Comment	Category
Please consider that SW DC is not service by many bus lines and only has one metro stop (two if you	
include L?Enfant). Cutting the P6 and 74 lines will impact primary low income working class	
Washingtonians and disproportionately affect access to public transit for Black and Brown	
Washingtonians. Please do not cut bus service in SW DC. Public transit is for the people that live in our	
neighborhoods. I?m a long time resident in SW DC and homeowner, and I still take these bus lines all	
over DC.	Bus Service
The G2 route is important to the Georgetown University community, particularly for staff with limited	Due Capiles
access to parking or other transportation and students who do not have cars.	Bus Service
Please do not cut the bus stops by Georgetown University! It is the only way for staff and students to	Due Capilea
affordably have transportation to the places we need to go!	Bus Service
please do not take away G2 it it my most used bus route Cutting the D2 and G2 routes is frankly ridiculous. You are cutting off multiple neighborhoods from	Bus Service
Metrorail access with an idiotic idea like that.	Bus Service
The G2 bus is the only bus that connects the Georgetown University area to most of NW and parts of	Bus service
NE DC. If that route would be cut, I would no longer have a way to get to my work using the bus	
without at least one change. The G2 already does not run that frequently and is often very full during	
commuting hours. Cutting it completely would leave lots of people without a public commuting option	
to Georgetown University. This would only increase reliance on personal vehicles, leading to more	
traffic congestion and parking issues in the area.	Bus Service
Please don't eliminate bus routes for those of us (and we are many) who need them. Eliminating bus	
routes is discrimination against those who choose public transport. Don't punish us.	Bus Service
The G2 are D2 are some of the ONLY options for public transportation in Georgetown. Taking them	
away would be an incredible hindrance to thousands of students, faculty, and staff at Georgetown	
University, as well as to the residents of Georgetown Neighborhood	Bus Service
1. The 42 and 43 buses should not reduce stops or service, they are essential for connecting Mt.	
Pleasant to downtown. 2. The G2 absolutely should not be eliminated, it is one of the few buses	
servicing the Georgetown area, and the only one for those traveling directly to Georgetown University,	
which includes the staff and students of the university, as well as tourists and many other visitors who	
would be left without options. Georgetown is an incredibly inaccessible neighborhood already for those	
of us using public transport, and this would significantly worsen the situation.	Bus Service
Keep the G2 Please, very vital to being ableb to get around DC	Bus Service
Georgetown/Burlieth as a whole are already so inaccessible to people with the lack of Metrorail stop in	
the neighborhood. Eliminating the G2, D6, and D2 would completely eliminate any mode of	
transportation for both Georgetown residents and individuals from DC who work within the	
neighborhood. It would be incredibly limiting for the hundred of On-Campus workers at Georgetown	
University as well as all of the individuals who work throughout Georgetown to provide the residents	
with goods and services which they rely on daily. It would also limit the young people within the	
neighborhoods options for getting to the rest of DC. This would limit the access to museums, galleries,	
shows, restaurants, etc which are found throughout all different corners of DC. Eliminating these would	
be incredibly harmful to all residents of DC.	Rail Service
As a Georgetown students, the G2 bus is one of the few forms of public transit accessible from	
Georgetown's campus. Getting rid of the G2 route would greatly inconvenience thousands of students	
and limit them from being able to travel off campus, such as to run errands or go grocery shopping.	
Georgetown students rely on this route. I would much rather Metro raise rates than the proposed service cuts. People need to get to work, to	Bus Service
the store, and explore the city. DC already has a horrible traffic problem. Cutting public transport would only increase it. Especially during rush hour when trains are already packed I can?t imagine less trains	Bus Service
Eliminating the G2 and the D6 makes it very difficult to get any transportation from Georgetown.	Bus service
Please at least keep the G2 route if possible.	Bus Service
Eliminating the G2, D2, and D6 routes and limiting routes that run on Wisconsin Avenue would	
effectively cut of Georgetown University students from the rest of the DC area. We have no metrorail	
stop, and rely entirely on Metrobus services to get around. For students who are impacted by financial	
hardship, eliminating our access to public transit makes it impossible to get off campus, as rideshare	
services are too expensive to rely on regularly. We students desire to explore our DC community and	
experience the opportunities that this city has to offer, and eliminating these routes completely	
eliminates our ability to do so. It also eliminates the ability for campus staff who rely on public transit	
to get to work using metrobus services. Please reconsider these proposals and keep the G2, D2, D6, 31,	
and 33 routes intact so that students and staff from Georgetown are not cut off from the rest of DC.	Operating Budget, Management and Spending
Metro is a public good. It's robust and reliable service is critical to enable the residents of DC to live and	-
work, and for visitors to our city to navigate freely without adding more dangerous car traffic to our	
already pedestrian-unfriendly streets. The false dichotomy of service decrease vs. fare increase is	
extremely disappointing. Budget shortfalls and new investment should be paid for primarily by (1) the	
many businesses and wealthiest residents who benefit immeasurably from a well-funded network of	
public transportation through progressive taxes, as well as (2) the many drivers who add vehicular	
traffic to our already busy streets through congestion tolls. They should not be paid for by our poorest	
residents, who rely heavily on this network to live and work.	Operating Budget, Management and Spending
D6 route is what I use for work and it is right outside my house	Bus Service
Eliminating the G2, D2, and D6 routes would further limit the already limited access to public	
transportation in the Georgetown neighborhood. Not only would this make getting around difficult for	
Georgetown students such as myself, but it would also complicate the commutes of the staff that allow	
the university to function. The lack of metrorail stop in Georgetown means that many people,	
especially the many students who don't have cars, are reliant on metrobus for transportation. Getting	Due Camina
rid of three of the most frequently used bus lines would be detrimental to these people.	Bus Service
Georgetown residents have no access to the rest of the city without the G2 bus line. It is crucial that it	Rus Sanira
remains operational to connect us with the rest of Washington. As a student residing in Georgetown, I am already affected by the lack of metrorail service to this	Bus Service
neighborhood. Altering or removing the G2, D6, D2 buses would severely impact my ability to travel to	
and from my residence. I consistently take the D2 or D6 to the Dupont Metro Station as a part of my	
commute. I believe that removing the G2 stop outside of the Georgetown University (O St) would also	
impact the student community based on comments from peers. I rely on the metro bus stops listed	
above that have served me for the last few years both for financial and safety reasons. I use these bus	
stops to get home at night when I do not feel safe walking alone and do not wish to use Ride Share	
apps such as Uber/Lyft due to their expensive costs. The DC Metro System must take into consideration	
the existing public transit in Georgetown and surrounding areas (or lack thereof) before choosing to	
remove accessible bus routes for individuals who rely on them as part of their daily routine.	Operating Budget, Management and Spending
I think there should be more investment from the city into the metro bus routes instead of cutting	1 - F - C
routes. If the city wants to get to net zero and reduce traffic conditions, then cutting routes is not the	
way to go. Lots of people also rely on the Metro system (buses, rail, etc) to get around and cannot	
afford another option, so cutting routes and raising fares are both bad ideas. Metro is a public service	
and shouldn't be focused on turning a profit. In fact, I would advocate for reducing or eliminating fares	
and shouldn?t be focused on turning a profit, in fact, I would advocate for reducing or eliminating fares while keeping or expanding services to under serviced parts of the city.	Bus Service

Comment	Category
The G2, D2, and D6 metrobus lines are the only buses that can take someone to Georgetown University	
and the associated hospital from Dupont Circle and other areas of DC. Not only does this impact	
everyone who uses this public transport to get to and from work every single day, but this will affect	
numerous residents of the DC metro area who attend MedStar Georgetown University hospital for medical care. Medical care access at Georgetown is already quite limited by only having three	
metrobus lines, and eliminating them completely will be eliminating an entire population of people	
that could receive potentially life-saving medical care here. As for the people that use these buses to	
get to and from work, there is the option of utilizing the Georgetown sponsored shuttles, but the	
operation of these shuttles only keeps the students in mind, and not the staff. There is already no	
parking available on campus, so eliminating public transportation options will make it next to	
impossible for any Georgetown employee to get to work when the Georgetown shuttle isn't running.	
