Ultimately, this is an opportunity to hear from you. Your testimony will help inform our decision making as a Board.

ANONYMOUS: Hello?

MS. GIDIGBI-JENKINS: Yes. Can you introduce yourself?

ANONYMOUS: One moment. (Pause) (Music playing)

MS. GIDIGBI-JENKINS: Hi. Can you introduce yourself?

MR. S.: Hello, can you hear me?

MS. GIDIGBI-JENKINS: I can hear you, can you introduce yourself?

MR. S.: Hello. How are you doing today? My name is Tommy S and I'm a high school student and a Maryland resident. I'm not a representative for any town board or anything, but just a concerned citizen who would like to voice their opinion. Is that all right?

MS. GIDIGBI-JENKINS: That is always OK. Go ahead, Tommy.

MR. S.: As, as a, as a high school student, a sophomore in high school, I've grown up here in the DC, DMV area for my entire life. And the Metro's always been there for me as a form of transportation with family, or just by myself. And it's a great feeling to know we have a system that

can provide us, when we need to go places, multiple areas at once. And closing in my opinion, and closing them down at nine o'clock would really interfere with a lot of schedules, for not just young college students, but also with older adults and the elderly, because as stated before by some other people, it really does interfere with schedules and those who work late night shifts, up to, into midnight or early morning, can't get back, due to the Metro being closed or some bus routes being closed.

And to follow up to a comment, I heard of a man saying that it's good to close, the stations. I feel, I can understand closing some of them, but with closing them, I feel it really impacts our economy for the worse. And Metro, I feel should be pushing forward and pushing to help the community by staying open longer, and also helping their employees by paying them well, and everyone being treated fairly. I think closing our system will just make our DMV area transit and everything in general, worse and a lot more chaotic with spreading COVID and getting people, not where they can't get, so they can't get to work, they can't get to everything on time, and it really will interfere with the community schedule. If that makes any sense. Thank you for your time. I really do respect what you guys are doing and, thank you.

MS. GIDIGBI-JENKINS: Thank you, Tommy. It does make sense. I'll take our next speaker?

MR. BROWN: Yes, good evening, can you hear me?

MS. GIDIGBI-JENKINS: Yes, I can hear you. Can you introduce yourself?

MR. BROWN: Yes. This is commissioner Kelvin Brown. I represent a single member district 7D06, which includes the Hillcrest community as well as Fairfax Village in Ward Seven in the District of Columbia. And I'm happy to virtually be here today with you all, and equally happily that WMATA is holding these hearings to hear directly from local leaders, who, we interact with our residents, our constituents on a daily basis to improve their overall quality of life.

As many have noted before me access to affordable, safe, and reliable transportation is critical to all of our constituents who live, work and play within my district, and across the District of Columbia. Now we know that without access to transportation, a person's state of, well, wellbeing is impacted and communities decline. We must work together to ensure we safeguard access for residents regardless of their ZIP codes or financial status, and equitable access to transportation is a fundamental right that we cannot and must not be abridged. WMATA has a responsibility to ensure residents are not negatively impacted when decisions are made to cut bus routes. Profits and financials should not be the most heavily weighted factor in decision-making.

Studies have continued to show that lower-income seniors, people of color, disabled persons, persons without housing and returning citizens are often impacted when access to transportation is limited. The lack of adequate transportation has a direct correlation support levels of health, lower levels of education attainment, and the list goes on. So, we're, we're talking about transportation, but what we're really talking about today is our residents' future outcomes.

In 2013 a review published in the Journal of Community Health found that 25% of lower-income patients have missed or rescheduled their appointment due to lack of transportation. Those same patients also reported issues with transportation, also missed filling prescriptions, and were more than twice as often as patients with the same problem. These decisions have consequences that could lead to inadequate management of chronic illnesses as well as poor health and overall life outcome.

It's our duty and responsibility to ensure those without a voice have a seat at the table to express their concerns and gain meaningful redress. As elected official for my Single Member District, I implore WMATA to reconsider cutting the 30S and 30N bus routes. If these routes are to be cut, it would have potential life-and-death impacts for so many residents within my district and across the District as a whole. Over the past few years, my district has seen several cuts to vital bus routes that have serviced our community. And as a result, these cuts, many residents have had to walk miles to transportation or rely heavily on relatives or pay an exorbitant amounts of money to Uber and Lyft just to get to work, or transport their child to school, or get groceries and simply get medicine. And, so, in my opinion, no one should be burdened or disconnected from resources because of inadequate transportation or lack thereof.

These proposed cuts must be taken off the table and safeguarded because the lives of my residents, our residents, my neighbors, literally depend on it. So, in my testimony, I've talked exclusively about inequity that exists with these and previous cuts, but there are many more negative impacts from cutting services. Instead, I believe WMATA should be working to expand services to underserved communities by working with new technologies to electrify buses and cut carbon emissions, working via collective bargaining agreements to ensure that none of our essential workers, bus drivers, et cetera, lose their jobs, medical benefits, or wages. Also, should, we should, instead of closing Metro at 9:00 PM, we should extend it for workers who work late-hour shifts to make sure that everyone gets home in a safe and sound manner. And so, in closing, I thank you for your time also your consideration in this matter. And I'm relying upon WMATA to ensure resident voices are heard during this process. And that profit does not dictate the final outcome of this conversation. We must....

And so, in my opinion, no one should be burdened or disconnected from resources because of inadequate transportation or lack thereof. These proposed cuts must be taken off the table and safeguard because the lives of my red, our residents, my neighbors literally depend on it. So in my testimony, I talked exclusively about an inequity that exists with these and previous cuts, but there are many more negative impacts from cutting services and stay at, I believe, well, motto should be working to expand services to underserved communities by working with new technologies, to electrify buses and cut carbon emissions, working via collective bargaining agreements to assure that none of our essential workers, bus drivers, et cetera, lose their jobs, medical benefits, our wages also should, we should, instead of closing Metro at 9:00 PM, we should extend it for workers who work late-hour shifts to make sure that everyone gets home in a safe and sound manner. MS. GIDIGBI-JENKINS: Commissioner?

MS. MAXWELL: Hello?

MS. GIDIGBI-JENKINS: Hi. Before you start... Commissioner Brown, if you want to hit star three again, we'll try and get you back in the queue, but thank you for your comments. Next speaker.

MS. MAXWELL: Hi, yes, my name is Tara Maxwell. I speak for several transportation and transit organizations in the Maryland, Virginia and DC area. And I am thoroughly surprised that they are still talking cuts at this particular time, when there has been a new bill in Congress that will be voted on, on Wednesday. Considering that most of the Board of Directors, including Mr. Smedberg, sits on committees in Virginia, DC and Maryland; they actually have more information

than is being shared with the public at this particular time, as far as the budget shortfall and things of that nature. And, instead of looking for alternative and innovative ways to cut other things other than operational costs, they're looking directly at operations costs when you still need more operations cost.

Congressman Gerry Connolly has had a bill in Congress since before COVID, that has not been voted on, that actually covers transportation operations cost for WMATA. There are other bills, two other bills that have been in Congress before, pre-pandemic, where they have not passed through Congress, that can be utilized to cover some of the operational costs. So, I am just really confused at this cut, cut, cut mentality, and the fact that most of the people that are actually on the Board of Directors sit on other committees, and are chairs on other committees, that understand what exactly is going on, yet they still ask for cuts. So, I would like to see the 3% cap on growth that is the responsibility of all three jurisdictions be waived or suspended during the pandemic until a year after the pandemic. That is one way that they can minimize operational costs. There are several other ways that they could do this instead of just going toward ridership and affecting the most and the least of the communities in the Washington, DC, Virginia, and Maryland areas.

It is really appalling to me the approach that is being taken. And I am happy to hear so many people that have called in to speak. Unfortunately, I don't think that's really gonna make a difference. The numbers, \$212 million budget gap, can be overcome if some of the ideas that I just suggested are put into play. And if someone comes up with other ideas instead of just cutting ridership services. It makes no sense. Please make it make sense. Thank you.

MS. GIDIGBI-JENKINS: Thank you, Ms. Maxwell. Next speaker? (Pause) If you'd like to be placed in the speakers' queue, please hit star three. (Music playing).

Hi. Hi, can you hear me? Hello?

MS. NICHOLS: Hello, can I be heard?

MS. GIDIGBI-JENKINS: Yes.

MS. NICHOLS: Hi, I can hear you!

MS. GIDIGBI-JENKINS: Okay.

MS. NICHOLS: Hi, my name is Kimberly Nichols and I live off the Morgan Boulevard stop. So, I'm just a regular old citizen.

MS. GIDIGBI-JENKINS: And that's who we want to hear.

MS. NICHOLS: (Laughs) And I'm here, and I'm here to actually complain about three stops that I think are being unfairly targeted because, where, or because of the pandemic. So, my stop is Morgan Boulevard Station. Already, we're not serviced by Metrobus and you can see the impact of that. Because we have Six Flags America in close to us, we have FedEx field, we have Jump!, we have Dave and Buster's and many more coming attractions at our stop, but you have to see all these workers walking from Morgan Boulevard station all the way, like half a mile or a mile over to where they work, just because there's no Metrobus on our stop.

Also, there are tons of people who live in the area who work in DC. So, taking the stop away would quite honestly stop lots of people from getting to their job. We are more valuable than, I

mean, than the low ridership that you have right now, simply because there's a pandemic going on.

Second Mount Vernon, Mount Vernon Square is also the convention center stop. Closing that would close off, you know, it would close off access to all those great conventions that you, the stop, you know, things like Oticon and Awesome Con USA and the USA Science and Technology Fair that invite crowds and crowds of people that spend in the local economy at that stop. So that stop is still very valuable, even though right now, there's a pandemic going on and those events cannot happen.

The last one is this Smithsonian station, which I can't even believe is on the list. The Smithsonian was a gift from a man called John Smithson, and he believed in giving information to all the classes by making that education free. There are 19 institutions in the Smithsonian that give information to everyone. And we know that because buses, and buses, and busloads of people crowds the Metro just to get off at the Smithsonian. However, the Smithsonian is closed right now, due to the pandemic. These three stations offer a lot to the economy and cut them off.

MS. GIDIGBI-JENKINS: Thank you, Ms. Nichols. Appreciate your comments and feedback. Next speaker, and just a reminder...

MS. CUMMINGS: Hello, can you hear me? My name is Leslie Cummings...

MS. GIDIGBI-JENKINS: Yes, we can hear you Ms. Cummings.

MS. CUMMINGS: I am a federal worker who lives in the state of Maryland and I need to, I don't have my own transportation. I have been taking public transportation since I came to live in Maryland back in 1979. It has not always been easy to get around, but I've come to love the DC metropolitan area so much that I have taken any means of public transportation I could, just to be a part of this great and wonderful city. I was fortunate to get a federal position. And when I moved to a place in Maryland, I found there was no buses, no train station. I was spending up to \$60 round trip every day for two years, to get myself back and forth to work in Washington DC. Now that you guys have these wonderful buses and trains, and it's close to 40 years since I been working for the government, every time you make an improvement, it's for the better.

However, I'm very disappointed that the improvements that you claim to be making, in these proposed budget cuts for all of the rail stations and bus stations in the DC metropolitan area, are sadly, a step backwards, and not a step forward. What we are all suffering through this pandemic. and some are fortunate to work from home and some have very essential and must be at their jobs. And whatever you guys were thinking, when you decided to cut these services is not really helping to ease the pain and suffering and loss of unnecessary lives due to this pandemic. I implore you, as an American citizen and as a faithful public transportation rider, to please reconsider your options. Listen to our citizens, hear the voice of the people and do what needs to be done. If you can reach people, we can reach people at the federal level, the state level, the local level, we can write to our Congressman and senators, we can write to our alderman Councilman, county executives, whoever we need to reach. We the people need to go ahead and put out a huge petition, sign it and send it to WMATA along with our written testimony. Thank you for allowing me to speak. Everybody have a blessed night.

MS. GIDIGBI-JENKINS: Thank you, Ms. Cummings. Next speaker. (Pause) Please press star three to be added to the speakers' queue. Hi, can you introduce yourself?

MR. STERNLIEB: Hi, Joe Sternlieb, can you hear me?

MS. GIDIGBI-JENKINS: Yes, I can hear you.

MR. STERNLIEB: Hi, I'm Joe Sternlieb. I'm the CEO and President of the Georgetown Business Improvement District, testifying on behalf of, on behalf of the organization today. The Georgetown BID understands that the proposed Fiscal 2022, Metrobus cuts and changes are budget driven, given WMATA's obligation to present a balanced budget and its funding and ridership uncertainty. However, the cuts to Georgetown service area will have disproportionately negative impacts on our commercial district, the university and the hospital, and its ability to recover from the pandemic. We pledged to support the efforts to get sufficient pandemic relief funding from the federal and regional governments to ensure these cuts do not occur. And we pretty much want to work with WMATA to ensure that these cuts do not occur.

Georgetown is the largest employment center in the district of Columbia that is not served by Metrorail. It is not on the city's grid and has very limited roadway access in and out of the neighborhood. We were extremely dependent on Metrobus to get our employees shoppers and visitors to the neighborhood. We simply don't have the roadway capacity to accommodate thousands of employees if they can't take the bus. Just as a point of reference, we have about 23,500 employees who work in Georgetown with no access to a, direct access to a Metro station. Specifically, a large number of Georgetown BID area employees, especially hourly workers with limited transportation options, use the 30N, 30S and 38B to access their jobs. Just outside the BID, the university and hospital are heavily dependent on the D2, D6 and G2 buses. The elimination of all these routes in the third quarter, notwithstanding some limited increases in the 31 and 33 buses, will force people into two- and three-seat rides that will extend commute times beyond reasonability.

This burden will fall disproportionately on lower wage earners and people of color. Georgetown's recovery strategy is focused on increasing sidewalk width, removing parking and heavily marketing Metrobus as the preferred way to get to the neighborhood. The proposed bus service cuts will undercut this effort to the detriment of both Georgetown and WMATA, limiting the labor pool from employers and negatively impacting our ability to recover. We urge the WMATA Board and regional jurisdictions to come together to ensure that bus service to Georgetown, as well as to other neighborhoods that depend on it, is not eliminated in a draconian fashion, in such a draconian fashion. And we stand ready to work with you on both funding and operational solutions to ensure that Georgetown remains accessible by Metro bus.

MS. GIDIGBI-JENKINS: Thank you for your comments, thank you for your feedback. Next speaker. Please press star three if you'd like to be added to the speakers' queue.

MS. HOUSEAL: Hello, can you hear me?

MS. GIDIGBI-JENKINS: Hi, I can hear you.

MS. HOUSEAL: Oh, great. So, my name is Delia Houseal, and I'm the Vice Chair of Advisory Neighborhood Commission 7E. My Single Member District is 7E06 and it's in the heart of Marshall Heights and is bound by the Capitol View – Benning Park neighborhood. Residents primarily rely on the U5 and U6, W4, 96 and V8 bus lines as well as the Benning Road Metro. First, I want to thank Board members of WMATA for making the commitment to conduct hearings about the Fiscal Year 2022 proposed Metrobus and rail service changes.

While I understand the significant budgetary constraints imposed by reduced ridership, I am strongly opposed to the proposals which will dramatically reduce our community's access to valuable public transportation. Our area has many residents who either depend on or prefer to use bus and rail service as their primary mode of transportation. Reducing and or eliminating access to bus and rail service will significantly reduce access to grocery stores, schools, critical healthcare, jobs, and other daily necessities. Further, asking residents to walk further to reach a bus stop will increase their travel times, and for many disabled residents and students make access nearly impossible. By cutting and/or modifying service, you give people no choice but to use cars, further increasing our carbon footprint and contributing to our community's traffic congesting problems.

According to WMATA's *Equity in Transit* initiative, Metro is committed to providing equitable transportation because the communities we serve are stronger whenever, when, when everyone has access to reliable and affordable transportation. Unfortunately, the proposed budget cuts are not consistent with WMATA's statement on equity. And in fact, the proposed cuts will exacerbate inequities in transportation as Wards Seven and Eight bear a disproportionate burden of the proposed service reductions and modifications. While we understand that adjustments must be made to reflect budget concerns, these adjustments must not be made on the expense of the city's most vulnerable populations.

While I am encouraged to hear that additional federal resources will be made available to WMATA, I hope that this also translates to WMATA rolling back the massive cuts that were originally proposed, specifically the changes and cuts proposed to the U5, U6, W4, 96 and V8 bus lines as many residents depend on these routes to access jobs, healthcare, schools, grocery stores, and other amenities. Again, we implore WMATA to reconsider these massive cuts to rail and bus services that impact the residents of Ward Seven.

Lastly, while I'm grateful for this form, the outreach provided by WMATA to their advisory neighborhood commissions and surrounding communities was grossly inadequate. For example, notice was just recently sent to commissioners on February 24th, and there has been no communication or explanation of potential impacts to bus routes or rail service. Additionally, many commissioners and residents first learned about the proposed reduction in service when met with flyers were handed out at the Metro stations. While the public comment closes, given that public comment closes on March 16th, this has really given ANC's fewer than 30 days of notice to gather feedback from constituents, raise awareness, and coordinate a response. As elected officials, we welcome and encourage ongoing and continuous engagement with WMATA, particularly around issues that have a significant impact on residents' access to critical transit services. Again, thank you for the opportunity to provide feedback.

MS. GIDIGBI-JENKINS: Thank you, commissioner. Next speaker?

MS. TABLER: Good evening, can you hear me?

MS. GIDIGBI-JENKINS: Yes, I can hear you. Can you introduce yourself?

MS. TABLER: Yes, good evening. My name is Anna Jane Tabler and I represent myself. I am a resident of Arlington, Virginia, moving into the District in a few weeks. I'm echoing a lot of sentiments.... Yes, thank you, I'll go ahead. I'm, I'm echoing a lot of sentiments of equity, accessibility and mobility that many concerned citizens and ANC commissioners have echoed this evening. But I just wanted to point out a few examples, of, on the survey that WMATA has

put out about closing specific rail stations and how that might affect communities who rely on Metro accessibility.

So, for example, if Federal Center Southwest or Federal Triangle, Mount Vernon Square were to close, there are other options for pedestrian walking. But, if East Falls Church was too close, there, isn't an accessible way to access the Metro in any other form. The closest one is either West Falls Church, which is 2.4 miles away, or Ballston, which is 2.8 miles away. And a lot of people have mentioned that mobility is defined as a 0.5 mile walk to a Metro station. So, I'm urging Metro to view their budget cuts through, you know, mobility and equitable lens. So many people are moving out of DC as the rent prices are increasing. And so, you know, closing these neighborhoods stations without any real solution to what we're doing with closing these stations is just not an adequate solution right now. So, I'm grateful for this opportunity and appreciate your time this evening.

MS. GIDIGBI-JENKINS: Thank you for your feedback and your patience. I believe... I'm being told that there is no one else in the speakers' queue. I'm going to give one last call for testimony. If you haven't already spoken and would like to, please press star three on your phone to be put in the speakers' queue.

Okay, well, that was our last speaker. This hearing is now concluded.

Testimony can still be submitted online or via US mail as long as it's received by Metro by 5:00 PM Eastern Standard on Monday, March 16th. Thank you again for joining us and taking the time to provide testimony. We look forward to incorporating and hearing your feedback as we make our decisions as a Metro Board. Have a good night.

Voicemails Received as part of the public hearing record:

Received 2/25/2021, 6:39 p.m.

Hello, my name is Carol Jones. xxx-xxx-xxxx. I'm calling in protest. You cannot take away the U5, U6 which is the Lincoln Heights and Marshall Heights bus. They already don't have service in the snow and to totally take away the service is unreal.

Received 2/25/2021, 4:55 p.m.

Please do not discontinue the U5 bus. xxx-xxx-xxxx That's the only way I can get to work from where I live. Thank you.

Received 2/28/2021, 4:38 p.m.

Cheryl Jones. Please do not eliminate the U5, U6 bus. That's the only bus line serving my neighborhood. We have a lot of senior citizens and a lot of people who depend on that bus to go to work and school and shopping and everything. Please do not eliminate the U5, U6. Thank you.

Received 3/8/2021, 6:19 p.m.

Hi, my name is Rainey Arduopolis. I live on MacArthur Boulevard and take the D6 for everything. It is my only mode of transportation. I work at a hospital, Sibley to be specific. It is the only way that I have to go to work and come home. Also, the other hospital on the D6 line, MedStar Georgetown, is also served by the D6. If the D6 is eliminated completely, there are two major hospitals in the city that no longer have public transportation coming. Therefore, employees are

going to suffer. Patients are going to suffer. You cannot eliminate this line completely. There's no other way for us to get around. You show alternate routes, but in order for me to get to that, I have to have public transportation and there is none. So, I, in essence, will have no form of transportation. I've lived in Washington, DC since 1950. I have always used Metro. I have never owned a car. It is my mode of transportation, and I have always spoken very highly of it. Please reconsider. You cannot totally eliminate it. I understand, if you want to cut back, we, we can adjust to some mode of transportation, but I use it not just for going and coming from work. I use it to go shopping, to go to meetings I go to. To go visit friends. It is my mode of transportation. I can't stress that strongly enough. Thank you.

Received 3/8/2021, 6:57 p.m.

Hi, my name is Kelsey McKim, M C K I M. And I'm a Ward Three resident. Currently I'm able to work from home, but before that, I commuted using the Red Line and I have many concerns about the proposal, but in particular, I'm concerned about the elimination of rush hour scheduling. Even before the pandemic, sometimes when I would get on, when I would go to the Van Ness station to board, the train would be too packed for me to enter and I would have to wait for one or two more trains. And so, if you're eliminating in rush hour, that means I could be waiting up to 30 to 45 minutes just to be able to board a train. And if stations like Cleveland Park are eliminated, then that will just further increase congestion at Van Ness, meaning I could have to wait maybe even an hour to be able to get on board a train. So, I strongly oppose that measure.

Received 3/8/2021, 7:07 p.m.

Hi, my name is Christina and I'm a DC resident. I've lived here for five years. And I wanted to give feedback on Metro's proposed cuts as a resident who has a physical disability and depends on buses to get around when I'm unable to walk places, especially to do things like pick up groceries or hold heavy things. Mostly the example that's coming to mind is groceries. And I live in Woodley Park and there's proposed cuts to both the 96 and the L2 bus that would affect where I live and limit this area that already isn't really near an accessible grocery store to make it so that there is no way to get to the Giant in Cathedral Heights and the stuff that is in that direction. And also not be able to use the L2 to get downtown or other places to access things like grocery stores and to get downtown to work.

Especially with more people getting vaccinated, I intend to return to work downtown and will be unable to do so, because I will have trouble getting on trains if they're 30 minutes apart, and then will also have to, you know, have trouble getting downtown because I'm not able to walk there, necessarily. Public transit is essential for our city, you know; proposing cuts to it is classist, racist and ableist. We really need it. It really affects the most vulnerable people in the city, to make cuts to it and to change it. And also could pose further COVID risks if trains only run every 30 minutes on the Red Line and other lines, then more and more people will be on those crowded trains and most people will not have to fit. And then less people will ride Metro if that is the experience and it is uncomfortable, so it'll be kind of counterproductive.

There has to be more ways to make buses and Metro, but especially buses, accessible. I know I'm not the only person with a disability who relies on that. Elderly people, workers, and essential workers especially, need bus services and especially with climate change and how crowded the city is we really can't have more reliance on cars and Ubers and other things to get groceries, to

get around. And especially having Metro close at 9:00 PM is really limited, it's really limiting to people who work late, people who need to get home when it's dark, people who don't want to wait at a bus stop, people who can't safely walk home in the dark. You know, that puts like a lot of, you know, threatens lots of people's safety to not be able to get home when it's dark and it's late and not everyone can afford to take Ubers. I really encourage Metro and WMATA to take these concerns seriously that a lot of people have had this night on this call. It's just, it's really important that in a place like DC, that people pay to live next to Metro stations. I know I personally chose to live near the Metro and on bus lines because I have a disability. I need access to that and to have the buses near me.

Received 3/8/2021, 7:24 p.m.

Hi there. I've been trying to speak for a while. I'm not sure what's going on with, with the mic. But I decided just to leave a comment because, um, I, I think I've heard that the tone, like three or four times now, it's just not working. My name is Yannik Omictin, I'm an Advisory Neighborhood Commissioner representing Single Member District 2A01, the Southeastern portion of Foggy Bottom.

I'll start by noting that the public comment period for this budget cycle is short enough that we, as a commission, 2A, won't even have a meeting during the comment period. Our next meeting is the day after the public comment period closes. So even if that weren't the case, I think that the comment period must be extended. These are some of the most devastating proposed changes to Metrorail service in decades, and Metrobus service, and we need more than three or so weeks to sift through all of this.

We also know that DC has recently discovered a surplus to the tune of \$500 million, and Virginia is enjoying a similarly unexpected increase in revenue. WMATA needs to work with these jurisdictions to get additional subsidy and dramatically stave off these changes. I want to reiterate that I strongly, strongly oppose, oppose almost all of these cuts and believe that they will massively fall on the DMV's working class.

But here are some of the more particular comments that I've got. The first is the proposed changes to the 30N/S need to be bolstered by the implementation of timed transfers in downtown between the 31/33 and 32/36. One-seat rides from from Northwest to Southeast are indeed critical, but the proposed alternatives can only serve the same purpose if transfers are timed in downtown though a kind of managed dispatch, and if late nights service is maintained. Waiting for long periods at night, exposed to the elements, especially in winter is something that should not be happening. Women and trans folks are particularly vulnerable, the way that this has been presently drawn up, as they have a higher chance of being targeted at night as they return from work. ANC 2A passed a resolution on this last year, and I will be re-proposing the same stance on the budget when I, when we meet on March 17th.

The second comment I have is regarding proposed changes to the D6 route after January 2022, which will absolutely result in greater car travel throughout the region and significant gaps in service for students, affordable housing residents and workers, but especially health workers.

Received 3/8/2021, 7:27 p.m.

Good evening. My name is Adriana Radulescu and I live in Glover Park in Washington, DC. Glover Park depends on MetroBus for public transit service because we do not have Metrorail within close walking distance. I use the Metrobuses for 25 years and am still using them to through the pandemic because buses are my only means of transportation. Prior to COVID, we have the

following bus routes serving our area: D1, D2, 30S 30N, 31 33 and 34. From these routes there are already two not running, and three more are proposed for deletion and from the remaining ones only two currently run in weekends.

Glover Park goes deep towards the actual Glover Archibald Park, and the only bus reaching the end of the neighborhood is the D2. Now D2 runs with a modified schedule, which spaces the buses between 26 to 36 minutes wait. This is a lot of time to wait for a bus. Then, in 2022, the bus is proposed to be deleted, and this route combined with the N6 bus, which would result in a longer route with likely a higher ridership and no number of buses to compensate for it. This bus takes Glover Park riders east to Dupont Circle, this is the D2, on a relatively shorter ride where one can connect with the Metro Red Line.

Also, the buses going on Wisconsin Avenue are currently cut in weekends, specifically the 30S and 30N, with only the 31 and 33 running on Saturdays and Sundays. The 30N and 30S are the only cross-city buses available for riders between upper Northwest and areas east of the National Archives and across the Anacostia River. These two buses will also be deleted in the second half of the fiscal year. The cost in time for using alternatives to the 30N and 30S could be a serious burden, particularly for low-income residents who work and commute to Northwest. Making a transfer also adds to trip time and the risk of missed connections. The full trip is already 90 minutes when the bus is on schedule.

Besides the residents and workers, there are many students going to several schools in these neighborhoods. Having reduced public transportation options, people will look for jobs in areas served by public transportation, or will have to spend a lot more money for other means to getting to work or school. And if these buses do not run, how would WMATA even know if the riders are using public transportation? I believe the current and proposed deletion of the buses serving Glover Park and in general in the city will have a major negative impact. If not immediately, in the near future. Reliable public transportation is a critical measure a city can take to reduce traffic congestion, combat vehicle pollution, and support viable, flourishing neighborhoods. Thank you very much.

Received 3/8/2021, 7:47 p.m.

Hello, this is James Ross. I oppose the cutting of routes 62, 63, in the Petworth area. I think it provides a great service and it's been around since I've been in the area. I enjoy Metro immensely. I think you do a great job at transporting people, but to cut service as far as trains and the buses would actually be detrimental to the city all over. Thank you. My name is James Ross. Thank you.

Received 3/8/2021, 7:52 p.m.

Steven Stark Ward 7. Here we reach another time that WMATA is proposing to cut service again, to make up for shortfalls that are, in part, are based on their own decisions. Bus service cuts have been made in 2018, 2020, and now are proposed for 2022. These, the bus service cuts are including the zip codes 20019 and 20020, which the District of Columbia's government has named as underserved areas. During the 2018 bus service cuts, the V5 line was eliminated and the Circulator line was modified to stop running up 30th and Alabama Avenue Southeast. The options given by WMATA was to take the 30N or the 36 bus line. Now WMATA plans on eliminating or modifying 25 bus lines so that they no longer will serve zip codes 20019 and 20020. The area found East of the River in Southeast, including many of the bus lines, such as the 30N, which were presented to riders as alternatives during the 2018 round of bus route eliminations.

Further, the 36 bus line is given as an option for nine bus lines that are being modified to no longer serve Southeast or totally eliminated altogether. By WMATA's own supplied weekday ridership

numbers, that is putting some part of 22,538 riders to be added to the number already present on the 36 line, which is the sole offer of option for many of these riders. I believe this does not take into account, further, riders, such as DC school students who ride for free. By January 2022, with the mounting pressure on local governments, in-person classroom learning will most definitely be back in session. The WMATA answer for adding buses to the line they know is something the ridership will not be able to tell is truly happening.

Meanwhile, WMATA goes through another round of service cuts; they spend money on new buildings and by their own advertising, will add employees when in 2022 the train line opens out to the Dulles airport. If they are cutting service and all the stations and lowering the number of, of bus service, why do they need to add more employees? WMATA, pandemic or pandemic, has consistently cut service to those who need it most. With their lack of service and safety record, they have driven more and more people to seek alternative forms of transportation, which the current times have become more plentiful in the area. Instead of making up their own shortcomings WMATA has shown themselves to be a non-starter.

Received 3/8/2021, 7:56 p.m.

Good afternoon. My name is Linda Thompson. I live in Ward Seven and I have been listening to the meeting, which is very informative. Very glad to know that there is great concern about the cutbacks. I know earlier around 7:35 and approximately 7:41, two other people spoke on behalf of Ward Seven.

As an individual, I take the, I take the first M6 at, Suitland, Suitland Road and Southern Avenue, approximately, say 5:40 in the morning. And usually when we get to the, when we get to the Potomac Avenue station, there's about 15 people that depart when we get to Potomac Avenue. My greatest concern is if you discontinue the M6, there are a lot of people, service people, that do have to be to work very early. I'm wondering, if has Metro considered, say having AM and PM schedules for the M6? I can understand, I do understand, you know, that the ridership is down due to the pandemic, but, in 2022, as opposed to eliminating it, you know, all together. If we could have what Metro used to have, used to go for some neighborhoods, AM, and PM. And of course, you know, having those schedules available when the ridership is higher.

Now, not only, speaking of eliminating the M6, I also need the D6 to get to my final destination. I do not work for neither of the hospitals, but, when I get off the D6, I'm getting off at McArthur and Arizona right before the light. So, if you discontinued that bus, uh, I have no means of getting to work, and I don't drive. Unfortunately, a lot of people can't afford to retire, so...

Received 3/8/2021, 7:58 p.m.

Hi, this is Linda Thompson. I just want to continue my message. So, I do hope that Metro, for the M6 will take into consideration not eliminating the service in 2022, but at least going to AM and PM and maybe on Saturday doing the same thing. And I can, I understand the ridership is low on Sunday, so if the Sunday schedule was discontinued, I could understand that. I can be reached at area code (xxx) xxx-xxxx. Thank you so very much.

Received 3/8/2021, 8:42 p.m.

My name is Commissioner Dorothy Douglas, ANC 7D03, in Ward Seven. I'm calling in regards to not, to discontinue the U5 and the U6. The notice we got, received a short notice on February the 24th, which was 30-day notice. And according to the mayor's emergency pandemic mandate that she already have an order it's supposed to have 51 days in order to reach out to our residents to let them know what's going on, what's happening in the community. And you all have not done that.

My name is Commissioner Dorothy Douglas and I do not wish to have our vulnerable citizens that are handicapped and disabled and don't have transportation. You received monies from the children going to school that don't go to school now. So, my question is what's happened to those funds and we're also having to the federal funds that you've received. And all the years that I've been residing here in the District of Columbia, this has never happened. So, I think that, our Wards Seven and Eight, are really being, being, being injusticed because of what, what's happening. You would not have done this in Ward One, Two, Three, or any other Wards. You might be doing something, but they do have public transportation tools to access what they need to get to. So, this is Commissioner Douglas. I do not support the discontinuance of buses in Ward Seven at all, especially the U4, the u5 I meant to say, and the U6.

My number is (xxx) xxx-xxxx. And you kept cutting me off, and I was unable to speak because of this. That's why I'm calling now. The mandate says that we're supposed to have a 30-day, not a 30-day notice, but a 51-day notice to notify the residents. And you all have not, have disregarded that, that emergency that the mayor had left and gave an order in regards to March due to the pandemic, due to pandemic emergency. Thank you.

Received 3/9/2021, 6:09 p.m.

Good afternoon. Good evening. This is Glen Lesak. I'm a resident of Potomac, Maryland, and I wanted to voice very strong concerns and disappointment that WMATA is considering closing stations. That is a horrible idea. As someone who's used the Shady Grove to Grosvenor end of the Red Line, you see all of the housing that has built up around Rockville Pike, who use that. I also think that the plan to reduce hours to perhaps as early as nine o'clock, effectively presents anyone in the restaurant business from ever being able to use Metro to get into town to work. I think also that some of the revenue that you would have from the parking that the stations like Grovesnor, which is the closest to my house are important sources of revenue for WMATA. I know that you have some serious challenges, but when I see it pitted Red Line against, I think, the Yellow Line, I don't think that is an equitable way to conduct business. But thank you very much. I wanted to be very brief and good luck with your, with your efforts. All the best. Goodbye!

Metro Hearing No. 636
Tuesday, March 9, 2021 – 6 p.m.

MR. GOLDMAN: Good evening, everyone. I'm Metro Board Member and Vice Chair Michael Goldman, and I represent the state of Maryland on the Metro Board of Directors. And I reside in Montgomery County. Welcome to the third of four virtual public hearings on Metro's Proposed Fiscal Year 2022 budget. This hearing is convened by the Board to gather public comment on two dockets. First, Docket B21-01 on Metro's Proposed Fiscal year 2022 to 2027 Capital Improvement Program and Strategic Plan. And second, Docket B21-02 on Metro's Proposed FY2022 Operating Budget and related service and fare proposals, as well as changes to parking rates at some Prince George's County stations.

Notice of this hearing was made by publication in the Washington Post and ads were placed in the Afro, Atref, Doi Nay, El Tiempo Latino, the Epoch Times, the Iran Times, the Korea Times and the Washington Hispanic, as well as through social media and radio. And signs were placed in all rail stations on Metrobuses, MetroAccess vehicles, at Metro bus information centers and at over 300 bus stops in the metropolitan area.

Since we're doing this hearing virtually, the hearing is going to look and feel a little different than usual than our usual in-person hearings for you, and for me. We would normally have a presentation from our chief financial officer, but in order to get right to your comments and testimony, we have instead posted a video at wmata.com/budget that provides an overview of next year's proposed budget.

However, before we begin hearing testimony from you, I want to note that with expected passage this week of additional COVID relief funding, \$30.5 billion nationally for transit authorities, Metro will be revising its FY22 budget accordingly. It will take some time, however, to calculate exactly how much funding Metro will receive from the \$1.4 billion coming to the DC regions transit agencies. But we will clearly be able to avert the painful cuts in services, station, closings and layoffs that were on the table.

When we began the public process back in January.

With that good news, I'd like to turn to the portion of this evening, where we hear from speakers. Those of you wishing to provide testimony should call (512) 580-8850. After calling in you'll need to enter a four-digit meeting code. For this evening's meeting, the code is 9-1-3-1. To repeat the phone number is: (512) 580-8850. Once you're in the meeting, you will be able to listen over the phone by pressing star one. If you'd like to provide testimony, you can press star three and you'll be put in the speakers' queue. You'll get a message when it's your turn to speak. For those of you on the line now, if you want to speak, go ahead and press star three to get in the queue.

If you're watching the live hearing on a different device, please make sure to mute that device, so there isn't any feedback. You'll be able to listen to the hearing while you wait in the phone queue for your time to speak. If you would like to provide oral testimony, but aren't able to wait until you come up in the queue, you can press star two to leave a voicemail. Your voicemail will be transcribed and included in the hearing record.

In order for the public record to accurately reflect who's providing testimony, I'll ask that you please state your name and any organization you represent before beginning your testimony. Elected public officials will be allowed five minutes and everyone else will be allowed three minutes each when it's their time to speak. Extra time will be given for translation, if it is needed. We ask you,

you stay within your time limit because we want to make sure everyone who wants to speak as an opportunity to be heard tonight.

I also want to note that each speaker is only able to speak once at each hearing. While you may have the option to rejoin the speaker queue, please note that we cannot accept additional testimony at this hearing.

I now want to take a moment to recognize that this is where we listen to you. This is your opportunity to comment on the proposals, and we are here to listen. And your views are very important to us. We will not be able to answer questions, however, during your testimony. Before you regain your remarks, please state your name and the organization you represent, if any. Please note that all statements, including any personal information, such as name, email address, address, or telephone number you provide in your statement are releasable to the public upon request, and may be posted on WMATA's website without change, including any personal information provided. Further testimony may be submitted and must be received by 5:00 PM on Tuesday, March 16th. Repeat that deadline is 5:00 PM on Tuesday, March 16th.

Testimony can be submitted online at wmata.com/budget. Online, you have the option to complete a survey, write a free-form comment and upload a letter, petition or other documents, if you so choose. You can also mail testimony to: Office of the Secretary, WMATA 600 5th Street, Northwest, Washington, DC, ZIP 20001. Again, all testimony must be received by 5:00 PM on March 16th.

Now, due to the pandemic and the slowdown in mail service, we encourage everyone to submit your comments online, if at all possible. Your comments will become part of the public record and will be reviewed by the Metro Board of Directors. changes to the options presented here tonight, may be proposed in response to testimony received and subsequent staff analysis.

And now it's time to call the first witness. As a reminder, please tell us your name and any organization you represent before you start speaking. We have an elected official who is first in the queue, and therefore first up tonight will be Montgomery County Councilman Andrew Friesen. Andrew, welcome to the Metro Board.

MR. FRIEDSEN: Thank you so much. Appreciate the opportunity to join you, Mr. Goldman and members of the WMATA Board of Directors. I appreciate this opportunity to address the severe impacts of the proposal to close the Grosvenor-Strathmore station, to re-introduce the Red Line turnback and to eliminate bus service along Connecticut Avenue via the L8 line and River Road via the T2 line, which would have a significantly detrimental impact on constituents I represent on the Montgomery County council in District One. The pandemic has undoubtedly changed the way many work and travel, and I recognize the enormous effect this has had on Metrorail and Metrobus ridership and the significant fiscal gaps that it has created, and which you are trying to navigate through, as we speak. Fortunately, the prognosis for emergency federal assistance to transit systems to help plug budget gaps in the second half of Fiscal Year 2022 is in a much brighter place than it was when the budget was developed.

As vice chair Goldman noted at the outset of the meeting, the American Rescue Plan includes \$30.5 billion in emergency grants for transit systems, and I appreciate the fact that the Metro board will be going back and reviewing what impact this will have on the cuts to try to mitigate their impact to the greatest extent possible. The outlook for transit ridership to return to pre-

pandemic levels in this moment is not quite as uncertain as that much needed federal assistance, but it does also appear brighter every day. Thanks to the demonstrated success of multiple COVID vaccines and the gradual ramp up of vaccine deployment. There is indeed light at the end of this very dark COVID tunnel. And I implore you to reject these proposed service cuts so our residents and workers can get to where they need to go. Especially since many don't have the option to telework and still rely on the Grosvenor-Strathmore station and the L8 and T2 bus lines.

The proposed service cuts would have a detrimental impact on our County and our regional economy, which has been hit extremely hard by the pandemic and which must take advantage of the shift to transit-oriented development that was well underway before COVID took hold in order to fully recover from this public health emergency and its economic impacts. Put simply, the threat of closing an entire Metro station and eliminating bus routes that serve key areas of our communities will have a chilling effect on the ability of residents to live and businesses to operate in Montgomery County. It's important for the economic security and prosperity of our community, that the WMATA board rejects the doomsday scenario that is now before you. More specifically regarding the proposed Grosvenor-Strathmore station closing, I understand the relatively low ridership at this station, however, throughout the closure that began in late March, 2020, I heard from multiple constituents who live within walking distance of the station and have no other way to get about and around the area, during this, with this hardship that the closure has posed.

This is especially true at the Grosvenor-Strathmore station, which is unique in that despite being physically and figuratively central to one of the most densely-populated communities in the region, it's isolated because it's not within reasonable walking distance to any of the nearest Metrorail stations. There are no great alternatives here. As news has spread about the budget proposal before you to close the station again in FY22, we have heard from many nearby residents and almost a dozen community groups, and then how much they rely on the station and the difficulties that reclosing it would impose on their daily lives. The closure could also jeopardize or delay future residents and businesses. WMATA has been working diligently through a joint development agreement to create more housing and businesses on its property at the Grosvenor-Strathmore station. A closure of that station, no doubt would threaten the progress which Montgomery County has supported significantly in order to help address our affordable housing crisis and attract new and needed businesses to this part of our County that relies so heavily on Metrorail service.

Furthermore, the Red Line turnback at Grosvenor-Strathmore that this budget also proposes would reinstate the diminished service along the rest of the Red Line that Montgomery County, its residents, and some of you fought so hard to eliminate. Major transformations into more walkable, urban and transit -oriented places are already underway around each of the four stations north of Grosvenor-Strathmore that would see significantly less service as a result of the turnback: White Flint, Twinbrook, Rockville and Shady Grove. Growing these station locations as transit -oriented are critical to solving our County's broader, affordable housing crisis and to reinvigorating our economy, not to mention to meeting Metro's long-term ridership goals. And it will be very difficult to consider these places, truly transit-oriented if the rail transit service provided comes only every 30 minutes. This will be exacerbated, if the Grosvenor Strathmore station is also closed as part of this budget.

Regarding the proposal to eliminate bus service along Connecticut Avenue via the L8 line and along River Road via the T2 line, this is not the first time Metro has proposed cutting these services. Last year at this time, the County Council urged you to reject these cuts for Fiscal Year 2021, after hearing from constituents and communities who rely on these lines in particular, because the impacted corridors don't have Metrorail service or viable alternatives to Metrorail

stations. The pandemic is not the time to cut bus service, especially given the reliance of so many essential employees, who don't have the option to telework, on bus. This is as true for the Connecticut Avenue and River Road corridors through my district, as it is anywhere else in the region. Please reject the proposed elimination of these needed bus lines.

In closing while I completely understand and fully appreciate the financial reality under which these devastating cuts were proposed, the current reality as I testify in front of you today is much different, and thankfully far better than it was then. Given the next round of significant emergency federal assistance for transit systems is imminent and the improving outlook on COVID vaccinations, I believe the WMATA Board should reject these proposals at this time, and at the very least continue to explore all alternatives to complete station closures or bus eliminations...bus line eliminations. This will at least maintain some level of service to people in my district who rely on it and allow us to more easily resume pre-pandemic service levels as we gradually return to pre-pandemic travel routines and our pre-pandemic way of life. Thank you again for your time and the opportunity to speak with you this evening. I truly appreciate it and appreciate all of your hard work to make sure that Metro is a great and accessible option for as many residents as possible.

MR. GOLDMAN: Thank you very much for your testimony tonight, Councilmember Friedsen. They will certainly, these comments will certainly be included in the record of the hearing. Thank you very much again. And now we'll hear from the next speaker. It'll take just a few moments, maybe 15 or 30 seconds to get the next speaker in the queue on the line. And so once that occurs, if that speaker will first identify him- or herself and indicate what organization, if any, he or she is affiliated with.

Standby, all those in the audience, there's nothing wrong with your system. This is just the delay that's incumbent in this system until the next speaker comes online. (Pause)

And I'm told by staff that the delay may be a little longer for this first speaker as we're experiencing what I'm sure you've heard before on these Zoom calls, some technical difficulties.

MS. CHEN: Hi, can everyone hear me okay please?

MR. GOLDMAN: Please identify yourself and organization you're representing tonight.

MS. CHEN: Yes, sorry about that. Hi, my name is Catherine Chen. I'm a resident of Washington DC, and a member of Sunrise DC. As a young woman of color, I rely heavily on public transportation to move around the city, to get to my place of work and to access medical services. I am deeply disappointed that WMATA is planning to implement such severe service cuts, which will impact vulnerable communities and their ability to access essential services and resources at a time of great need and precarity. I hope that the potential federal assistance referenced earlier means the WMATA board is able to forego all of these proposed service cuts, but if choices still need to be made, I urge the board to consider the racial and socioeconomic impacts of closing Metro stations and bus lines down completely. I firmly believe that public transportation is a right, not a commodity, as the fundamental infrastructure that underlies human mobility and access to essential services.

For those who lack other means public transportation is a lifeline that offers access to employment, food, and public life. Cutting Metro stations and bus lines, especially based purely on metrics of demand, is a policy decision that will inherently yield racial and socioeconomic

inequities. Public transportation, WMATA included, is used by predominantly lower-income immigrant and communities of color. These are the very same communities that have been hardest hit by the COVID-19 pandemic and are disproportionately represented as workers in sectors deemed essential services. The proposed service cuts will therefore impact access to food, medical services, work and other vital resources for the most vulnerable communities in our city. I understand that these are uncertain times for WMATA and its budget. I assure you that the very same uncertainty is felt a thousand-fold by its riders. Crippling the mobility of thousands of students, senior citizens, folks who are low-income and people of color at this very trying time will have ripple effects on the health, safety, and well-being of our community.

If anything, this pandemic has brought to light how important public services, including public transportation, are to our society. Economic and financial considerations are important, but not more so than public health. We need to come together and invest in public goods and the well-being of our community. It is not the time for sustained austerity measures, which only leaves privatism and people to fight for themselves. We can have a more collective, livable and accessible society. That starts with hearing the needs of our community, taking racial and socioeconomic inequalities into account and investing in basic needs for the underserved. So many of us depend on WMATA. And so I urge you to please reconsider your planned service cuts, and echoing thoughts heard earlier, the impact of closing Metro stations completely and bus lines completely. Thank you for your time.

MR. GOLDMAN: Thank you, Ms. Chen, for your testimony tonight. It will be included in the record of this hearing. And now we'll hear from next speaker. Again, it may take some 15 or 30 seconds for us to get the next speaker in the queue on the line. So please, if you're listening on the phone at this time, you can press star three to be put in the speakers' queue, and star two if you want to leave testimony in a voicemail.

MR. SCHUKALTER: Hey, can you hear me?

MR. GOLDMAN: Yes, please, welcome to the Metro Board. Please introduce yourself by stating your name and any organization you're affiliated with.

MR. SCHUKALTER: Sure. My name is Levran Schukalter. I'm a resident of Montgomery County, by the Grosvenor-Strathmore station. And I'm not representing any other groups or organizations today. I want to say, first of all, that's promising to hear that the money coming from the federal grant may help alleviate the entire, concern that a lot of us have, so hopefully that will come to fruition.

In addition, I just wanted to say that closing the Grosvenor-Strathmore Metro would be catastrophic for the residents of the area. While I understand that budget constraints may require a change in service hours, parking fees, fare fees, and the number of trains in service, those opportunities must be completely leveraged instead of closing stations. Closing the station would negatively impact surrounding stations, surrounding businesses and result in added environmental consequences. Additionally, closing the Grosvenor-Strathmore station will unfairly and unexpectedly impact property values of those in the impacted area. The Grosvenor station is crucial for many people, including myself, to get to work, entertainment and responsibly and safely commute around the DMV area. I implore WMATA to reject the closure of station for the good of the County and its residents. Thank you.

MR. GOLDMAN: Thank you very much, sir, for your testimony. These comments will be included in the record. So now we'll hear from the next speaker and again, it will take a few minutes for us to get the next speaker in the queue on the line to testify.

MR. WOJAHN: Yes. Hello. Can you hear me?

MR. GOLDMAN: Yes, good evening. Welcome to the Metro Board. Could you please state your name and any organization you're affiliated with, and then present your testimony?

MR. WOJAHN: Great. Thank you very much. My name is Patrick Wojahn, and I'm the mayor of the City of College Park. Good to join you this evening and thank you for the opportunity to testify on the proposed Metro cuts for the FY2022 proposed budget. I want to note that the City of College Park city council, last week, unanimously approved sending a letter in opposition to the closure of the College Park - University of Maryland Metrorail station, as well as the elimination or modification to Metro bus routes, 83, C2, C4, F6 and R12. And just wanted to comment that terminating service at these, terminating these, this service at the Metro station and terminating these bus lines would seriously and detrimentally impact our community.

We rely on this, the students, faculty and staff at the University of Maryland, rely on this service to access... Many of the people that come to College Park every day are people who do not have cars. A significant percentage of the student population is, experiences housing insecurity or food insecurity and, and rely on a very limited budget, to be able to get around. So cutting off access to the Metro to get to, to get to class would make it very difficult for them to, to access these, is important, their education, and these important services.

We have been engaged in the last couple of years in College Park in significant transportation improvements that rely on Metro, including the landmark reconstruction of US Route 1; we're trying to reduce vehicular traffic along the corridor. And so a reduction in bus service and closing the College Park Metro station would be, would really hurt us. It would really hurt our effort to try to try to bring about transit-oriented development that will benefit our, the region in the long-term. We're certainly sympathetic to the budget shortfall that Metro is experiencing and, and hopeful that the relief package that is working its way through Congress right now will make these cuts unnecessary. But should that relief not occur or that should additional cuts still be necessary, we ask you to please consider the serious impact that this would have on the College Park community and the University of Maryland. Thank you very much.

MR. GOLDMAN: Thank you, Mayor Wojahn, for your testimony tonight. It will be included in the record. Now we'll hear from the next speaker. Again, it will take maybe 15 or 30 seconds to get that speaker in the queue on the line to testify. Again, if you're listening, you can press star three to be put in the speakers' queue and star two if you want to leave your testimony in a voicemail.

MR. RYERSON: Yes, good evening. This is Joel Ryerson.

MR. GOLDMAN: Good evening. Welcome to the Metro Board. Could you please state your name and any organization you're affiliated with?

MR. RYERSON: My name is Joel Ryerson. I'm speaking for myself, no other organization.

MR. GOLDMAN: OK, please give your testimony.

MR. RYERSON: My email is xxxxxx@xxxxxxx. My phone number (xxx) xxx-xxxx. I've been a loyal Metro customer for 42 years. And I have been going through a lot of eliminations for these bus routes, which I don't like at all. I don't know if I have the option, if I have to catch a bus on Sundays, either going to church or going to work or anything else because there won't be no Sunday buses up on... I live in Prince George's County and near me, the bus service is not too good. And if you eliminate the buses that we have, I won't be able to get around, and TheBus, our county bus, the buses don't have no Sunday service, and they just started November 7th for the Saturday schedule, and you only have 13 routes.

But the Metro is more better than the other, the other bus service, because they will be running, it'll be OK to run. Since if they eliminate the bus service, then I won't have no way to way to get around on Saturdays. And TheBus only has 13 routes on a weekend, on Saturday, but they don't have no Sunday service on Sundays. And I don't know how they going to do that because nobody can get around on Sundays, especially. On Saturdays it's OK. And sometimes I like to go downtown and I can't do it now because of the COVID-19, but I use a lot of the bus service.

And I have an issue with my tablet. I couldn't take the survey for my comments because I, it kept on disappearing. I keep going back and it keeps on disappearing. So, I don't know if I can do the survey at this time, maybe I'll have to do that later. Alright, I'm so upset and I don't like this proposal at all. And I hope for the... if you get a chance... I called, Danie's old phone number. I know she left Metro. I left a message telling if there's any way I can receive the transcript for tonight's meeting, so I can see what everybody's talking about, because I might have to leave. Hello?

MR. GOLDMAN: Yeah, still here. Please try to finish your testimony, because you're reaching the three-minute limit.

MR. RYERSON: What was I saying. Oh yeah, the testimony transcription. Maybe you can email that because Danise did it the last time when she had that meeting for the Takoma Langley Transit Center. And I saw my testimony, and I saw all rest of the testimony. I don't know if they have enough time or room for that email, for that transcription for the public hearing.

So, hopefully you can reconsider not to cut the bus service, but maybe you can add some bus service to make it better. That's all I'm going to say. You have a good evening and good night. Can I stay on and listen to some of the testimony?

MR. GOLDMAN: Yes, you can listen to the other testimony and someone from the staff will be in touch with you, since you left your phone number, regarding the problem you're having with the survey. So, you will be contacted if not tonight, probably sometime during the day tomorrow.

MR. RYERSON: OK.

MR. GOLDMAN: Thank you, thank you again. And your testimony will be included in the record of the hearing.

And now we'll hear from the next speaker again, it will take a few minutes, 30 to 60 seconds while we get that person lined up in the speaker queue.

MR. LAWSON: Okay. Can you hear me okay?

MR. GOLDMAN: I can, yes. Welcome to the Metro Board.

MR. LAWSON: Okay. Thanks for having me. My name is Lamar Lawson. I'm just a regular rider

for Metro for about at least 20 years. And I'm also totally blind. The first thing I want to talk about is the Metro didn't have it in the plan as of yet, because they took it off recently, is the bus B30. It goes from Greenbelt to BWI, and recently they had just added Arundel Mills. They have taken that bus off because of low ridership. Though I do understand that, I relied on that bus because I have kids that live in Baltimore. My SmarTrip card works only on that bus. And it does not for any of the transit services that head up to Baltimore. And to make matters worse, coming back from the airport, it goes, there is no bus that goes straight to Greenbelt. You have to go all the way to, Arundel... I'm sorry, Shady Grove Metro. Once again, Shady Grove from the airport, and it takes an hour, that's an hour out of the way.

Then you have to get on the Red Line and ride an extra 30 minutes to go into town and then get on your next train. And that is inconvenient to go all the way out the way. And you have a station that's not that far away. So, whatever you can do, please, please, bring back that B30. Whether you want to run it to Arundel Mills or not, I don't care. I just, I need that bus.

Secondly, we'll talk about the D14. It's talking about cutting that. My stop is off of 210, and it's Indian Head Highway and Seneca Drive. 210 can be dangerous. And because I'm totally blind, I have to cross 210. And the D14 also is the only bus that goes down 210 on the weekend. The P18 and others are not even running. So if they're going to put these budget changes, please at least leave one bus that goes down 210 on the weekend.

And, I am also against the Red Line turnback and even the Yellow Line and turnback because it's bad enough we have to wait for the train to clear it across the track. And of course, recently, Metro just installed those signals so that the conductor know when it's time to go, we already delayed in itself. So, I need, I want to keep the Yellow Line the way that it is Huntington to Greenbelt, and the Red Line, Shady Grove, to Glenmont. So, in conclusion, I do understand that cuts have to be made, but please, before Metro does it, I need y'all to help us and especially me on those lines, because that would definitely, definitely affect me. Thank you very much.

MR. GOLDMAN: Thank you very much, Mr. Lawson, for your testimony, your concerns about the B30 are noted and they will be part of the record of this hearing. And now we'll hear from the next speaker. And again, they will take a few minutes while we get the next speaker in the queue on the line. (Pause) Again, standby, there's nothing wrong with your device. We're just waiting for the next speaker to come online.

MS. FORSHAY: Good evening.

MR. GOLDMAN: Good evening. Welcome to the Metro Board. Could you tell us your name and any organization that you're affiliated with?

MS. FORSHAY: Yes. My name is Jessica Forshay and I am not affiliated with any organization.

MR. GOLDMAN: Please, then please give your testimony at this time. That'd be fine.

MS. FORSHAY: Thank you. I am a rider in the Greenbelt area. I am currently a teleworking and so I'm part of the reason you have low ridership on the bus line. But I am concerned that if you eliminate buses, during, due to the pandemic low ridership, that, as the ridership comes...is able to come back that these buses will not be returned to service. I would say that I use the G12

normally, when I do commute into the office regularly. And, I would suggest that rather than eliminating G12 entirely, if you would, if you do have to eliminate the service temporarily, if there...I would suggest there'd be a way to suspend the service rather than eliminating the routes entirely, so that when the ridership levels do come back and people begin going back into their offices and workplaces that, that there is a way for those routes to be reinstated as demand increases. I am hopeful that the funding you mentioned earlier means that you are not eliminating routes as I would like to be able to continue using Metro, once the offices open back up and I'm able to commute in, thank you.

MR. GOLDMAN: Thank you, Ms. Forshay, for your testimony. We will welcome you back as a Metro rider, once the pandemic ends. Your comments will be included in the testimony tonight for this hearing. And now we'll hear from our next speaker. Again, it will take a few minutes while we get that speaker lined up in the queue on the line.

MR. ORLEANS: Hello.

MR. GOLDMAN: Hello, welcome to the Metro Board. Could you state your name and any organization that you're affiliated with before you begin your testimony?

MR. ORLEANS: Good evening, Mr. Goldman.

MR. GOLDMAN: Good evening. Yes, you can begin at any time, please.

MR. ORLEANS: Well, this technology is talking to me, telling me I'm muted.

MR. GOLDMAN: (Laughs) Okay - tell us, tell us your name and any organization you're affiliated with and then proceed and give your testimony.

MR. ORLEANS: Again, good evening, Mr. Goldman, my name is Bill Orleans and I've a member of the frustrated and abandoned riders of metropolitan Washington. Abandoned by our Board of Directors and our senior management at WMATA. Before there was COVID, the COVID-19 pandemic, there was another epidemic infecting WMATA senior managers and its Board of Directors, a viral desire to curtail operation costs, notwithstanding riders needed provision of service. Tonight is just...transportation is not just a means to get to work, it's also a means to get around otherwise: to get to school, to get to worship, to get to see family and friends and otherwise enjoy the amenities of our region.

MR. GOLDMAN: Mr. Orleans, we're having a little dead time here. We can't really hear what you're, you're saying.

MR. ORLEANS: I scratched out some notes, Mike, and I'm having difficulty reading. (Pause) With the end of our collective pandemic experience, the ridership numbers will return, even if not at the pre-pandemic levels. Transit availability will still be required. With prior budgets, and pre-pandemic, the desire to eliminate or reduce bus routes and potentially MetroAccess service, have been prominently featured in the General Manager's proposal. I understand if I, even if I'm distressed that many riders, this cycle just yesterday and today are descending, pleading, for the perpetuation of their individual bus routes. But we should all be demanding current preservation of all existing bus routes, not just the ones that we ride on. Indeed we should be attempting, we should be requiring, the reclamation of all previously-eliminated routes and for the expansion of

bus service throughout the entirety of the transit zone. All of us presumably are going to be gratified by the federal dole that will be arriving soon, but regardless of that dole arriving, it's really the responsibility of our local jurisdictions and here I'm pleading that they accept this responsibility to fund appropriately, an expansion of rail and bus and paratransit service throughout the zone.

I don't have much faith in my senior, the senior management, of WMATA, nor do I, unfortunately, do I have much faith in the Board of Directors of WMATA, but I still hold you to that responsibility.

Lastly, there was reference in the Notice to this, to these dockets and these hearings, that the full docket would be available by calling the Board Secretary's office. And, Mr. Goldman, the Board Secretary's office is not staffed. I twice left my name and phone number and twice not received a call back. I presume I'm not the only one in the region who would like to see the entirety of the docket. Someone on staff, someone on the Board, should suggest to someone on staff that the Board Secretary's office tomorrow, should be staffed and respond to telephone inquiries. Thank you very much.

MR. GOLDMAN: Thank you very much, Mr. Orleans. It's good to hear from you tonight. If you would like to just state your phone number, someone from the Board Secretary's office will definitely call you back tomorrow and deal with your concern. So, if, if that's not too much of an intrusion on your privacy, if you want to just state your phone number, we'll have that taken care of. (Pause) Okay, sorry, we'll....Bill, if you'll just bring that to the Board Secretary's attention with a phone call in the morning with your phone number, they will return the call. Thank you.

All right. That testimony from Mr. Orleans will be included in the record of the hearing. Now we'll hear from the next speaker and as has been the case, it will take a little bit of time, 15 to 30 seconds to line that next speaker up in the queue.

MS. CUMMINGS; Hello.

MR. GOLDMAN: Hey, good evening. Welcome to the Metro Board. Could you just state your name and any organization you're affiliated with, and then proceed to give your testimony tonight?

MS. CUMMINGS: My name is Leslie Cummings, and I am not affiliated with any board, but I am a citizen of Greenbelt, Maryland. I am an elderly person who is still currently working. And my only means of getting to the Metro stations has been the G14 route, Greenbelt to New Carrollton, and the G12 route, Greenbelt to New Carrollton. I believe it was back in the late twenties, two-thousands, where the Metro decided to change or reroute the G14, so that instead of going through my neighborhood, which is the Greenbrier condominium complex, it now runs exclusively on the Greenbelt, on Greenbelt Road to New Carrollton and to the Greenbelt Metro station via the New Carrollton, Princess Garden Parkway route.

I used to have both the G14 and the G12 as a way to get to my place of work, my place of worship, to visit with family or friends, to do my retail and grocery shopping and to get into Washington DC, to see the sites. The elimination of the G14, going through my complex, made it a little harder for me to do the normal commuting and traveling that I would, had I had that option. Since the G12 only runs to Greenbelt and New Carrollton, and it does not stop at other locations where I used to shop and visit, I felt as though I was being cut off from my community. Now that you're talking about eliminating the G12, I feel as though I'm getting cut out from being a tax paying citizen of the state of Maryland.

I, I understand that we are going through hardship and crisis, and I understand the problem that the Board is having. Metro has had many problems, but cutting bus service in areas where they're needed the most, is not only detrimental to me, but to all of the people who rely on the services. Metrorail is not everywhere, and the only connections are from your Metrobus services. So, I ask as you think about cutting services or eliminating services, and, just sort of think about who you will be affecting when you come to these decisions. You may save money in the short run, but you will increase pollution. And because people will jump into cars, you will probably have more problems with less ridership since no one's able to get on your, go to get to your Metro stations. And you find yourself with, a lot of competition from Lyft and Uber and other local means of transportation. And if you're trying to increase your budget, outlays, capital... fulfill your capital requirements and, build up your reserves, I believe that you're going backwards and not forward in achieving this goal. Thank you.

MR. GOLDMAN: Thank you, Mrs. Cummings. I appreciate your testimony tonight and your comments, and we'll certainly take that into account and these comments will be included in the record of this hearing. And now we'll hear from our next speaker again, it will take 15 to 30 seconds while we, uh, get that person lined up as the next speaker in the queue. (Pause)

Good evening, and welcome to the Board. Yes. Good evening. And welcome to the Metro Board. Please tell us your name and any organization that you're affiliated with, and then begin your testimony tonight.

MR. KAPLAN: Hi, my name is Ron Kaplan and together with my partner, Andy Altman, we're the co-founders of Five Squares Development, and importantly, the joint development partner with WMATA of the Grosvenor-Strathmore Metro.

MR. GOLDMAN: Very good, Mr. Kaplan, you can proceed with your testimony tonight.

MR. KAPLAN: Thank you very much, Mr. Goldman, and for your introductory comments, which are encouraging. We hope it's likely that all stations will stay open based on the most recent federal funding update, which we'll be analyzing. Should that not be the case we're testifying to urge you to keep the Grosvenor-Strathmore station open. The partnership that we have with WMATA and with Strathmore is an imaginative and precedent-setting collaboration. WMATA, over the past five years, has held public hearings and expressed his commitment to the community, to deliver an enhanced station experience with community-oriented, cultural and retail spaces, programmed by our extraordinary cultural partner, Strathmore Music Center. Even a temporary closure of Grosvenor-Strathmore puts all of that hard work and capital investment at risk. WMATA and Five Squares designed and built a 220 unit addition to the WMATA parking garage to accommodate the development. And I'm thrilled to announce, Mr. Goldman, just this month, we'll complete the expansion and thank you for all your support and effort with that.

WMATA and the Montgomery County Park and Planning staff, the Board and the County Council has spent years working with local citizens to assure that Grosvenor-Strathmore becomes a model for bus and Metro transit-oriented development. WMATA and we submitted a preliminary plan that was unanimously approved, for the creation of a new model for transit-oriented development at Grosvenor-Strathmore with up to 2,200 residential units, and including importantly, up to 330 moderately-priced dwelling units. Only five months ago, the Montgomery County Council demonstrated tremendous leadership and passed legislation to assure its housing and moderately priced dwelling unit goals could be met by prioritizing WMATA's Metro station locations in Montgomery County. A temporary closure puts that at risk.

If federal funds do not close the budget gap, it would be devastating, should WMATA include Grosvenor-Strathmore as one of the stations to be temporarily closed, as it would send a chilling signal that this station is somehow less important and will raise the specter that could be closed again in the future, scaring away institutional investors who are necessary to make this dream a reality. The extraordinary by WMATA and Montgomery County and Strathmore, as well as the tens of millions of dollars recently spent positioning that station to become a model for transit-oriented development and for the entire WMATA system would be undermined by a temporary closure.

We urge WMATA to reinforce the message it has been making for the past five years by its time, effort, community meetings, and financial prioritization that Grosvenor-Strathmore remains a key station for the future of WMATA's plans. Thank you so much for holding this hearing, Mr. Goldman, and for your support.

MR. GOLDMAN: Thank you very much, Mr. Kaplan for your, uh, testimony tonight. We do appreciate all that you're doing at Grosvenor Strathmore and wish you well. Thank you.

And now we'll hear from our next speaker again, it will take 15 to 30 seconds while we line that person up in the queue to get on the line. (Pause) During this downtime, I'll mention again that if you're listening on the phone you can press star three to be put in the speakers queue, if that's what you want, and press star two, if you want to leave your testimony in a voicemail.

MS. HADIN: Hi, can you hear me?

MR. GOLDMAN: Yes I can welcome to the Metro Board. Please state your name and any organization you're affiliated with and then begin your testimony.

MS. HADIN: Yeah, so my name is Sema Hadin, and I'm part of the Sunrise DC hub, and I'm also a resident of DC, and I have three points that I wanted to make today. The first one is that public transportation service reduction and cuts are an unsustainable financial and environment proposition. In terms of financial stability, these cuts are only going to exacerbate reduced demand. By making our transit system more inconvenient, less people are going to use it creating a declining spiral of ridership and revenue that will leave Metro in an even worse off position. This is also not the first time Metro is contemplating severe service cuts. Each time we hope that Congress will come to the rescue, demonstrating that this is a fundamentally unsustainable position. As long as most of our operating budget depends on fare revenues, our public transportation system will always be vulnerable to crises like this pandemic, the 2008 recession or a climate change-induced disaster.

In terms of environmental sustainability, this is the time to invest in our future and not simply react to present crises. You cannot reduce public transportation without for going to the climate goals set out in the Clean Energy Amendment Act of 2018, the Sustainable DC program, and more. We also cannot honor DC or the US's commitment to do its part in tackling, in tackling our climate crisis without public transportation.

Second, these cuts also post series COVID-19 safety concerns. Longer waits and fewer routes will lead to crowded trains and buses creating a greater risk for the pandemic, regardless of mandated preventative measures. Given that those who regularly use public transportation are predominantly low-income people of color and immigrant communities, the increase in COVID-19 risk on the rail and bus systems is significant equity concern.

Finally, and most importantly, people of color, low-income, disabled, elderly, and other marginalized communities rely on these services to move within our city. Service cuts that are purely informed by demand levels overlook the real differences in need for public transportation.

I've collected some census data to further illustrate this for Metro. If you close the Federal Center Southwest stop, it will affect a very low-income area, at 50% of median household income, who cannot rely on other forms of transit. For bus, if you close the 8S line, it will depress over 33,000 residents who identify as Black, Indigenous, or as people of color. Also limiting public transit access past 9:00 PM and on weekends will affect the DMV residents who work non-traditional hours. A population made of mostly Black, Latinx and low-income individuals.

The takeaway here is that demand-based services, service cuts do not capture the real equity impacts that come from a lot of proposed changes. WMATA should reject this proposal, but if the service cuts are the only way to move forward, I then urge WMATA to look at the impact these cuts will have on people of color, low-income, disabled and elderly people as the most important metric to inform your proposals. I recognize the potential for federal funding, but my criticism of WMATA's approach, which ignores the racial and socioeconomic impacts of these service cuts, still stands. I feel even more passionate about this point, given the extraordinarily valuable testimony that has already been offered, ridership demand is not the right metric to determine any service cuts. Thank you very much for your time.

MR. GOLDMAN: Thank you very much, Ms. Hadin for your testimony tonight. They will be included, it will be included in the record of this hearing. Now we'll hear from our next speaker again, it will take 30 seconds or so until we can get that person lined up in the queue to come online. (Pause)

MS. MILLER: Hello. Hello?

MR. GOLDMAN: Hello, good evening. Welcome to the Metro Board. Yes, you're on. Please state your name and any organization that you're connected with and then proceed to give your testimony.

MS. MILLER: Yes, my name is Initial Miller and I'm a resident in Burtonsville, Maryland, as well as a person who utilizes the Metrorail as, as well as the buses. And I would just like to say that it is going to be really difficult for us as community business owners, who are basically supporting the general public by creating ways to help ensure that they do not fall under more poverty lines. This does not help.

Also it creates more poverty because you are removing over 2,500 staff. That will be really difficult, that will create more homelessness as well as not allowing the Metrorail to run every day and stopping the Metro well at 9:00 PM, that creates loss of jobs. Closing the Metro stations, 22 stations in total that will create really harsh, harsh conditions for low-income, as well as middle-income families. I think it is not something that should even be put in suggestion during this time, regardless of the pre-pandemic levels of low ridership. It is already proven that transportation gets over three times the amount people who ride to use that as a physical activity per day, and that leads to an overall happier community and an active, healthy community with neighbors. Thank you. My name is Initial Miller. Thank you.

MR. GOLDMAN: Thank you, Ms. Miller. Thank you again for your testimony tonight. It will be included in the record of this hearing. We'll hear from another speaker now and we'll wait that 15 to 30 seconds until that person comes online.

MS. FROSH: Hi. Am I...audible?

MR. GOLDMAN: Hi, good evening. You're online and welcome to the Metro Board. So, just state your name and, and any organization you're affiliated with and then proceed to give your testimony tonight.

MS. FROSH: My name is Wendy Frosh and I'm a resident of Grosvenor Park. I'm not affiliated with any specific organization. But the revitalization of American cities is really dependent on a robust public transportation system. And, you know, up to this point, by taking cars off the road, Metro has made the DC metropolitan area more livable by reducing traffic congestion and pollution, and it indirectly supports local businesses that are dependent on easy access for both their employees and their customers. And as we see a growing population living in more densely-populated neighborhoods, we're also seeing more and more people giving up their private cars and relying on public transportation. And while there are services like Uber and Lyft, these alternatives are not a sustainable solution for those who need transportation to and from work on a daily basis. All that does is increase the disparities that some of the other speakers have talked about.

Proposed in this new budget is the cessation of Metro services at 9:00 PM. And it would surprise me if Metro administrators didn't understand that many people worked second shift, and getting home before nine o'clock just, isn't an option. Additionally, if we're looking at revitalizing our urban areas a vibrant city nightlife would be destroyed if public transportation were to end at nine. That kind of cutback would endanger lives. It would put more individuals on the road in cars after having a little bit too much to drink. It would require more people to wait outdoors for other means of transportation. It's just an unfathomable suggestion to cut service at nine o'clock.

I moved to Grosvenor Park about eight years ago, because I was looking to live in an accessible urban environment. And I chose this neighborhood because it has great access to DC today, via the Grosvenor-Strathmore station. Prior to the pandemic I used Metro regularly, and I hope to do so again in the not-too-distant future, because I used it for work, I used it for recreation, for education, for entertainment.

The proposed closure of the Grosvenor-Strathmore station, in particular, and, and I know we all have our own pet route or station, but it would seriously curtail not just my ability to get in and out of the city, but it would have a serious impact. I live in a residential neighborhood where there are a lot of government employees who travel out to Rockville or into DC or out to other parts of the DC metropolitan area. And it would really make their ability to reach their places of employment impossible. Also, as an earlier speaker mentioned, Strathmore concert hall is an unbelievable community asset. Montgomery County has put tremendous resources into developing it as a community resource. It serves the community with educational programs and art exhibits and concerts and other performances. And to shut down the station that allows people easy access to Strathmore is just unthinkable.

And, and then forcing people in you say, well, we can just move down the road to the next station. But getting to those other stations, isn't exactly easy. And there's been a lot of effort and money put into the development of the Grosvenor-Strathmore station. All of the cars that park there

currently would now be looking to park at other Metro stations, creating a problem and the need to expand services there. But, but worst of all, cutting back service makes Metro an unreliable source of transportation. The less accessible and routine Metro service is, the less people are going to use it. And you create a downward spiral, that's going to result in additional cutbacks, closures and fare increases down the road. We all endured the inconvenience of the overdue track work, and we're just getting into the groove of good Metro service again. I really have thought Metro was a great public transportation system. Significant investments have been made and that you're proposing to throw all of that out at this point just is a bad idea. Thank you.

MR. GOLDMAN: Thank you. Thank you. You almost forced me to ask you this to sum up. Well thank you again, and your testimony will be included in the record of this hearing. Yours is a very famous name in Montgomery County and in the State of Maryland, and appreciate your taking the time out to join us and participate in this hearing tonight. Thank you again.

So, I'm told that there is no one else in the speakers' queue. I'm therefore going to make one last call for testimony from new speakers. If you haven't already spoken and would like to, please press star three on your phone to be put in the speakers' queue. So, we'll wait about 45 to 60 seconds to see if any new speakers, come online and then we'll proceed with the hearing. So, be back in about 45 seconds.

All right. So, we have two new speakers and so we'll wait for that first one to come online to provide testimony tonight. I'm sorry, now we have four people, so it's been a popular event and we'll have four more speakers tonight, at least.

MR. STERNSTEIN: Hello, good evening. Can you hear me?

MR. GOLDMAN: Yes, good evening. Welcome to the Metro Board. Please state your name, any organization you're affiliated with, and then proceed to give your testimony tonight.

MR. STERNSTEIN: Thank you. Uh, my name's Alan Sternstein, and I'm speaking on behalf of and authorized to speak on behalf of the Maintenance Trust Association for Grosvenor Park. I'm the president of that board of trustees. Grosvenor Park is the private parkland immediately adjacent to the west of the Grosvenor-Strathmore station. I'm also speaking on behalf of my... the condominium building in which I live, which is one of eight developments in Grosvenor Park. The total number of units in those eight developments is 2,323 units, meaning conservatively at least close to 5,000 residents within Grosvenor Park alone. And as Mr. Kaplan previously testified tonight, and I would endorse all his remarks on behalf of the communities I represent, there are other nearby developments, that either exist that are multi-residential unit developments on the east side of 355 and many more planned for the future.

When I hear that the Grosvenor station has low ridership, I have to say I'm very perplexed about that. And the first thing I would like to know is where there is information that I could look at to see what warrants that description of the Grosvenor station. As you likely know, the Grosvenor station not only is, borders our park here and the eight communities, there was a entrance to the Grosvenor station directly into Grosvenor Park. So, the notion of closing that station, strikes loudly among the people that I'm in contact with here, with really the entire community, as something a bit bizarre. And, and there will certainly be potential political blow back from the 5,000 residents in this community were that station to be closed.

It's why many residents in this community located here. It's why they purchased home here. The County I know directly has long encouraged and facilitated multiunit development in the Grosvenor Park area. I participated on my behalf of my community in a residential development that I can look out my 11th floor window and seeing growing up. And, and part of the county's justification for the authorizations that the planning board provided this development were, because of its desire to facilitate use of mass transit and development of communities near the Metro.

Madison Homebuilders is, in fact, a major home builder in the DC area. And it's, it is currently doing that development. And the access to Grosvenor Park, and the Metro in particular, was a major factor in its undertaking, the development here. Even more perplexing about the proposal is the, the considerable effort, historically, that by Doug Duncan and Eliot Pfanstiehl and others that, that went into getting funding for developing the Strathmore Arts Center, which, frankly as a performance venue, per se, rivals the Kennedy Center, if doesn't exceed it in terms of, of acoustics and even beauty now.

The County also considers...

MR. GOLDMAN: If I could get you to try and sum up? We do try to keep everybody to the three-minute limit.

MR. STERNSTEIN: Sure, one other point. The County considers Metro access as a significant factor in property valuation. And I would fully expect that if that Grosvenor station were closed, even with, even with the prospect of it being reopened sometime in the future, it would precipitate a flood of requests for property reevaluations in this area. Thank you for the opportunity to speak with you.

MR. GOLDMAN: Thank you, Mr. Sternstein, for your testimony tonight. Those comments will be included in the record of the hearings. We'll hear from our next speaker in a moment. As usual, we'll take a few minutes to line that person up.

MS. THOMPSON: My name is Corietta Thompson. I'm a member of the National Federation of the Blind. I live in Germantown, Maryland, and I only have access to two buses around my way, and they come around rush hour. And so my concern is, we have a huge complex where I live, so we have a series of children, teens, adults, and seniors that are gonna need to be able to...to use public transportation. So, when the budget is being reviewed, I'm urging the Board to consider not only keeping the current buses running, which is the 97 and the 98, I would also encourage the Board to see if they can add more buses that come more frequently. So, everything we have to go to is not going to always be during rush hour, it would be before, during and after. And so we're going to be going to have to need to be able to go wherever we need to go, at any designated time.

And also my next concern is that I'm totally blind with other multiple disabilities. And so my biggest concern is that those that use MetroAccess, if we cut that service short or cut it off completely, those particular clients of MetroAccess will really be at a serious deficit. And it would really hurt those populations since substantially. Because MetroAccess is like the main source of transportation for those who cannot use the buses or trains. Luckily, I'm able to use all of them, but there's times I can't use a bus or train and I would need to use MetroAccess.

And I wanted the Board also with MetroAccess to check on what's the deal with the prices? Why is sometimes the price is \$4 to take a trip versus \$6.50 or \$7? I'm urging the board to really look

at those fees and take into consideration, a lot of these people that use MetroAccess, or either unemployed retired or on a fixed income. So those fluctuating prices are very challenging too. I would like to see MetroAccess have flat rates, like one price for a trip or whatever, rather than having fluctuating prices. So that's my thing. Just keep, let's see if we can make this thing work where nobody's at a deficit, because we all need these services, whatever disabled or not, and we all need to be able to keep our independence. Thank you so much for allowing my voice to be heard.

MR. GOLDMAN: Thank you very much Mrs. Thompson, Ms. Thompson for your testimony tonight. Those comments will be included in the record. We'll hear from our next speaker in 30 or 45 seconds. As soon as we can get that person online. (Pause) Please be patient; I'm told we still do have one or two more speakers in the queue who will be testifying shortly.

MS. LEE: Hi, can you hear me?

MR. GOLDMAN: Yes, good evening.

MS. LEE: Oh, you can hear me? I'm sorry. So sorry, I think I was having a technical difficulty. Yes, my name is Jenny Lee/ I've been a resident for 10 years, within walking distance of the Grosvenor-Strathmore center. And I'm calling to ask that you please don't close the, the station. I should say the Grosvenor-Strathmore station not center. So, I moved to this neighborhood 10 years ago, almost entirely because there was a Metro station within walking distance. It was a sort of relatively affordable area that allowed me to get downtown to my job at the time. Before the pandemic, the Grosvenor-Strathmore station was the only way I could get downtown, it was the only way certain friends and family could visit me.

I understand that if you need to reduce the frequency of service or if Metro needs to reduce the frequency of service, I understand the need to balance the budget. I would be willing to take for my personal purposes, even a train once an hour over the station closing entirely. Especially if that, I mean, it would be nice if the frequency of rail service picked up again after the pandemic, and presumably ridership will increase again, but please don't, don't close the station completely.

I also wanted to briefly comment on the proposal to stop rail service at 9:00 PM. I remember when it, it, started stopping at 11 or 11:30 on certain days, and that made things difficult pre-pandemic. For me, I, I go down work. Before the pandemic, I would go downtown frequently, at least a couple of times a week for meetings, in the evening, and also for social things. It was sort of the, the rail line was my lifeline to the city, and you know, board meetings as well as, as entertainment. So, I, I really hope that, that...those, those are my two, two main issues.

Please, please consider not closing the Grosvenor-Strathmore Metro station and not cutting rail service at 9:00 PM. It's too early.

MR. GOLDMAN: Thank you, Ms. Lee, for your testimony. You've been very concise and to the point and your comments will be included in the record. Okay. Now we'll hear from our next speaker.

MR. GILL: Hi, can you hear me now?

MR. GOLDMAN: Yes, welcome to the Metro Board. Good evening, please...

MR. GILL: My name's David. I'm David Gill, and I live in Petworth. So, my issue, I wanted to raise for the last hour-and-a-half is the consideration that you would eliminate the 62 and 63 bus service, which our ANC has already done a resolution and a petition on because it's kind of ridiculous because it goes right by the Hattie Holmes Senior Center. It also goes by Mayor Bowser's very first temporary family homeless shelter at Fifth and Kennedy. And I used to take that bus when, before COVID, every single day, with all those homeless families that were trying to get to daycare, to their jobs. And it baffles me that you would shut down that line and make those families walk. I guess the plan is you have to walk over to Georgia Avenue?

MR. GOLDMAN: Yeah, Mr. Gill, I'm sorry, but I, I can't respond and engage in a colloquy with you on this issue. I'm just here to preside and take your testimony.

MR. GILL: Okay, but I'm just saying that it is ridiculous that you are considering shutting down the 62 and 63 bus line down Fifth Street, when you have, like I said, one of the major senior centers for the city Hattie Holmes, and you have the mayor's signature transitional housing unit at Fifth and Kenned. That should not... I mean, that should not be on the chopping block.

MR. GOLDMAN: Thank you. I hear you loud and clear. Thank you, Mr. Gill, for your...

MR. GILL: Yep. And thanks for listening.

MR. GOLDMAN: You're very welcome. Thank you. Have a good evening. All right. We've heard from Mr. Gill and now we'll hear from the next speaker. Okay, so I'm told now that there's no one else in the speakers' queue. So, I'm going to give one last call, final call for testimony. If you haven't already spoken and would like to please press star three on your phone to be put in the speakers' queue. We'll wait 30 seconds to see if we have any last minute speakers, and then we'll proceed to end the hearing tonight, if there are none.

MR. SHEEHAN: Hello, sir. My name is Pat Sheehan. Can you hear me?

MR. GOLDMAN: Yes, Mr. Sheehan, go ahead. Please....

MR. SHEEHAN: Thank you. My name is Pat Sheehan I'm a member of the AAC. I appreciate being given the opportunity to speak tonight. First. I'd like to thank the Board, WMATA Board and WMATA staff for the partnership, good relationships that we have with both of you to be able to get work done for WMATA and appreciate the ability to contribute to that success. And you've heard some testimony tonight with respect to MetroAccess, and I'd like to echo some of that testimony. We appreciate the fact that the service area and the time is being maintained for the MetroAccess area within Maryland, DC, Virginia area. We would urge that you continue that. MetroAccess is really the last refuge for a lot of people with disabilities who cannot use the fixed route service. So that is something that is very critical to that population.

With respect to MetroAccess, also, we understand that there was an IG report making a couple of recommendations. One of which is the use of real-time information, access to MetroAccess, MetroAccess customers, the same way as you'd see information on Uber and Lyft as to where your vehicle is and when it will show up. We're looking forward to implementing that system. Also, another issue with respect to Metro access was the, was the, on time, that, that, patrons would be on vehicles. We want to make sure that that is consistent with the regulations: if bus and rail gets you there in an hour, we would expect the same thing from MetroAccess.

With respect to bus and rail, we would also like to make sure that we don't have any transportation, basically deserts. Areas that if stations are shut down, that buses won't serve. We've seen too many times where that has been the case, particularly people with disabilities who don't have the ability to go from one bus stop to the next, basically are marooned in a certain area where there is no rail or bus transportation.

I congratulate WMATA on being able to get funds to move forward with respect to transportation and making sure that individuals' stations won't be closed, individuals won't be laid off. I think that's all very, very good and appreciate that.

The other areas that, with respect to bus and rail, that we appreciate: the lighting project, over the years has been something that people with disabilities has been, have been active in and really spearheaded. And also, I understand that there are other efforts coming up in the area of wayfinding, which I would urge the Board to approve and look at. You've got a disability population who is interested in getting out and moving in the community and being part of that effort so that if there are wayfinding efforts coming up in the future, in which we can help make sure that they are accessible, the disability, and I'm sure the AAC would be happy to be involved in those projects. Once again, I appreciate the partnership that we have with the ADAP staff, and the Board of Directors. Thank you for listening to my testimony.

MR. GOLDMAN: Thank you, Mr. Sheehan, it's always good to hear from you. Your testimony will be included in the record. All right, I think we still have a couple of potential speakers, so we'll wait a minute for the next speaker to be brought forward in the queue. (Pause)

MS. KLAKOVA: Hello.

MR. GOLDMAN: Hello, good evening. Welcome to the Metro Board.

MS. KLAKOVA: Thank you, can you hear me?

MR. GOLDMAN: I can hear you loud and clear. Everybody else can as well. Please state your name and any organization you're affiliated with.

MS. KLAKOVA: Hello. My name is Anna Klakova. I I'm not affiliated with any organization. So, I'm very concerned about the possible closure of the Grosvenor-Strathmore Metro station on Red Line. This station is very important for me and for the big residential community located nearby. I'm a mother of three little children and I don't drive a car. So, I'm totally dependent on the public transportation and the direct access to the Metro through the Grosvenor-Strathmore station. It is the only way for me to get to DC or Rockville or Bethesda or other locations, including bringing my kids to preschool. So, before pandemic, I started in Richard Montgomery High School in ESL classes. So, they go until 9:00 PM. So, without transportation after 9:00 PM it will be no opportunity for me, to come home and other peoples. So, I want this station will not be closed and we'll continue to be operational. Thank you for my testimony. Thank you so much.

MR. GOLDMAN: Thank you very much, Ms. Klakova, your testimony will be included in the record of the hearing. All right, now we'll look forward to hear from our next speaker and we'll wait that 15 to 30 seconds for that person to be lined up in the queue on the line.

All right, I'm told that we've reached the end of a line of people in the queue. So, we'll just give it another 30 seconds. If you haven't already spoken and would like to, please press star three on

your phone to be put in the speakers queue, and we'll just wait 30 seconds to see if anybody else wants to speak before concluding our hearing tonight.

All right. So I believe that Ms. Klakova was our final speaker of the evening. And so the hearing, excuse me, is now concluded. Testimony can still be submitted online or via the US mail, which of course we don't recommend, as long as it is received by Metro by 5:00 PM on Monday, March the 16th.

And before I thank you for joining us, I find that we have one more speaker who has belatedly come forward. And so, we will hold the hearing open to hear from this last person. So please, uh, bring that last person online for today's Metro hearing.

MS. MOORE: Hello?

MR. GOLDMAN: Good evening, welcome to the Metro Board. Please tell us your name.

MS. MOORE: Can you hear me?

MR. GOLDMAN: I can hear you loud and clear.

MS. MOORE: Okay. My name is Ms. Moore. I reside in Montgomery County and work in DC. I do the 3 to 11 shift. I was doing it two days a week, I'm currently doing it one day a week. By Metro closing down at 11 has impacted me as far as not having transportation to get home. And the only other choice was to rely on Uber, which comes out of my account at the time of the trip, and it takes weeks for me to be reimbursed from the company. So, it may be a ways down the road before Metro will resume closing at 11:30 on weekdays, but hopefully that will be in the near future, once the budget issue, situation is a lot better.

But, Metro closing down at nine will impact other people more than me. The ones that get off at 11, and Metro shutting down at nine, they will have to rely on other means of transportation. Whereas, I'm getting off at 11 one day a week and having to now take Uber. But when Metro road shut down at nine, again, if that's a possibility, my shift starts at 11 o'clock when I do overnight, that means I will have to get to work two hours early and wait around before my shift starts at 11. Like I had to do last year when Metro was closing down at nine. So hopefully things will be worked out where it won't be an inconvenience budget-wise on Metro and transportation-wise on the riders. Thank you for listening.

MR. GOLDMAN: Thank you, Ms. Moore for your testimony tonight. That was definitely our last speaker, and this hearing is now concluded. As I said before, testimony can still be submitted online or via US mail as long as it's received by 5:00 PM on Monday, March 16th. Thank you again for joining us and for taking time out on this beautiful March evening to provide testimony on Metro's budget for Fiscal Year 2022. Good evening and good night.

Voicemails received for the public hearing record:

Received 3/6/2021, 4:15 p.m.

Hello, this is Deborah Brown from Rockville, Maryland. And my comments are that we are really in a bad time of, to, to cut more bus service beginning in July, because things will be getting

beginning to pick up in July, probably. And that's probably not a good time to cut service because you want people to come back to service. People will be starting to probably go back to work a little bit more often, and that's when people will need the service. So, you will, if you want to keep people using it, that's not really a good thing to do.

And also, I am a person with a disability. I am a blind person so that, people with disabilities have not been served well. They, first of all, cut the Abilities Ride service for people to, to same day, same day access service, they cut. And that was not a good choice for people, that some people, a person I know that got a job during the time. And she went, got a job in the health field as, as a person with a disability and she one day needed to go, to get a ride home from work. And she could not, no warning, no nothing. And we are, and that was, this was very difficult for her to get to her job. MetroAccess doesn't work for her. As a healthcare worker, she has to change hours sometimes. That's not really acceptable.

And people with disabilities, changes are made without us having any say and any concern. And we have nobody, we have no board representation at all. As a person with a disability, I feel more served by somebody with a disability in or outside of my jurisdiction. It doesn't matter their race, their, whether they're male or female, I feel more represented by them than I do by a person like me that lived in Maryland. That that is, that, that the disability is a major factor in whether they will serve me or not. And we are not very well-served. We have nobody on the WMATA board representing people with disabilities. I think there needs to be a slot for that, because none of the board members know anything about paratransit. They barely know about the bus service, and they might know a little bit about the rail service, but they definitely know nothing about paratransit. We must have somebody with a disability on the amount of board that's making these decisions, because the advisory committee only advises and is mostly ignored. And so, I would think that, that then I bet that is a major factor in us not receiving proper service from WMATA. Thank you.

Received 3/9/2021, 5:59 p.m.

This is Ron Kaplan at Five Squares Development, partners with WMATA on the Grosvenor Strathmore, Metro, and wanting to testify that we believe the station should remain open in order to preserve the vision and effort of the past five years. That WMATA and we have worked to create a vision that can now become a reality for transit-oriented development. Thank you.

Received 3/9/2021, 5:59 p.m.

Hello, my name is Brian Riley. And my comment is that, Metro should not close Metro stations, particularly, Metro should not close the Grosvenor-Strathmore Metro station. I live right near that station and it is a critical part of our community. There's a whole bunch of apartments and townhouses around here that people bought and moved into because of the Metro station. It would be devastating to us to close that Metro station. Please do not close the Grosvenor Metro station. That's my comment. Thank you very much.

Received 3/9/2021, 6:22 p.m.

Hi, this is Vickie Moore. I live in Montgomery County and commute in Washington, DC. The bus cuts, especially if they cut the T2 bus, that's the only source that I would have to get from Montgomery County into DC from the Rockville end. So that would impact me as far as me communicating back and forth to work in DC. If they were to close the Rockville station or close the station at nine o'clock. And, I also commute on Metro five days a week to get to my 11 to seven shifts. So, if Metro was to close at 9:00 and my shift starts at 11, I'll have to get to work early and wait around for two hours, like I did last year when Metro was closing down at nine,

which posed the inconvenience. So hopefully the funding that Metro needs they will get so they can keep the regular service. Thank you.

Received 3/9/2021, 6:23 p.m.

Hi, my name is Fran Riley. I live near the Grosvenor-Strathmore Metro station. It would be absolutely devastating for our community here to close this Metro station. It's a truly vital resource for us, for people to get to and from work for people to access DC. It's really the cornerstone of our community around here, and it would really cripple us if you were to close the Grosvenor-Strathmore Metro station. So, I would urge you to please do whatever you can to save our station and every other station that you are thinking of closing, because I know that so many other communities depend on their Metro stations as well, just like we do. Yeah.

Also, I wanted to say, I'm very concerned about the closure of these stations because it, at this time, when we need to be doing all we can to site the climate crisis and everything now is not the time to reduce our public transit infrastructure, to close Metro stations, to stop bus lines, et cetera. These are moves that likely it would be difficult to come back from, and Metro is kind of shooting itself in the foot by, by doing this right now. So, I would urge you to please not close any Metro stations. I do hope that some of the, the stimulus money that you mentioned earlier in the meeting can help to keep these stations open, but I would urge you to please keep the Grosvenor-Strathmore Metro station open, and to keep in mind all of the communities who truly rely and depend on this critical resource, which is Metrorail. Thank you.

Received 3/9/2021, 6:27 p.m.

My name is Initial Miller. I'm a resident of Burtonsville, Maryland. I serve the homeless community and I also do outreach. I utilize the Metrobus and closing 22 stations and the Metrorail would impact my work to the community. Also, the reduction of over 2,500 staff members being removed would also create more homelessness. Cutting the bus service cut to 50% of the pre-pandemic levels would create more homelessness and insecurity for jobs and training and transportation needs.

Trains running every 30 minutes and most places service at 30% of predetermined levels stopping the Metro rail at 9:00 PM every day will stop individuals who work at night and part-time and remove that transportation. I'm here to ask you not to do this and that we think about how we can make better choices for individuals. And I thank you for listening and my testimony. I'm initial Miller, Burtonsville, Maryland.

Received 3/9/2021, 6:33 p.m.

Karen Tracy, Grosvenor Place. I'm not representing a company or business. I'm a resident, Montgomery County, Grosvenor Park area and I use the Grosvenor Park Metro for business and personal issues. I very much agree with the first couple of people who left testimony and I think it would be a great detriment not to have continued Metro service, for many, many reasons. So, I do hope that their station remains open. Thanks.

Received 3/9/2021, 6:53 p.m.

Hi, my name is Emma Montgomery. I am a resident of Montgomery County and a non-driver. So, I rely on the Metro to access all things from food to medical services, to most importantly work. As someone who now has the privilege of teleworking, but does not have the privilege of driving,

I relied on the Metro even during the pandemic and especially the buses to access all the things that I need to live: to eat, to make sure that I'm healthy and well, and not so much to see people these days, but to do all those things that I need to do.

While I was working downtown and while I will be working downtown again, I need the Metro to access my work. I am not a person who can afford to supplement my travel by getting Ubers everywhere, by getting Lyfts everywhere. And this is my biggest concern. These Metro closures and especially the bus closures, specifically the T2 line and the Grosvenor-Strathmore station closure, disproportionately affects people who not only work in these areas, but rely on these things to get to their work. Transportation or the ability to work and make income is not a privilege, it is a right. And whether that means exploring options such as running buses and trains less often, increasing fares, whatever it may be, like these services need to stay intact.

I also deeply deeply oppose the idea that we cut service hours. As somebody who used to do shift work downtown for, you know, 15 bucks an hour, and got off at 9:00 PM, I did not have the luxury of just finding a job closer to home in a pandemic. I also did not have the luxury of taking a cab home or driving home. The hours needed to stay the way they are and all the routes that are currently operating need to continue to operate. Disproportionately disenfranchising people who don't have other options, can't drive, won't drive, are not able to drive and are also not able to do things like take cabs twice a day to wherever they need to go, is, is completely ridiculous to me. So, while I understand the budget limitations, I understand the difficult position that WMATA is being put in right now, cutting service hours and cutting stations entirely and cutting bus routes entirely has to be the absolute last option, whether that means leaning more heavily on Montgomery County, PG County and Northern Virginia, and the District to provide funding or what have you. The accessibility that the Metro and the buses provide to lower income people and to people who are traditionally disenfranchised is necessary, to get to work, to be able to do their jobs and to be able to say, well, fed and healthy. Thank you.

Received 3/9/2021, 7:00 p.m.

How are you doing? This is me Lamar Lawson. I know I was on the live recorded comment, but I didn't specify some things on there. I was talking about the B30 going for Greenbelt to BWI and how it's eliminated at this point because of low ridership. I need that bus back because I have kids who live in Baltimore and the B30 was the only cost-effective way for me to get there because of my SmarTrip card, and I'm also totally blind. Leaving from the airport. If the B 30 is not running there, I have to catch the MTA bus number 201 that goes all the way to Shady Grove, which is an hour out of the way. That doesn't make any sense. And then you have to get on the Red Line to ride 30 minutes to your nearest transfer station, and then get on your final train to get to your destination.

My problem with Metro at this point is they were so quick to get rid of the B30, but yet the 5A's still running. That goes from Dulles to L'Enfant Plaza. Something just doesn't seem right about that. So whatever you do, please bring that B30 back. If you want to run into Arundel Mills or not, I don't care. It doesn't matter to me. But I definitely need it to go from Greenbelt to the airport and also running every day. It used to run during the week and not on the weekends, which makes absolutely no sense whatsoever, considering the weekends are the time where generally people come to the area. It wasn't running on weekends and holidays. That just doesn't make any sense to me. So again, I know we have to make budget cuts. I got all that, but please, please bring that B30 back, 'cause I definitely need it.

The D14 and D13, the bus, it goes from Southern Avenue to Suitland via 210. Eliminating that bus, I have to cross 210, and many of you I'm sure know that is a dangerous street to cross at

times. And also, the D14 is the only bus on the weekend that runs down 210, even on Sundays because the 35 on TheBus does not run on Sunday. And that D14 definitely helps me, I live off that line. So, to eliminate that, that would definitely affect me. If you must eliminate that route, you have to put another bus in its place to run down 210 as long as the D14 used to and even on Sunday.

Received 3/9/2021, 7:01 p.m.

This is Lamar again. This is my last comment on the situation. I'm definitely against the Red and Yellow line turn back because sometimes when you get to the cutback stations, like at Mount Vernon Square or Grosvenor, the train that's in front of the train that I'm on, hasn't cleared the platform. So, we have to wait for that train to leave, then wait for the signals for the conductor on our train to move up to the station and for it to go. And that's another delay in itself. So, I am definitely against the turnaround of the Yellow Line and Red Line as well. So, with that being said, thank you for taking the time to listen. And I hope, I know I left this in a couple of messages, that you would definitely take this under advisement. Thank you very much.

Received 3/9/2021, 7:03 p.m.

Hi, my name is Ladans Fakory. Last name is F as in Frank, a K O R Y. My, uh, cell phone number is (xxx)xxx-xxxx. And I'm calling about the unfortunate proposal to close Grosvenor-Strathmore, which is probably one of the most critical Metro stops on the Red Line. I have been living walking distance from Grosvenor-Strathmore since seven years ago, I bought property and, at the forefront property values will drop drastically if you change the hours or cut service. Many of the residents in the area rely on the Metro, we've chosen, where we're living because of the proximity to the Metro.

And I, for one, don't trust myself to drive after long work hours and have a tendency to get very sleepy driving. So, shutting down the Metro for me would actually lead to very unsafe driving and Plan B would be to drive to another Metro stop. And I haven't built in a budget to park in a Metro garage. That's another added cost that was never calculated into my cost of living.

I also wanted to share that this Metro stop is important to people driving from outside of Montgomery County. For several years, I lived in Columbia and Ellicott City, Maryland, and Grosvenor Metro stop is the most convenient stop on the red line for parking because of the number of parking spaces that are provided. And it's an easy exit off of 355. Other Metro stops on the Red Line require driving through multiple red lights or there isn't a convenient parking option. So, for these reasons, Grosvenor-Strathmore is one of the most critical, critical Metro stops on the Red Line. And that's why I moved to live near it, so I could be within walking distance. So, I just want to let you know that myself and my neighbors have carefully chosen to live where we do. And I was an avid user of the Metro. I was using that for five days a week going and coming from work. And I plan to do that as soon as this pandemic is behind us. So, having any plans to shut it down in FY22 is absolutely not a good course of action when in nine months, everything will return to normal and Metro will be back to gaining revenue from our ridership. I also wanted to add that...

Metro Hearing No. 637
Wednesday, March 10, 2021 – 6 p.m.

MR. SMEDBERG: Good evening, everyone and welcome to the Metro Board of Directors meeting of March 10th. We are here this evening to receive public comment on the Fiscal Year 2022 Proposed Budget. I'm Metro Board Paul Smedberg, and I represent the Commonwealth of Virginia on the Metro Board of Directors. I'm joined this evening by Walter Alcorn, a fellow Board member who represents Fairfax County on the Metro Board. Welcome to the fourth and final virtual public hearing on Metro's Proposed Fiscal Year 2022 budget. This hearing is convened by the Metro Board of Directors to gather public comment on two dockets: B21-01 on Metro's Proposed Fiscal Year 2022 through 2027 Capital Improvement Program and Strategic Plan, and second, Docket B21-02 on Metro's Proposed FY2022 Operating Budget and related service and fare proposals, and changes to parking rates at some Prince George's County stations.

Notice of this hearing was made in publication, or by publication in the Washington Post and ads were placed in the Afro, Atref, Doi Nay, El Tiempo Latino, Epoch Times, the Iran Times, Korean Times and the Washington Hispanic, and as well through social media and several radio stations. And signs were placed in all rail stations, on Metrobuses, MetroAccess vehicles, at Metro bus information centers and at over 300 bus stops in the metropolitan area.

Since we're doing this hearing virtually, the hearing is going to look and feel a little different than usual, than our usual in-person hearings. At this point, we would normally have a presentation from our chief financial officer, but in order to get right to your comments and testimony, we have instead posted a video at wmata.com/budget that provides an overview of next year's proposed budget.

However, before we begin the hearing, tonight's hearing, I want to note that with expected passage this week of additional COVID relief funding, Metro will be revising its FY22 budget accordingly. It will take some time to calculate exactly how much funding Metro will receive from the \$1.4 billion coming to the DC region's transit agencies, but we will be able to avert the painful service cuts that were on the table when we began the public process back in January.

With that good news, I'd like to turn to the portion of this evening, where we hear from speakers. Those of you wishing to provide testimony should call (512) 580-8850. Again, (512) 580-8850. After calling in you'll need to enter a four-digit meeting code. For this evening's meeting, the code is 9-1-4-1. Again, the code for this evening's meeting is 9-1-4-1. Once you're in the meeting, you will be able to listen over the phone by pressing star one. If you would like to provide testimony, you can press star three and you'll be put in the speakers' queue. You'll get a message when it's your turn to speak. Again, if you would like to just simply listen, star one; and if you would like to speak, star three and you will be placed in the speakers' queue. For those of you on the line now, if you want to speak, go ahead and press star three to get in the queue.

If you're watching the live hearing on a different device, please make sure to mute that device, so that there isn't feedback. You'll be able to listen to the hearing while you wait in the phone queue. If you would like to provide oral testimony, but aren't able to wait until you, y'know, your, your turn has arrived in the queue, you can press star two to leave a voicemail. Again, if you're unable to stay with us for the entire time before you're allowed to speak, in the queue, please press star two to leave a voicemail. Your voicemail will be transcribed and included in the hearing record.

In order for the public record to accurately reflect who's providing testimony and comments, I'd like to ask that you please state your name and any organization you represent before beginning your testimony. Elected officials will be allowed up to five minutes and everyone else will be allowed up to three minutes each. Extra time will be given for translation, if it is needed. We ask that you stay within your time limit because we want to make sure everyone who wants to speak has an opportunity to be heard.

I also want to note that each speaker is only able to speak once at each hearing. While you may have the option to rejoin the speakers' queue, please note that we cannot accept additional testimony at this hearing.

I want to also take this moment to recognize that this is where we listen to you. This is your opportunity to comment on the proposals on the table for the Fiscal Year 2022 budget, but we are here to listen. We will not be able to answer questions during your testimony. Before you begin your remarks, again, please state your name and any organization you represent, if any. Please note that all statements, including any personal information, such as a name, email address, address or phone number you provide in the statement are releasable to the public upon request, and may be posted on WMATA's website without change, including any personal information provided. Further testimony may be submitted and must be received by 5:00 PM on Tuesday, March 16th. Again, if you'd like to submit written testimony, it must be received by 5:00 PM on Tuesday, March 16th.

Testimony can be submitted online at wmata.com/budget. Again, wmata.com/budget. Online, you have the option to: 1. complete a survey, 2. write free-form comments, and last, upload a letter, petition or other documents. You can also mail testimony to the Office of the Secretary, WMATA 600 5th Street, Northwest, Washington, DC, 20001. Again, WMATA, 600 5th Street Northwest, Washington ,DC, 20001. Again, all testimony must be received by 5:00 PM on March 16th.

Due to the pandemic and the slowdown in mail service, we encourage everyone to submit your comments online, if possible. Your comments will become part of the public record and will be reviewed by the WMATA Board of Directors. Changes to the options presented here tonight may be proposed in response to testimony received and subsequent staff analysis.

And now, finally, it's time hear from you and call on our first witness. Again, as a reminder, please tell us your name and any organization you represent before you speak. And as a friendly reminder, staff will un-mute the speakers one-by-one from the speakers' queue. And please note that there could be a bit of a lag when switching between speakers, so I just wanted to acknowledge that. (Pause)

Eleanor, when you're ready, we're ready for our first speaker.

MR. ZLOTH: Hello?

MR. SMEDBERG: Hello, welcome.

MR. ZLOTH: My name is Williams Zloth. I actually spoke at another session you had, sir, but this, I'm calling in for this session too. I don't represent an organization. I live in Fairfax County and a couple of comments...regarding bus 2A. I noticed under the current information on the website, it looks like you're going to maintain that, but then it had a link to some proposed changes, it looks like you're not going to maintain it. I just want to state that bus 2A, that's two alpha is crucial to

have. It's the only transportation for people going to the City of Falls Church. There's no other, there's no other ART or Fairfax County bus to go there. So, going to the City of Falls Church, Lee Highway, it is the only transportation available and it also goes by Kaiser Permanente, which is really important to have a public transit to go by the Kaiser facility in Falls Church. So, just calling to emphasize that bus 2A should be maintained, it's an integral route. It should be, it should be maintained.

Also want to state... I also would encourage Metro to on weekends to have some sort of service after 9:00 PM to 11:00 PM, Friday and Saturday. One idea might be if it's not cost-feasible to run the trains on Friday and Saturday from 9:00 PM to 11:00 PM, you might want to have some sort of bus from Ballston or otherwise that could provide service between 9:00 PM and 11:00 PM. Maybe sort of shuttle every half hour. So that's really crucial for nightlife to have that option. Also I noticed where there's a proposal to lower the parking fees in PG County. I personally don't understand why that's necessary. I don't think the parking fees should be lower anywhere, picking one jurisdiction. I think it's totally wrong to do that. That's pretty much it. Thank you.

MR. SMEDBERG: All right. Our next speaker again, just as a reminder, there will be a little lag.

MR. HARNETT: Hello? Can you hear me?

MR. SMEDBERG: Yes, we can, welcome.

MR. HARNETT: Great, thank you. Hello everybody. My name is James Harnett and I'm a resident of the District of Columbia. I want to strongly encourage the Board, in both the upcoming fiscal year budget and in future budgetary considerations, reject any plans to name stations after private companies, either for free or for a fee. While conversations have been authorized by the board chair with private companies to discuss the potential renaming of stations, given the hundreds of millions of dollars of losses and revenue for the system due to the pandemic, it is clear that with the new leadership in the White House, transportation systems throughout the United States should come to expect continued hundreds of millions or billions of dollars in investment in rail, buses and the transit options that strengthened this region and our country. Our public transit system is owned by the public, not private companies. I would encourage the board not to bow to pressure from legislators or those who seek to strong arm the WMATA Board into their own political, personal agendas. That's the only comment I have, so thank you all for your time.

MR. SMEDBERG: Thank you, Mr. Harnett. Alright, Eleanor, our next speaker. Again, for those of you just joining us, it will be a little bit of a lag here between speakers.

JIM: Hi, can you hear me?

MR. SMEDBERG: I can. Or we can, well, thank you.

JIM: My name, my name is Jim and I'm a homeowner in Virginia Square and I've attended this meeting to vehemently oppose...

MR. SMEDBERG: Jim, what's your last name?

JIM: I'd prefer not to say if that's okay.

MR. SMEDBERG: OK.

JIM: Thank you. So, the first reason is that the closure of the Virginia Square station would have a severe negative impact on the local community. When one stands within Virginia Square station, all one sees its high rise, commercial and residential buildings that are filled with commuters, commuters who packed the station prior to the pandemic and who due to the availability of COVID vaccines could be expected to return to heavily using the station during precisely the time period that WMATA proposes closing. It seems nonsensical to propose closing the station exactly when a substantial portion of residents who depend on it and to pay for it are expecting to use it most heavily.

In addition, WMATA must take into consideration those residents who, whether they are elderly, disabled, or for other reasons, rely on the Virginia Square station for basic transit needs. For such residents, it would be no remedy to suggest that they simply walk to Ballston Metro because in some cases that may not be a practical option.

Further still, Arlington prides itself on being a community where residents can get around without a car. But the proposed closure of the Virginia Square station is diametrically opposed to that notion of Arlington as being a car-free municipality. The second reason that I strenuously opposed the closure of the Virginia Square station is that in my opinion, even raising the mere possibility of closing a station reflects a failure of WMATA to engage with its congressional delegation and local governments to secure the funding it needs to maintain service levels. Ensuring widespread access to the Metro system should be among the highest governmental priorities, much like ensuring widespread access to, for example, electricity should be, but it would be absurd if a local electric utility threatened to withhold service from, or even hinted at holding service from, a substantial fraction of its users, because that would convey that the utility has failed the fundamental objective of ensuring its continued operation. Here, it feels as though WMATA has offloaded the responsibility of lobbying Congress and local governments for funding to its customers and to the taxpayers. But given the burdens that residents and taxpayers have already had to carry for the past year, this is sincerely depressing thought. So, in closing, I urge WMATA to significantly increase its efforts to work with Congress and local governments to ensure that no station need be closed, especially not the Virginia Square station. Thank you.

MR. SMEDBERG: Thank you, Jim. Eleanor next call. Again, for those of you just joining us, welcome to the WMATA Board of Directors Fiscal Year 2022 Proposed Budget public hearing, and we are waiting for our next speaker to join.

MS. HORN: Hello. Can you hear me?

MR. SMEDBERG: I can hear you. We can hear you.

MS. HORN: Thank you. Well, thank you very much. I am Sally Horn and I'm speaking tonight on behalf of the Greater Tysons Citizen Coalition, which is a multi-jurisdictional coalition comprised of concerned citizens, organizations, and communities in and around Tysons. We have uploaded a letter to the WMATA Board on the WMATA link, so tonight I'll just summarize our key points. We are pleased that the Congress has passed the COVID relief bill and that it will soon be signed by president. We are hopeful that WMATA will receive sufficient federal funding to maintain the existing levels of bus and rail service throughout the second half of fiscal year 2022. However, in the event that that cuts are still necessary, we urge you not to cut service as the McLean rail

station for the following five reasons. First, closing the McLean rail station would defeat the goals of reducing traffic congestion and encouraging the use of public transit, goals we strongly support in as much as our area has routinely experienced high levels of traffic congestion from commuters and our public transit options are very limited. Second, the McLean Metro station is the only rail station of the four stations in the Tysons/McLean area that has nearby commuter parking for users of Metro. Since most of McLean is not on a bus line, McLean residents must drive to a Metro station to access public transportation. Third, the McLean Metro station is the second busiest-Metro station of the four that I mentioned. It is also the station that serves the CapOne headquarters and its employees, the CapitalOne Performing Arts Theater in Tysons that will open in the fall and other businesses such as Wegman's. As more people are vaccinated and return to work or feel, feel safe enough to venture out for entertainment, and certainly by early in calendar year 2022, it is not unreasonable to assume that ridership will return and grow if the station is open.

Fourth, bus service is not a viable alternative for us. WMATA does not plan to operate bus routes from the McLean rail station into DC during this time, this first six months of calendar year 2022. And further, none of the few operational Fairfax-operated bus routes have stops at the McLean rail station that provide direct service to any place outside of Virginia or to the other Metro stations in the Tysons McLean area. And finally, based on the data provided by WMATA, it would appear that the anticipated costs of closing the rail station is about \$450,000 for the first six months of calendar year 2022. If federal funding does not fully close the overall budget gap, we urge you to find savings elsewhere and keep our McLean rail station open. Thank you for listening.

MR. SMEDBERG: Thank you Ms. Horn, appreciate those comments. Eleanor, our next speaker?

MR. SNYDER: Good evening, Mr. Smedberg, Dave Snyder representing the City of Falls Church. I serve, as you know, vice chairman of the Northern Virginia Transportation Authority and I serve on the Northern Virginia Transportation Commission and COG's Transportation Planning Board. I personally, and the City of Falls Church, have long been the strongest possible supporters of both Metrorail and Metrobus, and we hope to continue to do so. The points that I want to make this evening, are first of all, in terms of bus service, you've already heard at least one citizen from adjoining Fairfax County talk about the importance of the 2A bus system. The city of Falls Church relies totally on Metro for its bus service, does not have a local bus service and so very much requests the continuation of the 28A and the 2A bus lines as fundamental to essential workers, our citizens and the citizens of the surrounding area.

Secondly, with regard to budgeting, we certainly support those citizens who have already spoken against totally closing any stations as self-defeating, and putting other interests ahead of riders. Secondly, headways, as proposed of 30 minutes, would discourage all but the most dedicated rail users who have no other alternative. So, we urge that in future budget considerations and discussions that the notion of closing stations or 30-minute headways be ruled out, especially in the case of FY22, where it's expected that the third and fourth quarters is where we will really see a rebound of ridership. We hope, as do you, that the current federal funding will make the worst of the doomsday budget scenario unnecessary, but we urge that in any future discussions about budget, that the notion of closing stations and 30-minute headways, not the, on the agenda, but instead much more nuanced and careful consideration of necessary service cuts. Let me end where I began: these are extraordinary times and the Board, the Metro management and the

employees are all to be commended for dealing with unprecedented challenge. And I want to thank you very much for the consideration of all of our comments, holding this hearing and the comments of other citizens. Thank you.

MR. SMEDBERG: Thank you, Council Member Snyder. And, as always Mr. Alcorn and I always appreciate your comments. Thank you.

MR. PALMIERI: Hello. Can you hear me?

MR. SMEDBERG: We can hear you. Welcome.

MR. PALMIERI: Hi, this is Daniel Palmeri. I reside in Alexandria and just represent myself. I do have issues following many of these similar comments that other people have mentioned regarding the high-density areas, where you do have a lot of, a lot of residential, as well as commercial areas where people are generally operating utilizing public transportation, almost exclusively or very close to exclusively. And so they rely on this public transportation. In particular, I live near Braddock station and I use the Metroway 1 bus frequently, to go around just for normal routine transportation, routine needs, say if I went to one of the stores or something like that. I have seen a lot of people use this, even during COVID, but I do believe the data isn't correct because what I've seen since I have frequently ridden this is that the bus scanners were not working properly. So, these numbers are probably 400% below what was reported in terms of ridership. And from the times I see, there's usually, I understand it's less than what it was prior to this, but there's usually five plus people on the bus during, during peak times. And then in the past, it's been a lot more during pre-COVID, which we'll probably restore once, once people are going back to work and getting out of the house, once everybody is vaccinated.

The other issue I do have is, is regarding somebody to the Metro stations that are proposed to be closed, especially ones that are in near, that are inside these areas where you have concentrated buildings. And in terms of having these, these shopping areas, as well as, as well as residential areas. And there's quite a few that have been built up all around Metro with that, with that in mind where people don't have to rely on cars to get around and then rely on public transportation.

MR. SMEDBERG: Is that it? Mr. Palmieri? Did we lose you?

MR. PALMIERI; Yes, that's it.

MR. SMEDBERG: Oh, okay. Well, thank you very much. Appreciate your comments. OK, Eleanor, our next speaker. And again, for those of you who may be joining us, welcome to the Metro Board Fiscal Year 2022 Proposed Budget public hearing. (Pause) As a reminder, we do have a little bit of a lag between each speakers with the phone bridge, but....

MR. EICHELBERG: Hello everyone. My name is Alan Eichelberg. I'm not here representing any group, just a private citizen living in Arlington County. I was just calling into express comment over the concept of closing Metro stations. While personally my wife and I use the East Falls Church Metro station to commute to work every day, I'm sure that we're not alone with many of the other private citizens that are listening in on this conversation, and participating. I'm not here to advocate just for the East Falls Church Metro station. I think that we need to think more regionally

about the health of our community and the citizens that rely on public transportation to get to and from work and other critical components of their lives.

I find myself a little bit confused about how closing stations would ultimately solve the overall problem. Uh, it seems to me that Metro has a problem with a lack of ridership and reducing access to the ability to participate as a consumer of public transit seems counterintuitive in terms of resolving that overall issue. I'm sure that it is a complex situation. One that's probably beyond any one individual to resolve, but I think that the idea of closing down access to critical public transit in a period after a pandemic recovery will be particularly harmful to businesses that rely on that commuter access as well. I just think for myself about how many times my wife and I have taken the Metro downtown to Arlington to one of the other stations there to enjoy a dinner or a meal. And have chosen to do that as responsible citizens with a public transportation ride home after, after dinner. I think that it's very important that these services continue to operate and, as opposed to considering opportunities to cut services and costs, I would encourage the WMATA Board to evaluate opportunities to provide their service to customers in a more efficient way that will increase ridership and improve reliability of the system. Because I think closing Metro stations will only permanently lose more riders after those stations may reopen, and it makes set forth an irreversible cycle of Metro closures. That's all I have to say other than thank you for your time and hearing me out.

MR. SMEDBERG: Thank you Mr. Eichelberg, appreciate those comments. Again, as a reminder for those of you who are on the phone or who have recently joined, if you would like to make testimony and to be placed in speakers' queue, please press star three. And if you would like to leave testimony on our voicemail, which will be transcribed for the official record, please press star two. Again, if you'd like to speak, push star three to get in the queue and star two to leave testimony. Eleanor, our next speaker.

MR. MUSSENDEN: Hello, can you hear me?

MR. SMEDBERG: Yes, we can. Welcome.

MR. MUSSENDEN: Well, hello. First of all, I'd like to thank you for your time today. My name is Christian Mussenden and I can spell my last name, Mussenden is M-U-S-S-E-N-D-E-N. And I'm a member of Sunrise DC, and I'm also DC Metro area.

I'm calling regarding my concern over the budget proposal. That kind of budget proposal would provide severe hardships for our BIPOC communities, the working class, the elderly and the disabled. This proposal, which calls for eliminating entire bus lines and shutting down Metro stations, is very shortsighted from an economic standpoint and is also unnecessarily cruel and discriminatory. On top of that, I believe that we must start considering the environmental impact that this may have. We're nearing a point of no return in our environmental crisis, so we need to be investing in green energy and sustainable infrastructure like our Metro. The news of the federal funding is encouraging, but I want to reiterate that the Metro is an invaluable service that we provide to our residents, it's not a privilege that we need to continue to fight for. I again, thank you for your time. And I urge you to consider my comments and use the federal and city dollars to avoid any budget cuts to the Metro. Thank you so much.

MR. SMEDBERG: Thank you Mr. Mussenden. Eleanor, our next speaker. We're waiting for our next speaker again. If you'd like to speak, please push star three. And if you'd like to leave a voicemail with your testimony, please push star two.

MS. WELLA: Hello?

MR. SMEDBERG: Hello. Good evening.

MS. WELLA: Hi. Good that you can hear me. My name is Ellie Wella and I am calling on the behalf of Sunrise Movement DC. And I am a former resident of Northern Virginia who has used WMATA's Metrorail and Metrobus systems since I was 12 years old. So, for me, that's 14 years. So, these budget cuts are extremely concerning in the fact that as a disabled person and as a person of working class poor, as a person who has lived within multiple BIPOC communities who have suffered grave injustices, environmentally, socially, and so on. These cuts, especially within the likes of Virginia such as 25B, 16, the 16 lines, the 2A, the 1A - these are lines that essential workers, especially within BIPOC communities in Northern Virginia rely on. These are also lines that disabled people have used, and I have experienced what cuts could do with the ART buses, Arlington transit centers, DASH within Alexandria, and Fairfax Connector within Fairfax County.

Additionally, most of the lines are they proposing cuts for within DC effectively, not just disproportionately, affect BIPOC communities, but also disabled communities. These are invaluable resources for disabled folks. These are valuable resources for BIPOC folks. These are invaluable resources for the unprivileged, for the poor and for the working class, because unfortunately as my previous colleagues have mentioned, we are in a climate crisis and these climate crises cannot be further ignored. And the green energy that the Metrorail would be able to provide is something that we need. So, we need to keep re-investing in Metrorail and maybe possibly consider defunding services that do harm to our communities and reinvest in services that will actually be safer for us because cutting, like this will actually propose more of a threat, and more violence than good. Anyway, thank you for your time.

MR. SMEDBERG: Thank you, thank you very much for your comments. Eleanor, our next speaker? (Pause) Again, just as a reminder there is a bit of a lag in getting speakers queued up here. Once again, if you'd like to speak, press star three on your phone, and if you'd like to leave testimony in voicemail, press star two.

And I'm being told that is it for speakers. We will give it just a few seconds here to see if anyone chimes in at the last minute. OK, we may have one speaker that is on mute that is trying to get through. Speaker with the last four digits 1-4-6-9? (Pause) And we have one other caller in addition to that.

While we're waiting, I'd like to get...

MR. GOUDIE: Hello, Mr. Smedberg, can you hear me?

MR. SMEDBERG: Yes, I can.

MR. GOUDIE: Thank you, Board Chair... This is Robert Goudie. I'm the executive director of the Reston Town Center Association, which is the community governing association for the Reston Town Center district. I want to thank you and Supervisor Alcorn for tonight's meeting. I was calling in to testify in support of opening the Reston Town Center Metrorail station together with the rest of the Phase Two Silver Line, as soon as construction and testing of the system allow, and in opposition to any plan, to reduce levels of service or to consider temporary closures once those

stations are opened. But I understood from your very helpful comments at the outset of the meeting, Board Chair Smedberg, those kinds of service level reductions are now off the table with the passage of the new emergency funding plan through the Congress today. So, in the interest of respecting your time and everyone else's, I'll leave my testimony here tonight at that, and I'll submit written testimony. Thank you very much.

MR. SMEDBERG: You're welcome. Thank you very much. And I believe we have one final speaker waiting to get through the speakers' bridge here.

MS. RANDALL: Hello, can you hear me? Hello?

MR. SMEDBERG: We can, Chair Randall. How are you?

MS. RANDALL: Very good... I am well, how are all of you doing?

MR. SMEDBERG: Good, good. I'm here with Walter Alcorn and the others listening.

MS. RANDALL: Well, it's, it's nice to talk to you all. And first let me say that yes, I'm Phyllis Randall. I'm Chair of the Loudoun County Board of Supervisors and Chair of the Northern Virginia Transportation Authority. And first let me say that I hope all of you are doing well and hope your families are healthy. I do thank you for the opportunity to speak tonight regarding the Proposed FY2022 WMATA budget. I understand that WMATA, and this is the good news, that we learned today, that you're going to be expecting additional federal aid from the American Recovery Plan that passed today in the House, and it is slated to be signed by the president. So that is very good news. Much welcome, welcome news.

Having said that I do want to express my strong concerns regarding any possible delays to the opening of the Silver Line Phase Two, which is, which, which we'd like to see open when the system is ready to begin revenue service. Loudoun County has invested millions of dollars into the construction of Silver Line Phase Two, along with additional millions to reorient our road system to the Metro system, modify transit system routings, and we're planning for future developments to and around the Metro stations. In Loudoun, our Metro stations include the Loudoun Gateway, the Ashburn Metro station and the Dulles Metro station that as you all know, is located in Dulles Airport. Dulles Airport and the Metrorail station that will be in Dulles Airport will serve as an international gateway to the region. Passengers and employees from all across the region will be utilizing the Metro, the Metrorail system to and from that location in particular.

Our investments that we made to bring Metro to Loudoun will reap benefits to localities and to the WMATA, and to WMATA for years to come, in economic development, increased ridership on the Metrorail system. And it's going to strengthen the Washington economy and the WMATA system. I'll give you an example: in Loudoun County, there are 1,280 acres of development and greenfield opportunities surrounding the Silver Line, from Innovation Center to the Ashburn station, where future success is predicated on Metro. As currently approved those developments, just those developments alone, account for 16,500 residential units, and over 21 million square feet of commercial, mixed-use development. Loudoun is projected to increase the population to over a half-million by 2030. And most of that growth will be seen in Eastern Loudoun County along the Metro Silver Line corridor, Metro access is a key factor in our new office development, and our office development is dependent on proximity, proximity to where the workforce lives. And what we know is that workforce wants to live through the Metro, near the Metro stations, and have all

the amenities that a transportation line like Metro will provide. In FYI 2019, Metro ridership generated 81% of fare revenues. Increasing ridership on Metrorail supports the entire WMATA system.

Finally, I want to say that we all appreciate the CARES Act funding that was distributed to localities last spring. I understand the additional funds from the CRRSA Act may also be allocated to local, local jurisdictions, and these funds have helped and will continue to help our, our system running in the COVID- 19.

Actually, this is really my, finally: I know how hard you all have been working. I know how tough this has been for all of, all of us. And, I do want to say how much I appreciate it. You know, there's been a lot of ups and downs this year in COVID, a lot of things that have been unexpected, and it has not been lost on Loudoun County, on our board, or on me, how hard the Metro board has been looking. So, I want to thank you and tell you all that I'm going to invite you all out here when we cut the, cut the ribbon on the Silver Line station, and we hope that sooner and not later. So, thank you for listening to me this evening. You all take care.

MR. SMEDBERG: Thank you, Chair Randall. And we appreciate the, y'know, your appointment of Mr. Letourneau, Supervisor Letourneau, to the various transportation bodies, and we very much enjoy working with him on the Metro Board. So, appreciate that and appreciate your comments.

I understand we have one additional speaker, Eleanor? (Pause) Speaker 1-3-1-2 is next.

MS. MILLVILLE: Hello, can you hear me?

MR. SMEDBERG: We can. Welcome.

MS. MILLVILLE: Oh, thank you so much. I'm, my name is Barbara Millville, and I cannot wait to ride Metro again. I have to say that I've missed it. And I'm representing the National Capitol Citizens with Low Vision, and I have low vision myself. I am using a closed-circuit television to read my comments. And so I, I thought I'd share with that with you since you can't see what I'm doing here.

Anyhow, I'm testifying because, Jim Hamre and Phil Posner recommended that I do so, and I wanted to share how the current and possibly future service change proposals would impact this group and seniors as well. Our riders are unable to walk an additional 1.6 miles to and from an alternate bus stop. There isn't enough time for our riders to learn a new travel route. It takes a month or more, and there is a long wait list in Fairfax County where I live, our riders are afraid due to the numerous pedestrian fatalities, which occurred while trying to cross streets. There simply aren't enough traffic signals, lighting and sidewalks near the bus stops yet. Many of these riders are not eligible for paratransit or don't care to use it.

Pandemic or not, many of these bus routes are further out and tend to have lower ridership numbers. As a result, they will always be on the Metro chopping block if Metro is forced to cut service. We hope this pandemic will be over soon; Jim's beard is getting quite long. We'd appreciate if, we'd appreciate it, if you would get with Jim and the AAC to develop a plan for how to handle the needs of this special-needs population. If you're unable to handle this soon, I'm

afraid these riders will decide to instead take the more costly MetroAccess. Thank you so much during this very trying year. I do understand that you folks are really working hard and we appreciate, appreciate the difficult position you are put in right now.

MR. SMEDBERG: Well, we thank you very much for your comments, Ms. Millville. And the Board, and I know staff, very much, very much appreciate the collaborative and close relationship we have with the AAC and Mr. Posner and the other, and the other members of that committee have really contributed quite a bit over the years. And we expect they will continue to do so as we begin to build back. So. I appreciate that.

Eleanor, do we have any additional speakers? We just have one more speaker. (Pause) Okay, I'm told Barbara was our last speaker. So, I want to thank everyone. I'm going to give one last call for testimony. Okay, we have no more speakers. This hearing is now concluded.

Testimony, again, can be submitted online or via the US mail as long it as is, as long as it is received by Metro by 5:00 PM on Monday, March 16th. Again, we must receive your testimony and comments via online or US mail by 5:00 PM on Monday, March 16th. Thank you again for joining us and taking the time to provide your testimony.

Voicemails Received as part of the public hearing record:

Received 3/10/2021, 6:39 p.m.

Hi, my name is Olga Colarano and I want to talk to about the, the bus, 10B in Alexandria, Virginia, going to Ballston Common. I believe that, they say they going to discontinue between King and Washington and Old Town Alexandria. And I want to know why, because the 10B is the only one bus who is going, crossing the street, Washington Street in coming from where I live, which is Hunting Point. I really needed to speak to somebody because I, I was really worried because there's the only bus is coming. Is a lot of retired people we live there, and we don't drive. And, I really, I want you, if you, you don't have time today, you can, tonight you can call me. My phone number is (xxx) xxx-xxxx. And I'm really worried that they discontinue the bus is especially in the place King and Washington. Thank you very much.

Received 3/10/2021, 6:40 p.m.

My name is Mike and I'm calling to oppose the service cuts to 21A and 8Z in the city of Alexandria, and also the proposed closure of Van Dorn Street station, also in Alexandria. And earlier today, the Metro put out a statement from the General Manager saying that due to federal funding service cuts could averted. And you already received a sense of federal funding last year after the pandemic. So therefore, my comment and question is, given that the large amounts of subsidies that you're getting from federal taxpayers, it seems like you ought to be able to maintain the pre-pandemic service levels. And part of that would be continuing to have the 21A bus line, 8Z bus line and Van Dorn Street all fully operational and reflecting the pre-pandemic schedule.

And that area, and I would note that that area of Alexandria, it's not close to King Street or Braddock Road, Metro, those stations are about five miles away. So, this notion of limiting 21A and 8Z, and also shutting down Van Dorn Street means the people in western Alexandria who are able to afford a car and, and are able to drive are going to almost certainly drive themselves to, to work and not deal with convoluted, work around just taking buses to distant stations and then taking Metro from that.

And then my other comment is a process one, which is that they said at the beginning of this hearing, that they, that you had received a large amount of federal funding or anticipating receiving

a large amount of funding and that there would be revisions to the proposal. So, my question is whether there will be an opportunity, another opportunity for a survey and also a public hearing, once you've looked at that federal funding and made adjustments to your plan. Thank you for considering my comment.

Received 3/10/2021, 6:51 p.m.

Good evening. My name is Harper Ricks. First, I'm going to apologize as I was unable to participate in the hearing last night. My comments are related to the Maryland bus service P18, NH1 and NH2. I personally drive and use the services only if my car is being serviced or for a nice change of pace from driving. However, many riders have no other options. While I realize ridership has significantly declined, these buses provide a critical service and eliminating these lines will cause a serious hardship for some residents. Please take this into consideration. Thank you.

Received 3/10/2021, 6:53 p.m.

Hi, my name is Olga Colorana. I live in Hunting Point and I'm concerned about 10B going from Hunting Point to Ballston in Arlington. I worry about it because the 10B is the only bus coming from the Hunting Point and crossing Alexandria. And when I hear, when I see the note was, and the buses stop at the King and Washington, I started to worry about it. If we don't have the 10B, because that is the only bus coming from the Hunting Point. We have, like is six blocks away the 10A, which is going to Huntington station and going to Pentagon.

My, our problem is that a lot of people don't speak English enough to, to call and, and ask why, what happened. But I think if you listen, what I tell, it's the only bus, the only bus coming to the Hunting Point. Before, was the 10B, the 10E, the, the, the 10A, it was the 11Y, all the buses was coming to Hunting Point and now we have only the 10B. And I don't think it would be too expensive to try to don't to keep it that bus. Especially if we, there is lot of people going in the bus. I wish you can keep that in consideration and you can listen to poor people. Because like I tell you, without the bus, I don't know how the people who live in Hunting Point, we going to do it. And it's not much it because it only is going and coming every 45 minutes. And I really, really worry about the old people living in the buildings and the people who try to move into, go to work and every everything else. I wish that you can put in consideration that, and please don't take away the 10B,

Because like I tell you before I live right here for 45 years, and around the 45 years, they discontinued in 28B, the 28A, the, the 29, they keep him discontinuing and that is the only bus coming to Hunting Point. Please, I'm begging you. Don't take the 10B away. Okay, thank you very much. I hope you do something.

Received 3/10/2021, 7:10 p.m.

Hi, this is Carrie Wilson with Cornerstones in Reston, Virginia. I was calling to urge WMATA to consider everything you can to request additional aid from the federal government. But it's very important to keep the Silver Line open. These stations are critical to open up the Dulles Corridor for economic recovery and connecting the DMV region. The Silver Line opens up opportunity for low- and moderate -income workers who can consider new jobs and education to support their families. And these workers are vital to our region, and frankly, the low-income workers are far less likely to own a car, and particularly out here in the suburbs. We also know that the bus transit support that goes along with opening the lines is critical, particularly in the suburbs of Northern Virginia, for those without access to car and Metrorail today. And, that's going to be an important part of solving the problem for our workforce. WMATA's own equity policy talks about finding a reasonable solution. It takes 61 minutes by bus to go 1.6 miles from Herndon, Virginia for workers to get to Dulles Airport. It's time to finish the job and open the doors for the Silver Line. Thank you.

Comments - general

I NEED ACCESS TO THE BUS ROUTES NEAR MY HOME, 62 AND 63, WHICH ARE PROPOSED TO BE CUT; THIS IS ESSENTIAL TO MY ABILITY TO TRAVEL TO MY PLACE OF EMPLOYMENT, GROCERY STORES, AND OTHER ESSENTIAL LOCATIONS

WMATAs largest expense in the signal / C&S department is labor. Anything that can be done to reduce labor expense will ultimately help in reducing WMATAs total budget. Signal Scout is a signal troubleshooting tool that helps identify the root cause of signal failures more quickly and has given other railroads the ability to reduce their staffing by up to 11.67%. Signal Scout increases the capabilities of signalman, allowing troubles to be resolved more quickly resulting in better on time performance and less paid overtime. Signal Scout is a training assistant. Signal Scout allows for quicker review of trouble logs to more quickly address difficult to identify issues. Please consider the use of Signal Scout as a cost savings and performance enhancement measure. www.semaphoresoftware.co/signal-scout

Please do not cut the D6 route. We rely on it for work and school.

Metros proposed plan is terrible on many levels. 1. It is clear that you are pitting commuters from Northern Virginia against DC residents. It is also clear that you are punishing federal workers, given that the closures are near areas with a high concentration of federal buildings. I believe this is intentional with the goal of enraging them so they will complain and it will lead to increased federal funding. You should not use federal workers as pawns to increase your funding! The decreased parking rates and bus plan for DC and Maryland residents is a clear indication that you are playing favorites. You are facing a budget shortfall, so naturally you are going to reduce revenue from parking to DC and Maryland residents but then punish Northern Virginia residents with reduced service? According to the plan, half of the proposed Metro station closures will come from Northern Virginia. Also, according to the plan, you are also looking to add bus service to 10 additional lines to add more access while shuttering entire Metro stops in Northern Virginia? If I lived in Alexandria, I would be particularly enraged with the closures of both Van Dorn and Eisenhower Avenue Metro stops. Come on! 2. Metro needs to consider ridership after 2022 and the conclusion of the lockdowns. The optics of this plan scream that you don't know what you are doing as an agency. For example, commuters in Loudoun County wait years for the Silver Line only for Metro to shutter five stations on the Silver Line? Also, closing the Arlington Cemetery and Smithsonian Metro stops will not help this area with tourists. It projects to the outside area that we have a substandard system. Granted there are two federal allocations for Metro, one for operating budget and one for improvements which justified the closure of the Arlington Cemetery stop. Now, you are proposed closing the station altogether right after making platform improvements. This improvement plan has already inconvenienced riders. What message does this convey to riders? 3. Can you please explain why current service is so poor? Decreased ridership should make Metro more efficient and yet every trip we are waiting for trains on the platform along from Franconia-Springfield? Why? There should be fewer delays with fewer commuters and fewer trains coming. That isn't the case. The point is, if riders should anticipate even poorer service (possibly with a smaller budget for maintenance) with budget shortfalls we should know that as well - - we are experiencing that now. 4. What are better options? Rather than shuttering service, the 9 P.M. service ending time is far better. While not desirable, people should be able to find alternate forms of transportation. The other point you need to consider is contingencies. If you shutter stations, what happens if a station is closed due to inclement weather or security concern? You could have hundreds if not thousands of riders stranded. Bus service will not accommodate those folks. Even a train arriving every 30 minutes is a better option than station closure for these reasons. I sincerely hope you will rethink your proposal with input from people, like me, in mind.

Don't close Clarendon metro. I moved to Clarendon for the metro accessibility with my little kids.

Please keep Cheverly I, ☐

Comments - general

March 13, 2021WMATA Board of Directors600 5th Street, NWWashington, DC 20001Comments Concerning the Elimination of the E6 Bus Route in the FY2022 Metrobus Service PlanDear Sir/Madam:I am strongly opposed to the elimination of the E6 bus route, which runs between the KnollwoodRetirement Community and the Friendship Heights Metro station as described in the FY2022 Metrobus service plan, especially as the alternative service plan expects to also eliminate a portion of the M4route along Utah Avenue to Pinehurst Circle beginning in January 2022. The effect of this proposalwould leave hundreds of residents in upper Northwest without any public bus transportation options.According to the transit authority's proposal, the change in E6 service has previously been estimatedto save the District about \$94,000 a year, \$1,800 a week, or roughly \$257 a day. Clearly, any savings forthe District would be nominal, but the burden on a community with limited public transit options wouldbe enormous. Hundreds of residents in upper Northwest's Ward 3 and 4 neighborhoods depend, andwill continue to be dependent on the weekday-only service throughout the day once we return to apostâ€pandemic economy. It will once again be a vital link for students traveling to neighborhood schoolsand for the many weekday commuters who use it to get to their workplaces throughout the region.Workers who rely on the E6 to reach their jobs at Knollwood would be also be affected negatively. Theproposed change would also affect many seniors who live at Knollwood, local businesses, including thepopular Broad Branch Market, the commercial strip on upper Connecticut Avenue, and a host ofbusinesses located immediately at the Friendship Heights bus depot. Finally, the proposal runs counterto the sustainable community so many Council members tout. Riders would be forced back into theircars and onto crowded DC streets.For these important reasons, I urge officials to reject the proposal to permanently eliminate the E6Chevy Chase line, and I believe many riders hold the same view. WMATA should service all parts of theDistrict with equitable public transit options. Instead of slashing it, there should be improvements to theE6 route that bolster convenience, frequency, reliability, ridership, and cost recovery. One simple step isto make sure that the E6 appears on WMATA's Next Arrivals app and website (currently the M4 oftenappears as a nearby service option, whereas a rider must search for the E6 busETA). Other options toconsider are greater frequency, weekend service, and the use of smaller buses that cost less to operate.The E6 bus ridership community is eager to work with WMATA and DC transit officials to ensure thatall DC residents, including those that live in the DC Chevy Chase community, can count on good publictransit options for many years to come. Canceling a needed service during the unprecedentedpandemic is a punitive and unreasonable step for WMATA to take.Sincerely, [REDACTED]

The metro is very important to us. Cutting the service is horrible for us. We need service at least every 10 minutes.

Metro is critical to the economy of the National Capital Region, Tysons and the entire Silver Line corridor. Transit is existential to the Tysons envisioned by the Comprehensive Plan. Much has been accomplished in the decade since Fairfax County adopted the Plan, and transit remains key to continued progress. Ever increasing vaccination will result in increased activity and reopening. Employees and customers will need more trains and buses to get to work and entertainment. Bus and train service should be increased to meet anticipated return of riders. While it is understood that mechanical or construction issues may delay opening Silver Phase 2, no delays should occur due to financial constraints.

When life returns to normal, I anticipate taking the bus from my home in Spring Valley into downtown. I hope that Metrobus can retain service along Mass Ave. Thank you.

Dont cut the College Park metro station

Please do not close Strathmore metro center this will be devastating to our community

Please start collecting fares from everyone. I know the pandemic is hurting everyone, but why should I continue to pay for Metro when I know fare collection isnt being enforced?

I have a huge number of tenants who live in the Grosvenor Park Condominium units and who work at NIH. Almost all of them are from out of the country and do not have cars. They must rely on public transportation and it is difficult for them because their English is limited to their scientific work. (Yes, I am describing the post-docs who come to NIH for a year or two). The Grosvenor Metro stop is a god-send for them. Closing the stop would be very difficult for them to continue at NIH. Travel to and from work would really cut into the time they could spend at their labs.

DONT CLOSE STATIONS AND DONT END SERVICE AT 9:00 PM! THE METRO IS SO IMPORTANT TO OUR COMMUNITIES

We believe that east falls church metro should not be closed. It's a key station for many government commuters.

I definitely think closing down the Greensboro station would be ill-advised since so many people rely on it to get to work and Tysons is very difficult to navigate without a car (or even with a car most of the time)

Do not shut down East Falls Church metro. That would be counterproductive and many of us who travel from the western part of Arlington.

Please do not cut the U4 bus route. This is the only bus connecting the river terrace community to other metro services

Please keep the M4, I need it to get to school and I would have to walk 45 min to get to school (both parents work, can't drive me).

Please don't close East Falls Church Metro. Many rely on this to commute and transportation for all types of reasons, including work.

We need the D6 bus route. Its the only transit option to Georgetown University from the west. Plus it serves Sibley, Georgetown Hospital, Key School, Duke Ellington, Washington International School, Lab school, and so many other schools.

Please do not close the east falls church metro station. It is a critical hub and closing it would further increase road traffic already close to breaking point in the area.

Comments - general

Please do NOT eliminate route H! We depend on this route and will need it once the pandemic eases

East falls church metro is key metro for north Arlington

I am writing to support the D6 bus route in anc3 which takes students to public schools and upon which my household members rely. Please keep this bus route. I oppose eliminating the D6 route.

The D6 and the M4 are the only buses that travel to Hardy Middle School and Wilson High School. My children need access to these lines because of their destination.

If you close the van Dorn metro station you are further disenfranchising the west end of Alexandria city. A location with a higher minority population then other parts of Alexandria. Please do not close this station.

No cierren east falls church , es un largo camino de tysons corner a ballston para quienes no tienen carro y usan esa ruta

Oppose eliminating D6 bus route as students on MacArthur Blvd use to get to school and no metro alternative nearby.

Please do not eliminate or reduce the D6 line! We are reliant upon this! There is no other public transportation in the area.

Just when people might be able to go back to sight seeing and work, you will close these stations??? You should close them now with a plan to REOPEN January 2022. Your plan is literally the opposite of people will need

IN the particular case of East Falls Church, it seems absurd to say it is not used enough - it CERTAINLY was used to the capacity of its parking; I dont see how it could have been used any more

Please keep bus lines 17K & 17H. Taking these away would be devastating to the working families in the area, many of which are military. Thank you for your consideration.

Please do not shut down the M4 line. This is essential for children to get to school at Deal and Willson. Public schools must be accessible to the students they serve! Please do not take away bus routes that serve schools!

Please don't do away with both 17H & 17K, at least one needs to stay. Many in the area depend on it for transport to and from work.

I object to the potential closure of East Falls Church stop. It is within walking distance of many neighborhoods and serves many people.

it looks like a death spiral

Do not cut any buses East of the Anacostia River. They are essential. Do not cut the U4 bus. Increase frequency of bus arrivals.

If all of the proposed changes are made to the bus routes, youll force me to drive my car!

Please do not close Grosvenor Station. This is a vital commuting hub for North Bethesda. Closing the station would have numerous deleterious affects on the surrounding community.

Closing stations only hurts the future of mass transit. Especially when the economy is about to reopen. These closures shouldve occurred from March 15 through June 1 last year. What on earth is the oversight board here doing? The entire systems couldve been shuttered instead.

Hi please don't shut down the college park metro. So many students and faculty rely on it for transportation into DC

Please dont cut the 62/63 bus line. It is used for most kids to commute to multiple schools

Potential closing of the College Park Metro Station would be of major hinderance for those who get into DC/VA via train. Also, students arent going to be able to afford to get into the city (given the pandemic is controlled by then).

Eliminating the D6 bus makes no sense and leaves those of us along MacArthur Blvd without accessible public transportation.

I heard WMATA is thinking of cutting D4 and D8. I haven't used them since the pandemic, but I plan to start using them again once I return to work downtown. So if you do cut them, please only make it temporary and bring them back when we are returning to normal.

Please do not close the east falls church station. Closures will negatively impact riders, local workers, and home owners

Our son goes to school. He takes metrobus and metrorail. Because there is no M4 or E6 we have to drive him to metrorail and pick him up. We would like this bus service restored asap

Comments - general

Comments on Proposed Service Changes March 14, 2021:As representatives of the Knollwood LifePlan Community we strongly urge the WMATA Board to ensure the full pre-pandemic service of the E-6 and M-4 bus routes. We urge WMATA to change its current plan to discontinue these lines to our neighborhood in 2022. These are life lines for seniors in our neighborhood for local shopping, pharmacies, and medical appointments and crucial for the wonderful first line employees who provide care for our community. These routes are also essential for students at Lafayette, Woodrow Wilson and Alice Deal schools. We have testified before on this issue and trust that WMATA will respond to this request in the interest of its public service mission. Our local ANC3/4 has provided a full picture of the impact of these routes throughout this entire neighborhood, and we urge you to give full consideration of the ANC comments also submitted to WMATA. Thank you. [REDACTED] Lois Callahan, vice-president, Knollwood Residents Association

Please don't get rid of the 16C route on Columbia Pike. It is a lifeline for so many in a diverse, economically disadvantaged part of Arlington. Thank you.

Please don't close this station.

What I do not see in this budget is the rightsizing of FTEs - now is the opportunity to restructure, reduce head count, dramatically reduce salary and other personnel expenditures. Why is it that riders have to suffer - lets look at the organization and start to bring expenditures in line.

it would be better to have the metro system working thank you. miss rivera

Do not close Grosvenor-Strathmore! Many people in our neighborhood depend on it to get to work and social events.

Having just completed the survey, the question regarding Metros operational budget versus maintenance budget is outrageous. Metro just spent significant money updating their dilapidated stations and rails, and there is not a day I take the metro that something else is not broken. In a decision of where to cut money, I recommend metro focus on keeping their operating costs as high as possible, and learn how to properly spend their maintenance budget, since it seems as if it has just gone to waste.

I do not have a way to get to downtown DC if metro closes the Grosvenor Strathmore station. And I work in downtown DC (Penn Quarter-Chinatown area.) This would also greatly affect the entire community of seniors in this area who no longer drive and rely on metro to get around.

Do not stop or reduce the M4. In nonCovid times, it already doesn't run frequently enough. There are times when it is so packed that the bus just passes kids waiting at the stop to get too and from school. Often when kids stay after school for activities they have to wait 45 minutes to an hour for a bus. How long do you want them to wait in the cold? How far do you want them to walk. The m4 should be increased not reduced.

I oppose closure of the proposed orange line station in Arlington

Guarantee you could fire half of your lazy work force and save money especially from CEO down. This is the worst transit system in the United States. It's a disgrace. You all should be ashamed. Cut your salary's before services.

I do not want the Grosvenor Metro station to be closed, that is the means for my commute. I need to leave 7.00 everyday and it is a long commute. I do not want that to be closed.

Please do not shut down the College Park metro, its imperative for the connection between UMD and DC.

There is MAJOR development (5 PUDs in last couple years) happening in Deanwood along Nannie Helen Burroughs. We should extend the hours of the X9 bus so it runs all day long the full corridor to Capitol Heights and back. It should also run on the weekend. If possible, frequency should be increased to every 10 minutes.

The 17H and 17K buses are essential in our neighborhood, Kings Park West. I know so many neighbors who use them to commute to the Pentagon or transfer to the blue line into DC. Just because the pandemic decreased ridership doesn't mean you should cut an essential mode of transport that will keep literally thousands of cars off our roads. When people are vaccinated and things open back up, everyone will start needing buses again

Please don't eliminate the 62 bus lineAt 66 it is a life line for me in getting around

Please do not cancel the M4. It is the only mode of transportation for the Deal and Wilson students in our neighborhood to get to school. Hundreds of students ride this route every day.

Last year at this time WMATA proposed to stop 16C bus service at the Pentagon and not continue into DC. There was enough public outcry that this proposal was canceled. Now you are proposing it again. Last year I was told that instead of my one-seat bus ride I should transfer to metro at Pentagon. But now you are also proposing to close the Smithsonian metro station. I literally will not be able to take transit into work. What is currently a 30 minute one-seat bus commute would become over an hour each way. Please keep the 16C bus line service into downtown DC. This was an essential part of the Columbia Pike transportation plan.

Please do NOT close the East Falls Church station. This station is critical to me and the neighborhood and businesses around it. Because the Silver Line connects here to the Orange Line, it allows those of us on overcrowded Orange Line trains to get off, wait for a Silver Line train to go downtown and thus has the benefit of smoothing out the amount of passengers on each line.

Comments - general

Please do not close the East Falls Church Metro. Reducing # of trains would be preferable to closing a station that provides vital access to DC for commuters and others. Thank you for your consideration.

Please do not close the Grosvenor/Strathmore station. I'm a student and rely on it to get to school in DC. Once I get my vaccine I plan to start using it again. Thanks.

Please keep the Silver Line open. our Reston residents HEAVILY rely on this form of transportation.

The East Falls Church Metro is important to me and others on this community . We chose our house location based on living near Metro access

Please do not eliminate U5/U6 bus lines or at least have am/pm rush service. This is the only bus line some folks depend on and is near apartment complexes and senior citizen apartments.

I live in Greenbelt Homes, Inc. (GHI) in Greenbelt, MD. With the elimination of the G-12 bus, much of GHI would be up to a mile from the nearest bus stop, making it difficult to take public transit to work, access medical care, or use local businesses and services. Lack of the B-30 bus would make it difficult to get to BWI airport. Weekend service reductions would make it more difficult to have access to the Washington DC metropolitan region, including National Airport and Union Station. These proposed cuts would also affect many GHI members' ability to use MetroAccess service, as WMATA's current policy is for MetroAccess to only pick up within ¼ of mile of a bus stop.

Please do not discontinue the 62 and 63 bus they serve a wide variety of neighborhoods and help connect DC and Maryland

Please, the bus service in Old Greenbelt MUST be maintained because there are so many seniors who depend on public transportation because they no longer drive. So many people in Old Greenbelt are aging in place which means there will be an increased need for public transportation as the years go by. PLEASE KEEP OUR BUS SERVICE! Thank you.

Eliminating the M4 route because of low ridership during the pandemic is not intelligent. Students attending Deal and Wilson will not have a way to get to school. Already the district is losing public school children. Don't make it harder on parents and children.

We cannot get rid of the M4 bus line. Ridership is down because kids aren't in school. Once schools reopen, thousands of students depend on the M4 to get to Deal, Wilson, St Johns, etc. We absorb need this bus line in order to have functioning schools.

Look, I've got a car and I'll be fine. I'm concerned that this will essentially affect the poor, who are riding the metro on the weekends to work. Please just look at what the effects of this has on the lower income population. Ask whether these impacts will disproportionately affect them. If the answer is yes, which I believe it is, let's figure out another solution.

The 16C is the far preferred route into DC. Eliminating it makes the difference between accepting work downtown or not due to commute complications from Co Pike into downtown.

WMATA is planning on eliminating the M4 bus route, which is used by students to get to Wilson high school and Alice Deal Middle School in my neighborhood. I would appreciate if WMATA would reevaluate this elimination, as the M4 is a vital part of the neighborhood. While students are not currently using it to get to school due to online learning, they will certainly use it again hopefully soon. The M4 but should therefore not be eliminated. Thank y

Please do not close the Grosvenor Strathmore Metro stop in Rockville/North Bethesda. This is a vital transportation hub for my family, our neighbors in the Kensington area and the surrounding neighborhoods as well. In addition, this stop provides a vital way for people from all over the DMV to have access to the art and entertainment offered at Strathmore House. Please do not close this station.

Dont cut the M4 line. Kids need to be able to get to school when they are actually allowed back in person. The M4 is a key feeder for Deal MS and Wilson HS. I get that times are tough and Metro needs more money -- but if you cancel bus routes they are almost certain to remain closed even if/when you receive more funding.

Concerned about discontinuation of M4, which my family uses to get to the metro and in which, in non-COVID times, kids in the neighborhood use to get to Deal middle school and Wilson high school.

Do not close the College Park Metro Station. Thank you. We need to fix this system. This can't be the future of metro.

I think closing this station wouldn't be the greatest thing to do. Just because numbers are low now doesn't mean the demand will be high next year. This station provides a lot of parking and is used by young adults and families!

Comments - general

I have never owned a car and have not had a drivers license in 30+ years, so I am totally transit dependent. What WMATA has proposed is a classic bureaucratic close the Washington Monument scheme. What it reflects is an agency incapable of competently managing a large-metropolitan mixed-mode transit system. WMATA should admit it is not up to the task and set up a transition plan so that all intrajurisdictional bus routes (which I define as 85% of the route being inside one city or county) are off-loaded to the local jurisdictions, so that WMATA only operates inter-jurisdictional routes and the rail system, instead of going forward with the proposed draconian cuts which might force others to step up and fill the void. The very fact of WMATA proposing, without a hand-off plan, such draconian cuts confirms WMATAs inability to manage such a large system. If WMATA proposes and negotiates with local jurisdictions a hand-off plan, it would not need to make such unilateral cuts. To illustrate my point with an example of a service I use: A slight expansion of the Alexandria DASH 3 bus to always serve Hunting Point and Shirlington would obviate the need for the Metro 10B route. Extending the Metroway from Braddock Road (and eliminating some intermediate stops) along the 10A route to Huntington Station (north side) would obviate the 10A route. Relatively little ridership would be eliminated because the discontinued segments are near other routes. This would drive more ridership to Metroway, save WMATA money, and eliminate duplication. WMATA and jurisdictions are undergoing bus ridership studies. Cuts should wait until those studies are completed.

The D6 bus line is essential. One of the only ways people without cars can get to hospitals (Georgetown, Sibley). You CANNOT leave this large section of the city without public transportation.

Pollutant and carbon emissions from fossil fuel transit buses are significant contributors to both local and overall air pollution. As these buses operate in denser, more urbanized areas where carbon pollution impacts more people -- particularly neighborhoods with higher percentages of people of color and low-income families -- they must be a top priority for electrification. In addition to its environmental benefits, fleet electrification of transit vehicles can save upwards of 50 percent on fuel costs and around 40 percent on maintenance costs compared to diesel buses. The operating life of a transit bus is 12-15 years, making it critical that DC and WMATA provide a funding mechanism and plan for the adoption of electric buses as soon as possible. Fleet operators need help to run electric bus pilots now so that they can lock in transition plans to only operate electric buses by 2035.

Please DO NOT discontinue the D6 route. This impacts the Ward 3 community greatly and cuts us off from public transportation and easy access to healthcare facilities as well. This route truly links the heart of the city from one side to the next and is crucial. Please reconsider eliminating the route.

Do not close the Grosvenor-Strathmore Metro beyond summer 2021. The pandemic is almost over thanks to vaccines and ridership will return by fall 2021. I read of a permanent closure, which if true is an incredibly dumb idea as the pandemic will end and there is a huge demand for ridership at Grosvenor-Strathmore due to the numerous high rise apartments and massive parking there. Even the fact people are talking about Permanent closures is terrifying and an incredibly bad thing to be signalling.

I have two sons who are visually impaired and cannot drive. We live one block away from the Grosvenor Strathmore metro station, both sons rely solely on Metro for transportation. We also live in an MPDU apartment. Closing the Grosvenor Strathmore station would basically take away the only affordable transportation option they have. We could move close to another Metro station - however, we live in MPDU housing and it would be nearly impossible to find affordable housing close to a metro station. Please do not implement these cuts.

The proposal to eliminate the D6 and M4 bus lines effectively eliminates *all* public transit options for our neighborhood (Palisades DC). Both of our children rely on these lines to attend their public high schools. This proposal is unacceptable.

Please do not close east falls church metro station. I have no car and walk from my apt complex on Sycamore to it. If its closed, the other alternatives -- Ballston or West Falls Church -- are too far and require my taking a bus. These are terrible times and I feel for you folks!

My child will rely on the M4 to get to school in the fall, and we hope it continues to run. At a minimum, no decisions on cutting that line should be made until there is an assessment of ridership in the fall. The current level plainly is not representative of what it will be as when kids return to school in person five days/week

Need keep M4 bus as this is the way that numerous Deal and Wilson students get to school. Last thing we want is to have thousands of cars driving to these schools twice a day on every school day.

The D6 bus provides transport for many staff and patients to Medstar Georgetown and Sibley Hospitals (and also fairly convenient access to GW Hospital) giving residents across DC Wards access to excellent healthcare. Its schedule runs from 12:25 am to 11:45 pm providing staff good access to and from their early and late shifts.

It would be utterly insane to close College Park station. Considering the rate at which the population is being vaccinated, students will be back on campus for in-person classes come 2022. Do you have any idea how many people commute to the University of Maryland?! Who proposed this and why???

I am a resident of the Trinidad neighborhood in Ward 5. I regularly use the D2 and D4 for my commute to my office downtown. I know based on that commute that I'm not alone. In fact, I have seen the demand for these lines only increase over the last 8 years I have been a resident of Trinidad. It is dangerously short-sighted--and unnecessarily disruptive--to get rid of these lines.

Comments - general

If the U4 is eliminated, I would not be able to walk to Mn Av Sta to catch any of the buses I need; I am 80 years old & that would be too much of a walk for me.

Please keep the King St-Old Town and the Gallery Place metro stations!

In the 13 years I've owned my home in Burke, WMATA has cut the following bus lines in my area: 18S, 18R, 18G, 18H. Only 18P remains. DO NOT CLOSE it.

Dont close Grosvenor-Strathmore station! I would like to provide my feedback on the proposal to close the Grosvenor-Strathmore station. I have been living in Grosvenor Park for six years and taking Metro to downtown DC to work on weekdays. I oppose closing the Grosvenor-Strathmore station for the following reasons: 1. Grosvenor-Strathmore station provides a lifeline for the residents to go to work, shopping and recreation. Grosvenor-Strathmore station is one of very few stations in the suburb with a concentration of Metro riders within walking distance. The community of over fifty years has developed its dependence on the Metro, as this area is not walkable to any business district or services. 2. Grosvenor-Strathmore station is a crucial commuter hub. Many commuters choose to park and ride at the station due to its easy access to freeways and express ways. The recent expansion of the parking garage will only drive the needs and ridership of the station, and become one of the most park-and-ride commuters in Maryland. 3. Grosvenor-Strathmore station is far from nearby stations, and the alternative plan doesn't work for frequent Metro riders in the area. It is not feasible for nearby residents to walk to White Flint Station or Medical Center Station. The one-way walking takes over 45-65 minutes, and the path is not easily pedestrian friendly. During rush hours, MD 355 is also congested, and adding traffic or pedestrian walking to MD 355 would only worsen the traffic. As a transportation professional, not only have I developed love for and dependence on public transit, I also developed a fuller understanding of its operational constraints. There are plenty of ways to reduce the operational cost, but closing stations, in particular Grosvenor-Strathmore would be short-sighted and destructive. It contradicts the very roles that transit should undertake: to provide equity and accessibility. It is a difficult time for everyone, and COVID-19 will be behind us eventually. No action should be made by the Metro to punish those innocent Metro riders in the time long past the pandemic in 2022.

Please don't close the Arlington East Falls Church metro. It provides a final point of transfer between the Orange and Silver Lines and no station that serves 2 lines should be closed. I am also opposed to closing the stations in busy commercial corridors such as the Clarendon Station on Arlington.

save money by firing metro general manager paul wiedefeld for rank and continuous incompetence over his entire tenure

I'm devastated to learn that Grosvenor metro might close. I'm active duty in the military, I moved here last month to Grosvenor Park because of its close proximity to the medical center where I am a long term patient. I do not drive and if they close the station I'll be forced to move.

The blue, orange & silver line should be timed equally apart if frequency is reduced. The silver line should be reduced dramatically. Maybe to every 35 minutes. Largo doesn't need so much frequency and people in Reston & McLean don't rely on Metro. The yellow line needs to have turn backs at Mnt. Vernon. I get the suburbs pay their share, but during the pandemic. Mass transit should be focused where it's being used. Which is mostly within the district and the lower income areas in MD

Closing the east falls church metro station would be detrimental to those who live in the area. It is a major source of transportation for work and for nightly festivities. Ridership to and from this station may have been down due to the pandemic but will resume once things get back to normal. Please please please reconsider this devastating measure

The Cleveland Park stop is a big deal venue for National Zoo traffic, especially for visitors approaching from the north of the zoo, since the walk is downhill from there.

The proposed documents do not delineate separate costs for the Metro Transit Police. With the ongoing social demonstrations and conversations about police brutality, overpolicing of minority and marginalized peoples, and Metro's commitment to an equity-first approach, how will funding and allocations for MTP be adjusted? How will the focus on the MTP be altered with these goals? With the covid-19 pandemic raging, please explain why MTP is not focusing on enforcing federal and Metro orders to mask up for the health and safety of riders and the community, and instead is relying on community enforcement, exposing operators and other riders to health risks and additional (on top of increased) risks of assault, particularly on buses? Why is Metro spending money on 700 employees in the MTP and not allocating them for riders and community health and safety priorities?

The number 17 bus routes play a vital role of the daily life in the Springfield, Burke, Annandale. Without their service the neighborhoods would scramble to find alternate methods of transportation. We did not have them several years ago due to labor issues. This caused hardships for many people.

Reducing service is only going to cause ridership to decrease greatly. This has been tried in American cities countless times, and the result is always the same: people stop using the public transit service altogether, because it just isn't convenient enough to be useful, and this reduction in ridership causes more budget cuts and service cuts, which causes more people to stop using the service, in an unending downward spiral. If you want people to use the service, you have to provide enough service to make it worthwhile. If you don't have enough money, you need to get more money from the government, and the way to do that is to divert funding from roadbuilding for cars to public transit. Why is it that public transit is somehow supposed to be self-sustaining, yet car ownership is highly subsidized with free roads? Personally, I don't see this turning out well at all, and I think WMATA is going to collapse before long, so I'd be doing my best to move out of this f-ed up country to a country that actually knows how to run public infrastructure properly.

Please do not eliminate the D6 and M4 routes in the Palisades. These are the only bus routes that connect the neighborhood to the rest of city - and to Metro rail stops - on a regular basis. The elimination of these bus routes will have an enormous, deleterious impact on workers all along MacArthur Boulevard and students - once schools are again meeting in person. I cannot believe how shortsighted it is of Metro to eliminate these routes.

Comments - general

I dont have time to go through the whole survey. But I want to voice my support for KEEPING the existing route for the D6 bus. The Palisades has no access to Metro / subways and the D6 is a lifeline toward Downtown and other form of Metro transportation. DO NOT DISCONTINUE THIS BUS.

I am a resident of Ward # and I STRONGLY OPPOSE cutting the D6, M4, N2, and N4 bus routes and reducing service on the N6 route.

Closing the Virginia Square and Clarendon Metro stations will cause me to stop using Metro altogether.

I ride the metro 2 days per week during COVID and 5 days per week in normal circumstances. Prior to COVID, I saw people skip fare several times a week, and now I see it every time I ride. If revenue is the issue, I think you should consider enforcing people paying fare to ensure you're not missing out on revenue. Why pay metro managers if they let this happen? I see metro managers watch this happen and do nothing about it. Why do I have to pay fare and others don't?

The D4 and D8 bus routes should not be eliminated. There are few ways to reach the Trinidad neighborhood through public transit, eliminating these two routes would make it extremely difficult to get to other neighborhoods and workplaces, leaving residents of Trinidad with precious few opportunities which require moving around. I dont currently live in DC, but Ive relied on the these routes in the past, and I hope that, should I return, the opportunity would still be available to me.

Do not cut service. The radical service cut proposals you're considering would render metro largely useless. Instead you should raise fares as necessary. You should also reduce the compensation of the senior management team. They are overcompensated and have done a miserable job.

Please keep D6 route intact for essential workers at Georgetown and Sibley Hospitals. â€” not to mention patients also. Penelope Woolley, Foxhall Village served by D6 bus

i think metro should look to reducing the bonuses paid to the top brass, and also look to reduce the union presence and reach a fair wage and benefit package. i also think the employees should do more work and less standing around. every time i see any maintenance goin on, theres 1 person working and 5 standing around talking.. according to google, your top salary is 700k a year.. and average is 233k a year... come the hell on... its tough to justify raising prices, and cutting service and closing stations when your executives are raking in the bucks that could be used elsewhere

I tired to do your survey, but it broke. Metro needs to keep the College Park Station open. Not only for those of use WHO MOVED HERE BECAUSE THERE WAS A STOP, but because the PURPLE LINE terminus will be there. This would be one of the dumber moves that Metro has made since Ive lived here. Closing the stop would also be a blow to the University of Maryland, but Metro doesnt care about its riders.

D2 MetroBus line servicing Glover Park is the only thing that matters to me in life. Eliminate this line and I lose purpose.

Concerning the idea of closing the station at Grosvenor, it is probably is true that this station ranks low for usage (and probably even lower for fares collected since many riders may only travel one stop). This latter point (one stop travel) may actually argue against closure. I have invested most of my retirement money into residential rentals in the Grosvenor area. I therefore have the experience to point out that a large number of units are rented to people who have short term (one to two year) appointments at NIH. These are mostly post-docs (and, recently, post-bachs) who seek modestly priced living quarters as close as possible to the NIH campus. (They are ideal tenants because they seem to spend most of their waking hours working in their respective labs!) They often are visiting from other countries and must rely on public transportation. I suggest the closing of the Metro station would be a disservice to many NIH programs by forcing the participants to seek housing farther away from the campus. Please consider the effect on NIH if the Grosvenor stop closes.

Yo necesito el metro, tengo la necesidad de viajar por mi trabajo

I live in the Palisades neighborhood of NW DC, and as such, am dependent on WMATA buses for all my commuting. Specifically, I write to seek your reconsideration of the alternative in which the D6 route is closed. The D6 route is a vital lifeline for DC, connecting essential workers to their places of work at primary job centers across the city and, most importantly, to the number of hospitals (Sibley, Georgetown) and schools (Key, Duke Ellington, and myriad others) served EXCLUSIVELY by the D6 line. It is also the sole lifeline for Palisades, Foxhall and Georgetown residents to commute into primary job centers in the city. It allows DC residents along the line to live without cars, and it has enabled the continuation of lower-cost multi-family housing along MacArthur (around 4400-4600 blocks). This affordable housing, alongside some of DCs better educational opportunities and more expensive homes, is a city priority and one of the few examples at the moment of what many see as the future of smarter affordable housing in the city; without public transit options to jobs and schools, this would not be viable.

If Metro is so concerned about losing money, why havent they required their station managers to eliminate the free riders? Youve lost your millions by daily letting people walk through the gates without paying!

Metro is a public service and should be supported and maintained for the public good, with the appropriate budget. Many people do not have acceptable alternate transportation. In addition, Metro is a major way to reduce our reliance on cars, traffic and asphalt, and to fight pollution.

Maybe lower overhead and labor costs? 70%+ of metro budget goes to labor and you are asking for suggestions to INCREASE that ratio. You are taking the WRONG approach. This will lead to WMATA going solvent. Every year, WMATA begs voters for more money, which yall get every year. I am sure no one is willing to take a payout...

Comments - general

Two of the highest priorities for Metro must be maintaining safety and accessibility. Shutting down or closing stations must be the very last option considered because it is the least desirable option and decreases access. Do not close stations. Thank you.

I have been informed about the dramatic cuts to Metrobus services in the DC area, and I am especially shocked and concerned about the decision to eliminate the D6 line. The D6 bus provides ESSENTIAL transport for many ESSENTIAL staff and patients to Medstar Georgetown and Sibley Hospitals (and also fairly convenient access to GW Hospital) giving residents across DC Wards access to excellent healthcare. Its schedule runs from 12:25 am to 11:45 pm providing staff good access to and from their early and late shifts. Students, too, need access to Georgetown University, the Medical School, the Hospitals. The D6 is of critical use and has to remain in place.

Eliminating the current N6 route and combining with other routes and changing the flow will be a significant disruption for me. I live at 4000 Cathedral Ave which was served by the N2 during the week and the N6 during the weekend. During the pandemic, the N6 has been adequate, however as business resumes and I start to work from my office in Judiciary Square, I will need greater frequency. Eliminating the current N6 route and reducing the frequency to every 35 minutes is just not frequent enough. If the frequency was increased to at least every 20 minutes as the N2 was, I think I could make that work. I understand the budget realities but for those of us without cars, who moved to our neighborhood counting on the bus service as it existed this will be a significant issue. Thank you. Guy Bosworth

As a resident of Greenbelt, MD FY 2022 service changes will create a significant problem for me. I am particularly upset about the elimination of Metrobus G12. For example, WMATA's proposed budget identifies The Bus 16, Metrobus G14, and the modified Metrobus 83 service as providing viable alternative service for the loss of the Metrobus G12 to Doctors Hospital and Hanover Parkway South of Greenbelt Road. However, Metrobus G14 and The Bus 16 do not serve Ridge Road, Hanover Parkway north of Greenbelt Road, Mandan Road and Ora Glen Drive. Service on Ridge Road would be limited to the area between Westway and Gardenway. Riders who currently access bus service along Hanover Parkway north of Greenbelt Road, Mandan Road, and Ora Glen Drive would be forced to seek service at the nearest stop along Greenbelt Road or Hanover Parkway south of Greenbelt Road. In addition, these routes do not serve Ivy Lane, Lastner Lane and Ridge Road which are currently serviced by the Metrobus G12. The Bus 16 also has fewer operating hours than the Metrobus G12. The elimination of the Metrobus C2 will impact available service to and from Greenbelt Station and Franklin Park at Greenbelt Station to destinations such as various University of Maryland sites and points northwest.. Additionally, WMATA's proposed budget identifies the University of Maryland's Shuttle-UM as providing alternate service for the loss of this route, but few Greenbelt residents are able to use it because riders are required to be affiliated with the University. The elimination of the Metrobus R12 will result in a severe reduction in service to Franklin Park at Greenbelt Station and to Beltway Plaza. I also oppose the reduction of Metrorail service to Greenbelt Metro Station.

I noticed that the Cheverly station is identified for closing. This is disturbing on so many levels. It is a small station that serves a variety of communities in Prince Georges County (including low income and underserved) who rely on this transportation for work. Metro needs to seriously reconsider this decision.

Now that WMATA is getting more money because of the American Rescue Plan, please try to restore as much service as possible to the bus lines. As we go back to in-person work in 2022, they will get super crowded and be impossible to use until there's enough service -- both in terms of frequency and line options. For years before the pandemic I relied on the Wisconsin Ave. lines, including the 30, 33, and 37 -- especially the 37, which as an express bus really cuts down my commute time. With the new shelter on Idaho Ave., there are more and more residents and we need robust service for folks not close to Metrorail. I'd rather seek a fee hike for express buses like the 37 than service cuts. I rely on the bus to get to work! Thanks so much for considering all of D.C.s commuters.

While covid has disrupted all of us, it is temporary. There are significant risks from budgetary choices if they are permanent. I request we consider what the temporary options are, as vaccine rollout and new facts bring life back to order. My hope is that Metro makes only temporary choices here (delay improvements, reduce some time slots); mostly of things that can be easily flipped back. Thank you.

I am writing to oppose the proposed elimination of the D6 and M4 routes that service Palisades and the MacArthur Blvd corridor. These bus routes are the lifeline to downtown and to Metro for many residents. Not only that, but the D6 serves two hospitals and the M4 one. Elimination of these routes will make it harder for patients and staff to get to the hospitals and will certainly increase traffic. With the dangers of climate change that we are facing, more buses--not fewer--are needed. Finally, by eliminating a direct route downtown, the proposed changes will be adding at least 30 minutes of commute time to most riders--this does not even factor in the large portion of MacArthur Blvd that will not be serviced at all.

Please don't close the Virginia Square and Clarendon Metro Stations. Many of us in the area no longer drive and are dependent upon public transportation. Please give Metro more operating funds so that they won't need to consider closing stations during the pandemic.

Comments - general

I am writing to support CONTINUING the D6 bus line, as (1) my family members -- students - use the bus to get to school; (2) I have personally used the bus to get to hospital appointments at both Georgetown Hospital and Sibley hospital on the route; and (3) I have friends across all race, social economic and age diversities using this bus line. 2020 and 2021 have been unusual as in people are on lock down, but in normal times this is a busy bus route and ESSENTIAL for students to get to Hardy Middle School, and other public schools, as well as to get to work downtown, and with things expecting to be in person in 2022 the loss of the D6 route would be devastating for people who commute to/from work at any of these hospitals - GW, G-town, Sibley -- and for students using the bus. I urge you to continue the D6 bus line -- there is no other bus line alternative especially in Ward 3 to get the hospitals and for students to take bus to school. Please please keep this bus line. Thank you for your consideration.

I tried to take the survey and it just refreshed in the middle twice. Its super frustrating so I am writing this now instead. It makes ZERO sense to close Grosvenor-Strathmore. The station is always busy and parking lot packed full of commuters. Not to mentioned its right next to a center for the arts. Guaranteed to lose a ton of riders. Why would everyone who goes to Grosvenor-Strathmore drive 15 minutes North to Rockville station where their parking lot is not even next to the station so then add 5-10 minutes to park and walk (now 20-25 min extra to commute)) to the station which feels very unsafe, just to ride down South to DC?? No one. You will lose all those riders who would then rather just drive into DC instead. Absolutely no sense to make a budget cut to this super popular station, much less close it down.

Public transportation should me INCREASE and ENHANCE, rather than cut: the more available and reliable the public transportation, the more public will use it, and the opposite is also the case: the more scarce the public transportation. the less people will use it. Choose a virtuous-, not a vicious cycle!!