We should not have to rely on ridesharing services with exorbitant prices just to attend our job.	Bus Service
The current proposed changes would almost completely cut off Georgetown from the rest of the	
district, and we already don?t have a Metro stop. The proposed eliminations would impact	
Georgetown students and employees alike who rely on these busses every day.	Bus Service
WHY THE DO WE PAY SO MUCH FOR THE METRO WHEN ALL YOU'RE GOING TO DO IS CUT LINES	
(WE PAY MORE THAN NYC, WHOSE TRAINS ARE OLDER AND RUN FURTHER AND LATER)? WHY AM I PAYING THESE EXPENSIVE TAXES IF THEY AREN'T IMPROVING TRANSPORTATION!? MAYBE TAKE	
PAYCUTS FROM THE GREEDY C-SUITES WHO DO NOTHING!	Rail Service
This proposal is blatantly racist and classist, prioritizing wealthy neighborhoods and riders over less	
wealthy in a manner that has been blatant since Mr. Clarke began his tenure as leader. By cutting bus	
and rail service in DC neighborhoods east of the river Metro is proposing to perpetuate longstanding	
harms. Instead of turning back silver line trains at Stadium Armory, why not turn them back in Virginia	
and cut service there? Raising fares is less harmful than the proposal to cut service but is still a	
challenge. Perhaps, instead of installing new faregates which damage bags and clothing metro should	
have focused on using those funds for other areas. It's unclear how metro proposes to bring back	
ridership to increase revenue by making the service less available. The 96 is one of the only remaining	
cross city bus routes, it is constantly plagued with ghost buses (in spite of metro's assurances that those	
had been eliminated) and is often disregarded by leadership. However, cutting off access from far NE	
and SE to NW harms residents who need to get to work or who wish to move about the city efficiently. We should be running more buses on this route, not proposing to eliminate it. The proposals here are	
the mark of lazy leaders who wish to solve their problems in the way that impacts them the least. By	
targeting neighborhoods east of the river or populated by college students it's clear who Mr. Clarke and	
his leadership team think matter. It's a shame that they feel the need to punish neighborhoods most in	
need of robust transit opportunities by cutting service.	Bus Service
Please do not eliminate the G2. It is really the only bus that I care about. I am a Georgetown student	
and we have very limited transportation to parts of the DMV outside of Georgetown. Eliminating the	
G2 would be a major barrier to students and staff at Georgetown.	Bus Service
you can?t cancel all of D2, D6, G2 all together, how the hell are we going to be able to go to	
Georgetown, is this segregation all over again!!	Bus Service
i just think cutting g2 would be a massive inconvenience to me as a consumer and would make me less	
likely to choose metrobus	Bus Service
The G2 is the only bus that goes to Georgetown University! It is desperately needed! To address the	
budget shortfall, get better enforcement on buses and metro stations. Every day I see people walk onto the bus without paying and the driver does nothing. Every day, people jump the turnstiles to get on the	
metro. It's infuriating.	Operating Budget, Management and Spending
Do not get rid of the G2. It?s the only bus access to Georgetown University.	Bus Service
DC governments should pay for the metro fees for DC residents! and DC residents should freely use all	
metro services for all year round.	Fares/Fees/Parking
I am a Georgetown a student and the only reason I am alright with not having a metrorail stop is	
because of the G2 and D6 buses. If you eliminate those it would essentially be a huge insult to people	raica/recay annig
because of the G2 and D6 buses. If you eliminate those it would essentially be a huge insult to people in the Georgetown area since we would have no reasonable access to public transportation. Please do

By eliminating certain routes in the Georgetown Neighborhood, the neighborhood will be come more inaccessible which will cause many problems for its residents. The people in Georgetown should be allowed to have access to public transportation and getting rid of these services will prevent many from getting access to the convenience of the metrobus system. This proposal should not be implemented at all, The elimination of the G2 and D6 Metrobus lines would be a huge disservice to the Georgetown should be allowed to have access to public transportation and getting rid of these services will prevent many from getting access to the conve	Bus Service
because of the G2 and D6 buses. If you eliminate those it would essentially be a huge insult to people in the Georgetown area since we would have no reasonable access to public transportation. Please do not get rid of these buses. The service cuts is a very lame proposal. A lot of people have chosen areas to live based on access to Metro. Life will be incredibly difficult if these cuts are effected. PLEASE LEAVE THE G2 METRO BUS ROUTE ALONE. It's better to increase the price if neccesary. Please do not cancel the MG and G2 bus. These two busses are my only way to work from home. I think Metrorail should be a budget priority without necessarily relying on fare increases, but rather on public funding ? as opposed to funding war crimes abroad. I also think that service hours should be extended Don't cut the G2 route to georgetown Please do not eliminate D2, D6, G2 and 31/33. It is vital to keep Georgetown connected and have these routes. Fare increases are a far more reasonable solution in this case. The G2 is vital to connecting Georgetown to the rest of the city. The neighborhood is already sparse in terms of public transportation, and eliminating this stop would leave many of the workers in the neighborhood but also Georgetown University (one of the largest private employers in the city) without reliable transport to and from work. Every time I take the G2 from Georgetown it's nearly full, so I don't understand why it's being considered for elimination. It is a heavily used line and connects a part of the city with no metro stop and few bus routes connecting it to the eastern part of the city. By eliminating certain routes in the Georgetown Neighborhood, the neighborhood will become more inaccessible which will cause many problems for its residents. Comment	Category
The proposed changes almost completely eliminate the city?s access to Georgetown. As a student who	
takes the bus almost every day, there is no other way for me to get to Georgetown in a relatively timely	
manner on public transportation. This part of the city is already inaccessible by transport as it is, and	
this proposed rule will only make that issue substantially worse. While those who can afford to live in	
Georgetown may have the luxury of owning a car, that is not the reality for all those who need to take	
public transportation to get to school and work, whether at the hospital, on M Street, etc. When I take	
this bus, it is almost always full, even as late as 9:00 p.m. and as early as 7:00 a.m. Why would Metro	
even consider cutting these bus lines when so many people rely on this consistent transportation to get	
to and from their obligations?	Bus Service
The G2 bus is the only goddamn option that many Georgetown students and staff have to travel into	
the city and get to work. The 31 and 33 are the fastest way for me to get to my job and my medical	
appointment. I know that whoever is reading this probably didn't make the call, and I don't blame you	
personally, but JESUS CHRIST this is such a bad idea. Holy hell this would be awful.	Bus Service
Parking increases will drive away many Metrorail customers, literally. Most are not included in	
company perks so it's a direct out of pocket expense for people. I would hate to pay more for worse lead times on the Metrorail. Ten minute waits on Silver line at rush hour are fine, anything longer is	
awful. I rely on G8 to provide access to Georgetown University and I cannot believe Metrobus would	
not serve the university staff and students. Weekend access is critical for bus service or else it's hopeless for people who live in DC and need public transit.	Due Canting