Closing the Smithsonian Metro Station should be avoided. This station is useful for tourists. After Covid travel restrictions are lifted, tourism will resume and provide additional revenue to DC. Closure of the Smithsonian Metro Station will have a negative effect on access to the Mall and all the tourist attractions there. Also, DC area residents use Smithsonian Metro Station for access to the important cultural sites around the Mall.

I work as a Tour Guide in Washington, DC many days our tours begin at one metro station and end at another. Example Arlington Cemetery then at 10 pm we get off Smithsonian Station. Our Tours begin at 8 am and we get off usually at 10 pm. We work a lot with school children groups do not have in their budgets a hundred dollars to pay for a Tour Guides Taxi home. Some Tour Guides live far up in Maryland or out in Dulles or Manassas.

I am writing to express my concern about your proposed elimination of the D6 bus line. This is absolutely inconsiderate. This is a fundamental means of transportation for Foxhall and Palisades residents to commute downtown, and the main line that serves students and faculty who commute to Duke Ellington; Georgetown University; WIS; Georgetown Day; Hardy; Wilson and other schools in Ward 3. Furthermore, D6 is intensely used by medical personnel and patients going to and from Georgetown Medstar Hospital and Sibley Hospital at all hours of the day and of the night. The District's proposal to add another school on the Hardy campus is yet another excellent reason for potentiating D6. On its route there is also the French Embassy, along Reservoir Road. Please do not eliminate D6.

I live on MacArthur Blvd and work at Johns Hopkins at Sibley Memorial Hospital. I do not own a car, use D6 Metro bs 2 times a day to go to work and back home. One the weekends I use the same bus line to run errands, go to appointments, etc. It is my mode of transportation. I have used the bus since 1950. To even consider eliminating it completely with no alternate way to get to any of the other suggested routes is horrible. Our patients use this bus route, many employees use this bus route. You are planning on taking away the only public transportation for two hospitals. Shame on you for even considering this.

I've seen many riders pass the gate and not paying their rides. Those stations were at Clarendon, Gallery Place Chinatown, and L'enfant Plaza Station. Why aren't the workers at the station ignoring them hopping the gates?

Metrobus 17 routes (17K, 17G, 17H, etc) have taken ridership hits over the last few years because of poor service and reliability. First were service problems, then a strike that shut down the bus lines and left commuters to fend for themselves. After 2 months of no service, ridership did not have adequate time to rebound before COVID. However, sparing these lines from cuts should allow ridership to resume and prove beneficial for Metrobus. Especially given the Braddock Rd Improvements planned by the Department of Transportation, which will occur in the next few years and increase pedestrian availability to the bus stops and increase Metrobus drive times while increasing drive time for local residents.

Please do not eliminate the D6 bus! Before covid I would take that bus quite often to go to appointments or entertainment venues downtown, and after covid I was planning to do the same. The proposed alternates are simply not adequate. Please keep the D6 bus!

Keep College Park Metro station open, or if you have to, close it now and reopen in mid August, Ridership will be back up when the University of Maryland starts its fall semester.

Comments - general

Keeping East Falls Church metro station is vital for low income seniors - like my sister - who depend on it to be able to maintain their independence and have access to vital services such as shopping, groceries and doctors. My sister is both low income and developmentally disabled. She lives on Patrick Henry Drive where there are several apartment buildings which house low income and senior residents. The bus route on Washington Blvd is critical to give them access to EFC metro and the metro gives them access and Independence to get other services. If EFC station closes, it will mean a bus ride (if the service is available) and/or a taxi ride to another station which will hurt her already meager budget. The board needs to seriously consider low income/senior ridership from local apartments that house these residents before closing a station.

Pls do not close the east falls church metro. This is a vital connection point for many of my neighbors and myself. While this past year has been very difficult with COVID, it also meant job losses for the community and forcing even a number of people with cars to depend on public transport. Additionally, there is no other metro station nearby for us to get to. Thank you for your consideration

Hi. Heard you were considering closing off the VA Square and Clarendon Metro stops in new budget. I'd say this is a mistake given the density of housing at these stops and the corridor access between communities. Ironically, as everyone will be more local we will be commuting along this corridor between these neighborhoods now. DC will be back. Soon. We will all be going to work and Kennedy Center and museums again very soon. Don't shut it all down.

La eliminación de las rutas E6 y M4 dejarían a una área importante sin ninguna clase de acceso a transporte público. Esto resultaría en un significativo aumento en la movilidad individual, generando mayor contaminación ambiental y gases de efecto invernadero. El plan no prevé cómo compensar por este impacto climático alto que tendrá eliminar estas dos rutas. Adicionalmente, estas rutas de bus son utilizadas diariamente por muchos estudiantes de Lafayette, Deal & Wilson como único medio de transporte escolar. Si se eliminan estas rutas, como se garantizará que estos estudiantes puedan asistir a sus centros de estudio?

I think that the members of Board of Metro need to commit to commuting to work via metrorail or metrobus on a daily basis as a condition of serving on the Board. The proposals to cut the budget in this way will only encourage people like me to drive. I can afford to drive. I CHOSE to take the subway. Enact these proposals and you will only see your ridership decrease. I've taken the subway in multiple cities in Asia (Hong Kong, Bangkok, Tokyo, Seoul) and Europe (Madrid, Lisbon, Rome, Athens, Istanbul) and even Latin America. Metro has a lot to learn from these other cities.

The R12 bus elimination is not conducive. This is a residential area and non-drivers cannot walk to the College Park Station or Greenbelt Station from homes located on Edmonson Road. Everyone does not drive/have automobiles and rely on the R12, the only bus that services this area, as a means to connect to other forms of transportation. Please do not eliminate this bus line. Thank you.

I am extremely concerned at the proposal to eliminate the D6 bus. This bus provides service to patients at Medstar Georgetown and Sibley Hospital (and access also to GW Hospital) from wards in DC that provide both patients and staff to these hospitals. Their shifts begin and end at hours that require good transport early in the morning and late at night. And then there are the students at Duke Ellington; Hardy; and Wilson among other schools. There is no Metro station close to these venues and those that are closest (Dupont; Tenleytown and Foggy Bottom) need a bus link to get to these hospitals and schools. Hospital staff are among the lowest-paid workers and need to be provided service that is both efficient and subsidized. Thank you for reconsidering the elimination of the D6 - such a critical service across all wards.

This may no longer be a critical consideration after the passage of the President's COVID relief bill yesterday, but closing transit stations is a ridiculous idea! DO NOT even consider it, please. Here are some of the reasons why: 1) Washington depends heavily on tourism, yet the proposal would close most of the stations most used by tourists: Archives, Arlington Cemetery, Federal Triangle, and Smithsonian. 2) DC's original and primary purpose is as the seat of federal government, and yet the proposal would close many of the stations closest to key buildings housing government workers and visited by those conducting business with government agencies and courts, e.g. Archives, Federal Triangle, Federal Center S.W., Judiciary Square, and Smithsonian. 3) Closing stations that are fairly close to downtown DC and Tysons employers, as well as reducing headway (potential wait time for trains) from 12 or 15 minutes to 30 minutes, will result in a lot more people driving their individual vehicles, adding to air pollution, greenhouse gas emissions, and traffic congestion -- which is exactly what Metrorail should be trying to discourage. With trains spaced 30 minutes apart, anyone using Metrorail will have to leave a minimum of 45 minutes before they need to be at their destination, which means most people will find driving quicker. If the trip involves changing to a different line, then they will have to leave at least an hour and 15 minutes before they need to reach their destination. And use of Metrorail for a trip within downtown during the day will become much more unlikely. 4) Closing stations at the outer reaches of the various Metro lines will discourage people who commute to downtown by driving to the terminus and then taking Metrorail into town. This also is the opposite of what WMATA should be trying to do, as it will increase pollution and traffic congestion (which causes more pollution). 5) Closing key stations on the Silver Line, most of which have not even opened, not only is contrary to what WMATA should be doing to increase use of public transportation and discourage passenger-car use, but it also violates the public trust, since hundreds of thousands of area residents have been paying dramatically higher tolls on the Rte. 267 toll road, ostensibly to help fund construction of the Silver Line to reduce private vehicle usage in that corridor. Abandoning brand-new stations, and at the same time making it significantly less likely that the Silver Line ridership will ever justify its operation, would guarantee a multi-billion-dollar misuse of public funds. Thank you for your consideration.

Comments - general

It was shared that there are changes proposed to the D6 Bus line in DC; as a resident who does not own a car, the D6 is very important to me to get anywhere. There is no metrorail stop near where I live, only the D6. It does not only help me, but students and other teachers use the D6 to get to school; many residents, young and old take the D6.

I am a senior and purposely moved to my location in Cleveland Park because of the convenience of the Metro. I would be hard-pressed to enjoy all the offerings DC has available for me if it were not for the Metro. I am sure that once the pandemic has slowed down that the Cleveland Park Metro will be used once again. People coming to the zoo know that its much more convenient than the Woodley Park station. Please please keep the Cleveland Park Metro station open!

Please retain service at the Grosvenor metro stop. Before the Covid crisis, I was a regular patron and hope to resume patronage as soon as I am vaccinated.

Closing the Clarendon station is going to seriously hamper smart growth in that area. There are two large projects coming on line on the West end of Clarendon. Secondly, the Arlington plan has been built based on the concept of blending residential and corporate density along metro lines. Of note is that the three closest multi-use family buildings contribute close to \$10M in tax revenue. Arlington should be fighting to keep this station open. Secondly and equally important, the plan that Metro is making for FY22 is being based on the past 15 months when a) metro was closed; b) were still in the third inning of the pandemic; and c) once the economy starts to thrive again, this station (which was the second fastest growing station in 2018) will again be among one of the busiest. Just a year ago, the County and Metro was advocating to add a second entry to Clarendon - that need will exist in the future. Closing this and other stations is short sighted.

Bus Route D6 and D5. Please do not abolish these bus routes; for many of us they are the primary way to cross the city, to get to Rosslyn (by foot across Key Bridge), to get to three major hospitalsâ€”GW, Georgetown Univ., Sibleyâ€”and to get to the DC Courthouse for (frequent) jury duty. The routes are central to many DC residents from many neighborhoods. Thanks.

Metro should find other means of savings besides proposing closing up to 22 metro stations. If that many stations are closed you will alienate customer base that when they soon return after increased vaccinations permits employees to return to their offices and businesses, they will need to use metro. Strongly recommend previous proposal to offer buyout and retirement of eligible employees to reduce costs instead of closing so many metro stations.

As a student and worker, the Metros proposed Fiscal Year 2022 Budget greatly impacts my life. My life is extremely reliant on public transportation and for millions of others who have a much more difficult situation. Please consider the many lives that could be completely derailed (more than it already has been) from more cuts to the public transportation system. Instead, there should greater attention to other COVID regulations that could be less consequential for those suffering the most during these times.

Budget does not reflect the growing needs and demands of the Washington metro area. You estimate ridership to continue to be low when you do not offer the service incentives. This includes train frequencies, safety priorities and enforcement, and welcoming visitors and non-rush hour situations. You must demonstrate financial responsibility with what you have been given (2020 bail outs) and show that you can operate efficiently and safely without a large additional funding request. If you run trains every 30 minutes and someone misses a connection at core stops (metro Center, gallery place, etc) you add an additional 30 minutes to their trip. Consider service needs and system safety above all.

Please remove closure of East Falls Church from the budget consideration. Many folks rely heavily on metro to commute to and from work in our neighborhood and travel to other amenities in Tyson's corner and in D.C. Personally, our children love riding the train and we use/own only one car because metro is readily available in our area. Please keep our station open.

I don't understand the decision to prioritize closing Grovesnor Metro over White Flint. Grovesnor has new parking, serves Strathmore Performing Arts Center, Georgetown Prep and Holy Cross Academy. It is also closer to Walter Johnson High. A shuttle system could support Nuclear Regulatory Commission and Metro employees who now use White Flint.

Please do not close Grosvenor Station. The last year I have worked from home, but come mid-March (two weeks after second dose of vaccine), I can go to DC and my office. Shelton Williams

Regarding elimination of the G12, I have seen kids use that bus to go to school at Greenbelt Elementary. Also, given that the Bus 16 was suggested as an alternative to the G12, are you certain that the Bus 16 wont be cancelled?

Please do not take away the U4 bus route. My family and I have used this specific bus route for years traveling to and from work, doctors appointments, taking our children to school, etc. Also there are many seniors in the Deanwood community that rely on this bus service. There aren't many metro bus options in this area. Please the bus routes that travel through the Deanwood neighborhood.

I am a route 18P rider from Old Keene Mill Rd at Huntsman to the Pentagon in the morning, and the reverse in the afternoon/evening. I understand the ridership during the COVID pandemic has significantly reduced, leading to the decision to terminate the route beginning January 1, 2022. I urge you to consider, as an alternative, simply reducing the number of AM and PM trips by half. Instead of 20 or 30 minute intervals, you might run 40 or 60 minute intervals. 18P buses were nearly always crowded pre-pandemic, often standing room only.

Comments - general

You cannot cut the D6, especially after eliminating the D5! We have three kids. One child rides the D6 with friends to Hardy Middle School. Our oldest and youngest ride the D6 in the opposite direction to Key Elementary School. After dropping off our son at Key, our daughter catches another bus to St. Johns High School. There are no other bus options in Palisades!!! I have absolutely no idea what our family would do without the D6 - it is our lifeline. By eliminating the D5 and D6, you are literally cutting off a huge section of the city with extremely little bus or metro options. How will people get to Georgetown or Sibley Hospital? How will people get downtown to work? How do our kids get to school? How the five members of our family get to five different school and work locations without any bus options? You CAN NOT cut the D6.

The service reductions will have a severe impact for commuters and citizens of the DMV area. I currently use the metro for work, and 30 minute wait times for a train will add an incredible amount of time to my already-long commute every day. Beyond that, this will adversely impact the most vulnerable (who may not be able to afford a car) in our community more than anything, and this will trickle down into multiple aspects of life here. These are the essential workers in food service, and these cuts will make it absolutely more difficult for the service industry to re-open in any substantial way. For those who can afford a car, I can only imagine the impact it will have on traffic. I understand that this last year has had a severe impact on ridership, but I fear that these cuts will make the metro completely obsolete - if its not running, nobody will want to use it, and ridership will never go up to the point of profitability again. The metro can be such a great amenity, but I foresee a death spiral by a thousand cuts if these service cuts are put in place.

Closing the Grosvenor/Strathmore station is unacceptable. We bought our house based on its proximity to that station. No work, no theater downtown or meetings with friend and family. It will adversely effect the Strathmore music center and the mansion. Please rethink this and PLEASE do not close this station. It is vital for us. Nancy

If you plan to close all stations and stops as the 22+ listed, you may as well close everything. We have been experiencing a pandemic and stay at home orders or suggestions, and many people have been working at home. Keep them all open and see what happens when the CDC declares things have returned to normal and many more are vaccinated.

Why cant Metro actually build proper fare gates to stop using the low capital budget balance as an excuse for not funds? I constantly observe as a rider that Metro invests resources and money into making ridership comfortable for affluent areas where as low income and middle class diverse areas receive less resources allocated to help riders there. For example when the trains are rerouted/stations are closed etc. - you employ staff to do this outreach at affluent areas seamlessly. Whereas in areas with minority populations at large these changes are done suddenly without any outreach allocated to help customers there. Overall, it has been eye-opening to watch Metro practice unfair and discriminatory operational ways when it comes to considering the needs of its less affluent riders who dont have commuter benefits from the government employment to cover their fare.

The FY2022 plan continues to not run the P19 bus and to eliminate the P18 and the W14 bus after January 1, 2022. I live in Fort Washington and the P18 is the only bus that operates all day from this area. The W14 operates only during morning and evening rush hours. If the P18 and the W14 buses are both eliminated, there would be no means of public transportation to access the Metrorail system from this area. This is unconscionable.

Honestly you probably wouldnt have a budget shortfall if you found a way to stop gate jumpers. Every single day I see countless people squeezing through the turnstiles. Especially at Union Station on the Amtrak side. What they do is enter on the side that the Station manager is not facing. And sometimes the Station Manger just turns a blind eye to what is happening right in front of him. Granted, I also understand that he/she is limited as to what they can actually do about it, but this is seriously costing you.

Please keep at least one of the following stations/services open: Reston Town Center, Wheile Reston East, Reston Park and rides. Many people in Northern Virginia depend on metro to get to their jobs in DC. There is not nearly enough parking in DC to accommodate everyone. If the city is open, metro should be too. If that is not possible, than Metro should advocate that businesses should be encouraged to continue to let their employees work from home until normal service can resume.

SMITHSONIAN IS THE HUB FOR ALOT OF FEDERAL WORKERS WHY NOT GET RID OF THE PROBLEM STATION IN THE HIGH CRIME AREAS AND RUNTHE 32 BUS MOST OF THE BAD AREAS THESE PEOPLE DONT WANT TO PAY THIER FARE LET THEM SEE HOW HARD IT IS.

As a 73 year old without a car who depends on walking and public transportation to get around, closing Cleveland Park metro and the L1 and L2 bus lines are body blows to my ability to grocery shop.

The 25B through Foxchase is the only bus that comes within about half a mile of our apartment. We depend on it to go grocery shopping and to medical appointments. My wife and I are both in our sixties. We walk to Duke Street or Seminary Road to catch other buses, but walking half a mile with groceries, especially in summer heat, is a hardship. If the 25B is cut or discontinued, the 28A would meet our needs if it is routed down Jordan Street, as proposed.

Metro needs to retain all the services that purpose for cuts its not getting things done for passengers who relied on Metro system they to keep everything the same and let people ride their respective area where they stay Im one of passengers who relied on Metro transit and that would complete my speech Im David L Burke from NE Washington DC

I am an essential worker who has relied on metro to continue working full time through the pandemic. My commute is already an hour each way after ten hour work days. To punish me by adding an additional 15 or 30 minutes to my ride is unreasonable. I would be forced to pay for uber rather than waiting long periods for trains while being continuously harassed by panhandlers. Your budget would be fine if you enforced rules, like paying for trips. At least once a day someone pushes through the gate right behind me or doesnt pretend to pay at all. Stop giving free rides to cheaters and you wont have to punish the people who are paying.

One thing Metro should and I'd say must do is look at transportation plans in neighboring jurisdictions, with respect to comprehensive planning and impacts. For example, Fairfax County in conjunction with Virginia Department of Transportation and City of Falls Church long term plans for Seven Corners intersection include a ring road that connects directly to Roosevelt Boulevard, whereby buses can easily and quickly get people to East Falls Metro station. Clearly if that station were slated for closure, it throws a wrench into the plans for that major intersection, and one unfortunately with no Metro Rail service.

I am very concerned about the proposal to cancel the D6. It is an extremely useful route, connecting areas poorly served by Metro from the far east to the far west of the city. Pre-pandemic, I used it frequently to go downtown, to Union Station, to DC government offices. In earlier years, my sons used the D6 to get to school. The D6 is a key means for people to reach Georgetown and Sibley Hospitals. I ride past the Georgetown Hospital and would observe that many of the people getting on or off there would likely have difficulty walking to Wisconsin Ave. to catch a bus.

I feel very strongly that the Grosvenor metro stop should remain open. It is our lifeline to the city and we bought near there to be able to access the system. Also the plan is to build additional multi story housing on the property without sufficient parking as the thought was parking wouldn't be necessary because of the metro. Also it is a critical stop for those coming to the music center at Strathmore. The cost of it remaining open also seems minimal as there is one person in the booth during operating hours. Maintenance of the track must be done as trains will need that to go north. Keep it open!

How about pausing the construction of Metro beyond Dulles Airport? Wouldn't it make more sense to delay gratification on a project not yet online than to lose loyal ridership at closer in, well-established stops?

I oppose the elimination of route G12 in the proposed 2nd half Fiscal Year 2022; it serves a very large portion of Greenbelt and facilitates use of Metrorail from Greenbelt station. It has been the daily means of commuting and accessing DC for many of us, and hopefully will remain so. The alternative use of G14 is not feasible for much of Greenbelt, and will likely result in an overall drop in ridership. I know nothing is easy for Metro/any of us now, but I'm hoping the G12 will survive, even at reduced frequency...with the hope of restored future service. Greenbelt resident

If Covid 19 is still a problem in 2022, I won't be going anywhere. If Covid 19 is not still a problem, then I will be taking it daily to commute and I will need full service between PG Plaza and Smithsonian.

Please do not close metro stations along the Interstate 66 corridor. These are very important for getting to town, especially with the high tolls. It is not fair to people who chose to live in the area for access to the metro stations. Commitment to reducing traffic, cleaner air, and accessibility requires investment. If the metro system is not making enough money, there needs to be a tax to fund it. Please don't be short sighted and sabotage our metro system by making it harder to use by providing less stations. Instead, study best practices for increasing ridership and apply them. Thank you, Constance Chubb

Closed East Falls Church Metro would mean my ridership would go from 30-50 trips per year (pre covid) to 0-5. I can easily walk the 1.25 miles to EFC Metro. Driving to another station would mean the convenience of Metro would go way down. Why not just drive to my destination? With green policies, more and better mass Transit is the key, not less and more headaches....

Use of the metro from Cleveland Park to my work in downtown Washington, DC is vital. I have been using this metro route for over 15 years. When deciding to relocate from a home in Dupont Circle, being walking distance from a metro stop was critical. Having the Cleveland Park Metro nearby was one, if not the only, reason that I decided to stay in Washington DC. Many of the terrific individuals who serve the businesses in Cleveland Park depend on the metro to bring them to the neighborhood. We recognize the hardship the pandemic has had on metro and I appreciate your staying open for those of us that depend on public transportation. Other parts of the Metro budget should be explored before closing stations to save money.

I lived in Philadelphia in the 1970s, when SEPTA engaged in a similar cycle of service cuts. Shorter hours and frequency, not to mention less access to Metrorail stations, will permanently push commuters away from transit and back into their cars. This is not mere speculation on my part: As someone who works days that extends beyond normal business hours and whose employer is offering 50% remote work as a permanent post-pandemic option, there would be little to no reason for me to consider using Metro in the future if this plan is adopted.

Your organization is bloated and wasteful and the services you provide are underutilized and lose money. Even pre-pandemic your offerings were plagued by empty seats, empty busses and empty trains. This has only gotten worse. Combine that with a rise in ride share and ride hailing apps, changes in how people work and shop and a new desire to avoid people in public and I'm not convinced that metro deserves to be a going concern for much longer. I urge you to drastically curtail your services to support only peak offerings and then provide aid to the less fortunate riders that will lose their transportation by compensating the riders with vouchers for uber and other services.

Comments - general

Our firm has 2 offices at locations nearby to WMATA stops, including Farragut West and Clarendon; and to limit access from one end in essence deletes the quick transfer of personnel from Arlington to the DC office and/or clients in the DC region. This will severely impede DC business originating from the Arlington office location. And as many staff are Metro commuters, some without personal vehicles, limited access to the Arlington office by DC residents will precipitate some attrition. There are many opportunities elsewhere in the community where transportation will remain convenient.

I completed the survey but also wanted to provide a note that while I think it is great that there is a survey and public comment period, I do not feel that this process will be inclusive or equitable. I don't have any specific suggestions, but wanted to highlight that. I received the email with info about it from a colleague, and had not otherwise heard about it. Additionally, I previously lived and worked in Silver Spring but moved into DC and my workplace will be changing when I return to work so it is difficult to anticipate what my metro needs would be. I do not own a car but think that people with cars may opt for them instead which could cause further road congestion and be counterproductive in terms of climate change. Lastly, I have concerns that decreased frequency of trains would lead to overcrowding and potential accompanying anxieties or conflicts, as well as the potential increased transmission of illness. (Even if covid were not an issue, the flu etc. would still be risks.)

My husband and I moved to Grosvenor Park 19 years ago because of the very close Metro station. We made many decisions based on relying on the Metro. My medical appointments are all in the GW complex and I always go to them by Metro. It is particularly essential for seniors--and there are many here--who can no longer drive farther than in this immediate area.

The D6 bus route is a mainstay cross-town bus line that connects residential neighborhoods to the downtown core. The proposed elimination of that line would adversely affect those, particularly seniors, who can board the bus within a block or two of their homes and not need to exit until their downtown destination is reached. The WMATA proposal would require those riders to make multiple transfers to reach their destinations at additional cost. Please do not eliminate the much-loved D6 bus line.

Hello. I am a metro and bus rider. I take public transportation for several reasons - one of them being the focus on environmental issues. In the past couple of months I have been the only person at times to be on the bus or train car. I understand that this is not environmentally friendly. It defeats the purpose of riding, for the reasons mentioned, if a bus is taking me all the way to the end of the route with just one person on it. So I understand the need for changes. I acknowledge that. I support that. What I am concerned about is all the lower-income families that can't just do a zoom-job. The people who are required to show up every single day to their job and who rely on the metro and bus to take them there. Because the middle income families have been knocked out (who instead of riding have now transitioned to zoom) ..it may reveal only lower-income families that are riding. Is there a way to price adjust that? Thank you for your time and consideration.

If Metro shuts down the East Falls Church station, hundreds of residents in the area are prepared to demand a change in metro leadership, political action against the ATU 689, and restructuring of the metro pension to make funds available for keeping the stations open. If portions of the system are closed, it will confirm the idea that the people employed by WMATA need to be replaced by new staff who can successfully manage the system.

I question the decision to close East Falls Church in January 2022 on the grounds that it is close to other stations. This decision seems to assume that the rider has a car. But one of the reasons for living near a metro station is to avoid driving. According to Google Maps, it is a 2.8 mile (56 minute) walk to Ballston from EFC, and a 2.4 mile (48 min) walk to WFC from EFC. Buses from EFC to the other two stations only partially alleviate the issue, as there is then the time for waiting for the bus and the actual bus trip. My expectation is that enough Americans will be vaccinated by the end of summer for there to be herd immunity. Once activities resume in DC and VA, my own use of the Metro will pick up. But not if the operational level is so limited that it is better to drive than to take the Metro.

Please do not cut the D6/D5 buses. I realize COVID has drastically effected public transportation, but many people use those buses to get to the hospitals to work or to go to a doctors appointment, OR TO GET TO THE METRO STATIONS! We already don't have a grocery store in our neighborhood anymore, now to eliminate public transportation, it almost seems criminal. We have a lot of elderly people in our neighborhood who can't drive and many of us step up to help them. Essential workers use these buses to get to the hospitals to work. Please reconsider eliminating the D5/D6 routes and don't do it, please. Every person in my house keeps a SmartTrip Card in their wallet. If you eliminate these routes, where do we get refunds for already having loaded our cards? This action doesn't hurt the rich people in my neighborhood, it hurts the already underserved.

I'd like to note my strenuous objection to the elimination of D6 service along MacArthur Boulevard. This proposed elimination would mean my only option to get to work is taking an Uber or taxi, a wildly expensive, inconvenient, and environmentally-unsound option. I don't own a car or a bike. The bus is literally the only feasible long-term option I have to get to work. The Palisades already doesn't benefit from a nearby Metro stop, and D5 service was eliminated; it's staggering to think that the neighborhoods sole remaining public transportation option is considered expendable. I can't stress enough what a callous, damaging decision this would be for everyone who relies on public transportation in this neighborhood.

Comments - general

Im very concerned about the possibility of closing the Grosvenor-Strathmore Metro station. Before the pandemic I used it a lot (at least 3-4 times per week). As soon as Im vaccinated and my Doctor gives me the OK I will be using the Metro and busses again. I dont drive and need the transportation from Metro. Im sure that are plenty other people in the same situation. The use will pick up in the next several months and should be available.I bought my condo because of the convenience of the Metro and it would be a hardship without this stop.We just spent several months to upgrade the garage and many apartment units are to be built on the property surrounding this stop. The whole purpose of concentrated building was because of the use of the Metro.This stop is also used for the Strathmore Music center. How are people supposed to get there when activities resume if the stop is closed.From Barbara Caplan

Some 2005 Commuted to and from work via VA Square daily. Never once drove. Once pandemic is better controlled, expect use of station will increase. Should be funded. Increase taxes in multiple affected government jurisdictions to compensate for fare losses.

Hopefully you will get the funding needed to prevent closures from happening. Though making your service even more limited and difficult to use will not bring you riders. Having lived in cities where I used the metro frequently, I would have to say this has been the worst experience we have had. It is unreliable, there are already not enough stops to make it convenient and with long waits between trains in addition to frequent service disruptions, I fear the only thing more closures will do is push more people away from using the metro. We've had so many issues we have given up and ride bikes to work. It takes less time and it always works. We'd love to see a better metro system in DC, the day that happens we will be back as frequent riders.

I am against closing both Clarendon and the Virginia Square Metro stations. I do not drive and frequently use BOTH those stations. Making me travel to Ballston station is not realistic for many reasons. I see many people waiting for trains at both Clarendon and Virginia Square stations.I think there are stations on the Red Line that could be closed instead, since the stops on that line are not convenient to anything.I use both Clarendon & Virginia Sq. stations for necessary shopping. Closing those stations will be a GREAT HARDSHIP for me, again b/c I DO NOT DRIVE !!

If possible, during the public hearing sessions, it would be good to get some clarity on if the proposed changes/closures are only being considered as temporary for the FY22 period or are these proposed being considered permanent. Also if temporary, will there be an opportunity during the FY to revisit the changes made and roll back on some of them if/when ridership/revenues increase? What metrics might be used to reconsider the opening of a station for example as ridership goes up near the end of calendar year 21, beginning of calendar year 22? Thanks

Metros long-term profitability would be greatly enhanced by moving to a rail plus property model, used most notably by Hong Kongs rail operator, MTR Corporation. This model allows for MTR to own and develop property near its transit stations. MTR is the most profitable transit system in the world, and the revenues generated from property development represent the greatest share of its profits. Even if MTRs operating costs were not covered by fares (currently ~190% of operating costs), it would still be profitable from its property development arm. Giving WMATA this power (and transferring any publicly held land near Metrorail or large Metrobus stations to WMATA at zero cost) would enable WMATA to develop a long-run funding stream that would insulate the agency against the pressures of declining ridership. WMATA would also be empowered to play a leading role in furthering transit-oriented development in the Washington region by pursuing its own mixed-used projects near stations, rather than simply relying on outside developers to do so.

It would be a foolish savings move to close the Strathmore Metro station. In the long run, it would damage local businesses and real estate immeasurably.

I don't use the metro no the bus line as much as would like to right now. We are going through a pandemic; therefore, works are on lock down even schools and some place as well. Does that mean we cut all these services that used after the pandemic is over. I live in Hyattsville. The budget is to cut all buses and metro to go and come to Hyattsville. Me to that is a lock down for all Hyattsville residence. Maybe there is other ways to increase income. If you increase the fare, increase it in the way that it would be affordable for everyone. You also probably have people in the organisation, just like any organisation, that are not doing any kind of work. Also May be there can be a fundraiser events. Or even a go fund. Use other alternatives instead of cutting and eliminating bus and metro rail system.

I have taken the survey so these are additional comments. I am at a loss as to why WMATA would close these stations in FY22 when things may be opening up again, tourists will return and some workers will need access to work. I am retired and use the Metro to go to a friend 3 blocks from the Eastern Market, events across the street from Virginia Square, and a friend in Reston. I use the Smithsonian quite a bit and when it opens again in 2022, I will not be able to attend any of the events there.Metro was originally for everyone or so I thought. I seems to be just for commuters now. If New York City can keep the subways running, then Washington, DC should do the same.I have walking issues and the Cheverly Station is perfect for me. I simply cannot walk the distance to the track from the parking lot at Landover. I urge you to rethink this draconian plan. My attendance at the Kennedy Center would be out, too, if you close at 9pm. It is unimaginable that you are using the figures of the last 2 years to determine ridership. When things open up again, so will ridership.

Comments - general

I am shocked to hear that consideration is being made to cancel the D6 bus. While there are many multiple bus lines that run to Wisconsin Avenue and Glover Park, the D6 is the only bus that serves much of the area west of Georgetown hospital. Also, the bus serves workers going to Georgetown and Sibley Hospital, who would have no other means of transportation to get there. Quite frankly, I think bus ridership in the neighborhood would increase with a more regular bus schedule, including busses that would drop off at additional Metro stations. Getting to the metro from the Palisades/Foxhall area is a huge hassle, because the busses run so infrequently outside of rush hour and the only direct bus is to DuPont Circle. It is shocking that The D6 would be cancelled without enhancing other bus services in the area.

Please keep the M4 line in service. I filled out the survey already but did not see an opportunity to comment on our local bus service. We live near Pinehurst Circle which was the confluence of the E6 and M4 bus lines. The proximity to public transit was one of the reasons we bought our house. WMATA has already eliminated our E6 service which was our easiest and most convenient access to the Friendship Heights metro stop. Keeping the M4 is imperative for our access to the red line (as well as Tenleytown and access for students to middle and high school when they reopen). Thank you.

I would like to suggest that WMATA for their 2022 budget uses Signal Scout in order to reduce their workforce and get troubles solved more quickly. Signal Scout is Signal Troubleshooting Software that reduces the work force up to 11.67 %, saving a lot of money. It guides employees to the root cause of a signaling trouble faster, either in real time or in a log review. Having the trains run on time not only increases customer satisfaction, it also reduces their exposure to Covid-19. We have already had contact with some people in the Signaling Department that are very interested in using the software to save time, but currently they don't have the funding to purchase. Making a small investment in this software can save you a lot of money on staff and erroneously replaced equipment. Here is a link to an explainer video: <https://youtu.be/IJWpxml1e-A> For more information or a virtual demo, contact J [REDACTED] <https://www.semaphoresoftware.co/signal-scout>

Where I live, about a mile from the Chain Bridge, off N. Glebe and near Old Glebe, we have almost no bus service, just morning and evening for commuters, and none on weekends as far as I can tell. I have quit even trying.. If you close East Falls Church Metro Station it will leave residents, who can't walk a mile or two, in the northernmost part of Arlington County with almost no public transportation at all.

How can cutting service help Metro. You will become irrelevant and lose all subsidies. Sounds like you lose money with each rider otherwise how can lesser service help. Metro should be about increased ridership. Losing on each rider is an acceptable model for public transportation since no one pays directly for roads either. Metro should be about enough riders to convince public officials and taxpayers Metro is a good investment.

I used to use Metro to commute but after assorted negative experiences I was eager to try other options. One time I was having issues with my farecard leaving LeFant. I asked the employee in the booth for assistance, I gave him my farecard which he scanned and reported this farecard was reported stolen... he didn't wait for me to tell him it was this 66 yr old professional working DOE employee who reported it stolen. He tossed my card into a oneway metal box. At that particular stop there were often groups of ill mannered school age kids carrying on and calling bystanders an assortment of foul names. Give me a break - I pay for a farecard and I pay taxes to commute in a safe environment. Those kids ride free and abuse the options.

As all resident-owners in Tyson, we the owners in the amberwood community are being taxed by Fairfax county for the last 10 years for the purpose of supporting the metro, on the assumption that a metro station nearby will increase the value of our properties. Closing Greensboro station will be against the commitments from the Fairfax county. We will be entitled to reimbursement of past taxes and the cancellation of the existing ones. We urge you to consult with the county to avoid having a legal and fiscal issue with the county

We moved to live here because of the convenience of the Metro.

I opposed the proposal to close two Orange Line stations (Clarendon and Virginia Square), for the following reasons: (1) Closing two consecutive stations creates an unacceptable distance for people residing midway between Courthouse and Ballston. If only one station were to be closed, then residents could shift to the other with only a reasonable level of difficulty; two consecutive stations is an unfair burden on passengers. (2) I vote for bond issues and Metro revenue subsidies with the expectation that Metro has an obligation to provide an acceptable level of service in accordance with its established route system. Many citizens of Arlington make important decisions about where to live based on the availability of rapid transit. Both of the affected neighborhoods have been developed in accordance with the long-term County planning process that emphasizes mass transit over individual automobiles. Closing these stations represents a violation of the implicit social contract between citizens, county, and Metro. If these stations are closed, I certainly will vote against Metro subsidies from Arlington County in future referenda.

I am a resident of Montgomery County who used the metro often prior to the pandemic. Like others, I have stayed home during the past year. I respect that reduced ridership has created budgetary constraints for metro operations and that some adjustments may be needed. However, closing the Grosvenor/Strathmore station seems uniquely ill advised. In normal circumstances, the garage is used by countless commuters. So too, the usage of the Strathmore Music Center will surely begin to return to prior normalcy. It can be expected that the usage will begin to increase as the threat from the virus diminishes. Under these circumstances it is illogical and counter-intuitive to close this station and thereby discourage the use of automobiles to access the metro. Kathleen Knepper10404 Strathmore Park Court North Bethesda

Comments - general

I understand the budget situation driving proposed metro station closures. How much of this can change after COVID vaccines is tbd. However, if closures are still necessary why would East Falls Church close as it is the first intersection/transfer of Orange and Silver lines. Would think West Falls Church is more appropriate closure given its close proximity to alternate Dunn Loring, Tysons and East Falls Church stations.

Comments from Tino Calabia, Montgomery County Representative to WMATAs Accessibility Advisory Committee and AAC Subcommittee Chair, Bus/Rail Subcommittee I've taken the survey. Now, enlisting citations from Dr. Anthony Fauci, syndicated columnist and author Fareed Zakaria, and John M. Barry, a scholar published in yesterday's Washington Post, I want to thank you that WMATA has begun testing a UV-C germicidal filtration system in Metrorail cars. Why? Because of what these (and other) experts tell us. Here's what Barry, author of the definitive book on the 1918 influenza, just wrote: "More variants will arise. . . . The variants we have seen so far do not worry me much. The variants we have not yet seen . . . yes, they worry me." And the Post's headline? "Keep your mask on. We're not out of this yet." In his October 2020 book, "Ten Lessons for a Post-Pandemic World," Zakaria wrote: "As humans extend civilization into nature building roads, clearing land, . . . we are increasing the odds that animals will pass diseases to us." Also in October 2020, with a coauthor, Fauci stated in the journal Cell: "in a human-dominated world, in which our human activities represent aggressive, damaging, and unbalanced interactions with nature, we will increasingly provoke new disease emergences." We remain at risk for the foreseeable future. Thus, perils from the aerosolized Covid-19 virus won't end once most Americans and others around the globe are vaccinated. Even remnants of the 1918 flu virus remain with us, killing tens of thousands Americans each year. That's why testing UV-C germicidal filters in Metrorail cars makes sense now and for the foreseeable future. Moreover, since New York City's MTA began doing so earlier, we may benefit from the MTA's findings earlier than a year from now, when the test in our railcars winds down. Let me add one new recommendation. That germicidal filters begin to be tested in our Metro buses as well. Buses are generally smaller than railcars, and buses can become as crowded sometimes even more crowded than railcars. While the number of bus passengers who've become infected while riding buses is not known, bus companies and driver unions have tallied the numbers of hundreds of bus drivers who have been infected and, worse yet, have died from Covid-19. Of course, I ought to note that many people are gratified that anti-Covid-19 vaccines are available. (Happily, I'm scheduled to get my second Moderna shot in a couple of weeks.) Yet, while the number of adults who've gotten one or more vaccination shots continues to grow daily, variants of the Covid-19 virus are rampant abroad and appearing in the U.S. How more dangerous any variant is and whether existing vaccines can contain every variant remains not fully certain at this time. But bad possibilities are out there. In the meanwhile, the new germicidal filters already available can kill virtually 99.9 percent of all viruses, germs, moulds, while also straining out particulate matter from a vehicle's interior. So installing such filters in Metrorail cars soon and hopefully in buses, too is not just a smart investment for now but for the future, too. Thank you so much for doing whatever more you can do. -Tino Calabia

As a restaurant owner, we depend on these metro buses to get staff to work and guests to our restaurants. This impacts foot traffic in Georgetown and our ability to employ.

If you end up needing to close a station, you should consider asking residents near that station whether they would consider paying a yearly fee to keep the station open. I live near Clarendon, and even though I do not use Metro very often, I would gladly pay to have our station remain open. Considering the real estate benefit, the freedom it provides for the elderly and disabled (I'm 80) and the potential savings against a second car, I believe that a (very) local tax on nearby residents might be more popular than enduring a closing. Bill Eisner

Our community is very concerned about the elimination of the D6 bus line. This is the only bus line that serves several neighborhoods. Equity is a concern as it relates to people working at or visiting folks at the two major hospitals that rely on the D6 bus line (Georgetown and Sibley Hospitals). Several DCPS schools (Duke Ellington, Hardy, and Key) rely on the D6 bus especially since most kids live farther than walking distance and in fact, many travel from all over the city. There are also up to two new DCPS schools planned for the Foxhall Village area that will also need transit access. For many commuters that live in the NW neighborhoods served by D6 bus - they rely on the route to connect to metro rail at Dupont Circle. Without the D6 bus line, our rowhouse neighborhood is left without transit options and will never be able to capitalize on Metro rail as a connection. Every neighborhood in DC and other urban areas should have at least one bus line within a reasonable distance along major corridors.

East Falls Church Metro Station services many buses and passenger transfers, as well as riders who live around the station, and is too important to be closed. As the Covid pandemic eases, traffic will undoubtedly increase by the start of calendar year 2022. Please reconsider closing this crucial station.

Comments - general

While the crisis is obvious, it is no less so that international efforts have been largely successful in developing major vaccines and not simply going to war against each other (for no reason, just out of frustration). Although it may take a year or more to be safe, the world already is a very different place after this major warning. It will take responsible administrations and governance to take us out of the various messes around us, but what is Plan B to being hopeful and fighting with all our might to improve living conditions for all? It is probably not trivial that the economy has not collapsed and new opportunities are around us, if we embrace the future with rigor, compassion, and participatory democracy as our foundations. With that said, it is unthinkable that we should not take our public transportation seriously, for it is part of the solution, not the problem. Take for instance the possibility of eliminating the College Park Station. What should be emphasized, instead, is a partnership with the university, one of the most vibrant in the region which can help instantiate a forward-looking vision. Why not work with the new administration there to ensure the use of metro by its faculty, staff, and especially students, through programs geared to facilitating something as decent as METRO? In times of a storm for a ship, rats jump off (and of course die); real sailors go to the bridge and hold tight to the helm. The choice is ours and not new either. Abraham Lincoln himself reminded us that the best way to predict an uncertain future is to build it. So if the ridership has declined... let us build it together.

Please do not cancel the D6 (of D5) as this is how my children get home from school with their babysitter. It also is how they will go to and from the middle school and high school. Also we do not want to drive and ruin the environment. We walk/bike/use public transportation for our daily commutes. We also enjoy it. When the weather is fine we ride the bus one way to church or the farmers market and walk the other way home, just for fun. Its too far to walk both ways in fancy shoes or carrying fruit/veggies. Please, we stay in the city because we want to be walking, biking, and using public transit for our daily activities. If we have to use our own personal car for all this, what would be the point of city living?

I AM VERY CONCERNED ABOUT THE PLANS REGARDING THE FOLLOWING ROUTES: H8 MT. PLEASANT RHODE ISLAND-PLANS TO TERMINATE THIS SERVICE 2ND HALF OF 2022 IS JUST APPALLING TO ME. I DEPEND ON THIS BUST TO GET TO AND FROM WORK DAILY AND PLANS TO TERMINATE THE LINE WOULD LEAVE ME AND MANY OTHERS WITHOUT TRANSPORTATION TO GET TO THE GROCERY STORES, PHARMACYS & TO WORK. LOTS OF PEOPLE ARE GENERALLY ALWAYS ON THIS BUS AND EARNED B RATING. DISCONTINUING THIS LINE WILL BE VERY IMPACTFUL TO LOTS OF PEOPLE WHO DEPEND ON IT, DAILY. H6 FT LINCOLN -BROOKLAND STATION-THIS LINE ALSO EARNED A B RATING, PEOPLE ARE ALWAYS ON THE BUS, WHICH I CATCH DAILY TO GET TO AND FROM WORK; LOTS OF SENIORS, AS WELL. PLEASE, DO NOT TERMINATE THIS LINE. D8 UNION STATION-WASHINGTON HOSPITAL CENTER-PLANS TO DISCONTINUE SERVICE THROUGH NEIGHBORHOODS THAT DEPEND ON THIS SERVICE THE MOST IS OF MAJOR CONCERN. (Brentwood, Trinidad, Montana Ave, West Virginia Ave) PLEASE DO NOT DISCONTINUE SERVICE THROUGH THESE NEIGHBORHOODS. A LOT OF SENIORS AND LOW INCOME POPULATION MAKE DAILY USE OF THIS BUS, AS INDICATED WITH THE B RATING. THE ABOVE BUS LINES ARE OF SIGNIFICANT CONCERN TO ME, AS I (AND A NUMBER OF OTHERS) RELY ON THEM TO GET TO AND FROM DAILY. PLEASE, STRONGLY CONSIDER KEEPING THESE LINES ACTIVE, EVEN IF THAT MEANS LESS FREQUENT TRIPS. AT LEAST, WE WILL BE ABLE TO GET TO OUT DESTONATIONS AND BACK HOME, SAFELY. THANKS FOR THE SURVEY.

I fully understand choices need to be made when determining budget and not everyone will be happy. HOWEVER, as the mayor and council have been pushing for several years to get cars off the DC roads, reducing and/or completely eliminating bus routes on a side of town that does not have metro will do the opposite. Eliminating the N4 and N2 and other bus routes will create an extreme hardship. just because someone lives in a more highly affluent neighborhood doesn't mean they are well off, doesn't imply they own a car and even if they did people don't want to drive downtown dealing with traffic and parking. also these neighborhoods are home to 2 hospitals and a university. employees and students rely on the bus routes you are proposing to eliminate. if the mayor and council do not want to increase car useage what do you propose all of these people do? there is absolutely zero alternative. and please do not say people can bike. i highly encourage the council to rethink the proposed bus routes to be eliminated.

If you delete the D6 you are deleting ANY public transportation for the Palisades neighborhood and the Georgetown Hospital/Medstar and Sibley Hospital. You are saying that anyone who lives in Palisades must own a car to get to work; workers at Georgetown Hospital and Sibley Hospital must own cars. Where are all these people going to park? Sick people in the hospitals will not get as many visitors. Cars, climate change, and not supporting public transportation is not a good mix. Up until 2 years ago when I retired, I took public transportation to work every day. Since then I have continued to use the D6 to go downtown for appointments or to transfer to metro to go other places. Yes, I have a car but I don't want to park at the other end. Indian Rock Terrace.

My husband and I live in Old Greenbelt, Md. We are both in our early eighties and might not be driving a car for too much longer. Consequently, the elimination of routes G-12 and B-30 as well as reduced weekend schedules would be a very essential loss for us and severely impact our access to shopping and medical care.

Comments - general

I've been relying on Metro for almost 30 years to get from school to recreation to my current job at a hospital. I frequent the D8 (union station-washington hospital center) which has always had its own set of problems ranging from skipping stops to just not showing up at all in inclement weather. But, most importantly, that is a hospital line that accesses two red line stations for people to get to work and appointments. I do not work at that particular hospital, but I can imagine the nightmare (to say the least) if that line is cut because people can't get to the care they need. I also noticed the D6 is facing the same cut -which is also a hospital line to Sibley Hospital. I beseech, implore, bug, and beg you to reconsider those two. I understand budget cuts and meeting fiscal year targets, especially in unprecedented times like this, but to cut lifeline buses like those two seem like that wasn't thought through at all. In fact, they should not have even been considered. People need those essential lines. As for the others, please find ways to either reroute or have lines take the place of those cut. Please do not cut hospital-line buses! The public (that includes you) needs them.

If the Clarendon Station is closed, it would be a hardship for those that live in my retirement community. We live on bus route 4B and use that station to catch the Metro. Our nearest Metro is Ballston, but bus 4B does not go there. Buses that do go from our neighborhood to Ballston Metro are over a two block walk away and do not offer benches or weather protection.

Dear Metro, About your budget for 2022, I wanted to basically ask for you to consider what I'm gonna put on this damn comment box. For the Metrobus proposals, consider the fact that eliminating some of these routes will offer no transit option for your customers and that the very same customers will have to resort to driving in order to get to work or whatever they go. Could you consider reversing some of the routes like for example the Q-lines (since all five of these routes are gonna get axed) where only one route like the Q2 can be saved from elimination and the L8 and the T2 to be transferred to Montgomery County. Because if people don't have access to a metrobus they would have to rely on local transit providers like Moco's Ride-on and Fairfax Connector for travel. If these routes do get eliminated (but not completely eliminated as in a discontinuation), consider restoring that or these routes when everything goes back to normal or before this goddamn pandemic even started.

I'm a senior who lives at the Tysons Towers Independent living facility on Tysons Spring St. I'm really upset that these changes are upon us. We did not ask for this Virus which of course has effected ridership. It's not fair to expect things to stay the same considering the virus. The 463 connector line replaced the 2T that was eliminated several years ago it was a fight to get the 463 to re-route to serve the population of seniors living at the Tysons Spring St stop. We also depend on the Greensboro metro stop which by the way was the big plus for the new BORO that was built and opened 2 yrs ago. So are you planning on taking this stop away from all the tenants of the BORO where is your head you'll leave them without a Metro stop to get to work. Let alone to all the employees of the BORO businesses and the employees of the Businesses at the Leesburg Pike mini mall. Keep in mind not everyone owns a car as well as those who moved to the BORO because of the convenience of having the Greensboro Metro stop near by. So please reconsider closing this station or making any changes to the 463 connector line which serves the seniors at the Tysons Spring stop from Tysons Towers. Thank you for the opportunity to express my opinion.

This comment is in regard to the 22A and F metrobus through South Fairlington. Suggesting that one of 22A or 22F be kept to ensure access from South Fairlington to Pentagon or Pentagon City metro station. WMATA should significantly reduce service now that there is very low ridership, and not in 2022 when people would be expected to be back to commuting to the office. By 2022, WMATA should plan with the fact that people would be commuting back to office. You are suggesting to cancel all the South Fairlington bus routes. So for people who need to go to work in DC, it is going to be a significant change in commute time and in cost of daily commute. Instead of taking one bus to Pentagon or to Pentagon City (10 mins ride) and the metro to DC (15 mins), we would have to take two buses from Alexandria to Shirlington (10 mins walk to bus stop + 7 mins ride to Shirlington: total of 17 mins) and then Shirlington to Pentagon City (10 mins) and then the Metro again (15 mins). Plus whatever the wait time everytime you transfer. With this proposal even living in Woodbridge would seem more beneficial than living in Arlington. At least from Woodbridge it would be one bus straight to DC for the same commute time as under the 2022 proposal of WMATA for South Fairlington. This is going to significantly affect our commute budget as well as commute time. There are many people in the area who by 2022 would be back to in person work and would have to commute to DC. So, we suggest keeping at least one of 22A or 22F. Thanks

Good morning. This makes no sense to me. We have metro "a \$100++ billion asset if it were built today" that were going to allow to go to pot. Why? Because three jurisdictions and the feds cannot figure out how to split maintenance cost and investment needed to upgrade & expand service. You should check out the metro in New Delhi, India "a so-called third world country. It is cheap, reliable, efficient, and spotlessly clean. If we will not invest in health, education, and infrastructure we will have condemned ourselves to becoming significantly less than we are today. This is just the wrong thing to do. Good day!

I am very disappointed to hear that Metro Bus 17G may be discontinued in the Fairfax/Burke area. There is no metro rail nearby and this bus service goes directly to the Pentagon. Most of the neighbors use this bus (pre COVID) since many military people who work at the Pentagon buy in this neighborhood to use that bus line. Since COVID, the ridership has been reduced but I know it will increase again once everyone has the COVID vaccine and it is safer to travel in buses. This is such an important bus line (17G) for our neighborhood and is used widely prior to COVID. Please reconsider and continue this Metro Bus service. Thank you.

Comments - general

While I hope we get past the pandemic such that ridership/fares increase, and that federal/state/local governments continue to provide money to maintain public transportation, I do understand the position you're in and the need to make difficult decisions. I would completely understand limiting service hours or frequency, but as an Eckington resident that used the P6 frequently before the pandemic and plans to again once I feel I can safely (not a critique of Metros efforts here, just personally avoiding gatherings until vaccinated), I am deeply disappointed the P6 line is proposed to be eliminated by end of calendar year 2021.

I am greatly concerned by the proposal to cut the D6 bus. Admittedly, during the pandemic, I've been housebound and not using any public transit so I'm part of the present problem. But this is the ONLY public transit serving the MacArthur Blvd area. Pre-COVID, and presumably post-COVID, the D6 and D5 buses filled during rush hour. At all hours of the day, the buses are used to reach Sibley and/or Georgetown Hospital, used by students, and used by seniors. Cutting the bus service leaves many in the neighborhood with no viable options. Biking is limited given the danger of trying to use the Capital Crescent Trail during rush hour if you're not an experienced and fast rider and the lack of other bike lane options heading downtown. (Efforts to improve the Trolley Trail all the way into Georgetown died, although that could have been an alternative to the CCC.) It's at least a 2 mile walk to get to the next nearest bus that would get me downtown; and for many it's even longer. Thus, we'll see a lot more driving. That's more GHG, more traffic congestion and likely more accidents from aggravated drivers, more wear and tear on the roads, more need for parking. The city will have to pay the price one way or the other. Please don't take away our only public transit.

The proposed elimination of the D6 route would have an awful impact on middle school and high school students located in the Palisades (zips 20007 and 20016) who rely on it to get to Hardy MS and Wilson HS. Please reconsider this proposal!

Writing regarding the South Fairlington 22A/22F bus routes: If the proposed change to these services is applied, there won't be any public transportation servicing South Fairlington at all!! How are we supposed to close to the Metro then? There are options provided in the proposal (such as taking the Alexandria bus) but depending on where in South Fairlington you are located, it can take 10-15 mins walk to get to the nearest bus station in the proposed alternative. Add to that that people will have to transfer twice if they need to commute to DC (once in Shirlington, once in Pentagon or Pentagon City)- instead of the 10mins ride directly to Pentagon/Pentagon City. We cannot all afford to drive to and park in DC everyday. Some of us have to take public transportation to DC everyday to work. Not taking into account the effect that it will have in the value of our homes. Who would want to buy in an area where there is no public transportation whatsoever while at the same time is located at 10mins of nearest metro? So we will end up (i) doubling our commute time due to all the transfers, (ii) paying more to commute (given three modes: bus to Shirlington, bus to Pentagon City and metro to DC), and (iii) lose on our house values given that the area will basically be an inaccessible zone unless you have a car (but the rest of us are stuck with the mortgages based on price as of when the area had good public transportation). Adopting this proposal is the best way to kill an entire Arlington community and their residents lose all the way! We cannot all afford to live near metro stations and for us to live closer to work, have accepted that we will have to take the bus to go to the nearest station. But now that you plan to cut that connection what is left for us? This measure is affecting those of us who (i) cannot afford to live near metro stations, (ii) cannot afford to drive and park in DC everyday. Please consider keeping at least one of 22A or 22F, with more rush hour services and lighter services midday and later at night. We really need that to close to a metro station. Hopefully by 2022 we will all be back in the office in person. Thanks!

The proposed budget is a LOSER! It eliminates needed bus routes and severely reduces rail service by increasing wait times & closing vital stations to customers who either live or work at the proposed stations Metro proposes to close. Metro NEVER puts the needs of its customers first. Instead, Metro should focus on expanding service. For example on Metrorail, it should go back to closing at 12am, as it did during SafeTrack in 2016-17. Metro should make minimal cuts on rail service. On the Yellow line, if any cuts are made, Metro should operate the line as it did in 2017. On the Yellow line, trains should operate in two segments: Huntington/Fort Totten (midday, evening & weekends) and Huntington/Mt Vernon Sq (peak & select weekends when track work is performed). On the Red line, trains should operate in two segments as well: Shady Grove/Glenmont and Shady Grove (non-peak), Grosvenor (peak & select weekends)/Silver Spring. The intervals between trains should be every 10-14 minutes (non-peak; adjusted only for track work) on every line and 5-8 minutes (peak), NOT 30 minutes all day 7 days a week. As for Metrobus, NO more eliminating bus routes. Metro should focus on creating new/restoring routes for areas where there is no available service. In an unrelated issue, Metro should NOT change the names of the Prince Georges Plaza (Green line), Tysons Corner (Silver line) or West Falls Church (Orange line) stations. These names have been the established names of the stations since their opening, especially at Prince Georges Plaza. If Metro wants to use Hyattsville Crossing, it should be a secondary name for the Prince Georges Plaza station.

Good Afternoon, I am the Commissioner for 5E03 in the Eckington, Edgewood area of Ward 5. We heard from a constituent that the P 6 bus was to be discontinued. We are extremely concerned, as one of the largest ANC Commissions in Ward 5 that considerations would be made for any cuts for viable transport for these communities. We have one of the largest populations of seniors in the District (approximately 50% of the population is 35 yrs and older). Further, over the last 5 years approximately 5000 people have moved into the area. Demographically, this area depends on bus service more so than the trains due to access. Further, the P bus goes through the residential areas where many of the people who depend on transportation live and work. As the Commissioner for 5E03 and also the Commissioner for 5E04, are wholeheartedly against any cuts to our bus transportation. The P bus is an invaluable transport for our community. The Commission will look forward to talking to the Board members about reconsidering these proposed changes. Thank you. Dr. D. Wright, Commissioner 5E03.

I find it totally unacceptable to cut bus service and close stations because you are taking away the only form of transportation to way too many folks. I do not drive and the cuts you made to bus service due to COVID had a negative affect for me, there were many things I was not able to do because there was no bus service and now you want to cut service even more. Where I live there is only one bus that I can take from home to wherever I need to go, that one bus stops running at 8am Monday-Friday and then there is no service until after 3pm so most of the time I get somewhere way ahead of when I need to be there and then I have several hours I have to kill before I can get a bus home. But what is even more aggravating is you cry about being short of funds yet there isnt a day that goes by that I dont see passengers get on the bus with no fare card and no money, they just walk right on by the driver and nothing is said. One day I counted how many got on without paying at just one stop and it totaled \$10, that is just ONE stop. No lets talk about how many folks push thru the gate at the stations, or jump over or just walk right on thru the gate right next to the station managers booth, most of the time all of this is done as the station manager is looking right at it happening.STOP TRYING TO CUT SERVICE BECAUSE OF YOUR BUDGET WOES AND STOP ALLOWING SO MANY TO GET BY ON A FREE RIDE!!! It is time for you to look for ways to stop fare jumpers instead of making it more difficult for those of us that pay our fare every time we use the system, GET YOUR PRIORTIES IN ORDER!!!

I use the metro to commute to work from DC to Clarendon. Closing the Clarendon stop will hinder my ability to get to work as well as many of my colleagues who live in DC and commute to VA. During rush hour, I often have a difficult time getting on trains at Gallery Place and Metro Center. I transfer at both. By altering the trains to every 15 minutes, I assume that it will be nearly impossible to make it on a train and creating a backlog of riders, as I usually have to wait for multiple when transferring to the red line.

It seems very short sighted to look to close the Strathmore - Grosvenor Metro location. Gradually it is clear that with more Covid Vaccinations that more people will be going to their offices in the near future as well as visiting many other locations in Washington DC. Additionally, there are 5 high rises within easy walking distance and many other nearby apartments and condominiums are nearby that in normal times, would create a huge need for the Metro service. Even though it will probably not be back to normal pre-Covid usage (because not all people will be going to office buildings,) it will certainly be much higher than the present usage. Additionally Strathmore Hall, after more Covid vaccinations, will certainly re-open and this will generate much Metro usage as well as definitely increased parking usage. I urge common sense in this situation and not close the Strathmore - Grosvenor Station.

As a resident of the Fort Davis community for 50+ years, I am appalled to hear that metro wants to eliminate the only bus that services a semi active senior community. Although several buses travel the Pennsylvania Ave SE corridor, this particular bus is crucial to the community. This bus route runs every 15 minutes and provides almost curbside service to the parents, kids, parishioners, teachers, students and seniors traveling to and from Dupont Park Seventh Day Adventist, Rocket Academy, Fort Davis Rec Ctr, New Macedonia Baptist Church, Fairfax Village and Potomac Ave and Southern Ave. Without it, neighbors will be forced to walk to Southern Ave or Fairfax Village to obtain service. Without the M6, residents, will be forced to walk to Southern Ave or Fairfax Village to obtain service. While this seems like a simple solution, it is NOT!Not only are our seniors unable to walk that far, you are presenting a safety issue for residents especially during season changes.

I chose to live in this condominium mainly because of the location, very close to Clarendon Metro Station and If you do close the station, I will be in trouble as I decided to give up my car because of convenience of this Station. Plus closing the station, it will be a big disadvantage and loss for the business owners of shops, restaurants, supermarkets as it is a very popular area. Please do not consider to close this station no matter how. We also pay high tax because of the popularity of this area.

In 1977 and for many years after that, I would ride the 36 bus from my home in Hillcrest in SE DC to Friendship Heights quite a few days a week to work and back again. I was working my first job at Raliegths at Mazza gallery. That ride, traversing this city, allowed me to become well acquainted with each area, Capitol Hill, the Mall with its museums and government offices, downtown, Foggy Bottom, Georgetown, Tenely, and finally Friendship heights. I became an expert at navigating this city. It made every neighborhood accessible to me. It brought be closer to so many neighborhoods and to every one who lived and worked here. It made me understand our differences and showed me where we are all the same. Thats how I learned to love DC. I have watched it grow from the seat of the 36 Friendship Heights bus. One is not afforded this experience when riding the Metro Trains. You miss so much. We need to do everthing we can to bring our residents together. Nowadays, (well, pre-pandemic) I see parents taking their kids to the museums on that bus line or to shop in Georgetown (no Metro access.) Folks who work in Georgetown and live in Arlington are taking the bus from Rosslyn, crossing the Key Bridge. Look, I know Metro is in bad financial shape but so many of us are and we are persevering. Focusing on the future. Please do not limit our access. Find the funds and do not cut the bus service.

I believe transparent funding for a metro bus line and metro rail line need to be shown for individuals to provide good answers. Also understanding that metro bus rider did not pay for service until Jan 3 2021, while metro rail paid fares throughout. (Taking a free bus ride vs paying for metro rail could have GREATLY altered the numbers in your ridership percentages.) I believe closing service earlier (bus and metro) weekdays, closing 22 rail stations, along with greatly reduced service on the weekend would be the best route. Severely curtailing metro rail would force more to find alternative means of transportation (not just bus) and as it is more of a revenue generator (per-rider) it does not seem as a viable option.

The city is trying to make Washington, DC, a car-free city and residents are being encouraged to walk or ride bikes. And now youre planning to completely elimination public transportation! I am referring specifically to the D6 and the Foxhall Village/Palisades area. How would students get to the public schools -- Key, Hardy, Wilson? How can patients get to Sibley and/or Georgetown Hospitals? How can employees get to the small businesses along MacArthur Blvd? How can we get to a grocery store -- there are NONE in our area. How can residents get downtown to work, to Union Station, to the airports, to a museum?We cant drive because theres limited parking and many places are too far to walk, especially for a number of the elderly. So that means that at age 80+ I have to learn how to ride a bicycle.The proposed elimination of the D6 is an outrage and a disservice to the citizens.

Growing up in the Maryland suburbs, I always lived within walking distance from a Metro stop. That allowed me to come into the city for shopping, concerts, museums, galleries, and restaurants and later to work. I no longer live close enough to the Metro to walk. I worked from home for most of 2020 until I became one of the millions of victims of the pandemic economy in October. The unreliability, impracticality, parking expense, and frankly random danger of Metro have all been factors in what jobs Ive applied for, mostly avoiding DC. Unless I were to wait at the bus stop to ride a Metro bus, it would take me that same half an hour to drive to the Silver Spring Metro, and then I would have to account for pricey all-day parking, walk through the maze that is this Metro stop, and potentially wait half an hour for the next train before riding another half an hour or more to my destination and walk from there, assuming the stop isnt out of service. Many DC employers do not have free or any parking because ease of Metro use was taken for granted in the old days. Taking Metro to work in 2021 would not only outspend and triple my old commute, but also take my life into my hands. Beyond that, the desperate measures taken in recent years had already made traveling into the city for its nightlife all but impossible for me. With no income, I cant afford a taxi or ridesharing because the last Metro train leaves before 9 oclock. I understand firsthand the reality of the citys lower-income residents; it is quite the privilege to just hail an Uber, as seems to be the tacit understanding behind these closures. After spending years envying other cities 24-hour subway lines, I have now all but exited the local economy.

I urge the WMATA board to keep the Silver line Metro stations open and the Fairfax Connector buses operating. My family is very fortunate enough to own cars, but other individuals and families in our area are not as fortunate. The Silver line enables low and moderate income workers to to get to work and school. Also, the planed Silver line stations could contribute greatly to the economic recovery of the Dulles corridor and facilitate connecting to the DMV region. Thank you for your consideration,Lynn Nagle

Please keep the 17G route the way it is/was prior to the pandemic. I am unable to walk out to the Braddock Road stops to be able to ride any of the other 17 series Metro buses due to arthritic knees, ankles, and a metal hip. I can make it out to the 17G bus stop four houses away from my house to catch the 17G ride into the Pentagon. Thanks for your consideration. I do have a reduced fair Metro card and truly appreciate the service that you and your drivers provide.

Comments - general

RE: alternative to eliminate Metrobus routes in Burke area, specifically 17G. I'm a federal employee who uses Metrobus 17G to commute to work. I transfer to the Yellow Line at the Pentagon in order to arrive at my office near L'Enfant Plaza. Sometimes I use the Blue Line, although this adds significantly to my commute time. During non-pandemic times, I commute 5 days a week at a minimum. My job requires me to be in-person at my office. If you cancel route 17G, I will be forced to acquire a second vehicle in order to meet my family's work commute requirements. Not only will this affect my cost of living, my car commute during rush hour will add my vehicle to congestion on Fairfax, Arlington, and, quite likely, downtown DC roads. My vehicle will also be just one more vehicle contributing to the wear and tear on Northern Virginia and DC roads. Additionally, unless I spend even more money on an electric vehicle, my combustion-engine vehicle will contribute to air pollution. Add to this the pollution and use of natural resources just to make the car that I'd be driving. There's also an adverse safety aspect to canceling 17G. When I'm using WMATA services, I can prepare for or recover from work instead of drive in rush hour traffic. Not only am I at a reduced risk for accidents, so are others since there's one less vehicle "my vehicle" on the road. Additionally, I was recently diagnosed with a heart condition that's made worse by stress and fatigue. Driving in NOVA and DC traffic during and even outside of rush hours is one of the most stressful parts of my life. I decided to accept the 60-minute commute by WMATA in order to avoid this stress. There are also adverse personal productivity and work-life balance effects to my life if you cancel 17G. My job requires me to do a lot of extracurricular reading just to stay informed enough to do my job during office hours. While I'm using WMATA services, I can safely do this reading during my commute. This means that I'm not doing it during what should be my personal life at home with family and friends. I use WMATA as a sort of secondary office to do the reading I have to do in order to continue to be a successful policy analyst for the U.S. government. One last, very personal effect if you cancel 17G: I specifically purchased my house along the 17G line in order to make it easy to use your services. That convenience came at a premium. Houses in my neighborhood are priced, in great part, due to the convenience their location offers to use WMATA to commute to government-related jobs in Arlington, the Pentagon, and downtown DC. I pay extra in mortgage just so I can use WMATA. What will happen if you cancel 17G? I'm betting that will affect my property value. On a bitter note, of course Fairfax will still charge me the same in property tax. Bus 17G and the Yellow and Blue Lines (but most importantly 17G), contribute positively in every way to my life. Please don't cancel MetroBus service in the Burke area. I'm more than willing for my 10 fares a week (20 if you factor that they're bus and rail fares) to contribute to your bottom line. I want to continue to pay for your services. It's better for me, my family, my co-workers, and the environment. Sincerely, Eric Stahl Fairfax, VA

Hi my name is Lamar Lawson. Not only do I want to talk about the budget, I also want to talk about a metro bus and specifically things I would like to happen on the rail as well, and also Metro Access. RT. B30 Metro needs to start running the B30 again. Just a quick reminder, the B30 line starts from Greenbelt Metro Station and ends at the BWI Airport/Business District. At one time, it was running to Arundel Mills Mall. It is not right that a person has to travel 1 hour out of their way to Shady Grove Metro Station because they have to ride the MTA bus 201 to have access to the system if they're leaving from the airport. Greenbelt Station is 25 minutes away but 30 minutes if there's a little traffic. I am totally blind and I depend on that bus. It helps me save money on travel because I have a smart Trip card and no other system accepts that card if I wanted to travel to and from the airport. I also have children that live in the Baltimore Area and the B30 was a cost effective way to get there. The thing I find disturbing is the 5a has been running during Covid but somehow some way, the B30 isn't. Something doesn't seem right nor fair about that. I understand the B30 had low ridership however, I rode the 5a and it's not always crowded. The last time I complained about this situation, someone said I needed to talk to my elected officials. If a person doesn't know how to contact them, how is someone going to be able to talk to them? And here's the ironic thing, when the B30 was running, metro ran it during the week but not on the weekends/holidays when people really needed the most. It doesn't make sense since what so ever to run it like that. Whether you want to run it to Arundel Mills or not is up to you but I would suggest if the ridership is indeed low, run it like you do the 5a. And as time goes on and people start traveling again, put it back to every 40 minutes. Metro Rail All trains need to run as far as they could. I do not like the mid turn around especially now that Metro has installed those signals letting the conductor know when to go and stop. I have been on many trains, when the other train crossed the track and was clearly on the other side the conductor announced they still couldn't go because they had a red signal. So the Yellow line should continue going from Huntington to Greenbelt, the red line needs to go all the way from Shady Grove to Glenmont and vice versa. The more lines on a particular track is concerned, the frequency should be often but the red line needs to run maybe every ten minutes because that's the only train running on that track. The others have at least two and L'Enfant Plaza runs five of them. The Metro system should have the hours of Monday-Friday, 5:00 AM to 12:00 AM, Saturday and Sunday, it needs to open at the same time each day. Now, it opens at 7:00 AM on Saturday and 8:00 AM on Sunday. Which ever time metro decides, it needs to open the same time both days but close at 12:00 AM. Metro Access Metro access needs to run to all three airports; Dulles, National Airport, as well as BWI Airport. Although I still would love to have the B30 back, Metro Access also would be a great help as well getting to and from the Airports. As far as the fares, during rush hour, the fare is \$6.50 but weekends/holidays, it should be \$4.00. So in conclusion, don't take this as just another rider complaining/suggesting. I've been riding metro for at least 20 years. I understand cuts have to be made because of Covid however, think about the people who really need a particular service. In response to the reasoning of the cut backs, of course it cuts deep. You can't expect people to ride when all the government officials are demanding people to stay home. That's not fair to the people who need the system. All I ask is, when you prepare the budget, and when you make the cuts, think about the severe consequences it would have on many people. Thanks for reading my long letter, and I still think we have the best system in the nation. My email address is: [REDACTED] and my phone number is 2 [REDACTED] [REDACTED] thanks again.

Comments - general

Before the pandemic, I used to ride bus and rail to and from downtown everyday. When I travelled during off-peak hours, certain trains and the buses were almost empty. This indicated that you had ridership issues before the pandemic. COVID relief funds wont solve most of these problems, eg, communications, civil/criminal/nuisance infractions, untimeliness, poor customer service, etc. Looking around my community (AU Park/Tenleytown/Cleveland Park), I have seen a lot of people riding bicycles, scooters, segways, and anything other than Metrorail or Metro Bus. This again is before the pandemic, but it has continued during the pandemic. The people coming through seem to be coming for work or school. Theres no real tourist attraction there (Target? 7-11?) One of the benefits of a mass transit system is that people can get to places where they can get to jobs and schools. However, when I see people commuting from all the way across the city or in some cases from Northern Virginia or Southern Maryland to get these low wage hour jobs I have to ask myself is this good or bad? It seems more like a failure on the part of the local Mayor and city council to provide opportunities where people live if they have to go so far to get even basic employment and resources. As Metro prices increase, this is a bigger issue for people who are trying to earn a living wage or at least hold on to some money so that they can build a better future. WMATA should be asking Muriel Bowser and her counterparts in NoVA and Southern MD why there arent quality schools and career opportunities in every neighborhood of the city. People should want to travel, not have to travel to get access to what they should be getting in their communities. The city revenues cant all go towards fostering gentrification. Just a note on my pandemic WMATA experience. I recently tried riding the train double-masked and saw too many people come into your subway system with masks and pull them off and position themselves next to other riders as soon as they got on the platform. We were trapped. It doesnt surprise me that people have been getting raped and molested in the train cars for years. Metro security is only focused on protecting WMATA, not the safety of the Riders. The regional planning commission and WMATA really need to work with communities served by these stations and bus routes to find out what they need from a transit system. Local governments have focused too much on how to WMATA can increase revenue coming into their jurisdictions without giving deference to the needs of communities. Regarding the proposed rail cuts, Im just confused. Im not clear why Smithsonian wouldnt be where most of your tourist ridership \$ would go when the museums re-open. In building the other stations on your list, WMATA got approval to disrupt quiet and environmentally desirable communities by justifying the need for business development, growth, Etc. Now youre proposing to cut them? At the same time, WMATA is still planning new stations and expanding existing lines youre struggling financially with the existing ones. Why would we trust your motives or your judgment now?

Metro would like to close the Cheverly Metrorail station. I have already filled in the questionnaire, but have the following additional comments. Cheverly is one of the stations slated for parking fee reduction. Also, Metro is planning to add solar panels to the Cheverly parking lot. These plans seem to be conflicting. Would the parking lot be kept open if the station were closed?

Needed it

I like the idea but they chose the wrong stops.

Latin America is not a language. It is Spanish. You could also use the different identifiers Spanish-speakers use, like Castillian/Castellano. But Latin America is never correct as an identifier for a language.

Please do NOT close the Greensboro Drive Station. There are thousands of people living at the Rotonda and the Boro with even more projected with future expansion and it would be wrong to deprive them of their station.

Que. o lo cierran parqu岸 es el transportado detodo los dias

The G2, D2, and D6 bus lines are very important to the student population at Georgetown University, especially low-income students who rely on WMATA services. Ridership will increase again with the impending vaccination, and the return of thousands of more students. Please do not neglect efforts to integrate student populations at this isolated university with the rest of DC.

Do not eliminate proximate bus stops!! Keep these stops so that the metro remains as accessible as possible for DC residents.

Do not cut the G2, D2, and D6 buses. This consolidation will make it harder for people living in and commuting to and from Georgetown to access the rest of the city and vice versa. This decision would have a particularly negative impact on low-income communities and only further the divide between the Georgetown neighborhood and the rest of DC—a harmfully elitist, racist divide. It would also prevent students living in the area from having accessible work commutes out of the neighborhood, an issue which already exists but would only worsen. Please reconsider this decision, as the consolidation under the N6 would not be nearly enough service to compensate.

These service cuts are unacceptable. In particular, elimination of the G2 would be a major blow to students at Georgetown University, most of whom do not own cars. These changes cut against the universitys goal of incentivizing more sustainable transportation. In addition, the rail frequency cuts would be crippling.

Please do not cut the G2, D2, and D6 buses. These are essential sources of transportation for Georgetown students, especially those of us with lower incomes. Cutting these buses will make it much harder for students to travel to jobs, as well as furthering gentrification in the neighborhood by making it harder for low-income residents to live there. Please don't cut these buses.

Comments - general

(normally) I live near the Cheverly station but use the Landover station because getting to the Cheverly station in the morning is a nightmare. The Cheverly Ave / Columbia Park Rd / 50 intersection traffic easily overwhelms the traffic lights

Metro services should not be cut , it's very needed by the public. If there's budgeting issues than honestly you guys should get rid of all the terrible employees they have such as bus drivers and station managers/help desk they are always very rude and ghetto and you should fire some of them in order to stay in budget and not cut services which many people need

I truly hope that the government can somehow be able to receive funds because I just started a job and I count on metro everyday to get to work and also I've noticed that other passengers do the same and yes there are a lot of riders who have stopped riding metro but not everyone so please I would greatly appreciate it if this matter can be resolved and I also speak for the other riders thank you for your time.

Will it ever end people are walking through the gate not paying for the train ride inside the station

I was doing the survey but somehow it logged me out and I had to restart. This change that should take place in Jan 2022 would make it difficult for me to get to work and home. It already takes me 1.5 hrs to get to work every day. Paying \$58. A week and it will take me longer is not beneficial to remain a metro user. I'm not originally from this area and rely on metro daily.

Por q los metro estan tan tardado se los dificulta mucho el poder llegar a nuestros trabajos gracias

I haven't been riding metro because the drivers have been so explicitly rude and obnoxious in their behavior towards me. I have been rejected to ride and mistreated so poorly by your employees. I pray for them that whatever caused them to act in the inappropriate manner they did, that God heals them from that because it was so unjust and I have nothing against them, they're humans just like me and I came in peace but they discriminated against me and didn't allow me to ride. I've been walking a couple miles now to get to where I need to go rather than taking the bus because their behavior was so unkind that I would rather protect and honor my dignity than put myself in that situation to be highly disrespected and humiliated again. God bless and protect all your employees. I mean that from the bottom of my heart. I think you should pay them more and I think you should also teach them how to have grace in dealing with people. That skill never hurt. Have a great 2021 and may God bless you

Ustedes de por si hacen lo que se les da su gana porque hay negros que tratan mal en el bus a la gente latina pero eso si si son negros los dejan pasar sin cobrarles el pasaje tanta discriminaci3n los morenos contra los latinos he metido tantos cumpli3s de que cuando tambi3n van manejando el bus platicando con otras personas ellos y no van poniendo atenci3n cuando vas manejando haga lo que se les da su gana

La verdad es algo pronto para que cobren los dos d3lares por cada vieja que uno hace

I have done the Survey. But, didnt find the Questions very Fair nor Appropriate. Many People are Purposely Not Traveling because of COVID. Especially, Seniors. Because We Dont want to get Sick! Not because we dont want the Buses. I Love riding the buses to get out & about. I do hope you will reconsider Cutting So MUCH of our MUCH NEEDED METROBUSES! Just because were Not Riding Right Now Doesnt mean we Wouldnt be Riding IF we Could! I have Contacted both Congresswoman Nortons Office, & the White House about a Separate Special Funding for Public Transit. I explained some of that we Seniors up here in Edgewood could NOT Survive without our D8 bus taking people to/from WHC/VA Center for Important Medical Appointments including Dialysis. Many are Mobility Limited. People also come from Brentwood, Trinidad Neighborhoods to Hospitals. Many Seniors in Fort Lincoln Rely on the H6 bus. Every time I have been waiting at Brookland Station there are people waiting for that H6. Many people in Eckington Rely on the P6 bus. The MBT is Not Always Safe to walk on. MPD Bike Officers do their best to Patrol it. But, Stuff happens anyway. Could You Possibly Hold Off on Finalizing the Budget for a Few Months? Till the Pandemic is over? I am Sure People will begin Riding Again. It would be a Terrible Shame to Take Our Buses Away Just When we will Need them Most. Not Everybody is Comfortable with Metrorail. Especially, when one has to deal with Elevators & Escalators that arent Operating Properly, IF one can Even Find an Elevator! Metrobus Supports a lot of Lower Income Essential Workers too. Many can barely afford Metrobus, never mind Metrorails Exorbitant Fares. About Twice what the Bus Costs. Please, Please Hold Off on this Dastardly Decision as Long as Possible. Give our City & Region the Opportunity to Get back to Normal. Wait another year or so. See what Happens. Thanks again LD Lee

No es justo que recorten el transporte por que muchos nos beremos afectados por que es nuestro medio de transporte para yegar a nuestro trabajo

Puede apagar las escaleras el3ctricas y reducir3n un poco la electricidad y poner unos minutos m3s retrasados los metros para que usen menos metros

Entiendo q estan perdiendo dinero pero soy una persona q us9 el metro 5 dias a la semana y lo q veo todos los dias es q mucha gente hombres mujeres pasan sin pagar hasta incluso cuando voy a poner mi tarjeta para salir o entrar la otra persona se me pone atras y casi me empujan para salir atras6 de mi..sin pagar....nolea digo nada por miedo....y l a persona q esta en la cabina los miran y no les dicen nada

Ok

Si quitan los serbios nos perjudicas. A nosotros los usuarios

| lamentablemente est  situaci n del covic 19 a da ado la econom a de todos, pero es muy necesario su servicio ya que yo conozco mucha gente que hutizamos y es muy necesario el servicio de metro y bus. deseo que todo se normalice lo antes posible para que no, nos afecte, de antemano agradezco sus servicios y amavilidas, Animo y deseo que pronto regresamos a la normalidad. |
| Espero qu  pasa mejor esta enfermedad tambi n usted puede ayudar m js ruta de buse sea los minor para toda lo pasajero |
| To many people not paying to pass on train why do I have to pay? Oh because social equality FU people |
| Formally I was an avid rider and support of the DC Metro subway system. However over the past 10 years, due to the consistent unreliability of the service, reduction in service hours, and overall decline in service quality and frequency has caused me to abandon Metro for other forms of transportation. Mass transit should be viewed as a necessary societal need as it improves the local economy by providing transportation to employment, entertainment and retail locations, and improves public safety by reducing cars from the streets and providing an alternative to impaired driving. Due to these significant benefits, mass transit should be subsidized as a necessary public utility and both service frequency and hours should be increased to provide a viable transportation solution. As it stands now, the Metro subway system is not such a solution. |
| No way. Ff county have mucho money. Don't understand it. We don't have enough money to taxi. |
| The metro transit is important to so many riders in the city. While it's important to realize that some stations and bus routes may never get back to normal because of work from home, ride share apps, city bikes and scooters, some of this proposal is just too drastic. Metro buses should be an alternative for people who can't afford metro-rail fair. For the rest of us who can afford the rail, having such stations that are near shopping centers, entertainment venues, movie theaters, and corporate buildings shut down permanently is not a good idea. Metro needs to try harder to safeguard its revenues. I can't believe the amount of people just walking through the gates every day. Updating the entry gates would be the first thing that needs to happen. While I have no idea how much this will cost, I know that majority of your losses come from people not paying. Metro also provides safety for those who work late at night. The city needs it's transit system. I noticed that you're planning on cutting the P6 route. I've never been on that bus and seen it empty during the day. Just stop running the bus after 11:45pm. How about skipping stations that are slow at night. What's the point of permanent closure of Eisenhower if you still go to Huntington? As for the bus routes suspend them during the slow hours or space them out as you have done. |

Comments - general

I truly understand the Fiscal Year Budget dialog, however, I am a licensed Female Security Officer, a Sr, healthy at the moment, only dealing with arthritis in my knees, which I keep them well oiled! Yes, I've maintained a positive attitude during these trying times of the Pandemic. I work many different shifts, mostly overnight. I live in the corridor of 1495 Bangor St SE, & deal with walking home the rest of the way from MLK & Morris rd now because the buses have stopped running up that strip, even when the schedule says there's 2 more trips. Towards the end of some of the drivers shifts, they do what they want to do, not all of the drivers. Now I watch the drivers tell the riders, well the ones that are paying, the machine is broke. I am compassionate for the drivers because it's rough dealing with ignorance, rudeness, just walking past the drivers not even greeting them at least. I trudge up these hills in all inclement weather, I understand that. Why does it have to be this strip between Hunter & 16th st? What I do is work, every night, 67 years, trying to put in 4 or 5 more years before I retire, probably won't. You have enforced stronger messages to these slouches before

Please keep service at Grosvenor station and maintain frequency of trains on the red line

Closing the Yellow Line Archives Station will adversely affect a lot of Nationals baseball fans who use or transfer at this station to go to the ballpark. You might consider keeping it open during and Nats home games.

I rely on REX to go to work

Please dont consider making these cuts until AFTER the Federal Government and government contractors have reopened. Only then can you have a sense of true ridership estimates. To cut metro stations will especially hurt DC businesses and DC/MD riders -- particularly those who dont have cars and cant afford Uber (if thats even available).

| No cierren east falls church , es un largo camino de tysons corner a ballston para quienes no tienen carro y usan esa ruta | Don't close East Falls Church, it's a long way from Tysons Corner to Ballston for people who don't have a car and use that route |
| Yo necesito el metro, tengo la necesidad de viajar por mi trabajo | I need the metro, I have to travel for my job |
| La eliminacion de las rutas E6 y M4 dejarian a una area importante sin ninguna clase de acceso a transporte publico. Esto resultaria en un significativo aumento en la movilidad individual, generando mayor contaminacion ambiental y gases de efecto invernadero. El plan no preve como compensar por este impacto climatico alto que tendra eliminar estas dos rutas. Adicionalmente, estas rutas de bus son utilizadas diriamiente por muchos estudiantes de Lafayette, Deal & Wilson como unico medio de transporte escolar. Si se eliminan estas rutas, como se garantizara que estos estudiantes puedan asistir a sus centros de estudio? | Eliminating routes E6 and M4 would leave a significant area without any type of access to public transport. This would result in a significant increase of individual mobility, creating more environmental pollution and greenhouse gases. The plan doesn't have a way to offset the large impact it would have on the climate to eliminate these two routes. Additionally, these bus routes are used daily by many students from Lafayette, Deal, & Wilson as the only way to get to school. If these routes are eliminated, how will you ensure those students can attend school? |
| Que. o lo cierren parquet es el transported detodo los dias | [Don't] close it because it's the only transport for every day |
| Por q los metro estan tan tardado se los dificulta mucho el poder llegar a nuestros trabajos gracias | Why is the Metro so delayed? It makes it really hard to be able to get to our jobs. Thanks |
| Ustedes de por si hacen lo que se les da su gana porque hay negros que tratan mal en el bus a la gente latina pero eso si si son negros los dejan pasar sin cobrarles el pasaje tanta descriminaci3n los morenos contra los latinos he metido tantos cumpl3s de que cuando tambi3n van manejando el bus platicando con otras personas ellos y no van poniendo atenci3n cuando vas manejando haga lo que se les de su gana | You yourselves do whatever you want because there are black people who treat Latinos poorly on the bus but if they're black you let them go without charging them for the ride. There's so much discrimination by black people against Latinos; I've made so many [unintelligible] that when they're also driving the bus and talking with other people and they're not paying attention when you're driving, do whatever you feel like |
| La verdad es algo pronto para que cobren los dos d3lares por cada vieja que uno hace | Honestly it's kind of soon to be charging two dollars for each [trip] someone makes |
| No es justo que recorten el transporte por que muchos nos beremos afectados por que es nuestro medio de transporte para yegar anuestro trabajo | It's not fair for them to cut back on transportation, because a lot of us will be affected because it's our means of transport to get to our jobs |
| Puede apagar las escaleras el3ctricas y reducir3n un poco la electricidad y poner unos minutos m3s retrasados los metros para que usen menos metros | You can turn off the escalators and decrease the electricity a bit and delay the metro a few minutes to use fewer metros |
| Entiendo q estan perdiendo dinero pero soy una persona q us9 el metro 5 dias a la semana y lo q veo todos los dias es q mucha gente hombres mujeres pasan sin pagar hasta incluso cuando voy a poner mi tarjeta para salir o entrar la otra persona se me pone atras y casi me empujan para salir atras6 de mi...sin pagar....nolea digo nada por miedo....y l a persona q esta en la cabina los miran y no les dicen nada | I understand you're losing money but I'm someone who uses the metro 5 days a week and what I see every day is that a lot of people, men and women, go through without paying. When I go to put my card in to enter or exit, another person will even get behind me and practically pushes me to get out behind me without paying... I don't say anything out of fear... and the person in the booth sees them and doesn't say anything |
| Si quitan los serbios nos perjudicas. A nosotros los usuarios | If you take away the [services] it will hurt us. Us, the users |
| Espero que todo mejore en el nombre de Jes3s | I hope everything improves in Jesus' name |
| para m3- es muy importante metro buss porque uno sale a trabajar a una cita con doctor o una cl3nica | The metro bus is very important to me because you go to work, to an appointment with a doctor or a clinic |
| El metro necesita volver a ser igual que antes , todos los que optamos por usar este medio de transporte sabemos lo importante que es para nosotros. | The metro needs to go back to being like it was before, everyone who chooses to use this mode of transportation knows how important it is for us. |
| Lo q nosotros qeremos los pasajeros q abordamos la ruta T2 q nosea quitada que ppr favor siga circulando es muy nesesario esa ruta y bastante abordada gracias | What we passengers who ride route T5 want is that it not be removed; please keep running it, this route is very needed and quite full. Thank you |

| Esta bien que le suban una cora | It's okay with me if they increase it a [unintelligible] |
| Estoy de acuerdo | I agree |
| Buenas noches La decisi3n que tomen para mi est3 bien Y se los entiendo que por la lamentable Pademia deban . Tomar itras Decisiones. Gracias por dejarme saber a mi , Y a la comunidad . Qu3 DIOS les ayude a tomar la mejor definici3n. ? | Good evening, the decision you're making is alright with me. I understand that unfortunately due to the pandemic you must make these decisions. Thank you for letting me and the community know. May God help you to make the best decision. |
| Es muy dif3cil para todos pero el metro es muy bueno para mi porque me permite seguir trabajando en diferentes partes esas Noticias no son buenas | It's very hard for everyone because the metro is very good for me, because it allows me to keep working in different places. This isn't good news |
| Reducir el servicio en horas especificas y en d3-as de poca afluencia de pwrsonas. | Reduce the service at specific times and on days with lower traffic. |
| Eso me preocupa porque yo soy usuario del transporte metrob3s i utilizo diario. Para ir a mi trabajo i eso le afectar3-a mucho aqu3- en fairfax va | This worries me because I use the metro bus transport daily. This would greatly affect me getting to work here in Fairfax VA |
| Me gustar3-a que no recorten los servicios de horario para mi seria mejor que suban la tarifa un poquito gracias | I would not like for them to cut back the service schedule; it would be better for me if they raised the fare a bit. Thank you |
| Para mi k suba el precio xk a veces uno nesecita moverse y sin transporte va ser dif3cil a veces es mejor pagar m3js pero k haiga m3js movilidad gracias x su comptencion | I think they should raise the price because people have to get around, and without transportation it's going to be hard. Sometimes it's better to pay more but have more mobility. Thanks for your understanding |
| El traspor de porsi es malo el las rutas ke llo recorro y si quitan ceria pe or las tarifa cienpre a3±o tras a3±o an an mentado cienpre | The transportation in itself is bad on the routes I take, and if they take them away it will be worse. Year after year the fare has always increased |
| Mi opini3n es que si uno paga tarjeta mensual y el servicio no funciona fuera bueno que no pongan tarjetas de l semana para que uno no gaste porgunto el dinero | My opinion is that if someone pays for a monthly card and the service doesn't work, they shouldn't give out weekly cards so you don't spend [unintelligible] the money |
| lamentablemente est3 situaci3n del covic 19 a da3±ado la econom3-a de todos, pero es muy necesario su servicio ya que yo conozco mucha gente que hutizamos y es muy necesario el servicio de metro y bus. deseo que todo se normalice lo antes posible para que no, nos afecte, de antemano agradezco sus servicios y amavilidas, Animo y deseo que pronto regresamos a la normalidad. | Unfortunately this situation with COVID-19 has hurt everyone's finances, but your service is very necessary since I know a lot of us who use it and the metro and bus service is very needed. I hope everything goes back to normal as soon as possible so it doesn't affect us. Thank you in advance for your services and kindness, good luck and I hope we return to normal soon. |
| Espero qu3 pasa mejor esta enfermedad tambi3n usted puede ayudar m3js ruta de buse sea los minor para toda lo pasajero | I hope this illness improves too, you can help more more bus routes even the minor ones for all passengers. |

| Route | 2021 proposed Metrobus service changes |
|----------|---|
| 17 | I dont care about any of those items. Its been Metros plan all along since contracting out the 17 line service to have it eliminated and youre on the way to accomplishing that. |
| 18 | Taking away the 18 bus line would be a huge loss for the Springfield and Burke communities! |
| 22 | Do not alter 22 service through Park Fairfax. |
| 22 | The 22 routes are absolutely essential for my ability to commute. |
| 22 | With the elimination of most of the 16 routes along Columbia Pike, densely populated areas would have little or no service. This is unacceptable. The buses were already quite crowded at commuter times before the pandemic. Columbia Pike is building more and more apartment housing with the idea that people will not have cars. They depend on the 16 buses as there is no Metro to service the area. The elimination of rte 22 from Ballston to Columbia Pike would make it impossible for me to get home using Metro in any reasonable time, requiring bus transfers in addition to metro. The trip would be very long! Many people use my same routes. |
| 23 | Currently only able to get to work in AMs by taking ART 41 line to Clarendon, switching at LEnfant Plaza in order to arrive at DCA airport regularly before 6:45 (7 AM clock in) in past I would take 23 route to Crystal City and catch metro one stop to airport, or walk remaining 3/4 mile to DCA via trails. Alternate was 10 line to Braddock Rd and ride metro to DCA. This no longer works due to later openings of metrorail on weekends. Im dependent on taxi service to get to work Sat/Sun until services restore to pre pandemic levels. |
| 32 | As long as I can get the 32 to and from work I will be fine with the phased service. |
| 34 | The only bus I use (or used pre-pandemic) is 34. The plan would eliminate it. I rely much more on Metro trains. If you also close Grosvenor-Strathmore, Id need to use bus 34 to get to Medical Center and back. |
| 37 | I use Route 37 |
| 39 | Please restore 39 also |
| 59 | These do not seem to be lines that I ride frequently; proposed cuts to line 59 in the detailed plan document are more disruptive for me. |
| 62 | Please bring back weekend 62 service |
| 62 | Like to open Route 62 as soon as possible |
| 62 | Keep.62 takoma bus |
| 62 | This works as long as the 62 does not get cut. |
| 63 | DO NOT GET RID OF THE 63 SERVICE |
| 63 | When in-office work begins again, I am hoping to ride the 63 bus again, or at the very least, take the 62 to the Petworth Metro station. This plan would mean that I would need to drive to work. |
| 70 | Yes but I need the 70 Silver Spring route and Archives after midnight at least till 2:00am. |
| 80 | I commute daily and the 80 bus is vital to getting around |
| 80 | I would hate to see bus access to the kennedy center eliminated (80) |
| 86 | Eliminating route 86 is very bad. I ride it frequently. |
| 87 | Please restore the 87 bus for commuters coming from south Laurel. |
| 96 | I do not like proses elimination of the 96 route to tenleytown. Modifications to 42/43, L2, H2/H4 are not great, but ok. |
| 96 | elimination of the 96 route between Union Station and Tenleytown would be a hardship to me. I use this 2-3 times a week. |
| 97 | Please restore 97 route for weekday peak times. |
| 950 | Some busses that start 6 am on weekends so run same like the weekdays. Example 950 runs from Reston to Herndon and continues to Willie metro on weekday. But on weekends when it starts 6am it doesnt go to Willie it stops at Herndon and you get stuck at Herndon. It should start the Willie same 6am. Thanks. |
| 10A | I depend on the 10A to get from Huntington Station to and from my job. If Metro eliminates the 10A, there will be no viable options. I already have to transfer once. If Metro eliminates the 10A, there seems to be no workable way to get to and from work, given the timing involved in a third transfer. It just doesnt work. The 11Y was a good option, but I dont see any signs that Metro is even thinking of restoring the 11Y. The thing is, the less service Metro provides, the fewer riders it will have. Initiating a downward spiral is not a solution. |
| 10A | This would improve services I currently use - especially the frequency of the 10A within Virginia - so it would help me. |
| 10A, 10E | The proposed future routes eliminate 10E and 10A and lave no direct route from Alexandria Old Town or Del Ray to the Pentagon. This is crucial! Please keep 10E and 10A intact! |
| 10B | Any changes to 10B are unacceptable. I have limited mobility and the next closest route is proposed for elimination. You obviously ahve never had to use Metro buses.. |
| 11Y | My office in DC plans to return to work in the Spring and the 11y is the easiest way for me to get there from Old Town Alexandria. Its faster and less expensive than my metro options. |
| 11Y | If you're gutting rail then bus service should be more restored. Restart 11Y |
| 11Y | Not reopening the 11y makes my commuting much longer and more difficult. |
| 11Y | The 11Y route is not mentioned in this plan. As was explicitly mentioned by MANY riders in the previous survey relating to bus route changes, the 11Y is essential for commuters living in the Mt Vernon/GW Parkway area. |
| 15K | Request restoration of 15K. |

| Route | 2021 proposed Metrobus service changes |
|------------|--|
| 15K | The proposal includes eliminating the 15k " which corresponds to the terrible proposal to close the East Falls Church station. |
| 15K | I don't see the 15k coming back on line or what alternative is proposed. |
| 16 G/H | Phasing out 16G/H will not work for me |
| 16, 7M | right now I ride the 16 line 7-days a week and the 7M 5-days a week and the service is acceptable. |
| 16A | While the 16A is an option for me, the 29G gets ne to the Pentagon in 20 minutes vice the 16A which takes anywhere between 45 to 30 minutes. If both are eliminated as shown in the brochure Tell us What Matters To You, I will have to start driving to work. To think after 40 plus years or using Metrobus I have now drive to work is had to comprehend. |
| 16A, 29G | 29G and 16A are buses that are routed to Pentagon from Little River Turnpike, and Columbia Pike to Pentagon. It is not acceptable to have no bus service to Pentagon to transfer to Metro line to get to work. Either 29G or 16A should be routed for people that to get to the Pentagon. |
| 16A/C/E | The 16A,C,E service is especially important to me because is the only service near me that runs on the holiday. Though I normally take the 16yit does not run holidays, after rush hour, or the weekends. At those times, the only means I have to get to the nearest metro station - and usually to get to work, is the 16ACE. Even under good conditions, the 16ACE does not run very often during rush hour. |
| 16C | Please do not stop 16C service into DC. |
| 16C | Please please do not eliminate 16c |
| 16C | please do not terminate the 16C at the Pentagon under any options or budget proposals. A one seat 16C trip from Columbia Pike (and Greenbrier) to downtown DC cuts 40 minutes off of being forced to disembark at the Pentagon Station and waiting for a metro train. |
| 16C | I would like 16c to continue operating. |
| 16G, 16H | I would be absolutely unable to access my job in DC if you eliminate the 16G and 16H. I know that I will be returning to the office at SOME point. I just dont know when because management is waiting for widespread vaccination. If I cant take the bus to the Metro, I cant get to work -- or to the ballpark, or to the Smithsonian museums, or to other DC attractions -- without paying incredibly high ride-share fees because I dont and cant drive. That means I will have to move out of VA and into DC, which means I will become poorer because I will have to pay two or three times my current rent, I will lose long-standing neighborhood ties including my house of worship, and be disenfranchised as a voter due to DCs lack of statehood. More broadly, those bus lines serve a lot of people of color, not just white commuters to office jobs, so you will be disenfranchising people of color by removing their transit access. So much for your alleged commitment to nondiscrimination. |
| 16L | Not acceptable. a) 16L is always very crowded and it should be running already b) we are already working regularly, we are just not using other bus routes or metro. Ridership is down because you dont offer a valid service, not because we dont need transportation. |
| 16Y | Please do not discontinue the weekday rush hour 16Y bus. This bus line was always packed with people and very popular for residents from Virginia commuting into DC. It was one of the reasons why I bought my house due to the great commute. |
| 16Y | For those who live on Western end of Columbia Pike, the 16Y is the best for commuting to DC. If you eliminate the 16Y there are many, many commuters who will have a more complicated commute. The 16Y is very popular along the Pike and through North Arlington. This bus is always full in both directions. |
| 16Y | 16Y bus elimination hinders quick bus access to West End of city |
| 16Y | I can take a bus to the metro and occasionally do depending on the time of my commute. The fastest commute for me is the 16Y and I use that bus if I commute to the office during its operating hours. I would like to see 16Y service restored. |
| 16Y | I'm planning on returning to the office by Aug/2021; the 16Y is my fastest and convenient bus route to go to the city. |
| 16Y | It isnt clear in the proposal when commuter lines will be added back. The most important bus for me is the 16Y and it doesn't appear in the detailed plan. |
| 16Y | I need the 16y |
| 16Y | This depends on when my office begins to encourage workers to come in again. If I'm understanding the plan correctly though, the 16Y would be shut down at least through 2022. Taking this bus to and from work essentially cuts my commute time in half (versus metro rail). It's a major advantage of living where I do. If this is paired with metro rail cuts, it would take away any convenience of me living near my workplace since my commute would likely take up over two hours of my day. I would gladly pay an increased fee to ride the metro buses and rail rather than lose the service. |
| 16Y | The 16Y bus has been a godsend for the morning commute. It is always busy and such a direct route to Downtown. I am sure it eases gridlock. please keep it. |
| 16Y, 16X/C | 16 lines, particularly express lines like 16y, 16x/c are huge for my commute. Really need the legs into DC to Farragut and Federal Triangle. |
| 17, 18 | The 17 and 18 lines are the only way for some Burke residents to get into the city. The drastic cuts have already effected our community and the VRE is not a financial option for many in this region. |
| 17G | The 17G is unaffected by the above changes from what I can tell. |
| 17G | There is no option for where I get on and off the 17G |
| 17G | At the end of 2021, I will retire from my employment and cease to ride the 17G. However, I cannot speak for other commuters in the Twinbrook Road-Pickett Road neighborhood. Before, we could walk our to Braddock, but with no 17s on Braddock, that is not an option. Perhaps there could be negotiations with Fairfax Connector. |
| 17G | I take the 17G so this would not work. However, if this was a temporary plan and Metro will restore 17G in 2023, I think it would be OK. |
| 17G | The plan eliminates the 17G. There are no buses serving Braddock road west of Lake Braddock Rd. I will literally have to buy a second car and join the traffic on 395 each morning and evening. |

| Route | 2021 proposed Metrobus service changes |
|------------------|---|
| 17G/H/K | Reinstate the 17K; keep the 17H and G. COVID-19 is the reason for the decrease in ridership. Our neighborhood needs these bus services for our daily commute. Increase fares if you must, but return/keep our services at pre-COVID levels. |
| 17G/H/K | It may work, but I prefer that the 17G route continue to operate as it currently does. |
| 17H | NO, the 17H is my bus. Please do not eliminate it!! |
| 17H, 17K | Restore 17 H and 17K |
| 17K | The 17K doesnt seem to be part of any of these plans. The 17k is pretty much the only affordable and timely travel option I had prepandemic. By eliminating it, you make my entire neighborhood unlivable for commuters. |
| 17K/H | Temporary adjustments to the 17K/H lines is acceptable, but not permanent changes. This service is critical to commuters in Kings Park West VA. |
| 17K/L | The 17K/L line needs to be restored and kept. Otherwise people in Kings Park West who commute into DC will be forced onto the unaffordable VRE or they will have to drive to the Vienna Metro and use the decreased Metro service. You can't cut all the bus lines out of a neighborhood. |
| 18G | Would like to see the 18G restored (even with limited service times) and the 18P maintained (even with limited service times). |
| 18G | Please dont eliminate the 18G route. Many of us bought our homes in the Springfield area based on having this service available to the Pentagon. |
| 18G | I ride the 18G and need a way to get home |
| 18H | You planning on bringing back the 18H, or are riders still being forced to go up to 2 miles one way to ride 18P? |
| 18H | I would like to see 18H restored |
| 18H, 1 | I accept that my normal 18H has low ridership and is currently suspended. Eliminating the 18P is an unacceptable alternative. Despite the bus - pre COVID - being almost full by the time I can get on it near my home, it goes directly to the Pentagon. the proposed alternative of the FFX 310, which only goes to Franconia Springfield would add over 45 minutes to my commute time. |
| 18P | It depends upon how route 18P would be affected, and whether or not COVID restrictions are lifted in such a way that I was required to reduce teleworking. |
| 18P | Does not seem to apply to 18p |
| 18P | In the two years Ive lived in Burke/Springfield, WMATA has cut the following bus lines in my area: 18S, 18R, 18G, 18H. Only the 18P remains. Please do not cut the 18 bus line because I depend on it to get to the Pentagon. Taking a Fairfax Connector bus to the Franconia-Springfield Metro would increase my commute significantly. There are individuals such as myself in the Burke/Springfield area who do not drive to the Pentagon/have a car. They work in West Springfield/Burke such as the Rolling Valley shopping mall. Without access to the 18P, there would be no way to get to work. |
| 18P | 18P must be fully operational |
| 18P | 18P is the main line to get military, Govt workers, and those that support us into the Pentagon and farther into DC. There are no alternatives for us in Burke Center, Burke, and Fairfax Station to this route. Its on a snow emergency route and is critical for that. With fed and Govt workers forced to telework, of course ridership is down, but only until we have to go back in. |
| 18P | This doesnt help with the 18P. To eliminate the 18P would leave an entire community without a single bus running through it. If you dont have a car, youre stuck. The 18P is rush hour only am/pm during the week. Allow this one lifeline to Rolling Valley Mall, the Pentagon, elsewhere along its route to remain - it would be a total disservice to this community and riders dependent on this bus otherwise. |
| 18P | The loss of the 18p line would be absolutely devastating for Burke military families and others who work everyday in DC |
| 18P | DO NOT ELIMINATE 18P. THERE IS LITERALLY NO OTHER SERVICE NEARBY. |
| 1A, 1B | I need EFC to stay open. If it does not stay open, I will need to take the 1A or 1B to Ballston, so I will need that line to run as often as possible. |
| 1A, 1C | Yes..please restore the schedule for the 1A and 1C |
| 1A, 3A | Unsure what changes this involves for 3A and 1AAlready very limited every 39 min and once hourOnly use on work days Monday- Friday |
| 1C, 2B | Need continued 1c and 2b service every day |
| 1C, 2B | Need more service 1c and 2b |
| 1C, 2B | 1c and 2b |
| 1C, 2B | 1c and 2b |
| 1C, 2B, 16L, 26A | 1c 2b 26a 16l |
| 21A | Bring back 21A between Alexandria VA and Pentagon Transit. |

| Route | 2021 proposed Metrobus service changes |
|----------------------|--|
| 21A, 8Z | *I strongly oppose eliminating 21A in Virginia and the changes to 8Z. People in western Alexandria have few transit options other than those bus routes to get downtown. Further, you say you are closing Van Dorn rail station which further hurts connectivity. Anyone with a car in western Alexandria is going to say goodbye to Metro and switch to driving. If you insist on eliminating those routes, at least set up a park and ride station at landmark mall like was done in the summer of 2019 for the Blue and yellow line closure to get people to the pentagon. *The bus cutbacks will make it difficult for rail ridership to recover because so many commuters use buses to get to and from metro stations. *The PDF with the bus changes is confusing.. For example, I only learned about 21A being eliminated by seeing a map of 8Z which said 21 would be cut. No ridership data is available for either 21 or 8Z. The packet appears to skip a number of lines being eliminated. Another confusion is how some service would resume and then be eliminated in 2022. Metro needs to stop playing PR games and tell people in plain English your bus route will forever be eliminated under this proposal. |
| 21A/D | If both Van Dorn and 21A/D close/cease operations, we are essentially located in a public transportation desert. |
| 21A/D | I and everyone else who relied on the 21A and 21D rush-hour bus service to and from West End Alexandria and DC need Metro to restore service to these bus lines. Period. End of story. Stop looking for service cuts or continuation of existing service cuts from the communities whose residents can least afford ride-share services or driving their own vehicles for their daily transportation. I dont own a vehicle at all, because when I moved to West End Alexandria, I had 2 Metro buses and subway service at Van Dorn Metro to get me to & from DC. Now I and plenty of my public transportation-taking neighbors have none of these. |
| 21C, 8Z | I can't tell if the proposed 21c will still stop at 5101 Duke and if I have to change busses to get to the Pentagon. Please bring back the 8z, it was always full and was a direct shot to and from the Pentagon. |
| 21D | I'm not seeing any information on route 21D so I can't comment. |
| 22A, 22F | I want to comment on the proposed 2022 changes on the 22A/22F route that would leave South Fairlington without any bus service whatsoever and would force all commuters onto area roadways. There is an implied contract when permanent bus stations are erected and tax dollars accepted that infrastructure will be maintained. |
| 22A/C | I normally ride 22A/C to Ballston Metro. Route is proposed for elimination. Best alternative is 4A/B to Rosslyn Metro, but that route is also proposed for elimination. Metro rail ridership cannot be sustained if Metrobus cant get passengers to stations. |
| 22A/C/F | Once I begin commuting to work again, I cant reach a Metrorail station without regular 22A, C, or F bus service. As I understand the current proposal service on those routes would not be restored. |
| 22A/C/F, 7A/F | I am not currently using Metrobus, but I am hoping to use it again frequently as things begin to open up again, especially the 22A/C/F and the 7A/F lines. |
| 22C | Please restore 22C |
| 22F | 22F headways could be better at 20 min rather than 30 min |
| 25B | I think eliminating the 25B is a bad idea - I have relied on this bus for almost 20 years. |
| 28A | I want 28 A come every 15 minutes and want the buses to start at 4:00A.M |
| 28A | 28 a is very important because I go to work and I want earlier 28a buses |
| 28A | I want 28A buses to work at 4:00 A.M instead 5:00a.m |
| 29K, 21A, 8Z | not sure what plan is for 29k/n because not mentioned, but 21a/8z is fine. |
| 29W | The 29W bus line is the only one that serves my neighborhood within a reasonable distance. |
| 29W | Please bring back the 29W and other commuter buses! Also, please enforce masks on buses! |
| 29W | Need to know more about the 29w replacement. This is a critical part of commuting from this neighborhood and faulty data last year jeopardized this line |
| 29W | This plan does not include restoring the 29W, a bus that many commuters rely on to get to DC. There are currently no other alternative options and no new alternatives being devised. |
| 29W/835 | Please keep the 29W (now 835) bus- it is critical for residents commuting to DC! |
| 2A | More 2A buses would be nice with the proposed metro closures. Particularly around 4 to 6 pm M-F |
| 2A | The 2A is the only option I and many others have to access Ballston and East Falls Church. This would make it much harder for people to get to stations and would overcrowd already limited parking (especially if certain stations that have parking â€” like EFC - are closed). |
| 2A | It would be really helpful if the 2A bus ran every 15 minutes during rush hour starting in September. |
| 2A | No change in service level is listed for the 2A route so Metro does not appear to plan to expand coverage to support commuter and school-based travel for this route. |
| 2A | Increase frequency of the 2A route along Washington Blvd from EFC Metro to Ballston IF the EFC Metro is closed. |
| 2A | I would like to see the 2A line have full 100% pre-covid19 service to East Falls Church. The lee highway line is desperately needed because there isnt anything between Hollywood Road and Dunn Loring. Its the only bus. |
| 2A, 2B | Need 2a. 2b some what |
| 2A, 3A, 17, 22A, 23A | These cuts would specifically hurt minorities, those with children, elderly and college students. I have personal familiarity with the bus lines I have listed below. 2A elimination in 2022 will hurt disabled people and those with children. 3A elimination in 2022 will hurt college students, elderly and those with children. 4B would hurt me, as an elderly person. Route 17 elimination will hurt low-income. 22A elimination will be a problem. 23A elimination will hurt elderly and people with children. 25B elimination will hurt college students going to NOVA. |

| Route | 2021 proposed Metrobus service changes |
|----------------|---|
| 30, D2, G2 | Please restore weekend service on the 30 line. The d2 and g2 lines are not needed. |
| 30B | bring back the b30, i want to go to arundel mills. daddy, ride. |
| 30N, 30S | You want to eliminate 30N and 30S and to change the routing of 96 and H2 buses which takes them away from my bus stop. This will present a hardship for me, a senior who relies on the buses. |
| 30N, 32 | first there is only 2 buses who go from pennsavanyia ave on to Naylor rd. one you already shut down (30N) now you limiting the other (32) the buses already run not on schedule. |
| 30N/S | You are cancelling the bus route I need to get from my home to my office -- 30N/S |
| 30N/S | The 30N/S are the only busses that can get me to the redline or anywhere downtown. Not restoring weekend service to this route would have a negative effect on many people, including myself. |
| 31, 33, E6, M4 | If the expansion coverage for school travel includes pre-pandemic schedules for buses M4, E6, 31, and 33, then yes, the plan will work for our family. |
| 32, 92 | Please, do not decrease service on the 92 or 32, both buses take me to the metro stations to get to work. |
| 38 B, 3Y, 4B | DO NOT REDUCE OR CUT SERVICE ON 38B, 4B, 3Y. Metros continuing to cut service or get rid of routes is unacceptable. NOT EVERYONE DRIVES AND WE DEPEND ON METRO BUS!!!! |
| 38B | The 38B is a major service to downtown DC. Eliminating it would harm residents of Arlington. |
| 38B | Keep Clarendon, Virginia Square, and 38B line open and have ways for people to get to Bethesda MD from Washington DC. |
| 38B | This was too complicated for me to figure out.If you plan on shutting down a chunk of Orange Line stations, or making the orange line much less convenient, many of us will switch to the buses. Prepandemic it was already impossible to get on one of the most convenient buses from my home to my office due to crowds. The 38B will become a lifeline for many of us in Arlington. Dont cut that if you close most of the orange line. |
| 38B | The bus routes are a lifeline for when their is a failure on rail. 38B saved my bacon many a time when you could not provide rail service for me. Youve cut that route, now you are proposing closing the orange line stops in Arlington. You do realize the goal is to attract customers, right? |
| 38B | The 38B is necessary as an alternative to Metro when it is not operating, and for providing service to Georgetown with no transfers (from Ballston). |
| 38B | Please restore 38B! |
| 38B | Are you planning to restore the 38B or not? If youre cutting subway service along the Orange/Silver line, thats my fallback for getting in and out of the city. |
| 38B | This plan appears to eliminate the 38B route, which is the one I use. This would be particularly hard if metrorail service is reduced and/or the Clarendon metro station is closed. |
| 38B | The 38B is vital whenever there are issues or closures on the orange/silver line, and for getting to Georgetown easily. Eliminating that line remove the closest bus access to DC from the Ballston-Rosslyn corridor. |
| 38B | 38B is an essential service for connecting to Georgetown and providing access to transit. |
| 38B | Im not familiar with these other bus lines. I live on the Wisconsin Ave corridor and use the bus to get to Foggy Bottom for Orange Line service to Arlington. My main concern is that if you close the Clarendon and Virginia Sq stations (closest to my place of employment) AND you shut down or reduce service on the 38B bus, then I have no way of getting to work via public transportation. If you reduce Metro service or close a station, you need to continue with the bus line that services that area. Its inconceivable that youre considering cutting both. |
| 38B | I dont ride the buses frequently enough to fairly weigh in. But whatever metro does, KEEP THE 38B; its a lifeline in and out of DC-Arlington!! |
| 38B | Eliminations bus lines like 38B in the same area where you're closing multiple stations (VA Square and Clarendon) leaves people with no reasonable public transit options. |
| 38B | Please do not stop route 38B - it is essential to many people for work and other reasons, especially those of us who do not have cars. And especially if you are going to close metro stations along the 38B route. |
| 38B | Creo que el 38B es muy importante ya que es el Único bus que nos conecta con Arlington y DC para quienes vivimos en Arlington y trabajamos en DC y salimos tarde del trabajo ya que si el metro deja de trabajar a las 9pm y eliminan la ruta del 38B nos quedaríamos sin transporte. Gracias |
| 38B | 38B is my primary commute choice because it is more reliable and comfortable than the Orange Crush on the subway. If 38B is gone I would probably drive rather than take subway, especially if stations on Orange line are closed |
| 38B | It appears the bus I ride out often, 38B, would be eliminated. This bus is a good alternative to metro rail, serves Georgetown (along M ST), in a way that metro rail does not. |
| 38B | The HB Woodlawn school is on the 38Bs route and my daughter rides the bus to school. As a family we ride the 38B to avoid parking in Clarendon and Rosslyn, where parking is scarce. Ive noticed that the route seems to serve workers -- Im guessing English is not their first language -- who are coming from VA to serve homes in Georgetown. |
| 38B | We need the 38B! |
| 38B | If you close Metro stations at Clarendon and Virginia Sq, the 38 B line could fill the gap. |
| 38B | Since the 38B is the bus line I ride the most, I dont support this plan! |
| 38B | Until I am vaccinated, I commute by walking instead of taking the 38B |
| 38B | Alternative options to the 38b proposed termination are not practical for many people, certainly the elderly that cannot walk long distances since many bus routes fill the gap between proposed bus route termination or reduction. |
| 38B, 2A, 23 | Im only interested at this point with continuation of 38B, 2A, 23 Tysons Corner, and other buses going through Ballston hub. |
| 3A | I would need more information about the proposal to replace the 3A route. |

| Route | 2021 proposed Metrobus service changes |
|-----------|--|
| 3A | I think the 3A should be running longer than it is there are people like me that get off work later and need to get home |
| 3A | Metro really needs to think who really needs the bus service. I have a car and it's optional, except when it's out of service. It's those folks who don't have cars. For example the public and low income housing routes should be mandatory. There is no way to get to Annandale to a metro station? Metro bus is there life line. Our roommate moved because the elimination of the 3A. |
| 3Y | I ride the 3Y to DC for a Federal job. I would ride it 2x a week if we go back to work in person. |
| 3Y | If you bring back the 3Y in May, I would support this. I still cant believe youd consider keeping the 3Y out of business. |
| 3Y | 3y can stay weekday-only, but please keep it! |
| 3Y | When pandemic is more under control, wed feel much safer taking a bus with better ventilation and open windows. Busses will be critical to reducing cars on the road. I am very disappointed and will be extremely inconvenienced if the 3y permanently disappears. This change will add at least an extra 30-40 minutes to commuting times. |
| 3Y | If it includes restarting the 3Y bus then yes it works. if it doesnt then no it doesnt/ |
| 3Y | The 3Y, which is the bus I take to work, does not look like it is being considered to reopen. That said, I also have a metro station not too far from my place that I use now, since the bus no longer runs. |
| 42, 43 | You need to expand Bus 42 service at Dupont Circle for the many seniors as well as embassy employees. Bus 42 was significantly cut in August, and Bus 43 service--which does not stop at Dupont Circle, was expanded. Why in the middle of the pandemic? During the pandemic both 42 and 43 should be making all stops. |
| 42, 43 | I use the 42/43 to get to work. Neighbors/ friends depend on 62/63 to get kids to school |
| 42/43, L2 | Reduced rush hour service on the red line will lead to significant crowding for inbound passengers entering at Dupont Circle. If you also take away segments of the 42/43 lines that can also get you downtown (Metro Center, Gallery Place), this will exacerbate the situation. Also, removing the L2 and at the same time eliminating the Cleveland Park station on the red line would significantly reduce ability to reach Cleveland Park from the Dupont Circle/Kalorama neighborhoods. We rely on having at least one of these modes to reach the library, synagogue, etc. |
| 4A | I do not have any timeline to return to the office, but when I do I would ride the 4A bus. No other routes are feasible. |
| 4A | Subways have been running all over the world for decades. The problems with Metro are with leadership, and consumers - those without cars, including people with disabilities and seniors - are the ones who suffer |
| 4A | 4A bus seems to have disappeared. My office will return to the office in September 2021, and 4A was my main commute. 4B would be my backup but if that disappears, I will be unlikely to commute using metro at all. |
| 4B, 38B | The two bus lines i use would be eliminated (38B and 4B) |
| 53A/B | The 53A/B is the most convenient for getting from the Woodmont and Cherrydale neighborhoods to the closest metro stations. |
| 62, 63 | Protect lines 62/63 |
| 62, 63 | My concern is for the route 62-63. In our neighborhood, we have been without a weekend service for over a year. with all that is happening, people who were taking the bus are home now. Those who have been working through all of this had to find other means than whats right outside. It was inconvenient, and I would like for the bus to remain. Its my livelihood. Its easy. If not, ill have to walk longer to get a bus. |
| 62, 63 | Dont eliminate the 62, 63 |
| 62, 63 | I rely on the 62/63 buses!!!! |
| 62, 63 | This is a very bad service plan. I am speaking on behalf of hundreds of patrons of the 62, 63 bus line. Disbanding this line as things begin to open up is a terrible idea. This bus line is the most direct route from my area to downtown and my place of work. If individuals are expected to go to work in 2022, we should have proper transportation. This plan appears to be made in haste without considering the hundreds of employees who work and go to school and have other needs downtown. Please reconsider this plan, with respect to the 62, 63 bus line immediately. |
| 62, 63 | Dont shut down the 62/63. The neighborgood is expanding at a high rate. We need public transportation to alleviate increases traffic and traffic-related incidents from cars. Also, 100s of kids depend on that line to get to and from school! |
| 62, 63 | Need the 62/63 bus ideally all buses should be 63 |
| 62, 63 | Your proposal eliminates the line that serves my residence and the neighborhoods of Takoma, Brightwood, Manor Park, Petworth, Park View and others. I oppose this in the strongest possible terms. Our neighborhood since between two metro stations - Takoma and Petworth - but is a mile or more from both. The 62 line serves a vital role in providing transit connectivity between these stations as well as to businesses in Takoma, Kennedy St, Georgia Ave and others. Meanwhile, the 63 provides a crucial one-seat ride from our neighborhoods to downtown DC. If anything, the service should be expanded. The idea of eliminating a service line with no alternative in a transit-deprived part of the city raises significant equity and accommodation issues. I could not oppose this more strongly. |
| 62, 63 | My common relates to the elimination of the 62/63 bus line. I am totally against the removal of this line. The proposed rerouting of the 70 bus is not acceptable. I live near the 5th and Peabody stop. School kids ride this bus as there are several schools along 5th St. I am a senior citizen and having to walk extra blocks to get too and from either Takoma or Petworth stations is not acceptable. The 70 bus is a crowded bus under normal circumstances, having to ride an already crowded but is not acceptable. The proposed changes seem discriminatory toward minorities who primarily ride these buses. |
| 62, 63 | How lame that you only list the positive and we have to look up the information for cuts; youre proposing completely eliminating the 62 and 63 line and I am completely against that. |

| Route | 2021 proposed Metrobus service changes |
|--------------|---|
| 62, 63 | I have been greatly affected by the 62/63 not running on the weekends. As a handicap senior citizen I cannot often complete my shopping and other things on the weekday. Look forward to school kids returning, because that would mean increased bus service. |
| 62/63 | Please keep the 62/63 bus lines for 5th st. Kids use that to get to school. We use it to get to the metro stations and downtown. |
| 62/63 | I would like to see additional service on the 62/63 route as I rely upon that route to get to work and to get my kids to and from school. |
| 62/63, F6 | PLEASE DO NOT SHUT DOWN the 62/63 AND F6 Metrobuses and routes. I use the 62/63 and F6 on a regular basis to go to/from work and to run errands, do shopping, and go to appointments. The 62/63 serves the Petworth, Upper Petworth, and Fort Totten neighborhoods. There are many people who use public transportation in these neighborhoods, especially the elderly, K-12 students, and Latinx immigrants, who must get to work, school, and appointments. Additionally, without the 62/63, we will be cut off from Takoma Park, where we do shopping. Also, please note that K-12 students in schools along the 62/63 route use this bus on weekdays to get to and from school. Finally, the F6 is a great bus route that connects metro stations, from New Carrollton to Fort Totten. I use this bus regularly from UMD to Fort Totten. |
| 70, 79 | The bus routes 70 and 79 are not impacted that I use on my commute. |
| 7A, 25B, 28A | I only take 28A, 25B and 7A. I want them to come the buses at 4:00A.M |
| 7A, 7Y | anticipating return to office in May 2021, so will want bus routes 7A and 7Y operating at normal 2019 capacity again. |
| 7C, 7Y | I use the 7Y and 7C buses daily during normal commuting times; I would have a very difficult commute if the 7C did not run at all. |
| 7M | I use the 7M route on a daily basis for periodic meetings between Pentagon and Mark Center |
| 7Y | Keep the 7Y |
| 7Y | I ride 7Y. Please do not discontinue. |
| 7Y | it looks like there are NO Metro Buses going into DC under this new proposal? why? Some of us are not close to a metro and would prefer taking the bus, like the 7Y that goes downtown during morning and evening rush hour. Versus getting off at the pentagon or pentagon city then taking the metro which adds time to the commute especially if trains will only be running every 30 minutes. Boy this all stinks. I might as well go back to austin texas where their public transportation was pretty abysmal but they had a free trolley downtown and good bus service in most of the city and MUCH cheaper than METRO. This is pretty disgusting for the Nations Capital and one of the highest per capita places to live with one of the MOST expensive public transportation systems and then see if fall apart and not be able to serve customers properly. Then METRO should let the ARLington ART bus and, Alexandria DASH buses to go into the city and back during rush hour so employees who work downtown can get there by bus if they dont live in walking distance to a metro. |
| 7Y | Please keep Metrobus in operation. My concern is that I wouldn't be able to ride 7Y to work. |
| 7Y | The most important thing for me is that the 7Y continue to go downtown and serve the federal buildings along Constitution Ave NW. |
| 7Y, 16Y | Pre-pandemic, I took the 16Y to work each day, and I plan to do the same once my office re-opens. This route was always packed, with standing room only.I sometimes took the 7Y, which is also planned for elimination. |
| 80, P6, G8 | I would need P6, 80, or G8 for my daily commute. Not sure if those are in the plan or not, having trouble finding details |
| 83, 86 | I use busses COLLEGE PARK LINE " ROUTES 83, 86 . I would be okay with consolidating the lines but the consolidated line has to maintain or preserve coverage to the following stops College Park Metro Stop on the west side of the station, RI Avenue service from Greenbelt RD up to the shopping center(s) Moms Organic and Home Depot, and integrate stop to Greenbelt metro station. |
| 83, F4 | The 83 and F4 are essential lines that go through Hyattsville that connect to the Metro. |
| 83/86 | I need either the 83/86 line to stay or the college park station to stay open. If either, or both, of these go away, I will not be able to reliably get to work and home |
| 8S, 8W | You need to reinstate the 8W, 8S buses. When you stopped those lines in Alexandria, it forced me to take AT5 which added 40 minutes to my commute into D.C. for my job. Also, when is the King Street bus bay going to be finished? I usually get there at 6:00 pm on weekdays and the AT5 doesn't show up until 6:45pm. Also, we need more metro police patrolling the gallery place- Chinatown and king street metro. I have seen drug paraphernalia in those stations. |
| 8W, 8Z | Full service should return when schools are back in session at the very latest. Additionally, 8W/8Z service should be increased by at least once bus per hour, especially in the evening rush hour.Having regular metro bus service is one of the reasons I live in the part of Alexandria that I do. Pre-pandemic, the buses were often full if not standing room only. |
| 8W/Z/S | The 8W/8Z/8S line MUST be restored at the earliest possible convenience with continued 7Y service (which should be restored to going over the Memorial Bridge rather than Roosevelt). It is possible to combine the 8Z/8W/8S into one route. |
| 8Z | The above link doesnt allow me to see if the closest line to my house (8z) will be restored. Without that bus line, my public transit options are extremely limited. |
| 8Z | Please keep the 8z and the REX BUSES |
| 8Z | While, I dont know when I will return to the office, the continued lack of service on the 8Z, makes it difficult for me to make plans to return. The lack of service in 2022, means I may never return to Metro. |
| 8Z, 21A | Note there are pages missing from the document, but I like the consolidation of the 8Z & 21A as a clever measure. Would be nice to know what the intended level of service is (that page is missing). The proposed 7A change is an improvement for me. |
| 90, 92, R4 | Please increase frequency of service of 90, 92 and also R4. R4 currently comes only every hour and I often end up waiting a very long time in the cold just to wait for that bus. |
| 96, 97 | I understand that metro is proposing to scale back the frequency of buses on the 96/97 routes. As it is, I need to wait 20-30 minutes for a bus, and sometimes buses never arrive. Reducing the frequency of buses on this route would severely impact my commute. |

| Route | 2021 proposed Metrobus service changes |
|------------------------|--|
| 96, L2 | The 96 bus will be an important part of my commute as I return to in-person work (and is also useful for east-west travel for non-work purposes). The L2 line is important for personal errands and appointments. |
| A4 | The A4 line will be needed for school base travel, and late night service for the workforce, and kids who live in my neighborhood. |
| A4 | As I mentioned before, I use the Green and maybe the Yellow lines when I ride the train, as for the Busses well, the only one that I May ride is the A4 that runs from MLK Fr. SE to SW. but I will say this, that Red line train seems to always have problems, instead of putting a bandage on the wound, ttry finding the root cause of the problems, close down and reopair the problem than reopen. |
| A4 | On my A4 bus route, there will be a lot of kids who will need the expanded coverage to get to school on time. It will be the same on a lot of these routes |
| A9 | as long as A9 bus is back in service during rush hours |
| B2 | I think its interesting that its easy to read here about the proposed changes to rail service, but for busses, I need to download a 166-page document. If I didnt know about Ctrl+F, that would be really frustrating and I may have given up on finding my bus line. But I did find it. Cutting B2 service would not only be detrimental to students trying to get to school and back, but the optics are REALLY BAD. It looks like youre trying to keep Ward 8 folks in Ward 8, and anecdotally, this is how they feel. |
| B2, D4 | The phased in 2021 schedule is fine, however the proposed 2022 schedule is proposing to eliminate the D4 (Ivy City/McPherson Square) line which cuts off those who work/travel/live along that route, leaving them with little or no options. The closest rail station is Union Station or Stadium Armory and it appears there is talk of reducing or eliminating part of the B2 line that would take those closest to that line to Stadium Armory station |
| B21, B22, C26 | This does not address the bus line B21 or B22 that I entered at all. If you take away the Bowie buses no service will come out to Bowie at all. You comments that other buses at the Park and Ride cover Bowie or not true. YourProposal to have the C 26 come around to Gateway Plaza to serve the park-and-ride in Bowie. Does not address the fact that no buses will be going to new Carrollton Metro Station from the Park and ride. Why can't the larges town in Prince George's County have at least one boss that would make the length of the town and circle back to new Carrollton Metro Station Bay least at rush hour times or maybe just in the morning or just the afternoon. The proposal for the new C 26 that would also go back to Largo metro station is absurds that station it's not the closest station to bowie city. We got also the fourth largest city in the state of Maryland is absurd to have no bus service to our growing city. In the next few years it will be at least 500,000 more homes in an expanded area of the city. |
| B27 | I would need to know how these changes would effect the B27 which already has too limited service. |
| B30 | Need B30 bus |
| C28 | I am already stuck in Bowie with no access to bus service. The C28 was already super limited service and now it is gone. There are a number of folks who would have benefitted from that line if service had been extended throughout the day (as opposed to the tragic three hours in the morning and then three hours in the afternoon it was offered). Cutting bus service harms certain DMV residents and makes it more expensive and time-consuming for them to figure out how to get to where they need to go. |
| C8, Z2 | where i live only two buses that come near me is C8 and Z2 and they close early and i always have to get on multiple buses so it would be more helpful if the areas where there are not many buses can run longer and maybe even add more buses there |
| D2 | The D2 would affect me but I wonder if service on D1 could suffice |
| D2 | THANK YOU for including the D2 in reinstating - I feel trapped in my home on the weekends without a way to travel by bus out of the Glover Park neighborhood (requires 20 min walk to closest bus) |
| D2 | Thank for working to put that together - perhaps there's a way we could better announce those changes. The change to the D2 schedule took some time for me to learn about - perhaps it could be included in the Washington Post's DMV covid update? |
| D2 | Restoring weekend D2 service sounds great! |
| D2, 30N, 30S | D1 - eases congested busses during rush hours - D1 along with coinciding routes is standing room only at many times. Having this limited service route is necessary.30N, 30S - standing room only during rush hours - Cannot combine this with other routes! Frequently at these times busses do not stop due to overcrowding.D2 - Necessary for access from Glover Park & Georgetown for access to Metro lines. |
| D2, D6 | Keep D6 and D2 service at the pre-pandemic level at least. D6 service need increase. |
| D2, D6 | Pleased to see addition of week-end services for D-2 starting in March, but not relevant to my concerns regarding long-term plans for D-6 line. |
| D2, D6, G2 | Maybe there will be qustions later, but cutting D2, D6, and G2 turns already transit-poor neighborhoods (Georgetown, Glover Park, Burletih) into complete transit deserts. This also basically eliminates ALL public transit from the Districts largest private employer, Georgetown University. Unacceptable. |
| D2, G2 | The addition of weekend service on the G2 and D2 would greatly benefit me. |
| D3, N3 | More buses are better. We need the D3 and the N3 routes back, among others. |
| D31/32/33 | PLEASE DO NOT eliminate the school bus routes D31, 32, 33!! These are imperative for thousands of kids to get to Deal and Wilson. What in the world are you thinking by getting rid of them. Please dont!!! |
| D4, 42, 63, 64, S2, X2 | Will need D4 (Deal bus) 63, 64, X2, S2, 42 |
| D4, D8 | You cannot cut the Trinidad neighborhood off from easy metro access by eliminating the D4 or D8 - those bus lines are already so unreliable they need to be improved not eliminated. Otherwise you're forcing women to walk more than a mile from a metro station on poorly lit streets to get home. |
| D4, D8 | Where is the D4 & D8 lines? Are you all eliminating them & if so what would the Ivy-City, Trinidad, Galludet community do about getting around? |

| Route | 2021 proposed Metrobus service changes |
|------------|--|
| D4, D8 | You are proposing to eliminate the D8 & D4 buses. They run through Trinidad and would leave many people without transportation. Prior to the pandemic I took the bus every day to and from my office. |
| D4, D8, X2 | I am not currently riding the bus because I work from home due to the pandemic. But when I return to work, I will take the bus again (D4, D8, and X2) |
| D5 | The D5 is an important link between the far west neighborhoods and downtown and I ride it whenever possible to go to work downtown. Please restore the D5 service! |
| D5 | We live on the 4500 block of MacArthur across from the bus stop at MacArthur and Elliott. I take the D6 and used to take the D5 to and from work getting off at the K and 19 stop. My Hardy teen takes the D6 to and from school. Next year she will be at Wilson and will take the D6 to Arizona Ave or Wisconsin Ave to catch a bus to Tenley. On the weekends we use the D6 to get downtown to restaurants, shops, sporting events and concerts. |
| D5, D6 | I am very concerned about when the D5 will come back into service. I am also very concerned about the proposed cutting of the D6 line for January-June 2022. |
| D5, D6 | If schools are back in the fall - especially Georgetown University - I will need to ride the D6 or D5 to get to work daily and the current service level will not be enough. |
| D5, D6 | I need a D5 or D6 service to get me into work |
| D5, D6 | I live at MacArthur and Q streets and the D6/D5 lines are our only options for mass transit. |
| D5, D6 | I live in Foxhall village and the only 2 bus lines that served my area, the D5 and D6 are both disappearing. I understand that during the pandemic ridership fell. But if all adults will be vaccinated by the end of May as promised by the Biden administration and in-person work resumes, we will need a way to get downtown. One of these two bus lines. |
| D5, D6 | The phased service increase plan apparently does not include the D5 or D6 bus routes, which are the only two bus routes accessible to me. These are the routes I use to attend meetings at Georgetown University, appointments at my doctor at Georgetown Hospital, and appointments at my orthopedic doctor on 18th St. |
| D5, D6 | I fear that eliminating D5 and D6 is shutting off a part of DC which has only access to buses and no rail transportation. It is unthinkable that there would be no public transportation west of Georgetown. Pre pandemic my husband and I both used these services to get to work or go downtown on weekends. |
| D5, D6 | My problem is the removal of the D6 line, which is essential for patients and staff to reach Sibley and Georgetown Hospitals and to return home. It is also very convenient to reach GW Hospital and places like the Pan American Health Organization / World Health Organization. For thousands of people this is the only public transportation available now that the D5 is defunct. We depend on this bus. Some of our seniors are too old to drive and they don't have enough money to pay taxis or alternate private means. To remove the D6 would jeopardize all these people... It seems SO WRONG! |
| D5, D6, M4 | Not clear to me how these changes affect the service in my neighborhood -- D5, D6, and M4 |
| D5, D6, M4 | PLEASE do not cut M4/D6/D5 bus lines. These lines are critical for access to Sibley Hospital and access throughout the city. Perhaps scale back the frequency of these buses but DO NOT cut them entirely. I commute on these for work daily and the traffic on MacArthur Blvd is bad enough, without the extra cars on the road. These are also essential for children to commute to the only HS and MS in the Palisades. |
| D5, M4 | I understand there is a plan to eliminate the D6 and M4. I, and my entire family, use both of these routes regularly and it would be very challenging if they were eliminated. We use the M4 to get to the metro and our children have taken the D6 to school. |
| D6 | Im concerned with the proposed elimination of the D6 line. Im currently working from home, but when my office re-opens I frequently use the line to get to work. |
| D6 | We were told D6 will be cut. This will not work for us. |
| D6 | My children relied on D6 to get to Hardy Middle School and M4 to get to Wilson. At 2-3 miles away, it is too far to walk. If service is discontinued, will the city provide school bus service? |
| D6 | The phased approach makes sense b/c of COVID. The plan however excludes D6, which is totally unacceptable. |
| D6 | D6 is critical for riders to Georgetown University Hospital, Duke Ellington School for the Arts, Hardy Middle School, Wilson High School, BASIS DC and is the only bus line near our neighborhood (Foxhall Village) and there is no metro near us. Ridership has been down during Covid because of covid. As people become vaccinated and schools move to in person, ridership will definitely increase. It is critical to keep the D6. |
| D6 | I heard they were thinking of eliminating the D6 personally I take it school although I am in walking distance this works better for me some of my classmates and neighbors have no other way of getting to school/work besides this bus. |
| D6 | The D-6 bus is indispensable to so many who live in the Palisades neighborhood - from hospital workers to school children to older people and others who work downtown. Please, please do not eliminate this service. We don't have other options except driving, if we drive! |
| D6 | Please do not eliminate the d6. It is the most convenient way for people in Palisades to get downtown for work. |
| D6 | D6 is necessary for Fall 2021 |
| D6 | My family uses the D6 bus and does not have a viable alternative |
| D6 | There are stops currently served only by D6 and they need to stay |
| D6 | Elimination of the D6 bus route will devastate the children, adults and senior citizens of the Palisades! |
| D6 | Please DO NOT eliminate D6 bus, which serves an important crosstown route for seniors, health care workers, and at the west end, people using the trails and river. I know this route is underutilized during the pandemic, but it provides critical access to Metro and downtown as well. If it's not available, traffic congestion will just get worse and the far west end of the city will continue to tilt toward rich people only, which is making the rest of us 50+ year residents a little sick. |
| D6 | I rely on D6 route to get to work daily. Once my office reopens I will have to walk pretty far to get to a bus stop (Wisconsin Ave). |

| Route | 2021 proposed Metrobus service changes |
|------------|---|
| D6 | If you cut the D6 bus line, I hope you have good lawyer because I fully intend to organize a lawsuit against WMATA with the other residents of my neighborhood in NW to stop you. Now that WMATA has foolishly eliminated the D5, the D6 is the only way that people in my neighborhood in the Palisades/Foxhall area have to get into the center of the city using public transport. Youll be cutting off an entire section of the citys access, including kids who use the bus to get to Hardy Middle School, the large number of seniors in the area and the large number of people who use the D6 to get to Sibley Hospital. YOU CANNOT END THE D6!!!!!!Personally, Ill have to walk half a mile to Key Bridge every morning or as much as 1.5 miles to Wisconsin Ave just to commute. I bought an apartment in DC, as opposed to VA, because there was readily available transport access in my neighborhood. Without the D6, there no longer will be. You have a duty as public servants to ensure transport access in every neighborhood and if you eliminate the D6, you will have failed in that duty entirely. This is not a joke and idle threat, Im already talking with others in the community about the potential for legal action. Do your job. Keep the D6. Or Ill see you in court. |
| D6 | D6 is an essential and ONLY public transportation service for citizens who work and go to school in the area and in downtown DC. The Palisades, Foxhall Village have many families with student children and renters/family members that use the bus to get to Metro trains or downtown areas. |
| D6 | Please do not stop buses that service public schools. The D6 services Key ES and Hardy MS. Kids will be lost without this bus. It also services Georgetown and Sibley hospitals. This is an essential bus route. |
| D6 | We use the D6 |
| D6 | I selected not sure because with the proposed elimination of the D6 (after already losing the D5) it is unclear how kids from the Palisades along the MacArthur Boulevard corridor will get to school (Hardy MS and Wilson HS) starting in September, unless Expand coverage to support commuter and school-based travel will encompass those needs. |
| D6 | Please do not eliminate the D6 Bus Route. It is literally the only public transportation that runs through Kent/Palisades/Foxhall. We do not have access to Metro, so the bus is our only option. I think it is telling that this survey doesnt even mention the proposed elimination of this route, and you have to go through several links to even find it in the proposed route changes. The D6 route is essential in our neighborhood for students, workers, and everyone who doesnt have access to a private vehicle. |
| D6 | D6 is the only bus that goes to MedStar Georgetown Hospital and Johns Hopkins Sibley Memorial hospital. It is used by both employees and patients as many as it is their only mode of transportation. Your proposal leaves me without a way to get to work and home or to get anywhere else in the city since I live on MacArthur Blvd and your proposal eliminates all service for a huge portion of this section of NW DC. You cannot possibly mean to cut me as well as all of the other people who utilize this route without any form of public transportation. |
| D6 | Do not cancel the D6 bus. |
| D6 | We need D6 route to continue!! |
| D6 | As schools reopen the D6 bus line needs to be restored. This line also serves 2 hospitals - Georgetown Medstar and Sibley Hospital. |
| D6 | D6 is the only route taking you to downtown or the metro from Palisades |
| D6 | The D6 is my lifeline from the Palisades neighborhood to the city. Please do NOT cut or reduce service for D6. I have no car or other transport and the bus service for the D6 literally connects me to the city and under normal circumstances my life downtown. |
| D6 | Need the D6 to remain in service. It is critical. |
| D6 | D6 bus is very much needed in my neighborhood. Many elderly live on this route and take the D6 bus to get to medical appointments and the grocery store. |
| D6 | The plan includes cutting the D6 line, which is I am strongly opposed to. The phasing proposed here seems fine with me, but not cutting the D6. |
| D6 | I use/need the D6 bus route to go to/from work. I have not been using Metrobus during the pandemic but will rely on it to go to work once the pandemic lifts. |
| D6 | Elimination of the D6 route along Reservoir, Foxhall and MacArthur would leave my neighborhood (Foxhall Village) without any access to public transportation. |
| D6 | Eliminating D6 would mean no public transportation near my home. I had previously relied primarily on D5 commuting during peak hours, and D6 for weekend travel to downtown. I would need similar service once my company office reopens. |
| D6 | How can you eliminate the D6 which brings patients, workers, visitors to TWO hospitals? |
| D6, H8, H9 | Eliminating the D6 and adjusting other routes as proposed is insufficient. The proposed plan leaves a gap in service between MacArthur Blvd NW & Arizona Ave NW and Reservoir Rd NW & 37th St NW. This would adversely effect my commute and negatively impact schools / residential areas. Eliminating the H8/H9 would leave Harewood Rd NE and school /residential areas along the route unserved. Rerouting the H2/H4, and Tenleytown leg would also negatively impact residential and school areas along the route, particularly in the stretch between Connecticut Ave NW & Wisconsin Ave NW as well as along Adams Mill Rd NW. |
| D6, M4 | Children in our neighborhood (Palisades) use the D6 and M4 to get to our neighborhood schools (Hardy MS and Wilson HS). Please do not take away these bus routes. |
| D6, M4 | My children will use the D6 and M4 to get to Hardy Middle School and Wilson High School. If you eliminate these routes, they will have no way to get to school! |
| D6, M4 | I have ready your proposed service plan. We NEED the D6 and the M4! I have kids who go to Hardy and Basis for school, they get there by the D6! I get to work via the M4. |
| D6, M4 | My school age children will need the M4 and D6 to get to their schools; Wilson and Hardy |

| Route | 2021 proposed Metrobus service changes |
|--------------------|---|
| D6, M4 | The M4 and D6 line are essentially school bus routes for the everyone living in the Palisades, Kent and along MacArthur Blvd. While you propose the N6 as an alternate route to the D6, it still eliminates all riders who access the D6 on MacArthur Blvd from Dana Place NW to past the reservoir. Basing decisions on ridership numbers while schools are closed makes no sense. All of the students that rely on the D6 to get to school obviously havent been riding during that time. Total elimination of the M4, again, the only bus that takes students from this area to Wilson High School and Tenleytown is also problematic. Once again, you reference ridership numbers for a period of time when students who ride on that bus to get to school werent going to school. I notice that you dont even bother to offer an alternative to the M4! Unless the city plans to provide school bus service to Hardy Middle School and Wilson High School, this plan does not work for a large portion of the 20016 area code. |
| D6, M4 | D6 is my connection to the 30 buses on Wisconsin Avenue. I really need the D6 bus as do many along the Palisades corridor. Please dont delete the D6 bus route. |
| D6, M4 | Plan does not include continuing service on the D6 or M4. |
| D6, M4 | I totally agree with improving and supporting commuter and school-based travel, but if you are planning to eliminate the D6 and the M4 buses this decision will not help at all, the students or the commuters. You are contradicting your own plans. |
| D6, M4 | The list above says nothing about the buses I use. Being redirected to another website and onto a 166 page document does not help either. I use the D6 and soon my kids will be using the M4 to return to school. Ive heard BOTH were being eliminated. That does NOT work for me. |
| D6, M4 | Cancelling the D6 route would TOTALLY isolate us from the rest of the city, whatever adjustments are done to other lines.Cancelling the M4 route would COMPLETELY block us from the Metrorail service. Better close the entire Metrorail then! |
| D8 | Increased service on the d8 line would be beneficial. |
| D8, H8, H9 | Phased service increase plan sounds good (and is absolutely necessary for greater school reopening in the fall). I'm deeply concerned about proposed cuts in January 2022, however"especially the elimination of entire lines in Ward 7, Ward 8, and in Carver Terrace and Trinidad with no proposed replacement. Also concerned about the proposed elimination of the H8, H9, and D8 routes, which were a lifeline during the 5 years my family lived in Brookland. |
| E2 | the E2 bus is the main cross town bus for so many low income workers - I suggest making that a more frequent route |
| E2 | E2 service on Sunday would be fine |
| E4 | my grandchildren will benefit from taking the E4 bus to high school/ middle school |
| E4 | Eliminating E4 would make my commute more difficult. |
| E4 | I'm not sure how this impacts the E4 bus route. This route is critical for my neighbors and I. The hill upon which Ft Totten metro station site is daunting and the bus makes our trip to the station manageable. It also provides an essential route across town. |
| E4, K2, K6, R1, R2 | This question is not clear. When you look at the detailed proposed service plan, there is a lot of bus route elimination, but this question implies increased Metrobus service. I am against taking away bus service especially for the poor. I am especially against any changes to bus routes for my neighborhood the E4, R1, R2, K2, K6 |
| E4, L8, J2 | The detailed description lists significant cuts to many bus lines, including eliminating the L8 in the second half of the year. It also cuts the E4 at that time. The J1/2 route seems to be combined, but there is no map to show what the real service will be. Is the J2 preserved? Will I be able to get to and from Chevy Chase to Bethesda Naval Medical Center by bus? |
| E6 | BRING BACK E6!!! We need it! |
| E6 | E6 line has been suspended and the proposal to restore services doesnt include it. If not restored, at a minimum merge with M4 so large sections of Chevy Chase and Barnaby Woods have access to metrobus. |
| E6 | Chevy Chase DC needs the E6 bus. It is the only means of transportation for thousands of residents to have access to Connecticut and Wisconsin Avenues for many services including doctors, dentists, banking, grocery shopping, access to Metro Rail and other amenities. Please restore this service as quickly as possible. We pay high property taxes in Chevy Chase, DC. We should get priority bus service. Thank you. |
| E6, M4 | You need to restore the E6 and M4 bus lines so our kids can get to school!!! |
| E6, M4 | I use the E6 to get to my office and M4 as a backup. |
| E6, M4 | The E6 and M4 are needed for my son to get to and from school |
| E6, M4 | I need E6 or M4 to get to school |
| E6, M4 | Sept 2021 plans seem sufficient but current plans to eliminate M4 and E6 routes would impact me a well as my children who rely on these buses to commute to public school and work. Need to keep M4 and E6 routes. |
| E6, M4 | You need to bring back E6 bus service, which was also unimaginably terrible even before the pandemic. The poor service without a doubt contributed to ridership being well below what it could have been. The E6 ran only every hour, not after 9pm, and not on weekends at all! Moreover a large part of Barnaby Woods (e.g. along Aberfoyle Place) is nearly inaccessible by bus in any way. This has partly to do with the fact that the E6 bus was very difficult to catch as it ran south on Western Avenue, owing to the absence of stops and on the western side of the road. If reducing automobile dependency and increasing ridership is a goal of the city and WMATA, there should be a route running through or nearer to the rest of Barnaby Woods, and service should be more frequent. The neighborhood is indisputably one of the worst served by transit in the entire city, a fact curiously at odds with the high tax revenues paid by the neighborhood. Also if you eliminate the M4 there literally will be no service at all. |
| F4 | I am not sure of current F4 levels. Also once flying becomes possible again Id like to see the B30 restored |

| Route | 2021 proposed Metrobus service changes |
|------------|---|
| F4 | This plan is missing an important priority: increase service on the F4 metrobus. That route has consistently high ridership and demand (often crush loads or at least seats full) and needs better headways. |
| F6 | Discontinuing the F6 bus line would exponentially increase my difficulties in commuting to the UMD campus. Also, it is frequented by students of the PG County School System. My morning bus is often crowded with high school students who will require the line to get to school. If the F6 bus is discontinued, AND the College Park Station is closed, my difficulties in getting to UMD campus when we return will be extremely difficult. I usually take the MARC to New Carrollton station and then the F6 bus to campus. If I miss the bus, I usually take MARC to Union Station and then metro to College Park station. If both are closed, my only option is to pay extra for private transportation between New Carrollton and campus. |
| F6 | The F6 bus provides an essential link between the UMD campus and New Carrollton Metro and Amtrak stations. This link needs to be maintained. |
| F8 | If you're going to decrease rail, at least increase bus. We need more frequent F8 busses in the evening after work. |
| G12 | The G12 provide important access for myself and members of my community in Greenbelt, and removing it would have serious negative implications on people's ability to get out and access the things they need. Additionally, the B30 access to BWI has been a fantastic resource! |
| G12 | What is the plan for G12? Heavy and for many, only, usage through Greenbelt to Metro. |
| G12 | I only take the G12. The G14 stops are too far to use. I use the G12 for all transit- to work, activities, shopping, etc. The G14 will not be sufficient. Please keep the G12 |
| G12 | G12 Route MUST be maintained. I use this route regularly and it is only one that stops near my house. (The other one of two within Old Greenbelt is G14, its closest stop is 1 mile from me.) I am elderly and have no car so I depend on G12 to get me where I need to go! |
| G12 | In many ways the metro bus is what makes the ends of each of the metro rail lines so important. Without a reliable way to reach the outer stations, the metro becomes irrelevant to those commuters. The G-12 in particular is important for riders not well served by the G-14, or to provide a more timely option. |
| G12 | Don't recall the best numbers to use near Grosvenor park |
| G12 | I ride on the G12 Greenbelt-New Carrollton route exclusively. The previous changes to the G14 route makes it hard for me to catch that bus in a timely manner. |
| G12, G14 | Greenbelt needs G12 and G14 full service as it was before and not eliminated or reduced. |
| G12/G14 | Elimination of the G12/G14 route is an absolute killer for people who live in Greenbelt and Greenbelt Homes Incorporated. GHI is a community of people of all ages, including senior citizens. G12 service to Greenbelt & New Carrollton Stations is critical to Greenbelters' use of the entire Metro System. It's how many, many people get to the Greenbelt and New Carrollton MetroRail stations and then get to work or to appointments. |
| G14 | I see that you all are updating most bus routes but my bus route has been the same and apparently will remain to be the same. I'm an essential worker and I know I'm not more important than any other worker or employee but I take the G14 to get back and forth to work and it's stressful. Where I'm located the G14 is the only nearby bus that I can take to get to a train station. Ever since the pandemic my bus schedule has been on a fixed schedule during the start of the pandemic you all cancelled the route altogether it's back and now only runs by the hour and half of the time I would wait for that hour bus for it to never arrive and I'm forced to wait for the next bus it's been difficult and has been even more difficult during the winter time. Luckily it's beginning to get hot but I'm hoping that more buses are being added onto my route soon or a better ETA of the buses. |
| G2 | Don't bother restoring service for G2. Almost nobody is ever on it and there is already bus service on M St and Q St taking people through Georgetown. |
| G2 | Nearest route is G2 so approve restoring service |
| G2 | I am very glad that G2 service is being restored on the weekend, since I used the G2 a lot on the weekends before the pandemic. |
| G2 | The G2 bus is critical for getting groceries to residents living in LeDroit senior apartment building. |
| G2 | The G2 is vital for me and the proposals to change service or get rid of it are very frustrating for me. As someone who needs to get to Georgetown from Logan Circle the bus is my only option without having to walk nearly the whole way. |
| G2, L1 | At the moment I have had to change my preferred bus routes from G2&L1 to the Wisconsin lines (30s/n, 33, 31 which are typically very crowded) and add in a lot more walking to the route due to the current service cuts. I only travel to work 3/7 days a week but my employer has indicated return to full operations in the fall. I would like to see the L1 return to normal and G2 frequency increase later in fall 2021. As it stands the way the G2 is running does not sync well with the L1 alternative (L2) which leads to long wait times. Preference would be for the return of the L1 or an increase of service times for the Wisconsin buses. |
| G8, G9 | Pre-pandemic I used the G8/G9 twice a day. I also used the P6, which was helpful in transporting groceries from the RI metro to home. |
| G8, G9, G2 | In normal times I would use the G8 (would have preferred the G9 most of the time), G9 (fantastic route - changed my life! makes so much sense for travel along Rhode Island Ave. NW/NE - should be continued with expanded service hours... PLEASE!) & the G2 (do not cancel - this is a great route and WMATA makes it so friggin' difficult to bus across the city) |
| G9 | With no or limited train service the G9 is more important than ever. We need this bus all the time, not just at limited rush hour on weekdays. |
| G9 | Restoring service to G9 bus by July is what is important to me for my daily commute. |
| H1, S1 | I use the H1 to commute to work. With both the S1 and H1 closed I have to walk an hour to work in each direction. It's brutal. I need these bus lines back. If these bus lines don't return I won't be able to use the bus and WMATA won't get any of my money that I used to spend every day. |
| H12 | Absolutely. The H-12 is my neighborhood route. Sunday service has been eliminated, with nothing to replace it directly in the neighborhood. The bus doesn't run on Sundays, and the D bus is located approximately 1/2 mile from my area. |

| Route | 2021 proposed Metrobus service changes |
|-------------|--|
| H2, H3, H4 | H2, H3, H4: to be able to safely transport students to Wilson HS & Deal MS, it seems like we will need increased service (compared with pre-pandemic crowding levels) as opposed to the proposed decreases. |
| H2, H4, L2 | I use the L2 and H2/H4 buses most frequently. The elimination of the L2 bus would be inconvenient. The revised plan for H2 service would not make up for this. |
| H3/4, 30N/S | The changes to the H3/H4 would make it much harder for me to get from my home to the metro. I would also lose the 30N/30S as my route to work, which is an important option if metro services are changing |
| H8, H9 | The H8 and H9 are the only buses that go by my office. If you eliminate them, it would leave me with no bus service. |
| J1 | Mostly this would work for me except I want to keep J1 buses to reduce crowding on the route |
| J12 | J12 running straight through to Capitol metro from Larchmont Ave. Earlier runs on Saturday and Sunday on the Marlboro Pike. |
| J12 | The J12 bus is the only bus that travels straight down Marlboro Pike to pick people up and take them directly to the mall, post office, and Bank. Taking the J12 away will force people to either walk or get a cab if they do not have a car. The V12 picks up close to peoples homes in District Heights to take them directly to Suitland metro or Addison Road. Eliminating the J12 and V12 will be a big inconvenience!! This is bad for the elderly people who depend on not having to travel far to get to a bus stop. :(|
| J2 | Need J2 route |
| J2 | Current uncertainty in arrival of J2 bus is the most significant contributor to my commute |
| K2 | Need k2 |
| K6, K9 | I depend on the Metrobus service (K6 and K9) for commuting. Any service cuts would discourage me from using buses. |
| L1 | I have been riding the L1 to and from work for 25 years. If it is not brought back I will not be able to take the bus to work. There are no other viable options. Please bring it back. |
| L1 | Please restore L1 service! |
| L1 | Recommend restoring L1 line |
| L1, L2 | L1/L2 is one of the only buses that go up Connecticut Ave. |
| L1, L2 | YOU CANNOT ELIMINATE L1,L2. What is wrong with you people?! Do you never want DC residents to give up their cars and adopt public transport? Are you being paid by the auto industry to keep undermining public transportation???? |
| L1, L2 | It appears that you are proposing to eliminate the L1, L2 line. This is the line that I use most often. |
| L1, L2 | L1 and L2 are crucial for us. Important to take the L2 to get to GW Hospital |
| L1, L2 | Pre pandemic I use to use the L1/L2 not only to get downtown or to DuPont circle area, but also to go up towards Chevy Chase, which would no longer have any bus service on Connecticut past a certain point. The L lines were the only ones I used with any frequency. Would in effect almost never use the bus routes otherwise if these were eliminated. |
| L1, L2 | This plan would completely destroy my ability to use the bus on Connecticut Avenue. I take the L1 to work at GWU and to doctors appointments near the GWU Hospital. In non-rush hours I take the L2 to Farragut Square and walk across on H street in nice weather. The proposed changes would give me no access to the GWU Hospital area and would require at least one transfer to get home at night. This plan would effectively prevent me from taking the bus, a service which I rely on heavily. |
| L1, M4 | Both the L1 and the M4 lines areVital! |
| L1/L2 | Couldnt find L1-2 |
| L1/L2, M4 | Removing the M4, L1/L2 would be taking away access for school based travel and other things you need the transportation for. |
| L1/L2, M4 | You need to retain the M4 and L1,L2 lines if we are to maintain school-based services. |
| L2 | We depend upon the L2 every morning to get up to Chevy Chase. Additionally, we live next to Cleveland Park Station and closure would mean walking one mile to Woodley and .5 mile to Van Ness. Either way we would have a steep uphill climb either coming or going with each of them. Both L2 and the Cleveland Park station get lots of travelers once Covid is over. |
| L2 | Its not clear why you would kill the L2; a route that travels through an apartment-heavy area. Are you punishing people without cars? What about all the people who ride the L2 all the way from Farragut to Chevy Chase Circle? What about the zoo service? |
| L2 | Please keep L2 service in Cleveland Park |
| L2 | L2 should be kept and maintained as that is the only bus route from that area to go to the metro or anywhere else in the city! |
| L2 | I am disturbed to see that the L2 would no longer go all the way downtown. For example, when I broke my shoulder by falling on a Metro escalator, I was able to start taking the bus before I could take the subway and was very dependent on the L2. I still use it to go to the Farragut area. I use the L2 frequently to go north on Conn. Ave. and the H buses to go to and from the Tenley area. The combined loss of service on these routes would be very inconvenient. |
| L2 | I rely mostly on the L2 bus whenever I ride the bus. Having to make a change would eliminate that option for me and force me to rely on other mode of transportation. |
| L2 | I use the L2. If it ran more frequently, more peolpe would use it. Please dont elimiate this route. |
| L8 | Eliminating L8 would leave me without transit access. |
| M4 | We need the M4! Our students depend on it. |
| M4 | Once schools and offices are open, we will desperately need the M4 again, especially in the AM rush and from 3:15 pm- end of PM rush.All the kids in our neighborhood use this to ride to Wilson & Deal--there is no other way to get to school. And parents use it to get out of this neighborhood--wed be completely cut off from public transportation!! |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| M4 | Please bring back the M4 to take our children to Deal and Wilson |
| M4 | Need M4 for Deal and Wilson students |
| M4 | Students who live in Barnaby Woods depend on the M4 to get to and from Deal and Wilson. Will the M4 be on of the routes expanded for school-based travel? If so, what would be the schedule--it need to accommodate times for students to attend before-school and after-school activities. |
| M4 | I need the M4 to run in the school year for my children to get to school. My husband and I are essential employees and leave before our children leave for school. They rely on the M4 to get to Deal. |
| M4 | Why do you not talk about elimination of the M4 bus? The kids who go to Deal and Wilson will be totally screwed. Already we have to wait for several full buses to get on in the morning or afternoon. |
| M4 | Kids need the M4 line to get to the largest middle and high schools in the city and the neighborhood needs the connection to Tenleytown metro station |
| M4 | Your plan eliminates the M4 line completely in the second half of FY22. This is how many Deal and Wilson students get to school. There do not appear to be acceptable alternatives. |
| M4 | M4 necessary for child to get to school! |
| M4 | The M4 bus is the only way my children get to school every day. There is NO OTHER OPTION for them to get to Middle and High school. Please make sure to support the M4 line. |
| M4 | The M4 line is necessary for our neighborhood, particularly for school children attending Deal and Wilson |
| M4 | Service needs to be restored on M4 |
| M4 | Do not Phase out the M4 -- it is literally the route that thousands of children in upper northwest use to get to Alice Deal Middle School and Wilson High School. |
| M4 | Concerned about the phase out of M4 bus which is used by students to get to and from Wilson High School and commuters to the Tenleytown metro. There is no Metro in my neighborhood, the Palisades. |
| M4 | DO NOT CUT the M4. That is how a ton of kids get to Deal and Wilson high school. Why would you shut that down, how will they get to school??? |
| M4 | DO NOT ELIMINATE THE M4 BUS LINE. IT IS CRITICAL FOR COMMUTERS AND KIDS ATTENDING TENLEYTOWN SCHOOLS (DEAL, WILSON, AND OTHER SCHOOLS VIA METRO). WARD 4 WEST OF THE PARK WOULD ESSENTIALLY LOSE BUS SERVICE IF THE M4 LINE IS ELIMINATED. |
| M4 | Need the M4 for school commute for kids and commute to metro |
| M4 | WMATAs proposal to eliminate the M4 is incredibly short-sighted. This is THE bus that most students in the Barnaby Woods/ Hawthorne/ Chevy Chase neighborhood take to Deal and Wilson. Neighborhood students who go to Duke Ellington, School Without Walls, St Johns, and other schools also rely on the M4. We are talking about literally thousands of students. When school is in-person, the morning and afternoon buses are jam-packed. My children have had 1, 2, 3, even 4 buses blow by them at a bus stop, because the buses had no room to let them board. Meanwhile, school populations are exploding... Deal had 800 students 10 years ago and now has 1700, with forecasts for 2200 students in a few years. WMATA is citing the low ridership figures in Fall 2020 --- when schools and many offices were closed -- as justification for eliminating the routes. If anything, with enrollment projections in Wilson and its feeder schools increasing, we could use almost double the M4 buses in the morning and afternoon. |
| M4 | Why is the M4 being eliminated? I live in Chevy chase and my children go to Deal Middle School and Wilson High School. Without the M4 they will have no way to get to school or to get home. They are already sometimes late because the busses are so crowded and the driver cannot stop. I do not understand the reasoning here. In addition, my neighbors and I often take the M4 to the tenleytown metro station to commute to work. There does not seem to be a alternative way for those in Chevy chase to get to the metro. |
| M4 | Do not cancel the M4. It's how my daughter gets to school. Do not cancel the E6. It's the only bus that services my neighborhood. |
| M4 | Keep m4 service as it is vital to kids and seniors |
| M4 | As long as the M4 is not eliminated, and is phased back in for the start of school in August, a phased approach would work. |
| M4 | I heard you are cancelling M4. This is the only bus my family uses. It is how the kids get to school and sometimes I use it to get to metro. I cannot imagine what all the kids are going to do without the bus especially in winter. It's too far to walk. |
| M4 | Please do not cancel M4 which is critical to our neighborhood (as is E4) |
| M4 | The M4 is a school based metro bus line as well as one used by commuters and students working in Chevy chase. Eliminating this line is inconsistent with expanding school-based travel when in-person schooling resumes. |
| M4 | Eliminating the M4 in FY22 would seriously impact members of the American University community commuting from the metro station to the campus as AUs shuttle can be unreliable at times, especially during the pandemic. If changes must be made to this line, then it should be done in consultation with the AU community. |
| M4 | It makes no sense to eliminate the M4 route. This is the way that a number of students reach Deal and Wilson from places that are serviced ONLY by the M4. At the very least, keep the service before school starts and after it ends. |
| M4 | M4 is critical to cross-town traffic for students and workers. There is no other way except by car and that isnt an option for many people, especially students and lower income workers. |
| M4 | You should expand school-based bus service in September, but you are planning to cut the M4 service that takes children from my neighborhood to school. |

| Route | 2021 proposed Metrobus service changes |
|-------------|---|
| M4 | The M4 is critical to the resumption of school for kids from the neighborhood as middle and high schoolers rely on this for transport to school; it is also critical for students and workers withtransferring from the cross town Military Road bus to get to Deal and Wilson and Georgetown Day and jobs in the neighborhood. For working adults and seniors. It is also critical for access to Chevy Chase dc and Tenleytown commercial zones as well as the connection to the metro station at Tenleytown. It also brings child care and elder care workers to and from their jobs in the neighborhood. Ridership during the pandemic is understandably low given that many of these users are not traveling at this time. However, by the fall of 2021 and certainly by 2022 that will change.. |
| M4 | Service on Nebraska Avenue NW north of Massachusetts Avenue, Military Road NW, 30thPlace NW, Utah Avenue NW and the Pinehurst Circle is eliminated and will not be replaced byother services ... Are you serious??? Do you have any idea how many residents and students RELY on the M4 to get to school locally as well as to Tenleytown Metro? I am so disgusted by this suggestion. Perhaps your ridership figures are horribly skewed because Kids Ride Free. What exactly is the method for determining Ridership on the M4 bus line? I am just disgusted by this incredibly short-sighted plan that WMATA has decided to put forth, taking advantage of a horrible pandemic and its affects to push an agenda that literally does not serve the people of DC. You should be ashamed of yourselves. |
| M4, D6 | my neighborhoods already stranded on weekends when the M4 does not run. and the D6 is our lifeline |
| M6 | The M6 is an essential bus service for those in the Penn Branch community. If this service were to be eliminated my spouse and I would sell our house and move. |
| M6 | M6 needs to be maintained for that corridor of the city. |
| M6 | I have relied on the buses traveling on Pennsylvania Avenue (M6, 30 buses [traveling on Branch Ave. and Pennsylvania Ave.) for travel into the city. Although I do own a vehicle, it is more economical for me to use public transportation (Metro). However, there are many in the community who do not have personal transportation and desperately rely on the services of Metro. Please continue these lines. |
| M6 | Please do not take the m6 off line. It is imperative that the seniors have access to work & to get to the grocery store! We do not drive so will we get around. Thank you |
| M6 | The M6 Route is a lifeline PREDOMINANTLY for seniors and low-income riders between Southern Avenue SE, Pennsylvania Avenue SE and Potomac Avenue, especially since the F14 runs later and sporadically on Saturdays to the Naylor Road Station and does not run at all on Sundays. The W4 transfer to a 30 bus at Branch Avenue SE & Alabama Avenue SE is not coordinated and is overloaded, resulting in buses passing-by the intersection. |
| M6 | the M6 is crucial to those of us who must travel along Pennsylvania Ave SE |
| M6 | It is very important that you restore Sat. and Sunday service on the M6 line. |
| M6 | I answered no because I checked the proposed service plan and noticed eliminating M6 service. This would be sorely missed and crucial to those that of us that do not live near the branch/penn aves stop for the 36 bus. The M6 provides a needed service for our Penn Branch/Hillcrest community and it became especially clear during the pandemic. |
| M6 | I would ask that you strongly consider not discontinuing the M6 bus line. My neighborhood has already lost the M2 and V5 bus lines. It seems that for Metro/WMATA, its all about money. Cant someone consider whats needed, as opposed to how much money isnt being made for your company? This line is needed.. The 39 bus line that was added (it only runs during rush hour), and really does nothing for those of us who need the M6. Why is this neighborhood constantly being targeted? Then theres the other bus lines that have been added (the 30s North & South). First of all we have to get to them. This takes one out of their way, when youre simply trying to get to the Potomac Avenue station. It just doesnt make sense to me. I know that my concern isnt going to make a difference. Nothing that I write will sway whats going to happen. I know that the decision has already been made and this is just a matter of formality. When I voiced my opinion about the M2 & V5, it didnt make a difference, and I know that it wont make a difference this time either. I attended the hearing, and for what, when it was all said and done, Metro/WMATA just did what they wanted to do, so that they could save some pennies. It should be about the needs of people, but its all about how much money you can make. Congratulations on being on top of your game. Money over needs. I guess thats just how it goes, especially if its concerning certain neighborhoods. Metro should provide quality service regardless of ridership. |
| M6 | Im very grateful that the M6 is going to be operational on Saturday and Sunday, this bus gets me to the grocery store on Pennsylvania Avenue SE. As a elder it benefits the community. |
| M6, 30 | I interstate the impact of the pandemic on metro ridership. My primary concern is metro not discontinue the M6 bus route which is used by alot of people in this area who much rather prefer going to Potomac Ave station to transfer to trains and 30 bus line. |
| M6, 39 | M6 is important to my neighborhood to get us to Potomac Ave Metro station. It is the only way we have to get there. The 39 is needed when we return to work because it will take us all the way downtown and is an express rush-hour option. On weekends, it is extremely important to have the M6 running because the 39 wont be available. The M6 is our connection to the rest of the city |
| MetroAccess | As long as coverage for service of Metro Access is not affected negatively. Disabled folks are disproportionately low income & are less able to avail ourselves of other transportation options - especially those who rely on Metro Access. |
| MW1 | Eliminate the Metroway/BRT line in Alexandria/Arlington. I see the buses for this line daily and I rarely see more than 2 people using it. It's a complete waste of money. Stop any future planning for more of these idiotic BRT lanes. People don't want them and won't take them. |
| MW1 | Do not end the Metroway line!! |
| MW1 | The main bus I catch in VA is the Metroway. |
| MW1 | Questions: What would be other public transportation options to travel from South Glebe Rd, Arlington/Potomac Yard to Crystal City Station or Pentagon City Station if MW1 is completely eliminated? Will the Potomac Yard Station be completed by FY 2022 as an alternative? |
| MW1 | The MW1 hasn't had any negative effect on me as it's been running |

| Route | 2021 proposed Metrobus service changes |
|---------------|--|
| N | We need the N buses back. Our part of NW has the most limited options of any ward. |
| N2 | Entire N2 route needed |
| N2 | Bring back the N2! |
| N2, N4 | N2 and N4 are vital to get to/from downtown from Wesley Height. N2 even more than N4, as N4 does not do the New Mexico Ave leg. You have already eliminated some bus stops - but I thought this was temporary. Now you propose to scrap the entire route. And there is no good alternative, with Tenleytown metro a good 25 minutes walk away. Moreover, pre-COVID, the busses I took in morning and evening rush were almost always completely full, with standing room only. It hence makes no sense to cut this service. I strongly object to eliminating N2/4 or reducing their frequency. |
| N2, N4 | need N2 and N4 back asap :(|
| N4, N6 | These are the increases to service. None of these increases impact me. The list doesnt list the HORRIBLE elimination of the N4 and N6 service (the new N6 service is a replacement of the old M service). |
| N6 | Eliminating N6 service to Friendship Heights is ridiculous. For a lot of people who live in this area this bus route is the only way to get to Friendship Heights. There are a lot of elderly people in this area who rely on this bus route as well as students and this change is making it very difficult to get around. |
| N6, M4 | this doesnt work because coverage is NOT being proposed to be expanded in 9/21 and beyond. This means my son will not be able to ride the D6 with his friends to Hardy middle school (or duke ellington, international school nor the several other schools right in georgetown)! The propsed N6 change will only come every 35min and take much longer to get to the same destination. It means practically that he will need to be driven to school unless DC provides school buses for the kids that will be stranded by this proposal. Further since the M4 no longer be in service there will NO way to get to tenleytown and wilson high school nor deal middle school. WMATA should partner with American to provide bus service to AU using the M4 instead of their own buses. Keep in mind that Hardy is still virtual so ridership hasnt been captured since the kids were physically in school early last year. |
| NH2 | Given this, I might ride the NH2 again to go to the MGM Grand Hotel. |
| NH2 | I am especially happy to see the NH2 return on weekends |
| NH2 | Nh2 people do travel to mall , Also we need B30 from Greenbelt to BWI Airport back in Service |
| P18 | Does not apply to my bus P18 as it never ran on the weekend even though that is when most people and families go out to enjoy themselves. The bus stops going north on the weekdays at 630pm. |
| P18, P19, W14 | The FY proposal will eliminate both the W14 and the closest alternatives (P18/19), thus eliminating all Fort Washington and many Oxon Hill residents from any MetroBus service. I understand the need to make cuts, but to eliminate all possibilities for us is not acceptable. Alternative: Keep the P18 or P19, with reduced service from the FTW Park & Ride (once an hour, 6am, 7am, 8am) for 3 months then decide if it is economical. People will need your service after the Time of the Virus, and, children return to school. Thank you. |
| P6 | The P6 is an essential bus route that travels throughout the city that the G8 does not. |
| P6, X2, 60 | If the train service is limited and/or station close at 9p, then MetroBuses should run much later til 2a, especially on crosstown routes like the P6, X2, 60 line, etc |
| R1 | Given the plans to eliminate the R1 as of January 2022, I do not believe this is appropriate. As of today, there is a good amount of crowding on the R1 and R2 northbound during rush hour, with the social distancing option limited given my option to Riggs/Chillum Roads. If the R1 needs to be eliminated, R2 service should increase to accommodate the additional rush hour load. I am glad the E4 service will be retained fully through 2021 and 2022. |
| R12 | Since I have not used the R-12 route recently, I see no need for restoring Saturday service. |
| R2 | Que la ruta R2 corra hasta las 11 pm los sÁbados y domingos |
| REX | The REX bus from the King Street station and Ft. Belvoir needs to continue to run so those in Alexandria and Ft. Belvoir can get back and forth. |
| REX | I take the REX to work if I miss the train. KEEP the REX buses. |
| REX | FEMA should also provide disaster assistance in the pandemic...the overcrowded buses on lines is unacceptable due to the pandemic there the masks are worthless |
| REX, 29K/N | Do not eliminate the REX Bus at Eisenhower Station. Do not eliminate the 29K/N bus. |
| S | We need the s buses back to post covid leveles once things reopen |
| S | As an S-line rider primarily, the proposed changes do not affect me. |
| S | None of the lines I will be using in 2022 (the S buses) would be included in the expansion of coverage, as far as I see. |
| S | I take the S bus on my commute (take it to Farragut West to commute from DC to VA). The line suffers from overcrowding, so it is crucial to run enough buses to meet demand. Otherwise, it will compound upon the reduced train service--especially for people like me that commute bus to train. If I have to wait 15 minutes for a bus and then 30 minutes for a train, that is completely untenable. |
| S | The S lines will be my primary foul-weather transit to work (plan to bike, as before, when the weather is ok). Getting those to pre-pandemic levels by the time I need them is important. |
| S1 | Do not eliminate the S1 line. Do not cut service on other lines. |
| S1 | Being back the S1 line! |

| Route | 2021 proposed Metrobus service changes |
|----------------|---|
| S1, S2, S4, S9 | This plans seems to work on the face of it, but Im not sure how it affects me exactly in detail. Its worth noting that since the pandemic started I moved from the high-serviced S1, S2, S4, S9 corridor to a home in Petworth serviced by the 62/63 route. I havent ridden the bus from here yet, but part of the appeal for buying this home was the easy commute on the bus to the downtown area. |
| S9 | The reduction in frequency of S9 buses could easily cause a big problem. Those buses are always extremely crowded as it is (or was, pre-pandemic). |
| T14 | Es bueno por que t14 habeces no pasa y no informan |
| T2 | This should be fine. My main concern is the T2 bus. |
| U4 | The U4 bus is need as we have 70 percent seniors that utilize this bus in order to go to work ,doctor church among other things |
| U5, U6 | I take the u6 and u5 bus to work. Please do not eliminate Minnesota station orange line and the u5 or u6 bus |
| V12 | It will be helpful for me to have the V12 Sunday service restored. |
| V14 | I am employed and to discontinue the V-14 to Deanwood and Penn Mar would create a hardship for me and many other riders that use this service weekly. |
| W14 | BOCK ROAD LINE “ ROUTE W14 taking this line away for South County would be a major impact for riders that need to get to Southern Avenue station for work, medical appointments, bad weather. There is no other bus service available to us. Once again we folks in South County will be impacted and it appears that no one whether it is Metro or P.G. County what happens to it citizens. |
| W2 | Please change the scheduled times of the W2, currently does not show at 6: 10 am on the %th Mellon St SE stop |
| W4 | Truly would appreciate if M6 is restored Saturday and Sundays. This bus is a great asset for Fairfax Village for the residence that do not have a car. I look forward to this bus not being taken away from our community. This is my transportation. It is tooo hilly to be walking up to the W4; it is an inconvenience. Thanks |
| X2 | This would work for me. My only issue is ensuring that the app is updated correctly with the schedule and any changes. For example the X2 hasn't been able to go to stops along H in northwest (layfette, 14th, 13th) for a long time. The app still show the busses going to the stops even in realtime. Many times after working late I've waited for a bus that never came at 13th St stop only to see it drive by on 13th and turn without stopping While I'm standing at H st stop. It is very very frustrating. |
| X8 | Although its a small ridership on the X8, its not fair to remove the Saturday and Sunday schedule for those who live along Maryland Ave in Carver-Langston. A lot of elderly people live there and need adequate transportation. |
| X8 | I rely on the X8 to get to work. Removing that line cuts Carver-Langston off from the rest of the City. The X2 and Streetcar are not replacements because of location, congestion, and the speed at which the X2 moves down H St. the X8 is a much more efficient and faster way to get to Union Station. |
| X8 | I used to catch the x8 on the weekends, as well as the b8 and be weekly which was taken out of circulation. |
| Y | Restoring the Y buses is going to be critical once people begin returning to the office. |
| Z1 | Please bring back the Z11 please I love that bus I havent ride that bus since last year March and I miss riding that bus |
| Z8 | The “Z8” get crowded and is never on time especially at night leaving from Silver Spring going northbound. Although it is a pandemic, more buses should be added to ease overcrowding and promote social distancing. |
| Other | The plan doesn't adequately consider and address auxiliary lines that, whileThey may have lower ridership numbers, serve as the only bus service for certain areas. |
| Other | Hourly bus service is a problem as its difficult to coordinate rail to bus transfers. |
| Other | I dont take the bus anymore |
| Other | Ramp back up to 100% by May. |
| Other | I would like to ensure that metro bus users are consulted. I don't think this format makes it possible when the burden to participate for the most likelyDependent bus riders is impossible to mitigate. |
| Other | Cuts in service will be a detriment to the community. PLEASE RECONSIDER! |
| Other | No |
| Other | This seems appropriate to the current commuter situation. |
| Other | It is essential to ensure adequate levels of service for communities where residents rely on public transport to commute to work and to schools. Longer term, the transport authority needs to plan for levels of service that encourage public transit and lower the appeal of private vehicles that congestion downtown districts and contribute to environmental pollution. |
| Other | Should restore everything immediately |
| Other | The proposed changes in bus routes exacerbate the already bad east-west transit options. In addition, they fail to take into account the needs of school children and seniors, e.g., the senior housing being built on MacArthur Blvd. which would have not bus service. |
| Other | no need to increase bus service |
| Other | This sounds great! |
| Other | Build more bus lanes so buses travel faster, increasing frequency at zero cost |
| Other | Expanding bus service is a great idea |
| Other | It would work for me, but I am privileged enough to work from home. Metro should consider the opinions of service workers above all else. |
| Other | cut the bus! |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | Adding early morning busses would also be a help |
| Other | Reduce bus service that overlaps with metro and increase bus service on lines not well served by metro, e.g. H St NE |
| Other | All bus routes in the Palisades are slated to be eliminated. We will have no public transportation available in the neighborhood. That is not acceptable. |
| Other | Yay increases in service! |
| Other | do it now, not later |
| Other | So many people are only able to get to their jobs using buses. |
| Other | This is fine for 2021 since many people haven't returned to the office yet. |
| Other | I only ride the bus occasionally, so I can't give feedback on regular travel |
| Other | This seems reasonable. |
| Other | I dont really see any need to increase. |
| Other | Discounts for students |
| Other | Metrobus service should adapt to use during the pandemic reducing frequency on frequent lines but not eliminating any line. Again, you provide a necessary public service for many low-income service workers. These are essential workers that depend on metrobus. Serve them. |
| Other | Prior to the pandemic, I saw a lot of empty or mostly empty Metro busses. Those people still need transportation. Is there a better alternative? Smaller, more fuel-efficient vehicles? |
| Other | Dont mess with the buses. Period. |
| Other | Get tax.mpney from road projects |
| Other | I didnt take Metrobus frequently enough pre-pandemic for any of this to matter, |
| Other | My point is that many people need public transportation. Dont leave them out in the cold with no transportation. |
| Other | Need to know the May 2021 changes |
| Other | I use metrobus to get to work so any increase in coverage will be helpful. |
| Other | Expand the commuter and school support routes in August. |
| Other | If there are no buses Imwould walk or take taxis/uberetc |
| Other | Run more busses. Bus service should be at 125% of pre-pandemic |
| Other | Save money by stopping all current and former WAMATA employees from riding for free or with a discount. |
| Other | Reducing transit access, frequency, and reliability reduces demand, which leads WMATA to further reduce transit --- its a death spiral. Accessible, frequent, and reliable transit sells itself. |
| Other | Im glad to see it explicitly take school-based travel into consideration. |
| Other | More service is better; personally Im not directly impacted but feel it critical that we need to provide MORE service to ensure a viable future. |
| Other | I do not use metrobus |
| Other | Phased increase needs to be in synch with more employees not teleworking, but reporting to work. Once that happens, demand will increase, probably gradually. |
| Other | Metro service increases should reflect the impact of COVID-19. |
| Other | Bus service has been ok in the pandemic, I ride the bus often and havent had issues. Some routes are crowded but overall the bus is more reliable for me than rail. |
| Other | In general I would like to see *more* his & rail service during a pandemic for social distancing (see: sydney) but understanding cost this is fine. |
| Other | See response to question 2 |
| Other | None |
| Other | Dont use Metrobus on weekends, and there is no planned service increase to affect my commute |
| Other | Do not close the Eisenhower Metro stop. We have several apartment buildings being built and ridership will increase once its safe to return to the office. |
| Other | My bus is not impacted |
| Other | phased increases make sense. |
| Other | As mentioned before, all proposals must take into account current ridership and the fact there will be fewer commuters as working remotely is expanding. |
| Other | Im unclear on how these changes will impact my daily commute in the context of expand coverage to support commuter. . .travel.. |
| Other | This is very, very poorly phrased and confusing. What will it return to AFTER the end of 2021? |
| Other | I dont ride the bus. I am afraid to ride the bus so I take the train to work at Morgan |
| Other | No, the expansion comes at the cost of my line, and your report lists no alternative for the neighborhood in which I live. |
| Other | The buses are pretty empty, why not decrease the frequency more, we dont mind waiting. |
| Other | Plan would work, but no need for late night service on 34 lines. |
| Other | Please keep bus service, especially ones that serve students across the city. |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | Prefer reductions to Metro busses instead of rail service. Far fewer people rely on them and they are in areas where parking and car ownership costs are significantly lower. |
| Other | I think the number one priority is NOT to decrease options related to school based travel as it always hurt poor children the most |
| Other | Eliminate the service I actually use, leaving no Metrobus service in my neighborhood. |
| Other | No comment. |
| Other | Service must be restored to pre-pandemic levels as quickly as possible. |
| Other | More late night options wouldMake commuting home by bus an option for me |
| Other | I dont take the bus. |
| Other | Use smaller shuttles perhaps. The bus capacity can be reduced but cutting routes and frequency will cause hardship and inaccessibility for those who don't drive |
| Other | Id appreciate covering school-based travel from Columbia Heights to Georgetown. |
| Other | You do understand that the purpose of public transit is to help people get to where they need to be, when they need to be there, don't you? |
| Other | The number of school kids, and commuters will require more busses than are currently being serviced. There is not enough parking, and despite that, people dont have cars. There is no transportation available for kids getting to either the middle school or Wilson high school from the Chevy Chase area. |
| Other | I dont currently use the bus, but might later this year |
| Other | We need more public transportation options |
| Other | Still missing my routes. |
| Other | The managing partner sent us an email last month stating that he hopes that we can all start coming in to the office regularly in the fall. I usually take the bus to work (and this will not change even though I moved from one side of Alexandria to the other). At the moment, I drive when I have to go in. |
| Other | Metrobus is an adequate one time substitute, but is not feasible as a permanent substitute to metrorail. |
| Other | The government needs to allocate more funds to run the Metro full time, and perhaps reduce rider fees - this is a good investment in reducing cars on the roads, reducing congestion and stress of commuting and cutting down on pollution, green house gases and global warming. |
| Other | I do not plan to ride MetroBus until September 2021 |
| Other | Yes. Please expand bus service. But also, please reduce fares for children between 6 and 18 riding with an adult. |
| Other | Resume all in may |
| Other | I am all for increasing service on various lines throughout the city and extending operating hours. But not at the expense of some of the proposed cuts!!! |
| Other | Eliminating bus routes would be insane, given the huge number of people who rely on them. |
| Other | Need bus from Grosvenor or down Rockville pike to DC/ Farragot North |
| Other | Its hard to weigh in without knowing the 10 additional lines and the 34 lines |
| Other | Prioritize increases in service to Wards 5, 7, and 8. |
| Other | I am currently unable to access the main bus line I use and do not live close enough to a Metro station to make up for it. |
| Other | Taking away bus service impacts low income communities. This is unacceptable |
| Other | It is critical to the city to have reliable frequent bus service |
| Other | We need 100 percent metro service to return sooner for communities east of the river that only have bus Access to get downtown for work, healthcare trips, and grocery shopping. |
| Other | This doesnt deal with all the bus lines youre threatening to close. |
| Other | I dont use the bus |
| Other | Please not, these dont affect my commute but I hope you consider those in those areas. A lot of people work on weekends, I imagine this would be hard, given the train changes as well |
| Other | Eliminates bus service at my house. Would require a 1.3 mile walk to West Hyattsville where headways will be 30 minutes. Cannot travel to Cheverly as an alternate. Only bus left in my area would be 83, so I would have to travel by bus to RI Ave where there will be overcrowded trains and reduced headways. |
| Other | Late night service should be expanded by an additional hour or two to accommodate service workers. |
| Other | Nuts. How can a transit org not provide transit? |
| Other | These arent my lines |
| Other | Its impossible to maintain any semblance of social distancing under such conditions. |
| Other | Metrobus fares should be higher. |
| Other | Brilliant. How could this possibly be from the same people as the Metrorail plan? |
| Other | I do not currently use any of these routes. |
| Other | Probably not the time to ask for new bus routes but it would be great if there were a route from kingman park down North Carolina to eastern market station. |
| Other | Thanks for taking care of the bus riders! They need help getting around the area. |
| Other | I do not use those busses. |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | People depend on the bus to get to and from places they need to be. I used the bus often when I didn't have a car and would hate to see it's services reduced. |
| Other | Metro trains are more important than Metro buses so any necessary budget cutting should be directed to cutting bus service, not train service. |
| Other | We need a break from Lyft. Metro is essential for bars and people who need transit to their jobs. Some people can't drive. |
| Other | I dont use these bus routes. |
| Other | Bus lines are already so long and the buses overcrowded; there needs to be more buses and shorter waiting times |
| Other | Metrobus services down Van Dorn St into Fairfax County would be excellent. |
| Other | It would be great to expand Metrobus service. DC needs a totally reimagined bus system. |
| Other | Why would Metro spend money on late night service? Why not use those funds to restore service to buses during rush hour and weekdays? |
| Other | Full service should be restored soon as vaccination rates will continue to increase. |
| Other | Increase late night service |
| Other | I work at Pentagon City and rely on the bus service to get to work. I dont live near a metro station and would not be able to get to work. |
| Other | Please provide actual routes, acronyms are not know by riders. |
| Other | Not environmentally friendly to add more buses to make up for missing metro |
| Other | Expand service everywhere. |
| Other | I never use the particular routes listed. |
| Other | Increasing bus service covers the gaps that are not accessible by metro and provides an easy and affordable way to travel around the region. |
| Other | Buses don't make it out past friendship heights and I like far |
| Other | Expand service as much as possible. |
| Other | We likely won't be using the bus until we are vaccinated. That means a few more weeks for my husband and who knows how long til the kids are. |
| Other | I'm happy to hear this! More access to buses is very good and helpful for me and many others |
| Other | Keeping routes to schools is important for summer school and the fall |
| Other | Great idea |
| Other | more trains, more buses |
| Other | Most of people work from home now and thats why numbers of riders decreased. With everyone getting vaccinated and getting back on track to work in person, closing of metro wont work! |
| Other | increasing service is the correct idea. Stop cutting lines and remember you are a public service. |
| Other | changes are too difficult to determine... documentation is unclear... try again... |
| Other | Offices are starting to require more in office presence due to increasing levels of vaccination. Support commuter bus lines by late Spring. |
| Other | Speaking of siloed budgets, is there any consideration of cost- and use-sharing with Fairfax County school buses? |
| Other | This cuts my bus, I think. But not really clear from your description? |
| Other | What are the additional 10 lines? |
| Other | These changes do not need to be implemented until people start going back into the office. |
| Other | HOW MANY ROUTES ARE YOU CUTTING? you want us to become peasants with ox carts trying to get from Point A to Point B???? |
| Other | Metrobus returning to full service (aka full bus open, no COVID considerations) has been a pandemic nightmare -- people not wearing masks, windows closed, people sitting next to eah other. Im in favor of more buses running *AND* windows open, max # of riders, bus driver protections,etc |
| Other | I do not use any of these services |
| Other | Planned elimination of 16G has been contemplated for many months or years, but always canceled due to riders demands. I see no change in the demand for this and relying on ART 41 as a connection is downgrading overall service, a highly undesirable end. |
| Other | Bus lines not convenient to my neighborhood. |
| Other | My main concern is that buses run on schedule. |
| Other | Seriously? Combine all the bus routes along Columbia Pike into one? And have no service into DC? Were an area of the Arlington Country with NO DIRECT ACCESS to Metro. The 16C into the city is our direct access. Cant you structure this so that every other bus or every third bus goes all the way into DC? Why is it our end of the county gets treated this poorly? |
| Other | Most people have cars or bikes so eliminating bus service on MacArthur Blvd is OK. |
| Other | I live along the Wisconsin Ave corridor. Buses are already fuller again. We have no alternative (ie we can't choose bus OR metro, it is only bus for us). Reduced service is going to cut off many neighborhoods from getting to and from work and errands in a timely manner. |
| Other | Late night service is critical if rail is closing at the absurdly early hour of 9 pm |
| Other | If the Metro rail returns to close to normal operating schedule (not trains every 30 minutes), then a more limited bus service would work. |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | So glad to hear about an increase. Will tune in on March 8 |
| Other | Expanded service is great!!! |
| Other | It's hard to say, of course, given that I don't know when I'll be returning to work in person. However, I would expect it to be July or later. |
| Other | The bus routes are not applicable to my own needs but good bus service is essential to a functioning city -- for workers and for socializing. Car ownership should be discouraged. |
| Other | I usually take Arlingtons bus to Rosslyn and then take the Metro to the Mall. Im not sure if Ill be able to do that, given the phased service plan. |
| Other | It would be great if expanded service was restored in summer, not September. |
| Other | Suggest for the final phase to be moved to August since many schools will be beginning normal schedule in August. |
| Other | i am not sure what the route numbers are but I am in favor of leaving both Virginia square and clarendon open even at limited high peak hoursMany people in our neighborhoods have selected living at Virginia Square and Clarendon for convenience. Many do not even have cars. its an unfair burden to close these stops |
| Other | never take these buses, so dont really give a crap about them, but i do wish them well |
| Other | This bus line is the primary mode of transportation for families and children that live in the heart of Marshall Heights. Its unacceptable to remove this line and leave an entire community without access to transportation options. Additionally, there are several schools on/near these lines, the disruption in bus service would also adversely impact attendance. |
| Other | I feel buses do not provide enough frequency and connective tissue between things. Anything additional is helpful |
| Other | Not acceptable. If we dont have a bus stop in the neighborhood, dont think we are going to walk to another one, we just dont use your services. |
| Other | Expanding hours of service is more important than adding buses on Sunday |
| Other | My main concern is the lines in upper NW east of the park. Its not clear to me how these will be affected. |
| Other | Just keep the metro train lines running. |
| Other | Again, essential workers depend on late night bus service more than anything |
| Other | The reason that I don't take the bus is because they come too infrequently. That stresses me out. |
| Other | Really pleased with expanded and invested in metro bus service. If metro train has to close please improve buses |
| Other | Again open up as many bus stations again as you can. We're beginning to come out of this thing and it's going to be difficult as more people come back and y'all keep scraping everything back |
| Other | Would this option be re-evaluated if the pandemic affect lessened? |
| Other | Apoyar a las personas con necesidades economicas, pidiendole al gobierno federal y a la reserva federal por mas recursos economicos, gracias |
| Other | WMATA needs to address weekday daytime reliability and headways before weekend service expands. |
| Other | More transportation reduces having to drive a car |
| Other | Please dont cut bus service! I need buses to get around! |
| Other | My metro bus use depends on when and where I need to go. Buses going to fort totten are important in this area. |
| Other | Makes sense |
| Other | The quicker expansion, the better. |
| Other | People bought in Shirlington and Fairlington with the expectation of public transport- our tax dollars are an implied contract!!!! |
| Other | Again, METRO must continue with service and not decrease service. I already see more traffic on the road, but not more people in DC |
| Other | I would encourage more bus use over metro rail. Many people I am in contact with, including myself, feel more comfortable riding the bus because often the windows are open to circulate the air. While it is not easy to distance on the bus as it is on metro, I believe the air ventilation is a significant factor in reducing COVID transmission. I would also encourage a mandatory open window policy on the bus. Increased bus options and bus only lanes may encourage more ridership as well. |
| Other | Unknown when I would return to working in my office (as opposed to working from home) on a regular basis. |
| Other | Please assure that underserved areas receive metro service first |
| Other | Coverage and headways need to be made better by actually making shorter headways and being back all the lines. |
| Other | People in my neighborhood and so many others rely on the bus to get to Metro. Reducing blood flow in the capillaries leads to heart failure. Don't do it. |
| Other | Increasing service on the bus lines is essential. You should be doing the same thing with the metro! |
| Other | I am still unemployed and unsure of my upcoming needs |
| Other | Service needs to return to 100%. |
| Other | Bus service is a lifeline in my neighborhood |
| Other | These changes would not impact the routes I use. |
| Other | Im not sure if busses will be frequent enough on my route |
| Other | I seldom use the bus, but people who do are often those that need this transportation most. You need to make sure that the bus riders get the best service possible. Use smaller vehicles for smaller ridership, but keep service. |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | Why are you keeping the buses running at such low levels when ridership is still fairly solid, while the trains are empty but you keep them running anyway? Oh, sorry, of course, the trains have a few rich, white people, and the buses are full of poor, brown people. |
| Other | dont ride those buses on the weekend, not in my AOR |
| Other | Metrobus is a critical link in our community. Frequency of buses should be increased as appropriate so that Metrobus remains usable. Lines with infrequent service should have service increased, or be re-evaluated. |
| Other | Please provide transit to Great Falls, VA and even Fair Oaks Mall |
| Other | With expanded service in the fall, please remember many school programs operate on Saturdays as well as M-F |
| Other | The metro bus is very convenient and I prefer using this to get around the city for work, leisure, appointments, etc. I would like to see more frequency in areas that are predominately black and other poc. |
| Other | If you add bus routes as ridership increases it will work |
| Other | If you're going to close stations, provide more bus options. People still need to get to work and get around the region due to these changes. |
| Other | Bus rapid transit is critical to connecting residents in Virginia suburbs to places of work, school, worship, recreation and ensuring connection to the Metro stations that open opportunity to new jobs. Living in Herndon - it can take up to 61 minutes to get to a shift at Dulles Airport - which is 1.6 miles away. Low-income working families are least likely to be able to afford reliable transportation and need the assurance of bus, rail and other options to ensure they get to work on time and can support their families. |
| Other | I had started before, but got off page one way or another, so sorry if repeatingThe plan for the first half of FY2022 seems intriguing, but the second half stark and desperate, lets hope not to need that.Which is to say, that the first part, looks fairly tenable. |
| Other | I like that the bus services are becoming expanded in many ways, but I hate to think this expansion is coming at the cost of the metro rail, where I think the drastic cuts in service are far worse than the changes to the bus system. I think the money would be better spent on the metro rail. |
| Other | Why cant you expand rail service instead of all these bus routes |
| Other | Having lived years in DC, and ridden buses often during that time, this all seems reasonable to me. |
| Other | I have recently returned to the area, but the bus was my neighborhoods primary means to access public transit. |
| Other | Restore full 100% bus service |
| Other | This seems reasonable. |
| Other | Not seeing any bus (or metro) within 20min walking of my house that commutes to Pentagon area |
| Other | The more service, the more convenient, the more ridership - people will tell others how easy and convenient, instead of they use it because it is their only option |
| Other | I feel the metro service is more necessary than the bus service |
| Other | The bus has been very unreliable and slow |
| Other | Add/maintain service to closed stations to compensate for closure. |
| Other | depends when federal offices reopen full time. |
| Other | I recommend full service be restored by the end of summer and the start of school in the fall. |
| Other | I like this plan because it shows a way to return to normal service hours and people including myself rely on the bus. Wish this could be done for metro. |
| Other | Prioritize re-establishing line service in areas where bus is the only essential form of travel |
| Other | Need 7 bus service to continue downtown and 22 crosstown service to be maintained. |
| Other | More service |
| Other | In general, the Metro Lines serve as an economic engine to the DMV. There will be cause and effect if you close stations and close them early. This will affect outlying businesses and tourism and other important cultural access for people in the DMV. It may especially effect the carbon levels and the congestion in the DMV. |
| Other | need more frequencies and late night service for essential workers. |
| Other | Collaborating with PGCPs so middle and high school students could ride Metrobus for free would greatly reduce pressure on the broken school bus system in the county. |
| Other | If trains will be affected, the buses will have to be the other option, as long as they are more and with open windows! |
| Other | Buses are slower and I would be unlikely user versus Metro train. |
| Other | I support phasing in additional service. However, none of these lines have any impact on me. |
| Other | Busses are most effective as a form of travel when wait times are less than 15 minutes, particularly/especially at night. |
| Other | I don't use metrobus regularly enough to have an opinion |
| Other | Its not enough - lets run more frequent buses on more routes, and have WMATA publicly pressure DDOT and the DC Council into expanding dedicated bus lanes. |
| Other | I think 75% of pre pandemic levels is too high too soon. I think that if they are going to save funds they should do it now and wait a few months to return to 75% |
| Other | Any increase in bus service is positive. It is the transit option most used by lower-income riders and essential workers, and should be the beating heart of the regions transit network. |
| Other | Esta bien |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | I've seen far too many low occupancy buses pass me on the road. Larger buses are too expensive in terms of cost, resources used, accident prevalence and impact, and maintenance/driver skill. Smaller vehicles (short commuter buses, need to be more widely applied to the service. |
| Other | Im concerned about changes on the Anacostia lines affecting up to 10% of riders. Isnt this where constituents are *most* likely to lack alternatives? |
| Other | These are not routs I usually take, so it's not appropriate for me to comment. |
| Other | An old transit professional told me the when tampering with schedules, never fool with the first and last runs. This looks like worse than that. |
| Other | It needs to scale to the riders, not to your cost cutting measures |
| Other | I don't take the bus too much other than if I'm in the DC and need to get somewhere because I don't Drive. |
| Other | I want to acknowledge how grateful I am that metro has kept as much service as it has. |
| Other | It does not affect the routes that I use but it does affect routes that serve a lot of workers in the retail and food service industries who are reliant on public transportation. |
| Other | Turn more routes over to the local MD or VA county or Virginia City bus lines |
| Other | The more the better, especially if metro rail will be less useful. |
| Other | I dont use the bus regularly, but if the proposed changes were to happen with the metro I anticipate Id have to rely on MetroBus more. |
| Other | I don't ride metro bus as much as rail, but with how many lines are being eliminated this would be hard |
| Other | I would likely not return to commuting until after service has increased, so its fine. |
| Other | I think it will be wonderful to have a way to get home safely on the weekends again. |
| Other | More frequent buses are needed. When I commute somewhere, if my bus is running early and I miss it, then it can be up to 30 minutes until the next one. This gap is not acceptable and leaves people without transportation. |
| Other | We are still not sure when we will begin to use bus and subway again |
| Other | I like the option to expand coverage... While I dont take the metro bus, my children have frequently and it is an important and safe way for them to get around the city. |
| Other | I dont personally use the Metrobus often however I have seen and know that people of lower socioeconomic status heavily rely on the Metrobus to cost-effectively and easily get to places. I wouldnt want to remove these resources from those who may need it. Some people dont have the luxury of getting a car and the bus may be the only want to get around different parts of the DMV. |
| Other | I dont know enough about the metrobus service. |
| Other | Metro bus is the worst run bus system I have ever seen, and I have lived in Los Angeles, San Francisco, and New York City. It is never on time, it is never regular, and I have been stranded more times than I count. It is an abomination. |
| Other | I dont ride any of these bus routes. |
| Other | Make bus routes convenient and reliable and people will ride. |
| Other | I am not riding the bus now and dont anticipate riding it regularly for the foreseeable future. In any case, none of these bus lines are ones that I would ride. |
| Other | There are many people that rely on Metrobus services that would benefit from increased routes. |
| Other | Uncertain of employers plans over the next 18 months. |
| Other | I take the bus often to different parts of the city |
| Other | If I have to sacrifice rail service, I expect Metro to make up for it by improving bus service to cover the loss of the trains. |
| Other | Bus service is needed to make up for reduced Metrorail |
| Other | Very concerned about many eliminated routes second half FY22. |
| Other | Please control bus fare increases if possible. |
| Other | Phasing service back in as we start to creep toward normalcy seems like a good idea. |
| Other | The metro bus schedule should reflect the openings times of the restaurants and bars in the city. If opening times get pushed back, metro bus should also extend service later to accommodate those people out spending money and stimulating the economy, along with those working in those establishments. |
| Other | It is our fervent hope that Metrobus service and Metro keep all services at all hours as before the pandemic. There MUST be expanded overage for commuter and school-based travel. |
| Other | If you shut down Archives metro, there is absolutely no reason for me to get on this unreliable bus route that takes me no where else, and drops off over a mile from where I live with no nearby parking. |
| Other | Not necessary for me to provide expanded service |
| Other | does not replace Metro service from East Falls Church Station |
| Other | I am happy with phased service increases, I am in favor of increasing metrobus and rail services |
| Other | Bus service should be expanded. I live a mile from the nearest Metro, and I so seldom see any buses that I have no option but to walk. |
| Other | Me nuevo en Virginia uso diferentes lineas y la unica propuesta que veo es que van a cancelar las rutas y no me conviene por mi trabajo |
| Other | I dont use any of those routes |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | I also use the Circulator from Woodley Park to the theater district along 14th Street. |
| Other | Bus service from poorest areas is very important. Bus service to all public High Schools & Middle Schools is important, since school busses don't allow for all before & after school events. |
| Other | Ridership should increase post-pandemic. Why would you cut service then? |
| Other | Does not help NOVA at all. |
| Other | I do not commute or run errands by bus regularly. I do try to use the bus as a non-car alternative for discretionary trips, like going out for dining, entertainment, and socializing. A regularly available network of bus routes extending into downtown and out to more residential neighborhoods helps me to want to use the bus when I can. |
| Other | I don't have a car so any expanded access on public transit would be fantastic |
| Other | I would walk because I have time and patience, but that's cutting you guys out of the equation so. |
| Other | It's critical that service be restored to low and moderate income communities and for school age kids |
| Other | Continue to ensure masks and social distancing since vaccination rollout has been slower than anticipated - we won't have a critical mass of vaccines until at least July, and a critical mass of people vaccinated until September at the earliest, according to Fauci. |
| Other | Metrobus has seen a much less steep dropoff in ridership compared to Metrorail as it actually connects essential workers to where they need to go. There's no reason this service should not be at pre-pandemic levels ASAP. |
| Other | What are the 10 additional lines? |
| Other | buses do not replace trains I need safety while traveling late at night and waiting outside for 30 minutes at a signpost is not safe. |
| Other | I find many metro bus routes redundant to metro trains and those should be eliminated. |
| Other | No comment. |
| Other | Thank you |
| Other | Why is it so critical to take away from riders? I have a car and do not ride a metro bus. Even so, I want that service to be available should I need it and for others who do rely on Metro bus. Good Public transportation is a big plus in this area and a great selling point. |
| Other | Affects workers, fixed income groups the most |
| Other | Metrobus should return to 100% capacity immediately. Ask for federal money for your budget shortfall - ask the President, ask anyone - this is really important and the federal government needs to know what is happening with Metrorail and Metrobus. |
| Other | Please don't cut ward 8 buses or green line ride every day to work |
| Other | I have always preferred metro over bus because it is more reliable, but this does impact those people who do rely on these forms of transportation and have no other means to travel. |
| Other | Our poorest fellow citizens are most dependent on Metrobus service; that service should be there for them, for DC visitors, and for the rest of us who may need the bus on occasion. Washington is a world capital; we ought to have world-class service. In other countries, buses are available, although smaller vehicles may be used on some routes. Perhaps Metro needs to look at diversifying its fleet. |
| Other | LOL. unless survey takers recognize any --- C14, D2, E2, G2, M6, NH2, R12, X8 or D2, E2, G2, H12, M6, NH2, T14, V12, X8 the question is useless. Restore full or partial service to 10 additional lines so which ones? What research has been conducted to determine where people go to and from reliably and most often and when? Are you willing to close all the Amazon-friendly stations and bus routes when all the Amazonians drive cars instead of taking metro. |
| Other | Service frequency needs to be increased as much as possible as soon as possible. Many metro busses have been overcrowded during the pandemic due to lower travel frequencies. Those who have cars will only ride transit if it is convenient. Please treat all your riders with respect by providing regular and frequent service so that traveling by bus is more convenient than traveling by car. |
| Other | Given there is no concrete information on frequency and expansion, it is hard to accept on good faith something that WMATA states, given that WMATA prefers service cuts before any other budget reconciliation measures. |
| Other | Yes, this is good! |
| Other | I am supportive of expanding bus service, generally speaking, to allow people to live car-free |
| Other | I am not planning on breaking quarantine any time soon. So for the immediate future, it is not important that metrobus run at all. |
| Other | It is important that we have a Metro Riders advisory Council like the one we had in Pittsburgh PA. They worked closely with the Port Authority of Allegheny County. |
| Other | This seems fine. |
| Other | work for the Federal Government and teleworking until we return to work post pandemic |
| Other | This seems reasonable, as long as the plan is to ramp up service back to normal levels by the end of the year. |
| Other | Metro is proposing to eliminate service ENTIRELY on the North Van Dorn corridor to King Street. This is a densely populated residential area containing many seniors and people with no other form of transportation. Eliminating this service will mean the only option would be to walk up to King Street to the DASH bus. Full time service on this line was suspended in 2015, and now, we will have no service *at all*. |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | Clearly you do not see the importance of Metrobus routes which are not Metrorail aligned or which operate where there is no metro service. Obviously, your proposal accommodates your need, and disinterest in providing local bus service. You seem to remove the needs of the transit dependent, in favor of those more affluent. Those financially able to do so have shown they will find non-metro alternatives and may never return. The transit dependent-sustain metrobus and will continue to do so until you finish your social engineering plan to eliminate them completely. |
| Other | Bus frequency needs to ramp up much more quickly. |
| Other | Make sure Bethesda has a direct Metrobus service to Washington. |
| Other | My primary commute was on Metro rather than by bus. |
| Other | I am in favor of any expansion to transit services. |
| Other | No comment |
| Other | Please increase safety and compliance of mask wearing on buses |
| Other | This looks like minimal service increases compared with the proposed reductions. |
| Other | The late night service would be a huge benefit. |
| Other | Please consider most heavily travelled routes AND routes servicing low income neighborhoods dependent on public transportation, especially those without metro available to them. |
| Other | Good idea to announce in advance when service will increase. I'm sure I'm not alone in my belief that I need to know when Metro will have reasonably frequent service (at least once every 15 minutes) in order to be able to commit to a commute again. |
| Other | Look at this time as an opportunity to permanently discontinue routes that mimic metrorail or have low ridership. Much easier now than when buses are being used...even at low levels |
| Other | Planning to restore and increase bus routes generally sounds like heading in the right direction |
| Other | School kids use the metro bus as an alternative to school bus - we also find that it is important going up and down Rockville Pike for the Montgomery College. lots of routes For example from Rockville Pike to College park. |
| Other | Please consider keeping Metrobus fares reduced, or providing fare waivers for low income DMV residents. People are more financially strapped now than ever due to the ongoing economic damage of covid. They shouldn't have to lose out on transportation to jobs, medical appointments, or family because of a bus fare. |
| Other | I don't like to take the bus. I prefer metro. The bus system is very unreliable, uncomfortable, and terrible to wait for in bad weather conditions. Please invest funds to metro instead of bus. |
| Other | The key impediment to use of metro is concern over the virus. When vaccination increases, ridership will increase. Weekend use is important for being able to get downtown to monuments and museums when open |
| Other | We have moved from Clarendon to Alexandria and use the bus way less, but see it as an essential service. Society needs a viable mass transit plan |
| Other | With proposed plans to cut back metro rail I feel as though increasing metro bus services is essential |
| Other | I am concerned that I will not have a viable way to commute from Fairfax/Burke to the Pentagon. |
| Other | Service should be returned first, only by actually running services can we see a return of ridership. Otherwise you are playing a game of chicken & egg that is destined to end in a death spiral of services. |
| Other | get to school on time |
| Other | STOP letting people just Hang Out at the bus stops and metro stations |
| Other | We would probably use the buses if they ran more frequently than at present. |
| Other | I do not own a car and I depend on the bus to get me to the train station |
| Other | Probably the wisest choice |
| Other | The most important point is to have the buses really running, running on time, and let people on. Many complaints were sent about how many drivers do not care for people and even do not stop for people to get on. |
| Other | My new work location in Ballston is not conducive to riding Metrobus to the Pentagon. I will have to drive to an orange line station or directly to my office. |
| Other | Metro is my main transportation service and buses complete the service |
| Other | Im glad to see increased metro service and the important expansion of coverage in September 2021 for commuter and school travel. |
| Other | I would like to see a detailed plan of the May schedule improvements to be able to determine if that plan works |
| Other | I would rely heavily on the bus to get to work, especially if there are cuts to metro service. But I don't know when I will be called back into the office, although I don't expect it will be before July 2021 |
| Other | Metro needs to stop being so effing racist; People of color need the bus to get to and from their jobs especially the east west lines since metro rail doesn't help on east west movements to get to jobs |
| Other | There's curfew not allowed out between midnight and five am I obey that rule |
| Other | I support the phased increase of service to match travel patterns. |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | Again, METRO needs the Federal government, the States or the local governments to make up for the deficit. If not, closing stations and reducing service is the only other viable option |
| Other | That late night service would need some safety features. People are getting more rude, more immoral, etc |
| Other | But these should be in addition to rail. Metro rail should not be cut in favor of bus. |
| Other | I support plans to increase bus service and make it as efficient and convenient as possible. and I support lanes for busses only to keep buses moving. Give people incentive to take the bus instead of driving |
| Other | NA |
| Other | The metro buses are subject to road conditions such as traffic and signals. They do not carry as many passengers as trains and are not as effective as trains. |
| Other | During 2020 I rode many bus lines and I was entirely dependent on those buses to get to/from work on a daily basis. Without them I would not have had access to income. Asking which bus is closest and which bus I rode the most does not give WMATA anything near an understanding of the bus usage. Many people ride multiple routes, and transfer at least once if not more, to get to/from home and work. You need to ask this entirely differently. |
| Other | I support a phased re-introduction of service, but urge WMATA to do so as quickly as possible, especially given new federal funding for transit agencies. Bus riders are already deprioritized, but we can and should offer excellent service on the bus. |
| Other | I live in the Palisades and do not use these routes |
| Other | The sooner you can phase in a return to service the better. Once folks start switching to driving in by cars you may not get them back as riders. |
| Other | I basically use the bus to go up and down Wisconsin Ave -- between Friendship Heights and Downtown. As long as those buses run and you don't have to wait too long between buses, I'm good. |
| Other | Too many changes to adequately assess. |
| Other | Service should not be cut period regardless of ridership. A lot of essential workers and the elderly rely on Metro as their only mode of transportation. |
| Other | This timeline makes sense with the return of trips |
| Other | At this point, I'm working from home as my employer has shut down our DC office because of the COVID-19 pandemic). Once life gets back to normal (when the pandemic is over), whenever that is, employees in my office are likely to be expected to go into the office again, so while a schedule like this may work now (i.e., in 2021 while the pandemic is still going on), it's not likely to work once the pandemic is over and other workers like me go back to working in the office. |
| Other | Eliminating the bus line in my community leaves us to walk farther to obtain a bus line which will also cause for multiple transfers. What are the seniors or the disabled supposed to do. |
| Other | Metrobus service is vital and having it back to pre-pandemic levels should be expected. |
| Other | Improved bus service will be very positive. |
| Other | Please don't reduce the number of buses running |
| Other | Don't use metro system during the weekend |
| Other | Cutting the hours and every interval is the best solution for the 2021 budget. Closing down ANY metro station is very devastating as the economy is starting up, passengers are going back to work as COVID reduces and vaccinations for everyone increase. |
| Other | These make sense. |
| Other | Not really that sure as I'm not a frequent bus rider. Happy that there's a plan for restoring service as people come back. |
| Other | My teleworking is currently through the end of June so the proposed plan works well for me |
| Other | N/A |
| Other | Metrobuses are an essential piece of the metro system for many DC residents. |
| Other | This makes sense, increase service as people return to in-person work. |
| Other | I do not use metrobus frequently |
| Other | Increase fares IAW data on peak hours and peak stations / routes, in order to flatten peak demand and to increase revenues, as a first resort, before reducing service, as a second resort. |
| Other | You are eliminating the bus route in my neighborhood (south Fairlington). Walking to other routes is not always feasible and the bus routes are quite crowded, especially during rush hour. Eliminating the bus route also harms residents who rely on the bus to go to Shirlington (a longer walk with a significant hill that is almost impossible for people who are elderly, disabled, pregnant, or traveling with infants and young children). |
| Other | Many of us now have made three fundamental life changes over the past couple years. These life changes essentially allow WMATA to go forward with the proposed service reductions for the following reasons and because of the following life changes: 1.) We moved from far out suburbs such as Springfield to Arlington so that we could be walking distance from high traffic Metrorail stations such as Courthouse and Rosslyn. 2.) Our income is derived from SSDI partly because we are incapable of getting the good jobs barely remaining after our occupations were outsourced, automated, or otherwise eliminated altogether. 3.) We now reside in Section 8 apartments which are walking distance from the aforementioned high traffic subway stations. |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | I guess I dont understand why all the proposals for bus service are around restoring or adding service, but all the metro proposals are around cutting services. I personally avoid the bus because it takes forever to get somewhere; the metro is much better. |
| Other | I think this makes sense to account for increased riders post pandemic |
| Other | Sounds OK, but not positive; thus, not sure. |
| Other | Buses get into traffic and stop frequently. It is not as convenient as Metro train. |
| Other | I know how critical Metrobus and county bus services are for so many so to me, as a fellow citizen in this region, better bus service is much more important than better Metro train service for me. |
| Other | My primary route for commuting directly into DC via the bus would be eliminated. Reducing service on Columbia Pike also impacts those who need to take a bus to get to a metro system. |
| Other | I stopped riding the bus due to the poor schedule written to schedule a trip. |
| Other | I think it sounds good, but I am not familiar with all the routes mentioned. |
| Other | Are you trying to drive more people to riding the bus rather than the Metro? |
| Other | Preferably that budget would go to the metro rail lines |
| Other | None of these increases would affect areas where I use the bus, though adding service seems generally like a good idea |
| Other | I'm always in favor of late-night bus routes. They are absolutely needed. I put "unsure" because you didn't say which routes. |
| Other | This appears to be reasonable to me. |
| Other | I currently telecommute but will likely be going back to work this summer or fall. |
| Other | I need more frequent rides |
| Other | Do everything possible to provide extensive and efficient MetroBus service as many residents depend on it. |
| Other | The bus section of the budget plan linked in this question is very confusing. It is difficult to tell the frequency at which buses in various lines would run. |
| Other | I appreciate the focus on restoring/expanding service as demand increases. |
| Other | This seems reasonable and sensible, unlike several of the rail proposals. |
| Other | Please restore bus service as soon as possible to all areas! |
| Other | Please do this. The bus is a lifeline, especially if you close more metro services. |
| Other | I currently work from home but will return to the office post pandemic and will need the bus. |
| Other | Enforce fare payments!! Many ppl walk on the bus without paying. |
| Other | too bad it is so inefficient to open the windows (too bad one cant open the windows at all!) |
| Other | hopefully, the subway will stay open past 9pm |
| Other | People work and NEED convenient access to public transportation |
| Other | This plan would completely eliminate the bus route I use to get to work. It would add a significant amount of time onto my travel as id have to walk further than I already do to catch the correct bus. |
| Other | I like the idea that Metro will offer to restore full or partial service to 10 additional lines to add more access across the region. |
| Other | This does not include increased service for buses that service my neighborhood. |
| Other | If trains are decreased might need nus |
| Other | I take the train not the bus |
| Other | People that ride the bus, especially where not near metro rely on this service and dont have options. Need reliable bus service |
| Other | There seem to be no bus connection from VA to DC |
| Other | More options for lower cost transportation helps everyone, especially late riders who are likely service industry/ lower salaries workers. |
| Other | Night and weekend service is key |
| Other | I dont think this plan affects me really since I expect to be continuing to telework over the next months and I mainly commute by metro rail. |
| Other | Need more data to fully answer this question. Equity and wealth gap balanced services should be key in these decisions. |
| Other | This plan does not describe how these service levels compare to pre-pandemic service. |
| Other | I really hope Metro can secure additional funding. I fear this will really hurt those that have all ready been hurt the most. |
| Other | Im in favor of increasing bus service as quickly as possible, since many people, most especially low-income residents or those who lack other transportation options, depend heavily on bus service. I would be strongly opposed to any decreases in existing bus service. |
| Other | If possible, I prefer reductions in bus service rather than train service, because there are more alternates available for bus services. |
| Other | I dont use any of these stations but Im sure it will help a lot of people |
| Other | why should virginia give metro any money when metro will cut lifelines to workplaces? |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | I think its important to provide regular, frequent, and affordable buses. I dont understand why Circulator bus service is mostly free (so far as I can tell, it is designed to make it easy for rich people to get to restaurants), but working people must scrounge up the funds to pay for getting to work. |
| Other | Believe bus service is more important than rail; spend budget on more bus lines, vs more rail service. |
| Other | Most important consideration for bus service is to make sure there is adequate service where Metro trains are NOT a good alternative. |
| Other | I depend on public transportation to go to work and for my personal interests, the hours that I have to work and personal interests should not have to revolve around metro, you have an obligation to the public to serve the public. The post office has not stopped delivering mail, the fire dept does not stop coming to emergencies. I moved to the Grosvenor area because of the metro being right there, am i supposed to see my home and move ? |
| Other | I support expanding bus service, particularly in areas that are less served by Metrorail. While I often rely on Metrorail for my daily commute, I occasionally use the bus as well (particularly early in the morning/late in the evening when there is less traffic). |
| Other | I would focus on commuters and school-based travel and make deeper cuts elsewhere. |
| Other | This seems fine. |
| Other | It is hard to predict what life would look like starting this summer when most have been vaccinated. If expectation is for folks to go back to work, then transport needs to up its services accordingly. |
| Other | this makes sense as people start to return to work for the fall, but may not work if things start to open up sooner. |
| Other | Appreciate the increased service! |
| Other | With current vaccination efforts, many in the workforce are expected to return to the office on a more frequent basis. 75% does not meet these demands, and ultimately leads WMATA customers to search other methods of transportation (such as renting parking spaces in urban areas) that will decrease WMATA ridership in the long run. |
| Other | Metro bus must prioritize bus services for frontline workers traveling from SE to NW medical and nursing faculties " these services have always been inadequate and the pandemic has made it much worse! |
| Other | I cannot find the specific lines that will be added, so the above is just a guess. |
| Other | If metro rail service is drastically reduced, bus lines and bus service hours will need to be drastically expanded. Much of what would need to happen to the bus routes depends on whether metro rail carries out the drastic cuts in rail service and metro station closings. |
| Other | Many seniors and disabled people in the area cannot drive and are stranded without bus service. All bus lines should be run throughout the day, and more lines should be added so every neighborhood is covered. I dont care about your budget, you are providing a need for the public and all groups matter. You dont want seniors who shouldnt drive any more to be reluctant to give up their keys, and you dont want to have them homebound, with substantially reduced lives. Providing public transportation to all groups at all reasonable hours should be part of your public charge. |
| Other | September expansion if it is effective will make a big difference for people in the community |
| Other | I live about a mile from rail, so even when I take rail, I get to the station on the bus. I have concerns about "30-minute" frequency. When bud or rail are currently off-schedule, I can plan to wait another 15 minutes. Having to build in an extra 30 minutes for each trip is untenable. |
| Other | Adding late night service would accommodate my schedule. |
| Other | Housing was chosen based on bus routes and their service. Post Covid now that they closed it makes commuting to work almost impossible! Please bring back more bus routes. |
| Other | Reducing train service is not acceptable. Does the Metro Board even ride the Metro? This proposal is not worth considering for the Nations Capital. |
| Other | Please restore bus service as soon as possible to all areas! |
| Other | It seems that WMATA is intent on ending bus service to sections of NW DC. If this is the strategic or long-range plan just do it now rather than making these interim cuts that just degrade service for the purpose of causing people to not ride the buses. While degrading service in the hope of lowering ridership is a strategy before cutting services yet again, there should be a more efficient way to eliminate bus service to this part of the city more quickly and using fewer resources to accomplish this goal. On time arrival is very poor, buses not showing up is very common; route consolidations to improve service, as the reasons for cutbacks as expressed over the past 8 years at least, have never been accomplished. All the ridership in this part of the city gets is more inconvenient routes, fewer arrival times, increased times buses just dont show up. The only benefit to these new strategies is to decrease ridership because the system is increasingly unreliable. |
| Other | Im still trying to find your bus map. |
| Other | As I (and most people in our region) expect to begin using public transit again in the latter part of 2021, for commuting and other activities, increases to bus service would be beneficial. |
| Other | This is a reasonable plan to safely expand capacity on the bus lines and grow service as people get ready to return to their previous ways of traveling |
| Other | The link you provided doesnt link to a plan-- it sends me to a page with lots of options, and I dont know where to click to get the proposed service plan |
| Other | Whatever brings the buses back to full, my friends. |
| Other | THAT PROPOSAL WILL DEFINITELY WORK!!!!!! THAT IS SOMETHING THAT DC RESIDENTS AND MARYLAND RESIDENTS ARE MOST IN NEED OF RIGHT NOW!! |
| Other | Do not cut any addition service east of the river where I live. This continues to further racial inequities. |
| Other | This is great - the more routes operating at full capacity the better for the city. |
| Other | Bus deals with Traffic and not reliable as form of transportation. less buses more metro and more environmentally friendly |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | Yes yes yes to all this. With buses in DC free people rely so much more on buses Ive noticed, I definitely ride more frequently |
| Other | Skip every other stop downtown. You do not need a stop EVERY BLOCK. You're willing to shut down metro stations because another is nearby; why not bus stops?! |
| Other | There should be better coverage in Southern Prince Georges County!!! |
| Other | I am in favor of any changes that would increase bus service in the region. |
| Other | Im all for expanded service both geographically and around the clock. One of the many challenges of living in this region is that the public transit doesnt go where you need it to, or if it does, it doesnt go WHEN you need it to. Try having a job in the city with a shift that ends after 7PM on a Saturday and then try to get back to your home in Fairfax. Youre going to have a bad time of it. |
| Other | If this is 75%, what are you planning to cut? |
| Other | Any plan to increase bus service and frequency is a step in the right direction. |
| Other | Sounds very realistic--a sensible approach to unknowable future levels of ridership. |
| Other | To reduce harmful pollution, we need far more public transportation not less. |
| Other | Metrobus service should be eliminated on Sundays unless there is current data to show that buses/ridership is warranted. |
| Other | As a shift worker, late night bus service is essential, esp with plans to end metro rail service at 11 pm |
| Other | I expect for my transportation needs to change this year and it is difficult to anticipate what my future needs will be. |
| Other | concerned that people who live farther from dense transit areas will have a much harder time with this than i do |
| Other | This is the way it should be. Novchanges |
| Other | Seems to limit 16th Street bus travel from Alaska Avenue north to the circle at Colesville Road |
| Other | Expanding service is what should be done, especially since the people who depend on bus transportation live in the most disconnected parts of the city and have the fewest economic opportunities close to home. |
| Other | Phased increases are logical. |
| Other | I support increases and bus service, just like with the metro. Anything we do to make it more convenient well increase the ridership and make the whole system stronger |
| Other | I am relatively new to the area. I am very concerned that the Metro changes are failing to consider the expected growth in traffic. Seems this is the time to invest in public transportation intelligently |
| Other | Why is there no Metrobus service connecting the Wisconsin Avenue buses from Georgetown to Rosslyn????? |
| Other | Restoring late night service should happen ASAP. |
| Other | It depends on if the close the metro. Without the blue line from Van Dorn to DC Im screwed |
| Other | Please ensure evening and late night service to as many areas as possible. Please do your best to ensure that no one in DC must walk more than 1 mile to reach a bus route. |
| Other | the changes for March 2021 have no bearing on my daily commute. Overall some additional late not bus services is needed. |
| Other | As MCPS schools start to reopen this spring, I am concerned that students wont have bus service for this school year. |
| Other | I use more than one buses every day. |
| Other | Phasing in seems right if you can really assess the levels of need as they increase and decrease. |
| Other | to protect passengers and riders it makes more sense to increase frequency faster - more busses=more spaces=more space between riders and drivers. Also people who use the bus are highly likely to be essential - they need frequent transit throughout the pandemic |
| Other | There should be bus service as late as the train service, to provide service to customers who arrive at stations on the last train. |
| Other | I dont really live on these lines. |
| Other | Phased service increase is a great plan and it is what we like to see, as people are returning to work and are now able to visit their families. |
| Other | Rush hour schedule should continue. Commuters need this. I need this. My community needs this. Congress appropriated 1.9 trillion. Only 9% is going to covid. Get Congress to give more money |
| Other | This phased service plan seems reasonable. |
| Other | As long as its increasing. |
| Other | I dont see how I can get to the Pentagon to catch bus service. |
| Other | I am worried after reading the last bit about rail what you guys have planned for the buses |
| Other | I can't tell what the impact will be on those off who rely on metrobus |
| Other | Why are we talking about reducing Metrorail service and increasing bus service? This will result in dramatically more emissions and will bring serious environmental consequences to the region -- which we must avoid at all costs (as everyone should be well aware of in this day and age!). I do not take buses late at night and dont take many buses on weekends. Keep the Metrorail open on weekends and at night (and do not shut stations) to keep our environment clean and provide the services that people need and use. |
| Other | I mean, if theres no more metro after 9pm then we need massive increase in metrobus late night services (i.e. frequency). |
| Other | I cannot remember the bus route numbers for all of the buses I ride on, and I cannot find them easily. Given that, I tentatively say that the plan would work for me. |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | Public transport is needed for people who work to take care of their responsibility for the economy and more... |
| Other | Basically I have to switch my ride from metro to Fairfax connector if I don't want to drive. Or, Metro is forcing me to drive to the nearest station to take a metro rail. Have to pay gas and parking. Not economical for customers. |
| Other | Impossible to get to work without walking a long distance, and impossible to get around for social activities and appointments on the weekend. More and more people are opting to buy cars -- exactly what a large city like Washington should be trying to discourage. |
| Other | I don't ride the bus, but this is a public service that people rely on. |
| Other | The full service needs to be restored by the time most people are vaccinated, which seems to be June 2021. |
| Other | I live where I live because of the bus routes. I need them to get to my medical appointments and church. There aren't enough East-West routes in this plan at this north in the city (Cleveland park). I need the bus that goes on Porter st across Connecticut, especially if you close the metro stop in Cleveland park. How am I or anyone at this north in the city supposed to get to Wisconsin? It is too steep to walk up Porter from Connecticut. |
| Other | ANY expansion of Metrobus is a good thing--if they actually show up. If folks can count on reliable, timely service, something Metro struggled with LONG before the pandemic, then expand away. |
| Other | WMATA should not be wasting scarce sources on things it does not do well. It is essential that service cutbacks be accompanied by commensurate reductions in staffing and facilities. Freed up funds should be returned to local governments who have a demonstrated ability to do transit better than WMATA. |
| Other | Please please please make bus travel more reliable (ie more frequent buses). The only way you are going to increase bus ridership is by ensuring people don't have to wait 30 minutes for a bus - which is not a valid option for people carry heavy, refrigerated groceries, for example. |
| Other | I am in favor of more service. We need more public transit options, and more frequent trips to increase the appeal, reduce crowding. Having good and effective public transit is an equity and environmental issue. We need to make it more appealing and easier to use public transit, so I am in favor of service increases. |
| Other | I am a power wheelchair user and cannot drive. I have no family to help me get around town. Metrorail is my ONLY means to get to my full-time federal government job and my weekly disability-related medical appointments. Any cuts in Metrorail service greatly impacts my life in a very adverse way. Telework has not been a good option for me because I am much better disability accommodated at my office than anywhere else. Nevertheless, if there are cuts to Metrorail service, bus service is my only sensible alternative. |
| Other | Maintaining the status-quo is fine. Service cuts is not. |
| Other | This is exactly what service should be doing - increasing as people go back to work. That this is polar opposite from the train budget proposal is baffling. |
| Other | Adding more service always sounds like a fine idea to me. Who would complain about it? |
| Other | Metro needs to restore full service now and go back to a regular weekday schedules. It's been a whole year now Sunday schedules need to be just for Sundays |
| Other | Reducing bus service has the same impact as reducing train service. It causes excessive crowded, which means that there arent disabled seats available for riders like me who need a seat in order to ride safely. It will also mean that buses and trains are very crowded, which I cant imagine being safe at all, consider Covid will still be circulating. Even with vaccinations, there are mutant strains, and it may become a seasonal disease like the flu that we have to contend with every year. Crowded buses arent safe. Crowded buses that dont have disabled seating render the system inaccessible for riders with disabilities. |
| Other | I do not not plan to use Metrobus before the end of 2021, but this sounds acceptable to me. |
| Other | i use these buses to transfer to the Pentagon so my commute would be impacted in both ways just to get to the office. |
| Other | If federal agencies return to the office after June this will result in overcrowding. |
| Other | Weekends, then late night sounds like the right order. Please dont expand service between 12-2AM if bars are open and virus transmission is still high, because we dont need disorderly people spreading disease. September 2021 is important for schools; cant tell yet if commuters will return by then. |
| Other | Metro bus is not as vital as Metro rail, Metro bus ridership is very low, but Metro rail is a MASS transaction, it can carry hundreds thousands passengers per ride. |
| Other | It is not clear to me that there would be any public transportation available from DC to Virginia after 9:00pmâ€”a real problem for people who work evenings! |
| Other | Yes I support restoring more metrobus service to serve the communities that need it |
| Other | A lot of the stations that are being considered lowridership are the stations that a lot of us working need. I work at night and I do take metro to and from work its foster I save money and its very convenient for me. I work in Arlington near Clarendon Station my commute isnt long at all and I dont have to worry about a lot of transferring from station to metro bus but if Clarendon gets closed Ill have to change up my whole routine. |
| Other | I am all for increasing service and getting things back to how they were as someone who uses Metro as their main form of transportation due to not having my license due to my disabilities. |
| Other | I have no clue what this means for commuting from Burke/Fairfax |
| Other | - |
| Other | Focus bus service to replace reduced rail service. |
| Other | I use the Fairfax connector to get to the Vienna Metro station. I dont know how these changes would affect me. |
| Other | I was riding the bus pretty rarely before the pandemic, but as I look at other job opportunities, I am considering taking the bus for work. |
| Other | I dont know what those lines are. Service seems curtailed on the lines I use but I am not riding right now due to coronavirus. |
| Other | Does not address the discontinuation of the D6 bus line |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | will have to wait and see |
| Other | Restore service soonest to routes serving low-income communities and those with fewer overall transportation options |
| Other | I rode ART buses more than Metrobus, but still used Metrobus on occasion. Whether or not the plan would work for me would depend on the details re. additional bus routes and hours. |
| Other | To the extent Metro rail service is cut or stations closed, restoring all bus service to normal, or increasing service, will be important. |
| Other | Do you know how much car service costs? |
| Other | Adding late night service is an amazing addition, and the phased plan seems like it is attempting to support as many riders as possible. Good plan |
| Other | I dont know enough about bus routes to know whether I can get from my home to work without a transfer. Id consider switching to the bus if I could get from home to work with only one transfer. |
| Other | While I understand the stop of bus from Edsall Rd and Indian Run Parkway during the pandemic, it is important to have a route from that area to Pentagon for military and government employees who work in Pentagon and DC. |
| Other | I agree. These schedules would make it easy to go to and from destinations. |
| Other | We know that Metro route metro bus will increase by metro bus is going to increase even more after September 2021 and then more frequently than not January 1, 2022 so I think we should increase more frequent train more if we could bus to every 5 to 10 minutes at all stops so and then they should close at 2 AM Sunday through Thursday and 3 AM Friday and Saturday they had the buses, in the metro rail run 24 hours a day |
| Other | I am on board with expanding access for students across the area. |
| Other | I do not take buses covered by these routes. |
| Other | Im unsure if this will work for me. Im happy to hear that service will be expanding in general, but I know that several routes in my area (Hyattsville) will be stopped altogether. |
| Other | Please dont restore service on routes that continue to suffer low ridership and where theres competition from Uber, connector buses, etc. |
| Other | Adding late night service is a nice idea but I do not feel safe waiting for a bus late at night so I would only use this when traveling with others--this would be a rare occasion |
| Other | It looks like you want to generally expand bus service around the city. Buses are an efficient and flexible way to get around the city and I am very in favor of expanding bus service in any way. |
| Other | Our limitations to using the buses are mainly how far the nearest bus stop is from our residence and how much longer it takes to get to places by bus, as well as difficulty carrying things like groceries. |
| Other | More Metrobus please. The bus connects neighborhoods more than the Metro. |
| Other | Restoring full bus service as soon as possible is essential to the recovery of the local economy. Bus service is especially important for low-income residents who depend on public transportation to get to work. Their contribution to the health of the private sector and dependable delivery of public services is vitally important to all of us. |
| Other | I know the stations closing at 9:00pm would impact me and the Smithsonian being closed impacts me too. Im on the orange line and that would also impact me, especially if theyre one of the lines where the train would come every 30 minutes. |
| Other | march is fine, may should be a bit more robust, sept should also expand more lines to near pre-pandemic levels beyond whats given above/on the proposal |
| Other | For Metro employees who have lost wages due to the pandemic, for extra hours and wages, acceptable. Also for the employees, during the pandemic, who still work in small businesses, around the region, to make sure they get to their destination would definitely help this current crisis for employment and transportation. |
| Other | M6 bus is a great asset to the homeowners that do not have a car. It is convenient and helps the Fairfax village community. Quick turnaround. History can show you this community had over Seven buses to assist this neighborhood and now there is one bus to come around Fairfax village community. It is needed so much. |
| Other | Definitely a great idea, especially as more people return to in-person work and more students return to in-person classes.Increasing bus service would bring in far more money for Metro, especially from those who work late at night and from those areas where Metrorail service is limited.Many people in the city do not drive, especially those with disabilities and the elderly and cabs are too expensive for many of the elderly and for those with disabilities. |
| Other | Please dont cut routes that service Alice Deal Middle School or other schools. |
| Other | None of these bus routes run near my home or workplace. |
| Other | The reason that I put - not sure - is because I couldnt find my normal route on your drop-down boxes, but I normally use the busline that goes down Clopper Road, to Shady Grove. I may have mistaken you for ride-on. Obviously, all the routes are important, and to be without bus service makes us worse than a third-world country, as their bus service is prevalent, and a necessary staple. I wish Metro the best, and I wish you to be profitable as well. I wish that you would spell out how much profit that you need and nail it down to a number, and then charge accordingly, so as to stay in business. I know, if only it were that simple. |
| Other | I do not regularly take the bus although I would if it were convenient my work. But anything to increase bus service I think is good. |
| Other | Im not a regular on any particular metrobus route. It provides the last mile on my journeys. |
| Other | The late night service needs to include the Silver Line, especially Dulles Airport. |
| Other | Looks like my main bus is unaffected but certainly seems like lots of other folks will suffer. |
| Other | It does not mention my bus, but: If you want to grow ridership, increase the frequency and convenient service. |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | Yes, this plan would work for me as a late-night essential-healthcare worker. I depend on three (3) buses to get me from work to home every night. It would be great having not to depend on an over-priced Uber/Lyft/cab to pick me up from a stop where the next bus isn't servicing because it's midnight. Looking forward to May 2021! |
| Other | By January 2022, workers will likely have returned to the office. Moreover, bus ridership has not decreased nearly as much as rail ridership during the pandemic. Therefore, bus service should be restored to maximum levels expeditiously. |
| Other | Would cause Crowding and increases travel time |
| Other | horrible on Sundays and on week-ends. Late night service not going to help most who will not feel safe riding at that time. Better to keep metro open later! If screwing up train service, then bring back transfers from metro to bus---if close off Cleveland Park, folks will take bus back to get to that neighborhood. same with other stations you proposed insanely to close. And i cant ever get to juror service again. |
| Other | I dont know - late night service and frequency is critical. |
| Other | Covid-exception for telework expected until at least Fall2021. |
| Other | I often use the service on Nebraska Avenue NW north of Massachusetts Avenue, Military Road NW, 30th Place NW, Utah Avenue NW and the Pinehurst Circle. |
| Other | The best thing about this plan is that it does not reduce bus service from what I can tell. I question how many people will ride the bus at 2am, but there are definitely people who work shifts that would utilize the service. |
| Other | You seem to be keeping early- and late- run commuters better in mind. I rely occasionally on buses, but I'm acutely aware they are a lifeline for many. Will you consider adding late night bus ribs to parallel metro like ones after 9 pm, if that is the cut you choose? Nurses,, orderlies, police, fire, custodians, restaurant workers all need late (post 11 pm) transit options; add teachers grocery store and shop workers and health aides to the early morning version of that list.All the same price I urge you to remember in your planning. |
| Other | Too early to restore full services. That is where you can do cost saving temporarily. |
| Other | I ride the metro every day. I need transportation to my doctors appointment, grocery store, checking on my family, and the most important is my job. |
| Other | As COVID-19 Vaccinations and health and treatment opportunities continue to improve, I am more willing to include various Metro Bus routes into my daily travel requirements. Since COVID-19 Pandemic, last February 2020, I have eliminated certain aspects of my daily routines, and prioritized my daily travel requirements based on access to Metro Rail, allowing for greater health and safety requirements and social distancing. |
| Other | Dont need late night service! |
| Other | I have not ridden the bus because it was always crowded, dirty and very often late which caused me to be late or miss appointments. |
| Other | Extending Metrobus service along these routes is a good start, but Metrorail service MUST be extended as well. |
| Other | The buses from Friendship Heights to downtown are the ones that I use but this suggestion is a major and surgical cut for many people and they are probably the ones who need it the most. I understand that you need to make some very hard decisions but I feel for those people who use Metro bus for their livelihood. and depend on getting back and forth. |
| Other | I work at Georgetown University and, while no announcements have been made, I am assuming (hoping) that we will not return to campus until Fall 2021 at the earliest so this timeline sounds great. Well, August 2021 would be better as, traditionally, students return to campus and things ramp up in late August, but September is ok, too. |
| Other | Restoring and adding service is wonderful, but it's very difficult to weigh in on bus lines I don't use, the naming system of Metrobus lines is so opaque most people have no idea where most of these lines go/if they'll ever need to rely on them (and anyway even if I don't need to rely on them I'm sure other people do!!). |
| Other | While I don't ride the bus as much as I did when I lived in and/or worked in DC, it is a critical service for many, so increasing/restoring service sounds good to me. |
| Other | These routes do not affect me, but in general I am in favor of restoring weekday and weekend service on most routes unless alternate service exists. Bus routes should operate at least every 30 minutes. Look at creating trunk lines for areas not served by Metro and service local stops and trunk lines with local service if areas are not served by other routes. |
| Other | If metro closes EFC metro station, I will have to take metro bus for at least part of commute to Federal Center SW during the week during work hours (M-F). |
| Other | I like the plan, but please don't cancel the bus line D6 because I need that bus to go to my school. |
| Other | Please just keep it as it is :(I don't have a car, and I really rely on Metro Rail & Metro Bus to get everywhere I need. Without it, I cannot walk every distance (too far) and I cannot afford to pay for ubers everywhere I need to go, especially work everyday... |
| Other | I will be working on Capitol Hill in 2021 and hope to return to Metrobus commuting when it's safe. |
| Other | I will save me a lot of money if I can take a bus during the weekends that goes to the National Harbor and take a taxi from there instead of taking a taxi from Branch Avenue train station or Southern Avenue train station as I have to do now since there is no bus service in weekends to Fort Washington, Maryland. |
| Other | Half-hour wait times during rush hour commute could kill desire to use buses. |
| Other | Try and cut as few lines as possible |
| Other | As an employee on the I66 project, we have noted the current traffic volume only 5% below pre COVID volume. Airlines are calling back their furloughed employees. Improving public transportation will benefit the metro. Limiting schedules will drive travelers to other means in advance of recovery. People are ready to move and are making plans now. Don't miss the surge. |
| Other | This plan is good let's keep in mind that everyone wishes to get out more in warm weather. |
| Other | I have not taken the bus since March 2020 but when I am vaccinated and return to the office I will be taking it every day. I haven't kept track of what the current service is, as I am not using it, so I don't know how well it will meet my needs then. |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | People are very dependent on the Grosvenor/Strathmore metro station to get to and from work and to get around—especially those who do not own a car. Closing this station and many others would be detrimental to riders who depend on public transportation to get to work, run errands, and get around the city. Many people either cannot afford a car or are unable to drive. While I understand that the pandemic has been especially hard on Metro, it will cause even more undue hardship on riders in a variety of communities. I strongly urge Metro to keep ALL stations open. Additionally, as the pandemic gets under control, more people get vaccinated, and offices/businesses begin to reopen, even more riders will be even more dependent on public transportation. Please do not close Metro. It is a faster and more direct way to get around. The hours listed above also create a hardship on riders. If you miss a train, you have to wait a considerable amount of time for the next train to arrive. This can impact riders dependent on Metro to get to and from work. This is too limiting for people who are dependent on Metro. |
| Other | Im unsure how often the buses in my area would be running, to complement my route from Tenleytown to Farragut North. |
| Other | We need more mass transit in this region, not less. Improvements are good. Cuts are bad. |
| Other | Please think of the workers of low economic means that depend on public transportation to get to and from work |
| Other | None of the are on my route |
| Other | I'm an essential worker and I live nowhere near those lines |
| Other | Buses are already becoming overcrowded given CDC guidelines and mask mandates are not being enforced as it is. |
| Other | Reducing Metrobus ridership on certain bus lines would only increase ridership on other bus lines as well as deter people from using the Metro bus and seek alternatives. |
| Other | Only M-F peak hrs traveler |
| Other | Need late night service throughout the region. |
| Other | Buses fill gaps where Metro does not run, and as such, expanded service frequency and hours of operation are hugely important. The faster you can get it done, the better. |
| Other | Any expansion is good |
| Other | The bus routes I've used in the past two years and may continue to use are not majorly affected (70, 30SN/31/33 between Friendship and Foggy Bottom area, 96, 38B) so I think this would be fine. |
| Other | Please increase late night service on bus lines. |
| Other | Good to see increased coordination. Please coordinate more closely with local transit services such as The Bus and Ride On. Service would be vastly improved with simple small changes in timing |
| Other | I believe in Public Transportation. I believe restoration of these lines give people more options to travel around our great city and as more people use them it may even reduce our collective carbon footprint by reducing the need for cars. |
| Other | Just that I have so many friends who use Metrobus as well. Im not sure what works the best for them |
| Other | Keep all stations open. |
| Other | I personally don't ride the busses, but I have two disabled family members who live with me that use the bus extensively to get from Cheverly to get to many different places. They know the routes; I do not. |
| Other | I watch with great curiosity as Metro buses travel in Virginia. Metrobus is a reliable staple that, understandably, could factor in to budget needs. Please consider those patrons who may find it impossible to comment on this forum or attend virtual or public hearings. I am also concerned that many in that audience of patrons may have poor grasp of English and might therefore, never be heard. |
| Other | I ride metrobus to access the metro. The bus service availability that will work for me is contingent on specific rail stations being open. So it is difficult to say whether this would work for me or not given the other concepts under consideration. |
| Other | We must always have affordable transportation for anyone who needs it. It's sad that we have replaced basic bus service with expensive UBER and Lyft. Bus services should be affordable and reliable with regular schedules |
| Other | I depend on public service for all travel. A bad plan. |
| Other | This sounds great! I've often used the late night service pre-pandemic, and I'm really glad it's coming back. |
| Other | This looks really good to me |
| Other | Do not eliminate bus routes if at all possible |
| Other | Metro bus shouldn't be reopening of metro rail is looking at cuts. |
| Other | I like the increase plan but adding more money for people to pay I don't agree with people haven't been working |
| Other | none |
| Other | More service is always good. The issue with late night service is safety. Rail stations are just more secure than outdoor bus stops. People traveling to and from work at those hours are often some of our most economically vulnerable neighbors. |
| Other | Please extend bus service until 3 am |
| Other | There needs to be flex between the proposed Metro changes and the proposed metrobus changes to ensure that community is being supported with means to travel home that doesn't contribute to adverse effects. |

| Route | 2021 proposed Metrobus service changes |
|-------|---|
| Other | Yes, this works for me but I need for frequent buses now. Because this 20 - 40 minutes are a massive inconvenience; Especially when I have to take multiple to reach my desk |
| Other | Si es muy buena la propuesta de agregar más horas de servicio porque muchas veces uno sale y necesita tomar el bus demasiado tarde |
| Other | The plans for September 2021 will help the most |
| Other | People without cars need to be able to get around. |
| Other | All good, just education the bus drivers, that when they pick up passengers, they shouldnt be stopping on the way to make up time. I have to get to where Im going. Please look into this. Thank you |
| Other | It sucks because not only do the routes change we still have to pay during this pandemic and theres no safety to ensure your safe |
| Other | No suelo tomar metros sábados y domingos, ni tampoco después de las 12 am |
| Other | If you shut them down, youll hurt business all over. |
| Other | Which 34 lines. I have no context to answer this question |
| Other | Many lines are already crowded again. There needs to be better service on priority corridors. |
| Other | I hope this moves faster than scheduled So I can stop taking \$15 uber rides to work every day |
| Other | I have a proposal on digital pay mandatory on buses like the technology base system structured in New York City. It's effective and can be efficient for everyone instead of just tapping and inserting coins. |
| Other | To do this proposal in my honest opinion, will hurt the ridership even more. You want improvement yet, to shut the stations down and close the metrorail early will be a damper to everyone's plans. Especially the ones who have to work at the late night or getting off work late. If You can bring your prices down at this period of time, you will see progress tenfold. Although we are responsible for our well being, you do need to maintain your stations, keep drivers more courteous and we will continue to show our patronage. I frankly disagree strongly with the proposition. It is a business suicide if you decide to do this and if Covid-19 gets treated before Jan. 2022, where will the workers go if they dont want to get stuck in traffic? |
| Other | Its fair and manageable |
| Other | I think this plan is a good one. Especially the later hours |
| Other | This schedule would accommodate myself and family who work late night hours. |
| Other | sounds good |
| Other | Restoring weekend service is great for when we are able to return to events inside. Thank goodness the Circulator has been operating these days to take up some of the slack into Georgetown on the weekends. |
| Other | expanded bus routes and timing would be fantastic |
| Other | I am pleased with Metro increased bus service |
| Other | I dont use the bus for my commute anymore. |
| Other | Bus need to be on time always |
| Other | I dont ride the bus often. I prefer the metrorail |
| Other | MetroBus has been unreliable and unpredictable lately. Buses do not appear on time or with regularity - if metro trains operate less often (30 min between trains) and with less stations, the buses MUST maintain a predictable timetable for riders to utilize metrobus in lieu of/addition to metro train. One of my favorite parts of visiting, and now living in, the DC area is accessibility via affordable, safe, clean public transportation. It will be devastating to see this great city lose that amenity. |
| Other | buses will be needed to bridge gap if metro closes early or closes station |
| Other | Will be easier for me to get to work |
| Other | Adding late night bus service would not compensate for stopping Metro service at 9:00 PM. |
| Other | Theres nothing worse than riding a WMATA bus. |
| Other | The current 75% of pre pandemic levels works adequately for me. |
| Other | Due to the Pandemic (COVID 19) how do you suppose to keep buses and trains from over crowding? |
| Other | I do not have a problem with the above question regarding increase services; however, I do have a problem with the proposed service plan changes with College Park-U of Md and 89M. |
| Other | It seems like Metro is throwing in the towel, especially when we are on the threshold of mass COVID vaccines |
| Other | All of the buses of those of the circulator have such convoluted and incomprehensible routes I avoid them. |
| Other | I love the fact That night schedule will be open until 2am again |
| Other | How does this improve or provide opportunities for the commuters that would normally ride trains? |
| Other | If these changes are implemented and have a negative impact on low income neighborhoods, I hope Metro will reconsider its plans. As you know, low income neighborhoods NEED Metro and we hope that Metro will not overlook US in time of need! |
| Other | Expanding anything is a plus |

| Route | 2021 proposed Metrobus service changes |
|-------|--|
| Other | Yes |
| Other | Do the people who are proposing these changes ride metrobus and/or metro-rail on a daily basis |
| Other | No thoughts at this time. |
| Other | The service plan seems to be fair |
| Other | We need a lot more buses |
| Other | I use buses as hoc and not for commuting |
| Other | Thanks for not decreasing metrobus services!:)) |
| Other | I wasn't really aware that it wasn't back to normal! Doing well :) |
| Other | With limited metro train operations, enhanced bus schedule makes sense. |
| Other | Closing metro-stops while running more busses would alleviate many short term issues with transportation. I'd like to see a better pay option for commuters vice tourists and residents. That could help to offset some costs and expenses. Night trains could run for extended runs from stations with large parking areas to areas with high entertainment, like Navy Yard, Metro Center, and Union Station. Busses could run from those stations |
| Other | The 2am time is feasible, however, once again it does not help me get all the way home |
| Other | No comment |
| Other | accurate schedules and next bus arriving would help navigate the changes. |
| Other | I don't ride these bus lines. |
| Other | I think it's important to restore late night bus service for those who work in the evenings in DC. Additionally if the metro closes at 9 or 11 PM, it's much more difficult to go out in the evenings and spend time with friends knowing you have to pay for an Uber home. |
| Other | I can understand this but I am not happy about it. Also with the cost goes up, I can drive and the cost will be about the same and to my benefits for time and comfort. |
| Other | The bus gets stuck in traffic just like cars. Taking the bus takes me 30 mins more to drop my kid at daycare |
| Other | Just run at full service towards. |
| Other | I don't ride those routes often |
| Other | This seems excessive, keep the number of buses low. |
| Other | I ride rail more than ride the bus because I commute across the city to work at a hospital. I'd rather not increase bus if the rail can remain the same. |
| Other | I moved back to the neighborhood where I am because the BLUE line used to be excellent - due to the new high density buildings in the neighborhood and the increase in population and the number of times the BLUE line was down (pre pandemic), I had to cobble together Arlington bus service, occasional use of METRO with a sketchy idea of where the stops were and in what order, and METRO. You could do better just by figuring out where your riders start and where they want to end up and what time they need to come back - it feels like no one has ever done that adequately after you built and opened your first track. |
| Other | Me parece bien bajar el precio de la tarifa de autobus y del tren. Pues con los ahorros generados se puede bajar el costo del ticket y contratar mas personal de seguridad y de limpieza. |
| Other | I understand that the L2 bus maybe canceled. It is a wonderful commuting route, and any low ridership numbers are only attributable to Covid, as it was very full pre-Covid. I expect when Covid is over, the ridership will be back where it was. This is a necessary route. |
| Other | Great plan to bring back more busses and increase hours. |
| Other | Love bus service. Please keep it available |
| Other | We need MORE public transportation- not less: to help curb Global warming & for seniors like myself who cannot afford OR want a car |
| Other | Great |
| Other | If Metro has a budget issue why are buses being run into 2am in the morning? Especially if most businesses in the region is still under occupancy restrictions |
| Other | Ásnicamente que los conductores cumplan con el horario , ya que si no son puntuales los pasajeros optan por usar Uber |
| Other | There are more Travellers than before, the services should be increased not decreased. Also public transportation helps in promoting a Green economy |
| Other | What are the safety measures put in place,since the virus is still spreading and cases not reducing? |

| 2021 proposed Metrobus service changes (Spanish) | Translation |
|---|--|
| Apoyar a las personas con necesidades economicas, pidiendole al gobierno federal y a la reserva federal por mas recursos economicos, gracias | Support people with financial needs, asking the federal government and federal reserve for more financial resources, thank you |
| Esta bien | It's good |
| Me muevo en Virginia uso diferentes lineas y la unica propuesta que veo es que van a cancelar las rutas y no me conviene por mi trabajo | I get around in Virginia using different lines and the only proposal I see is that they're going to cancel the routes and that's not good for me due to my work |
| Creo que el 38B es muy importante ya que es el Único bus que nos conecta con Arlington y DC para quienes vivimos en Arlington y trabajamos en DC y salimos tarde del trabajo ya que si el metro deja de trabajar a las 9pm y eliminan la ruta del 38B nos quedaríamos sin transporte. Gracias | I think 38B is very important since it's the only bus that connects us to Arlington and DC for those of us who live in Arlington and work in DC, and we leave work late, so if the metro stops running at 9pm and they eliminate route 38B we would be without transportation. Thank you |
| Si es muy buena la propuesta de agregar más horas de servicio porque muchas veces uno sale y necesita tomar el bus demasiado tarde | The proposal to add more service hours is really good because a lot of times you go out and need to take the bus too late |
| Es bueno por que t14 habeces no pasa y no informan | It's good because T14 sometimes doesn't come and they don't report it |
| No suelo tomar metros sábados y domingos, ni tampoco después de las 12 am | I don't usually take the metro on Saturday and Sunday, or after 12am |
| Que la ruta R2 corra hasta las 11 pm los sábados y domingos | Route R2 should run until 11pm on Saturdays and Sundays |
| Me parece bien bajar el precio de la tarifa de autobus y del tren. Pues con los ahorros generados se puede bajar el costo del ticket y contratar mas personal de seguridad y de limpieza. | I think it would be good to lower the fare for the bus and train. The savings generated could be used to decrease the cost of the ticket and hire more security and cleaning people. |
| Únicamente que los conductores cumplan con el horario , ya que si no son puntuales los pasajeros optan por usar Uber | Just for the drivers to follow the schedule, since if they're not punctual passengers choose Uber instead |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| 16 | Reduction of the 16 line into downtown DC is detrimental to my commuting needs. |
| 17 | The bus 17 bus routes servicing the Burke area along Braddock Road is vital for the many Pentagon military and civilian workers. Additionally, the 17 routes provide greater services for those that use the route to transfer to MetroRail at the Pentagon. |
| 17 | The description of proposed service plan eliminates the #17 busses. That will not work for me. I use this bus to get into DC. My son used it every day to go to work, and was anxiously awaiting it starting back up again in the pandemic. He was even able to catch an early afternoon ride home on the bus when let out early. We are the envy of many who visit because we have readily available public transportation - what a delight it is, being in community with friends all around the DC area because of the bus that is so convenient to get to. Going into DC is so handy using the bus, by eliminating all things associated with driving (traffic, parking). It is a real draw for other close neighborhoods whose residents come to ours to catch the bus. It is a money-saver, time-saver, stress-reducer, happy-maker! It is truly the life-blood of our neighborhood, Please keep the #17 busses rolling!! |
| 17 | Its been Metros plan all along since contracting out the 17 line service to have it eliminated and youre on the way to accomplishing that. Give the DC people allergic to work more bus options. |
| 18 | So far as I can tell Metro plans to eliminate all the 18 bus lines, which seems ridiculous, as the document I read seemed to indicate that Metro knows there are no good alternatives to these bus lines. |
| 22 | The 22 line goes directly to the Pentagon. That is essential work! How can you consider eliminating that. Fairlington is full of people who need to get to the Pentagon and Constitution, and we should not have to walk a mile to the bus stop. If we lived in Centreville, I can see walking a mile. Not in a densely populated area of south Arlington. |
| 22 | I use the 22 bus through Fairlington often. Eliminating that route does not provide options for South Fairlington residents. |
| 22 | The 22 route is essential for my commute |
| 22 | Eliminating all the 22 buses eliminates all service to the South Fairlington neighborhood. Those routes are heavily used pre-pandemic and ridership would increase as workers return to downtown. Eliminating the 22 will increase traffic congestion on 395 |
| 22 | The 3 proposed bus routes (22***) that serve my neighborhood are all being eliminated, with no proposal that I can see to provide any replacement service. My neighborhood alone houses about 6,000 people who largely rely on the bus to get to the metro station as it is not possible to walk to one (and we are only a small portion of the route). I cant imagine how Metro thinks all of the people served by this route are going to get to and from their jobs every day (especially in rush hour traffic when ride shares are neither affordable nor time efficient) without access to the bus and metro. Some type of rush hour bus service for these routes at least needs to be maintained (and will be financially profitable as it is packed during this time period), even if off-hours service is discontinued. |
| 23 | The plan would eliminate the 23 series routes, which are the only routes near my home. |
| 23 | The 23 routes are eliminated, leaving no service in the McLean N. Arlington area. This is not acceptable. How do people who this route supposed to get around? |
| 23 | I use the 23 line to head north in Arlington beyond Ballston. I like having frequent service along Columbia Pike (16 lines). |
| 23 | Reducing bus service/routes is counterproductive. Losing route 23 would make it harder for those of us in S. Arlington to get to N. Arlington and the Orange/Silver lines, perpetuating and deepening the segregation of the County. |
| 23 | I have young adult twin sons aged 26. They are both on the autism spectrum and have used metro bus 23 for ten years, to Tysons, to downtown McLean, and to ballston. They love it. One son, Ben, rides it at least 8 times a week to and from our house on Linway terrace to McLean metro station for his job at Wegmans. We cannot imagine life without bus 23 on old dominion drive. It would be a huge inconvenience/hardship for the sons and also for my own plans to give up driving locally at age 68 to ride bus 23 for many of my own needs. |
| 32 | Again if the 32 bus is will still be operating then this plan will also be great for me and anyone that need to get out of the neighborhood. |
| 33 | Wisconsin corridor cannot be cut to one route. Pre-pandemic, buses were often overfilled and stops were skipped during rush hour. The 33 cannot meet morning and evening demand on its own. |
| 37 | I use route 37 |
| 42 | Eliminating the portion of 42 that runs from Farragut Square to Gallery Place will slow down commutes and lead to more crowding on the Red Line between those locations. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| 42 | I use the circulator and the 42 most often but I don't own a car, so the bus (which is rather use) needs to be fast and convenient to be worth it over an Uber. This plan doesn't contain enough info to let me know if that's the case |
| 46 | Please keep the 46 bus line! I love taking it between Grosvenor and NIH/suburban hospital where I work as a nurse. |
| 50 | They should not slow up or lessen the amount of buses serving 50 buses at Columbia Heights. |
| 51 | Of course I could make it work - I can use the 51 Bus, but that is going to get very crowded. I dont understand why plan isnt switched, that is less service in latter half of 2021, more service starting in Jan 2022. |
| 54 | The 54 is already extremely crowded and does not come frequently enough. |
| 59 | METRO MUST keep Bus 59. The 14th Street corridor has dreadfully slow service, particularly with the bottleneck in Columbia Heights. Bus 59 is the only way to get N/S on 14th St. in a timely manner. |
| 59 | I use the 59 bus to get to work |
| 62 | You need to also focus on students! The 62 bus serves 5 schools! How is this even on the chopping block at all? |
| 62 | I am against getting rid of the 62 altogether. It serves many schools and connects Manor Park to Petworth/Takoma. Otherwise there will be no transit options and my commute would become significantly more difficult. |
| 62 | Please dont eliminate the 62 route. I am working from home now, but when I worked in the office I depended on that bus to get to the metro and then to work. When I go back into the office when the pandemic ends I will continue to use that bus. The closest metro station to my house is 1.3 miles. We bought a house where we did because we knew that there was a bus route that could get me to the metro. Without that bus, it will be much harder for me to use public transportation. |
| 62 | Please do not discontinue route 62 in particular. It provides a fast and safe mode of transit to get to and from Takoma station. I'm not aware of another line convenient to Kennedy St/Brightwood Park that goes through Takoma station. This provides a critical connection to rail in the neighborhood. I frequently took it to get to and from the red line while commuting, and often took it down to Petworth to get to businesses on lower GA Ave. |
| 62 | I dont see any reference to Route 62 which has been out of service since last March. I hope it will be restored at some point. |
| 62 | Combining lines actually means that some routes are getting cut. The 62 should run through federal triangle otherwise the bus no longer goes past my house. |
| 63 | Please don't cut the 63 bus. I depend on it for commuting to work and daycare from my home, as do many of my Petworth neighbors. |
| 63 | The 63/63 bus line is critical. Pre-pandemic it was frequently full (or over capacity) during rush hours, and provides essential service to a large number of DC residents. It also serves, stopping just outside, a short-term family housing facility on the corner of Kennedy and 5th Street NW. It is imperative that this bus line not be eliminated. |
| 64 | I need route 64 to stay in service as it is. |
| 64 | I use the 64 Line to take my grandchildren to school (in Fort Totten). Please dont eliminate the 64 Line in the U Street area. We take the bus from Columbia Heights area. |
| 64 | No. It would be challenging to have the 64 rerouted from going down 11th to going down 7th Street. There are already the Georgia Ave buses that go down 7th but nothing that goes on a diagonal to get closer to Dupont and downtown from the Petworth neighborhood. If you are going to reroute, it would be more useful to have it go all way diagonal across the city down New Hampshire than the propose change to having it go down 7th (which is also redundant with where metro goes). |
| 64 | Ending the 64 going downtownâ€”I would get stranded with no way to get home. Its a lifeline to me that has saved me before, and you would cut off my lifeline. The 70 isnt a viable alternative. I would no longer be able to access Capitol Hillâ€”I need the 30 buses. The 50 buses are a vital artery and shouldnt be cut. |
| 74 | The 74 is the only bus that services Syphax Gardens all the way down to Buzzard Point, which is also an area not immediately serviced by a Metro stop. |
| 74 | Eliminating the entire 74 route leaves an entire new & growing area (plus many established residents) without convenient access to public transportation. It's a bad idea to eliminate the whole 74 line with no replacement or alternative south of M street SW. |
| 74 | There are many low income, elderly, and disabled persons who live in SW who need the 74 route. |
| 74 | The service plan proposes eliminating the 74 route during the second half of the fiscal year. This is one of the few services to my neighborhood and is often used by people with limited mobility. The proposed substitutions are inadequate replacements, especially as the Wharf shuttle only makes one stop south of the freeway, at the Wharf and nowhere near a large portion of the 74's route. |

| Route | Proposed 2022 Metrobus service changes |
|-----------------|--|
| 74 | Buzzard Point is a developing area that, prior to COVID, had no residences. Since then, a condo and two large apartments have opened, with more on the way. Because there is no retail in Buzzard Point, residents rely more on public transportation than most. Route 74, slated for elimination, is Buzzard Points only bus service. There is no metro service within a 20-minute walk. While ridership on 74 may be historically low (due to all residences having opened in the last 6 months, and COVID decreasing numbers), once COVID ends, WMATA will see increased ridership on route 74. Buzzard Point needs this route, as it is isolated from not just all public transportation, but local retail as well. |
| 80 | The 80 bus route is being completely altered. I currently ride it to and from work, from North Cap and Randolph to GW. This is the most direct and requires no transfer for my commute. |
| 80 | I dont know what yall are planning but the 80 bus should come more often than every 20 minutes. |
| 83 | I ride the 83 bus every day for my commute. With small children at home, my timing can vary a bit each day, and missing one bus could mean waiting as long as an hour until the next. This is unacceptable. |
| 86 | Reduction on the 86 would be problematic for my area. |
| 86 | I ride the 86 bus so I would want that route to be available. |
| 86 | Getting rid of the 86 would impact me as well |
| 96 | Route 96 is the only route to connect from Florida ave NE to American U. and the surrounding medical facilities. |
| 96 | Do not support eliminating 96 service between Tenleytown and Union Station in second half of fiscal year 2022 |
| 10A | I am shocked that you are claiming to focus on underserved communities and allow them access to Metro rail stations while cutting service from the poorest Alexandrians. Your own proposal admits that the 10A is the only way to get from North Alexandria to the Pentagon. By cutting this bus route you are forcing people to either travel almost 30 minutes to Ballston or the wrong direction to find a metro line into the city. Cutting this line is completely anathema to your above statement. |
| 10A, 10E | This absolutely would not work for me. I take the 10A (or previously either the 10A or 10E) from Del Ray to Crystal City as my commute to work every day. If 10A/E are unavailable, I have the alternative of taking Metroway from Crystal City to Potomac Yard. This plan proposes eliminating both of these bus lines, leaving no bus options for my commute or to be able to get to a metro station. While the Potomac Yard metro station is scheduled to open in 2022, it will not be open by January 2022 and could easily be delayed, leaving an undetermined period of no public transit options in this area. Further, the metro station will be quite a distance from many locations currently on the 10A/E bus lines, leaving these people without a viable option (the walk would be too long for some people to physically do). Also of note, the plan indicates a focus on providing service to areas with low-income riders, but the 10A/E line is heavily utilized by low-income residents in the Arlandria neighborhood who would lose public transit access if these lines are completely eliminated. |
| 10A, 16, 231 | I take the 10A, 16, 23A, and MetroWay buses. Please do not stop them in January 22202! I would have limited options for getting around. |
| 10A, 42, 52, 87 | This would reduce or eliminate access to medical appointments and groceries for me - I use the 87, 42, and 52 for medical, and the 10A for groceries. |
| 10A, MW1 | 10A and Metroway are key to keeping down traffic and expanding access to del Rey and surrounding neighborhoods, and access to Potomac yard shopping. |
| 10B | I would have no way of knowing because nothing is said about what routes are affected. If youre considering re-routing the 10B to Glebe Rd. instead of Walter Reed/Fillmore (which keeps getting suggested), then DO NOT DO IT. My bus stop is on Walter Reed, and I do not want to have to go a half mile out of my way to get a bus. |
| 10B | people need the 10b to get to work and buy food all times of the day and weekends not just rush hour!! |
| 10B | The proposed service adjustments to the 10B and 16 lines in Virginia will harm access for lower-income individuals on some of the more frequently used lines in an area with no direct Metrorail access. Please do not make these cuts. |
| 10B | I am in favor of the 10B route changes but I am concerned for many other folks who rely on the bus network |
| 10B | Unless there will be more buses, just having 10B to Ballston will be way crowded. How often will it run? Right now it is often too crowded to board and this is pandemic time. |
| 10B, 11Y | Between eliminating the 11y and eliminating the 10b through hunting point, you will completely eliminate all mass transit access to hunting point!!! This is terrible!!! |
| 10E, 10A | Please do not eliminate 10E and 10A. Communities in Old Town, Del Ray and Chirilagua need direct access to Pentagon |
| 11Y | Why is the 11Y being eliminated when it is convenient for the hundreds of people that ride it to and from work? Without the bus, I will plan on teleworking full-time, since metro rail is not convenient, especially running every 15 minutes?!?!? |
| 11Y | It is not convenient or practical for many of us to have cars in this area or to use them for daily commutes. The bus system now covers so much more area than the Metro lines do and are important to my daily work commute as well as many others. The 11y is a valuable mode of transportation to many of us in Alexandria. |

| Route | Proposed 2022 Metrobus service changes |
|-------------------------|--|
| 11Y | I dont even see the 11y mentioned |
| 11Y | The 11Y route is not mentioned in this plan. As was explicitly mentioned by MANY riders in the previous survey relating to bus route changes, the 11Y is essential for commuters living in the Mt Vernon/GW Parkway area. |
| 16A | Hay rutas como el 16 A que son necesarios |
| 16A, 16B, 16C | Regarding the 16 bus routes, if the 16A,B,C to Pentagon took Army-Navy Drive to pentagon (similar to ART 42 bus) riders could get off at different bus stops near to Pentagon Row/Pentagon City. |
| 16A, 16C | Stagger departure times of 16 A/C with Art 42. Part of the route is shared, and if times are staggered, riders on the shared route have more frequent buses arrivals. |
| 16A, 16H, 25B, 28A, 38B | My main source of transportation for me is Metrobus to get to work, doctors appointments, shopping, etc. I do not drive so cutting back or eliminating any of the bus lines will hugely impact the way I can get around as well as many other riders.. I rely on the 16A, 16H, 25B, 28A, 38B and some other lines. |
| 16A, 29G | Not acceptable to eliminate both 16A and 29G that accommodate services to Pentagon. |
| 16C | Do not cut route 16C. |
| 16C | Please do not eliminate 16c |
| 16C | Do not eliminate 16c |
| 16C | please do not terminate the 16C at the Pentagon under any options or budget proposals. A one seat 16C trip from Columbia Pike (and Greenbrier) to downtown DC cuts 40 minutes off of being forced to disembark at the Pentagon Station and waiting for a metro train. |
| 16C | Many of us use 16C to get downtown to USDA and Federal Triangle from the Baileys Crossroads area in Virginia. This is an important route and before the pandemic it had maximum ridership. Usually the bus is full all the way to the Pentagon and then is refilled at the Pentagon for the trip into D.C. In the evenings, this same bus provides cost efficient and safe transportation back into VA, all the way along the Columbia Pike corridor. The underserved and low income communities in Baileys Crossroads need this bus (16C) to travel into D.C. Please dont cut this busline. The cost to transfer to Metrorail (both in terms of \$money and Time) is far greater of an impact and burden on the riders who need the 16C bus into D.C. Please maintain this bus line after the pandemic and vaccines are widely available. It is important to know that anything Metro does to cut service in the coming years will be undermined by increased needs from riders after the pandemic lessens. Buses are critical to avoid the higher cost of trains. Buses are quicker than trains. Buses are more reliable than trains, and allow more flexibility along the routes for entrance and exit. |
| 16C, 16Y | This only works if 16C and 16Y are continued |
| 16E | The 16E bus service from Pentagon to DC 14th St is an important method of travel to and from DC during rush hour. It is important to have that service as metro rail is dangerous and unreliable. |
| 16G | people along columbia pike use 16G to go to Pentagon or Pentagon City and to return home from the metro. ART 41 is NOT a substitute because it turns on Glebe Road and goes to Ballston after a long ride. 16G is important to continue operating |
| 16G, 16H | If you eliminate the 16 G and 16 H buses on Columbia Pike I would literally have to move. Offering one bus to everybody would be unbearable. The crowding would be horrendous. I don't know how anybody who's ever ridden this line would even consider making such a change. |
| 16G, 16H | DO NOT ELIMINATE 16G & 16H. I RIDE THIS ROUTE EVERYDAY |
| 16G, 16H | I can only access ANYWHERE -- my job in DC, which WILL at some point have in-office requirements again, the Metro stations nearest me, grocery shopping, the mall, my house of worship -- via the 16G or H lines. I SPECIFICALLY moved to my apartment YEARS ago -- because Im not rich and cant afford a house OR a car unlike all you rich Metro managers -- BASED ON THIS BUS ROUTE BEING SO CONVENIENT TO THE METRO AND NECESSITIES OF LIFE. I guess I dont count and all the money Ive forked over to Metro over the years doesnt count because I dont have a healthcare or social services job, huh? On top of the personal ruining of my life, you will cripple businesses up and down Columbia Pike, but you dont care, do you? Do you even realize how full these bus routes will be again? What about the Amazon employees coming in? Do you care? I will be writing my Congressional representatives to demand they take action to stop this. |
| 16G, 16H | Your manipulation of data in this proposal is unethical and unprofessional because you assume no one will come back to Metrobus after the pandemic and are reducing service by 50% based on what, fantasy? Your alleged proposal to provide service actually creates hardship for the 16G and 16H riders, many of whom rely on Metrobus to travel to medical appointments, to shop for groceries, who are essential workers, and so forth. |
| 16G, 16H | Elimination of 16G/H will not work for me |
| 16H, 16C | I note the elimination of 16H and the route changes to 16C, which would give almost the same service to Skyline and South Jefferson Street. |

| Route | Proposed 2022 Metrobus service changes |
|---------------|---|
| 16H, 16G | My route, as well as the Pentagon City routes (16H/16G) already experience significant crowding even with low ridership, primarily during rush hour. Eliminating half the routes down Columbia Pike is going to make it significantly harder to even attempt distancing on the bus. Those routes pre-pandemic we're heavily crowded during rush hour as well, and that was with all buses running. Ridership is increasing, and removing those bus routes, even with a duplicate route is going to cause a crowding nightmare. Even with vaccine roll out, who's to say we'll be safe in January? |
| 16Y | Please do not discontinue the weekday rush hour 16Y bus. This bus line was always packed with people and very popular for residents from Virginia commuting into DC. It was one of the reasons why I bought my house due to the great commute. |
| 16Y | Pre-pandemic I relied on 16Y to get to and from work in DC Mon thru Friday around 6:30 to 7 am and around 3:30 or 4 in the afternoon. My office will likely reopen and executives will expect staff to return to the office after most adults can be vaccinated. |
| 16Y | If the 16Y line is cut, I give up on metro and will drive. |
| 16Y | The 16y bus is how I get downtown. It was always full in prepandemic days. It's a vital route to me. |
| 16Y | If I'm understanding the plan correctly, the 16Y would be shut down at least through 2022. Taking this bus to and from work essentially cuts my commute time in half (versus metro rail). It's a major advantage of living where I do. If this is paired with metro rail cuts, it would take away any convenience of me living near my workplace since my commute would likely take up over two hours of my day. I would gladly pay an increased fee to ride the metro buses and rail rather than lose the service. |
| 16Y, A16, 23 | I use the 16Y direct to DC or a 16 line to Pentagon City or the 23 to Ballston. I cannot tell from the description if service would be decreased for those routes which are critical to the Columbia Pike corridor. |
| 17, 18 | Do NOT cut more 17 and 18 bus lines. The current ones that have been cut are already seriously damaging the community. |
| 17, 18 | Eliminating 17 and 18 Express Bus routes effectively eliminates service to the Pentagon for a large swath of Northern VA. Assuming pre-pandemic levels, parking is not available at the Pentagon and this proposal doubles commuting time if you drive from these areas to rail service. Reducing service on the 17 and 18 is logical, eliminating it is not. |
| 17G | I use the 17G rush hour metro bus service to get to the Pentagon and then into D.C. And I take the reverse service in the evening. There is no other nearby alternative. This line is very important to me and to others in my neighborhood. PLEASE keep this line in service. Thank you!!! |
| 17G | I would be needing 17G morning and evening once COVID restrictions are lifted. |
| 17G | I rely on the 17G bus line and need this service to continue in 2022. |
| 17G | 17G is the only bus route to service my neighborhood |
| 17G | the proposed discontinuation of the 17g metrobus route is unacceptable, as this is the only bus service I take that service my address. |
| 17G | PLEASE DO NOT ELIMINATE THE 17G BUS LINE |
| 17G | Request to keep the 17G running on Twinbrook to the Pentagon. |
| 17G | I am 86 and driving less and less and depend on the 17G bus. |
| 17G | The elimination of the 17G would greatly increase my commute to the Pentagon. It would require driving to a metro rail or alternative bus stop and then fighting for parking. |
| 17G | 17G is the only bus route available for our neighborhood. There are several military families who use it to get to the Pentagon |
| 17G | 17 G riders use the Metro bus to and from the Pentagon. |
| 17G | Why not retain routes but reduce the buses to the busiest times in the morning and evening. The bus to the Pentagon 17G and others on Braddock Road west of Rolling Road are almost always busy (pre-pandemic) with people heading to the Pentagon. Buses from Northern Virginia to the Pentagon seems like a good plan. After this plan, people will have an easier commute from Woodbridge to the Pentagon than from Burke. |
| 17G | Please retain the 17G service in the upcoming fiscal years. It is valuable to keep commuting traffic minimized on Braddock Road. |
| 17G | No alternative for route 17G. This will have significant impact to commute and expense. There is no alternative for parking at or near the Pentagon. Property purchased due to ability to commute through MetroPCS. There is no economic alternative to get there. |
| 17G | Bus route 17-G is a essential option to my community. We have supported the establishment of this route for over 30 years. It has provided essential transportation to the Pentagon and transfers to DC. |
| 17G, 17H | The 17G/H line is highly used during non-pandemic times, and usually full to capacity during the morning commute times. It serves as the only method of public transportation from the outer suburbs into DC, and Regan National Airport. Eliminating this line would add a huge amount of unnecessary congestion to already strained roads. |
| 17G, 17H, 17K | I a 17 Bus (G, H, or K) to get to work. Please dont close all the 17 lines. |
| 17H | NO, the 17H is my bus. Please do not eliminate it!! |

| Route | Proposed 2022 Metrobus service changes |
|---------------|---|
| 17H, 17G, 17L | Please do NOT eliminate the 17H and 17G lines!!!! If you must then combine the routes. These buses are packed in Kings Park West and the. Stop for additional passengers on Braddock road. Stop the 17L which is less dense. But KEEP 17H and 17 G please! |
| 17H, 17K | do not kill 17H and 17K Busses to and from the Pentagon. |
| 17H, 17K | 17H and 17K are vital links from Kings Park West to Metropolitan Transit area. Elimination of these routes would not serve the residents of Fairfax County at all. People from the surrounding area often drive into King Park West to access the 17H and 17K routes. Eliminating them will increase vehicle traffic and increase commuting times for all on Braddock Road, Guinea Road, Little River Turnpike, Capital Beltway, 395 and other routes into the Pentagon and DC. Eliminating the 17H and 17K routes is a devastating plan of action. |
| 17H, 17K | The plan eliminates travel on 17H and k. These busses were packed Irepandemic. |
| 17H, 17K | Keep the 17H and K at pre-COVID levels; ridership WIL return! |
| 17H, 17K | I depend on either the 17H or K to get to work. There are no metro stations near the Burke/Fairfax area. Driving would add another car to the already congested I 395 corridor. |
| 17H, 17K | 17H and 17K are very critical to our neighborhood and the great number of early morning commuters to Pentagon |
| 17H, 17K | Restore 17 H and 17 K |
| 17H, 17K, 17G | The 17h and 17k routes are long and make my commute over 90 mins without traffic delays.If you are going to get rid of the 17g, please add a line that goes straight down braddock road from GMU to the beltway. |
| 17H, 17K, 17G | I am not sure about the impact that would have on existing commuter routes but it is important to keep lines like 17H and 17K running. These lines are are critical to keep commuting options available and reducing traffic as we return to normal work lives. |
| 17K | just give me a 17K thank you please stop making me drive a mile and park in front of my neighbors house like a creepo |
| 17K | The 17K doesnt seem to be part of any of these plans. The 17k is pretty much the only affordable and timely travel option I had prepandemic. By eliminating it, you make my entire neighborhood unlivable for commuters. Its like 10\$ more a day plus 30 minutes in commute to drive to a metro station, pay for parking, and pay the exorbitant cost of living at the end of a metro line if you take our buses. We just got them back before the pandemic and my finances had barely started improving after the strike and now you claim low ridership when we barely had a chance (less than 2 months) to ride them again? Its like you are trying to justify taking them by creating the conditions through which you can eliminate the roots. |
| 17K | We need the 17K to continue as usual. |
| 17K, 17G, 17H | It appears (based on the analysis provided as well as statements made by WMATA) that pre-pandemic ridership levels have been used to make route cut determinations. However, I dont se any evidence that the pre-pandemic strike has been taken into consideration as well. For example, pre-pandemic ridership levels for the 17 line (17K, 17G, 17H, etc) appear very low, and in fact they may have been low, but that is because those lines were affected in late 2019 by a 2 month strike which halted bus service. Prior to the strike, I rode these lines daily and ridership levels filled the bus during both morning and afternoon commutes. If WMATA can re-institute reliable service on these lines, ridership will return, as alternative methods of transportation to the pentagon and to the city are not readily available. Many in the Braddock Rd corridor chose to live here because of the Pentagon transportation availability, but had to move to other methods during unreliability related to Trans Dev and the subsequent strike. Additionally, WMATA should factor in that the Braddock Rd corridor is scheduled for roadway design changes in the near future that will be beneficial to WMATA (faster drive times to 495) while decreasing locals ability to directly access Braddock Rd East towards 495, which will leave many local drivers looking for alternatives such as Metrobus. |
| 17K, 17H, 7 | Too hard to find the reference to the metrobus lines we use in the 400+ page document. We rely heavily on bus transportation, mainly 17K and 17H to Pentagon, and then to the 7 to DC. |
| 17M | The elimination of so many bus routes is idiotic. This is at least as bad an idea as closing a score of Metro stations.I recently moved and would take the 17M to work, but you plan to eliminate it. This means I would have no option but to drive, which will add to the traffic and cost me hundreds of dollars every month in parking and gas. Im not alone. Do not make moves that make public transportation useless, or *people wont use it*. |
| 17M, 17B | Bus lines shouldnt be eliminated in 2022 just because ridership was low in 2020 due the pandemic. Im not currently using 17M/17B due to the pandemic, but will return to usage in mid-2021 and theres no other line within miles of my home. |
| 18, 17 | Thoroughly opposed to elimination of 17 and 18 bus services. |
| 18G | Again, please bring back the 18G bus line. |
| 18G, 18P | Would like to see the 18G restored (even with limited service times) and the 18P maintained (even with limited service times). |
| 18H | I would like to see 18H restored |
| 18J | Ive used 18j for yeas for my job and I cant wait to have it back |

| Route | Proposed 2022 Metrobus service changes |
|-------------------------|---|
| 18P | The plan shows eliminating 18p...it is the only bus service for Burke Centre, leaving some without any way to Pentagon without adding to already 45+ minute commute |
| 18P | Cutting the 18P is unacceptable and leaves Burke with no way to get to the pentagon. |
| 18P | It depends upon how route 18P would be affected, and whether or not COVID restrictions are lifted in such a way that I was required to reduce teleworking. |
| 18P | Cancelling the 18p to the pentagon would force me to use the metro which is also reducing their service. The pentagon does not offer parking. |
| 18P | Bus 18P going through Burke is necessary for my travel, it would be very upsetting if it is removed! |
| 18P | Planned service elimination of 18P would drastically effect my weekday commute. There is no service alternative for this route. |
| 18P | Eliminating the 18P with no alternative severely hampers commuting for many people. |
| 18P | The 18P bus route is the only one that covers a large section of Burke. |
| 18P | Need 18P bus route preserved |
| 18P | Eliminating the 18P route will have a negative impact on property values, and result in increased vehicular traffic commuting to the Pentagon, unless Fairfax County starts its own substitute route |
| 18P | 18P must be a full pre-pandemic operations by Jan. 22 |
| 18P | My autistic son (disabled rided) is an essential employee riding the 18p from our Burke home to Rosslyn 5 business days a week. Reducing or eliminating that route would almost eliminate his commuting options |
| 18P | The 18p is a highly weekday run from Burke to the pentagon. Every bus is full. It's the only bus that services Burke Centre. Covid has drastically slowed ridership. Evaluate ridership after the government opens back up not right now. Ridership will return to full buses. |
| 18P | What are other riders dependent on the 18P for work, medical appointments, shopping, etc. supposed to do for public transportation? |
| 18P | You cant eliminate 18P line, you already did with 18G and other line in the area! |
| 18P | The loss of the 18p line would be absolutely devastating for Burke military families and others who work everyday in DC |
| 18P | DO NOT ELIMINATE 18P |
| 18P | The Metrobus 18P route was standing room only pre-pandemic. As vaccination rates increase people will return to public transit. Eliminating a high ridership route is not warranted and will put cars back on the road. There are no comparable replacement options. |
| 18P, 18H, 18G | I rely on the 18P to get to the Pentagon for my daily commute. As the Pentagon begins to move toward pre-pandemic operations I would expect ridership on the 18P to increase greatly. Also the 18P, 18H and 18G all provide faster service to the Pentagon than using the Blue Line from Franconia Springfield. Currently I transfer to the Metro at the Pentagon. The added expense of Parking at the Franconia-Springfield Metro and increase commuting time would probably lead me to switch to driving in a personal vehicle. |
| 18S, 18R, 18G, 18H, 18P | In the two years Ive lived in Burke/Springfield, WMATA has cut the following bus lines in my area: 18S, 18R, 18G, 18H. Only the 18P remains. Please do not close the 18P bus line because myself and others depend on it for our morning and afternoon commutes. |
| 1A, 1B | I need EFC to remain open. If it does not, I will need to take 1A or 1B to Ballston, so will need that bus to run as often as possible. |
| 1B | Not happy about eliminating 1B, but can live with that |
| 1C | Occasionally use 1C in Merrifield area. Would have to use Lyft instead. |
| 21A, 21B | 21A and 21B were my daily commute for nearly 10 years. My employer intends to return to normal operations, and I rely upon these routes. |
| 21A, 21D | I use 21A/D busses. |
| 21A, 21D | Any proposal that continues the elimination of Metrobus service for the 21A and 21D bus lines will never work for me as long as I am a resident of West End Alexandria and need to get to DC during rush hour (ESPECIALLY when closing Van Dorn Station is ALSO on the table for the budget). |
| 21A, 7 | Need to understand routing plan for new 21A and 7..map doesnt show them |
| 22, 22A, 22C, 22F | we bought our home precisely bc it was right next to a metro bus 22 acf stop. We take it to pentagon for work. there is no other option coming through our southern neighborhood to get to pentagon. walking to Shillington in a suit with a briefcase would add 30+ minutes to each end of commute. 22acf also is essential for getting our teen to her new neighborhood school location on the blue line. she can take the bus to pentagon easily eight now. unless 22 is replaced by a very frequent art service, she wont have a reliable way to get to school. |
| 22, 22F | Do not alter 22, 22F routes. |
| 22A | before work from home the only bus I could take to work (at the Fairlington Community Center) was the 22A. If eliminated, there isnt another bus service I can take to work once our offices open up and Im really not strong enough a bike rider to get up that hill! |
| 22A | Please keep 22A on weekends. On weekdays there is ART service on the route as an alternative but not on weekends. |

| Route | Proposed 2022 Metrobus service changes |
|---------------|--|
| 22A | 22A is necessary for many workers in the neighbourhood. Other routes on the chopping block look familiar to me (meaning I have used them, but usually for events and not regular travel). Raise rates if you must. Social justice is an element for consideration, but cutting services in other areas to focus on those reliant-upon the bus for grocery stores is not the way to solve money-flow issues. |
| 22A, 16C | Reduction by 50% and combining routes will result in extremely overcrowded buses if federal agencies return to work from their offices. The removal of 22A from my neighborhood to Ballston forces me to only take 16C during rush hour which was already very packed (pre-pandemic). The proposed changes severely limit commuting options from my part of the Columbia Pike corridor. |
| 22A, 22C | If the 22A/C lines running through South Fairlington are eliminated, I will be driving my car into the District five days every week (M-F) |
| 22A, 22C | Don't eliminate route 22a/c in south Fairlington |
| 22A, 22C, 22F | Frequent access to the 22A/C/F lines including on weekends and evenings is very important to me, because otherwise it is difficult for me to get to Metrorail. |
| 22A, 22C, 22F | I am deeply concerned about the elimination of routes 22A/22C/22F. I have relied on this bus route to commute from my home in South Fairlington to DC for a decade (pre-pandemic), and plan to resume riding on this bus line in summer/fall 2021 once I return to the office. I know many of my neighbors rely on this bus route too. Thank you for the opportunity to comment. |
| 22A, 22C, 22F | I need the metrobus to get to my office, and I will be back in the office full time by January 2022. Any cut to the 22a/c/f line would be very detrimental to my ability to commute to work. |
| 22A, 22F | Given the availability of the vaccine over the next several months as well as children returning to school, I anticipate ridership of area workers will return to 75% of pre-pandemic levels in January 2022. The buses on the 22A/22F were generally full, even with people standing going down the express line of 395. Mid-day buses are a completely different story often traveling with no passengers. 2022 changes on the 22A/22F route that would leave South Fairlington without any bus service whatsoever and would force all commuters onto area roadways. There is an implied contract when permanent bus stations are erected and tax dollars accepted that infrastructure will be maintained. |
| 22A, 22F | One of the primary reasons for locating in the area we live was the reliable and frequent bus service to metro rail. Your proposed changes to the service, particularly the discontinuation of the 22A/F will eliminate the most reliable and frequently used line that our family uses to get to and from work/home. I strongly oppose this proposal. |
| 22A, 23T, 10A | Too many routes cut with no alternative, such as 22A (my most used route) to get between Fairlington and Ballston. Ive used 23T between Ballston and Shirlington on occasion (followed by a long walk up to Fairlington), but that is also on the chopping block. And what replaces 10A between Arlandria and Pentagon? |
| 22A, 7A | Dont eliminate the 22A route or modify the 7A route. |
| 22C | The South Arlington area is underserved by metro and the ART 72 bus that allegedly will cover this route in the absence of the 22C is not available on the weekends and outside of rush hour. The 22C route serves a critical area of south Arlington that has no walkable access to metro and relies entirely on buses for public transportation. |
| 22C, 22F | Please do not eliminate the 22C and 22F bus lines! The buses are crowded during rush hours and many people in Fairlington, including me and my husband, rely on it to get to work. Its one reason we moved here and these buses allow us to live farther from the metro in slightly less expensive housing. Eliminating these lines would mean bus riders would have to drive and either park somewhere to get to the metro or drive into DC. Either way it would increase traffic, hassle, and commuters times. Its a well-loved bus line in the Fairlington neighborhood - please dont take it away! |
| 22F | Eliminating 22f through South Stafford leaves all of Fairlington with very limited or no options. |
| 22F | On the FY22 service plan there is no alternative arrangement if 22F service is discontinued. |
| 22F | Eliminating 22F from South Fairlington to Pentagon is totally UNACCEPTABLE! That route is the only way for people in South Fairlington to get to the Pentagon metro and would seriously impact the hundreds of people who live in Fairlington and commute to DC for work under normal circumstances. That included many federal workers like myself. You CAN NOT leave us with no viable alternative, that is insane. Once people get vaccinated and start returning to work in person there will once again be a major demand for that bus line. You are also leave people, like my mother who is an essential federal worker, without any way to get to work currently. This is extremely short-sighted and Metrobus must find an alternative way to fund its budget cuts. |
| 22F | I am a 22F rider with vision and mobility impairments. Walking to another bus stop is not an option, and I do not prefer to drive-in daily with my vision impairment. |
| 22F, 22A | I work at the Pentagon and am not authorized a parking pass. I rely on the Metrobus to get to and from the Pentagon. By eliminating the 22F and 22A lines I will have no transportation options to/from the Pentagon. |

| Route | Proposed 2022 Metrobus service changes |
|--------------------|--|
| 22F, 22A | We expect to go back to the office by 2022- if service in South Fairlington is cut then it will add substantial commute time for everyone going to Pentagon and to DC. With 2 changes of bus and for those going to DC plus the metro. Propose to at least keep the 22F if the 22A is not maintained. For instance I have an elderly parent who relies on the bus and do not drive. The 22A and 22F Are convenient because close to our place. The Dash (the proposed alternative) stops far away. So for these people cutting the 22A and 22F means cutting their independence to move around. Don't think that everyone can make the extra walk to a far away bus station. We have chosen were to live exactly based on the easy access to bus stop. If 22A and 22F are stopped then that will mean a lot of changes for us. |
| 22F, 22C | I take the 22F to and from work every day. The only other closest bus is the 22C. If you reduce their service in Fairlington, I won't have a way to get to work. |
| 23A | I read that rout 23A may be cut. I often use that bus route to commute to work in the morning and Im not alone. Would it be possible to keep that route for morning and perhaps evening commutes. I agree that the route may not be in demand during the rest of the day. However, it is a crucial service for commuters living in these areas. |
| 23A, 23B | Try to keep the 23A/B bus as it is the only service between Ballston and Crystal city aside from the Metro. I support your efforts to provide for needs of Low-income customers and Essential workers - agreed they should come first! |
| 23A, 23B, 23T | Elimination of the 23A/23B/23T Metrobus service would negatively impact my commute (via Ballston Metro) to DC. Moreover, closure of East Falls Church Metro station would eliminate my alternate commuter route. |
| 23A, 23B, 23T, 10B | My main bus route is 23A/B/T to travel between Ballston and Shirlington. Based on the proposed service plan, this line would be completely cut. The only remaining service for the area would be 10B. |
| 23T | do not eliminate 23 T. better to shift to less frequent service and increase fares. use of AI and apps will allow predictability that should sustain or even help increase ridership despite higher fares. provide transportation vouchers to lower-income or tax incentives to employers who subsidize public transit for employees. |
| 25B | M wife and I are in our 60s and depend on buses to get around. Its already difficult making medical appointments, for example, when our bus (the 25B) runs only once an hour. Transfers to other infrequent buses make trips of only a few miles into trips that take an hour or two, and my wife cant easily walk a few miles. |
| 25B | You are eliminating the 25B which is my only way to get to my volunteer job near Landmark. I connect to a DASH bus at Southern Towers. If you eliminate this route which also passes by several long term care facilities and NOVA community college, you will be significantly impacting those of us who dont drive and rely on the public bus system to get where we need to go. It also eliminates my closest way to get to the Ballston metro, forcing me to a lengthier walk over to the 1A line. Im a mobility impaired senior who doesnt drive. Your proposed changes would ground me worse than the coronavirus. |
| 28A | Modification of route 28A away from E. Broad Street in Falls Church and the closing of East Falls Church METRO RAIL station eliminates the two closest options for me. |
| 28A | I dont like 28A buses to be less service. We go to work early in the morning |
| 28A | No, I want 28A buses early because I am an essential worker. I understand by mid day buses late but morning and rush hours are very important to go to work |
| 29G | The metro bus services should be available to all. Please keep 29G line as it is the only line that get me into work every day. There is not another line that would do that unless you significantly increased the 29K and 29 N lines both in the morning and evening periods to above the pre COVID levels. |
| 29K, 29N | This spells disaster for my students, who often rely on the buses - especially 29K and 29N, but often connecting buses from metrorail stations to their homes. |
| 29K, 29N, 21A, 8Z | current VA modifications do not include FY2022 second half or timetables for 29k/n or 21a/8z consolidation so it's hard to know whether this would work. |
| 29W | 29W is needed for my neighborhood. |
| 29W | Please keep the 29W (now 835) and do not reduce it. It is always full during rush hour pre-pandemic and people rely on it to get to and from work! |
| 29W | Again, this plan does not include restoring the 29W, a bus that many commuters rely on to get to DC. There are currently no other alternative options and no new alternatives being devised. You are effectively ignoring all the commuters in the Annandale/Burke area since you plan to eliminate all the bus routes in the area. |
| 2A | Prior to Covid I commuted every day on the 2A bus, along with Metro service to and from East Falls Church. Eliminating my bus line would be a big problem. |
| 2A | Youve proposed cancelling the 2A route from Jan-June 2022 AND closing the East Falls Church metro. This would realistically give our family (and thousands of others) nearly zero way to use public transportation. This increases traffic, clogs the city, and forces us to pay sky high parking fees in Washington DC. It is the VERY reason that we chose to buy a home near a metro. |
| 2A | Proposed cuts or elimination of the 2A line in Arlington would be detrimental. |
| 2A | The proposal would eliminate the 2A bus entirely, and there appears to be no alternative for getting from East Falls Church to George Mason Dr, which is a part of the route I have often used. |
| 2A | My line 2A is proposed for cut, along with my metro station EFC. I would be left with no public transit options to get to work everyday. |
| 2A | Eliminating the 2A will impact low income and elderly passengers who don't have an alternative. |

| Route | Proposed 2022 Metrobus service changes |
|-----------------------------|---|
| 2A | You'll be kicking me off Metro since you're also planning to close the EFC Metrorail station. Either you need to give me the 2A bus to get me to Ballston or you need to let me continue walking to EFC. I'll end up in a car, ending 30+ years of riding Metro every weekday to work and back. |
| 2A | Please do not eliminate Route 2A |
| 2A | It is essential that Bus 2A remains in service. Bus 2A is the only transportation option that runs thru the City of Falls Church, and it is the only transportation option that can transport people to the Kaiser Permanente Falls Church facility. |
| 2A | eliminating 2A along Lee Hwy between Gallows and East Falls Church or Ballston metros would eliminate my access to all of Metro. |
| 2A | Metro proposes to eliminate the 2A line. The 2A route goes by areas of lower income in Fairfax County and many apartment buildings in Arlington and Fairfax, yet Metro proposes to completely eliminate this route. There is no alternative bus service for most of this route and it is on a major artery in the Fairfax County. It is a far distance to other bus routes or the Metro so walking is not really an option. This route stops right by Kaiser Permanente in Falls Church so people do take this route to doctors appointment. It also goes by/near grocery stores (such as Safeway, H Mart, Harris Teeter) and stops at multiple Metro stops. Many times, Metro itself listed the 2A as the alternative route when there were problems on the Metro at Dunn Loring, East Falls Church or Ballston. Given Metros criteria listed in this question, I fail to see why the 2A should be eliminated. We can't all afford to have to use Uber or Lyft. |
| 2A | No alternative direct connection to a Metrorail station for essential workers when eliminating Metrobus Route 2A. There's actually no need to shutdown stations and services because the pandemic will eventually be over soon given that vaccines are already available and people start commuting to and from work which will increase ridership and back to normal in all levels. |
| 2A, 29, 50, 1A, 1B | 2A bus line is crucial to the neighborhood surrounding Fairview park drive sandwiched between 29 & 50. We have a high concentration of apartments and many who rely on the bus including us to connect to the metro as we opted to go to one car. You are also proposing canceling the 1A/B line portion that's our backup plan (but very inconvenient) that connects us to Dunn Loring metro. You have essentially cut off all access to Dunn Loring station, one of the stations you're proposing to keep open- and due to these service cuts you're going to see a huge decline in ridership on metro due to these bus cuts! |
| 2A, 2B | Need 2a. 2b |
| 2A, 3A | This plan makes no sense for people living near East Falls Church metro. You are proposing to shut down the metro and the bus lines (2A and 3A) that would take you to other metros. By doing so, you are ensuring that entire segment drives and never takes metro or a bus again. Find a different solution because many essential workers live near East Falls Church and rely on public transportation. |
| 2A, NH2, | 1. We need reliable bus service. There are a lot of people who have given up vehicles (I gave up my car 7 years ago because I live within a mile's walk to metro station and the 2A to get me to Fairfax County early in the mornings. 2. We need to focus on getting the public to work. Eliminating the NH2 bus will increase my ridership to 3 hours one way. I could take the 28A bus but the bus won't be running before 5am to King Street so I would rely on the train but with the NH2 bus eliminating, why not operate it for rush hour only: 6am - 10am and 4pm - 8pm or once an hour from 6am until 8pm and consider a smaller bus or coordinate with Amtrak and Reagan National for a shared bus system. Also consider bypassing the Oxon Hill Park and Ride and call it the NH Special. 3. Those who rely on the NH1 bus can use the D12 bus out of Suitland. It isn't fair for those in Virginia and those getting off at Reagan Airport and Amtrak heading to National Harbor to have to spend \$20 for a taxi. 4. Consider this an NH Special and charge us a flat fee like Metro has done for shuttle services from Rosslyn to Dulles Airport. I won't mind paying \$5.00 one way. |
| 2B | Since the VA bus I use often - 2B - would be eliminated, I would have to rely on Fairfax Connector Bus 466 to get to/from the Vienna Metro station, and it only goes one direction in the a.m. and one in the p.m. I imagine Fairfax may have its own plans for changing/eliminating bus service. If 466 continues in pre-pandemic timetable, I am good. If not, and there's no 2B, not sure what I would do. |
| 2B, 16A, 23A, 23T, 25B, 38B | Proposed routes should at least be served every 10-15 minutes on overlapping segments and a minimum 20-30 minutes on all segments. Some crucial routes are missing from proposed minimum service plan in Virginia including but not limited to: 2B, 16A, 23A/T, 25B, 38B. Bus routes like 3A, 3T, 4B should be served by local bus services. Weekday routes like 17, 18, 21, 22 routes should be served as trunk lines (Ex. Burke - Pentagon every 30 minutes along fastest route with local service filling in areas not served or walkable within reasonable limits). Other eliminated routes should be considered for local bus services. Parking rates during the week in Arlington (Ballston-Rosslyn Corridor) and DC are very high and many people rely on Metro to get to work once companies reopen in 2022. |
| 30, 30N, 32, 34, 36, 38 | Do not combine routes or lower service for any 3 of the 30 buses (30, 30n, 32, 34, 36, 38, etc) |
| 30, 31, 33 | I also ride the 30 buses on Wisconsin Ave to downtown. I don't care about the bus # (30 vs 31/33) as long as the service is decent (no long waits, not constant overcrowding) |
| 30N, 30S | I need 30N/S to get to and from my work in Hill East. Without this line I would have no means to get to work. Having to switch lines would make it a two hour commute to go a few miles. |
| 30N, 30S | Keep 30 N and 30 S |

| Route | Proposed 2022 Metrobus service changes |
|---------------------------|--|
| 30N, 30S | January 2022 we're likely to be back to near pre-pandemic commutes. Cutting service as commuters are returning will cause over crowding and make it difficult to get to/from work. Additionally, Ro he was 30N and 30S are crucial for people trying to get across town, particular people trying to get from Ward 7 to Georgetown and people trying to get from Ward 3 to Capitol Hill. |
| 30N, 30S | SO inconvenient to eliminate cross-town service of the 30N/30S lines. Busses do not operate reliably enough to make connections and transfers good options along this route. Instead, please consider modifying service on some of the shorter routes that overlap with the 30N/30S. |
| 30N, 30S | Previous combination of 30N/30S route with more regular 33 service worked very well for my needs |
| 30N, 30S, 33 | I am opposed to eliminating the 30N and 30S. I regularly travel to upper Wisconsin Ave and the 30N and 30S are a lifeline for me. The 33 service is really spotty having to wait in the cold for a bus that doesnt come regularly at the scheduled time. Sometimes I can go weeks without seeing the 33 near the scheduled arrival time. It makes for a terrible commute.. |
| 30N, 30S, 96, H2, 31, 33 | You want to eliminate 30N and 30S and to change the routing of 96 and H2 buses which takes them away from my bus stop. This will present a hardship for me, a senior who relies on the buses. It will take me hours and more walking to get across town, and it will increase crowding on the 31 and 33 buses that are the only ones that will come up Wisconsin Avenue from Downtown now. There are new developments coming on line between Rodman and Upton Streets on Wisconsin Avenue with thousands more residents and commercial visitors. You are eliminating public transportation options for these riders which will lead to more use of Uber, Lyft, and private cars. I am strongly opposed. |
| 30N, 30S, M6 | If you eliminate the 30N and 30S AND M6 lines, you will do a terrible disservice to the people in my community, including me. Again, this seems another huge victory for Uber and Lyft. While I am fortunate enough to have a SmartPhone and the means to use these services when necessary, I prefer public transit, and I think of my neighbors who are not able to use ridehailing services. In effect, you are telling them that they do not matter. |
| 30S | The changes to the 30s bus routes would not affect my personal travel but could impede others ability to get across town. |
| 30S, 30N, 60S, 70, 79, D6 | You had a great proposed idea to not have the 30S (Suitland) and 30N (Naylor) run and be replaced with shorter routes, among lots of other improvements. Perhaps you could roll all those out. And yes, the 60s have outlived their usefulness south of NH Avenue. Also, perhaps the 70 could run down 9th the way the 79 does. (Perhaps they city could make 7th St one way and make traffic flow again.) If you get rid of D6, you will give in to the idea that rich people dont need the bus, but their poorer in-house employees do. Getting rid of unused branches of other lines is not bad either. My personal route the Yn buses is thankfully not changed. How about putting a Ga Avenue bus stop near the ICC Park and Ride, so people can get off there on weekends and midday and evenings? |
| 37, 30N, 30S | Where is the 37 Bus? And eliminating the 30N and 30S HURTS cross-town bus users (I am one - but students use it daily to go to Duke Ellington). |
| 37, M4, H, E | I can't find the 37 bus in your document. I need to ride the H bus from tenleytown and you are proposing elimination. Without the M4 and crosstown E many students will not be able to get to Deal and Wilson |
| 38B | I ride the 38b daily and it's always crowded. Please don't end this route. |
| 38B | DO NOT eliminate the 38B |
| 38B | I rely on 38B to get to and from work especially at off hours. |
| 38B | Keep Clarendon, Virginia Square, and 38B line open and have ways for people to get to Bethesda MD from Washington DC. |
| 38B | Pre-pandemic, I rode 38B at least 10x/week for commuting and to access Georgetown. It removes the easiest/most reliable way for me to commute and perform most life tasks and largely remain car-free. It will be a huge loss because it is a primary alternative to overcrowded metro rail trains in NOVA (pre-pandemic) |
| 38B | 38B is already a long wait pre-pandemic, if service is cut by 50% I would try to find other methods of travel. |
| 38B | Proposal of elimination of line 38B in second half of 2022 would prevent me from being able to get to work in Georgetown without an absurdly long commute. |
| 38B | Restore the 38B |
| 38B | 38B is important to me and my neighbors. We want to avoid taking the subway into DC due to being indoors and reduced frequency. 38B is the only way into DC. |
| 38B | Too many routes are eliminated under this proposal. Please consider keeping route 38B. It is a useful way for north Arlington residents to travel to Washington, especially if there are delays on the Silver or Orange Line. |
| 38B | The 38B bus is the ONLY way to get from Clarendon to Georgetown. AND if the Clarendon Metro is closed, the 38B is the alternative way to get to the Farragut West. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| 38B | I live next to the Clarendon metro station and starting in March 2021, will start commuting to work via metro. I will utilize the Clarendon metro station most days of the week. Sometimes I take 38B to quickly get from one part of Arlington to another. Not only that, but there are businesses close to the 38B metrobus line that have been struggling because of low ridership of the metrobus. As workers start going back to office buildings in 2021 and 2022, the Clarendon metro station and adjacent businesses will start to recover and be used/visited more often. Closing the 38B metrobus route will not only hurt ridership because the other lines wont be convenient for travelers, but local businesses will struggle and possibly fail. That doesnt have to happen if the 38B metrobus stays open. |
| 38B | I use 38B for grocery shopping. |
| 38B | Please do not eliminate 38 B, especially if you close stations along the route. Plenty of elderly and service providers take this route. |
| 38B | Eliminating the 38B route along with closing East Falls Church station effectively eliminates Metrobus service from Virginia to DC, and specifically Georgetown proper (not Foggy Bottom). What if local jurisdictions also reduce service? Many commuters will be stranded, and the goal of reducing vehicle traffic is diminished. |
| 38B | Can you retain 38B? |
| 38B | Do not eliminate the 38-B. |
| 38B | The 38B bus line is essential for seniors or anyone who cant walk to a metro station or for anyone in rain, cold, or other bad weather conditions. If this line is discontinued there would be no way to use public transportation from my location in Virginia Square. This is especially important since both the Virginia Square and Clarendon metro stations are on the list for possible closure. If Virginia Square and the Clarendon metro stations are closed, and the 38B bus is also eliminated, that means someone would have to walk from Virginia Square to Courthouse or Ballston to access metro – not a viable option for seniors or anyone who cant walk such a distance and also a hardship for anyone in cold, rain, or otherwise bad weather conditions. And if they were returning from downtown they would have to get off at Courthouse or Ballston and walk home. Again, not very senior friendly or anyone friendly in rain, cold, or other bad weather conditions. You would in effect be eliminating public transportation in the Virginia Square and Clarendon areas. |
| 38B | It appears the plan would get rid of line 38B entirely in the 2nd half of FY2022, which I am extremely opposed to. |
| 38B | Please do not eliminate Route 38B. It is needed by many people who do not have a car. Especially if youre thinking of closing Clarendon and Virginia Square metro station. Closing Clarendon would be a huge mistake. VA square is close enough to Ballston and Clarendon - but do not get rid of Route 38B or Clarendon station. |
| 38B | The 38B is used by many senior citizens to go shopping at the stores along the Route which ends at Ballston. There would be no way to get to the Library. (at Quincy Street). Many people depend on the 38B bus line. The 4A and 4B bus lines are the only way for those who live in Rosslyn to get to Seven Corners. These two bus lines should also NOT be eliminated. |
| 38B | 38B is my primary choice for commuting to DC. It is more convenient, comfortable, and reliable than the train. I would likely drive if it is eliminated, especially if Orange line stations close |
| 38B | But please dot cut out the 38 B. We use this bus route. |
| 38B | The primary approach to reducing Metrobus waste is to eliminate redundancy, both within the system and redundancy with Metrorail. I frequently take the 38B bus from Rosslyn to Ballston. However, this line runs in line with existing rail lines. There is no need for the 38B to run all the way to Ballston. Service to and from Georgetown is appropriate - but once rail is available, this should be eliminated. |
| 38B | Our family uses the 38B. More important, I believe the line serves lower-income people who are traveling west to east to go to their jobs. (e.g. domestic workers going into Georgetown). My guess is that many of these will not be aware of your survey or wont be able to take it easily due to language or internet barriers. |
| 38B | The priorities listed above seem reasonable. But the closure of 38B will eliminate the only bus service on Arlingtons main commercial corridor. This would be especially troubling if Clarendon station is closed. |
| 38B | If the 38B bus route is eliminated in January 2022 (after most of the population is projected to be vaccinated and we may be returning to normal!) I would not switch to Metrorail and would discontinue using WMATA transit on my weekday commute. |
| 38B | It looks like 38B was removed in 2022. This is also a key element of my commute. |
| 38B | The proposed elimination of 38B in the second half of 2022 would be a major problem for me. This is my most frequently used bus route. This is compounded by the Metro rial reductions. |
| 38B | The plan states that the 38B Metrobus route would be closed. I oppose this, since the 38B is the line I primarily use. Its my only way into Georgetown. Additionally, there is a 38B bus stop very close to my residence, which makes it extremely convenient for me. However, I dont use the Metrobus system very often compared with the Metrorail. |

| Route | Proposed 2022 Metrobus service changes |
|---------------------------|---|
| 38B, 2A | Eliminates the bus route that gets me home late night from the district (the 38B), says service will be replaced by a multi seat ride but the dc circulator does not cover the same routes to Roslyn and has no service after midnight. Also eliminates service on the 2A that I often use to get to the east falls church metro station from Tinner hill and has no alternative service before Washington and broad. |
| 38B, 2B | I use the 38B to get between Arlington and DC, and I use the 2B regularly to get to work in Fairfax and would no longer be able to do that under the proposed service changes. |
| 38B, 4B | Im commuting to GMU-Arlington from courthouse with life-threatening medical history, and visiting Georgetown frequently. Both disconnection of clarendon and GMU-virginia square metro/38B and 4B buses significantly block my mobility and force me to buy a car to drive. I strongly urge to keep 38B bus line at least... |
| 38B, 4B | This plan appears to eliminate the 38B route, which is the one I use. This would be particularly difficult if metrorail service is reduced and/or the Clarendon metro station is closed. |
| 38B, 4B | Pre-pandemic, I mostly used the 38B for commuting (with 4B on occasion in combination with DC Circulator). Currently I walk. Post-pandemic, I may continue to make some commuting trips by walking and would have reduced use of Metrobus compared to pre-pandemic. I understand the need to prioritize lower income users of the system. |
| 38B, 4B, 3Y | DO NOT REDUCE OR CUT SERVICE ON 38B, 4B, 3Y. Metros continuing to cut service or get rid of routes is unacceptable. NOT EVERYONE DRIVES AND WE DEPEND ON METRO BUS!!!! |
| 38B, 5A, 4B | The 3 bus routes that I use, in order of frequency, are 38B, 5A and 4B. All of these have been proposed for elimination and they are along routes where Metro stations may be closed. The 5A should keep running until Metro trains run all the way to Dulles Airport. |
| 38B, REX, 22A, 4B, D4, D6 | I took a look at bus service changes. I dont think that this plan aims to help low income passengers. Disagree that this plan works to achieve the goals. Especially, lines like 38B, REX, 22A, 4B, D4, D6 are serving important functions for essential workers who commute from NE/SE DC or other areas. |
| 3A | I would be negatively impacted by the plan to end 3A service and close East Falls Church Station. |
| 3Y | I would need to ride the 3Y if the Govt. returns to in person work and I need the East Falls Church Station open for occasional use. |
| 3Y | I dont see a restoration of the 3Y line which is the one I use. I just take multiple buses to my place of work and would want to avoid subway travel if possible for safety and cost. |
| 42, 43 | See prior comments re: concerns about reduced rush hour red line service and at the same time eliminating downtown segments of 42/43. |
| 42, 43, L2 | I can probably get around with my car or by walking, but bus service would be a convenient option that Id consider if it was actually convenient. Cutting back the 42/43 to Farragut Square wont have much impact on my travels, but the L2 is useful for when we need to travel up Connecticut Avenue. The proposal to ramp up service at the start of FY22 only to roll it back six months later seems like a tease. I understand that if new funding sources come through, these plans would not be implemented or only partially implemented, but why not just keep service at sustainable levels for the long term so that riders arent constantly adjusting to new routes or schedules? |
| 4A | Please keep 4A during rush hour times. |
| 4A, 4B | Please dont eliminate on 4A/4B. My husband who is visually disabled relies on that route |
| 4B | I care about 4B and dont want to see it discontinued or severely cut back. |
| 4B | You cant say those are your goals and then eliminate the 4B. Thats disingenous and insane, especially if you also close Virginia Square and Clarendon. 4B serves a ton of lower-income service worker immigrants in Buckingham in Arlington, as well as seniors from several elder-care facilities who cant walk to Ballston. I used to live in that area. Elimination of that route would be a disaster - its upwards of a mile to Ballston, and most demand is into DC, so Rosslyn is a perfect connecting point. |
| 4B, 38B | Metro is proposing to eliminate the only two lines I ride - 4B and 38B |
| 4B, 38B, 25B, 7M | I do not have a car. I live in Arlington because I can get around by bus. You are proposing to eliminate 4B, 38B, 25B, 7M that I use all the time. The alternative bus routes will double my commute time. The alternative bus/metro combo will increase my transportation costs. Please do not cut all these bus routes! |
| 4B, 4A | Route 4B serves a large working class community seven days a week, and bus capacity is often very high. Elimination of this route would have an extremely negative impact on the community, particularly because the alternative route 4A does not operate on weekends. THIS PROPOSAL AS IS IS A NON-STARTER! Perhaps eliminating stops that are close together will speed service and still serve the community. For example, there are 20 stops between Arlington Blvd./Park Drive and Court House Station, some of which are less than 1/4 mile apart! Eliminating some of these stops will improve service for all. |
| 52, 54 | IfThe 52 and 54 buses are going to run nose to tail down the street and a great caterpillar train them it doesn't matter if there are less buses. I presume that bunching occurs with other lines also. It's the timing that's the real critical issue and recent apps that predict when the next bus will appear very very helpful. |

| Route | Proposed 2022 Metrobus service changes |
|--------------|--|
| 52, 54 | We will return to using the 52/54 bus line but there are so many route closures being funneled to that line as a replacement. It was a challenge getting our toddler downtown for school prior to the pandemic because of crowding, I cant imagine how it will be if that one line will be replacing multiple others. |
| 53A, 53B, 62 | Need to use the 53A/B route - using the 62 route in the meantime but it is not as easy. |
| 59, 43, 63 | SO MANY ISSUES. Why are we talking about cutting express bus service (59) and replacing with much slower local service? Why not cut some of the slower local buses instead, or work with DDOT on creating bus-only lanes on the route? I would also prefer to see express-ing the 43 bus rather than eliminating portions of it. PLEASE dont eliminate the 63 bus as it is a very quick way for people in Pleasant Plains to get downtown without hiking all the way to a metro station. Finally, cutting services where a metro station is far away (Palisades, Ivy City) is the WORST IDEA. |
| 59, 54 | Route 59 helps eliminate overcrowding on the last few stops going south during the morning rush hour. Simply adding more 54 busses during morning rush still stops at all stops. That overcrowds all busses that tend to skip stops because all the busses are full from R Street NW through N Street NW going south. Before 59 came into existence, I was passed up by 4 busses in a row one morning while waiting at P Street NW! |
| 59, 96 | The elimination of the 59, the change of the 96, and the elimination of buses through Georgetown would not benefit me at all. The 59 would affect loading on the 52/54, but the majoroty of the changes will generate a lot of confusion. Not advisable. |
| 5A | I oppose the 5A bus removal. I also want to see bus service in Great Falls, Va. |
| 60, 62 | We depend on the 60/62 route to access essential services. |
| 60, H8 | The current plan would leave my neighborhood without ANY local bus service. It is irresponsible, ageist and racist to suggest that the 60 and H-8 can be considered obsolete. It's thoughtless to the needs of American Veterans who live at the Soldier's Home, it's rude to the many senior citizens who reside in the neighborhood and it is irresponsible as many of us are reducing/if not eliminating the use of personal automobiles. Also, with the advent of successful small businesses and restaurants, we should be looking at ways to get folks to those restaurants, businesses and services (library, grocery) by keeping and expanding on the 60 line the runs straight down Upshur Avenue |
| 62, 63 | I NEED ACCESS TO THE BUS ROUTES NEAR MY HOME, 62 AND 63, WHICH ARE PROPOSED TO BE CUT; THIS IS ESSENTIAL TO MY ABILITY TO TRAVEL TO MY PLACE OF EMPLOYMENT, GROCERY STORES, AND OTHER ESSENTIAL LOCATIONS |
| 62, 63 | Reduction/elimination of the 62,63 line would be detrimental to much of Brightwood, who rely on these lines for red and yellow/green line access as well as access directly to downtown. |
| 62, 63 | I ride the 62,63 bus line everyday to commute to work and rely on the 62,63 bus route for transit to metrorail. Eliminating the 62,63 bus line would cripple the ability of myself and my neighbors to get around the city on public transportation. Please do not cut the 62,63. |
| 62, 63 | By 2022, I hope to be returning to work in person and to be able to take the bus to work. I am particularly concerned about the possible elimination of the 62/63 line, which is particularly convenient to get me to destinations that are otherwise hard to get to. |
| 62, 63 | The 62/63 bus is a critical north-south connection in the city. On a weekday morning (pre-pandemic) between 7:30 and 9, the buses are jam-packed. People use this bus to get to work, to school, take kids to day care. Underserved communities use it more heavily than others. Frankly, I struggle to understand how the proposal to completely eliminate this route can be made. At a very minimum, please keep this route for the commuting hours. |
| 62, 63 | I commute to and from work on the 62/63 route and it is usually very full during rush hour. Please do not eliminate this route. |
| 62, 63 | Myself and others in my neighborhood (relatively low income) rely on the 62,63 bus routes to get to work. Eliminating them would mean many would not have access to necessary bus routes. |
| 62, 63 | Please do not eliminate the 62/63. |
| 62, 63 | Protect lines 62/63 |
| 62, 63 | I heard that metro is planning to cut the 62/63 line. This is the line that stops by my house in brightwood and goes straight to my office. I plan on using this line in 2022 when my office reopens. I do not want it shut down |
| 62, 63 | People will be looking for a broad range of transportation options in January 2022. Eliminating bus lines serving neighborhoods - like the 62/63 route - would create significant challenges for many and disincentivize the return to the use of public transportation. |
| 62, 63 | I rode the 62/63 line regularly pre-pandemic, and will return to riding once community transmission is nearing low levels. This is one of the bus routes that I use most frequently, and would not like it to be cut. |
| 62, 63 | You cannot eliminate the 62/63 bus line. |

| Route | Proposed 2022 Metrobus service changes |
|--------|--|
| 62, 63 | The 62/63 bus route is the route that I rely upon to get myself (single mom) and my two school aged kids (DCPS students) to school. Removing or reducing service on this line would make it all but impossible for me to access my job and the kids' school. Please keep this line active and with frequent headways. I realize that the pandemic has reduced demand for bus service but THAT WILL NOT ALWAYS BE THE CASE. Please do not make plans to eliminate bus routes based on current demand "demand will be changing as people are able to return to work and school in person. We absolutely rely upon the bus during non-COVID times " please do not reduce travel options for DC residents who live in this neighborhood " we need MORE investment in public transit, not less. |
| 62, 63 | I need the 62/63 bus line!!! |
| 62, 63 | 62/63 is my primary means to get to work. The commute is already far too long given the distance and taking a metro or alt bus would add 30 min or more. Ridiculous that public transport should be so slow, inefficient and unavailable in one of the poorest wards for ppl that depend on it to get downtown |
| 62, 63 | Bus route 62,63 is vital for people in Brightwood, which has been among the hardest hit communities in DC by COVID 19. Children also use this route to get to school. Cancelling this route is unacceptable! |
| 62, 63 | eliminating the 62/63 bus route would make it harder for me to access the metro - i currently take it from northern petworth to the petworth station. |
| 62, 63 | Please do not cut 62/63 services. If anything these lines will need MORE buses post normalization. I frequently took this bus from Takoma to work downtown and it constantly filled, with riders often being turned away. With its direct neighborhood connections to downtown and route that many children use to get to school, it is not feasible for this line to be cut. |
| 62, 63 | I agree with the above suggestions and I will need the 62,63 line to continue to make commuting via metro feasible. Please do not cancel the route that goes between Petworth and Takoma. |
| 62, 63 | This is a very bad service plan. I am speaking on behalf of hundreds of patrons of the 62, 63 bus line. Disbanding this line as things begin to open up is a terrible idea. This bus line is the most direct route from my area to downtown and my place of work. If individuals are expected to go to work in 2022, we should have proper transportation. This plan appears to be made in haste without considering the hundreds of employees who work and go to school and have other needs downtown. Please reconsider this plan, with respect to the 62, 63 bus line immediately. |
| 62, 63 | The January 2022 service plan proposes the complete elimination of the 62/63 bus routes, which serve the Ward 4 Short-Term Family Housing Facility, at 5505 5th Street NW. The FY2022 Proposed Metrobus Consolidated Route Network Service Plan utilizes a "Equity/Essential Travel" criterion, which is supposed to take into account "the low income who rely on Metro for essential travel to groceries, medical appointments and daily necessities [and] also support access to jobs in health care at hospitals and in other sectors"and yet this criterion ignores the very group of people who will be adversely impacted by the elimination of the 62 and 63 bus routes. WMATA's final "Framework for Transit Equity: Metrobus Service Guidelines," publicly unveiled on December 10, 2020 and based on data from July 2019"February 2020, indicates that routes 62 and 63 meet the proposed Service Guidelines, including availability, route design, reliability, comfort, productivity, and cost effectiveness. Simply put, WMATA should NOT eliminate the 62 and 63 bus routes in the final FY2022 budget since it harms many of DCs most vulnerable residents who depend on these bus routes. |
| 62, 63 | Please do not remove 62/63 as it services an area with otherwise very limited public transportation options. It also connects this community with other major thoroughfare as well as services multiple schools. |
| 62, 63 | Im very concerned about the elimination of the 62/63 bus line. This serves a lot of students to get to and from school and is very beneficial to the Manor Park/Brightwood neighborhoods. It provides access to both Petworth and Takoma metro stations. |
| 62, 63 | If there's no 62/63 bus service I can't get to work using transit. |
| 62, 63 | The proposed elimination of the 62,63 line is extremely problematic. This is a popular route that brings students to at least 3 different schools, and provides direct transport to the metro. For a neighborhood with many parents of small children this line is a life line. This line is consistently used, and it's important for my daily commute. |
| 62, 63 | I am personally ok with changing 62/63 to run between Petworth and Takoma. That would retain my use of this bus line, but I expect that if you eliminate the 63 line, a 62 bus will arrive at each stop about every 10 minutes. |
| 62, 63 | pre-pandemic the 62 and 63 lines were always packed; ALWAYS, especially during rush hour in the morning and afternoon. If you expect people to go back to work like you say you do, to levels they were before, you cant use the excuse of the pandemic to make cuts IN THE FUTURE. That makes no sense whatsoever. |
| 62, 63 | I do not support eliminating the 62/63 bus service. I rely on this to get to two metro stations, one for commuting. I plan to be back to commuting to work by fall. I see a lot of school children on this route to access school as well as elderly neighbors using it to get to the metro. |
| 62, 63 | Do not eliminate 62/63 |
| 62, 63 | We currently live over a mile from a metro station and the 62/63 provides a safe option to residents in that community during its service hours. It also allows for workers / students / elderly / disabled to get to metro stations on a more timely basis (and safely). |

| Route | Proposed 2022 Metrobus service changes |
|--------------------------------|--|
| 62, 63 | If I read correctly you are eliminating the 62/63 line in January 2022. So basically as a handicap senior I have no excess out of my neighborhood because I cannot get to Georgia Ave. or New Hampshire Avenue. What do I do after January 2022? |
| 62, 63 | The completely elimination of the 62/63 bus route would completely change my commute plans. I moved to the home I live in now during the pandemic looking forward to ride the these buses to work downtown everyday. |
| 62, 63, 52, 54, S, E | Again, not clear how this plan will impact area in upper NW East of the park. The lines that my family relies on to get to work and school--62/63, 52/54, the S and E buses. |
| 62, 63, 59 | The proposed plan assumes that regular people that don't fall into the 3 categories can leave without public transportation. The proposed elimination all busses that go to Takoma station (bus 62, 63, 59) is ridiculous. This bus is used by many schoolchildren to get to and from school (Coolidge high school, ida wells school) and many people who use Takoma station to go to work. When Takoma station is closed people use this bus to get to Petworth station to go to work. There is no easily accessible replacement for the bus! Also, the area is still heavily affected with crime and I personally afraid walking home from Takoma station in the evening. I always take the bus. How can you eliminate all busses to/from Takoma station? |
| 62, 63, 64, 70 | Again if you take away the 62-63 that will put a stop to people who rely on the bus to come from work late at night. It is not convenient for me to get off the 64 or 70 and walk to my house in the dark late night because there is no 62. That is not safe. Please do not take the bus rite away. It will cost me more in alternative transport thus not using metro anymore thud ridership goes down. |
| 62, 63, 70 | I and many people in my community need the 62/63 bus line. Line 70 is not accessible enough and it does not go to the Takoma station, making getting to the red line much more difficult. It is unacceptable to get rid of such an important service for my community, which is full of underserved people who NEED metrobus service so they can get to work and school. The 70 line is not an acceptable replacement. We need the 62 at LEAST. |
| 62, 63, 70 | My common relates to the elimination of the 62/63 bus line. I am totally against the removal of this line. The proposed rerouting of the 70 bus is not acceptable. I live near the 5th and Peabody stop. School kids ride this bus as there are several schools along 5th St. I am a senior citizen and having to walk extra blocks to get too and from either Takoma or Petworth stations is not acceptable. The 70 bus is a crowded bus under normal circumstances, having to ride an already crowded but is not acceptable. The proposed changes seem discriminatory toward minorities who primarily ride these buses. |
| 62, 63, F6, E4 | PLEASE DO NOT SHUT DOWN the 62/63 AND F6 Metrobuses and routes. I use 62/63 and F6 on a regular basis to go to/from work and to run errands, do shopping, and go to appointments. The 62/63 serves the Petworth, Upper Petworth, and Fort Totten neighborhoods. There are many people who use public transportation in these neighborhoods, especially the elderly, K-12 students, low income neighbors, and Latinx immigrants, who must get to work, school, and appointments. Additionally, without the 62/63, we will be cut off from Takoma Park, where we do shopping. Also, please note that K-12 students in schools along the 62/63 route use this bus on weekdays to get to and from school. Finally, the F6 is a great bus route that connects metro stations, from New Carrollton to Fort Totten. I use this bus regularly to get from my job at UMD to Fort Totten, where I transfer to the E4. I cannot afford to buy a car or to pay for Rideshare or taxi. Many people are in the same boat as I am and we rely on Metrobuses. Thank you. |
| 62, 64 | I object to the elimination of the 62,64 lines - which serve predominately Black and Brown riders, including many front-line workers traveling from Ward 4 to downtown DC for work |
| 63, 62 | do not get rid of the 63/62 service which serves the Mayors big homeless shelter in Ward 4! |
| 63, 64 | I see you have eliminated the 60 routes, all except a shortened version of the 64. This is extremely frustrating - I am a regular user of the 63-64 from Park View southwards, and this would eliminate a bus I use frequently on the weekends and off-peak hours coming home from downtown in pre- and post-pandemic life. If you were increasing 70/79 service to compensate (a bus that is already crowded, even now!) I might feel OK about this, but youre not. By January 2022, the schools served by the southern portion of the 60 buses will be back in session and I know the 70s arent as convenient for those. Until late 2019, I commuted on the 63/64 every day, so even though I dont do it now and wont in Jan. 2022, I can speak to who is on that bus. At rush hour, its commuters and kids. And the commuters might be slow to return, but i sure hope the schools are taking children by next January. |
| 63, 64, 70, 79, 52, 54, 59, 50 | Getting rid of the 63 and 64 lines during rush hour would be a mistake. Pushing everyone from these lines to the (pre-pandemic) already very crowded 70/79 and 52/54/59 lines would cause a major issue for my commute. The 70/79 line does not drop me near my office building, and the 50 line is not near my house. I would likely instead drive to work rather than take the bus. |
| 7, 238, 16C, 16A | There is no service that covers Columbia Pike between Route 7 (Leesburg Pike) and Route 238 (Little River Turnpike). Id recommend that the revised 16C continue down Glen Carlyn Dr to Blair Rd and south on Columbia Pike. Then turn onto John Marr Dr (like 16A) to Little River Turnpike and then take Backlick Rd back on to Columbia Pike and return to the Pentagon Metro Stop. |

| Route | Proposed 2022 Metrobus service changes |
|----------------------------|--|
| 70, 79, 63, 64 | What is metros plan when the region starts to come back to pre-pandemic levels. Will bus lines be added? How will WMATA plan to add bus lines back in. These cuts seem feasible for the short term, however they will seem to strain the condensed lines in the long term (when thinking of the pre-pandemic ridership). With bus lines 63 and 64 cut, the proposed plan of using lines 70 and 79 without additional services to either of those lines seem inadequate. Buses 63 and 64 were already packed during rush hour, as were 70 and 79. When ridership is back up, these are going to be near impossible to use --- leaving no viable ridership options south of GA-Petworth. I plan to be using bus 63 or 64 by fall 2021. |
| 70, 80, 90, 54, S2 | can you add more buses to the more used routes.. for instance, 70, 80, 90, 54, s2. thanks |
| 70S, S | I take the 70s and S buses and they were always packed before the pandemic. How can you possible reduce service by 50% when the buses are so packed that they often just pass stops with more people waiting |
| 74, P6 | Eliminating 74 and P6 eliminates almost all of the the already limited bus service in Southwest. |
| 79, 70 | This plan will be good if more express routes like the 79 are added in contrast to the 70 bus route. |
| 7A | I always ride 7A and take it from Pentagon City to Mark Center. To not have a bus on that route at all would ruin my daily commute. |
| 7A, 7F | We rely on bus service for our commute (7a, 7f) and really hate to drive into DC. |
| 7A, 7F, 7Y, 22C | I live along the 7A/F/Y line, near the north end (Shirlington/Fairlington). Under this plan, busses will be so infrequent that they will be packed when they reach my neighborhood, and I wouldn't be able to get a seat. With your additional proposals to reduce frequency and eliminate the 22C line (which I used to use at least once a week due to 7A delays), combined with the fact that I do not have a MetroRail station with parking nearby, means this proposal would leave me stranded, late for work, and unable to use public transit at all. |
| 7A, 7M | I take either the 7A or the 7M from the Mark Center to either Shirlington or the Pentagon in the afternoon everyday and you have eliminated that service. I also take the 7M to the Pentagon for meetings. I have been riding every day since the start of COVID. Not everyone can work at home and not everyone can drive. |
| 7A, 7M, 25B, G14, G12, W14 | I am a low income customer who relies on Metro to get to my doctor appointments using the 7A, 7M, 25B, G14, G12, and W14. PLEASE do not cut these bus routes. They are my main way of getting to my doctors. I understand that money is tight, but PLEASE do not cut the bus routes above so that I can get to my doctors. I am a Metro Access user (id#17130) but I use Metro Bus and Metro Rail more than I use Metro Access due to the fact that it would cost me \$13 round trip using Metro Access to get to one doctor appointment and as someone on SSI who is not working I dont have that type of money. I use Metro Bus and Metro Rail alot when the pandemic isnt going on. It is only because of the pandemic that I havent been using Metro lately, but as soon as I get my vaccine and have waited about a month after the last dose to get it in my system , I plan to start using it again in order to start seeing my doctors in person. PLEASE if there is any way that you can keep theses bus routes I would truly appreciate it; they are my life line to get to my doctor appointments. I love using Metro Bus and Metro Rail; it is only because of safety concerns right now because of COVID19 and not having my vaccine that I am not using it right now. However, I have came to depend on Metro to get me places and Metro Rail and Metro Bus has never failed me. Metro Access is not that reliable as Metro Bus and Metro Rail is. I cant drive due to one of the medications that I am on and my disabilities; therefore Metro is my main form of transportation. |
| 7M | The 7M is a part of my commute. Eliminating it would mean Id have to find another way to get to work |
| 7M | Route elimination of 7M route will impact my day to day life |
| 7Y | I moved here because of the 7Y bus!!! And now you are thinking of eliminating it??? I am VERY upset! |
| 7Y | Please dont eliminate 7Y route into DC! |
| 7Y | Keeping the 7y going, running all the way from Alexandria into DC up Constitution would be excellent, especially now that Memorial Bridge is back open. Those are two areas not particularly well served by Metrorail (Shirlington and Constitution Ave), and it would really help. |
| 7Y | I rely on the 7Y to get to and from work at the State Department. Forcing me and my colleagues onto the train is expensive (additional \$4.25 per trip, \$8.50 per day, \$42.50 per week, \$170 per month) and adds 35 minutes to the morning commute (because it takes time to walk from Foggy Bottom to 22nd & C) and 45-60 to the evening commute (because the transfer back to a bus is less reliable). I urge you to find a way to continue bus service from Virginia/the Pentagon to the federal buildings along Constitution Ave NW. We are not and will not be on telework and we cannot park at work. We depend on public transportation. |
| 7Y, 16E, 38B | Too many routes are eliminated outright with no alternatives. Elimination of the 38B, 16E, and 7Y leave people who depend on Metrobus for travel between DC and VA with no alternative other than Metrorail. There are people who prefer to take the bus instead of rail. The region definitely needs a bus connection between DC and VA. |
| 7Y, 7A, 7F | Please keep 7Y, 7A, and 7F in service. I used to take 7Y to work most days, sometimes getting off downtown. It was a godsend to have a bus option for when the Metro was down. Also, the buses on that route were crowded - I just don't understand where everyone will go once they go back into the office. If these service changes are made to the 7Y route, I will likely need to buy a car to drive to work. |

| Route | Proposed 2022 Metrobus service changes |
|------------------------------|--|
| 80, 96, D4, P6 | Changes to the 80 means I wont be able to ride, the 96 is a straight shot from my house to Adams Morgan but the service changes eliminate that, the D4 goes right past my house but there are plans to eliminate the entire route which is inconvenient, and most importantly I need the P6 because it drops off right in front of my house and there is no alternative service because the D4 will be eliminated also. |
| 83, 86 | The changes to the 83 and 86 line represent a fundamental misunderstanding of the use of those lines by its riders - if we want to get to the Greenbelt station, we take the C2. We use the 83 and the 86 for other vital purposes like commuting from home to school, getting groceries and other essentials from the cheaper stores north along rt 1 or near PG Plaza, accessing medical services, etc, all of which the new route would eliminate. The buses should not be thought of as a connection to rail, but as the transport option for those who struggle to scrape together the two dollar fare and so need the bus to travel to and from lower income neighborhoods and business areas. |
| 83, 86 | If this keeps 83/86 line it works, otherwise no |
| 86, 83 | Cutting Route 86 and ending Route 83 at Greenbelt Station would be devastating to College Park, increase traffic congestion and make it hard for many people to get to the Greenbelt and College Park stations. |
| 86, 89 | Eliminating bus service (86, 89) north of Greenbelt Station leaves us stranded! I cant believe this is even being considered! A bus route has served Beltsville and Calverton for over 40 years, with service being downsized from 3 routes to 1 during that time. The road improvements along Powder Mill Road include the installation of bus pads and sidewalks to reach them, so clearly someone sees how important public transit is to our community. On a personal note, I do not own a reliable car. Eliminating Route 86 leaves me with NO WAY TO GET TO WORK! Please cut the budget somewhere else. Do not cut off Beltsville from the rest of the world. |
| 89, 89M | 89 89M is the Only Reliable Means of Transportation to get to Metro Station |
| 89M | I do not have a problem with the above question regarding increase services; however, I do have a problem with the proposed service plan changes with College Park-U of Md and 89M. Many customers are getting on and off the train or at the College Park station, so to stop service going there would affect many customers. |
| 89M | Getting rid of the 89M bus would make it harder to get from south Laurel to a metro station. |
| 8Z | Eliminating the 8Z line, in conjunction with the closure of the van dorn metro station, would leave a large segment of the west Alexandria population without a realistic public transportation option. |
| 8Z | By Jan, work levels will be increasing with vaccinations so will need bus lines to return, specifically 8z. |
| 8Z | Impossible to tell since the explanation sheet is missing for 8Z (not sure how frequent bus will run; making a guess as to where the stops will be). If trains also only run 30 minutes, that means connecting to the bus in a timely manner will be next to impossible. |
| 8Z | I have heard that metro plans to cut the 8Z I take to work after the pandemic... The community needs a bus that goes to the pentagon without having to switch buses or take a long circuitous route |
| 96, H2, H4 | I understand that the 96, H2 and H4 routes would be shortened and would no longer go as far as Tenleytown. This change would be very problematic for me (and others living and/or working in the northern section of Wisconsin Ave - with consequently no bus routes traveling between the Cathedral-Tenleytown part of Northwest to the central and eastern parts of the city). I regularly use these lines to travel between Adams Morgan and the Cathedral neighborhood and Tenleytown. It will be incredibly inconvenient for me (and many others) if the Tenleytown part of the route is eliminated. This is an incredibly bad idea. |
| 96, H4, H2, 30S, 30N, 31, 33 | This is a massively ill-judged plan - many essential workers and families rely on access to cross-town buses, which provide better, more reliable and often quicker/ more straightforward journeys than Metrorail. During the pandemic bus ridership may have decreased, but the cross town lines are still well-used and relied upon by many people. Removing them creates a physical divide between affluent NW and less-affluent NW/ NE/ SE DC and would promote further ghettoization and separation between groups of residents. It will also affect students travelling to schools in upper NW (around Tenleytown) from Mount Pleasant and AdMo who previously (when schools were open in person, which they will be again soon) relied on crosstown services to travel to/from school. Removing these routes is also bad for businesses (esp restaurants and bars) in 14th St/U St corridor, Mt Pleasant, Columbia Hts and Petworth/ Georgia Ave as many residents of upper NW used crosstown bus services to access these businesses (metrorail doesn't provide a good substitute - as it involves a journey along the red line, a transfer to yellow line and then a journey on the yellow line, using the 96 or H4 allows access to these areas within 20-30minutes in one trip). These changes also have a significantly negative impact on the residents of the Brooks and other social housing in NW whose closest transport access are bus routes - the Brooks is 20-30mins walk from the closest metro stations but moments from bus links - both cross town H4 and H2, 96 30S and 30N and the Wisconsin Ave routes (31 and 33). Ridership on longer crosstown routes may have dwindled somewhat during the pandemic due to the assumption that close contact for more than 15 minutes presents an increased risk of transmission - with the advent of vaccines for all DC residents and (hopefully) falling case numbers it is likely many will return to the buses over the coming months and certainly by Jan22. |

| Route | Proposed 2022 Metrobus service changes |
|---------------------------|--|
| 96, L2, H | It appears that the 96 route would be eliminated in the second half of 2022 that services from union station to Woodley park station and up Wisconsin. That is my main route, between Calvert street and U street, or Calvert street and Tenleytown station, to do shopping as there are not accessible grocers nearby. I did not see a replacement for this route so I would be very impacted by this change. The L2 route appears to be cut, and merged with the H route, this would be fine so long as I can travel from Connecticut ave to van ness station, again where accessible grocers are. |
| A4 | My bus route is A4. I travel on this route almost everyday for work, etc. and have done so for over 13 years. I also have a lot of older people who live in my apartment complex, and nearby complexes, and houses who need this bus route to get around. To reduce, or eliminate the A4 route would cause a lot of grief for the workforce age, kids, and retirees who depend on it to get to the metrorail (which takes 8-10 mins from where I live on the A4 route). |
| A4, A8 | The A4 line goes up a hill into my neighborhood passing many houses, and 3 apartment buildings. There are a lot of workforce, elderly, and kids who need to be able to walk to the bus stop outside their homes, and catch the bus. Some of them can not walk a few blocks downhill. to the next line (A8), and then have to walk a few blocks uphill everyday afterwards. Please keep the A4 line running for the many who need it. |
| A6, A7 | It looks like the A6/7 buses won't service the stop that I used everyday which is on Atlantic and Barnaby Streets |
| A8 | Expanded A8 needs to connect directly to Giant grocery on Alabama Ave to continue providing grocery access to residents of this food desert |
| A9 | you have to restore service on the A9 rush hour bus route |
| AT3, AT4, 22A | No bus service between Parkfairfax and any Metrorail station after DASH discontinues the AT3-4 loop and WMATA discontinues 22A service. |
| B2, 70, D8 | Eliminating this level of service will cripple this city. There are many affected lines that I'm not familiar with, but I'm particularly concerned with the changes to the B2, 70 and D8 lines. I honestly cannot believe that reducing service to 50% of prepandemic service is a serious proposal. |
| B24 | The plan is to eliminate the B24 bus route. That is the only bus in that area and I will not be able to get to and from work during the week. There is no way I can get to the metrorail station from where I live without that bus. |
| B24 | B24 is really needed |
| B30 | Don't cut the B30. It just exacerbates traffic and parking problems. Greenbelt metro to Bthe B30 to BWI serves a wide area and the alternates are not good. You could cut the frequency but please keep the service. |
| B30 | that's fine but I want to ride the B30. I do like how major routes are probably not affected by that though. |
| B30 | The B30 is essential for allowing people to get to the airport! |
| B30 | I think it's a shame to get rid of the B30 route. Not having BWI connected to DC by a metro service, is a real disservice to the area. This has always been a great asset to the area and we have used the B30 often. |
| B30 | Absolutely not. With no bus service to Metro, and trains only running every half hour, I would probably just drive into town. It's a shame the B30 bus service was ever cut. People take Metro out to Greenbelt and then would get on the B30 to Baltimore airport, completely by mass transit. It was widely used, as I observed waiting for my bus at Greenbelt in the evening. |
| C12, C14 | I am a low abled person that requires the C12 and C14. Bjs service in PG county is already so limited. I support some of the extensions and reroutings that make sense but this would devastate ridership even more |
| C12, C14, H11, H12, H13 | I have looked at the plan and it would eliminate both the C12, C14 and the alternate lines that I could walk to the H11, H12, and H13. |
| C2, G12, G14, 89, 87, R12 | I live in Greenbelt, and I don't have a car, and I need all of the lines C2, G12, G14, 89, 87 and R12 to get to the places I have to go. For instance, the RTA bus 302 between Laurel and Greenbelt runs less than once per hour. I need the 89 and 87 busses to get between Greenbelt and Laurel. |
| C2, J4 | I tried to read the proposed changes but there were too many to understand. However, I see both C2 and J4 (which I was hoping would be returned post pandemic) as being eliminated. That makes it really hard for me to get from Langley Park to College Park. |
| D1, D230N, 30S | We cannot cut bus access so much, but I do appreciate the focus on those who need the bus most. The D1 and D2 are essential to my daily commute, and the 30N, 30S are required for my community. |
| D14 | My bus (D14) mostly runs once an hour. Were that to change to every two hours it would be extremely inconvenient. Between that change and Metro running less frequently, traveling could take a very long time. Very problematic for working people. |
| D2 | I rely on some routes like D2 for alternative service and would want that route maintained. |
| D2, 30N, 30S | Eliminates the D2, 30N*, 30S*, which I use frequently and replaces them with undefined routes that will be less convenient on routes that were already full pre-pandemic or cuts altogether |
| D2, 96 | Both bus lines I rely on (D2 and 96) would be cut in the areas I ride them |

| Route | Proposed 2022 Metrobus service changes |
|------------|---|
| D2, G2 | I currently use the D2. Elimination of the line would significantly affect my daily commute from Dupont to Glover Park. The Proposed N6 does not service the same Glover Park area (or Glover Park at all). Additionally, the one semi-alternative, which would still require a connection and increase my commute time by at least 50%, is taking the G2 to from Dupont Circle to Wisconsin Ave. This line is also planned to be eliminated. Further, the G2 is the only bus that connects to Georgetown University and to the west side of Wisconsin Ave. Eliminating this route would drastically reduce the already limited access to west Georgetown and the school - from the staff, student, and public perspectives. I know the rejection of the G2 was strongly opposed the last time it was suggested. Also, on the D2, I know your ridership estimate is wayyy off. This is because each morning between 8am and 9am and afternoon between 3:30pm and 6pm, there are tens and tens (likely over 100) of students at Duke Ellington High School that take the bus each way to/from Dupont Circle. And, because the students ride for free, the bus card system does not account for them. That minority, school-age population NEEDS the D2 service and eliminating it (without replacement.. G2 elimination + .N6 does not come close to covering the route) puts them and their families in more of a financial burden. |
| D2, G2 | DO NOT CUT G2 or D2. These lines are critical to Georgetown University staff and students like myself. Please please please do not eliminate this line. |
| D2, M4, N6 | N service would no longer go down Mass Ave to Dupont Circle, which is so much faster than D2 route you're proposing. D2-N6-M4 would not only leave thousands of riders without service at their stops in interior Glover Park and on the N series and the M4, but would also have such infrequent service that even people whose stops would still be served would very likely face overcrowded buses on the route at peak times. Buses were already running close to capacity in early 2020 and leaving people behind at bus stops because of overcrowding. That is not the recipe for winning back riders after the pandemic. |
| D3 | It's ironic that you claim to serve low-income customers when you eliminated the D3 which was critical to one of those customer bases. |
| D4 | Please do not get rid of the D4 - its Trinidad's only connection to downtown. I'm not sure how I will get to work without it. |
| D4 | The elimination of the D4 line would remove the SINGLE bus access in Trinidad. To Anywhere. |
| D4 | Need to maintain D4 bus |
| D4 | There is only one form of public transportation that service Ivy City (D4) and you are proposing to eliminate the entire line. You admit in the proposal that there are no alternatives to reach Ivy City, which is only growing with more residences and businesses. This cuts off a historically low-income area from many parts of DC. ABSOLUTELY CANNOT DO THIS!!!! |
| D4 | Why are you eliminating the only buses that come through the Trinidad neighborhood- many people use this for work. pre-pandemic the D4 that went to DuPont would be packed and many waiting for it could not board. 2020 should not be the decision on eliminating buses or metros - MD and VA need to step up and help pay for this service. |
| D4 | The D4 bus route should not be eliminated due to the residents in Ivy City and Trinidad use this service to go to work, local businesses and to their doctor appointments on these routes. Are these routes being eliminated because of the protected bike lanes and the proposed streetcar? |
| D4, D6 | D4, D6 and other bus routes are needed and crucial for us to get to medical appointments, grocery stores, work, etc. we need the buses to still run even when the metro stops are closed. If anything buses should still operate! |
| D4, D8 | Please don't cut the D4 or D8 lines. They are vital to my neighborhood's access to transit |
| D4, D8 | You shouldn't get rid of the D4 and D8 lines. Access to Ivy City and Trinidad via bus are vital to us and our neighbors who rely on them. |
| D4, D8 | The plan to remove both D4/D8 service completely is unacceptable. Trinidad will be left with NO PUBLIC TRANSPORTATION OPTIONS. The nearest metro is OVER a mile away and there will be no bus service. This is UNACCEPTABLE. |
| D4, D8 | I support ending D4 and D8 lines. The ridership appears to be minimal and most of my neighbors no longer take the bus |
| D4, D8 | Do not cut the D4 or D8. The D4 provides a vital link downtown to folks in Trinidad and Ivy City. And the D8 is a critical bus route to Washington Hospital Center--I myself have taken the bus to WHC from my Trinidad home in the last 3 months. |
| D4, D8 | I understand combining overlapping routes or running fewer busses. But my neighborhood relies on the D4 and D8. There is no nearby metro nor other bus routes within a comfortable walking distance. |
| D4, D8 | Need D4 and D8 service in Trinidad DC. |
| D4, D8 | You cannot cut Trinidad off from metro service by eliminating the D4 and D8!! |
| D4, D8 | Proposal includes elimination of BOTH of Trinidad neighborhood's metrobus lines. This would be devastating to commuters in this neighborhood some distance from alternative options. Pre-pandemic, I frequently used D4 and D8 busses to get to Union Station, and will again soon once my office reopens. |
| D4, D8 | You're proposing killing the D4 and D8, totally cutting Trinidad off from bus service. This is unconscionable. |
| D4, D8 | D4 and D8 are needed in the Trinidad community. |