The proposed bus route changes effectively disconnect the Georgetown/Burleith neighborhoods from	Bus Service
the rest of Washington, DC and the public transportation network. This neighborhood includes a large	
University and hospital. Maintaining a connection to the broader WMATA network is critical for students, faculty, staff, and patients.	Bus Service
bo not remove the G2 Line at Georgetown. Also maintain the same level of service on the red line	
going to Shady Grove.	Bus Service
I think that bus routes in Virginia and Maryland should be cut before bus routes in DC are considered	
for being cut. The Metro should serve the residents of the city of DC before it serves commuters from	
the states of Virginia and Maryland which have their own transportation budget and funding.	Operating Budget, Management and Spending
The G2 is the only way for students in Dupont to and beyond to get to Georgetown. Cutting this route	1-1-1-1-0
will force students to have to relocate to Georgetown, which is unaffordable for most. Dont cut the G2	Bus Service
PLEASE PLEASE PLEASE Don not eliminate the G2 bus as a Georgetown student this bus is so helpful for	
getting anywhere	Bus Service
The G2 is an important route for accessing Georgetown. I live in Shaw and work at the university	
hospital in Georgetown, and while I usually use the university shuttle, the G2 makes commuting to	
Georgetown easier.	Bus Service
Meet the gap with taxpayer funding. Public transit is a service not only to those taking transit but also	
drivers, walkers, bikers, and all community members. As well as visitors and tourists.	Capital Budget
G2 and 31, 33 are the only busses that go to my work in Georgetown. Please don't remove!!!	Bus Service
The D6 is the ONLY bus or form of public transportation that comes through my area with access to	
Sibley Hospital, DuPont, and the rest of DC. It is also is what a majority of MacArthur high school	
students take to get to and from school. Completely eliminating its service would leave a lot of people	
without easy transportation or access to any form of transportation, not to mention that it would	
severely increase traffic through Foxhall and MacArthur Blvd since there would be no other way to get	
to this area but by car; there is already a lot of traffic on these roads with the bus included. In short,	
eliminating the D6 would make it incredibly difficult to navigate DC and the DMV area. I?d much rather	
there be a fare increase than no form of public transportation at all.	Bus Service
Please do not eliminate the D6 route. That is currently one of the only routes through downtown DC	
prease as not emminate the portoute. That is currently one of the only routes through downtown DC	
that also crosses Capitol Hill and reaches Georgetown University. I take it nearly every day and many

These proposals greatly disadvantage students, as well as the workers that work at the universities	
around DC. Taking these buses away will drastically change the experience of going to University in DC.	Bus Service
PLEASE DO NOT ELIMINATE THE D2, D6, AND G2!!!!!!!! these are the three routes I use more often	
than any other	Bus Service
Keep GU bus routes- and if we have more service people would be more likely to use the metro	Bus Service
If you?ll be increasing fares, how about actually making people pay? All the new security guards do is	
stand around watching people jump turnstiles. Also, the bus service frequency is so bad they?re nearly	
useless. I don?t care how many routes you cut as long as the remaining ones actually run. (And fare	
enforcement on busses seems to be non-existent? I feel like the only person dumb enough to actually	
pay)	Bus Service
The G2, D2, and D6 buses are the only buses that directly serve Georgetown University and the greater	
Georgetown neighborhood. 31 and 33 routes do not provide direct or reliable travel to DuPont, which	
is a key commuting route for many students, faculty, and staff and serves Metro access. Eliminating	
these routes means eliminating a huge portion of your user base. I will personally start using the GUTS	
shuttle buses rather than paying for Metrobus.	Bus Service
I use the S2/S9 and then the G2 every single day to get to class at Georgetown. It is one of the main reasons that I can continue to live in Mt. Pleasant (a neighborhood that I have now lived in for almost 4	
years). If the G2 in particular is eliminated it will greatly diminish my likelihood of using MetroBus. These service cuts are incredibly harmful to the students of the university and to those attempting to	
make East-West commutes in the city (of which the bus routes are already limited). Furthermore, this	
summer I will be regularly using the 42 and 43 to get to work at the State Department, eliminating the	
Foggy Bottom stop would lengthen my commute and decrease my chances of visiting the Kennedy	
Center on weekends to support DC's art community. I would greatly prefer a fare increase rather than a	
blanket service cut. DC's public transport system has already been impacted by the pandemic, this will make it much harder for me to live in the District.	Bus Service
	Bus service Miscellaneous
Public transportation is a critical component to a livable, equitable, visitable, working city While there are a number of proposed cuts that would not directly impact me, they would impact	ואווזרכוומוובטעצ
friends, family, and neighbors. In particular, proposed bus and rail service cuts would detrimentally	
impact poorer communities that rely on public transportation to travel around the DC region. That	
being said, multiple proposed cuts would directly impact me and my daily commute and regular trips	
that I take throughout the city. At this time, major cuts are being proposed during rush hour. I ride either the D6 or Blue/Orange/Silver lines daily. Buses and trains are packed as it is, and eliminating	
service would only decrease access to transportation thus decreasing the opportunities for individuals	
to ride WMATA services. Eliminating service means eliminating ridership. Perhaps our city administrators should consider cutting their salaries before we cut necessary transportation for city	Pue Certier
	Bus Service
Eliminating the G2 bus would be extremely detrimental to the Georgetown community. It is one of the only direct routes from the city to Georgetown and it would be a disaster to eliminate it. Same goes for	
the D2 and D6 busses.	Due Comies
This proposal eliminates nearly ALL of the buses I regularly take. Please don't eliminate the D2, D6, and	Bus Service
G2!! Glover Park already lost the D1. If the D2, D6, and G2 are eliminated, Glover	
Park/Burleith/Georgetown will be cut off from easy transportation access downtown, and all Glover	
Park residents will have to go to all the way to Wisconsin Ave to catch the 31 or the 33 to get	
anywhere, which is a really long walk through a hilly neighborhood for many of us. Already now during rush hour some 31 and 33 buses don't accept passengers because they are full. Taking away the D2, D6,	
	Bus Service
and G2 will make this overcrowding worse. Don't take away our buses!!	Bus Service
I'd rather you cut down on metro trains rather than buses. Buses connect many lower-income folks and	
in smaller neighborhoods to the whole city! We are in a metro desert and rely on the D6 to get to work,	Rus Sanisa
school, etc. And the bus wait times are already long.	Bus Service
Please don't get rid of the G2!	Bus Service
G2 should not be eliminated. It is vital for the Georgetown University community.	Bus Service
I rely heavily on the G2 and D6 routes in particular to travel from Georgetown to other parts of DC. I	Due Certier
will be screwed if I don't have these routes. Of all the lines to cut, it's absolutely preposterous to consider entirely cutting the G2 to Georgetown	Bus Service
a critical line on which many, many students rely. I know for a fact that there are dozens of students who almost exclusively use Metrobus for the G2. The area has no other public transportation options.	