| Route | Proposed 2022 Metrobus service changes |
|--------------------|--|
| D4, D8 | WE regularly rely on the D4 and D8 as Trinidad neighborhood residents. Additionally, reducing service and/or eliminating service on the D4 and D8 would affect our access to our jobs, daycare and school, retail and groceries, and more. It would also affect community members access to shelters and other services in and around Ivy City. |
| D4, D8 | Proposal eliminates the D4 and D8 bus lines removing all of the Trinidad neighborhood public transit. This proposal leaves low-income residents with no access to metro stations, medical services, healthcare, food services, social services, and transportation to employment. The Trinidad neighborhood and Ward 5 have been affected by the pandemic more than other neighborhoods/wards and this proposal further disenfranchises our low-income and senior citizen residents. |
| D4, D8 | If metro is focusing on Low-income customers who rely on Metrobus for travel to medical appointments, to shop for groceries, and for other essential purposes; and Essential workers, including those with jobs in healthcare, food service, social services, and other important societal functions., then why are you proposing to cut lines in neighborhoods where residents rely on these services? Neighborhood in question is Trinidad. Current proposal is to eliminate D4 and D8 thus creating a vacuum in the Trinidad neighborhood where income rates are low, car ownership is low compared to other neighborhoods and where residents have to walk 3/4 a mile or more to get to the nearest bus, which arrives every 45 minutes. |
| D4, D8 | Both D4 and D8 bus routes travel through the Trinidad neighborhood. They are the only buses that go through the neighborhood. Both are being canceled. This will have a huge impact on the residents of the neighborhood. If forced to use bus routes outside the neighborhood that require a longer walk to access and that are also reduced in service, the number of transfers and travel times will be increased. This makes bus service less useful. It seems completely contrary to the desire to provide services to those low-income residents who live in the neighborhood and rely on metro bus. It is also contrary to DC push to reduce vehicle traffic. Personally, this will increase me driving my car to get to location in town. |
| D4, D8 | The elimination of D8 and D4 buses would cut of a major growing area of DC and an highly impoverished community from work, entertainment and hospitals. Much of the effect location is too far from the nearest metro and alternative bus routes are insufficient. Only the x2 would remain for the developing area of Trinidad and this bus is already over crowded. |
| D4, D8, D3 | getting rid of the D4 and 8 is laughable. the D3 was tragic enough a few years ago. youre cutting off an entire neighborhood from easy access to the hospital and the rest of the city. just NO. |
| D4, D8, E2 | Eliminating the D4 and D8 bus lines would completely contradict the second bullet: Low-income customers who rely on Metrobus for travel to medical appointments, to shop for groceries, and for other essential purposes. Both lines serve low-income areas: Ivy City, Trinidad, K Street NE/NW corridor, Mt. Olivet and Brentwood Roads NE. I live in Trinidad and take the D4 and D8 regularly, and have even during the pandemic. Additionally, my area has a large elderly population that depends on having Metrobus service close by. Eliminating these lines, and then offering no alternative except to walk far distances to catch other lines, would be detrimental to my community. The E2 is also proposed for elimination, which serves Ivy City in addition to the D4, with D8 service available just outside of Ivy City on Mt. Olivet and WV Ave NE. If you eliminate all these routes, there will literally be no available transportation for Ivy City residents, even transportation that you have to walk far to get to. I implore you to reconsider eliminating the D4 and D8 bus lines. Please do not leave my neighbors and I stranded. |
| D4, D8, G2, 42, 43 | D4, 8 and G2 get me to Georgetown Hosp and Wisconsin Ave via the 42/43. If you eliminate those routes, is there an alternative? I dont think so. |
| D4, D8, X1 | Do not eliminate the D4 and D8 and X1 busses. |
| D4, D8, X2 | The proposal to eliminate D4 and D8 service in 2022 is VERY alarming to me. As a resident of the Trinidad neighborhood, I rely on the D4 and D8 to get to Union Station and Downtown. The X2 is already one of the most crowded lines in the city, and if we consolidate the D4, D8, and X2 riders into one group, nobody will ever be able to catch a bus due to overcrowding. People in my neighborhood NEED the D4 and D8 busses. Please do not do this to us. |
| D4, S8 | We need the D4 and S8 lines in Trinidad!! |
| D4, X2 | Eliminating the D4 would drive more people to the already overcrowded X2. In addition, unclear if the plan would reduce service to X2 or keep it at current level, but service should be increased on that line. It already frequently bypasses stops/passengers due to full buses. |
| D5 | My child uses the bus to get to Hardy and will also need to use the bus to get to Wilson. At this point, the D5 doesnt come through often enough (when one can even catch it) and its stops arent close enough. |
| D5, D6 | Same as before "d5 and d6 essential for work |
| D5, D6 | This would leave no service for those living between Georgetown MedStar Hospital and Arizona and MacArthur. There is also no subway access or a means to get downtown from basically all of MacArthur. Further, for those needing to get to a grocery store, pharmacy, doctors etc. the only option will be private transportation. This will make what is currently bad congestion even worse. D5 service has already been cut, by eliminating the D6 as well you are essentially eliminating all public transportation for those living in the Palisades neighborhood. |
| D5, D6 | My husband and I live on MacArthur Blvd and do not own a car. Pre-pandemic, we relied on the D5/D6 bus to get to and from work. This plan would leave us without an effective and affordable means to travel to work after COVID. |

| Route | Proposed 2022 Metrobus service changes |
|----------------|---|
| D5, M4, D6, N2 | Palisades residents would be cut off from nearly all errand and shopping areas: Georgetown (D5 limited times), Tenleytown (M4) and shops on MacArthur (D6). Commutes to workplaces in Chinatown (D6), Farrugut (N2) and Rosslyn (D5 limited times to Key bridge) would take so long it is not practical to take WMATA. Our household eliminated our second car during COVID so will be more reliant on buses during reopening. |
| D6 | Need to continue D6 bus service. It is the only one near my house. |
| D6 | DO NOT CUT THE D6. You will create a transportation desert along MacArthur Boulevard. |
| D6 | The plan proposes cutting the D6 line which is completely unacceptable. As one of only two bus routes that serve my area, and the only one that serves my area outside of weekday rushout, my family and many neighbors depend on the D6 to get us to work. Additionally, many DC residents depend on the D6 to get to Georgetown and Sibley hospitals. |
| D6 | Object to the elimination of the D6 |
| D6 | I am writing to keep the D6 bus route as it connects local DC residents to hospitals including Georgetown, Sibley, and GW Hospital. I have personally ridden the bus to hospital appointments; my family members are students relying on the bus (in non-lockdown times) to get to school; many other students commuting to Hardy Middle School from the Palisades neighborhood rely on the D6 bus service to get to school there is no alternative route for them. |
| D6 | The D6 bus is the only Public transportation option from Macarthur Blvd into downtown DC. |
| D6 | Please do not eliminate the D6 line! Without it we have no public transportation in our neighborhood |
| D6 | Please do not eliminate or cut the D6. This will affect my neighborhood, esp school kids and workers. Our neighborhood will become significantly less diverse and connected if you do this. It is a very bad plan |
| D6 | Please retain the D6 bus. It's how I commute downtown from the Palisades |
| D6 | I rely on the D6 line to get to work. |
| D6 | Eliminating the D6 would be detrimental for an area that doesnt have any metro access. It would also cut off access to two hospitals. |
| D6 | I ride the D6 on my daily commute (non-pandemic) and there are no alternatives if it is cancelled. Please don't cancel it! |
| D6 | Please do not stop D6 |
| D6 | The D6 line is essential to communities along MacArthur Blvd., and Reservoir Rd. This line is critical to serving two hospitals (Sibley and Georgetown) and to students, many of whom are still in grammar school. I have been riding this service to and from downtown for more than 25 years. |
| D6 | I rely on the D6 for connection to metro, doctors, and regional transit access |
| D6 | My family depends on the D6 for work and school. |
| D6 | If there is no D6 bus, the plan does not work for those of us in the Palisades. |
| D6 | We rely on D6 to get into town. The change would be devastating to metrobus and increase the number of people who either 1) can't get affordable into town or 2) use personal cars for transport which is bad for health of all residents |
| D6 | The D6 route is essential for Capitol Hill NE residents to get to work downtown. |
| D6 | I need to use the D6 and so do my kids |
| D6 | Elimination of D6 in the Foxhall area would have direct effects on DCPS students in the neighborhood that rely on this service to access Hardy MS. Does DC plan on providing school busses then to get their students to school? This is absolutely mind boggling that the city would eliminate public access for students to their respective schools. It would also eliminate access to Medstar Georgetown University Hospital. |
| D6 | The elimination of the D6 route would be a disaster for many low income residents of Ward 3 and for those who work in the ward, including employees of Sibley and Georgetown University hospitals. The D6 bus plays a vital role in the city's economy and would devastate many thousands of people who depend upon it. |
| D6 | Elimination of the D6 bus route would devastate the citizens of the Palisades. |
| D6 | Getting rid of the D6 cuts an entire section of the city off from bus service. Children rely on this line to get to school. Workers rely on this line to get to and from the hospital. Residents will once again use this line extensively to get downtown in 2022 and likely before. This would be a devastating loss that would greatly increase traffic and cause many other headaches. We implore you not to get rid on the D6. |
| D6 | If you eliminate the D6, especially without restoring D5 service, I will have no public transportation option to get from my home on MacArthur Blvd NW to my job downtown. I do not drive and this would be a major financial and logistical hardship on a daily basis. |
| D6 | If D6 is eliminated there will be no bus service available anywhere near my home - no bus or metro service in walking distance. No way for my kids to use public transportation to go to school. We would be completely excluded from public transportation. |
| D6 | Keep the d6 for school students, restaurant workers and the hospital |
| D6 | Need also to focus on providing kids with a way to get to school. Please dont stop bus lines - such as the D6 - that service DCPS kids |
| D6 | You can't get rid of D6 - that is the only bus that runs through the neighborhood and will be needed desperately by residents in 2022 |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| D6 | Eliminating the D6 line would eliminate a way for kids to get to Hardy MS. |
| D6 | D6 is an essential route for students at DC BASIS and essential workers. |
| D6 | The area on Foxhall Rd and MacArthur Blvd are essentially only served by the D6. There is no nearby metro station. As DCPS relies on Metro to transport children to school, the reduction/elimination of the D6 would have a significant negative impact on students attending Hardy MS and Wilson HS. Many people take the D6 to travel downtown for work and to access Metro rail. My children and caretakers would take the D6 to school frequently even from Foxhall to Key Elementary on MacArthur. Additionally, these buses serve health care workers at Georgetown and Sibley hospitals. Please do not remove this line - the residents of Foxhall and Palisades will be essentially cut off from all public transport in the city. |
| D6 | Eliminating the D6 does not work for my travel needs in 2022. I took the D6 every day to get to and from work before the pandemic and work-from-home began. I plan to use the D6 line again once I return to working from the office. Eliminating the D6 would be very disruptive to me. My office does not have a parking garage, so public transit is the only feasible option for me. |
| D6 | We use the D6 |
| D6 | Again, D6 is only service to 2 hospitals and you cannot eliminate this service . |
| D6 | The D6 bus is the ONLY line that serves the area west of Georgetown. It is the lifeline to the heart of the city, used for commuting and students traveling to/from school. As someone who works at Georgetown University, this would eliminate the ONLY way to get to work for the vast majority of those who work at the university and hospital. Our nearest metro stop is more than 1.5 miles away. We do not even have a grocery store in our community anymore and my entire community relies on this bus line for travel to necessary services. |
| D6 | D6 is the only bus reach Georgetown Hospital and Sibley from east side of Rock Creek Park. Need increase D6 service. |
| D6 | D6 needs to keep running for employees at Sibley |
| D6 | Do not cancel the D6 bus. This is an important bus line. |
| D6 | Elimination of D6 would completely isolate The Palisades neighborhood. There is NO other public transportation access. |
| D6 | Eliminating D6 is OK |
| D6 | We need the D6 route for our kids to get to school! |
| D6 | The elimination of D6 line is unacceptable, this is the only line serving the Palisades area, and the only way for students in the area to reach their assigned public school, Hardy MS and Wilson HS. And for adults to reach downtown places of work. Cutting the D6 line would create a great disruption to the families in the area. |
| D6 | The D-6 line pre-pandemic was a very well used bus line -- for commuters, but also for many retired people who live in the MacArthur Blvd corridor. Without the D-6, I will end up driving downtown, thereby adding to traffic and pollution. There are no other public transport options for the region. If bus lines need to be cut, you need to take account of Metro/subway lines. We have no Metro options in the area of the city. Also, the D-6 is heavily used by health care workers at Sibley and Georgetown hospitals, as well as students on MacArthur Blvd and Foxhall Road. The student population will in fact be increasing when DC Public Schools take over the old Georgetown Day School property on MacArthur Blvd. Without the D-6, car traffic will become almost impossible in the area. |
| D6 | eliminating the D6 starting in January 2022 will profound impact on my regular commute. Your Proposed Bus Changes admits there is no alternative for residents who use stops along MacArthur btw Foxhall and Arizona. This cut will result in increased car dependency. Im hopeful that by January 2022 ive resumed my normal commuting patterns and the elimination of the D6 leaves many with no options other than private car. |
| D6 | This plan will eliminate the D6 line which means my neighborhood will be without any public transportation. My child will not be able to get to school. This will also directly affect students traveling from other parts of DC who will not be able to get to school. |
| D6 | It looks like this would eliminate the D6 route with only partial replacement - I dont know what that means, but I rely completely on the D6 route for bus travel. |
| D6 | The D6 line is the greatest line in the city. It takes me and my neighbors everywhere we need to go. Eliminating that line and exchanging it for a series of transfers would significantly increase our commute time. |
| D6 | As with prior comment, the D6 must NOT be removed or reduced without transport to and from the Palisades region. For me, it represents the sole transport line from my neighborhood to work and other resources in the city. |
| D6 | Eliminating the D6 would be devastating for some DC residents. There are a number of apartments in the Palisades area whose residents rely on the D6 route as it is the only bus line out here. And as the Safeway in Palisades closed, many residents use the D6 route to travel to other parts of DC (including Georgetown) for grocery shopping. It is also important for people who work at both Sibley Hospital and Georgetown University Hospital. Eliminating this route would literally strand DC residents and hospital workers. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| D6 | D6 is my vital connection for any visit downtown. Service at Arizona Ave is far too distant and inconvenient. It also connects key hospitals and schools. Car use is prohibitive in view of downtown parking limitations and costs. Cutting this service will only increase congestion from cars and limit access to the central city from my neighborhood. |
| D6 | Please do not eliminate the D6. |
| D6 | I am very concerned about the elimination of the D6 bus line which would leave several neighborhoods with major hospitals (Georgetown and Hospitals) and several DCPS schools without ANY transit several options at all. We also cannot take Metro if we cannot take the bus there. |
| D6 | Eliminating the D6 line would leave me completely without public transportation. I find that very upsetting because I think everyone should have access to public transportation, it would greatly inconvenience me, it would unjustly decrease my property value, and it would be an unjust change to my public services without a decrease in my taxes. D6 would further cut off people in need of medical services from Sibley Hospital and its complex which would be a disadvantage to those residents of our city without a car. If D6 was to be eliminated then the city needs to provide free Taxi service and capital bikeshare memberships to our community and increase the number of bike stations and bike lanes. My taxes go up every year with continued cut backs in services. Now, we have that ugly fence in our city like a prison, people walking around with mouth guards and public schools closing its doors to the kids who need it most, I believe under the current leadership our city has taken a very dark turn in the last 4-5 years. |
| D6 | cutting D6 is not consistent with the statement to provide services to Low-income customers who rely on Metrobus for travel to medical appointments, to shop for groceries, and for other essential purposes. how to have access to Medstar hospital at Georgetown University? |
| D6 | I support the ideas above, but I rely on the D6 Metrobus route to go to/from work (Palisades to Dupont). |
| D6 | D6 route is essential and necessary. It is the only bus route for a large section of residents where there are no other commuter options and no metro anywhere near. It is a hidden pocket where we rely on these lines for school and work. Including to go to other neighborhoods not serviced by metro. |
| D6 | I mean, I support those three priorities. But ending the D6 -- what on earth?? I live in Hill East and am considering moving to Kingman Park. Cutting the D6 would greatly impact my ability to get to work and cut off a whole chunk of the city from east-west access. And thats on top of the proposed changes to metro rail. Combined, getting to work and around town has become significantly harder. |
| D6 | Rely on D6 bus line to commute to school and go downtown. |
| D6 | I definitely support focusing service on low-income riders. However, plenty of others depend on bus service for their commute. I previously commuted for almost 2 years via the D6 from Judiciary Sq to 12th and C NE. The bus was always full. There was no direct or easy way to get from that corner of the Hill to my office, so the bus was a godsend. I think a lot of people would be dramatically inconvenienced if you cut some of these routes. |
| D6 | The D6 bus route is essential for those of us in the Palisades who do not own a car. It is also essential for workers at Sibley and Georgetown hospitals. |
| D6 | I use the D6 metro bus from MacArthur & V St for all trips further into DC (and return), including to transfer to metro. The proposed plan eliminates any possibility of my using public transportation in DC. Driving raises the question not only of congestion, but parking. |
| D6 | too long wait times between buses and an unreliable app system. Eliminating the D6 is a very bad idea. Why should riders have to transfer numerous times to other bus lines or Metro to get to their destinations? You have no service from 13th St NW at K St to Dupont Circle. Numerous disabled and elderly riders take this route and it would be an undue hardship to eliminate this line. You say you want to service areas where people have medical appointments, etc. K St NW and adjoining streets are where numerous medical offices are located. Heck, the line is Stadium Armory to Sibley!!! That alone tells you what businesses are being serviced by the D6. I see how crowded the D6 is on workday mornings, especially if the weather is bad. If you are making riders get buses at other stops north or south of where they live arent those bus line going to be over crowded? We live in a major metropolitan area and deserve a public transportation system that looks like a major system. Not everyone wants to hop on a scooter, ride a bike, used Uber/Lift or afford cabs/taxis, or walk additional blocks to get a bus. The D6 takes our household every place we go frequently. Do not eliminate or reduce service. |
| D6 | The D6 bus meets the needs of people employed in health care and food service and should NOT be eliminated |

| Route | Proposed 2022 Metrobus service changes |
|----------------|--|
| D6 | The proposal to eliminate the entire D6 line by the second half of Fiscal Year 2022 is extremely upsetting. With the exception of a rush-hour line (D5), which operates very limited hours, only in one direction whenever it is running, and does not operate on the weekends, the D6 line is the only public transportation servicing my family of four and everyone else in my neighborhood of Foxhall and the Palisades. It is upsetting that DC would even think to discontinue a public service, something so fundamental as public transportation, when we are still paying property taxes and other city taxes (in fact, our property taxes have gone up drastically since purchasing our property only five years ago). Eliminating the D6 would eliminate my public transportation to school every day at George Washington University Law School once in-person classes resume. And as a mother of two small children, the bus is sometimes the only feasible way to take my kids to other parts of DC, especially with parking being so hard to find in this city that is our home. Furthermore, this proposal would drastically decrease the value of my property, for which DC should compensate if it goes through with this plan. I am extremely surprised that DC, the great capital of our nation, and a city government which I thought would make strides to making this city more livable, would leave whole swaths of people without public transportation. Additionally, being that the D6 services three of the city's top hospitals (GWU, Georgetown, and Sibley), eliminating this plan simply does not serve the plans stated goal of focusing on providing service to essential workers, including those with jobs in health care, food service, social services, and other important societal functions. Furthermore, the city is considering adding two public schools to my neighborhood (one near Hardy Recreation Center and one at the former Georgetown Day School Lower Campus): how does it make sense to have at least four public schools (the two new schools and the current elementary and middle schools) to be serviced by absolutely no public transportation? I urge all decision-makers involved to reject the idea of eliminating the D6 bus line. |
| D6 | I currently ride the D6 bus and eliminating this bus I would not be able to get to work. |
| D6 | Cutting the D6 service will considerably limit my use of the bus system |
| D6 | Eliminating the D6 is ridiculous! Its the lifeblood of the entire Kent-Palisades neighborhood! |
| D6 | Elimination of D6 would make my use of public transport infeasible. I would need to resort to driving or taxi. It would also reduce property values in the increasingly family neighborhood because it would not support schoolchildren getting to school. |
| D6, 30 | The d6 lines doesnt need service reductions or possible elimination because essential workers need it to access Sibley and Georgetown hospitals. Please dont change the early morning service either. The 30 line needs to run on weekends too. |
| D6, 32 | WMATA is planning to shut down service on the D6. My parents bought a fixer upper in Foxhall village before they divorced and my mother was a single mom, working long hours and she had to travel for her job or else she'd risk losing it. I had financial aid at every single school I went to. My mother couldn't use her car to drop me off - she had to get to work or she was on a business trip and we couldn't afford a nanny or a driver. The D6 was how I got to school - I and many low income classmates going to my elementary school in the Palisades from the eastern part of the city or the apartments on MacArthur Blvd. the D6 took me to middle school in Tenleytown - I took the 32 up from Wisconsin and Q - and to high school in Bethesda via the Red Line and Dupont Circle. I would wait for that bus in pitch darkness in my athletic clothes in high school to take me home. When I came home from an Ivy League university freshman year, the D6 took me to Dupont Circle every morning so I could work my internship on Capitol Hill. Interning there was so hard because they didn't offer much in stipends, and my mom had to work so she couldn't drop me. I couldn't afford to Uber everyday. The D6 has been a huge part of my life and without it I wouldn't have been able to attend the schools I went to, work at the jobs I did. You're taking a huge opportunity away from people and cutting off a complete side of the city by taking away this bus line. |
| D6, 32, 36, 39 | I use both the D6 and the 32, 36, 39 bus lines to get to work in lieu of Metro. The D6 is my neighborhood bus that takes me from my home through downtown, to my office, to my medical specialist when I can't drive. |
| D6, D4 | I desperately need either D6 or in a pinch D4, please dont eliminate both as youre considering |
| D6, D5 | NO! This excludes D6. D5 has been cut and cutting D6 too would fully disconnect students from school and commuters to work for people of various socio-economic groups. Many who cannot afford the additional costs of driving and parking, or the extra time with somehow traversing hilly terrain on foot for long distances. This is totally unacceptable. Do not cut D6! |
| D6, D5 | I live at MacArthur and Q streets and the D6/D5 lines are our only options for mass transit. |
| D6, D5 | We need at least one bus - if you cancel the D6 - restore the D5 commuter bus. |
| D6, D5 | D6 and D5 lines need to remain intact. |
| D6, D5 | You are intending to cancel the bus routes that serve my area of palisades (d6 and d5). There is no real alternative for me to get to work in Farragut west. I will have to drive and that will be very very expensive and bad for the environment. I've been a weekly metro rider for more than 30 yrs. this would be a huge loss for me and all my neighbors-especially those who don't have an alternative/a car |

| Route | Proposed 2022 Metrobus service changes |
|--------------------|--|
| D6, D5 | Why is Metro not also prioritizing getting kids to school, assuming that the buildings will be open again in January 2022? As reflected in my comments to an earlier question, with the proposed elimination of the D6 (after already losing the D5) it is unclear how kids from the Palisades along the MacArthur Boulevard corridor will get to school (Hardy MS and Wilson HS) next school year. |
| D6, D5 | The plan eliminates the only bus route near my house, D6. (You have already eliminated the D5 rush hour bus.) It is about 1/2 in one direction and 2+ miles in the other direction to get to another route. I will have to walk 1/2 mile + bus + subway to get most places without a car, including to jury duty. The mayor wants to encourage less driving but this makes it much more difficult for many residents! |
| D6, D5 | Absolutely not. The plan excludes the D6. The D5 has already been cut which is a massive blow. Both lines are crucial for students getting to school and commuters getting to work downtown. D6 also connects both Georgetown hospital and Sibley on direct routes. Without D5 the D6 was the only option for broad swath of people of various socio-economic backgrounds. Many of whom cannot afford to drive or face the additional significant increases in commuting time. This is totally unacceptable. |
| D6, D5, K, 19 | We live on the 4500 block of MacArthur across from the bus stop at MacArthur and Elliott. I take the D6 and used to take the D5 to and from work getting off at the K and 19 stop. My Hardy teen takes the D6 to and from school. Next year she will be at Wilson and will take the D6 to Arizona Ave or Wisconsin Ave to catch a bus to Tenley. On the weekends we use the D6 to get downtown to restaurants, shops, sporting events and concerts. |
| D6, H8, H9, H2, H4 | Eliminating the D6 and adjusting other routes as proposed is insufficient. The proposed plan leaves a gap in service between MacArthur Blvd NW & Arizona Ave NW and Reservoir Rd NW & 37th St NW. This would adversely effect my commute and negatively impact schools / residential areas. Eliminating the H8/H9 would leave Harewood Rd NE and school /residential areas along the route unserved. Rerouting the H2/H4, and Tenleytown leg would also negatively impact residential and school areas along the route, particularly in the stretch between Connecticut Ave NW & Wisconsin Ave NW as well as along Adams Mill Rd NW. |
| D6, L1, 96 | Elimination of D6 seems very problematic for workers and patients at Georgetown Medical Center; the bus is not frequent, but is well used in my experience, at least during daytime hours. Perhaps the route could be continued west of Dupont Circle, but with an alternate route SE of Dupont and/or a new eastern terminus to avoid traffic in the K Street corridor, which frequently delays the route. Elimination of L1 would be very problematic for commuters from the Connecticut Avenue corridor to Foggy Bottom, and would increase rush hour vehicular congestion in Dupont Circle and the West End. The bus is often overcrowded at rush hour (pre-COVID) and government employees in Foggy Bottom are likely to return to previous commuting patterns once the pandemic is under control. The 96 bus is not well used in Woodley and Cathedral Park but still provides a valuable amenity to residents in those neighborhoods. |
| D6, M4 | We need the D6 and M4 lines for school transportation |
| D6, M4 | My children relied on D6 to get to Hardy Middle School and M4 to get to Wilson. At 2-3 miles away, it is too far to walk. If service is discontinued, will the city provide school bus service? I use the M4 to get to Tenley Metro station and D6 to get downtown, what bus service do you propose to replace these lines? |
| D6, M4 | Absolutely freaking not. Do not cut the D6 and M4 lines in the Palisades. PLEASE. I am begging you. |
| D6, M4 | Please also prioritize routes used by DCPS students to attend their in-boundary schools, particularly middle schools and high schools. My children relied on the D6 route to travel 3 miles each way between from the Palisades neighborhood to Hardy MS and the M4 route to travel 3 miles each way between the Palisades and Wilson High School. |
| D6, M4 | Please retain D6 and M4 - critical routes for student travel to Hardy and Wilson |
| D6, M4 | Eliminating the D6 in my area will eliminate my child's school bus. We have section 8 vouchers for our apartment on MacArthur Blvd, and one child goes to Hardy, the other to Wilson. My area will have no bus service and I have no car. Please don't eliminate M4 and D6. |
| D6, M4 | Cutting both the D6 and M4 greatly impacts people traveling to Sibley and Georgetown hospitals. There are several schools along those routes. This proposal provides virtually no bus service to those of us who live in the Palisades area. |
| D6, M4 | The elimination of the d6 and m4 lines would leave me without a single public transport option and would not enable my kids to reach their dcps school. This cannot be an option even on the table |
| D6, M4 | I agree with the priorities. I do not agree with cutting service by 50%. Our children use the bus to get to their DCPS schools (Hardy, Wilson). If the D6 and M4 are eliminated, they will not be able to get to school. |
| D6, M4 | Removing the D6 and the M4 effectively cuts the Palisades off from public transportation. Without the M4 how do we connect with the Metro? Without the D6 how do we get downtown? |
| D6, M4 | Eliminating D6 and M4 would eliminate all service to my neighborhood, which I depend upon. |
| D6, M4 | Our neighborhood relies on the D6 for access to downtown and getting to the local hospital. It also relies on this line for getting children to two public schools. I'm not sure how we could get by without it. Please don't eliminate it! |
| D6, M4 | Eliminating the D6 and the M4 would leave me with no bus options. |

| Route | Proposed 2022 Metrobus service changes |
|---------------------|--|
| D6, M4 | Wmata needs to spell out these changes more explicitly for me to understand how they would affect me. I have heard that several major routes in my area (D6, M4) will be eliminated. This is a major problem for students in my neighborhood who attend Hardy or Wilson- eliminating those routes mean there will be no public transportation to school for them when school returns. |
| D6, M4 | The D6 is how I get to work downtown and the M4 is how my daughter gets to highschool. You will effectively be cutting us both off from being able to access our daily activities. We live in the palisades near MacArthur and W street. Also note the grocery store in this area was recently eliminated, how will people without cars in our neighborhood get access to food? |
| D6, M4 | D6 and the M4 need to be kept in service. |
| D6, M4 | You are cutting off Sibley Hospital, school transporte to Hardy MS, you are cutting off the whole Palisades by eliminating the D6. Bad idea all around. More traffic, negative impact in low income population working at Sibley and other businesses. Keep the D6!!! |
| D6, M4 | Cancelling the D6 route would TOTALLY isolate us from the rest of the city, whatever adjustments are done to other lines.Cancelling the M4 route would COMPLETELY block us from the Metrorail service. Better close the entire Metrorail then! |
| D6, M4 | Losing the D6 and M4 will be terrible for the Palisades/Foxhall neighborhoods of DC. Students and workers both rely on these buses. We have no nearby Metrorail station. |
| D6, M4, N2 | We are using the D6 and M4/N2 buses to get to public schools. These changes make getting to school very difficult as the students do not have cars. |
| D6, M4, N4, 311, 33 | The D6 and M4 buses are essential for me to get to meetings downtown and to Union Station to access Amtrak. The proposed N4/311/33 alternative is too lengthy and too far from my home to make it usable. I prefer mass transit to car usage for environmental reasons - it is important to the future of our country and region to encourage more use of mass transit. This is impossible with reduced services. |
| D6, M4, N6 | Georgetown University Hospital needs and deserves a bus stop curbside, not two blocks away, for staff and patients. The proposed changes (replacing D6 and M4 with N6) makes Dupont Circle the only Metro stop accessible to the Palisades. And it is a much longer bus ride to Dupont than it would be to Tenley or Friendship Heights. Quite a few public and private school students should be able to take the M4 to school (Deal, Wilson, Sidwell, GDS, St. Johns, St. Anns), but the N6 doesnt get them close enough. |
| D8 | The D8 being eliminated is problematic for me. It's a line that I use in both directions and which connects people to healthcare, schools, and h st corridor |
| D8, 96 | How does a service plan that eliminates entire lines in low-income neighborhoods including Carver Terrace, Trinidad, Ivy City, and large sections of Ward 7 and Ward 8, and eliminates the D8 route to Washington Hospital Center, actually serve low-income communities and those who rely on the bus to access medical services and appointments? The updates to the 96 route sound promising, but the rest of this plan does not achieve its stated goals at all and will cut off lifeline bus service to those who need it most. |
| D8, D4 | Removing the d8 and d4, Trinidad's only bus lines, is egregious. There is no metro for at least a mile from most parts of Trinidad, in an area where not everyone has/can afford a car. Removing resources from ward 5 would not help the city. There are many senior citizens and low income residents that depend on these bus lines. |
| D8, D4, X2 | This plan cuts ALL my public transportation options between my home and place of work. It is frankly ridiculous to cut BOTH the D8 and D4 buses, especially when the X2 is always jam-packed. You are cutting off entire neighborhoods. |
| E4 | Sharon, I'm not sure how this impacts the E4 bus line but 50% operating status is not acceptable to me. |
| E6 | I need route E6 in order to get to work downtown. |
| E6 | Bring back the E6. You agreed it was important last spring, just before the pandemic. Once it's over, I'll need to take it again. |
| E6, M4 | Schools are one of the MOST important societal functions. DC does not provide school buses and our kids need the E6 and M4 to get to and from school as soon as schools reopen. |
| E6, M4 | The current E6 and M4 routes do not exist. These are needed for my son to get to and from school |
| English | Focusing on low-income customers and essential workers is good, but looking at numbers that have been severely impacted by the pandemic without accounting for that is not. Although things are finally starting to look promising, we have no idea how much of a return to normal will have occurred by January 2022. |

| Route | Proposed 2022 Metrobus service changes |
|------------------|--|
| F1, F2, P18, W14 | Shame on Metro for eliminating service for mainly low-income and far-out suburban riders, especially along the F1/F2, P18, W14, and the B-line Bowie riders. People still need to get to important destinations, especially work, which will not leave any alternative options aside from the F1/F2 lines. For the Q-line services, there is not really any alternative options on Veirs Mill Road for certain portions, which will not please riders. Being that Y-bus service will remain the same along the Silver Spring-Glenmont segment, riders will be able to travel to the appropriate destination. With the Shady Grove-Grosvenor segment, there will be additional transfers necessary depending on the destination with the potential elimination of the Q-bus service. The Q-bus lines are pretty crowded, especially between Rockville and Wheaton, which it doesn't make sense to eliminate this service along with Red Line service. |
| F4, T14 | I use the F4 and T14 daily, as a matter of fact, these are the only lines I can take to get to and from home and work. |
| F6, F2 | I rely on the F6 and also the f2. I have a knee injury and it's very difficult for me to have to walk 20 minutes to catch the train plus a lot of people rely on this bus to get to DC |
| F6, F4 | I live in Hyattsville without a car; the bus is my lifeline to catch trains at New Carrollton Station. Eliminating the F6 makes that more difficult. the F4 is a reliable connector to Silver Spring. Its been too crowded for me during the pandemic but I'd like to see it restored to pre-pandemic levels after we can travel again. |
| F6, J4, B30 | DC cuts are OK for me. In Maryland I sometimes use F6, J4, and -- once air travel resumes -- B30, but there are workable alternatives. |
| F6, R12, 83 | With elimination of the F6 and R12, I cannot tell if 83 will service River Road. That's where there are government and UMD offices. |
| F8 | Any reduction to Maryland service, especially the F8 will impact me negatively |
| F8, F13 | I need the F8 and F13 line along Cheverly Ave to get to Cheverly Station to get to work. Eliminating these lines would force me to move my home or start a new career. Please keep the bus line along Cheverly Ave to Cheverly station open. Even if at a reduced capacity. |
| F8, F13 | Please keep F8 and F13 lines along Cheverly Ave open along with Cheverly Station. Closing them would add a lot of time to my commute and I would either need to move or change jobs. |
| F8, F13 | If you are going to close metro stations, you need to enhance the bus service - not completely remove it. For example, if you close the Cheverly station and remove the F8 and F13, it doesn't give Cheverly residents any options to get to another metro station like West Hyattsville or Deanwood. |
| G12 | I and many others need the G12 bus route. Please do not eliminate it. |
| G12 | Please do not eliminate the G12 route through Greenbelt! We need that route, as many of us aren't close to any of the other routes that go through Greenbelt. |
| G12 | Losing the G12 bus is a real blow. I use MetroRail a few times a month, and, pre-pandemic, been trying to use the bus to access the Greenbelt and New Carrollton stations. The G12 route is very conveniently located for me, making it easier to wait longer for the bus and Metro as opposed to driving to my destination, but if bus stops are nowhere close, it is hard to use Metro as an alternative to driving (particularly with the planned Greenbelt Station closures in 2021). I've wanted to use public transportation more in the coming years, but these cuts are making it harder and harder to use MetroBus or MetroRail at a time when their use seems all the more crucial for our environment. I know budget issues are complicated, but this is a real blow to me, my community, and our environment. |
| G12 | Closure of the G12 route in 2nd half of 2022 would significantly impede my ability to reach the Metro and downtown D.C. without a car. |
| G12 | Cutting off Metrobus service to my neighborhood (G12) will make it difficult to connect to metro rail and will impair my mobility overall. |
| G12 | I'm not sure where to put this, but I am retired and live in old Greenbelt and am concerned about the planned elimination of the G12 bus route through old Greenbelt. As I get older, I expect to be using the bus more regularly and had assumed that the G12 would continue to provide service to Greenbelt. |
| G12 | Removing the G12 service on Ridge Road in Greenbelt will disconnect the heart of Greenbelt, including the senior citizens who rely on services like meals from Green Ridge House, from the rest of the community. Convenient bus service was one of my criteria in choosing to retire in Greenbelt. The ongoing, precarious financial situation of WMATA must be remedied if DC is to function as a major city. |
| G12 | I need the G12, and many others use it to go to the elementary school in my area, as well as many other uses. No other bus works. |
| G12 | This would wipe out the G12 bus route, which is the only bus line servicing much of the Greenbelt Homes, Inc area. I am not in favor of eliminating the G12 line since I used the bus during bad weather days before the pandemic and would like to resume using it on bad weather days after the pandemic. |
| G12 | Knock out G12 likely deprives me of MetroAccess. I can't afford Uber/Lyft. Knocking out service to the hospital sucks. Greenbelt is a GING-IN-PLACE FRIENDLY (sorry about the caps) and there are a lot of us who depend on MetroAccess. |
| G12 | Eliminating the G12 route reduces my chances of arriving at any appointments as well as my workplace in a timely manner. I don't own a car and for me, the G12 is my only means of transportation. |
| G12 | Reducing service and making metrobus less attractive option, will further decrease ridership. MetroBus should rather be expanded to new markets and attract new/more riders. Eliminating G12 vs. G14 makes no sense. G12 passes more residential areas and is the faster connection to the metro stations. I suggest to run g12 and g14 on alternate schedules, rather than eliminating g12 entirely. |

| Route | Proposed 2022 Metrobus service changes |
|-----------------------------|---|
| G12, C2, B30 | The G12, C2, and B30 lines have all been important to my family at various times in the last few years. G12 in particular is the only route that connects our neighborhood (Old Greenbelt) to Greenbelt Metro Station in the evenings and weekends. I urge you to reconsider the plan for dropping these routes. |
| G12, G14 | I oppose the proposed elimination of the G12 bus service, which efficiently and helpfully extends G14 service through Old Greenbelt, making the metrobus accessible to the entire neighborhood. When commuting into DC via bus and metrorail, this line is an essential piece of my travel. If the route was reduced to only G14 service, I would need to walk an additional 10-15 minutes in each direction to complete my already long commute into work each day. This would be an even larger inconvenience for many of my neighbors because I live right next to one of the stops and many others on my end of the neighborhood already must walk up to 10 minutes to reach the existing G12 stops. This would make the bus very unusable for us and probably decrease our usage of the metrobus/metrorail system overall. |
| G12, G14 | My bus line to the Metrorail is cut (G12) and I do not find G14 to be an acceptable alternative. I would cease riding the Metro system and drive and take MARC instead |
| G12, G14 | The G12 bus is the one I rely on. Your proposal documents give it an A rating. If you're only keeping the G14, at least add more of the G12 stops back into its route. Don't cut off the residential communities. |
| G12, G14 | G12 should not be eliminated people in my community need bus G12 and G14 to get to work, Groceries etc. Not everyone has a car to get around we need both busses in Greenbelt. |
| G12, G14 | Greenbelt residents need both the G12 and the G14 Routes. Some neighborhoods would be unserved if the lines were combined and we would lose our transit connection to Doctors Hospital. |
| G12, G14 | Elimination of the G12/G14 routes are part of this plan, and as explained in previous question, it is a non-starter for my needs. |
| G12, R12 | Your plan to eliminate the G12 line between New Carrollton and Greenbelt does not make sense given your stated goals above of focusing on providing service to low-income customers and essential workers. Many of the riders on the G12 fit these criteria. The route serves several Prince Georges County communities and also provides links to other transfer points for public transit. This line (previously titled the R12) is especially helpful for people using the bus to get to medical appointments as there are numerous medical offices on Hanover Pkwy on the route. |
| G2 | appreciate the prioritization of low income customers in Metrobus plans. HOWEVER eliminating the G2 would make it very challenging for folks to get to jobs at Georgetown University |
| G2 | Georgetown University is DC's largest private sector employer, and there is no Metrorail access in the Georgetown neighborhood. Getting rid of the G2 bus will get rid of the only public transport that is accessible to the university. For those who have disabilities, walking an extra half mile to a Metrobus stop is not an option. Additionally, this half mile walk might not be safe for those who work at night. This closure would place undue burden upon the Georgetown workers who are already at socioeconomic disadvantage, and does not promote a commitment to serving those most in need. |
| G2, 62, 63 | The G2 line is a vital route connecting major portions of the district on an east-west trajectory. Particularly, it is one of very few lines to run past Rock Creek Park and the only one convenient for access to Georgetown University and Georgetown University Hospital from locations east of Dupont Circle. The 62/63 lines are the only lines serving a large population in Petworth and Manor Park, including many low-income residents, and are relied upon by that population for not only access to the Metrorail system at Georgia Ave/Petworth and Takoma Ave stations, but also groceries, medical appointments, and other essential purposes. |
| G2, D2, D6 | Specifically, the combination of services to G2, D2, D6 bus services would harm my commuting ability severely. I rely daily on those buses to travel to work, and with no metro or other public transportation option, this reduction would make my commute much longer and substantially more difficult. |
| G9 | Please keep the express routes like G9 |
| G9 | G9 not listed. I need this for my work commute. |
| H12, H11, H13, D, P | Why would the ENTIRE H-12 line be eliminated? The focus above includes the entire route. This route was cut during the last cuts to service, even after Metro put up charts showing that it was the ONLY route in the black. Now there's no Sunday service. Not many, if any, people have missed the H-11 and H-13 buses because they were strictly rush hour buses. The H-12 route serves the needs of the community. Many people can't walk the distances required to intercept a D or P bus. |
| H12, P12, D12, K12, 30, D14 | I am surprised by the H12 elimination since it is pretty busy during rush hour. However, the P12 and D12 can still connect me with the public library and shopping centers. Although I ride the green line and K12 frequently, the bus changes would connect me to blue line. Hopefully, MD The Bus 30 will still operate to cover elimination of the D14. |
| H2 | The plan for H2 not serving Tenleytown makes no sense since there are so many people up there who need it and the age to line is such a terrific cut through from Washington Hospital Center to Columbia Heights to Tenleytown. I have a disability and I use it to get to the pool at the Wilson high school |
| H2, H3 | The H2, H3 not servicing Tenleytown will be disruptive to my commute and dropping my daughter off at school |

| Route | Proposed 2022 Metrobus service changes |
|----------------|--|
| H2, H3, H4, 90 | 1) The plan eliminates cross-town travel from Wisconsin Av. (H2, H3, H4, 90)2) I want to rely on the bus rather than Metrorail more and more as I am nearing age 80. I want to take short trips to doctors, grocery, library, etc and every place I go is NOT just along Wisconsin av. How would I go to Cleveland Park in the current plan?3) Since small children do not pay a fare, families with pre-schoolers are undercounted -- I see grandparents picking up children from day care, nannies taking kids to the library -- your numbers do not reflect the wide array of uses that I see during the day -- not just rush hour. |
| H2, H4 | Not sure if the new H2/H4 routes would run as close to my place, if not, I would not ride |
| H2, H4 | Personally need H2/H4 service to run frequently to feasibly connect with Cleveland park and Columbia heights metro stations and for partners daily commute to Washington Hospital |
| H2, H4, H3 | The H2, H4 and H3 are essential for getting me to work at the hospital. I live in Cleveland Park and need to be able to get to work because I'm an essential worker. There is talk about shutting down the Cleveland Park metro. I would like this to stay open as well. |
| H4 | Bus service on H4 route is infrequent in normal times. So, this plan would probably make it worse. |
| H4 | I need the H4 bus to get to work and my kids need the 30 to get to activities. Those are our priority bus lines. |
| H6 | I rely heavily on the train and bus and without the H6, I have been effected! |
| H6, 86, C2, C4 | Just reading is the possible elimination of my bus terrifies me. I literally depend on H6 fort Lincoln and back to brook land station. The bus already work on a modified schedule and it's hard enough as it is right now. In absence of h6 I rely upon on 86 and that could be eliminated too? Also, c2 to greenBelt station and c4 to prince Georgie plaza are already bad enough as it is any more modifications would be terrible to the many passengers that use the bus daily |
| H6, H8 | H6 and H8 reductions would be problematic. |
| H8 | H8 bus should continue to run, because it is near Carrol High school and Soldiers home. |
| H8, H9 | Please do not eliminate the H8 and H9. |
| H8, R4 | It would not work to completely eliminate the H8 route and to eliminate the R4 route.Many people depend on the R4 route to get from Hyattsville into DC, especially if the Metrorail were to stop running early, so please dont eliminate that route.I saw on the attachment that the ridership is graded as an A, so it would make no sense to eliminate an A route.Perhaps have the R4 route run from Prince Georges Plaza Station to Brookland every other route and perhaps after 8pm, have the route run from PG Plaza Station to Brookland only.H8 is another route that too many people depend on, especially the elderly.Perhaps instead of eliminating the route, have the route run from Columbia Heights to Brookland only on every other route and after a certain hour.Or just have the H8 run from Columbia Heights to Brookland as a proposed change as long as there are alternate bus routes between Mount Pleasant and Columbia Heights and alternate routes between Brookland and Rhode Island Avenue.Just please dont completely eliminate the H8 and the R4 routes, which would cause Metro to lose even MORE money and especially since so many elderly individuals depened on these buses and cannot afford cabs or uber rides. |
| J1, J2 | Need frequent J1/J2 service |
| J12, V12 | The J12 bus is the only bus that travels straight down Marlboro Pike to pick people up and take them directly to the mall, post office, and Bank. Taking the J12 away will force people to either walk or get a cab if they do not have a car. The V12 picks up close to peoples homes in District Heights to take them directly to Suitland metro or Addison Road. Eliminating the J12 and V12 will be a big inconvenience!! These two buses are essential for people who need them to get to the metro and go to work. This is bad for the elderly people who depend on not having to travel far to get to a bus stop. :-(|
| J2 | Need J2 route |
| J2 | I might be able to take a ride on bus instead of J2 if it's eliminated |
| J2 | A part of the reason why I chose to live where I do is so that I can commute to work on public transit. A loss in J2 service impacts my direct route to the Medical Center station and downtown DC.I would have to consider driving. |
| J4 | As a commuter from Silver Spring to College Park, I use the J4 to get to work daily. This plan would prevent me from getting to work. |
| K12 | I ride the K12 to Suitland Station because its the fastest way to get to my job which is along the green line. If the K12 is rerouted to Addison Road then it will take longer to get to my job. Also my grandma that haves trouble walking rely on the k12 to go in the direction Suitland Station because her doctor building is in that direction. |
| K6, K9 | I depend on the Metrobus service (K6 and K9) for commuting. Any service cuts would discourage me from using buses. |
| L1 | I rely on L1 bus to get to work. Very few bus lines service the lower foggy bottom region it. Alternative metro and bus options only go as far as Farragut Square, an 18 minute walk from the lower foggy bottom region. Eliminating this route would limit my ability to use public transportation options. |
| L1, L2 | Important for us to have L1 and L2 bus service |
| L1, L2, 30S | The buses I use are always very crowded. I use the Connecticut Ave. lines: L1 and L2 quite frequently as well as the 30s on Wisconsin Ave on Saturday and Sundays. |

| Route | Proposed 2022 Metrobus service changes |
|--------------------|--|
| L1, L2, D4, D6, D5 | Eliminating the L1/L2 would make it very difficult for me, as a rider with a mobility impairment, to get from my home to the train, which I hope to use when we begin a return to work. Eliminating the D4/D6/D5 lines will cut off the Palisades completely from public transit, as there is NO metro stop in that area, and both of these large cuts/eliminations are unacceptable. |
| L1, L2, H1, H2 | Preserving full L1 and L2 service is important. Transit between upper Connecticut Ave. to the bottom of Connecticut Ave. (Farragut Square) should not require Metrobus riders to transfer to Metrorail at Van Ness or Cleveland Park (especially given the proposals to reduce Red Line service at those stations to every 15 or 30 minutes). And it definitely should not require riding a new H1 or H2 line through Columbia Heights to the far side of Union Station. |
| L1, L2, M4 | The elimination of the L1,L2 and M4 may affect my travel, but I could continue using the adjustments I've made during the pandemic. Moving the H2,H4 down Connecticut Ave would prove useful. |
| L2 | I am an essential worker and take the L2 to get to work. Its not clear to me how this will affect my route. You write Another route has been modified or already exists to provide partial replacement service -- I dont know what this means concretely for my commute. |
| L2 | Even during the pandemic, we ride the L2. |
| L2 | Please keep L2 service in Cleveland Park |
| L2 | I rely on L2 for my transportation to my job. Other options either take more time or are more expensive. |
| L2 | I frequently rely on route L2, even during the pandemic. The bus is almost always full of passengers, meaning many others rely on the line as well. While I take the bus often, L2 is the only line I need for both professional and personal reasons. Changes to the other routes would be acceptable to me if needed by budget shortfalls. |
| L2 | Loss of the L2, especially when combined with the loss of Cleveland Park Metro, greatly complicates our ability to move along Connecticut. Longer commute times, often involving the need to change buses, even assuming that the buses can maintain their interconnection times. Lack of redundancy between modes of travel, meaning that when one mode is out there is no alternative. |
| L2 | Eliminate the L2 in the second half of 2022? Are you nuts? Lots of folks - commuters and older folks who dont/cant trek to the Metro, take the L2 to get downtown. The proposal would have one have to transfer n Adams Morgan. |
| L2 | Please do not cut the L2 route, I use this line to go north/south on Conn Ave and the proposed route would no longer work for my needs. |
| L2 | It appears--from the more detailed description of the proposed service plan--that L2 service WILL CONTINUE with modifications to schedule and route. I depend on that Connecticut Avenue line to reach the northern/Chevy Chase length of the Avenue, as well as for service to Adams Morgan and Columbia Road. |
| L2 | Absolutely the focus should be on serving those areas where there is the most need, but Im getting a bit tired of bus ridership almost exclusively being tied to income level. I ride the L2, and that bus is frequently PACKED. People are trying hard to not get in their cars, or do do without a car altogether. The implicit implication is always that service can be taking from higher-income areas because theyll have plenty of other options, but why should they be forced to use them?! Why force people into their cars or rideshare or cabs or whatever? Another option often presented are scooters and bikes, well, let me tell you, scooters are death traps for many people either on them or around them, and the bikes arent much better. And really, do I want to haul my groceries on a scooter or bike? Probably not. Get real about bus usage and stop going exclusively by what your survey response data say. Get out and look around and take a month or two to actually EXPERIENCE what using the bus in the DMV is like. |
| L2 | I live on the L2 line and ride it regularly. Other options are not convenient because too time consuming. |
| L2 | I have difficulty walking long distances and do not own a car. The L2 enables me to go downtown while reducing the time on my feet as it stops right outside my home. |
| L2 | I use the L2. If it ran more frequently, more people would use it. Please dont eliminate this route. |
| L2 | Replacing the L2 with H buses would eliminate the ability to go directly downtown on the bus. |
| L2 | If you eliminate lines that are currently active and replace with alternative lines that have new routes then will the new routes come with the same frequency as the older/eliminated lines do? If not this will definitely cause an impairment for riders especially if you close metro stations and stagger times that trains come to stations. The L2 line which i ride will be eliminated by your plan and part of the line will be replaced with the H line buses. I am worried this change will effect the commuters especially the elderly who are in a public transportation desert along the upper north west area of Connecticut ave. Many of these elderly are unable to walk to the nearest metro station. |
| L2 | I reiterate my comments that the L2 route is a necessary route and should not be canceled. |
| L2, D6, E2 | The proposed elimination of many lines -- including those in Anacostia, the L2, the D6, the E2 -- to name just a few is not acceptable. Most folks who ride these buses do not have any other means of transportation and the bus is a lifeline for work, drs. appointments, grocery shopping, etc. Please do not eliminart bus service. |

| Route | Proposed 2022 Metrobus service changes |
|--------|--|
| L2, H2 | Do not eliminate L2. Do not modify H2 route to Tenleytown |
| L2, H2 | L2 must not be eliminated. This is the only bus in the Connecticut Ave area (20015) |
| L2, L1 | Before the pandemic, L2 took too long to show up and rarely did I ever see the L1 bus. |
| L8 | I rely on the L8 to get between my daughters daycare in Kensington and my work just south of Friendship Heights. Eliminating the route means I will no longer be able to take transit to work. The Ride On 34 takes SO much longer. |
| L8 | Eliminating route L8 would leave me without transit access |
| L8 | When the Purple Line is in service, my best commuting route will be the L8 to Chevy Chase and the Purple Line to College Park. I hope you will be able to increase service to Purple Line stations at that point. |
| M4 | Please do not eliminate the M4! It is a vital mode of transportation for the middle and high school students in the neighborhood. |
| M4 | I depend on the m4 to get to the metro, which gets me to work. |
| M4 | We need the M4! |
| M4 | M4 is the only transportation available to middle school and high school students in the neighborhood traveling to Deal and Wilson High School. Eliminating the bus line will leave hundreds of students stranded. |
| M4 | The M4 should not be eliminated. How will schoolkids get to school? Plus, it would mean an entire large neighborhood would have no transit service. |
| M4 | m4 is critical to access schools and tenleytown metro from barnaby woods |
| M4 | My kids ride the M4 to Wilson HS. It is there only option. If you stop this route they will need to walk more than a mile to school. |
| M4 | Please bring back the M4 so that my child can ride to and from school |
| M4 | M4 is an important transportation lifeline. That bus is packed weekday mornings getting our neighborhood children to school (Deal & Wilson) and for getting residents to the Tenleytown metrostation. The M4 is rather essential for schools and commuters. The hours could be cut back to just school hours, but it shouldnt be completely abandoned. |
| M4 | It seems highly likely that DCPS schools will be in-person again by January 2022. And yet you are eliminating the M4, which is swamped during school commutes? DCPS doesnt have to maintain school buses because kids ride metro buses. This seems insane. |
| M4 | My kids use the m4 as their school bus. |
| M4 | Do not cut M4 |
| M4 | Don't cut M4. Students and commuters need it. |
| M4 | Elimination of M4 would mean I cannot take public transposition to work. |
| M4 | This plan would eliminate the M4 line completely. This is how many Deal and Wilson students to and from school and is already overcrowded. There are not viable alternatives I see in the plan. |
| M4 | I am a bicycle commuter from the Palisades to Union Station. On days that I am unable to ride my bike, I need access to Metrorail to get to work. That access is now provided by the M4 (to Tenleytown station), or DC (to Dupont Circle) as second best. These would be eliminated in your plan. |
| M4 | Eliminating all service entirely is unfair to low in command minorities that live in those service area. I have a section 8 voucher, and cutting the MR entirely would make me have to move because no bus service would take my son to school on the M4 at St. John's where he is on scholarship. |
| M4 | Do not get rid of the M4! Needed to go to Wilson and Deal schools, how are kids supposed to get to school without it? |
| M4 | The M4 is the bus route that connects us to the Tenleytown metro and also provides service to Sibley Memorial hospital. |
| M4 | DO NOT CUT THE M4. The M4 is the most popular bus line for kids in Chevy Chase to get to Deal and Wilson schools!!! It will add terrible traffic to Nebraska Ave and alls all streets if a ton of kids now have no public transportation to get to school. |
| M4 | M4 is only service for my neighborhood. We have many residents who rely on this service to connect them with Connecticut Ave and Wisconsin Ave |
| M4 | Do not eliminate the M4. It is the only way out kids have to get to school. |
| M4 | No, I need the M4 to continue for commuting purposes. Additionally, the M4 serves many neighborhood kids going to Deal, Wilson, etc. |
| M4 | I am concerned about talks to eliminate the M4 bus line. This is the bus line that students at Deal Middle School and Wilson High School use to get to school. If this is eliminated, how will these students get to and from school? |
| M4 | DO NOT ELIMINATE THE M4 BUS LINE, WHICH IS HEAVILY USED BY COMMUTERS AND SCHOOLKIDS. |
| M4 | Need M4 for essential travel school and work |
| M4 | The M4 is essential to enable my children to get to school every day. |

| Route | Proposed 2022 Metrobus service changes |
|---------|---|
| M4 | WMATAs proposal to eliminate the M4 is incredibly short-sighted. This is THE bus that most students in the Barnaby Woods/ Hawthorne/ Chevy Chase neighborhood take to Deal and Wilson. Neighborhood students who go to Duke Ellington, School Without Walls, St Johns, and other schools also rely on the M4. We are talking about literally thousands of students. When school is in-person, the morning and afternoon buses are jam-packed. My children have had 1, 2, 3, even 4 buses blow by them at a bus stop, because the buses had no room to let them board. Meanwhile, school populations are exploding... Deal had 800 students 10 years ago and now has 1700, with forecasts for 2200 students in a few years. WMATA is citing the low ridership figures in Fall 2020 --- when schools and many offices were closed -- as justification for eliminating the routes. If anything, with enrollment projections in Wilson and its feeder schools increasing, we could use almost double the M4 buses in the morning and afternoon. |
| M4 | I am concerned about eliminating the M4 bus route for Deal students. If this route is eliminated, the city will need to provide dedicated school transportation |
| M4 | Eliminating M4 will create commuting nightmare to Wilson HS/Deal MS from Chevy Chase etc in upper NW |
| M4 | How will kids get to Wilson and Deal? What about congestion and pollution? All of these cars would be driving through the newly-implemented Safe Streets neighborhoods. I can see cutting back on the M4, but to eliminate it entirely is foolish and does not align with what the city says its priorities are. Further, wont it hurt red line Metro traffic? There is no place to park at Tenleytown for all day rider, so those people who take the bus to work will have to drive instead of taking the Metro. To completely eliminate a part of this city from service is unwarranted. |
| M4 | Please do not eliminate the M4 |
| M4 | Need M4 for travel to Wilson and Deal from Hawthorne. Or At least a school route that comes north of military Road |
| M4 | Do not elimjj in Nate the m4 . Kids use it to go to school and adults to get to tenleytown! Those buses are packed every morning! Also expand after work service so people can exit at tenleytown and use ghe bus to get home without a 45 minute wait! |
| M4 | Assuming that school is back in session at Deal and Wilson, I don't see how the M4 could possibly be eliminated. I regularly commuted to Tenleytown Station on the M4 (during normal times) and that route was often standing-room only, given the number of students. And many times, the M4 would pass me by because it was already so crowded by the time it reached my stop. |
| M4 | The M4 bus line would be a major loss as it serves all the Deal Middle school and Wilson high school students, as well as American University students, residents who commute via Metro and also essential workers who work in the neighborhood such as nannies and other workers |
| M4 | Elimination of M4 bus route is not good for me. Plus many neighborhood kids use the bus to get to school in the morning. |
| M4 | dont eliminate M4 |
| M4 | Absolutely not. By eliminating the M4 you will literally be destroying the ONLY form of transit to Barnaby Woods. Not all residents can drive or have the economic resources to move elsewhere. By eliminating the M4 route you will be leaving residents who don't have cars for dead. The nearest Metrorail station is literally miles away. I have relied on the M4 for years just to go buy groceries and if you get rid of it I will be royally screwed. |
| M4 | Students will be back in school and among the proposed cuts are bus lines that serve thousands of students, including the M4, which is so crowded at school entry/exit times that riders often have to wait for several buses to pass by! This makes no sense to cut. |
| M4 | my daughter will use the m4 to get to school which is due to close |
| M4 | The M4 is vital to our neighborhood, especially for children attending Deal and Wilson |
| M4 | Keep M4 |
| M4 | If you cancel the M4 bus, how will our children get to Deal middle school? |
| M4 | Need M4 service. |
| M4, 30S | Some routes are low now due to school closures, including the M4 and the 30s - please do not make decisions affecting these routes until schools are back open at capacity! |
| M4, D6 | Eliminating both the M4 and the D6 will deprive the Palisades neighborhood of bus service and create problems for (1) students needing to travel to Wilson HS and Deal MS and (2) patients and staff at Sibley Hospital. |
| M4, D6 | Please do not eliminate M4 and D6 bus service to the Palisades. Our school kids and many commuters depend on these buses. |
| M4, D6 | Please do not close the M4 line which is relied upon by many individuals for hospital access, nearby childcare facilities, and visitors to local senior centers in the nearby community. The M4 is an excellent and economical option for federal workers who need an environmentally friendly alternative to driving into downtown for the work commute; the M4 is also the only viable option to reach the Tenleytown metro from the area hospitals. The D6 is similarly utilized and especially helpful during inclement weather scenarios. |
| M4, D6 | do not discriminate against NW residents, especially schoolchildren, and hospital workers needing to get to Sibley, M\$ and D6 are indispensable. |

| Route | Proposed 2022 Metrobus service changes |
|------------|--|
| M4, D6 | Do not cut M4 or D6 service. Only way for us to get to Metrorail or directly downtown. How do kids get to Hardy or Deal Middle schools or Wilson HS? WMATA must be crazy to cut these routes. And if they were run more often, more people, including me would take them more often! |
| M4, D6 | M4 and d6 are the only public transportation that many workers rely on to get to work. The palisades community in nw dc heavily rely on these two bus routes |
| M4, D6 | What about public school children? M4 and D6 transport school kids to Hardy, Wilson HS. Also, many front lines workers (cleaners, house keepers, care personnel, waiters) take these buses to connect to downtown or Tenleytown. |
| M4, D6 | The reductions in bus service will lengthen my commute or the elimination of them will make it impossible for me to get to the subway without driving (my commute is completely within the district). The proposed cutting of the M4 and the D6 will mean my first choice and then only alternative will be gone. Neighborhood children also use these routes to get to school. Mine rode the D6 to Hardy MS and Duke Ellington HS and the M4 to Wilson HS. |
| M4, D6 | My school aged children will need the M4 and D6 to get to their schools; Wilson and Hardy |
| M4, D6 | M4 and D6 routes are what my children use to commute to and from their schools in an efficient manner. |
| M4, D6 | M4 and D6 are essential public transportation services in neighborhoods that don't have a metrorail station, as is the case of Kent, Palisades, Foxhall, etc. Eliminating D6 for example, means that my kids won't be able to get to their public school by bus as they did prepandemic and currently do for partial onsite instruction. This is a very unwise proposal that puts working parents, especially moms, in a very delicate and unfavorable situation, and further impacts the loss of jobs that working mothers, and women in general, have been experiencing since Covid started. I want to believe that Mayor Bowser would not support a proposal like this. But I also think of women in other neighborhoods of the Washington metro area that come to these neighborhoods to work every day and depend heavily on public transportation. Many of these women are the breadwinner in their households and will undoubtedly suffer as a result of this proposal. |
| M4, D6, D5 | The planned elimination of M4, D6, and I assume D5 mean that I will no longer be able to rely on ANY public transportation to get to work in downtown DC nor attend local public schools. This means a public transportation desert in a large quadrant of the district in Kent, Palisades and other nearby communities. Is the assumption everyone is wealthy in these areas and doesnt need public transit? I assure you that is not true and removing affordable transportation will mean many will need to relocate to find dependable transportation. For example, my sons former day care provider lives along the D6 route and wont have a way to get downtown to her job if these cuts exist. Additionally there are numerous hospital employees that rely on public transportation that wont be able to get to work easily w/these changes. |
| M4, E4 | Elimination of the M4 bus line will completely preclude DCPS middle and high school students who live in upper Chevy Chase and Barnaby Woods from any form of public transportation back and forth to school when schools reopen. This will greatly increase vehicle traffic on roads during rush hour as parents will need to transport students back and forth. Furthermore, as offices reopen, people living in these neighborhoods who use the M4 to commute to the metro will now have to crowd onto E4 buses. |
| M4, E6 | Please save the M4 or E6 |
| M4, E6 | The M4 bus is the only line in my neighborhood and needs to remain in order for neighborhood kids to get to school and adults to get to work. This is the ONLY option since you got rid of the E6, which I rode often. |
| M4, E6 | Keep m4 an e6 routes. |
| M4, L1 | We need the M4 and L1 lines! |
| M4, L1, L2 | You need to retain the M4 and L1,L2 lines in order to ensure school-commuter routes. |
| M4, L1, L2 | We need more M4 and L1,L2 - especially if trains run less frequently. |
| M6 | My spouse is an essential health care worker. We reside in Penn branch is Ward 7. He commutes by M6 from our home to Eastern Market where he takes the metro to Roslyn then walks over the bridge to MedStar Georgetown. He sometimes bikes to work then uses metro to return home and puts his bike on the M6. The M6 is an essential service in our neighborhood. |
| M6 | M6 route is very necessary as many ppl along the route depends on this bus as their ONLY transportation. With elderly residents and residents with small children, this route is NEEDED and should remain in service |
| M6 | It's not easy having to catch 2 additional buses when M6 not running |
| M6 | M6 is slated to be eliminated entirely in January 2022, leaving Pennsylvania Ave above Branch Ave without any bus service. There are a number of churches, day cares, schools and businesses that are accessible because of this bus line. This will greatly impact not only the neighborhood, but the employees/teachers who work here. Additionally, eliminating the line gives residents of Penn Branch/Hillcrest limits the neighborhoods direct public transportation route to downtown DC. Please advise whether the route would return after 2022. |

| Route | Proposed 2022 Metrobus service changes |
|----------------|---|
| M6 | Again I'm answering not sure only because yes (I agree) it would be essential to have Metro focus on especially low income customers (and don't forget the retired and elderly) and essential workers but when I look at the details of Metro's proposal I say no (don't agree) when the M6 is up for elimination. My reason? If you remove the M6, you remove service to these very members that you say you are focusing on. |
| M6 | I disagree. The M6 is essential for a quick and convenient connection to the subway and other transportation connections for errands and doctors appointments. We do not have as many convenient transportation options to get downtown or across the bridge to other connections quickly. The M6 provides independence for doctor appointments, run errands, shop and anywhere else I need to go without depending on Lyft or Uber. Also car ridesharing is not an option for me since COVID. I am able to ride the M6 and have a comfortable and contact-less ride. If cancelled will add an undue burden and expense to my household. |
| M6 | I live in Fairfax Village SE DC. We depend on the M6 to go to Potomac Avenue station, grocery stores, doctor appointments, and work. If this bus is discontinued I have to leave home at 4:30 am to walk 4 to 8 blocks up a hill (in the dark) to catch another bus and will be late for work. I did that route when the M6 stop running and was written up for being late. Im almost 60 years old and the only one employed in the house I cant keep walking up hills, afford car services or afford to get fired. We have seniors that depend on the M6 bus and everyone can not afford a car. Metro has take majority of the bus we need in Fairfax Village SE. Please keep the M6 bus so I can keep my job and I wont be homeless. thank you |
| M6 | I take the M6. You plan on cutting a bus line that's the only way people in my neighborhood can get down Pennsylvania Ave. This is the only bus that brings me home. You CANNOT CUT THIS LINE!!!!!! |
| M6, 39 | As of now, Metro is proposing to eliminate the M6 line. While I currently resident near both the 39 and M6 lines, I serve as the Director of the Pennsylvania Avenue East Main Streets. DC Main Streets is a comprehensive program that promotes the revitalization of business corridors in the District of Columbia and our mission is to support traditional retail corridors in the District. We support businesses located along the Pennsylvania Avenue SE corridor from the John P Sousa Bridge to Southern Avenue, SE. The M6 travels the entire Pennsylvania Avenue East corridor, providing an essential transportation node for the corridor. If this line is eliminated, over 52 businesses will be impacted severely, limiting access to businesses for many of the residents of the Ward 7 Community. The Pennsylvania Avenue SE corridor has traditionally been a commuter corridor, with thousands of travelers using this vital artery on a daily base. Cutting the M6 services would cause substantial economic hard to many of the businesses located along that corridor who rely on commuters and the surrounding communities for financial support. If the M6 is eliminated, many of our business will not survive this economic impact. |
| M6, 39 | Elimination of the M6 would greatly effect my traveling as its my primary way of transportation for work. |
| M6, M2, V5, 39 | I would ask that you strongly consider not discontinuing the M6 bus line. My neighborhood has already lost the M2 and V5 bus lines. It seems that for Metro/WMATA, its all about money. Cant someone consider whats needed, as opposed to how much money isnt being made for your company? This line is needed.. The 39 bus line that was added (it only runs during rush hour), and really does nothing for those of us who need the M6. Why is this neighborhood constantly being targeted? Then theres the other bus lines that have been added (the 30s North & South). First of all we have to get to them. This takes one out of their way, when youre simply trying to get to the Potomac Avenue station. It just doesnt make sense to me. I know that my concern isnt going to make a difference. Nothing that I write will sway whats going to happen. I know that the decision has already been made and this is just a matter of formality. When I voiced my opinion about the M2 & V5, it didnt make a difference, and I know that it wont make a difference this time either. I attended the hearing, and for what, when it was all said and done, Metro/WMATA just did what they wanted to do, so that they could save some pennies. It should be about the needs of people, but its all about how much money you can make. Congratulations on being on top of your game. Money over needs. I guess thats just how it goes, especially if its concerning certain neighborhoods. |
| M6, W4 | the M6 runs through a low income working class neighborhood in SE and is the quickest way to get from Maryland into dc. the only other option is taking W4 which is a 40 min ride to get from Maryland into a DC metro station. DO NOT CUT! |
| MW1 | I depend on metroway line in crystal city for access |
| MW1 | When back in the office will use metroway bus daily |
| MW1 | I rely on the MetroWay to get to my office. I bought my home near Braddock metro in part to be able to utilize this service. Once we start returning to our offices, The MetroWay is vital. |
| MW1 | I rely on mw1 |
| MW1 | Reducing bus service is a terrible blow to everyone in the DMV. A city like DC in 2022 should have state-of-the-art public transit that is widely available and widely used, not reduced services. As a resident of Arlington without a vehicle, I most rely on Metrobus (MW1) for my essentials, especially grocery shopping and doctors appointments. I need reliable bus service to get to those appointments throughout Arlington and Alexandria. Less service and more crowded buses is not the way to build a successful bus service. |

| Route | Proposed 2022 Metrobus service changes |
|----------------------|--|
| MW1 | Eliminating MW1 makes little sense. It is one of the few routes with dedicated bus lanes, and it is in a fast growing area of Arlington/Alexandria. People in this high growth area will convert to cars permanently if there is no bus service to get to rail stations. |
| MW1 | the proposal eliminates Metroway service starting January 2022. This is critical parallel service to dramatically reduced Metrorail service. If there are ANY issues with rail service along this corridor, Metroway is the release valve. And, it funnels travelers TO rail, so eliminating it just further damages rail ridership. |
| MW1 | New housing still being developed along MW1 bus route which connects 3 metro stations, 3 neighborhoods and runs right through the new Amazon HQ and Virginia Tech campus. It would not be wise to remove the route just as the construction is expected to be complete and more workers, residents and visitors come visit a fairly active area. |
| MW1 | I use the MW1 on my daily commute (pre-pandemic), so this would absolutely screw me (post-pandemic). |
| MW1, 10A, 23 | I rely on MW1, 10A and 23 for medical, food and banking needs--all essential. |
| N | The N bus proposed changes are not feasible or fair. |
| N2 | I dont have a car. There is no metro within walking distance. We need the bus in our area. (N2) |
| N2 | I need the N2 restored. The low income employees of all the huge apt buildings and American Univ need the N2 |
| N2, N4 | N2 and N4 are vital to get to/from downtown from Wesley Height. N2 even more than N4, as N4 does not do the New Mexico Ave leg. You have already eliminated some bus stops - but I thought this was temporary. Now you propose to scrap the entire route. And there is no good alternative, with Tenleytown metro a good 25 minutes walk away. Moreover, pre-COVID, the busses I took in morning and evening rush were almost always completely full, with standing room only. It hence makes no sense to cut this service. I strongly object to eliminating N2/4 or reducing their frequency. |
| N2, N4 | The N2 and N4 buses are essential to my area of travel. |
| N2, N4, N6 | I rely on the N2/4/6 to get to and from work each weekday |
| N2, N4, N6 | I am elderly, cannot walk far, and don't drive. The reductions and rerouting in N2,N4, N6 service would be a disaster for me. I could walk to 30 buses on Wisconsin Avenue, but their service is being reduced too, and pre-COVID ai found it hard to get a seat on them. |
| N2, N4, N6 | The elimination of the n2 and n4 and changes to the N6 to eliminate any bus service down mass avenue from Idaho to Dupont circle is unacceptable to the many who live in large Cathedral Heights apartment buildings on Mass Ave and Cathedral Ave. We dont have close metro service as an alternative and elimination of this service leaves many without transportation to their jobs and for the many seniors in our neighborhood without access to medical appointments. You can change things around as needed, that is understandable but eliminating this service is detrimental to many in this neighborhood. |
| N2, N4, N6 | I do not agree with reducing the N2,N4,N6 line. It is a vital way for me to get to work every day, and changing the route would prevent me from accessing public transportation without a significant walk. I live 1.5 miles away from the closest metro train stop so the N2 route has been a lifeline for me. I particularly disagree with cutting service to Tenleytown as it is the closest metro stop for many in the area near the National Cathedral. Instead of a quick bus ride to the nearby stop, I would have to spend time making my way to the new stop, waiting as the bus fights through traffic towards DuPont Circle, then take the metro back several stops to make it to Tenleytown, let alone MD. Please don't cut this route. |
| N2, N4, N6, 30N, 30S | Many elderly people and younger people live in apts served by the N2/4/6 and 30N/30S routes. We will need them after the pandemic--the full routes as before--for our quality of life. |
| N4, N6, D2, M4 | The N4 and N6 service for Massachusetts Ave. has been completely eliminated by this proposal. The proposed N6 is re-routed to support Georgetown and the Arizona Ave/MacArthur Blvd. population. Nothing is available to the Mass Ave corridor (north of Nebraska Ave.) under this proposed plan. This is not consistent with the stated goal of supporting low income customers who rely on Metrobus. MANY people who use the N4/N6 bus transfer at the Friendship Heights bus depot and travel to the Mass Ave. corridor for restaurant/service jobs. There are significant retail areas (and medical service buildings) along Mass. Ave that support these workers. Except for Sibley Hospital, the Arizona Ave/MacArthur Blvd. corridor is significantly less dense (and are far wealthier than the Mass. Ave corridor north of Nebraska Ave.) While I strongly suggest at a minimum retaining the current N6 (or N4 route), if you REALLY had to make the proposed Route D2 and M4 cuts, you should have the bus-- after it makes its Loughboro Rd/MacArthur Blvd cut away from Mass Ave -- go BACK to Mass Ave and continue NORTH to service that Mass Ave corridor (then turn onto Western Ave and terminate at Friendship Heights). This would enable low income bus users to stay connected to the Mass. Ave corridor. NOTE: There are already many ways for workers to get from Friendship Heights to Sibley (see MD ride on buses), but there is literally no way for these workers to access the Mass. Ave corridor. above Nebraska. The remaining sections of Mass. Ave. also need service, but the main point of these comments is to advocate for the corridor north of Nebraska Ave. |

| Route | Proposed 2022 Metrobus service changes |
|---------------|--|
| N4, N6, M, N2 | The elimination of the N4 and N6 service (the new N6 service is a replacement of the old M service and is combined with the old N2 service. It completely eliminates the N4 and N6 Massachusetts Ave. service to Western Ave.) The N4 bus was a heavily occupied bus before the pandemic. The current N6 largely covers the N4 service. This decision to completely eliminate this service is a HORRIBLE change to the way many in NW D.C. commute. PLEASE DO NOT DO THIS! Let us keep the old N4 (or N6) service. |
| N6 | No Mass. Ave. buses! New N6 route would only go as far as Dupont. Then what? Possible 30 minute wait for train to Metro Center? With station closings, then a walk to Mall. If its raining, snowing or cold? |
| N6, M4 | I would like to object IN THE STRONGEST POSSIBLE TERMS to your proposed changes to the N6 and M4 routes. Such changes would cut off all access to public transportation for me; I would have no transportation to anything or anywhere. I cant call an Uber because I dont have a cellphone. Please keep in mind that folks who live in Upper Northwest Washington pay taxes, too -- very high taxes. Your proposed changes to the N6 and M4 stink to high heavens! |
| P | If you are trying to save money cars are the most expensive option to an individual. Frequent, safe, clean mass transit may be expensive but it is the most helpful to low income people. As a tax payer I'm all for subsidies to mass transit |
| P12 | As long as the P12 line isnt affected I am fine. |
| P18 | In January 2022 the plan says it will eliminate the P18 route. This is not only detrimental for me but for others as well. Not everyone in fort Washington has a car to drive them places. Many people do not have the money to buy and maintain a car and some many not be able to drive due to medical reasoning like I. There are also many young adults, elders, and teens who ride the p18. I DEPEND on P18 to go somewhere the same day. To get out of my area. I can not always depend on someone to drive me places when ever I feel like it. If the p18 gets eliminated without any alternative routes taking its place, I will be stuck in fort Washington. It will be so rigid trying to go anywhere. |
| P6 | P6 and other similar neighborhood routes might not be the fastest or most used way of getting around, but they provide a useful alternative when metrorail isn't working, when there aren't enough bikeshare, scooter, or other shared transport options available, or for people with limited mobility who can't get to a metro station easily and who can't use other travel options. |
| P6 | Do not cancel P6 |
| P6 | This plan would eliminate the bus line I rely on most often. The P6 serves a large portion of the city, extending from Ward 8, traveling through heavily populated a visited parts of the city (Navy Yard, Waterfront, the Mall, Downtown, Chinatown, NOMA) before terminating at Rhode Island Avenue Station. To remove this line, especially when considering reductions in Metrorail service would leave many along its route with few options for accessing these parts of the city. |
| P6 | The P6 is the only bus that travels through Eckington. The Eckington community not only has lots of residential projects going on, it is also home to a large number of seniors who depend on the bus to carry them to the doctor, grocery store and church. The seniors dont bike or drive. We also have residents that work everyday using the P6 to travel to and from work. The P6 travels from NE to Anacostia. Its probably one of the few buses that actual connects distant parts of the city to one another. Theres so much traffic in our community that DDOT/Mayor Bowser took land through Eminent Domain to get rid of Dave Thomas Circle and establish new routes to move the traffic along. |
| R4 | The R4 is an important bus route for a lot of people to get to work and back home we need this route to continue. |
| REX | please keep Rex line route (including end points) in place. can be fewer buses if needed |
| REX | Please leave the REX bus that ride Richmond Highway as it helps those who work at Ft. Belvoir get to work. It is also a large low income area and many rely on it to do their shopping and go to appointments. |
| REX | I am not sure because I dont know how this affects REX bus |
| REX | Veterans must have REX to Ft Belvoir Hospital & Xchange pharmacy |
| S | The S buses are often very crowded. Buses running every 15-20 minutes instead of every 6 is a disaster waiting to happen. How can METRO expect to make money if riders are unable to take the bus due to overcrowding? No one is going to want to ride the bus post pandemic if the buses are going to run less frequently. |
| S | The S bus already suffers from overcrowding and historically could not service all customers waiting for a bus during rush hour. Slashing service in half would make my commute untenable. I commute bus to train, and so slashing service on both would really add up. I am disabled and cannot drive and so I do not have other options. These proposals would severely impair quality of life for people like me. |
| S | The buses were already so crowded pre-pandemic, especially at rush hour. Riding the S line buses up 16th St, I often had to wait for 4 or 5 buses to pass me before I could get on one that wasnt wall-to-wall people. I cant imagine how cutting service even further will work. |
| S | I rely on Metrobus to get to work. I live a couple of blocks from the S lines, and I chose where I live based on my ability to commute by bus. If it was reduced significantly, it could endanger my ability to get to work. |

| Route | Proposed 2022 Metrobus service changes |
|--------------------|---|
| S, 52, 54 | I used to rely on the S buses to get around, but now I am mostly a rail rider. This plan would work for me, but I am sure that I would run into issues on occasion (e.g., when I take an S-line bus or a 52/54). I could live with this. |
| S1 | I take this S1 bus to work in foggy bottom. I understand this is one of the lines proposed for elimination. This will make it very difficult for me to commute to work. The S1 has consistently been a very packed bus line and needs more busses running, not cutting the line altogether!! |
| S1, S2, S4, G2, D2 | Please restore MetroBus service to pre-pandemic standards.I do not support reductions to S1, S2, S4, G2, or D2 service. |
| S2, 90, 92, X2 | I want to know more about Metros forecast for areas with the most ridership, because ending service at midnight on the S2, 90/92, and X2 at midnight in conjunction with the projected rail cuts doesnt appear effective to me. |
| S2, S4 | The 16th St. bus lines of S2/S4 is a crucial route. And its always crowded. I dont think that line should be cut or lessened but instad it should be expanded |
| S2, S9 | S2 and S9 buses should not be reduced, they are usually crowded as it is. |
| S4 | It looks like the S4 is eliminated, which if it limits frequency from columbia heights to downtown is a problem for me in terms of reliability |
| S4, S2 | The S4 line is already being eliminated - reducing the frequency of the S2 is doubling down, when the 16th St line is so highly trafficked...I dont understand. |
| S9 | I cant wait twice as long for a bus, plus the S9 bus was already operating at capacity. This would mean that the buses were not workable as a commuter option. |
| S9 | The priorities you've mentioned make sense, but I'd have to look at the detailed plan to be sure. I typically use the S9, and since it comes so frequently it requires little planning. |
| S9, 59 | Eliminating service for the S9 and 59 would greatly inconvenience commuters. Those routes significantly reduce commuting times to downtown. Pre-pandemic, the routes are often crowded. |
| T2 | I totally rely on the T2 route to get to and from work. I'm the only source of income for my household. Please don't shut down the T2 route |
| T2 | Id lose T-2 service. |
| U4 | U4 is very important way to connect to metro for me and my neighbors. I do not want to see its service diminished. |
| U4 | the U4 needs to continue operating for those in the community without transportation. |
| U4 | The U4 is essential to the River Terrace neighborhood and without an extension of the Streetcar is one of the only connections to a Metro. |
| U5, U6 | I take the u6 and u5 bus to work. Please do not eliminate Minnesota station orange line and the u5 or u6 bus |
| U7 | Cutting service by 50% when you are expecting 75% of your riders to return is a recipe for a death spiral. That being said, I agree with the priorities you have established here. There are several problems with this plan however, many of the service cuts in Ward 7 emphasize connectivity to Metrorail over connection to regional activity centers. The U7 cuts, for example do not connect seniors to the places they need to shop for groceries and essential purposes, but rather are more tooled to connect commuters to the Metrorail. More needs to be done to ensure that these shorter routes continue to function as a way to connect communities to regional activity centers. |
| U7 | The service on the U7 is too slow as it is |
| V12 | This plan eliminates the bus (V12) that I use to get to work (connect to Suitland Station). Moreover, my parents use this line to get essentials (medical care, groceries, etc). They cant afford to use a cab or Uber/Lyft. Please do not eliminate this line. It would be detrimental to us and our thousands of neighbors. |
| V12, J12 | How can you eliminate both the V12 and J12 buses? Those are the buses that go across Marlboro Pike, a main thoroughfare. I know of no others. Eliminating those lines will be a disaster for workers. |
| V14 | I am employed and to discontinue the V-14 to Deanwood and Penn Mar would create a hardship for me and many other riders that use this service weekly. |
| V4 | V4 is the only route that goes along Minnesota Avenue and across the river. Connecting near to Potomac Avenue and Navy Yard allows riders to catch other bus routes downtown. Eliminating that route means riders can ONLY go to Anacostia - even further away from downtown and with access only to the green line. There must be some option for crossing the Penn Avenue bridge to get to a more central location. If that route could circle to Stadium Armory or even Union Station, it would allow riders east of the river access to more options. |
| W14 | I use and need the W14. |
| W14, P18, P19 | The FY proposal will eliminate both the W14 and the closest alternatives (P18/19), thus eliminating all Fort Washington and many Oxon Hill residents from any MetroBus service. Our taxes supportyou. I understand the need to make cuts, but to eliminate all possibilities for us is not acceptable. Alternative: Keep the P18 or P19, with reduced service from the FTW Park & Ride (once an hour: 6am, 7am, 8am) for 3 months then decide if it is economical. People will need your service after the Time of the Virus, and, children return to school. Thank you. |
| W4 | If an area will no longer have metro coverage at all please provide warning via TV and/or radio. The wmata.com website can be confusing and trip planner does not update itself when changes occur. There have been many cold nights waiting for the w4 and other buses with several other individuals and no one knew it wasnt running out stopped all together. I had to search and download a pdf with frozen fingers. That an extremely dated process. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| W4 | After reading the proposal change for the W4. My stop at JBAB Bolling Air Force Base will be eliminated. Im not disabled however Im a senior with no car. I didnt see any bus change for service to South Capitol and Malcolm X Ave S.E. I only saw service elimination. Will there be a shuttle implemented for those of us who cant use the base shuttle. Its a very long walk from Anacostia metro station to the base or from Malcolm X ave. S.E. to the base for us seniors who catch the bus to and from work in the morning and in the evening. At night its dark in the area if some are healthy enough to walk and its a high crime area outside of the base putting our life at risk trying to make it to public transportation to get home. Some are essential workers as well. This was not well thought out for all services to and from the base to be discontinued. |
| W5 | w5 is a commuter route that would be greatly impacted by these changes and transfers that occur at ancostia station for those workers that use this route. |
| X2 | The X2 bus route should be increased. It's always crowded even during pandemic times. |
| Y | Y line is always a busy line lots of older people and people getting to their jobs etc I think ridership is higher the states numbers reflect |
| Y | What is not mentioned on this page of the survey but is visible on the webpage is that you are planning to cancel heavily-used commuter Y bus lines -- a horrible and stupid idea! |
| Z | Cutting service to lines, like the Z, that serve people coming from outside the beltway seems to compound the problem if red line service is reduced beyond Silver Spring. |
| Other | Not enough service. |
| Other | I agree with the targeted priorities to make sure the biggest needs are met. |
| Other | I just took a job where I would have used commuter benefits to ride the bus every day. My route is limited and what used to be a 45 commute is now scheduled for 90-120 minutes depending on departure time. If this persists, I will never use the metro system despite plans to initially. |
| Other | I suspect demand for transit will pick up sharply over the summer and Metro will need to restore bus service more quickly than the budget currently contemplates. |
| Other | Eliminating the only bus line I use is absurd. The identified "alternative" does not apply to me in Lincolnia. Once I have to go back to work, it will be an absolute pleasure to start driving and never rely on WMATA's garbage service ever again. |
| Other | Considering the possible closures of the metro stations nearest my home, I will need to rely more on bus services to fill the gap. Moreover, diminishing bus service will most hurt lower-income commuters in neighborhoods that are not serviced by metro rail. |
| Other | Depends on how the Post-Covid ridership resumes and when. |
| Other | Eliminating bus routes is going to cause many people to have to take multiple buses in place of one. Given the already uncertain arrival times and long intervals, we will be punishing people who need to take buses and disincentivizing the use of public transit. |
| Other | We need bus routes in and out of Chevy Chase and Barnaby Woods. For us, for our kids, for the teachers and staff at Lafayette Elementary School and Knollwood advanced living home, and people who help us in our homes, etc etc. |
| Other | Generally my bus ridership is driven by rail service too. With significant rail cuts, I would buy a car and no longer use rail or bus service |
| Other | Dont cut service. |
| Other | Low income riders should take priority |
| Other | How can WMATA expect to meet the needs of commuters with a 50% reduction in bus service? The buses I take to work are already often filled to capacity. If anything, the city needs more bus lines, not fewer. Reduction in bus service will harm the citys low-wage workers most significantly, and it will drive many people to commute via car, which is exactly counter to the behavior we should be incentivizing and facilitating in the interest of a sustainable future. |
| Other | Bus service CANNOT BE CUT ANYWHERE. Regardless of zip code or demographic, any one who rides a bus needs that bus and has no other option. |
| Other | you need to be INCREASING Metro bus service, not cutting it. |
| Other | As i understand the plan, there is to be no service from the Palisades to the Tenleytown metro. I do not support this, as it would eliminate the ability of people in our area to use metro easily and it would not allow students going to Wilson HS to get to school via Metro bus |
| Other | This is one of the primary busses we use to get to work and the reduction/removal of this route would impede our ability to do so and create a significant gap in service for the Brightwood neighborhood, which already has substantial public transport challenges. |
| Other | schools--kids need to get to school |
| Other | I hope that in January 2022, my use of metrobus and metrorail will be similar to pre-pandemic use. |
| Other | Please think of the needs of college students who live in DC proper but don't have cars |
| Other | Cuts in service will be a detriment to the community. PLEASE RECONSIDER! |
| Other | No |
| Other | do not do it!. need more service. |
| Other | Does not allow for ease of travel to different parts of Montgomery County/RideOn is less reliable. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | 50% reduction in January 22???? Tax people from virgina pls - dont ruin the city |
| Other | Many of the health care workers at Sibley and Georgetown Hospitals come from the eastern side of the city. This plan would inadequately serve them. |
| Other | See above comment |
| Other | Should include federal government reopening plans, since demand will lag behind actual ridership in Jan 2022 |
| Other | We might as well just pack it up as a city if were going to 50% pandemic levels. |
| Other | Reducing service further in January 2022 is extremely counterproductive and counterintuitive and will harm workers ability to commute. |
| Other | Stop cutting service. Public transit is a public service. Not a for profit organization. |
| Other | listed changes are too vague to evaluate |
| Other | There would be no other service available |
| Other | Good to target high use and high need communities |
| Other | are you really going to run buses on a scheduled basis for people to go to medical appointments? is there a cheaper on-demand alternative? |
| Other | I am strongly opposed to any and all cuts in Metro service. Tell the DC, Maryland, and Virginia governments that this voter and taxpayer supports full funding of WMATA, and that I dont care if they have to raise my taxes for it. If cuts are inevitable, however, prioritize access for low-income citizens. |
| Other | Please keep bus service at the current levels. It is very important! |
| Other | Buses were too crowded in the morning pre covid. There's no way I'd be able to get on one in the morning |
| Other | need service in Kings Park region East of Burke Lake Road. all service is cut except for busy Braddock Road |
| Other | The proposal decreases bus services through Fairlington and Shirlington which would make me less likely to take the bus and would also create buses with no social distancing |
| Other | I haven't risen metrobus |
| Other | It sounds good in theory though I am skeptical WMATA will follow-through. I imagine WMATA will be easily swayed by angry, loud, and wealthy people. |
| Other | Don't cut metro bus wtf |
| Other | This is ridiculous |
| Other | Stop reducing service!!! Reduce your bloated pensions! |
| Other | This plan will mean that large portions of the city dont have adequate transportation options. |
| Other | Please do not cut bus service by 50% |
| Other | Stop with the overtly racist proposals. Most severe cuts are all in the most transit-dependent neighborhoods. Why split the 30 routes? To keep white Georgetowners away from everyone else? To make cross-town commuters originating east of the river have to wait for transfers?? |
| Other | Not sure where my daughter will be going to school yet, but this has the potential to affect me. I am a health care worker. |
| Other | What I am most concerned about is the transporting of DCPS and other school children to Deal and Wilson. I am also concerned about those who use the bus to get to or from Friendship Heights or Van Ness Metro stops in order to get to and from work -- both those of us who work downtown and the many caregivers and others who come to homes in this neighborhood to work. I am concerned that at least during peak travel hours for those groups -- probably 7-10 am and 2:30-7:30 pm -- operating at 50% capacity would result in severe crowding of buses. |
| Other | Focusing on low income areas creates the perception of buses and only for low income people, and discourages middle and upper class individuals from using bus service when we need them to do so to decrease emissions and reduce traffic. |
| Other | I dont know how you would identify low-income riders who rely on Metrobus for those services. |
| Other | I wish the city would take revenue that SHOULD be taken from motorists, by way of steep parking fees and congestion pricing. |
| Other | Cutting back transportation services is a foolish idea. Have the authors of these proposals ever actually USED the Metro system? It doesnt look like it. |
| Other | Direct metrobus (not having to transfer to rail) is really important |
| Other | Bus customers are completely dependent on public transit and often from lower income communities than metro riders. their needs should be prioritized. |
| Other | The buses from ballston are already oversubscribed |
| Other | Completely eliminates service to King's Park West. I would have to drive to the office every day. |
| Other | Want to ensure adequate frequency. buses that only come every 30 min and then have two buses with the same number on top of each other doesn't work. |
| Other | I think pre-pandemic ridership is a better gauge. Hopefully by January 2022, office workers will be returning to the office - I know I expect to and will need my bus service. |
| Other | The buses are critical for low income workers who can't afford to stop working. Cut trains before you cut buses! |
| Other | NO CUTS! |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | some of the changes are reasonable given constraints (though, lets be honest, the idea of WMATA leadership simply throwing up their hands and accepting constraints is ugly and bad and yall are acting really shamefully and frankly have been as long as current leadership has been in place). some cut off entire areas of the city, counter to your stated goals of equity & aid for low-income and essential riders. |
| Other | Reducing the bus service is awful |
| Other | Caveat - keep the full orange line open. You will kill Clarendon businesses if the metro does not stop there. I dont understand why you would propose to close orange line stations. They were always packed when I used it. |
| Other | We dont know how the pandemic will have changed peoples needs in Jan 2022. It could be that more people are working remote long term post-pandemic and it will change the transit needs of the community. Better to assess the current needs rather than reverting to what was before. We will likely have a new normal. |
| Other | This seems okay in theory, but defining low income and essential workers correctly is important. |
| Other | These shutdowns would increase congestion and affect lowest-income residents, despite supposed targeted efforts |
| Other | My point is that many people need public transportation. Dont leave them out in the cold with no transportation. |
| Other | Will you be cutting buses in neighborhoods that do not have metro access? |
| Other | Appreciate prioritization for low-income and essential workers. |
| Other | My concern is what this plan would mean in conjunction with reduced metro rail service. If metro rail service is cut, people may rely more on the bus service. But if that is cut too, it would be extremely problematic. |
| Other | This is a ridiculous proposal |
| Other | it will not work for me |
| Other | Why would you reduce metrobus service in 2022. Reduce it further NOW and save that money to apply to 2022 when ridership will increase post-pandemic?? |
| Other | Please extend extra hours on trains and buses |
| Other | You need to focus on getting kids to and from school in addition to areas with the most riders, Low-income customers who rely on Metrobus, Essential workers, including those with jobs in healthcare, food service, social services, and other important societal functions. You cannot use September of 2020 as baseline for determining ridership - that is in the middle of the pandemic and assuming that is normal ridership is sheer idiocy. |
| Other | Because one of the main reasons that I'm against this proposal is because people who live near a metrobus route (and i only mean the number one) would have no transit access to the metro and would have to rely a car, taxi, Uber/Lift to get to where they got to go. |
| Other | After pandemic ridership should zoom up |
| Other | Awful |
| Other | A bus that comes every 30 minutes is not a bus. If you are going to run busses, run them frequently. Every 10 mins or less. |
| Other | buses are important connections to certain neighborhoods and should not be cut |
| Other | If were routing buses to metro stops it would make sense to keep; as many stops open as possible so the bus plan cant be independent of the rail plan |
| Other | Do not reduce service. Will result in a death spiral |
| Other | Good plan to make sure low income riders and essential workers are covered, as well as reroute to increase transfers to metro rail. |
| Other | Please do not cancel metrobus service! |
| Other | Reducing transit access, frequency, and reliability reduces demand, which leads WMATA to further reduce transit --- its a death spiral. Accessible, frequent, and reliable transit sells itself. |
| Other | I |
| Other | It would depend if the bus I take is cut. |
| Other | You cant reduce service anywhere and still allow for essential workers. Its an oxymoron. |
| Other | Penalizing the full fare paying customers who bear the brunt of your funding!!! |
| Other | Metro will have more ridership post pandemic |
| Other | I do not use metrobus |
| Other | In January 2022, Metro can expect almost (95%) pre-pandemic levels of transit and this plan needs to reflect this future. |
| Other | We should not be reducing service in January 2022 based on todays ridership. The vaccines are expected to significantly alter the Covid situation and many other will be returning to work and play by January 2022. |
| Other | I am not confident of any forecast of riders in January 2022. All riders should have access to Metrobus. Essential workers live in many areas.Do not reduce level of service. |
| Other | everyone needs bus service. pre pandemic parking and commuter travel was out of control. we need more buses not fewer |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Again I do not favor eliminating J1 buses because the ones left will get more crowded |
| Other | Eliminating routes will not provide needed public transportation |
| Other | Also need the Smithsonian exit. It's vital for visitors, volunteers and employees of the Smithsonian |
| Other | Cutting bus service is not a good idea |
| Other | I live by the courthouse metro and I think this plan would hinder me. |
| Other | Metrobus is the most important service tying the city together. It has to be maintained, but perhaps downsizing the bus size. Cost-effective bus services are provided in all European cities and Washington DC cannot do less. Perhaps a cost review with someone with European experience might be in order. |
| Other | In combination with the metro cuts would be impossible |
| Other | Do not close the Eisenhower Metro stop. We have several apartment buildings being built and ridership will increase once its safe to return to the office. |
| Other | The plan, as proposed, threatens to alienate me and my fellow commuters just as conditions are projected to return to a more normal condition (post-vaccine, daily office work schedule). Displacing these customers will make it challenging to recoup them as they find alternate transportation means and conditions in the area further improve. |
| Other | Reducing Metrobus is unacceptable and disproportionately used by the lowest income DMV's. Cutting Metrobus access would be unacceptable. |
| Other | People will be back on transit by January 2022. Well, not if you implement these changes. I'll be forced to drive back to the office. |
| Other | As mentioned before, all proposals must take into account current ridership and the fact there will be fewer commuters as working remotely is expanding. |
| Other | DC is becoming one of the wealthiest cities in the world. Why are we cutting public services? |
| Other | Maintain some service through Trinidad. |
| Other | It's not just low-income people and essential workers who need the bus. Many people "including my family" got rid of our cars because we believed in helping the environment and supporting public transportation. Don't turn your backs on us. |
| Other | My preference is to continue working from home rather than having my commute time elongated by service cuts. |
| Other | Appreciate the understanding that buses are essential for low income communities |
| Other | This is obviously going to hurt a lot of low-income people. Do not do it. |
| Other | Offices should be open by then, there will be a need for pre-pandemic levels of service. Metro should be focused on INCREASING service and EXPANDING rapid bus transit routes, not decreasing service |
| Other | WE need more buses! |
| Other | I do not agree with cutting metrobus service 50% |
| Other | Too many places would be unreachable by public transit. |
| Other | Would prefer late-night service, especially late-night service connecting DC to Virginia |
| Other | The link does not explain service changes. Please include details in the survey itself, as with the section on rail service. |
| Other | 50% of previous bus service is a travesty, and I know you said you would prioritize low-income riders but they are the ones who will be most harmed by this, plus its just a bad plan, please dont cut back on buses like this |
| Other | Reducing service doesn't help anyone |
| Other | The nAe plan provides no service to north Springfield/Burke area (served by 17 series bus). If Fairfax Connect runs, then there is an option. Otherwise, it is almost as close to drive to work as it will be to the nearest metro or bus stop. This will increase traffic and parking issues. |
| Other | Eliminates main bus routes which makes it more difficult for elderly, low income residents. |
| Other | I want to be sure that certain areas with customers who need MetroBus to get to work and school have the transportation they need. |
| Other | Please please expand or keep at same level ALL services that impact the poorest residents and poorest neighborhoods in dc |
| Other | Hopefully no cuts are necessary but if they are, these are best options |
| Other | If WMATA reduces its top heavy management structure...that would eliminate over paid salaries. Too much management, not enough labor... |
| Other | Eliminates service to my neighborhood. |
| Other | The buses were already too crowded in the mornings and evenings before the pandemic |
| Other | No comment. |
| Other | This is absolutely unacceptable. Metro must fight for the funding needed to preserve Metrobus service. |
| Other | I am an essential worker who can ONLY get to work via metro bus. Current levels are barely sufficient and reliable. |
| Other | Reducing bus service will discourage people from using public transportation and give rideshares more business. We cannot have that. |
| Other | Please don't reduce limited-stop service on Georgia, 14th, or 16th streets. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | PLEASE DO NOT ELIMINATE THE M4 BUS LINE!!! WE NEED IT TO GET OUR KIDS TO SCHOOL AT DEAL AND WILSON. PLEASE DO NOT CUT US OFF!! |
| Other | The city needs to continue bus service in all areas of the city. You can not pick certain neighborhoods. The idea that you can stop bus service to certain neighborhoods goes completely against the notion of decreasing cars in DC etc -- The city has made parking expensive and limited so exactly how will people get to school or work? For many people riding bikes is NOT an option ie: too old, disabled, too young, too dangerous!!! |
| Other | Quit trying to get rid of buses. The pandemic will end and people (including me) will be taking the bus again, but NOT IF THERE IS NOT A BUS TO TAKE |
| Other | If service workers are a priority, the bus will need to run after 9 pm |
| Other | Some reduction would be ok (about 80%) but reducing to 50% cuts service too much. |
| Other | I will need to take a bus every day to the pentagon metro. |
| Other | Busses were already overcrowded before the pandemic. Reducing service will just deter commuters from public transport. This will result in additional car traffic, pollution and green house gas emissions. Such approach is neither healthy nor in line with the promise of reducing pollution and green house gas emissions. |
| Other | This would be fine if metro stations are not closed or service severely curtailed. |
| Other | We need more public transportation options. |
| Other | That is bonkers |
| Other | As long as schedule and skipped stops are clearly communicated and do not fluctuate daily. |
| Other | You cant cut bus lines and not expect to harm low income communities. |
| Other | The government needs to allocate more funds to run the Metro full time, and perhaps reduce rider fees - this is a good investment in reducing cars on the roads, reducing congestion and stress of commuting and cutting down on pollution, green house gases and global warming. |
| Other | more buses, more often. |
| Other | The only bus route that use is proposed to be eliminated. I don't agree with this |
| Other | I live in Ward 2 and have lots of transit options, a luxury many do not. I have flexibility as well, whereas many others do not. Use my tax dollars to focus on customers who dont have a host of options, please. |
| Other | It's not ideal but it's understandable given the circumstances |
| Other | Absolutely. Please bring more (and cheaper) service to low income areas. |
| Other | Buses were often packed before the pandemic. This doesn't seem workable. |
| Other | Students. And environmental commuters |
| Other | Columbia Pike is too crowded - bus services were already cut here |
| Other | The problem is that the lowest income rely on metrobus. How are they supposed to get to work? |
| Other | Ore pandemic ridership levels should be considered once work and home orders have been lifted and downtown offices are open |
| Other | We dont want service cuts. Hire do you expect to have riders if you cut service. |
| Other | I want the bus to serve those who need it most - but it is eliminating all routes my family has to get to work, other than driving. |
| Other | Resume all to pre-pandemic |
| Other | I do not believe that this is an equitable plan. In the neighborhood of Trinidad, most residents do not own a vehicle and rely on the bus service to get them to work, appointments, and to run errands. The proposed plan eliminates all bus service in the neighborhood. |
| Other | A robust bus network is essential to residents who do not live near Metro stations, or who have disabilities that prevent them from walking long distances. Not all disabilities are related to age or income. |
| Other | Please do not close the metro bus stops that are near the Grosvenor-Strathmore metro station. |
| Other | As long as you do not close east falls church metro station |
| Other | Buses were already full early in the morning pre-pandemic. Metro should be planning to increase service not decrease. This will bring ridership back when vaccines are widely available this summer. Decreasing service will put Metro into a downward spiral. |
| Other | Keep Morgan Blvd open |
| Other | My entire bus line would be eliminated. |
| Other | It's impossible to answer this question without knowing specifically which routes will be targeted |
| Other | I would have to move :(I only take bus and metro, no driving. I NEED bus access. It's why I chose my current apartment, |
| Other | I think better more frequent service and longer hours are worth budgeting for. |
| Other | Do not do this. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | The January 22 eliminates entire neighborhoods bus service with no reasonable alternative. One such closure offered an alternative stop more than a mile away, no consideration for those unable to walk and no inclement weather protection at the stop. While the service reductions are understandable and should be adjusted as ridership increases or decreases the wholesale elimination of public transportation to an entire area is unreasonable. |
| Other | It is important to prioritize people who most need bus service, but if Metrobus doesn't serve the needs of upper NW, it will lose an important customer base and cause major congestion problems in the city |
| Other | THIS DISENFRANCHISES SOUTHEAST DC - POOR AND MINORITY NEIGHBORHOODS |
| Other | It will not work to have permanent cuts at that level, but another few months during recovery would be understandable. |
| Other | It depends how you determine the areas |
| Other | Too many route closures. |
| Other | I like the prioritization of those who need it most |
| Other | Everyone should have access to metrobus |
| Other | I think it is important to keep those riders that rely on the metro bus the most. Specifically, keep regular bus service to areas that are not easily accessible by metro |
| Other | I don't use the metrobus |
| Other | These categories of riders ride all the lines, even the ones going through more affluent areas. |
| Other | see previous answer |
| Other | If this budget is trying to support low-income riders, the proposed cuts are not achieving this goal. While reviewing the proposed cuts, I noticed that the majority of Maryland cuts were concentrated in Prince Georges County, where incomes are lower and tends to house more essential workers. Furthermore, the proposed cuts in Prince Georges County affect a larger percentage of riders who are no longer able to board at their stop. Often these redirect riders to the Metro service, forcing them to stop take Metrorail for a couple of stop to get to places that were previously covered by bus service (i.e PG Plaza). Metrorail is significantly more expensive than Metrobus, even to go one-to-two stops, plus when transferring from bus to rail you incur additional cost given the payment structure. Most people who are riding on these long bus rides aren't doing it for fun, they are doing it to save money because Metrorail is cost-prohibitive. By cutting bus services, you adding additional time waiting for connections onto what is already a very long commute for people. These proposed cuts do not provide adequate services for low-income areas, and further more will likely increase congestion on the roadways. |
| Other | I will be back to using bus every day by 2022 |
| Other | You should have more buses. |
| Other | Metro bus is my main way to get to work. Changing this would be a major issue for me. |
| Other | Won't use metro if not convenient and during regular work hours |
| Other | I agree with the idea, but if my service is cut I won't be happy. |
| Other | Just going to leave SW out in the cold, huh? |
| Other | We need to be expanding metro bus not only for essential workers and those without transportation but also to decrease the area's reliance on individual cars which negatively impact the environment. |
| Other | As long as the bus is still serving lower income communities or communities who heavily rely on service, then I think that's fine. |
| Other | Metrobus is so unreliable where we are - Garrett Park - that it's usually quicker just to walk the 30 minutes to White Flint or Grosvenor than to wait on the bus. This goes back to the service cuts in the Great Recession, which were never fully recapitalized. So, sure, cut away, make it harder for lower income folks to get around, put more cars on the road. Whatever. Might as well just shut the whole system down. |
| Other | It would work for me, but probably wouldn't for many low-income riders. |
| Other | I refuse to use Metro Bus service |
| Other | Definitely prioritize these |
| Other | This plan leaves many areas with no bus service at all. It is better to reduce frequency than to eliminate routes. |
| Other | It already takes a long wait to catch any bus. |
| Other | Buses are essential to my work and recreational travel. I do not drive. |
| Other | Please keep in mind the reduction of 50% may cause the remaining buses to be crowded. We don't know what the future hold in regard to this pandemic. People don't want to be crowded on buses regardless of vaccines. |
| Other | Why would you start to increase service in anticipation of more users going back to work and then cut service even more come January. Shortsighted and stupid. |
| Other | Why plan on going up from here only to drastically cut later? |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Why are we acting like we will still be in a pandemic in 2022? |
| Other | Id be interested in hearing more about what criteria are going to be considered in choosing what areas are going to have the most riders, and what levels of service will be needed essential workers. |
| Other | You cant reduce Metrobus service like this. |
| Other | It appears as though Metro will basically reduce or eliminate most bus service to northern VA. Why doesnt Metro just cancel ALL service to Virginia, because that is essentially what you are planning come January 2022. Very disappointing! |
| Other | Not sure how youd determine all this. Also, why would you not make a decision based on pre-pandemic numbers? |
| Other | I hope to be commuting by January 2022 and that requires having a viable and regular buses |
| Other | Should be 100%. |
| Other | Way too little service |
| Other | While I would not want to see Metrobus service cut, as long as the changes proposed would be designed to serve low-income communities and essential workers, then I can support this kind of plan to close the budget gap. |
| Other | Prioritizing low-income customers and essential workers is key |
| Other | It is simply crazy to take away bus service, even for those who are not low-income, because DC is trying to reduce cars and because a lot of the residents are senior citizens. Plus, there are several schools in our neighborhood and the busses that serve the neighborhood carry those students across town. |
| Other | Stop reducing services. Raise taxes if you need to. |
| Other | I usually take the Georgia Ave bus to Petworth and it was usually crowded pre-pandemic. I think that line needs more buses. |
| Other | Reducing bus service will negatively impact many individuals, regardless of efforts to focus on those most in need. This kind of means testing is not effective at capturing everyone who might be in need and will leave someone in the dark without a way to travel to the places they need to go. |
| Other | 50% of pre-pandemic service is far too infrequent for Metrobus to be useful. What a travesty. |
| Other | All the buses still need to be running cause again everybody doesnt drive and people still need to get to work |
| Other | The January 2022 service plan will significantly weaken the overall effectiveness of metrobus service throughout the system. |
| Other | Depends what routes are combined. A lot of people solely rely on bus access. |
| Other | I live close in. I will never get on a bus. This combined with metro changes will make platforms scary. |
| Other | The 46 bus is very important to essential staff and medical workers commuting to Suburban, NIH, and Walter Reed--please do not slow down service at this station! |
| Other | I am pleased that Metro considers prioritizing the needs of low income residents |
| Other | I need the bus for work and essential travel. This plan is very scary to me! The system needs better funding. This is very frightening. |
| Other | When you reduce service, youre going to reduce ridership even more |
| Other | Metro typically ignores the needs of the 18-line customers. |
| Other | Not sure how Shirlington -Pentagon bus route would be impacted |
| Other | You would be eliminating an already poor access to public transportation in our neighborhood. Closet metro station from home is 1.9 miles. Your plan would remove the bus that brings me there. The closest bus stop would be 1 mile away. Commute to work (6 miles in downtown) would take 1.5 hours. |
| Other | Metro bus is important for high schoolers |
| Other | The same people who most rely on public transportation are the ones who will be most affected by any changes when the pandemic returns. How is this major workforce supposed to get back to work once we are allowed to take our masks off if we cant even get to work |
| Other | Many low income people use metro. Most of the lines you want to cut are in those area. If your organization had a way to catch up with current trends you would have an increase in ridership. Offer competitive rates because sooner or later metro will be none existent if you cannot keep up with trends. |
| Other | I rely heavily on the M4 and D6 lines. These are essential for movement around the palisades, Kent and Spring valley neighborhoods. There is no other public transit option available. These must be maintained. |
| Other | It's crucial to keep service for those who depend on public transportation. |
| Other | Metro needs to have service for everyone |
| Other | All communities need public transportation |
| Other | I am expected to work in person starting March 15 and I rely on public transportation. Closing of it will not help in already hard situation! |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | ABSOLUTELY NOT. 50% service cuts right after things return to normal? This is sick and twisted. Stop proposing these draconian measures. The low ridership is directly correlated to the current pandemic, which will be over by 2022. Stop trying to run this like a for-profit enterprise and instead remember that you're a public service. |
| Other | In 2022 ridership will be back to normal. This is just silly. |
| Other | I'm essential in-person government staff and rely on the bus every single day. Further cuts to the lines I take would be super burdensome on my commute/getting to work |
| Other | this should include commuter and express busses. |
| Other | Absolutely not. I am disabled and I depend on the bus. Please restore the bus to full service. |
| Other | Please prioritize the Fairfax Connectors for this reason. |
| Other | I'm all for closing some stations if there's low ridership now, but in 2022 I expect things to be back to normal and those stations should be open |
| Other | The proposed service plan is 166 pages. Where is the executive summary? |
| Other | Once people return to work we need regular service not reduced. |
| Other | As most of us who witness Metros planning genius, this will probably not suffice |
| Other | Does not provide service in my area. |
| Other | Where the buses will go sounds fair and equitable. However, 50% seems low, especially in the winter. Having people wait outside at that time of year is rough. |
| Other | I live in Barnaby Woods. We would have no public transportation at all in our area with the changes proposed. Not only will this leave us with no public transportation, it will also leave students in our neighborhood without a way to get to Deal Middle School or Wilson High School, causing massive traffic on Nebraska Avenue and disrupting parents work schedules if they need to drop off and pick up their students. |
| Other | The service plan eliminates bus service for the Palisades, so that we cannot take the bus to Sibley Hospital, Georgetown Hospital, Dupont Circle area, or downtown. With no Metrorail service in this area, this will remove any public transportation for a large area. |
| Other | Although changing routes to drop the riders at metro stations doesn't make sense if you close 22 stations - so hopefully you're thinking this through holistically. |
| Other | By 50% do you mean you'd have twice as much time between buses, or you would cut half the routes? The latter is better. |
| Other | All of these plans should be suspended until after the pandemic ends |
| Other | The current routes don't serve a lot of pockets of DC. there's a lot of overlap between metro and bus routes |
| Other | No Alternative to getting into DC and Pentagon. You could decrease frequency, but, killing the line, which is Govt supported for government workers is just not right.No ALTERNATIVE??? Seriously? |
| Other | Any decrease of public transportation is disastrous for all the residents, especially ones who are economically disadvantaged and do not have the opportunity to have private transportation to go to their jobs. |
| Other | This probably wouldn't affect me but I think you need to be very careful about cutting bus services in locations that need it. |
| Other | Are the arts an important societal function? The Kennedy Center needs service for workers. |
| Other | It's very important to me that the most vulnerable in our community have access to safe and affordable public transit |
| Other | The combining of routes could make buses be crowded and will not allow riders to socially distance and would put a strain on essential staff such as myself to get to work and home safely. This would also be a barrier for riders who are not able to sustain alternate means of transportation due to financial strains caused by the pandemic. While I do understand that metro has had financial burdens due to pandemic I feel that combining routes will expose more riders to COVID 19. |
| Other | It already feels like metro doesn't care for the citizens of laurel as it is and now you're cutting the one bus that's never on time or if it shows up it's away?? That's not acceptable for my tax dollars!! |
| Other | It should be for all. Though I live in a zip code that has a high salary for most, personally I qualify for Section 8 housing and sometimes depend on the Metro transportation. Uber is expensive. |
| Other | I don't like the reduced service and some of the combined routes don't serve as many people. I do like the focus on low-income customers. |
| Other | Not applicable to my situation but I would support this proposed service plan because it favors essential workers and low-income customers who rely on Metrobus |
| Other | Pre-pandemic metrobus routes and options were excellent, please don't make changes. |
| Other | I have repeatedly tried to take the bus and had buses not show up (yes, even following the adjusted schedule) both in the middle of the day and at night. Can you really justify "reducing" service when you aren't providing it consistently in the first place? |
| Other | Ridership will never return to previous levels if the levels of service do not return to what they were pre-pandemic. The goal is to attract customers. Your message has gone from, Everyone should ride Metro to We're going to make Metro difficult to ride. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Same as above |
| Other | Prioritizing access for low income residents is important because they have few other options. |
| Other | Use smaller buses and serve more areas |
| Other | i am an essential worker and many of the people living my building at Virginia Square where i serve on the board are also essential workersTherefore closing both Virginia Square and clarendon is not wise |
| Other | Service needs to be provided in an equitable way and not skew priorities based on numbers of riders, and rather focus on access to transit. Metrobus should be considered as more than a means of transporting riders to Metrorail, which for many it is not. |
| Other | without specific bus lines mentioned here this is very vague |
| Other | Not sure where most riders are but this is about equity so a plan helping those most in need is good |
| Other | It's sad you're considering decimating service to the point where ONLY people with no other option use it. By maintaining a decent level of service for everyone, you'll be able to better serve the communities that rely on it most. |
| Other | Busses are already packed. Cutting service by 50% seems very untenable. |
| Other | If you dont provide adequate bus service dont think you are still going to collect metrorail fares, well use other options. |
| Other | These closures would significantly impact commuters and increase commute times. |
| Other | Metrobus should also be in areas that are not near MetroRail. A lot of people rely on bus to get to the train. |
| Other | We bought a condo in Clarendon near the metro station last year for our son who is in a wheelchair and works full time. The plan was for him to be able to use the metro to commute to and from work and other places. Having to take a bus to a metro station farther away would increase his commute time way too much to make that a feasible option. His life as a paraplegic is already time consuming. Post Covid he will not be working from home and will rely on this metro station. Do not close it |
| Other | How will you prioritize those who are essential workers? There is no plan proposed to accommodate these changes. |
| Other | If routes have to be cut please make sure its easy and quick to get to my destination. Especially northern virginia make this a dependable experience with not too much waiting. |
| Other | Stop spending on marketing. Spend on as a structure |
| Other | Any cuts to our metro bus or metro rail system will disproportionately affect our low-income and Black and Latinx DC community. This plan to cut access by 50% is an unjust and cruel response to a devastating pandemic that has already disproportionately affected these communities. |
| Other | How can 3 bullets summarize 166 pages???? |
| Other | Would this option be re-evaluated if the pandemic affect lessened? |
| Other | Make sure those buses are taking people to metro stations. |
| Other | This would devastate our lives. We would have to buy a car because we rely on the bus for the vast majority of our transportation needs. |
| Other | Esta situacion no es adecuada, por que se le debe dar fluidez a la trasnportacion del distrito |
| Other | We take public transportation to reduce our carbon footprint |
| Other | Some of the areas are having all routes eliminated from them. That would make it impossible to commute from home to metro and back entirely |
| Other | All the groups named need universal metro bus service! |
| Other | While I don't fit in any of those categories, driving into downtown DC would not suffice due to limited space with all workers returning pre-pandemic levels, thus not able to go to work and contribute to DC's economy. |
| Other | I expect that in january 2022 service should be back to full operations and people will be needing to get to work and other locations. |
| Other | Priorities seem good |
| Other | No reduction in services. |
| Other | â€œbuses in Virginia are vital links in my local neighborhoods. I am on disability so have not ridden in 2 years per earlier survey question but hope to get back to work after pandemic and bus usage important |
| Other | Strongly prefer prioritizing low income/essential workers in this decision. (Not ideal for me, but they need it much more) |
| Other | Im very concerned about reducing service. My understanding is that frequent, timely service leads to the best usage of the system. Reducing service may further erode the amount of people using the system. |
| Other | These are unacceptable cuts to service. Implementing these cuts will force me to seek alternative transportation options. |
| Other | Should also prioritize densely populated areas without Metrorail service or steep cuts in Metrorail service. |
| Other | Im glad that low-income customers and essential workers are being considered here. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Reducing to 50% capacity will cause the buses to become overcrowded and make it difficult for people to get to work. This would make it difficult for me to get to work and school |
| Other | Perhaps Department of Defense workers should be considered essential. Many of us traveled to the Pentagon throughout the Pandemic. |
| Other | As much as we rely on metro rail, metro bus service is overwhelming used by people underserved by rail Or economically disadvantaged people. |
| Other | We cannot cut bus lines as someone relies on each line. Bus ridership has been higher than metro during pandemic and we have to assume it will continue. We cannot cut services when ridership will increase |
| Other | The proposal to eliminate the D4 route is unacceptable. It completely eliminates the primary mode of public transportation through Trinidad. And with the additional planned elimination of the D8 route, Trinidad residents will have no immediately available public transportation. |
| Other | I support your plan |
| Other | Both metrobus lines within a mile of me would be eliminated. There is not even Arlington Rapid Transit (ART) buses in a one mile walk of my house. |
| Other | I cant tell what the frequency will be of the buses that I use at the times that I use them. While a minor reduction in service times is ok, once every hour is not!! |
| Other | This decreases the necessary number and frequency of bus routes far too much. |
| Other | So you are OK to cut out students who take the bus to school? Is that because they can't vote? And how in the works are you planning to measure which routes will have the most use post pandemic before we are actually post pandemic. You need to look at pre pandemic. That is simply ridiculous. |
| Other | This drastic cut to bus service will greatly impact low-income people, no matter how hard you try not to |
| Other | Cutting public bus or metro service is a downward spiral. As service reduces and become more unreliable, people look for alternatives that reduce ridership. We should be looking to strengthen the system, but weakening it |
| Other | Don't forget workers with disabilities who cannot drive |
| Other | Stop reducing service! You are harming people! |
| Other | I think generally yes, supporting those people is crucial but the it is also necessary for students to be able to get to school so if there is a way to support both, then that would be ideal. |
| Other | Please keep metro station at Grosvenor-Strathmore. One way to satisfy need to have metro bus and metro rail station nearby. |
| Other | Buses with service to metros is crucial. While I understand prioritizing routes that are most used, routes with reduced service would be better used if the service was increased. |
| Other | Buses in many areas are already full during peak hours and have had to leave passengers behind. |
| Other | I think my routes would be okay, but I want our city to expand bus service. |
| Other | I dont think the proposed reductions would affect the routes I use. |
| Other | This would eliminate the most convenient bus route for me to take to work, but that might be okay if the Metro rail stations near me dont close. I hope Metro will consider which bus routes and rail stations you close, so there is still at least one or the other option in each place where you offer service now. |
| Other | We need to make sure kids and teachers can get to school as well. |
| Other | You need to make sure you aren't unnecessarily harming low income communities with no access to a personal vehicle. Service reductions do that, and it isn't fair. |
| Other | Not a plan designed to help bus riders. |
| Other | With potential increased traffic and less rail, need faster and more reliable bus |
| Other | I want the buses to continue to be on time & get me to work on time. |
| Other | Concern is overcrowding with the groups listed as the masking is ineffective with overcrowded buses |
| Other | Im an essential worker living in Van Ness and working in Tenleytown and I worry about whether my area has enough essential workers and current riders to maintain service. |
| Other | This is confusing. The previous page seems to plan for adjusting to residents going back to work, but the 2022 plan seems to go an entirely different direction to reduce accessibility permanently. This is not ok. |
| Other | Devils in the details. Normally when you make. Changes the service gets worse. |
| Other | Bus service is already pathetically limited for such a densely populated, extremely wealthy metropolitan area. If youre going to cut it by 50%, why pretend to even have a bus service? |
| Other | See previous comment. |
| Other | Im not low income but I dont have a car and I rely on metrobus for essential travel. By forcing me on to Uber or whatever, thats draining money out of the system |
| Other | Makes no sense to reduce service in 2022 just as the region is recovering from COVID |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | This reduction would hurt essential workers the most, and the reduction in frequency would dramatically limit the usability of the system. |
| Other | Please provide transit to Dulles Airport. |
| Other | That seems to make sense, but I'd rather you raise additional revenue to keep those services. |
| Other | With infrequent service buses MUST be trackable via smartphone app. Your bus tracking system frequently fails. |
| Other | Looking at the MD changes alone - this cuts off entirely communities that have only a single bus route, eliminates service to the biggest university, and many people who still are served at all would be facing multi-hour commutes each way. This will kill people. People will lose jobs, lose homes, lose families. |
| Other | I appreciate metros prioritization of essential workers and low-income riders. |
| Other | Reducing service in 2022 would be counter productive. More people will be out and about in 2022 so reducing to 50% of pre-pandemic service is a short sighted response to the problems experienced in 2020. |
| Other | To close Metro stations on the Silver Line that haven't even been opened eliminates any possibility of driving ridership and most affects low-income workers and families who are living in the Virginia suburbs northwest of Fairfax and eastern Loudoun. |
| Other | Like many in my neighborhood, I am elderly, on a limited budget, and not comfortable driving most places. I need to get to the doctor and dentist as well as church. I volunteer for essential services and would have to quit that. My husband is increasingly disabled and was counting on riding the bus now that we have been vaccinated. My senior years would, frankly, be blighted. |
| Other | Try it. See how it works. |
| Other | As noted, the general measure of this seems stark and desperate, reasonably well thought out, knowing that there are extreme measures needed, but difficult for many. Luck to us all. |
| Other | No. Metrobus covers more of the city and provides more connections than the metrorail due to limitations in station locations. It is not acceptable to reduce Metrobus service if we want to provide equitable transportation options to all and especially those with lower socioeconomic resources and if we are going to meet our sustainability goals and reduce the impact of climate change on our region. If we want to meet our sustainability goals and vision zero goals we must incentivize alternative modes of transportation and disincentivize car use. This plan shows a lack of prioritization, a lack of courage, and a lack of leadership on the part of all DCs leaders. |
| Other | combining bus svc makes sense, but cutting lines would once again hurt the people who could least afford it. instead of cutting lines, reduce the # of stops by 1/2 |
| Other | The more you cut service, the more you cut ridership and encourage people to use Uber and Lyft. |
| Other | When I am able to move into my home, I will not be able to utilize public transit. |
| Other | The woman who cleans our house couldn't get to us |
| Other | Combining the Pentagon City and pentagon routes will lengthen travel times significantly introducing the pentagon route buses to more congested roads that will likely increase bus delays. |
| Other | My children would not be able to get to school safely. They rely on the M4 for transportation to Deal. |
| Other | Ridership will be increasing as the Pandemic risk improves. This plan cuts public transportation right when people would be returning to work! Bad idea. |
| Other | i think you should at least consider pre-pandemic as a factor in how ridership could increase again. |
| Other | There are currently no planned bus routes from VA to DC or MD... so my only option would be to ride the metro, but my station is also proposed to be closed so I'd have to walk a half mile each way rain, shine, snow, etc. which does not seem to be the best with these time frames seemingly being when employers will start to have employees back in the office. |
| Other | While I appreciate the equity focus. We should not have to accept this draconian budget. Metro should avoid all cuts thanks to the new federal emergency funding of \$30.5 billion nationwide. Any other shortfall should be met by the states of VA, MD, DC and local jurisdictions. Post-pandemic, with increased telecommuting might allow for shift of some peak hour rail and bus service to off peak, evening and weekends AND ensure we address equity in accessibility, which would help workers who don't have 9 to 5 office and help car free and car light households. |
| Other | That sounds awful. I thought the purpose of the 2021 plan was to get back to better service. Not cutting things to 50%. I don't see how this would help low income customers and essential workers. |
| Other | restructuring routes to cover as many stops as possible is counterproductive. some these routes have been running like they are for 100 years. people know where they go now! don't make the remaining routes unusable. run good service on existing routes. |
| Other | This plan is destined to fail. Return the bus routes to prepandemic levels no later than September 2021. |
| Other | Yes! |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Implementing these changes would affect riders, and we wont be on a state of pandemic forever, Metro will not restore these immediately or restore them at all, when things go back to normal |
| Other | Cutting Metrobus access to Chevy Chase (e.g., M4) isolates the neighborhood from Metro and downtown access. With these bus cuts, it would be inconvenient to use public transit to get to the office downtown and I would likely switch to driving. |
| Other | Decrease significantly is a bad move |
| Other | I would have to see the plans for how Metrobus would identify which low-income areas to focus on. Its not acceptable to only do 50 percent capacity service for the primary public transit system in a major city. |
| Other | Why would the service increase in 2021 to then scale back in 2022? |
| Other | need more frequencies and service for essential workers. |
| Other | Harder for me to get to work |
| Other | The groups prioritized seem fair. I would add students in 6-12 - reduce pressure on school bus systems and allow more flexibility for participation in extracurricular activities |
| Other | #1 protect the drivers, get them on vaccine priority list. I would hope that by Jan. 2022 the whole DMV will be up and running again. Get Biden to give us the money to use this down ridership time to totally revamp Metro - no more diesel buses, safety improvements on the Metro rail. WMATA recovery is closely linked to vaccine distribution and income necessity. Curtailing service will impact economic recovery, community vibrancy and real estate development. But those who can afford it will use Uber and drive/parking lots or work from home or a combination (drive/e-scooter) until it is safe to ride again. |
| Other | I will need to start going back to work every day. How am I supposed to do that if metro cuts all the bus lines. What WMATA is describing is the collapse of public transportation in the region. I dont have a car. How am I supposed to live here. |
| Other | Metrobus should be made accessible to people of all walks of life. If it is limited to low-income customers, there will be strong declines in usage from individuals who are not low-income, and those individuals will be more reliant on personal vehicles. |
| Other | Who can possibly know what their travel plans will be in Jan 2022? That is a silly question to ask; last year at this time one would not have predicted the pandemic. At this time, we cannot predict its end. |
| Other | Too much mess to be transferred. But some people need more the bus than others and its fair to prioritize. |
| Other | Very few riders on D6 buses - Sibley has a shuttle to/from the Tenleytown metro so most use that or AU buses which travel back and forth on Nebraska & Loughboro Rds. |
| Other | Does not make sense to cut off service to low use areas, because they are most likely to be underserved by other transit options. |
| Other | 50% reduction is way too big. How will people rely on such limited service to get to work? |
| Other | But Metrobus will need substantial public funding if its to be a service focused on those who cannot afford cars, rather than also a service attractive to those who have cars, but prefer public transit, either for greater convenience (no need to find parking, can read or write while traveling), or to decrease carbon footprint, or both. Metro needs to attract both riderships (and tourists, too) if it is to be long-term sustainable. |
| Other | This plan would eliminate all metrobus service to our community. It would cause leave many commuters without a mass transit option, more commuters to drive into work (bad for the environment and traffic congestion), and decrease property values in our neighborhood. |
| Other | While the plan is not applicable to me because I am not an essential worker and use the metro not metro bus as my primary transportation, focusing on serving frontline workers and communities that rely exclusively on the metrobus seems appropriate. |
| Other | Access and frequency are my concerns. |
| Other | As long as kids can still get to school since there are no other options when parents work (i.e., no school buses) |
| Other | My wife relies on metro bus to get to work, which picks up in front of our house. A cut in service would make her commute more difficult, especially to time up with dropping or picking up kids from daycare |
| Other | Full support for focusing on populations that rely on metrobus |
| Other | I live next to a station that is proposed to be closed. Having a reduced metro bus would make it even more timely to get to another stat that is open. |
| Other | Why the hell would you reduce service to 50% of pre-pandemic levels? Again, MORE BUSES, MORE SERVICE, MORE DEDICATED BUS LANES. NO SERVICE CUTS. |
| Other | No service along washington Blvd through Westover |
| Other | This needs more service to help people to get their destination for the people in the community. |
| Other | Bus service should not be reduced once the peak of the pandemic has passed. That would cripple the recovery of Metros ridership and the region as a whole. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Given these priorities this is fine to me. I don't take the bus frequently and am only taking this survey to vote against plans that would disproportionately inconvenience low income riders |
| Other | Yes. This plan emphasizes equity. |
| Other | Unclear how you have determined 1/22 ridership needs given the pandemic and changes likely to occur with community vaccination. |
| Other | Again, cutting public transportation permanently for a hopefully temporary problem is nuts. |
| Other | I require elaboration on this. I have not seen WMATA actively prioritize the groups it mentions here in the past: low-income and essential workers. Most of the city's transportation decisions are made in adjustment with gentrification, not with the residents that have already been here for years. I had zero faith that WMATA will prioritize the groups mentioned as it has never in the past. |
| Other | Public bus service needs to be provided for all, especially those taking the bus |
| Other | If someone is an essential worker it's likely they are not going to be able to navigate downloading a PDF file and understanding what this plan means for this reason I am selecting not sure. |
| Other | The goals of this plan are good but a 50% reduction is too much. 75% is better. |
| Other | See my earlier comment |
| Other | Bus service is critical to get around the city, more so than metrorail. Bus should be given priority as it serves neighborhoods. |
| Other | Need more buses not fewer |
| Other | This proposal prioritizes groups that require regular access to public transportation to commute to their essential jobs. |
| Other | Many people will be returning to the office in January 2022 and will require more bus transportation |
| Other | Ill just drive more if I cant take the bus. |
| Other | This eliminates all of the lines I used to use when commuting as backup when Metrorail has issues. |
| Other | I can get around with other modes of transport if I have to. I am more concerned about low-income customers who rely on Metrobus for travel to medical appointments, to shop for groceries, and for other essential purposes and essential workers, including those with jobs in healthcare, food service, social services, and other important societal functions. |
| Other | How will reducing service when many who have been remotely working are likely to return to work help the situation? |
| Other | It is ok to redesign the network, but not cut so much service |
| Other | You would be eliminating the routes that I use the most often for commuting. |
| Other | I would no longer have access to Metrobus. |
| Other | It sounds like Metrobus service will be so poor that it will not matter if it gets cut 50%. I am unlikely to return to riding Metrobus given its current state. |
| Other | I do not see any buses crossing from VA to DC. If there are issues on Metro, there is no way from residents to get back and forth between the jurisdictions. |
| Other | Don't cut rail and increase bus, that's stupid. |
| Other | M6 service is the last available service in our area. Fairfax Village. The V5 has already been cut. How will I get to work |
| Other | It will work for our needs if/when we begin to take bus and subway again. Service is adequate for seniors in our immediate area and for Takoma DC, Brightwood. Im not sure if new residents of Parks DC senior housing will be served by bus service under this plan -- dont know the route number which goes there. |
| Other | While I like focusing on the three areas you have said, I think tough to talk about cuts when we are essentially still in a pandemic and we need to have as much as possible in place to help with our recovery. |
| Other | Eliminating the only bus line serving Foxhall and Palisades neighborhoods affects thr school commute to/from the in-boundary elementary and middle school as well as employees commute to/from downtown offices. |
| Other | Please increase the frequency of services instead of cutting it. |
| Other | The detailed plan does not address how metro proposes to prioritize low income and essential workers. Please let us know what you have actually done to ensure cuts do not disproportionately affect the most vulnerable. |
| Other | Once again by January 2022 we will all be dead or the pandemic will be over. If you needed to save money you should have adapted to the pandemic last year |
| Other | The metro bus system does not deserve the monicker "œsystem" because it is irregular, never on time, and a total abomination. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | The only proven way to ensure continued (and increased) mass transit ridership is to maintain regular, predictable service through neighborhoods that are not otherwise served. Rider lost through service cuts are riders lost forever, as people will inevitably work out alternate means to get to the places they need to go. And since you will be teaching residents how to do without mass transit, you will be cutting yourselves off from a revenue stream for years to come. I appreciate the impulse to concentrate on low-income customers who do not have access to the same set of alternatives that wealthier residents do. But to serve the one at the expense of the other does a disservice to the ideals of mass transportation - reducing traffic congestion, easing the environmental impact of city living, and providing transportation options to all of the areas residents. |
| Other | Way too drastic - many of us depend on buses to get to our jobs and shopping. |
| Other | Not enough information easily available |
| Other | Bus routes needed to get children to school when schools reopen and access to metro |
| Other | Bus lines that do not meet a threshold of ridership should be converted to on demand service. |
| Other | Any reduction in bus service is unacceptable |
| Other | This is curtailing my sole bus route to my work, with out a replacement. You have not presented the trade offs in a fair, transparent manner, my commute might increase by 50-69 percent. |
| Other | The plan should prioritize service to low income commuters and essential workers. |
| Other | My home is close to the metro station and doesn't have metro bus station close to me. |
| Other | I dont see any exceptions to the options regarding peak hoursTwo different answers for me |
| Other | You shouldn't reduce any transportation |
| Other | If you can accurately identify and service the areas above, then that is very good. I think it sounds ambitious and could possibly be very difficult to do adequately. |
| Other | I think you need to be very careful with cuts to bus service. This is a lifeline for so many people. |
| Other | Middle and high school students need to be among the priority groups. Parents (including single parents like me) made school choices based on our teenagers abilities to get themselves around the city--were not able to rearrange our work lives to drive them to schools that arent in walking distance. Buses going to schools were frequently very crowded pre-pandemic--it seems like to maintain safety when schools reopen, we will need an increase rather than decrease in service. |
| Other | Sometimes during the day, like evening and weekends, parking is free. Thats unwise. Parking should never be free. You could offer reduced rates, but never free. Reconsider that. If people park at a Metrorail station, then they should pay something. You are losing lots of money with free parking. I know people who go back and get their car and drive out during the free times. I do not know how common that is, but even if only a few people did that, thats a lot of money you are losing. |
| Other | Almost perfect. You forgot the kids. There are a lot of kids relying on metrobus to get to school and the next available options are so much more expensive and inaccessible to a lot of families. Its hard for parents to drive kids in and back from school every day especially for Charter schools or magnet schools which take a lot longer to get to. |
| Other | Too much reduction in service. |
| Other | The focus should be on serving low income riders, but reducing service by 50% is extreme. Busses were crowded enough already prepandemic and this will be when more people are commuting. And for those who are not yet vaccinated, reducing service will make bus travel more dangerous |
| Other | Concerned about maintaining service to lower income riders city wide. |
| Other | I feel as if this will all result in an unfortunate no-win situation for commuters. |
| Other | possibly |
| Other | How do you decide low income? The only reason we can live where we are is with 4 working-adults in the house. We cannot even afford a dog, much less kids. To assume we do not need the bus, as sparse, unreliable, and inconvenient as it is, is presumptuous. |
| Other | Cutting Metro rail service and reducing bus service to 50% of pre-pandemic levels is UNACCEPTABLE and would greatly impact the workforce |
| Other | This depends whether bus service would also be affected near routes where there are proposed closings to stations. There will be increased bus traffic if stations are closed and therefore they will probably need more bus support not less. |
| Other | Focus on low income! |
| Other | Good way to realize operational efficiencies |
| Other | If we're not considering the pandemics impact on WMATA service as a whole, then these cuts would essentially gut public transit in the DMV area indefinitely. The pandemic of course needs to be accounted for in helping to shore up our public transit with subsidies or even slightly higher fares. Everything should be considered from a pre-pandemic perspective. As well, only considering those who are low income or essential leaves out a huge portion of the populous who rely on public transit anyway leading to less ridership as a result. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | How do you select who rides the bus? What demographic data is WMATA using to determine where essential workers work or live? And if there is no service, obviously there will be less riders. WMATA's logic makes no sense, sorry. |
| Other | Bus service is already too infrequent and with too many stops which makes travel by bus too time consuming. |
| Other | Ok, fine |
| Other | The plan provides an insufficient above-ground travel network for a city like Washington, DC. |
| Other | Plan should also prioritize students commuting to school. Buses should be available to people who live more than a mile from a metro station to get to the metro. |
| Other | This would negatively impact so many service workers in our area. It would also reduce teens' ability to travel without driving. |
| Other | 50% is a big number. A quarter of pre-pandemic levels should be the first phase, then reevaluated to reduce by another quarter. |
| Other | I appreciate the emphasis on maintaining service for low income riders and essential workers. I hope that the MetroRail proposal decision bears this in mind as well. |
| Other | Pre-pandemic service is needed when life returns to normal! |
| Other | We need to get people out of their cars and in to mass transit. |
| Other | While not the worst of your ideas, this is not great either. I understand funding is a problem, but this is not the solution. I will be writing to my representative to fix this. Most riders in Jan. 2022 is not an accurate representation of who these stations serve. Keep your numbers focused pre-pandemic. |
| Other | this plan would be problematic upon return to work. |
| Other | Metro needs to reimplement normal service levels as quickly as possible by January, as most people are expected to be vaccinated at this time. It seems strange to continue focusing on essential workers when most people will be back commuting to work and traveling throughout the day. |
| Other | So many routes would be eliminated, including my route. Please consider handing over routes to other local operators who would be willing to run them (ART, Fairfax Connector, etc) as these are essential public services. It's two faced of WMATA to propose green; initiatives when these cutbacks would encourage many lower income persons to purchase cars (inevitably more polluting ones) as their bus routes are being reduced or eliminated and there would inevitably also be people who would lose their jobs as they couldn't get to work anymore. |
| Other | This is not considering pre-pandemic ridership, shouldn't there be a comparison at least. |
| Other | I cannot tell from this description whether my bus line will be affected. |
| Other | I don't think it's reasonable to assume 50% of pre-pandemic ridership levels as of January 2022, so this service will leave out many returning commuters, including myself. |
| Other | It looks like the Lee Highway lines would be eliminated. They are needed by commuters. |
| Other | Once again, your plans re-engineering transit service to inconvenience and force feed bus riders into and onto the metro rail system, if they are able to get there. |
| Other | WMATA claims to care for its customers, yet the entire 2020-2022 approach is deliberately accelerates the growing inequity towards the Low-income customers who rely on Metrobus for travel to medical appointments, to shop for groceries, and for other essential purposes including work! |
| Other | Metrobus should return to 100% of pre-pandemic service. People still need to get around. |
| Other | The proposed elimination of the portion of the M4 bus line covering Pinehurst Circle, Utah Avenue, etc. in the second half of FY 22 will pose a significant problem for Deal and Wilson students who live in Hawthorne and Barnaby Woods. My two DCPS students, who live ~2.5 miles from their respective schools, will be significantly impacted and will have no viable public transportation option for getting to school under this proposal despite DCPS's reliance on public transportation as a rationale for not providing routine transportation to and from school for DCPS students. (https://dcps.dc.gov/sites/default/files/dc/sites/dcps/publication/attachments/Student%20Transportation%20Policy%202017.pdf - section II(A)) |
| Other | that is far too many cuts |
| Other | MetroBus service in the suburbs is just barely adequate as it is. Any cuts at all make it entirely impractical to get around without a car. |
| Other | I live in Eckington and do not own a car so I rely on public transportation. However, I am also working from home so have not had to use public transportation much during the pandemic. That would change once we are back in our offices again. |
| Other | If the goal is efficiency and the routes are simplified with a focus on working class folks then I would be in support of this. Matching bus schedules with metro schedules is crucial. |
| Other | No comments |
| Other | This is an imposition for me, but it sounds fair as it benefits those in greatest need. |
| Other | It depends on the area that metro is looking to reduce service. |
| Other | Combined with the metro changes, this severely impacts my ability to get around the city |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | I understand there is budget concerns, but cutting bus lines is ridiculous if the idea is to reduce traffic in the city - people tend to drive more when public transportation is unreliable. We need to keep the bus routes available in all areas of the city to encourage participation in WMATA |
| Other | While it was understandable, the back door boarding put a huge dent in revenue. That said, if more business picks up in the next few months, a reduction in service would not be helpful. |
| Other | The plan eliminates all bus service to my neighborhood. I would not have a convenient way to get to my office in DC without buying another car and driving to a Metrorail station everyday. The loss of bus service in the neighborhood will also decrease my property value. The bus line is one of the reasons we bought our home. 2022 service cannot be planned based on ridership levels during the pandemic since they will not be comparable. |
| Other | Way over time coming! But sounds ridiculous to do this in 2022...just as people are coming back to full work. Start this NOW while people are already out and reengineering their own processes as they figure out how to deal with new realities. |
| Other | Cutting service by 50% is absolutely unacceptable |
| Other | Would metrorail be limited to every 30min? :(|
| Other | I do not understand how this plan supports low income people. |
| Other | Support the points of emphasis but not the 50% service level |
| Other | low income, night shift, health care, societal services should be prioritized for bus routes |
| Other | For the same reason laid out in the previous comment section. |
| Other | I appreciate that you are targeting service cuts to people who need it most, and urge you to continue to consider low income and less mobile DMV residents when you make your service decisions. However, the solution to Metros trouble in this instance (and all others) isnt to cut service to Washingtonians who need it- its to get more money from the state and federal agencies that are currently treating this public good like it is disposable. |
| Other | I have to consider the bus line cancellations in light of the rail station closures proposal. If my closest station is closed, then I have to rely on the bus. If the bus line is also canceled, then I have no means of commuting, and I will not longer be paying in to the Metro system. That said, I agree with the plan to prioritize bus service to low-income commuters (assuming that other commuters can take advantage of rail service). |
| Other | Sounds fair |
| Other | Great idea |
| Other | I don't if these plans include my bus stop. Busses into the Pentagon should be prioritized. |
| Other | Long term, do not fall into the trap of making public transportation uncool. Our environment needs us to embrace public transportation widely, even if parts of society can afford alternatives. Public transportation is also a way of making cities vibrant and successful and safeâ€”avoiding drunk driving and keeping nights safe for women. |
| other | See comments to previous question. |
| other | Your proposal takes away the bus route from Tenleytown metro to Sibley Hospital. |
| Other | My children used to the bus on a daily basis |
| Other | This language goes against your plan at https://wmata.com/initiatives/budget/ which favors elimination of a number of bus routes in low-income neighborhoods. |
| Other | As soon as the pandemic eases up I plan to return to riding the bus much more than now. I hope that will ease up by January 2022. |
| Other | I am very concerned that there will be no direct service from Fairfax/Burke/GMU area to the Pentagon. |
| Other | that is like having no service |
| Other | Given climate change, transit options should be expanding, not reducing so as to make them unattractive options. I take the bus everywhere because it is reliable and convenient. Cutting it by 50% would make it impossible to rely on. |
| Other | I want it works both because I go to work |
| Other | I like focusing on low-income customers and essential workers. I would also want the metrobus to focus on routes that do not have metro alternatives, for example logan circle to dupont circle. |
| Other | This is making it very convoluted to get around as well as much longer waits. |
| Other | If they are so Low Income --- why arent they shopping while people are at work. All those electric scooters are ridiculous |
| Other | Not having service on the Brock Line will hurt me financially. I work in DC and I depend on the bus and train to get to work. I am new to this area and the only reason I brought a house here is because of the bus service. |
| Other | Not applicable |
| Other | Im always a fan of buses that take you to a metrorail station, because I can get to my destination faster if my trip includes segments that include metrorailing. |
| Other | My new work location in Ballston is not conducive to taking Metrobus to the Pentagon. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Reducing service would severely impact my ability to use the bus for commuting |
| Other | I don't trust Metro to run enough busses on combined lines |
| Other | YOU ARE PROPOSING TO ELIMINATE THE BUS LINE I TAKE TO WORK WHICH IS ALWAYS CROWDED DURING RUSH HOUR DURING THE WORK WEEK. |
| Other | Reduction of metrobus always seems risky especially given the demographics of who primarily rides them. Focusing on low-income customer and essential workers is essential, but I think any service cuts would still definitely harm these groups whether or not the focus of the remaining routes was on them. |
| Other | I am glad the plan would focus on low income and essential workers. However, those areas that have "most ridership" should also be assessed based on a pre pandemic levels as Jan 2022 will likely be closer to that than pandemic levels. |
| Other | I support the groups targeted for service. However I would also need to use the bus to commute to the office (same as pre-pandemic) |
| Other | I appreciate the focus on providing service to low income and essential workers. |
| Other | Metro needs to stop being so effing racist |
| Other | Many of the Metrobus routes I have relied on during my life would be cut in with these proposed service changes. I have already lost all Metrobus service to my home in two previous rounds of service cuts, and this would further reduce all possibility for me to use Metrobus. |
| Other | METRO is a service to the citizens of this area. However, it must have sufficient revenue to operate. That revenue can come from either increased ridership: support from the Federal, State and local governments; or reduced service. THERE IS NO FREE LUNCH |
| Other | Again; I rely fully on metro rail and metro bus for ALL transportation"to and from work; to medical appointments and errands; etc. Customers fully reliant on metro include not only people who can't afford a vehicle but also those of us all over all areas of the DC metro who cannot drive due to medical issues and disabilities; and many of us are such that we don't need or qualify for metro access but are also unable to drive so we depend entirely on trains and buses |
| Other | 50% is too much of a reduction. |
| Other | There are a lot of commuters with multiple forms of employment. Long term changes should not be implemented as a result of a pandemic which is likely to abate after mass vaccination and better preventive measures. |
| Other | How about actually cleaning the metro cars more frequently. It is always disgusting that would actually benefit us all. Thank you. |
| Other | Im concerned about people who rely on bus service losing the service that they need. |
| Other | Although this would probably meet my needs, this reduction in service should be avoided if at all possible. Metro is a critical component to equitable economic growth region wide and cuts in service would disproportionately affect low-income workers. Metro is a public good and should not be run like a business. Although I understand if no further subsidy comes from Congress cuts might be necessary, please keep fighting. |
| Other | I dont have a car. Eliminating routes that I use, especially in Virginia, could force me to get a care and eliminate all use of the Metro system. |
| Other | I am not sure why it would not be based on pre-pandemic ridership, since this would be a picture of the scale of economic activity that ridership supports. I do support focus on low-income residents, as they are less likely to be able to use uber or lyft, but many of us cannot budget uber/lyft as ways to get around. All DC residents, especially those at the lowest income levels, need to be able to get to/from work, to/from shopping, doctors AND from friends/entertainment. |
| Other | One of the most attractive features of the Virginia, Washington, Maryland area was it's public transportation. Plans to make the DC area less accessible post pandemic are not in the public's best interest. |
| Other | I support the priority of offering service. Pre-pandemic, I was a relatively infrequent Metrobus rider (about once a month), but every route I normally take is scheduled to not operate in 2022, so I will definitely not be a Metrobus rider in the future under this plan. |
| Other | Reducing bus service would be a disaster. Buses are already infrequent, and this proposal would harm accessibility for the largely low-wage, Black and Brown ridership. How does WMATA expect to target cuts to preserve routes for low-income riders and essential workers? These groups live in every part of the service area, and have travel needs that take them across the DMV! If you want more traffic and greenhouse gas emissions, and less opportunity, accessibility, and mobility for low-income households, cut bus service. |
| Other | I agree with your prioritized categories. I hope you will also coordinate with any changes in metrorail service, for example if you close certain stations please make sure you maintain bus alternatives along that route. It is hard to answer this question definitively because like many people I do not yet know what my work/ commute/ public time will look like in January 2022. |
| Other | For the environment and for the people, buses should be bolstered instead of cut. Theyre easier to get than rail, easier to get to, and usually are closer to home/where were going. Wealthier people have more options, so please dont remove service from the bottom. |
| Other | Working to coordinate schedules between redundant or semi-redundant bus routes sounds like a great idea. For me personally, I would not be negatively impacted by the reduced service, but it does seem like it could be a hardship for a lot of people. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | How can you know where low income riders live? Cut the police funding and save public transport |
| Other | Im glad this plan focuses on people for whom buses may be their most common mode of transportation. |
| Other | Acceptable as long as this Metrobus plan focuses on providing service to Low-income customers who rely on Metrobus is taken very seriously |
| Other | If there were more express services at rush hours- I think you could alleviate some costs and overcrowding. |
| Other | Its important to provide service for low-income customers and essential workers, but Metrobus should also strive to become a preferred transportation option for all--serve areas/distances not served by rail. Long-term success and support of Metrobus requires that it become a desirable option for all. |
| Other | Combining routes in certain neighborhoods that are populated heavily with the elderly is not the best judgment. Please take their needs and income to consideration. |
| Other | By 2022, the worst stages of the pandemic will be history in the United States. Our transit system in DC should reflect that. |
| Other | At this point, Im working from home as my employer has shut down our DC office because of the COVID-19 pandemic). Once life gets back to normal (when the pandemic is over), whenever that is, employees in my office are likely to be expected to go into the office again, so while a schedule like this may work now (i.e., in 2021 while the pandemic is still going on), its not likely to work once the pandemic is over and other workers like me go back to working in the office. |
| Other | How do we know where the majority of essential workers live - or their commuting patterns? This seems bound to benefit only popular areas and while its written that lower income neighborhoods will be prioritized, this is not something thats worked well in WMATAs history. Whats to guarantee that this will be equitable and accessible? Schedule cuts are *not* the answer to rebuilding goodwill, even with promises of equity. |
| Other | Metro should be increasing service, not reducing service. |
| Other | Jan 2022 will see an INCREASE in ridership, not a reduction. Horrible idea to cut service if youre trying to win back customers. |
| Other | I rely on buses to get across the city. Less frequent service means I would probably not be able to use the bus. |
| Other | I especially like that this takes into account prioritizing customers who most rely on the bus for all aspects of life - not just the daily commuters. Thank you |
| Other | Reducing bus service that much would significantly hurt me, my community, and my students. We all rely on the bus to get to work and school. Pre-pandemic rush hour busses were packed full with no space to sit or stand (which of note increased sexual harassment). Having 50% service we won't all fit. People will have to wait too long. |
| Other | 50% of pre-pandemic level is low. I think the important thing here is keeping in mind the low-income and essential workers who rely on the bus to get around. Thats the most important thing. |
| Other | We have one bus line near our house, and its on the list for termination. That would make it very difficult for us and our neighbors, many of whom are lower-income or seniors, to get to the grocery store, work, and the metro. |
| Other | This would be a major bummer and make me much less likely to take public transportation overall. |
| Other | Sorry, but they are a lot of homeless people in the buses and stations during the pandemic. It is a health hazard and safety issue. |
| Other | I dont like that the service would get further reduced |
| Other | Before closing, I know that metro budget is very large but terribly mismanaged because of politics AND corruption. First, clean the swamp, appoint efficient, honest and knowledgeable people to manage the system and learn from how efficient services are offered in other countries (Paris, Brussels, Canada, London etc.) If they can provide an adequate service to the population, Washington area should be able to do the same. Instead, we feel like an area in a third world, undeveloped country. This is so shameful - all because of jerks and politicians who are not in touch with the mass. |
| Other | Please do not do this - the proposed route changes and eliminations would make commuting to and from work, appointments, and other necessary travel impossible. |
| Other | This splits some of the buses that I take and Id have to transfer to a new bus instead of being able to only take one bus to my destination. There are also no buses going over the Potomac, which is untenable. |
| Other | East of the River is dependent upon our buses, there must be no cuts. |
| Other | By 2022 I think well be back to normal. I wouldnt plan any changes now for 2022 |
| Other | Providing service to low income areas is fine, but many seniors who are not in low income areas still minded to rely on the bus to take them to hospitals, medical appts, appts downtown, where parking is limited or too expensive. Many students, not in low income areas, use the bus to get to school. Pp |
| Other | I dont know the details. But focusing on low-income passengers and essential workers is the right thing to do. They have the greatest need and the fewest other options. |
| Other | See previous response.. |
| Other | Circulator should go through East of the River, SE, etc to support residents in their transportation needs. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Cutting and consolidating bus lines mean my typical travels will have about 2 bus transfers instead of none. Pre-pandemic, a single bus transfers would increase my travel time by 20 minutes because it took so long for the next bus to arrive. It was horrendous, bus times were unpredictable. Will buses be more frequent under this plan? |
| Other | How would your plan provide service to the customers listed above if you plan to reduce it to 50%???? That doesnt make sense. By 2022, I imagine more and more people will be heading back to in-person work as well as many of the public health emergency restrictions being lifted. People will need a way to get around - Metrobus provides this service - do not reduce it! |
| Other | i do not use metrobus frequently |
| Other | It is crucial that healthcare and foodservice workers have early morning as well as later evening hours metro services available to meet the community needs for these essential workers. |
| Other | I dont ride the bus daily, but in order for it to be a viable committing option for me, it would need to run every 15 minutes. |
| Other | Keep in mind though that what you are implicitly doing here is the driving of more population back from the suburbs into and closer to the cities. With that being an unintended consequence, there is going to be too much population density concentrated in small areas which means that car traffic must be then further reduced as well. Otherwise, there is going to be too much pedestrian traffic and too much car traffic in these high population density urban areas with high cost of living where so much of the formerly suburban population without cars is now being driven into as another consequence and aftershock. |
| Other | I agree with focusing on providing bus service to those customers who really need it (low-income customers, etc) and to those areas where there are a lot of riders |
| Other | Sounds Ok, but when I click on a detailed description, its too much detail to comprehend and evaluate. I would have to answer you next week after Ive thought about the details. |
| Other | I really question this thinking. Jan 2022 is when people will be back in the swing of things right when all these cuts happen. This makes no sense considering the likely trajectory of people getting back out an about. Having the bus and metro available at lower levels than now when folks are able to get back out would cause so many issues. |
| Other | See previous comment. |
| Other | I really dont get this. Reducing both train and bus availability can only make DC less and less transitable. Both train and bus service will be slower, and everyone who can afford to will just use cars. Traffic jams will increase, and then itll take EVEN LONGER to get anywhere on the bus. With huge cuts to TRAIN service, there will be NO EFFICIENT WAY TO GET ANYWHERE! People will be, on average, able to do fewer things in a day in the city. This hurts businesses. All together, this reads as a plan to get rid of public service, increase traffic and the need for more parking spaces, slow everything down and make everyone unhappy. Not to mention the massive equity implications of such huge cuts on a service that most benefits the poorest and most underserved among us. |
| Other | The schedules must be available to everyone and maintained. You must evaluate he working people who must use the bus to get to work., |
| Other | Why increase it in 2021 only to cut it even farther in 2022? |
| Other | SW DC already has limited public transit options and it looks like you're taking some away. |
| Other | This is a further method to discriminate against working poor people and also give business to Uber and Lyft to clog our streets. Make the bus more reliable, predictable and useful and people will ride. |
| Other | As an essential worker I need more frequent rides |
| Other | Don't forget about middle income commuters who rely On the bus and can't afford to uber to work every day. Low income people are not the only ones that rely on the bus. |
| Other | Riders with disabilities should be included in the above list. Expecting that these individuals will instead be served by Metro Access is discriminatory and non-equitable. |
| Other | It would be crucial to include Restaurant and Bar workers in the essential category. Bus routes that run through areas with high numbers of restaurants and bars should maintain their schedules 24-hours a day |
| Other | How does it make sense to ramp up service in 2021 and then cut it in 2022? Everyone who wants to be vaccinated will be done in 2021. Further, people are going to be angry with Metro for playing games like this with them to say oh come back on Metro, but a few months later we will forever eliminate your bus line. |
| Other | Thank you so very much for considering the needs of essential workers and low income riders, many of whom may not be able to participate in this survey. We rely on buses especially to get into areas with light rail coverage. |
| Other | To be honest, it is really difficult to figure out what the transit options will even be with the elimination of so many lines and possible stations. This is especially challenging for folks who took a combination of bus/metro services pre-pandemic. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Proposal seems to be good, but I do not have enough information to form a firm opinion. |
| Other | Im really glad to see the focus on low-income customers and essential workers. |
| Other | in January 2022, we may be back to work and need all the bus and train service we can get |
| Other | Busses would likely be too far apart, I would look for other alternatives. |
| Other | Bus service from the Rosslyn/Ballston to the Georgetown area is essential for many of our hourly employees. Without metro rail access, bus service is the only form of transportation available to many people. |
| Other | Timing of bus connection to metro is very important for me to get to work. With the cuts to bus service locations, times between busses and the 30min gap between trains I will not be able to get to work or home regularly. |
| Other | I expect to be commuting at 2019 levels in 2022. 50% cut to Metrobus would make my commute unsustainable. |
| Other | Cut is too drastic |
| Other | how do you determine the income level of individuals? will you create a new smart-trip card that determines income levels? |
| Other | Not enough details to assess |
| Other | With the proposed metrorail changes, decreasing metrobus will not help at all! |
| Other | Reducing service to 50% at a time when demand would be higher due to more people who would be transitioning to post-pandemic activities is a huge step backward for Metrobus. Public transportation should be for all, and not just for low-income communities. Reducing services would push middle-income residents to get cars, which would contribute to worsening traffic and pollution in the District. |
| Other | My bus route would be entirely eliminated, adding significant time onto my travel |
| Other | This is ridiculous. While I appreciate the areas of focus, you are basically encouraging people to look into other transportation options as well as penalizing people without the resources for a car who don't live in the target areas. |
| Other | Metro bus for me is a convenience, not a necessity. I appreciate that metro is considering prioritizing low income households and essential workers! |
| Other | The plan described above in detail is fair and completely understandable. I support this plan for 2022. Metro is being realistic about its future services. |
| Other | We need Metrobus to increase not decrease. Its to the point Metrobus is no longer a good way to get around period. |
| Other | Plan will eliminate 2 of 3 buses available to my neighborhood. This is completely unacceptable! As a side note, the documentation is not user-friendly. There should be a table of contents with clickable links. It is very hard to navigate and even understand the proposal. This is a complete disservice to the residents of DC. I only hope our elected officials will be standing up for us, |
| Other | This would isolate whole populations with no other means of transportation. Plus money coming in from any stop is still money coming in. It is a moot point closing stops especially since ridership in general proves that stop is needed unless there is absolutely no one getting on at a particular stop consistently. |
| Other | People need a form of normal and public transportation services provided that for them. It may not be in Metro's best interest but it should be there!! |
| Other | WMATA, as Always is Cutting Service to those who NEED it MOST! LOW INCOME PEOPLE, SENIORS, ESSENTIAL WORKERS. Not everybody can Afford MetroRail. Many of Us PREFER to use the Bus! KEEP BUS SERVICE AS IT IS! We've made this far, we can Finish WITHOUT CUTTING OUR BUSES! |
| Other | Hard to say based on information provided |
| Other | The bus is an awesome alternative to metro |
| Other | How are these three categories tracked in order to assess ridership? I think it holds a lot of assumption of what lines are used for what reasons, even if surveys are collected. Usually surveys are not wholistic and they miss a large portion of society that is unable to complete them (people with disabilities, mental health issues, inability to read, children or people who need adult consent). |
| Other | I use metrobus often to commute to work (pre-pandemic) and to connect more easily to areas that are not efficiently linked via metro. Reducing to 50% service would be a massive inconvenience. |
| Other | I feel that Metro really needs to concentrate on their Low-income and essential workers. |
| Other | Sounds appropriate. |
| Other | Bus service is essential to our elderly and non-driving public. |
| Other | Non-rush hour bus service already barely exists. Why not just remove dozens of stops from say, Wisconsin Avenue route to make the buses (on that route, at least) run more efficiently? |
| Other | Although if you close metro stops (like East Falls Church), bus service should not decrease as it would need to accommodate former metro riders. |
| Other | There is no part of this city where people do not need mass transit. Limiting metrobus service to areas where oppressed people live now ensures that they will never be able to live, or work, anywhere else. |
| Other | Combining bus routes that are typically crowded is a disaster waiting to happen. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Bus crowding is already a big issue across the city; reduced service would make public transit even less accessible and reliable. |
| Other | I am strongly opposed to any reduction in bus service. 100% of pre-pandemic levels is the bare minimum standard that should be met, and ideally bus service should be expanded. All areas need to be fully accessible by bus, no exceptions. |
| Other | If they reduce their services I probably wont have any buses that will take me to work |
| Other | While I appreciate the emphasis on running bus services for essential workers and low-income customers/neighborhoods, I think it is a terrible idea to shut down services based on January 2022 metrics and not pre-pandemic ones. I think that, while post-pandemic ridership will certainly be different, we will not be able to track that by January 2022. Instead, we should continue using pre-pandemic models with the understanding that those models will be subject to change as we better collect and map post-pandemic ridership data |
| Other | you'd be eliminating routes I use for my commute and will use again when I go back to work. |
| Other | You cannot reduce buses. We need more not less Public transit. Petition congress or raise fares. |
| Other | This would work if Metro stations weren't closed at the same time. |
| Other | Why can't we run smaller, electric buses more frequently? More frequent buses would raise ridership. |
| Other | Though great that Metro's goal is to help low income + essential workers, all bus lines should operate on pre-pandemic levels + cut subway. With high subway crime, people try to avoid subway, as it's not as safe as bus |
| Other | My only concern about the criteria is the use of Jan 2022 as the benchmark, rather than pre-pandemic. It seems to me that, at a minimum, the benchmark should be a hybrid. We really don't know how far along we'll be in January 2022 toward emerging from the pandemic's effects so that month might be an odd snapshot. |
| Other | I depend on public transportation to go to work and for my personal interests, the hours that I have to work and personal interests should not have to revolve around metro, you have an obligation to the public to serve the public. The post office has not stopped delivering mail, the fire dept does not stop coming to emergencies. I moved to the Grosvenor area because of the metro being right there, am I supposed to see my home and move? |
| Other | The number of bus lines reduced makes the system much more unusable. Having to transfer results in longer, more frustrating trips -- which will reduce ridership. |
| Other | Reduced service will force many people to drive cars leading to more carbon dioxide in the atmosphere. It also creates a barrier for access for many who rely on that service. |
| Other | Prioritizing Metrobus service for low-income customers and essential workers is admirable, but if it comes at the cost of reducing service overall there may be disparate impacts on those populations that are unanticipated by this plan. Additionally, prioritizing areas with the most riders may also mean prioritizing the areas where users will have the greatest number of alternatives. I would like to see WMATA focus on expanding Metrobus in areas where Metrorail is not easily accessible. |
| Other | Metro should receive A LOT more funding from Federal and State sources to function. Climate change is real and people want to use mass transit if it works for them and is convenient. The pandemic isn't possibly to blame for all this-losing one year revenue shouldn't eviscerate the national capital region's public transportation system! |
| Other | This is super logical! |
| Other | Prioritizing service to low income and essential workers seems like a good approach. It would also be important to consider- with decreasing train line service, who will be left with no public transportation options at all |
| Other | As in previous comments - it is a city's responsibility to provide safe, appropriate, and frequent public transport to its citizens rather than find ways to cut services. |
| Other | I don't understand how reducing metro bus service to 50% and potentially closing and reducing service on metro lines, will help anyone get to work who does not have a car? There are a lot of one car or no car households in the DC area who have picked their home location because of the metro. We rely on the metro service to get around and offset the ridiculous traffic we have on our highways due to overcrowding. I am so disappointed and outraged that Metro is making their riders uproot their commutes because they don't know how to budget properly, shame on you. |
| Other | this will not work for a LOT of riders. walking to an alternate route that could add miles is unacceptable, and with added traffic from commuters abandoning transit, the bus system is going to be so much less reliable than it has been. especially as 2022 will have many more people going back to work |
| Other | Buses have lower capacity than trains. Reducing service to 50% of pre-pandemic levels would cause significant crowding on buses, which is a public safety hazard during this pandemic. |
| Other | Cutting service after people return to work will lead to overcrowded buses. Additionally, encouraging people to transfer to metrorail while cutting metrorail service will cause overcrowding on metro platforms. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | All commuters should be able to rely on public transit for commuting and otherwise. |
| Other | Appreciate the focus on low income customers and essential workers |
| Other | Im unsure as to why you would be reducing services to less than what they are during the pandemic. Why not reduce services when they are less in demand? |
| Other | I can work around the timetables |
| Other | Reducing bus service at the same time as reducing rail service and closing stations makes no sense. Metro would end up losing a lot of ridership and the hardship on people who depend on mass transit would be enormous, especially for lower-income workers. Restoring both bus and rail service to pre-pandemic levels will help the DC Metropolitan area recover faster from the Pandemic. Reducing public transportation options will hinder economic recovery for the entire region. Congress needs to act to provide adequate funding for both metro rail and metro bus service back to pre-pandemic levels. |
| Other | Im one of the riders that depends on Metrobus I have no car and no one to rely on most of the time to get me to and from but metro I can't afford Lyft and Uber all the time |
| Other | Any reduction in service threatens to drive ridership down, creating a downward spiral for Metro. Reduction in service also impacts those who cannot afford other modes of transportation. |
| Other | How about students/young population that uses metro system to go to school? |
| Other | Its not just low income and essential workers. Seniors and disabled people are citizens of this county too, and deserve to not be stranded. Again, its your public charge, and it matters more than your damn budget. |
| Other | Please, before taking the absurd measure of eliminating the D6 and M4 buses, check how many hospitals and schools are served by these two lines. (Sibley Hospital, Georgetown Hospital; schools: Hardy, Wilson High, Basics, Georgetown Day, etc.,etc.). |
| Other | It is really a little bit complicated and the description is too general - I hope you all will do your best because we depend on this transportation for everything in our lives. |
| Other | We are depend on buses and metro and not fair at all. We are tired of covi 19, struggling to go to work and now metro, we are really tired |
| Other | It eliminates the bus route that I use. It would force me to drive instead of riding metro. |
| Other | Pre-pandemic I took metro bus back and forth to work but not sure my route will be available under this plan. |
| Other | The description above does not say anything about specific routes and neither does clicking the link to a huge document. |
| Other | I am an essential worker this proposal would accommodate my schedule. I also support providing additional service for low income customers. |
| Other | Need more opportunities during rush hour to get to and from work. These long wait periods would Congest peak travel times and make commuting twice as long waiting for the next train. |
| Other | I hope WMATA take the pandemic as an opportunity to restructure bus routes to reflect current and future needs rather than retaining legacy routes. Now seems like a good time to do a wholesale change to increase the effectiveness of WMATAs coverage. |
| Other | Reducing train service is not acceptable. Does the Metro Board even ride the Metro? This proposal is not worth considering for the Nations Capital. |
| Other | The other strategy seems to be to force bus riders to take the metro rail for at least part of their trip. Once again, not focusing on passenger convenience, it does increase some ridership figures but it add valuable time to any trip because the walks between these various systems is non-trivial and the arrival times between these various systems are not coordinated to be efficient. |
| Other | not happy to see direct service all the way up Connecticut Avenue, but its more important to me that the populations youve mentioned above are taken care of. |
| Other | We have to care for or most vulnerable citizens. Otherwise, who the Gordon Bennet are we? |
| Other | Bus route eliminations would significantly reduce service in my area. |
| Other | Austerity policies are bad and public transit is good, simple as that. |
| Other | Please ensure the communities named above are not just considered but help to co-create the priorities. This is the only way to ensure it meets their needs. |
| Other | We should be increasing, not decreasing Metrobus service. |
| Other | You would confuse people in southeast with the changes to the bus. And it would be hard on the older generation just but under covers on the bus |
| Other | ABSOLUTELY NOT!!! |
| Other | Metro should consider a major redesign of all the bus routes in the system. Many of the routes are still the same routes from Metro's predecessor companies over 50 years ago. Demographics in the area have changed but Metro keeps running the old street car routes. |
| Other | Again, these restrictions make it difficult to plan and promote overcrowding. |
| Other | this would eliminate the only bus route to where I shop for groceries etc and I do not have a car |
| Other | please do not reduce service |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | We already have the second worst congestion in the country. We already have the major public transport infrastructure assets in place. Frankly, its insane to be talking about closing stations, much less curtailing services. Im sorry, but this is a horrible public policy decision. |
| Other | The buses are my husbands only way to get to work |
| Other | The same comments I made for the previous question. |
| Other | Assuming my employers offices open up in 2022, which I assume will be true, then I will have no way to get to the metro. |
| Other | I FREQUENTLY see riders get on busses without paying - driver allows them to pass, in rush hours they get on the back door. If you are using fares to analyze the metrics then you are not getting the complete analytics. Income from fares should be much higher than recorded. We should not suffer loss of routes due to poor analytics. Those living in areas that are not low-income generally pay for the service, and are happy to do so. This is a transfer of wealth that suits ALL. It lowers congestion on the roads - which will increase given the lack of alternatives. |
| Other | The second and third bullets are good, but combining routes might require people to ride longer and/or transfer more which can also extend the time people need to get to where they need to go, which will affect the citys poorest. |
| Other | I would be very disappointed to see such a drastic cut to bus service at all. Make more cuts to metro rail which is already centered around transporting more privileged and white people. Priorities are straight tho |
| Other | metrobus is far more essential to working class people than metrorail is because of its higher accessibility-- I personally would rather you gut the metro rail in order to keep metrobus fully functioning |
| Other | In order for me to get to and from work, I use more than one metrobus to get to and from work. This proposal seems like it would make it difficult for people to get to work on time. |
| Other | this impacts my ability to get to work/keep my job |
| Other | If you dont increase bus service levels you wont see more ridership. Riders do not come first. Bus service needs to come first. |
| Other | Why a 50% service reduction? It would be better to increase the fare. It would still be cheaper than having to take private transportation |
| Other | Please take a close look at how many people in the District/Southern Prince Georges county utilize the service. Most of this area has essential healthcare, food service, social services needs. These always are always the ones that suffer from changes. |
| Other | I am 81 years old, I depend on WMATA bus and train to earn a living and to buy my food. |
| Other | Youre saying youre going to focus on those who are most in need, That doesnt seem to be reflected in these plans. |
| Other | It would work as long as it kept lines currently operating late (around midnight) open at those same times. |
| Other | There are many elderly residents in Foxhall/Palisades who do not own cars or drive, and are dependent on public transportation. |
| Other | A more thorough question and summary of the proposed changes need to be provided. Not a 166 page document. |
| Other | Should add more express bus services and more services on Connecticut Ave md |
| Other | Since I do not own a car, Metrobus is my only option, especially if I need to go my doctors appointment, or if I need to stock up on groceries. |
| Other | We bought the house in Kings Park West to avail of Metrobis service. As a healthcare worker in DC, it will be a extremely costly to park in DC . I also think of the metro bus/ metro rail employees who will potentially lose their jobs. We need to keep all metro buses and trains open .The government needs to give metro rail budget to operate. |
| Other | As someone who does not drive and uses Metrobus often, though not daily, for essential needs (I am retired), I think that it would be a mistake to reduce service to 50% of pre-pandemic levels. Route consolidations and re-design might present problems of reliability as routes get longer. |
| Other | By Jan 22 I think most people will be commuting to work again so I don't think it is a good idea to cut service on bus or metro lines |
| Other | I applaud the effort to serve as many customers as possible and the focus on low-income riders and essential workers. That is as it should be. I also agree there can be some room for route redesign; there are some routes that probably have too many stops, slowing down overall trip time. HOWEVER, the goal needs to be to expand service beyond pre-pandemic levels rather than reducing it from pre-pandemic levels. More people will take the bus if there are buses running more frequently and with some added help like bus-only lanes and signals. |
| Other | Unsure how you absolutely know that people who rely on these services could still manage with these changes. |
| Other | This plan would work for me, however I feel concerned about reliable bus service needs for others who need and dont have alternative transportation, and riding the bus as an important alternative to driving and fossil fuel emissions. Access to public transportation is a major factor and a critical asset in providing equitable access to jobs, resources, and services, across the region. Proposed reductions could result in more people abandoning Metro instead of using it, creating a downward spiral of revenue and ridership. |
| Other | I appreciate the focus on low-income customers of Metro and support it. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Public transportation is a public good, just like fire fighting, appropriate law enforcement, good libraries. It cant be measured simply by the number of riders currently using it. Bus and rail service ought to be measured against many factors, to help the environment, prevent global warming, contribute to public safety (cars kill people much more than public transportation.) These questions here dont reflect the true value of a public transportation system. |
| Other | Metro is being discriminatory and profiling in focusing on low-income riders - a distinct group of individuals. This is not fair to other riders and shows NO equity. ALL riders should be treated equally and race/income levels should NOT be the basis for decisions. |
| Other | These sound like appropriate priorities. I expect my needs to change in the coming year and I am not sure what they will be. |
| Other | metrorail is much more expensive than bus, so unless this comes with metrorail price drops or full transfer benefits, this is not workable for low-income working people. |
| Other | Not good enough. I am a senior not an essential worker I am mid income but can't afford Uber |
| Other | Assumes transfer to Metrorail which is more expensive |
| Other | I would stop using the bus completely and, instead, drive to work with this level of service cut. It would take too much time to get to work downtown. |
| Other | Please consider educators and their students at all levels. |
| Other | You are really trying to put lipstick on a pig with the way you presented these changes. Cutting and combining lines does not better serve low-income customers and essential workers, it cuts off their legs. By reducing their ability to get to work, you are making it more likely they will be fired. You are making it impossible to rely on your product, which is only going to make people less inclined to be able to use Metro, which will then make this budget crisis go on long beyond COVID, which will then feed into even more severe budget cuts, and more genius moves like those proposed, making the system even more useless, and so the cycle goes. Have some vision for once and realize that saving money now often means losing a lot more of it down the road. |
| Other | If there are cuts in both rail and bus it will negatively impact ridership and increase traffic congestion as your former riders move to alternatives. |
| Other | I do think it's very important to focus on the three groups mentioned. But it's also important to build ridership in the rest of the metropolitan area. In Europe everybody takes buses but in the United States people often think of it as something for low income people. While it's true they need it more than higher income people, there are many middle income people who are concerned about the environment and would like to use the bus system. Therefore it needs to be convenient for everybody. We will build ridership by making it convenient. We must be patient though . |
| Other | This population needs to easy, reliable and efficient transportation. In the future all of us will need options that do not require cars. |
| Other | This is a good time to redesign the network for optimal use, but going from increased service in 2021 to decreasing service in 2022 doesn't make sense. |
| Other | Metro needs to secure funding! Most of your proposals are unacceptable for people like me who do not own a car (to protect the environment and fight climate change) and rely solely on public transportation. More people need to take public transportation if we want to live on this earth in 2050. Cutting service will not convince people to take public transportation. What is going to happen to metros employees? How many people do you plan on letting go? Your plans are unacceptable!!! |
| Other | I do not live near a metrorail station and rely on Metrobus for work transportation. |
| Other | The reduction to 50% does not help at all, but access to those that need it does... |
| Other | Not happy about it, but yes, I can make do. |
| Other | The buses should be available to the people who pay taxes that allow them to exist |
| Other | January 2022 metrobus and rail becomes unusable for me |
| Other | Cut service until pre-Covid levels return. Ask congress for additional funds. Im ok as a tax payer doing this as this pandemic through everything out of whack but Im ok with providing extra funds for our public transit system. It is essential for travel in the region! |
| Other | This will remove all public transportation from my neighborhood (Berkely/Palisades), and require my family to purchase an additional car and pay for parking every workday |
| Other | I use the trains as the are closer to my apartment. |
| Other | Again, Im concerned that our lower-income neighbors will have reduced service/support that they most need |
| Other | Again, if you are able to assess real needs and rebuild the bus system to provide the service that is needed at the times necessary, that would be a true blessing. |
| Other | I appreciate that you have tried to take low-income riders into account. |
| Other | I read the detailed plan link, but still dont know logic behind the proposed changes, why changes are in 2022, why assuming ridership wont resume post-COVID. Seems like this is being sprung on us. |
| Other | This may work, but I worry that buses will be crowded if services are combined. There are many lines that were very crowded pre-pandemic, and many that I have ridden that are crowded in the current environment. I worry that if any route is combined, it will make it very difficult to utilize the bus system. |
| Other | Logical reasoning. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | i do think low-income customers should be a priority. |
| Other | Prioritizing service for low-income customers and essential workers is the right plan. It would be great to see continuous updates on how service is prioritizing these groups. |
| Other | Stop punishing the riders! Take a paycut from your high salarier and save metro and bus! |
| Other | There are too many cuts to lines that connect communities to work. What is most concerning are the modifications that would require commuters to consistently transfer between bus lines. Unlike transferring from bus to rail and vice versa, transfer between bus lines is always complicated, rarely convenient, and in this case would cut off many communities from access to necessities, including vulnerable populations, low-income communities, and essential workers. |
| Other | I live in Foxhall Village, am 83 years old, no longer drive, no longer use a bicycle, difficulty walking more than 2 or 3 blocks. How can I get to Sibley Hospital where my doctors are located? How can I get to Wisconsin Avenue to use bus service to a Metro stop?How can I get to a grocery store?How can I get to church?How can my neighbors children get to any public school -- Key, Hardy, WilsonBusinesses along MacArthur Blvd are already suffering and with this plan they will be damaged even furtherI thought the City wants to increase the use of public transportation and eliminate private automobiles; this plan does the exact opposite |
| Other | Its already difficult to travel with bus since the frequency is so low and unpredictable timetable. 50% would make bus travel practically non-existing. |
| Other | This plan gets me half way to the Pentagon, however, no other bus picks up from there to finish the route. |
| Other | That sounds good, but does that mean you will cut back on the rest of us? |
| Other | I can't tell the impact on those odds us who solely rely on metrobus especially routes where there is no metro rail |
| Other | Not acceptable. Your prepandemic service was already inadequate. |
| Other | All bus connections between Virginia and DC would be eliminated, forcing people to use a Metrorail service that would run every 30 minutes. I fail to see the logic in this. |
| Other | See previous responses. |
| Other | A reduction to 50% would likely encourage me to just drive to work and no longer take the bus at all. Easier transfer to Metrorail would be a big plus. There's not a metro station near the intersection of Mass Ave. and Wisconsin Ave., but pre-pandemic this was a major intersection for buses. Since Tenleytown-AU, Cleveland Park, and Woodly Park metro stations are not very close to this intersection, would like to see continued, frequent service. |
| Other | This reads as contradictory. We should be focused on increasing access rather than decreasing access. |
| Other | If you've been operating at 75% throughout the pandemic how does dropping to 50% in 2022 make absolutely any sense??? Especially when you're planning on increasing service throughout 2021??? |
| Other | Do I understand correctly? You mean you are thinking about shrinking service in both metro and metrobus??? |
| Other | This plan works directly against environmental goals. It would force people to use cars or taxis. It would make significant negative changes to work and educational and recreational plans. |
| Other | I am an essential worker who would not be able to take public transportation at all if some bus and metro rail proposed eliminations occur. It is not clear if Fairfax connector may be able to fill in the huge gaps found in metro's proposal. Even though some stations are physically close the stations do not offer parking, buses do not connect the stations, and there are no sidewalks connecting stations. |
| Other | Consider issues of crowding if social distancing is still encouraged at that time |
| Other | Changes will confuse and would be hard to support travelers. |
| Other | There are low-income riders and essential workers throughout the city who have reasons to travel throughout the city. |
| Other | With any of them, for normal times it's important to have access to Metro busses and trains. Right now I am not using them because I am honoring the request not to use public transportation. |
| Other | Shame on WAMTA for not realizing that metro and bus ridership is a public service. The plans will hurt people. |
| Other | I agree with prioritizing routes needed by low income customers and essential workers and ensuring those routes run regularly. |
| Other | Yes! it is wise to provide service to high ridership communities but make sure they are paying when they get on the bus. So in the area where there are a few people who do not have a car can know that Metrobus will come in our area to pay Metro for transportation to work, healthcare, food service, social service and other important occupations. |
| Other | 50% in January 2022 when thing should return to normal much earlier? How are people supposed to get to work? |
| Other | There is only one service plan for the bus at this link- I cannot tell them apart, so my evaluation is still the same. If it doesn't have the line that connects Connecticut to Wisconsin via Porter, it will be more challenging for me. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Cut back more. WMATA should not be wasting scarce sources on things it does not do well. It is essential that service cutbacks be accompanied by commensurate reductions in staffing and facilities. Freed up funds should be returned to local governments who have a demonstrated ability to do transit better than WMATA. |
| Other | 50 percent of pre-pandemic levels?! Are you kidding me? That is atrocious. Bus service needs to be INCREASED from pre-pandemic levels, not reduced. |
| Other | I am opposed to service cuts, especially as they may affect people without other transportation options, or areas that were specifically built to take advantage of public transit. |
| Other | I am a power wheelchair user and cannot drive. I have no family to help me get around town. Metrorail is my ONLY means to get to my full-time federal government job and my weekly disability-related medical appointments. Any cuts in Metrorail service greatly impacts my life in a very adverse way. Telework has not been a good option for me because I am much better disability accommodated at my office than anywhere else. I have to rely on Metrobus when there are Metrorail elevator outages as well as get to a few other places. Please don't cut Metrobus service! |
| Other | I am not for service cuts. Metro is set to receive millions in COVID relief from Congress. It is not acceptable to cut service. January 2022 is exactly when most Americans are expected to resume their pre-pandemic lives. Cutting service exactly when we are getting back to our daily lives is unconscionable. |
| Other | This is vague and unspecific so I am unable to determine what its impact would be. |
| Other | See my comments above. There would be no Metrobus access to either Ballston or Rosslyn Metro stations from my neighborhood if the proposed plan is executed. |
| Other | No, you have to think about the people who live in those areas they just don't go to the places that you named they go to other places too. Those routes have always have good ridership |
| Other | Again, reductions in service mean excessively crowded buses that are not safe with Covid circulating. Also, crowded buses are not accessible to riders like me with disabilities who need a seat in order to ride safely. I've tried riding buses in the past, and sometimes I don't get a seat. Sometimes homeless people are napping stretched out across the entire disabled seating section (I'm sympathetic to their situation but it is not WMATA's job to provide mobile shelters in the form of buses). Or else riders without disabilities take up all of the disabled seating. If Metro reduces service, how will you keep the system accessible to riders with disabilities who need the disabled seating? And how will you ensure that buses aren't overcrowded and unsafe with Covid strains still circulating? |
| Other | The priority groups and a redesign for them seem wise but a 50% cut does not. We should be increasing bus service to facilitate more train usage. |
| Other | I do not ride Metrobus enough for this to impact me. |
| Other | If you have to make these cuts in January-- then by all means re-open fully for commuters in Sept. 2021, so that we have reasonable data to work with as to where the commuting needs are most acute! |
| Other | First half of 2022 is ok. 2nd half you've eliminated all the buses I would take. I don't know if ART would make up for some of it. |
| Other | I really don't support these proposed service cuts for metrobus a lot these bus routes I rely on and really hope you guys get additional funds come to help aid you guys. |
| Other | I like the priority on essential workers, low-income customers. I don't fit in either of those categories, but Metro needs to have service priorities to meet their needs |
| Other | I can work around this by taking a Ride On bus or some other shuttle if the new scheduled times don't work out with my schedule. |
| Other | I like the idea of providing service to essential workers. Our neighborhood has a nursing home, two daycare centers, a 7-11, and a large Safeway, |
| Other | Let the Metrobuses run in all areas |
| Other | This would eliminate all service between the north end of Alexandria and Pentagon/Pentagon City/Crystal City, which would add approximately four miles of walking or at least 30 minutes of time waiting for other bus routes to my daily commute until the Potomac Yard metro station is opened. Reducing or eliminating service in this part of Alexandria before the Potomac Yard station opens would be disastrous for me, and even after that station is open, eliminating bus access between northern Alexandria and businesses in Crystal City and Pentagon will raise costs significantly of those trips given metrorail vs. metrobus base fare. There is no replacement for this service via ART or DASH either because it crosses between Arlington and Alexandria. |
| Other | Metro should maintain or increase service for low income passengers who depend on MetroBus as their primary means of transportation, and if bus service reductions are necessary due to budget problems, reduce service to more affluent areas where there is less need for bus service. |
| Other | Stop cutting service in mainly black neighborhoods in DC. We depend the most on bus service |
| Other | I appreciate the focus on low-income customers and essential workers. |
| Other | Full bus service needs to be restored. Buses are often crowded during rush hour (pre-pandemic) and reducing or cutting Metrobus service would make it less attractive to use public transportation vs. commuting via car or car service. |
| Other | Why such a dramatic jump from 75% to 50%? How about something like 62% or 63%. Maybe I do not understand this question? |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | Some of these route changes and cuts are absurd. Why are you eliminating a line that had 4,000 daily riders before the pandemic? |
| Other | I'm for saving jobs. Where do all these people go when they are laid off? Economy will return once every one is vaccinated |
| Other | I rely on the buses to get to the metro station to commute every day to/from work between Falls Church City and Washington DC |
| Other | - |
| Other | I dont like this one bit because it could cause me to be late for work each day if I dont a time in which a bus should be taking me to work. |
| Other | I use the Fairfax connector to get to the Vienna metro station. I do not know how these changes would affect me. |
| Other | I must not understand the plan and the presentation on the webpage is a bit jumbled together. It does not make sense in 2022 to remove Express Buses. It seems like that would have been done over the last year or so since those busses looked empty every day. |
| Other | If you are truly focusing on low income and essential worker Routes, I am in favor of it. Unsure how this data was collected and if accurate. |
| Other | I have already seen buses not picking up passengers because the bus was full. If you have a way to track how much that happens, that could help inform your decisions. |
| Other | WMATA should be planning for POST-Pandemic ridership that emphasizes outreach to a larger and more diverse potential customer base. |
| Other | Again are you CRAZY. Washingtonians need to be encouraged to use public transportation for the citys economic recovery and to discourage car use to combat the negative effects of climate change. Public transportation needs to be more not less accessible!!! |
| Other | Adapting routes to fill gaps of closed metro rail stations would be the way to go. A campaign to get people to ride the bus would definitely be needed as the reputation of on-time bus service is lacking |
| Other | Shifting fund from rail now to pay for bus in January 2022 would be a better choice if possible. |
| Other | It you shut down my two closest metro stations, it is more than 2 miles to the next station and no bus. I have arthritis and cannot walk that far twice a day. That would have a big impact on my commute and I probably would have to start driving. I moved to a metro accessible area so I would not have to drive. |
| Other | See my comments above. |
| Other | The proposed route eliminations are nothing short of slaps in the face to seniors, financially-limited, and everyone who wants to live with reduced reliance on automobiles for travel around the city and region. Completely undermines DCs objectives to reduce the number of personal vehicles. What an utter disgrace. All of you should resign. Immediately. |
| Other | That makes sense and I agree with all three of your focal audiences |
| Other | This is not a solution to the budget shortfalls. The DC area relies so heavily on public transit that this would cripple commerce, and peoples ability to return to work. |
| Other | It looks like service is being cut too much within Anacostia given their lack of options. |
| Other | as of now not sure |
| Other | These cuts impact too many communities that need service. The most important priorities should be low income and essential workers. Higher income neighborhoods have the resources to afford other forms of transportation. |
| Other | Metrobus service should be expanded to reach as close to pre-pandemic levels as possible, and any significant reduction in service will be really bad for its riders. |
| Other | I think prioritizing especially low income and essential workers is absolutely what we should be doing! |
| Other | I rather cuts be made to bus and rail service than to raise fares. Now I do not regularly ride metro buses and trains because they are too expensive. I regularly rode metro buses when it was free. The corona virus is going around and people are dying every day. It should be free to ride Metro buses and trains. A lot of people can not afford to ride Metro buses and trains every day. |
| Other | Given the number of low-income residents, elderly residents, and those who rely solely on public transportation to get to work, it is absolutely incomprehensible to me that any service in the Anacostia and Fairfax Village areas would be reduced. This is absolutely unacceptable in our city. |
| Other | Need more buses from herndon and reston into DC and Arlington |
| Other | Service being reduced to 50% seems like it wont be enough in 2022. The frequency of some buses pre-pandemic was already lacking, and reducing service even more is highly concerning. Wait times would get to 40 minutes to an hour or more during non-rushhour, so what will it be at 50% capacity? |
| Other | The proposed plan would totally gut bus service in DC. This is one of the few cities in America where you can rely on transit to accomplish most of the tasks of daily life. If this plan were implemented, that would go away forever and DC would become a car town like Atlanta or Dallas. Emissions would go up, people would breathe more polluted air, and just as respiratory pandemic came to an end, more people would start dying from exposure to toxic fumes. Perhaps Metro cant stop this, in which case preserving the higher-ridership routes is the right thing to do. But it should be done with the clear knowledge of what is being lost. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | You should consider the needs of low income riders first, not the most populated areas. Low income residents are the least able to switch to a car if they lose their bus. |
| Other | I used to live in the area, but was out of the state the past 6 years. I specifically moved to my old neighborhood because of the express bus from Edsall Rd and Indian Run Pkwy to Pentagon. Now Im finding out that route is on the chopping block. The express bus option is even more important for 2022 when car traffic to Amazon and Marks Center will be significantly higher. We dont need more car traffic and having an express bus from Indian Run Pkwy and Edsall Rd to Pentagon is so important. |
| Other | This will not be acceptable |
| Other | The reduction of service to 50% of pre-pandemic levels is less than the service offered now at the end of the pandemic. This makes no sense and doesnt seem to be sustainable in the long run. |
| Other | Although I don't rely on the bus for work, I feel it is imperative that public transportation serve people who have to use it for work or daily life. |
| Other | For those who live in VA and MD, cutting bus service, or cutting bus service to metro stations and then closing certain metro stations is going to make commuting (particularly at rush hour, because again no rush hour trains) into DC near impossible |
| Other | We should already be back to pre-pandemic before January 1, 2022 so you don't need to worry about essential travel or any of that kind of stuff that's right now but, we should already be back to pre-pandemic by about January 1, 2022 or before hand so just to let you knowWe should already be back to pre-pandemic before January 1, 2022 so you don't need to worry about essential travel or any of that kind of stuff that's right now but, we should already be back to pre-pandemic by about January 1, 2022 or before hand so just to let you know |
| Other | Generally shorter routes, less subject to traffic delays, with better feeding into Metrorail, would enhance service even with less frequency. |
| Other | not sure if 50% service would be useful for the target group above |
| Other | As an infrequent bus rider, these proposed changes do not affect me. |
| Other | Several routes that connect the route 1 corridor will be eliminated in 2022, which directly impacts the ability of our community to travel both to DC and around our own area. Current county and local shuttles are not adequate and do not provide coverage during certain times/days. Relying on these resources is not sufficient to connect our community, and impacts our area negatively. We will no longer be a walkable community, and we will be largely cut off from the metro area during evenings, weekends, and school holidays (during which the UMD shuttle, a service being relied on to fill the gaps of the metrobus route cuts). |
| Other | WMATA provides too much service on routes with too few riders, including extravagant Metro Access service. |
| Other | Why would it be reduced by half of pre-pandemic levels in 2022, when ridership would probably be picking up? |
| Other | Seems reasonable |
| Other | This is based on occupation and location. There are many diverse neighborhoods and areas in the DC region. Low income persons, essential workers, who live outside the proposed service areas that arent cut would be greatly affected. Makes no sense. Promotion of metrobus in all areas would benefit me and all others and bring in revenue to metro. |
| Other | People rely on bus. Invest in bus, more bus. Get even better bus options. Have bus only lanes, enforce bus lanes, dont cut off the livelihood for countless residents. |
| Other | Although I rarely use bus transportation, i know many people who depend on it, and I hesitate to cut service. |
| Other | As the economy recovers, the public transportation needs of Washington will increase. For Washington to retain its strength as a center of government, business and culture, a strong Metro system is essential. In terms of fairness to the interests to all residents regardless of income, of minimizing damage to the natural environment, and maintaining transport/communication infrastructure at an adequate level, the Metro system must grow. The proposed reductions as a whole would be catastrophic for city and its residents. Given Washingtons role as the center of the federal government, Metro proposed degradation of public transportation would be detrimental to the country as a whole. |
| Other | As more people are vaccinated and returning to work, ridership will increase. |
| Other | The bus isnt my primary option but I still believe wholeheartedly in its crucial role, and I dont know that I wont need it much more in the near future. My roommate relies on it heavily to get to work, so would obviously not want him to be negatively impacted either. |
| Other | Already struggling to get service in AM.. the ART 41 bus I ride in AMs is filled beyond capacity due to metros reduction in services, and often has to avoid picking up passengers in my area due to overfilled bus conditions. Essential workers like myself are often early AM riders.. were not getting the levels of service we need in AMs. If people need to go to Drs and other places, they can go earlier and live with less mid day service intervals. Workers on the other hand do not have luxury of making appointments, or showing up later, or whenever in their employment. I have been car free for about 7-8 years as my car grew less reliable, and adapted to using metro exclusively. You are forcing me to look at purchasing a car since service reductions impact my commute so often in AMs in particular. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | If this also includes cutting VA routes by 50%, this could work, but the survey does not indicate which routes or not would be affected by this. |
| Other | elimination of Bowie lines is crazy. Areas without Metrorail need at least bus service to supplement. |
| Other | See previous page. |
| Other | Im skeptical, based on the routes proposed to be cut, that Low-income customers who rely on Metrobus for travel to medical appointments, to shop for groceries, and for other essential purposes are being prioritized |
| Other | If essential workers and domestic matters are required, they need the best possible transportation available to meet their needs. |
| Other | If metro is focusing on low income fixed income essential personnel. In Fairfax village community. The M6 should not be taken away from this hilly community. It is not wise to have all that need M6 not have this transportation. |
| Other | Well youd be removing my actual bus line and there is no alternative. And one of your proposals for Metrorail would include getting rid of the Metro stop closest to me. And also this would severely harm property values. |
| Other | No matter how well you try to target certain high-need areas for bus service, people are going to get missed and its going to cause big problems. In addition, this risks creating long term stigma against the bus as a service that only low-income people use, which is bad for future attitudes toward and use of the system. |
| Other | The plan is awful and will permanently kill Metro. it will no longer be a feasible commuter service. It would no longer work as the way our son travels to high school. Given the stations you are seeking to close, we would no longer be able to walk to metro. Parking would become tight at the nearest stations. I would likely have to drive my son to school and then park near my office in DC. That would be a significant new expense for our family. Traffic would increase exponentially. Terrible proposals all around. |
| Other | Bus riders on every bus represent a mix of low income, essential workers, students, the carless. No cuts. |
| Other | Well, I have to trust you on this, as you have all the facts, but just be honest. Yes, God is alive, and He is watching. |
| Other | sounds good if you are making sure people can get tow ork, if they have no car. |
| Other | I am very happy to hear the rationale for metro bus changes being about providing access for those who are in most need. I believe we all benefit from mass transportation as it is one of our great tools in combatting climate change. |
| Other | I would love buses to support ease of transit around the area. |
| Other | Considering limiting access to transportation for low-income individuals highlights the lack of understanding of the needs of our economically vulnerable families. |
| Other | Im not an essential worker but I still have to go to the office for my job. So I need to use metro to get there. I need to get to work on time. |
| Other | Im a late-night essential-healthcare worker and I would strongly support a plan like this, especially the May 2021 plan with buses running until 2AM. |
| Other | By January 2022, workers will likely have returned to the office. Moreover, bus ridership has not declined nearly as much as rail ridership. Therefore, bus service should be restored to maximum levels expeditiously. |
| Other | new plans do not protect the most vulnerable citizens regarding travel time or cost |
| Other | how do you know who relies on this and who needs for what reasons? You are being biased and undemocratic. when im on bus, there are professionals, students, poorer people, handicapped, the lot. You are cutting needed services. See prior comments. A national capital that cant operate a modern day bus system. What an EMBARRASSMENT. Get a grip. Get innovative. Fight for the nations capital. You act as if only a DC matter and i take the bus to NIH, to DOD HQ with metro rail. You act like only needed by a small group of people. WRONG! and we will vote each of you out and investigate why this metro system the ONLY ONE IN THE COUNTRY that is faltering. BART is the same system and its had to deal with pandemic but is it doing this???? NYC? Chicago? DC will look like a backwater town and these changes will harm those who do business in DC of all kinds--and you should lose more of your tax base for lack of services when taxes highest in area. FOR SHAME |
| Other | I like the idea of providing needed services to low-income riders to do essential trips, and for essential workers - but how in practice do you target this? Buses everywhere with frequent trips allow all riders including low-income riders and essential workers agency in their travel and options. The main goal should be to reduce car-dependency and improve outcomes for people to arrive on time to appointments, work, school with dignity. |
| Other | Need more details to understand if Id be impacted |
| Other | Reducing both metrorail and metrobus service simultaneously would significantly clog traffic in the region. |
| Other | public transport shouldnt be for profit but a public service |
| Other | Make neighborhoods where rider travel to work a priority. |
| Other | I appreciate that youll focus on providing service to people that need it. I am concerned that youre redesigning routes to allow easier transfer to a metrorail that will also have reduced service so not sure how that will work timing-wise. 50% of pre-pandemic levels is also a huge cut along with the rail cuts. I cannot imagine the traffic jams, which will also make bus service less reliable! |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Metro is not really working for the low income families in DC. We strictly rely on bus / train to do everything we need to do. There needs to do more survey done in the low-income neighborhoods so that you can have better proposal. |
| Other | I dont drive, and rely entirely on bus and metro for commuting. Its going to be very inconvenient if metro and bus services are reduced at the same time. |
| Other | If bus service is cut, how are people supposed to return to work? Does anybody have statistics on how many people have gotten rid of cars to save money during the pandemic? Also changing the rail schedule will necessitate changes in bus schedules. Some places will need more, not less. Some places are walkable; some are not. Also, you must factor in the increased need for Paratransit that some people will experience if their walking distances increase or their travel routes change. |
| Other | The plan to eliminate the D6 line would be very problematic, as it is the only line that serves my neighborhood and my only method of public transportation for getting downtown to my office and to drop my kids off at school. |
| Other | I have been going to work since March 16 and present, when Mayor order the city to shut door I continue to work everyday Monday thru Friday 8:00am-4:30pm or 8:30am-5:00pm |
| Other | Good plan. |
| Other | Even though my response is not applicable, it is important for Metro to meet the needs of customers who are dependent on public transportation for their daily activities. |
| Other | Reduce hour of operation during weekdays and weekend. But do not close stations. You need to be more innovative than this. Also too early to make assumptions on what will happen after vaccinations. Your approach or closing stations will only put ou more in the ref with your budget as commuters will nude even less your business.Increase your parking fees even your ridership but do close station |
| Other | I see a lot of bus elimination and elimination of parts of routes. This plan is horrible for poor people and seniors. Limited bus routes and proposing no alternatives or alternatives that are miles away from current routes is a horrible plan. |
| Other | Please look for more revenue sources instead of reducing service. |
| Other | Just because we are currently challenged by and struggling to deal with COVID-19 Global Pandemic, people who required Metro Bus and Metro Rail services before remaining require it now. The Federal Government must reprioritize its current funding levels and invest more into a more reliable. sustainable long term funding solutions, |
| Other | I am one who depends on the bus and train to take care of basic needs and have been confined to my home or dependent upon the kindness of friends, neighbors and family members during this pandemic. I am most certainly anxious to resume my independence by using the metro services. |
| Other | I would be okay with some consolidation IF WMATA could create 4 to 5 express bus lines with limited stops that cover VA DC MD in a East West Pattern or Direction, and a beltway bus line that stops at metro stations close to beltway. |
| Other | The plan only gives numbers of affected riders and not the breakout to align with the stated goals. Low-income and essential workers MUST be a priority. There should be MORE service in and around from wards 7 and 8. Next up: wards 5 & 6. |
| Other | I appreciate the priority on low income travelers who don't have any option. I think the changes will be really hard on commuters, and would be likely to push me to look for alternate ways to work (e.g. biking). Would metro consider different winter and summer schedules? I feel really differently about walking and standing outside in nice weather vs when it's cold. |
| Other | It seems foolish to cut or alter bus service to allow for easier transfer to metro rail when you are also cutting service to train service. Forcing everyone to use a system that is often delayed and unreliable is asinine. Many of us use bus service because delays are often more predictable than rail service, and we use bus service to cover problems with rail service. Cutting bus service will not allow that to happen, and will only exacerbate problems on the rail service. |
| Other | Metro MUST do everything possible to provide the most service possible. Reducing service to 50% is not only unacceptable, its also irresponsible. Under this proposal, waiting on Metrobus could be longer, buses would be MORE crowded and fewer routes would be available. Metro would LOSE more revenue and customers if they slash service by 50%. Metro should be working to get service up to 80% or 90%, and eventually to where it was before March 2020! |
| Other | I am sorry but the VA bus route changes were 89 pages so I did not have time to read through them right now. |
| Other | I literally do not believe that Metrobus has figured out how to adequately serve low income residents and essential workers (to the extent that these are different populatons), especially with 50% cuts!!?? |
| Other | Given less traffic on the roads, bus service straight from Arlington Columbia Pike to downtown (federal buildings, etc.) would be wonderful. It takes too long to switch from bus to train and there is no wi-fi on the train. There is a huge need for more bus service that cuts out the need to transfer. |
| Other | Reducing service by 50% of pre-pandemic levels in 2022 cannot possibly achieve the goals above. |
| Other | Redesign of routes to get people where they need to go more efficiently sounds good |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | sorry what? yall better be 100% of pre-pandemic levels starting in january 2022. redesign for easier transfer to metrorail is cool though. and focusing on areas that have most riders + greatest need, that makes sense too. but dont try to sneak a FIFTY PERCENT REDUCTION IN SERVICE?!?! into this. yall reading SHOCK DOCTRINE the wrong damn way |
| Other | I do ride Metrorail much more. Cuts in Metrobus and Metrorail as proposed will likely have me drive mostly. |
| Other | Do students need to pay for the bus to go to school? And I like all the ideas. |
| Other | Pre pandemic levels were already too low. Cutting them by 50% is unacceptable. |
| Other | WMATA needs to see what happens as folks return to their regular activities. |
| Other | I want you to prioritize low-income people and essential workers, but this seems wildly inadequate to accommodate people going back into the office as more people get vaccinated. |
| Other | Not having a bus service to Fort Washington will create hardships to many of riders like me in order to get to work. There is not other bus that provide service to Fort Washington from anywhere in the Washington DC, Maryland and Virginia areas. A community without public transit services is not a community without concern for those in need of public transit to survive. All taxpayers need to be served in order for a community to grow. Public transit help those less able to get where they need to go to cover their needs.. |
| Other | Travel between NW, U corridor and SW would be severely complicated. It would be an invitation to completely abandon metro transit just when vaccinations and lower Covid cases would allow me to once more take transit as I did pre-pandemic |
| Other | You are eliminating service in some areas with no alternatives. This does not consider that some people use public transportation as their only means of transportation. If the government wont subsidize the revenue shortfall, then you need to consider providing services at a higher cost rather than eliminating them! |
| Other | Not a good solution |
| Other | This plain would not go well in 2022 we will get back to mid part of working and social life it may be a little slow it will pick up every may still have some fears, but we will need to still get around the areas. |
| Other | The areas of focus are extremely important to me, but I dont know that 50% of pre pandemic service levels meets my needs. |
| Other | People are very dependent on the Grosvenor/Strathmore metro station to get to and from work and to get aroundâ€”especially those who do not own a car. Closing this station and many others would be detrimental to riders who depend on public transportation to get to work, run errands, and get around the city. Many people either cannot afford a car or are unable to drive. While I understand that the pandemic has been especially hard on Metro, it will cause even more undue hardship on riders in a variety of communities. I strongly urge Metro to keep ALL stations open. Additionally, as the pandemic gets under control, more people get vaccinate, and offices/businesses begin to reopen, even more riders will be even more dependent on public transportation. Please do not close Metro. It is a faster and more direct way to get around. The hours listed above also create a hardship on riders. If you miss a train, you have to wait a considerable amount of time for the next train to arrive. This can impact riders dependent on Metro to get to and from work. This is too limiting for people who are dependent on Metro. |
| Other | This will result in greatly expanded use of cars and create traffic congestion, particularly in neighborhoods. |
| Other | Adds too many cars into traffic. |
| Other | I think this would work. Not completely sure. |
| Other | It is critical to our family's continued ability to commute for school (DC public schools) and work to have continued service of the D6 bus line. |
| Other | Im glad that its pinpointing its focus on customers needs but at the same time there may certain areas in which they would like to be dropped off in order to get to whatever their destination is. |
| Other | It is wrong to assume that ridership will remain low after the pandemic ends, but it WILL remain low if you reduce service so much that the buses arent reliable. |
| Other | Does wmata not expect ridership to increase after vaccines are distributed to say least 70% of the population? |
| Other | Need to run buses at regular intervals no reduced service. Many people dont get off until after 11 or 12 oclock. |
| Other | Service was already below what was needed before the pandemic, this would only make metro less desirable and make riders search for alternatives. We need more service not less. |
| Other | I cannot imagine that cutting 50% of service would leave a substantial enough service for me to continue to visit without needing to rent a car (a hassle, expense, and environmental impact I try to avoid whenever I travel). |
| Other | Reducing Metrobus service to 50% would create more passengers on the other bus lines that are in service. Therefore, buses will be more crowded. |
| Other | Id like to return to public transportation when my office reopens full time. I would need the commuter buses that serve my area (South Arlington/Columbia Pike corridor/route 50 toward DC) to return to operational status. I dont know how I will return to work in the office if they do not. We cant all drive, and parking is limited in DC and prohibitively expensive. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Cutting bus service is unacceptable. |
| Other | How does Metro account for low income riders/areas that need to travel into higher income areas? Will they lose access because of a terminal point being higher income? |
| Other | Why are you cutting so many north/south lines while also cutting yellow line service to north side of the city and potentially closing green line stations?? This is where so much growth is happening! Invest in GA Ave and 14th st corridors, these are lifelines! |
| Other | Not enough buses |
| Other | I am primarily a Metrorail user to get to work, so the bus cuts are inconvenient but not horrible for my professional life.I can figure out how to work with the reduced times when using buses to cross the city. |
| Other | Most important thing is providing transportation to folks who don't have cars â€” those who need it â€” that must be priority. |
| Other | If the metro rail system is reduced, the bus will be my only method of transportation. It is already my primary method of transportation in the city. I have been stranded countless times in the past year because of reduced bus services. |
| Other | If the Cheverly station closes and I need to get to a nearby metro station then this might not work. It depends on the nearby bus route available to those stations or parking available near those stations. |
| Other | Replacing Metrobus with regional bus service is viable if and only if there has been discussion and coordination to make sure the county can provide consistent and reliable service. |
| Other | As before, closer coordination with local providers would improve service throughout the region |
| Other | there are so many changes - I cant really determine what impact this will have on me. |
| Other | Keep all stations open. |
| Other | See previous thoughts. |
| Other | As long as metro takes into account low-income customers/essential workers, then this plan will work. |
| Other | 2022 is a long way away. WMATA should be planning how it will quickly ramp up to deal with new riders - not exploring further service cuts after the pandemic is over. |
| Other | Again, we must always maintain an affordable public transportation network for all citizens. |
| Other | I already prefer metro because the buses dont run often enough. |
| Other | You say you will not compromise people who rely on the bus service. I oppose any plan that does not accomplish that. |
| Other | Im not sure how this would affect me exactly, but I think prioritizing low-income riders and essential workers makes sense. To be honest, you should be doing the same thing with metro rail service. |
| Other | This plan eliminates the closest route to me that connects me to both Metro rail and my current employer. This would add at least 10 minutes of walking to an alternative stop and might not even be viable for my commute at all. It would definitely reduce my travel into DC for recreation/entertainment/etc. |
| Other | Metrobus is already unattractive in the Hyattsville and College Park area. I cannot imagine how 50% LESS would work out. |
| Other | Bus service is valuable to more people than just essential workers. |
| Other | The absurdity of your proposes continues. |
| Other | This will disenfranchise many and could be viewed as inequitable |
| Other | We need more regular and frequent bus services |
| Other | The elimination or continued stop of some lines would make getting to and from work an obstacle. As a low-mid income worker I depend on the bus for transportation weekly when we are in person. |
| Other | We need to promote the usage of metro, and all public transportation, in order to achieve an inclusive and sustainable development. This is NOT the time to cut public transportation. I am strongly against it. |
| Other | n/a |
| Other | Pues creo afectarÃ¡a mucho a los que viajamos en bus si recortan porq yegariamos mÃ¡s tarde a nuestro trabajo |
| Other | I and other Federal workers need 18P to get to and from work each day. |
| Other | Unless routes are redundant and have low ridership, every route is crucial for someone. If it came to it, I would want to see exactly what plan is being proposed. |
| Other | If trains and busses are reduced so drastically, then any workers will be forced to spend 1 upwards of \$20/day or night catching rides and rideshares to get home, etc. |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | I am particularly concerned about having a connection from south east to the rest of the city, I think these changes are fine so long as we can ensure folks in low income wards don't just have access to the essentials like food and medical care, but to jobs and other economic opportunities outside of their ward |
| Other | I appreciate the considerations that are being made, however my concern is the note about combining routes. How is Metrobus addressing volume on buses. Were in a Pandemic and there are often still too many people on buses. It raises concerns on if we are actually doing our part to stop the spread. When really what should have happened was increasing the frequency of buses and having more buses available... Because you cut half the bus when you can only enter from the back and depending on the size of the bust protecting the driver... So now regardless of desire to practice physical distancing you are not. And for many of us we make the decision to put our health at risk due to the need to be somewhere and not having a swift back up option due to reduced service times. |
| Other | No |
| Other | There isn't enough information to make an informed decision. Given you are considering closing Van Dorn and Eisenhower stations, residents in NoVA are having their options significantly reduced. |
| Other | I don't have a job so being able to take the bus for free would help out |
| Other | I believe if services are not cut back its intirely this should work. Give ppl the options when riding on metro buses or trains. |
| Other | if you focus on areas that have the most riders than what about the people who are in areas that dont have the most riders . they wouldnt be able to get around which would be fair . |
| Other | During the pandemic, busses on Wisconsin Ave were cut to every 30 minutes. However, instead of staggering 2 different lines so a southbound bus arrived every 15 minutes, they OFTEN arrived back to back, so if you missed one, you missed 2 and had to wait 30 minutes for another 2 busses to come. Please have a better plan for lines with more than one bus. |
| Other | I work at a bank and use the metroway, metro rail, and Fairfax connector bus to commute to and from work |
| Other | Depends on what the plans are, what routes and the options offered. |
| Other | Keep the current schedule running |
| Other | Sound good |
| Other | It already takes me over an hour to reach many destinations, then to often wait over an hour to head back over another hour to get home.Making it longer is ridiculous. |
| Other | Everyone needs a ride but to do harm on these lines, will hurt everything. |
| Other | I want service to be expanded but also streamlined |
| Other | Maybe this is an opportunity to go through a full network redesign? |
| Other | It Will hurt everyone who work within those areas as well. |
| Other | I am military working at the pentagon and no parking is available for me. Metro bus is my only option. |
| Other | Its fair. |
| Other | Your not specifying the route which make it impossible to answer far as for me going to an from. |
| Other | I need to get from Columbia Pike and Walter Reed to Crystal City Metro Station, Pentagon City Metro Station, Pentagon Metro Station, and Mark Center Bus Terminal |
| Other | at least it takes into account those most reliant on bus travel |
| Other | It worries me about not reducing service when we are somewhat back to normal. It would seem that you would want to encourage more people to return to the bus and make Metro once again the way many of us can travel within the District. |
| Other | I mostly depend on metrobus to service my daily needs. To cut service would be a hardship let along overcrowded buses which can lead to on for seen circumstances |
| Other | I dont use metrobus for my commute anymore. |
| Other | Need regular and reliable service downtown |
| Other | This would be catastrophic. |
| Other | Yes we all |
| Other | In an effort to preserve revenue, this seems logical given the nature of stakeholders using public transit |
| Other | Some bus I do ride a lot need those routes |
| Other | Helping customers get to their destination |
| Other | I agree with the proposal |

| Route | Proposed 2022 Metrobus service changes |
|-------|--|
| Other | People are more likely to be comfortable on a bus than metro and if buses are over crowded and people need to default to a car, traffic will return to the nightmarish state it was pre-pandemic. you need to encourage people to take transit for many reasons including the environment |
| Other | It will be easier for me to get to work |
| Other | Especially weekend service |
| Other | Glad to see were focused on equity when it comes to ridership |
| Other | How do you focus on only those groups? All urban residents are encouraged to use public transit for many reasons that have nothing to do with your selected audience |
| Other | This looks like way more laziness by WMATA while you pay the psychos in ATU to do nothing but be crazy. |
| Other | When Metrobus was only coming 50% of the pre pandemic level, it was almost impossible to guarantee I would make it to work on time. |
| Other | Overcrowding would start the Pandemic again. Start with no fees for parking for @ 3 to 5 months. Most people may start back riding metro into DC. Or, the Peak times of riding \$2.00 anywhere flat fee, limit 1 to 3 months to get people back to riding. Just let people know it will change. Be transparent about increases. Make it inviting to come back to Downtown DC to work. Just be transparent about future cost. |
| Other | not sure how your plan to cut metrobus lines will reach more customers, especially those who have limited mobility and may not be able to travel to a farther bus stop if their preferred line of service is stopped |
| Other | Need every day |
| Other | I think you should just keep the all of the routes and maybe cut the Service time |
| Other | Should be based on ridership alone |
| Other | I only ask that you look out for low income neighborhoods! |
| Other | This is all fine, provided there is NO change to the Metro rail service - otherwise people will need the bus routes to still work correctly |
| Other | Barely ride bus |
| Other | Need more bus service |
| Other | I look at your proposed changes and shutting down of bus routes. You did not take into account the low-income or essential workers, it looks like you are basically cutting those routes out |
| Other | none at this time |
| Other | In January 2023 will metrobus service be reduced to 25%? |
| Other | I agree with the plan being offered. As long as the service isnt completely eliminated. |
| Other | No reduction in bus service is acceptable. We are facing climate catastrophe and working people are already suffering long commutes. You are really trying to make life worse for people in the DMV. |
| Other | The lines I rely on are already crowded both now and pre pandemic - reducing the amount of busses and the frequency will make them unusable, and I rely on them to get to my job. |
| Other | My route has already seen two service reductions and halving the one remaining route will make the bus worthless |
| Other | Prioritizing low income customers and essential workers is definitely my preference |
| Other | Me parece bien |
| Other | Metrobus services are very impactful and combining routes would be a significant barrier to me and lots of elderly who use the bus to get to and from. |
| Other | This is quite vague, which routes are you altering and which areas will have the highest traffic? Also, why make it easy to transfer to metro rail if youre reducing metro rail service? Are you bringing back price reductions for transfers? |
| Other | I think the focus of this plan is on target! |
| Other | More important to keep bus service in DC robust than to keep metro service to outlying areas. People in suburbs with cars are going to be working from home.... let them wait/face drastic service cuts first |
| Other | Yes if it also included essential workers that work at night |
| Other | No comment |
| Other | If riders are back in the office, we need the buses to get there. If people are not back in office, we need means of getting around without cars and rely of bus service. |
| Other | we all hate the bus service decreases, but at the same time I know you have no choice. I hope that ride on and the bus can step up and replace some of the discontinued routes. |

| Route | Proposed 2022 Metrobus service changes |
|-------|---|
| Other | Metro is the most reliable mode of transportation for residents east of river. So whatever you do you cannot cut of the buses that service these communities either serving as the transport to connecting metro subway or constitutes their entire transportation experience. Metro will be funded money thru the Cares Act and probably additional funding in congress.. consequently metro needs to better manage its money. Every year you are making budget slashes before the pandemic and minority communities and those east of river took the hit. Therefore you do not have people who can give your budget wholehearted support because you do this song and dance every fiscal year and NOW you truly have a crisis |
| Other | I support protecting those who are most in need of buses for transportation- they should be the priority |
| Other | This cuts out points were i would need to go for work. |
| Other | I am a nurse working at dominion hospital I and many patients use public transportation Mental health patient struggle financially It sounds like curt and limiting public transportation access to this hospital making difficult for me get to work vTimely and patient to get to hospital |
| Other | Extend benefits of government beneficiary program to contractors as well. Many contractors already ride Metro Rail and Metro Bus at Walter Reed but aren't offered any incentive through their employment |
| Other | Keeping service currently |
| Other | Do not decrease service. Find the money. Raise taxes. Raise hell. |
| Other | No way. Why? |
| Other | There are other ways to travel, cutting buses that are a drain on Metro resources is encouraged. |
| Other | Dont know how much Ill need the bus until the federal government goes back to 100 percent. Were still working at 25 percent. |
| Other | Does not seem fair to reduce public transportation even further. |
| Other | ¡Excelente! |
| Other | I'm not opposed to this plan but I'm not sure if it will be implemented correctly. |
| Other | Should consider providing continued services for low wage workers |
| Other | Less bus service would hurt all areas not just the ones listed above. |
| Other | I have a disability and rely on buses to get my groceries |
| Other | But many of these people need reliable transportation early in the morning and later at night. |
| Other | Love the emphasis on low-income riders and the routes with grocery stores. |
| Other | This would be a catastrophic nightmare...You are saying that while we are in a pandemic that you operate at 75% BUT when we return to normalcy you operate at 50%??? Do you actually hear or understand what you are saying and really have any logic to that? |
| Other | Noop starting now |
| Other | In addition to the listed riders, there are essential employees throughout the region that rely on bus services, especially express bus service to the pentagon. These lines could possibly use adjustment, but not elimination. |
| Other | Currently more metro bus set |
| Other | I would be willing to sacrifice bus routes where Metro provides service to make sure more essential workers can use the bus. |
| Other | There are more Travellers than before, the services should be increased not decreased. Also public transportation helps in promoting a Green economy |

| 2022 proposed Metrobus service changes (Spanish) | Translation |
|---|--|
| Esta situacion no es adecuada, por que se le debe dar fluidez a la trasnportacion del distrito | This situation is not adequate, because DC's transportation should be fluid |
| Hay rutas como el 16 A que son necesarios | There are routes like 16A that are necessary |
| I dont see any exceptions to the options regarding peak hoursTwo different answers for me | I dont see any exceptions to the options regarding peak hoursTwo different answers for me |
| No deberÃ-an hacer ningÃ³n cambio hasta que no se normalice todo hacer cambios basado en la reducciÃ³n por la pandemia no conviene trabajo hasta tarde y necesito el servicio | They shouldn't make any changes until everything goes back to normal; making changes based on reductions due to the pandemic is inconvenient; I work late and need the service |
| Pues creo afectarÃ-a mucho a los que viajamos en bus si recortan porq yegariamos mÃ¡s tarde a nuestro trabajo | I think it would really impact those of us who travel by bus if they cut back because we would get to work later |
| Me parece bien | Seems good to me |
| Ã¡Excelente! | Excellent! |

| |
|---|
| Proposal to close 22 Metrorail stations |
| I am living 5 min walk from Grosvenor Strathmore and don't have and don't want to buy a car |
| Greensboro is essential for my commute |
| Clarendon stop open is a must for our family |
| don't close any stations not acceptable, reston town center is nowhere near any other station |
| this is outrageous. people plan their entire lives around how close they live to these stations. |
| need Clarendon stop open |
| College Park station is incredibly crucial and serves the University students. Especially those who live out of state and use trains as a way of transport to get home. |
| Closing these stations would prevent me from getting to and from my job and my community. |
| Need metro for work and daycare |
| This is a laughable proposal |
| Opening the Silver line as soon as possible is key to the regions economic recovery. |
| Need more orange and silver line trains open especially at Clarendon and VA square |
| DO NOT CLOSE TAXPAYER FUNDED METRORAIL STATIONS!!!!!! |
| My metro is cleveland park. If it is closed I cannot take metro. |
| Need these stops to get to work, take care of parents, and get our daughter to daycare |
| do not close EFC or Clarendon |
| the closing of virginia square metro and clarendon would impair my ability to travel |
| Greensboro is main tysons stop, we work right next to it |
| Do not close east falls church metro |
| Please do not close these stations, would be a significant inconvenience |
| Keep East Falls Church open! |
| Virginia Square and Clarendon are my 2 most frequently used stations |
| I commute daily from Clarendon to McLean (I work at Capital One). |
| We rely on the metro for daycare and to get to work. Need these stops in Virginia open |
| The stations I use most frequently would all be closed. |
| I and several other commuters that live in the Grosvenor park area rely on this station to get to our jobs. |
| Please do not close Greensboro |
| This would cause a reduction in my salary as I am hourly at the hospital and would have to leave early to get my daughter from daycare in Clarendon |
| These stations serve many commuters 1Not workable - do not close |
| Van Dorn Station is home to thousands of apartments and townhomes - if there was no metro rail, the Duke St traffic would be impossible. Please keep Van Dorn open |
| Not smithsonian. Only station that works for me by the mall |
| Grosvenor is the only station reasonably close to my house. |
| For these to be closed would kill the community of each of these stations. |
| Using Clarendon metro is integral as an essential worker |
| Virginia Square is an essential station. |
| No other station within walk or commuting distance from home (E Falls church) |
| I've been teleworking for the last year due to the pandemic but I expect to need to be able to use the metro station at Grosvenor Strathmore daily again in 2022. The other stations are not in walking distance from my apartment. |
| Don't close Clarendon |
| Do not want Grosvenor station |
| Don't close east falls church!! |
| please keep clarendon open!! |
| Please don't do this |

| |
|--|
| Proposal to close 22 Metrorail stations |
| Why are the brand new silver lines being closed? Thats a major waste. |
| Grosnevor-Strathmore is a vital stop on the red line! |
| I use all of these stations frequently - do not close any stations |
| Please dont close East Falls Church metro! Its difficult to get to Ballston due to the 66 HOV restriction and neither that nor West Falls Church are in walking distance. It is the most convenient station if you live in between Arlington and Falls Church. PLEASE KEEP THAT STATION! |
| Need more stops open for accessibility |
| I would no longer take metro at all if these stations closed, particularly the McLean station. |
| Shut down Greensboro permanently imo. |
| This greatly impacts people who live in Loudoun County as well as students who go to community college and GMU |
| I live within 3 minutes of Clarendon and wouldnt ride if I had to go to Courthouse. |
| I strongly oppose the closure of these metro stations |
| Close either Clarendon or va square but not both |
| I take the Greensboro station to work. Not only is it myself and my company, but there are tons of offices in the area as well as the boro which is right there. I think this station needs to stay open especially when returning to work in September. |
| This would be devastating to my ability to commute to work. I would probably stop taking metro all together. |
| This will bottleneck parking, traffic, and ride time at my station (East Falls Church). Ballston does not include parking, so the other closest station, West Falls Church, will have to bear the brunt of all of us from EFC - I dont think it can handle it. |
| I live and work in this area and value the open status of the stations in Arlington. Please keep them open. |
| I rely on multiple of these stations for my commute to work. These should not close. |
| Very terrible idea that would force many people to drive into the city |
| Do NOT close Van Dorn Street |
| The McLean station is essential for me and many colleagues and friends to get to work. We ask that you please do not close this station. |
| I am very dependent on the McLean station |
| Closing of the stations would require me to move. This would be devastating and completely uproot my life. Especially at this time, this would be a horrible decision. |
| East Falls Church is critical for commuting |
| I live next to East Falls Church, use it for commuting, and so not live near any other metro stop. |
| Would be ok closing EITHER Clarendon OR Virginia Square, but not both. Closing East Falls Church is a tremendous loss to the community and a hugely big deal. |
| Moved specifically between VA square and clarendon. Would definitely move in 2022 if these closed. |
| Our family moved to our current home due to the location between the Virginia square and Clarendon metros. We need metro stops within walking distance as we cannot drive |
| I use Clarendon Metro daily. I need this stop to remain open. |
| Do not close Cleveland park. Will kill local biz |
| Leave Grosvenor-Strathmore open |
| Do not close Clarendon and Virginia Square! |
| Do not close Clarendon and Virginia Square |
| my work is next to Clarendon metro, and this would severely and negatively impact my ability to get to work |
| Do not close both Clarendon and Virginia Square. |
| Do not close orange/silver line stations. |
| I count on the East Falls Church station. |
| This is insane! |
| Absolutely not |
| Currently live in Clarendon - from this neighborhood Ballston and Courthouse would be too far |
| Please keep either Clarendon or Virginia Square open. One or the other of these needs to remain open for riders in this corridor. |
| Grosvenor-Strathmore needs to stay open!! |

| |
|---|
| Proposal to close 22 Metrorail stations |
| Wouldn't be able to get between work and daycare in time |
| Would have to move daycares as we rely on the metro to get our daughter to the center |
| Do not close east falls church metro |
| There are a lot of residents that use the East Falls Church Station. It would be devastating to the community as far as convenience and to the property values if this station was closed. |
| Desperately need the Clarendon metro stop to stay open. We moved between the Virginia square and Clarendon metros due to these stops and chose daycare to be close to the Clarendon metro. |
| During non COVID times I take the Metro to College Park from U Street everyday. Shutting down this service is a huge hinderance to anybody who works in College Park and doesnt want to live with college students. |
| Do not close Grosvenor Station |
| College Park station is vital -- its already difficult enough to commute to the University without closing the closest station. |
| Huge impact if Strathmore Station is closed |
| Absolutely NOT. I take metro to work every day from East Falls Church metro. |
| this would negatively impact my commute to work |
| Need the McLean station to be open to go to work |
| i could maybe understand closing VA Square since its close to Clarendon, but the rest are all kind of far from each other so it doesnt make sense. |
| Closing the Clarendon metro stop would be disastrous for my commute. |
| Closing stations will mean that people will find another way to get to work and they will not come back to use metro ever again. This option is the worst for addressing your financial issues. |
| Do not close East Falls Church. |
| Keep Clarendon station open |
| Closing Grosvenor-Strathmore is a deal-breaker for me, especially if service is reduced to Forest Glen. |
| Please do not close Clarendon Metro |
| some of these arlington stations are way too important to be closed!! this would be a terrible idea |
| East Falls Church is not near any other station |
| Please keep the East Falls Church Metro open. We are expected to be vaccinated and back to work by then and will rely on the metro to get to work every day |
| Most of these stations (especially Arlington Cemetery, East Falls Church, and Federal Center SW) are not at all near enough to any other station to warrant closure. |
| I would never take the metro again to commute for work if this happened |
| EFC serves such a broad community! |
| I need Greensboro to get to work |
| Need Grosvenor Strathmore |
| Housing and childcare were chosen dependent on these locations |
| I require Greensboro for work |
| This would make my commute more expensive |
| East Falls Church will be used more once schools reopen and COVID cases decline. |
| Permanently? Clarendon and VA Sq are needed. |
| I live near East Falls Church and have oriented my commute around that station for the past 13+ years. Closing it would have a tremendously negative impact on my ability to get to work. |
| I live walking distance to Clarendon, this would be a very big hassle when getting back to work. |
| This is nearest metro to our apartment and we dont have a car. Closing the station would make it difficult for us to get to work if we are expected to be physically back in the office in 2022. |
| I live at Grosvenor Park precisely because it is CLOSE to the metro!!! Madness!!! |
| There's a ton of construction going on in Tysons and McLean! We need those metro stops to remain open |

| |
|--|
| Proposal to close 22 Metrorail stations |
| This destroys the metro- these stations are critical !!! |
| Grosvenor metro is essential as so many of us live in that immediate area and commute to DC to Rockville |
| The McLean and Clarendon stations are critical for my commute right now |
| East Falls Church should stay open in particular. |
| Easy Falls Church should remain open |
| staff at UMD would not be able to easily get to work and students would be impacted as well |
| My walk time to and from the metro would increase by ten minutes each way |
| I work across from Eisenhower Avenue, the closure would mean I have to drive to work |
| Eisenhower will get more business. They are building more apartments and they are putting up a Wegman's across the street. |
| Keep Eisenhower open |
| NEED MCLEAN TO GET TO WORK -CAPITAL ONE |
| It makes no sense to close both VA square and Clarendon. If anything you should keep clarendon and close VA square and Courthouse. |
| Absolutely not. |
| stupid costs you nothing to stop at a station stop being so lazy |
| Do not eliminate the East Falls Church Metro. |
| I think Clarendon is a stretch to close, it seems a lot of use when things arent closed down. I do create with Virginia square though. |
| It seems ridiculously irresponsible to spend \$\$\$\$ to build stations that could never be used |
| If the Virginia Square metro was closed I would stop riding metro altogether. Ballston is a cesspool. If you close Virginia Square, you must upgrade Ballston and get rid of all of the sketchy people that hang out there that make it dangerous and uncomfortable. |
| Mainly use Virginia Square and Clarendon metro. This cannot close |
| Closing East Falls Church would significantly impact my commute and mean I would be unable to ride metro anymore, as there is no other station within walking distance of my house. I also do not have access to bus service to a different metro station. |
| We rely on the East Falls Church metro station for commuting. |
| The College Park station is extremely important for University of Maryland students and staff |
| McLean is a heavily used metro for work commuting once office complexes are filled again post-covid |
| Do not close Grosvenor-Strathmore. Big mistake. Youll actually lose money because those riders will find alternate transportation - they will no longer ride Metro. |
| Keep Grosvenor open!! |
| Do not close Clarendon station |
| Clarendon is right by my job |
| dont close any stations |
| I live by the East Falls Church metro station which is critical for me since I dont own a car to get around the DC metro area. Closing this station would make it much harder for me to commute. |
| My home is at Eisenhower Ave. The next closest is Van Dorn. Closing both would mean I would not use metro. |
| To cut off all these stations would cause severe overcrowding at the remaining stations, esp if trains are running 30 minutes apart. |
| Closing both Clarendon and Virginia Square presents significant inconvenience. Recommend closing either one or the other, but not both. |
| Would be very inconvenient to close the clarendon station |
| McLean station is vital to my ability to commute to and from work. |
| I live in ashburn and need the metro |
| Closing any of the stations places undue hardship on the ridership and puts people on the already overcrowded roads. |
| I rely on East Falls Church metro station |
| Way too many orange line closures |
| Do not close Grosvenor and don't use data indicating reduced ridership during COVID as evidence the station isn't needed. Grosvenor has Parking that nearby stations do not. Don't close Grosvenor!! |

| |
|---|
| Proposal to close 22 Metrorail stations |
| East Falls Church is a CRITICAL NEED station |
| ABSOLUTELY NOT! I rely on Metro to commute, and adding a 7/10 mile walk to Ballston is unacceptable |
| I wouldnt be able to get to work without the College Park line. My husband is disabled and also relies on this line to get downtown. |
| Absolutely not. This arrangement severely limits transit options in Arlington where a large portion of DC employees reside. |
| EFC may be near to other stations, but its not near for the user/for traveler accessibility. Closing EFC would run counter to the public transport goal of limiting cars on the road--it would take at least an hour to walk to the WFT metro station, and longer to Clarendon. |
| A lot of those stations aren't close enough to any other to warrant closure. |
| These stations do still have ridership |
| Use grosvenor metro for daily commute |
| Several of the Arlington stops listed are usually packed pre-COVID. It would add even more pressure to the Arlington stations that remain open |
| This would drastically impact my commute and I would not be able to use metro if this happened. |
| The Clarendon metro station is my closest location. |
| Located in Reston specifically to take advantage of Reston Town Center metro |
| need mclean station for commute |
| Please do not close Greensboro Station |
| These stations are critical to my ability to get to work and home. |
| Do NOT close stations, particularly East Falls Church |
| IF you open the Silver Line extension; I would use it! |
| Please dont close Grosvenor-Strathmore!!!! |
| Est Falls CHurch is not close to other stations for people walking. |
| This would be devastating to falls church. |
| Archives is one of the two stations I use most frequently as it is the one closest to where I work |
| As a Cleveland Park resident, this would greatly disrupt my morning commute. My partner and I chose our apartment for metro proximity and to lose this would be frustrating. Furthermore, as the operator of a Cleveland Park restaurant, the impact on my partner's business could be devastating as the restaurant industry continues its recovery. |
| Eisenhower must be kept open. Very important. |
| I will need to use innovation to commute to work |
| I would only approve this if it is for a temporary basis (one year or less). |
| Cant close Clarendon. Too many bar bros would be drunk driving instead. |
| We bought our home specifically for access to the Grosvenor train station as I cannot drive. This would be a travesty. |
| This would impact my ability to take the metro to work, because I need access to the Greensboro station |
| College Park serves a vast amount of students, most don't have cars. As they're trying to work for their future many of them get internships in DC and take the Metro down to work. Cutting off the College Park Metro line would severely harm all the students and citizens of College Park, as well as impacting DC revenues. |
| East falls church station is NOT close enough to other stations. This would be detrimental |
| I rely on some of these stations for my work and travel. |
| EFC connects to silver line. Makes no sense to close this one. |
| Need orange and silver trains open |
| Due to the growing development in reston, rtc needs to be open for easy access, whiele reston east is not close enough by bus |
| Need greensboro for work. I could get off at tysons and walk, but Tysons isnt walkable like D.C. is, so that wouldnt really work either |
| I live in Cleveland Park and I am 100% opposed to this suggestion. This would make my commute way more inconvenient. |
| The Cleveland Park Metro stop is conveniently located. |
| If Grosvenor-Strathmore is closed then I will be forced to move, forcing undue hardship on myself and my family. |
| Grosvenor is packed when not covid times, don't close it!!! |
| I had been utilize Grosvenor Daily, especially with COVID and shots will be back to using daily in summer 2021 |

| |
|--|
| Proposal to close 22 Metrorail stations |
| Closing both Clarendon and Virginia square would leave us stranded. |
| This would really limit people coming into DC from Arlington and put SO MANY MORE cars on the road. Just ridiculous. |
| UMD will be open at full capacity by January 2022. Why would you close the College Park Station? Students/faculty/staff are heavy users. |
| Do not close Clarendon or RFC |
| I rely on EFC Metro to get to work. |
| East falls church is not near other stations for those that are able to walk from there neighborhood. We should be encouraging those walkable options. |
| Take Grovesnor train daily |
| I do not support the closing of East Falls Church metro. |
| I rely on East Falls Church for transportation. |
| Clarendon must stay open |
| East Falls Church rider |
| LOL |
| Clarendon and Reston Town Center should remain open. |
| I use Mt. Vernon Square and Clarendon. |
| McLean is a major station for capital one and Hilton employees. |
| NO NO NO NON NO |
| Please do not close Grosvenor-Strathmore station. This my only cost-effective method for getting to my job in Downtown Washington, DC. |
| My family relies upon the East Falls Church station, together with its adjacent parking, for our commuting needs. |
| I would not be able to commute |
| I live within walking distance of East Falls Church but not West Falls Church. Closing EFC would make me totally unable to commute using metro |
| This is a terrible plan!!! It takes away any incentive for people to move out to VA and commute to DC. This would be the worst case scenario. |
| I commuted from East Falls Church for the last five years and will do so again once my downtown DC office has returned to in-person work, but if you were to stupidly close metro stops I and many other people will have no choice but to turn to driving. |
| This is my metro stop |
| Closing Virginia Square AND Clarendon leaves a big gap for many in those areas that makes riding the metro unfeasible. Many people living along the Arlington corridor pay higher rents due to proximity to metro, and chose their locations based on metro access. |
| As a I stated before, I go to UMD and getting rid of our station would make it impossible for me to get into the city and home |
| The McLean station is in a high-traffic area that is difficult to traverse on foot. Additionally, thousands of employees use that station to access Capital One as well as other large businesses with headquarters in the area. Closing an already-built station seems like an incredibly inefficient cost-cutting measure. |
| Closing East Falls Church is ridiculous, as well as a lot of these stations. People live near these for a reason and in a post-covid world, they will need them back. |
| Metro needs to reduce labor costs. The ATU is driving up costs. Metro should be about serving the public, not a jobs program for union members. |
| I live in College Park at the University of Maryland. I use the College Park metro station to get to D.C. I have no car, and can only access this metro by UMD-provided bus. If the station were to close, I would have no way of getting to the metro, and thus, no way of getting to D.C. |
| Clarendon is a critical metro location for my use. Understand the budget concerns but as a Silver Line rider I would prefer clarendon remain available |
| These are important stations you clowns |
| Closure of Clarendon and Virginia Square would be a significant negative change in service. |
| This would dramatically impact my ability to use metro to get to work. |
| New stations have zero ridership close them first |
| I live at East Falls Church, and have relied on orange and silver lines to commute for more than a decade. This would impact me very significantly, given I am a solid supporter of public transit, for policy and personal reasons. Pls reconsider, thanks. |
| PLEASE do not close these stations. COVID will not last forever and folks will return to work, go to the museums, visit the city etc. |
| College Park metro station is crucial for transportation to and from the University of Maryland. |

Proposal to close 22 Metrorail stations

Some people can't travel to other stations so closing ones near them is unfair. This will probably decrease ridership even more since people can just work from home if they really want to.

Keep arlington stations open. People made significant housing choices based on a transit expectation

I really really really want the Silver Line extension to Dulles open. Like please. Also not sure if stations are mothballed and put into a state of very low maintenance or just completely abandoned, prefer mothballed.

My daily commute is from Clarendon metro station to McLean metro station

Grosvenor is an extremely important station used by many to get to/from different part of the city. This station should not be closed!!

This is a necessary step to preserve resources. We should not be funding metro to keep the sites open if I can ship is so low. In most cases walking to a adjacent metro stop or using a bus would supplement the missing station.

Get real!

These are very popular metro stations that would make travel much more difficult if eliminated

This would add 5 minutes to my commute, which may prompt me to walk.

I rely upon the East Falls Church station heavily and would see its closure as detrimental to my every day commute.

Grosvenor is my metro station

East Falls Church is not very close to other stations

This will not work for me or my neighbors, and will disenfranchise tens of thousands of commuters. You cannot simply close 20 stations, and believe that's an acceptable way to handle this situation. Instead of .3 miles away, my next metro station will now be nearly a mile. That is a major difference, and this is a wholly unacceptable proposal.

I live by Grosvenor and use it often. This is why I moved here. Please don't shut it.

As a student at UMD, this would make it much more difficult to commute around the area

We live right by and use the East Falls Church metro to get to work. This plan would cause significant delays in our getting to and from work every day.

Don't close Clarendon

Don't close Grosvenor. The parking at that station is crucial.

Not sure what pending silver line phase 2 is to comment

need mclean station to get to work

Grosvenor-Strathmore must stay open since it is the southern-most station with parking AND it services the arts center

keep Arlington

Eisenhower Ave station provides critical access for military personnel who reside in the local area and commute to locations such as the Pentagon Station. Closing this metro station would significantly impact their ability to use mass transit for commuting, and increase the cost of traveling to and from work.

Keep Grosvenor

Cleveland Park is essential when businesses reopen

I use the Cleveland Park station regularly, and having to walk to woodly or van ness would seriously impact my commute.

This would be extremely detrimental

College Park needs a metro station

Stop closing stations that I live and work near, thanks.

Many people in the College Park area need the metro to get to DC for internships, work, and other necessary functions

Please do not close Grosvenor-Strathmore station.

No, the Mclean station is a critical throughfare for the region.

Need the whole silver line from Reston on!

I commute to work using Metro. I am expecting to return to the office in the fall. I use the east falls church station. Using another station would make using metro harder than driving so I would have to stop using metro.

How would commuters, including students who attend Bishop OConnell High School or travel into Washington, DC, get to from work/school otherwise?

This is utter madness. All the money and time put into the Silver Line would be wasted. The riders will return to crucial stations such as East Falls Church, once the pandemic is under control.

Proposal to close 22 Metrorail stations

Lots of government employees rely on all routes affected. Leave all routes open.

i dont see how you can close both Clarendon and Virginia Square . that would move everyone to Ballston which would be a nightmare. Choose one of these but not both

Clarendon should remain open

East Falls Church & Clarendon lines are the life blood of the community. I strongly oppose closing these stations.

I use Grosvenor strathmore quite often

This is just patently Ridiculous on its face

This would work as long as West Falls Church stays open

I live in cleveland park and specifically moved here because of the convenience of the metro. This would double my commute time and I would likely have to move.

East Falls Church is an important metro stop for my business and there are no nearby walkable stops.

The college park station is one of the most accessible ways for UMD students to access other parts of the DMV area, and closing it would greatly harm the campus.

I think the metro should be more ubiquitous

This is the least desirable of all proposals.

McLean stop is used by myself and many other employees of nearby companies. No way to get to work if it is closed.

I rely on both the Clarendon and Reston Town Center station to get to and from work. This would severely ruin my commute to work.

EFC is walking distance from many homes!!

I will use Innovation Everyday.

I frequently use East Falls Church so this decision will greatly impact me

East Falls Church station is critical to my commute and my familys well-being

Need Clarendon metro stop to stay open. It's the reason we moved to our current apartments for chose our children's daycare. Closing this stop would cause us to uproot our children and move elsewhere. PLEASE keep this metro stop open!

I live near Va Square/Ballston stations and if both Clarendon and Va Square were to close, I shudder to think how crowded Ballston would get!!

East Falls Church should not be closed the distance between West Falls Church and Ballston is too far to go without a station in between.

I rely on the Cleveland Park metro station.

Absolutely not. Closing Clarendon, Virginia Square, and East Falls Church reduces home value and will cause a a bottle neck at the other stations. Why you close Clarendon AND Virginia Square. Leaving only one option for BOTH stations. We bought our home due to the proximity of the metro, do not decrease our home value and increase my commute time by 25 minutes.

Need Virginia square and clarendon

Closing Clarendon would be a disaster for me. Please reconsider

It's outrageous to propose closing EFC when it would result in so many people having to drive into other stations, causing parking issues and further delays. There is not another metro stop â€œcloseâ€ enough to justify this, period.

We need all these stations open.

Closure does not make sense given the expected availability of COVID-19 vaccines and the high likelihood of quick economic recovery.

East Falls Church is no where near another station. VA Sq and Clarendon are next to each other, so you could close one, but not both.

Do not want Grosvenor to close

I dont like the idea of closing stations.

Closing the Clarendon and Virginia Square stations would mean that a long walk would be required. This would be extremely inconvenient and harming to everyday life including grocery shopping.

Grosvenor Strathmore is a wonderful station and serves multiple communities plus the arts center at Strathmore - please dont close it!

Distance between ballston and courthouse is too far

We rely on East falls church every day for our commute. It is not close to any other station and would create significant inconvenience.

Clarendon is a key station. Do not close it!

Do not close stations. Reduce hours or have more time between trains

I rely on Greensboro and East Falls Church to commute to work.

Proposal to close 22 Metrorail stations

I use several of these stations and they would affect my ability to use the metro if closed

Please dont close the College Park Metro Station. College Park being so close to DC provides numerous opportunities for college students that dont have access to cheap transportation. Please.

This would be fine for my commute but would greatly reduce the likelihood that I would use metro on weekends

The Clarendon Metro should remain open to support the surrounding businesses.

If you have to close stations, you should not close both Clarendon and Virginia Square.

Cleveland Park and Judiciary Square are two of the stations I used most frequently pre-pandemic, and expect to use again frequently post-pandemic.

Need Grosvenor to remain open

HELL NAH

Clarendon and VA Square especially wouldnt work.

Closures of Clarendon, Virginia Square and McLean stations would not work

I rely on metrorail (orange/silver lines) to commute into the city from East Falls Church, VA every day. The surrounding stations (West Falls Church and Ballston) are too far away to justify this proposed closure. If the East Falls Church station is closed, I would no longer use metrorail services - it would double if not triple the length of my commute.

People buy houses and rent apartments based on location to the metro, so this proposal would impact a lot of people.

Clarendon is an important stop and it's expected ridership will increase in 2022

It would be very difficult for me to get to work if my station closes

Clarendon must stay open!

Getting rid of both Clarendon AND Virginia Square metro is highly problematic

This would present a huge waste of the infrastructure and would risk decay from disuse.

I use Van Dorn station when 21A/D busses are delayed or not running.

Being near another station is undefined and apparently arbitrary, it just makes anyone but the lucky few who dont rely on those stations commutes longer.

I live or work at multiple of these stations and closing them would probably force me to stop using the metrorail service altogether.

Closing Clarendon and East Falls Church seem bold. The rest I get. I do wonder about the people who need parking at east falls church.

My work is near the Clarendon stop - I expect to use it regularly once the pandemic is over.

Grosvenor-Strathmore is vital for work.

Need to keep either Clarendon or Virginia Square

I live in Arlington and use metro everyday. This would require me to spend more time on my commute and less time with my family.

No downtown stations should close on weekdays.

McLean station is essential for thousands of people who work at Capital One. Getting rid of that station would create an increasingly difficult commute

As soon as in person work resumes, I will need access to EFC and McLean to get to work. There are no bus routes that handle that route.

Students at UMD need the College Park station

Closing stations should be an absolute LAST RESORT!

Terrible idea. We would not use if EFC was closed.

Do not close east falls church metro especially since it has the silver line connection. This would be a huge waste of public funds since silver line was just installed And invested in.

I would cease using metro rail for my daily travel needs

I normally take the metro to work at Greensboro Station. This will significantly impact my commute when I go back to the office in Fall 2021.

Need Mt. Vernon sq.

SAVE CLEVELAND PARK

My primary station is East Falls Church. It is walkable from my house, eliminating the need for parking at the station. If East Falls Church is closed, I will have to drive to and park at a different station (additional parking required, more cars on the road).

prefer reduction in service vs. closing station

As a UMD college park student, the College Park metro station is the only way I can access DC for internships or anything else. Closing this station would make it impossible for me to access the city.

| |
|--|
| Proposal to close 22 Metrorail stations |
| i need the clarendon/ Va square stops to take to and from work |
| Need Grosvenor for commute to work |
| College Park is necessary!!! |
| Please keep open east falls church, Reston town center |
| Accessing any metro station near east falls church would add 30 minutes to my commute which is unacceptable |
| I rely on Van Dorn for my daily commute |
| Too many stations, maybe close VA square |
| My commute is East Falls Church to College Park. I also use Metro for baseball games. |
| This would eliminate my use of metro entirely if these stations were to close |
| East Falls church and others with massive parking lots should remain open. |
| You're nuts. |
| We bought a property in Herndon based on proximity to the metro. This is a years long decision. |
| There is no point in opening a bunch of stations if youre not going to use them -- youre asking us how we want our money to go to waste |
| I heavily rely on this service. Please do not cut it |
| Please do not close Grosvenor-Strathmore Station! |
| Good but will lead to overcrowding at other stations. |
| I regularly use the College Park Metro Station. |
| This would not work for me. |
| If Grosvenor station is closed, it would be detrimental to hundreds of residents in the north Bethesda/Rockville area. This station is a god sent to al residents here who work in DC, especially downtown |
| Un opened or lightly used stations can be closed w/o major impact. Nearby stations can pick up slack |
| Closing of the Loudoun gateway station (or rather never opening it) would be wholly unacceptable. This is one of the major reasons we moved to the area! |
| I use both the Virginia Square and Clarendon stations |
| I use the metro to get to the airport |
| Works for me because I am close to Ballston but I am concerned about those at other Orange line stations crowding the Ballston station at a time when we should be distancing. |
| This is nuts |
| I will need Grosvenor-Strathmore after the pandemic slows |
| Fine cutting all except Clarendon |
| East Falls Church is my closest metro station. |
| Closing these stations would further destroy businesses that have already been battered due to the pandemic. |
| Need Clarendon metro station to access my office |
| College Park is a college town where many kids use the metro to go to work and that is part of the appeal of the school. Also, as someone who works in McLean, I find this stop necessary. |
| East falls church should remain open |
| I live next to Grosvenor-Strathmore and am dependent on metro transit for work. My wife has no car of her own and is dependent entirely on the metro station to obtain medical appointments and to work |
| Please do not. close East Falls Church! |
| obviously some of these stations have low ridership due to covid-19 and will come back to be high ridership when things start to reopen in 2021 |
| Please DO NOT Close Eisenhower Av or Van Dorn St, with the vaccine roll-out, workers are going to be commuting again so we need these stations. |
| Grosvenor Strathmore is NOT near another train station and many residents will need the use of this train stop in 2022. |
| I rely on the East Falls Metro Station to commute to and from work. |
| Please dont close the Greensboro stop - I rely on it to get to work every day! |
| Multiple stations listed are crucial and would completely remove the desire to use Metro. You would just be discouraging customers even further from using your service |

Proposal to close 22 Metrorail stations

These only have low ridership due to COVID. by 2022 it should be back to normal

That is too many to close. This will decrease ridership further because of the lack of accessibility.

This is a great option if pandemic conditions dont change. If were no longer in a pandemic, Id expect service to return to pre-pandemic levels.

Absolutely not! Open more stations. Not close stations.

Need Grosvenor open

I live near Virginia square and use the metro for work and would not like a longer walk for me to go to another station to use the train

Closing the Virginia Square metro station would have very negative consequences for my commute

McLean station is the only one in its area with parking

I only use the metro to visit the historical sites/museums. This would impact too many of them.

I cannot stress how much this would be a death knell for metro

Closing Clarendon and East Falls Church would make it completely impractical for me to ever take metro

This is an awful idea and would cause me to drive and not be able to take the metro

My husband uses EFC to commute every day

Keep Clarendon open. Shopping with Clarendon Market Commons, both Whole Foods and Trader Joes, plus many restaurants and bars. Major economic consequences to these businesses if Clarendon is closed. Walking from Courthouse or Virginia Square is NOT an option.

These stations staying open is vital to my using the metro.

East Falls Church is critical for my commuting to work

Silver Line Phase II MUST stay open; critical for millions of square feet of office and Dulles Airport

Need many of these stations, including Cleveland Park, College Park, and Smithsonian

This kinda just sounds like blackmail for those who own housing around these stations.

Please do anything possible but do not close Clarendon metro. There are so many people who rely on it!

I live in Cleveland Park, and have taken the station for the last ten years. Closure would be horrible.

I use Grosvenor to commute to work. It's in walking distance and I don't have a car. I would be screwed if it closed!

Grosvenor has apartment complexes all over. It is an important station to keep open.

Sure. As long as these metro stations reopened once regular ridership was established again.

This would make my commute so much more difficult to the point where I would consider moving to reduce my reliance on metro

I need metro to operate in Grosvenor to get to work and back. I do not own a car and I am completely dependent on metro!

Please please please do not close east falls church! This is nowhere near other metro stations and would make commuting by metro almost impossible for me. This proposal is sending the wrong message about the environment by forcing more and more people to commute by car. I would much rather use public transport but if you make it totally inconvenient that won't be possible

Arlington stops are very important to me

No station in the orange/silver corridor should be closed. There would be an EXTREME NEGATIVE IMPACT if any such station is closed, including Virginia Square or Clarendon

Millions invested into the silver line phase 2 and you already are talking about closing stations there? What a disgrace.

This would significantly increase and complicate our commutes as offices reopen

As a resident of EFC, I would essentially have to stop using metro entirely with this plan

East Falls Church is essential to me.

This would not work because I live by Van Dorn metro and it will make my commute too long

This increases my commute time drastically. It is not fair to people who purchased properties at high prices expecting to be close to a metro for that to then be taken away.

Keep Grosvenor Strathmore open.

We need College Park open as a family

The metro is my only means of transportation

Closing stations would significantly reduce whether I use WMATA at all.

The metro stations I use DAILY are on this list. I would no longer be able to use the metro for work.

Proposal to close 22 Metrorail stations

Frequently out of town guests are met at this metro station from DCA or IAD.

I and many others depend on the East Falls Church Station and it would be a massive disruption if it were to close

Clarendon and East Falls Church are used A LOT. That would be crazy to close those.

The only reason I moved out to falls church was the metro access, this is a life line to myself and my employees working to Rosslyn and DC

No absolutely not. I rely on east falls church metro station for transportation. Please do not close east falls church station.

I use Clarendon station daily. This would be disastrous for me.

fewer trains before closed stations

Clarendon isn't that close to other stations. The others seem manageable though.

This is a strategy intended to pressure Congress to cough up more money. Lets hope it works.

Please do not close Clarendon or VA Square. Youd be leaving that entire part of Arlington-- which is the most densely populated in the county-- completely out of a Metro option.

Do not close Grosvenor

closing the Clarendon station would remove a heavily used station and the alternatives are not likely to be used, the result would be less use of metro and a continuing downward spiral in service

The Clarendon and Greensboro stops would interfere greatly with work commutes.

This would make it extremely difficult for me to commute into the city. I rely on the Grosvenor-Strathmore station to commute to work, as well as commute into the city.

I use the Van Dorn station. Im ok with commuting to another station if necessary, but there are not many metro stations near Van Dorn that have parking for me.

I live near Clarendon so hope it or VA Square remain open at least during the week.

Use Cleveland Park and Grosvenor-Strathmore

This would be a real disappointing outcome and would discourage me from supporting WmATA in the future. Thousands of people have made living and work arrangements based on acres to these stations

Cleveland park is my station. Our neighborhood would lose small businesses and home prices would be affected.

It would be a disaster getting to work or downtown

Grosvenor is vital to suburban Maryland. It needs to stay open!!!! It is used by all in this part of longtime ruler county plus those attending shows at strathmore!

East Falls Church is not only my neighborhood stop, but also the branch point for Silver and Orange lines.

We depend on East Falls Church station for commuting into the city and would have a much harder and longer commute if it were to close.

I pay a premium to live in Virginia Square, if my station is closed I wont have a reason to ever use Metro

Not a good idea as many people still depend on those stations.

This would hurt so many commutes and communities that thrive on metro access. Please dont do this!

Absolutely not. If my station closes, the next closest station is 30 minutes away.

I use the Cleveland Park metro on a regular basis

This is a lot of stations to close and impacts many commuters. Decreasing frequency across stations is a far better option. Closing stations will also increase traffic and congestion given the lack of parking at many stations.

Low ridership doesnt mean no ridership. Those of us who have been working to keep things running during the pandemic have already put up with enough transit inconveniences

Haha seriously?

College park provides an integral transit link to the university of maryland and to the neighboring community. In addition it is planned to be a purple line station to provide a better integrated transit network and closing college park is counterproductive to the purple line goals.

Grovesnor is a great metro stop. It's very convenient and easy to go instead of going to rockville

It does not make sense for Clarendon Station to be closed instead of Courthouse. Clarendon is a larger area with grocery stores and less available parking.

Do not close grosvenor this is a main station that a lot of people walk too to get to Dc

I depend heavily on judiciary square. Please keep it operating as it is a lifeline.

The distance between Ballston and Courthouse is too far not to have a station between them.

Clarendon needs to stay open. The other stations are too far away for me, and bus-to-rail is not an option.

Virginia Square would probably be okay to close but closing Clarendon would be a really bad move.

Proposal to close 22 Metrorail stations

These stations might have low ridership now, but a lot of them will become much more popular once companies start returning to work

This is horrible for property value and extremely inconvenient! I would move out of the area if this were to be implemented.

I frequently use the Clarendon station and would prefer it not be closed.

I prefer having stations open even if they are close to other stations. Closing stations adds 15 minutes of walk time to my commute each way.

DO NOT CLOSE CLARENDON

I live closest to Virginia Square and then Clarendon; if both of these stops close, I will be forced to walk a mile in the opposite direction of my commute to get on at Ballston. This will lead to overcrowding in Arlington and will be extremely inconvenient.

Do not close EFC, crucial to silver line and DC commute

I love the Cleveland park metro stop.

Please keep the College Park station - it is the easiest way for students at UMD to get into DC for work, housing, and other opportunities.

Virginia Square and Clarendon are next to each other. That would be closing 2 stations in a row. Bad idea.

No alternative to EFC station. Nothing within walking distance.

Please do NOT close Clarendon.

the ridership at the University of Maryland stop will go back up once classes are able to resume in-person given the number of commuters, both students and staff. Prince Georges Plaza is not nearly near enough when it comes to commuting to school, especially since the universitys shuttles, etc, dont go to Prince Georges Plaza.

East Falls Church, McLean, Clarendon, and Arlington Cemetery are all vital stations that would impact me if closed. I believe the McLean and Clarendon stations would also negatively impact the local economy and low income employees who commute from the city to these locations for work.

Do not close E falls church

I use the judiciary sq station every day.

Easy Falls Church is a major hub.

i will not ride the metro at all ever given these proposed closures. prior to the pandemic i rode 5 days a week

This is horrible news and I don't feel any metro stop should close. If anything stops should be added. This is our public transportation and we should be growing it not making it worse. And to close Virginia square and Clarendon which are right next to each other are terrible.

I use Easy Falls Church, walkable from my house

East Falls Church is where you change trains from Orange to Silver. This station (pre COVID) served a huge number of people and keeps many cars off the road. Closing the gateway to the silver line is just stupid.

I live near Grosvenor Strathmore and specifically purchased my home based upon proximity to the metro.

Some of these stations could easily be converted to lower maintenance stations. They wouldnt have full-service offerings and could be staffed by few if any WMATA employees.

I use the Grosvenor-Strathmore station everyday, as do many others who live near this stop

It makes no sense to close the Eisenhower stations for the following reasons: ridership is likely low because A) the station was closed for an extended period of time for repairs and then B) there was a global pandemic. Decisions shouldn't be made until the world returns to normal. There is an explosion of housing development near the station but far enough to be too far from another station.

I think its a huge mistake to close stations, even if they are (somewhat) near to others. I rely on a Metro station being just a ten minute walk away, and would NOT use it if I had to walk thirty minutes.

I rely on the Virginia Square station to get to work. It would make my commute extremely more difficult if it closes

Grosvenor-Strahmore is my station and it's closing would greatly detrimental to my commute.

This would be terrible. I am still working from home now but expect to be using the metro again by January 2022.

Please do not close the Greensboro station!

near other stations is not the same as walking distance. This would severely reduce the walkability of our neighborhoods and our city, and decrease quality of life, air quality, increase traffic and parking issues. This is a terrible idea.

Depends on how the Post-Covid ridership resumes and when.

This is also ridiculous -- most of those locations have become major residential hubs.

| |
|---|
| Proposal to close 22 Metrorail stations |
| East Falls Church is not close to other stations. It should absolutely not be closed. |
| I use EFC STATION |
| Absolutely and utterly unacceptable to make communities invest in new stations and work to support them for you to close them. |
| Shutting down both VA Square and Clarendon would be a huge loss. Many businesses, restaurants and retail are at these stops and are critical to be kept open |
| I use the Grosvenor-Strathmore station daily. Closing Smithsonian and Judiciary Square would also increase foot traffic at Metro Center, which could make it incredibly difficult for homeless people who depend upon Metro Center for shelter. |
| All you will do is clog up the roads with people who are too far from other stations and basically bring the entire region to a halt. This proposal is absurd and obviously meant as some sort of bargaining position that no one intends to actually implement. Again, no world class city would close half at stations. |
| I would use innovation center every day |
| I live close to EFC metro and purchased my house so that Metro would be within walking distance. If you close this station, I will need to find parking for my car at another metro stop. So many of us rely on this station -- please do not close East Falls Church! |
| Use Virginia square for daily commute to hospital |
| Would never ride Metro if this happens |
| There is a huge community of houses and apartments at Grovesnor station. |
| PLEASE DO NOT DO THIS! You would be cutting out metro-access to all of Arlington, which has a high number of commuters. Closing these would lead to heavy traffic increases and marginalize individuals without affordable transportation. |
| The EFC metro station is regularly used and the public transportation alternatives are very limited in that area |
| There are big businesses at the Greensboro metro station and this is a newer station. |
| I depend on this for work and my livelihood would be severely impacted |
| Please don't close East Falls church |
| This strongly affects me and I hope these impacts arent permanent |
| Please keep Clarendon |
| McLean is heavily utilized by employees at nearby office buildings. Depending on when those companies reopen, it would cause significant parking congestion if McLean was to close. |
| Yes, there are bus alternatives to other nearby stations. |
| Closing the College Park station would severely limit my ability to drop my dog off at All Dogs Club, a local doggie day care. |
| This is a terrible plan. I require the College Park station for work. Once people are back in the office and back on campus this will be a critical stop. |
| This is the stupidest proposal of all of them |
| I need the Grosvenor-Strathmore station to remain open |
| The Clarendon station is critical to the success of this neighborhood! The area is robust because it is so easy to go downtown or live and work. Please do not close that station! |
| Provide busing from these stations to nearby stations |
| I live in Arlington and would likely use multiple of the Arlington stops listed here |
| Grosvenor and Cleveland park definitely need to stay open. |
| I usually look for apartment further from the city so that I can afford it. East Falls Church and Eisenhower are ideal for that. |
| College Park is an important station, will be especially important when the purple line is ready, and isnt close to any other station in a meaningful way (PG plaza or Greenbelt are at least 15 minutes bus) |
| I dont know how you can write off Innovation Center and Loudoun Gateway before they are open. It makes no sense to build those properties and never utilize them properly. And none of them are all that close to each other. I have no opinion on the further eastern stations as I dont know how close together they are. |
| East Falls Church is a busy station that is critical to my commute |
| This would be a devastating blow to Arlington neighborhoods serviced by the stations in question. Bad for business, bad for property values, bad for commuters. |
| Closing these stations would impact myself and many other people who rely on those stations for commuting and other trips |
| WHAT IS THE THOUGHT PROCESS HERE |
| We need a metro station in Clarendon |

| |
|---|
| Proposal to close 22 Metrorail stations |
| Please don't cut Clarendon. |
| I travel to McLean daily |
| Closing Clarendon and Virginia Square would be a complete disaster for the Arlington area. |
| Again, this would severely limit my ability to get places within the DC area as someone without a car. |
| I moved to be closer to one of the proposed stations, EFC, to help drastically cut down my commute time/spending. It was a rather busy station pre-Covid. |
| I rely on many of these stations on a daily basis |
| Virginia Square is critical. Please do not close. There is a lot of residential development occurring right now and ridership will increase soon. |
| This would disproportionately impact George Mason students who depend on the Metro to travel to and from different campuses, not to mention D.C. |
| Virginia Square is very close to Clarendon and Ballston and is unnecessary to maintain. It should be closed. |
| Closing stations is probably the worst option given the elimination of accessibility |
| Please do not close Grosvenor-Strathmore! |
| Grosvenor Strathmore is my main form of travel, and would impact me significantly if closed |
| Please do not close Clarendon station!!!!!! |
| I work near College Park Metro station. Closing it would force me to drive to work. |
| Need to use Virginia square for work commute for healthcare |
| Many young professionals who work in DC live in Clarendon. Shutting down both VA square and Clarendon leaves Courthouse as the closest metro, which is over half a mile away from Clarendon. This is a ridiculous proposal that will take away all appeal from Clarendon for young professionals like myself. |
| The College Park station services many nearby businesses, including the University of Maryland and NOAA, and closing the station would require all of those employees to find other means to commute to work. |
| This would severely impact our work routine, eliminating the ability to use Metro for work and result in extensive parking costs to work in the city, if even available. |
| This will cripple Metro. You might as well shut the whole thing down. |
| Absolutely would not work to close the clarendon metro. This would be devastating |
| The Grosvenor-Strathmore Metro Station is about to undergo major redevelopment but, because no commercial development is involved, I suspect this station made the closure list. PLEASE RECONSIDER YOUR DECISION, AS IT WILL COME AT A CRITICAL TIME FOR THIS MUCH NEEDED NEIGHBORHOOD ENHANCEMENT. |
| After spending five and a half years on a bike storage area at the East Falls Church metro stop, I am surprised that you'd consider closing the stop. Really... Why don't you learn to manage things better and maybe you wouldn't be extorting people with these threats? |
| Need Eisenhower station |
| I live and work near the Greensboro station and would be very disappointed if I could not use this station |
| I commute to my work via the McLean station and there is no pedestrian path between McLean and Tysons. |
| I use the East Falls Church metro frequently and many people I know do as well. It is a key mode of transportation for people who commute and the alternative station is a few miles away, which is a major inconvenience for many commuters. |
| Grosvenor is very important to my neighborhood. |
| McLean is a VERY important metro station and will tremendously hurt the surrounding community if it is closed |
| I do not understand the savings. Many of these areas have development around the stations that would increase demands for Ubers rather than using another station. |
| College Park is essential. The covered garage makes it easier for families. Greenbelt parking lot is not easy to work with. |
| Do not close any stations they are needed!! |
| This would significantly impact my commute. |
| The Eisenhower Avenue station is conveniently located for many apartment residents. Closing it would not only be a big blow to those of us that commute but also to the buildings themselves. I used the Eisenhower Avenue station to commute M-F every week and if it were to close I'd be very upset and have to find new living accommodations |
| This would directly impact public transit options at my home and my office (when we return to work). |
| Greensboro station is not very walkable from other locations. |
| Greensboro station reaches further into Tysons than Tysons Corner. The walk from Tysons Corner to the Greensboro office park, which is now very developed, is long. |
| I moved to Clarendon one block from the metro so I could commute to DC easily. If the station closes I will leave the area. |

Proposal to close 22 Metrorail stations

Stations should be kept open to provide access to citizens in the area. Many people have chosen their home based on access to public transport, and this will make road congestion even worse.

I don't understand what the term near other metro stations means in this context. Most of the stations are miles or more away from their closest neighboring station in terms of how long will have to walk or drive to get to them. It would effectively make metro much less valuable and make me far more likely to take a ride share or to drive myself.

Keep all Orange and Silver lines

No! this would be awful!

Grosvenor-Strathmore is a crucial station.

The Cleveland Park station is essential to the homes and businesses in the area and very important to me because of ADA accessibility.

Being near other stations isn't good enough for people who live nearby and go to these stations because of other factors.

Too many closures.

I am a East Falls Church metro commuter

I likely would use many stations on orange and silver for work and general transportation once the pandemic slows down next year

Mclean stop is our go to stop. The difference W fall Church is too far away. Plus Mclean is THE stop for the new Wegmans grocery store.

Once working from home isn't an option all of the above stations will be back up to their normal capacity!!!

Doesnt hurt me, impacts others.

College Park station helps connect University of Maryland students to DC, and should not be closed

Wow this would absolutely not be acceptable. Many riders at Va square and Clarendon would agree

I frequent the Clarendon, Virginia square, and Federal Triangle metro stops. My commute would be a lot longer if these were closed.

You could close either Clarendon or Virginia Square, but closing both means that youre going to be cutting off people who live between Ballston and Courthouse. I know that a large portion of the car-less Arlington population lives in those neighborhoods, so that would be a huge hit.

All orange/silver line stations in Virginia need to remain open. They are vital for our local transit.

I ride daily from Clarendon.

Grosvenor-Strathmore; please keep this station open. Only COVID precautions have decreased my ridership at this location.

EFC is essential to my commute

If this is a short term, temporary solution because people are still working remotely, sure this makes sense. But to do it permanently is dumb.

This is an outrageous suggestion. Closing stations is a terrible idea that will have tremendous negative effect on people and communities.

Clarendon station is very important to the Arlington community and its businesses

Please keep the College Park stop. This is a necessary link for college students, many of whom cannot access DC otherwise.

Closing the Clarendon line would be criminal. Clarendon has many bars, restaurants, and retail so closing it would be detrimental to those small businesses. It will also affect condo values adversely and the people who live in Arlington are by far the highest tax base in Arlington County.

Do not close East Falls Church

Need the Silver Line to be completed. Moved to Reston for Metro access.

This would close all of the stations I use, I would stop riding Metro entirely.

This would severely impact my day-to-day commuting into Washington.

NO. Clarendon station has high ridership and I rely on it to commute.

I use most of these stops along the Silver Line and would not have access to work and class if these closed.

I travel from Van Dorn to Archives

Clarendon is a highly populated area. There are a few new condo buildings in the works that would increase ridership

Ghost stations are a bad idea

I live at grosvenor and rely on the metro for work and school

My office is right off of the Greensboro stop and I use metro to commute. It is a long walk from the neighboring stops, especially in inclement weather.

I need Grosvenor Strathmore to commute!!

We depend on this station and purchased this house due to proximity to the metro. This would be a disservice to our community

Proposal to close 22 Metrorail stations

Weve spent two generations encouraging people to live and work near Metro stations. The above concept is not workable, and not fair to anyone in the DC area.

You are closing vital stations. Why use the metro at all if I cant get to where I need to go.

Closing EFC would have a material impact on our familys travel needs. Proximity to the EFC metro was the MAIN reason we purchased this house and we use the Metro daily (pre-pandemic). Please reconsider closing EFC.

I would probably stop taking the metro all together if orange line and silver line were that restricted.

Clarendon is a vital station for me.

Please leave Clarendon ope as it is a means to get to work.

Closing college park destroys the college campus. Don't close grovesnor- it's a bust packed station during normal times, with parking!

That would increase the traffic drastically

Closing Clarendon and Virginia Square does not make sense. Close one or the other.

We moved to be closer to East Falls Church Metro and this would significantly, negatively impact our quality of life.

NO! the Mason Arlington Campus is between the VA Square and Clarendon stops. We must have one or the other open and available to our campus-- and open unti 10:30 PM.

Definitely not East Falls Church please

This is terrifying. Do not close Clarendon. Virginia Square I could understand since its so close.

As a UMD employee, closing the College Park metro station would have a disastrous impact on the university.

Please do not close Clarendon metro stop!!

Please don't close EFC metro!

If these stops close I can no longer be an active Metro rider. I use many of these stops and rely on them to get where I need to go. It will weaken the system and I believe the entire region will suffer if this proposal moves forward.

Closed permanently or just sometimes?

Losing access to the college park metro would severely impact my ability to get into DC and would make the planned purple line less effective.

PLEASE DON'T CLOSE THE EAST Falls church metro station. If it closes, we would have to drive to Ballston where parking is extremely limited.

Need the Grosvenor station open

This would ruin my commute

I live in Clarendon and one of the reasons I picked to live in such a high cost area (sacrificing certain other luxuries, like owning a car or paying off student loan debt faster) was to be close to a metro station. Clarendon and Virginia square are very popular metro stations when I was commuting prior to COVID and I am often carrying a heavy laptop and briefcase so walking to the nearest station if mine was close would be difficult. I would imagine even more so for those with a physical disability or illness.

It doesnt make sense to close adjacent stations like Clarendon and Virginia Square. Give consideration to where existing usage will divert if closures went into effect and maintain reasonable alternatives.

Do not close both Virginia Square and Clarendon because they are located next to each other. Instead, close one or the other. If you close both, people who live in between them would have to walk a long way either to Ballston or Courthouse.

I have taken the Metro for 20-plus years by walking to the East Falls Church stop, which is a bit longer than a mile from our house. I would discontinue taking the Metro.

No way this would ruin property value. There's zero parking for it so makes it harder to use. The people who use it still value it highly

There is too much distance between the metros around E Falls Church to warrant it closing. Many people in Falls Church need access to both these stations.

This would close the closest metro to me and the closest metro to my work. This would significantly impact my commute. As a result, I'd likely switch to drive commuting instead of metro.

Closing all of these stations dramatically decreases the viability of the metrorail system and results in more and more cars on the road as a result

As someone who lives in Arlington, after COVID-19 and everything is reopened, Clarendon is a very popular destination as that is where a lot of the bars and restaurants and shops are.

Closing the metro stop would eliminate people being able to get there and all of the residents would have to walk a decent distance to get a metro into DC.

Closing the smithsonian line will impact tourism significantly

Greensboro station is important for my getting to / from work.

Closures of these stations would drastically impact property values. People have bought and solid properties based on the proximity to metro access

Proposal to close 22 Metrorail stations

These stops are extremely important to those of us who only use public transit for work.

This is crazy I work off of one of the stops on the Orange Line. If you close Clarendon and Virginia Square that would be Ballston would be the only option that is not acceptable.

I use Clarendon and Virginia Square often. Closing both does not make sense as they are congruent. This makes living in the metro area inconvenient - not sure I would continue to live here if this is the case.

East falls church station must remain open. those without access to cars will be hurt by this proposal.

Compared to other stations here, EFC is quite far from any other walkable stations, which is what a big chunk of the community rely on.

please do not close East Falls Church Metro -- critical to our familys transportation needs that this stays open.

Do not close grosvenor strathmore.

We rely on VA Square

I rely on East Falls Church to get to and from work. This would be devastating for me and my family.

Virginia Square is an up-and-coming area where ridership will be increasing significantly as the Ballston Quarter sprawl develops. Closing this station would stunt the growth of this area significantly.

Some of these work but not all. Current ridership is primarily due to the pandemic, look at prepandemic ridership values too

Please do not close East Falls Church Station!

Terrible idea - might as well just shut down the entire metro system. It would be pretty worthless without those stations.

I chose my house based On It's proximity to East Falls church metro station.

I need the East Falls Church station for my commute.

Home station is Grosvenor Strathmore and if closed I would really ride the metro as there isn't anywhere else close

many of these stations are not within walking distance of other stations

Grosvenor-Strathmore is not only a turn-around but services a large number of residential communities. Ridership is low because the station was closed.

Access to EFC is very important to me, its not viable to use adjacent stations at WFC or ballston for me or my children.

GROSVENOR-STRATHMORE IS ESSENTIAL FOR PATRONS OF STRATHMORE, OF WHICH I AM ONE. IT WOULD KILL IT TO CLOSE STRATHMORE.

I love walking distance to Grosvenor. I purchased my home because of its proximity to the Grosvenor station. We do not have two cars because we rely on metro to get to work.

Do not close Grovner please

I live in Clarendon and have 3 stroller children. I need the station. That is why I moved to Clarendon.

If the office reopens, this won't work. If we remain on telework, it's fine.

As long as Grosvenor-Strathmore stays operating I have no problem

The closing of Greensboro is not acceptable, I need the station to commute to work

Having both the Clarendon and the Virginia square metro shut down would make my commute a lot longer both ways

Absolutely not. THis is terrible idea, as most of these metro stops are under utilized strictly because of COVID. The ramifications of when dining opens up/work (esp in Tysons), is unimaginable. Drunk driving would be rampant.

again! this is the most ridiculous solution

I am a resident of Reston, and opening the Reston Town Center stop is necessary to curb traffic at the Wiehle stop. The Wiehle stop is structurally quite dangerous and was clearly not designed for high capacity. It makes traveling there during morning and evening commute very difficult. Please keep the Reston Town Center stop open when the Silver Line Phase II begins.

I ride to Eisenhower Ave

I live at cleveland park so would really appreciate keeping it open

This would severely and substantially impact my ability to get to work.

Closing the East Falls Church station would prevent me from being able to travel to my job in the city.

Have used the EFC station for years and there appears to me to be steady usership pre-COVID. Also just finished two capital improvement projects which would go to waste if station is closed.

keep college park open

Closing Grosvenor Strathmore station makes no sense as it is always packed during normal.times and new developments are abound

| |
|--|
| Proposal to close 22 Metrorail stations |
| Grosvenor-Strathmore is my primary station. |
| Closing both Clarendon and Virginia Square leaves that entire corridor without access. |
| Clarendon is a heavily used station in non pandemic times. Is it possible to just close for a couple of months rather than a year? |
| Lol no |
| Its crazy to close stations that are already built. The trains have to drive right past them anyway. Arlington has specifically constructed entire neighborhoods around the presence of the Metro stations. You cant just close them |
| I will use Greensboro station to get to work |
| I would like the Grosvenor-Strathmore station open |
| Metro should NOT close East Falls Church station. This is not sufficiently near any other station to merit closure. |
| I work at Eisenhower Ave! |
| This is terrible and would create major commuting issues, parking issues and logistical nightmares for commuters in these areas. |
| this is dependent on adequate bus service to fill in the gaps in closed metro stations |
| Awful idea |
| Maintain Orange line Virginia stops |
| Closing Va Square AnD Clarendon makes NO SENSE! |
| Why is it that after all the money that has been appropriated and spent to maintain Metro, you are resorting to shutting down most of its services? This is utter incompetence on the part of your leadership. |
| grosvenor strathmore is my only way to get home, without this i cannot work |
| This will make metro less useful and make walks too far. |
| Keep Virginia Square open |
| Need Clarendon metro to get to work |
| The College Park metro station is essential for many staff and academics who work there. |
| Keep Clarendon or Virginia Square, but don't eliminate both. |
| I use Clarendon and Federal Triangle the most for medical reasons, to visit a medical provider. |
| Please keep east falls church station! I use it often! |
| I use the East Falls Church station frequently. |
| Please don't close east falls church metro. My livelihood depends on it |
| Do not close East Falls church. Too integral to linking service along Orange Line with downtown DC. |
| Clarendon station should remain open. It is a vibrant,busy area. |
| East falls church is not close to any other station. |
| Grosvenor is our preferred station! Please don't close it down!!! |
| The college park metro station needs to remain open to service university of Maryland student and the future ridership of the purple line |
| Live at Clarendon metro station and rely on metro for work. |
| Closing this many stations should be an absolute last resort. It would require a two mile walk to West Falls Church should East Falls Church close. May as well drive. |
| Closing all the busiest stations? Reston Town Center for everyone who works in Reston? |
| This makes the metro completely unusable. |
| The Arlington stations are packed at rush hour. With a large population of people living in condos near the metro with no cars metro is essential. Traffic is always heavy at any time of day and we don't need more cars on the road because of lack of a metro |
| You cannot close these stations. We depend on these for our livelihood. This will ruin our community if you close Clarendon station. |
| NO NO NO NO NO! This would make metro basically useless for most of us. |
| Do not close grosvenor-strathmore metro station, please! |
| I work in retail and do not have the luxury of working at home. If my station, east falls church, shuts down I will not be able to work and be out of a job. |

Proposal to close 22 Metrorail stations

You cut innovation station for lack of ridership? It's never even opened. How does that make any sense. I think there are 6 city blocks of 4 stories of apartments walking distance from this new station just waiting for this service. Don't turn away new customers and expect them to suffer you.

I exclusively use EFC to commute to Foggy Bottom m-f.

I use Clarendon and Smithsonian stops daily.

It would close all the stations I use and make my commute significantly more difficult, meaning I'd likely have to always drive and never take metro we use Grovesnor/Strathmore

The Clarendon metro station is a critical and highly used metro station - connecting one of the most densely populated DC suburbs with downtown. The removal of this metro station would be catastrophic to Clarendon businesses and unduly burdensome to the thousands of residents who rely on the Clarendon metro stop to get to and from work in DC.

Greensboro is the closest to most of the work places in Tysons and McLean VA

Please keep East Falls Church and Virginia Square open.

Reston Town Center is walking distance from my house if it is closed after it opens in July, I will have to drive to Wiehle East which will force me to pay for parking

Grosvenor-Strathmore is the closest station with a large parking structure. The next closest stations have much smaller parking lots, and would ultimately necessitate driving to Shady Grove for parking.

I live in Cleveland Park. Before the pandemic, I rode metro every day. If you close my station, I will not ride at all. People in my community will not walk to Van Ness or Woodley to get on the train.

Shut down the ghetto stations instead. Keep ALL Virginia stations open.

Save Grosvenor & Cleveland Park

I deliberately bought my condo right near the Virginia Square Station. With Clarendon being closed, it would be unreasonable to have to walk to Ballston.

I work in Clarendon and live in NW DC. This proposal would take away Metro service that allows me to get to work.

An entire large company depends on the McLean stop. Also, housing prices in Clarendon are so expensive largely due to the metro stop right there. Closing it would be wrong to those residents.

How can you close Grosvenor if you are turning trains around at it? No, don't close Grosvenor!

East Falls Church is not near another station for anyone that lives near it. It's also your most dense work from home spot in Arlington, so as soon as offices reopen it's going to be a mess without it.

Close Courthouse instead of Clarendon

Closing both Clarendon and Virginia Square would leave a long gap between orange line stations (Courthouse-Ballston) in that part of Arlington.

I would rather have slow service than metro closures. I live near Eisenhower Avenue and this would be majorly disruptive to me getting to work everyday.

Have been commuting using EFC for nearly 25 years pre COVID and expect to resume metro use in the summer

Please don't close Grosvenor-Strathmore or Smithsonian.

It makes no sense to close Clarendon and Virginia Square because they are adjacent stations. If one needs to be closed, Virginia Square should be closed.

This is the most asinine thought in this entire proposal. At least three of your proposed stations would be expected to return to closer-to-normal service once facilities open up again.

I walk to the Grosvenor station but would need a ride to another station.

I use the Grosvenor-Strathmore station, and it is my closest available metro station. This would greatly impact me. Please do not close it.

I will be using the Greensboro stop regularly once our office opens up again in late 2021.

I don't know how you can close Federal Triangle? That has to be one of the busiest stops at least on a workday.

East Falls Church metro is necessary. Easy to park serves a lot of customers from lots of different areas of Arlington and Fairfax

I live at Grosvenor metro. It's a very residential area in need of the metro. It's also the last stop on this end of the red line with plenty of parking to accommodate the surrounding areas.

Many of these stations don't have suitable alternatives, so closing them will essentially cut many riders from metro access.

As a resident of Arlington, the closure of so many stations on the orange and silver lines would be devastating. I would rather the trains run slower than close so many of these stops.

Stupidest idea I've ever heard

Proposal to close 22 Metrorail stations

| |
|--|
| These stations may have others in their vicinity, but stops like East Falls Church dont have another station that close, which means additional transportation costs to get to a station. |
| Are you kidding me? the East Falls Church station during the rush is very busy. Trains are crowded to the point we cant even board. NOT ACCEPTABLE. |
| Hopefully we will all be back at work by January 22. Please do not close our stations. |
| j live in clarendon and working in old town |
| We need Van Dorn station to stay open! We use it multiple times a week. |
| No, I only ride the metro because the East Falls Church station is walking distance from my house. I would absolutely not ride the metro at all if that station is closed. |
| I use the Grosvenor station |
| Keep all stations open |
| Please keep East Falls Church open. |
| It would be a mistake to close both Clarendon and Virginia Square, since that would result in a couple of miles between Ballston and Courthouse. Clarendon should stay open as the way point between those. Also Arlington Cemetery needs to stay open for tourists, who will help provide funding for Metro when they start visiting again. |
| Efc is a critical switch point for orange silver. I wouldn't be able to commute to work via metro. |
| Please do not close East Falls Church. |
| Would hate for these stations to go unused - MOST OPPOSED to this proposal. |
| Provide service to these stations on a on/off again basis instead of completely shutting them |
| Grosvenor-strathmore on Red line is used for commuting purposes. |
| I travel DAILY for work in Dupont from Grosvenor, I live in GP4, me and my husband live near the Metro so that we can take Metro to work. |
| We purposefully bought our home to be able to walk to Clarendon and Virginia Square. Now we would have to go to Courthouse? This doesnt work for us at all. |
| Would severely impact my travel plans with the Clarendon closure, given the next closest stop (VA Square) is also on the list. Suggest only closing VA Square, not both stations. |
| Our commuter community around East Falls Church needs this stop for a walkable metro option. Do not cut! |
| I rely on the Cheverly Station |
| East Falls church station was always mobbed before Covid 19. I would like to see it stay open so that when Covid restrictions relax, we can use our local metro. |
| I work at federal triangle. If this station is closed my commute gets 10 minutes longer each way due to the walk from metro center. This is 20 extra minutes of time I do not have, when I have to race to get my kids to and from childcare |
| PLEASE KEEP GROSVENOR-STRATHMORE OPEN. GIVE US TIME TO GET USED TO THE IDEA OF BEING AROUND PEOPLE AGAIN. |
| Too many passengers would congregate at Courthouse Station, which was already one of the most crowded stations during the morning commute on the orange and silver lines , posing both a public health risk as well as making it difficult for many passengers to even get on a train |
| I use the smithsonian stop to get to and from work |
| Stations should not be closed. |
| Keep the College Park station |
| Closing the two closest metro stations nearest me would ensure I have trouble traveling anywhere |
| EFC is crucial for my commute |
| Leave the stations alone. There are other ways to cut costs than saving on the 2 employees you have there. Incase you have never been there. Clarendon and VA square are not that close to other stations. 15 minutes of exrra walking is alot.. especially if you want to close it down early |
| Many of these proposed closures would impact the silver line which is the primary line I use on metro and the only reason that metro is useful to me. If these stations closed I would most likely quit using metro except for very special occasions. |
| I require the East Falls Church station for my commute. It would be very difficult for me to reach other orange or silver line stations without that station being open. |
| what the fuck, metro |
| Reckless shortsighted decision. |
| I would like to keep the clarendon station open, during precovid times it was always busy with commuters, and it is my main way of getting to work and around DC (I live in Clarendon and do not have a car). I commute to Amazon HQ2 in Crystal City, as do many of my colleagues who live in VA Square and Clarendon. |
| East Falls Church Metro is an important venue for use to get into D.C. and has parking availability that the Ballston station does not have. It would cause a major inconvenience. |

Proposal to close 22 Metrorail stations

This would be terrible for folks like me who have been taking the train at the East Falls Church Metro station for over 25 years; the station is walking distance from my house and if it were closed that would probably mean more people using their cars to commute which would be terrible for the environment and rush hour traffic in Northern VA.

closing the trains along the busy orange line corridor will kill ridership. Also, closing especially Clarendon and East Falls church will have an adverse effect on commuters, given the number of people taking trains from these stations

I plan to take the Silver Line Phase II once it opens, and I disembark at Federal Center SW. I strongly oppose this plan.

Clarendon is an extremely useful metro stop for those of us in the northern virginia area that dont live close enough to rosslyn or courthouse

How can you close a hub station such as EFC with parking & connecting bus routes??

The Pentagon City Metro station should also be closed.

There is no walking access to Clarendon. It would make more sense to close Courthouse.

Grosvenor is a huge hub serviced by many in the area, even beyond Grosvenor.

The closure of any station currently built out is entirely unacceptable. The stations were built for a reason.

East Falls Church is used often.

You should not be closing any stations or reducing your hours. Be better.

I rely on Federal Triangle for work.

I think Clarendon should be taken off the list for consideration for closure.

My station of concern is Clarendon since that is where my office is located. It would add considerably to my commute to close that station.

Due to its immediate proximity to the University of Maryland, it would be a very poor choice to close the College Park metro station

This would not work. There is not an easily accessible station near Mclean from where we are. Please do not close the Mclean station.

I walk to East Falls Church Metro. West Falls Church is too far for me to walk, so I would not use Metro at all.

We chose our housing based on proximity to the Clarendon metro station.

Don't close Clarendon. I wouldn't be able to go to and from work or spend time in restaurants. It's the most reliable elevator, too.

I moved to this area thinking the metro would be open at Reston.

Some of these stations are critically important to the region.

I bought a house near Grosvenor Strathmore and rely on the metro

Closing Grosvenor would not allow my husband to commute downtown for work

East falls church is a highly used station for falls church and Arlington riders.

Judiciary Square is an important metro station for those with Court dates, and it is a considerable walk to the Courthouses from Gallery Place for those who have any accessibility difficulties.

I rely on connecting at Eisenhower to go to work.

Please do not close the Van Dorn station

There are myriad people who live in the RTC area and work in Herndon offices around Innovation center; the closure of these stations would impede Metro's opportunity to provide a car-free commute to this group

I will be expected to be back at work in DC 5 days a week as soon as vaccinated. I will be using Grosvenor-Strathmore

Cutting off these stations kneecaps riders in College Park and in Montgomery County around Grosvenor-Strathmore, where there is a high-percentage of residents who live in the dense housing nearby and rely on the train to get in and out of the city.

Given that the pandemic situation is likely to be much better by next year and potential rider numbers will increase, how are tourists supposed to get anywhere in DC with all those station closures?

I travel from East Falls Church and frequently from East Falls Church to Clarendon. This is nonsense.

Closing certain stations altogether is an extremely drastic measure. University of Maryland prides itself on close proximity and accessibility to DC, which would be taken away if the Metro station was closed. This would have implications for students trying to secure jobs and internships around the DC area.

We use EFC metro for commuting to work.

Please do not close east falls church!

Huge mistake to close stations in general, Metro should be looking to make it easier for people to ride.

| |
|--|
| Proposal to close 22 Metrorail stations |
| Grosvenor-Strathmore is essential for my family. |
| We have been waiting for Reston Town Center to work for a long time. |
| Grovesnor station is the primary station that North Bethesda and Kensington use to commute downtown. While presently most folk are telecommuting, this will change as people return to the office. The loss of this station would be huge. |
| Closing both VA Square and Clarendon is crazy! |
| This would eliminate the station closest to me, the station closest to my job, and render my choice of apartment location and selling my vehicle entirely pointless. |
| Please try to avoid closing stations as much as possible especially EFC - they are important lifelines to the community! |
| I rely on Clarendon metro for commuting. |
| I use Clarendon station to commute to work (pre COVID) |
| Low ridership is because there arent enough stations and lines that make it efficient to travel this way. you should be adding more stations and making it more desirable to ride metro NOT making the problems that keep people off even worse! |
| Could tourist only stations like Arlington cemetery be just permanently reduced to half time? Given the track past willStill be used? |
| Virginia Square is my metro stop, so closing both Virginia Square and Clarendon would really reduce my use of metro. I would drive to work by myself and contribute to greater traffic. |
| The college park stop is extremely important for connecting the students of the university. Please reconsider shutting down the station. |
| I live near Clarendon and bought a place near the metro given some mobility considerations. Metro would not be a feasible option if Clarendon station closed.. Less frequent trains would be preferable. |
| Why not just close all stations |
| Stop counting overtime in your high 3 pension number and that will save money for everyone instead of giving a lifetime windfall to a few. Than use the saved money for service. |
| Clarendon is the only stop within walking distance of my house. Please do not close. This will have a negative impact on the overall economy of Clarendon as well. |
| Clarendon and East Falls church are crucial stations for Arlington commuters. Please keep open- even of at reduced capacity. |
| My station would be closed |
| Grosvenor/Strathmore is a very important station especially for those near that station. You also have the Strathmore music hall which hopefully, will see patrons soon. |
| I frequently use the Clarendon and Virginia Square stops, so this change would not work for me. Especially closing Clarendon. |
| I travel from Clarendon to Federal Center SW, so with both closed I basically would not be able to use Metro anymore. |
| VA Square OK, Clarendon is 1 mile walk and people frequently get off for the two grocery stores. It would eliminate a lot of service to that area. |
| Once the federal government agencies open back up after the pandemic, the Smithsonian metro station will be very busy and should not be skipped over. |
| College park is a major hub for the university |
| Dont close Grosevnor - Stratmore station. |
| I would switch to driving |
| This is a completely insane idea that seems designed only to get local jurisdictions to put in more money. This would permanently wreck metro. People move to areas with metro stations under the assumption that the lines will be permanent unlike bus lines. |
| do not close Clarendon and Virginia Square this makes absolutely no sense given dense urban Arlington corridor and development plan |
| Clarendon shouldn't be closed |
| East Falls Church is not near any other stations, nor are some of the other stations Metro proposes to close. Its unclear to me how closing stations would save money - it seems like the staffing requirements for the various stations are low, whereas the potential lost revenues from closing these stations would be high. |
| this us an over-reaction to the pandemic. you have to wait at least a year before taking such drastic measures. |
| The Grosvenor station is extremely convenient and necessary for those living near the metro. It supports the surrounding community. It is also needed for those looking to attend concerts at strathmore. Do not close the Grosvenor station! |
| The College Park station is by far more accessible than other stations nearby for students and the ability to go into DC would be gone. |
| I need east falls church to get to work. Driving to west falls church would add an unacceptable 10-15 additional minutes driving in the wrong direction |
| Please keep Clarendon open. Virginia Square closure makes more sense to me. |

Proposal to close 22 Metrorail stations

The only reason I moved to Virginia, is for the Metro and I live at the Eisenhower Stop. I always see people commuting to work from the Metro and I have started to use it more frequently since I just moved here. I think it would be a real burden to be closing stations right now as the vaccine is becoming more widespread. You will see less economic opportunity flowing into the DC area since more people would be forced to stay local too.

Once the world opens back up, we'll need these lines! They're low this year, but usually these are some of my primary stops on weekends

Do not close Clarendon and Grosvenor

I go to school at GMU and my classes meet in person.

If the Wiehle station remains open, this is more feasible.

Grosvenor-Strathmore is my key station and is walking distance to my house. It's the reason I purchased a home in this area. Walking to the next nearest station is not an option for me.

Closing Grosvenor would eliminate much of the park and ride option for travelers in this area, and would undermine the efforts to create a more pedestrian friendly area as people who are walking distance from Grosvenor would end up needing cars.

You want to close stations....that aren't open yet? Also, for Arlington, this would require everyone to walk to Ballston or Courthouse. Completely absurd.

I live near Greensboro and it would be a lot more difficult to walk to another station. While it may be convenient for Metro to not stop there, it would not be convenient for me to arrange to be at another station.

I live near the VA Square Metro

NO - I ride Archives every day for work

Closing Clarendon and Virginia Square would create a large gap between stations. Also, Virginia Square services the FDIC HQ and GMU's Arlington Campus.

Closing EFC would be terrible. Closing stations downtown would be terrible.

This is probably the worst proposal. Do not do this.

Please do not close Grosvenor Metro - it is so important to our community to have access to DC without driving.

Closing Metro Stations is not the answer to Metro budget shortfalls.

Leave all orange line stops open!!

Keep Metro running like a big city deserves!

This would drastically impact me and my travel plans. Closing Metro stations has a severe impact on property values and would result in less tax revenue and less money directed towards future service.

I am planning to commute from East Falls Church

I rely on East Falls Church Metro!

This would be an enormous problem for me in terms of being able to get around.

Not good for attending events at Strathmore-Grosvenor/Strathmore

Please don't close Grosvenor-Strathmore!

The McLean stop is used by 1000s of people working at or near Capital One's campus. Not only would this be an inconvenience, but you'd have 100s of people choosing to drive to work and traffic would be pretty awful. Additionally, during rush hour, hordes of people would be walking from the Tysons stop to McLean, which could be dangerous given all of the traffic.

East Falls Church Metro is down the block from us and we use it to get in and out of town frequently

I don't mind walking a little

Grosvenor/Strathmore should not be closed. It is in a major commuter area between several major roads, work areas and highway exits just before city limits.

Don't close Archives or Clarendon

I need the East Falls Church Metro to stay open as other stations are not in walking distance and it's our primary mode of transport for work.

We use Virginia Square station a lot.

Clarendon needs to stay open

Grosvenor is my nearest station!

Clarendon should remain open

| |
|---|
| Proposal to close 22 Metrorail stations |
| I have no other way to work the metro without a significant increase in commute (doubling time or more) |
| I NEED Greensboro Station to remain open. This is the location of my office. |
| I think this would cause way too much crowding at the remaining stations (eg every user of the Virginia square metro station would flood to Ballston) |
| I live near Grosvenor-Strathmore and use it everyday to get to work |
| I am TOTALLY against closing East Falls church. this would be devastating for me personally and would harm development in this area. BAD IDEA. |
| Several of these stations are crucial to my commute to and from work, which would drastically impact my commute and my use of the metro system. |
| I invested in a house near East Falls Church (and got rid of my car) on the expectation that the metrorail system would be functioning. |
| It would be a shame if the Clarendon station were closed. It is a long walk from Clarendon to Court House. VA Square, Greensboro, and Smithsonian are dear to my heart as well. |
| This is an awful proposal! |
| Is this change based on pre-COVID data? With the purple line coming through we need the College Park metro station to be open. Once campus opens back up the ridership should go up. Route one is a beast to travel on during rush hour so going to Greenbelt or PGPlaza is not a viable solution for those of us near campus. |
| Please do NOT close Cleveland Park station. I can never ride metro if you close the station. The buses are irregular and slow. |
| I live in Clarendon and take the metro into work everyday. I picked my location because of the convenient metro stop. Closing this stop means that I now dont live in a desirable area anymore and my close walk to the metro just doubled because I would have to walk to Courthouse. |
| The Arlington stations will return to normal use once federal employees and others return to work. Arl Cemetery is needed for tourism. |
| Increasing distance between metro stops from 0.5 miles apart to 2 miles apart creates unsafe situations for commuters |
| With the new Capital One center, it would be convenient for visitors to have the McLean metro station open. |
| Clarendon, Virginia Square, East Falls Church are heavily taken. Please reconsider. |
| i cannot even imagine this happening - this is basically the end of the metro system functioning as it needs to |
| I use College Park Metro every weekday |
| Please do not close East Falls Church! It is criticalTo our community! Cuts to hours are fine, but please keepIt open. |
| Do not close Clarendon. |
| What a terrible idea |
| Need grosvenor |
| Keep Clarendon open so many people use it!! |
| If this happens I will lose my job as I will be unable to get to my required station and to my place of work. I cannot afford to drive downtown. People live in proximity to these stations to support our ability to get to work. |
| Grovesnor is used |
| Keep the Smithsonian station open |
| East Falls Church is a critical junction between the Orange and Silver Lines. Closing this stop would make transfers more difficult. |
| Unacceptable. |
| Getting to Greensboro station (where my office is) is very hard if I had to go to another station. |
| This would be very sad, but would not impact me personally very much. |
| Closing VA square AND Clarendon? Yeah, brilliant move... This is a terrible idea. |
| I need the Clarendon metro stop!!! |
| Would not be able to commute between East Falls Church and Tysons by metro. |
| I rely on service to the stations lited. |
| This plan would absolutely not work for me. The Clarendon metro station cannot be permanently closed as I along with countless other commuters take the Clarendon stop to get to work. Both the courthouse and ballston metro stops are too far away to walk to to take the metro. If anything you should close the Virginia square and COURT HOUSE metro stops as courthouse is not far from Roslyn. |
| Now what the heck is this?! |
| I use the college park station! |
| I oppose closing Cleveland Park station. |

Proposal to close 22 Metrorail stations

| |
|--|
| East Falls Church is utilized for work and weekend travel. It is also the last station on the line with a parking lot (which is always full). How would West Falls Church accomodate all of the parking needs? |
| The Clarendon station is the closest station to a high concetration of bars, restaurants and grocery stores. I think this would be detrimental to many people. |
| Grosvenor-Strathmore is an essential service point for myself and many others in my community, as well as the large entertainment venue located here |
| As a University of Maryland student who does not own a vehicle, the College Park station is the easiest way for me to get to DC. If it were to be closed, it would make it a lot harder to get to DC for myself and thousands of other UMD students. |
| DO NOT CLOSE East Falls Church! You may as well close down all the Metro if you do. This will make you irrelevant to the tax payers that PAY for metro! |
| Every option you have presented would adversely affect individuals who need metro the most. |
| I hope it doesnt come down to this option -- though I do not rely on these stations, I know I would be devastated if mine closed. Many folks who rely on public transportation dont have other options for getting to and from work or medical appointments and adding a bus (especially a metro bus bridge) adds a lot of time and stress to an already stressful process. People who take metro truly do it as a last choice opportunity -- please dont punish those who need this service the most. |
| Severely limits usefulness of metro |
| I don't want my nearest metro station to close as I would ride more when it comes to 2022. |
| GROSVENOR is my local station. I will stop riding metro all together if I'm forced to bus or drive to another station. The economics of using metro quickly stop making sense. |
| Mt Vernon is the closest station to my home. Closing these stations will just reduce ridership further |
| I use Virginia Square Square Metro as my usual travel to work. The extra time needed to walk to a different station even ballston would inconvenience me getting to my family. What about alternating between which stations are closed? |
| College park and cleveland park are intetgral |
| People plan their living situation based on metro stops |
| Grovesnor Strathmore is my most frequent station and has parking |
| This would be incredibly problematic. I depend on Metro to take me from College Park to downtown for meetings and these closures would mean I need to find an alternative method of travel. |
| These stops are vital to commuters and getting to certain neighborhoods, especially on the red line |
| the closure of Virginia Square would have some serious impacts for students at the GMU Campus in Arlington. |
| The closure of the Virginia Square and McLean stops would eliminate my major use of Metro to commute between my home and office. |
| This would be terrible |
| I adamantly oppose closing the EFC station. It was heavily trafficked before the pandemic, our entire area relies on it and you just completed upgrades there which would become a complete waste of money. |
| I use Van Dorn Street to commute to work. It is not near other stations. I would simply have to not use metro to commute. |
| Judiciary Square is most critical to me. |
| I strongly oppose closing east falls church. There is no way I could get to a metro station without this stop. |
| Closing Grosvenor-Strathmore is the worst idea!!! |
| I use the Archives stop for work |
| Do not close Clarendon. Once the pandemic is over I will continue to use this station. This station is critical to reducing traffic congestion into DC. |
| I dont think you should close VA square and Clarendon. I would like Clarendon to stay open... VA Square is very close to Ballston and should be fine to close. |
| Please don't close the Clarendon metro stop! |
| Va Sq and Clarendon are consecutive stations on the same line. Closing both would make working in the downtown Arlington corridor much more difficult to use metro for commuting. Currently, the two stations I use most are East Falls Church (closest to my home) and Clarendon (2 blocks from my office). Eliminating those two stations would make me significantly less likely to use Metro for commuting or personal use. |
| Grosverner and Cleveland Park are my route home and work. These are critial |
| definitely an impact on stations I use. I would have to switch to another (i.e. go to Ballston instead of Clarendon or Virginia Square) |
| If you cut metro from suburban locations like EFC the traffic will be horrendous! |

| |
|--|
| Proposal to close 22 Metrorail stations |
| I get off at greensboro for work |
| I am a frequent user of the Eisenhower Ave stop normally. My use has been less frequent due to COVID, but I expect to return to normal metro use in the coming months. |
| Clarendon Metro station is vital to the people in this area! Closing it would affect home values, commute times, and general quality of life! This is not acceptable! |
| It will make Ballston more crowded, harder to get seat. With 30 min spacing, jammed cars have no ability to stay safely distanced. You would need an N95 to ride. |
| EFC metro is a critical component of living in a residential commuter area outside DC. This station is critical to our livelihoods, property values, Quality of life, and one of the defining reasons why we chose Arlington east falls church area to live. DO NOT close this station!!! |
| We need Grosvenor-Strathmore and is the reason we purchased our condo there. Please dont close this one. |
| It is vital that you keep the GMU/Virginia Square site open so that GMU students an continue to access the line. |
| this is absolutely crazy. |
| I live one block from the Virginia Square Metro. When things open back up I will be commuting from that station. While the Ballston station is not that far it would involve multiple road crossing which increases risk of getting run over. |
| DO NOT close Clarendon or Virginia Sq. This would consolidate traffics at Ballston and courthouse and make the wait times and bottlenecks at those stations far worse |
| Really really bad idea |
| This would be a financial disaster for my wife and I. We have financially committed to living near a Metro stop that would close under this proposal and did so with the assumption that our station would remain operational. |
| This closes the only station near my office. |
| I use Va Square and Clarendon |
| Closing that many orange line stations is ridiculously inconvenient for commuters. It would also drastically reduce property values along that corridor |
| These are major stations. |
| Absolutely not. I live near grosvenor and moved there because of metro station |
| While I do not use any of the above stations on a regular basis, I am against the proposal, especially for closing the College Park station given how it serves the UMD community |
| Archives is the station closest to my work. Please dont close it. |
| I purchased a home near the East Falls Church metro. The closure of the station would severely impact our commute. |
| I use the Archives station, federal triangle, mt vernon, smithsonian, etc, often |
| we need this open for our workforce traffic |
| This is not at all convenient |
| The closure of both Van Dorn and Eisenhower leaves a huge gap in service and would require riders to get to King Street. At a minimum either Van Dorn or Eisenhower should remain open to leave an option for riders. Perhaps a short term measure would be to close one and then consider whether post COVID whether rider rates will be up. Unsure what other Station Van Dorn is in close proximity |
| Van Dorn Station is a station I use frequently. If offices open back up in 2022, I will rely on this transportation to get to work so I would prefer that this station is not closed. |
| My workplace is next to Clarendon station. If any station along that portion of the Orange line should be closing, it should be Virginia Square. |
| Closing the stations which provide greater access doesn't seem like a great idea |
| College Park is not normally low rider, for the majority of students it's the only mode of transportation they have to get to DC and have a day away from campus. |
| By closing stations, you are making metro transit less alluring. Station closures especially impact individuals with disabilities and seniors who can't necessarily walk additional miles to alternative stations. |
| Prior to the pandemic I used East Falls Church to be able to go to Dulles, DC, and other locations. Closing it would have a significant impact for my commute and likely result in me no longer using the metro. Per the pandemic I am not currently using the metro but intend to do so after getting vaccinated and my work commuting needs coming back. |
| I need these stations to commute to work |
| I live walking distance to the East Falls Church station and expect to resume riding the metro daily when my office (in DC) opens in August 2020. Not having the option to ride from the EFC station would be hugely impactful to my ability to get to and from work. |
| I live in Cleveland Park and would like our station to stay open. |
| Clarendon and Virginia Sq development has been designed around no- or low-car usage. Closing these stations would disrupt this focus and harm those who have depended on it.. |

| |
|--|
| Proposal to close 22 Metrorail stations |
| Too many people live near Grosvenor-Strathmore and there is a lot of parking there |
| This would significantly impact my ability to travel on the metro. |
| Don't change Grosvenor!!!! |
| McLean is a necessary stop - please do not include McLean on this list |
| This makes sense |
| Please do not close Grosvenor-Strathmore |
| Please keep East Falls Church station open. |
| East Falls Church is the station that has the trains that lead to McLean, Tysons, and beyond. West Falls Church does not. Also, the McLean station is critical given all the new development opening in the next few months. |
| East Falls Church is an odd choice. I was looking at 2012 numbers (only ones I could find), and it was busier than West Falls Church. I'd assume it's just as, if not busier since the Silver line completed. It serves as a Major bus hub, lies isolated from other stations, and serves as the initial transfer point for the two lines. Keep it open. Keep them all open. |
| Lots of people use these! Would much rather wait a longer time for a train than take a stop away completely!And Please please please don't close Clarendon! |
| I use the Clarendon station to get to work when I dont have my car. |
| This would severely lower my property value near Grosvenor-Strathmore " the location near Grosvenor-Strathmore station is the entire reason we purchased property there. |
| Closest station is van dorn |
| Many students, staff, and residents of College Park use the station to easily access DC. By closing the CP station, you take away the ability for many potential travelers to use the metro, as they lack transportation to reach the next nearest metro station. And with the Purple Line still not finished, the problem would not be fixed. |
| Many of these stations are near high residency areas where people depend on transit. That would be unfair as many people need to use transit. I take the orange or silver daily from VA Square for my healthcare job in DC. |
| Do not close College Park! |
| Clarendon is a key metro stop that we use for our commute. We have just started using it again as our son's school is reopening. The school has no buses and this is how we commute each day to drop him off. |
| Do not close Grosvenor-Strathmore! |
| Need to have service to FFX and LoCo |
| Absolutely not. Part of the reason I chose to live in Falls Church was access to metro. This would severely impact my day to day life. |
| Virginia Square is one of my primary destinations. The alternative stations are not very close. |
| This is just stupid |
| Reston Town Center is the station closest to my location of employment. |
| Virginia Square, Clarendon, East Falls Church, Archives, Smithsonian are stop that I use frequently. That would completely eliminate the option for me to use the metro. I would no longer use it at all. |
| Horrible idea. This will not only crash local housing prices but it will cause an exodus from dense populations and cause even more traffic on the roads. |
| As long as there are walkways to the next station |
| All station stops need to remain open for accessibility reasons |
| I use many of these stations along Red and Orange lines. |
| Many businesses asking these lines will unnecessarily suffer from lack of metro lines. |
| Clarendon should not close, there is a need for people who live here, for the businesses, and those who work in the area and for those who come to the restaurants and stores in the area.. |
| If Clarendon is closed, I would stop taking Metro. |
| East Falls Church is a much needed stop! |
| doesnt stop near work - but ok for return trip home since Wiehle not listed |
| Keeping Grosvenor-Strathmore open is essential for me and my work commute. |

Proposal to close 22 Metrorail stations

So many students, faculty and staff rely on the College Park metro station to get to and from work and school, regardless of the COVID-19 pandemic. This would be a huge blow to the school and the people of College Park. There is no other metro station that would be nearly as convenient for people on campus to use.

I regularly use East Falls Church metro and closing it would not be beneficial because the other stations are not close enough and would severely impact my commute.

Not sure how you could close East Falls Church as it is a branch point of the Silver Line. This would artificially extend trips from people at the Western edge of the Orange Line.

I live in Clarendon and rely on the Clarendon station every day to get to and from work.

Please keep East Falls Church open

Absolutely do not close the College Park station. So many students use it.

These are top tourist attractions and a college town, this would not work.

It would be problematic to close both Clarendon and Virginia Square. Closing one or the other is feasible, but closing both leaves the entire Clarendon business district without service. The nearest stations (Ballston and Courthouse) are too far away.

Cleveland Park is my main station. I would use Metro less if it were to close.

East Falls church is the station I use for work, recreation

I exit at Fed Center SW for work.I am considering moving into NW DC

This plan is ridiculous.

Keep Clarendon Metro station open

The closure of stations would require significant inconvenience

Would this be permanent? Would bus service/transfer be provided between closed station and "closest" station?

Please don't close EFC! This makes no sense! I am not riding during the pandemic but other wise hope to and plan to return after my vaccine! This is how i commute and it will be devastating if the metro is not an option from NoVA!

East Falls Church is critical. It has two lines and outdoor parking.

I would close courthouse over clarendon as its in the middle of shopping.

No!!!!!! Please no!!! I travel from Clarendon to the Pentagon and/or Crystal City for work EVERY DAY!!! Lots of people do.

No way.

Keep Virginia Square open

Gorsvenor-Strathmore is important to my investments

People will use the stations especially the ones that have parking lots shouldn't be closed because they might not be near other stations.

Both Clarendon and Virginia Square are near my home and I frequently rely on them. Eliminating them would be insufficient for my commute and personal Metro travel needs.

Grosvenor-Strathmore station is convenient and seems to have plenty of traffic.

The businesses in Clarendon would really die. Getting to and from work would be extremely cumbersome. The home values in Lyon Village and Lyon Park would be negatively impacted.

AWFUL IDEA. People choose places to live based on proximity to stations. I can walk to some but cant to others even if you consider them near other stations. Walking 3 miles is not the same as walking .2 miles

VA sq is my local station so personally I would benefit from it staying open

East Falls Church is definitely not near enough another station to make that closure acceptable.

I oppose closing any stations and in particular the Virginia and DC stations. I am less impacted by the proposed Maryland station closures.

So many Capitol Hill staffers and government workers live in Clarendon and Virginia Square and rely on the metro to go to work. Forcing us to walk to the Courthouse Metro would be ridiculous

I moved next to Innovation Center just to be able to take this metro station.

Need station at Archives open

I use these stops

I vote NOT to close the Clarendon metro station.

Our office location is located directly across the street from our office location and many employees rely on Metro to commute to and from the office location.

Proposal to close 22 Metrorail stations

| |
|---|
| The closure of the Virginia square stop would greatly impact the ability of many residents to get into the city to work. DC needs to keep stops open in higher income areas so that those individuals decide to return to work in person, and do not work remotely. Without those people entering the city on a daily basis the general financial state of city businesses will continue to suffer. |
| Closing stations discourages ridership. Closing McLean station means there will not be a station with parking in the McLean/Tysons area |
| Could not get to work easily |
| Why did you make the silver line if no one uses the stations? Seems like something you should have looked into BEFORE you wasted tax payer \$\$ to build it. However, no issues with the closings except for the Smithsonian. A lot of people and tourists want to get off right on the mall, so this should stay open. Probably the same for Arlington Cemetery too. |
| If you close the stations, please make sure they stay secure and maintained. Do not let vandals and varmints ruin them. |
| I use Virginia Square. That is a heavily populated area and if you're also closing Clarendon then I'm not sure how you expect people to access that area. My gym is right at that metro stop so my commute there from Courthouse would become astronomical |
| East Falls Church Station is the transport hub for our neighborhood. Two bus lines pass near our house which go to East Falls Church, and we use it daily for Metro commute into DC. |
| Grosvenor-Strathmore and Cleveland Park are essential stations to me!! |
| I use and love the Clarendon metro station and need it for getting to and from work |
| Please keep Grosvenor Station open |
| Grosvenor Metro Station should remain open |
| Clarendon metro rail should not be closed. |
| Eisenhower Ave is my local metro station and helps to direct metro traffic coming from Old Town - some go to King Street and some go to Eisenhower Ave. Everyone going to King Street will create a crowded commuting nightmare. |
| I work at Fed Triangle. |
| Morgan Boulevard is my closest station and very essential for my daily commute as an essential worker into work daily. Closing this station would be detrimental to my travel. |
| The closest station to east falls church is 3 miles away, hardly an option for those who walk. It is also a transfer point to orange and silver. It makes no sense to close it. |
| Closing stations they are primary to federal government offices deemed essential and have worked through the pandemic would be detrimental. |
| Clarendon and VA Square are important to me personally, due to their proximity to social hubs in Arlington that Courthouse and Ballston lack. |
| Cuts in service will be a detriment to the community. PLEASE RECONSIDER! |
| Closing Grosvenor-Strathmore is a terrible idea!! |
| Many many people commute from Grosvenor-Strathmore because there is so much parking. Its also critical to the cultural center. |
| Why would you close stops at all the major tourist destinations? |
| I generally do not use any of these stations |
| Need to use Reston and Loudoun and East falls church as west is far |
| Please do not close the College Park Metro station. It may be near other stations, but that does not make it convenient or practical given what it will take to get to those stations. Further, the station is a reasonable walking distance from UMD, whereas Hyattsville Crossing and the Greenbelt station are NOT. Also, the purple line will be opening, and apartments are already being constructed at the CP Metro - what about those people? |
| Grovesnor Station is the closest station to downtown with parking. Closing the station would make parking at other metro stations more difficult and increase density at the other stations. It also grants access to the Strathmore music center. |
| I am a student at College Park who travels to DC constantly. This would be a terrible hit to everyone commuting between DC and the university. I strongly encourage you to reconsider the closing of the College Park station, since it would be detrimental to thousands of people and would impact the economy of the College Park area and of DC as well. |
| Myself, along with many of my colleagues utilize one or more of those stations to commute to work 5 days a week when we are not in WFH mode. |
| Dont close Clarendon or Virginia Square stations. |
| College Park Station serves the University of Maryland, which has not held in-person classes since March 2020. Once in-person classes are held again, ridership is almost certain to rebound. The station is a target of transit-oriented development, and is not within walking distance of any other MetroRail station. |
| Two of the stations expected to be closed are my entry and exit stations for commuting to work. |

| |
|---|
| Proposal to close 22 Metrorail stations |
| will greatly impact my ability to get to my office which lies above the claredon station |
| How does Clarendon have low ridership? |
| I use college park Station daily, it would be a real hardship if it was closed. |
| These stations need continued service |
| I live within walking distance of East Falls Church and pre-COVID I depended on metro access from EFC to get to and from work. By January 2022 I expect to be working in the office again full time and will need metro access from EFC |
| This would kill our neighborhood and economy!!! It would produce economic hardship on top of what we have already experienced as a community with COVID. If people cannot access the neighborhood metro station they cannot access the neighborhood and driving or underwing is not a financial option for many people. Please please please save these metro stations and the surrounding neighborhoods. |
| Smithsonian cannot possibly be considered low ridership. Grosvenor is not near any other station. |
| This would leave me with no stations to which I could easily walk. It would probably preclude me from using Metro at all |
| I rely on East Falls Church Metro station to commute to work, for engagements in DC and Nationals games. |
| College Park Metro is within walking or biking distance of many residents and students. Saying they would have to go to a neighboring station is untenable. |
| Closing stops only as last resort. Run less frequently highly preferred. So many small businesses along the corridor and communities rely on their proximity to a stop. Better to have a known train arrival perhaps less frequent than close stops. |
| I live at Grosvenor-Strathmore so I can use that train stop. That is the whole reason why I live here. I need this stop to get to work! |
| Shutting down Grosevenor would be a tragedy for the community around and for the environment. It's a huge step backwards. |
| This is unfair and Unamerican. You make us pay through tolls and taxes, and now you plan to close stations. We paid for this, you need to better manage your funds to operate. |
| WMATA needs to completely fail and be rebuilt from the ground up. The current leadership and administration must go before any changes are even contemplated. SHAME on each and every one of you. YOU ARE THE PROBLEM. |
| Although it would work for me because I am equidistant to Courthouse and Clarendon, closing any stations along the Courthouse, Clarendon, VA Square, Ballston line is just plain silly. These stations are all oversubscribed, and it will create dangerous crowds and conditions at the metro stations that are open to absorb crowds from the other stations. |
| I need to use the East Falls Church station and dont have access to any others. |
| I WORK AT MCLEAN AND TYSONS. NEED BOTH STOPS. |
| The East Falls Church and Virginia Square locations are mission critical to so many travelers like myself!! |
| East falls church is an extremely important transportation hub for a growing community of high density housing near the metro. Closing this station would miss an opportunity to capture loyal riders. |
| I need Grosvenor strathmore as its a 5 min walk to my place |
| All these stations are vital. |
| This will impact my ridership with East Falls Church metro |
| Need access at Clarendon to meet anticipated work needs. |
| I could walk from my home near Virginia Square to Ballston. |
| Don't close anything |
| Grosvenor-Strathmore is an important station which should remain open. |
| Do not close any metro stations! DO NOT CLOSE ANY METRO STATIONS! |
| This would be completely unworkable, Metro station coverage is already sparse. |
| Cleveland Parks shouldnt be closed |
| GMU is especially convenient because the school is right there. Otherwise, I have to walk in the cold/elements. |
| This would just make it much harder for anyone to get where they need to go. Getting close to a place while taking the metro would mean having to take other public transportation, which just defeats the whole purpose of closing the stations, as it just pushes that responsibility/cost onto a different route, most likely bus or shuttle. |
| People with limited mobility need more stations to get closer to their destinations. And dont route Smithsonian tourists to stations that locals need to rely on for commuting. |
| I use EFC metro station all the time, especially pre-pandemic! |

Proposal to close 22 Metrorail stations

The trains and stations are already very crowded on orange/silver line and as we return to normal, putting people intentionally in even more crowded situations is unacceptable. I would ask for more frequent trains to keep stations and trains more manageable.

Utterly unworkable. Closing stations is not the answer.

Of these stations were to shut down, ppl would travel to the nearest station to go home bc that would be too much of a walk. They would either ride share or get a car.

Closing stations is a massive waste of resources. The stations are already there and people live around them. Not using existing resources makes no sense and will only lead to crowding of nearby stations.

Live in Cleveland Park. I'll leave the city if that station closes.

East Falls Church is a thriving, just renovated station. Post COVID numbers will show this. Also many of the DC Closures are some of the most important weekend stations.

Please do NOT close Grosvenor-Strathmore!!!

I regularly use one of the stations listed, so I said no. I would rather do this than shut the system at 9pm.

The Strathmore station is the most convenient for me with a convenient location and ample parking.

Ridiculous Grosvenor is my main station

My apartment community provides a shuttle every 15 minutes to the East Falls Church metro. The West Falls Church and Ballston stations are at least that far away, and during peak traffic times, are probably more like 30 minutes away.

Keep Clarendon and Virginia Sq. running.

I expect to be using these stations in Jan 2022

Clarendon to Rosslyn is popular and ridership should go up come summer.

We moved based solely in accessibility of Van Dorn street. Would not be able to get to work.

We cannot afford to lose so many stations that make life possible and sustainable for so many across the DMV. Not in a climate emergency. Not to mention that this will only lead to an even sharper drop in revenue for WMATA.

The metro at Grosvenor-Strathmore is my only way to get to work at the moment.

I pick up the train at Clarendon every day

Home values near Grosvenor would plummet.

Reduce the cost and provide faster service between stations

Why would Reston Town Center station close when it is just opened, and when Reston Town Center is one of Fairfax County's largest urban hubs outside of Tysons?

Federal Triangle is a critical station to the federal workforce. It is centrally situated to multiple federal buildings where thousands of federal employees work. Closing this station makes no sense. Bypassing this station after normal work hours may make sense, but closing the station completely makes no sense.

I live in Cleveland Park and I have not used the metro more than 1-2 times a year since 2005.

I am strongly opposed to this proposal. To me, Clarendon is a key stop and by closing both it and Virginia Square, it would be a long walk for me to the office (neither Courthouse nor Ballston is that close) and I would choose to drive instead. While I get that ridership is down now because of the pandemic, this proposal for 2022 when I would anticipate Metro ridership would be up again would seem to me to only decrease the chance that people start using Metro again. It seems to me that the proposal to close Clarendon and some of the others along the Orange/Silver line (particularly Reston Town Center and East Falls Church which is near my house) would serve only those who drive to Park and Ride and commute into the city and that the value of Metro as a mass transit system within Northern Virginia would be greatly diminished. Closing stations just doesn't seem to me to be the best way to achieve cost savings and it also just seems like a bad time to be proposing this as things start to get back to normal. I would prefer to see fewer trains than entirely closed stations.

Why not start this NOW? This is the year when people won't need those stations. By 2022, hopefully ridership will be back up.

This would be incredibly short-sighted. If you need to save money, reduced frequency should be the first option. Eliminating stations would weaken the network and make the entire system less desirable. Not to mention it would severely impact economic growth and development in the DC region and be very harmful to existing residents and owners near these stations.

I regularly take the metro to/from East Falls Church.

Greensboro used for employment travel to Tysons

I rely on the Mt. Vernon Sq. Station as it is near my residence. I also go to school at GMU and so rely on the Virginia Square stop to get to classes.

Proposal to close 22 Metrorail stations

This would have a disastrous impact on my life. Beyond disastrous. Cataclysmic

I would very much like to keep my station at College Park. Especially during a pandemic, I do not feel comfortable on a more compact bus ride. The big trains on the Metro and the less people on it that I have seen make me feel comfortable to get to where I need in DC. I don't think I have any other options if metro was gone.

How does this help? Those are mostly sunk costs. You just reduce ridership without meaningfully impacting operating costs

Keep McLean open

I would literally never have any reason to ride the metro ever again if you closed these stations

Horrible idea

I use two of those stations for errands, the post office on one and the grocery store on another. I would be forced to pay for rideshare to run personal errands.

This seems reasonable with the option of reopening if ridership goes up

Easy falls church metro is my stop and when we get back to normal it will be impossible to get to Ballston or West Falls Church by walking. It's expensive on the toll road into dc with parking costs very high. Federal taxes should be re-evaluated. Public transport is the back none of any city

Neighborhood around Virginia Square is quite dense in terms of buildings and population and Metro is essential to most residents.

Please do not close the East Falls Church Metro!

This works for me but would be an incredible hardship for low-mobility passengers who would need now to walk that much further do their destinations.

How much tax payer money was spent building these stations exactly? Can we have it back now, is that part of this proposal. They need to privatize you guys.

This is a great way to ensure I use other options to get to work.

How do you define "nearby" other stations? I would interpret that term as walkable to another station. I can see Smithsonian or Virginia Square in this category, but East Falls Church, located in a fairly high density neighborhood, is by no means walkable to another station.

Rely on access to East Falls Church; not walksake or parkable to neighboring stations

I have aging parents who rely on and need the Grosvenor-Strathmore metro station

I live and use the Grosvenor station to go to work

We use Judiciary Square to go to work.

It is idiotic to close Clarendon and Virginia Square. That leaves no stations from Court House to Ballston. So much for Arlington being walkable with this plan.

We need access to metro services, rather than close stations adjust hours to reduce costs

I use those stations. How would I get to work?

Very very important to me, my family, and Clarendon businesses that the Clarendon station not be closed. Thank you.

Keep Grosvenor-Strathmore!!

I live in Ballston. While I don't normally use Virginia Square, it can be convenient to get off there at times.

Grosvenor Strathmore is essential

I work at Arlington Cemetery and tourists and funeral attendees and employees DEPEND on the metro station. It is shameful to close off public transport access to this national shrine. Also, researchers will not be able to get to the National Archives if the Archives station is closed--there is little public parking and many researchers do not have cars. I also disagree with closures of Clarendon, College Park, East Falls Church, Eisenhower Ave, Smithsonian, Van Dorn, Va Square, all stations I rely on! This is a terrible idea. Closing these stations will destroy Metro as a system--no one will ride at all because it wont go anywhere.

Parking is not available at Medical Center or White Flint so they are not alternatives to Grosvenor.

Its not close each other!

I use the Clarendon metro station daily to get to work. Closing that would severely and adversely impact my commute time, especially since the next closest station (Virginia Square) is also listed as a station that would be closed.

Absolutely not

It seems if you closed Clarendon you cant close VA square Clarendon has more activity around it

East Falls Church is a busy and important stop for me.

This would end Metro as we know it. Please seek federal funding in order to keep Metro functioning

These are all frequently used stations. Closure would make use of metro very inconvenient

I live in DC and work in Clarendon. I need Clarendon to remain open rather than walking .5 miles from nearest metro to get to work.

| |
|--|
| Proposal to close 22 Metrorail stations |
| I use the Clarendon and Virginia Square stations |
| I require Eisenhower station to remain open; please do not close it as the ability to get to the next closest stations is difficult and time consuming |
| Do not close grosvenor-strathmore. It has parking. The other two options are not very walkable and have limited parking. Closing grosvenor-strathmore will create great hardship for riders and will have consequences |
| This is a terrible idea for some of the stations - some stations make sense. Closing stations in the Rosslyn-Ballston corridor is not a good idea. |
| Limits range of metro too much |
| My station is Grosvenor Strathmore, and there are no other stations within walking distance. If a station needs to be closed, why is Medical Center not being considered instead? Medical Center is within walking distance of Bethesda Station, and there are circulator routes that can take people close to it. Also, Grosvenor Strathmore has massive parking facilities which Medical Center does not. |
| Closing the College Park metro station would be of particular disturbance to transit to and from the University of Maryland for university classes. Closing the College Park Metro station would annihilate any commuters that made use of the Metro to UMD especially given the expectance of the return to in person classes as of Fall 2021. |
| These stations are vitally necessary, and serve important communities which are centered around them. Shuttering them would be disastrous for the entire region and would cause a massive loss of confidence in the metrorail as property values fell in response to the closing |
| I rely heavily on nearly half of these stations that are planned to be closed. Without these stations, I would be unable to get to work. |
| Absolutely not. I use the Greensboro station and know many others who do as well. There's no good alternative for us if the Greensboro station was closed. Tysons Corner is too far for many offices, especially to walk. Plus, what would you do with these closed stations that you already put the money into the build? Let them sit empty? That seems like a waste. |
| Losing Arlington stops especially through east falls church to DC will hinder a lot of people who have moved specifically to me close to a metro and does not have a car. This will also hurt apartment and house values since being close to a metro helps hike up the value of a house or apartment. Will shutting the metros actually be a cost saving when you factor in the drop in value of those neighborhoods without the metro? |
| Same as previous statement |
| This would require quite a change in my commuting plans, as I live by the Virginia Square metro. Furthermore, it would likely reduce property values. |
| Worst idea ever!!! |
| Metro should not close both Clarendon and Virginia Square - at least one must remain open |
| too many closures - close on weekends only if you have too |
| Nope. Mt Vernon Square is necessary for me. |
| I use Grosvenor Strathmore regularly |
| Please keep service at the East Falls Church Metro Station. |
| Why even run any trains at all if you shut down stations? |
| Federal Center SW is my end stop for my daily commute and is directly across the street from my employer |
| I use these stations and without them, I am unlikely to have to drive halfway into DC, park and wait 30 min for a train. This will likely take me out of riding the Metro as a whole. |
| This would work for me personally, but it seems like a total dealbreaker for residents that live near these metro stations. I would be furious if I had purchased a home specifically to be within walking distance of these stations (I live near West Falls Church and feel fortunate that it is not on the chopping block). |
| Please don't close the Eisenhower Ave station. Many of us in the neighborhood depend on the yellow line from here for commute to work. |
| GrovesNor Strathmore provides access to downtown with parking. This would isolate my neighborhood. |
| VA square, innovation center are expected to be utilized by me for commuting purposes |
| I commit to work on the East Falls Church Metro line. This would severely effect my ability to get to work. |
| This would be awful and ruin 1000s of commutes and businesses that rely on foot traffic |
| Our family relies on the Cleveland Park metro station for work and school. This would force us to drive instead. |
| Greensboro is my work metro stop, I live in the district, this would make me have to drive. |
| I can deal with reduced service. A total shut down of an entire station is unacceptable. |
| Smithsonian should remain open. |
| Please do not close East Falls Church. It is greatly needed for access to both DC and western VA (Vienna and Tysons). |

Proposal to close 22 Metrorail stations

People choose places to live, and pay more, precisely because there is a metro station near them. It is wrong to close stations. Reduce service if need be, but do not close the stations!

Definitely need more train for Grosvenor when things back to normal this year

Clarendon is the heart of activity in Arlington, I love to take the metro to the Smithsonian station to get to the mall

It is critical that we have White Flint, Grosvenor Strathmore and Medical Center

Closing the Clarendon station would make the Courthouse station insanely busy. These closures would also mean that I can't commute to my office on the Silver line from Courthouse. This is terrible for Virginia commuters!

College Park is a MARC linkup. Consider keeping.

I live near East Falls Church metro and I would appreciate the convenience of this stop remaining open.

These suggestions get worse and worse.

What station is near Arlington Cemetery? What bribe did WMATA receive from the tour companies that they would consider this?

I chose to buy a home near one of the stations that would be closed, so walking a mile to another station won't work.

Absolutely not--I live near one of these stations and they are crowded as it is during rush hour. This proposal is utterly idiotic.

Regular user of East Falls Church

I rely on East Falls Church metro station and live just a block from the station. This would have a huge impact.

This is not an awesome option.

Shut it all down. Rip up the tracks - sell for scrap. Sell off everything else. You will save a lot of money.

This is absolutely appalling and will severely impact the ability of people to get around using Metro. Considering the push to green and car-free lifestyles, it's unbelievable that you would even consider this as a viable option.

Clarendon is the stop where people in NoVa use to go to the only Trader Joes in the area that is metro accessible in addition to many other businesses

Closure of Virginia Square and Clarendon - which are next to each other - makes my commute via metro impossible. I will no longer ride metro if you close both.

Clarendon is HEAVILY trafficked in non pandemic times, which we will return to by the end of 2021. Virginia Square also gets tons of use.

Grosvenor-Strathmore is a very important commuter station with ample parking. It would be extremely detrimental to our community to lose this important commuter station. Many of the commuters are working from home now, but will return by January 2022.

Please don't close Grosvenor Strathmore. It is needed

I can only use Grosvenor-Strathmore. If it's closed, I'll stay home.

In this scenario, both Clarendon and Virginia Square are on the list meaning a traveler would have to take Courthouse or Ballston which is very far away. Why both and not just one?! Also East Falls Church is a major stop for those that live in Falls Church/Arlington and need parking. There is NO parking at the Arlington metro sites. Furthermore, parking is already troublesome at EFC for this reason. Closing this station will put a lot of burden on WFC and that station cannot handle anymore either.

LPW RIDERSHIP IS DUE TO THE PANDEMIC. CLOSING STATIONS IS PREMATURE. AS VACCINATIONS CONTINUE RIDERSHIP WILL PICK UP. THE EAST FALLS CHURCH STATION IS VITAL FOR THE NEIGHBORHOOD.

Clarendon, Smithsonian and East Falls Church are essential to my travel. Please do not close these stations.

There is a large population of metro riders that take the metro to work near the McLean station. This would cause a major inconvenience for many

I use Cleveland Park, Smithsonian, and Grosvenor-Strathmore

East Falls Church is my metro station. Driving to Ballston and parking would increase my costs and hassle. I would start driving to work instead. You would lose me as a rider.

It would mean a significant walk to the next station.

Clarendon should remain open

I moved to the Parkside Condominiums behind Grosvenor-Strathmore station specifically to facilitate my commute on metro. Neither of the nearest two metro stations -- White Flint or Bethesda -- are within pedestrian commuting distance from me, and neither have adequate parking. If you close this station, I'll have to drive and park to a distant metro just to continue using your services.

I have planned my move near Innovation Center and it would disrupt my commute on the Silver Line if this stop gets shut down. Really need this station to stay open for my family's commute.

| |
|---|
| Proposal to close 22 Metrorail stations |
| inequitable for working poor without alternate transportation |
| Depends on whether federal employees return to office. It would be ok if we are on max telework but not if we need to commute. |
| Expecting to travel to and from Judiciary Square and to and from College Park often - this would be very messy. Please do not close stations. |
| Are you freaking kidding? |
| This is a terrible idea. You can't close stations if you expect to get any revenue. If you close them, people will find other ways to commute and they will NEVER go back to metro. |
| This is the worst one. Asking people to wait is one thing, closing stations altogether is much more damaging. |
| Do not close both Clarendon and Virginia Square. Close one, preferably Virginia Square because it is smaller. Clarendon is a developing area with more and more people living there and a larger number of local businesses such as restaurants that depend upon the metro. |
| This limits access for those who rely on the metro for transport. |
| The property value of homes will decrease if you close these stops. It will cause an increased use of cars, which will increase traffic that metro eliminated by the nature of its accessibility |
| I cannot overstate how much of a misstep closing the College Park station would be. There are no other stations served by WMATA being targeted. This would be a drastic inconvenience for students, professionals, and others who rely on WMATA to get to and from DC. |
| My partner and I use the Grosvenor-Strathmore station almost daily to get to work |
| If you close Grosvenor-Strathmore, I won't be able to get to work. I'll be forced to buy a car I can't afford, or I'll have to move to an apartment in a higher density area, which I also can't afford. Reduce service if you have to, but do not abandon parts of your city, please. |
| I live near Virginia Square and Clarendon, I would need at least one of those to remain open for my metro commute to work. |
| Closing both Clarendon and Va Square leaves a huge gap in Arlington. Just close one or the other€"NOT both. Va square would be OK given it is not far from either Ballston or Clarendon. |
| Nothing should close between DC and Ballston. People that close to DC do not have cars, as we moved to where the metro is. The mile walk from Courth House to Clarendon is not possible for many months out of the year. |
| This is the worst proposal of the lot. People depend on access to their closest metro station. Reduce service if you must, but outright closing these stations is a terrible idea. |
| Please keep the Grosvenor-Strathmore Station open! This Station is critical to our neighborhood! |
| This would prevent me from getting to work! |
| Why in the WORLD would you close stations - especially some that have JUST been renovated and/or built??? In-station staffing is minimal and would not affect budget in a large way. Also, stations like McLean, ANC, East Falls Church, and the new yet-opened Silver Line stations are NOT within walking distance of others due to lack of safe pedestrian options |
| Closing Virginia Square and Clarendon would be a burden because these are two stations nearest to me. |
| This is ridiculous. |
| I use Virginia Square every single day to get to work. If you close that - and Clarendon - we have no open Metro station around us. |
| This is a terrible idea. This would destroy property values near these metros. One of the primary reasons people bought certain properties was to be able to easily walk to the metro. |
| Grosvenor needs to stay open. A lot of people in that area dont have cars. It would also hurt the Strathmore concert venue, and Medical Center is not an alternative since theres no parking. |
| We live in a place where there is a walk to any metro station. We do not benefit from any one station staying open. |
| That would close key stops that I use to commute and generally get around in the area |
| This would further reduce ridership. |
| this would likely lead to very crowded stations as people return to more normal commutes and very undesirable commuting for those of us with no other options |
| Virginia square or Clarendon needs to remain open. |
| I live near Grosvenor-Strathmore and would not like for it be closed. Smithsonian is also right on the Mall and should not be closed. |
| It would work, but increase my inclination to simply walk from Ballston to Clarendon and skip Metro altogether. |
| Many of these stations arent within walking distance of another station. This would really be detrimental to many riders. |
| Clarendon is a hot spot. How can you close two stops in a row, Virginia Sq and Clarendon? |

| |
|--|
| Proposal to close 22 Metrorail stations |
| Do not close Grosvenor. I would rely on it being open to get to work. |
| Closing stations is a foolish and shortsighted plan. Jeopardizing current workers as well as hurting the future of the metro system. |
| I used to commute every day to work in downtown DC before the pandemic from Grosvenor. |
| Closing College Park station is unbelievably short sighted. The number of students and staff for the University of Maryland who rely on metro for transportation is quite large. 40,000 plus students and 25,000 staff. If only fraction of those people use metro, it still warrants keeping the station open. This doesnt include others who are visitors to the campus as well. |
| I depend on Cleveland Park station for using Metro |
| Several of these stations, including my closest station East Falls Church, are NOT near other stations. The nearest station is over two and a half miles away! Thats not walkable and certainly does not work for the people who live near East Falls Church. Please do not close stations that are more than a mile away from the nearest other station. |
| I plan to use the East Falls Church abs Federal Triangle stations. Please do not close them |
| Many of the people in my building including myself and my husband use this metro line often. We use it to get into the city and around places where parking is minimal or non-existent. This would create a large hardship on us as well as many of the people in our building along with the workers. |
| Yo dependo de la estaci3n en Greensboro para poder ir a trabajar. Me mude a esta area solamente por la presencia de esa estaci3n de metro. |
| We will eventually go back to our offices stop this madness |
| We purposely moved to our house for the convenience to the metro and will be using it to commute to work. This will force us to drive and not use the metro at all |
| By January 2022 I would resume by commute from East Falls Church into DC. Closing this station would become a huge burden on commuting, either forcing me to drive (increasing congestion on the roads and cost to me) or extending my commute by 20-30 minutes to arrive at a different train station. |
| Closing East Falls Church would make me stop using Metro Rail completely. I also think closing the transfer station between Orange and Silver lines defies logic. |
| Critical to continue having access to metro |
| This would significantly hamper my ability to get to work as I live near east falls church and ride to federal triangle. I rely on metro every day. This would truly be devastating. |
| East FC is a very important station as the last stop for the silver line in the closer in suburbs |
| While East Falls Church is located between Ballston and West Falls Church, it is the most convenient station for many Arlington residents, cutting down signifantly on commute time to a metro station. Closure of this station would result in 40-50 additional minutes to commute to/from work. |
| Grosvenor station is very important to us and disagree on any changes! |
| I live near Grosvenor. It was such a hassle getting around when the station was closed before |
| I will likely be commuting from east falls church, and I need to use the metro. So I will need the station to be open. |
| Closing stations is not equitable. Better to have delays than close stations. |
| The EFC metro is crucial to our commuting needs and the needs of our neighborhood. |
| Critical that Clarendon station stay open for my needs |
| The Clarendon station is critical to me and must remain open. I urge you to find other ways to cover the costs to continue to operate it and other stations. |
| I commute form College Park and return to College Park via metro. I cannot afford to take Uber everywhere. If there was a bus to Fort Totten I wouldnt have any issues but College Park Metro is extremely convenient for me and the reason why I bought my house 2 blocks away from the metro. |
| I lived in Clarendon near the metro on purpose because I must use it to get to work at Walter Reed. I am an active duty Military member and am not allowed to drive to work, so I must use the metro. If you close the Clarendon Station, I will have no way to get to work. How can you take away my only mode of transportation? How do you think I will get to work if this station closes? |

| East Falls Church is needed. Unable to get to Metro otherwise |
| As I live near East Falls Church, I would switch to car pooling. |
| This is an extremely huge issue for the disabled community and the elderly who rely on the Metro. |

Proposal to close 22 Metrorail stations

I am a student at UMD College Park, and rented based on proximity to the Yellow/Green lines under the assumption I would be able to metro to College Park. We will be in person beginning Fall 2021, so ridership (and need for this service) would go up.

I rely on the use of the College Park metro stop for my commute to my position as a student and member of the faculty at UMD. The University is planning to open fully in Fall 2021 and faculty like myself will be required to be on campus. Folks like myself commute to work and need to use the metro and buses to do so.

McLean metro has parking. This is important.

Absolutely not. This is a horrific idea to close this many vital stations. Most of these actually wouldnt even affect me, but low income people who rely on metro to get to work would be out of jobs because of this decision. Please dont be that heartless.

Morgan is my only transportation

I need to get off College Park

How would people be able to visit Arlington Cemetery? It is hard to get to by foot. And Smithsonian is very important for tourism and the only station on the mall!

I use east falls church so closing the station would make me never use metro.

Keep the Grosvenor station open

This would be detrimental to work

This proposal would force me to find a way to get .6 miles to my apartment. I am disabled, so this would severely hurt my ability to commute.

Need Virginia Square or Clarendon. No point in closing both that are one after another

Closing both Clarendon and Virginia Square stations is especially problematic.

Youre proposing to close the Smithsonian station? This station cant possibly have low ridership. Its packed to the gills with tourists.

Please consider closing Arlington Cemetery permanently. This infill station is a drag on the blue line.

I am an active user of Grosvenor-Strathmore and believe that station should stay open.

This would place an undue burden on me and my family if Cleveland Park closed. The walking distance to other stations is just not practical for us

This is ridiculous and would devastate metro. Federal government employees need the metro stations like grosvenor in Maryland. Get rid of twinbrook or white flint.

This would greatly impact my commute and the property values of our home. It would add to traffic congestion as people would consider driving instead of taking another station. The push has been to maximize the efficiency of public transportation to ease congestion into DC and to encourage environmental responsibility. Shuttering stations entirely unfairly punishes certain home owners and renters and discourages this push in the Falls Church area. I am strongly against shuttering stations and in particular East Falls Church, which is the proposed hub to the Silver Line.

I do not have a car and would hate to see the Grosvenor-Strathmore Line closed. I have used it to go to musical events at the Strathmore.

I dont ever plan on riding a Metro train, not worth the hassles.

We recently bought a house in Grosvenor Park near Grosvenor metro and a big reason for the purchase was the proximity to the metro station. This would be terrible and inconvenient because we are expecting to resume some form of normal life in 2022 (including commuting to work daily and back).

My station is Greensboro. Without it, I would have to walk close to a mile each way to work from Tysons Corner or no longer use the metro at all.

These really arent as close to other stations as you think they are.

My family commutes from Grosvenor-Strathmore daily.

I use the Virginia Square station a lot and the Ballston station is a far enough walk that makes it challenging to use frequently.

Population density around the Arlington areas nearer to DC necessitates increased density of metro tail stations.

Closing the East Falls Church station would be a huge problem for Arlington, and will disproportionately harm teachers and other workers who live outside north Arlington but do work there: nannies, teachers, retail and food workers, grocery store staff, etc.. This stop has long had a wait list for parking spaces so I cant imagine how it could possibly have low ridership

Grosvenor-strathmore is an important station in this side of the red line as this is the stop that has parking.

dont close both Clarendon and Virginia. Its a long walk from Court House to Ballston

Grovesnor needs to be open. This is vital for commute.

No!!!! These are stations that I frequent

I use Grosvenor when my office is open downtown

Proposal to close 22 Metrorail stations

Absolutely not. The point of public transportation is to provide transportation in a city! All these stops are necessary

Grosvenor-Strathmore is vital for our commute to work. There is no parking for work and the station is near our home. We would have to move to be close to a metro station. Are you going to pay for our move?

My husband and I only have one car and commuting would become very difficult if our east falls church stop closed as we specifically live within walking distance to the metro to save on transit costs. This would be harmful for our family and others like us

Absolutely oppose this idea!!!! I won't be able to go to work.

This would be incredibly devastating to so many commuters and local businesses served by those stations.

You might as well shut down the entire system and go back having everyone drive. This will force crowded stations everywhere. Nobody will want to ride Metro!

The system already has not enough stations to be really useful. All should remain open.

Total disaster to close existing stations that folks depend on. We live in our neighborhood because of the metro proximity for school and work and depend on it, unthinkable that you would close a station that has been open for 40 plus years and that multiple neighborhoods depend on. And near is such a silly word -- would be better to close something like Virginia square -- you could walk to Ballston or Clarendon far easier than someone in East Arlington could walk to west falls church or Ballston.

I keep hearing about closures but am not seeing if this is just temporary. I live near East Falls Church and that station was one of the main reasons we bought where we did. As soon as covid gets under control, we plan to be back on the metro

No, I rely on the Mt Vernon Sq station to get to work. Having it close permanently would affect my ability to get to work reliably, especially in inclement weather. There is a reason the stations that are in place exist and not using them is a waste.

This is the worst of all the proposals. Thousands depend on these stations for mobility. Several are not near other stations, especially for riders with mobility limitations. Please do not allow this to happen.

why would you close a transfer station?

Do not close both Clarendon and Virginia Square. The GMU Arlington campus is there. Student ridership will increase soon.

My daughter uses CI Park to get to school

A lot of employees work around corporate offices near Greensboro metro station. I prefer to keep Greensboro station open!

Only if the stations can quickly be reopened when riders return.

The entire reason people move into Clarendon, vs Ballston or Courthouse is because of the Metro access. Nearly everyone in Arlington takes the metro to work. This would SEVERELY impact everyone in Arlington. Also - HOW would anyone be able to visit loved ones at Arlington Cemetery without owning a car - something that is very common in the area.

East Falls Church keeps me away from the high prices of the city but still easily accessible. McLean Station gives us the only metro accessible Wegmans - a staple for my roommates many food allergies.

I commute into dc and live near the grosvenor station.

Especially if combined with the first plan to limit the intervals between trains, this would extend my commute to the point that it would be more effective for me to just drive or uber into the office. The stations outside of DC need to stay open. Especially to maintain social distancing at the platforms/on the trains themselves.

How will people get to work if they have to walk miles to the nearest open station?? People have disabilities who need to use public transit too and they can't all walk that far

I live in courthouse so thats perfect for me

I live in Virginia square and I would need to walk 20 minutes to walk to a metro. This will definitely not work and is unfair. Close down courthouse instead.

The Clarendon station is necessary for our neighborhood and my commute.

I would need Clarendon station to commute to work in DC after Federal agencies allow employees and contractors to return to the workplace.

I worry it would crowd the stations that remain open, which already see huge numbers of commuters during non-pandemic times

Would have to work from home or quit if Virginia Square was closed.

I live near Innovation Center so I would need that station open when I start commuting.

I live in College Park

Virginia Square is right next to a large government agency. Ballston is way too far to walk.