who almost exclusively use Metrobus for the G2. The area has no other public transportation options. Would you rather we all add our cars to the already-congested Georgetown streets, fighting for non-

The L2 is a critical connection to downtown D.C. and needs to go further than Woodley Park. Those	
buses are packed every morning with riders going much farther than Woodley. Additionally, the buses	
buses are packed every morning with riders going much farther than woodley. Additionally, the buses that go to Georgetown are necessary considering there is no metrorail stop there, and any service cuts	
would have a hugely negative impact on the community. Finally, eliminating the 96 would get rid of the	
only cross-connections in the northern parts of D.C. There are no other buses that take a similar route	
that could be used as a connection between these areas.	Bus Service
Please do not get rid of the D2 it is the only bus that goes to my neighborhood and I don't have a car. I	
will never be able to go anywhere.	Bus Service
Don?t cut the G2!!! Georgetown is already difficult to access and many of us need public	Bus service Bus Service
Is there any way to start enforcing that travelers pay bus fares? So many people use metrobus and do	
not pay for services. I depend on the D6 to get to and from work. It would be an inconvenience to have	
to use metro alone.	Bus Service
Eliminating D6 and G2 will leave the western side of Georgetown, Foxhall Village, etc. without public	
transportation options.	Bus Service
If anything, I think Metro needs to be mindful of not cutting service to the G2 bus because you will cut	
all access between Georgetown and the rest of the city via public transportation. It would truly be a	
all access between Georgetown and the rest of the city via public transportation. It would truly be a travesty for workers, students, faculty, and staff in the community who rely on public transportation.	
Please don't cut the G2.	Bus Service
Address those who don?t pay fares rather than punishing the people who need to use public transit	
AND pay on a daily basis. Enforce the fares	Fares/Fees/Parking
Eliminating the G2, D2, and D6 and reducing service on the 33 and 31 would be terrible for the	i urcaji ecaji urking
georgetown community. For those of us who are students without a car, we would have basically no	
way of getting into the rest of the city besides ubers which are often extremely expensive.	Bus Service
indy of Becaus and the resconded operations which are often extremely expensive.	

Comment	Category
I am a frequent user of the metro bus and metro rail on weekends and weekdays. Public transport is	
my only way (as with a lot of peers) of getting around the city as parking/ having a car is not feasible within DC. Georgetown is already not easily accessible by public transport and even to those who do	
have a car, does not have adequate parking available. The D2 and D6 are my only options to get to	
school every morning and without them I would be left walking a considerable distance to get to	
Georgetown University from where I live. Even if I moved to Georgetown I would not be able to access	
the rest of D.C in an easy way if these lines were suspended. I have also worked at Sibley Hospital in the	
past and I personally know a lot of healthcare workers and patients that use the D6 bus to get to and	
from the hospital. I believe discontinuing this service would have very negative effects on the	
community, specifically to service workers who rely on public transportation. I am more in favor of fare	
increases of necessary (or more monitoring on buses to ensure patrons are paying the fare) than	
entirely removing these lines. Metro?s proposals to cut bus routes serving the Georgetown community, such as the D2, D6, and G2,	Bus Service
would be detrimental to the Georgetown neighborhood. These cuts would completely cut off major	
portions of the neighborhood that already have relatively poor connections to Metrorail and the rest of	
the DMV. These routes are not redundant and are a vital lifeline for Georgetown residents. Please	
consider the community?s concerns and needs when deciding whether to eliminate these routes.	Bus Service
You would basically be cutting Georgetown fully from DC. Either build a Metro stop or keep the buses	Bus Service
The proposed changes would radically reduce my ability to navigate the city. I might have to start	
commuting by car. These proposals remove the only public transportation in Georgetown. Removing D2,D6, and G2 would	Miscellaneous
be extremely harmful to students and cut off access to internships, jobs, and the city in general.	