Keep van dorm open

| |
|---|
| Proposal to close 22 Metrorail stations |
| College Park needs Metro! |
| This presumes that ridership will remain low due to telework. This could be a temporary solution but metro needs to quickly be able to reopen stations if telework is no longer available. |
| Cheverly ridership is low bc it's a neighborhood station with most workers at home. This is not a permanent situation. I believe that once businesses open offices, ridership will return. Please do not close permanently |
| Access to Eisenhower station is crucial for maintaining my job. |
| I use the East Falls Church station to get to work. |
| Closing some of these stations cuts off a persons ability to travel to work as essential workers. Closing Clarendon and Virginia square does not ease the travel constraints present for those of us still going into work. Closing both of those stations would require people who now live near the Clarendon station to walk a mile to the Ballston station or 0.6 miles to the Courthouse station. Please do not take this vital option (the metro) away from people who have chosen to live near the metro station so that they can travel to work |
| Please, please dont close College Park metro! |
| Clarendon houses a wide variety of attraction and is an important hub for all age groups. If need be, Ballston and courthouse should be closed. |
| I work at the McLean metro stop. How would I get to it if its closed. Thats way too long to walk from the Tysons Corner station its not comparable. |
| Closing Grosvenor-Strathmore would stop me riding Metro. The next closest stations are not easily accessible in a timely manner |
| There are still people going in each station, what would happen to the current infrastructure ? Would it just sit and it would cost more to fix it if it were to run again. If anything, stagnating the ride would be the option I would choose, but not completely closing bc these stations would just be sitting there |
| This would greatly affect me negatively. |
| I rely on taking the Metro from East Falls Church to work. |
| Outrageous that you would build a station like McLean and then shut it down. Who does this planning? This is a board that doesnt believe in public transportation!! |
| This proposal would be catastrophic for Metro service. I am a commuter in Falls Church who also routinely uses multiple stops that would be closed under Metrorail Proposal 5. I would be severely affected by this if it goes into effect. |
| You would destroy the property values of our neighborhoods that rely on metro commuting. |
| The metro stations are essential for the communities around them! This would be terrible for people who commute daily. |
| East FC is the link to the Silver Line. Leave that one open! |
| I use the college park metro to get to work, so no, this does not work |
| Closures of these stations would create a hardship for so many metro users and would, in fact, contribute to lower ridership in the future. Not a good long-term solution. |
| I don't use those stations often, but especially in the more residential areas I think closing them is unfair to people who moved there for metro. |
| We need this metro stop. |
| East Falls Church should not be closed. Although there are other stations that may be close, it isnt realistic for people near East Falls Church to commute to those stations....especially when the main means of commuting is the metro station. |
| Closing any stations in Arlington is a problem for me and others. The East Falls Church station is particularly problematic for me. Many of these stations are located in highly populated areas and the residents chose these locations to live and work due to access to the metro. This is not the way to balance the budget. |
| This would negatively impact my work and social reliance on Metro |
| This (sorry to be so blunt) is ridiculous. Closing these key stations would be very bad for ridership, and would limit my ability to get to my near by metro station with a young child. |
| I live at Grosvenor |
| I will need to go to College Park |
| station closure is impactful |
| I need this as my only transportation to work in CC |
| Medical center doesn't have adequate parking, grosvenor should remain opened |
| Living in close proximity to East Falls Church metro, this would have a huge impact on my commute. I own my condo in that area so that I have access to a nearby metro station (walking distance), and so I dont have to drive into DC. |
| Too many closures in arlington |

Proposal to close 22 Metrorail stations

I use EFC most often and would be less likely to use Metro at all if that station closed.

Closing the Cleveland park metro would be a major mistake. That metro is widely used by the CP neighborhood. I understand that telework has shown low ridership, but the Cleveland park metro station is integral to the community.

I work at judiciary square but could get off at Chinatown. This would However add to my commute time by about 5 minutes.

McLean station services many office buildings that nearby stations do not

I expect that in January 2022 I will be going into my office in DC again and will need access to metro.

I live in between clarendon station and virginia square so I would not have an accessible metro station with this proposal. I do not think two stations next to one another should both be closing. That is a drastic change in service.

The Grosvenor-Strathmore station is used by a high volume of commuters daily. Other stations in its vicinity have nearly zero parking options. This would be a travesty for Metro, and a huge problem for all commuters in and out of D.C.

While I am walking distance to Grosvenor-Strathmore, I do not have easy access via Metro Bus or other method to another station.

This is frankly unacceptable.

Closing Clarendon and Virginia Squares makes no sense since they are next to each other.

I am solely dependent on the clarendon, rosslyn, and foggy bottom metros stops. I have a disability that prevents me from bicycling to work and driving would result in prohibitively expensive parking. Im sure Im one of thousands of people who cannot work from home and depend on the orange line to get to work.

January 2022 COVID should be over and there are going to be thousands getting off and on the Metro at the McLean stop. You are going to be impeding so many people and increasing traffic in the area. Please do not close the McLean stop, and maybe even the Clarendon stop. The timing does not make sense. Why close it starting in January 2022, right when the COVID WFH issue would be going down

A closure of East Falls Church would be devastating to our commute schedule.

These proposals are based on ridership today, not once the world opens up. Also, it is not clear how you are defining close. East Falls Church is not within walking distance to another station. Unless you are nclude walking on Route 66.

The College Park metro is not close enough to any other stations to allow for decent coverage of the UMD student population.

I can walk to either Virginia Square or Clarendon. Closing one or both would mean a much longer walk to either Ballston or Courthouse or a bus ride to either. This would make the commute time much longer. The added time on public transportation would likely make driving a more efficient alternative.

This is, by far, the dumbest thing Ive ever heard. If this option is chosen, the entire system should just close. I seriously cant even believe this is being considered, it is that stupid. Why even have a rail system?

Need the Silver Line!!

Closing stations would further reduce desirability- if I have to take two modes of transportation I might as well take an uber

Clarendon is one of the stations that could benefit from staying available due to college students going from Ballston station to Clarendon

Metro nay decide to reduce its opex by using only manual stairs or have some trains not stop at the locations. However closing them down will adversely affect my daily schedule

Ridership is down but it will come back especially when tourists return. You can't close Arlington Cemetery or Smithsonian. There would be no public transportation to the cemetery. Clarendon will be thriving when restaurants open again.

We purchased a home close to Virginia Square so we could walk to the Metro. We fully support Arlington funding Metro and would expect this station to remain open as it has close to George Mason University and needed by residents who live in the vicinity. This is totally unacceptable.

Devastating for the seniors in our community who cant get to other stations.

This would close Both the station near my home AND the station near my work. I would need to purchase a car and a parking pass in a neighborhood that is already overflowing with cars. My husband would likely have to purchase a car as well. This would add two additional cars in the city just from onehousehold!

I wouldn't use Metro.

closing so many metro stations would greatly negatively impact peoples lives and would cause some people to have to move and uproot their whole lives. I think closing stations that people depend on would make people use the metro less, and reduce revenue.

I got on at the Greensboro station Monday-Friday before COVID.

I live in falls church and work in DC and rely on metro for transit

| |
|--|
| Proposal to close 22 Metrorail stations |
| Closing stations will drive ridership away. |
| Too many VA closures in Arlington/Falls Church. Keep close to city options open. |
| McLean is where I work. There's no way to walk to the buildings at the McLean stop from the Tysons stop. This would completely prevent me from getting to work. Also, Clarendon and Virginia Square are next to each other, closing both of them would make travel there really difficult (I live in Ballston and there's a lot in Clarendon I travel to). |
| I currently live in walking distance to the East Falls Church metro. If you close it, then I will be required to drive and pay to park somewhere further away from my home. Parking is expensive and not in my budget. Why would you close EFC which has its own parking lot. A lot of people drive to and park at? The Smithsonian is the stop I get off at which is right next to my office. It's also a tourist destination, it should remain open. |
| Why would you spend all that money building stations that would never open. |
| Clarendon and Virginia Square are high volume when businesses are open, and post covid metro closures right next to each other like these will hurt businesses operating in these areas |
| I use Franconia Springfield - with Van Dorn closed, our station and garage will become much more busy. That is not going to work with trains every thirty minutes. |
| Cut staff not service |
| I use these stations to commute and my schedule would be drastically impacted by the closing of the above stations. |
| You just spent millions on EFC station and shut it down while you worked and now you want to close it permanently? Insane. |
| There are so many facilities, daycares, shops, restaurants, and bars that are concentrated in Clarendon area. This would cause major inconvenience if Clarendon metro stop is closed. Please DON'T close Clarendon metro!!!!!! |
| A lot of these stations are near major attractions |
| Remove VA square but keep Clarendon |
| Would like to keep either Clarendon or Virginia Square open. |
| The metro should consider other ways to support these populated station areas for transit |
| I use College Park Metro consistently |
| I work at Capital One and need to get off at McLean station. |
| I work at College Park. I and many of my colleagues (and students) rely on the College Park metro stop to get to campus. Campus has reduced parking spaces due to expanded campus construction, so the metro is many people's only way to commute to campus. University of Maryland plans to re-open for physical, in-person education in the fall, so by January 2022 we will need to have the metro stop in order to commute to campus. |
| Lack of frequent and timely service will result in my abandoning use of Metro for my commute, resulting in my driving to work instead |
| Closing Clarendon and EFC would be an absolute disaster. If you have to close one, choose Virginia Square, even though I hate that idea. |
| Closing East Falls Church would significantly increase travel time and might be enough incentive to move outside of the area |
| How can you suggest closing major stations in the District like Smithsonian, which concerns me specifically, as it is the only stop I can use to go to work, never mind those who use it to visit the museums, is beyond me. By January 2022, do we not expect that things will be closer to normal if not all the way there, and that there will be a real need? Amazing. |
| We live in College Park, and use that station every day. Also, the University is very dependent on it. |
| I live near Greensboro station, so this is a major problem for me. I also used to live near Wiehle-Reston East and I can tell you that Reston Town Center is not realistically walkable from Wiehle-Reston East. |
| No reason to ride Metro if many of these stations close. Metro will lose business. |
| This is utterly insane. How would anyone get to work? Are these closures permanent? |
| I will likely be working in person again in January 2022 and will be using the McLean station to get to work. I can walk there. Although Tysons is close, it is absolutely not walking distance. |
| The College Park metro station is how I get to work. It is also one of the busiest stations during the school year, I'm very confused about why it has made the list. |
| Same as comments before. This will make platforms more crowded and it is appalling that Metro is considering this as a possible option |
| Don't close Grosvenor-Strathmore. |
| Potentially closing stations that haven't even begun operations (Silver line phase 2) is an abdication of the social contract taken in building these stations. Additionally, Dulles toll road drivers have been subsidizing the costs to build this line so would be unacceptable to have taken these funds and not deliver the benefit of rail service to all stations. |

| |
|--|
| Proposal to close 22 Metrorail stations |
| We use metro and this will not work for our family. Please do not do this. |
| Lots of closures on orange with Clarendon and VA square. Could be a long walk to either Ballston or Rosslyn. |
| College Park is needed |
| Closing the metro stations would have a disastrous impact on the remaining metro stations. It will increase the number of people that go to the other metro stations, which will cause longer lines, more stress, and delays. Additionally, large crowd gatherings will spread COVID and other infectious diseases. |
| I use Greensboro and Reston Town Center stations regularly for work. |
| Cleveland Park, Clarendon, Mt Vernon Sq, Federal Triangle are all core stations I would use. This is really harmful! |
| I live in Cleveland Park and am deeply concerned by this proposal, it would reduce my ability to ride metro drastically |
| Grosvenor-Strathmore is a very popular station! Countless people rely on this station. |
| My family rides from the Clarendon Station many times each week and it is important for us |
| I moved to my current residence specifically because of proximity to Clarendon & Va Square stops. many residents in these areas do not drive and like me, will once again rely on metro to commute to work once the work from home becomes less widespread. |
| Commuting between DC and McLean is important to me. |
| Metro is a public utility it serves the people. Without Metro, there is a snowball effect to keep more people in cars which we need to get away from if this area is to become its potential of a great metropolitan city. |
| I use East falls church station every day. |
| College Park is the closest Metro station within walking distance to my house. Its unsafe and more problematic to walk to PG Plaza |
| If Va sq and Clarendon stations are closed I would stop using metro. |
| This is the worst proposal of all of the proposals in the survey. I use many of these stations regularly, and I know for a fact I am not the only one. This is beyond shortsighted and harmful to the people who use the metro on a daily basis or to explore our city. Reduced stations when more people are going to be able to start riding the train is a terrible idea. As people get vaccinated, more and more people like myself will be returning to using the metro. These plans are very shortsighted. |
| Clarendon and Virginia Square are heavily residential with people returning to work downtown by 2022. The crowds at Ballston and Courthouse will be unbearable if those two stations close. |
| Use Grosvenor/Strathmore on a daily basis, including use of parking garage. Would present an immense hardship for me if this station closed. Additionally, we make full use of the Strathmore Theatre and this would make that more difficult without the parking facility. |
| I live at Grosvenor station and walk there to commute. I would have to move if the station shuts down. |
| College Park is a vital station for UMD students and employees and would severely limit my options for commute if it is closed |
| Clarendon, East Falls Church, and Virginia Square are my top stations. Virginia Square and especially Clarendon have high-density housing dependent on Metro. |
| This is crazy. These stations are close to other stations only if you are driving a car |
| I live in Cleveland Park. I do not own a car. I depend on Metro to get to/from work. And Metros solution is I need to walk a mile to get to either Van Ness or Woodley Park? A one-mile walk is not near another station. Adding a 20-minute walk to my commute more than doubles it. A totally unacceptable solution. |
| I walk to East Falls Church. It would be a much longer walk to nearest alternative. |
| I moved into my current home specifically to be able to walk to the metro (East Falls Church) to commute to work. This proposal would have a serious negative impact. Also, when ridership resumes post-COVID, the other nearby stations will become extremely crowded/over-crowded. |
| I depend on being able to walk to the East Falls Church Metro station to access Metro |
| Virginia Square OR Clarendon should be closed. I think thats a better compromise than Clarendon moving to Courthouse and VASQ moving to Ballston. |
| Stations are there for a reason, you need to give recovery a full year once were officially in it to track new trends and movement before just closing stations. What rides did before and during the pandemic isnt indicative of behavior after. |
| I commute via Metro to Greensboro - Tysons Corner is not a close enough walk. |
| Please don't close grovesnor. |
| I use the van dorn metro everyday |
| Smithsonian is key to taking friends and family to visit DC museums and attractions. |

Proposal to close 22 Metrorail stations

Even though many of the stations have others close by, it would greatly increase travelers headways. Relying on buses to run on time, especially during rush hour traffic, is a dangerous game to play when trying to coordinate that with reaching Metro on time for your train.

I use Virginia Square and/or Clarendon daily.

I am a frequent user of Clarendon and East Falls Church stations.

This is a terrible idea.

All this would do is make traffic in the DMV worse as people will be forced to drive to get to work in addition to overcrowding stations that won't be shut down.

People purchase homes assuming access to metro lines; closing stations could affect property values

I support closing some, but not all of these stations. For example, closing either Archives or Federal Triangle, but not both.

I use Grosvenor-Strathmore and it is a busy station for those who drive and park. I would not be interested in using Metro if I had to take a bus to another Metro station first, since parking would be limited at Twinbrook and there is not parking at NIH.

I rely on the Yellow Line and College Park Station specifically to get to work. Closing this station would make my commute much more difficult.

I live in the fringes of the metro, not even opening the silver line phase 2 would be detrimental to my commute

I rely on metro to get to work

I primarily use the Clarendon station

Close temporarily or permanently? What is considered low ridership? How did this proposal rise to the level of serious consideration given that it is effectively culminating in a non fully functioning system?

For my commute, this will actually speed it up (no stop at Eisenhower). But when riding Metro for other purposes besides commuting, having all of these closed stations is a real negative.

Dont close East Falls Church!!

Innovation Center should remain open with its large parking facility and similarities to a terminal station.

Keep all stations open by the Mall and keep Cleveland Park open.

Save Clarendon and Arlington Cemetary. Clarendon is the only stop I routinely use. If you close that station, I will stop using Metro altogether. I am voicing support for Arlington Cemetary only because I know my out-of-town family uses it when sightseeing.

I rely on Grosvenor - Strathmore for transportation

Why did we spend all this money on a subway system if half of it is going to be closed. We need more access to metro, not less.

Another horrible idea. Metro needs to be about service. This plan puts customers last.

I use some of those stops regularly

Work right next to the Mclean station and losing it would make the commute really rough; nearby stations are too far away to be useful (no safe way to cross 495)

I use those stations in Virginia often

Please leave Cleveland park open

One of the main reasons our family moved to the Grosvenor Place condominiums was the walking distance to the Grosvenor-Strathmore metro. Removing this station would be devastating and would also decrease the property values in that very highly lived-in area.

You cannot remove stops. There are valuable citizens who rely on these stops. Using 2020 or even 2021 usage metrics are irrelevant and not a reflection on the true usage. Please do not let one year of poor usage impact the future years usage (which will most like increase tremendously as citizens continue to increase their public exposure in the coming months/years).

If less stops means more frequency in cars, then yes

This is absolutely ridiculous and you all know it. Why are you spending millions on projects that wouldn't keep metro open? We all know when the vaccine is widely available and folks go back to work we all will be relying on public transit again. Why would you cripple a major metro region because of how your board mishandles funds? The people, small businesses, restaurants, museums, and region shouldn't be screwed because of the actions of a few.

I live in Reston - The Town Center Station isnt even open yet and you guys are closing it?????

Keep east falls church open

Proposal to close 22 Metrorail stations

Closing stations will force people to have to go longer distances for normal commuting and will negatively impact the businesses surrounding those stops which will then mean less money going into those communities and causing the decline of dmv area

Absolutely not - it is hard enough to get to stations as it is. Closing more stations will just make it worse. Grosvenor is extremely crowded, parking lot is often full, how could this be a station with low ridership?

This would affect my ability to travel to work.

I use many of these station, including Cleveland Park, on an almost daily basis.

Please keep at least one station open out of Clarendon and Virginia Square. I need at least one to stay open.

If these are permanent closures, I can guarantee that Metro would never recover from such a bad decision.

This would be really difficult

I literally chose to live in Virginia Square for metro access. Rents in the areas where there continues to be metro service will rise exorbitantly. Are you kidding me?

Large populations use these stations at different times. If they are closed, the riders would have to walk from the other stations, a dangerous situation in the dark. Many of us are widows and single women who take the Metro and can actually park near the station. This would be a HUGE disservice--and mean that I would NEVER take Metro.

We moved to Arlington for the sole reason of being able to mero to DC for work

East Falls Church is quite far from other silver/orange stops - I wouldnt consider it being near any station. McLean is also not near any station. McLean is also very important to the employees of Capital One who do not drive to work.

Why open the Silver Line Phase II stations just to close them again? Delay opening them if needed.

Smithsonian needs to stay open, or else Federal Triangle does. Tourism helps DC alot. So, all these stations close, and the trains run every 30 minutes? I dont see that working at all during rush hour.

The Clarendon station is VITAL! There are many restaurants, bars and shops in Clarendon which would be difficultly to walk to from other stations proposed to stay open. This would be awful!

The Virginia Square metro is a significant station for the FDICs office in Virginia Square.

I plan to ride the metro to work frequently and the closest station is Grosvenor-Strathmore.

Greensboro is my station

I rely on the Clarendon station to go out for drinks on weekends

I work at federal triangle

McLean Station is important for many big companies in the Tysons area. Shutting this station will further reduce demand for Metro service. Has a financial study been done to understand if cutting service to Mclean is cost effective? I worry that if Mclean is shut down, then it will further deter people from taking Metro, leading to an even worse financial situation for Metro. Is there any way to ask the nearby companies to help shoulder some of the costs of keeping the station running?

East falls church is a critical station

This is the worst idea. Too many people would have to give up using mass transit in a way that would truly enable various work schedules.

Closing EFC is a disaster and forces me into my car. VA square serves the university.

A lot of the D.C. near the national mall I would use.

This would severely hinder my use of the metro

I used grovsner because there is some parking there and none in medical center.

Grosvenor-strathmore improved to me

Closing both Clarendon and Virginia Square seems ridiculous. Pick one to close.

I use the East Falls Church station every day, Monday to Thursday. I walk to that station from my house. If that station were closed, the bus schedules to get me to the next nearest station would result in a 1 hr + commute just to get from my house to the (now farther) station, then my normal commute time. In other words, my commute time would increase by 200%, and frankly, I would stop using Metro altogether.

Given the excessive delays ALREADY in opening the Silver Line extension, this proposition may as well completely cancel the Silver Line as operational and also stop any chance of some agencies working with public transport.

No, I live beside Grosvenor-Strathmore and use it daily to get to-from work.

| |
|---|
| Proposal to close 22 Metrorail stations |
| The Clarendon station is important for my commute. |
| I use EFC to access the system and rely on it heavily. It is the closest and most convenient with easy parking and exceptional access to I-66 and the neighborhoods and shopping that I frequent the most. |
| I work in downtown dc, and many of the stations listed give me access to work |
| Do not close silver line! Especially to Greensboro. There are a Lot of offices there! |
| I use Metro to travel to work. If the station closes I would have no way to get to work. |
| Would these be permanent? With so few stations why would people use the metro at all? |
| I live right next to grosvenor and work at the NOMA station. My wife works at NIH. The closing of this station would cost me thousands in moving and/or parking fees. This is a TERRIBLE IDEA |
| It is important to keep Clarendon and VA Square metro stations open |
| No this would be terrible. I would not ride metro at all if East Falls Church metro closed. Please do not do this. |
| For the effort required to go to the closest station, I would just drive to work and wouldnt ride at all. |
| the college park station is so essential for many jobs in the area, especially as the university has plans to return to in-person classes and more students are likely to return to campus |
| This is a huge mistake. A lot of people chose to live near the above stations because of their easy access to the city. |
| It is absurd to consider closing metro stations. |
| Depend on Grosvenor-Strathmore |
| Access to metro via walking was one reason to purchase a condo near the Grosvenor-Strathmore Station |
| Closing stations should NOT happen. Better to reduce frequency than to close stations. Commuters use these stations for work and need the service. |
| I live above the VA Square metro for a reason- if I would have to walk all the way down to Ballston or better yet, have to Uber to Courthouse to get on the metro, I would literally never metro again. I often metro a few stops in Arlington itself and this would most likely cause me to never take the metro as I have no easy access. |
| If fed employees go back to work this year, then my metro station would be closed and increase my commute considerably. |
| If Grosvenor-Strathmore is closed, will more parking be made available at White flint? |
| Grosvenor parking lot has been closed and surely that impacted ridership. It is a very important station! |
| This plan is absolutely absurd. Local governments have pumped billions into the infrastructure and maintenance of the metro. Not to mention, Metro has been collecting toll money on 267 for decades. Completely disappointing that this is even a topic of conversation. |
| I commute to work via College Park. I also attend school at the University of Maryland, near the CP station. Please, please do not close it. |
| I live in College Park and Use the College Park station. The College Park Station is not a short or walkable distance from the adjacent stations.Please do not close the College Park Station. |
| The distance I would have to travel if both the Clarendon and Virginia Square stations closed would make it very difficult for me to use Metro and I would probably have to find other transportation for virtually all my needs. |
| Do not close Clarendon! It was always busy weekdays pre-pandemic |
| PLEASE DONT CLOSE GROVESNOR STRATHMORE! Im currently working from home due to the pandemic but I would use the train all the time once life goes back to normal, like in January 2022. Please dont close it! |
| One reason you have low ridership at East Falls Church is that Im currently working from home. Otherwise, Im a very regular rider of the Orange and Silver Lines. |
| Please do not close these stations. As a resident who relies on the Eisenhower Ave station, I know that I and many others would not have other options to travel to and from Washington, D.C. during the work week. Thank you. |
| Closing EFC VS and Clarendon is too many on the same line. Ballston would be way too congested. |
| Cleveland Park is closest to me and for health reasons difficult to get to Woodley. Also Woodley is always very crowded with a long wait for the elevators at peak times. |
| Many of us at my workplace depend on the Clarendon station! |
| The college park station is the only easy way to access the University of Md via Metro. Cutting it off prior to the Purple Line being deployed would severely limit my ability to commute. |

| |
|--|
| Proposal to close 22 Metrorail stations |
| Clarendon is the main station I use |
| Don't close any stations! |
| Its not ideal, but its survivable temporarily |
| I work in McLean and navigating those streets as a pedestrian is already so hard... this would make me even farther from work |
| Grosvenor station is essential for my commute during non-pandemic times. |
| Why are you cutting service in 9 months as opposed to now? We'll be back to work in 2022. |
| I take Grosvenor Strathmore metro station everyday to work. Please keep it open. I can accept lower or reduced service at non work hours for the station but please have it functional otherwise during work hours. |
| I will need to travel to College Park during this time |
| This plan would not work at all. This would increase my commute by at least 30 minutes. Clarendon metro is a very populous metro stop. |
| This would essentially make it so that metro would not be an option for me to commute. I would no longer be able to ride metro at all. |
| EFC is critical gateway to Westover, Arlington, Falls church including to lower income housing areas and should remain open |
| Please do not close East Falls Church. The ridership there seems relatively large, Im surprised this is considered a low ridership station. Could it be that with both the Orange AND Silver Line coming through it seems lower as there arent as many people on the platform at any given time? |
| Just shut the whole thing down. Congress just approved more money, I will contact them to shut the whole thing down instead. |
| Georgetown Prep students and at least four apartment complexes near by |
| Part of what makes metro appealing are the proximity and options offered in stops. Removing stops would remove a lot of what metro has to offer. I think closing these stops would be a HUGE mistake, a detriment to the communities and areas they serve, and would decrease ridership. |
| We need the Clarendon and Va Square stops to commute to work everyday! |
| Cleveland park is a vital station for downtown dc, close to vital community assets! We need to keep it open!! |
| As a commuter to College Park, Im not sure how I would be able to get to work. |
| I rely heavily on the East Falls Church metro station. It's closure would be devastating. |
| Cleveland Park is a important Red Line Station. Must stay open. |
| Office is located adjacent to Greensboro metro station and given the layout of Tysons (lack of pedestrian crosswalks, hills from other nearby stations (e.g., Tysons and Spring Hill) make it difficult to commute to Office) |
| Morgan Boulevard Should not be closed |
| Possibly the worst idea in the history of the metro system, and thats coming from a completely unbiased metrorider. |
| This would have devastating impact to my community, home ownership, commuting and other aspects of my familys and friends lives. |
| I live at Grosvenor Strathmore. Shutting down the station would limit my ability to transit and connect to the entire area. |
| Not totally unreasonable if it allows wait times between stations to remain shorter at rush hour |
| The Arlington stations and Smithsonian are vital for tourism and commuter needs. |
| Please do not close Clarendon station, as it is the center of Arlington on the Orange/Silver line, especially as public places begin to open back up. |
| Low ridership during the pandemic doesnt equate to low ridership all around. This is a terrible plan. |
| We primarily use the grosvenor Strathmore station and would suffer from its closure. |
| The college park metro literally serves the UMD campus. You can't close it. |
| The courthouse and ballston stations on the orange/silver lines are not equipped to handle the overflow crowds from Clarendon and Virginia square. There are not enough gates for entrance and exit without long lines, particularly in courthouse. |
| We moved into our current house because of its proximity to Metro. Closure of the station would force us to move far away, uprooting our kids from schools, and causing SIGNIFICANT socioeconomic disruptions to our family. |
| I use the Clarendon station to get to my favorite bars and East Falls Church to transfer from Vienna to get to the Silver line to socialize |
| I enter at Grosvenor and would need to start driving to work. This is the worst of the proposed ideas for me. |
| See comments to Proposal 1: this would mean longer commutes to Rosslyn along already congested Washington Blvd. |
| This would work for me but it outrageous for people who depend on these stations |

Proposal to close 22 Metrorail stations

| |
|---|
| Why are you closing stations that arent even opened yet? Doesnt that make you question whether they should be built at all? Maybe save some money by stopping construction. |
| Would not ride metro under this proposal. Clarendon in particular is near multiple grocery stores that make it easy to pick up something on the way home. |
| There are a lot of riders in Clarendon please do not close that station. |
| Not having a stop between Courthouse and Ballston with all of the residential, commercial, and office space there would be detrimental to that area. |
| Cleveland Park residents need this to get to and from work. As do the other stations. |
| I live between two metro stations - and must walk to catch the train. Both are slated to be closed in this plan, Clarendon and Virginia Square. Please close one or the other, not both. |
| Recommend closing Virginia Square as it is very close to Ballston and Clarendon. |
| Although not using it now, we intend to return to work by January 2022 and would need the College Park metro station. |
| Clarendon and Virginia square in high density areas and should not be closed |
| I live one block from Clarendon. You will force me into Uber |
| This is a terrible idea. East Falls Church is NOT close to any other metro stations. The parking lot is always full and I see people walking there every day (prior to the temporary closure). It is highly utilized without a good alternative. Closing this won't make people go to another metro stop. They'll just drive or Uber to their location.. |
| Work near innovation station, closing this station would make metro non viable. |
| You closed East Falls Church for almost a year of course it was low rider ship |
| I have no easy access to other stations - there's no parking at the two other stations closest to me, and taking a bus will add a huge amount of time to my commute. I'm a nurse - I'm already working crazy hours, taking pay cuts, and facing huge amounts of stress with the pandemic. This will impact my life in a massively negative way. |
| I am strongly opposed to any and all cuts in Metro service. Tell the DC, Maryland, and Virginia governments that this voter and taxpayer supports full funding of WMATA, and that I dont care if they have to raise my taxes for it. |
| I park at and travel from EFC so its closure would be detrimental |
| Clarendon is an important metro station as it serves a commercial and residential community. Virginia square can close because it is a half mile between two stations. Closing both would create a 1.5 mile gap between stations with many homes, offices, and apartments in between. |
| What an unbelievably bad idea. near is subjective. It is grossly insensitive to individuals with mobility issues. Home values would drop significantly because they are no longer within what any rational human being would describe as close. Taxes on properties would need to come down. This is really among the worst ideas I have ever heard, coming from a longtime Washingtonian used to terrible ideas. |
| I rely heavily on grosvenor and other stations are not walkable |
| This would be the downfall of the metro. The Courthouse to Ballston area is so popular because of the walkability to the metro. Closing Clarendon and Va Square would be detrimental to the area and to the metro. If you close these stations I would uber to work and never take the metro. |
| McLean is the metro station closest to my office |
| I get on at East Falls Church and get off at Greensboro, so this would absolutely not work for me. |
| Keep Grosvenor Open |
| I use Grosvenor-strathmore on a daily basis. The entire reason I moved to Rockville was because of the proximity to this particular station |
| When the Metro bypassed many of the downtown stations due to the Inaugural festivities, that was actually one of the best Metro rides I had been on: quick, easy, got right where I needed to go. I think this would be great. |
| Grosvenor-Strathmore is NOT a low ridership station. |
| Grosvenor-Strathmore is our close station. |
| I would have to walk from l'enfant plaza to my work on the Mall twice a day, in work clothes, increasing my commuting time significantly |
| Would take away my metro station |
| This is diabolical. Especially the Cleveland Park and Grosvenor cuts. If you do that, I hope they just shut metro down entirely. |
| I depend on the Cleveland Park stop for my job. If it shuts down I will have to sell my apartment and move. Please there are a lot of people who need this stop. |
| I frequently use Cleveland Park, Federal Triangle, and McLean. I also dont understand how DC would propose to close the Smithsonian station - we have TONS of tourists that frequent the city and use the Metro from Virginia or other places. We are taking revenue away from downtown businesses and museums by closing that station. |

Proposal to close 22 Metrorail stations

No, no, and heck no. Some of these stations are very close, and require you to get in your car to get to the next open station. You know what I am going to do if I have to get in my car anyway, I am going to drive instead of take metro. Bad, bad, plan. Metro is so people DONT drive!

I sometimes take the train from Grosvenor-Strathmore and so this would not work for me.

East Falls Church is not near other stations and it is not in walking distance of another station and this will have a HUGE impact on the surrounding community.

I use the falls church metro regularly, and I have neighbors who have bought houses specifically near the metro.

I use Clarendon station and federal triangle

Need the Grosvenor station open

The Clarendon metro station is located next to my office where I expect to return to work once vaccinated. I use the metro form commuting and to travel to/from work for meetings in DC.

I could use an alternative station. I think this works as a temporary solution as ridership is recovering but it will depress ridership. Metro should run the math on how many trips will be lost versus the cost of closing these stations. Does closing them actually result in faster trips from other stations? It needs to be clear that this is a temporary measure and what period we expect temporary to be.

What was the point of the silver line if you're not even going to open most of the stations? Why not let it run and see what ridership ends up being? Urban planning in the Chantilly area has been banking on these stations. The pandemic won't last forever and when it ends those stations will be needed.

VA SQ and Clarendon are too close to me. hard to get to Ballston or Courthouse

If people are returning to work this year, this proposal makes no sense.

I use the Eisenhower Ave. Station. I moved here because it is outside or the city while still having access to my job. Being military, I move a lot and this would cause quite the dent on an already hectic life

This will increase traffic/crowding at nearby stations and impact needed economic activity at my Cleveland Park neighborhood

Absolutely not. Closing these stations cuts me off from reliable transportation

Grosvenor is a super busy station during rush hours - when there is not a pandemic. This idea is INSANE. How am I supposed to get to/from work in DC if there is no Metro? ANd how am I supposed to get / from evening events (also on the weekends) if there is no subway?

This would completely remove my ability to travel anywhere. Without a car, this is effectively isolating people who chose to live somewhere with the expectation they'd be covered by public transit. Please don't do this. Limited service is much better than no service.

East falls church metro is crucial to the community in which it sits. There would not be easily accessible options to other stations and it is the reason many people bought their homes. Closing it would be a big mistake

Absolutely not!!! As more and more people move to DC and return to work after the pandemic, people are going to need better transportation not worse. This is an absolute disgrace. Further, it would decrease property values in those areas.

I live in College park, you have a major university in college park. You would be cutting off so many people who work in the cities access to work as well as people who live in the city and work in college park. This will increase traffic to Prince Georges Plaza metro and therefore cause overcrowding. I doubt that after everyone is vaccinated they would feel comfortable going back to pre-pandemic packed like sardines on the metro. People are still going to want to keep their distance. PG does not have enough parking to accommodate the demand coming in from college park

PLEASE DO NOT CLOSE VIRGINIA SQUARE. This is the most vital station and it would be extremely damaging to me to close this station. I have health requirements that require me to have easy access to a metro station. The others are too far PLEASE DO NOT CLOSE VIRGINIA SQUARE. It's vital to my life.

I use East Falls Church station all the time for work, travelAnd recreation. People bought property HERE just to use the EFC station. Don't close it!

Given high ridership on the orange line during rush hour, I dont think any of those stations should be closed

One of the proposed stations is my main station

gap between courthouse and ballston too great. prefer you close neither VA square or clarendon, but definitely not both.

Closing these stations is hasty. Once Covid numbers drop my family and I will ride the metro and use half the stations above including East Falls Church, Smithsonian, Arlington Cemetery and McLean. Please keep East Falls Church metro station open. It has a parking lot and ridership overall will increase as vaccinations increase.

This would be a nightmare and render metro unusable

Closing stations will decrease ridership to a huge degree. Not the way to get back riders!

Proposal to close 22 Metrorail stations

The Clarendon metro stop should not be closed given the amount of commuters who do not have cars and the distance between courthouse and Ballston is unreasonable. There is no parking at these stops and the walk may be too far for some.

Please do not close Grosvenor

Smithsonian is ridiculous - that is how all tourists get to the mall. It would seriously hamper museums and downtown activities. Many others are critical for workers. This is a cruel proposal.

McLean is my primary metro station

I can walk to EFC but no easy way to get to Ballston

We moved to the Cleveland Park neighborhood and bought our first home here specifically due to the red line access and convenient Public Transportation. As a young family without a car we would be significantly impacted by the station's closure as we rely on it entirely for transportation.

I am OK with having to walk further to reach a metro stop, in order to preserve the entire WMATA system.

This is the worst of the offered proposals and most significantly diminishes the value of metro to commuters

Please do NOT close red line stations! We have no other way of getting to work in DC.

DO NOT CLOSE STATIONS! We are still dealing with the pandemic - people need to be able to easily access, doctors, work, and home. DO NOT CLOSE STATIONS.

near does not mean accessible...with the consolidation of bus lines, it will make it harder for many in neighborhoods served by these stations to get to where they need to be.

Clarendon is a hugely populated area- this metro stop can't be eliminated.

I would encourage metro to figure out a way to open metro stations without the need of a station manager. Having neighborhood stations open is too critical when most return to work

I use the VA square to ride downtown and to the airport

Need clarendon and east falls church to stay open!

Closing the grosvenor-Strathmore station would be detrimental to the surrounding areas. Better solutions must be considered.

All stations were built with our tax money! They need to stay open for the businesses around them, especially in Arlington!!!!

You cant close so many stations in a row in the ballston quarter; if you have to close some stations, close every other station out of courthouse, Clarendon, Virginia Sq, and Ballston. Too many people live and work there to have the whole corridor gone.

It would be impossible for me to commute with metro if this change was implemented

I live near Virginia Square and closing this station would greatly reduce my metro usage, and possibly ultimately drive local businesses away. Closing multiple Arlington stations could make traffic and parking much worse.

No, some of these stops I use frequently for work and pleasure

Higher fares, less service. You suck metro....

Eisenhower is my daily commuter and would impact my life significantly if it closes

Too many downtown stops on the closure list

I live near grosvenor and have used the metro station for my daily commute to work. Closing this station would have a big impact on my career and work.

Grosvenor-Strathmore is my local station and would force me to relocate due to declining property values. Also you literally just approved a new development at Grosvenor-Strathmore.

It would be very difficult for me if the clarendon metro stop closed. I would no longer be able to go into work because it is too difficult for me to travel to ballston for the train.

Please do not close Cleveland Park! I moved here to be close to Metro.

NO!

Pre-pandemic I rode Va Square to McLean for work every day. This is terrible for my work transportation plans as there is no valid way to get from Tysons to McLean station area.

I will use College Park more frequently as the pandemic dies down and people are vaccinated

Keep Cleveland Park open!

This makes the metro system almost useless!

Closing the metro stations would be a huge disservice to the community and would result in more people abandoning Metro all together. I'm afraid the stations would not be maintained and would then be harder to open back up when the area goes back to pre-pandemic ridership.

Proposal to close 22 Metrorail stations

This adds significant travel time to folks who live/work near those locations.

I moved to Cleveland Park so I would be near a metro. Van Ness and Woodley are too far away to walk to when I'm making an entire journey after that. Closing the CP metro is a breach of trust.

Loudoun has been waiting for metro access for years. Developments have opened with people purchasing homes expecting to be able to access public transportation to work. To have the delay to continue after years of paying additional taxes is unreasonable and poor management of funds.

People have chosen to live & work near these stations specifically because metro operates there. This is unacceptable.

Clarendon & Virginia Square are back to back stations- how can you close both?

I need Archives for my commute.

Need Virginia Square or I won't take metro at all.

We are not a third world country, don't close stations

Bus service between stations for handicapped people would put them at great disadvantage. The lack of working elevators is already horrible.

It wouldn't work for me only because Grosvenor-Strathmore is the station I use, but if it does have less traffic than other stations, I'd understand why it might be cut.

you're basically killing the Silver line.

NO!!! Grosvenor is the only station near me with parking. I would not be able to use Metro without this station!

This is completely ridiculous - I rely on many of these stations - especially Clarendon. Clarendon is an absolutely essential station that needs to remain open.

This would work for me, but I would like to learn more about other accessibility options if these stations are closed.

Grosvenor is an important hub. Medical Center is not much of a publicly accessible station. White Flint crowded and lots of construction; some people would have to drive far for realistic parking situation.

It would be foolish to base these decisions on pandemic ridership just as the vaccine is being distributed.

Are you considering closing stations that haven't even opened yet? That makes no sense.

You may as well shut Metro down and force all people to use their own transportation thus adding to traffic, pollution, frustration and the like.

Do not close the Cheverly Station - it's our only connection to DC without a car. Once the pandemic is over, ridership will increase

People will be getting back into offices before this. Greensboro needs to stay open.

Virginia square and clarendon are my main, home stations, both with residential density

You can NOT close the stop at ANC. That's how many tourists get there. This is just plain stupid

Please keep Grosvenor/Strathmore open.

Poor choice to close the Clarendon station. Also surprised to see Federal Center SW, Federal Triangle, and especially Smithsonian on the list. Would like to see Virginia Square remain open but can understand that more than I understand closing Clarendon. Closing both of them would leave no stops between Ballston and Rosslyn. Clarendon is also an area where young people live and they are more likely to look for a community that is metro accessible.

It is appalling to imagine that the once-proud Washington Metro, which serves the nation's capital and surrounding inner suburbs, would be compelled to shut nearly 2 dozen stations, entirely. If you had told me this was even being considered just 2 years ago, I would have been dumbfounded. This is a horrifying spectacle that sends ALL the wrong signals at the worst possible time. Whatever it takes--those stations must remain open.

My husband and I bought our home, which is within walking distance to the Grosvenor Strathmore METRO rail station so that we could walk to and from METRO and commute to work via METRO rail. We also bought our home near the Grosvenor Strathmore METRO rail station so that we would have access to public transportation as we age in place and so that our family would be able to travel to us when they can no longer drive.

Reston Town Center is economic / business center and closing would lead to business revenue leakage for the community and businesses in the area

Greensboro has many, including my office buildings and new apartment buildings as well as new restaurants and shops.

We have waited years for the Silver Line II stations. To close many of them will defeat the purpose of building them. Additionally, a lot of construction has been taking place in anticipation of these stations. These are sunk costs for the builders and the community. Finally, how do you know these will be low-volume stations until they open?

My whole family commuted using the Cheverly metro, and we will again once we are vaccinated. Driving to another station isn't feasible, especially for people without cars. When I was injured and unable to drive, walking to the Cheverly metro was the only way that I could get medical care and see loved ones. Please keep it open.

I use these stations regularly & when people do back to work likely in 2021, they will need access to these stations as well

| |
|--|
| Proposal to close 22 Metrorail stations |
| Please dont close College Park! |
| This guts metro access in one of the most heavily developed areas of Arlington. |
| This would severely impact my ability to work. |
| I have commuted from the Clarendon station since beginning to do so six years ago. Before the pandemic, I remember the station was packed every morning rush hour. I have called Clarendon home in large part because of the metro station. Closing it would be devastating. |
| We live at Grosvenor and it is not of feasible walking distance to the next stop (Medical Center or White Flint) |
| Grosvenor Strathmore is an essential station! |
| I need Grosvenor-Strathmore for commuting |
| I rely heavily and almost exclusively on Grosvenor, and the parking there is essential to those who need to drive to the metro |
| there is a major university between Clarendon and Virginia Square, as well as major office buildings. The area is slated for expanded use. Closing these would significantly impact education and commerce in this area. |
| Grosvenor-Strathmore is very important to me! |
| I would prefer that White Flint Metro close over Grosvenor. i use Grosvenor to go into DC when i go downtown. there are buses from Grosvenor to White Flint for those working at NRC. |
| I disagree with closing both Clarendon and Virginia Square. For people who live between those 2 stations, Ballston and Courthouse are pretty far. I would suggest closing one or the other but not both. |
| I relocated just to be near one of these metro stops and would be very disappointed if it closed. Some of these stops are also near many restaurants (e.g., Clarendon) and I think it would impact the businesses. |
| I live near the Ballston Metro stop, my daughters school is at the Clarendon Metro and my office is at Metro Center. This would create huge disruptions in my ability to rely on the Metro as my single form of transport on a daily basis. I would likely end up driving, adding to congestion on the road. |
| Metro should not expect any Virginia contribution to their budget with this TERRIBLE plan. We have a global crisis with climate change for which no vaccine can work and it will only get worse. WHY would anyone suggest cutting back on public transportation??? VERY BAD IDEA. |
| I use Grosvenor Strathmore constantly. Would be very difficult to travel with the station closed |
| Grosvenor-Strathmore is walking distance to my home. i am unlikely to use metro if i have to figure out how to get to another station |
| Too much space between open stations, especially on OR and SL lines. EFC was just renovated. In the same way that if you build it they will come, if you close it, they will drive. Closing stations will cause a downwards spiral for metro finances. |
| Metro should be heavily subsidized by the federal government because most of its riders are federal employees or federal contractors |
| As a student at UMD the College Park Metro station is extremely convenient and necessary for students to be able to travel in and out of DC. Without it many students at UMD may lose out on opportunities for internships and jobs. Closing the College Park Metro station would heavily impact staff as well, as many of the UMD professors and lecturers commute to campus using the metro. |
| I can see the Cleveland Park Station from my residence. I am against closing stations. |
| Please remove peak hours fares if there are not additional trains during peak hours. |
| I rely on the Grosvenor Strathmore station |
| Are you kidding. This would be awful. |
| I use Virginia Square and Clarendon stops every day!! |
| Please do not close Grosvenor Strathmore |
| This would severely impact my commute to work. It is not reasonable to walk in the snow, ice, rain to the next metro station |
| These are disproportionately in black and brown communities |
| Do not close East Falls Church station - no other stations are walkable to these neighborhoods. |
| Grosvenor has parking. Why on earth would you consider closing Grosvenor vs White Flint, which is in walking distance and has limited parking options. We bought our home because it was walking distance from Grosvenor. If you are making these decisions due to a pandemic, this is so shortsighted. Grosvenor should not be on this list. This is ridiculous. |

| |
|--|
| Proposal to close 22 Metrorail stations |
| I bought my house near Van Dorn specifically so I could be within walking distance of a metro station. |
| Closing the Clarendon one is a problem. Courthouse and Virginia Square stations are pretty far from it. |
| I rely on East Falls Church metro station as a key part of my commute |
| No to closing Grosvenor Strathmore, it has sufficient affluency |
| Use East Falls Church |
| Closing Grosvenor, Archives and Smithsonian would be deeply problematic for thousands of riders |
| This would reduce access to public transit for the most disadvantaged people who need it the most. This is a horrible idea. |
| I work on the mount Vernon square station |
| Closing Clarendon and VA Square will harm not only residential commuters, but also businesses that serve them. Closing East Falls Church would mean the end of a convenient station for the many people who enter and exit the Metro system from there. Have you considered perhaps bypassing those stations during non-rush-hour periods? |
| That is just bonkers |
| If COVID is under control by next January, riders will depend upon metro to return to their jobs. Closing downtown stations near their jobs will make metro less reliable. For me, it means I will have a 20 minute walk to my office. Also, it seems stupid to pay for a Silver Line extension if those stops will never be used. |
| East falls church connection point critical. |
| Close them forever? No way what about those people? Maybe limit their hours instead. |
| I currently walk to the Grosvenor metro and chose my home based on the Grosvenor stop. This is a very important spot as it also includes parking. This would be a major disruption to me and so many other riders who depend on metro daily |
| I live by Cleveland Park metro. This makes your system entirely useless to me. |
| I use the college park metro stop |
| WTF |
| I need East Falls Church open. It's walkable for me and gives access to the Orange and Silver lines. |
| These closures would be awful. |
| Grosvenor strathmore is a much needed station and provides convenient parking when driving there. |
| Why close down adjacent metro stations? For example Clarendon and VA Square stations are consecutive stops. If you have to close down stations you should close Courthouse and VA Square leaving open the Clarendon station which located between Courthouse and VA Square |
| Need at least one other stop past Ballston towards DC. |
| Clarendon is vital to many businesses |
| This would devastate our neighborhood (Clarendon) and many others. |
| Absolutely not. This impacts both ends of my daily commute. |
| Closure of Clarendon would mean that we could no longer walk to a station. |
| I live near Clarendon station and have no other transit to my workplace. Closing the station will severely impact my daily commute by public transit. |
| Its better to keep the access to stations with a reduced run schedule. We dont know what 2022 will look like, but when COVID begins to wane, it wouldnt be a good idea to cut stations. |
| How long would these stations remain closed? I could see this having very widespread effects, like on the real estate market for example. |
| Will there be bus service? Is this cutting off people that rely on these trains outside of downtown? |
| This is a ridiculous proposal. Jurisdictions and tax dollars have been invested in making Metro convenient. |
| I would not close Clarendon too many grocery stores in that neighborhood |
| Do not close my station - East Falls Church |
| I need to get off at McLean station for work |
| Bad idea for tourism, esp. closing Arlington Cemetery and Smithsonian |
| Just add an express train, NYC style |
| I feel that this proposal will end up costing the system more over the long run because it may overcrowd existing stations and eventually result in expensive reopening projects being dedicated to the abandoned stations |

Proposal to close 22 Metrorail stations

Please do not close Strathmore! When the concerts start up again, it will be needed.

Our station at East Falls Church is a key commuting hub for our neighborhood. It would put many cars on the streets of DC if service were ended there.

I specifically chose where I live to be close to the grosvenor metro stop. Other metro stops are not a reasonably walkable distance or even have safe sidewalks to walk

Clarendon metro is the best metro stop for my office. If there are shuttles from open stations to where the closed stations are then this could be okay.

I use 3 of these stops for everyday life activities currently.

I require Grosvenor-Strathmore station for my work commute

There is no train in Loudoun County; Reston being the closes would cause an inconvenience

It would be insane to consider closing Clarendon and East Falls Church.

EFC has been my station since 1989. Ballston is accessible during the week via ART 52 bus, but that doesn't run on weekends.

Keep open either Clarendon or VA Square to spread out the station closures.

This would significantly impact the ability for my wife and I to travel for both leisure and work. We live right next to East Falls Church and taking this away would affect our ability to travel into DC and MD.

This would be devastating. I use metro daily to get to and from work. My station is listed above

In general, I think it is a bad idea to close stations and would seek other alternatives, such as alternating stops, etc.

Grosvenor must stay opening. Residential buildings are there because of the proximity to the station. With the development at Pike and Rose, White Flint will become more crowded and the garage cannot handle the need of the White Flint and Grosvenor Stations.

YOU REALIZE PEOPLE LIVE AND WORK AT THESE PLACES, HOW DARE YOU

I use Greensboro

I live in Arlington. Virginia Square could be closed. Perhaps Arlington Cemetery too though tourists use that. Clarendon and East Falls Church are pretty important stations.

I always use the clarendon and va square. Closing one of them might be okay but ballston is too far to close both

I work in Virginia Square and although the walk from Ballston is not too long, traffic patterns and construction projects in the area make it difficult sometimes for me to walk from Ballston to Virginia Square in a timely fashion.

I am relying on Grosvenor-Strathmore parking and train.

I live in Cleveland Park and work downtown. This would be extremely inconvenient and only encourage me to drive to work.

I use all of these stations - I ride in on Clarendon daily. Those stations are all necessary!

Clarendon doesn't belong on this list. Closing the station would be devastating to local businesses, and there's nothing walkable from that station that would make a decent alternative.

Numerous stations on this list are used for regular weekday travel. Prior to pandemic they were used heavily. Maybe reduce use on some of these so they are closed on the weekend.

I think the stations along the Orange Line on this list (Clarendon, East Falls Church and Virginia Square) are in areas with significant growth, both in terms of single family homes and apartment buildings. Closing stations would be hugely detrimental to both residents, old and new, and businesses along the Orange line corridor.

east falls church may have low ridership, but the population is high, there is growth, and property values would drop.

I use VA Square!

Keep East Falls Church and other orange line stations in Arlington open! People in Arlington use these stations and closing them will just increase traffic on the beltway!

I live within walking distance of Grosvenor-Strathmore metro station. Considering I would have to drive to another metro station, I would just not take the metro at all.

Given that many of us are expecting to be back at a normal work schedule by next January, this proposal falls well short of what I would need/expect.

Horrible i commute by metro everyday

Several of these stations offer parking, where the nearby stations do not. Parking garages are essential for our family usage of the station. Several of these stations are very important for tourists (Smithsonian, Archives, Arlington Cemetery, Cleveland Park, etc.) which may not be visiting during the pandemic but will return. Others are key for Federal workers, who are again teleworking for now.

I'm not using the metro right now because of the pandemic and the situation. Once I'll be vaccinated, I intend to reuse the metro station. I only rely on the metrorail since I do not have a car.

Proposal to close 22 Metrorail stations

i hope you dont have to do this.

Would undermine the entire regional strategy of smart growth and density, given all the residential multifamily development around Grovesnor and other stations.

Falls Church stations are the heart of our communities. If either of them close, that will have a very negative affect. We have apartments and townhomes built near them specifically so a metro station is close. Reduce the number of trains tonget through the pandemic, but PLEASE dont shut them down.

This closes my nearest station

Arlington cemetery stop is a tourist stop. Eliminating it would cause issues once tourism picks up

What a great idea! Earn more riders (ergo more revenue) by cutting service and motivating them to seek alternative means of transportation that aren't Metro! Business Management 101 = Make your product so awful and inconvenient nobody wants to use it.

I am completely reliant on the east falls church metro. Without it, get to work work cost hundreds of dollars a month either in parking fees, uber fees, or increased living expenses. Theres no way around it.

East Falls church is a key station for those in Arlington and falls church as well as those just coming in off of 66. There is a large community of individuals that rely on this station outside of the current covid pandemic. west falls church is often too packed and ballston is cumbersome with the garage parking. EFC is also a key economic driver for our neighborhoods here.

Ridership is down now, but will bounce back after COVID.

I exclusively use East Falls Church Station. To get to West Falls Church would make my commute 45-60 minutes longer, especially if trains and buses come less frequently

We need more stations, not less. If you do this will you increase bus accessibility?

This is absolutely absurd that you would suggest to close Grosvenor -Strathmore. homes were built around the metro specifically for metro use. The value of our homes would plummet. If you look during non-pandemic times, the grosvenor strathmore parking lot is filled especially on weekends. Shame on you for even thinking this is an option

I much prefer decreased frequency of trains over closing stations.

This is a wholly unacceptable solution to budget shortfalls and an abdication of civic responsibilities to the greater DMV. Thinking like this is why Metro is and has been failing for DECADES it has nothing to do with Covid-19 budget shortfalls

These stations already exist and have been paid for. Why mothball them? What are you going to do with them?

Grosvenor vital for surrounding community especially since med center has no parking and given restored turnaround proposal.

Keep Cleveland Park open!

Keep East Falls open. This is a last transit point for silver/orange lines. You can consider closing other short distanced stations between rosslyn and ballston

I rely on Grosvenor metro stop

This is just an unacceptable solution. There has to be workarounds than closing stations, stations that people have moved closer to and rely on. Ridership will increase again.

I can only walk to east falls church metro

Closing any station would be unfair for even a small percentage of riders. Ask Congress for more money.

This plan is insane. I live near Clarendon and chose where I live based on proximity to metro. It would be horrible if that station and several key stations in downtown DC were closed. Not the kind of metro experience you'd expect from the nation's capital.

Not sure why Clarendon is being shutdown when its somewhat of a hub and a busy area too. It would perhaps be better to shutdown Courthouse instead.. it always seems dead, at any time of night or day. The others seem ok in your proposal

I would have to walk over a mile to reach my closest station. This would add 20 minutes to my commute everyday

There's no other option for those that live in East Falls Church not to mention the home price values will drop precipitously.

Virginia Square needs to stay open. Clarendon as well. These serve surrounding neighborhoods and tons of people walk to these stations from their home.

I use some of those stations

This would be devastating change the hours at these stops but DO NOT close them

I live near the Cleveland Park Metro station and strongly object to its planned closure. I use this station every work day M-F (during the pandemic).

This would inconvenience me and my family. We rely on Metro

If wriggle or Reston is open (one or the other) this could work for me but need one or the other in order to get to work.

Federal Triangle is closest metro station to my office. This would result in increased commuting time, particularly given congestion at Metro Center.

Proposal to close 22 Metrorail stations

I really worry about accessibility for those with disabilities or elderly who may have a hard time getting to their next-closest station.

This is by far the least attractive option for me. I chose my apartment and even sold my car based on the fact that I now live within walking distance to the East Falls Church station.

Closing this station would also make very little sense after the investment WMATA made in upgrading the station just this last year.

Closing both Clarendon and Virginia Square would leave a huge distance between metro stops. Perhaps one or the other could be an option, but absolutely not both.

Virginia Square and Clarendon are near high density residential buildings. Makes no sense to close those stations!!! Also Virginia Square is near an expanding campus and law school. Should keep that one open as well. And please dont close smithonian!!! how would we get to the museums????

I live at Avalon Grosvenor-Strahmore and chose this location specifically because of the metro as im sure many at the surrounding apartments have done. To make us go to another station would be difficult. Buses can get stuck in traffic along Rockville Pike and to have to walk to either Medical Center or White Flint is a little more precarious considering Rockville is a major highway.

It seems like this list is based on ridership during covid. Some of these stations have very high ridership - particularly when the Federal government reopens (for example, Federal Triangle). Closing these stations would result in heavy traffic and many delays.

Closing Clarendon is a horrible idea. The restaurants, office and communities in that area need that line open.

Greensboro should stay open as it is the heart of many riders in Tysons corner, also many businesses are in this area

My family only has one car. We specifically bought near the East Falls Church station so my husband could walk/metro to work in DC. Many people use the EFC station for commuting purposes as it has a parking lot and kiss & ride in addition to being near 66 and bike trails. It's a very important station for people's day to day lives to get to their jobs. Please do not close this station as it would have a tremendous negative affect on those of us whose families rely on this station.

Smithsonian and federal triangle are right next to each other.

Absolutely not. Those are all stations I frequent often, one that I even moved to be close to. This would be catastrophic in terms of lessening people's reliance on cars. Why would we close metro stations?

The orange line is so crowded and will likely return to that one vaccinations are rolled out, please dont close orange line stations. The crowding will only get worse!

NO, NO, NO. There is NO way this would work long-run in the busy Rosslyn - EFC corridor on the Orange/Silver lines, esp. when people start returning to work. Given vaccination efforts and likely reopening of schools in the fall, people will be returning to their offices and will need these Metro stations. Closing Clarendon, VA Square, AND EFC?!?!? That would cause MASSIVE congestion/overcrowding at Courthouse and Ballston (and likely WFC), not to mention parking problems from huge numbers of people driving from EFC to WFC, Ballston, or Courthouse. Combine the removal of all those stations WITH the 30-minute gap between trains and there will be a complete CLUSTER-F@#\$. Nope. No Way. This will NOT work.

I rely on East Falls church when I go into the city.

This plan would drastically reduce an already dwindling ridership level. Less service = less riders. Sort out your financial problems internally before taking measures that would cost metro rider ship and by extension revenue. This would make it so I am unable to commute to work via metro and as such I would probably not take the metro again

I rely on Judiciary Square for my work stop. This would make Gallery Place insanely busy.

Clarendon? Where the drunken millennials go? Keep it open and them off the streets

I anticipate using several of these stations frequently.

I use the East Falls Church station to commute. This would not be possible under this proposal.

this could be ok as long as bus service could make up for it

Archives and Judiciary Square are integral to my commute. They cannot be shut down.

We rely on the east falls church station

Some of those stations are easier to close than others. For example, East Falls Church is a transfer station and is not really near Ballston or West Falls Church. It should remain open. But Virginia Square is walkable to Ballston or Clarendon - closing it would be OK.

Must keep Grosvenor open, especially with new parking lot!

These closures would highly impact me to go to work as well as to live in the area

All stations are important. Closing stations will reduce my usage significantly

I use east falls metro to get to work. Getting rid of this station would be detrimental to me having reliable transportation

Proposal to close 22 Metrorail stations

I simply cannot believe Metro would consider closing the East Falls Church station. It is the only one within walking distance of where I live; it connects the Orange and Silver lines; and Metro just spent millions upgrading the station and installing a fancy bicycle kiosk. I cannot oppose this idea vehemently enough. I would have a little less opposition to closing Virginia Square, since it is relatively close to Ballston.

I am excited about the new Innovation Station and would like to finally not have to drive to a station to get to DC!

You just spent untold dollars to repair and increase the Grosvenor parking garage, additional residences within walking distance of the station are being planned, the White Flint garage is small and fills up early and you want to close Grosvenor and spend untold millions on a new Metro building? Tarring and feathering is the least you deserve!

Saying one station is near another (i.e. Cleveland Park) is ridiculous. Its quite a haul, especially at night. Closing a station saves you what one station manager position? Come on, this is such a useless proposal and directly impacts my usage of metro at all

please do not close clarendon. it supports a vibrant local community with many local businesses and residential communities. it supports more density which is good for the enviu, among other benefits.

Absolutely need East Falls Church service

You will kill small businesses who rely on Metro accessibility for their clientele, I use the Clarendon and Virginia Square Stations for many errands.

This would cause great hardship.

Grosvenor-Strathmore has better parking not to mention closer to my home than any other station in the vicinity.

I take the ride on 6 bus to grosvenor and have no other station convenient enough.

Closing Clarendon in particular would pose a massive hardship on my ability to travel.

Not convenient

I use many of these stations often, and nearby stations are not really nearby. This would be especially problematic for people with disabilities.

The closure of stations are unacceptable. I personally work at the Greensboro station and would need the station open. The other stations are not close enough to be feasible given the bad walkable infrastructure between Tysons and Greensboro, and between Greensboro and Spring Hill. Also if the trains are already running, what do you save by closing them?

The East Falls Church line is critical to my commuting

Live in condo walk to Grosvenor metro. Use frequently to go to sporting events, dining, site seeing.

Archives and smithsonian stations specifically are the ideal route to get to events on the national mall, and visit museums. I do not see how this will not inconvenience many riders.

East falls church is a critical stop for us!

Currently my closest station to home is Van Ness-UDC, but I occasionally get off at Cleveland Park to meet people at a restaurant after work. Closure of Cleveland Park metro would impact my ability to patronize businesses there.

I rely 100% on East Falls Church and Federal Triangle. This will make my commute untenable. I walk to the metro so I can just switch to other locations

It is very important to me to keep Grosvenor-Strathmore. It is my home station and the station I use all the time. Ive never used White Flint. It would be quite a blow to lose the station.

This would be a death nell for the metro. Why not just shut it down completely? I would oppose any further funding and will write my legislators if this is implimented.

I live near cleveland park and while I can go to van ness they are many many apartment buildings in my area that rely on that metro station as well as local businesses

Grosvenor is the closest station to my residence offering parking. Without this station operating I would be forced to consider other forms of transportation.

I reside in my current location BECAUSE of access to the East Falls Church Metro. Closing this station would be incredibly inconvenient for me. PLEASE do not close this station!

Cutting off service to Arlington Cemetery is barbaric. â€Closing' stations that haven't even opened yet due to low ridership is insane. We are waiting for those stations to open.

You cant close half the stations in the system. That makes the metro station absolutely useless.

Open stations, don't close them.

Dont close Grosvenor-Strathmore

Clarendon-Virginia Square-East Falls Church is a lot of stations in a row. Courthouse and Ballston are hard to find from the road.

Wow, are existing stations going to be so much more crowded!

Grovesnor-Strathmore is particularly important to me.

You're saying F the suburbs here. Doesn't seem fair to those without cars who rely on metro. For instance, I can walk to van dorn or take dash to Eisenhower. Without both stations, I am unable to get into DC via public transit. This will cut off a lot of people in Alexandria from dc.

Proposal to close 22 Metrorail stations

I believe there is not another station close enough to Arlington Cemetery that would be feasible walking distance for tourists, thus would increase car traffic.

Whats the point of running the system if youre closing so many stations?!

do not get rid of Grosvenor-Strathmore

Keep Grosvenor-Strathmore Station open

If East Falls Church closes, I would stop riding Metro altogether and simply take an uber. Also, while it does not affect me, closing the Reston Town Center station before it even opens, seems like an absurd strategy and evidentiary of why Metro cant ever seem to get into the black.

I am paraplegic and getting to a farther station is difficult.

This will motivate people to find alternate forms of transportation, not alternate metro stops. Especially bad idea on the Rosslyn/Ballston Orange line corridor.

I use Grosvenor Strathmore Station.

Clarendon + Virginia Square closures would be a big issue - due to the distance created between Ballston & Rosslyn and the social location of Clarendon

I commute on the silver line to McLean so closing that station would disrupt my ability to go to work

huh? what is near? if youre lugging a laptop and walking to/from your commute, Grosvenor-Strathmore is not all that near White Flint

Grosvenor-Strathmore is a key metro station for many riders

I need Clarendon station to remain open. It is too far to walk from other stations for me.

Closing the Clarendon station would be detrimental to my weekly commute

No, it's very crucial to keep Clarendon Station. It's the business and social attraction place for all of us living in Arlington. Please keep Clarendon Station.

Define near other stations. I commute to College Park and it is not near any other station on the Green Line in Prince Georges County.

McLean metro is over a 30 minute walk from the closest station (Tysons Corner) and dangerous. Closing that station during peak hours on weekdays would definitely force me to seek a non-wants solution. Even if service were to be limited to stopping a few times during peak hours - I could plan my workday around ensuring that I can catch a train.

Closing Virginia Square and Clarendon Stations would be detrimental to the area.

Do not close stations!!!

Closing down stations is insanity. Will give riders ever more incentive to drive the whole way. Enable riders walking to stops from their homes.

NO! Please DO NOT CLOSE EAST FALLS CHURCH! Its not walking distance to any other stations!! We need it! Also, please keep the planned stop for Reston Town Center!

TERRIBLE and elitist.

I use the Smithsonian station every day

Some of these stations need to stay open to ease the uptick in tourist traffic. Others are too close together, if you close both Clarendon and Virginia square it doesnt make sense. Cleveland park is much closer to the zoo and is a much easier walk (advertise that and youll get more traffic there)

I use the clarendon metro and walking to the ballston or court house metros would drastically increase my travel time. I think closing either clarendon OR VA square would work, though.

East Falls Church station is the last transit point between orange and silver lines. Would have to travel much further to get to work/home or have to start using a car to commute.

I use the archives stop to go to restaurants and museums and would prefer not to have to walk further from lenfant or Chinatown. Smithsonian closing will be a big hit for tourism when it returns.

This will for sure make me use METRO less.

Youre actually proposing closing stations that havent even opened yet? Just run trains reliably and more people will use metro. Its not rocket science.

Metro has always been a safe, affordable and environmentally sustainable option for residents who cant or choose not to drive. this would severely affect our quality of life and increase cost of transportation

I use many of these stations and closing them would make traveling difficult

Virginia Square is major stop for GMU and offices (FDIC)

I live in Cleveland Park and take the metro often for work, leisure, etc. as I do not have a car. Station .75-1 mile does not count as close enough for Cleveland Park residents without a car. Our neighborhood depends on the metro for transportation. Limiting service to provide trains less frequently is a much better option than eliminating stations that DC residents rely on in their daily life.

Proposal to close 22 Metrorail stations

Closing both Virginia Square and Clarendon is a bad idea, in direct opposition to Arlington County development of additional apartment housing (apartments and condos) in exactly that location. These buildings have parking at .75 spaces per unit - less than one car per unit; clearly the county's assumption is that residents will use public transportation. Closing these stations would have a bad effect on Arlington's urban core and car-free initiatives. Personally, it would greatly reduce my likelihood of using Metro as Court House and Ballston are too far to walk, especially after dark. At least one of them should remain open.

The Clarendon Metro stop is very important for bike and other non-auto commuters at my workplace. It enables those of us without cars at work to efficiently travel to the Pentagon for meetings. Closing it would make it much more difficult to meet with military personnel at the Pentagon due to the increase in travel time and lengthen the commute for many of our younger employees who live in DC or along the other Metro lines west towards Vienna and Reston.

East Falls Church was just reburbished and serves as a bus hub. It does not make sense to close that station. I do not support closing any station.

Unacceptable. Antithetical to a public transit system.

This is the worst option compared to all. You cannot shut down metro stations, it hurts our home values and neighborhood access.

The Grosvenor metro station is the only station within walking distance to me and has been the only reliable means to get to and from work in a timely manner. All bus routes force me to change buses in Bethesda and is EXTREMELY inconvenient

I absolutely need Grosvenor-Strathmore to stay open.

I, as well as many tourists, use the Smithsonian stop. I always see many riders using this stop. I am surprised that it is considered a low use stop.

Stations within walking distance to others might work. However, closing East Falls Church in particular would be terrible for me!

ridiculous

I use the Virginia Square Station and it would be too far for me to walk to another

The silver line has a growing population of individuals who commute to Arlington and DC via the metro.

How can you propose turning trains around at Grosvenor and then close the station? No one can be that stupid. If youre going to close a station, close Medical Center, where you cant park.

Any station serving the National Mall should not be closed. And the gap between closing VA Square and Clarendon is too far.

The college park metro is the only accessible metro station in my area and it connects dozens of students without other means of transportation to Washington DC. Closing the College Park metro station would be a huge blow to the campus community and make it difficult for students to commute to internships or go to the city for entertainment.

I consistently use East Falls Church and live in the area of that station. There are a growing number of businesses that attract visitors from outside the neighborhood. Metro is a valued option; parking is very limited.

Need Mount Vernon

My work is at the Greensboro stop so this would be a major inconvenience

There are no other metro stops convenient to UMD- College Park. Without the College Park stop, many, many students, faculty, and staff would be left with a out a convenient way to get to campus. With plans to reopen campus for in-person operations by January, we will need this stop to be available to us. Otherwise, students, faculty, and staff will be unable to live outside of the immediate College Park area and still get to campus easily.

Grosvenor-Strathmore is one of the few stations with easy access to the Beltway, with parking -- I think its a mistake to close this station.

I use the Grosvenor Strathmore Station, as it is walking distance to my condo. If this station closed, I would have to take a bus to another station, which would add a great deal of time to my trip. Additionally, the College Park Metro Station is vital to the National Archives at College Park, where I work. This stop is important to both employees and researchers, as the National Archives at College Park is served by the C8 Bus route, which picks up at the College Park Metro. This bus does not run to other nearby metro stations. With the College Park Metro station closed, this would cause a great hardship for employees and visitors to the facility.

Go fuck yourselves on this. It will ruin communities and we use these stations daily.

It does not make sense to close these stations, especially certain ones near tourist destinations (like Smithsonian). If Metro is basing its numbers on pandemic times, this will not accurately support post-pandemic ridership needs, as people start using the system more frequently again. Seems very shortsighted.

I bought a house at Van Dorn during the pandemic with shuttle service to the metro. I have no idea if you eliminate my station how I will get to work.

I would have to take a bus to woodley park. At that point I would take bus all the way downtown.

Proposal to close 22 Metrorail stations

Do not close College Park. That is insane. It provides access to the areas largest university. Allows for the DC to UMD flow. Surrounding stops are not sufficient for College park, for students, commuters, sports fan.

Jesus Christ. This is not acceptable, you cannot think that this year was a normal year by any means. So, for me to get to my job on Pennsylvania Ave., I would either get off at Archives or federal triangle. Obviously there has been low ridership this year, but pre-pandemic, Federal Triangle was an essential stop for those people working in the gov't.

please do not close va square. i need it for school.

Decreasing train times and asking riders to go to few stops will overwhelm stops/trains. worried about overloaded trains.

I primarily use the College Park station. It would be especially hard for University of Maryland students to use a different Metro station. Once the University of Maryland returns to full in person classes, you can expect ridership at the College Park station to pick up. I expect this to occur around August 2021.

Shutting down Grosvenor seems ridiculous, given the parking lot there.

The CLARENDON station is CRITICAL to those of us in the surrounding neighborhoods, and also to the many many businesses in the Clarendon corridor

Strongly object to this proposal. Need all stations open during working hours

I would use the Virginia Square stop every day. This is not a good solution. Metro SHOULD NOT close any stops. Change the train times or make weekend adjustments, but after fighting for so many years to open these stops, closing them seems incredibly foolhardy and short sighted. Clarendon and Virginia Square are dense areas with new high rises. Things will get better, but closing stops only makes surges at others. And it decreases real estate value which no one appreciates.

Self serving, but some of those stations are key for me.

I rely on the East Falls Church Metro for work 5 days a week AND on the weekend. My household and I do not own a car. I chose to live within walking distance of the East Falls Church Metro so we could have convenient access to the metro. Closing the East Falls Church Metro would severely impact my day-to-day routine, going to work and leisure activities on the weekend. Please do not close the East Falls Church Metro Station!

Dont close Smithsonian station. We often use it for guests in town.Dont close Virginia Square. Too many people live close by and would make Ballston even more crowded.

Why are you closing Cleveland park?!

All stations needed. Pre-pandemic, I used most Redline stations, and many of the blue/orange yellow ones, multiple times per week.

East Falls Church is a busy commuter station that is ESSENTIAL.

As a UMD student, i would need access to the college park station

The College Park station is integral to the students of University of Maryland. Student presence at the university has dropped due to Covid-19, however the president of the university has already stated that classes should be expected to be in-person beginning Fall 2021. Thus, on-campus student population will increase, and ridership will increase at this station. Closing this station will make it much more difficult for students to acces job, internships, and other opportunities.

These stations are extremely important for riders to have access to the city for many reasons. This would negatively effect the economy of the DMV.

I live near and use East Falls Church station on a daily basis.

Metro should not close neighboring stations such as Clarendon and Virginia Square. The distance between the remaining stations, Courthouse and Ballston, would make it inconvenient to access anything in Clarendon, vs if just Virginia Square closed.

I take the metro at the East Falls Church stop because both the Orange and Silver line stop there, thus cutting dramatically my commute time. I think it is a very bad idea that will cause a lot of outrage.

I work at federal triangle. I travel with a stroller - and metro center is hard to get to with a stroller.

Closing stations is devastating to so many people. This would close both my entry and exit points for all my travel needs and would make it virtually impossible for me to sustain living in my current area. I am paying to for this service and the rug would be ripped out from under me and so many people I know. Closing stations would increase travel times astronomically, severely impact folks with or traveling with young children and those will special mental and physical needs. Traveling to another station is not possible for everyone and thats the reality. This leaves me stranded and greatly negatively impacts my mental health. Closing stations would also cause overcrowding at open stations as well as increased wait times because not everyone will be able to fit on the available trains especially during rush hour. Plus folks will pile in on top of each other which is not great considering the pandemic were coming out of. Please do not do this, it would be a massive slap in the face to all public transit riders who rely on these stations for service.

Access to the University of Maryland is a must for me, so closing College Park would be extremely detrimental to my households needs.

This is also a terrible idea, please do not do this. I will say, as a University of Maryland alum, closing the College Park station would be an especially devastating move; UMD attracts students from all throughout the state and country, and we should make it as easy as possible for them to see our beautiful region.

| |
|---|
| Proposal to close 22 Metrorail stations |
| If Federal Triangle and Mt Vernon Square are both being closed, would be nice to have access to the National Mall via the Smithsonian stop. |
| This would close both stations closest to my work - archives and judiciary square |
| I live between VA Square and Clarendon, so I need at least one of these to remain open. |
| . Closing some will have a negative impact on property values as people purchased homes based on their proximity to Metro. Silver line stations should remain open for at least 2 years from when the Silver Line is complete to get accurate count of ridershipFinally closing these stations would put more cars on the road and increase traffic and pollution. |
| I rely on Grosvenor-Strathmore station! It is near a huge number of condos and townhomes. |
| I use the Grosvenor station to go to work Monday through Friday. Once Covid restrictions are lifted I will be going back to work in DC and I will need the Grosvenor metro station to get to work. |
| I live by the McLean Station. I will not have a reasonable way to work. |
| Mt Vernon Square is the station closest to my work |
| This is a lot of stations. I think closing some of these stations would effectively cut off certain communities (like Mt. Vernon Square) from Metro access. And some, (like Smithsonian) would have negative effects on tourist use of Metrorail once that comes back in (hopefully) 2022, because there would not be a direct stop for National Mall/Smithsonian access. Additionally, what would the empty space be used for? |
| This one would be catastrophic |
| Horrible idea |
| I plan to use several of those stations |
| My station is Grosvenor. Walking to a different station means that I would likely skip metro and drive instead. |
| Youre talking about closing MY metro station. Please dont. |
| Closing conveniently located stations will make me use metro even less. I will come back to metro after I feel safe. |
| Cleveland Park is a vital access point for one of the only commercial districts for miles. Completely vital for a metro. |
| my office is literally right at the Greensboro station, which is exactly why i take metro instead of driving. shutting that station would dramatically and significantly impact my ability to take the metro to work |
| Trains must stop at Grosvenor-Strathmore! |
| This is truly the worst. Why have public transportation then? |
| MORGAN METRO IS 3 MILES FROM ANY STATION AND COST 14.00 TO GET TO BY CAB!! THIS NEIGHBORHOOD HAS YOUNG PEOPLE WHI DEPEND ON THE METRO! |
| grosvenor strathmore is a crucial stop, especially since you are building the new residences and retail shops there |
| There are a ton of working professionals in the Clarendon area, it's also where there are a lot of restaurants and grocery stores - I think it would be really inconvenient for a lot of folks if Clarendon is closed. Courthouse metro is quite a walk away. |
| Not convenient for commuting |
| Metro needs more stations, not less. Metro is terrible because the stations are not proximate to more desirable locations. |
| Closing the College Park Station would force more traffic on 495, Route 1 as well as thru neighborhoods around the open stations |
| Archives and Federal Triangle are my two options, this would be insane. You cannot make 2022 decisions based on pandemic ridership! |
| East Falls Church is ESSENTIAL! The parking lot is full, people can walk there. We NEED this station and use it regularly!!Arlington Cemetary and Federal Triangle are CRUCIAL! |
| Again, not ideal, but wouldnt impact my commute. |
| This is the worst of the proposals. Keep all stations open and reduce service intervals across low ridership lines instead. |
| Closing both clarendon and va square severely impacts the thousands of residents who live here. It would be unacceptable to close two neighborhood stops like that. |
| This is unacceptable and would not work for me personally and I know others would be impacted too. I choose to live in Clarendon to have access to Metro to get to and from the Pentagon. Telework will become less and less as the vaccine is made more available. Please do not close stations. I would rather you run less trains than close stations. |
| Too many stain closures! You are going to close Smithsonian with all of the tourists! This is a very bad idea. WE live near Grosvenor! How are people supposed to get to the Grosvenor Mansion for performances. |
| I use several of those stations for getting to work. |

Proposal to close 22 Metrorail stations

This is absolutely insane. People will be fully vaccinated by the summer and you will be killing the local restaurant industry as well as severely hurting property values. I pay high property taxes so that I can live in or rent my East Falls Church home as metro walkable. You cant take taxpayer dollars and cut entire stations from your service.

I MUST HAVE EAST FALLS CHURCH METRO STATION!!!!!!!!!!!!!! I would love you to keep Federal Triangle but I can cope with getting off at Smithsonian or Metro center. BUT I MUST HAVE EAST FALLS station

this is a very bad idea - station platforms will be so crowded and also inconvenient

This would impact two stations I use to commute to work - Clarendon and Eisenhower Ave

The proposed stations include the stations I use the most.

McLean & East Falls Church are among the most important lines to me. East falls Church is the closest line to DC that also has a generous parking spot.

Closing stations may have further repercussions for people who have to commute to and/or from one of the listed stations. This could include having to move closer to a different station, ordering a Lyft or Uber at their destination because it is too far to walk, causing people to be late to work, overcrowding of stations.

Close entire stations? No, this seems crazy. Entire neighborhoods exist because of their proximity to Metrorail.

The stations listed here are of critical importance to my commutes both professionally and in my personal life, as I am aware they are for many people.

I have used Vandorn St

I use grosvenor station

My parents live at East Falls Church station and it would be difficult to get to the Orange line without the use of East Falls Church station (since I often go there first).

Some of these metro stations listed are very central to the city, doesnt make sense to close them down.

Grosvenor-Strathmore is indispensable to my wife and me.

I need to stop at Federal Triangle which is where my job is.

For metro to be convenient there needs to be stations convenient to where people live

I love at the metro stop and always use it.

This is the worst of the options presented.

Greensboro is a key station for workers in the Tysons area. While there are other stations that are physically close to this station, Tysons Corner is not very pedestrian friendly so this would significantly increase commute times for the people that rely on public transit. There is a large business base served by the Greensboro Station

Many Federal employees and People who work for businesses that support the federal government live on the Silver Line, especially in Clarendon, Falls Church, and Reston. They do not own a personal vehicle, and the metro subway system is their only way to get to work every day. When the pandemic is over Or even before it ends, those workers will eventually go to their work places Physically. We need those subway stations to stay open for our commute to work.

East Falls Church is the first station outside the more urban part of Northern Arlington and it is also the last station before the split to Dulles - as such, it is a strategic location. VA Square makes far more sense.

E. Falls Church station is the station my family uses.

I anticipate that with vaccines the situation will change drastically from 2020. This is not the time to cut public transportation.

I would have to buy a car.

This would adversely affect my commuting and would encourage me to use alternate means of transportation. I would most likely no longer use metro at all. This would hurt me financially and be unfair to many of us who rely on the existence of these metro stations.

I use multiple of these stations in my commute, this would effectively ruin my ability to get to work.

East Falls Church and McLean are what I routinely use. The next closest stop to McLean is not walkable at all, and would make my commute much more difficult.

Many of these are important to my job and daily duties, such as Archives, Clarendon, Smithsonian & Mt Vernon Sq

My family lives in East Falls Church and I used the the metro before the pandemic happened. Once things go normal, I will continue to use it. In addition, with the vaccine approaching, normal maybe closer than we think

Grovesnor is one of the most crowded station. Please don't close it.

The Federal Triangle station serves many federal agencies. How do you expect all those people to get to work? Grosvenor also has way more ridership than White Flint.

Terrible idea -- These are crowded stations in normal, non-Covid years and well-used.

Silver stations should stay open.

| |
|---|
| Proposal to close 22 Metrorail stations |
| Live near VA SQ metro stop and use frequently |
| These are essential stops that are conveniently located to major workplaces or that do not have other stops nearby |
| You cannot close east falls church metro. For other stations in more urban areas, you can easily walk to other stations, but not with east falls church metro. |
| People's property values are going to drop astronomically with these closures |
| Innovation Center is walking distance from my house and I moved to the area with the hopes of being walking distance for my commute to DC. I am also worried about the closure impacting my housing price. This location also has many businesses in the area that look forward to having Metro rider-ship. |
| I live within walking distance of EFC. While my complex has a shuttle, this would be a problem. |
| The Cleveland Park Station is one of the ones I use most often. I also use Grosvenor to attend events at Strathmore. These are important stations that need to keep operating. |
| We need to induce demand by making train routes more frequent and reliable! |
| This plan would absolutely NOT work for me, as East Falls Church is my neighborhood station. Before the pandemic I commuted from the East Falls Church station at least three or four days every workweek. |
| Not Clarendon. Not federal triangle. |
| Keep McLean and Clarendon open |
| I live near the Grosvenor metro and use it often so that would be a big problem for me. |
| I use many of these stations outside of the workweek. |
| It would be devastating to close East Falls Church, Clarendon, AND Virginia Square. I could see Clarendon OR Virginia Square since they're so close. But, closing East Falls Church would be bad under ANY circumstance given the number of commuter who are dropped off there from all of North Arlington. |
| Closing stations counter intuitive given the changing and improving pandemic situation |
| This would cripple my work needs |
| This is a major problem as if my station is closed the others are not in walking distance |
| All ny many out if town visitors use Smithsonian to see DC |
| Virginia Square and Clarendon are adjacent stations. closing one if you must but both is not sensible. Also, putting stations not yet open on the closure list makes me wonder about your management abilities. |
| I use the archives station as it is safer than the location of the Chinatown station |
| I live near Grosvenor-Strathmore |
| I rely on walking to the East Falls Church metro to get to and from work everyday. The next closest stations are two miles away and not reasonably walkable. |
| Cleveland Park station is vital, especially for seniors and workers |
| I depend on Clarendon for weekday travel into DC |
| Would prefer that the stations around the National all stayed open. Maybe an adjustment to scheduling. But this leaves a lot of Federal employees around that area to rely on LEnfant station which is generally busy. |
| What station is close to Arlington Cemetery? |
| No this will make metro wait times at stations like Roslyn terrible |
| Why would Metro spend so much money expanding the number of stations only to close so many of them? This is, plainly, not workable. |
| No - I would have to move |
| My daily commute takes me to McLean using the rails. If this stop is removed, an incredibly large reason for my usage of the metro is removed. |
| Closing two stations that are next to each other (such as Clarendon and Virginia Square) seems like it would leave large gaps in coverage. |
| strathmore closing would not be good for me |
| Please keep McLean station open. |
| Parking is scarce and often unaffordable in the Clarendon area. Removing the metro there would be a huge blow to most budgets. |
| Prior to COVID I exclusively commuted using the East Falls Church Metro line. I cannot do remote work for my job. Closing the East Falls Church metro line will drastically impact my ability to live and work in this area. |
| So you're looking at closing three stations that haven't even opened yet? PATHETIC! Maybe close some of them on weekends. Or, if some of them are more popular on weekends, keep them open on weekends and closed mid-week. |

Proposal to close 22 Metrorail stations

Close Courthouse and VA SqLeave Clarendon open It's easy to walk from Rosslyn to Clarendon

Clarendon metro is essential so thousands of commuters. It is the heart of one of the most important and dynamic and diverse areas in Arlington County. Closing the metro would hurt businesses and workers who rely on this critical metro stop. Virginia Square should close if it comes down to closing one of the two stops.

This proposal closes BOTH of the stations within walking distance to my house - Clarendon and Virginia Square. If one of them must be closed, I would suggest a Virginia Square, as it is in such close proximity to the Ballston station.

This would likely work. I dont appreciate the silver line closures but from experience I do know the arlington stations are close enough and walkable enough that this would be an inconvenience and not a show stopper

I'd be ok closing Innovation Center until ridership increases but Loudoun Gateway and Reston Town Center are critical stops.

Cleveland Park is my station. It would be very inconvenient for it to close, and would be a major blow to the community.

East Falls Church is my closest metro station, I would need that one to stay open

I use mt Vernon station a lot

Closing Clarendon and VA Square makes sense as it is an easy walk to Ballston for former VA Square users and Courthouse for former Clarendon users. There is no walkable alternative for East Falls Church users. Additionally if East Falls Church was closed there would be no silver line stop in Falls Church.

My two closest stations are Virginia Square and Clarendon. I would no longer ride the metro if you closed both of these stations as it would become inconvenient for me to go to Ballston or Courthouse as I cannot park or walk to either of them.

This is a terrible idea

Understand need

This is absurd. If you want to boost ridership maybe not close down stations. If I have to drive to begin with, it wont be to a metro station, Ill drive to my office.

I need the east falls church metro station. I live on the walk path that has easy access to the metro,as do so many others that I know.

We live in the high Density area around East Falls Church metro. Closing this would be devastating, not to mention inconvenient for the many of us who rely on this service.

I usually use Archives 5 days a week

Closing metro from Ballston to Courthouse is awful! That's a LONG stretch. Please keep these stations open!

Grosvenor-Strathmore makes my commute walkable. If the station closes, Ill be adding around 30 minutes to my commute every day.

As a government employee, I plan to resume riding and will use Federal Triangle stop every day.

Cutting union wages and or time and corporate compensation would not affect customers

Why would you close stations you havent even opened yet?

College Park is an important station especially for UMD students

This would drive down potential growth areas and severely curtail infusion of resources into areas that could use it for upward mobility.

Closure of major stations in VA (Clarendon, BA Square and E Falls Church) would eliminate commute options for me entirely as ART connects to these stations. Also it would vastly increase car traffic and parking problems in Arlington.

No! Do not close stops along the orange line. Especially not in Clarendon and Virginia Square. Once the pandemic is over ridership will increase and you will be doing a grave disservice to those in the Ballson-Rosslyn corridor!

I moved to Eisenhower ave because of proximity to the metro station. I use this station several times a month for my commute. I live car free and this would impact my ability to get around easily.

Virginia Square may be adequately served by Ballston. But Clarendon is not adequately served by Courthouse, at all, and it would be a nightmare for Clarendon businesses and many commuting to DC.

I would not have been able to work without Grosvenor-Strathmore red line

I need access to Grosvenor metro.

I have children go to school at the location.

Absolutely would not work, particularly Cleveland Park closure.

Metro needs to be more accessible -- not less.

Hurts local communities and tourism

Proposal to close 22 Metrorail stations

This is the worst. These stations are a part of the community. People move to be close to these lines and would affect real estate and commutes.

You'd be closing the station I live at and the station I need to get off at for work. It would significantly increase my transit time. I'd rather pay more money than try to figure out how in the world I would get onto the train every morning.

Alas Grosvenor = home station, walking distancedisabled, not really driving, so would force me to metroaccess or bus if well enough

It's much more difficult to park near Ballston than Virginia Square.

This stations are critical to my grocery shopping. I commute from Ballston to VA square for the Giant and the Clarendon for the Trade Jose and the Market Square for other essentials.

I use many of these stations regularly.

Please keep Grosvenor station open! Its an important park and ride station esp. if you are closing those north of Grosvenor

I live in Clarendon. I need the metro access to commute. If you close this station, I would not use metro again. Its also a popular neighborhood. I think it would negatively impact a lot of people and businesses.

Virginia square and Clarendon service GMU students. This would make access to the Arlington Campus difficult.

Clarendon is a major commercial center. Also I have to wait in normal times as this platform is crowded and busy

Virginia Square Metro is a really important metro stop. the area is booming and growing and taking away convenience for the people in that area will not bode well in the future. there is a school nearby as well and students need access to that metro stop desperately. its become a wonderful area to live in primarily because of the access to the metros in the area.

Grosvenor-Strathmore is surrounded by multiple apartment complexes that house people who moved mainly for the purposes of easy metro access. This is a necessary station to keep open.

This would be disastrous for people who dont have cars, have limited access to busses, etc. It would also overburden the Metro Access services for people with disabilities who would otherwise have no other options for getting around if the stations near them are closed.

Grosvenor station is used by so many and would be a devastating loss. Without this station, I would stop using Metro altogether.

closing stations massively impacts commute times. closing stations will disrupt business activity. closing stations will decrease property values. these closures would represent a huge failure of governance.

Depending the time of day, this could reduce safety and drastically increase commutes.

Having frequent trains is more important to me than keeping all of these stations open.

I need the metro at Grosvenor-Strathmore

While my stop is not one that is proposed for closure, closing too many on the same line(s) would likely result in increased crowding

This is the worst idea! My metro station closest to my house is East Falls Church. My family uses the metro 5-7 days of the week to get around. It makes NO sense to completely close that many stations, as that would only further limit accessibility and availability of the system and de-incentivize ridership. Why would you take away stations and make it LESS useful of a system? In my opinion, the more stations open the moreUseful and beneficial the system is to the public. It makes so much more sense to just reduce frequency of trains on certain low use lines. Please do not close down entire stations!

EFC is a popular metro station that serves a large part of N. Arlington. I cannot speak to the others, but closing EFC would be a major impact to me and many of my friends/neighbors that rely on Metro.

I se the grosvenor station and if this proposal is implemented, I would not use metro rail

These plans are HORRIBLE. Why are you destroying metro???

I will be working a judiciary sq and might live in cleveland park... this would be problematic

This proposal is absurd

Again so short sided. These decisions need to made after vaccination and reopening of businesses.

My office is right off the Judiciary Square metro, which I foresee traveling to daily from my stop at Forest Glen

Not sure yet but it could in the future

This would eliminate service to and from my home and place of work. Keep Eisenhower, Van Dorn, Federal Triangle, Federal Center SW

Proposal to close 22 Metrorail stations

My regular commute involves either walking to or parking at East Falls Church Metro. As the first above ground station on the orange line, you will greatly limit accessibility for travelers between ballston and WFC, a considerable distance.

You should not close Smithsonian- thats how many people who work there arrive and how tourists travel to the National Mall

You should not close any stations. We need them!

See my points from earlier on the necessity of keeping College Park Metro open.

These are some of the most populous metro stop areas. Why on earth would these hugely dense areas be considered for metro closure? It would cut off travel for thousands of people, and would drastically increase traffic in these areas.

Please keep East Falls Church open. It is more than two miles away from the stations on either side, not close to them, and it is an important node on the rail to bus network

This only works if remote work continues in 2022.

East Falls Church is not near other stations. It is walkable/bikeable for thousands. If EFC goes away I will just drive to work.

I would be using Clarendon metro regularly

I have a physical disability and you are closing the stop closest to me. Therefore you would make me travel much further, with a PHYSICAL DISABILITY because you cant bother to open a station. This is discriminatory to people with disabilities - please see the ADA.

Grosvenor is a major hub as one of the few stations on redline with large parking facilities. This would cause a tremendous disruption for redline commuters if closed!

I live at Grosvenor-Strathmore Metro Station (in one of the many, many multi-family residential units located within a 10 minute walk of the station). Pre-pandemic, I took Metro to and from Bethesda almost every weekday. Now, I still take Metro 1-2 days/week when I go to my office in Bethesda. Closing Grosvenor-Strathmore would result in me driving, not using another Metro Station that I need to drive to anyway. There have got to be more multi-family residential units (in high-rises, low-rises, townhouses, older buildings, newer buildings, etc.) within a 10-minute walk of this station than almost any other station in the Metro system. Please do not close this station!!

I use Eisenhower Ave station whenever I need to ride Metro. It is true that King St station is within walking distance but it is not an easy walk especially in inclement weather.

I live near Grosvenor-Strathmore and use that station for my commute.

East Falls Church is within walking distance of my home. This station is critical to my DC commute

These stations are necessary and closing them will inconvenience many people as well as reduce property values. Also the definition of near other stations seems stretched here. Van Dorn Street is miles from the closest station in either direction, and far from walkable. In addition for some stations, such as Arlington Cemetery, there is no other station close by and are the only way to access this location via public transit. You should only consider closing a station if it is easily walkable to another station (e.g., <0.5 miles away).

I expect to start working in an office again in summer 2021 and will resume my commute from East Falls Church to Foggy Bottom. I walk to East Falls Church and could not get to another station.

I ride East Falls Church metro every business day to and from my Arlington house and into Union Station. I dont own a car and rely 100% on metro service

Grosvenor is a very popular stop (parking lot is overfull, showing how popular it is). It would be ridiculous to close it.

Dont close my station - Clarendon. It would also close safe access to bars/restaurants in this community which was BUILT around the metro station. Businesses and buildings were built BECAUSE of the station. You will see an entire area go down. Ridiculous. Same with Virginia Square - tons of new apartments have just been built there..

Please keep- Grosvenor-Strathmore station open

College Park must have a metro station for students --the university couldnt operate without metro

I live within walking distance to East Falls Church and this would be awful if this station closed. I rely fully on Metro for commuting to DC and purchased a property within walking distance of EFC for this reason. While I understand this may be a low ridership station, many use it and it would be impactful from a commuter and property value perspective if it were to close.

why would you close Clarendon? That station doesnt seem to suffer from low ridership

It would make it much harder for older people and people with disabilities to use Metro if they have to walk further to get to an active station.

I frequently get off at Reston town center as its the closest to my home. Ending it would further damage people who work overtime and rely on the metro

I use the Clarendon station regularly. Walking to Ballston or Courthouse is inconvenient and means that I would not use metro

Closing East Falls Church is a horrible idea. Pre-Covid, the station's parking was always full. I would not consider the station "low-ridership." Close on weekends - fine, but please reconsider keeping the station open M-F.

Not my stations. That would be fine.

Proposal to close 22 Metrorail stations

Strongly feel that you must open the phase II Silver Line. I relocated to this area with the promise of access to public transportation. Property values will decrease and area development will stall.

I regularly get off the metro at Archives, which is much closer to my office.

Cleveland Park is the stop for my place of employment. I have 20+ employees who would be significantly impacted by the loss of this stop.

This will be challenging getting too and from work.

Clarendon is not close to other stations. It is always busy in the mornings around 8:30am. Closing it would be a mistake.

This would make transferring between orange and silver lines take longer.

Just because of perceived low ridership, this would impact an inordinate amount of workers in the district negatively!

Ridership is low for many of these stations due to Covid. This would be disastrous in a post-Covid world. Car commutanship between DC and Tysons corner would massively increase

Closing stations is not the answer. Some of these stations are not particularly close to others, which would require some to drive to the metro or avoid the metro altogether. If East Falls Church is closed, my family would shift to driving rather than take the metro. We would be far more willing to accept reduced service over closed stations.

Clarendon and Virginia square would mean closing two stations in a row. Consolidating into one might make sense but not both. Virginia square is convenient to my kids' daycare but Ballston would be an acceptable substitute. East Falls Church is not easily replaced.

This will reduce ridership and lower income from fares. It doesn't make sense. It leads to spiraling losses. Closing new stations is a dumb idea before you know the ridership.

Several of the stations on the Orange line are very important to the community. East Falls Church and Clarendon help the community manage without high car traffic.

I would not use Metro if the orange line stations are not available as I use those stations for my daily commute.

I rented my apartment to be near Clarendon Metro. I am a senior citizen. The nearby stations are not as accessible. PLEASE do not close Clarendon.

Terrible idea. People rely on those stations. Many would be unable to reach another station and would have to stop using metro.

No I live right by Grosvenor metro station

I need East Falls Church to commute into DC everyday post COVID-19.

Our family has limited mobility and rely on East Falls Church station to get to work and visit health care providers.

I will be working in DC and the Eisenhower Station is very conveniently located across the building where I live. If the Eisenhower Station closes, the closest Metro Station will be the King St. Metro Station which is too far away for me.

Closing both Clarendon and VA Square affects my commute to GMUs Arlington Camous.

this would be vital for for commuting

If this is permanent its an absolutely terrible list. Some of these stations like Clarendon have HUGE utilization even if they are close to other stations and some of these stations like Reston Town Center and Loudoun Gateway have never even opened to know how much use they would get. This one is the worst proposal Ive seen so far.

Both Clarendon and Virginia Square for the closest metro stations to my job and that would very much impact my way to get to work.

The pandemic has changed ridership at an unprecedented rate. It's not fair to close items just people return back to work. All those sites include important stops for federal commuters who are expected to return then.

It is one thing to have one closed station in the neighborhood. It is another thing to have adjacent closed stations. Examples: Virginia Square AND Clarendon. I would either have to walk to Ballston or to Rosslyn -- this is quite a schlep. We may lose tourist revenues if you close Arlington Cemetery, specially from April to November.

This would put walking to metro ridiculously out of reach...

Yes, I take either Rockville or NIH

Surprised to hear Clarendon is low ridership! This plan means courthouse to Ballston.

Prior to Covid I commuted to and from East Falls Church station every day. Closing this station would be a nightmare for me.

Archives is close to FBI and other DOJ buildings.

Dont close stations. Metro stations are not close together to begin with.

This would make it incredibly difficult to get to work.

Grovenor-Strathmore needs to be open due to large ridership to Strathmore Concert Hall

Proposal to close 22 Metrorail stations

Definitely not! Purchased a home recently based on decision to be near the silver line extension stations to commute for work. This is a TERRIBLE idea and would affect thousands of NoVA commuters

I work at George Mason University between Clarendon and Virginia Sq. Closing both of these stations would create a mile gap to traverse mid-Winter and given bus reductions add 20-30 min to the commute. Please dear god do not close both. GMU is a major supporter of Metro and subsidizes my transit costs.

This is a good idea to save money

I live midway between Virginia Square and Clarendon and can walk to either station. Closing both of those would force me to drive. FYI, I currently commute 1-2 days a week on Metrorail. That would stop if these closures were implemented.

I dont think this would be a problem, but it depends on how many additional riders flow into the surrounding stations.

Keep east falls open!

Absolutely not

I spent much more money and bought a smaller house specifically to be walking distance from Grosvenor-Strathmore. Closing it would cost me 10s of thousands of dollars.

Grosvenor Strathmore is an important stop for many you live close by and are able to walk to the station. Closing that station will be detrimental.

This would make it impossible for me to get to work! East Falls Church station is not close enough to any other station for commuters who currently walk to EFC to walk to another station. It would take me more than an hour to walk to Ballston or West Falls Church from my house.

Closing stations is the worst outcome. Metro is better off reducing service rather than closing stations.

Absolutely not! This will not work. Clarendon, and may of these other stations are in place to support the higher density populations living in these areas. I would like to see the ridership numbers and a comparison before this decision approach is formalized. As described, this is untenable.

No please dont close the Grosvenor -Strathmore station!

Cleveland Park is essential for me, my family and neighbors.

I need to take the East Falls Church metro everyday to work, as an essential national security federal employee.

Other stations close to me like Bethesda, medical center, do not have parking options

No! No! No! Raise fares, taxes, something! Public transportation is the lifeblood of any metropolitan region, especially DC, where there is so much traffic on the roads!!

Grossvenor is used a lot for commuting and pleasure pre COVID abs I expect post COVID. Same for college park, federal triangle and judiciary square.

Closing train stations defeats the purpose of mass transit altogether

I work at the Greensboro station and will be going back to the office. Even if you keep Tysons open its still a mile away.

Greensboro is the station closest to my, and thousands of others, places of work. I rely on the metro to get to and from work.

I use the Clarendon stop for work - related travel from work throughout the DC metro area, so this would be bad for me. Van Dorn St. is my main point of access to DC from home and Id not be able to travel into the city if the Alexandria stops are closed.

These stations are important and necessary for the system. Whats the point of taking the metro if it doesnt have a station where you need to go?

East Falls Church is a heavily relied upon metro stop within the Arlington and falls church area. Virginia Square has significant growth due to the number of additional multi-use facilities having been built in that area. Same applies as before, once the pandemic is eased, ridership will return. Do not make short sited drastic decisions based on pandemic measurements for ridership.

Keep East falls church open. Please.

Closing both Virginia square and Clarendon would be a burden on a large number of Arlington riders, especially those of us who live between those two stations.

We live quarter mile from EFC metro and our family uses to get to/from the city for work. A large investment was made in upgrading this station so it doesnt make sense to close. Also if closed, would be a blight on the neighborhood area and create many other problems of an abandoned site. It also would make it difficult for those who work near EFC metro to get to work as there are not great bus options. So it would impact many of our businesses in Falls Church City and Arlington.

The strength of the subway system is that the stations along the orange line corridor are strategically placed to prevent crowding at any one. To remove Virginia Square or Clarendon or (worse) both would disrupt that and cause unnecessary crowding which is precisely what is NOT needed. Closing East Falls Church would essentially remove subway accessibility to all of the west portion of Arlington.

I use the College Park metro, including its bike cage, and bike storage at the Greenbelt station is not as secure.

This would wreak havoc upon the business and tourism industry in Washington, DC.

Proposal to close 22 Metrorail stations

| |
|---|
| closing stations would increase crowding at other stations, e.g Ballston and Courthouse if closing Va. Sq. and Clarendon; would be difficult to get to work |
| This is insane, how can close so many stations? Closing Virginia Square and Clarendon would leave a huge gap between Ballston and Courthouse. There are so many people concentrated in these areas between stations, most of these are in high density locations for both residential and business riders. Again, by January 2022 every adult who wants a vaccine will have one and travel patterns will have reverted to essentially normal. Dont punish riders for Metros decades of mismanagement prior to the pandemic. |
| East falls church is critical to my commute to work |
| Closing these stations would cost more in revenue than it would save |
| Why build the stations to then close them? This doesnt make sense. Why not consider hiring in non-union workers. |
| Once everyone is vaccinated I will need to get out to Van Dorn Street for religious meetings. There is NO good travel alternative for Van Dorn Street. If you must close stations, how about one of Pentagon City or Crystal City, which are basically walking distance from each other. I hear College Park is a really bad one to close too. |
| This is insane. I use East Falls Church. There are no other stations nearby. This station has a huge parking lot that many people commute to. This would affect many people. Not just locals like me. |
| Please keep Clarendon open. It is a high density area which brings in a lot of night life and shopping. This is crucial in the post-pandemic world |
| Workable, but not enjoyable. |
| I need College Park Station to remain open. I ride a connector bus to the station from my home. |
| I think the new Silver line stations in and near Reston should be open to help increase ridership. I could see closing on of the Tysons Stations but remember this may decrease ridership...not the goal. |
| The Cleveland Park station is important to me. |
| I use East Falls Church to commute into the city and believe many of the downtown DC stops will become much more utilized once people start going back into the office, tourism comes back, etc. |
| College Park must stay open, it is a major university |
| Please do not close Grosvenor. I drive past three other stations to go to Grosvenor because it feels the safest and most convenient. All the condos accords the street would lose their access and I have friends in those buildings who started working from home after the pandemic started. Ridership will go up when Covid is over! Please give it more time |
| closing both Clarendon and Virginia square is too long a distance |
| Clarendon station should not close. This would decrease use of metro. Clarendon is in the heart of Arlington where a lot of people live. It is not very close to other stations. |
| I live within walking distance of EFC. The next closest stops are 2.5 and 3 miles from home - too far to be practical to use. Further, Metro just spent time and money renovating EFC and building bike parking there. Closing this station would make Metro unusable for a broad swath of the Arlington/Falls Church population |
| please do not close archives/Cleveland Park/judiciary square/mt Vernon square |
| I live at Van Dorn St station |
| Cannot get around now |
| I use the Clarendon station daily to get to work. There are a lot of apartment buildings as well as restaurants and shops that benefit from proximity to the Clarendon metro |
| Clarendon is my station. Virginia Square is next closest. Closing them would put me over a mile from Ballston and further (and up hill, I'll be 71) from Roslyn. |
| Keep Arlington open! |
| I live in Clarendon, this is a popular stop and one of the only ways for me to get to work |
| I regularly commute between Virginia Square and Judiciary Square. |
| I use the Orange Line (Clarendon and Virginia Square) daily to commute to work. Such cuts in train service would severely impair my ability to get to my destinations at Foggy Bottom and Federal Triangle. |
| Virginia Sq is my stop, I dont see how you could close BOTH Clarendon and Virginia Sq. The area between Courthouse and Ballston is very densely populated. If the ridership is low right now, it is only because of the pandemic. Otherwise there are LOTS of people at those stops during rush hour. |
| Delay reporting time to work |
| Dont close Clarendon, Virginia Square, East Falls church, Reston Town Center, smithsonian, Federal Triangle. |
| What planet are you living on? Cutting out services is not the way to go. Open your eyes. |
| But only because these are not stations that I use frequently. |

Proposal to close 22 Metrorail stations

Arlington really depends upon having metro stops easy to walk to. If clarendon and Virginia sq are closed, it makes many more neighborhoods too far to easily walk.

I work near Judiciary Square, so closing this station will not work for I and others.

This would severely impact my ability to commute to work.

There is no other public transportation to arlington cemetery. clarendon is a major hub in northern VA for food and nightlife as well as many young professionals who cannot afford a car live there due to the proximity to public transit.

Closing two stations close together doesnt make any sense. Why Clarendon & Va Square and not Courthouse & VA Square? You guarantee even lower ridership with the first two closures you propose because the stations block out a large consecutive area of ridership.

Maybe limit the number of trains to these stations (only stop during rush hour)

I chose to live in my neighborhood knowing that metro would be located conveniently close to me. If I had to travel any further just to get on the train, it would encourage me to choose a different mode of transportation instead

Please dont close these stations!! If you build more parking structures, ridership will increase. East falls church metro parking lot fills up by 7:30am, so people must go to west falls church which isnt as desirable or convenient. Lack of parking is the reason for low ridership, fix this problem!

This plan would work for me but I dont think this is the best idea.

THINGS WILL OPEN BY JANUARY 2022.....

I am Really dependent on the judiciary square station and it would be very hard to operate with out it

We bought a Condo in Clarendon specifically because it was a block away from a Metro station to ensure our wheelchair bound son could get to / from work, events in DC, etc. This would negate the entire reason we bought this condo at considerable expense. Please dont close the Clarendon station down!

Just because stations are close to others, doesnt mean they arent key. Closing some of these stations, including Clarendon, Mt Vernon Sq, Smithsonian, Archives, Federal Center, Federal Triangle, may cause substantial issues to those with disabilities. It will also funnel more people into certain stations or trains and jeopardize the quality of service received at the open stations.

Among these are multiple stations I use frequently, including one I use for work. It also makes no sense to open the silver line extension and then immediately have it close, it negates all the time and money that went in to it and only lets down those who were planning on using it

We rely on the East Falls Church metro station to commute to work!!

It makes no sense to close stations when people have chosen to move to areas in specific reliance on the locations of stations. Also, some of these stations (EFC, which is my station) have just been redone. This is the least desirable option in my view.

Some of these stations are not near other stations. This will further deter ridership.

Do not close Grovesnor station. Tons of people will once again rely on it once people get vaccinated. Many people live and have purchased their homes in order to be close to that station.

The Clarendon station provides access to restaurants, bars and shopping. It should remain open. It would be a mistake to close both Clarendon and VA Square.

Grosvenor-Strathmore is a big hub for commuters with vehicles and closing down the Smithsonian stop would be an inconvenience to visitors.

Need specifics as to why these are the lowest ridership compared to others

None of these apply to me.

Grosvenor-Strathmore is my preferred station.

This would make commuting to work impossible. For a LOT OF PEOPLE. What a terrible idea

PLEASE don't close Grosvenor. I'd have no real way to get to work other than drive, which is horrible.

This would make it significantly more difficult for me to travel, as I would have to either walk (~40 minutes) or take a shuttle to a farther away station if I wished to travel.

I am absolutely against closing Clarendon and Virginia Square stations.

No because I live at Virginia square and that would be devastating since it would impact how I got the doctors in east falls church. And to work.

how can you close three stations that haven't even opened yet? The Arlington cemetery station allows tourists to go and visit one of America's most solemn sites without increasing surface congestion. And Virginia square is my stop, so I'd be opposed to that for sure

The walk from Ballston to Courthouse is too long for commuters

I understand closing stations with low ridership, but mothballing BOTH stations between Courthouse and Ballston-MU -- a distance of about 2 miles -- makes no sense.

Proposal to close 22 Metrorail stations

If the remaining stations have frequent trains it will be OK. But less trains AND less stations, no.

I regularly commute from Cleveland Park and would be disturbed to have that station closed. Many people using the synagogue at Cleveland Park take metro to the synagogue as well.

Would prefer leaving Clarendon and Virginia Square remaining open, as I live in Courthouse, but I understand the rationale. I would think by 2022 return to work and in turn ridership increases would happen. But hard to tell by how much.

many of us purchased property in order to be near these stations. many are not convenient to other stops - why would they have been built if they were? no metro stops should be closed. They should remain open in order to make taking the metro the preferred, eco-friendly way of transport.

Closing these stations would be a great way to cripple the metro rail systems efficacy and increase the number of people hurt by the First Mile-Last Mile problem.

absolutely not, this is an atrocious idea. you should feel bad for even proposing it

Clarendon station needs to stay open

Outside of the pandemic environment, the Eisenhower station serves an area that has a large number of apartment/condo complexes, who probably take the metro. The nearest stations (Huntington/King St) are both very far for people to walk (at least 1 mile either way).

People will not use Metro if they have to walk too far between destinations. Also, many people's property values depend on how close they are to a metro station. This could also be devastating to development in those areas.

when the convention center opens again, it will need service.

Please do not close the East Falls Church metro station. We live across the street and would go back to using it daily once vaccinated.

Am I being punked? This obviously will not work? Many, MANY of these need to remain open. To name a few: Cleveland Park, Clarendon, Grosvenor-Strathmore, Judiciary, Mt Vernon Sq, Smithsonio.....really all of them

Im located at College Park. I use a dedicated bus connection from where I live to the station provided by the university. Greenbelt would be quite problematic in terms of using the bus from where I live.

this would definitely not work as both my home and work stations are included in this list.

Some of these stations (like East Falls Church) were not low ridership until the pandemic hit. In January 2022, the ridership would likely be high again.

Need Grosvenor

Ridership is low because business have their people working from home. Once we return to the office, many of these stations will be an absolute necessity again. For me specifically, I would be impacted by the closing of Greensboro, McLean, Loudoun Gateway and Reston Town Center. I am counting on these stations for my commute.

Would definitely cause a problem for me.

I live two blocks from Cleveland Park Station and my wife and I are regular users. We have been since we moved to Cleveland Park in 1996. Woodley and Van Ness are too far to walk if commuting to work or trying to make an appointment. We will be forced to drive or use ride-share services, and our neighborhood will suffer.

We rely on one of those stations to get to work and this would be extremely problematic!

Unfortunate but practical cost-saving idea

This would be the worst - having enough stations to make Metro useable is so important!

Do not close Cleveland Park station or downtown stations. While I don't use them, it seems idiotic to close stations you just built.

Would prefer the stations aren't completely closed, but rather have reduced access of budgets can't sustain the full schedule.

We moved between VA Square and Clarendon to be able to take the metro to and from work. We chose our daughters daycare to be close to the Clarendon metro intentionally. This change would force us to move to make our commute and work situation work.

Same as the previous comment

I live near College Park metro and strongly oppose this proposal

I won't be able to get to work easily or around my own neighborhood-and the restaurants and shopping in Clarendon! I hate using my car when I can take pubtrans! The crowding that would result on the Ballston platform could cause significant hazards.

I am also near Grosvenor and that is a very busy station.

This seems like a really bad idea and would further reduce ridership. Wont metro be back at near perfect-pandemic ridership by this time?

Proposal to close 22 Metrorail stations

Closing Clarendon would be a major mistake. Not just for those of us who use it to get to DC, but for traffic congestions/parking for those who would have to drive to bars and restaurants. There would be more drunk drivers out and about.

People plan their entire lives, and buy property and select jobs, based on location relative to metro. Closing these stations would have a dramatic and catastrophic impact on their lives.

Closing stations does not seem like a solution. Would it really save much \$? You are inconveniencing lots of people who live/work near stations

Smithsonian is crucial for residents and tourists. For tourism, that station should be the example for the district. There are really no convenient nearby stops for tourists. Low ridership could be increased by making the Smithsonian entrances more prominent. Been under construction for awhile and you can walk right by without noticing.

This would be disastrous for my commute. It would put more cars on already clogged roads and make finding a parking spot in the remaining Metro parking lots almost impossible.

College Park is important for access to UMCP. Grosvenor-Strathmore is important for access to the music center at Strathmore. Judiciary Square for access to the courts. Smithsonian for access to the museums on the Mall. This is a terrible idea.

I need the Clarendon stop to be open, as my office is in very close proximity.

Closing so many stations at once during a pandemic will cause overcrowding

I walk to East Falls Church daily under normal circumstances. If I have to drive to get to a different Metro station, I'll stop using to commute at all and just drive to my office.

Closing the Clarendon and Virginia Square stations is a terrible idea. There are numerous businesses in the area that are struggling as a result of the pandemic. They need metro functioning and open to make them accessible so that they can get back on their feet once pandemic restrictions ease.

I rely on the McLean station for work purposes. I also frequently utilize the Clarendon and Downtown DC stations on a daily basis.

You are suggesting closing several stations in Arlington and I live in Arlington and work at Greensboro

If VA Square and Clarendon stops are both closed, I will never use Metro. Those are the only stops close enough to me where I could drive and park to get to metro stops.

Innovation Center is the station I'll be relying on for transportation to Dulles Airport as well as to Reston and Tysons. Innovation Center not opening would be a catastrophe.

It would be stupid and shortsighted to close new stations on the Silver Line a few months after they open. People will just be developing a habit of using these stations and will be very excited about having them.

Please do not close BOTH clarendon AND Virginia Square. This makes life very hard.

As long as the Ballston station stays open!

Keep Arlington open

Some of these stations are really needed. Why would you do that and increase traffic in DC where parking is very limited...

Definitely this doesn't work

GROSVENOR is one of the few stations with parking

Grosvenor-Strathmore and Mt. Vernon Square would need to stay open due to operation of service levels.

This is unacceptable. We need more stations and more trains, not less of both.

Virginia Square and Clarendon are quite useful to me. Everything else could close non problematically.

It is important to keep the stations open. We need to be green. If it is too difficult to take metro people will drive more and that would be bad for the environment. Also would adversely impact home prices. Don't hit people when they're down.

Clarendon is a strong mixed-use (residential, retail, office) community that can bring ridership back to Metro. Otherwise everyone will have to make it to Rosslyn and Ballston, which will choke up stations. Better to keep more stations and spread out the trains.

My Vernon Sq should stay open

This would add more time to my commute.

Many of these stations get many riders!! Please do not close them.

Absolutely no

Wondering how the Silver line would be accessible without EFC

Please do not close down Grosvenor Metro station.

East Falls Church needs to remain open!

Proposal to close 22 Metrorail stations

Many of these are NOT near other stations. This is unacceptable. The majority of us do not have cars and even if we do, we do not drive to work. We are dependent on these stations for commuting. DC has also gotten even more unsafe recently and I don't want to be walking far in the dark to get to a far away station.

My closest Metro station is Grosvenor-Strathmore and I have no way of getting to the next nearest station. Closing Grosvenor-Strathmore, considering its in a suburban area in which many people drive to, will place a terrible burden on those who commute. Another bad idea.

With the exception of Clarendon, Greensboro and McLean stations

Crazy to talk about closing station when you don't have any idea what the post-covid ridership will be. We're retired but will be using Grosvenor-Strathmore to go to Smithsonian museums and park in the Grosvenor-Strathmore parking garage when attending Music Hall at Strathmore events.

I regularly use many of these stations.

My station is listed

I don't own a car and rely on Grosvenor metro for transportation. Taking a bus to the next station is not a good option in the winter.

I live near the Eisenhower metro station and intend to use it to commute to work once I have been vaccinated

Before the pandemic, Grosvenor metro parking lot was full by 9:30am

This would make it incredibly difficult to get to/from these stations and areas. What would the people that live near these stations do? How would we get there? People need and expect these stations to operate.

Once the pandemic is over my main mode of travel is metro starting from East Falls Church

I find it hard to believe that Grosvenor has low numbers. Please produce evidence from pre-pandemic periods for all stations

I plan on returning to Orange Line commuting when the workforce and social happenings resume in-person. People do not want to commute by car. Metro is doing a great disservice to taxpayers and commuters if it closes these stations. If it is to close stations, consider closing adjacent stations. No one wants to drive to a Metro Station to catch a train. You will lose even more riders if you close adjacent stations.

What metro stop would I get off of if I need to go to Clarendon? It is too far of a walk from Courthouse and Ballston. You need a stop in between Ballston and Courthouse for the busy neighborhood

It would add more time to my commute and cost me more money to get to another station

this would make my trip to a metro station at least twice as long as the closest stations are VA Square and Clarendon. Also, stations like Innovation Center are work commute destinations with no other option to commute

Assuming Metro volume returns to pre-pandemic levels, closing these stations would mean excessive crowds on other stations' platforms. I ride the red line from Tenleytown to Gallery Place (in normal times), so Cleveland Park's closure would affect my ride.

College park is needed

Riders have been low because the stations are closed for renovation and the pandemic. Hopefully, by January 2022 the renovations will be completed and we will be able to go back to traveling on the Metro

Strongly dislike this disastrous proposal.

I use Grosvenor all the time.

Again, give me a break. What would this do for real estate values in these neighborhoods?

As someone living in College Park and not owning a car, I depend on Metro and the College Park station. If you close this station I will move away from the DC metropolitan area.

We live within walking distance of the East Falls Church Metro and regularly use it to go downtown for appointments and work-related meetings.

My employer, the National Science Foundation, moved to its Alexandria location in part because of the Eisenhower Ave metro stop. If Eisenhower is closed, I have no way to get to work; I do not have a car.

What about the housing that has kept its value for walking distance to the metro. Grosvenor also services two major area high schools: Georgetown Prep and Academy of the Holy Cross, with students depending on public transit

East Falls Church is my closest Metro station. I often take Metro (in non-pandemic times) to Virginia Square and Clarendon and am looking forward to taking Metro to Reston Town Center when the silver line phase II is completed. The only reason I and many others are not taking transit right now is the pandemic. As soon as I am fully vaccinated I will be back on Metro.

Proposal to close 22 Metrorail stations

Thats a PITA, combined with super long headways. This is the kind of plan that will penalize people who rely on Metro the most and drive the rest of us to just stop considering Metro as an option for traveling around the DC area.

EFC a picks up alot of commuters. Including myself and my husband

We use two of the north Arlington stations at least 5 round trips a week

I would specifically feel pain if either East Falls Church or Arlington Cemetery were closed.

What is East Falls Church near?

no, this will certainly not work and is a huge waste

I commute from Van Dorn to King to LEnfant and AR night from Fed Ctr SW; too many rats at LEnfant.

I'd be curious when these numbers willRun, but some of the stations listed are among my most frequently used - when we're not all shut down for Covid. And I anticipate they will be again.

Some of these stations (maybe around half) should remain open.

Strong no! Closing stations when we have spent so much to renovate and build the new Silver Line seems shortsighted. The area needs a strong public transportation system to recover from the pandemic and limit climate change. Keep East Falls Church and other stations (especially that feed into the Silver Line) open. I understand the need for budget cuts but hope those can be accomplished by limiting service rather than closing stations entirely, which could have devastating effects onneighborhoods and our region.

Seeing as how my plan is to use metro to get to RTC station for commuting purposes, no this plan would be very bad.

I utilize Grosvenor-Strathmore which just had a large parking structure improvement project completed. It makes no sense to close as more and more riders are returning and fill up the expanded parking spaces.

The college park metro station is within walking distance but no other metro station is close by. My friends would not be able to commute

â€œNearby stationsâ€œto Cleveland Park means walking to Van Ness or Woodley Park, which is a 20-m walk.

I need some of these stops to get on/off the metro for work as a federal employee

I live across the street from the strathmore, i chose this area because of the easy commute to DC.

These metro stations are a significant reason that people live in these neighborhoods. The closure of these stations would impact property values and businesses in these submarkets.Just dont open the pending sites. Hardly anyone uses the silver line. Just shut down the silver line!

This is a truly insane idea and very embarrassing to even consider seriously. Closing these stations would make metro inaccessible to many people, especially those with disabilities and who do not have the resources to go to another station that is much further away. If WMATA does this, metro will inevitably fail. This is the worst idea I've ever heard coming from WMATA, and that's saying something.

The increase in car traffic that would result from these closures would be terrible and have negative consequences for the environment and the economy. Once the pandemic winds down we will need these stations. I rely on the east Falls Church metro to get downtown for meetings and to attend cultural and other events. I would think twice about dining and doing other things that support the economy if I couldn't take the metro to get to certain venues.

For tourism Arlington & Clarendon are key

This would be disastrous for local transportation, real estate, and the local economy. I understand the pandemic has caused issues, but using that as an excuse for permanent closure makes no sense given the pandemic is not permanent.

Please dont close East Falls Church Metro Station - its important to me.

Terrible idea

People need those metro lines and stations to make it to work as business opens up. You closing that many stations would be detrimental and premature. Not to mention it would force more people to drive this increasing congestion, traffic, and pollution on the highways. It is not smart and definitely does not show a care for the community.

I live in East falls church and use the metro almost everyday. I have no care and cannot walk to the other falls church station as it is over two miles away for where I live. This would financially devastate me and the local community

DO NOT CLOSE THE COLLEGE PARK STATION! It is used by so many, including college students who have no other means of transportation around the DC area.

No. I use the Grosvenor-Strathmore station to commute to work. There is no practical alternative station for me. The NIH stations and the next one to my north dont have parking, so even if my wife and I bought a second car--a major expense--it wouldnt be practical to drive to them. I would have to stop using metro altogether.

Proposal to close 22 Metrorail stations

I absolutely rely upon taking Metrorail at the East Falls Church subway station. Closing East Falls Church subway station would be a complete and utter disaster for me. Please ! Please! Do NOT Close the East Falls Church subway station.

Many of these stops are vital for commuters. For example, there are many who work in McLean and live near DC. This removes their ability to take the metro to get to work, putting more cars on the already busy 66 and 495.

How do you expect people to get to other stations. Va square I get, that's walking distance but not the others

Absolutely not! Parking is already a disaster in the county. We bought our house with the intention to walk to the metro. I'm not willing to be forced to find limited parking at a different station AND lose money on the sale of my house because it is no longer considered metro-accessible.

There are some stations that may require additional walking or transportation that may not necessarily be convenient (with weather or other circumstances - particularly in urban areas or suburban areas with limited sidewalks to get to next stations), so eliminating them may not be feasible. I would propose closing those stations at certain times of the days OR have the trains just arrive later.

DO NOT CLOSE EAST FALLS CHURCH. It is absolutely in no way close to either West Falls Church or to Ballston, and would eliminate any ability of people within walking distance of EFC to use Metrorail.

east falls church and clarendon are important stops

Please consider bus services as well. I often only see 1-2 riders on full size buses. Cant these be handled with more efficient vehicles?

This plan affects numerous communities that have densely populated areas around the metro stations.

My family relies on the East Falls Church Metro, as it is within walking distance of our house and many other communities and apartment buildings. Closing this station is tantamount to shutting off Metro service to a big part of the D.C. community. This really should not happen. (And closing McLean? It was just opened. What - its just going to be an empty building? What an eyesore. Sounds like the beginning of a fictional dystopia -- only this is real.

Grosvenor-Strathmore should remain open

Our daughter is expected to attend the University of Maryland. No subway stop in College Park is a non-starter. Cleveland Park and Smithsonian are two other must-use stations in my pre-COVID travels.

I use Virginia Square or Clarendon so shutting these stations down would be extremely inconvenient.

Do not close Grosvenor Strathmore station. It is an immortal station for many people. Additionally, it has a parking lot that provides an excellent amenity to commuters that many stations dont offer.

Would not use other station due to safety and distance to parking (College Park, Greenbelt)

Clarendon and Virginia Square are my two closest stations. Closing both of them would be an inconvenience.

This would be highly detrimental, I depend on the college park station on a daily basis.

Many of these are the only stops I use! (Including Archives, Clarendon, federal triangle, Virginia square, etc. Especially between Rosslyn and Falls church, people have chosen their living arrangements specifically because of the proximity to the metro!

People using EFC would not be able to walk to Ballston or West Falls Church. Most EFC users are walkers, bikers and kiss and ride drop offs.

EFC is an indispensable hub for changing between the Orange and Silver lines, especially when heading out to Tysons or Dulles Airport. Living west of EFC on the Orange line, EFC is the place I go to, switch, and then head west on the Silver Line. Additionally, EFC is a hub for bus routes that connect from Metro into Arlington. Finally, EFC has some parking whereas Ballston does not, so EFC is extremely convenient for tourists who stay in NOVA and then want to head into the District to sightsee.

The logic for closing several of these station is lacking. Several of the stations are near one another and closing both would create a hardship for the people who depend on them (i.e. Van Dorn and Eisenhower). Some of the closed stations may be geographically near others when using a straight-line method to calculate distance, but accessing the closest station may prove difficult with current public transportation options and road configurations (i.e. Morgan Boulevard). Im not sure how you can even assess stations on Phase 2 of the Silver Line when they arent even open yet. Models arent always accurate.

Clarendon is very popular stop. I specifically moved to clarendon to have easy access to the metro.

Can walk to East Falls Church. Taking bus to/from home to next station would not work for me because it would lengthen my travel. I would have to drive,

A lot of people use College Park especially for Univ of MD

My husband and I would not be able to walk to the next metro stop since we live near one that would be closed.

Proposal to close 22 Metrorail stations

| |
|---|
| UMD is anticipated to return to primarily in person instruction in the fall with 90% of on-campus capacity. You would cut off students from internships, and thousands of DC residents who work at Umd from having reliable transportation. DC and UMD reliable upon one another to boost each other's numbers and this would be a major shot in the foot for metro. |
| No! My commute is between a Morgan Blvd and Federal center SW, which would mean both of my stations would close Driving and parking would be overly burdensome |
| I would like to see the Cleveland Park metro stop remain open. |
| This would almost double my commute having to walk to a metro stop that far away. This would cause me to have to use a other form or transportation. I pay a lot of money to live next to the VA Sq metro, not to have to walk 15 min to get to a station. |
| I expect to use the Clarendon station to get to work. Closing stations near high density housing makes zero sense |
| We leave near EFC metro and take it often during non Covid days. This would be a big blow to our area as the closest other metro stops are a good distance away. We also often use as destinations Smithsonian and Federal Center SW |
| Those stations may look like theyre close to others but thats only on a map. If a rider lives or works near one of the listed stations, its not always easy for the rider to get to the next closest open stations. Pedestrian access is not always safe and buses do not provide reliable/regular service. |
| Do you guys not realize that Clarendon has so many restaurants and businesses? Its a destination people travel to. Cutting the metro would be abysmal for the local economy. Greensboro/McLean area will see high office commute traffic after the pandemic. The low ridership is because no one is allowed to go back to work yet. |
| Grosvenor and its associated parking structure are critical for convenience. |
| For Arlington stations, closing both VA Square and Clarendon would be very inconvenient for people who reside or work in that stretch of Arlington. If two stations along the orange/silver line in Arlington need to close, it would make more sense to close VA Square and Court House. This proposal would mean there are no open Metro stations between Ballston and Court House. |
| I wont walk over a mile in Tysons Corner to get to my office. Theres absolutely no safe way to walk from station to station. The only reason Im spending the money on such a high rent is to be able to walk to Ballston and get dropped off at Greensboro. If that isnt an option, Ill move out of Arlington for sure. |
| Entire residential and commercial developments have been built around these Metro stations and people have bought homes and built lives based on being near a Metro; it would be economically destructive to close stations. |
| In 2022 I expect normal ridership |
| When Im allowed to go back to work at my jobs office in Rockville after the pandemic restrictions have abated, I plan to use the Grosvenor-Strathmore Station to Shady Grove route daily. I did this before the pandemic hit and my office temporarily closed. I have been working from home. |
| Eisenhower Ave is a much needed station for the residents in this area. The area is growing and we require a station for our area. |
| East Falls Curch provides a valuable serve to both Arlington and Falls Church. There is no parking available at other Arlington Station and the lots west of East Falls church are always full. To take this station away would be a detriment to the area and to the Metro system |
| There may be a few stations worth closing, especially downtown where they are relatively close together, but in the suburbs people depend on most stations to get to work. Why have we invested in this infrastructure if we are only going to make it impossible to use it???? |
| I have concerns about this and accessibility. There are already a lot of handicap shuttles helping navigate elevator outagesâ€” how will taking out all of these stations impact that service? Sounds like it would make the system even harder for those with mobility issues. |
| I reside near east falls church and use the metro to commute part time when I work at the office in the dc area. Not having access to this metro stop would cause huge issues for me |
| I use the College Park station to commute to the airport so I can travel home (out of state). |
| Keep EFC open |
| That is NOT IDEAL at all!!! I use a lot of these particular stations and would prefer they remain in use. |
| Absolutely not! Rely on Grosvenor station!!! |
| I heavily use the Cleveland Park station. |
| I ride the Clarendon metro and live walking distance from it. My husband does too. Courthouse is not as convenient for us. |
| Metro's plan would close all the stations within walking distance of my home and within walking distance of my work - meaning Metro would no longer be a viable transport option for me so I would never take it again. |

Proposal to close 22 Metrorail stations

This proposal is a disaster. These stations serve many people, residences, businesses and offices. Metro works because of the many stations and options it provides. Closing these stations should not be considered.

I am strongly opposed to this plan; I live at Clarendon, and feel strongly that the station should remain open to facilitate easy access to DC.

I live a 15 minute walk to the station so I would cease using the metro if they close the Strathmore station. This could also impact my property value.

Absolutely not, would negatively impact many neighborhoods throughout this area. Same answer as before, by January 2022 things will be back to normal and so Metro should return to normal service at all stations.

I would love Cleveland park station to stay open - Woodley is already congested with normal travel

Need all stations open to meet my needs

I don't think this is a huge deal but crowding on the platforms at L'Enfant, Metro Center and Chinatown would probably be an issue.

No

You built them u keep them open. Or shut permanently as they do in London, or have Express and Local as in New York, wait you only have dual tracks!

Clarendon and Virginia Square are right next to one another. Seems odd to close stations side-by-side and not stagger.

I just bought a home that is closest to the Clarendon metro and part of that decision includes the need to get to work in DC. Please do not close this station!

Stations that are close together is a relative term. For people who have issues walking, doubling the distance and time it takes to get from the Metro Station to their office isn't feasible.

Closing both Virginia Square and Clarendon makes it difficult for people along the orange and silver lines. Closing just one of them would make life easier--although it would be best if both could remain open.

There are so many apartments and homes nearby that Grosvenor-Strathmore station serves! There is no parking option at medical center and the parking at Twinbrook is minimal. I know many adults and youth who use this station because it is closer to home and within walking distance.

Getting rid of Virginia Square AND Clarendon does not make sense. Clarendon is a busy station - Virginia Square is less busy and close enough to the Ballston stop - so if any were to close it should be Virginia Square.

How will the people who work in essential businesses near these stations do to get to work?

I use multiple of these stations regularly, this would be a significant inconvenience for me. I currently take the metro everyday (M-F).

There are so many stops included on this list that I use regularly and would significantly impact my travel abilities for work. SPECIFICALLY the Clarendon station. There are so many apartment buildings and restaurants and businesses in Clarendon that the removal of this station would make absolutely zero sense and probably harm a lot of businesses that rely on the Metro's foot traffic in that area.

Greensboro gets more and more important due to a lot of people who have moved to the area (new high rise buildings), not at last BECAUSE of Metro.

None of the stations I use are affected by this proposal, but this seems like a backward step for a growing city.

Grosvenor - Strathmore has garage and the arts center/ should not be closed.

Would be good if you could keep either VA Square or Clarendon open since they are next to each other.

Regularly use Clarendon and Virginia Square metro.

I need Judiciary Square. A ton of people use it in normal times and rush hour to avoid Union Station chaos

Physically would not be able to walk from Metro Center to 12th & Constitution Ave. closing Federal Triangle would be detrimental.

Grosvenor should stay open. Why not close White Flint instead?

Completely unacceptable. You might as well shut the whole system down. Is low ridership based on 2020 COVID shutdown levels? With the vaccine in place and most agencies and offices resuming normal operations ridership will go back up by this summer/fall.

Closing stations in middle of federal buildings

We rely on the Grosvenor station to commute on weekdays. We expect to resume our daily commute in 2021.

I live in Courthouse. I use Virginia Square for work and use Clarendon regularly for grocery shopping and restaurants - I can walk to work in Virginia Square, but it's a bit of a haul to do it every day. But bus is okay, but it doesn't come as reliably as the Metro and isn't protected from weather.

Proposal to close 22 Metrorail stations

Closing the Virginia Square Metro Station will significantly alter my ability to enjoy and use by home. I think its a really bad idea. It will reduce property values significantly. Also, there are two major employers in Va Sq, GMU law school and the FDIC. In a post-Covid world there will be a big impact on those businesses as well as on the infrastructure that was build up around the Va Sq metro station

I live at the Mt Vernon Square station and I work off the Greensboro station so this would definitely not work for me. I am also considering going to graduate school in College Park and would want to use the metro to get to campus.

This is sad, but this works for me.

Please No!

Keep either Virginia Square or Clarendon open. Dont close them both.

Very bad idea

I use Archives every day. The next closest to my job is Federal Triangle -- also on the list. Walking from Gallery Place or LEnfant Plaza is lousy considering the cost of the commute. This is a terrible idea. These stations already exist and sure seem busy to me. Is overcrowding already busy stations a workable alternative? This is a terrible idea. If you want o discourage ridership throughout the system, this is the way to do it.

god please no. these nearby but off-center stations make it so much easier to get around and avoid crowds

McLean is the closest station to my job, the alternatives mean I wont take metrorail

This is detrimental to so many DC neighborhoods. The "nearby" stations in many cases are not close. I cannot believe this is even being considered.

I chose to live where I do because of the walkability if the Clarendon metro. Not only that- if the metro closes I'm sure businesses will as well since I'm sure part of their location strategy was being close to the metro.

Utilize Grosvenor- Strathmore regularly. It is my home stop

I use EFC and Mclean for work and live on Van Dorn

how is grosventor-strathmore near other stations? i cannot walk to an alternative

Federal Triangle it is the hub for many federal workers. If the government continues to telework all the time, then this is moot. but, if federal workers phase back in, you CANNOT close Federal Triangle.

I rely on East Falls Church to commute to work (when we return to work), anytime I go into DC for an evening event or on the weekend. By closing this station, I most likely would not use metro at all.

GMU students and employees need Metro access to get to our Arlington campus. We are just about to undergo a huge campus expansion which will bring more people to the area and have increased transportation demand. Closing both Clarendon AND VA Square/GMU stops would be extremely detrimental to this expansion. We have many students and staff even right now prior to expansion that rely on Metro to get to work and school.

I moved to my current home because I though I would be able to ride metro from the Loudoun Gateway station.

I live at Grosvenor Strathmore and regularly use the metro.

I specifically moved to my current area for the easy access to the Greensboro metro.

Our family desperately needs the metro stations near us to stay open - Clarendon and Virginia Square. Our daughters daycare is two blocks from the Clarendon metro and in order to get our daughter to daycare and be able to work. Well either have to decrease our work hours (and therefore income) or move to a different daycare and possibly different apartment. PLEASE keep at least the Clarendon metro stop open!

Too far to walk from other stations

NO STATION CLOSURES!

Closing both Clarendon AND Virginia Square is not reasonable. I agree these two stops are very close together (hey, I did not design the system!) but given the very high density building that has sprung up around these stations, they cannot BOTH be closed.

no - more stations open will likely lead to more riders and more revenue! worth keeping key stations open during key hours - say 7 am to 7 pm or 7 am to 10 am and 4 pm to 7 pm at least. Also Clarendon and VA Square are adjacent. Pls dont close both. Clarendon keeps young people, sometimes, drinking, off the roads and helps get revenue to our community restaurants!

As a Federal employee, I have depended Metro from the Grosvenor-Strathmore station to get to my worksite.

The entire nursing shift depends on many of these trains.

Proposal to close 22 Metrorail stations

| |
|---|
| The east falls church line is located near MANY commuters and this would not be an easy transition for folks once we return to work. Many of us rely heavily on metro for weekday commuting as well as for entertainment commuting in the DMV |
| This would be a huge disservice to those who rely on these stations (especially those farther out from other stations). It is not easy to get to another station which could be several miles away. |
| I use some of these stations, especially Clarendon (work site), often. |
| Many of these stations I rely on for work and for commuting. |
| That leaves a 2 mile stretch in Arlington without service. Thousands of people live and rely on access to those stations, not to mention universities and business that attract thousands of travelers and commuters each day. These plans should be scrapped now that the American Rescue Act was signed into law and the billions of dollars going towards saving public transit. |
| This seems to be a very equitable way to consolidate if ridership is low and people would have to switch to another closer station. I don't think this plan is a huge negative for a lot of people - as long as frequency stayed the same. |
| Grosvenor Strathmore metro in itself is a huge base in the community. It is essential. |
| Cheverly and Smithsonian are important to me. Morgan Boulevard and College Park are also important. |
| Closing select stations would inevitably create a run on parking at the remaining operating stations. |
| I use both Va. Square and Clarendon. Prefer that you reduce service rather than close the stations. |
| This would discourage me from using Metro |
| Keep Grosvenor Strathmore station open |
| ... |
| You are closing high ridership stations. McLean, Clarendon, etc. |
| I take the train daily from East Falls Church when there's no pandemic. |
| Too complicated and limits availability of service. Not a good long-term solution |
| These are all the stations that I use |
| I ride from College Park to Archives. This would be terrible |
| This seems like the most drastic proposal. I live nearest to the East Falls Church metro station so closing this station would have a major impact on my travel |
| I live by EFC, I need access to public transportation |
| I understand these are based on low ridership, but it is not helpful to walkers to have two stations next to each other closed. Another alternative is to close Courthouse and Virginia Square keeping Clarendon open. Courthouse riders can walk to Rosslyn or Clarendon while Virginia Square riders can walk to Clarendon or Ballston. |
| Please don't close Clarendon! Sell the naming rights to the station if it means you can keep it open! |
| Not a good idea to close the stations. |
| Although there may be another station close by within whatever metric you are using, these are nowhere near my residential community and will add additional time, bus/parking fare, and hassle to a commute that is meant to simplify the movement of vehicles. |
| I don't believe closing the Clarendon station makes sense. It would force users to go to Rosslyn which would overcrowd the platforms during the normal rush hour. |
| I need to be able to travel to Greensboro for work easily. |
| I work at Greensboro and need that station to go into and out of the office. |
| My husband and I use the Morgan Blvd regularly for work and travel into DC. We also have 2 children so additional travel to another station would not work |
| This seems to be a very bad idea and doesn't take into account that once the pandemic recedes, people will begin to use the system again. People will begin to travel for family vacations, etc. These stations have taken a hit during the pandemic but it won't be permanent unless metro curtails service to the point that it is no longer useful. |
| Don't close Clarendon AND Virginia Square. Keep Clarendon open |
| I could make it work but it would decrease the frequency with which I ride Metro. I'd probably use ZipCar more often. |
| Do not close Orange Line stops. Ridership will resume as the pandemic eases. |
| Please keep the Grosvenor Strathmore station open. |
| This would severely limit people's abilities to commute - particularly in MD/VA if individuals do not have access to a car/bus route. |

| |
|--|
| Proposal to close 22 Metrorail stations |
| To extend the time between trips and close the two closest stations to my home would extend my commute significantly and negate one of the main draws for living where I live. |
| East falls church is very critical for my job and closing it would be very hard for patients to get to their health care at falls church |
| Keep federal triangle open |
| Closing stations is a very bad idea |
| Many communities have built up around the Metro stations. It is understandable to close areas with no community nearby (such as Arlington Cemetery), but for many, they have chosen where they bought a home based on Metro Access. This would be a major disruption to their lives and likely result in considerable financial loss for them, as well, when they move since the Metro no longer services them sufficiently. |
| This is terrible option that will have major repercussions for travel and safety given the footprint of many of these stations. |
| I frequently visit family who live near the Grosvenor station. Permanently closing the station affects visitors to the Strathmore performing arts complex & residents of Grosvenor Park apartments. |
| EFC is not near other stations and there aren't any bus stops near me. This would mean I would have to drive to work instead of using public transportation. |
| Grosvenor-Strathmore serves a huge community. |
| You must be kidding about the orange line, right? Once people are back in the office, it will see heavy use and need all of its stations open. You are proposing to close them just as their use will spike again. Terrible idea. |
| Dont close Clarendon and Virginia Square. I am a GMU student and this would force me to not take the metro. Metro would close before my classes end and not even take me to where I need to be. Not a good idea. |
| The closest station to Van Dorn is Eisenhower and both are proposed to be closed. Many communities shuttle to the Van Dorn station and once COVID is over and the federal government is back to in-person working, there will be more ridership. |
| COLLEGE PARK ONLY HAS LOW RIDERSHIP BECAUSE U OF MD IS NOT IN FULL OPERATION DUE TO COVID. THIS IS A VERY IMPORTANT STATION AND SHOULD REMAIN OPENZ! |
| Smithsonian should remain open no matter what |
| Clarendon is a MAJOR hub in Northern VA with two grocery stores blocks away. Similarly, VA Square has a grocery store a block away. There is an incredible amount of development taking place between Clarendon and VA Square. Ballston and Courthouse with their increased development would not be able to support the increased usage without major maintenance and ability to keep the escalators and elevators moving. |
| Some of these stops like Clarendon have huge ridership. Virginia Square nearby could be closed but not both. Especially during tourist season Smithsonian and Arlington Cemetery should be open. |
| East Falls Church is an important connection station for people who are using the W&OD and consider EFC their access point for the Silver Line stations going west. |
| The Arlington stations are heavily used, especially Clarendon and East Falls Church. Closing them would be terrible. |
| I am mobility limited and one of these stations is where I live nearby. I would have to move. |
| Please don't close college park, grovesnor/strathmore, my daughters rely on these stations to get to school and we use grovesnor to get to union station and smithsonian. There is easy parking at grovesnor and Bethesda station is not as easy/friendly to park and maneuver. One of my daughters uses Amtrak to get to her college then takes metro to grovesnor which is close to home. |
| I walk to East Falls Church. No other station is walkable. |
| Grosvenor is my usual station. There is a lot of housing around Grosvenor, allowing patrons to walk to the metro. If it closes, patrons may use alternate transportation and further reduce Metro revenue. |
| It is important Arlington stays open. Many tourists rely on this station as well as many who rely on tourism for their income. Closing Smithsonian and Federal Triangle would rely be horrible for tourism as well. And D.C. really needs positive tourism now more than in a long time. |
| Family of four depend on metro service from Eisenhower station. Requiring us to travel to either Huntington or King Street will add 30 more minutes of travel and this adds to additional delays if trains are only offered every 15-30 minutes. |
| Clarendon and Smithsonian are high traffic and should remain open regardless |
| once the pandemic is over, I am sure I will use Grosvenor Strathmore more often. |
| I rely on East falls church station for my daily commute |

Proposal to close 22 Metrorail stations

My significant other and I both use the Virginia square metro frequently to get in and out of dc as we leave above it. We also use the Clarendon. Loosing these stations would be very sad and make our commute very difficult.

This is a disaster for people in this area (CLEVELAND PARK) and for our commercial district. The Cleveland Park metro serves apartment building and homes with many elderly people and working people who rely on the subway. PLEASE RECONSIDER

would rather have less frequent trains than no trains at all at the stations I use.

Absolutely ridiculous idea. Especially if youre considering closing stations on a line THAT HASNT EVEN BEEN COMPLETED YET!

Absolutely not. I moved to Virginia square because of the metro stop and would be devastated. Would not use metro at ballston and metro would lose my business. I think many would feel this way. Ballston pre pandemic was already too crowded and I would honestly move out to fairfax and buy a car if they closed the metro stations in Clarendon and VA Square.

Clarendon is needed station. Closing Virgina Square can work since Ballston is close; however, Courthouse is too far and there are reasons to keep Clarendon open.

I live in DC and work near the College Park station. I dont own a car. This would be a disaster for me.

Closing stations should be the very last option!!! Keep them open, especially East Falls Church!

Please do not close these stations.

During normal times, I don't believe Clarendon has low ridership â€” this should be based on pre-pandemic ridership. I live in Clarendon and use the metro for my work commute. Closing this station will significantly impact my ability to get to and from work.

This is the only way to access my work and the adjacent station is far

I moved to an apartment complex by Grosvenor-strathmore for the sole purpose of being able to walk to the train to commute to AU. Closure would complete negate my reason for living here.

There are massive amounts of riders who join at the McLean Metro and the McLean stop is also a destination for a number of shuttle from nearby office parks. The Tysons stop isnt particularly close to McLean and there are a number of neighborhoods and areas the McLean stop pulls riders from who wouldnt be able to get the Tysons stop.

As long as it doesnt require excessive transfers.

Low ridership is due in large part to covid. When that goes away over the course of 2022 and into 2023, ridership will increase as people go back to work. These stations need to be open for people to use or you risk people no longer viewing metro as a viable transportation option altogether.

This should be off the table. Closing Smithsonian station? Clarendon? Whole communities exist because of these stations (e.g. Mclean/Capital 1).

The Silver line isnt even completed yet and you already want to shut it down? Horrible you are.

Grovesnor has parking and is closest to my house. White flint is a mess and twinbrook too far. If I have that much time to devote, I'll drive. Parking at my office is free.

This would fundamentally change the character of Arlington. I think you should measure how things change after things open up like every other struggling business before making such a drastic decision. Hopefully, funding will be available to push the decision out until then.

Closing grosvenor Strathmore doesnt work. This are depends on metro once vaccines come out. Not to mention the closest station is medical center which does not have a parking lot nor is walkable from around grosvenor Strathmore because Rockville pike does not have a sidewalk for part of that walk

I rely on Grosvenor-Stathmore station for my weekday commute

This would definitely not work for me. If this were to happen, I imagine a lot of people would not even bother taking Metro. I would probably just drive or take an Uber.

I use Cleveland Park

THIS IS UNACCEPTABLE.

This would likely not affect my transportation situation to and from work, but it could affect other situations.

We bought a home near EFC metro so we could walk to the metro. This defeats the purpose of trying to use public transport and we might be forced to drive in to DC, which we don't want to.

Not having these stops would adversely impact many riders

This would close stations vital for my work and school commutes

I live near one of these stations and depend on it to get to school and into the city. I do not own a car. I cannot afford the station to close. I live in this area specifically for the station.

This has to be a joke, right? Virginia square and Clarendon have a TON of traffic. East falls church is not close to another station and is incredibly important to the federal workforce and so many others who commute from the Virginia suburbs to DC every day. And McLean isn't even open yet so how can you know ridership?! This is absolutely ridiculous

Proposal to close 22 Metrorail stations

I can only speak to Grosvenor-Strathmore, but given that the station is linked to a large condo complex and multiple town home complexes, this station is the only means of commuting into the city for residents without cars. The bus system is not reliable enough to connect them to the next closest station.

Archives and Smithsonian and Arlington cemetery should stay since they are near top tourist locations

Would prefer to have options between East and West falls church since no parking at East but all bus lines go there

Closing these neighborhood stops would have a significant negative effect.

I purchased property near a metro station so I can easily use the train to commute to work (which I am still doing through the pandemic). I cannot image if my local station on the list closes down.

Keep Clarendon open, since it serves an important commercial area; Virginia Square is infrequently used, so close it.

No parking available at medical center so this wouldn't be a feasible option to close Grosvenor.

This would work for the stations I use - HOWEVER, if riders are forced to use other orange line stations, such as West Falls Church, there may be issues with overcrowding of stations/trains at the next closest stations. Especially if there are any reductions of trains.

This will hurt ridership even more. Covid will end.

I use the Cleveland Park station regularly -- at least two to three times a week. One of the reasons I bought a condo in this neighborhood was that as a senior having a Metro stop near me was essential. This would be a major inconvenience for hundreds of us.

People need to have access to public transit!

Living next to the East Falls Church metro, I utilize the metro under non-COVID times regularly to access locations not easily replaced by bus service without transfers.

McLean is the station that I use. Needed for Tyson's development

ridership has been low due to the pandemic I am sure, but my office will require us to come into work once this is over. Please do not close these stations.

I live walking distance to East Falls Church and would no longer be able to ride metro if this happened. Also this would kill property values locally and hurt the local economy significantly.

This would be the least preferable outcome. Thank you.

I live at east falls church, and deliberately moved there to be close to a metro station. I share a car with my partner and by 2022, he will need the car for his commute. What am I supposed to do? East falls church is one of the only affordable neighborhoods along the virginia lines right now, and I dont get paid enough to move closer to the city.

You really want to close stations that are brand new? Thats a huge irresponsible waste of taxpayer money.

Eisenhower Ave is the metro station I use frequently when I go into DC, and especially when using the airport. It is a 15-20 minute walk to the king street station and would make travel more laborious for early morning flights, and various trips on the metro. I very much hope that Eisenhower ave station is not closed! It is a big reason why we moved where we did in the first place.

Arlington Cemetery is vital for tourists. I moved to Clarendon in large part because of the Metro: if necessary, close VA Sq or Clarendon, but not both. EFC is a transfer point: dont close.

I oppose the closing of station of Clarendon, East Falls Church and Virginia Square in Arlington. It is a shame that Arlington County supported Metrorail with millions of dollars a year but Metrorail wants to close so many stations on the Rosslyn to East Falls church route.

Both Virginia Square and Clarendon cannot be closed. However, I may agree with closing Virginia Square, given its proximity to both Clarendon and Ballston.

Does this mean that transferring to Silver line has to be done at Virginia Square? I think so? Adds a lot to such trips from Vienna end of Orange line.

We need to encourage ridership, this won't happen if Metro is not convenient.

If we are back to working in person in offices by January 2022, then I would need the Federal Center SW station to get to work.

Grosvenor is my primary station and I intend to resume use upon COVID vaccination. Do not close grosvenor-strathmore

Closing stations is bad.

Most of these make sense, but Clarendon is a mistake (note: this is not my closest station). Clarendon is a hub for shopping, restaurants, etc. which will return to normal operations by fall 2021, and it also has dense housing. This would have a negative impact on commuters, local businesses, and surface traffic.

I don't think all of these need to be closed. Sure ones like Virginia Square that are very close to both clarendon and Ballston could be closed, but also closing clarendon and making Ballston the only stop of those three to be open would surely overcrowd the trains especially during peak hours.

My station is Grosvenor.

Proposal to close 22 Metrorail stations

Please keep Grosvenor-Strathmore open!

Closure of East Falls Church would be difficult (that doesn't seem low ridership given the number of buses, etc. that come through to drop off there). The remainder of the stations would at times be inconvenient but manageable.

I believe it would be better to have less service at all stations than to close any station entirely. I also would rather see fares go up than see stations close.

These areas need Metro. I think if service was better more people will ride in post pandemic days

I walk to East Falls Church station. Using a more distant station would require driving....if I'm driving anyway, why not just skip the train and drive the whole way? Closing stations will further reduce ridership.

Would there be a shuttle or a service to get people to those alternate stations?

I find Clarendon and East Falls Church crucial stations as do many of my work colleagues

Absolutely not-- this does not account that people are just not riding it at the moment due to COVID; by Jan 2022 when most are vaccinated things will be better. This is unacceptable.

Not at all. Grosvenor Strathmore must remain opened to keep me as a rider.

We use the Grosvenor stop

Grosvener-Strathmore station is really important since it's one of the best sources of parking on the outer edges of the red line.

I leave near Clarendon. If you close both Clarendon and Virginia Square, it is a 20-30 minute walk one each direction to get to another station. I understand closing one of them, but not both

Grosvenor services Strathmore, which is both an educational and entertainment venue. It is used throughout the day and well into the evening for performances, rehearsals, classes. The walk from the next nearest station is much too far for seniors such as myself, and for the many people of all ages who access Strathmore via the Metro.

I'm a fed commuter who post covid will be using strathmore

Why are you doing all of the upgrades if you plan to close stations. The metro board and managers should be fired.

You must be some kind of idiot if you think closing Federal Triangle is a good idea. Yeah ridership is down because of covid, but federal employees need to be able to go back to the office eventually

This will send the Metro into a commuting death spiral

Access to College Park is essential

This is the worst proposal for me. I have no car so I walk to East Falls Church to commute into DC for work.

I depend on the metro to go to work and back home. East Falls Church metro should not be closed especially because a lot of commuters take this train into DC. It also enables us to take the Silver Line from this metro station.

Closing East Falls Church would be terrible. As we come out of the pandemic I would hope metro keeps in mind that current conditions are temporary and people will rely on metro weekdays and weekends in the near future. Closing stops down will impact people's lives, the environment, and family outings.

Closing Cleveland Park metro station would impact my family and I greatly.

I currently commute to the McLean station - I would stop using Metrorail if the station was closed.

I use Judiciary Square daily. This would significantly impact my commute.

Please do not close stations--especially on the Orange and Silver Lines! I would rather trains arrive less frequently. The impact to the local economy is already devastating. Please do not make it worse by closing stations and impacting businesses and property values even further!

If you close Grosvenor, I will need to go to a further-out station where the trains run every 30 minutes. The overcrowding would be horrid and the parking lots would be filled. I'd most likely shift to driving to work.

I'm a student at UMD. Taking away this stop would be a huge blow to many UMD students that rely on this metro station to get around. This school is already screwing us over enough and losing the College Park metro station is only going to make our experience right now even worse.

I only dispute one of these closures - Clarendon. I feel like that is a mistake. Courthouse seems like a more logical station to close.

I use Clarendon and Virginia Square stations primarily. Additionally, how do you know the Silver Line Phase 2 stations will be low ridership before they open?

I'd like to see these stations remain in service - Clarendon, Cleveland Park and East Falls Church.

I need EFC to get to work

Proposal to close 22 Metrorail stations

| |
|--|
| I live near Clarendon. There is not another metro that would not add at least 10-15 minutes to my commute. This would be even worse than having cars every 15 minutes, because it would guarantee that I could not commute as quickly as driving, and during the summer, I would be sweaty by the time I got to work. I would stop using the service. (And I cant believe Clarendon has low ridership in normal times. Every time I show up there, there are a good number of people waiting on trains). |
| should not close both clarendon and Virginia square. If you are closing a station choose only 1. Too far of a walk to the next station and therefore the convenience would be eliminated of the metro. |
| My house is the closest to Van Dorn, and this would considerably change my commute. |
| This could impact home values in my community. |
| Downtown stations should be exempt regardless of ridership numbers. |
| This plan is insane and would destroy property values and rental rates in many locations such as Clarendon where people regularly choose to live and not own a car due to metro access. |
| This change would provide no service for Arlington riders who do not live along the Metro corridor and kill the Clarendon commercial district. |
| A lot of people in Virginia will need those metro stops. Virginia square has the GMU campus where students got to school. A lot of people commute via metro to work to Greensboro and Reston. A lot of people park in Reston and commute into DC. With the increase in vaccinations by FY2022, this would reduce people's abilities to get to and from work. |
| How can you close stations that have high volume of traffic and serve areas that were developed specifically for its proximity to a metro station? This plan is simply silly unless you want people move out of DC and use even less the metro and Kill the company forever. |
| I use the Grosvenor Station to go to work, and after the pandemic we will expected to work on site. There is not adequate parking at my workplace; closing the station would be a huge problem. |
| I can walk to the East Falls Church station. This plan would make it very difficult for me to use Metro. |
| Closing the Clarendon and VA Square stations would make the surrounding stations extremely crowded during rush hour. |
| How are people supposed to get to their court dates without the judiciary square stop. |
| Keep College Park open! |
| Is this a permanent or temporary closure? I have no reason to use Metro for the next 6+ months, but things could return to normal if/when we return to Phase 4â€“meaning Metro every day. |
| Closing of these stations could lead to overcrowding at stations if ridership increases in January 2022. Assuming a covid-19 vaccine is widely rolled out by then, daily commuting may resume for most individuals and cause more people to congregate at the stations. |
| I don't have a car and rely on grosvenor Strathmore to get to work and socialize. When it closed from March-June 2020, I felt trapped and couldn't go many places. If this station were to close, my quality of life would decrease and I won't be able to get to work post-pandemic. |
| Virginia Square is the closest station to my residence. I oppose closing it and any other stations. Residents rely on this public transportation infrastructure so it must be funded to provide service to residents. |
| This proposal would be terrible for my family. My husband and I bought a house in Arlington due to it being walking distance to the East Falls Church metro. We both plan to take the metro (me to McLean and him to Reston). If these planned stations were closed we wouldnt take metro at all. Why would we? How would I get to the Ballston Station from my house? How would I get to the McLean station from Tysons? Why did you even build the silver line if you are going to shut down all the stations? |
| Please do not close Grosvenor-Strathmore station!!!! I cant live without it. And many other people depend on it a lot too. |
| More crowded areas. |
| I can understand closing either Virginia Square OR Clarendon, but it does not make sense to close both. |
| Meed to use Grosvenor - Strathmore and ability to park there |
| Fire the station managers!! They let people jump fairs, they sleep, they act put out when you need help. Use the money elsewhere ! |
| 3 of those stations havent even opened yet so you have no idea what ridership is going to be! On top of that, the stations in this proposal are key stations for tourism throughout the region. |
| Need Grovesner-Strathmore |
| My whole family uses Grovesnor Strathmore metro to get to school and work year round. We can walk there from our home but cannot walk to other metro stations |
| How will people get to museums |

| |
|---|
| Proposal to close 22 Metrorail stations |
| live near Grosvenor commonly used |
| I live next to Mt. Vernon Plazas station and routinely take the green line for work, social events, and to visit family. |
| EFC is our main metro station. Ballston is very far as is West Falls Church. If you add more than 15 minutes to people's commutes by eliminating stations that leave people no other walkable option, people will drive/traffic will be horrendous. |
| So many rely on east falls church park and ride, and I use that metro regularly. I also use the smithsonian stop regularly when the museums are open and would plan to once things reopen. It's a huge draw for tourists. |
| closing Clarendon and Va Square would leave a huge gap in stations and make it hard to commute to work via metro. And east falls church is an important station not close to any other stations and closing it would limit ability to use metro. |
| It seems unreasonable to close both Archives and Federal Triangle, especially given the large number of federal employees who use these two stations. As essential workers, weve been required to come to work every day despite the pandemic, so these are possibly two of the most heavily used destination stations for daily commuters. |
| You should be OPENING MORE STATIONS and LINES NOT CLOSING ANY STATIONS! |
| Closing stations does not contribute significantly to budget savings, and is not worth the significant hardship it causes for people who use those stations. If you must consider cutting service, perhaps these stations could be skipped on weekends or during non-rush hours. But during rush hour, even low ridership stations have significant numbers of people using them. I am very familiar with a number of these stations being considered, and they are vital during rush hour. |
| Is this a joke? No to Clarendon and Virginia Square. Those do not have low ridership outside the pandemic and the closures of these stations would destroy these neighborhoods. |
| East falls church, judiciary square need to remain open. |
| Grosvenor should not be closed given the location |
| This would severely impact my commute |
| I use several of these stations and would have added time to my commute if they close. |
| There is a lot of housing built around Grosvenor specifically for commuters. Many of these homeowners do not have cars, Parking is a big issue for metro. Medical center has no parking. Parking in downtown Bethesda garages is very difficult. And no parking will be available if everyone was going to white flint unless many more parking spaces are available. |
| Do NOT close Federal Triangle. |
| Closing Arlington Cemetery means loss of tourist revenue. Where would Van Dorn riders get on metro? |
| Metro should be convenient for folks to travel; not more inconvenient and necessitating an additional bus or longer walk. |
| This would make Metro completely useless to me. And, because of network effects, it would probably start a ridership death spiral that would destroy the system. |
| I use van dorn station |
| This would cause many issues with people who live near these stations, and also add over-crowding to the remaining stations. |
| I bought a place just to be close to the metro at Grosvenor/Strathmore. Plus there are approved plans to build a ton of housing around the metro station. I realize the pandemic changes some stuff, but it would be VERY inconvenient not to have the Grosvenor Strathmore station open |
| I need Greensboro open! Its right at my office and otherwise it will be too hard to get to my office. |
| If you close McLean and EFC, there is no option for me to commute via the Silver Line. If I have to drive to Tysons or Ballston, then I won't be able to use Metro. |
| Need Arlington Cemetery, Smithsonian and Archives |
| This is the worst proposal of them all. Proposal #5 would force so many to move out of the DC area entirely. |
| I often use the ant Vernon Square station to commute to see a friend. |
| I purposely moved to my current apartment so I would be close to a metro stop for commuting to work. I love near one of the above stations that is proposed. This would significantly impact me and many others who rely on the metro for transit |
| Some of these stations are critical to my commute and would impact my Metro usage significantly. I prefer the other options. |
| I live at Clarendon and travel to Ballston. I would have to walk to work when I return to the office, which would be undesirable in the hot summers and snowy winters. |
| Clarendon and Virginia Square are the stations I would use in Jan. 2022. This plan would not work for me unless I could ride a bus to Rosslyn, which is a possibility but would take more time. |
| Close virginia square or clarendon but not both. Clarendon seems the logical choice to remain open with the retail surrounding the station. |

Proposal to close 22 Metrorail stations

| |
|--|
| I work near Federal Center SW and also use East Falls Church regularly - there are quite a few in Arlington that would make metro travel MUCH more inconvenient if we wanted to travel into the city. |
| Although I normally use Virginia square I can easily get to ballston, I usually did not use it though because it is so busy and cost more |
| While it would be sad for strathmore station to close its better than 30 minute waits |
| You are going to close existing stations while opening new ones on the Silver line? Are you serious? |
| I work in Clarendon so this Metro station is important for me and my colleagues not just to get to and from work, but also to meetings in DC, the Pentagon, etc. Before the pandemic Clarendon was also very busy in the evenings as there are many restaurants in the area. |
| I use Grovener-Strathmore station a lot and it is NOT walking distance to another station |
| This is a huge amount of closures and would substantially impact the utility of the metro. Ive already felt like some stations were very far apart in comparison to other public transit systems Ive used, and this would absolutely make the DC metro worse. Furthermore, I am concerned about how this would impact the commute times of those who typically use those stops. Horrible plan. |
| I know people who take Metro to get to concerts at Strathmore. This would force them to drive or use other means to get there and home. |
| The College Park station serves residents of the city (population: 32,000) and the more than 54,000 students, faculty, and staff at the University of Marylands flagship campus. |
| This is the worst proposal |
| How can you close two adjacent stations (Clarendon and VA Square)? At least alternate closed stations. |
| Absolutely not. As an East Falls Church rider I would strongly disagree that there is a station close to us. Getting to either WFC or Ballston is very difficult on public transit, to then ride the Metro. This is the absolute least appealing option. |
| I expect to need daily travel to / from the McLean station on weekdays. |
| With Smithsonian and Federal Triangle closed, anyone going to the Mall would have a long walk. But that wouldnt be a problem if there arent tourists because the museums are closed. |
| Many Cheverly residents depend on Cheverly Metro Station., including many like my family who share one car. Please reconsider this. We can work with less frequent trains, later opening, earlier closing, etc..., but please keep the trains in service during peak hours, especially week day. |
| Going to an alternative metro stop would add significant time to my commute |
| This is a terrible idea. |
| No, walking to the College Park station is the only form of transportation I have to get to work. |
| The stations are there. Use them! Tourists will come back then Arlington Cemetery needed. Distance between Court House and Ballston too far. Dont like this proposal. |
| Like many, I depend on the Cleveland Park metro station. |
| In January 2022 ridership will hopefully have increased as offices are open and people are vaccinated. At that point you want to give options for public transit. |
| East Falls Church is not in walking distance of another station. Please do not close East Falls Church. |
| some i think are okay to close but not others. east falls church and clarendon are still useful to me |
| Clarendon historically was a busy station and was/is an important part of why Clarendon was so walkable. |
| The Clarendon Station is very important to keep due to the density of multi-family housing and popular businesses/stores in the area. |
| Virginia Square supports both George Mason and the FDIC. I use the metro for both. |
| Grosvenor-Strathmore station is very very very crucial to my daily commute. Closure of this station would have a missive impact on my lifestyle and cost of living. |
| The closures at Grosvenor would make it difficult for half of my office to get to work. |
| Many people board the train at Grosvenor, including bus passengers. |
| Public Transportation in DC would be made extremely time-consuming and difficult, especially for people without any other transportation options, and for many, it would make the metro so inconvenient it wouldnt be worth using. |
| Need access to college park |
| I am a regular user of the East Falls Church station and would be forced to relocate if it were closed. |
| This will mean I can no longer walk to the metro. Why are you opening new lines if you cant take care of the ones you have????? |
| Please keep Grosvenor open |

Proposal to close 22 Metrorail stations

More, not fewer, stations would be better.

We live in the Clarendon-VA Square area and commute to the District. Closing both of these stations would require that we sell our house and move into an apartment or condo in the District, at significant financial loss. This would be a disastrous move by Metro. It would also seriously impact the value of our house, since proximity to these stations is a core component of value.

Do not close Clarendon!

In particular, I live at the Grosvenor stop -- closing this would mean I'd be forced to reconsider my residence. Closing stations is an absolutely horrible option, though I understand the need to increase public support for transit and will always support that.

I live near East Falls Church and would no longer be able to use metro for commuting to my job.

As I wrote, I'd rather you increase the pricing than decrease stations of trains.

More frequent trains when more people ride and when getting to/from station is more difficult (traffic), as well as when schools are operating, is more equitable.

The entire reason many University of Maryland students attend the school is because of the local metro stop to DC

Honestly, this seems like a WMATA political ploy to me. You would NEVER close the Cemetery station. Also, closing Clarendon I'm sure you know is a non-starter. Pretty disingenuous.

I use the East Falls Church Metro Station. I walk to this station and cannot walk to any other.

There is no service anywhere near Van Dorn, and cutting this station would result in having to extend my commute significantly or, more likely, stop using metro all together.

Closing these stations would greatly harm people's ability to travel to Clarendon and DC, for nightlife/restaurants and for work. This should be the last possible option as it could have grave economic impacts for bars, stores, and restaurants all over the area that are already struggling. This would also essentially eliminate the use for a metro line as everyone would be forced to buy cars or move away.

I live near Grosvenor Metro - it is vital for me that that station remain open. Other options (White Flint and Medical Center) are much farther away and not realistic.

If this were implemented, I would not take metro any more since I would have to drive to a station vs walking so might as well drive to work.

The College Park station should not be closed. Many people, including myself, rely on that station for transportation. Greenbelt and PG Plaza are not close enough to compensate for the loss of College Park. It would be a terrible idea to close it, especially given that it is the nearest station to UMD.

But it sure won't fit my former work place that moved to Eisenhower because it existed

Closing stations would really be the beginning of the end. I would urge Metro to avoid this, and take one or more of the other steps you're proposing.

Metro should have closed the stations DURING the pandemic when ridership was low, not now when it will quickly ramp up once everyone is vaccinated. This is such a bad plan! Metro just finished renovating the East Falls Church Station in 2020- why would they now close it? SO many people use that station, it is not near enough to ANY others. We bought our home nearby so we could commute by metro and also because we strongly believe in public transit. If you close this station, everyone in the entire surrounding community will be left without metro - and our property values will also plummet. We paid more to be near metro - to now take it away without warning is unacceptable! We use it, we need it - please do NOT close the East Falls Church Metro Station - it contradicts everything we've heard and practiced for years about the value and need for transit based development and transit based living!

Morgan Blvd station is greatly needed. A lot that live in the community rely heavily on this station to get to and from work. Morgan Blvd metro station is the reason I moved to the area.

Closure of College Park metro would force me in finding another transport alternative! Also the decline in ridership can be majorly attributed to the construction of purple line going on for over a year

Don't close both Va Sq and Clarendon - keep Clarendon open.

In any event, don't close BOTH Virginia Square and Clarendon. Closing of Clarendon station would have a negative effect on local businesses and the growing number of residents in the increasing number of apartments and condos in the area.

I specifically chose to live near a metro line to ease my commute to work and reduce car dependence. Closing these stations would significantly impact my commuting time and cost, as well as over quality of life.

Closing both Virginia Square and Clarendon would put me more than a mile from the nearest station, and those stations have no parking facilities.

very bad idea

Proposal to close 22 Metrorail stations

| |
|---|
| I live right next to the Grosvenor-Strathmore station, and will be using the Metro for my daily commute to work in 2022. The proximity to the metro was a major reason for my choice of housing. |
| This is a huge problem... so many residents have made housing choices to be within walking distance of Metro. Saying the potential closures are near other stations in this question isnt accurate when were talking about miles of distance in many instances. |
| 2022 will be back to full use |
| I take trains from Grovesnor to work |
| Some of these are essential for commuters and wild make getting to the heart of downtown much longer and harder. |
| Closures at East Falls Church and Virginia Square may impact me. Closure of McLean would impact someone in my household. |
| I oppose closing the College Park station. |
| People live near these stations and need to get from place to place. And Clarendon is one of the busiest VA stations. Why would you even consider this nonsense? |
| We need expansion, not reduction. These plans are not great |
| Grosvenor-Strathmore is a vital metro station. |
| i caught them train |
| No other way to get to Arlington Cemetery, no metro close by. I also use the metro for Eisenhower and Smithsonian, so both would cause me to abandon the metro all together. |
| Why not close those stations now when no one is riding the Metro and reopen when the pandemic eases?? |
| Do not close any stations. Find other savings. That is not why we spent millions building those stations. |
| I live in Clarendon and use it quite often. If you get rid of it I will have to far to walk home and I am seventy-one years of age. |
| Grosvenor is the closest station with parking. Closing this station would have impacts beyond changes in timing of trains. This would be horribly negative for the community. Please do not close grosvenor! |
| its ridiculous to judge ridership during a pandemic. The closing of College Park would impact students of U of MD who dont drive. Additionally, parking has become more restricted at U of MD making the use of public transportation even more necessary |
| We don't own a car because we purchased a condo in Arlington. This would have a significant impact on our ability to commute, shop, visit other parts of the region, etc. |
| i have no way to get to another station i walk to metro |
| I would much prefer lengthier time between trains rather than closing any station including Grosvenor. |
| I hope that instead of closing stations, you couldn't stand increase intervals between trains as mentioned above |
| You built them, use them. |
| These stations are necessary. |
| I would be unable to use the Metro to commute or for any other purpose. In addition, this would seriously reduce the value of my house which would not only be a loss to me but also to Arlington County in loss property taxes. In addition, shutting Clarendon Metro would eviscerate the Clarendon areas businesses and, again, reduce tax revenues from those businesses. |
| How much does it really save to close a station -- especially stations with paid parking lots? I can walk to EFC but others are too far from my home. Metro must make riding the train more convenient than driving my POV |
| Oh please no! Grosvenor-Strathmore is just barely walking distance from Kensington and if that goes, we will have nothing walkable at all. Please don't don't this. |
| This would make me NEVER use Metro again since the closest stations to me would be closed. |
| With the every 30 minute proposal, one way to combat that would be to take East Falls Church where Orange and Silver do both service the station, except for if East Falls Church is closed. |
| This is an unacceptable approach to low ridership at these stops. People must still have all of the metro stops accessible to them; otherwise they will incur increased time and costs of travelling to the other stops nearby - when in reality, that distance makes a big difference in terms of everyones commute. Less people will choose to ride Metro if it means increased costs to get to stations that arent closest to them or additional time because they have to cross major roadways and traffic intersections to go to the other stops that actually are in service. |
| It would be better to work with local governments to develop a ride metro program to get ridership back up. |
| Our company has apartments near 3 of these metro stops - closing them would have a massive negative impact on our small business. |

| |
|---|
| Proposal to close 22 Metrorail stations |
| Do not close East Falls Church please. |
| Just close Arlington cemetery already. I should not be open during rush hour normally. |
| If this makes Ballston metro incredibly crowded, this would make metro travel incredibly difficult. It would make commuting frustrating and possibly make me telework more frequently. |
| keep Grosvenor open |
| While I dont utilize all of these stations, it is very helpful to have multiple stations service an area to cut down on foot travel. I moved to the DC area because it had a more robust metro system and this would defeat that purpose. |
| No stations should be closed given the prior investments made by Metro and property owners near stations. |
| I use VA square, but Ballston is reasonably close so this is an acceptable sacrifice to make. People who live between Clarendon and VA square would have a long distance to travel. If possible, close VA Sq only but keep Clarendon open. |
| Cleveland Park is my closest metro station and I depend on the metro to get to work, this would significantly increase my travel time and pose a large inconvenience. |
| Where is the next station close to Grosvenor Strathmore?! The next one is a 5-10 minute DRIVE. Some people that live near the Grosvenor Place condominium require the metro station to get to work. Especially if they dont own a car. |
| This would mean that my disabled husband and I would not have access to a nearby Metro station. It also would eliminate most of the stops we use to get somewhere. This would not work for us at all. |
| Many of the stations listed are integral to getting around and cater to areas where public transportation is required |
| McLean is a heavy commuter station, Capital Ones expanding campus and improvements like a performing arts center need the ability to get there easily by public transportation. Closing the McLean station would cause a lot more congestion for the expanded offices around the campus |
| East Falls church would be a concern, but some of these would be ok. Maybe take a poll. This will also hurt home prices and economy of the area. |
| I was hoping to utilize phase 11 openings on the silver line |
| Closing stations is outrageous, especially on the silver line |
| Frequently use Grosvenor-Strathmore Metro Station |
| East Falls church is exceptionally busy, plus it is a transfer point to the silver line. Would limit my options for both getting to and coming home from work. The station is so crowded, you cant even find parking; the plan to close it makes absolutely zero sense and I am STRONGLY opposed. W. Falls Church is not an acceptable alternative (no silver line train getting out of the city) -- adds at least 20 minutes to the commute and Ballston is equally unacceptable because of lack of parking near the metro. STRONGLY OPPOSE!!! |
| This is a serious obstacle to travel |
| Closure of east falls church would be problematic as students use it to access a nearby high school. |
| East Falls Church station does not have any other walkable alternatives |
| Would kill businesses. |
| This would be very short sighted to eliminate many of these stations. Major development for a small community center is set for Grosvenor Strathmore in the near future. Why would the metro close and cripple access for the community? |
| Loudoun Gateway is critical to my ability to return to WMATA. Before the pandemic, I was a daily rider from Braddock Road to Farragut West. During the pandemic, I moved to Ashburn, choosing my location in part because a Metrorail station would be opening in the near term. WMATA Metrorail service at Loudon Gateway, which is not near any other stations, is critical to my ability to continue using Metrorail and returning to work. |
| I depend on Grosvenor station to get to work |
| I would hope ridership, density and transit options to the stations in question would be considered. Thinking of density and transit options, I would suggest Reston Town Center remain in service. Generally though, I like this line of attack, both for cost savings and to shorten some rides by making fewer stops. |
| I use the Grosvenor station. there are a lot of large apartment and condos here. It would have a huge impact on all the residents of this area. |
| Im at East Falls Church and during non-pandemic times, rely on Metro to get around downtown. I thought this was a transfer hub for the Silver Line out to Tysons and Dulles. |
| Closing stations will further limit usability of transit as a commute option further reducing ridership. |
| Wrong to close these stations. These stations are in place, and should be used |

Proposal to close 22 Metrorail stations

I live on top of the Cleveland Park station that is slated for closure and cant walk well enough to use either Van Ness or Woodley Park. They are too far away. Also, DC is changing zoning rules based on the existence of a station that is slated for closure.