Georgetown has no Metro rail stops so removing all of the busses and combining the other nearby	
busses (31 & 33) is unconscionable.	Bus Service
the D2 and G2 routes are basically the only way to access the georgetown area. I use these daily and	
they are crowded at every single stop. I think the cancellation of these lines would be a massive	
mistake and would negatively impact thousands of people who live in the NW region of DC	Bus Service
save the G2 :(Bus Service
Please keep the G2 route and the 31 and 33 route. It is essential for Georgetown workers to commute	
to campus, and if eliminated the University likely will not provide a substitute for these essential	Bus Service
The G2 route is the single Metrobus line to Georgetown University, a historic landmark of Washington D.C. It would not make sense to eliminite this route.	Rus Sanira
Please try and find a better solution :(Bus Service Miscellaneous
The G2 and D2 are essential routes for Georgetown University. Eliminating them makes Georgetown	
even more inaccessible to those who do not own a car to park (which is already awful in the first place)	
This is essential for equity, sustainability, and ensuring use of Metrobus by GU students and staff.	Bus Service
The G2 bus is basically the only bus I regularly use, and my ability to get to the other side of DC from	
Georgetown would be immensely impacted by its removal.	Bus Service
Cancelling all buses that go to Georgetown (D2, D6, G2) would considerably affect students and staff	
who need to commute to this area daily. There is no metro option in this area, either, so that would	
leave people the only option of paying for Uber. This is a serious disservice to all lower and middle	
income people who need to commute to Georgetown for work. This includes major employers

Please keep the G2. There is already limited transit access into and from Georgetown! Eliminating the G2, D2, and D6 routes, as well as combining the 33 and 31 Metrobus routes, would drastically hinder the ability to travel from Georgetown University to other areas of the city. Additionally, given that there is already a lack of Metrorali access to this part of the city, maintaining bus routes which will allow us to get to rail services is all the more important. Eliminating the G2 line will be highly inconvenient for residents of the Georgetown neighborhood, in particular for students at Georgetown University, seeing that the G2 line is currently the only bus line that services Georgetown University directly. Many Georgetown students have a daily need to travel via bus downtown for work, thus this proposed change will pose a travel difficulty for a large number of people. Eliminating G2, D6, and D2 will hinder access to Georgetown University?s campus via public transportation, which can make it difficult for Students that utilize metro to travel to/from Georgetown This is outrageous! I am 86 and rely completely on the G2 bus service. Do not suspend the G2 route. It is used widely by the Georgetown community and this would directly impact rider use. I would never want to use the metro or have zero daily need if this route is The G2 bus line has been an essential part of my daily commute, providing a reliable and cost-effective means of transportation. If this route is eliminated, I would be faced with the dauning cospect of having to absorb hefty Uber/Lyft fees or consider resuming personal driving. Given the current parking	Bus Service

Comment The C2 route is the only but route that bring Georgetown students from downtown straight into	Category
The G2 route is the only bus route that bring Georgetown students from downtown straight into	
campus. It is already difficult to get to campus because we have no direct metro stop to the area, so eliminating this will be extremely troublesome especially for graduate students like me who live off	
campus and cannot afford to live in the immediate Georgetown area. I take this bus route almost	
everyday and I also see many GU students and staff who take this bus route to/from home. It will be a	
disservice to the GU community if this route is eliminated. Please help us! Please don't take the G2	
route away! We need it.	Bus Service
Service cuts only make metro worse and dissuade people from riding. We've seen this happen in the	
past! Put pressure on DC, MD, and VA to pay their fair share and support public transit across the DMV.	Bus Service
Eliminating bus routes that serve hospitals and educational facilities should be the last place to save	
funds. I dealt arrea with aliminating the metro convice of C2, providely because it is one of only a few shoices.	Bus Service
I don't agree with eliminating the metro service of G2, precisely because it is one of only a few choices for people in DC to get to the Georgetown University, one of the best universities in DC and also in the	
United States in general. Even under tight budget restraint, more priorities should be given to	
maintaining services that help connect more isolated places like Georgetown, which in this case also	
has strong economic spillover effect like connecting the youth population in Georgetown to other parts	
of DC. Even increasing fares would be a better choice than eliminating the service at all.	Operating Budget, Management and Spending
Don?t cut G2 service, university laborers would have no access to work	Bus Service
I work at Georgetown University, so I am mostly concerned with the proposed elimination of the G2	
and D6 routes. The G2 route in particular is already often filled to capacity during rush hour and would	
benefit from increased service, not elimination. The people who use these routes would need to either switch to metrorail when possible (which would stress the already-packed rush hour trains) or drive,	
which would put even more cars on the roads during rush hour and make traffic worse than it already	
is. In addition, the G2 and D6 routes serve the Georgetown neighborhood, which has no metrorail	
alternative and very limited street parking. Many Georgetown Hospital employees and Georgetown	
University staff and students use these bus routes. Eliminating these routes would make street parking	
virtually impossible for many, since the university has very little parking of its own for staff and	
students. The parking garages south of M St. NW are not an option because they are too far from the	
university and the majority of the Georgetown neighborhood. Eliminating the number of routes you	
propose would affect not just the people who use those routes. Not having those routes will make	
traffic and parking throughout the city a nightmare, and that would affect us all; metrorail is already	
packed during morning and afternoon rush. Raising fare prices, while not ideal, is preferable to eliminating service altogether. Increased fares may prevent some people from being able to afford	
transportation, but eliminating entire routes prevents everyone from using it. If your goal is to make	
traffic and parking in the city worse than it already is, this is a great way to do it.	Bus Service
The D2, D6, 30s lines, 96, M4, and N-lines are all critical to residents of DC who reside along these bus	
routes as they serve as the only public transit available to those without cars or other automotive	
transport due to the lack of any Metrorail stations along many parts of these routes. Please do not cut	
service to them!	Bus Service
I work at Georgetown University. The G2 is how I get to work every day.	Bus Service
The idea of cutting bus service to the Georgetown region, and connecting North DC with downtown DC	
and therefore increasing car traffic congestion is a very bad one. Reducing public transit will also prevent people without cars such as those with lower incomes, the young, the elderly and the disabled	
from traveling for school, work and healthcare will have a large negative impact on the city. I believe	
we need to increase fares and prevent fare evasion to prevent this shortfall.	Bus Service
Public transit is supposed to be accessible; physically and financially. By eliminating services, decreasing	
frequency of services, and increasing fares you are ensuring that a large population of DC will have	
limited access to public transit. Personally applicable to me is the bus routes that go through	
Georgetown. The lack of metro stop in Georgetown makes these bus routes crucial to connectivity to	
DC. As a college student who doesn't have a car, or large amounts of money, bus routes like the G2, D6,	
and D2 are one of the only ways I can get to a convenient metro stop in an affordable way. To	
eliminate these routes would have impacts on students and faculty alike who rely on these routes to get to Georgetown, or from Georgetown to the greater DMV area.	Operating Budget, Management and Spending
I use the D2, D6, and G2 several times every week for work so these changes would dramatically impact	
my commute making it much harder. The fare machine often does not work meaning that there is	
probably inaccurate measures of how many people actually use these routes (the buses are typically	
very full). If you fixed the fare machines you would actually be making money off these routes as most	
people try to pay but are unable to because of these tech problems.	Bus Service
Please DO NOT eliminate G2, D2, or D6. These are the only transportation option for many Georgetown	
graduate students who don?t live on campus or nearby a shuttle pick-up. I know many people who use	
these services daily and a cancellation of service would make it that much harder to get to campus and finish our degrees.	Rus Sarvica
By eliminating the G2 route and others that go through the Georgetown area, you are disenfranchising	Bus Service
people with limited access to the hospitals in the area, contributing to further health inequities in the	
DMV area.	Bus Service
The G2 / D2 are critical to my ability to get to work. Given that there are no trains that go to	
Georgetown, eliminating these routes would be a huge issue.	Bus Service