It surprises me that some of these stations have low ridership given their proximity to tourism, places of work and homes

PLEASE DO NOT CLOSE GROSVENOR-STRATHMORE!!!!!! Also closing College Park metro seems like a terrible idea. PLEASE DO NOT CLOSE FEDERAL TRAIANGLE. Why not just close Metro Center or Union Station? This is a horrible idea.

Stations not within walking distance of another stop or near higher population density and apartment buildings (e.g., Grosvenor) should not be put into the same bucket as Arlington Cemetery.

Opening the Reston Town Center station only (vs all Phase 2 Silver Line stations) would tap into a pre-existing high density ridership market

Anything that impacts the orange line and silver line would be a negative not only for me but for thousands of people that live in the area. During the pandemic, ridership is low because of the obvious reasons. However, once we are on the other side of the pandemic, I do believe ridership will return to normal. To make changes now based on pandemic ridership would be a mistake.

I have not taken the metro to work since the summer of 2020 due to the pandemic, but I plan to return to the office in the summer of 2021. I rely on the metro from East Falls Church to get to work.

I often use Grosvenor-Strathmore. I

I believe clarendon is close enough to va Sq and courthouse that its not a huge inconvenience to clarendon riders. They can walk an extra 4 minutes.

McLean is the only station close enough to use to get to work each day, which is my intended primary usage of the Metro. Similarly, Clarendon is the station nearest where I live, and is of similar importance to my daily commute.

At that point, I would no longer ride metro and simply uber.

this will eliminate my use of the Metro

Closing stations it the most disruptive thing metro can do. I also don't see how you close without a plan to reopen and not loose a substantial portion of business

This would technically work but it would be pretty inconvenient.

Need East Falls Church to remain open

Ha ones needed

The Cleveland Park Station is proximate to two grocery stores, a Target, a large CVS, 7-11 and a veterinary clinic, among other essential services. It is also an important junction with cross-town buslines and the metro. Closing this station would negatively impact those little for these essential services in this part of northwest.

If Grosvenor were closed, I would have to go to White Flint. This would raise my costs and take more time. I would give up riding Metro and drive

There is a large residential community near Grosvenor Strathmore that walks to the station. This would cause an unnecessary use of multiple vehicles, which is contrary to what public transportation s trying to improve

I live very close to the Cleveland Park station and itd significantly impact my commute to downtown Washington.

What the fuck will be open?

Innovation Center and other Silver Line trains are needed for increased population at these stops due to new apartment buildings being built in these locations with population using metro to get to work and the airport. We NEED these stations to be operable.

I am a federal employee who commutes from Cheverly to Federal Center, SW. Closing both of my metro stations would create a huge hardship for me. I would be able to walk to work from LEnfant Plaza, but closing Cheverly altogether would make it impossible for me to get to work. I am unable to park at my office, and I would have no way to get home in the evenings. I ask that you please reconsider closing the Cheverly station as I know so many of my neighbors would not be able to get to and from work otherwise.

I would probably use Ballston instead of Virginia Square even though it would be slightly less convenient.

I commute to the McLean station, and the Tysons station does not meet my needs. Travel from Tysons to the Mclean stop includes walking along 8 lane + roads without adequate pedestrian options. This would be reckless on part of the metro system. My experience with Metro shuttles (presumably what would replace the actual stop) has been abysmal, in terms of crowding, timeliness, and many other pieces

East Falls Church is one of my primary stations. I do not consider it to be close to either Ballston or West Falls Church.

too many stations listed to understand the impact. Generally I am against closing any station

How could Mt Vernon Sq be closed when that is one of the station that is being proposed as the end of the Yellow Line?

Proposal to close 22 Metrorail stations

This makes sense as of right now but I foresee this imploding on itself when people are trying to go downtown for work come 2022.

there are so many closures listed here on the orange line - how is this even possible? One - we are expected to ride the metro so that traffic is not impacted, then they push tolls on 66 if there is no HOA ridership - how do you expect this to be helpful? McLean is a growing / emerging area for a lot of businesses - they are moving into this corridor on the orange line - it should NOT be impacted. Clearly, ridership won't increase until COVID goes away, so to prematurely have these closures is a huge negative.

I live near Grosvenor and would not have metro access. It will also vastly impact many people who do not have a car.

How would people get to the more popular Museums on the Mall if you close Smithsonian or Federal Triangle?

I require use of the Archives station to travel to my place of work. Without MetroRail, I would need to pay \$16 minimum in parking for one day of garage parking to drive to work.

I only use metro because it gets me very close to where I'm going (federal triangle, mount vernon sq, Smithsonian, Clarendon)

Stations should not be closed. Access needs to be maintained at all times.

This is appalling. Why even have a metro? This eviscerates the entire system. I am especially alarmed and confused by why both Clarendon and VA square would be closed. Clarendon is used heavily both for commuting on weekdays, for eating/barhopping at night, and for shopping. You would destroy the area economically and encourage more driving, especially drunk driving by people who can no longer easily metro to the area. These neighborhoods were designed around the metro stops. You also would create unworkably long walks/connections to the other stations. This is just bizarre.

MUCH prefer reduced hours or less frequent trains to longer walks to locations near these closed stops. what stop is near McLean or Grosvenor or Clarendon?

It would be a major loss to the arts if EFC to Smithsonian closes

I anticipate using Metro more once my workplace reopens fully and Archives is the stop I would use.

Unsure if closing Loudoun Gateway and Reston would affect me.

I commute to Federal Triangle but could use Metro Center instead. I recommend NOT closing both Federal Triangle and Smithsonian.

I live walking distance to East Falls Church and this is the station I use.

The Reston Town Center station would likely have more riders than White because there are many more residences in the area.

Closing Clarendon and Virginia Square would inconvenience many people

While the Metro stations are full of homeless and I would like for that to end in my neighborhood, closing these Metro stations will make traffic a complete nightmare - and burden many that cannot afford to drive in to work or only have one car per family household

Do not close East Falls Church.

Grosvenor stop critical to my commute.

The College Park Metro station is needed for UMD students and government workers that commute.

It would cut off my station nearest to work. I work at dol and archives is mine

We use the grosvenor station frequently

I live very close to VA Sq, so this absolutely does not work for me, and it will negatively affect my property value

Given parking situations and driving to alternate stations, I would be severely impacted by this to the point that I might give up metro and drive instead.

I work at federal triangle so this would affect my commute to work negatively.

too many of these are high ridership even if close together. how much does it save to close one station? just the station agent and lights? not worth it.

Grosvenor has the largest parking lot in this area, which is usually full by 10am. The other nearby metro stations don't have adequate parking to take on those of us who go to Grosvenor. Once everyone returns to the office, Grosvenor will be busy again. If the trains stop there anyway to turn around, why can't passengers board there?

I work two blocks from the federal triangle station. A large proportion of my office building is back full-time, and it appears that our agency will cease paying for employee parking after March 31, 2021. I would expect that many employees, myself included, would solely rely on metro for commuting at that point. My alternative station would be Metro Center, which is doable but definitely further.

I use the East Falls Church, McLean, Virginia Square metro during the year. Closing those stations would be extremely inconvenient for the commute.

Closure of Greensboro and McLean both might not be helpful. Keeping Greensboro is very helpful as multiple businesses are next to the station making commuting much easier.

Grosvenor is the most convenient station and there is limited parking in the nearby stations. Plus, Metro just spent a fortune expanding the garage there.

I use the Cleveland Park station daily. This closure would create a significant hardship for residents who would be much farther from the Van Ness and Woodley Park stations. This would also have a very negative impact on the businesses near the Cleveland Park station.

| |
|---|
| Proposal to close 22 Metrorail stations |
| having to walk further in hot weather to get to metro would be a huge pain. |
| closing stations near other stations only works if you can travel to the next nearest station on foot. this would not be the case for east falls church or any stops west of that including mclean. |
| It isn't right to close two contiguous stations, such as Clarendon AND Virginia Square. Since Ballston would be kept open, close Virginia Square only. The same applies to Federal Triangle AND Smithsonian. If I had visitors who wanted to go to the Mall, I would not take Metro if both of those stations were closed. |
| I get on at Reston. If the Herndon station is open, this is fine. |
| EFC and Clarendon are my home-work stops. If they go away, I'd just start driving. |
| Clarendon or courthouse should remain open and both should open once pandemic is over |
| I have limited mobility and specifically chose to live near a metro station that would allow me to preserve my quality of life. Closing these stations would significantly adversely impact me. |
| Cleveland park - easier to walk downhill w stroller to zoo v uphill at Adam's MorganGrosvenor - important bc parking available and not have to drive downtown Smithsonian - best for getting to USDA and or walking to water front |
| As the future hub of the Purple Line and a MARC station, it is ridiculous to close the College Park station. It is NOT close to either PG or Greenbelt stations, practically speaking. And with the student population returning to campus in 2022, this isolates a college campus unnecessarily and throttles the College Park economy, which has expanded to provide residential housing dependent on the proximity to the College Park station. |
| I do not travel to these stations. |
| My commuting stops are EFC and FW SW so these proposed closures would negatively impact my commute. |
| Closing Cleveland Park adds two additional stops to my commute and Tenleytown cannot accommodate free street parking in the same way |
| I regularly use College Park and Mt Vernon Square. |
| Arlington Cemetery and Smithsonian important for tourism. Clarendon neighborhood built up around metro access and restaurants and housing are dependent on it. |
| I live and use the Cleveland Park metro station everyday and moved to this neighborhood for its availability. It is a mile to the next station. |
| absolutely ridiculous |
| I've used the Grosvenor Strathmore station for over 20 years. I couldn't imagine it being closed. It is such an integral part of our neighborhood and our commutes |
| Terrible |
| Clarendon And Virginia Square are the only stations within reasonable walking distance from my house. Please do not close them! |
| I live in McLean and don't have a car. There is really no nearby station to use, tysons is not accessible without a car. Also this seems to close a lot of really major stations like Smithsonian's and federal triangle for no reason. |
| This seems crazy. It would impact major tourist and business destinations and completely upend years of planning in many communities (such as the Orange line and the huge numbers who rely on it to live and work). |
| Grosvenor-Strathmore was, pre-pandemic, a busy station during rush hour. I assume that would continue post-pandemic. Moreover, you have just spent a lot of money (and caused considerable inconvenience) building extra parking spaces at Grosvenor-Strathmore. Mothballing the station would also have an adverse effect on the Strathmore Music Center, which already has enough problems. I fail to see how mothballing Grosvenor-Strathmore solves your budgetary problems, and it will certainly create other problems. Please don't do this. (And why on earth would you close the Smithsonian station?) |
| Please reopen east falls church |
| Horrible proposal. |
| I expect to use the Virginia Square station regularly |
| Someone should resign for even proposing this. You are a criminal cartel that is stealing from taxpayers and the public transit system. |
| Closing the east falls church metro would significantly impact my ability to commute. There are no real viable alternatives, except buses and I don't believe the bus system could accommodate all the metro riders at East Falls Church |
| Keep Grosvenor open and running regular schedule. |
| This is laughable. Even creating these survey questions should be a firing offense. |
| At worst, close either clarendon or va square, but not both Smithsonian is so busy whenever I'm there it should stay open |

Proposal to close 22 Metrorail stations

Ridership is down because of the pandemic. Once things open up there will be a surge. East Falls church has just had a fortune in renovation. Why would you close it after all that expenditure?

I rely on metro for commuting

I use East Falls Church.

I live near Grosvenor and prefer it to Shite Glint. Parking is easier and the station is nicer.

The closest station for my work commute is Smithsonian. My elderly father relies on Virginia Square metro station for travel into and out of the city. The value of his condo depends in part on metro access.

My work (~900 people) is relocating from Crystal City to Federal Triangle around January, 2022. Please dont close Federal Triangle!

Some of these stations were just built at huge expense! As someone who lives near East Falls Church, I may not ride it everyday now, but it's an important part of how I get into the city.

I dont understand why we would be closing metro stations when the need to reduce car riders in relation to climate change needs to be drastically reduced.

College Park station is important to my campus and important for making us connected to DC as a school.

East Falls church is the station I use. I am a mile from this station . Any other station would increase cost and length of commute considerably

Dont understand why youd close Smithsonian.

Metro recently spent a lot of money at East Falls Church Metro station. Why close it now? No other station is walkable to EFC. Pre-pandemic it had many passengers.

Even if low ridership the best feature of metro is the different areas that can go to

We were promised that East Falls Church would be a neighborhood station. Ballston is not that close for many people. Many elderly people rely on the EAsT Falls Church station for transportation

one reason i moved to where i am is the metro station. if closed that would not only inconvenience many people but would also unfairly effect property values

THIS is a bad idea for so many reasons. One of those reasons is that many of the stations that were mentioned have parking! And commuters from the suburbs - which are a huge part of ridership - need those lots to be able to to be able to use the metro

100's Commuters rely on Cleveland Park Metro daily when businesses are open. Restaurants rely on traffic. Metro has not maintained the CP stopâ€”long before COViD. Proper maintenance would also improve ridership. Failure to operate CP would be neglecting a significant portion of Federal Employees.

Living on the Red line, we see how busy both White Flint and Grosvenor stations are in normal times (and how crowded their parking garages are). And there is increased development coming to the White Flint area. We cannot fathom how all that traffic could be handled by only White Flint station.

I live near the Reston Town Center and one of the primary features is the metro. Closing it would make commuting outside of this area inconvenient and undesirable due to road traffic.

Clarendon metro station absolutely cannot be closed. It is a key station providing access to the entire Wilson Blvd corridor. The other nearby stations are already crowded, and this would negatively impact both businesses and residents living in all areas of Arlington. Please DO NOT close Clarendon metro station.

terrible idea to close entire stations especially in NOVA where other stations are not in walkable areas

This plan would disrupt my ability to travel throughout the metro area effectively.

Terrible idea to close stations. If I have to get in the car to drive to another station then I will just skip Metro and drive the whole trip in my car.

I regularly use the College park station, which is usually full in normal times. As a disabled person, the long walk from even the handicapped parking spots of Greenbelt to the station is prohibitive, when its possible to get from the College Park covered parking lot to the station in just a few steps. Greenbelt station is extremely unfriendly for those of us with disabilities.

Even though some of these stations are near each other ex Federal Center SW to Lefant Plaza it will lead to severe overcrowding.

Grosvenor needs to stay open

Very poor idea. This goes against all we know about decreasing auto pollution.

Closing Clarendon and East Falls church would be a hardship.

Clarendon and VA Sq are in sequence - you cant close both. Plus GMU is expanding its campus and is closer to VA Square. Arlington pays a great deal of \$ to Metro and our main usage are the Metro stations.

We need to keep everything as is.....

Proposal to close 22 Metrorail stations

This puts too large of a gap between operating stations. I am renting next to one of those stations primarily due to ease of access.

Please do not close Clarendon station. The other closest stations are too far away and do not adequately serve the public transportation needs of the residents in the Clarendon area. Thank you.

My workplace is between federal triangle, archives, and Smithsonian. If ALL 3 Are closed, it's a VERY long walk, or wait for another bus.

How would Metro serve the Strathmore Music Hall patrons as well as the 20-plus communities to the west of the station? This proposal will cost Metro more than keeping than station open. Of course, the neighboring communities will suffer greatly as will those who work nearby. Tis is a non-starter. That said, believe Metro should be fully funded.

Clarendon metro is really needed

I can walk to grosvenir station. Closing it would increase my costs and travel time

Am certain you would not close College Park, does not belong on this list.

Seems as if closing both Clarendon and Virginia Square would be a long, densely populated swath of Arlington without a station. I could see closing VA SQ and leaving Clarendon open.

You would be closing two stations near me that have been crowded in the past and likely would be again when offices reopen in 2022. Keep Virginia Square and Clarendon stations open.

Having zero access to my station would be a huge problem. By next year I will be going back to normal hours in person and this would dramatically increase my commute time.

You are seriously considering closing Clarendon station??? WTF?? Do you realize how many people rely on this station? There are many small businesses in the area that rely on being close to the metro so they can stay in business. I have lived here for 25 years and can't imagine what will happen if you shut this station down! The reason there is low ridership is because of the pandemic and many people working from home. As an alternative, must charge more \$ per ride.

I regularly use Clarendon.

Would no longer use metro if this proposal is adopted

Having access to nearby Metro Stations is very important for my use of the Metro system. This is true not only for my residence, but also for other stations I occasionally use during the day.

Weve been waiting a long time for the Reston Town Center station. With all the new condos and apartments under construction it will certainly be needed.

For people that rely on their proximity to their metro station (e.g mobility impaired), closing stations altogether will disproportionately affect them. Metro Access is not a suitable substitute, and in the long run could be more expensive for Metro. Metro has not made the case on how it will continue to support these groups with this closure plan.

closing down all these stations, especially clarendon, falls church and Virginia square, will make it more challenging to ride during rush hours due to large congregations of people. Trains would be packed, potentially resulting in having to wait for another train.

This would effectively kill Metro by driving ridership away from the system. People have many more transit options, like Uber, Lyft, bike and scooter share programs among others, and making the Metro system less accessible and convenient is a terrible miscalculation. Strongly oppose.

Closing the Cleveland Park station would mean an additional 30 minutes to my commute to get to a different station. I would be willing to pay more in fares to keep all the stations open.

Closing Grosvenor-Strathmore would make it much harder to go downtown just when hopefully ridership will increase because people will feel more more comfortable being on public transportation.

The university of maryland plans to resume face to face instruction in fall. Service to college park must resume in august

Unacceptable. These stations are important and are not close to other stops

It would be a travesty to close the Clarendon metro. This is the main source of transportation for thousands in the neighborhood.

No- this closes off so many highly valuable stops. I (like thousands of others in the city) work in McLean and would rely on the metro.

I rely on the Grosvenor strath more station to commute and would likely not use the metro system much or at all if this station closed.

Let housing developments continue at Grosvenor like they did at White flint (eg pike and rose). Also new developments near Montgomery mall such at Erickson at Bethesda and more living units at the mall itself.

Many of these stations are either major commuter destinations (i.e., Grovesnor) or work centers (i.e., Federal Triangle) and closing will significantly lengthen and slow down commutes either walking downtown or driving to more distant stations with commuter lots

No. I live in Cleveland Park. There is absolutely no reason to closest metro. I work downtown and ride this station regularly during non-Covid times. And I also go into Virginia.

Proposal to close 22 Metrorail stations

They are not really that close to each other. If you want to hurt metro ridership even more, just make it harder to use it and a more frustrating experience. Cutting back has never been a good strategy to grow a business - nor is it a good long-term plan for Metro. As a CEO for decades, I think you are nuts to do these cutbacks.

I use the Grosvenor Strathmore station daily as my means of transportation to and from work at Lenfant Plaza. Closure of this station would affect me and others in the area greatly.

Close to seems to be very relative here.

No!!! I depend on the Cheverly Station and it increases my quality of life. Don't close any!!!

So again those that commute to work get fucked. Let's make traffic great again in the DC area!

Clarendon and Virginia Square are consecutive stops. Eliminating both would create a relatively large gap compared to current service. It would be much easier to adjust if only one were to close and the other were to remain open.

Please keep Clarendon open! It is such a vibrant area and so many residents. Thanks for your consideration.

Closing stations should be a last resort option after every other option has been exhausted. Closing stations will be very disruptive to neighborhoods.

Not using metro to go downtown isn't feasible. Too much traffic, hard to find parking etc

Virginia Square is my stop. This would not work for me

Grosvenor-Strathmore is the station that I use primarily. If it is closed, I will not be using metro at all.

How was this list arrived at? Some stations make sense, but College Park and East Falls Church are more than 30 min walking from each other.

This would close the nearest station for me and many others in my neighborhood that use metro forcing them to drive.

I need the Grosvenor-Strathmore Station to commute downtown to work.

Eisenhower Ave is really far from the closest station for some people

This would be very problematic. In addition to making it extremely difficult to make it back and forth to the city from Grosvenor at times needed, it would significantly impact property values.

Why would you close stations that people rely on, that we taxpayers paid literally millions to build and bought our houses because of proximity to those stations.

I use many of these metro stations, especially in my expected travel needs for January 2022.

Not all those stations, that's ridiculous. You would close Judiciary Square, where people need to go to court, especially the disabled? Some Silver Line stations could be closed or bus service provided instead (Arlington Cemetery)

I frequently board trains at Grosvenor-Strathmore and that station has parking.

I cannot use metro without Grosvenor Strathmore station open.

This would work fine for some of the downtown stations, but not for stations that are further out. If you can't walk between metro stations, then it should not be closed.

Need College Park, Grovesnor to stay open

How does this plan incorporate the Purple Line, if needed

The metro station in College Park is SO important for UMD students to get to DC for internships and tourism! It absolutely needs to stay open! It also has a parking lot, which a lot of stations don't.

You can't close stations. People make living decisions based on proximity to these stations (not only renting but also purchasing homes) and this will cause immediate hardship on people's schedules but will also create lasting economic effects on the areas surrounding these stations.

The Grosvenor station is situated in an area with a high population density. It would negatively impact Strathmore (the venue). I don't know about the other stations.

Closing the McLean station when offices open up is crazy - there's a ton in that area and now more with the Wegman's, and it's not particularly walkable from other stations

Grosvenor-Strathmore station is critical and should stay open

East Falls Church has heavy ridership in non-COVID times, so this would be a mistake.

The Clarendon metro station services numerous stores and restaurants in the downtown area and is crucial to their survival. If Virginia Square is shutting down, I don't see the need to shut down Clarendon as well.

A closure of the East Falls Church metro stop would require myself and many neighbors to purchase vehicles to either commute to another metro stop or all the way to work. This does not appear to be a workable solution for many. This has the potential to severely weaken the appeal of living in many Arlington area neighborhoods if they are no longer within walking distance to a metro stop (Clarendon, East Falls Church, Virginia Square) and also result in increased traffic on an already crowded 66 or increased traffic in surface neighborhood roads increasing safety concerns for families and children.

Proposal to close 22 Metrorail stations

The Loudoun stations haven't even been given a chance yet. There would be significantly greater riders along the silver line if there was parking! IE, McLean

I use the clarendon, virginia square, reston town center, loudound gateway, falls chruch, and arlington cemetary stations

This is idiotic. At that point just shut down the whole system.

Save money by stopping all current and former WAMATA employees from riding for free or with a discount. USPS does not give discounts to employees on stamps ...

East Falls Church station is not close enough to its surrounding stations to allow residents who walk to East Falls Church to get to one of the other stations without driving. It would be a significant inconvenience to the residents around the EFC station, and would likely result in those residents no longer using Metro.

Grosvenor-Strathmore is our preferred stop.

I think they should have relook of what metro stations are around those they want to close. Closing Clarendon AND Virginia Square wouldn't make sense to those living in the area. The walk to the closest metro increases by a lot. It makes living on those areas less metro friendly.

This would be devastating to the thousands of condominium prices in the area. Many of us specifically bought our condos to be walking distance from the metro and would never be able to sell them if there was no metro out there.

I will need Grosvenor Strathmore to connect to the Purple Line to get to work as a handicapped person

Define close. A mile walk is not close if commuters have a disability.

Defund MPD Instead

Reducing transit access, frequency, and reliability reduces demand, which leads WMATA to further reduce transit --- its a death spiral. Accessible, frequent, and reliable transit sells itself.

grosvenor station closing would not meet my needs.

Federal center SW is likely to get more traffic as government buildings begin opening back up during the week. There's no real alternatives than this station.

Many of the closures are near business and medical offices I use.

This would definitely hurt the neighborhoods involved - and especially for stations further out - you cannot easily walk from East Falls Church to West Falls CHurch or Ballston. Gimme a break. Not even to say about the Silver Line. There is no *easy* way between stations. I think youd be better advised to look at the downtown stations, which are much closer (i.e. Farragut West is very close to Foggy Bottom and McPhearson Sq and Metro Center. Theyre all w/in a two to four block walk at maximum).

Not great, but a reasonable compromise.

East Falls Church is not a short walk to another station. I walk to East Falls and cannot walk to another station.

If the train is passing through why not stop? It would help a lot of people.

I am blocks away from Cleveland Park. Tenleytown is close, but a little more away (plus, it's in the wrong direction).

I rely on the the Metrorail Station at Eisenhower Ave.

Several metro stations listed are not very close to another station. Also some on here have parking i.e. east fall church

Inconvenient.

The Grosvenor-Strathmore metro station has a whole community who are using metro every day. It will be a terrible decision to close this station. With expected improvement regarding pandemic and high rate of vaccination it will be a absolutely unacceptable and inconsiderate to close this station.

I work at federal triangle and it would be difficult to get to work if it was closed.

Keep Reston Town Center station open; it is at an economically viable place in northern Virginia

Please consider keeping the station open during rush hour.

This would have a massive negative impact on people who live in these communities. It's a terrible idea.

I dont mind this concept but the execution seems poor. For example, Virginia Square and Clarendon are close to each other, but you wouldnt want to close both and leave a gap from Courthouse to Ballston. Also, tourists would have a harder time getting to Arlington Cemetery without metro service.

closing E Falls Church would be a hardship given the distance to other stations and my regular use

Courthouse and Clarendon are already crowded enough during the work week and this will only increase wait time for trains

I use the Van Dorn street metro station when commuting into the city for work and school purposes. Closing the Smithsonian stations would also severely limit tourist abilities in the city and create confusion.

Keep the Cheverly station open.

| |
|---|
| Proposal to close 22 Metrorail stations |
| I need to be able to use the Clarendon metro station |
| I live near Eisenhower Ave station and love the convenience of having a close station. Please dont close this station. |
| This is crazy. |
| Grosvenor garage is often full suggesting it's maximum use |
| This is a terrible, unacceptable idea. Just because as the crow flies a station is close does not mean its actually close to another station. It may take 20+ minutes for people to reach other stations and would cause innumerable amounts of problems for the thousands and thousands of people that commute on the metro. I cant even believe this is a proposal and should never even have been brought up. Absolutely NO. |
| Va Square and Courthouse are about a mile walk, Clarendon is only two Blocks |
| Near other stations is carrying a lot here, and is very different. Van Dorn is ~4 miles away from the adjacent Blue line stations, while Judiciary Square is within 0.5 miles. Very different situations of whats nearby/feasible/realistic for a detour. |
| Not all of these stations are close to others, especially considering commuters who can only travel on foot and by Metro. The College Park station is the only one within reasonable walking distance to the University, and much of the low ridership this year I feel is due to the COVID-19 pandemic. Personally, I know I would have used the Metro much more frequently if I werent attempting to maintain social distancing as much as I have, and I plan to use it a lot more in the future. This wouldnt be possible by closing this station. While I cant speak for other stations, especially for ones that arent in the heart of DC itself, near is not really the word I would use to describe them. |
| I purposefully moved to my current location near the Cleveland Park metro station in order to have convenience in travel by being close to the Metro. I currently do not own a car. If the Cleveland Park station closes down in January 2022, at a time when much of the city will presumably be OPEN again, I will have to walk to the Woodley Park or Van Ness station to go to work. It is absolutely absurd that Metro would keep the station open when it is at minimal use in the middle of a pandemic but would close it when everything is about to reopen. How do you expect people in the neighborhoods with closed stations to get to work? Do you expect them to all buy cars or go to another metro stop? |
| There are too many changes made here. Specifically - removal of the McLean stop removes any ability to reach those offices and surrounding buildings. |
| I regularly use Clarendon and EFC, during my daily commutes. |
| Clarendon stop is essential - it supports large numbers of single family homes and also apartment dwellers. Obviously many people come here in the evening for eating and drinking and you do not want them in cars. Pre-pandemic traffic was dangerously congested with Uber/Lyft weaving in and out in the Clarendon area and closing metro would make that so much worse. In addition there are many many new buildings planned (see Clarendon sector plan) and several that will open up pretty soon (Red Top, Kirkwood, etc.) |
| People without other transportation will suffer |
| I would not take Metro if Clarendon (the station in walking distance from my house) is not open. |
| I use Grosvenor Strathmore all the time as well as Judiciary Sq and Cleveland Park |
| I commute to McLean |
| This plan would work for me personally as someone commuting but would have a significant effect on tourism in the city. |
| You cant close stations. For example, I work at the court and frequently need to use judiciary square. |
| College park needs to stay open. Once in person classes resume ridership will increase. |
| One of the reasons I moved to Alexandria was the close access to the Van Dorn Station. It would be inconvenient and lower the value of my home. |
| Grosvenor should absolutely not be closed. Current low ridership is because of the pandemic and will certainly go back up. Its one of the closest-to-DC stations with parking |
| I do not want the Grosvenor-Strathmore station closed |
| Closing down clarendon AND Virginia square is a terrible idea, ESPECIALLY clarendon. Clarendon station is widely used typically and key for the clarendon bar and restaurant scene. This would mean there is no metro for 3 miles in a densely populated area with a lot of alcohol consumption where people won't be driving. The closure of clarendon I think would have a hugely negative impact on ridership and metro revenue. |
| have used many of the stations for business (on an ad hoc basis) |
| closing the grosvenor station would make it difficult for those who live near the station. |
| Grosvenor Metro when having its regular ridership is an important place for public transport, getting rid of it would make people walk extra miles to get to a station |
| Smithsonian is perfect and aptly named. Do not close it. Clarendon is how I get into DC. |
| We depend on East Falls Church stop so much to get everywhere. That would make it very difficult to use the transit system entirely. By the time these changes are supposed to take effect, the vaccine will have been distributed almost everyone to everyone. Ridership will go back up. |

Proposal to close 22 Metrorail stations

| |
|--|
| Closing both Archives and Judiciary Square impacts DC residents that serve on jury duty and work at the court. It also impacts easy access to the District Building near Judiciary Square. |
| I cannot say for now, but I am sure there will be an impact. |
| Van Dorn is the station from which I commute. |
| I need either the Virginia Square or Clarendon metro stop to get to work. |
| Please do NOT close East Falls Church! |
| I would be VERY negatively affected by the closure of Grosvenor Strathmore station |
| Closing grosvenor/ strathmore station would limit ability to attend/have events at strathmore |
| Wtf? People work at these stops and cant drive to where these places are? What are you thinking? This is beyond idiotic and the fact you need a survey to test the waters is shocking. |
| When I moved to the DC area, I chose my residence exclusively on its location near the Eisenhower Ave. station. It is essential that this station stay open for my work and its closure would put undue pressure on my commute. Closing stations would destroy the whole reason for having a Metro to begin with and render the system inoperable and useless. |
| I strongly believe the Clarendon Station should remain active. |
| I use Grosvenor-Strathmore every week for work related travel. |
| I use Grosvenor-Strathmore and I am able to walk - this would require me and all others that walk to Grosvenor to have to drive to another station thus clogging the roads around the Grosvenor-Strathmore area |
| Closing Grosvenor, a heavily trafficked station, is insane and would lead to massive overcrowding at White Flint and other near stations. White Flint is not equipped to handle double the riders. |
| But courthouse would be overcrowded |
| Closing Clarendon and Virginia Square would be problematic |
| The UMD community heavily relies upon the college park station. This would put hundreds of students who transport for internships and other responsibilities at a disadvantage |
| Closing these stations would be insane. |
| It is imperative to me that the College Park Station remain open. |
| That is a lot of stations to close and will likely lower ridership even more |
| Eisenhower should not be closed |
| Grosvenor-strathmore is the closest to my home and has parking. Going to either of medical center or white flint would be annoying and cost a LOT more given the lack of parking at either location. |
| Clarendon is a station I go to often and the pandemic will end eventually. |
| Closing Clarendon AND Virginia Square? Federal Triangle AND Smithsonian? Whats the point of Metro if you do this? Id spend more time walking to get to where Id need to go than on Metro in the first place. |
| I need the Mclean metro station |
| I use Grosvenor metro for many things from Grosvenor to metro center or S=Supont circle I love where I live because of walking distance from Grosvenor metro I bought a house for that very reason - to be able to walk to grosvenor |
| Although this works for me personally, I dont think its a good idea to close stations based on low ridership using numbers from 2020, and numbers from when lines have been out of service for upgrades. |
| Please, please do not close East Falls Church! |
| I am between the Silver and Orange lines - I would use the Silver line which is next to where I work. Reston Town Center is very close to a community center for travel and when DC opens back up, could be a big hub for travel. Planning to close this station (and those West) before Silver Line Phase II opens would impact Metro. |
| I went to the University of Maryland and used the College Park metro often. Closing this line is closing the ability for students to intern in DC, attend activities in the city and have exposure outside of campus. You also impact the schools games, alumni events and activities as well since many fans come from the DC area and use this line. |
| I use College Park station regularly. |

Proposal to close 22 Metrorail stations

I take the Clarendon metro, the other stops are too far to walk to

I use both Clarendon and VA Square stations regularly. I bought my house specifically because of its proximity to those metro stations. I do not have the option to park at my work in downtown DC so Metro is my only option for getting to and from work economically and in a timely manner.

regular grosvenor user - cannot park in bethesda

Van dorn station is too far from others and has so many residences that funnel to it.

Grosvenor-Strathmore is very important to the area, and has a parking garage that draws from a bigger area.

What's the point of having a metro system if there are only a few points where you can access it? That's precisely one of the best things about metros in other cities - the many points of access. The low ridership at these stations is at least partly due to covid and it will likely increase post-covid. This is not a good idea.

This would have a severely detrimental effect on the metro system. It would lead to over crowded platforms and densely packed stations. In a time when social distancing is even more necessary this would do the opposite. The closures of these stations would have almost unmeasurable impact on businesses and real estate values around that metro. Residents and businesses have made Billions of dollars of real estate investment around those metros. The decline in values would also have a detrimental effect on property tax revenue in those areas.

Both the Federal Center SW and Smithsonian stations are necessary for federal commuting and for tourist use. Virginia Square serves a residential and business ridership in Arlington.

Unacceptable, existing stations need to remain open.

this is highly used and very safe metro that users greatly like! leave this metro always open, functional all times. bad idea to even think of closing it! do not close!

I dont have a car and I rely on Grosvenor-Strathmore station for my work commute and errands. Getting to one of the other stations would require a large increase in the time that I have to spend walking and commuting every day and would make it difficult to run errands

The Grosvenor-Strathmore station is an important part of the fabric of the Grosvenor Park community. Without Metro access, many people will struggle to commute in and out of the city and itll have a major effect on the viability of the Grosvenor Park community real estate prices.

College park is my station. It would drastically increase the cost of my commute and commute time.

Grosvenor Strathmore Metro is needed in order to access Strathmore Center for the Performing Arts

I live at WFC so no direct impact. Where my clients are varies month to month. It would be a bit more of a hassle but especially to get downtown I would still utilize the metro when I could.

I don't understand how Clarendon is described as low ridership. The platforms are always crowded during rush hour (Pre-pandemic days).

Grosvenor-Strathmore serves a large community. Important to keep it open.

This directly affects me and I am okay with consolidating stations

Do not close East Falls Church stop. This stop is vital for us.

Yellow line closing archives for those who work in fed triangle only leaves Chinatown open. That's a far walk from fed triangle area. Closing archives and fed triangle is leaving many government workers far away from their needed stops.

closing any station would be not great for the public

The Clarendon Station is vital to the operations of a major business in Clarendon that relies on the Clarendon METRO station to (1) conduct day time business between Clarendon and the Pentagon and (2) as a vital mode of commuting transport for our 600-700 employees.

need more stops in northern virginia

I would use the Reston Town Center station, but bus service is available from Wiehle

I ride at EFC and it is not "close" to these other stations. I understand For example VA square Smithsonian, which are pretty much within walking distance to other stations. But if EFC is closed I would have to take a bus to another station and if bus service is cut back how would I do that?

NO! I need the College Park Station to get to work! This would severely impact students, faculty, and staff who commute to campus using metro.

There is a really big gap between ballston and Court House. Are you expecting riders to drive to Court House or Ballston where they could otherwise walk to Clarendon or VA square? This does not make any sense.

WHAT. I need these stations to get to work! There are already not enough points of entry on the metro. Shutting these down would be ABSURD

I periodically use the Cemetery, Clarendon, Cleveland Park, Greensboro, Judiciary Square, and Smithsonian stations.

| |
|--|
| Proposal to close 22 Metrorail stations |
| Too many closures in N. Virginia right in a row. At least leave Clarendon in place. |
| Not sure this would save much and would increase crowding at open stations |
| This plan would absolutely not work for me and others in my household. What about Strathmore performances? |
| Do not cut level of service. Do not close any of these stations. |
| This is an unacceptable proposal. |
| Closing Clarendon would cause me to drive to work. A lot of others would probably make similar decisions |
| I DEPEND UPON THE STRATHMORE STATION TO GO TO AND FROM WORK SO IT CANNOT BE CLOSED |
| This is by far the worst plan. Please do not close stations as so many in the region rely on this service for travel to and from work, and general transportation needs. Please do not select this option! |
| EFC is used for work and to get to other destinations in metro area. The parking lot is at capacity before pandemic. Why would we go back to driving when we are trying to eliminate carbon emissions???? |
| These are stations I use infrequently, but closing so many stations would definitely have an impact on a lot of commuters. |
| Cleveland Park is my station |
| Reducing train frequency and reducing operating hours is much preferable to closing stations. East Falls Church is not "near" other stations. Closing stations will only further reduce ridership. |
| I use the East Falls Church metro station multiple days a week. It is not close to other stations and would negatively impact the people and businesses nearby that rely on it. |
| Closing McLean would make it impossible for me to get to work. Closing Clarendon and Virginia square would impact ease of buying groceries and supporting local restaurants. |
| Stations already don't serve the entire city and this would make it worse. |
| The reason most people purchased their condos and homes was for access to the Metro Station. Real Estate would plummet. |
| Within DC, I can understand closing many of the stations close to each other -- but the Silver Line, again, which had a LOT of money thrown into it, closing stations already when Phase II hasn't even launched yet? Seems a bit ridiculous to me and many people around here rely on the Silver Line to get from McLean to Tysons and reversed, over to East Falls Church. One of my doctors is actually off of the Virginia Square stop too. It would be a huge inconvenience for me, as well as many others, I am sure, and this seems like a ridiculous proposal. |
| As a person who typically commutes from Alexandria to downtown, these closures would dramatically impact my ability to get to work in a timely manner. It would cause me and many people who work in the same area normally to reevaluate use of Metro at a time when I would imagine you would need to increase ridership, not make it more difficult and decrease it. |
| Shut down the entire metro, then. This is crazy. |
| Closing both the Virginia square and Clarendon metro stations puts a large population of people (who likely chose where to live based on metro proximity) out of reasonable walking distance of a metro stop, since there would now be nothing between Ballston and Rosslyn. PLEASE do not consider closing both locations. |
| I take metro every day to federal center SW |
| Federal Center SW, Smithsonian and Arlington Cemetery should remain open. A lot of out of town visitors use those stations. At least during the weekdays |
| Please do not shut Clarendon down. It has groceries (Trader Joes) and I use metro to get there. Thanks! |
| You may be able to slow Arlington Cemetery during late evenings depending on cemetery hours. |
| I live on one of the closures |
| I personally use the Greensboro station every day to go to work, if this station was closed my commute would become even longer to the point of near impossibility. |
| The reston town center station should be open. There are a multitude of residential complexes in the town center with riders. People would also be encouraged to take metro as parking isn't free in the town center. |
| This will not work for me because there will be no service from the McLean rail station. For me and others who live in McLean, the McLean rail station is the only nearby rail station -- of the four Tysons rail stations -- that has a nearby parking lot. Since there is no bus service for vast parts of McLean, without a nearby parking lot, those of us who live in McLean and the surrounding areas will have no other reasonable option than to drive. This will put more cars on the roads. It is also foolish, given that the McLean station has the second highest ridership of the four Tysons stations and directly services Cap One and its performing arts center. I strongly urge you to find the funds (purportedly \$900K) to keep it open. |
| If the closures are temporary during reduced ridership this makes sense. |

| |
|---|
| Proposal to close 22 Metrorail stations |
| Clarendon is my "home" station. I'm 74 and would not appreciate a longer walk to get Metro. I might switch to the bus (38B) |
| I can't believe in non-Covid times that the college Park station isn't used. It's hard to get to Prince George's plaza from college park campus |
| This counters all progress toward a green future. There may be a short term gain but long term loss. More stops means more convenience and reason to use. |
| The reason ridership is low is due to pandemic. Prior to that, there were many times I could not board a DC bound train from the Clarendon. Station. It would be a huge mistake to close this station, Virginia Square and EFC on a permanent basis. Reduce service frequency and closing times but do not close these stations. The majority of residents rely on metro to get up work. Moreover, proximity to metro is why most people choose to live where they do |
| Would be an inconvenience, but I would still walk to the nearest adjacent station to use the metro |
| Unable to commute to work in DC |
| Keep metro 2022 on track! |
| PRE COVID, there were several people on most of these stops. They are vital stops for those who do not live in inner DC |
| I use the Grosvenor-Strathmore station and the UMD-College Park station, taking the shuttle to UMD campus. There may be another station near, but it is not clear whether UMD will operate a shuttle. Further, no other station service Strathmore arts center/concert hall, meaning that no one can attend it without a car. |
| This is a self-perpetuating problem. People will ride more when they need to return to the office, not right now when everyone is on lockdown. Closing these farther out stations hurts many of the workers who are backbone of DC and will necessitate them bringing cars back into the city. If service were reliable and quicker, people would use metro more. |
| stations like smithsonian, federal triangle and archives will see an increase in use as things beginning opening back up and tourist start coming back. College park is not near other stations and will lead to overcrowding at stations like greenbelt. |
| "Near other stations" is a pretty unfortunate term. Making people walk over 20-25 minutes to a station is completely unsustainable, especially as we all go back to work in person. This is a really bad proposal considering some of these stations are in crucial residential areas. It would also hurt tourism when that picks back up post-pandemic. |
| Very much in need to Grosvenor/Strathmore |
| East Falls Church station has high ridership. Please do not consider closing it. |
| Closing any station presents challenges, but closing multiple stations that are next on the line to one another creates a host of access issues across entire neighborhoods and communities. Besides impeding many peoples access to work / school, these closures would have negative effects that include increased traffic and pollution as riders shift to driving or ride-shares, and economic impacts associated with those shifts (people required to use more expensive forms of transportation). |
| This is less bad than closing more in the evening or not restoring rush hour service, but I do plan to use some of these stations occasionally post pandemic. |
| People in this area rent/buy apartments and houses based on proximity to metro stations - closing them would absolutely not work and would negatively impact millions of people in the DMV area. This change would make WMATA one of the worst-run metro stations in the world. |
| Absolutely not, please do not close Clarendon Metro as i have bought a place in clarendon. |
| Removing those silver line stations effectively destroys the investment made in the silver line at all. Everyone drives to the mall, and more Metro infrastructure, not less, is needed to support the commercial buildings and areas in Tysons |
| My office is at clarendon. closure of this station would increase my commute by 15 minutes and require me to walk in all weathers for a 15 minute period. |
| There are limited metro parking stations around the Grosvenor-Strathmore station. Twinbrook and Bethesda dont have enough parking spaces to pick up closing Grosvenor-Strathmore (no parking available at Medical Center or White Flint). |
| Would like Grosvenor to remain open |
| Anything less than full operations is unacceptable. |
| Why on earth would you propose to close Grosvenor-Strathmore station, THE MAIN STATION off the beltway, but not close Medical Center, the least used station on the entire Red Line. Is this about wealthier people getting better service. And why would you propose closing the station that services UMD? Very weird choices. |
| This would contribute to the sufferings of businesses around those metro stations |
| Again, this will further drive people away from using Metro. This is an absolutely unacceptable proposal. |
| Dont close E. Falls Church station because it is so suburban and there arent good transit alternatives. Close stations in DC that are only a few blocks from each other instead. |
| I have lived near and used every single station on this list. If Metro is going to close 22 stations, it might as well shut down entirely. |

Proposal to close 22 Metrorail stations

Reducing stations will result in even lower ridership. Please don't close stations. Work on getting more funding from Government. Metro is a public service and better for environment than cars. Invest in public transit.

That seems extreme.

The station I use, as well as the station I get off are on the list of stations to be closed. This will add additional time and cost to my commute, which will force me to drive into work instead of taking metro.

I live at ba Square and use the subway regularly!

I utilize many of the stops under consideration. The changes could mean the loss of my job.

I have not been using Metro only because of safety concerns connected to COVID 19. I would resume using Grovesnor-Strathmore which is a 1/2 mile from our house later in the year after getting my second vaccine.

Cleveland Park, College Park and Grovesnor strathmore need to stay open

My commute to work, daily, is Grosvenor Strathmore to Judiciary and back.

I use the Grosvenor-Strathmore site for travel into DC. I guess i would have to drive unless timely bus service is available.

I use East Falls Church to travel into D.C. for medical appointments and work.

Closing stations would lower valuations of real estate

This is also a good plan, many of these stations are not needed and are within walking distance of other stations. Especially Mclean station which is always deserted even before covid, also Greensboro. Loudon county VA is extremely wealthy and is the last place that needs Metro.

Only because I am curious what would then happen with the land and infrastructure. Would it just exist and slowly become over run with decay? The stations were built and exist for a reason. It seems silly to stop using these stops just because there is a decrease in ridership due to COVID. Also closing these sites will increase population in other stops resulting in increased crowds and decreased ease of finding parking spots at stops that allow parking.

We would lose several stations that are nearby

Some of these like efc and Clarendon are major commuter hubs. Others like archives and mt Vernon are needed for transfers

East Falls Church is my station. Although a residential area, there are a number of condos and townhomes going up as we speak, all those folks are planning on using the metro. If not, 66 will become very crowded which means tolls will go up and I guess someone is going to get that money...just not the Metro... You are also going to put more people onto the trains increasing the density and potential for super spreaders. Given this schedule I will drive and put another car on the already congested roads, in turn driving more wear and tear on the streets driving more funds required to maintain and repair roadways. either way, the \$\$ will be the same, it will just be spent in different areas.

Tons of people live in these areas that need the metro to commute and the point of the stations are so commuting doesn't take longer than driving. IE closing Virginia Square AND Clarendon will cause a ton of people to walk 3-4x their original distance just to get to the metro. One closure may be okay but both is unreasonable.

This will make already crowded stations more crowded. Gallery Place is already a mess due to poor design. Closing Archives will exacerbate the platform problems on the red line platforms.

Innovation center should stay opened instead of the Herndon station. We have a lot of communities (specially condos and townhouses) that are walking distance to innovation center station. It makes more sense for a station with a higher number of people that live walking distance to be opened. There are around 4-5 more communities currently being built near innovation. The areas around Herndon station are mainly big houses that have less density of population.

Even during COVID, I frequently use the Clarendon metro stop as I live in that neighborhood. This also has a huge negative impact on people who don't own cars. One of the great things about DC is the metro is so accessible you don't need a car. This also mainly targets people in low income areas who can't afford cars.

College Park needs to stay open

Grosvenor/Strathmore is a hub for many travelers due to its expanded parking area.

Eisenhower is not close enough to another station with parking for this to work

I live in Cleveland Park and rely on the train to get to work every day. If you decrease the frequency of trains AND close my station, my commute would be four times as long at a minimum. This is unacceptable. I chose my residence based on the proximity to the metro station- my rent was priced accordingly. This would leave me stuck in a lease for an overpriced apartment with no access to transit.

I need Grovesnor Strathmore to get to dance. I need many of the downtown DC ones for when I travel into DC

Closing both Clarendon and Virginia Sq. makes my commute to work via Metro impossible.

Proposal to close 22 Metrorail stations

Close East Falls Church Station and my wife and I will have taken our last Metro ride!

I need the East falls church station every week day so I can 1) commute to work and 2) have a commute less than 2 hours

Clarendon station is essential to my commute.

Closing the Metro stop will hurt already beleaguered local businesses and hurt communities that are dependent on Metro to commute.

Clarendon station services a lot of young professionals who work in DC and use the metro as a main (or only) mode of transport; additionally, the next closest metro stations are too far to walk to justify the cost of living in the Clarendon metro, which is set at a premium due to proximity to a station. I am sure this is the same in other places on the Orange/Silver line such as Virginia Square station.

Grosvenor is critical station for work and schools my family can walk to this station

Need Grosvenor Strathmore with the use to get downtown and to other areas on the red line. Very useful and needed for my transportation needs.

Prefer for Virginia Square to stay open and close either Ballston or Clarendon. Virginia Square has a higher mass of population in closer proximity to the station than either Ballston or Clarendon stations do.

Use east falls church and want to continue to use since it is more convenient and saves time and money.

This is insane.

Pls do not cancel Grosvenor!

Need to use the Grosvenor station frequently. Too long to walk from other metro stations

I purchased my house based primarily on proximity to the metro. This is a terrible idea.

I work at Federal Triangle, and sometimes have to travel to Federal Center SW. I also sometimes travel to Clarendon or Virginia Square from my home.

You are basing low ridership at Eisenhower Ave. on 2019 when it was closed for the summer and 2020 when most federal employees were teleworking? Unconscionable. I can't believe the commercial developers around the station would support this. Not to mention your own HQ is at this stop. During normal times, this is a well used stop and you know it.

It is crucial to my travel plans that McLean station stays open. I would not purchase a pass otherwise

This is the worst proposal by far. If it would add 39 mins to my commute - and I'm sure I'm not the only one. Also, many neighborhoods base their housing prices on proximity to metro and this damages home values near these stations while putting thousands more cars on the roads, encouraging drunk driving, and ignoring people trying to have a car-free lifestyle by living near public transit. Please don't do this. You all know 2020 ridership isn't a permanent trend.

Need Grosvenor-Strathmore stop.

College Park riders will dramatically increase when University of Maryland students are back on campus. The sharp incline at that station in the summer and fall should more than make up for the losses.

Many of these stations are not near other stations. This plan is completely unfair to those of us who live near these stations and have invested in property near them.

Some of these stations are the closest to my home and work, so it would add a significant amount of time to my commute due to the need to walk longer distances.

Many people use Clarendon station during the day and evening. There are also many bars in Clarendon area which will make it safer for people so they don't drive while drinking.

I live very close to two of these upcoming new Silver Line stations and was counting on that to INCREASE my use of Metro.

It would be an extreme hardship if you closed the Clarendon station. I bought property in Clarendon area primarily because of the easy access to Clarendon station. My walk to courthouse would be about 2 miles and I have no alternative means of transportation. Moreover it will devastate the value of my home.

Our station (PG Plaza) is not on that list, but it seems crazy to close College Park. The only Metro station for UMD? You really want to encourage more college students to drive in this area?

This would seriously limit my ability to get around the city.

Reston town center station has not even opened yet. What is the purpose of building a station which will be used quite frequently and not even opening it

I would not be able to get to/from my work at either Clarendon or Virginia Square. Please leave one of those two open. They are adjacent. Closing both will close off major areas of the orange line.

I live near the Reston Town Center station and I would like to be able to walk to the metro.

I don't use metro for commuting to work, but I would use it for sight seeing or to get to the airport. If Grosvenor Strathmore is closed, I would probably drive instead of metro.

This is not a good idea from an accessibility standpoint - not everyone can just walk a few extra blocks. Closing Grosvenor-Strathmore is an awful idea and I'm sure the Strathmore Center would be very opposed!

Proposal to close 22 Metrorail stations

I personally do not use these stations as much and could use a proximate station if need be.

Close silver, the others are integral to traveling around the city

Closing Silver line stations right after they finally opened would be terrible and make my commute unbearable.

I live near the McLean stop and depend on this station. Additionally, this stop does NOT have low ridership!! Thousands of Capital One employees use it every day for their commute when the offices are open.

There are stations that I very much need during nonpandemic times, such as judiciary square.

Once pandemic is calmed down , riders will come back

Better abolish entire system.

Clarendon and VA Square are critical to the walking population in the Arlington Metro corridor. Metro will continue to lose ridership and highways will be further clogged with commuters. Please wait until the population is vaccinated and returning to more normal work/school/leisure schedules before closing so many stations!

I ride into Federal center SW everyday starting from Grovesnor. Please do not shut down

Grosvenor/Strathmore is a station that has a ton of use during rush hour.

closing the smithsonian station seems insane. I have seen times when this station is super crowded during public events. These will come back post pandemic.

This is preposterous. The platforms on Metro Center and Gallery Place Chinatown are already so crowded during rush hour that it is a miracle no one is not accidentally bumped onto the tracks each day. Archives, Federal Triangle or Archives must remain open to siphon off some riders and also provide tourist and handicap access to the Mall, Smithsonian, etc.

We moved to Cleveland park in part due to its proximity to the Metro - won't be able to get to work, or any events without it - I am a senior

Why close stations like Cleveland Park or Clarendon that have restaurants and bars that promote the area economy. This would just lead to lead to dining closing and less jobs.

How ridiculous to consider East Falls Church "low ridership" when it's been closed for renovations since before the pandemic. What a waste of money to not finish renovations and get it up and running again!

This would be hard, as one of the stations slated for closure is closet to my workplace. However, as noted above there is another station nearby, so it would work (just wouldnt like it).

Do NOT CLOSE CLARENDON! It's one of the fastest growing hotspots for restaurants and bars and entertainment and would damage the economy drastically !!

This is an untenable proposal.

Arlington Cemetery is a key tourist destination, as is Smithsonian.Clarendon is a nightlife center.Mount Vernon Square is the access point for the Convention Center.

I live near Van Dorn St and would use it to go into DC on weekends instead of driving. Also, what is the definition of near other stations?

Eisenhower and van dorn provide valuable metro access

This would add additional expense and time to my trip as my main stop for transportation to and from work is Grosvenor Strathmore.

I actually like this proposal best.

I think that grovesnor is critical to commuters , tourists . How can metro make this decision on ridership during a pandemic? We need this location. It helped get to national airport too.

This would be extremely disappointing. We bought a condo near the clarendon metro BECAUSE it was near the clarendon metro. Our condo value will plummet if this change happens, as will housing/condo values near any of these stations. This may also result in businesses being hurt because people often grab food/drinks before/after work near their originatio nor destination metro stations.

Definitely NOT. If you close all of these stations then what is the point of having metrorail service anyway?? This is a terrible idea that will affect so many people, businesses, and tourism. DC will suffer from this decision

I use Grosvenor Strathmore station daily and closure of this station will significantly increase my commute

I rely on the College Park station as do the University students

If they close the stations I will have no way to commute into DC for work. I moved close to a metro to get to work faster and if you close it I have no idea how I would get to work

We moved into the area because of the Eisenhower Metro. And the King St. station is too far for us. If this plan were to be adopted, wed move out of the area.

Proposal to close 22 Metrorail stations

I am opposed to closing ANY existing MetroRail stations. Families and businesses have invested in these neighborhoods based on access to MetroRail. There are numerous high-rise buildings under construction that will flood these areas with vehicle traffic if the Metro stations close permanently. In particular, I note that Clarendon and VA Square are near to each other closing both will leave a long expanse from Courthouse to Ballston without MetroRail access.

Both myself and my husband use the metro and a HUGE part of the reason we purchased our home where we did was ACCESS TO METRO. We are less than 3 block from the Clarendon metro...and the closest after that is Virginia Square. If you close both of those stops it would both severely impact home prices in our area, but also our (and many others ability to live/work in this area without sufficient metro availability.

Closing stations when the infrastructure is already built is incredibly silly

If you close these stations, then just close the entire system permanently and call it a day.

I go to work and into town by metro from East Falls Church. Of course, not during the pandemic but I cannot wait to go back when we reach herd immunity. I bought a house close to the metro to be able to ride it. The silver line connects DC with Dulles Airport. It should be improved not made worse. Please, a bit of long-term vision and planning.

Closing the Clarendon station would be a major problem for me/my employment.

No way. Unless you would be rerouting buses

Arlington Cemetery is not just a stop but also a landmark. I'd recommend keeping for equal access to landmark.

Very short sighted

I take East Falls Church to Greensboro. It would significantly increase commute time and expenses.

Grosvenor-strathmore should remain open, it's helpful to get to medical center and stay out of traffic and convenient to travel to DC

You have to be kidding.

Not ideal, since one of the proposed stations is the one I use, but I could make it work if I had to.

My stop for work is Smithsonian. To close that station would be a great inconvenience to my commute

I live close to East Falls Church.

I specifically moved to be within walking distance of the Grosvenor-Strathmore metro station. Terrible idea to close this location. I know so many people that have specifically moved to this location to be closer to a station without being in Bethesda or DC.

Do not close the Eisenhower Metro stop. We have several apartment buildings being built and ridership will increase once its safe to return to the office.

I use grosvenor strathmore station everyday

I work between Clarendon and VA Square. This would cause me to rent a bike, wait for a bus, or walk 15 minutes from the Metro to work in an Urban area.

Loudoun Gateway hasn't even had a chance to open; developments are being built around and near for the purpose of easy access to metro

I work on Capitol Hill near Federal Center. Most of us work late hours and it's not safe to walk to Cap South

Please keep the Grosvenor-Strathmore station open.

I and many other people use these stations

I use the East Falls Church station, which is walkable from my house. Given the difficulty of finding parking at other metro stations, closing EFC makes it more likely that I will be unable to use metro for my commuting needs, and will need to drive to work.

I use the East Falls Church Metro and this would hurt a lot. there was just a lot of money spent renovating it and its parking lot. To close it would not make sense at this point.

I live directly above the VA Square metro stop, and would otherwise default to using the Clarendon metro stop. Shutting down both of these would be a big hassle and would greatly impact my commute to/from work, as well as for other travel reasons. This would likely lead to a huge increase in people driving, and would make local traffic conditions even worse than they already are.

I moved to my current home - and paid a premium- so I could walk to the Grosvenor-Strathmore statin to get to work everyday and get to Nats Park and other DC venues. It is an active station and should not be closed. I expect to be resuming normal commuting via this statin by onetime this summer.

why even extend metro to Dulles is you plan to close five of the new stations. What a waste of money and resources.

The closest 2 metro stations to me are on this list. I live where I live because of the metro. This would require me to move which I cannot afford.

No, not at. Part of the reason we bought our home where we did is because of the metro. Please don't shut stations down. That doesn't make any sense. We won't be in this pandemic forever. Please find the funding.

Grosvenor station is the ONLY station near where we live. Please dont close it -- and dont close Judiciary Square where we work. Thank you

Proposal to close 22 Metrorail stations

Would not be able to get to work in a timely manner. Would make visiting DC a nightmare or just impossible via metro

The College Park Station is not near enough to any other station (over 2 miles from the Greenbelt station) to justify closing the station. Students are less likely to own cars, which means we rely on public transportation, and taking away this station would be a huge blow to the university.

Yikes! You are proposing to end bus service 16C into DC under the notion that I can ride the metro instead, but then you are also closing the Smithsonian metro station? You cant do both!

I can use King street s an alternative . all proposals must take into account current ridership and the fact there will be fewer commuters as working remotely is expanding.

Wont ridership in these stations pick up when circumstances warrant? Why lock yourselves into a closing when you could just run trains through those stations, etc.

Need east falls open. Serves 2 lines.

Same comment as before. This would destroy traffic and typical commuting once COVID quarantine is over. Did you even look at pre-COVID ridership?

Terrible idea. Better to reduce service than to close stations

Closing two stations in a row like Virginia Square and Clarendon does not make sense. I dont recommend closing any stations, but if you are going to close stations you should close every other one to reduce the distance people dependent on the trains will need to walk to get to an open station.

Do not close these stations as they are used so frequently especially those like east falls church, Clarendon and Virginia square. We need these stations to remain intact and open.

This would be devastating to those communities that have developed around these stations, inhabited by residents who are invested in Metro. Closing stations should be an absolute last resort not invoked any time soon.

My family deliberately purchased an apartment near the Cleveland Park station, sacrificing square footage for access to public transportation. Forcing us to walk over a mile to either Van Ness or Woodley Park makes the metro much less viable for us. The metro should be designed to encourage city residents to adopt a car-free lifestyle; closing stations within city limits is thus a terrible, terrible idea.

The Clarendon station is essential.

I live use virginia square.

I dont think you should close stations that havent even opened yet, Reston Town Center in particular. Not sure what station would be considered close to East Falls Church. Hate to see stops at tourist attractions closed (Arlington Cemetery, Smithsonian, Archives)

The reason I live in Clarendon is so that I am able to use the Clarendon metro station. Walking to Ballston or Courthouse will only make things more difficult and cause those stations to experience unnecessary congestion. The number of people who metro to Clarendon to go to Trader Joes to get groceries will also be impacted. Not only those of us who live in the area will be impacted, but those who come for daily life. I would rather pay more than walk a mile to get on a metro. If that happens I will no longer use the metro ever.

These are key locations for Metro!!! How else will people get to/from Cheverly? And where is the close one to Cleveland Park? Don't do this!!!

Grosvenor is at least 40 minutes walk from any other station. What are you talking about?!

I work in college park

keep Arlington Cemetery open

I live within walking distance to Grosvenor Strathmore and it would impact my ability and willingness to take metro significantly

This is the worst of all plans for me. We DEPEND on the Cleveland Park station. In fact, proximity to the station is one of the main reasons we bought a home in CP two years ago.

Should reduce service hours but not just close the stations

Grosvenor-Strathmore is near where I live and McLean is near where I work, and Ill need access to those stations once its safer to take public transportation

So that the stations sit vacant? This is not a way to encourage metro ridership. I work at Grosvenor-Strathmore and this is incredibly disappointing. What about all the commuters during normal times??

Just by Keeping federal Triangle open you would be saving me 6000 dollars annually.

Grosvenor-Strathmore also serves Music Center at Strathmore; other neighboring stations are too far away.

Avoid closing adjacent stations. I think closing some is okay but avoid adjacent ones so that people have very long walks to the closest station.

This would be an EXTREME burden for me. I bought my home in my neighborhood 20 years ago because of its proximity to the East Falls Church station, and I walk to and from the station. The two nearest stations to my home are several miles away, and I would have to drive and pay for parking, assuming it is even available at the other stations. It would also add significant time to my commute and delay me from picking up my children at school.

Proposal to close 22 Metrorail stations

Closing Grosvenor-Strathmore station would remove a critical vein of commuter travel for me and my neighbors in the North Bethesda area, impacting my ability to report to my essential worker job in Washington, DC. It also would depress utilization of the Strathmore Performing Arts Center. Please do not close the Grosvenor-Strathmore station!

My office is walking distance from reston town center station.

I need two of these stations to get to work. It would seriously disrupt my commuting.

If federal workers return, overcrowding at Gallery place from closing Judiciary Square and Mount Vernon could be an issue.

Every Silver Line listed above and slated for closure is used by federal employees and contractors. This would negatively impact national security and continuity of operations.

Some of these closures would be fine with me; others would not.

Keep my Vernon triangle and I think stations near the mall should be open like archives and college students get on at college park to access the city

The new Silver Line stations are mandatory for me. It would be a deal breaker for me if any of them are closed.

When I use Metro, I am most likely to use Grosvenor-Strathmore. I am also concerned about access to Strathmore Music Center.

Absolutely not. Closing orange line stations like Clarendon would be devastating. I'd be remiss to not point out that closing the Clarendon station would tank property values in that community. Directly harming tax paying homeowners in the surrounding neighborhood.

I live across the street from East Falls Church, and use the metro frequently, so this would be devastating to the advantage of living in our current house.

Closing of stations will discourage people from using metro. I often use Clarendon and East Falls Church and would not want those closed

I get on and off at Clarendon.

I depend on the Clarendon metro to get to work and travel. Not having a car, this would be an incredible hindrance to my day to day life.

I use the Mclean stop and Clarendan

I rely on Grosvenor. Closing the station would only be OK if we had shuttles to Medical Center.

I use several of these stations instead of using my car

Does not apply to stations I use to get to work.

The close in stations should remain open. This is an awful idea.

I live in Clarendon and chose a location thats a five minute walk from the metro because of the easy commute. Thats also one of the most important stops because most restaurants are there for people who live by other stops. Clarendon needs to stay open.

Please keep Grosvenor-Strathmore open! We use it both to get to/from downtown and to attend functions at the Strathmore Music Center!

Use the Grosvenor- Strathmore station. And being a senior this would be very very inconvenient for me

Closing eisenhower and van dorn would inconvenience hundreds (if not more) of commuters all from the same neighborhoods in VA.

Its COVID and its not forever. We need these stations. I need Grosvenor, Archives, Cleveland Park, Federal Triangle, Smithsonian, and others!

Keep East Falls Church, Clarendon; and Smithsonian open please!

This seems absolutely crazy. There are still people who commute via most of these stations for work/school and, though some of the stations listed here could be considered duplicative, cutting others will put commuters in a tight spot.

Archives, Mt. Vernon Square, Judiciary Square, and College Park stations are all essential to my daily commute

Why would you close Grosvenor when it is a hub for most people in Maryland who take the red line. White flint would make more sense to close

East Falls Church is nowhere close to West Falls Church - the nearest station.

College Park metro station is nearest metro and would impact my ability to use public transport. PLEASE DO NOT SHUT DOWN

Federal center SW is my stop. Having to walk a further distance to and from the office isn't always feasible for me

For many people, myself included, stations that are near other stations still will result in needing additional transportation and more cost to reach the destination.

This will lead to crowding at other stations - it will be a mess during holidays (Cherry Blossom, 4th of July, etc, etc). So many of these metro stations help to keep tourists on Metro and off the already crowded roads.

Would cause overcrowding during rush hour and squeeze parking

I would argue that EFC is not that close to another station. Virginia Square really is between Clarendon and Ballston, so if I had to pick one it would be VA Square. I cant believe were talking about closing McLean, which just opened. Archives is pretty close to other downtown stations, so that one could be closed and not affect as many people so much. Arlington Cemetery needs to stay open - theres no other way to get there!

College Park is a critical station for student access to the city.

Proposal to close 22 Metrorail stations

I live in Clarendon. This would really screw me as the metro station was a huge attractor.

Again, closing the College Park metro station would be detrimental to the UMD community.

I really hate this for other people, but it would work for me.

Terrible for me who lives near GrosvenorHow can I get to DC?

It is a 15-20 minute uphill walk from King Street to Eisenhower and there is limited taxi availability. There are several large office buildings AND new apartments around Eisenhower all built on the premise that Eisenhower would be convenient access. This closure will have a profound negative impact on the neighborhood and its recovery. I know for certain that offices in that region plan to reopen and by and through the summer. So this closure will happen just as the recovery demands restoration of easy metro access!

Ridership was down because of the pandemic and COVID. Many people live near these stations because of proximity to metro. By closing stations, you will further reduce ridership and more people will drive or have to find alternate means of transportation.

This will have a significant negative impact on property values near these stations for people who bought relying on Metro service. I hope you have thought about the budget impact of lawsuits.

Please DO NOT CLOSE Grosvenor/Strathmore - so much residential development has happened in this area, which depends on the metro for transportation!! Strathmore music center as well uses this metro stop directly. The added volume of cars on this section of road infrastructure would be untenable. So many of these high rises and high-density living communities were built specifically to utilize the metro. Many of the residents depend on it for transportation and do not own cars!! Please do not close this station! Additionally Strathmore Ave is about to have another major development on land sold by Holy Cross, which would also access this metro station. Please allow normal ridership to resume as the pandemic eases before making such a disastrous cut in service!!

I use Grosvenor-Strathmore, Cleveland, and College Park stops frequently and need them to be kept open because the other stops are too far away to get to as substitutes.

I rely on the Grosvenor-Strathmore Station. I live in the area because of the station.

From a personal aspect I use either the Clarendon or Virginia Sq. stations to get to work. IF those stations are closed I would drive rather than use Metro. The threat of closing these stations is a knee jerk reaction to the year of COVID. Metro should maintain all stations and see if the numbers improve once everyone has the ability to be vaccinated and returns to a more regulated in-person work schedule.

That station (EFC) is very close to me and my neighborhood (lots of ridership), and would be detrimental to my commute and everyone's property value in the area! Please DO NOT close East Falls Church.

I use EFC to commute to work near Gallery Place. I can walk to the station. Otherwise I'd have to drive to WFC. We moved here specifically so I could walk to the Metro.

Cleveland Park station is the one I use. More importantly, the community aims to increase density BECAUSE the metro is here. Desirability of neighborhood-- especially affordable housing-- will be diminished. Many people here don't have cars. And we need to reduce cars more

My office is one block from Clarendon and I go into the office daily,

Grosvenor-Strathmore is not near any other station. There is no walking-accessible route between it and the next closest stop on the Red Line. When Grosvenor closed last year, I lost my job because I was not able to get to work. I was able to find employment when the station re-opened, but if it closes again I would once again be prevented from going to work and would lose my job. I have no car and there is no way for me to get to work without metro.

I think the more stations the better, but this would personally not impact me.

In some cases, there is no reasonable option (walking, bus, etc.) to get to a closed station from the nearest open station.

Our closest station is E. Falls Church, to which we can easily walk. If you close it, we would not travel to a more distant station, we'd probably drive, either into the city or to Rosslyn. Then we'd add parking costs to the metro fare and probably not travel as much in the Metro area.

Could you publish the ridership statistics for the proposed closures? Those of us that rely on these stations find it hard to believe ridership is that low.

I oppose closing these stations, it seems like it would actually cost more money to close them than to continue operating them.

Cleveland Park is very important to me.

This is absolutely ridiculous and cannot happen.

Grosvenor is a critical station

Ugh just awful.

I live near Clarendon and VA Square and the proposal to close both stations is unacceptable to me.

METRO has enough funds to keep these stations open during the downturn -- taxpayers have spent \$Billions to fund Metro.

Proposal to close 22 Metrorail stations

This would tip me to switch to car. I prefer to use public transit but I'm not walking a mile (versus several blocks) to get to an open station.

Important to keep East Falls Church open for me and wider community, especially as reopening continues. Many essential workers and government workers use this station.

This seems like the most obvious and least-impactful service cut. Cant help but laugh at the irony of closing a brand new station that is not even opened yet. I live in that area and feel that many of those new stations other than at IAD are unnecessary and never should have been built to begin with.

You can not close college park. At all that would have major implications

Some of these stations are tourist attractions that will open again.

This would affect my station. I moved to this area because of the station being close by, and that I could easily walk there. It is harder for me to walk the longer distance

NO! NO! NO! I use a number of these stations.

I use Grosvenor-Strathmore station

These stations should stay open.

My USDA colleagues and I need the College Park station to stay open in order to get to work.

I use Grosvenor to get to work. Driving to next metro station is not an option and there is no good bus service from where I live

These closures would create unnecessary hardships for commuters, increased auto traffic, and decrease property values. In particular, the Grosvenor-Strathmore station would affect me and my community.

I traveled on the blue and silver line during the station closures during COVID. Though it was nice to have a quicker commute, it was frustrating since I get off and on at McLean and had to work around alternative travel.

Need Cleveland Park station

Grosvenor-Strathmore station (pre-Covid) always had a packed parking lot if you didnt arrive early. I find it a bustling station that is not underused. It is the last stop really for people in the suburbs to park and ride the metro. Parking is not available at Navy Medical and is not easy at Bethesda.

no. office workers will be returning and need transportation to work

Every student at UMD relies on the college park metro station

Closed forever or just closed at times? Arlington Cemetery is NOT near any other metro station so that should not be included on the list.

I have a mobility impairment but can currently walk from my home to the East Falls Church Metro. If it were to close, it would be a huge loss for me.

This would add considerable time to my morning commute if Clarendon and Federal Center were closed. I would prefer a reduction in hours, or closing on the weekends.

I live close to grosvenor. Huge impact in my life

This plan makes travel more difficult for all populations, especially elderly, low-income, and disabled.

This would be devastating. My daughters and I live in downtown College Park and rely heavily on using the College Park Metro stop. This is how we get to work and school, and also to fun events downtown. Although we have not used the station as much during COVID, we expect that to change soon as things get back to normal.

I rely heavily on the East Falls Church Metro station! It is a hub for changing from Orange to Silver or to catch the Silver towards Tysons and further--makes no sense to close it. Also, close EITHER Clarendon OR Virginia Square but not both!

My work stop is at Federal Triangle. It is convenient and allows me to be undercover so weather is not a factor at this time.

What is a short distance for some is an insurmountable obstacle for others.

This is ridiculous. Just to let stations sit empty to save money seems absurd to me.

Many of these stations are not near other stations for example East Falls Church. This is a bad idea to completely close stations.

NO. Clarendon and Virginia Square are two seriously busy stations at peak times and would leave large parts of Arlington more than 2 miles from the closest stations on either side (Ballston and Courthouse). This is not a good idea. Also, the Silver Line II stations arent even open yet, but lots of people have moved further out of DC in anticipation of having those for commuting; how can you think of closing them when you have no way to tell how ridership will look yet?

I walk to Grosvenor-Strathmore. I am not close to another station unless I would have to take the bus or drive.

Making Metro less accessible and useful is NO way to save it.

Do not close Clarendon. This is a ridiculous proposal. It will affect negatively all the shops and restaurats. It will bring the value of homes and rentals down. It will deeply effect the economy.

Closing of the Grovesnor station will impact everything from Strathmore Hall itself to all the apartment commuters around it. This is a very bad idea

Proposal to close 22 Metrorail stations

| |
|--|
| My livelihood depends on metro service. I invested everything I have to relocate to my current location because it is close to the metro station and planned not to have a private vehicle. It would be absolutely devastating for me, my family, and many people in my community. |
| While this proposal is a year out, there are too many variables that will happen in this time. I would ask officials that once the area is out of pandemic protocols it is reviewed. I ride the metro from the Virginia Square station to work and school at least 8 times a week. I would also condemn this removal of accessible public transportation to lower income communities. Many whom use the VA Square and Clarendon stations. |
| My most common route when visiting the mall is to take College Park to Archives. Closing college park would severely limit access to DC for people in the region who rely on it to get to internships and other jobs. |
| I bought an apartment specifically because it was close to one of these metros. |
| Would largely stop using Metro if Clarendon station is closed. |
| Grosvenor-Strathmore station should not be closed. It is a very busy and used station |
| I work in Clarendon! |
| This station has significant ridership who walk to the station in normal times and eliminating it will require lots of additional people driving to work or to a more distant station. There are no other stations within walking distance. |
| Closing all of these stations would make large parts of the area not metro accessible. This would have a huge impact on the city (increased traffic, decreased property values, business closures). |
| Im a female and I walked to the Subway station to get to work downtown with no parking spaces. My walk is less than 8 minutes and I have to be at work at 6am. Im afraid to walk and or wait for a bus to go to another station. I watch too my Investigation Discovery and its some crazy people out here. |
| Please evaluate which stations should close, if any, based on more than ridership (especially pandemic ridership). Closing two stations in a row, like Clarendon and Virginia Square, leaves a large section of a dense area without a station. Population density in reasonable walking distance seems to be an important factor to consider as well. |
| I exclusively use the Grosvenor-Strathmore station and as a disabled veteran one of the appealing aspects of the station is the convenient parking. To close this station and to depend on other stations, even though they are close, they do not have nearby, convenient parking. This severely limits their appeal and accessibility. If this option is selected I would rather pay to park in downtown DC close to my place of work, drive to work and avoid metro completely. |
| This would close my station and I would never be able to ride metro |
| That would be fine for me, but I suspect other people will be mad about it. |
| Need to get to work and go out for fun |
| Please dont close Mt. Vernon Square (there are a bunch of others that are important too, but please dont close Mt. Vernon Square especially) |
| I would use federal center SW in 2022 when I begin commuting for work |
| This would not encourage people to use metro more often |
| All of the proposed stops are ones I frequent. This would be unreliable and I'd stop using it altogether |
| Station closings are inconvenient for customers as the economy opens back up. Pilot some closings but not wholesale closing of all these. Platform crowding could become an issue at some stations if others nearby are closed |
| Grosvenor Strathmore is a necessary station for access to the arts and to support the very crowded suburb of north Bethesda |
| This includes so many vital stops, including mine! I would be forced to buy a car and drive as my commute. This is rediculous and inconveniences so many vulnerable populations who rely on metro for their livelihoods. Please don't do this!! |
| The silver line stations are very spread out, and closing the stations from Reston to the end will defeat the purpose of having the line. |
| Keep the stations open. Trains will already pass through them anyway. This is not a good way to encourage people to participate in DC businesses |
| College Park is a very busy station that serves the University of Maryland, primarily students who do not have cars. University provides regular shuttle busses to connect College Park Metro station and the campus which are free to everyone to use. College Park also has been a nice hotel right near the metro station so visiting scholars, conferences, and parents are able to enjoy DC. |
| East Falls Church is the closest station to me. I walk. Driving and parking elsewhere would be inconvenient and expensive. |
| I live close to Grosvenor-Strathmore and I use this station daily during the week. |
| I rely on the East Falls Church station because it has service from the Arlington County bus to my neighborhood. |

Proposal to close 22 Metrorail stations

| |
|--|
| Too much stress on the used to be connecting lines so this cut will it have shuttles? Some of the stations are hi volume and possibly transfer points for some |
| Are you trying to turn the system into a long distance commuter light rail? Closing this many stations is obviously a bluff. If you did you might as well close the entire system.. |
| Van Dorn is where my neighborhood shuttle takes us. The commute time to other stations is to long - we would have to add more shuttles, meaning an increase in HOA dues. |
| Sad to see so many stations that may be closed but I live roughly between East and West Falls Church so can live with this |
| I work at judiciary square and need it open when i return to in-person work. |
| I start at grosvenor and if I had to travel at all to another station I would just drive instead for convenience |
| Please don't close grosvenor -strathmore |
| I purchased a home in the Clarendon Metro neighborhood in order to utilize the train service. |
| Many commuters walk to Clarendon station ! Keeps autos off the roads |
| Clarendon is a key stop for my office. I would likely then drive to work more often |
| This will have an extremely negative effect on me as Im using the Grosvenor-Strathmore station to travel to work |
| There is no metro close to Innovation. By vehicle, Reston-Wiehle is still a 20+ minute drive in normal traffic, adding to whatever metro commute exists. Travel into DC hasnt been a legitimate option as of now. |
| This would completely upend my ability to not only commute but to be able to utilize public transportation to go to museums and other cultural things that Ive missed during the pandemic.Determining which stations to close due to pandemic era ridership levels seems shortsighted, if the goal is to return somewhat to normal. |
| Absolutely not. I live in Cleveland Park and absolutely need station access for child care services 5 days a week. I also use this station to get downtown for work (when WFH goes away, which it will as soon as vaccines are distributed). What is the definition of near other stations? Certainly doesnt apply to Cleveland Park and my home, while lugging a small child and all of her belongings to/from the metro station 5 days a week. |
| I live in Falls Church, so losing that station would greatly affect my commute. Losing access to the downtown stations such as Smithsonian station would greatly affect my post-pandemic travel. |
| This makes people get Uber's causing people to spend more money. Why not just drive at that point? |
| Many of these stations are critical. Ridership will likely increase again. And commuting is already difficult as it is and would not benefit to close so many stops |
| To close grosvenor station would be terrible. I have two visually impaired sons who rely on metro transportation. We live a half block from grosvenor station in MPDU housing. We could have to move and it's difficult to find affordable housing. Please do not do this. |
| Grosvenor Strathmore and Cleveland Park are absolutely essential and must remain open. |
| I live closest to Grosvenor stop and will be commuting daily. |
| So well only have 3-4 stations downtown? Making the service less convenient will result in further decrease in ridership, followed by more cuts. If you want to run the Metro system into the ground and abandon it altogether by 2030, go ahead |
| I work right by the Clarendon stop so this would be a huge loss if this happened. Please dont close Clarendon. |
| I rely on metro from the East Falls Church stop as my primary means of transportation. We bought a house near this station specifically so that I could use this station. Additionally, this station was just renovated so closing it would be a total waste of those renovation funds. |
| We have been using East Falls Church for years. While this station is somewhat close to other stations, traffic makes it very difficult to reach these stations. We purchased our home for easy access to Metro and Metro Bus. It would make commute very difficult for us. Please do not close East Falls Church Metro Station! |
| In non-pandemic times, East Falls Church metro station is a busy and very necessary station. I live near east falls church metro and have used it for many years to get to and from work and plan to use it for years to come |
| Please do not close East Falls Church! It is the only metro within walking distance to my home. |
| Federal Center SW is a back up station when the Lenfant elevator is out which occurs frequently. |
| Station closings at these popular stations are unacceptable |
| Even though there may be stations nearby, the other stations do not have parking available and/or are not convenient for various reasons. I would likely stop using Metro altogether at that point. |
| Need access to Clarendon and Arlington, judiciary square is necessary for transfers |
| These stations were constructed for a valid reason - - that reason still exists to keep them open |

Proposal to close 22 Metrorail stations

We use the East Falls Church station almost exclusively and there are always other riders there no matter what time we are there.

The EFC train station and other stations along the orange/silver line are already extremely heavily used and this area has developed (and relies less on car commuting) because of metro. It would be hugely irresponsible to close stations from EFC inward to DC, would leave thousands of people without a crucial commuting option, and force those who can afford it to instead drive. I don't know what metro thinks others who have less resources will be able to do -- bus service is slower and less frequent and a poor substitute for metro trains.

Judiciary Sq, Federal Triangle, and Smithsonian should remain open due to tourists.

This plan would make my commute to work significantly more challenging.

This would prevent me from being able to get to my office - I rely on the train to McLean for my commute.

Take East Falls Church off this list and it would be okay.

No to Archives, Smithsonian, Arlington Cemetery, Federal Triangle

The only station we use regularly is Grosvenor-Strathmore, so closing that station would cause a big problem particularly since the parking there is better than nearby stations. Also use Smithsonian to go to museums and Smithsonian programs.

Terrible idea. This cuts off whole sections of the city and makes commuting even more difficult for those in these areas.

Will be using the stations on the Orange line. Clarendon and Virginia Square.

I get on in Vienna- no impact

Grosvenor-Strathmore is the closest station to me, the others are not convenient. Limited parking if I need to park at them

I live near the Clarendon station and use it all the time to travel to work and go into dc. This would not only be detrimental to the businesses and property values in my area, but would also drastically raise the already insane cost of parking and make it hard for me to justify living in Arlington without an easy way to commute to work.

What other station is near Arlington Cemetery?

I use Grosvenor station every week multiple times

I regularly use the East Falls Church metro station for my commuting needs. It really is closer to me than West Falls Church and is the only station in my neighborhood.

I have a disability and live across the street from the VA Square metro station and rely on it to get to work. This would significantly impact my ability to transit to and from my job at a Government agency in the district of columbia as walking to Ballston is not possible.

I work in Clarendon and hopefully would use metro again when pandemic restrictions are lifted.

Eisenhower Ave needs to stay open

I use East Falls Church to get to NOMA near Union Station for work. It's already a very long commute. Driving would be expensive, time-consuming, and aggravating as well as bad for the environment. I already have to take a bus to EFC. If it closes I'd have a much longer bus ride to another station.

People plan where to live based on distance to metro stations. Closing stations limits these choices and is bad for the real estate market

Grosvenor-strathmore is a station near where many AU students live and it would take away transportation for many students!

I live walking distance to East Falls Church Metro and commute to DC. This crushes me.

Grosvenor-Strathmore and College Park stations should remain open.

If you close the Strathmore station and make the Shady Grove, Rockville, and Twinbrook stations every 30 minutes- commuting will be a mess ESPECIALLY considering the red line is literally ALWAYS delayed (even on normal schedule) and/or broken down.

East falls church and Clarendon are important stations

The closure of Grosvenor-Strathmore would not make sense, as it is a station with access to a significant parking garage that is necessary for my commute. Other nearby stations on the Redline do not have access to a parking structure and are otherwise accessible by bus from Grosvenor-Strathmore. As such I STRONGLY recommend considering these other stations for closure, if necessary.

I use the Greensboro stop for work and its my main way to the office.

Please DO NOT close Grosvenor station!!!

I live in Cleveland Park so obviously closing that station would impact me. There is an in going debate about increasing density in Cleveland Park. I would suggest tying the two together -- if Cleveland Park increases its density, then the metro station stays open. Otherwise close it and we can walk to the Woodley Park or Van Ness stations.

Morgan Blvd station is my primary station for going to work. I rely on this station to provide for my livelihood

| |
|---|
| Proposal to close 22 Metrorail stations |
| This is a depressing prospect. Businesses and residents near these stations will suffer greatly. |
| How does it make sense to close Grosevnor when reinstituting the turn-back? |
| I frequently use the Clarendon smithsonian stations |
| Not only would this dramatically impact my ability to go to work, it would also affect my home value. This is a terrible solution! |
| Again. Ridership will likely increase in 2022 when people are vaccinated... why close things down and make it harder for people to get around once traveling opens up? |
| This is a terrible idea! Archives, Federal Center SW, and Federal Triangle are critical, downtown stations that many tourists, locals, and Federal workers use and rely on. Clarendon is a hugely popular retail area in Arlington. Another death spiral for Metro if they do these closures. |
| DC area depends on tourism. When that bounces back, we want visitors to be able to easily and safely access the Archives, Arlington Cemetery and all the Smithsonian museums. Closing those stations will make that hard. |
| Ive been waiting for the Loudon Gateway station to open. I would use it. Also, would use the Archives station. |
| Mclean station is vital for my commute |
| Metro is the primary mode of transportation for me and my family. We do not own a car. Closing down the station would cause a tremendous inconvenience to me and my family. Bus service is not always reliable. It will make our lives more difficult and transportation more complicated and expensive. |
| Closing both Virginia Square and Clarendon would eliminate the ability to take metro to George Mason university and result in more commuters driving in. |
| Many of those are either tourist, services or nightlife destinations we anticipate will return to higher ridership once the pandemic is under control |
| If our federal office opens by January 2022, I will need the train to get to work. I currently live 1 mile from East Falls Church, and so needing to bus or bike to Ballston would become a burden on my commuting. Also, closing a station like Smithsonian and Federal Triangle would put a huge burden on tourists, who will come back to DC. The museums, at a minimum will reopen. |
| I currently use Clarendon to commute. Having to get to Courthouse would add at least 20 min to my commute and I would drive in that case. |
| Why close both Virginia Square and Clarendon. Why not keep one or the other. Also, there is no other close station to East Falls Church metro, that one should be kept open. |
| Closing stations would be unacceptable |
| Why have the stations and not use them? Other stations may be nearby but that does not mean it is easy to travel between them without Metro, especially with the cutting of bus routes. Please do not close stations. |
| Why not look at some of these and in stead of closing (some you may have to) just not make them stops for every train. NY does this with local and express trains and it works well, then people naturally go where is best for them or understand they have to wait longer for a train. |
| Absolutely not acceptable. There is nothing near East Falls Church, and there is a large neighborhood of people who rely on metro who live near EFC. I agree, get rid of clarendon OR Virginia square because , theyre within walking distance of each other, but do not get rid of EFC. |
| This list feels inconsistentâ€”why are you considering closing stations that have not even opened yet? I like that these stations reduce traffic at other nearby stations as I do not like being in super crowded metro stops (even before the pandemic) |
| I depend on the metro to get to work. I would not have a way to work or to the Capital One Arena. |
| As a Clarendon resident, the fact that this is even remotely being considering is horrendous. It would dramatically impair property values for homeowners and inconvenience residents between Courthouse and Ballston who rely on Metro to get to and from work when it is safe to resume in-office week |
| Ill be working in the Washington, DC office five days a week. The Grosvenor-Strathmore Metro station would be the best alternative for the commute. |
| It will cause major inconvenience for us as we take metro from work |
| I use the Cleveland Park Metro station. |
| I rely on the Clarendon station to get to and from work each day. |
| I need Arlington cemetery. I need Virginia Square. I need East Falls Church. I need Mclean. I need Smithsonian. If these stations close. I will have to buy a car and give up metro riding all together |
| Clarendon is a go to Metro stop for me personally and if Clarendon were closed I would likely stop using Metro altogether. |
| This assume ability to walk significant distnace. Elderly may not be able to do this |
| Need Grosvenor-Strathmore Station |
| I currently commute to archives weekly. If archives was not on this list, it would work for me. |

Proposal to close 22 Metrorail stations

Clarendon especially is a large business hub accessible to many essential workers who do not own a car.

It would be a grave mistake to close stations that are hubs for entertainment and tourism -- which is what Archives, Arlington Cemetery, Cleveland Park, Grosvenor-Strathmore, and Smithsonian are.

East Falls Church is critical to serving many lower income families who actually do depend on metro access for their livelihood. Its also not close to any of the others. Courthouse and Clarendon are close to one another so its reasonable to consider that. All of the silver line stops should be kept closed as they are not currently impacting anything if they delay being opened whereas the others require citizens to change their world.

Need Cleveland Park metro

Cleveland Park is station we use.

Close these stations past certain hours. It would be good to keep running them during rush hour and close after rush hour is complete each day.

East Falls Church is a popular station b/c it is close to my parents home when I visit them on the weekend. Also the fact that EFC holds 2 lines, I am more likely to catch a train there to go back to DC and not wait 20+ minutes for single color line. Is this implying that there is higher ridership at nearby stations? (Dunn Loring, West Falls Church, Ballston).

Need archives and federal triangle

I can't imagine what the back up would be if you closed Grovesnor-Strathmore!

Guessing lots of visitors use the Arlington Cemetery station. Probably somewhat seasonal, but still seems like an important station. Also are you going to account for parking at stations that remain open being able to handle all cars from closed stations?

The proposal is to close 3 of 5 consecutive stations in Arlington (Clarendon, Va Sq, EFC), plus Arl Cem. This is insane if youre running the trains past those stations anyway--minor incremental saving for large reduction in service. And why should Arlington contribute to Metro if youre not serving Arlington? Idiotic proposal.

Again, closing stations makes people want to ride metro less not more. If you start closing these stains whats the point of keeping the other ones open?

Please don't close Clarendon or Smithsonian!

I use G-S all the time...don't close that!

College park station is an important stop for 100s if students and staff at the UM.

I work for Arlington Economic Development and metrorail is key to our business attraction and retention efforts. Clarendon and Virginia Square are two key stations along the Rosslyn-Ballston corridor and it is essential that they remain open to attract businesses to locate to Arlington.

Smithsonian is right next the National Mall this is absolutely necessary to stay open is it's a familiar spot for almost everyone.

Arlington Cemetery and Smithsonian Stations are heavily used by tour guides. Closing them would be disastrous.

I also wk at Archives we have our own station. This building has NO parking is off Pennsylvania Ave with is a main road no parking

Closing Arlington Cemetery, Federal Triangle, and Smithsonian would significantly decrease access to major centers of national significance.

Need service (and parking) that are available at Grosvenor Strathmore

This would make commuting very challenging and frustrating

It wouldn't impact me but it'll decrease ridership a lot.

I live in Clarendon and could walk to Courthouse. But again, I would just opt to drive to work near Union Station

I would stop using metro if Grosvenor closed. There isnt sufficient parking at other stations nearby.

You just spent so much money refurbishing Falls Church. What happened to planning and budgeting. What a waist of funds and then you leave the riders with no alternatives. let's not forget you already severely curtailed our bus service.

If you close Grosvenor-Strathmore I will not be able to use metro. I moved here in part to be close to the station. My neighbors and I will be very unhappy if this happens.

I depend on Grosvenor station and parking. I would have to park further out and then the operation would move to every 30 minutes which would interfere with commuting.

This would increase crowding in stations and not allow riders to safely social distance. Most of the stations listed are commuter stops; once offices reopen, these closures would be devastating.

Close Archives, Arlington Cemetery , Eisenhower Ave, Greensboro, Judiciary Square, Smithsonian, Virginia Square, all times. Clos Federal Center, Federal Triangle, on Weekends & after 7PM.

I use the Van Dorn and Eisenhower station to commute to work so the proposed closures would not work for me.

I use College Park station but I could use Greenbelt instead

Proposal to close 22 Metrorail stations

Would love to see the data that claims some of these stations have low ridership because it doesn't make sense for some of these. Also, so many closures would really limit service. Terrible proposal.

Closing neighborhood stations kills the connectivity of these communities and exactly why we moved where we did. The thought that a station is near another doesn't help when walking is no longer an option and an extra bus ride & connection will add 20+ minutes to an already 65 min commute. This is hugely impactful and we strongly suggest station closures are taken off any budget proposal.

The Cleveland park station is the important to travel to places I need to go. Like the new library and Adas Israel.

Grosvenor-Strathmore is my closest station and one that I can walk to. This station is very high traffic and the parking is readily available. If it closes then Bethesda will be the closest. I can't walk there and the parking isn't very good. Closing Grosvenor would be a major hardship for me and people in my neighborhood!

Clarendon metro stop is a vital vehicle of transportation for my work. I would not want to see it closing.

Or having local versus rush trains during low ridership times for these stations

I don't have a car and currently walk to Grosvenor-Strathmore station. I purposely chose to live somewhere I could walk to the metro to get to work. If Grosvenor station closed, I would have to move or figure out how to take a bus to another metro station. This is by far the most disruptive proposal in my opinion.

I could understand stations that are close to other stations - VA square, Archives - but East Falls Church is an important hub for the orange and silver lines

My husband uses the Archives station for work daily - this cut would be frustrating.

This sucks

Especially in urban centers, like Clarendon, Virginia Square, where not many riders have their own cars to drive to far away stations, closing a station will mean they will have to walk over half an hour to reach stations which were previously accessible with a 10-15 min walk.

With my travels to work I get on at Smithsonian in the morning and in the evening.

East Falls Church is within walking distance of thousands of homes in the surrounding neighborhoods. It is better to have less frequent service than to completely cut off huge swaths of Arlington to metro service entirely.

It appears that some key stations would be eliminated, which is a concern

No way! Do not close Clarendon, Virginia Square or Fed Triangle! I'm sure many will be traveling back to work by then! If these stations closed it would severely hamper my commute, make me late for work & add to already long child care areas. NO.

Absolutely not. Only stations that are close to each other should be considered, if at all. East Falls Church is at least two miles in either direction from the nearest Metro station and it is a transfer station.

Are you crazy? I use Grosvenor-Strathmore, but it is also home to a huge parking garage for park-and-ride, three huge apartment complexes, and the Strathmore Performing Arts Center. How would tourists get to the Mall and Smithsonian museums if you close all those orange/blue/silver stations?

My office is near Mt. Vernon, and USDA is next to Smithsonian. Again you make plans without thinking about changes in ridership if telework for federal employees ends. You could save money by firing your planners.

STRONGLY oppose this plan; Silver line phase II is very important to me

This is just plain dumb. It would only reduce ridership, most likely more than the cost savings.

I use most of these stations, particularly Smithsonian, Federal Triangle, and Archives.

Why did we build those stations only to close them down?!? No service in these areas will disproportionately affect certain groups of people

If Archives closed, I would stop using metro completely.

As a commuter and non-commute to work user of the Metro, I'd rather see evenings curtailed or weekends curtailed, not locations.

I need the Grosvenor-strathmore station open for sure. Would be terrible if it closed as the next station is too far and inconvenient. Closure will also affect property prices in my area. Do not support the closure of Grosvenor/Strathmore station.

Closing Clarendon and Virginia Sq would make morning commutes insane. I would never be able to get in a train at courthouse.

Closing these stations will negatively impact adjacent businesses that made a site location decision based on TOD activity. It would also reduce the accessibility to transit to the point that I would drive my own car between Arlington and DC and never take Metro.

Clarendon must remain open.

Grosvenor Strathmore should remain open

Proposal to close 22 Metrorail stations

Closing stations would put undue burden on individuals as well as communities. This is not a sustainable solution

You might as well close down the entire metro with these plans because it will make it impossible to use the Metro to get to work for just about everybody. Other stations nearby? You consider a walk a mile for someone physically unable to make the trip nearby? Is there anything nearby College Park? or Archives station? Get real.

Smithsonian stop must remain open especially during weekends and tourist season.

Judiciary Square is the station I utilize when I physically go into my office for work.

First, Metro has just spent a fortune upgrading the parking at Grosvenor so how would that investment be recouped. Second, Grosvenor serves the Strathmore center and, secondly, people who use the Metro to attend programs at Strathmore would have to drive. Before the Covid period, parking was difficult to find at Grosvenor as the station was so heavily used, and once people can take metro again it will be heavily used once more.

One of these stations is my home station (and most used). The next closest station is an extra 15-20 minute walk.

I use the McLean or Greensboro Metro because there is parking there. We are not legally allowed to park at Tysons to take the metro. I often visit the Smithsonian and would have to walk much further, even in bad weather, to find another metro station. I think Smithsonian is actually busy when there is no Covid.

i dont use any of these stations

East Falls Church was recently renovated, has great bike access and is key to a burgeoning Falls Church City - it needs to stay open!

I do use Arlington Cemetery, and Clarendon stations.

Ridership will increase when businesses open up. I do not support closing stations, particularly those that have been recently renovated, etc. That seems like a very poor use of resources. Also, many of these stations are in densely populated areas. Im very surprised that East Falls Church is being considered for closure.

Grosvenor-Strathmore is important with a lot commuters parking there. There are no stations with parking that are close.

I depend on some of these stations -- such as the Smithonian station to attend Smithsonian events.

Trains will be even more crowded, and a lot of people will be cut off

This is bad. People should have access to stop closest to them. Infrastructure exists, you should use it.

Closing stations is the worst possible option For my family

please do not close the grosvenor metro stop

This cuts off large swaths of metro access in Arlington and would have an adverse affect on housing prices and other businesses currently centralized around existing stations that would then be closed

I live in a community where many people do not have cars, so closing the Grosvenor-Strathmore metro station would be detrimental. Please consider another plan.

Closure of Clarendon would overwhelm Courthouse. Given one escalator entrance & exit I cant imagine the crowds when this re-opens, unless only college age students are left in the area.

I very occasionally use the Virginia Square station

If you close those there would be no point in using metro, especially the stations outside of the beltway those are not walkable

Insanity! For years, high rise condos/apts with insufficient parking have been built along the orange line Rosslyn to Ballston SPECIFICALLY to encourage use of metro instead of cars. Closing Clarendon and VA Square is pure bait and switch and evil.

What major metropolitan area in the world would ever do this to its customers. You built the stations. Developers and residents moved near the stations and now you propose closing them. Really, how much does it cost to have a train enter a station. Find other ways to save money, like reducing the number of managers and middle management, and take a pay cut directors! Seriously!!!!

By 2022, we'd be vaccinated and I'm guessing have to resume our normal work schedules. It's ridiculous to think we won't need these stations, my home station among them. I have relied 100% on Metro to get me to work for 11 years until the pandemic and I'll start relying on it again by this fall. There is literally no other way for me to get to work. Buses only would change my commute time from 40 minutes to at least 2 hours! That's 4 hours just going back and forth from my job, assuming there are no traffic jams to slow it down more.

Do not close stations close to my home and work including Clarendon station.

This is a horrible idea. You basically will ruin DC. It will never be able to recover. So many implications and too many to list. Who ever came up with this is either insane or is making a political statement to get more money.

This question is a pure demonstration Metro is clearly not anticipating ridership demand increases as COVID restrictions are lifted.

Proposal to close 22 Metrorail stations

This is a disaster. The stations all have businesses and will become handouts for all sorts of trouble.

I do not want to see EFC metro close. This is a high commuter stop and it is ridiculous that they would consider closing this station.

While this plan works for me personally, I imagine this would be incredibly frustrating for people who intentionally live near metro stations for accessibility. This seems incredibly unfair.

Closures will have too many unintended consequences and result in crowding at the other near by stations. Businesses near these stations would be negatively impacted, along with potentially the housing prices of homes nearby.

Whats the point of having these stations if theyre closed? A lot of the ones cited are NOT near other stations. (think its crazy to maintain that Arlington Cemetery, East Falls Church or Smithsonian can be readily accessed from other nearby stations (just as examples).

Grosvenor station with its large parking structure is important to my travel needs.

va sq and claredon stations should stay open at least part of time

I live within walking distance of the East Falls Church Metro Station. If it closes, rather than take a bus to Ballston, I will drive rather than take combined Metrorail and Metrobus.

Closing stations combined with eliminating routes would leave people stranded with no way to get around.

I need access to Clarendon via metro

Those stations have far distances between them. Would be a burden to an average person much less someone who is disabled

We rely on Eisenhower and Van Dorn. Closure would ensure that we no longer use Metro.

Can't shut Grosvenor. That's insanity. I'd never ride Metro again and probably sell my house.

So many people live near those stations that rely on those stations and it'll also impact tourism if those are closed

I live near Virginia Square and purchased our condo here anticipating using the metro on a frequent and regular basis.

Given previously described reductions in train service, how much cost savings is there in closing stations? Closed stations means riders will likely find other modes of transport and possibly not come back to Metro Rail... while less frequent service, as convenient as it may be for some, stand a better chance of retaining them as Metro Rail customers.

I live in Clarendon and work at McLean as does everyone at Capital One.

I live and work near the stations that would close.

You are closing stations that you are currently building? How insane is this? Please do not close stations, especially the Arlington and East falls Church. How are urban/suburbanites supposed to get anywhere? You dont have enough parking at West Falls church. Ive been there after like 9am and its FULL. The pandemic will be over, and then what? Youve screwed the DC area?

I live in McLean and used the metro and that stop daily on my way to and from work. Tysons Corner is a growing business hub with at least four new business buildings currently being built by the McLean Station. Closing the station would be a huge disservice to commuters and those businesses and the community.

People who live between/near Van Dorn and Eisenhower metro on Alexandrias West side would be HEAVILY impacted if both Van Dorn and Eisenhower metro stops are closed. Would highly encourage keeping Van Dorn metro open since there is a lot of housing in that area and heavy reliance on metro.

the college park station is very important for my household to get to school/work, we dont have enough cars to get there otherwise

This would be terrible and make it hard for me to get to work.

ABSOLUTELY NOT. We live in Clarendon because of its proximity to the metro/DC. Rosslyn is an area where there are a lot of office buildings. But Clarendon has grocery stores, fitness centers, shopping. It would be an outrage if it closed. We are a 30 minute walk from both Ballston and Rosslyn. If anything, closing courthouse would make more sense since the next major stop is Rosslyn. People in Courthouse come to Rosslyn or Clarendon more often. We are an extremely residential area with a lot of commuters/ liesure travel to DC. Our rent is expensive because of the proximity of the metro. Clarendon would suffer without metro access because of Whole Foods, Trader Joes, all of the shopping, and restaurants. Whereas VA square and Courthouse do not offer as much with regards to those categories. A lot of young people and older people live in condos in these areas due to the proximity of the metro service. It would be ridiculous to close Clarendon.

Arlington cemetery station is convenient to visit the cemetery, especially for tourists. Its difficult to get there without this stop.

I commute using Grovesnor-Strathmore

Closure of stations will kot work particular when us government restores full office return, estimated to be june 2021. Several proposed stations serve growing communities and heavily represent federal employees. Do not close them. If needed, raise cost of riding.

Grosvenor-Strathmore is an essential metro station with a large parking lot, closing Grosvenor-Strathmore would have big impact on use of metro services.

Proposal to close 22 Metrorail stations

I rely on the Eisenhower station to utilize metro

I believe closing stations is the wrong direction to be moving from a business and environmental perspective. Less people will use the metro which would lead to future closures. NYC has even more frequent stops than DC. The more comprehensive the system is, the more attractive it will be to potential customers.

Closing Virginia Square, Clarendon, and East Falls Church metro stations will significantly disrupt commuting patterns on the I-66 corridor and impact local business health in Clarendon and Virginia Square. Strongly recommend metro maintain investment in these metro stations rather than maintain service in outer suburbs (silver line areas). Closing Smithsonian and Arlington Center which are heavily used by tourists that drive a large part of the regional economy will also be detrimental.

Absolutely not. Destinations in-between remaining stations would likely suffer, as people would be less likely to visit: you now have to rely on a third transportation mode (scooter, ride share, taxi, etc.), increased travel time while waiting on additional transportation, and the increased travel distance from the resulting Metro station. Public transportation needs to be more accessible in order to be used more frequently; reducing stations will only worsen the situation.

Cleveland Park is not close to other stations. For what it's worth, I don't live in that neighborhood so my comment is not based on self interest. It's just not at all close enough to Van Ness or Woodley Park.

I would not recommend closing both Clarendon AND Virginia Square.

My courthouse platform already too crowded. Please keep Clarendon and va square open

East Falls Church is not all that close to other stations and there are good public transportation options for the neighborhoods surrounding EFC to access the other stations. The only available bus lines from my neighborhood to Ballston have all been shut down. EFC is walking distance. If EFC closes, I likely won't continue to ride the Metro.

Some of these stations are major hubs for travel. I can not imagine it makes any sense to close them.

Closing adjacent stations (such as Clarendon and Virginia Square) would impose significant hardships, especially for senior citizens. Closing Federal Triangle would further overwhelm Metro Center.

This is a major problem for myself and my family. Living directly on Eisenhower avenue I use this station most often and shutting it down impacts our community a great deal. This station is how our community travels to and from work everyday. It is not only an inconvenience but it created unnecessary hardship for us to have to travel further to another station.

Older riders depend on Grosvenor Strathmore. No art center access without it. No walkable station for non driving seniors

Will stop taking the metro all together. This would cut off major access hubs and essentially kill new ridership for your business.

It is stupid to close stations.. The pandemic is temporary

We live within walking distance to Grosvenor and before the pandemic commuted into DC five days a week. This might change our calculus on using Metro to get to work.

This would impact my wife and I significantly as we depend on silver line for commute.

I would no longer use metro if the College Park station is closed.

I'm sure closing of station means more travel for people because they will have to walk the additional blocks or catch a bus.

Your definition of near other stations is quite inaccurate. If you close both College Park AND Greenbelt, you are talking many many miles to the nearest station.

Please do not fully close East Falls Church, right when we go back to work!

Grosvenor is essential to my commute.

Grosvenor-Strathmore is where I commute from. Property values would be highly impacted.

After all the input and construction of building these stations, it would be a shame to eliminate them from service. Plus, this would greatly inconvenience a number of people. Instead, why not market Metro as a way to get around starting in January 2022 instead of closing stations?

Please do not close Clarendon Station! There are so many people who rely on it! All these residential buildings with so many people in it live in Clarendon just because of Clarendon Station. It will destroy wonderful Clarendon neighborhood and all the businesses. The impact is horrifying if you close Clarendon Station! We beg you please do not close Clarendon Station.

That would greatly decrease my chances of riding Metro due to needing other transportation after getting off at the next closest station if some are shut down.

East Falls Church is significantly far from the previous and the next metro station and the closure of this station will negatively impact my daily routine and the value of my property.

No! We need Clarendon and Ballston, both are in densely populated areas and have noticeable ridership.

I don't see the logic behind closing tourist based stations like Arlington Cemetery, Smithsonian, Clarendon, and the new Silver Line stations (which I don't understand how you can classify them low ridership if they haven't even opened yet outside of the pandemic). Low ridership during normal times or pandemic times?

I live at Grosvenor and rely on the Redline for work.

Proposal to close 22 Metrorail stations

I live next to the Greensboro stop and I am 66 years old. The extra mile round trip to the next closest station would require a cab especially in cold or inclement weather. I would probably not use the system at all

If things are back to normal this would be disappointing.

Arlington Cemetery, Federal Triangle, Smithsonian are stations I frequent on the weekend since they are close to tourist attractions. Clarendon, Virginia Square are stations close to restaurants and my company so my company teams frequent there for team events.

Terrible idea. These are important stations and you are only discouraging ridership by closing them. I will start driving instead of taking public transport if your cuts get much worse. I've had it with trying to save my bus/station every damned year.

Virginia Square metro serves a huge number of condo dwellers and two large neighborhoods. There is enormous expansion plans for the immediate vicinity, including more condos, apartments and a hotel. If you close both Virginia Square and Clarendon, vast swaths of clarendon will no longer be walk-to-metro. Courthouse metro is too far for walkability. Courthouse serves far fewer condo buildings. You will increase the number of people in cars exponentially.

We can walk to East Falls Church, dont close it. Clarendon is needed too.

I used the Clarendon station. Walking t courthouse or ballston would be too far, especially if the va square station also closed. This area is seeing new development and ridership will increase, especially after covid and people start traveling into DC for work/fun.

Grosvenor-Strathmore is a much needed station that provides essential service to so many of us in the adjacent buildings. Its the main reason most of us moved and live here.

I take the Metro not only because of the efficiency of the trains themselves, but the convenience of stops prevents me from having to walk.

We chose our current residence largely due to its proximity to the Eisenhower station. It permits ease of access to the city without having to drive. COVID has drastically curtailed such activities yet in any post-COVID environment the loss of the Eisenhower station would be a major detractor for us and could in fact lead us to leave the neighborhood.

We need to keep all stations open so that riders do not have to find other transportation modes. This will cut down on greenhouse gases and will keep our region moving forward with a dependable and efficient mass transportation system.

The East Falls Church metro station is critical for my family!s transportation needs.

Are you planning on doubling parking? This is ridiculous.

would make my commute very difficult and I would consider not using the metro as my commute

I live near the Grosvenor station and from what I could see pre pandemic the ridership was not low at all. It is ridiculous to close all those stations and inconvenience all those people. Metro was built for public transport, not selective transport

Working at Capital One, the closing of the McLean station would be a dramatic problem and would affect ~1K people who rely on Metro Service for daily transportation

I live next to the Grosvenor Station and dont have to drive and park there. If it closes, I will have to drive to another Metro Station making my commute longer and cost more. If Im already driving to another Metro Station, I might as well drive downtown to work instead of spending more time and money taking the Metro.

Dont close Arlington Cemetery. I know it has low ridership all the time, but thats not nice. Close all the other ones, but not that one. Skip it if you need to, but dont close it.

I can walk to grosvenor. I'm not driving to another station just to wait for a train and have a still onger commute on less frequent trains. I've commuted via public transportation for almost 30 years, but you'll lose me.

Closing some metro stations like these (due to low ridership, being car-centric stations or close to another station) allows for more efficient services and faster travel time.

A lot of apartment buildings growing in the area of East Falls Church and one of the reasons is that is a good metro station to get to, how would that help that group?

I live by the east falls church metro! Do not close it. I need it to commute everyday.

This would add over a mile to my daily walk to/from metro, which would be a major disincentive to metro use. I currently anticipate using metro for 5 round trips a week in January 2022 but this would make it likely I would use alternatives in poor weather and maybe discontinue metro use entirely.

For how long? We are in a freaking pandemic so we do not use Metro. Youve given us no reason to think Metro is safe in many respects. Closing stations is a symptom of your FAILURE to respond to the situation not a solution. The start of a gradual death. Give us a timetable and your plan to give rebirth to this poorly designed system and maybe you will succeed. E Falls Church is slated for massive redevelopment - are you trying to kill that plan? Rethink your desired outcome and give us a sense of a positive future. We pay the board how much? A high school class would heve a better plan.

I dont know how Grosvenor is low ridership. Maybe during the pandemic, but you have tons of apartment buildings, a school, and Strathmore. I dont get it.

I primarily take metro from Grosvenor-strathmore to work, closing this station will create great hassle to me and thousands of other travellers.

Proposal to close 22 Metrorail stations

Cleveland Park is my home station and an anchor for our vibrant retail. I would have to walk an extra 10 minutes to get to Woodley Park in oftentimes inclement weather.. those days I would surely take rideshare rather than dealing with such an inconvenience

My station is only a close to other stations if I drive to metro which I don't.

Reason I am living in Falls church is to be close to EFC station I walk 12-15 min to station.

Virginia station is central to many people working in DC. As the Covid restrictions are eased more people will be using this station to get to work in DC and attend social events in the evenings.

I specifically moved to this area due to its proximity to Grosvenor strathmore station it would severely limit my access to the city

This would not work for a lot of people. Near other stations is not near enough to be walkable and lots of people rely on the above stations to get to or from work every day.

You are suggesting closing the stations I use the most -- East Falls Church, Virginia Square, Smithsonian, Archives. You are also suggesting closing the stations I use as back-ups -- I use Clarendon when Virginia Square is not available, Archives if Smithsonian is closed. I cant help but notice that the stations you suggest closing have more public parking and fewer WMATA lots. It would crucify Arlington real estate to close the better part of stops on the Orange line. What are you thinking? That entire part of the county was designed around housing for people who dont drive and use Metro to get downtown to work. Do you really want the Clarendon bar goers to get in cars??? How am I supposed to get to National Airport, Uber to Courthouse? I might as well take a cab all the way there.

This is the most absurd request that I have ever had the privilege of responding to. While I understand that low ridership could be an issue, WE ARE IN A PANDEMIC. These stations in normal times are absolutely crucial to how this area functions. The relief it provides families of all socioeconomic standings is so important. I cant even fathom the toll this would take on our already disastrous traffic situation. Not only for metro riders, but for drivers. This is absolutely the most unacceptable plan I have ever seen and I will absolutely work to fight this tooth and nail. Shame on you for even suggesting this.

The only reason Grosvenor-Strathmore has low ridership is due to the pandemic...the Strathmore Center that is located at Grosvenor strathmore metro is currently not offering as many entertainment venues as it did before the covid 19 pandemic started, for obvious reasons. Grosvenor should not be closed

Falls church has easy access to pentagon right now; this May drive longer commute times bc these people will now drive

I think having these stations (Grosvenor/Strathmore and Smithsonian being the most important to my family) is essential.

Unclear how those stations were chosen, I use Clarendon and McLean and VA Sq frequently

I could see closing these during off times or weekends.

closing Smithsonian and/or Federal Triangle would be a disaster for people wanting to go to the mall.

Please dont close Clarendon!

I walk to the station and need it to be a manageable walk. I am in my 60's

East Falls Church is the last westbound station where one can change trains to go to the Silver Line, it is in a more urban area where new townhomes and other denser housing is going up, and it is the station nearest us. The nearest alternative station is West Falls Church, which is not reasonably accessible by walking, does not connect as many lines and is in a much more suburban area.

Taking metro to work is the only good options. Drive either Bethesda or White Flint, park there, then take the train would add tremendous burden to our commute and not a viable option.

i am completely dependent on the Strathmore station and bought a house solely to have access to this station

Exceptionally harmful to my commute and tourism.

My commute time would double. My beginning destination would close and my terminating point would close, forcing me to walk much further. I would drive or telework, abandoning metro for good.

I strongly oppose closing the Grosvenor-Strathmore metro station. I rely on this station to access Metro. If I had to walk to White Flint that would add an additional 30 minutes onto my commute. I would probably opt for an alternative to Metro such as driving alone to work should this proposal be implemented.

Doesnt make sense to close two stations that are adjacent: Clarendon and Virginia Square. Just close Virginia Square, and maybe Courthouse. Clarendon seems like it would have high ridership.

We use the Grosvenor Station and would hate to see it close

Need VA Square or Clarendon . Many affordable housing being built near those on Washington Blvd. Very unfair as housing planned before those closures

Proposal to close 22 Metrorail stations

This change puts my life at risk. Just because there is another station close by does not mean I can get to it. I specifically live directly by my station so be able to get to metro. This change would literally ruin my life any may cause me to die.

Smithsonian, Virginia Square, and McLean are the only 3 metro stations I use!

We just bought property by the Clarendon station bc of its proximity to the metro. This is a public service that should not be removed due to WMATA's inability to manage the budget. Appalling we would even consider it - worse than some developing countries infrastructure.

Please do not close metro stations.

Grosvenor - Strathmore is the main station I use. It is the closes station to me and closing it would have a negative impact on many of the people who live around this area.

I would have to walk to Clarendon from Virginia Square. It would be a slight inconvenience.

So your plan to address low ridership is to reduce the destinations that people can use you to get?Its a choice.

Keep

I dont know how close these stations are to other stations. If a 5 min walk away, then this proposal may be ok. But on the face of it, this doesnt seem like a great idea. Would make transit more inaccessible --- unless there were better bikeshare options (or even dockless bikeshare)

I require regular access to both Clarendon and East Falls Church Stations in particular.

Cleveland Park is my home station. This would greatly reduce my use of Metro.

closing the college park station would limit students ability to travel to/from the city for work/school/opportunity. Perhaps ask the campus to help fund/promote that station, since it benefits their student life

This is insane plan and ploy for more funds.

This is extremely harmful for people with limited mobility and destroys the fabrics of neighborhoods. Increase service!

Some of these stops are to places that can't be easily accessed without. Smithsonian, cemetery etc

Grosvenor Strathmore is the main station I use to take red line to work and it's very convenient. Once things get back to normal it will be difficult if this station is closed. Once offices open all these stations will be required.

Pre pandemic, I was a Morgan rider, when was this assessment made, there are a lot of federal workers on the clarendon, fed center, fed triangle judiciary sq and smithsonian stops - - unless you have intel that indicates feds arent returning to offices this is horrible

If you want to keep current riders and encourage new riders, you need a totally different approach for post Covid times. This is a terrible idea. Instead of closing, partner with the local communities/neighborhoods affected to give confidence in riding Metro- cleanliness, ease of use, environment friendly, no long commute.

You dont pour money into new Silver Line stations, around which many businesses opened to take advantage of its accessibility, and then never open them. What jackass proposed that? Outrageous! Silver Line stations at minimum should be off the table.

This would be exceptionally difficult without another form of transit at these stations. If you plan to expand the citibus then this may work but otherwise you'd be cutting out a LOT of people

I use College Park Station at times.

The point of living in Arlington near Clarendon is to walk to the station. It cannot be closed.

I use Grosvenor-Strathmore metro. The parking garages there are full most weekdays by 9:45am (except reserved parking). This would have a significant negative impact on the area as commuters come From Potomac, etc as it is the last parking station. In addition, there are significant renovations being done to GS metro area. It's also used heavily for Strathmore events.

Im Vienna. If you close East Falls Church, the parking situation at Vienna might get nuts, which might prompt me to take unanticipated decisions about ridership. But hey, Im one ass in one seat.

There are no walkable alternatives to some of these stations. This would remove riders from the system.

East Falls Church closure would lead me to stop using Metro altogether, as W. Falls Church and Ballston are both too far for me and my family to reach. Please save the EFC station!

I use Clarendon, Virginia Square and East Falls Church frequently. The nearby alternatives are not sufficient. Moving riders to other stations would increase crowding.

Archives, Arlington Cemetery, Clarendon, College Park, Federal Center SW, Federal Triangle, Judiciary Sq, Mt Vernon Sq, Smithsonian are the primary source of public transportation to these areas.

Proposal to close 22 Metrorail stations

Many working people and older people need East Falls Church and Clarendon stations,

Looking to purchase a home in the Cheverly area and this would negatively impact my ability to commute. Closing stations should never be on the table

Closing both Virginia Square and Clarendon would make it impossible for me to take Metro ever.

Maybe leave the ones downtown open and Arlington Cemetery

Give the Silver Line a chance! I think a ton of Loudoun/Ashburn/Sterling/Herndon/Reston riders will use the Silver line. Reston Town Center is one of the more business-focused destinations. Close Innovation Center if you must but Reston Town Center is very important. I will use metro to go from Herndon to Reston Town Center for restaurants.

Often use clarendon!

I'd prefer for Cleveland Park and Eisenhower stations to remain open, even if I had to pay a little more.

Stations should be opened with reduced headways to maintain nearby stations to origins and destinations.

Once covid ends and I return to the office, I will need to take metro to work because I can't drive. Closing so many metro stations in Arlington - specifically Clarendon and Virginia square is not workable. Courthouse is too far to walk

Grosvenor -Strathmore is critical to my commute and we depend on it to go to work

By January 2022, i expect life will go to almost normal. Ridership from Grosvenor-Strathmore will bounce back. Also if Strathmore opens almost close to normal.

Arlington Cemetery is a national shrine that should be readily accessible to all in the area. It is not an easy walk from other Metro stations and should remain open.

I basically take the Metro to go to College Park since I work near there.

east falls church is a very residential neighborhood and i use the train from there when I need to go to the city. And its not just me, it is the same for more than half of my city, Falls Church City, this is the closest station for this population. If you close it, I will not ride metro at all because going to other stations means driving and parking, which means, we might as well drive all the way to our destinations.

Keeping grosvenor Strathmore open is important

Only reason for low ridership is because of the pandemic. Do NOT close these stations!

as a family with two parents who take the metro at Cleveland park including to take our son to school, this would be unworkable for us.

This would put significant stress on other stations, and make the Metro less accessible for a lot of people. It would also affect property values and decrease frequenting of businesses near those stations, potentially reducing tax income for various jurisdictions, and driving small businesses into further financial trouble beyond that caused by the pandemic.

In January 2022, if we are out of quarantine, I plan to regularly use both the Virginia Square metro stop and Clarendon metro stops for groceries trips to Giant and Trader Joes, respectively.

I have used the East Falls Church everyday--pre-pandemic0- since it opened and purchased our house to be close to this Metro station. This would pose a significant commuting hardship and will also lead to a lower value of all properties near the East Falls Church station. I strongly oppose the closing of the East Falls Church station. The Metro was designed for commuters and to take more cars off of the area roads. If the station is closed, I will have no choice but to drive into D.C. daily--at a great expense and damage to the climate from more cars on the road.

Strathmore is essential. It is a big draw to live in this neighborhood. I can walk to it and there are no metro stops close enough with parking!! I'm hopefulThat we will start going toFunctions atThe Verizon centerEtcThis year

Closing both Virginia Square and Clarendon doesnt make a lot of sense. Close the less active one. Many people take metro to Smithsonian. Why would you close that one?

Need Van Dorn Metro station open for commuting to Pentagon.

Absolutely not. This is a supremely dumb idea

I can walk to the EFC metro. I cannot walk to the WFC metro. So the EFC metro station is proposed being close for low ridership. I do not think you will capture most of those people at WFC. I think you will lose them from the system. Another death spiral.

Closing both Clarendon and Virginia square would be difficult since the only stops would be courthouse and Ballston. Closing Reston station would be difficult, if there are no other stops in Reston.

Do not close East Falls Church

My office is at smithsonian. The USDA building has 10s of thousands of employees that use that stop.

Not crazy about this as I sometimes get off the train at Virginia Square and shop in McLean. But would not be the end of the world.

Proposal to close 22 Metrorail stations

The McLean station is the only way I can get to work. There are no other walkable stations nearby. This would not work at all!!

Smithsonian is vital to making museums accessible for everyone. Additionally I get off at the Clarendon metro stop frequently for errands or happy hours that I would expect to resume in 2022.

Closing McLean station would be hugely problematic to all the high rises & businesses in that area. There is no easy way to reach the Tysons corner station for people who have to commute early in the morning or late in the evening.

I would be most affected by the Grosvenor-Strathmore closure. My family moved in order to be closer to this station so that we could use it more.

How is Arlington Cemetery considered to be near another station?

Again you seem to be making the situation worse. There have to be better ideas to cost save.

WMATA would open Silver Line Phase II, only to close multiple stations?

This is the worst plan. In order to maintain ridership, the trains must continue to serve as many communities as possible. This plan will likely REDUCE ridership and reduce good will among many communities.

Closing these stations would not directly effect me, but still feels like theyd negatively impact a number of people. Some of the nearby downtown stations may be fine, but the ones further out are an issue.

Why not close White Flint instead of Grosvenor-Strathmore? Grosvenor has a parking garage and multiple bus routes.

Do not close the College Park metro. The only reason ridership has been low is because of the pandemic. Not only does the metro provide invaluable access to the DMV to students, but also faculty and staff who may need the metro to get to work every day. Ridership will almost definitely go up once it is safe to return to everyday life and it is safe for students, faculty, and staff to return to the UMD campus

If these stations were closed, I would not use the metro. Two of these stops are the only ones I will need after my return to the office in January.

DC needs more stations, not fewer! Dont sacrifice public transportation!

Smithsonian!? Are you KIDDING ME? You must be out of your ever-loving minds. Sure, ridership is low right now. Pandemic, anyone? My two most used stations (as a non-commuter) are Smithsonian and Clarendon.

Not applicable to me personally but this is a terrible ideA. People can't just get to another station

East Falls Church is an important gap between Ballston and further west locations. Driving into Ballston is inconvenient, and driving west to East Falls church would not justify my continued use of metro on a regular basis.

Many of these stations (Van Dorn Street, just as an example) are NOT near other stations. Van Dorn Street is over 3.5 miles to the closest station, which would be Eisenhower Avenue. And since youre planning to close Eisenhower Avenue as well, the closest stations would be King Street (4.8 miles) and Franconia-Springfield (4.3 miles). That isnt close, especially in rush hour traffic.

We require Grosvenor strathmore for daily commute

I use the Grosvenor-Strathmore Station to access medical appointments. Closure would be an extreme hardship.

This would truly be unacceptable. We are experiencing a rapidly changing climate that is already manifesting itself with more frequent natural disasters throughout this country. Good public transportation is crucial toward combatting this trend and we need to invest more in this type of infrastructure, not less.

The silver line is my only mode of transportation to work, as many others in my company (capital one). Traffic is already congested in that area when over half the company does comment via train. Between traffic and the entire company needing to commute via car (which some do not even have) would renderer it impossible to get to work.

the money being spent on new stations going West on the Toll road will be wasted out of the gate if stations opened but not really. People will find other methods or commuting options.

We bought our home in Reston in March 2020 after moving from out of state specifically so I could ride the silver line from Reston Town Center to Arlington. We are expecting to return to the office in July, so this closure would dramatically effect my commute.

Some stations aren't close to others. Keep all stations that would require walking more than 1km

I take the metro to work into DC and Grosvenor Strathmore is my metro station. If Grosvenor Strathmore closed that would have an immediate negative effect on my commute into downtown DC.

I commute to work in DC from East Falls Church. I can walk from my home to the East Falls Church Station. If East Falls Church station were to close, it will be extremely difficult to get to the next nearest stations (West Falls Church or Ballston).

Proposal to close 22 Metrorail stations

Clarendon is my preferred station. I could use others, but prefer not to.

This one is not at all desirable. I particularly need the Grosvenor-Strathmore station. Failing to have this station open would present a significant hardship for me in terms of getting to work each day.

Other stations dont have entrance / exit facilities to handle any more rush hour traffic. Would not be safe to wait on platform - too little space / jostling near tracks.

Parking is easier at Grosvenor for me and the walk is shorter. I cannot walk very far.

This is the only station I can reasonably access from my work. The buses are so infrequent and slow that it is not reasonable to consider this station near another station for any practical purposes. I also cant imagine that it will have low ridership once more people are commuting to in-person school and work again. This station also provides an important connection between the Metro and the MARC commuter trains that would be broken if the station no longer had Metro service. I strongly request that service at the College Park station not be suspended.

I believed all these stations are needed, particularly Clarendon, East Falls Church and Reston.

Eisenhower Ave station is a big drawcard for the apartment complexes around it and the businesses in the area. Closing the station could have serious impacts to them.

Do not close Grosvenor-Strathmore station. I believe it is a mistake. Grosvenor-Strathmore is not a low ridership station.

Several of these are station I use often.

Clarendon is a major station that should remain open.

If East Falls Church station closed I would no longer use the service. I will drive.

Would Metro provide alternative transportation to each listed stations? Meaning would there be buses that move between closed each station? Would closures be clearly communicated so riders are not stranded?

I use Clarendon and Va Square all the time and own property by east Falls Church - please do not shut them down!

Closing both virginia square and clarendon would be very bad. They are near each other so if I wanted to go there, there would be no stops near by. Do not close virgina square just because ridership is down, of course it is down during covid

My family and I use three of those stations every day.

You would be effectively NOT opening the Phase II Silver Line. Also, how would people get to Metro if both eisenhower and van dorn st are closed? This leaves only King St and Franconia for the people living in that part of Alexandria. Closing both clarendon and Virginia Sq would mean there are no stops between Courthouse and Ballston. What do people do if they live between those stops? College Park is the stop for the University. Is the University closing in 2022? I doubt it. This is a main method for people to get to the University.

How does closure of east falls church impact silver line transfers?

This is just insane.

Closing these stations would make transportation much more difficult for so many.

Being able to walk to east falls church metro is key to my commute into Washington D.C.

This is an absurd amount of stations to be closed and really disproportionately affect people who live beyond the DMV. This must be reconsidered.

This would close both the metro station I live by as well as the metro station I get off at to work. Would ruin metro for me, and I would be forced to drive to work.

Closing Cleveland park would remove the level flat walk to the zoo for physically impaired going to the national zoo.

Ok for me but could cause much difficulty for those with disability, etc.

Stations near Grosvenor are not really close

Closing these stations would be a hardship for many federal employees who rely on them to commute, particularly as offices reopen. More than that, it would be devastating to service workers who have relied on metro to commute through all of COVID

The government needs to allocate more funds to run the Metro full time, and perhaps reduce rider fees - this is a good investment in reducing cars on the roads, reducing congestion and stress of commuting and cutting down on pollution, green house gases and global warming.

Why would this be implemented in January 2022? By then I think well be back to almost normal, this would be useless.Plus, I often use the Federal Triangle, College Park, and Grosvenor-Strathmore stations so this would be bad for me

I commute from East Falls Church. If that station closed, I would no longer commute by metro. I understand some people might drive to a nearby open station, but many, including me, will not.

It seems better to close West Falls Church and leave East Falls Church open since the latter is a transfer station.

Proposal to close 22 Metrorail stations

East Falls Church doesn't belong on this list as the last transfer point to the Silver Line. East Falls is also my fall back station for West Falls, but I generally use West Falls. Closing both Clarendon and Virginia Square seems short sighted. If there had to be choice, I'd opt to close Virginia Square over Clarendon.

I only use Grosvenor and would not be able to use a different station

My work is near Virginia Square, so it would impact my commute to work.

East Falls Church is the easiest and most convenient station to use. Closing this station would greatly impact my ability and that of my family to take the metro.

Eisenhower station is important to keep open and once covid is over it becomes a larger share of ridership again.

Absolutely unacceptable. I use Grosvenor-Strathmore station. How much is saved during station closings? Salary of one station attendant? Would rather see longer intervals between trains at low ridership stations than close a station.

The college park station is not near other stations in a realistic sense. On top of that, the purple line is supposed to stop there. Closing CP station would then reduce ridership on the purple line and green/yellow. It would also make traffic for umd worse.

These stations -- especially the ones within DC -- are vital to my work, as many meetings occur in the areas they cover (Federal Triangle, Fed. Ctr SW, Judiciary) -- and of course Smithsonian and Grosvenor are key to entertainment and enrichment activities. This would be a huge blow to the city's economy....and push more people to continue working from home (including fed. employees)....and limit the number of people who can attend some of our most interesting tourist venues.

The parking at Grosvenor is good and we need that. Also, when going to a concert at Strathmore, a metro station is necessary

I take West Falls Church to Metro Center so I would not be impacted most days. But nevertheless I think this would be a crushing blow to Metro and would contribute to a "death spiral."

Closing Grosvenor Strathmore would be extremely burdensome for me as a Federal Employee for my required work downtown.

I live in the side of Falls Church near East Falls Church Metro. Getting to West Falls Church is a nightmare without driving and if EFC is full the lot will be full at WFC

Closing the College Park Metro station will make commutes more difficult for myself and many of my colleagues.

College Park is necessary for umd students. Don't close that one.

Not Clarendon

Closing either Clarendon or Virginia Square is fine, but not both. I think closing Virginia Square and Courthouse would be more fair to spread out the open stations.

While these stations may be near others, they will still be a 15 minute walk for a person who, if unable to walk distances, may have trouble accessing the metro. If Virginia Square and Clarendon are closed, then the distance to talk to a near by metro if you live in clarendon or Virginia square is even longer.

Grosvenor is my home station - this would be a huge problem for me. We bought our house - in part - because of the proximity to Grosvenor.

Could only work if there were increase bus service

Grosvenor-Strathmore, with the parking lot, is an essential station. I don't even have an alternative station I could use if Grosvenor were to close

Closing Virginia Square would affect me. No place for someone to park to drop me off or pick me up. Closing Clarendon is foolish. It is quite a walk from Court House to Clarendon.

I walk to east falls church station. I can't walk to any others. This is how I get to work.

Some of these stops, especially Smithsonian are widely used by tour groups. Students are doing plenty of walking during the day, the Smithsonian stop is a convenient stop to meet groups when they are traveling through the district.

Closure of Grosvenor-Strathmore Metro station would greatly inconvenience me.

Please do not close Strathmore!!!

Currently working from home, but will be commuting from East Falls Church to Reston Town Center in January, 2022. Also, closing East Falls Church would put a SIGNIFICANT strain and bottleneck on the other Virginia stations and general area as there is no easy way to travel the other nearby stations with the tolls on 66 and the limited roads (other than through neighborhoods) to get to those other stations. Traffic would be unbearable in Falls Church and other areas.

I do know when some of this closed down during the height of the pandemic it was difficult for those without cars to travel to some areas. Luckily my stop didn't close so I do not know the full extent.

several of these are stations I use.

Grosvenor strathmore is where I live without that station I can't get to work in DC

I live near Virginia Square and Clarendon stations. please keep them open. thank you!

Proposal to close 22 Metrorail stations

This works only if the silver line phase 2 stations open. If not, you cant close Reston

I pay \$\$\$\$\$ to leave near McPherson so I can commute to Virginia Square. (FDIC) I use Mt Vernon Sq for pleasure frequently.

I take Grosvenor and will need to take the train from there after I get my vaccine. Please please do not close Grosvenor! I don't have any other option to get to work. Please don't close it! Ridership should increase once covid is over. Perhaps reduce service on the weekend or maybe have trains run less frequently during off hours but closing it completely would be detrimental to me and the many commuters I'd see every morning

When UMD is primarily in-person, I use the College Park metro station to get to and from DC as the most convenient route for internships. Once the pandemic draws to a close, I will begin riding the metro frequently again, and the CP station is very important to me.

This is an awful plan. Shutting down a ton of stations is infuriating. Do not do this. You are abandoning riders.

Arlington Cemetery station isnt near another station.

Rather than close both Clarendon and Virginia Square, close only one of those stations and leave the other open. Ballston and Rosslyn are too far apart and too far from the center of this densely populated corridor.

We use the East Falls Church station. Can walk to it which is a huge asset! And Metro just finished adding that huge Bike locker area! That would be such a waste of money to now close this station.

No. No. No. Being near another station is meaningless if that other station is a mile away.

I am a senior citizen living within 3 blocks of College Park Metro. I can now walk to the station, and it would be difficult to get to PG Plaza or Greenbelt. We also have 30,000+ students, many of whom come to campus via Metro and use it to access downtown when there isnt a pandemic.

I use multiple of these stations

The whole point of metro is to not have to take multiple types of transportation - if I have to take an uber/cab whatever before or after my metro ride because my usual station is closed I am just going to skip metro and take a different mode of transport. That means metro loses even more money.

I live within walking distance of East Falls Church station; its closure would be highly inconvenient for me, requiring me either to drive to work instead of taking the metro or taking a bus to a different station, which would increase my commute time considerably.

Closing the Arlington stations would be an extreme hardship particularly because so many people rely on those stations for weekday and weekend service. And so many people can now walk to these stations - closing would increase time of travel significantly and would encourage more use of cars.

No metro in college park would be devastating for UMD

Anything is better than closing Metro rail stations. Please do not close the Grosvenor Metro Station.

My friends and I use Grosvenor frequently. To go into center of DC for its accessibility.

This plan would absolutely not work for me and I would stop riding metro because McLean is my work stop.

i utilize the federal triangle and smithsonian stops regularly

College Park especially is not near or within walking distance of other metro stops and is utilized by the university and numerous local neighborhoods

Please don't close Clarendon and Virginia Square or at least don't close both. Courthouse is crowded enough.

Federal Triangle is too important.

My closest station is Grosvenor-Strathmore. Also, without the parking at that station, the Music Center at Strathmore (where I volunteer when it is open) would have a much harder time securing patrons.

Closing stations, especially ones as critically located as Clarendon, Federal Center SW, or Cleveland Park, would just make the low ridership problem worse and force people to use other methods of transportation. If these station have low ridership, Metro should implement strategies to reduce expenses which would be possible with less wear and usage at these stations.

Grosvnor is an important overflow option for parking. College Park is also an important stop for college students, assuming the school resumes service by then

I bought in Clarendon because of the metro. Coming home late in the evening and winter, I feel safe getting off in Clarendon and walking home. If closed this would have a huge econimal impact on the businesses and home in the area.

Are you kidding? Why create the Silver Line in the first place, if you are eliminating three stations? Limiting access is not the answer.

I use several of these stops regularly under normal circumstances

We need more stations, not fewer. Please don't close stations. Riders need those.

Proposal to close 22 Metrorail stations

I use Greensboro to go to work. if you close it, that is a major inconvenience

I regularly use some of these stations and this seems catastrophic for people who live or work near these stations.

Closing my metro station (Grosvenor-Strathmore) would be an absolute nightmare for traveling safely to and from work as well as for visiting family members for care purposes. I chose to live at this metro station four years ago for the safety and security of the neighborhood and station, and losing that would be detrimental to my daily activities, commute, finances, and safety.

Housing options were based on stations being open at these locations. In cases like Grosvenor-Strathmore, the traffic is already bad with more mass housing options planned. That is an active station I don't think should be closed. It makes more sense to me to increase the time between trains at ALL stations rather than close ANY stations.

Golly, it would be punk if the East Falls Church station closed. I can walk there from about 1.7 miles, or occasionally park on the weekends. If the EFC is closed, that puts a significant limit to getting downtown to enjoy what DC has to offer, and conveniently get to the Mall, etc. Every election cycle, when Arlington asks if we should fund the METRO I gladly click yes even though I am not an everyday rider, because it is a great service, and cuts down the pollution of all the cars that are on the road due to Metro. I hope you can find a creative way not to close stations. Metro is a great local treasure. Grace

With some of my work happening in College Park, this would greatly impact me. I would not like this plan.

These metro stations are essential to travel for individuals with no other means of getting around. I use the Clarendon stops as well as Virginia Square to get essential items such as groceries. I also use the Federal Triangle stop for class and as a part-time student at night after work this is cause issues with me making it to places that I need to get to on time.

I work in the UMD Discovery District served by the College Park Metro. Why Metro would use a period when the majority of students and employees are studying and working remotely to make a decision on ridership for January 2022 does not make sense. Further, this station is planned to tie into the Purple line in the future.

Need Cleveland park to access Adas Israel synagogue, only way to get there on High Holidays! And need Grosvenor too!!

There are whole neighborhoods that can walk to Grosvenor-Strathmore; a whole arts center that relies on metro accessibility. You will put people in their cars, you will worsen traffic and pollution.

Many of these stations have people working from home that will anticipate returning in 2021/2022 with no other way to get to work. PLEASE do not shut down these stations and stand workers going to DC or NIH or Walter Reed just because they're a little further out. Also this could have detrimental effects on their communities since proximity to the metro is a big reason people live here

Closing the only station at the convention center feels incredibly stupid if you ever intend on having conventions in town again.

If Grovesner were closed, would White Flint have all trains?

Frequently use East Falls Church & Archives.

Grosvenor is a very important station and I have used it in the last few years all the time will change my life complete

Please don't close Clarendon or fed triangle

East falls church is a major hub for travels coming from outside the beltway and looking to park at a metro station. This station should not be part of closures.

Many new homes, apartments, and town homes were built nearby the new metro stations or are already there. Many stations are located so they can accommodate pedestrian traffic. If they are closed commuters will need supplementary transportation (Uber, Lyft, Taxi, buses) to get to the next station. This would be extremely inconvenient and those commuters might find a more permanent way to commute in lieu of Metro. If you want them back you have to accommodate them.

It does not make sense to close two adjacent stations (Clarendon and Virginia Square). The ridership at Clarendon will dramatically increase when people return to their offices

We bought our house specifically because it was .5 mile walk to East Falls Church station. The other stations are not "near" enough to be of any use. I would never use metro if this station closes, and people who come to visit could not use it anymore either because it would be much too far to walk from any other station. This is a terrible idea.

I can understand closures of some stations (assuming it's temporary). However, closing stations with parking garages doesn't make sense. Not only would this eliminate any potential revenue from parking fees, it would make it harder for anyone not within walking distance of a station to use the system.

This is a terrible idea, as least as to East Falls Church and Clarendon. This idea will decimate ridership.

Long walk from Courthouse to Clarendon area where I live

Need Virginia Square Metro Station to be open

Closing Grosvenor-Strathmore would be terrible and would increase car ridership

I use metro as my primary source of travel. I choose my home so that it would be walking distance from a metro. I use a wheelchair so I cannot easily use other forms of transportation. I live at Grosvenor.

Proposal to close 22 Metrorail stations

Closing Virginia square AND Clarendon together will cut off a very large portion of the city- I'd be open to one or the other, but not both

Archives is a station I use.

I specifically moved to where I live no due to the ability to walk to East Falls Church. If that option is removed, I would have to assess the total commute time and the possible need to drive and park at West Falls Church. It might make just as much since to drive to the office.

I am a senior citizen and can walk to the Clarendon Station. I have many doctors in DC and take the subway to these appointments. Having to go to Ballston or Courthouse stations to get to Dc would be a burden.

I purposely bought near a metro stop. If it was closed, I would have to walk a mile to the next stop, potentially wait 15 min if there were no delays to travel into the city. It would make my commute as long as if I lived further out and drove, and would cause all of us home or condo owners lose a lot of money.

Save East Falls Church! Those of us who live nearby are reliant in this station. We also routinely use Clarendon, Eisenhower Ave., Judiciary Sq., Federal Triangle, Smithsonian, Van Dorn St, and Virginia Square in our regular commuting, and would rely on these stations when we resume post-pandemic commuting.

Grosvenor strathmore services a huge number of people. The nearest Metro stations, white flint and medical center do not have parking capacity to absorb the overflow

Has anyone proposing any of this ever ridden the metro before in life? Or during rush hours? No? Well, let me enlighten you. Think of shoving fifty people in a car meant for five. That's what you're proposing here. While January 2022 will not be the old normal, it will be the new normal and once herd immunity is achieved then the metro will be packed. This proposal will make it worse, not better. Especially in a city where the metro IS the main mode of transportation within city limits.

I use Virginia Square and Clarendon for my commute

100% this would not work. Closing both the Clarendon and VA Square stations would leave over 1.5 miles between the two remaining stations (Ballston and Courthouse) in the most densely populated area in the Orange Line corridor. You could close VA Square and leave Clarendon open, but definitely not close both.

Its ridiculous to consider closing stations on which youve recently spent a lot of money! What will happen after the pandemic?

Archives, Arlington Cemetery, and Clarendon are definitely needed.

I use East Falls Church, and removing that stop would make my ability to commute significantly more challenging.

Once normal travel resumes (my assumption after vaccines are more prevalent and work returns to the office) I use 2-3 of these stations and do not have walkable alternatives.

Ive been paying a rent premium for 12 years to live at an apartment complex which is right next to Grosvenor-Strathmore Metro stop to commute to and from work in downtown DC. When pandemic is over resume your service to normal pre pandemic levels. Grosvenor - Strathmore Metro station was always packed and will be again.

i will be using Greensboro station for the commute.

We rely heavily on Greensboro for employees without vehicles to access our office. Other Tysons area stations are not in safe walking distance

I dont use any of those stations so I would not be inconvenienced by this plan.

This is a horrid idea. All stations must remain open regardless of the ridership at a particular station. If you close these stations thousands of additional cars will be on the road, and you might as well shut the whole system down and prepare for gridlock 24/7/365.

I want Grosvenor-Strathmore to stay open.

College Park is not a good idea

We live in Cleveland Park and bought a condo on Connecticut Avenue specifically to reduce driving. Traffic on Connecticut Avenue is terrible in non-pandemic times. And what happend to all the shops near the metro? This would be an economic mistake. If I couldnt use my home station, why would I bother to use metro at all?

What studies have been done for the usage level of these sites?

Clarendon should remain open

What the hell. No. This doesnt work for anyone. These ideas are horrible.

Grosvenor-Strathmore STation is our local station with ample parking. If you close this, you take away a major station which people use all the time (prior to and after the pandemic)

Grosvenor-Strathmore is a metro I currently walk to. The added hurdle of taking a bus to the next nearest station would likely have me switch to using my car.

not all. we live close to clarendon metro and we use it to go to work

I use Clarendon and Virginia Square - this would drastically reduce my options.

I use Cleveland Park station but have mobility issues (due to an accident) that mean I could not walk as far as either Woodley Park or Van Ness. This would mean I would not be able to use metro any more.

Clarendon services several neighborhoods and this would be a significant inconvenience to those who live there..

Proposal to close 22 Metrorail stations

Do not close any stations

This got the whole system. Grovenor Strathmore station not only serves a tremendous commuting population, but also serves the music center, which located there due to the existence of natural. That is just one example of the impact of closing the stations. I cannot speak to the closing of Cheverly for example, which is not applicable to me.

I live near and use cleveland park metro. So this is a no

This would completely destroy Metro for me. Clarendon and Virginia Square are near other stations--EACH OTHER. If you close both, then I cant take it to work anymore as Ive done the past 10 years. This is terrible, and I feel you may be intentionally trying to downsize and destroy the service.

Um. That's the stupidest thing I've seen in a while. You'd close Smithsonian?? People have bought and paid more to be by metro stations. Apartments have been built by metro stations for lower income families to have access and now you want to make their lives even more difficult? Can SOMEONE in DC PLEASE have the ability to see outside the lines? Things are becoming more normal everyday. You're going to close in 2022?? Idiotic. That's prob about when things will finally be getting back to normal. Embarrassing organization.

East Falls Church is not walking distance to another station.

Just kill yourselves already then

I use the Clarendon station. It is a hub for life in Clarendon. Do not close it.

Those stations are needed

Hubs of commerce and apartments are around metro stations and closing them would negatively impact the surrounding areas.

Clarendon is not busy due to the pandemic Arlington Cemetery is a landmark, and did you JUST open Reston? I feel like the whole point of the metro is to make transportation easy but if you're not keeping them open... then what's the point?

No GROSVENOR means commuting by car. Also, how would crowds ride Metro to STRATHMORE?

Closing Grosvenor-Strathmore will very negatively impact the adjacent residential community as so many people rely on Metro and will worsen the traffic situation along Wisconsin Ave

Closing the Arlington stations: Virginia Square and Clarendon will prove very detrimental to students commuting to the Arlington campus of George Mason University. They choose that university for various reasons and the ease of commute is one of them. The stations are in the heart of the Virginia Square/Clarendon corridor and vital for the success of that area. Ballston Metro is almost a mile away and there is no shuttle to the campus. This is an unreasonable suggestion and should be rethought.

Why close Grosvenor - Strathmore with all the planned development? Once life gets back to normal after COVID,ridership will improve.

While this wouldnt affect my own personal travel needs, I think this is a terrible idea. Closing Archives and Smithsonian would be a huge drag for tourism -- visitors to our region wont necessarily know how to navigate the system if we start closing clear destinations. A longer walk to/from stations is fine -- except what if its raining, or snowing, or sweltering in the summer?

The Grosvenor-Strathmore Station is a critical and necessary station that serves a large population of the Grosvenor Community (Condos, rentals & townhomes). In addition, many people use the Grosvenor Station to travel into DC, Bethesda, Rockville and attend concerts at Strathmore.

This cuts too many subsequent stations.

This list is ludicrous - how is East Falls Church, for example, near other stations? And how can you suspend stations on the second phase of the Silver Line without any data to see if they are/arent under-utilized?

Grosvenor-Strathmore is a critical station for many individuals, including myself, who work in or with the federal government and need to commute from their residences in Rockville/North Bethesda to downtown DC. Please do not close Grosvenor-Strathmore.

I'm planning on moving out of DC to Reston in the next year or so and would take the Reston Town Center metro once it opens.

Please do not close the Grosvenor-Strathmore Metro Station. Having just graduated from college, I moved to Rockville in 2020 for a new job and do not have car. I rely on the Grosvenor-Strathmore metro station in order to go to work...and truly to go anywhere. My only other options would be taking the bus or calling a Lyft or Uber, but the metro has been the most affordable and reliable mode of transportation for me. I had, in fact, specifically moved to the apartment complex that I am at right now because it is situated right next to the Grosvenor-Strathmore metro station. Many other folks living in this apartment complex and the front desk staff also rely on this metro station.

For people with mobility issues or small children in tow, closing stations means a dilemma on getting to specific places. Ultimately if it becomes too inconvenient or cumbersome because of a nearby station being closed, we will not use the rail system at all. Above ground shuttle buses are not a good option particularly when you are trying to get small children to cooperate if a person has a physical disability.

| |
|---|
| Proposal to close 22 Metrorail stations |
| Closure of Grosvenor station would be a significant disruption to my commute requiring me to drive daily. |
| This is insane! I live in a house near one of these stations and it absolutely undermines my reason for living there. I'll be screwed! Greensboro and Clarendon must be saved! |
| This would leave a lot of gaps and make it hard on people particularly closing smithsonian and judiciary sq. The closing of these metro stations would harm buisnesses surrounding these stations dramatically |
| I live by the EFC metro. I use it to commute to work. Having to take the bus to Ballston, then metro in is NOT useful. That dismantles any efficiency for my commute, and would force me to drive, thus making traffic terrible |
| Would like to see data on ridership. Grosvenor-Strathmore has event venue that was probably built where it is because of Metro access. It doesnt seem appropriate to eliminate that service. |
| This is, in my opinion, an absurd solution. Limiting metro in this way could put it into a death spiral, where use constantly declines and budget problems become worse. |
| Would make the remining open stations crowded and would equal more waiting times |
| I live near Grosvenor Station and use it for commuting and also going into DC on weekends, and a LOT of other people who rent apts in buildings in this area do so. In fact, buildings here are popular exclusively for their walking distance to this metro station. |
| I will need East falls church metro Monday - friday |
| I use these stations frequently to get places. Closing them hurts my ability to travel in the city. |
| Does the city WANT us to have jobs downtown, or ever go to museums? This makes that less feasible. If you dont invest in a working metro system, the funds you do invest in will go to waste. |
| Having moved to VA Square be able to take metro and sold my car, this will not work for me. |
| These are all very important. This would cause people including myself to walk even further |
| Closing the Cleveland Park metro would greatly disadvantage the residents of Cleveland Park and neighboring areas. The residents rely on the Cleveland Park metro as a necessary means and anticipate using the metro even more in 2022. Furthermore if the Cleveland Park metro is closed, riders would have to travel to either the Woodley Park or Van Ness Metro. During rush hour and inclement weather, this would add even more time to their travel and riders will have to opt to other transportation methods such as ride shares in order to avoid undue delay. The metro system stands to lose more money by closing a valuable station like Cleveland Park that will see back to normal use by 2022. |
| This is silly. That would change the walk on a lot of commutes to unacceptably long. |
| East Falls Church is a station that is close to several of my destinations. I dont depend upon it as much as those who regularly use it, but I see so many people waiting or getting off to transfer to the Silver Line that I feel at least certain hours need to be open for this station. |
| Grosvenor Strathmore opened 1984 It is always very busy. Close White Flint there isnt a White Flint Mall at all Grosvenor is the first above ground and a very very important station to the Area |
| I work at the Smithsonian. You need to keep the Smithsonian station open for me to safely access work. Under the plan above, I would need to walk from Metro Center to my job. That was OK in the Pandemic with such low traffic volumes downtown. I am concerned that, given my intellectual disabilities, it may not be safe to cross that many downtown streets to get to work. Of greatest concern are Pennsylvania and Constitution Avenues. |
| East Falls Church is not near another station. Completely different rider base from West Falls Church Metro. Recent bike storage options and completion of a pedestrian fly over bridge (over US 29) at EFC metro or near it were made to increase non-car transit through East Falls Church Metro. Seems completely backward to now go and close it. Additionally, EFC metro is the last stop for orange and silver. Why eliminate this key split? |
| Metro is the areas subway. If closing all these stations , regardless of distance, then makes it a commuter train. So just dissolve all Metro and make more commuter train services. For example in NYC metro there Metro North, LIRR, and NJ Transit. Just make a full fledge commuter train service. Dissolve Metro, sell assets and decommission the entire infrastructure. |
| You would shut down all stations close to my work place making it extremely difficult to get to work |
| Absolutely do not do this. What the hell are you thinking? |
| Grosvenor is walkable for me |
| We down sized and move near Eisenhower metro for the easy access to Pentagon. Closing it down will force me to look at other options, likely have to drive due to the lack of options to bus to the Pentagon. |

Proposal to close 22 Metrorail stations

Grosvenor-Strathmore has parking and we use it to get downtown on weekends and to work on weekdays. Where would we go with parking if this station were closed? Please keep this open.

Don't close Clarendon. I'd have to move and I can't afford that.

Federal Triangle is KEY for most federal workers

Since I live at the Grosvenor stop and don't have a car, this would severely affect my transportation routine and main option of traveling.

Grosvenor-Strathmore cannot be closed as government and businesses are opening up. Unacceptable

Some of these make sense, but why close East Falls Church and Reston Town Center?

We utilize the East Falls Church station as a family almost daily for work and recreation.

Everything is low right now because of the pandemic. It will go back up so planning on closing stations based on low numbers right now is idiotic

Arlington deserves full service from Metro.

Closing East Falls Church would impact all of my family in a terrible way, just after we endured so many other closures because of the endless construction projects. Now you are saying ridership is low, but this is a chicken and egg thing—you have subjected the riders at EFC to so much pain over the last few years that they have put up with more expensive and less convenient *temporary* options. With residents from Falls Church, Arlington and McLean, I strongly believe EFC has the potential of being a hub for riders, if you stop closing it down. Extremely disappointed with metro as access to public transportation was the main reason we bought our house where we did.

If the Grosvenor station closes I am done with metro. I could encourage you to look at the large population that lives in Grosvenor Park and the surrounding area and caution you against cutting off such a populous area.

I depend on Grosvenor-Strathmore for my metro needs. It is difficult to get to other stations.

I need the Clarendon station

These stations may have low ridership but they support communities that have risen up around them. There is low ridership due to the pandemic and people losing their employment or having to work from their homes

This wouldn't affect my regular commute, but would disincentivize using Metro to get to other locations at times.

DC stations should remain open

This is especially harmful for those with disabilities. Wouldn't this just increase the cost of Metro Access?

I use the Federal Triangle Station to go to work. The stations mentioned for closure appear to be the ones that federal workers use and we will need them after restrictions are lifted due to the pandemic.

East Falls Church should definitely NOT be closed as it is a junction allowing switching between the silver and orange line. It is also critical as a commuting hub.

low ridership is clearly due to covid and will go up again after covid, don't you understand this?

I work in Clarendon so this would be a pain. I'd be more like to drive more than take the metro at all. Would work OK if one of the nearby stops was open so I could still walk, but closing both Clarendon and Virginia Square would mean I would probably stop using the metro.

I go to Strathmore, and the Smithsonian

I sometimes take the blue line from work from federal center, sw. This might impact me, but I could also just go to lenfant plaza instead

Metro would no longer be a viable option for me for transportation.

Need CLARENDON metro

This feels like you're gutting the system.

I use Clarendon Station and the other closest station is Virginia Square: closing both is completely unreasonable!

I regularly access the East Falls church Station.

OK with eliminating duplicative downtown stations within walking distance of each other but not key suburban stations like Grosvenor

The stations listed are essential and will definitely impact riders.

There are multiple multi-family buildings being built near the Clarendon that are likely to be completed prior to January 2022 station that would increase ridership, and the marketing of those buildings is heavily reliant on being such a close distance from the Clarendon station. In addition, closing the metro station is likely to depress the Clarendon nightlife, as well as diminish property values that are so reliant on being able to easily walk to commuter trains as well as other lifestyle needs.

East Falls Church is a crucial station and full every working day -- until the pandemic and when no parking was allowed for construction.

Proposal to close 22 Metrorail stations

| |
|--|
| If you close my station(East Falls Church). I will no longer ride metro. Others surely . Feel the same about their station. There is no other station close by!. This will destroy the value of the system and will kill it! This is a.Very Bad Idea. |
| If Metro adopts this option, I will urge the Arlington County Board to curtail its payment to Metro. |
| No I will ride metro from Clarendon to my office at Federal Center SW once COVID is better. |
| I commute using the McLean stop and this would drastically increase commute times and costs associated with daily commutes. |
| Keeping stations open even if theres few riders has little impact on expenses. The trains have to go through those stations anyway. People rely on those stations to get around. Very much against this idea |
| I would be unable to reasonably commute to work if this happened |
| Many of these stations are very important to me.. Those stations are Archives, Arlington Cemetery, Cleveland Park, Federal Triangle, Judiciary Square, Smithsonian. I would miss the option of using the others as well. |
| Closing stations will cause increased travel time and more crowded cars |
| Insanity. You want people to come back to your system. Run the system. |
| Morgan blvd is necessary to the new homes built for that reason! Please do not close! |
| I purposefully moved to be close to a metro station and I happen to live near the Van Dorn station. Eisenhower or the Franconia-Springfield metro would be the closest and I would prefer to go to Eisenhower. If both Van Dorn and Elsenhower are closed, I will be forced to drive into Rosslyn and pay for parking. |
| Why would you close both Clarendon and Va Square? That leaves a 2 mile heavily populated corridor with no train service. |
| Reducing stations that are operating on the Silver Line will severely limit ridership. In particular, eliminating service at the Reston Town Center station seems ludicrous. RTC has the most dense, walkable development in Northern Virginia, and even modest capture rates within the walkable half mile radius will drive significant ridership throughout the Silver Line corridor and Metro generally. |
| How else do you get to Arlington Cemetary? What stop is East Falls Church near? This could work for stations downtown with very close alternative (Archives/Fed Triangle) but others further out are much more difficult to reach without metro. |
| On occasion, I utilize the College Park station as an employee of the University of Maryland College Park. I live right behind the Grosvenor-Strathmore station and use that more often. Having to go to another station would be a burden to many families close to that station. |
| Not sure how some are â€œcloseâ€ to others- ie can you walk from grovesnor to another line? Cleveland park to what? |
| College Park should not be closed. There are residents and students who rely on service from College Park. And development is ongoing with College Park Metro as an attraction. |
| I live in College Park and still use Metro and the 86 bus regularly post-pandemic. I would never use Metro again if our station closed, and my public transit rides would all turn into single-occupant vehicle trips. I would probably adjust to this proposed change by trying to avoid moving through DC at all whenever possible, and certainly would result in many more of my familys dollars being spent at businesses outside the beltway. |
| Closing Virginia Square makes sense if a station has to be closed in Arlington |
| Commutes to College Park necessary |
| Please do not close College Park station |
| I use and NEED Grosvenor-Strathmore. |
| The College Park station is closed to a major state flagship University and you are proposing for it to be closed makes no sense. That metro station is used by the students who cannot afford to buy a car and the students and visitors needs metro to go back and forth. |
| Must have access to Grosvenor Strathmore Station for work commute. |
| A lot of people live near stations that has made it convenient to get to work or do other things. Not a good idea. Plus people with special needs live near stations to make life easier for them. |
| Cleveland Park is a community in its own right with a thriving strip mall of stores and restaurants outside the Metro station. Closing the station would be a disaster for both residents and businesses. People would not walk to other stations, they would use alternatives to Metro. |
| The closing of any of these stations would be absolutely absurd, especially the stations in Virginia. These stations have been vital for commuters for years, and all this will do is cause more drivers to use the already packed roads all over the metro area. Shutting down these stations would be extremely short-sighted and cause more problems than it would fix. |

Proposal to close 22 Metrorail stations

The Meroe stops here chosen to be closed would gravely impact metro's business- again more people whose choose to drive rather than use the metro if these tourist stops and stops used for employment and living are closed. Terrible idea

These questions disappoint me because they dont account for anyone coming back to the District of Columbia not even tourism when we know people are already starting to travel more

There are a few stations I recommend open for possible riders from time to time. Clarendon, Virginia Square and Smithsonian.

not clarendon, mt vernon, or cleveland park as people live/work/visit those stations frequently

With in person classes scheduled to resume in Fall 2021, this would be terrible for the College Park riders

Highly against closing the Clarendon station, ridership is likely down because of COVID however that station is very popular regularly

Some of those station closures would significantly impact our daily commute

I would no longer be able to get my kids to school if the Grosvenor station closes and I wouldnt be able to get to work as I use the Judiciary Square station.

Too far to walk to get to another station. I would buy a car instead.

Many people choose where they live as it is close to a metro station so they can get to work. Closing stations will complicate people's lives'. Having some service to those stations is preferable to none, particularly if that service is weighted around rush hour times.

East Falls Church is not nearby another station. Closing it would have a detrimental effect on all the neighborhoods nearby.

Grosvenor-Strathmore is becoming is critical for me since I have to travel to DC. My family members also come to visit using the metro stop.

not McLean: I need that one for work

A major reason I chose my building when I moved here from NY is that its walking distance to the Grosvenor-Strathmore Station.

these dont seem that close to other stations.

This is a terrible idea. Individuals purposely move to some of these areas BECAUSE of metro accessibility.

with COVID situation changing and more people start to return to work, schools, and shopping closing this station will have a negative impact. Are you using figures from the COVID days?

I moved to be near the McLean station. The nearest metro station to McLean would require additional bus ride to metro station which cannot be easily walked to Tysons corner until the pedestrain bridge is built which is not scheduled to be finished until summer of 2022.

If my East Falls Church station were to close I would no longer use metro rail (or bus).

I take the Metro from Grosvenor to downtown instead of driving.

Unacceptable! Through the plan to commute only every 15 minutes the commute would become significantly longer already - and then on top, my metro station gets closed. How is a reasonable commute then still possible? And I'm sure I'm not the only person affected - so what will it do to the highways/roads that are already packed?

Achives and Smithsonian are crowded during years of normal tourist activity. Keep the service you have instead of pursing transportation to affluent silver line areas.

Closing stations is not the answer to solving budget shortfalls.

This proposal would close many key stations

This makes metro inaccessible to people with disabilities in those areas. Additionally, this adds on 20 minutes to most trips because you end up having to walk on one or both ends.

I use the judiciary square stop every day.

The Grosvenor station is how I get to work and pre Covid that place was packed just like every other station both during the weekday and weekend. I would urge the team to no use the current ridership as an indicator of the future ridership. This will have dramatic third order effects for the quality of life of many.

Post-pandemic, we need MORE stations, not less, if we are going to increase peoples motivations to take metro. Lots of folks have moved out of the city into the surrounding suburbs but eventually will be going back into the office. When that happens, they will NEED metro stations in order to take cars off the road!

These are despicable changes to limit services throughout the system for people who need them.

Grosvenor Strathmore is the station I use most on weekends as it is easy to get to and park

I live near Van Dorn and plan to commute by metro to DC for work next year. You are proposing to eliminate my home station and the next nearest station, Eisenhower. I will have to drive to Fairfax county or take a metro bus, which you're also reducing to get to an open metro. This will make public transit commuting impractical and force my family to stop using metro entirely

College students would not be able to get to internships in D.C. as many of us do not have transportation to get to other stations.

| |
|--|
| Proposal to close 22 Metrorail stations |
| Please do not close Eisenhower, Federal Center, Van Dorn, and Federal Triangle. These are stops that I use frequently everyday during the weekday. |
| No impact on me, and may not have big impact on ridership rebound |
| Please do not close stations |
| I live near East Falls Church and use the Metro. |
| Skipping stations will only drive customers away and increase crowding at other stations. |
| The parking structure at Grosvenor-Strathmore fills when we are not in a pandemic -- where are people supposed to go. There is no parking at Medical Center and little, if any, at White Flint. Telling people to take the bus to Medical Center or White Flint is not a serious option. |
| Arlington National Cemetery should remain open no matter what. There is no easy pedestrian access to the cemetery from any other station. This is a major tour site. |
| Absolutely not! We live walking distance from Grosvenor-Strathmore & my husband uses Metro to commute to work in DC. We moved to this location specifically to use the Metro more easily. This would negatively affect us directly & also the re-sale value of our home. |
| This would be devastating to the Cleveland Park neighborhood. Most people do not drive to work and rely heavily on this service. Woodley and Van Ness are too far for older residents in particular. |
| For people commuting along the silver line, access between the hub of Arlington at Clarendon and the Hub of Tysons corner at the Greensboro stop is paramount. The closure of these stops would practically end my ability to commute via Metrorail and force me to drive to work every day, even as gas prices continue to skyrocket. |
| Virginia Square is essential to my way of life. Without a car, I have no way of getting to any other metro station. DO NOT CLOSE VIRGINIA SQUARE I AM NOT ALONE |
| I understand that the metro has lost a lot of money from this pandemic, but I think its premature to think that we are going to be staying at home for the rest of our lives. |
| I use several of these stations on a regular enough basis that this would create difficulties (Archives, Clarendon, Virginia Square, Mt Vernon Square, Smithsonian). Typically, if Im deciding between taking Metro or using rideshare services such as Uber or Lyft, Im factoring in walking time. Even if a closed station is near another station, the walking time from the other station would make me just use rideshare instead. Additionally, although we dont visit Arlington Cemetery often, we almost always use Metro to visit when family and friends are in town. Although ridership may be low, thats an important stop for tourists. |
| Closing van dorn metro station would be detrimental to my ability to get to work |
| These particular stations are the best. The worst stations to close would be Ballston and Vienna because of their superior locations. |
| Use Clarendon but not the rest |
| Lol. Closing Silver line stations before they even open? Ive never heard anything more WMATA. |
| Dramatic reductions in accessibility to Metro Stations seems counter to the whole point of having Metro. |
| College Park Station was an essential part of my commute to and from classes within three difference locations and is one of the major stations in a matter of convenience that is a straight shot route towards the heart of the DC. |
| I use Clarendon station to go to work and back. Also, not sure why most of the above stations are considered low ridership. Pre COVID-19, this stations are packed during rush hour. |
| So youre penalizing everyone without a car? All the senior citizens who live in Cleveland Park? Everyone going to the Smithsonian? Tourists going to Arlington Cemetery or the Archives? |
| Smithsonian, Archives and Arlington Cemetery are heavily used by tourists who may have difficulty finding alternative stations. |
| Es imperativo quela estaci3n deGrosvenor Strathmore siga abierta todos los dA-as! |
| Necesito trenes en Grosvenor. Como voy a ir a mi trabajo en DC |
| The only stop that I tend to use is Smithsonian but there are others that I can use and walk to my destination. |
| Grosvenor Strathmore should not be closed. It is one of the few with parking and many residences nearby |
| Come on thats like half the system. The poor tourists are confused enough without changing trains |
| Please evaluate whether a station has low ridership NOT during the stations construction and NOT during a pandemic. I assure you, EFC has significant ridership at normal times! |
| Even though other stations are close by, closing my station would affect me greatly. I live directly across from my station and having to walk further (in the extreme heat and cold) would not be ideal for my health. |
| This proposal would make my use of metro virtually impossible given the distance from my home to alternate stations and limited parking or bus service to reach the alternatives. Further, closing this many stations would undermine the utility of the entire system for travel around the city during the work day, etc. |

Proposal to close 22 Metrorail stations

PLEASE don't do this. People who commute by bus will be utterly screwed. The bus from my apartment complex goes to East Falls Church metro and East Falls Church only. As someone without a car, that's the only way I can get to work. Unless you're willing to dramatically retool all bus routes, this will be a nightmare to manage.

That would be tough but doable

With everything closed it's probably not a big deal. You'd probably want to re-open this up after things open again

I rely on the station at East Falls Church.

Closing Grosvenor- Strathmore station would be an extreme hardship for me.

This is especially hurtful to people working and living in the area. Especially young adults, who often make low salaries in their first few years of work. Also, the price of the surrounding neighborhoods are astronomical and the metro allows many to get to work without spending as much on a car and gas. The metro lines are also incredibly important to lowering air pollution, the more metro riders who need to drive, the higher air pollution. It also puts undue stress on those working further out and increases commute times.

East Falls Church had lower ridership due to the pandemic.

Archives and Arlington should not be closed

Worst possible option extremely disruptive and shot sighted. Ridership will rebound next year.

I use the Grosvenor station at the time. It would not work for me.

Only as long as Marc includes additional stops at Greenbelt that were only options at college park

It is crucial that Grosvenor-Strathmore to remain open

As a former Terp I am incensed that you all are considering cutting the College Park. It is a key selling point of the school and unless the purple line is open by January 2022 it will hurt the school and the city of College Park. Moreover, this is a significant number of station closures. I just moved to Arlington and this slashing of stations is disheartening.

Eisenhower is undergoing a revitalization, including an increase in residential rentals. As these move further west, the option of utilizing alternatives becomes more difficult. Huntington is not a viable alternative.

For employees working Downtown these closures will affect them significantly and people may no longer depend on the Metro for their commute because it is inconvenient.

Grosvenor-Strathmore is key for park&ride commuters. At the two adjacent stations, there is insufficient parking at White Flint and no parking at Medical Center. Park&ride customers would be forced to travel 20 minutes north to Twinbrook or 15 minutes south to Bethesda Metro Stations. At that point, customers will simply drive and skip the metro.

please keep Mclean and Virginia Square open.

Cleveland park closure would make it impossible to get to essential work on time while balancing covid restricted childcare hours.

I live 0.3 miles from the Clarendon metro stop. It is the number one reason I chose to live where I do. As a single female, I often walk from the station late at night. The closure of this station would cause me to walk further alone at night and I would not feel as safe walking in the areas of the other stations.

By January 2022 I will be commuting to work again and my home station is Cleveland Park. This would likely result in me not using metro at all.

No I use Mount Vernon sq station.

need East Falls Church to get to work

Kids going to school near Cleveland Park

I am a regular rider on Metro and use it daily to commute to and from work. I specifically chose my apartment complex because it was so close to the Eisenhower Ave. Metro station (Parc Meridian at Eisenhower Station). This would be a huge blow to me personally and may make me switch to driving. I just can't say enough how detrimental this would be.

You can't close BOTH Clarendon and Virginia Square/GMU. That means everyone on GMU Arlington campus (including me) has to somehow get all the way to Ballston or Rosslyn. That's not really walkable and so we'll need to Uber/Lyft to and from Metro stations and GMU. You're going to force everyone to drive instead which completely reverses any progress being made on cutting down cars, pollution, and traffic.

I work at U of Md and live in DC. I rely on Metro to get to work.

My son uses Grosvenor station MONDAY- FRIDAY. DON'T CLOSE it - close White Flint where the mall is demolished but NOT Grosvenor

I use many of these stops - Clarendon, East Falls Church, McLean

I do not own a car, so it is untenable for me to reach stations other than the one closest to my destination (College Park)

For College Park, I might be wrong, but I don't see any suitable bus options to other nearby stops. The F6 bus will be cut if WMATA doesn't receive funding. Also, I didn't see any buses to Greenbelt. Finally, I am sure that students will be here when the new budget is finalized, and they (as well as the businesses) will not find this option suitable.

Proposal to close 22 Metrorail stations

I work across the street from the McLean station, and given how major a road Dolley Madison ave is, it isnt necessarily safe to try to access that separate station. McLean station is right next to a major office park including offices such as Capital One, MITRE, Northrup Grumman, among others. The area right next to the station is rapidly developing -- it does not make sense to close that metro station when the area will be becoming a hub of traffic

While it wouldnt effect my travel to work, closing the College park station would make it difficult for students and staff to get to University of Maryland College Park. It is a huge university and needs mass transit.

But keep Arlington Cemetery open.

This is RIDICULOUS and you know youre not going to do this. The amount currently being spent on developing the area adjacent to Grosvenor makes it clear that those developers arent going to let you get away with this nonsense. (The proposed stations to be closed include the one where I live and the one where I work.)

In order to make the system truly work Stations need to be walkable to homes and businesses. Rosalyn and Ballston do not serve my neighborhood in the same way that Clarendon does. Closing this station adds bus rides or significantly longer and impractical hikes to commutes. And if time between trains is reduced having to then depend on a bus after the train will add at minimum another hour to commutes. It will make me drive.

College Park is my local station. The next nearest station is Price Georges Plaza, 3 miles away in Hyattsville. That is NOT nearby. Further, the College Park station is likely low ridership because its so far from the university its meant to serve. Its location was chosen, per former governor Glendening, due to racist fears (what if those scary black people from DC use the metro to get to our pretty, green campus?!) so using that as an excuse to close it and further disadvantage Prince Georgians, who are overwhelmingly minorities, seems like salt in an open wound. Find a better way to make ends meet.

Cutting off metro access to Clarendon and Virginia Square would make it difficult for the thousands of commuters living along the orange line to get to work (when offices reopen).

I live at one of these stations and it would hurt the businesses in my neighborhood. Plus, it can be hard to get to a station even though it is "nearby."

This would limit my mobility significantly and I anticipate needing to get to the office by jan22

Unacceptable for commuters/riders

This cannot happen! Please please please do not shut down any stations. This is not an equitable solution and is entirely short sighted.

SUCH A BAD IDEA

I could no longer use Metro to commute to and from work.

Virginia Square, East Falls Church, and Clarendon are some of the stations that I use the most!

Need Grosvenor-Strathmore station in operation

People will use rail again in 2022- post pandemic. How can we close metro stops that have so many new housing builds people rely on? We are the nations capital! Please find the funding. More and more people live in east falls/metro area and it's one of the main reasons bought a home here. Why would I drive to ballston- can't even park there?! Crammed stations would make everyone hate metro full stop.

I can walk from the next station but so many others can not.

I need to be able to use Grosvenor-Strathmore station! Please do not close.

East Falls Church is essential to our neighborhoods. It would be a tremendous loss for the area.

I rely heavily on Virginia square station.

Another very stupid proposal. This would make traveling harder and just keep me off the system. Eisenhower is a station I use all the time and it is not near another station. I would stop use the metro if this happens.

I paid a substantial surcharge to buy a home that is walking distance from East Falls Church. Shuttering that station effectively deprives me of substantial value in my home. Unlike some stations -- Archives, Clarendon, Federal Center SW, Federal ITriangle, Judiciary Square, Smithsonian, and Virginia Square, for example -- there is no other Metro station in walking distance from my home. I would need to purchase a car and pay for parking at a distant Metro station in order to transfer my travel from East Falls Church to Ballston or West Falls Church.

I made a conscious choice to live across the street from Eisenhower Avenue. Its been great to walk 5 minutes to get the train. Trekking to King Street is doable, but at least 15 minutes each way. If Eisenhower closed and I was still largely working from home In January 2022, I would probably just drive to work.

Proposal to close 22 Metrorail stations

I can speak most authoritatively about the Orange and Silver lines and can say it would be catastrophic to close Clarendon and East Falls Church. They are very heavily used and service large populations. It would be a travesty - not to mention an absurd waste -- to close EFC after the huge investment just made there to upgrade the station. Furthermore, EFC has a large parking lot that brings in commuters from all over, and many residents of Arlington use public parking on streets near EFC in order to take the metro. It is hard to understand how closing important stations - through which trains are already running -- would save enough money to justify the enormous blow to the crucial role they play in supporting commuters.