G2, D2, D6 lines, especially the G2 are very important routes to keep Georgetown and glover park	
connected to other transit options in the city. Georgetown students, staff, and faculty rely on the G2 as	
a part od their regular commutes. The 31,32,33 are important north south busses on Wisconsin and	
give more access to transit to residents of NW DC, and the S busses are often full, especially during commuting hours, so I do not generally support decreasing S2 service, especially with recent	
improvements to bus lanes. I?m a regular metro commuter and take the green line at least 6 trips every	
week and often grab a 90/96 bus to get to the metro station, fare increases and changes in transfer	
fees will impact me but I would rather pay slightly higher fares than lose service. Metro/metro bus are	
always the first option I check for getting around the city and a decrease in service could lead to a spiral	
where then people take the bus/metro less often which then could lead to continued decreases in	
ridership. How often and where metro runs has also impacted my housing choice for the last 8 years	
I?ve lived in DC. Currently, I work full time at an office in L?enfant plaza and also teach at Georgetown	Due Camina
in the evening having multiple options to get between those locations facilitates this for me.	Bus Service
G2 D2 and D6 are critical lifelines for connecting the Georgetown community. Do not reduce or disrupt these lines. WMATA needs MORE funding and expanded service not budget cuts. What the heck	
happened to the free fare bill that passed DC council? DC stands apart from its peer cities across the	
Interpreter to the neer one on the passed be council be stands apart from its peer cities across the	
USA precisely because of its walkability and robust public transit. WMATA plays a huge role in

Dear WMATA Board and Stakeholders, I am writing to express my strong opposition to the proposed	
service cuts to the WMATA Metrobus routes, particularly the reduction of the G2 bus line. Public transit	
in Washington D.C. is not just a convenience; it is a lifeline for many of its residents, especially those	
who depend on it for their daily commute to work, school, and essential services. The decision to cut	
services such as the G2 bus will disproportionately affect service workers, as well as faculty and staff of	
Georgetown University, making it extremely difficult for them to reach their workplaces in an area	
already challenged by limited public transit options. Public transit is a public good. It is essential for the	
economic, social, and environmental well-being of our city. Cutting services undermines our collective	
effort to decrease reliance on cars, reduce traffic congestion, and minimize environmental pollution. A	
well-funded, accessible, and efficient public transit system is critical to achieving these goals. Moreover,	
investing in public transit supports those in our community who need it most, promoting equity and	
inclusion in our city's growth and development. Reducing the accessibility of public transit, such as the	
G2 bus, sends a message that we are stepping back from our commitment to a sustainable and	
equitable future. It forces our workforce, particularly those in essential services and education sectors,	
into difficult positions, potentially affecting their employment and our community's access to essential	
services. I urge the WMATA to reconsider these proposed service cuts. Instead, I advocate for	
responsible funding and strategic planning that ensures our public transit system is not just maintained	
but improved. Let's work together to make public transit in Washington D.C. more accessible, reliable,	
and efficient for everyone. By doing so, we invest in our community's future, support our workforce,	
and take a significant step towards a more sustainable and equitable urban environment. Thank you	Rus Conico
for considering this appeal to keep our city moving forward together. Sincerely, Nick Scrimenti	Bus Service
No service cuts or fare increases should be implemented, however if they are necessary, I would rather	Due Carrier
service cuts. I think the Metro should be better subsidised by the government	Bus Service
The G2 is essential to my travel and to students at Howard and Georgetown. I use this route almost 5-6 times a week, often twice a day. I would use public transportation far less frequently if G2 service were	
cut. It would be a great disservice to the Metro's budget to eliminate this route since hundreds of	
students use it daily. My sense is that students would switch to bikes, scooters and even low-budget	
ride shares over taking a new route.	Operating Budget, Management and Spending
The elimination of the G2, D2, and D6 would essentially cripple Georgetown University access to the	operating addpet, management and operating
broader WMATA system. These routes, especially G2, provide convenient and accessible travel to key	
locations in the system such as DuPont Circle(and in turn the Red line and broader metro system),	
Embassy Row, and downtown. The lack of a nearby metro rail station is enough of a headache for	
students please don?t completely leave us stranded.	Bus Service
I use the L2 bus to get to and from work (Cleveland Park and Dupont Circle). To stop it at the Duke	
Ellington bridge makes the line entirely useless to me, especially with reduced service of 42,43 bus	
lines. The L2 is so convenient, I pick it up right outside my house and I ride it almost to its last stop. It's	
so important and losing this bus line would make my commute completely inefficient. The Z6 is the	
only bus I can take to reach a relative's home and it already has atrocious service (20 minutes between	
buses and sometimes it doesn't show up). If anything it needs service improvements. I have really	
appreciated the red line frequency improvements and I really hope those continue. For the other lines,	
20 minutes between trains is too long and I would love to see more frequency. I am okay with fare	
increases but I think it's best to have no transfer fees between bus and rail in a single trip. Thanks.	Bus Service
As a Georgetown student, the lack of a metro station in the Georgetown neighborhood isolates	
students like myself from the rest of D.C. For many of us, the G2, 33, and 31 is what we use to travel to	
work or just to visit downtown and the city center. As it is, the G2, 33, and 31 buses are often packed	
and do not come as frequently as they should. Removing these options would be a huge inconvenience	
for students in an area that is already vastly unaccessible. This would also only exacerbate economic	
inequities as not everyone can afford to travel by car or rideshare.	Bus Service
Do not eliminate the G2 Metrobus route, or the D2 or D6	Bus Service
public transit is good but fare increases are regressive	Fares/Fees/Parking
The G2 is essential to many Georgetown students, staff, and faculty please don't eliminate our route.	Bus Service
Public transportation is not supposed to be profitable. Thousands of people rely on even the least used	
bus routes and metro stations to go to work and sustain their lives. Please consider the effect of the	
proposed changes on the residents of DC and Maryland.	Bus Service
Please keep the Georgetown University community connected. This will isolate us from the city even	
further.	Bus Service
These changes are a step In the wrong direction decreasing services will actively decrease the need for	
metro and increase the feeling of unsafe.	
	Fare Evasion/Safety/Crime
I have heart problem. If there are no buses out front of georgetown university front gate I cannot walk

I am a Georgetown University graduate student who is living in Columbia heights. Considering that my university has no metro station, no on-campus graduate housing for grad students and there is no shuttle service to columbia heights, I find the removal of G2 line as a student-hostile policy. I use this line 5 days a week. Since there is no alternative bus route proposed for Georgetown University students who live around the proximity of G2 line, I strongly disagree on this change. The G2, D2, D6, 31 and 33 routes are extremely important for accessibility in the Georgetown neighborhood. Many community members depend on these routes to travel into the greater DC area. Eliminating the routes would eliminate a large customer base. The WMATA public transportation network is an absolute joke in comparison to that of any mid-sized European or East Asian city, don?t make even it worse! Please keep the G2 Metrobus with service to Georgetown University's main gate. There is no metro that connects the University to DC, and it would be a terrible hardship for faculty, staff and students if the G2 bus is eliminated. Thank you for your consideration. Please don?t shorten the 32/36 bus line service. I use it to access the 31/33 line and the proposed cuts would make this commute impossible! eliminating the G2, D2 and D6 bus routes would disproportionately impact low-wage earners that work to keep Georgetown University running behind the scenes (facilities, dining, transportation, etc). There is no metro accessibility, very limited parking, and thousands of workers rely on these public transit options to make it possible to wo	Bus Service
down to Wisconsin Ave. without some health issues. The G2, 31, 33, D2, and D6 are vital metrobus lines for connecting the Georgetown community with the rest of DC without having to pay for expensive ubers. Students rely on these bus lines to get to their workplace and internships. Please do not cut the G2 routing to Georgetown University. This will impact my ability to get to work. Comment	Category
Metro is one of Washington DC's most valuable assets, and while I understand the difficulties of budge	t
shortfalls and fare avoidance, increasing fares / decreasing service is a poor choice. Millions of people	
rely upon the districts busses and metro services. Other transportation options (like automobiles)	
should have the absolute lowest priority in terms of funding for the sake of Metro's continued success.	
D2, D6 & G2 are essential to accessing the Georgetown neighborhood. Many including myself ride ther	
every day.	Bus Service
Eliminating the G2 would completely cut off any form of public transportation to Georgetown	Rue Service
University and to employees who rely on Metro to get to work. Please do not do this.	Bus Service
Please do not eliminate the G2 metrobus. Georgetown is already so inaccessible, that would be a huge	Due Comies
loss. I do not have a car and relocated recently to be closer to many of the bus lines currently under	Bus Service
consideration for termination. These changes would be disastrous for me and many others who believe	
in and use public transportation. I am particularly upset to hear that you are considering getting rid of	
the G2 given Georgetown?s extant lack of any other public transport options. I work at GU and this line	
makes my life much easier and connects the students to the larger city.	Bus Service
For working families without personal vehicles, the affordability of the metro system as well as its	
frequent service are essential. Limiting service to lesser used routes is heavily preferred over increasing	
fares which are already expensive for families crossing the metro area.	Bus Service
I am specifically concerned about elimination of the D6 route. Please do not make budget cuts that	
compromise the long-term sustainability of the metrobus and metrorail systems. Ensure that	
preventative maintenance occurs, even if it means fare increases. Focus fare increases on rail service	
instead of bus service.	Operating Budget, Management and Spending
metrobus line are essential for workers	Bus Service
Current proposals severely limit Georgetown University's metrobus access which is severely needed,	
particularly on the backside of campus where the hospital and D6 route is. Eliminating this route will	
leave no viable alternatives for these individuals.	Bus Service
Cutting service for G2, D2, and D6 would further the inaccessibility of Georgetown, especially to its low	
income students who rely on these routes for transportation services. Additionally, they are vital for	
community use for daily necessities, from commuting to work to utility for errands in the face of rising	
rideshare prices.	Bus Service
Elimination of the G2 route would completely cut off Georgetown students from accessing public	
transportation. With no metro stop and the closest bus stops being a 15 minute walk away, many	
students would be forced to not use public transportation and instead opt for Uber. Furthermore,	
elimination of the route will make it incredibly difficult for workers to make it to campus. Many GU	
workers take the G2 from the DuPont metro stop to campus.	Bus Service
The G2 serves a unique route that is important for many visitors to the Georgetown neighborhood. I	
am a regular user and notice that it is often well used in the morning and evening rushes. Elimination of	f
this route would make my significant commute more complicated.	Bus Service
By eliminating the G2, D2, and D6 metrobus lines you are creating absolute inaccessibility to the	
Georgetown neighborhood and Georgetown University. As a disabled member of the D.C community	
that relies on these bus routes to get to school and around the city, My, and others like me, lives' woul	
be severely hindered. By eliminating these routes, you effectively are eliminating the ability of all	
persons with or without disabilities to access the university and city we all live in and attend.	Bus Service
DO NOT GET RID OF G2 BUS ROUTE ONLY ACCESS FOR GEORGETOWN STUDENTS!	Bus Service
I think that it makes sense to make service cuts in places where there are other public transportation	
options available, such as places where the Metro (rail) can serve the same purpose. However, I think in	
is unfair to cut bus service to places where there are no other public transportation options. These	
proposed changes would cut off nearly every bus service available to me in my home in Glover Park,	
and I would have no way to get to other parts of the city via public transit because there is no Metro	
stop in the Glover Park nor Georgetown area.	Bus Service
There aren't many buses going through the Georgetown neighborhood. The G2, D2, D6, 31, and 33 are	
essential. These routes are essential especially since there is no metro station in Georgetown.	
Eliminating these routes will make it more difficult to get into and out of the Georgetown	
neighborhood. I take the G2 to and from work. The bus is always full to the brim during rush hour.	
Eliminating this will affect so many people's ability to move around the city. Do not eliminate the	Bus Service
Georgetown University Staff use the G2 bus line to get work every day. Fare evasion is rampant on this	
route. Elimination of the line may create hardship getting to work, including for myself. I propose you	
eliminate the line on the weekend only if you need to reduce cost.	Bus Service
I use MetroBus to travel between Georgetown University and Dupont Circle Metro Station. The	
elimination of the G2 Route would be very disappointing and frustrating.	Bus Service
G2 bus is crucial connection to georgetown	Bus Service
Cutting service and increasing price will further drive metro into the ground. I ADORE WMATA and the	
wide accessibility of services. They are an essential public good that people rely on heavily. We need to	
encourage wider use.	MetroAccess
Please don?t remove the G2!! It?s essential for georgetown students who don?t have a metro stop	
nearby.	Bus Service
Georgetown University is one of the largest employers in DC. It's already incredibly isolated from the	
rest of the District, making it a very challenging place for employees to commute and encouraging	
students to engage with the community around them. Eliminating the G2 would further isolate and	
make the University less accessible.	Bus Service
Just don?t rise out Georgetown university stops - if anything increasing them to foggy bottom and	
DuPont circle would be great.	Bus Service
I am a Georgetown grad student who works part time in Capitol Hill neighborhood. I rely heavily on the	
D2/D6 line to take me to DuPont metro stop so I can get to work. I also use the G2 to get to campus	
regularly. The proposed route cuts would negatively impact my daily commute to work and school. I	
literally would not be able to make my schedule work without these bus schedules. In fact Georgetown	
would be completely cut off from all public transit were these bus lines to be cut. So many graduate	Due Contine
students rely on these lines. Please do not cut them.	Bus Service
These changes will seriously impact my ability to get to work and school. Please, please reconsider	Due Carrier
removing these routes - it will absolutely impact my quality of life.	Bus Service
I am very sad to see the proposed service cuts, as public transport is much more environmentally	
friendly and making it more inconvenient only pushes more cars to come into the city. I am	Dur Conice
friendly and making it more inconvenient only pushes more cars to come into the city. I am disappointed by this gutting of the public transit and want the current services to still be provided.	Bus Service

Comment	Category
G2 is a critical bus route to Georgetown University, which is the second largest private employer in the	
city of DC. Cutting this important bus route to an area of DC that has no metro access would be a huge	
mistake and negatively affect thousands of Georgetown University employers, as well as third-party	
vendors and visitors to the area.	Bus Service
Eliminating the D6 and D2 routes to Georgetown Medical Center will cause many students to be limited	Pur Convico
on how they get to the medical campus from downtown or dupont circle quicker.	Bus Service
I think Metro should focus on curbing fare evasion. I feel like fare hikes, in a way, would mean that the people who pay the fare subsidize those who don't. Related to decreasing frequency of services - I have	
found that the next bus information displayed at bus stops is highly inaccurate. 'Arriving now' doesn't	
usually mean that. Oftentimes I would see the arrival time move from, say, 2 minutes, to 7 minutes and	
then back down to 3 minutes. Decreasing bus frequency would not help with the situation. If I miss a	
bus because the ETA info is wrong, it will then be a miserable 30 minutes of waiting for another bus.	Bus Service
Appealing to please not cut the G2. There are few options to gain access to Georgetown and	
Georgetown University. The G2 is vital to many Georgetown University employees with personal	
transportation and insufficient means to pay the exhorbanant parking fees. More cars crossing Key	
Bridge, going up/down Mass Ave and Wisc Ave will add to the chokehold traffic already experiences	
during rush hour. The University has thousands of employees who work non-traditional hours, and	
students from all over the DMV who need rely on the G2 to make a living and complete their studies.	