I frequently use the Archives and College Park stations in particular. Also, the closing of the College Park station would have a very negative impact on the University of Maryland community. Many students, faculty, and staff come through that station, and this would make their daily commutes much more difficult. I do not approve of the proposed closing of these stations.

Greensboro is vital to my commute

This would have SIGNIFICANT impact for numerous communities. Living within 5 minutes to a metro stop is crucial for a lot people. I would have to move to make the metro accessible if one of these stops is closed. a 20 minute walk on both sides PLUS the potential of having trains only every 15 minutes? That would increase commute times significantly.

No! This would be a terrible move. As a daily rider from the college park station, I know that this would make me consider other forms of transportation, not going to another station. Additionally the university would no longer be served by the metro

much prefer fewer tranins than closing stations Bad for business in Arlington also. Somewhat biased mabe since I live in arlington

Too much distance between Roslyn and ballston unless you ride bike. Elderly may have big issue.

Metro is my sole transportation and grovornor is my station if you close it it will significantly and negatively affect my commute and hours outside of home

This is ABSURD. This is a clear effort to extract money out of the jurisdictions by threatening ludicrous service cuts. Come up with actually reasonable proposals.

These are the only options station we use for commuting. Please do not close

I will use Innovation everyday once it's opened, I would also use Reston Town Center.

It is ridiculous to close metro stations and expect ridership to not also drop. I frequently use the East Falls Church metro and would be devastated if it were to close again

East falls church is the only Arlington county stop that serves areas west of Ballston. Most arlington residents who use EFC metro walk or ride bikes to it disproportionately higher than the tiny parking lot implies.

Grosvenor-Strathmore is the stop I use most. I live closer to Twinbrook but I prefer to drive a little further to Grosvenor because I feel safer at the Grosvenor Station. The parking is easier, the station is brighter and the area feels safer.

Some would be fine for me lots more would not.

So people who live in those areas will overcrowd other stations which will make it impossible to get on trains because they're coming every 30 mins? This really makes no sense.

Reduction in frequency is much easier to adjust if ridership bounces back after the pandemic. Closing stations is more permanent and can have serious impacts on people who cannot easily get to a station that is further away.

To entertain closing a station that isnt even open yet? The RTC station is so behind already. Our buying decision and work decisions were 100% based upon access to the RTC station. Allowing us to get to work and also to the airport. Not at all supporting the Silver line closures.

The Grosvenor metro is perfectly located since it is right off the beltway and 270. Makes no sense closing this station.

Please do not shut down metro stations. If Grosvenor-Strathmore is shut down, I'll have to buy a car and then won't take the metro as often so you'll be losing my business.

McLean is a hugely important commuter station - it makes no sense to close this at all times. It would only need to be open Mon-Fri from ~7-10am and ~4-7pm.

This would severely disrupt my community. People specifically buy homes near some of these stations, for one. It would also cause overcrowding of nearby stations, especially during key hours.

As a student, this would close the metro station I would take to school which would make it much harder for me, and my fellow classmates, to commute.

Claiming low ridership at these stops based off of the past year is ridiculous.

Grosvenor Station is one of the a few on the redline with access to a garage and its right be the Strathmore. Also the Smithsonian is a huge tourist attraction- when the pandemic lets up, I believe the closure of these stations will be a major mistake.

College Park and Grosvenor Strathmore are essential stops. Do not close

Proposal to close 22 Metrorail stations

Pasting from previous question: Please dont do this. There are communities that will be heavily impacted by this change. I would gladly pay a higher fee or wait longer for a train than to have ANY of the stops, anywhere, removed. This kind of change is short-sighted. It may stop partial bleeding in the budget, but create long-term problems with the communities impacted. It isnt worth it.

If you want people to no longer take the Metro, this is an excellent plan. The subway would be next to useless as mass transportation with this many stations closed.

Might as well shut down the entire system. But this proposal is so obviously a bluff. Why dont you just threaten to shut down the whole system instead?

I think it would be fine in the short term, but with planned reopenings once riders increased usage.

I use Clarendon and va square

Closing the Clarendon metro would have a negative impact on my travel.

Eisenhower Ave and Van Dorn St serve neighborhoods that are difficult to reach on foot from other stations due to intervening rail right-of-ways, major roads, etc.

Do not close the East Falls Church metro. My family rely on it for commuting to work.

This is terrible. These stations arent close enough together for riders. It also cant possibly save metro enough for the decrease in riders youll see.

I think some stations could be closed but this includes too many. Doesn't make sense to close consecutive stations (archives & mt Vernon sq, clarendon & Virginia square, etc)

Property values are too high near these stations anyway. Could train operators also consider blaring the horn when they pass by these stations to add extra insult to the yuppies who live near them?

Clarendon is in the middle of everything and should not be closed.

i moved to be closer to the EFC station. I need it to get to work in DC. Closing the station would double my commute time and would likely force me to drive

Please dont close Clarendon and Mt Vernon Square.

Grosvenor Strathmore is the only station I use in the suburbs.

What is Cleveland Park close to?? Woodley? That's like a mile away. Regardless, this proposal seems fine for my small little life.

People with mobility issues rely on the metro to get them as close as possible to their destination. Closing these stops, regardless of their proximity to other stops, would make like much more difficult for us.

There are lots of offices close to Greensboro station. so please do not close that stop. It will affect thousands of people.

Have you seen the new number of homes and apts built near Eisenhower?

Please dont shut Cleveland Park metro station

Grosvenor strathmore is used for daily commuting and should remain open for the local community

So, you are shutting down major tourist stops and metro stops that are placed in majorly developed areas of the city? How do you define "low ridership" and when was this measure taken? Was it during the pandemic? Was it an average over 5 years? How did you determine that people weren't using these stops.

Closing both the Clarendon and Virginia square metro stops would be difficult for Arlington residents. Those areas are heavily populated with commuters. Being a resident between the Clarendon and va square metro stop, the inconvenience of closing both of these stops would be awful commuting. The ballston metro stop is a good 20-25 minute walk and the courthouse stop is about the same. Closing both of the Clarendon and va square stops will cause a lot of problems commuting.

I often use many of these stations. As it is, its hard to get between stations sometimes. These closures would make it even harder.

Smithsonian is a very popular stop.

Ridership on the BLUE line has always been high = excellent. METRO needs to have more confidence in their precovid experience & income from the BLUE line and do like most everyone else who has been adversely affected by covid.....hang in there & have confidence that your long-term planning will prove successful - DO NOT REDUCE OR DISCONTINUE RUNNING THE BLUE LINE SERVICE AND STATION STOPS.

Would put a big load on west falls Church metro.

This would have a major negative impact on me

Please do not close these stations as it provides great hardship on commuters who walk to these stations as a means of getting to work. I understand that other cost saving measures may be necessary but closing stations is too drastic a measure and results in too great a harm to a large number of commuters.

Van Dorn is my primary station and I do not have a way to get to another station as I am legally blind and must rely on public transportation

Entire family needs access to Grosvenor Metro to get to work.

Outside of the downtown core, these stations are not close enough to make using adjacent stations viable for average commutes.

| |
|---|
| Proposal to close 22 Metrorail stations |
| Again, on the red line crowding has led to major service disruptions pre-pandemic. |
| I need College Park, Clarendon, and Greenbelt Stations. |
| While this does work for me personally, what about the people who live near there? are you increasing bus routes in those areas? |
| Why Reston Town Center? Once we can go about normal lives again, I would think that there would be an uptick with usage to Reston Town Center. This would change to a yes if one could only come home before 9pm, though. |
| Choosing this option would ensure I not use Metro for any travel. Are you really considering closing 22 stations, three of which haven't opened yet? |
| I can't assess the impact of the closure of all of these stations but inevitably it would be less convenient for me at some point. Busing would need to be addressed, and contingencies when one or more of the remaining stations need to temporarily close (safety issues, weather, etc). |
| There is no point in having accessibility to metro stations if they are closed. This will make the roads more crowded with other means of transportation. |
| Rockville is close but no parking. Prefer to close Rockville and keep Grosvenor |
| All of these stations are vital for someone in the community. The close options aren't all that close |
| This plan would assuredly result in car travel to/from work rather than metro. |
| I own an apartment across the street from the Grosvenor station. The station is a huge selling point for the apartment. Indeed, there are many apartment/condo buildings within walking distance of the Grosvenor station. Closing the station would impact many residents. This is especially problematic since the decline in ridership is temporary. |
| Personally, my stations aren't affected BUT I wonder about all the others who are impacted by the closures. I also wonder how that will affect larger stations in terms of more people using the fewer stations. Also, if closing East Falls, doesn't that cut out the silver line going to Tysons? Does closing Smithsonian mean there is an anticipation of no tourists going to the mall again? |
| This would gut service. There are many restaurants in Clarendon for example that would benefit from having people taking metro to visit them. Closing the College Park station would hurt students. The closing of those stations would have negative rippled effects throughout the region and almost certainly would make a Metro recovery in the future infeasible. People do not want to close stations. that's unacceptable. It will hurt those who do not have vehicles and decrease people's quality of life and livelihood. But to cut service to this extent would make people not want to depend on public transportation "thus increasing dependency on cars which will set the region back. |
| Closing Grosvenor-Strathmore will affect performance at the Strathmore Music Center. |
| Need Cleveland park stop |
| It wouldn't be ideal, especially for those with disabilities who need closer stops. |
| Beyond just the waste of money of refurbishing, or building most of these stations in the last year or two, just because it's close to another station does not mean that the station isn't extremely useful in supporting the use of public transportation. I currently can walk to a Metro station but eliminating one of these stations would make the use of public transportation impossible. |
| No, do not stop service anywhere. Reduce departures, reduce hours, even close on Sunday, but keep access for all those who live in the Washington metropolitan area. |
| I moved to Reston in 2019 because of the Metro station. |
| Potential closure of Grosvenor-Strathmore is utterly outrageous. Many folks that live in the surrounding area can walk there and depend on it to get to work. Personally, I am a Marriott International employee and plan on using metro rail to work when the new Headquarters opens up in 2022. The current headquarters in Bethesda is still mostly closed due to the pandemic, but pre-pandemic many employees relied on metro-ing to Grosvenor station from DC and then taking the bus to HQ. There are close to 5,000 Marriott International employees. Please keep them in mind when making this decision. |
| The shut down will lead to infrastructure deterioration and an increase in future costs |
| You conned the public into not having cars, and built high density housing near metro sites. You are putting lives at risk by asking people to walk over a mile at night to get to their homes. In some of these examples you are closing more than one stop in a row., and nothing on the silver line is "close to another station" You don't save much by having a train bypass a station. Go ask the federal government for emergency funding. |
| Closing College doesn't make sense with it be used by UMD students and staff. Also it would be a transfer station for purple line. |
| I sometimes walk to Grosvenor-Strathmore station and would like to keep it open |
| You would lose me as a metro rider permanently. I would vote for candidates that promise to defund you. This would make metro worthless. |
| The Grosvenor station on the Red Line is vitally important to the region. I would greatly prefer less frequent trains to closing this station. |

Proposal to close 22 Metrorail stations

Some stations will always have more users than others. People who use other stations should not be penalized. People have made major decisions about housing and employment based on the location of Metro stations.

Once again another joke of a proposal that fosters inequity in who can use metro even more. There are people who rely on the metro that live within walking distance of one of these stations but another station would require them to drive

I use Cheverly as a back-up station if there are delays or closures on green/yellow lines

You or any of us knows the future of working from the office once we are vaccinated and we have achieved herd immunity.

Closing Clarendon, East Falls Church and Virginia Square is absurd. Why have an Orange Line? Arlington Cemetery, only if justified by actual numbers, could withstand reduced service more to than is already reduced, I guess. There are people who need to visit their loved ones and there is no car parking.

The McLean station services Capital One center, the Mitre Building and offices across 495. If workers in these offices cannot commute via metro, this will create extreme traffic in the already congested Tysons Corner area. Further, there is not actually enough parking at these buildings to support every employee driving a car.

I use Archives and Mt. Vernon Sq often to move about the city

The most direct impact would be on residents who use public transit to get to work or for personal business/pleasure and persons who commute to jobs in our community. The East Falls Church Metrorail station benefits from being served by the Orange and Silver lines. This means more frequent trains and Silver line access to Tysons Corners and eventually Dulles Airport. With closure our inconvenient options are West Falls Church and Ballston.

Close the Smithsonian? This is ridiculous.

As long as the closures aren't permanent but for one year

Tourism will be back in 2022 and stops like Arlington National Cemetery and Smithsonian will have high demands.

Arlington is removing parking which will increase ridership at Clarendon. However Virginia square is walkable from either Ballston or Clarendon, so it could close

I rely on Grosvenor to go to work so closing this metro stop would not allow me to maintain my current job since I do not have a parking option at my place of employment in the district.

This is a horrible idea. People bought homes in Loudoun County because we were promised the metro would run there. You want to close stations before they even open. This will also lead to more people driving. This idea is not feasible.

I don't think it's fair to classify stations that have yet to be opened as "low ridership." I will use the Reston Town Center station once it is open (and once I am vaccinated).

Grosvenor-Strathmore MUST REMAIN OPEN. There are several high-rise residences within walking distance of this station. Many of us do not have cars and depend on the metro for our daily commute and general necessities (groceries, shopping, entertainment, etc).

This plan would severely negatively effect government workers like my partner who rely on the metro to get to work.

This seems a silly proposal.

I utilize the Grosvenor Strathmore station for commuting work and entertainment within MD, VA and DC. Would greatly decrease my ridership and mobility if this went into effect.

MClean is a major stop that I use

Dependent on East Falls Church. Arlington a good one to close. Not good for tourists but good for locals.

Closing both the Clarendon and Virginia Square metros would leave a lot of people without access to metro because walking to ballston or courthouse stations would just be too far and taking a bus in addition to the metro would make the trip too long verses driving.

Is the low ridership because of the pandemic? For example, Smithsonian is typically a very busy station. If youre considering closing it or other stations that have had reasonable ridership before the pandemic, solely because the ridership has been low over the past year, that doesnt seem like a good decision. Ridership could go back to normal in 2022.

Metro would be useless. No way to actually get a train to go where you want and waste of time walking to a station that may be closed

Metro is crucial for me in my life, post pandemic. No other station besides East Falls Church is walking distance for me. It would also greatly decrease the housing values of any residences that were bought specifically because of their being walking distance to the metro.

I anticipate commuting from Clarendon to Greensboro next year. While the Courthouse metro station could replace the Clarendon metro station for me, the Tysons Corner metro station would be prohibitively far.

We bought our place near Innovation Center specifically with the purpose of utilizing it to commute to work in DC. Not to mention not opening this station as had been planned for some time devalues my property.

This is beyond unacceptable.

Proposal to close 22 Metrorail stations

I walk to Grosvenor do having to drive to another station would. It work.

Closing off stations at Archives, Arlington Cemetary, Cleveland Park, College Park, Federal Center, Federal Triangle, Grosvenor-Strathmore, Smithsonian, and Mt Vernon sq will jeopardize and may even deny access to important cultural sites in DC. This tactic is ableist, classist, and cuts off important access to culturally and civically important sites to workers and metro-riders who are from marginalized communities.

Please refer to my previous answer about Grosvenor station

Close permanently or just close in off hours? NO to total closure.

Grosvenor should remain open (specially if one train out of 2 on the Red Line is limited to the Silver Spring - Grosvenor segment.

If that happens, I would suggest ensuring the distance between stations is either an easily walkable distance or provide an as-needed shuttle service for those that can't walk as far.

Lots of business in McLean and activities at Smithsonian as well as Government. So closing would not work, again Covid depending.

WMATA should not reduce any service.

I live by the East Falls Church metro station. A bus to From EFC to Ballston would add significant time to my commute. I would choose not to ride the metro all together. Keep East Falls Church station open.

Station close to my house is vital. Currently walk to station. Walking to an alternative station is crazy

No. I have health issues and Eisenhower is the station I walk to daily pre-pandemic and once I am vaccinated. Please keep it open.

This would further drive declines in ridership as regular riders at these stations would likely find alternative forms of transportation.

This will not only impact my travel it will also reduce the value of my home and all the homes in my neighborhood. In addition, there are many subsidized housing complexes off of the Clarendon station and many others which rely on the metro for public transportation.

While I understand the immediate need to manage around the devastating impact of the pandemic on ridership and revenue, making closing decisions before seeing what ridership looks like when folks return to work would have an unintended effect of suppressing potential ridership. It would send the signal that Metro will not be available and lead folks to make alternate plans thereby creating a self-fulfilling prophecy. These "low ridership" stations particularly those in residential areas like Virginia Sq " help balance out the crush of riders that would otherwise be pouring into Ballston or Rosslyn. Let's find another way including fare increases, contracting operating hours and seeking federal funding.

Grosvenor Cleveland Park Federal Triangle are reasons to use metro. Big disservice. How can DC survive if u take away metros near attractions ???

This is a particularly disastrous decision. Metrorail needs to have all stations open. We use East Falls Church and since it is where the Silver line divides, we often see many riders change trains there. Metrorail already has too few stations, so if you reduce them even further, it will make crowding at the still open stations much worse. This is really a bad, bad idea.

This is a short sighted and unacceptable solution.

This lists the three stations that are most important for my commute: Clarendon, Virginia Square, and McLean. If Clarendon and Virginia Square closed I would need to walk much farther to get to a Silver Line station or any station really. Getting rid of both of these stations would make my commute wildly inconvenient.

We purchased our home in 2019 for its proximity to East Falls Church metro. This would harm our home value, and negatively impact commutes for us and many of our neighbors.

This would cause a lot of inconvenience to a lot of commuters especially for people with disabilities and during inclement weather when commuters have to travel more to be able to get to the nearest metro station.

Some of these stations do not have good pedestrian access between stations. If riders are to access nearby stations it should not be a dangerous trek

I can walk easily to College Park Station (maybe a mile), but not to any other.

No. No. No. No. This is a planned system with residential and business connections that are important to the community, relied upon by residents and businesses alike. Simply irresponsible and unworkable for many, many people.

Once the vaccine rollouts get real traction and herd immunity becomes a reality, many people will return to working in the city. I wont, but many people will.

I frequent several of these stations and would pose a big issue to the convenience of the metro rail system.

Closing stations is a terrible idea. WMATA has bus stops and parking garages at these stations too. It would be a ripple effect that would turn riders away for a long time.

Some of these are reasonable but not all.

The nearby stations are already overcrowded at rush hour, this would make it nearly impossible to function in those stations. Also closing Arlington cemetery makes no sense. No one is going to use an alternate station and then walk, and it will be a nightmare during tourist season.

Proposal to close 22 Metrorail stations

| |
|--|
| I have recently purchased a condo walking distance of grosvenor Strathmore. The only reason I moved was because of the walking distance considering i dont own a car.. this plan will increase financial and time burden for my commute. |
| How would this help given your legal and moral obligation to provide paratransit which is far more expensive to operate? If you close stations that'll force passengers with mobility independence constraints to be further from the stations or destinations, possibly forcing them to rely on paratransit. |
| First, you can't close both Virginia square and Clarendon â€” that would cripple the Arlington boulevard neighborhood. Secondly, closing these stations would lead to further ridership decline as people who work at downtown stations (federal center southwest, archives, judiciary square) may opt to us ride share if they can't get close to their work. Delaying the opening of new stations would be a better alternative. |
| In what world is Arlington Cemetery near other stations? |
| No no no! Do not close stations! Do not close Grovesnore Strathmore. You'd kill the performing arts complex. |
| Grosvenor-Strathmore must not close it has valuable parking availability that no other station nearby has |
| One of the reasons I move to College Park was proximity to the metro station here. |
| McLean station is close to Tysons, but there is no walkable pathway between the two. |
| Arlington has heavily invested in high density housing with reduced parking spaces based on public transportation options. Closing public transportation forces many of these people back into cars. Clarendon and VA Square stops are consecutive forcing many people to walk a mile or more to another stop. Pre-pandemic all these stops could be quite crowded at rush hour. |
| It would be a bad thing to close any Metro Station |
| We currently live in an apartment at Grosvenor Strathmore but plan on moving away to save money. This would be awful if we were staying. |
| I use east falls church primarily and moved here based on the proximity of the metro station and if the east falls church station is closed that would preclude my use of metro. |
| Eisenhower makes a lot of sense as its usually a ghost town, but not college park- there's a massive university there! |
| I use several of the stops listed. |
| Completely unacceptable. The incompetence at Metro is breathtaking. People need this system to get around. Closing stations defeats the entire purpose of Metro to exist. |
| Near other stations is meaningless even if FREQUENT and FREE shuttles are provided. When stations were closed temporarily, it increased commuting time by at least 30-40 minutes per trip. College Park serves University of Maryland and Federal government facilities in College Park and closing this station would have a major impact. |
| This would close stations near me that I rely on to commute and would make others that are less accessible very crowded. |
| Makes no sense-particularly Grosvener after spending all that money in the parking garage |
| Please keep grosvenor-strathmore open. It would be a disaster to close it. |
| Isn't Smithsonian normally (outside the pandemic) a busy station, due to its proximity to the museums? |
| absolutely not, closing the grosvenor-strathmore station would be devastating to our local community, and take away a major reason we moved to this neighborhood, It would also be devastating to people who use as customers and those who work at Strathmore Music Center |
| I frequently use many of these stations (grosvenor-strathmore, judiciary square, mt vernon sq, clarendon) their removal would significantly increase my transit times due to increased amounts of walking |
| Half of these stops are stops J use regularly. 2022 will be back to normal. |
| Some on this list are less important to me, but Cheverly is the one station I want to continue service. |
| I live between Clarendon and Virginia Square, a dense residential area that highly depends on the Metro. Closing the Clarendon and Virginia Square stations would be a devastating blow to the residents and local economy. |
| this would cause over load at the open stations. In my case the orange line. Parking at Ballston is limited and WEst Falls Church would add time to my commute. |
| I must have the Clarendon metro open and available for my travel and commuting requirements |
| Many of the stations listed are ones used most often by me and my family |
| Closing Grosvenor-Strathmore station will directly impact my ability to use metro for commuting purposes. I would likely not utilize metro train service for commuting and instead carpool. |
| Virginia Square has many residents who choose to live in Virginia Square because of the metro system. |
| I bought my home with Metro access #1 priority |

| |
|---|
| Proposal to close 22 Metrorail stations |
| I use Cleveland Park station. |
| While not ideal, I can access alternative Metro stops to get where I need to go. |
| This is the worst proposal so far. |
| Virginia Square is home to George Mason law school. This seems odd to me. |
| Requiring any sort of transfer to a bus would make me reconsider using Metro. |
| Just shut down the entire system. This |
| this is crazy, please keep all the stations open |
| Permanently close them? I could see reduced stops there, but permanently closing them seems extreme. Some of these stops provide important access to major points - e.g., Smithsonian, Federal Triangle, Clarendon, Arlington Cemetery. |
| It would be disastrous for my family's commute to close all of this. |
| Would use Eisenhower daily... |
| If I need to take the 2A bus to get to ballston, instead of just walking to EFC station...It would probably add AT LEAST 40 minutes to a commute that normally takes 45 to 50 minutes. IN other words it would double my commute. If that happens, I would just request to work from home most days. That would take money out of your account. |
| Works for me only because these are stations I dont generally use.Consider not closing Clarendon and Virginia Square, since those are adjacent to each other |
| One of few reasons I moved to Falls Church was the proximity of the East Falls Church station. I depend on this station for many reasons and would be very upset if it closed. It also seems foolish to close the Clarendon station considering the demographic in the area. |
| I use the Smithsonian station during normal times --meaning pre-pandemic. |
| The Grosvenor station should not be closed, especially if there are fewer frequency of trains at White Flint |
| I absolutely DO NOT want East Falls Church Metro to close under any circumstances. I need it to commute to work. etc. |
| Grosvenor-Strathmore station is highly important in our community. No other station exist at walking distance. |
| East Falls Church is the nearest station to my home. Closing it would make traveling by Metro much less attractive. |
| Closing Grosvenor Station would force using the car to commute to DC causing more traffic, more pollution. Our community will suffer great impact in our housing prices too. |
| Please do not close the Clarendon station. It would pose a massive hardship to those of us in the area once the pandemic ends and we are expected to return to our offices. |
| This would make it extremely difficult to use the metro. My commute would be lengthened considerably, and I would be unable to get to my closest station without increased bus service or options for parking. I likely would stop riding metro entirely. It would also affect property values. |
| Closures will destroy property values. Successive stations on a line would remain open by this plan, causing commuters to walk long distances. This is completely unacceptable. |
| I depend on Virginia Square, and closing both it and Clarendon seems to be too much. Keep at least one. |
| It should be safe to anticipate that the pandemic will be at the tail end a year from now, so the ridership demand will start going back to normal. There are at least 11 of these stations that I use on a regular basis precisely because we live close by and in January we anticipate needing public transportation again. |
| Clarendon is the closest station to my condo. Before WFH I commuted to work 4 days each week during rush hour. I assume that by Jan 2022 everyone will be back to work. Clarendon was always crowded for people getting into DC for work |
| Do not close Grosvenor Strathmore station. It is critical to the surrounding community. |
| I take Grosvenor but can adjust to another station without a huge burden. |
| The college park station is critical for the university of maryland and would directly impact the sustainability of the university. Closing this station would also impact the planned purple line, which intersects with CP. additionally, the PG plaza station has less parking and involves much more traffic to and from the station. |
| This would not work for me as I use the Grosvenor-Strathmore station to go to work. |
| I am not sure about the other stations, but Grovesnor Strathmore has a large parking infrastructure and seems silly to close the station. Some of the other proposed closures-Judiciary Square, Federal Triangle, Smithsonian, dont have parking and are short walks to other stations and can be closed. I think Metro should close those that dont have parking only. |
| Terrible idea to close Clarendon -- its at the commercial heart of Arlington. Closing it would be severely damaging to small businesses, restaurants, and of course the general public. |
| Personally, it would work for me since I dont often use these stations, but do not like this at all as I fear it would depress ridership even more and put the system in a worse position. |

Proposal to close 22 Metrorail stations

Those stops are near places where people go out. They need a safe form of public transportation.

I ride from East Falls Church regularly. In order to get to the next closet train station I'd have to take 2 buses

If the Silver line is getting extended, then the trains are going to be full or close to fuller sooner so we need all stations to fit people like me who get on at VA square. Also, I get off at Smithsonian which is a MUCH safer option that going to Lenfant after work. Thats such a sketchy area and I much prefer and feel much safer using the Smithsonian. Plus, it is such an amazing view to come up from the Smithsonian to the National Mall!

NO! THE METRO IS THE LIFEBLOOD OF THIS AREA. THIS WILL KILL OUR ECONOMY.

Not only is Grosvenor my originating station, but the fact that it has parking is also key. Please do not stop service to this station.

Closing Grosvenor would have a terrible impact on the surrounding area. Once people begin to return to work, many will rely on Grosvenor. It's a big reason why many people moved to the area. Terrible idea.

In general, that would not impact my commute. However, it would impact my opportunities to spend off-time in dc as a visitor. Also, by January 2022, we may be back full time and not be so impacted by COVID.

Grosvenor is critical to Strathmore Music venue; it should not be closed. White Flint is critical to Pike and Rose and Countys new bioscience center planning and cant be considered as an alternate to closing Grosvenor. Too much population now in the North Bethesda area that needs to be accommodated by transit. Montgomery Countys 30 plus years of planning for the White Flint sector relied on both of these stations, so both Grosvenor-Strathmore and White Flint need to remain open. Both will pick up metro ridership when covid restrictions affecting venues like Strathmore and shopping/entertainment in Pike and Rose change, and when working in offices for NRC and other nearby offices resumes.

The east falls church metro is the only metro within close proximity to my family. The Tysons one is almost 20 minutes away, and usually in the opposite intended direction. Not only would that add on almost an hour of extra commute time, it increases my neighbors and my need for other transportation to even get to another station.

We need our Virginia Square Station as we are getting older, 77.

There is not a continuous sidewalk from Grosvenor Strathmore to Walter Reed which puts walkers at risk. They could take Beqch Ave but would risk being hit because of curvy roads and being on the road before dark.

if you do this you might as well close the whole thing and just forget it uber all

Eisenhower Avenue closure will detrimental to our community. Please DO NOT close EISENHOWER

I used at least one of the stations every workday and expect to again this fall when offices begin to reopen in earnest.

Not sure why Metrorail would close down the two closest stations - Clarendon and Virginia Square - that makes no sense whatsoever and will create a lot of issues for people who use public transport in the area.

Closing stations should be the last resort. This approach augurs the beginning of the end.

It makes sense to curtail service at stations with low ridership given nearby alternative stations

No. This would absolutely destroy my life. Grosvenor-Strathmore station is critical to my life.

I depend on East Falls Church station for commuting to work

This would close basically every station in the downtown / Capitol Hill / Mall area - completely unworkable

This would make ridership far too inconvenient and would be especially difficult for people with disabilities and the elderly.

NO! Close Virginia Square, but not Clarendon. They are close, but the Rosslyn-Ballston corridor is densely settled. Virginia Square riders can walk to Ballston. Greensboro riders can walk to Tysons. If you close any stations, please provide bus service instead.

I think this is reasonable, though it may not be for some people with physical disabilities who cant walk farther.

I need Archives station for work

For the DC locations, it probably isnt as big of an issue because the stations are close enough together to walk. But... the outlying stations in VA and MD will then cause people to have to drive further which again makes the ridership go down. It would be easier to just drive and I dont believe that is the basic concept of Metro.

i live near VA Square and due to disability need close access. I very much oppose closing Arlington Cemetery station due to need for people to travel there.

I would not be able to use the metro for my commute. East falls church is a critical stop for me

closure of McLean (with parking) would cause me to divert to W. Falls Church

Another station is not that close to me. I would have to drive to another station,

| |
|---|
| Proposal to close 22 Metrorail stations |
| I do use several of these stations, but if there is another station within a half mile of a closed station that would probably be okay |
| Is this even serious? This would close my closet stop and most of the ones I use most often. Hard fail. |
| I heavily require access for work to both Cleveland park and McLean station. The McLean station is the only option I have for work |
| Works for me, I dont use these stops.... |
| This probably wouldnt affect me but would affect many others. |
| I use Archives station daily, as it is closest to my workplace and is one of the cleanest and safest stations to use in the area. |
| fix the problem inside the management |
| Grosvenor is my local station |
| Closing grosvenor strathmore station doesn't make sense. Once the pandemic is over strathmore hall will need the station open to provide a means for people to go to events |
| This would leave several people I know without reliable transportation to their jobs (in Virginia). This is especially true for the East Falls Church metro stop. |
| This proposal could reduce travel times while causing minimal inconvenience to others (especially for those stations that are half a mile or so apart). Presumably people with limited mobility could use the Metro Access system? Or buses? That would be the main thing I would want to know about this plan. |
| I often visit most of these stops and live at one of them. Closing these would severely limit my transportation options and ability to do simple things like get groceries or get to work. |
| Absolutely absurd and unworkable. Dont open the three that havent opened yet, but dont close any existing stations. |
| I desperately need the Grosvenor Station |
| This is dumb |
| College Park station needs to stay open, in particular. It is nowhere near any other station and I rely on it for my job at the university. MARC commuters would be negatively impacted, as well. Close Archives, sure - it's literally two blocks away from Chinatown. But College Park is ESSENTIAL. |
| This is a terrible idea, especially since it will lead to deferred maintenance that will eventually make these stations even harder to reopen. And good luck dealing with traffic when people are going down to the Mall and have only LEnfant to get there for their pet protest, permitted event, or other mass gathering. |
| I live in Cleveland Park. If this were to happen I would likely take Uber more often than Metro. |
| I work at the National Science Foundation in Alexandria. I do not have a car. The Eisenhower Avenue station is incredibly important to me. The walk from King Street is impractical in the rain. Also, we bring panelists in from all over the US. They often leave NSF directly to National airport. Carrying their bags to King Street to catch a train would be very disruptive. |
| All Silver line stations need to stay open. It is so convenient to use the Silver line to get out towards Reston and soon beyond! |
| This is a bad idea. I live near EFC. Without that station Ill just stop using metro, as will most who live near one of the proposed closed stations. Once other transport habits are formed, returning to use of Metro becomes unlikely. |
| This is a terrible proposal. Many, many people would abandon metro use, resulting in considerable loss of funds, much more than the decrease in costs. |
| I need to take the metro at Clarendon several times a wee to go to Washington. Also when I travel to Dulles airport or National airport every month I take the metro. If there is no stop at Clarendon I will have to drive. |
| The Clarendon station does not have low ridership, in my experience having lived there for five years. The trains are always packed by the time they arrive. |
| I often travel to Downtown DC close by to the specified lines above. Closing them would be an inconvenience. |
| This would make travel to certain parts of the city difficult. As an alumnae of the University of Maryland, I am also concerned about the impact this would have on students who intern in DC |
| I do not like the closing of Smithsonian or Federal Center SW as I use these daily. Van Dorn St would be a hardship because my overnights there wouldnt allow me to walk the almost mile to the station. The other Alexandria station is too far. |
| Very disappointing if the Cleveland Park, Smithsonian, Fed Ctr SW, etc. stations closed. |
| I use both Clarendon and Virginia Square. The disruption of closing either will be devastating to the neighborhood real estate |
| It would be a horrendous idea to close East falls church. There is a great distance between ballston and west falls church. Plus, it is a very busy station at rush hour, accommodates a large kiss and ride community, and is an important but hub. PLEASE dont consider this! |
| Why did we build a silver line extension that no one but real estate developers wanted if we have to shutter existing stations? You cant be serious with this proposal. |
| Closin Virginia Square will probably stop us from using Metro |
| UNACCEPTABLE. A non starter. You can just close the system as far as I am concerned. I only travel to Grosvenor and East Falls Church. |

Proposal to close 22 Metrorail stations

We use grosvenor metro frequently, it is a lifeline for us and others

Reston Town Center and Loudoun must open. There are many new housing developments that have been built in the area with the promise of having easy access to a train station. Right now, because of the pandemic the ridership is very low from this high-tech area. This will change. If you dont open these station the areas developments will suffer.

Do not close Grosvenor-Strathmore

We are walking distance from East Falls church metro. If it shuts we will have to drive and find parking at another station.

Please do not close Grosvenor! It is not a low ridership station, I see many people take it! It is needed to get to the Concert Hall. Without it people would take cars and pollute! Traffic is already horrible on Rockville Pike, even on weekends

Grosvenor Strathnmors us surrounded by housing at the station. Are these other stations? Metro shpuld be where people are living.

I use the East Falls Church station. Closing 4 stations in Arlington is too punishing for us. The East Falls Church station is used to separate Orange and Silver lines.

This plan closes several stations I use a lot - College Park, Federal Triangle, and Judiciary Square in particular. I have some foot issues and losing College Park means parking in Greenbelt with a much longer walk from my car to the station. The other two stations are near places I frequent for work and while there are alternative stations, it will mean longer walks which is hard on bad days for my foot pain,

This is a TERRIBLE idea - how on earth can you consider closing these stations? You are going to shoot yourself in the foot. Specific stations of concern - Federal Triangle, Judiciary Sq, McLean, Mt. Vernon Sq Smithsonian, VA Square. All of these get heavy usage under normal circumstances. This is the worst thing you could do for yourself.

I accepted a new role with reliance on the Grosvenor station as an option for my commute. Many ppl who live in the condos and apartments surrounding that station purchased or signed leases based on proximity to the station. (Likewise for several other stations on the list such as Reston Town Center.)

While this would have little to no impact on my own commute, this seems like devastating decision for people who rely on metro for their livelihoods, particularly if they are paying high premiums for rent to have metro proximity.

Absolutely not! This would make using the metro nearly impossible for me. Do anything else before you do this.

I use Clarendon and archives so this would affect my metro use

Closing so many stations gets in the way of equity in terms of people being able to access the metro for work or shopping.

Clarendon is a busy station! We use it to go to the grocery stores (trader joes and whole food) in addition to restaurants and pubs

Closing the Clarendon station would make is much harder for me to get to work in DC and would have a horrible impact on my property values. Once the pandemic is over (which should be later in 2021), youll see ridership rebound. Closing the Clarendon station would be incredibly short-sighted!!!

The issue with Wiehle station is parking and getting into and out of that damned parking lot. If RTC is not a reliable alternative, then there is no point to even creating that station. Its not like people are walking or biking to these stations primarily. The bus service from Wiehle is really limited as well. These outer stations need more support and resources, not less.

We are opposed to closing Virginia Square and Clarendon. The Clarendon metro stop is particularly important. Many of us are living in the Clarendon area specifically because there is a metro station there. Roslyn is not close enough and is very congested in terms of traffic. Please do not close in the Clarendon metro

I use Greensboro daily, due to pandemic I have work from home for few months. But closure would affect me and my girlfriend to commute to work.

Cleveland Park is my primary station

All of these proposed stations can be closed expect - Cleveland Park. I use this station - to get to the post office, target, and my house. I cant afford to take an uber all the time - I need the metro to keep this station open.

Closing East Falls church would eliminate needed parking and would also result in overcrowding at nearby stations.

The College Park Metro Station is an invaluable resource for students. Many students such as myself use the metro to get to school. For others it provides access to easy travel for internships and other educational opportunities.

I would prefer a change in service hours to closing stations. Keep the stations open

People have strategically placed themselves (and paid high rent prices and high mortgages to do so) near metro stations. Closing certain stations due to WMATA's best guess of which stations can be deemed "inessential" is rather discriminatory and will have targeted repercussions for many.

Please do not close Clarendon. This is a very busy area.

Two of the stations I use the most are Grosvenor-Strathmore and Cleveland Park (often traveling between the two).

Again, I can see it as a cost saving effort but closing so many stations would be a hardship especially Reston and Arlington Cemetery.

Proposal to close 22 Metrorail stations

Having reston town center open is the one main thing that would get me to commute by metro again. To get from wiehle to my job by bus can take an extra 30 min which has made me drive a lot more often.

Please keep east falls church open! And closing both federal triangle and smithsonian is a problem

More cars on the road, parking problems at adjacent stations, kill local businesses. Does metro even remember where the University of Maryland College Park is located? Hello? Is anyone reading these comments? A death spiral proposal, but all of these options are.

I work at the University of Maryland, and I wouldnt be able to take Metro to work if the College Park metro station were to close.

I can't imagine closing stations that have maybe 1-2 employees on duty will save any significant amount of money. Eliminating some of these stations will mean I will drive instead.

We are retired and would have to drive to another station since we cannot walk that far or bike. Parking is at a premium at the nearest station which actually isn't near at all. We rely on the Metro for our travel needs.

We live in Grosvenor Park. A main consideration in buying our condo here was the convenience of the Grosvenor Metro station.

Your list includes the stations I use the most and two are next to each other. I suspect ridership will increase as the pandemic ends.

Judiciary Square is an absolutely critical station. The nearest station, Gallery Place / Chinatown, is the exact center of the crime-infested Chinatown ghetto, and it is not at all safe to walk to or into Gallery Place / Chinatown station. You would be better off closing Gallery Place / Chinatown, for the safety of all non-criminal ridersâ€”except that that might push all the criminals to Judiciary Square (although the nearby MPD HQ might deter that). Please do not close Judiciary Square, for all of us law-abiding riders!

This is the worst option of all. Closing so many important stations that people not only use for their daily commute but also to go out for dinner and drinks as those stations are conveniently close to everything. After going out for an evening out and especially if its a bit late in the night, people may not want to walk far to get to the closest metro which means again they would probably use alternative means of transport resulting in more people turning away from the metro and losing their ridership.

Currently I use Van Dorn St metro so closing Van Dorn St down would be a major issue for me because I am very close to Van Dorn. Franconia-Springfield metro is too far and Eisenhower metro is not that close either. If there are buses going directly to Eisenhower metro that would not be a bad option, but if it stops along Eisenhower then that would not be good either since ti would take a lot longer to get into work.

Closing Arlington stations seems unnecessary and thinking ahead on closing new stations before theyve even had a chance to open seems a bit premature. Could thos hours simply be placed on an earlier closing schedule, as opposed to eliminating them altogether?

I use mt vernon daily. And will hamper convention usage

If it saves money and there are stations close enough anyhow, it makes sense.

Archives and Federal Triangle are the only 2 stations near my work. If both are closed, that would affect a lot of government workers in the area.

I would be using college park & federal triangle

Many of the metro stations included in this list are close to high traffic areas and areas with a high population who need metro access.

The only stations I need on a regular basis are Columbia Heights and PG Mall to get to and from work.

Grosvenor-Strathmore metro station area is attracting more and more people, families with young children and etc. Not having a metro station within walking distance will have a huge impact on the neighborhoods close by. Please do not close the Grosvenor-Strathmore metro station!

Need Reston Town Center to stay open

Metro would no longer be walkable and property values would tank. The loss of value would be many times greater than any savings to Metro. Horrible option.

If those stations close, there should be consideration for bus service in place of the metro.

Depends on how VA busses adapt

I travel to work from Grosvenor every day.

My brother is a Special Needs Adult, who does not drive. He works at NIH, and we purposely bought his home near Grosvenor-Strathmore, so that he could have a short work commute, that would not stress him out. This would completely turn his world upside down, and make it near impossible for him to continue his employment.

Closing 2 adjacent stations: Clarendon and Virginia Square would not be feasible. Clarendon station should be kept open.

Our family relies on East Falls Chirch metro for transport

There isnt a station close to College Park allowing access to the University by foot.

Again the issue here is whether the working poor who depend on Metro can easily access stations that are further away from the one they normally use which you would now close. Will there be bus service between closed and open stations?

Proposal to close 22 Metrorail stations

I use the Federal Triangle and VA square metro stops frequently to commute to work and my child's school

I commute into DC and Rosslyn area and walk to the East Falls Church Metro. Closing that metro would require I drive to West Falls Church and create environmental impact by using my car where I do not now. It also has a terrible impact as a place where crime and vagrancy can take place if we have a closed Metro Station in the neighborhood. The loss of the station to this community is far greater than the savings that would be gained by closing it. I am adamantly opposed to it and will join others in protest if Metro takes action to close the station. Its short sighted and foolish.

Grosvenor is the closest station I have it will jeopardize all plans. It has been one of the busiest station pre Covid so while you can alter schedule to decrease frequency you must not close the Grosvenor metro station.

Closing East Falls Church station will result in platform overcrowding at the two nearest stations - West Falls Church and Ballston. Ballston is already super busy. Shutting down East Falls Church will make it awful.

Grosvenor-Strathmore was packed pre-COVID and should be shut down. Calling it a low ridership station is nuts. This solution will force more cars onto the roads, causes overcrowded metro station garages for those that remain open (and Grosvenor-Strathmore was already at capacity due to construction), and make commutes longer.

Cutting service will potentially create a death spiral for future cuts if Metrorail pursues these cuts.

This would be absolutely horrible. People rely on these stations to get around, especially if they don't have a car

I work in DC and ride home late night to Grosvenor. This would require me to take an Uber home from another station adding an additional expense. I am also horrified that you would consider doing this to the patrons of Strathmore Music Hall.

A lot of us who live near the metro do not have cars. if all the stations listed were to be closed we would be forced to Uber.

Please keep Grosvenor Strathmore station open

I'm not immediately opposed to this option, but I think Metro needs to reconsider the list. I live at Clarendon and typically exit at Federal Triangle but support the closure of those stations, if necessary, because I know I have other walkable options. Please consider the number of apartment buildings at Reston Station - people who may not even have cars - who don't have another walkable station. Please also consider impact on tourists. We will likely have more tourists by January 2022, at least into the spring and summer, so stations like Smithsonian and Arlington Cemetery should be reopened to maintain our positive appearance for visitors who will bring profits back into the city and make sure they have access to our biggest attractions.

This would be a significant hardship.

I use many of these stations regularly and would be highly inconvenienced by their closure. The East Falls Church station for example was just renovated, and closing it would be a serious waste of those resources. Unlike cutbacks in hours and number of trains, station closures are more permanent (whether the station is removed or just deteriorates in place), and thus it is harder to recover them when ridership recovers and even expands after the pandemic.

This would work for me but it is ridiculous.

A silly proposal which would leave people so confused they would use Uber or the like;

Many of these stations are only seeing low ridership right now given the pandemic. These will be some of the busiest stations when people have to go back into the office, which may very well be well before January 2022

It would create a disaster on roads and severely impact people who don't have cars and walk to Metro

Would spillover mean insufficient parking at other locations? If so, this is nonviable.

With respect to the metro stations that have parking, why close these when commercial parking would add even more cost on to an already expensive system???

As a temporary measure, it is understandable but permanent closings would be a mistake. In the long run, the DC and surrounding metro area is going to have a lot more people who need to move around and we will need public transit to be a viable convenient alternative mode of transportation.

Not Clarendon. Not East Falls Church. Both of these stations are heavily used. Other stations are not walkable

I live near Virginia Square station and closing BOTH Virginia Square AND Clarendon leaves this entire area of Arlington to only use Ballston....? I would be a bigger advocate of closing VA Square and leaving Clarendon open so that no one section of the community has a much further walk to get to a station, even though I'm a resident of VA Square and the VA Square metro is about 100 yards from my house...

There are major offices near Clarendon station, please do not close the Clarendon station. I use that for my work.

These stations are crucial to getting people where they need to go. I love RUGHT bt East falls Church and my husband uses it every day to get to work. If this station closed it would take him so much longer to get to work and get home

Proposal to close 22 Metrorail stations

this is too much. it would make metro almost unuseable

Those are all important stops especially those close to government buildings that employ a lot of people or the public travels to. Ridership is down due to Covid pandemic/restrictions and so many working remotely. Ridership will increase as things get back to normal. Also some folks may live close to multiple stations, but choose less busy stations or avoid larger stations where they feel unsafe. Do NOT shut down stations!!!

These are all the places I go and use, I rely solely on the metro for transportation!

It doesnt make sense to close two stations that are next to each other (like Clarendon and Virginia Square). Closing the downtown stations and Arlington Cemetery seems as though it would hurt tourism. I think we want these people to come back.

I might need College Park as an option.

I use the Eisenhower Ave station. I actually moved to my current residence to be near a metro stop. It is not that far to walk to King Street station, but I am hoping to switch jobs and take metro to work. If so, it may not be practical to walk from King St in bad weather.

Rely on Grovesnor/Strathmore station for commuting, access to cultural events in city, access to airport. There are plans to add housing at the station as well. This is a short-sighted & terrible idea

Some of these stations are near population centers and business districts and would hurt small businesses in these areas. And what about elderly people who cannot walk far enough to go to supposedly nearby stations?

Keep Greensboro open!

Clarendon, Virginia Square are critical hubs for Northern VA access

How are tourists to get to Arlington Cemetery?

Clarendon and Reston Town center are in major retail areas. McLean is the only station close to McLean and we are underserved by busses.

I live in Cleveland Park. While I can walk up to Van Ness in good weather, commuting to work on wet days will be a problem.

EFC should be ope at rush hour on weekdays. Other stations I don't have an opinion on.

Most of these stations have other stations within a few blocks. College Park, however, does not and thus should not be closed.

Unless you're going to reliably accommodate folx with mobility issues, this is a bad plan. Also, do you mean closing them early? Or completely? You'll be screwing over many people who have chosen to live by a metro. This is ridiculous.

East Falls church is in walking distance to my location and neither of the nearby stations have sufficient parking. If I get in my car I will stay in my car.

Pre-pandemic, I regularly used the archives, clarendon, cleveland park and federal ctw SW stops.

Please keep Grosvenor-Strathmore, it is the closed station to myself and my neighbors.

My essential worker travel to and from forest Glen on the red line to foggy bottom where there is a major healthcare destination would be minimal impact w these changes

I live on the Orange line, convenient to Virginia Square first, Clarendon second. We will leave the area if you shut our Metro stations. My adult children will not live in Arlington or Falls Church any longer.

I MUST get on at East Falls Church and moved into my home to be be near this station. I also work in downtown DC and use all the stops for business. ABSOLUTELY NO ON CLOSING THESE STATIONS

Closing both Clarendon and Virginia Square seems to reflect poor foresight. That would mean there would be no Metro station between Courthouse and Ballston, which is a significant distance. These neighborhoods have had, and continue to have, significant residential construction. Basing ridership needs in January 2022 on current pandemic ridership is unlikely to lead to accurate planning.

Grosvenor is the closest station on the Red Line to the city with parking and has always been crowded. The garage was expanded for that very reason. The station is very important for workers to get downtown on weekdays and people to get in on evenings and weekends. Closing that station would cause a major hardship for thousands of riders. There is nothing anywhere close with as much parking.

I depend on the Clarendon stop for essentially ALL of my travel needs when we arent in a pandemic. It would be devastating to be without it. I depend on it for work, family, medical, and all other commuting needs.

I use Archives, Arlington Cemetery, Federal Center SW, Federal Triangle and Smithsonian very often.

I use EFC. I expect substantial demand to return by January 2022. It seem premature to make decisions about service a year from now. If there is low ridership, close stations now with the ability to reopen as people are vaccinated and demand picks up.

| Proposal to close 22 Metrorail stations |
|---|
| I use some stops |
| Park & ride at Grosvenor-Strathmore is vital for commuters. |
| Definitely need College Park station open daily |
| I am not sure what the ridership is or how that is determined. I worry about overcrowded trains which I experienced pre-pandemic. |
| closing Cleveland Park is a major problem. |
| Grosvenor strath ore is critical for Strathmore events. I also use this metro station frequently after 9pm and would be very upset if it closed!!! |
| Please keep judiciary and mt. Vernon. |
| As a student at UMD College Park, I regularly rely on the College Park metro station. I would not be able to travel to work or class without this metro station. |
| The East Falls Church metro is essential to my professional work life, particularly my commute. |
| Closing the following metro stops would affect my small business and the value of the nearby apartment communities that only rent because they are a quick walk to metro. Please do not close Clarendon, Eisenhower Ave, Virginia Square and Reston Town Center. |
| I live near Cleveland Park and would be unhappy about losing our station, but can walk to Woodley Park (not everybody would). Closing both Clarendon and Virginia Square is totally unacceptable. (I go there often.) That would leave nothing between Courthouse and Ballston. Under no circumstances should two stations in a row close. Close Courthouse and open Clarendon if you have to. Better yet: close nothing. |
| I live within walking distance of the East Falls Church station. It is definitely NOT NEAR other stations. Taking a bus to Ballston or to West Falls Church would add so much time to my commute, especially during evenings when bus traffic is reduced and when I'm not comfortable about my safety waiting in the dark for a bus. Some family members live in DC where parking is scarce; not being able to travel from East Falls Church to DC would make such visits more complicated. Closing both East Falls Church and the McLean stations will make it difficult for me to go to my church in McLean. |
| For environmental reasons and to reduce traffic congestions, WMATA should make Metro train riding more user-friendly. The best way to do this is to run trains more frequently, run longer hours, and KEEP all the stations OPEN, especially Shady Grove, Rockville, Twinbrook, White Flint, Glenmont, Wheaton, and Forest Glen. European cities encourage their residents to use their mass transit by running more trains, serving all stations, and operating the trains for most if not all of the day (24 hours). Trains in London, Paris, Berlin, Munich, Rome, Brussels, and Madrid are great models for how WMATA should serve residents of the Washington DC area. |
| The Cleveland Park is essential to my commute! |
| This would work for me, but is not a great solution. A lot of people depend on those stations. |
| My job is reopening by end of 2021. I see Jan 2022 as a time to reopen these stations for the many people like me who will return to offices. |
| Clarendon?? That is in the heart of a restaurant and shopping area and should not be closedVA Square is a vital station for commuting residents |
| on site parking is not available at White Flint or Medical Center, the stations flanking Grosvenor-Strathmore station |
| This plan would close the two stations which I use most frequently. |
| You are proposing closing stations that are not actually close to other stations. You are not taking into account pedestrians and sidewalk availability between stations. For example, closing McLean would make it really hard to get there by walking from a nearby station. |
| This current proposal would close BOTH Clarendon and Virginia Sq-GMU! I am faculty at GMUs Arlington Campus. Students, staff, and faculty commute to GMUs Arlington Campus using these stations (and the same is true for the FDIC). Currently, either Clarendon station or Virginia Square station is a reasonable walking distance to GMU/FDIC; it would not be unreasonable to close ONE of these stations. But it is unreasonable to close BOTH at the same time! |
| Some of these closures are OK for me. Some are not; I use Clarendon for quick trips. Walking to Court House would add 10 minutes each way. |
| IGrosvenor needs to remain open to accommodate those driving to park and ride metro. White Flint will not be able to accommodate all Grosevnor and White Flint riders, and there are no other parking options nearby. May as well drive downtown than take metro if getting a parking spot will be impossible. |
| Cleveland Park needs to remain open. It's vital to the neighborhood development. Many older residents live in Cleveland Park and use the metro regularly. Growvenor Park is also important to serve the Ootomac Rockville area. |
| I rely on being able to walk to Grosvenor-Strathmore in order to use Metro. |
| I use so many of those stations! All of the stations need to operate. |
| We need public transit. Driving is too expensive. |
| Both my wife and I regularly commute from the East Falls Church station - closing that station would be terrible for us and everyone in our community. |

Proposal to close 22 Metrorail stations

I live a mile from the East Falls Church Metro. I walk there to get to Metro. I remember what it was like before EFC opened: having to wait for a bus to Ballston. It was such a convenience when EFC opened. Dont close the Arlington Cemetery or the Smithsonian station.

Federal Triangle/Smithsonian and a bunch of other stations would be fully utilized if federal offices go back to full in person work. Tourists would be left out. This is super shortsighted.

Closing both VA Square and Clarendon leaves a long stretch along the Orange Line that has no stop. Ballston to Courthouse is a long distance, and there is a huge density of commuters along that line. Closing the stations due to low ridership during the pandemic (remote working) makes no sense. How can this projection be made with this non-normal data?

Closing stations closer to downtown, while not ideal, seems more practical than closing stations that are out within population centers. Cleveland Park metro is not near enough to another for that to acceptable, for example.

I regularly use many of these stops, Greensboro for work, Live at VA Square (though I could use Ballston), shop often at Clarendon and East Falls Church, go rock climbing at Eisenhower Ave

Besides driving, there would be no way for patrons to attend strathmore programs. Many people bought homes or rent near the strathmore station and rely on metro to get to work.

There are huge number of people who live between Ballston and west falls church that would be unable to get home on the metro so closing East falls church would be a disaster. Virginia square can go, it's easy to walk from ballston. The distance between them is very little

My husband takes the metro daily from east falls church into the city.

I use Virginia Square daily.

The largest share of the station closures would in Virginia, significantly higher than the share of station closures in MD or DC. Why this outsized closure of VA stations (based on the opening of the full Silver Line). The station closure percentage (of the total stations in the state/district) is roughly double for VA compared to MD and DC. Was this closure based on ridership numbers onboarding at those stations? If not, what was the metric that was used. I would really like some transparency on the metrics/calculations that were used to determine which stations were selected for closure. The stated metric of near another station just doesnt cut it given the huge preponderance of closures just in VA.

This would severely disrupt neighborhoods as well as housing markets. Improve service to improve ridership, not cut it.

I am vehemently opposed to this for a number of reasons. Please do not take a drastic step such as this due to a medium term problem like COVID. In the long run, these stations service populated areas that will only continue to grow. If these stations close, they will have long range impact on the economic growth of the entire DMV, limit options to riders who rely on metro, and limit the Metros ability to attract the ridership it needs to recover. This option should NOT be considered at all.

I use metro to commute to work, with the station closures, I would have to drive to work instead of taking metro. Not a good option since I have been using metro to commute to work for 32 years now.

RTC Station to Innovation Center will be my primary commute.

I am a legally blind individual and live at the end of the silver line near the innovation metro and in counting on this metro stop opening in order to get me to work once I am required to go into the office. If this metro stop closes, there would need to be adequate and regular buses that could take us to the nearest metro stop that is open. This would also deeply impact the value of my house which I just purchased last October.

I strongly oppose to your plan.

Please keep Fed triangle open! Not only is it central to several agencies in that area, its one of the faster stops to the Mall. If you are also closing Smithsonian, it would be difficult to get to the National Mall

Keep stations open.

While physically close to Med Center -- the very constrained parking there would negate this as an optionWith the loss of the Mall -- White Flint is a ghost town

To get to Georgetown University Hospital you need to travel from The red line to DuPont Circle to reach the complimentary services. For cancer patients and the elderly this service needs to be there and more accessible to make ends meet

Going car free was an option due to metro train access. Eliminating stations in Arlington would mean mass transit within Arlington and into DC would be difficult if not impossible. This would also impact our diverse population in Arlington which do not have the luxury of choosing a car fee diet but instead do not have the means to own a private vehicle and rely solely o. Mass transit. This also includes our high school students who use mass transit for getting to jobs after schoolTo supplement family income.

I have regularly commuted from the Grosvenor metro station into DC for 11 years. I have not witnessed low ridership pre COVID. It is a very busy station, and local commuters such as myself depend on it to get to work.

| |
|--|
| Proposal to close 22 Metrorail stations |
| I depend on Eisenhower Station for transportation! |
| I use the Grosvenor-Strathmore station a lot |
| I work one block from the Clarendon Metro. Its unclear if you close both the Virginia Square and Clarendon Metro how that would not drive commuters to the Courthouse stop instead making commuting more difficult. |
| The Bethesda and Rockville stations are not close enough to Grosvenor-strathmore to walk to. |
| I know that i could use the stations nearby these instead |
| Many of the government workers work near Archives. this would provide a great hardship to getting to work if I had to use a different station than Archives. Downtown DC has many federal buildings where there are essential workers who have to work 5 days a week every week. |
| I use these stations and they make travel convenient; putting more space between where you have to go is difficult and makes travel more inaccessible |
| Judiciary is busyGrosvenor metro is a big walker commuter stationIt is also the station for strathmore and outside events at strathmoreIt has parking No parking at other stations - not at medical station and very little at Bethesda and twinbrook |
| I dont regularly use any of these stops so it wouldnt affect me per say but it would affect people who live close to these stops |
| Completely closing (as opposed to reducing service frequency) would have a drastically negative impact. Grovesnor-Strathmore, for example, is adjacent to a world class cultural venue that serves the entire DMV region. As we are all encouraged to opt for public transportation (e.g., increased parking costs in DC), the stations that serve desirable destinations must remain open. |
| Absolutely not. I use Van Dorn to get to work. I will no longer use Metro if this happens. |
| I agree with all but two stations:Smithsonian: Mainly for tourists who wont know their way around. The name of the station is very important, so even though there are many stations that cover for this one, its probably the destination most used by tourists Reston Town Center: This may be either a destination commercial station (like Pentagon City) or is a potential high source for new ridership. I think this station should be opened in at least its first year to assess its viability |
| Short-sided. In this timeframe the world should be opening up again - and to cut off the poorest communities that rely on public transportation being in reasonable walking distance for work would not be well received. The last mile problem is only worsened by doing this. |
| Closing Grosvenor would leave me without transportation |
| I rely on service at Strathmore |
| East Falls Church is not walking distance to other stations and should remain open. |
| Closing stations is a terrible idea. Specifically closing Grosvenor would severely impact hundreds or even thousands of nearby residents, and would also negatively affect attendance at Strathmore, a local cultural treasure. Do not do this. |
| See Previous Comments. AGAIN I dont see Dupont or Farragut Listed?! |
| This is a travesty for everyone living in and around those metro stops... for their convenience of commuting, for the necessity of commuting on metro rail to spare our traffic and our planet, not to mention real estate value dropping around the locations where stations are closed. AND ARLINGTON CEMETERY! Whats the point of having an established public transportation system that reduces its convenience instead of expanding it. It feels incredibly short sighted and wasteful. Please do not close those stations but seek alternatives to this plan! |
| It would no longer make it feasible to take the train at all. |
| Closing Grosvenor-Strathmore would be a disaster! During non-pandemic times its garage always filled up. This station is not a low-ridership station is normal times. It is an absolute necessity, since Medical Center has no parking. People bought homes near Grosvenor on the assumption it would always have the Metro. Closing Grosvenor would be horrible for so many people. |
| Rosslyn at rush hour is packed as it is. Close two orange line stations before that and it's going to be mobbed. It would also increase the time it takes to embark and disembark at each stop with more people getting on and off. |
| Longer walks to other stations can make safety an issue |
| No. I live at Cleveland Park. Forcing Cleveland park residents to go to Woodley or Van Ness (both roughly a mile distance away) would again result in more crowded cars, and a huge chunk of riders forced to walk further (taking into consideration those who face various disabilities). Second, removing Arlington Cemetery? Really? Youd lose so much bank from tourists in the warmer months. |
| I use the silver line, and formerly attended things at the Smithsonian. |

Proposal to close 22 Metrorail stations

This proposal is a joke, I assume. Closing all these stations would make Metro useless to many of us. Might as well just shut down the entire system.

Arlington County has zoned so that larger buildings with condos and apartment buildings are along the metro line. They also cut back on the parking these buildings can offer to make the residents rely on Metro. You would create a huge disincentive for local governments creating a long term alliance on the Metro system. I strongly urge you to keep the Clarendon and Virginia Square stations especially.

Closing stations will cause undue hardship on too many riders and make the remaining open stations overly congested, loading trains and platforms over capacity and creating unsafe conditions.

Need VA Square Station

Please keep East Falls Church open!

Many apartment buildings near the Grosvenor-Strathmore station that would be affected. With the NIH being the next stop, this eliminates the metro as an option for many NIH employees who live just north of NIH. Closing some stops all together should be a last resort. Less frequent is better than none at all. Thank you.

I use Grosvenor-Strathmore as my primary station. Like me, there are many other individuals who live within walking distance of Grosvenor-Strathmore. There are many more apartment buildings and homes in the vicinity of this station than in the immediate vicinity of White Flint or Twinbrook. It would make more sense to close one of those stations. Also, what about all the patrons who use Metro to travel to the Strathmore Music Center, which is literally connected to Grosvenor-Strathmore by a pedestrian bridge?

Should open all Silver II

I would likely not use Metro rail at all if the McLean station were closed.

East Falls Church should remain open. Major infrastructure developments including new bike facility and new bridge overpass of Lee Highway will increase bike commuters on Metro at EFC. Also major residential developments near station will add to ridership.

College Park is literally how many low-income individuals get into the city. If you close this, it'll cause so many issues! Plus, you just spent all that money redesigning the station!

I live here due to metro accessibility and this would devastate housing prices, push people to cars, hurt the environment and quality of life due to traffic

Closing EFC and Clarendon limits orange/silver line Arlington FC residents from accessing metro by walking or with parking. Ballston has no parking and Ballston and WFC require driving to access for the EFC service area

NO! Please do NOT close the Clarendon, Virginia Square or East Falls Church stations! Our dense community relies on these stations to get to work; otherwise riders from these close-in suburbs become car drivers -- many of the young people out here don't own cars, and the ensuing congestion and air pollution from increased single occupant vehicle traffic would reduce our quality of life and health.

East Falls Church is essential, particularly since it is the change over hub for Orange and Silver lines. A majority of riders from around this area walk to the station and commute daily to DC and closing it would have a serious impact.

Send the buses in the area to Grosvenor-Strathmore in lieu of going all the way to Friendship Heights

How are people supposed to commute, to get to college (UMD or Montgomery College), visit people? My mom is disabled and can't walk between these stations and then PAY A FARE AGAIN to enter again. This is not reasonable.

This is depressing. This is so many stations! Will there just be ghost stations everywhere?! Is this permanent? Metro service needs to be expanded not contracted. I use metro and then walk to my destination. I don't meet people with cars at my destinations. Closing stations just further hurts people who don't have cars to park at stations. This is too many stations to close, my goodness.

Many many people commute to Reston Town Center including myself and this would prohibit me from taking the metro to work. In addition, Virginia Square and Smithsonian are two very popular spots for my commute and in January 2022 when everyone is vaccinated those will pick up more ridership.

I would prefer Clarendon and Virginia Sq. Stations to remain open or at least Clarendon and Ballston

What about the people who don't have cars who moved to be near those stations who suddenly won't be able to get transport to the stations that are open. Why not delay the construction of Potomac Yards?

Greensboro station is my main station that I use and that all the people living around me (very residential and highly populated area). Walking to another metro station requires crossing a very busy road which wouldn't be safe. The walk would additionally take 20 minutes or more, which is very inconvenient. I would be extremely upset if Greensboro metro stop closes.

A retreat, a sad day for a great city and frankly for the country.

I regularly use several of these stations on a daily basis to enter and exit the metro. I would be required to drive to work rather than take metro.

Proposal to close 22 Metrorail stations

This would increase my travel time to get to/from work each day. I will have to work in excess of 1/2 mile to find an open metro station. Coupled with eliminating bus service, Metro is making commuting into/out of DC very difficult for VA residents.

This would very negatively impact my ridership on orange and green lines. Please do NOT close down *any* metro station. Having more convenient stations and stops is far more important than having more frequent bus/train service for me.

Close the new Silver line stations first. Nobody uses these stations.

Clarendon is in the middle of tons of apartments. And Va Sq and Clarendon are too close to close both.

I rely on clarendon, east falls church and mclean for work and general riding. Virginia square should be closed. No one uses it and the other two stops are close enough but more on this list are near critical locations. Also ridership will be higher in a post covid world/whenever I can get a vaccine and people are working in offices again so this seems like a late and bad solution to a problem that will be fixing itself soon.

The VA Square metro is my metro station. I purchased my home because of accessibility.

This would effectively end service to Northern Virginia.

Clarendon is the closest stop to me and the next closest is virginia square. Closing those stations would require me to either walk 2 miles, or pay additional metrobus fair, almost doubling my transportation cost. I do not own a car and this would severely impact my ability to work in DC.

Closing Silver line stations a few months after they open would kill ridership on the line and severely impact recently completed development at those stations.

This would significantly impact the employees of businesses who work in DC, or simply work in different parts of Virginia, from getting around. This would effectively turn Metro into a system for and exclusively for the benefit of live and work DC residents, and anyone who chooses to not live in DC be left to their own.

This proposal would be accepted if the other proposal is to close the station. I've lived within Grosvenor park for nearly a decade and use the train to access the city for work. Thankfully my station, New York ave is on the red line as well. I think it's important for most residents that live within walking distance to the station to continue to have access to the station. There are many apts and condos that were built ride on top of the station to gain access to the service. Unless there is going to be bus service provided to other stations close by, I think it would be a real disappointment to see this station closed.

As an interim measure only

This impacts Mt Vernon near my home and Virginia Square a frequent destination. I anticipate needing Mt Vernon Sq in Jan 2022.

Closing Grosvenor is ridiculous. It is one of the few stations in the area with parking. It will also destroy property values in the area. Closing the Smithsonian stop is also dumb. For tourists, it's the most logical stop for them to use to get to the museums. Closing it would be detrimental to the area tourism.

My home station is east Falls Church. This would greatly negatively impact my ability to get around the area. I am strongly against this change.

Grosvenor-Strathmore is important to many who live nearby, and there is parking available. This would be a tremendous inconvenience.

How can you close two contiguous stations? Ex/Clarendon and Virginia Sq? Where are people suppose to go to get the Metro? Particularly since that corridor is continually growing population-wise with high rises galore.

Clarendon as a local commercial and residential hub needs to stay open

I would rather close some stops (as long as they are within a mile of another stop) than cut hours/have trains come less frequently.

Oppose closing East Falls Church, since it allows commuters to ride both orange and silver lines.

I would be extremely disappointed with the closure of the Virginia Square and Clarendon metro stations, and I think many residence of the area would as well.

This is a terrible idea, especially without back-up shuttle buses. Clarendon is a highly-populated station, and East Falls Church is nowhere near another Metro station. Federal Center SW also serves buildings not easily accessible from L'Enfant Plaza or Capitol South. Arlington Cemetery is also nowhere near other stations. And why would you close Smithsonian? Think also of people with disabilities who cant hike over a mile between stations.

Just utterly ridiculous. Live at McLean and don't have a car. It's not possible to walk on foot to a different station (ex. Tysons due to the beltway). And East Falls Church is next closest. And closing Smithsonian?? Words cannot describe. You understand that this will cause a death spiral, right? The way to get more people to ride is to offer more service!

Absolutely not. These are critical stations needed for daily work and weekend travel in/out of the city!

I use the metro to get to work from grosvenor strathmore so closing will not work.

I walk to East Falls Church and rely on the Metro service from there. I planned my home purchase in that neighborhood specifically because I could walk to the station. Closing EFC would force me to drive to West FC or other station, putting another car on the road.

this works for me, but i know that this would be extremely inconvenient for others

Proposal to close 22 Metrorail stations

I commute from Grosvenor-Strathmore and it is a very popular commuting hub. A lot of people walk to those stations and may not have or be able to afford transportation to other stations.

Do not close strathmore! The music amphitheater will suffer

Does not take into account the whole rider experience. station closest to my home would be closed. Also station closest to my work would be closed. Next closest station to work is also closed. This would double the length of my trip do to having to access other station and possibly needing to add a bus to the trip.

Station closures would be tragic. This region lies within the seat of government and is one of the most populated metro areas in the country. To cut critical stations throughout Arlington should not be an option on the table. There is nothing so unique about our subway system that is causing the continual funding issues faced by Metro.

I rely on the Grosvenor metro stop to get to work each day and will resume my ridership now that I have been vaccinated

College park is the only station near where i work. Other stations are *minimum* 30 minute bus ride away and I already have to commute for at least an hour to get even that close. Id rather keep taking public transport if i can but getting rid of the college park stop would kick me off regular commuting on the metro to work for good.

Why are we looking to close metro stations that have not yet been opened? After spending this much funding on opening stations in Northern Virginia this would be a poor decision and would cause social and political backlash. I think it is widely known you would not be able to close these stations and this is posturing for additional funds.

This would greatly impact my ability to get home from work.

The station I use is located directly within a high-traffic residential area that has only seen a decline in use in the past year due to COVID-19s impact. The ending of the pandemic will result in my stations use skyrocketing, and needs to be kept open for all of our livelihoods.

Hate to see Grosvenor-Strathmore close. Its my go to station.

This plan fails to reflect the unreliability of escalators/elevators throughout the Metro system. While working near the Federal Triangle station, I frequently travel to Metro Center when the escalators/elevators are not working at Federal Triangle. Limited stations would also put more strain on the elevators and escalators, increasing the likelihood that they would break.

I do not understand why Metro would eliminate all service between Ballston and Rosslyn, given the proposed closure of the E. Falls Church, Virginia Square, and Clarendon stations, These closures would, in effect, eliminate Metro service for Virginia residents, to and within in a very busy central business and entertainment core in Arlington County.

I live in McLean and the issues I have with the next closest station -- West Falls Church -- is the traffic encountered getting from my home to the station and parking at the station. Assuming COVID gets under control and restrictions are dropped in 2022 -- I will primarily be using the metro system to attend day and evening events in DC. Parking is very difficult at West Falls Church during the day and there have been times (prior to the silver line) in which I could not find a parking spot. The McLean stop has remedied that problem. Additionally if you plan on closing the East Falls Church stop -- parking will be even more difficult. In the evening parking in DC is very difficult due to the early closing times of the parking lots --so I tend to take the metro in for those events as well.

East Falls Church is my closest station and it serves two rail lines, Silver and Orange. I like to use either line for my trips into and out of the downtown area.

Closing Grosvenor Strathmore would be terrible! I live in a high rise condo and rely on the metro. Also, property value would drop

This question is just ridiculous on its face. First of all, why would you ask about low ridership at stations that aren't even open yet? Second, this would just create a death spiral for Metro. When you need riders, you don't cut service, you add service.

East Falls Church is a crucial stop for many.

Your job is to get people around town. Cutting off access points to the system does not do that

Moved by grovnesor strathmore to give up a car and use it more

We use Virginia Sq station

I use metro and live walking distance from east falls church and all my neighbors also routinely use metro - Arlington Cemetery I agree has always had low ridership

This would absolutely not work. We purchased our home for its proximity to Grosvenor-Strathmore station. PLEASE keep it open!!!!

Particularly concerned about closing or Arlington Cemetery station. Would impact service families and many out of town visitors.

My work is likely to be situated near one of these stations

Grosvenor/Strathmore is a critical hub for many residents who live in the condos on both sides of the station. This is a critical infrastructure particularly for lower income residents of 20852 who need Metro to commute to work, schools, etc. If you must close a station in the area I would recommend White Flint, or even Medical Center. Medical Center supports primarily workers at NIH. Why penalize everyone else to support that station.

Seems pretty unfair to people living near those stations but doesnt affect me directly

Proposal to close 22 Metrorail stations

Any proposal that closes metro stations increases reliance on cars to move about the city. This is bad for the environment and for residents who cannot afford cars. Find the money.

So.....close off all the tourist hubs, close off metro access to the city from VA and MD to where people would either have to drive in and find parking or take a cab, and close down many residential stops that people depend on for their commute??? Come on, guys.

Closing Smithsonian is crazy.

Undecided

Near other stations is not the same as being accessible to commuters living by the closed station.

Too many station closings will make it hard for commuters to get to work. Concerned about the economic impact.

we need these stations! We cant return to commuting if the stations are closed.

I chose my apartment because it was so close to the Clarendon station

Closing of at least half of those stations would increase the time of my commute, and also take away from very convenient stops into popular areas of the city.

How would anyone get where they need to go?

I live in College Park and do not own a car. It would be very difficult for me to commute to work in DC without access to the metro.

How will the turnbacks on the RD/YL work if each terminus station (Grosvenor, Mt Vernon) is scheduled to be closed?

This seems like a reason more people will not use the system, it makes it less convenient to fewer people....

When I use Metro, I always use the Virginia Square station or Clarendon. Having to go to Ballston all the time would be a significant addition in travel time making it less likely I would use Metro at all.

I use East Falls Church station a lot. I am retired but go into town for all types of things.(museums,etc) There is almost no street parking in DC or very expensive garage parking. Closing that station would eliminate my opportunities to go into town. Why eliminate the Smithsonian station. Every tourist uses that station!

Grosvenor-Strathmore is the most important station for me, but also for many other people as it is located near many multifamily dwelling units where many residents do not have cars and rely on public transportation. Equally important it has very ample recently upgraded parking which facilitates use of the station by people driving from beyond walking distance, some as far as Potomac. White Flint on the other hand has much less parking. If one has to close, it probably should be White Flint. I also would be impacted if Judiciary Sq. were to close but I could live without Judiciary Sq. if need be. Perhaps Judiciary Square could be open only between 8 a.m. and 6 p.m. for the many people who use the courts or work near that station.

Grosvenor Station is critical to a large community, in particular to staff a NIH and WRNMC.

I take a bus from McLean metro mon-fri.

I would think you could close clarendon OR Virginia square, not both. Preferably Virginia square as there are far fewer riders there, and most people could go fairly easily to Ballston or clarendon instead. East falls church also feels like a tough closure, it's a pretty big gap between west falls church and Ballston. And especially if you close both EFF and McLean, that's a huge distance.

I rely on the Cleveland park metro to get to work.

Most of these aren't really that close to others

This is a terrible plan and takes away the convenience and usefulness of the Metro system. Many people, including myself, would have to drive to a station to then park. Once you are in your car, its often easier to just stay there. A little rain or cold and people would opt out entirely.

Several of these stations are not "near" other stations and several of these stations are parking hubs East Falls Church has a wait list for parking.m. It doesn't make sense to close this station.

Smithsonian? Are you kidding me?

While it would work for me personally, that's a lot of stations to close at one time and would add a significant amount of time to a commute. For example, I work at Clarendon metro and if closed I'd have to walk from Courthouse or Ballston. That's miles of walking and I wouldn't want to do it daily as part of my commute. I'd start looking for other options.

Closing my local station EAST FALLS CHURCH, is a ridiculous proposal. Metro just spent considerable money to complete a major renovation of this station. The cost of manning this station has to be minimal compared to the money spent on the renovation and on the revenue derived from the parking lots.If you continue to whittle away at the service provided the entire system collapses, as it become unworkable and undesirable.I dont see the highway department suggesting that lanes of highway be closed due to reduced traffic during the current pandemic.HOW SHORT SIGHTED CAN YOU BE?

Proposal to close 22 Metrorail stations

I rely on the Clarendon Station for work commute.

Some of those closures would be fine, but perhaps not all of them.

I would rather pay more in metro fares then see my local metro station, at Clarendon, close.

You will lose me as a customer if East Falls Church closes. Closing these stations will destroy the metro. You permanently lose a lot of ridership immediately. Lose more revenue need to cut back more. Classic death spiral.

Under this plan I would drastically reduce my ridership as well as my tendency to patronize businesses in neighboring communities. If cuts under this plan are necessary, I would urge Metro to reconsider the list and examine the areas that the cuts would essentially make Metro dead-zones. For example, the above cuts would leave the Orange/Silver line with Rosslyn and Courthouse --- then no trains until Ballston, effectively cutting off Clarendon and VA square to much of the current foot traffic.

Mclean should remain open. Significant community growth in the area.

Clarendon should stay open

I use the cleveland park metro station

Im handicapped and need to be as close to home and work as possible

This is an absolutely absurd idea that would cause an uproar - why would these stations be chosen over others? Every station is getting hit, how do you rationalize choosing these ones, many of which are popular hubs that commuters into the city rely greatly on. The Clarendon/East Falls Church ones are especially disturbing, considering Arlington is a hotbed and so close to the city, not to mention since there isnt a Metro in Georgetown, many people rely on the Arlington stations for transit. And finally, a Metro is VITAL to have when selling or buying a home, and you get rid of the Arlington stations, you would have a great many home owners ready to for revolt. This is just a HORRIBLE HORRIBLE idea that WOULD face major backlash - do we really need more backlash right now? It would literally be suicide for the city to nix these stations.

Closing Mt. Vernon and East Falls is an especially bad idea

I need the Clarendon station in order to have a reasonable commute to work - Also, many customers get off at Mclean. Reston is an essential stop for many people who travel past the metro.

This plan would remove public support for the Metrorail system. Why did we all spend a great deal of money to invest in Metro if its not going to get people where they need to go? These stations were built for a reason and this is a time when people are being encouraged to use public transit rather than drive places. It would have a detrimental and domino effect on the areas around these stations if these were closed and then what happens to the infrastructure invested there? Are these stations going to be mothballed never to be used again? We will regret it in the long-term and I find it hard to believe that any leaders in this region could support this proposal. I will never vote for anyone who does and will fight against any of my tax dollars supporting Metro in the future if this is the way you treat the system that has cost so much to build and that is supposed to serve everyone in our region. There is so little parking at Smithsonian for example, so how can people enjoy the museums that weve also invested in? I live near EFC metro and it adds a great deal to our neighborhood--people commute to work, use the metro to get to airports and downtown attractions. This is the worst idea Ive heard. Surely some of the \$1.9 trillion package can support Metro enough to keep its stations open. Be more creative--why dont you sell naming rights to companies for every station? Then people who support public transit and the environment can put their money where their mouth is and keep Metro in service. This needs to be a last resort and if you do this, you might as well just shut down the entire Metro system

It would be absolutely catastrophic to close Clarendon and East Falls Church metro stations. They are very heavily used and service large populations. Also, it would be a complete waste to close EFC after the huge investment just made there in 2020 to fix the station. EFC has a large parking lot that brings in commuters from everywhere, and many residents of Arlington use public parking on streets near EFC in order to take the metro. It is hard to understand how closing important stations - through which trains are already running -- would save enough money to justify the enormous blow to the crucial role they play in supporting commuters. Please reconsider this proposal. EFC has no alternative especially because there in only one bus (2A) that operates between EFC and Ballston and it has been announced that a lot of its stops along Washington boulevard will be closed.

Horrible impact on tourism

East Falls Church is the nearest metro from too many communities (along routes 50, 29 and 7) that are not near any other Metro stations. Parking is a nightmare near Balston, and it's not walking distance for commuting purposes. EFC needs to remain open.

I need the College Park station to be open, at least on weekdays!

These cuts ensure Virginians stay in their cars and exposes the fraud, waste and abuse of the METRO Silver Line expansion.

Proposal to close 22 Metrorail stations

Grosvenor strathmore provides comprehensive muting for other only a workforce outbound to DC and return but also incoming for service staff to many major condo buildings that need to retain the workforce and whose income cannot absorb additional commuting costs (Gus or Uber) back to Grosvenor from other stations

I use the Grovesnor station daily, M-F. That is the only reason I moved to this neighborhood, to be close to this station.

Closure of Grosvenor-Strathmore station means I would cease regular use of metro.

Please do not close these stations

I live at East Falls Church. There is low ridership because of coronavirus. You will be killing the metro system with these closures.

I regularly use the Eisenhower Ave, Federal Center SW, and Federal Triangle stations.

This would prevent an overwhelming number of residents from conveniently using the metro as East Falls Church is not close to any other stops.

This would be awful! I rely on the Virginia Square metro stop being open. Please do not close this station. We need it!

We walk to Grosvenor-Strathmore and this would add a substantial amount of time to our commute. This wouldn't work given a 1-year old. We are strongly opposed to closing Grosvenor-Strathmore.

this would be a horrible idea and would impact the community in varying ways. Was the low ridership due to the pandemic? understanding how these numbers were pulled together and when is important.

Closure of the Van Dorn station would effectively cut me off from the Metro system.

I live at McLean. Low ridership is due to the pandemic. 2020 numbers should not be used to determine how much ridership is in the area. Especially now as multiple new multifamily units are finishing construction, the construction of a Wegmans is over, and Capital Ones HQ building will be reopened with thousands of employees. We should be pushing to increase ridership not closing and cutting off those who want to use metro.

East Falls Church is not convenient to other stations and there is no good alternative option without paying for parking (that is too expensive) or taking a bus (that increases commute time / complexity, and with covid could easily get too crowded and not safe). I also use Federal Triangle, but Metro Center is close enough that its closure would work (even if somewhat inconvenient).

I mainly use the Cleveland Park Metro. This would make things even worse!!!

Please dont close Virginia Square! Its where I work, and I depend on the metro! Reston Town Center and Federal Triangle and Loudoun Gateway are desperately needed too!

Some of these stations are miles away from their nearest station. Also, Arlington Cemetery is a unique station in that it serves a different purpose. My mother is buried there and I live in the District without a car. If the Arlington station is still closed once I start regularly using the metro again, I'll have to either connect to a bus or just take a ride share. Having a nearby station doesn't make it any easier to get there.

This is truly absurd!

Ridiculous! Most of these stops are imperative to maintain! Grosvenor, Smithsonian, Reston, Cleveland Park. Absurd! We live in a metropolitan area! This must not happen!

Home station is Van Dorn, and this change, combined with METROBUS schedule changes, would severely impact my travel needs.

I chose to live in Grosvenor Park community because of the metro access. Most of Walter Reed Hospital staff do not have parking privileges, so we rely on reliable and consistent metro services. Please do NOT close Grosvenor station.

This would be devastating. Without Grovesnor, I have no idea how I would get to work In DC. Metro would be unusable because people would be packed everywhere else and I'm not even sure how I could reliably get to other stations. It would also create a nightmare on the roads as more people have to drive and already horrific traffic gets even worse. I have to believe ridership will increase once public health circumstances get better. It probably won't be at pre-pandemic levels, but ridership will grow. Grovesnor was always super crowded and the parking lot was overflowing (part of the reason the parking lot was being expanded). It would be shortsighted to close it. Also, this is supposed to be public transportation and the public would be severely hurt by the lack of service.

Im particularly concerned about the proposed closure of the College Park station, which is critical for UMD students and employees (myself included) to get to and from campus. Using FY21 ridership data to predict FY22 station closures doesnt make sense for College Park since UMD is currently operating in a primarily virtual environment for Academic Year 2020-2021 but has already announced that it will resume all in-person classes/work/services by Fall 2021 (September 2021). If this change is made, I will have no way to get to work 6 months after being required to report to campus on a daily basis again; the same will be true for many UMD students and employees.

Greensboro station is very critical for my travel.

I rely on the silver line operating to Reston for work, and would be starting from the Clarendon station. Having to walk to either the Courthouse or Ballston station wouldnt be feasible to do on a daily basis.

| |
|--|
| Proposal to close 22 Metrorail stations |
| Closing both smithsonian and judiciary square would make it hard to get to museums for me |
| I live near EFC and take it on a daily basis to get to work in the district. If the metro here closes, I will most likely have to purchase a car and will then be taking the metro less often overall. |
| My husband and I rely on the College Park and Smithsonian metros. |
| Keep Clarendon, Virginia Square, and 38B line open and have ways for people to get to Bethesda MD from Washington DC. |
| Ridiculous!!!! |
| Rethink this list. College Park, really? Are you out of your minds. Smithsonian? Reston Town Center. Bad idea. |
| Not sure how Grovesnor strathmore is considered to have low ridership outside of pandemic times. The station is a so tease rial for the community. Most days, I would have trouble finding parking at the station given how full the garage gets on week day mornings by 9am. |
| We live walking distance to grovesnor station and close the neighborhood because of this convenience. |
| This would be terrible. Alexandria has built and is planning additional building of multi-unit apartment buildings surrounding the Eisenhower Metro station. It is a far walk from all of these locations to the King Street Station, and there is no parking at King Street. This would be a disaster for Alexandria and all the accessible building they are doing. The stations I use most during my business day are Archives, Federal Triangle, Judiciary Square, and Smithsonian so it would be awful to have them close. There is nothing remotely near the Smithsonian stop that I could use if it closes. |
| This would be a huge change and would result in me no longer using Metro for daily use |
| I currently live near or had planned to live near some of these stations. Near another station is relative when you're walking to it, it may look close on a map but be a 20 minute walk. Or it could be an unsafe walk even if it's close, especially at night. |
| Please keep all metro stations open or I think ridership will decrease even more. |
| It works for me personally as I dont use those stations, but Im sure there are others for whom it would not work. In particular, consideration should be given not just to low ridership but also whether those particular station closures would negatively impact low income communities and communities of color, regardless of ridership numbers. |
| I used a number of these stations with some frequency but I admit that they are close to others so working around is likely possible for most folks. I worry about folks with accessibility or mobility concerns though. I would also still like to see Judiciary stay open during rush hours especially for folks who have work at the courts or jury duty. Could we maybe consider bypassing these stations during non-rush times only? Thanks. |
| Closure of all proposed statins except Smithsonian is OK except Smithsonian. |
| My office is at the Mclean station and would almost make it impossible to walk from the Tysons Corner station and definitely impossible from the east falls church station |
| Some of these are stops where I would walk to in order to transfer- Mt Vernon and archives for example. Others would be closing two stops in a row - Clarendon and va square for example, and that won't be accessible. |
| With tourism returning to the city as early as late 2021, closing stations like Smithsonian and Archies seems unreasonable. |
| My primary station is Virginia Square. I could use Ballston, but would prefer if Ballston then had a Kiss and Ride option. Right now it is not an easy station for picking up or dropping off passengers. Parking is not adjacent. East Falls Church has these options, but is mentioned as being closed as well. |
| It seems like you are trying to destroy the system. Pretty soon it will be useless. |
| Feel bad for Grosvenor riders. But this works for me. |
| Many of the listed stations arent all that close to other stations. These closures would make it very difficult to get to my dentist and to some of my favorite restaurants. |
| This proposal is TOTAL UNACCEPTABLE! Archives and Judiciary square are the only two close options for those that work at the multiple courthouses or those individuals that reporting to court. These stations also serve MPD and CSOSA. Having to walk almost a mile to get to a metro stop is ridiculous and petty. |
| Need Virginia Square. You are a service. Provide more not less |
| Grosvenor Strathmore has tons of residential properties within walking distance. Why would you consider closing it? in theory, it's near NIH I guess, but there's no parking options at Med Ctr so the only other option is White Flint. |
| Clarendon metro station has too high a volume to close, if it closes this will cause many centralized around it to avoid using metro upon reopening and use car instead |
| If grosvenor-strathmore closed I would most likely stop using metro all together. |
| I regularly use the Judiciary Square metro stop everyday to get to work. I also use the East Falls Church metro to get home given bus schedules. |

Proposal to close 22 Metrorail stations

Worst idea ever!!!These stops will require more ridership after vaccine rollout. This is based on pandemic data, while everything in these area is closed. Restuarants open back up and people will go back to work and attend events in DC.Whoever the idiot proposed this dumb idea should be fired and clearly never rode the metro pre-covid

This could be devastating to the economic health of the surrounding neighborhoods and businesses. Seeing as these stations are already built and operational, can't the deficit be addressed elsewhere? What are the operating costs of a stop like the Cleveland Park station versus the value of the service and access that it provides?

While I support the notion that some stations near other stations are close enough to shutter, it is absolutely not appropriate to close multiple stations next to one another - particularly where there is no real station servicing for foot traffic. For example, how far would a pedestrian have to travel to reach Arlington Cemetery if that station closes? If WMATA shutters both Clarendon and Virginia Square, thats a very, very, very long commute by foot for the midpoint between Courthouse and Ballston. This proposal needs to establish a threshold by which certain stations may be closed, but also a guarantee that two adjacent stations will not be closed. Otherwise, WMATA incentivizes the demise of its own system - is ridership low because people dont want to use WMATA or is it low because WMATA doesnt provide a realistic option for commuting?

As an Orange Line rider that originates travel at VA Square but could walk to Clarendon, it is unreasonable to close both stations meaning that service would be Ballston and Courthouse. That would make Metro a less desirable option and could mean I get back in my car given the loss of time savings due to walking.

Grosvenor-Strathmore is my primary metro stop.

Clarendon is a main hub for riders commuting to/from DC daily.

Idiotic. That's my only comment.

I strongly advocate for keeping Virginia Square and Clarendon stations open.

new bus routes in Loudoun County are being planned to connect with Loudoun Gateway

I have no issues with this. I do think it would be bad for tourists to close Arlington Cemetery.

East Falls Church metro station is several miles from the closest metro station in either direction.

Judiciary Sq. is important and convenient for jury duty, and other matters at the courts. Limiting easy access to courts is not equitable. I regularly use Cleveland Park, Smithsonian, and Federal Triangle stops. It seems premature to close stops or change schedules until we know what demand will look like post the COVID19 Pandemic.

My regular station is Grosvenor. Closing these stations would be penny-wise and pound-foolish. As we encourage people to live near and take public transportation, closing these stations would be bad public policy.

This would create a hardship. Ridership is low only because of the pandemic and to make a decision for 2022 based on that is absolutely ridiculous.

While some of these stations are close to other ones, they arent really walkable. For example, getting to Arlington Cemetery from the Rosslyn or Pentagon stations is not all that easy. Same with getting to McLean from Tysons

McLean, Virginia Square, Clarendon, Loudoun Gateway are near points I use often for work, commuting home, groceries, etc..

This would absolutely not work for me as you would be closing the station I would use once the Silver Line Phase II is opened. Also closing Smithsonian and Federal Triangle will limit access to popular museums and sites making it very difficult to get there.

I'm east falls. If you close my station I would opt to drive.

once the pandemic is over ridership will return. Grosvenor is necessary

Need access to Clarendon station on a consistent basis.

Federal Center SW is the station I use to commute to and from work, so that would be a big inconvenience for me. And I also occasionally use Clarendon to access shops and restaurants, as well as Archives.

Some of those stations see much more ridership during summer tourist times, so perhaps a seasonal schedule would be appropriate. Closing stations that neighbor Ballston would result in much more traffic at Ballston, which would impact my schedule. Perhaps the outlying stations in McLean/Tysons, could just run at peak times and not at other hours.

That would double the distance from our dwelling to a Metro stop, a considerable inconvenience given our age.

This could create massive last mile transportation issues for commuters; it would force many residents to move away from closed stations, possibly causing restaurants and businesses in those areas to close; and it would create problems for tourism. I worry that closing stations would put more cars on the road and drive business to problematic ride-sharing companies, exacerbating climate change.

Grosvenor is my closest station. Getting rid of Grosvenor will make it harder for Potomac and Kensington and some Bethesda residents. Many condos are built around Grosvenor. Strathmore depends on the parking lot at Grosvenor.

Proposal to close 22 Metrorail stations

East Falls Church is not near any other station. This means no transportation via metro for all the people living just beyond Ballston! The whole reason many people live in that area is because of access to Metro. If people are back working in offices this would be catastrophic for everyone living in this region

College Park is the station for the flagship university in Maryland. Closing it would make it difficult for students to travel around the region for employment. The Grosvenor- Strathmore location has great parking, is convenient for so many neighborhoods, is closest to the Montgomery mall bus depot. Closing that location would make it difficult for the commuting wokrers.

Ballston already can barely handle demand with VA square and EFC open.

I only utilize East Falls Church for commuting to work (pre and post-pandemic). Due to living within a 1/4 mile of the East Falls Church stop, waiting for a bus going into Ballston and then waiting for a 15 minutes for an Orange or Silver line train, and then during the reverse after work, isnt ideal. Id likely start driving into DC due to the extra waits for the bus and the slower bus ride into the metro stop (given the magnitude of the stoplights around the metro stop).

Clarendon and Virginia Square are my primary stations! Having to head to Courthouse or Ballston would be a huge inconvenience.

I use the College Park station every weekday on a normal basis. MANY other students and professors do as well to commute to the University of Maryland. Furthermore, many students who live on the universitys campus use this station to access the city. I think this would be extremely detrimental to the UMD community. Furthermore, the Clarendon station is located in a lively area with restaurants and bars, and provides safe travel for many people, myself included, going out on weeknights and the weekend.

Do not close stations. It will greatly impact the communities that depend on it. Living in this time of COVID is hard enough. Taking these stations away is a hardship. Do jot close stations! This is not normal times and hopefully by 2022 we will be back to normal.

This is absolutely insane and if it happens will only make people consider not using metro in the future. It's so unfair to people who bought property right by these stations. It will only hurt you if you do any of this.

Losing the College Park station would be detrimental to as it is one of my options. There are also thousands of students that will be coming back on campus if everything is going well. These would be frequent riders needing to attend internships, travel to lectures and exhibits in DC, and attend other activities. I imagine closing this station will actually be worse for metro income.

Of all these proposals, this proposal combined with the closure of certain bus lines (38B) will completely eliminate my current travel route to work at Georgetown/downtown DC. Our nearest metro station would be Ballston and Ive havent looked to see if my bus route to get to Ballston would be eliminated as well. We bought into this neighborhood to be specifically near a metro for accessibility reasons, and this proposed closure may effectively necessitate us to drive.

DO NOT CLOSE THE COLLEGE PARK STATION!! Could you send a clearer message that you are a train line for Rich people than closing service to a large state university with many commuters and leaving small private colleges with service??? Your plans are offensive.

Clarendon, VA Square and East Falls Church are important locations for metro stations. Without it a large swath of area suddenly has no access to public transportation

Due to constraints with family care, I prefer the proximity of East Falls Church as a metro station.

This feels somewhat less disruptive than other plans.

You'd close all the stations in the heart of Arlington: Clarendon and VA Square + EAST Falls Church. That will push too much traffic to Ballston which is congested already.

This is ridiculous- Arlington Cemetery? Are you going to inhibit people from visiting the cemetery ? East Falls Church is about to have significant development, which necessitates a metro station. Do not close!!!

Do not close Grosvenor Strathmore

The crowding that will occur with fewer stations makes me worried for health risks in a post-pandemic world. I will not feel comfortable using metro if all these people are forced into one station rather than spread across the stations that are most convenient for them.

When were these ridership numbers collected. The College Park station likely took an incredibly dramatic dip during Covid but is likely a vital link for the University of Maryland and the students there, even if only on the weekend.

Many of these stations are not actually near other stations! For instance, Cleveland park is 20 minutes walk from the next nearest station.

People in my Strathmore neighborhood are deeply reliant on the station being so accessible on foot/bike.

This is the worst idea yet, please don't close our station!

Please keep all stations open.

I don't have a car, I can't buy a car, cars are bad for environment and expensive. I need grosvenor station to get to work.

I depend on clarendon stop, if it is closed i have no way to get to work.

Proposal to close 22 Metrorail stations

Closing all of these stations will make the Metro non-functional. It would make it far more difficult for those in need of public transportation to be able to use it. Furthermore, ridership would decrease and revenue would not cover operating costs and a year later the metro would end up shutting down completely.

I walk to East Falls Church but no other station is walkable. I would need to give up metro altogether

My travel needs dictate that I use several of the above stations.

I understand some of the closures but others do not make as much sense. Many people walk to east falls church metro for example and depend on that to get into the city!

This is just a dumb idea. You want to close like 20% of all metro stations? Seriously?

This would be horrible.

Absolutely not. You would leave thousands of people with no convenient public transit options from Ballston to CourtHouse Metro stations. That is about a 1.5 mile stretch. That stretch is not only home to a majority of the new housing development in the region it is home to the majority of the restaurants and bars--couple this with the limited parking offered you would be leaving individuals with very limited options. A horrific terrible idea and one that won't go over well with the direct community.

Closing the Grosvenor Strathmore station would severely hamper my ability to commute to work once the pandemic is over. If this proposal were to move forward I would need to relocate.

Of all the stations in the Bethesda area, Grosvenor's parking is the easiest to access.

How can access to the Smithsonian, Arlington Cemetery be closed? This is a terrible idea. Residents and tourists will be very upset.

It would add another 30 minutes to my commute and I have children that I need to pick up from school.

The pandemic will wane and ridership will increase. We frequently have used various stations over the years and pre-pandemic were using East Falls Church, Virginia Square, Clarendon, McLean, Smithsonian, Metro Center to name a few. Do not close them!!!

The only bus that goes to the National Archives and Records Administration (NARA) in College Park stops at the College Park UMD station. Without being able to get on that bus at a different station, there will be no public service options to NARA.

Grosvenor and Cleveland Park are vital and must not close under any circumstances.

This would make the stations closest my home inaccessible. I would stop using metro completely.

The two stations I use are either East Falls Church or McLean. Going to another station would make my commute from home and the office much longer. I also park my cars at those Metro Stations.

Metro needs to give access. The funding should support even low ridership stations since people need to get around.

I strongly dislike cutting off access to stops. Nearby communities depend on metro stops, even if others are somewhat close-by. I would prefer a solution that limits frequency over a solution that limits access, especially this solution which closes an alarming amount of locations.

Maybe they could be closed later in the day to save funds, but they should be open for the heavy use periods.

I work for NSF which relies on Eisenhower Ave Station which is just outside. I moved where I did because metro access was so easy and the cost subsidized by my agency. It would cost me thousands of dollars a year that I don't have if I was forced to drive to work.

I walk to East Falls Church Metro. If it were to close, I would be stranded.

I am off the Forest Glen Metro, so this plan works for me.

Though I don't live in the neighborhood that services Grosvenor-Strathmore, there are a lot of residential travelers that find that route and station convenient, plus those that are looking to rent or own in those buildings would impact those sales/rentals. I have a friend looking in that area and with this knowledge I will let them know the potential impact they may not be aware of. However, I do go to Strathmore, so if Metro Rail was taken away, that would force driving to the event instead.

Are you insane? Smith is so IAN, a world known tourist destination? Charge more, ask counties to pony up but closing Clarendon would decimate the neighborhood.

Closing College Park, the station closest to a major university makes zero sense. Are you proposing closing any other stations that are close to colleges, or is it just this college in a majority black county that you think is worth discarding? I also simply do not understand closing Smithsonian. Yes I know that people are not visiting the museums right now but it's far too important over all tourism in DC and too recognizable to close. People still go downtown to see the Monumental Core. I have fewer problems with closing archives.

Ok, if Clarendon metro station remains open

MORE STATIONS NOT LESS!

Proposal to close 22 Metrorail stations

| |
|---|
| I currently only ride at the Clarendon and Virginia square metro stations as they are the only ones near my apartment. If either of these are closed, there will be over a mile between the stations on the orange and silver line. I believe this will very negatively impact the many businesses and apartment complexes that are located to be close to these stations. Personally, I may have to move to a new neighborhood to maintain access to the metro, so I would prefer for them to remain operational |
| I'm handicapped and bought my condo to be directly on the red line. I take metro daily to get to and from work. |
| Generally, it would probably be ok for daily and regular needs. Unfortunate for leisure needs but perhaps manageable if there is sufficient shuttle or bus service to fill-in for areas where service is eliminated. |
| Closing the stations would 100% move me toward driving instead of riding. |
| This will harm the overall effectiveness and usefulness of the metrorail system. I strongly oppose this proposal. |
| Normally I rely on the College Park metro stop. |
| Use Clarendon, Virginia Square, East Falls Church, and Judiciary Square stations. |
| These stations aren't a reasonably walkable distance to other stations. It's ridiculous to say they are "near other stations" if you need more transportation to get to the "nearest" station. |
| The primary station I use is East Falls Church because it is closest to my residence. I probably wouldn't bother to go to another station in order to take Metro. I would probably just drive into the city. |
| I moved to the Eisenhower metro area specifically for walking access to a metro stop. This is a high occupancy high rise community area with two federal government HQs here as well, NSF and USPTO. Workers depend on this metro stop |
| I live at the future Innovation Center and if you don't open, there is no incentive for me to keep my lease here |
| Cleveland Park is very necessary for my daily commute, and should not be closed. |
| East Falls Church is a major hub for local bus lines. Mt Vernon Square is my station. Temporary closure is bad long term closure is a disaster. |
| Closing these stations would make it impossible to use metro for commuting. |
| Please do not close these stations |
| totally unrealistic and not a solution |
| Closing Mt Vernon Sq doesn't make sense if you have the yellow line stopping at Mt Vernon Sq... Smithsonian closure doesn't make sense either if the museums reopen as you'd need to have new signs to direct people to the Mall from L'Enfant. |
| I can only speak to the Arlington corridor, but closing both Clarendon and Virginia Square is two in a row, which leaves a pretty big stretch with no station. |
| You have got to be kidding. They call this the orange crush for a reason. Once the pandemic is over, it's going to be back to the normal crowded hell. |
| Don't close federal center sw until the fence around the capital is gone. Arlington Cemetery needs to stay open for the families that visit. |
| My home stations are Clarendon/Virginia Square and my work station is Greensboro and I cannot drive to work so I absolutely need these stations to remain open. |
| Assuming my pandemic-related telework ends, Clarendon and Judiciary Square stations would be necessary for my daily commute. |
| Please keep Cleveland Park metro open. I use it to go downtown for doctor appointments and meetings. Also please keep the Judiciary Square station open since I often have business by the courts. |
| Please do not close Grosvenor-Strathmore. Ridership might be lower than other stations, but the station is important for the DC area's most unique art center and a host of development projects that are being built predicated on the use of the metro. You are killing that reputation and saving little. Also, closing Grosvenor means you can't turn around some of the trains there to maintain the 15 minute wait time. Grosvenor is the perfect place - it was designed for this - to be a closer in turn around point. |
| For someone who lives in Alexandria and works by Archives Metro, the closure of Archives, Van Dorn, and Eisenhower would all impact me greatly. These are three of the four stops that I use the most. |
| If you have to shut stations, make sure you don't shut a station that is next to another. Also, don't shut VA Square, because it's the only station near me where I can park my car |
| Wow. I mean this is terrible, but maybe if it's the only option? |
| East Falls Church to Virginia Square is my most used route |

Proposal to close 22 Metrorail stations

Specific to my business, closing of Greensboro entirely impacts my business as we are literally next to the station. It is a long, long walk from the nearest station, and impacts my employees arrival, candidates travel to/from the business, competitive advantage of a non-automobile travel option located close to the business. Additionally, Reston Town Center station closure (pending opening of Silver Line Phase II) is a target home location for our employees and candidates. Removing this from the Station list will again cause problems for our business as regards employee acquisition and retention.

Some can and should close. However, you have the complete wrong mix of stations to close. Grosvenor Strathmore is immensely popular and is one of largest sources of Montgomery County ridership. It would significantly impact my commute. Close medical center, cleveland park and judiciary square. Dont look at ridership during pandemic, look at it before and where people were getting on/off. Literally no one gets on around medical center for instance.

The concern is night time safety if need to walk additional blocks to metro station.

Thats nearly all of the Arlington Stations. The platform at Ballston is not even close to big enough to accommodate rush hour ridership. It would not be safe.

That would require so much extra walking for me and my small children.

Grosvenor station is the most convenient station to my home with save and plentiful parking.

Absolutely need East Falls Church to operate.

Many of these stations are not that close to another station. Rather, many of these seem to be closer to businesses or government buildings that have been closed due to the pandemic. This is insensitive and is not considering how more businesses are opening. I know personally it would hurt me for the Clarendon metro to be closed.

Wow. So we're gonna close stations? This worked out really well for lower-income areas (like H street, Trinidad, etc) when DC shut down the rail car system in the mid 20th century. No. Do not close stations.

Again, Metro is being shortsighted. Because of the pandemic, ridership is significantly down. However, once the pandemic has ended, ridership will increase. These stations currently have low ridership because of the pandemic. Most previous Metro riders are working from home and there are not in person events. This is absurd.

I don't know what your definition of near is, but this would result in 2 or more miles between open stations. Crazy.

The closure of central stations, especially, Archives and Smithsonian, would affect travel to the National Mall for events, museums, etc., badly affecting local, national and international tourism. Personally I would be inconvenienced by both this and the closure of Cleveland Park near my home.

Please don't close Van Dorn - very many townhomes communities and families

Closing Smithsonian is really not tourist friendly!

I live in Arlington and depend upon the Va Square metro station to get to work.

No, this plan would not work for me. My office is located closest to one of the stations listed above. Im going to have a longer commute if Metro closes all the stations mentioned above.

Please do not close Clarendon. Having the station open will help restaurants in the area come back - as clients can get to Clarendon and help boost sales.

Archives and Smithsonian are the stops that I use the most when I travel to DC.

I live next to Grosvenor for the convenience of the metro station

Why bother to have a Metro system. Another absurd proposal.

I use Archives regularly as it is near the Shakespeare Theatre company. I use Federal Triangle occasionally for Fords Theatre. I use Smithsonian occasionally for the museums and Mall. I do not typically use the other stations listed.

Youre basing these closures on current ridership numbers. Once tourists come back to DC and businesses reopen, youre going to have a lot more individuals needing to access these metro locations. By closing them, it would be a huge inconvenience going forward.

Having all these stops increases accessibility. Eliminating them would reduce accessibility for some riders, particularly those with physical disabilities

You cannot close clarendon and va square stations. I take these to work to doctor appointments, etc. I bought a home equidistant from Clarendon and Va Sq stations to give myself access to these two stations. This proposal is insane:

I travel from the Clarendon metro station every single day of the week and some weekends too. Shutting down this metro station would be a huge problem for me

I go to school at George Mason University - Arlington campus and the closure of the Virginia Sq and Clarendon stations would greatly affect my commute to school. I am also concerned about the closure of stations that have yet to open, Silver Line Phase II, as there has been a lot of money poured into this line.

We use Grosvenor Metro as it is in our neighborhood and has parking. It is the primary way we commute to work.

No closure for virginia square metro

Proposal to close 22 Metrorail stations

This would close the station closest to me that I can walk to- East Falls Church- and would reduce the likelihood of using Metro to get downtown. I would have to drive and park to Ballston or W Falls Church to use Metro. Without addtl parking, this doesn't seem feasible and it's certainly not viable for a daily or even a few times/week commute.

Thanks Metro for now not using any of it. So if we want to do anything. F\$^%%_\$\$ Metro idea. Like the 2 years following

Please do not close East Falls Church or Federal Triangle. These closures would force more people to drive.

I rely on having access to those stations for a wide variety of activities

Some of those all metro stops I and my friends frequent both for work/personal reasons. It would require us to take a cab from metro stations closer by.

Hard to believe these are low ridership stations. Every time I've ridden the train from. federal triangle, east falls church, Clarendon the trains are picked. COVID-19 has seriously decreased ridership bulgur it willPick up again once vaccines are widely available.

Please do not close the Grosvenor-Strathmore station!

Closing Grosvenor station would be a severe problem for me. I have transportation difficulties and this station is very close to where I live.

If every other red line train terminates at Grosvenor-Strathmore, please don't eliminate that station There's insufficient parking at Medical Center and Bethesda, etc. Driving to White Flint (vs walking to Grosvenor) and waiting up to 30 minutes is very inconvenient for many in the Grosvenor apartments and condos.

No. I will be going into work again by 2022. I just moved to be right next to innovation metro only to help my current commute and rely on the metro to DC vs bus lines. Closing any of the stations near me would be a waste of why I even bought property in this area. By not having the stations in the Reston area open would make me take a different form of transit and not take the metro again so you would be losing ridership and money there

Innovation Starion is needed. This is the station I will need to use to travel to my job in the District. Travel to the Wiehle-Reston station is not sustainable for my commuting needs.

Don't close the Cleveland Park station

I would really miss the use of the train traveling to the Archives and most especially to the Smithsonian where the castle and so many wonderful museums are available. So, for the future of tourism, those two stations should not be closed.

The Grosvenor station and the 46 bus are very important to essential staff and medical workers commuting to Suburban, NIH, and Walter Reed--please do not slow down service at this station!!!!!!!

Although now is teleworking, if back to normal, the stations would be necessary for me to arrive to office.

I need Grosvenor Strathmore to remain open for my public transit needs.

Good idea, speed things up.

We sometimes use the Archives and Mount Vernon Sq stops but it's easy to use one of the other stations instead

Your definition of "close" to other stations I don't think is accurate. To someone without a car this is a huge issue!!!

Lots of us who work in Rockville, at NIH, or in DC live in the Grosvenor Strathmore area

Close Virginia square or Clarendon but NOT both; closing east falls church would particularly hurt those that park there.

This is terrible. DC welcomes tourists, yet will close Smithsonian and Arlington Cemetery? Makes no sense. Also, I dont think you should close two adjacent stations, such as Clarendon and Virginia Square. That means theres no station between Courthouse and Ballston. Thats unacceptable.

Tons of people live near and bought homes near Grosvenor so they could walk to the station and get to work. If you close this everyone will be pushed to White Flint and there is not enough parking for everyone.

Nada conveniente, y no entiendo el razonamiento de cerrar Grosvenor dada la gran cantidad de personas que utilizan la estaci3n.

We use Grosvenor -Strathmore when doing to concerts at Strathmore. We could not walk further than what we do with this stop.

Archives and Smithsonia are the stations that I use the most. I live in Reston, and I would like all the silver line stations open especially because of all the development along that line.

Unacceptable. Half metro salaries and enforce turnstile skipping instead

Consider the impact on people with disabilities and who need to work and keep the economy running. And don't make this decision during Covid or based on Covid stats. Don't close stations some people live particularly next to stations and pay premium rent in order to get to work and not pollute or make extra traffic. Less accessible stations will also impact small businesses and families at a time when accessibility will be important when we come out of the Covid epidemic.don't close the stations.

Grosvenor strathmore is essential for my transportation needs

Proposal to close 22 Metrorail stations

I was literally stunned when I read this list which includes key stations for neighborhoods, tourists and federal workers. How are the elderly and disabled expected to walk a mile between stops. This is absolute madness and Metro should be ashamed that they are even considering it.

This would dramatically negatively impact our commuting needs

I need the Clarendon stop to remain open. I am harassed on a fairly regular basis by people in the Courthouse stop, and I don't feel safe going there. The only other stop would be Virginia Square, which is almost a 20 minute walk away from me. I need the McLean stop to stay open because it's the only way I can get to my office. There's no way for me to walk from Tysons Corner and McLean, and there's no other way for me to get to my job. If the closures at McLean and Clarendon go through, I'll probably be forced to stop using the metro entirely

Van Dorn Street is where I typically board the train unless there is weekend construction, and Eisenhower Avenue is an up and coming area. I cannot speak to other stations

Grosvenor-Strathmore is the only station I can walk to from home. Kind of defeats the purpose of a metro system if I have to get in a car to get to a station.

absolutely do not close Grosvenor as there is large number of elderly living in the apts complexes in that area. The next closest station is < 1 mile away and would require a bus connection for those unable to walk. Terrain in that area hilly and high traffic makes crossing of Rockville Pike dangerous.

This is terrible! Claiming stations makes so sense! You'll even lose more customers! We are dependent on these stations, esp EFC for livelihoods, home values, and easy access to the surrounding area. There most likely be parking issues at the remaining fewer stations. Terrible idea. Don't do it! It just makes life harder than it already is! Cut other areas but do not close the EFC metro station!

This proposal would be extremely disruptive to my ability to get to and from work.

Closing down East Falls Church would be disastrous for my commute and subsequently for my personal and professional life. It would be a life changing hardship. I will depend on it daily in 2022 and beyond. There is no other station close enough to compensate for its closing. Please, please do not shut down the East Falls Church metro station. It's absolutely vital to all who live around it for commuting under normal circumstances.

I live in Virginia square and do not own a car- closing this station would significantly inactive my travels.

Close Clarendon and I'll use Virginia Square - don't close both! Would overcrowd Ballston and Courthouse

I use College Park station for work and the distance to and parking situation at Greenbelt and Hyattsville is very inconvenient.

Why are you decreasing services to your citizens and tourists? These closures would make Metro essentially useless for thousands of riders forcing them to drive in already unacceptably over crowded roads only creating more transportation issues

I solely depend on Morgan Boulevard station, which is within walking distance of my residence, for travel to and from work since parking is not an option at my work location. When the station closed during the early pandemic response it greatly adversely impacted all of us that use the station. If there were shuttles provided to Largo or Addison Road this might be acceptable but without any option to get to nearby stations, it would be detrimental at a time when many may actually be returning to work as businesses start reopening offices and other facilities.

Omg. We live off EFC and use 14 of the listed stations! So no. This would not work at all for us

This would discourage use of metro for commuting by adding at least 10-15 minutes of walking at either end of a commute. Inclement weather would be very problematic.

The East Falls Church metro station allows for families who aren't able to afford to live closer in and families who are trying to manage with one or no cars to commute to work. Many people in the surrounding neighborhoods walk to the metro to commute (or will again when the pandemic is under control) By closing it, you will force people further out, to buy more cars, to use I 66 more often.

It is the only station for me to use for commuting to work/DC. This proposal might cost me my job so please don't close it for is.

My son is confined to a power wheelchair. We purchased our condo next to Virginia Square Metro so he could work 5 days a week. Rolling the .6 miles to Ballston, especially in bad weather, is not a sustainable alternative.

This might work for stations that have a commuter base that drives to the station but what about people who walk?

I live in Clarendon and I highly rely on the metro as my way of transportation.

Proximity to the metro station is why our family purchased the specific house we're in. One parent relies on access to the station for daily commuting to work, and it also provides a useable option for our child to get to high school (instead of driving or transferring from a bus to a station)

I rely on being able to access both Smithsonian and Federal Triangle for work. They are far enough apart that the difference in travel time is significant, especially if the weather is poor.

Proposal to close 22 Metrorail stations

This is probably the least feasible of any of the plans. Do not do this. Many people in VA purchased their houses due to close proximity of metro stations, including me. My wife and I use Clarendon metro a lot. Please do not close this station. It would have a negative effect on many businesses too. Ridership will increase again after COVID. Having changes take affect in January 2022 is likely too late as well. Whatever you do please do not close stations.

It would destroy businesses and property values in Cleveland Park

I attend class at night at GMU. I need the Virginia Square stop or the Clarendon stop to be open, so I can get to class.

Concerned about impact for tourism and some of the Arlington stations (Clarendon, VA square) are in heavily populated areas

I commute from EFC to Tysons/Greensboro and also go out to Reston. We had waited ages for these stops and now you're going to close them? Nooooo

East Falls Church is the main metro closest to my home and the one that I would use regularly when the COVID-19 epidemic is over.

Dont you expect things to be better in 2022? It seems weird to shut things down just as people have started to use the system again.

The stations that we use are Virginia Square, Clarendon, East Falls Church (occasionally), Mt. Vernon Square, Smithsonian and Federal Triangle (occasionally). Close these stations and you may as well close the entire system. I would oppose any taxpayer support of such a truncated system. Why bother?

I own a home blocks from East Falls Church. I take the orange or silver like from East Falls Church station to Smithsonian station and back every week day for work. It is very important for my livelihood that this transportation service stay available!

My office is at one of these stops. Regardless, does it really save that much money to close stations and just run trains through them?

Metro must keep Clarendon station open to service the residents and patrons of the restaurants, shops, food stores, etc. Closing Clarendon is a terrible idea and will lead to massive congestion and a parking nightmare

I rely on East Falls Church metro to get to work every day; this would pose significant impacts to me, as Im sure it would others.

I rely on the convenience of the McLean metro station. It is easy to access as a resident of McLean.

Closing Virginia Square impacts on senior and handicapped citizens in the neighborhood as well as George Mason University students.

There is no other way to get to Arlington Cemetery. There is no close option for East Falls Church for those without a car. I also have concerns with Federal Center, Judiciary, Mt Vernon, Virginia Square, and Federal Triangle. Closing Smithsonian would be a poor decision for tourists, if we want to encourage tourist use of metro and increase tourist traffic after Covid.

Wow.

I go to Clarendon almost exclusively when I ride the Orange Line, so this would not work.

Too many residential buildings at Virginia Square. Please don't close!

I moved to my specific apartment complex due to its location by the Eisenhower station

This is unacceptable. Not only do thousands of people rely on the Grosvenor metro from near by towns (Potomac especially), this would depreciate the neighboring property values. Potentially closing the Grosvenor stop will put people in financial instability if they cannot rent or sell their homes for the value they purchased it as. Having the metro close by to properties is valuable and has always been a selling feature. The White Flint metro is not near by to Grosvenor and is not in a safe walking distance. Lastly, the Grosvenor community is elderly and disabled, this would put many commuters in a difficult situation, possibly facing loss of jobs because they cannot get to work. We need the Grosvenor station to remain open. Many people depend on it.

Need Grosvenor station open to walk home near it in the dark.

East Falls Church just got the bike storage and is the hub between the Orange/Silver line. It would not be suitable at all to close East Falls Church metrolt is popular/populated and very busy. It must remain OPEN

I use EFC station regularly. I'd have to travel to Ballston which will require a different bus and more time.

I work @ Smithsonian, usually get on/off @ Archives

This would be detrimental to the Clarendon community. There are a lot of people that will rely on that metro stop in 2022 when traveling on the metro rides pick back up after the summer of 2021. This would ruin a lot of community members reliance on that counted on that metro being there and paid higher cost leases to be close to that metro stop.

Mt Vernon Square and Judiciary Square are my go-to stations

This would significantly increase my transit time to the above destinations.

I would be affected by several of these stations closing. It's not good but if there are buses available it may not be terrible.

Proposal to close 22 Metrorail stations

This would not work for me at all. I work at Capital One in McLean right off of the McLean metro and need the metro to be open in order to get to work. The closest station to this one is 1.5 miles away and taking the metro to then walk over a mile is not something that I want to do. As I said earlier removing these metro stops is a great way to get people to leave the area altogether because it would make everything in the NOVA area much less accessible.

This is the worst proposal of all. Many people rely on their closest station to get to work and earn their livelihoods. Being near another station could be still be a mile or more away, and for those without cars, closing their station would make it almost impossible to get to work. I personally would have to take an uber during rush hour 10x per week (each morning and each evening) to the next closest station and pay for that on top of the metro fare, or incur moving fees to live closer to an open station. Please do not close any metro stations!

East Falls Church metro isnt near any other metro station so its not easy to just walk to a different one. I can understand some of the DC closures and some like Clarendon (since its next to Courthouse) but the East Falls Metro station doesnt fall into that category - I hope we can keep it operational.

We bought our house near East Falls Church explicitly because it means I can walk to the metro (even though it is still a mile away). My commute will be even longer, more crowded, and more stressful if I have to now get a ride or take a bus to/from Ballston or West Falls Church, which are both several miles away. Also, metro just renovated East Falls and the station always appears plenty busy to me during the week.

There is no walking distance between Greenbelt and College Park station. Closing this station would significantly impact the commute of Faculty, Students, and Staff at the University of Maryland, College Park

Keep Grosvenor open!!! It's critical for Rockville and Potomac residents. Helps address parking shortages at other stations too.

This is about as dumb an idea as I can think of as a financial expert. Your trains roll through newly built or renovated stations (or even just existing stations) but don't stop because the station operating costs are too high? What kind of costs are these? One person in the info booth? Some trash collection. This is just dumb. Again, you will just start to erode the usefulness of the service and more people will stop using it. You will end up shuttering the whole system next.

Closing East Falls Church (which I walk to) would permanently stop me from using metro. It would be cheaper and faster for me to drive downtown than to drive to West Falls Church or Ballston and attempt to find a parking space. Same for trips to airports etc (including Dulles which I had been hoping to use more often once the silver line opened. I now try to use only National so I can take metro.)

Grosvenor-Strathmore is the last station that you can park on the Red Line. This is a very important station for commuters coming into and out of the city.

I use Grosvenor Station to access business and pleasure ventures and cannot imagine not having the station open. Judging it's full value in this unusual time is naive.

Please leave open Cleveland Park station

If you close all those stations, the remaining stations are not close enough to provide transportation to Arlington. We are already transportation- deprived in South Arlington, and this would make it worse.

Low ridership is because you as an organization have closed these stations for months. I take metro to smithsonian during the summer and I live at Grosvenor. I love here specifically for access to metro.

This is not acceptable at all!

Grosvenor-Strathmore is an important station, do not close.

These closures could severely impact my travel needs, particularly closing Grosvenor Station. I moved to this area 12 years ago specifically because of the access to the Metro.

Totally ridiculous. Not everyone has a car or can afford uber. So much of federal funds are given for other purposes..we need it for public transportation. This is hoing back in time. Just totally ridiculous. Almost every station on this list affects me and my family personally.

In areas where stations are not in walking distance of residents (especially older), there wont be enough parking with some metro garages also closed.

Eisenhower Ave is my station. The recent shut-down made me not use Metro at all. You suggest walking to King Street -- but there is NO DIRECT PATH there by foot without crossing several very dangerous roads via hilly and indirect paths. Plus the ATROCIOUS CONSTRUCTION at King Street Metro that has gone on for WAY TOO LONG makes access very limited in a roundabout way. I would just not use Metro at all again if this was the case. Utterly ridiculous.

This seems like a real step backwards. Again, what are the metrics for return to normal?

This proposal will not meet the needs of the community. Planning for this based on pandemic ridership will have dire (and avoidable) consequences.

Station closure is an awfully bad idea. Close early hours is better option.

Cleveland Park is my go to station for trips north. To walk 7/10 of a mile SOUTH to Woodley Park Station to travel NORTH, makes no sense to me whatsoever. It adds more time to my trip unnecessarily.

Proposal to close 22 Metrorail stations

As someone who cannot drive as a person with disability and rely on public transportation, I urge you to please not close any stations at all. By closing metro stations, you are creating an inaccessible environment for persons with disabilities.

Crowding and COVID-19: This will push additional ridership to adjacent stations which will crowd trains and increase risk of COVID-19 exposure. I would entirely stop using Metro and drive instead if this was adopted.

but is a bad idea as it would clog up stations and trains

Keep clarendon

This plan is not preferred. However, this does not immediately affect my current metro commutes.

I live and commute from Arlington - please dont close our stations!

If were not all vaccinated, then this works

Please don't close Grovesnor especially since Strathmore is there. The parking is very important. Also, how could Smithsonian be closed? It's central to all the museums!

To me, this is the WORST possible outcome for the budget plan. Some parts of the city already feel inaccessible and this would make things so much worse. Closing both Clarendon AND Virginia Square would make living in Arlington so inaccessible especially for people with lower incomes. So many people are already pushed out to Arlington because they cannot afford to live in D.C. With this plan, a significant proportion of their metro access would be eliminated.

The grosvenor/strathmore is essential to North Bethesda !We need it for all those people who do not own cars and are dependent upon this form of transportation. The pandemic is not going to last forever. In addition, the Grosvenor/Strathmore metro serves The Strathmore Arts Center exclusively. Please don't close it - please

I live next to East Falls church so selfishly it's where I get on but more importantly, EFC is where people can switch to from orange Silver to go to Reston etc. Once phase 2 opens and if there are fewer trains of each color, people will choose to not ride at all and your numbers will go down even more.

Arlington stations should stay open. It's hard to get to Arlington Cemetary from other stations. Also, Clarendon and Virginia Square stations are serving a lot of local residents who would commute into DC after Covid restrictions are lifted. It will hurt a lot of residents who preferred to pay some housing premium to live walking distance to a metro station, to save time and money on commute.

Between trains being less often and stations closing it would be difficult to depend on them for arriving anywhere on time.

The Reston Town Center station is at the heart of the Reston business district . Many new businesses that have relocated to a Reston are relying on the station opening as part of their business strategy. Further many citizens have moved to the community in part because of metro's decision to open a station at the town center, where commercial retail and the viability of the housing market are depending on metros opening as part of its recovery plan post covid.

East Falls Church station serves a large residential area. The next nearest station would greatly decrease convenience and limit our use of Metro.

No people live in va works in dmv area

Close to other stops is not a great way of defining things. There are differences in how easy it is to navigate to those stations as well as the setups of the stations.

I understand ridership is low, but is it not expected to increase as the pandemic lightens? Would these closures be permanent? There are major universities and landmarks and businesses at these stops and for the disabled who use public transit an extra few blocks is very inconvenient.

There are tons of people in the surrounding neighborhoods that walk to Grovesnor. Its too far to walk to White Flint. If you close Grosvenor, many people, myself included, would take the MARC instead, causing Metro to lose more revenue.

I cannot drive and the Greensboro Metro station is my primary mode of transportation.

I use College Park. I dont feel that there are really other Metro stations close by.

You want to close Grosvenor-Strathmore, while decreasing service past that station towards Shady Grove? All of the stations listed are being closed without any true thought in mind.

The Grosvenor-Strathmore station is essential for commuting to work.

Still think this is a bad idea and would negatively impact a significant portion of DC residents and tourists.

Prefer East Falls Church and Arlington Cemetery to stay open. The latter maybe not every day.

I live near East Falls Church where parking is more plentiful than in Ballston, but this plan might be okay

my station is not close to the other stations.

are you shitting me? college fucking park? and fuck disabled riders I guess who were trying to be closer to their destinations

Do not close any of these stations. It would be dangerous and strathmore grovesnor is a definite must

| |
|--|
| Proposal to close 22 Metrorail stations |
| Grosvenor station is closest to me and takes 15 minutes each way. |
| The Arlington Orange Line stations are close, but they are accessed by pedestrians. Do not close these. Arlington Cemetery is not used by commuters, this can be closed. |
| WHAT? You're out of your damn minds! |
| This is a terrible idea!!!! |
| Grosvenor-Strathmore is not only in an area of increasing population density, but it also services an important cultural institution. Closing the station would deprive many concert-goers of accessible and reliable transport. Furthermore, as plans for the area indicate continued population growth and even greater density, it makes no sense to close this station. |
| Generally yes, but Archives/Navy Memorial is a station that is close to many things. It would seem like that one would need to stay open. |
| This wouldn't affect me |
| If metros become an inconvenient option, the ridership will continue to drop. |
| Do Not Close adjacent stations, ie Clarendon and Va Square on the Orange/Silver Line. I would leave almost all stations in residential areas open during rush hour times, and close the low volume stations earlier and on weekends. East Falls Church is not near other stations. |
| Grosvenor/Strathmore is my metro stop so this plan does not work for me. I live where I live because I can walk to metro. Closing stations will forever change ridership in a bad way. |
| I have a nerve issue and cannot always walk long distances. This plan would impose hardships on people with disabilities who need to be dropped off closer to their destinations. |
| Terrible idea to close Clarendon and Virginia Square |
| Smithsonian is the only stop with direct access to the National Mall. |
| Some of those stations listed are primary areas where people get off... don't really understand why you would propose closing a station that is right by an area with restaurants, businesses, etc. - that's how you drive overall revenue in an area. |
| Prefer if Grosvenor would not close |
| I frequently use several of these stations. If I'm going to have a longer walk from the closest station to my destination, I may forgo using Metro altogether. |
| Now is not the time to make this decision. We continue in a pandemic and unprecedented conditions. Those of us that live near stations do that for a reason and hope that when restrictions lift we can resume using metro the way we did pre-pandemic. The suggested closures are some of the only ones with parking, will hurt tourism, and will force station and train congestion that is unnecessary. |
| This would close the station adjacent to me and I would no longer be able to walk to a station - nor to drive and park at a neighboring station. |
| The Grosvenor-Strathmore metro station is the most convenient station for me, and I plan to use it on occasion. |
| I walk to the Grosvenor Metro because there is a convenient tunnel and it's so close to the Grosvenor Community I live in. I will be riding Metro again this summer when my office goes back to work. I rely on Metro on a daily basis, closing this station would be awful for me. I LOVE METRO! |
| No! This is a very bad idea! Please keep Grosvenor Station open! |
| Most of the people don't have vehicles to go to the nearest metro. Please don't close Greensboro station and Judiciary Sq stations. |
| Unless there is an increase in bus service to cover the closed stops, this will not work for me. It essentially means no public transit coverage for wide areas of our region. |

Proposal to close 22 Metrorail stations

Closing down these train stations will disenfranchise hundreds of people who depend on the Metros services daily. The metro is supposed to be about access, and this does the exact opposite. It favors populations who can afford to live closer to one of the remaining metros (very expensive), call an Uber (often twice a day, very expensive), or live in a circumstance where they are able to walk an additional 10, 20, even 30 minutes to one of the remaining stations (time-consuming and some people have children or others in their care). If there is low ridership on these metro stations, for most stations, it is purely because of the COVID-19 pandemic. Prior to the pandemic, I know from first-hand experience that a number of these stations (Archives, Clarendon, Federal Triangle, Mt. Vernon Square, Virginia Square in my experience, though I do not intend to discount or recommend closure of the rest at all) are, in fact, very populous stations. Rush hour time for the Clarendon/VA Square area metro stops consisted of numerous cars that went by because they were already too full. Those in the middle of DC and near cultural centers (Smithsonian, Judiciary) are essential to allow people, both residents and tourists) to access the culture of DC. Closures of these stations is also incredibly unsafe and needlessly dangerous. Not only because it will force other stations to be extremely overwhelmed (leading to potential falling onto tracks, pickpocketing, sexual assault), but it leaves people who are forced to walk longer outside to the metro and/or their destination are more vulnerable to these sorts of attacks as well. Women, especially, but also men, walking alone for upwards of 30 minutes or more because metros near them closed will be at greater risk of sexual assault, theft, kidnapping, or more. I understand the pandemic is one of the primary reasons for these cuts in the first place, however, closing these low ridership stations will not only disenfranchise many communities like I mention above, but also diminish the trust that these communities and DMV population has in Metro. Many people rely on metro, even during the pandemic. Closing stations will force people to find alternate modes of transportation. They may inconvenience themselves for a time and commute longer to a metro (to commute again), but many will not. Very few people, if any, will move their homes to be closer to a metro, but many might invest in a car or rideshare. This will cause Metros profits to sink further, and will lead Metro to being obsolete. Metro needs to put in the investments NOW to maintain the trust the community of the DMV has put into it and continue to be a source of access to those who depend on its service.

I bought my house in morgan boulevard because the metro stop-this is not fair and I think shutting the metro-and being expected to go to either Addison or largo which is additional commuting is not ok. If you are not closing largo the logic is that the train just passes through morgan without stopping...doesnt make sense....

We definitneed Grosvenor strathmore metro rail open . We use the station all the time

This will be regional rail, not a metro system and kill downtown tourism, thus having many cars clogging downtown.

This doesnt affect my work commute. And if I was going to a museum, Id probably have my family with me and therefore would drive and find parking.

the stations in Arlington and DC are ones I use, if they close, Ill wind up switching to car or taxi services

Seems like a lot of Orange line stations are closing right in a rowâ€"East Falls Church, Virginia Square and Clarendon. I see that Ballston would still be open, but that is a long way from East Falls Church. Also Virginia Square and Clarendon to Courthouse or Ballston is a long way

Our business is at the Clarendon station. We have over 50 people (and growing) coming back full-time in the office as soon as vaccines are widely distributed. It would be crushing to us if the Clarendon station closed. Our office keeps business hours so the station doesn't have to be open late at night, but we have to have the metro available during regular business hours. There are so many offices on that corridor- please don't close Clarendon. We just have to hang in there a little bit longer.

I live near the Clarendon station and routinely use that station, Virginia Square and the downtown DC stations. Closure of Clarendon and Virginia Square would be a big blow to the Rosslyn-Ballston corridor as that areas economy is centered around the five metro stops and the connectivity they provide. The downtown DC stations are also a key element of the tourism economy and tourists would be hurt if the Smithsonian and Archives stops especially close, along with the Washington DC workers who rely on tourism dollars for their livelihood,

None of the station closings significantly impact my current commuting patterns. However, the closures of Clarendon, VA Square and EFC will push more commuters to stations I do use frequently (Courthouse) and may contribute to overcrowding.

Clarendon is a very high place of business and I think it makes more sense to close courthouse instead

You should not close down stations. If you make the metro less accessible to riders you will have less riders

Closing Virginia square over Clarendon makes more sense. Closing clarendon would greatly impact the economy of Arlington due to restaurants and nightlife there.

EFC is a good example - in normal times its crowded but close to plenty of people even without good parking. Again, this is related to other networks - if there were more buses running to and from metro stations, there would be less traffic. I am very very concerned that without public transportation well end up with LA-like traffic. More roads - not the answer. Are all these budgets - roads, metro, connector bus lines - that siloed?

Clarendon station is in the middle of a neighborhood that is adding an increasing number of apartment buildings. These people will need public transit. I am strongly opposed to closing Clarendon station.

I would miss being able to get on/off at Archives and Clarendon for social engagements but I don't use them for commuting.

Proposal to close 22 Metrorail stations

Absolutely not. I depend on several of these stations: Grosvenor for all of my metro travel needs.; Smithsonian [I work at the Holocaust Museum] , etc.

I live walking distance to EFC and have loved the convenience of direct service into the District. Once people start going to work again downtown ridership should increase. If necessary could service be lessened in non-rush hours?

This is ridiculous! Clearly, there needs to be new management for Metro. What was the point of building this system, and then trashing it in the face of a unanticipated, and hopefully, unique pandemic situation. Metro spent a lot of money to rebuild EFC, shutting the station down, and now with the work completed, Metro wants to shut it down permanently. Metro is a very greedy and poorly managed system -- new management is needed from top to bottom..

In my Pre-pandemic, and expected post-pandemic, commute I use Grosvenor-Strathmore station every day. I bought my home partially based on being walking distance to that station! This would also hurt the Music Strathmore at Strathmore which is a wonderful venue for classical music.

Moved near the grosvesnor-strathmore station specifically for the access to the metro. The next metro stations are not in walking distance. I also have a disabled family friend who does his best to live independently. His family specifically chose this location due to the proximity of the metro.

Clarendon is a major stop in Arlington. This station should not be closed.

This is just asking people to stop using the metro. Half of your ridership will skip riding the metro and switch to driving. This is not at all realistic.

East Falls Church is a transfer point. You really should keep that one open. Measuring how many people pass through the gates there is an extremely inaccurate measurement of its use. I use it to transfer from orange to silver all the time--even in bad weather. Ballston is too crowded a platform for me to want to use it to transfer.

As long as the Ashburn metro stop is open, Im good

Businesses along these lines will be substantially hurt by these closures.

I have been paying for the Toll Road for 17 Years and with the increase in the tolls, some of that money has been going to fund Metro. Already the station is over 2 years past due and I still have not been able to use it. I would be using the Innovation Center line. No bus goes to the Reston Metro from where I live. I would have to drive and pay for the Toll Road, then pay for Metro parking and then pay for Metro.

This is a terrible suggestion and would negatively impact EVERYONE. Please do not consider this option.

You wouldn't have any stations between Courthouse and Ballston (???)! Come on. Clarendon is a major, major Arlington hub, and this would force so many people to walk 20+ minutes to get to and from Metro. I can't even believe this is a possibility.

I moved to Cleveland Park one month ago and chose the location based on the proximity to the Cleveland Park station, which I use every day for the Red Line. I would need to consider moving if the Cleveland Park station closes.

Two of the closest metro stations to me would be closed under this plan. To get to a metro station I would have to take a bus, drive or walk for 20-25 minutes. Under those circumstances I would not take metro train to commute.

This would affect where I exit for work, and where I exit for where I live.

Im assuming this would be a temporary closure, not permanent.

Any closures should also consider impact on low income communities

The Arlington community around the Orange Line exists because of the Metro. People have bought homes and built their lives around the proximity to DC and availability of the metro to get into the city using public transit. Hopefully things will be opening up again and people will be returning to work right when you plan on shutting down the metro. Additionally, businesses in the Clarendon stop vicinity have built their existence on accessibility to the metro.

These closures would increase commuter times and leave many passengers stranded and forced to find other transportation means, at a higher cost. This also increases poverty levels.

Silver Line should be extended all the way and not closed. Greensboro, McLean and Loudoun would be a major hub for Jobs and closing those would be bad for the local economy.

By January we will be post covid and ridership back to normal. The proposal would be wholly inadequate. Many of those proposed to be closed are key stations for daily workers and tourists. And many of the suburban stations listed have communities built around them based on the metro and dependent on the metro. Grosvenor is a key station that is used to over capacity in normal times, closing it is not a serious proposal--rather it is just a scare tactic.

I live at one of these stations, and this would not work for me. If metro decides to start closing stations, I think it would be the death knell of the system as a whole. If the current board decides to reduce service and the number of stations, I think the whole leadership structure would need to be removed and a new system set up. The region relies on WMATA (which is already doing a shoddy job at best), and this would be a completely abdication of your responsibility to your riders and the people of the DMV.

If yellow line trains from one of the previous questions only run to Mt. Vernon Square, how would you close Mt. Vernon Sq?

Proposal to close 22 Metrorail stations

My commute station is Eisenhower Ave.

This is completely unacceptable and in the OPPOSITE direction that public transit should be going. By doing this you will be making ridership (not to mention home ownership) less desirable! I ride the metro because I know I can get to work location (Judiciary Square, Smithsonian, and Federal Triangle stops) as well as my home (Clarendon) in comfort and quickly regardless of the weather. Making it so that I have to transport miles either to get on or once I get off the metro will make me more likely to drive and give up Metro ridership entirely. I cannot overemphasize what a BAD idea this is. This will not save or help WMATA - it will just continue to devalue the service and the likelihood that myself or anyone else will ever use it. If you look at other municipalities that have reduced services and stations in this way, the trend is that by cutting stations and services, you make the services less useful which makes them less funded and less used. This is perhaps the worst proposal from Metro I have ever seen and I (along with most of my coworkers and neighbors urge you to reconsider.)

you are taking your service backwards

I can make the walk between lots of the downtown stations, even though closures would be a bummer and hamper my mobility. I dont think closing College Park works though; Greenbelt is too far away from where Id walk to make Metro still work. Id have to look at what the bus route changes are to know if it would work for me. I dont make a trip to College Park very frequently, but this proposal would make that trip impossible.

The East Falls Church Metro station and many of these other stations are important transfer stations and serve large communities.

Auburn station should absolutely be on the "closed" list. All Arlington stations should remain open, as many residents who live there don't have cars.

Operations at Grosvenor are a significant factor in my use of the metro system, I would stop using metro entirely if this station closed

As things open post pandemic these are needed stations!

East falls church is the closest metro station for me, if things reopen in late 2021, I will need to take metro to get to my office

Of the above, Virginia Square should remain open, as I see riders waiting for the train when approaching the station.

Cleveland Park includes essential services for those who live in Woodley or Van Ness along the Connecticut Ave corridor. Cleveland Park also serves residents over on Wisconsin Ave that have NO metro service

I use the Cleveland Park metro M-F and the nearest alternatives are too far to walk in business attire. It would also double my commuting time. I would drive instead.

Is this based on current state (during Covid)? Does this decision think about the future?

LOOK JUST RAISE MORE MONEY. Public transit is ESSENTIAL to fighting climate change and making cities more livable--including DC. ALL THREE jurisdictions involved with the Metro system need to be PRESSURED (start a public campaign if necessary) to cut other things and FULLY FUND METRO. We need to think of this as an essential service not a fiscal proposition.

Grosvenor is my go to station. No parking at Bethesda

Grosvenor Strathmore station is a valuable asset because of the large development surrounding the station and because of the Strathmore Music Hall. Much the same can be said about other stations, especially Federal Center, Federal Triangle, Arlington Cemetery, and Judiciary Square. Keep them open. People will come and will need these stations.

Why have a metro if the stations are closed. I can see reducing the trains in service before I would consider closing any stations.

Dont see how making service worse improves metro. Grosvenor is the last station you can park at coming into city from 270 corridor. This makes metro unusable for any transportation option.

I often travel around the DC area for work-related meetings which requires me to utilize many Metro lines and stops along all the lines. This proposal would make my travel without a car (which I cannot afford) challenging.

I live near the Grosvenor Station. If this close Id either need to go North (further from where I need to go), or wait in traffic near NIH and I try to get to Medical Center or Bethesda. There is also limited or no parking at those stations so it would be very difficult to commute to work.

closing the College Park station prohibits a huge population of students that use the metro to access work/internships in DC. Its often a huge draw to come to the university, and make the experience so much more impactful. what other station is close enough for students to walk to?

East Falls church Station is very important as no other options are available in that area. Bus lines have closed down. Terrible idea. Many other stations on the list would be a hardship

Closing many of these stations would increase commuting times, especially without rush hour service accommodations.

Proposal to close 22 Metrorail stations

The East Falls Church station is an extremely busy station (prior to the pandemic). The only reason ridership is down is because of the pandemic and Metros construction that closed the station over the summer. This station is the only one within walking distance to the Westover, East Falls Church, and Falls Church areas. Bus Service between EFC and Ballston is not sufficient to handle the number of people that would need to get to their jobs come January, when its expected that a huge percentage of the workforce will be back at their desks. Moreover, this is my metro station, and I relied on it to get me to work 5-6 days a week pre-pandemic. Do not let the pandemic-level ridership at this station cause your myopic reaction to shut this station for good.

Judging who has low ridership in the midst of a pandemic is misguided. If i had to commute to work again you would be closing down both grosvenor and va square. Grosvener has way better parking than other options and services strathmore. Shutting it is a terrible idea.

I use the Grosvenor- Strathmore station to commute to work

Working at Walter Reed there are many people who live in the vicinity of the grosvenor strathmore station out of convenience and proximity to the hospital. There is extremely limited parking on base so metro becomes a very convenient means of commuting. These people have worked tirelessly throughout the pandemic. Please don't close this station as it would cause many people undue problems getting to work.

Some of these stations are right next to each other. If stations are going to be closed, they should at least skip a station as to not truly inconvenience riders. For example, Virginia Square and Clarendon are right next to each other. It doesn't make sense to close them both; it should be either one or the other.

I live near Grosvenor-Strathmore station. I will have to walk a lot from other station to get to my house.

Keep East Falls Church... OPEN! The Nationals are having games this summer and taking metro is vital. So much has been taken away... please dont isolate us further.

I use East falls church and can't use the system at all if you close it.

If tourism is back then archives, smithsonian and cemetery stops should open.

close grosvenor and I would stop using metro

Clarendon station should be open.

This is the worst idea yet.

I commute from Grosvenor-Strathmore and its critical for area workers, too. The surrounding area is very densely populated.

This will negatively impact citizens as we return to normal after the pandemic. A large of money has been spent on the silver line, why waste it?

This is the closest Metro station to my house so this has a major effect on my commute not to mention the socioeconomic impacts to Arlington and Falls Church City that rely on this Metro station. Im against this closure.

No, no, no. It is a total waste to take stations off-line, especially for well-established ones like those on the Orange Line. The East Falls Church station in particular, meets a very particular niche, providing surface parking or being walkable from many, many neighborhoods. Although Ballston is close by, the parking there is terrible, so it isnt comparable. Use the stations you have; it will keep cars off the road. If these stations close, its the beginning of a slow death for Metro. Arlington Cemetery - How else will visitors be able to access this important national treasure?Clarendon - The abundance of shops/residences and young commuters here makes this station essential.

RIDICULOUS!!!

Bad idea to close Smithsonian station. This is a critical station for people headed to the Mall, especially tourists.

This would work, but it would be unfortunate to have both Clarendon and Virginia Square close, I think it should be one or the other

This is just ridiculous

All I can say (again) is that this seems like a massively bad idea for DC housing, communities, workers, really everyone.

I don't regularly travel to any of these stations, but I think it would be very important to still have bus service making up for these cuts.

Cleveland Park is an important hub for many commuters in NW DC. Van Ness and Woodley are significantly further for those who live on the streets off of Connecticut and rely on a moderate (<20 min) walk to the Metro to commute downtown and elsewhere. Its also a vital lifeline to the Zoo and the many businesses in the area. Closing Cleveland Park station would also devastate the commercial strip on Connecticut Ave.

Want to keep the stations within DC like Cleveland Park and Mt Vernon Sq

I need smithsonian to get to work

May be low ridership but remains very essential to those who live by

Not ideal

Many students use the College Park metro station. It is a vital connection for both UMD staff and students who work, have internships, or need to go to DC.

Proposal to close 22 Metrorail stations

We are at the East Falls Church Station and will resume frequent use of metro after our office opens in the summer 2021. My employer is one of the largest in the metropolitan area, the World Bank Group, with over 3000 employees many of whom live in the EFC metro area. East Falls Church metro has no other metro station close by and the area has expanded tremendously during the pandemic, lots of new construction and many families moving from the city. There is an elementary school, Tuckahoe Elementary, which is walking distance from the metro and many staff and teachers depend on the metro for transportation.

Closing of Grosvenor-Strathmore will drastically impact my familys commute to work. My family and I use this station to get to work and other places 5-6 times a week.

Im a heavy user of the Clarendon station

We most often use Ballston but sometimes use Virgina Square and Clarendon stations. Closures of two stations in a row will make Ballston even more crowded than it has been in the past and we may have to take a car instead.

None of those affect me. But the Grosvenor-Strathmore station is not that close to White Flint or Medical center to make taking transportation to the metro cost effective.

If my station is closed there is no incentive for me to commute with the metro

This is a horrific mistake and would take affordable transit options away from thousands of DC residents.

The alternate station for Grosvenor Strathmore is Medical Center. Medical Center (Walter Reed/NIH) is where I work anyway so I would stop using the metro system entirely. Additionally this facility infamously has an extreme shortage of parking meaning I would have to walk the 3.5miles each way year round. Because the walking paths are unlit this would also mean walking in the dark or along sections of MD355 that dont have sidewalks.

My job is located right outside of Clarendon metro. That or VA square would need to be open to make work metro accessible within reason

I use East Falls Church station.

I think decreased service is a far better solution than full station closures. Please maintain service at Clarendon station

Need proposed trains to continue to stay open

I live in a hi-rise near Grosvenor. I purchased the condo so that I would not need a car. Theres not a sidewalk to walk to Medical Center (much less the distance). White Flint is a hike. I cant understand why an existing station near a world-class music center and near many hi-rise apartments/condos would consider closing. This is anti public transportation.

I use Van Dorn on a daily basis and is part of the reason I moved where I did. You closing this station would put everyone around here in a major bind and would also depreciate our house value!

I would miss the Smithsonian stop, but do not regularly use the others

Oh my fucking God. More proof metro is run by the dumbest people on the planet. We dont have money because if ridership so lets solve that by decreasing ridership and making our shit service even worse. Also imagine building a new line and closing multiple stations before the line is even complete.

Would impact my local stations

This closes the only two stations I use for getting to work. Specifically, the McLean station is used by the majority of Capital One employees to get to work. This also proposes closing Clarendon and Virginia Square, the 2 central stations in Arlington. It would make more sense to me to close Courthouse rather than Clarendon so that every other Arlington station would be still open.

How would you do the turn-arounds at Mt Vernon if the station is closed? Was this thought through?Smithsonian? Really?

keep archives, cleveland park, and smithsonian stops open!

This is absurd. You would pay more in maintenaning the properties of these closed stations than you do for them being open and getting fares. Dont be stupid.

As a female, and of course a home owner living close by, I would be very unhappy and concerned if the East Falls Church metro station were to close. What plans does Metro have to care for people who usually use this station? Another concern would obviously be the potential decrease in value of our real estate, proximity to a metro station being a major draw.

This is a very dumb idea, many people depend on these metro stops, this plan would put more cars on the road which means more harm to environment & more traffic to an area that is already heavily trafficked

Bus are not consistent in their schedules. Several times, the bus passed and did not stop and the other times, iwas just waiting for 30 minutes then just took the metro

There is much building going on near EFC, are you sure ridership is not going to increase? Also, The parking lot has been closed at EFC for some time, of course ridership has changed and may be low. If you close Clarendon AND Virginia Square, that is a long way between stations in an area that is known for its award winning smart growth around transit stations. Development in that area relies on Metro, residents rely on Metro, and you are going to push all of those people into cars. Cars that they dont have, and have no place to park.

Proposal to close 22 Metrorail stations

There is too great of need to close these stations. Furthermore, why has so much been spent on reburishing/fixing some of these stations and then turn around and close them?

You cannot close Clarendon or Reston Town Center!

The most important of these to me is keeping the Grosvenor-Strathmore station open! A close second is the Smithsonian station!

Please DO NOT CLOSE GROSVENOR STRATHMORE as it would drastically affect my commute and those of hundreds of people in the area, where this station is their hub. It would be the end of the Strsthmore Cultural Center.

Closing Arlington Cemetery shows great DISREPECT for those who gave so much. Arlington is an important stop for many reason, one being that many visitor tours begin at Arlington Cemetery. This means tour guides have to arrive at the cemetery before 8am to connect with the tour bus. Were talking hundreds of guides. Please do NOT close down Arlington stop.

I am legally blind. Although I dont ride MetroRail weekly, I rely on it for trips to DC and Arlington. When I purchased my home, I chose it based on its proximity to the proposed metro stops in Reston. I realize that daily riders have to be a priority, but closing stations before they even open doesnt seem like a great idea to me.

This would be completely unacceptable - I work for UMD in College Park and so many of us (students, staff, faculty, visitors, etc.) use this stop. The Smithsonian and Archives would also be terrible for those who visit DC sites and once the pandemic has less of an effect, these stops will have much more activity. Finally, I regularly use Mt Vernon Sq for conferences - again a top stop for visitors.

Closing stations will cause increased traffic, congestion and pollution.

I live and use the Clarendon metro stop. Any closures here would involve an additional 15 minutes of commute time each way, adding an extra 30 minutes total to my commute every day. Furthermore, several of the stops listed are close to or central to lower income communities, who don't have alternative options. This places unfair burden on people in those areas/communities to add to their commutes in order to get to and from work every day. The metro system should be seeking to alleviate burden on lower income populations (as they need public transportation more than people who can afford cars), not increasing it.

By closing both Virginia Square and Clarendon you have greatly inhibited residents of this area from travel!

Many of these stations offer parking and closing them would limit the ability to get into metro and ride

This is a horrible idea that would literally ruin people's lives they have established. People chose where to live, which houses to buy, and how much to pay for all of this based on these metro stations. To just shut down these stations, including one you wasted money to refurbish like East Falls Church when it should have been spent keeping the station open, would dramatically and irreparably change the lives of all that live near them. This is the worst idea possible.

If the station near me closes, the next nearest station is dirty and unsafe, so I do not want to go there.

Grosvenor-Strathmore being used.

We bought purposefully to live near East Falls Church so my husband could use the train for his work commutes. He relies 100 percent on this station to get to his federal job downtown.

I rely on the College Park metro to commute to work. I built a house and moved to this neighborhood specifically to be near the College Park metro! Closing this metro stop does not work for me at all.

I work at Federal Center SW, as do thousands of other federal employees. Closing this station would drastically alter how many of us get to work. Many tourists come from out of town to visit Arlington Cemetery, taking away a public option for people to get there seems...irresponsible. Shutting down the Smithsonian stop will make it harder for tourists to get to the Mall, the Cleveland Park stop is used frequently for visitors to the zoo. This just looks like a massively disruptive plan. Understand the havoc wreaked on your budget by the pandemic and know something has to change, but its sad to see all of these stops closed. People live and work in these areas because of metro access, taking that away I fear will cause businesses to move and people to no longer visit neighborhoods.

need to get to work and doctor appointment

No no no no! Closing stations after the pandemic ends. Why? I would reduce frequency of some trains further rather than cut out these stations forever! That would be like giving your car away because you have a broken leg " and waiting till the bone was nearly mended to do so. Might make you feel like you're doing something but won't get you anywhere.

Closing two stations in a row would be unacceptable, for example, Federal triangle and Smithsonian.

As someone without a car, while some of these stops are near other stops, they arent that near.

This is insulting to even propose. How many millions and millions of dollars have taxpayers already paid to have these stations built? I agree with what someone on our NextDoor platform said - this survey is meant to scare us. If theyre really serious about doing this, its time to replace the entire Metro board, because this is not a serious proposal.

Proposal to close 22 Metrorail stations

This would make it more difficult for me in terms of my commute. We bought at Strathmore Park Court partly because of metro availability. We appreciate decreased reliance on cars and greater reliability of public transportation. Also not sure how much of a selling point closure of Grosvenor will be for construction at the metro station - pennywise, pound foolish.

maybe Arlington Cemetery stop is not as important to riders, but Clarendon, Virginia Square and the new Loudoun stops are vital if you want the public to feel that they are being serviced by an effective rail system

I have chosen to live within walking distance from Strathmore Station.

No!! Do not close Virginia Square and Greensboro! I use these stations EVERY DAY! I live and work where I do because of these stations specifically!!!!!!!

This would be terrible. It would ruin West Alexandria and its future development, not to mention the thousands of people who currently use that station in normal days. It would, personally, ruin my home value and have a HUGE IMPACT on our neighbourhood next to the station. It would decimate traffic in the coming years and just make everything in Northern VA worse. This is a terrible option that would hurt so many people and really damage a community.

EFC should not be closed because it is not near Ballston or West Falls Church. McLean should absolutely not be closed as it's how many people arrive to work near Tysons and where many businesses are headquartered (Capital One, Hilton) and those thousands of employees rely on the metro to get them to and from work (myself included).

I don't think that Grosvenor-Strathmore is a station with low ridership. It's not close to the other stations.

East Falls Church is not meaningfully near any other station. Driving to West Falls Church probably would add 45 minutes to my commute each day. And that also would require me to buy a second car and pay Arlington's vehicle tax on top of it. There's no meaningful bus access near where I live - probably because I can walk to EFC. We're a family of 4 on \$80,000 in 2021. If you take away the metro, we may have to move to a different state. We couldn't afford to stay here. You certainly should stop the silver line expansion until revenues pick back up and people start commuting to work. Crazy to keep building while you're driving people from the area.

Closing Clarendon and Va Sq means not stops between Courthouse and Ballston. This is the heart of Arlington nightlife and would require long walks between stations. If needed, why not close Courthouse and leave Clarendon open to minimize unserved distances. But in general closing stations that would otherwise have service (meaning, the train is going by anyway) seems like very low savings (one station master) for large inconvenience, and a bad choice if you want to maintain ridership.

Grosvenor strathmore is an important hub with parking facilities. People rely on driving to the station. Ridiculous proposal.

Incredibly difficult for people with disabilities, and in inclement weather such as excessive heat and excessive cold (which will happen more often because we have too many cars and metro is already too small for this area)

Grosvenor-Strathmore NEEDS to remain open for all the commuters that use the parking structure there. It is also too far from Medical Center and White Flint on a road that is dangerous for pedestrians (Rockville Pike).

Ridiculous idea to close Clarendon station. I've lived here 30 years and seen the Orange line corridor develop as planned: high population density around metro stations. It works. Leave it alone.

Doesn't make any sense to walk away from existing infrastructure and lose ridership

I'm a Virginia resident and I commute from Reston to Arlington (East Falls Church). There is NO station close enough to EFC to make closing this one convenient. Also, it's the first nice park and ride inside the beltway on 66 so it's convenient for those of us coming off the toll road. Second point...we've lived here for more than 30 years and have always been jealous of the reach into Maryland...we have endured YEARS of silver line construction and are about to see some final rewards and now you might be pulling this out from under us.

More people would take the metro from Grovesnor if it had more parking. Me included. I was taking the metro from Grovesnor until the parking lot closed. then I was forced to take it from White Flint. This is better than proposals 1 and 2 but still not good. And worse than proposal 3,

I use the Grosvenor stop for commuting downtown. It would be difficult to have to drive to a neighboring station. Also, given that the lot at Grosvenor is always busy on weekdays (and even many weekends), it is hard to believe that this is a low ridership stop. The same actually goes for stops like Federal Triangle and Judiciary Square.

Does it cost that much to keep a station open? Have shorter hours at these stations instead of shutting down completely? Maybe not run all 3 escalators constantly, only run one up and one down? Have limited hours at these stations?

Please make sure we are elevating disadvantaged neighborhoods!!

Please keep East Falls Church! I can walk there, and as it is an outdoor station waiting with other passengers would be less risky during a pandemic. Ballston would be too crowded.

The Grosvenor station is vital to my commute.

Proposal to close 22 Metrorail stations

To say this proposal would be a disaster would be an understatement. This would absolutely destroy the DC Metro system as we know it and torpedo any effort to restore the stations and grow in the future. Ridership would plummet to an extent that there would never be sufficient support to reopen the stations. Anyone serious about transportation cannot be serious about this proposal.

A large part of the reason I live where I do is because it is very close to the Grosvenor-Strathmore station. If it closed, I would have to move

I board metro at Grosvenor stop on red line- this station is walking distance to my home

if Grosvenor closes, i would not be able to get to work. it is essential to me as taking a bus to another station would not work or it would take over 2hrs.

It is imperative to continue service to and from Grovsnor!!!

I rely on the East Falls Church station, and plan to use the Reston Town Center station when it opens.

The cuts to the federal center, federal square SW, and smithsonian would be detrimental in many ways. There is only low ridership because government buildings and the museums are closed due to the pandemic- which would be detrimental if employees or tourists would want to navigate to these locations after these buildings open up again. Additionally, Virginia square has many residents who also WFH and aren't utilizing the stations at the moment but will once work and other activities in DC are open again. RTC only has low ridership because it has not opened yet. It is significantly more conveniently located to a larger population than Wiehle East- where these residents currently go. It is unfair to close a perfectly working station that has yet to be opened just because there is no data yet. The RTC station would be used a significant amount by members of the Reston and Herndon communities.

EFC station plays a critical role in this part of Arlington and Falls Church.

I live near East Falls Church. As a practical matter, alternative stations are too far away for walking, and bus service is likely to be infrequent and slow. So you would ensure that I never use Metro again. Moreover, when ridership returns, how will you know how much East Falls Church ridership there will be. You should close no stations until the pandemic is far in the past, so that you can truly evaluate ridership.

Keep East Falls Church open

Green and yellow lines through College Park will become more and more critical in 2022 with development occurring in College Park towards Greenbelt and return of students to in person classes.

We purchased on new home near the Grosvenor-Strathmore station and chose this location because of the walking access to the metro station.

Im very dependent on the East Falls Church, Ballston, and Clarendon metro stations to get to my work. Please do not close the stations I depend on to get to my job.

Are we talking about closing those permantly?? thats ludicrous!!!

This option will not work for me. If my station closed, I would have to walk at least one mile to get to the nearest metro. While I am able bodied, this option would not be doable for those who are mobility challenged or elderly. Buses that service this route have also been reduced so closing the Cleveland park metro would be detrimental to the community and our ability to get around.

Arlington cemetery stop is very close to fort Myer and soldiers can use that as a walkable metro stop, also the tourism industry will want to keep that stop for people visiting our nations military cemetery

One of the stations listed above is where I exit and enter metro for work.

I and many others in my position purchased condos and homes because of their close proximity to a metro. I purchased my condo in Clarendon because of its proximity to the Clarendon metro. Closing the Clarendon metro station would make commuting on the metro impractical and I would be forced to use other methods of transportation. Additionally, closing these metro stations would have a significant negative impact on property values for properties that would no longer be near metro stations, and this would have a significant negative impact on the economy in DC/Virginia.

Closing the East Falls Church Metro Station would make taking the metro impossible for those in the tysons/falls church/Arlington area-- it is the last station prior to the orange silver split, so it doesnt make any sense. Furthermore theres a very large population of folks that require public transportation around the seven corners area, where the nearest metro station is East Falls Church.

I work at Smithsonian stop so this would be very inconvenient.

I live near one of these stations. This is absolutely unacceptable. Perhaps if you had halfway decent transit options for folks with disabilities. But as it is, being within walking distance to the metro is critical. You should be planning on more services to resume and pressuring our government to get out more vaccines.

This would put a huge burden on anyone depending on these stations. For example, Van Dorn isn't near anything else and bus service is too spotty to make up for these closures.

Absolutely not

| |
|--|
| Proposal to close 22 Metrorail stations |
| CLOSING BOTH CLARENDON AND VIRGINIA SQUARE WOULD HURT MY USE OF THE METRO SYSTEM. AND CLOSING THE SMITHSONIAN STATION WOULD HURT MY MUSEUM VISITING, WHICH I DO OFTEN. |
| This would be fine for my commute. I dont rely on catching Metro trains at any of these stations. |
| Why close Virginia Square AND Clarendon and thus have no stops between Ballston and Courthouse ? |
| That is a large number of stations. Clarendon is my everyday use station to commute to work. This would greatly impact me. |
| Most condo/apartment residents in our area use Van Dorn station to commute to work. The closure of this station would cause significant hardship for me and other residents to commute to DC and would also effect property prices in the area since many choose to invest or live in the area because of its proximity to Van Dorn Metro. We just purchased our condo last April in large part due to easy access to the Metro. The closure of the station would create problems for my commute and takes away the main reason that we moved to the area. Inova Hospital and the recent Landmark redevelopment project would also be effected by the closure. I truly hope that WMATA does not close Van Dorn St due to the numerous West Alexandria residents that rely on the station to get to work every day. |
| Closing the Grosvenor-Strathmore Station would be catastrophic. |
| I often use the Courthouse station and could continue to do so if it didn't get overcrowded from closing the two stations ahead of it. |
| I think this would create too much traffic on the roads because the added commute time to other stations would render use of Metro pointless. |
| I don't use any of these stations and at least the downtown ones could close without much pain. I find it interesting the VA portion of the silver line would be practically unusable but I see that making sense. I could see closing Cheverly and College Park creating problems for people without vehicles in those areas |
| Please don't close stations in the heart of residential areas. That's the great benefit of public transportation as an alternative to wasteful and cost-prohibitive car ownership. |
| Depends on how it is handled, and if there is not major track work disrupting service as well |
| Closing Clarendon would be bad for us, commuters and property values. Lots of restaurants, bars and residences served by Clarendon. |
| During the pandemic I/we moved to the Grosvenor area. The whole point of moving to this area was to be able yo have more space outside the city eith metro access so one doesnt have to rely on a car to get to DC. |
| Travel to Reston alot |
| I am within walking distance of Grosvenor-Strathmore. Closing it would have a significant negative impact on my commuting options, as well as property values in the area. Please do NOT close this station! |
| Arlington has focused development along Orange line corridor for decades. Shouldnt punish that good behavior by closing stations on Rosslyn - EFC segment |
| Ridership is artificially low now. By January 2022, I would expect ridership to pick up dramatically. This will also negatively affect housing prices near these stops. |
| Federal Triangle and Smithsonian stations are very important to me and ones I use on a near consistent basis. |
| East Falls Church only has low ridership because there is essentially no parking available. If you construct a multi-story parking garage there as you have done at other locations, I expect ridership would increase significantly. |
| Metro made a substantial investment in building those stations. That investment will be lost if they are closed. It will also be very confusing to tourists once the pandemic is over. |
| once things resume to normality, well need these stations to be open |
| We chose our house because of its location near East Falls Church (EFC). I used the EFC to Tysons for my previous job at least once per week - a bus trip would require a transfer and triple the time needed. When my office reopens, I expect to use the Metro 1-2 per week to go from EFC to Silver Spring. My husband will travel daily from EFC to Union Station. This change might push us to switch to driving daily because of the extra time needed to walk almost a mile further to Ballston or take a bus to Ballston or Rosslyn. Both Ballston and Rosslyn have crowded stations - this change would drive up crowds as those stations absorb riders from multiple stations. |
| Absolutely not! It would require much longer commutes to another station |
| These stations make places more walkable. If by close to you mean you have to take a bus now instead I don't see that helping people get to work on time. Also the Arlington cemetery stop is extremely helpful for tourists and hopefully by 2022 there will be more of those. |
| This would technically not affect my daily commute to and from my office but I often opt to walk a little further and go to Archives. I will sometimes likely need to go to College Park as I am a student there. I will be forced to take other transportation methods in those instances. |
| Some of those station stops are essential for me |
| LOL! |

Proposal to close 22 Metrorail stations

DO NOT CLOSE COLLEGE PARK. WE MOVED TO THIS NEIGHBORHOOD BECAUSE OF METROLINE. STUDENTS NEED STATION FOR SAFE TRAVEL TO CAMPUS AND REQUIRED ASSIGNMENTS FOR DC INSTITUTIONS. ALSO MANY BUSINESSES WILL SUFFER IN AREA, AS WELL AS DC, IF STUDENTS AND PUBLIC DONT HAVE METRO ACCESS TO COLLEGE PARK.

For the orange/silver line, it makes more sense to close every other line instead of based on usage volume. A suggestion would be to have Rosslyn open, courthouse closed, clarendon open, virginia square closed, ballston open

This is the worst possible option. We bought our house because its close to East Falls Church Metro. It means neither me nor my wife has to drive to commute. We are not close to the West Falls Church station.

These are major metro stops that should not be closed.

Those stops are frequently used. Many are in areas of heavy traffic that would be potentially dangerous to traverse above ground as a pedestrian. For me personally, this is especially true of east falls church, archives, clarendon, and most of all smithsonian. Removing the smithsonian stop would make it much more difficult for certain groups to visit DCs treasured museums.

I recently relocated to Reston and found an apartment close to a silver line metro station knowing that I was relying on the opening of the new stations in Reston. The line has direct access to DC where I work.

I moved to my apartment so I could use Grosvenor to get to work. That would no longer be possible under this proposal.

Grosvenor-Strathmore has a large development in construction that will increase the number of people dependent on that station. College Park is used by many University of Maryland students and staff to commute.

This would significantly impact my ability to use metro for my two jobs, to visit family, go shopping and for social events. I would not be use metro at all if Archives, Arlington Cemetery, Clarendon, Cleveland Park, East Falls Church, Federal Center SW, Federal Triangle, Judiciary Sq, McLean, Smithsonian, Van Dorn St and Virginia Square were to close as I used these stations frequently.

I use Judiciary Sq. to get to work.

East Falls Church is not near other stations at all. Those of us who bought houses near it included proximity to a metro station as a reason to buy where we did. And by near it I still have to drive 5 minutes to it.

If you close Virginia Square and Clarendon and terminate 38B bus how will people travel in that section of Arlington. East Falls Church is not near any other Metro station.

Grosvenor is the only metro station with a parking lot to many people from Potomac, north bethesda, bethesda, and it is no close or near to orjer metro starions

Its important to keep all the new Silver Line stations open until ridership patterns can be established. Innovation Center is key. Thats where I work, and Ive been looking forward to riding Metro to work for over 10 years.

We use East Falls Church station for daily commuting and there is no other Metro station at walking distance, please keep EFC OPEN

I live in Cleveland Park and that station (and all the others) should absolutely not be closed. The more extensive the service is, the more attractive an option it is to use Metro for my transit needs.

We need MORE service and MORE stations, not fewer

I live right next to Greensboro station. That is the main reason I moved into the place I am at. Otherwise, I am forced to drive to another station and pay for parking. If there were free parking provided at any of the other stations nearby that would not result in towing my vehicle then I could possibly make due. But as it stands now, Greensboro is my best option for getting into downtown DC.

Innovation center in near my home. Anything farther is a great inconvenience

Van Dorn station is the only close station to a lot of people in West End Akexandria. A lot of money was spent to renovate it and now it will be closed? It doesn't make any sense. It is convenient to many people. Please leave open!

People who live or work near some of these stations would have too far to walk to get to an alternative station -- e.g. East Falls Church is about 2 miles from the nearest station in either direction.

I use these stations, but more importantly this is a big fuck you to tourists. Dont you make a lot off SmarTrips that go back to wherever the tourists came from and never get spent again?If you do this, youll crush DC under the weight of tourists who dont know how to get around.

Proposal to close 22 Metrorail stations

There would be no metro stops between ballston and courthouse which is almost a 2 mile gap. That is absolutely ridiculous for the huge number of people living in the Clarendon area, and not to mention the bar and restaurant district right outside the Clarendon metro station. As a resident of Clarendon I would have to drive to work everyday instead of using the metro line most days (I work in Reston). That doesn't seem to align with the metro's marketing to reduce your carbon foot print by using metro does it?

Clarendon station should remain open - it does not make sense to close it both it and Virginia Square. If needing to close one on the Orange/Silver Line, only Virginia Square should be closed. Clarendon is an important neighborhood in Arlington and should definitely have a Metro station to service it.

If a station is near another station and you close them both (e.g., Clarendon and VA Square), then its no longer near an open station. From VA Square, people could walk to either Clarendon or Ballston, but not if Clarendon is closed. These are busy areas, and many people dont even have cars because there are metro stations.

We depend on several of these stations, especially East Falls Church, for our daily commutes. We need access also to Federal Triangle, Smithsonian, Virginia Square, Clarendon.

This just makes the metro unusable if you cant get to where you need to go in the city

I dont have a car, the metro is my only way of commute, and as soon as Ill be vaccinated against covid, I intend to use the metro again. Grosvenor Strathmore is my metro station and it is crucial that it stays in service (even regarding my health, I use the metro to go everywhere).

This option unfairly penalizes riders that live or work near those stations.

The only stations I use are Clarendon and East Falls Church. Closing these two stations would mean I would never ride Metro.

Van Dorn is the station closest to my home.

I get on orange or silver line from East Falls Church every day so I don't know what am I going to do if the East Falls church station close! No, driving is not an option!!

I regularly use the Cleveland Park station.

1) I have been waiting for years (!!!) For the innovation station stop to open as it will be closest to my home; 2) my workplace is at the Smithsonian station and it is much closer to my workplace than the other options in the area.

I don't use those stations on a regular basis

This would severely limit the walkability of my commute to work and add additional time to my commute by requiring me to take a bus to complete my trip. Additionally, this would potentially lower the property value of my home if it became a permanent solution.

The College Park Station is very important to me and many others. Ridership is lower now due to the pandemic, but it will pick up substantially by January 2022.

Grosvenor is a key red line stop offering easy access parking and walking access to a large population.

I use Grosvenor! I couldn't imagine how I would get by without Grosvenor station. I park there but with enough time, can also walk there. There are SO MANY people in apartments and residential areas who use Grosvenor that post-pandemic will again all need to use it.

VA square would impact us.

Grosvenor is a very busy station with many riders who walk to the station or park there. The nearest station would be White Flint, and there isnt enough parking to accommodate the increased drivers.

East Falls Church is my primary station.

Of course these are low-ridership after a year of a pandemic! Stations that are further out are the only way people in the suburbs close to DC have of getting to their jobs, and stations like Smithsonian and Federal Triangle are key to the tourism in the city. This would absolutely not work.

I need one of those stations and it is not that simple to just close these stops.

Providing less service will not increase funding

You should not close two stations next to each other (e.g. both Federal Triangle and Smithsonian, or Clarendon and Virginia Square).

Please keep Grosvenor metro station.

I use Grosvenor-Strathmore station.

closed stations look really ugly. dont half close the rail, either switch to bus only or dont.

But this makes little sense with the likely return of federal workers and tourists. Seems shortsighted.

People rely on these stations! Figure something else out

I am an East Falls Church rider so this plan would be incredibly burdensome for me. Im not sure metros definition of close to other stations, but getting to either West Falls Church or Clarendon would require a 15 min drive for me (likely more with traffic) whereas East Falls is walking distance. Further East Falls Church is located in walking distance of several new apartment complexes currently being built and has recently undergone construction to make it more accessible for cyclists and other commuters.

|--|
| Proposal to close 22 Metrorail stations |
| Would this be temporary until the COVID situation changes? How often would trains come? Would there be coordination with Metrobus? |
| I commute from East Falls Church and Metro is the only way I can get to work. My commute is more than 45 minutes with metro and would be much longer with other alternatives. I can't do that. We also use metro as a family. Please do not shut down our station. You can have fewer trains. |
| I would have to travel to West Falls Church or Ballston to board a train as I live near East Falls Church. This would add time to my commute. I dont know how I would travel or if I drove where I would park. It would be very inconvenient and would make me consider moving house or driving to work or getting a new job. |
| In particular Smithsonian, Cleveland Park, and Grosvenor-Strathmore should not be closed. |
| I will have to drive to another metro station if the East Falls Church station is closed. It will add much more time to daily commute and inconvenience. |
| This is absurd. You have incurred the large fixed costs. These are smaller marginal costs. You will lose customer revenue. You hurt the elderly and working class. BAD idea. With climate change we should encourage MORE public transport not less. Shane on you DC for being elitist and anti-green. If this happens Bowser should be out. |
| By January 2022 I expect I will be back in person. My metro station, Clarendon, is on this list, and I do not realistically see myself choosing to take Metro if it adds 30+ minutes to my commute to walk from Courthouse or Virginia Square. Id opt to either take Uber/Lyft, or see if I can continue teleworking exclusively. |
| You should not close both, Virginia Square and Clarendon. There should be one stop between Ballston and Courthouse. also think that McClean, Smithsonian and Arlington Cemetery are all important stations to have, especially as work and tourism ramp up across 2021 |
| A large part of the population needs access to those stations to get to their jobs. |
| Some of these stations are used by a lot of passengers, especially cleveland park where there are a lot families living in the area and they rely on metro to go places with their children. It would not be wise to close this station |
| The majority of stations I use are on that list. Other metro locations are too inconvenient and I would find alternative transportation instead of taking metro to a different station. |
| Grosvenor-Strathmore is our go-to station - a short drive from home with good parking. Other stations are not nearby and do not have enough parking. |
| I use the grosvenor station regularly!!! |
| Save grosvenor-strathmore!!! |
| Closing Greensboro would require me to walk a total of 3 miles everyday. I propose you not close it rather have them run on an hourly schedule during busy hours. In the morning at 7, 8 and 9 and in the afternoon at 4, 5 and 6 pm instead of just shutting it down. |
| Wouldn't Court House Metro be too crowded if Clarendon closed? |
| I do use some of these stations frequently. |
| These include several stations I would use frequently, both pre and post pandemic times |
| without a car and reliable and frequent bus service it will be very difficult to bridge the gap between stations / enable a proper commute |
| I commute from Grosvenor metro via metro center to Smithsonian for work |
| Like many people, we bought our house on the premise that the Metro would be within walking distance. Shutting down VA Square would make our walk a few blocks further, and we are much older than when we bought our house in 1995. |