The wealth of that specific community doesn't mean the low-wage employee does not rely on the G2	
service for daily survival to care for their family. Thank you.	Fares/Fees/Parking
Please do not eliminate the G2. Metro service to Georgetown is already slim, and the G2 is the primary	
way I get to the neighborhood. Otherwise, my only option is Uber.	Bus Service
It?s completely irresponsible to cut the Georgetown, Glover Park and Foxhall lines, considering	
students live in these areas without cars!	Bus Service
You all need to install all of the new fare gates and step up enforcement before raising fares!! I am so	
tired of paying my fare and watching hundreds of people skip the fare gates. Yes, I know you say this is	
less than 2% of the shortfall, but Metro has greatly frustrated your riders by being so slow to do anything about it. I've only ever seen one Metro cop at faregates in all of my travels on Metro, and so I	
don't buy that you all are doing everything that you can, plus the rollout of the new fare gates are	
going so slow, they really shouldn't be taking this long. From an optics standpoint, no fare hikes until	
you actually get people to start paying their own way.	Fares/Fees/Parking
The G2 is my sole transportation to work	Bus Service
The G2's service is essential, connecting students and workers at Georgetown University with other	
Metrobus and Metro routes. Without it, access to the rest of DC becomes really difficult, especially	
since there is no Metro station near Georgetown. Please do not eliminate the G2!	Bus Service
The georgetown university community values having busses near us and uses them all the time!	Bus Service
Please please don't get rid of the G2 bus route. Additionally, please don't cut get rid of the D2 or D6 bus	
lines either. I use the G2 line at least once a week. The Georgetown community is already so	
inaccessible and cut off from the rest of the city, and getting rid of this route would completely cut us	
off. There are no other options for public transportation from Georgetown other than this one bus	
route. Without it, I would have to walk longer than 40 minutes to the nearest Metro station. I use the	
G2 for commuting, shopping, and any time I have to go anywhere in Washington, DC. I can't afford	
rideshares or a car, so if I didn't have this bus route, I would be completely trapped in the Georgetown	
I need more access to Georgetown, and connect it to the capitol area!	Bus Service
Please don't eliminate the Georgetown University stop	Bus Service

Better enforcement of current fair would heave much better results than increasing it to the 10% who pay I can?t count the number of times I see people not pay and bus drivers not doing anything about it. Increasing fares does nothing with all the fare evasion. Get real.	Rail Service Bus Service Bus Service Miscellaneous
Reducing service will push people to not use metro rail which will translate in bigger deficits \$\$. Closing the stations with extreme low riders might be the solution. Regarding the silver line which connects to Dulles airport cutting service on this line will be catastrophic Eliminating the D2 D6 and G2 routes will pretty much eliminate bus service to Georgetown, which I would not prefer. I live in AU park, near the Maryland border. The N4 bus is my only remaining route to and from downtown. Eliminating the weekend service would force me and my family to drive or use taxi/rideshares to get downtown on the weekend, which would be inconvenient, expensive, and bad for the environment. Contractors who don't work or have oversight is an issue. There is no point in increasing bus fair when almost no one pays for the services. Better enforcement of current fair would have much better results than increasing it to the 10% who pay I can?t count the number of times I see people not pay and bus drivers not doing anything about it. Comment	Category
Given the lack of MetroRail access to and lack of parking available at Georgetown University, it was be	
foolish to cut both G2 and D6 buses. This measure would create significant transportation issues for a	
number of students, faculty, and staff, particularly those who cannot afford to live closer. I say this for	
all those who rode the G2 and D6 buses with me these past few months. This morning, I rode the D6	
bus, and it was filled to the brim with passengers students, families, office workers just trying to reach their destination with less hassle and stress. Would you be willing to strand these groups? A weel	
ago, I rode the G2 bus and stood side-by-side the fellow riders, crammed into the space yet treating	
each other with the same empathy and kindness you would treat family. Again, they were students,	
families, and office workers. You are not simply impacting a commute; you are impacting the ability of	
an individual to make it home on-time to see their kids; you are impacting the long-commute workers	
who already have to wake up two and a half hours before work to get there in time; you are impacting	
the students that rely on public transportation to get to class, to receive an education; and, finally, you	
are impacting every disabled person who perhaps cannot walk to the next closest bus stop or can't	
afford an Uber. I implore you to consider the humans impacted by this decision, not the measly funds	
you may earn back. I know it is important to maintain funds, but this truly cannot be your only feasible	
solution. It simply goes against the entire purpose of the Metro, its entire mission. Thus, I encourage	
you to think wisely about this decision and consider the interests of your constituency.	Bus Service
This problem of a budget cut should not even be an issue, we are one of the only 'developed' nations	
that continuously has public service infrastructure funding cuts and inaccessibility. But, unfortunately,	
this is our situation, so to address the issue head on, do not take away any lines, but make do with the	
budget provided and increase fare prices.	Operating Budget, Management and Spending
I hope Metro will reconsider as this will affect many people's commutes.	Bus Service
Please keep G2 bus route	Bus Service
Public transportation will never be profitable and for God?s sake it doesn?t need to be. Allowing people	
to get to and from work easily and cheaply is good for the economy and good for society. Allowing	
people to easily visit their friends and family and explore their own town is a moral good. You should	Sandea Lavele
not decrease service, you should not raise prices, you should make public transit free for everyone. Cutting services from entire days, metro bus lines, and late hours will inevitably impact the people of	Service Levels
the DMV who need and rely on these services the most. While there may be minor adjustments that	
would allow for cost-saving, the burden of the WMATA budget cannot fall upon the working class	
families of the DMV. Political will must demand that the metro services are adequately funded, even at	
a net fiscal loss, because the purpose of public transportation is not profit, but public benefit.	Operating Budget, Management and Spending
The G2 is the only Metrobus that connects Georgetown with the DC larger area. As a Georgetown	
employee, I will not be able to efficiently get to campus using public transportation.	Bus Service
I mainly care about the G2 route because it is the most accessible way for Georgetown students to get	
out of the Georgetown neighborhood	Bus Service
G2 is literally Georgetown's only Metrobus stop so it would be devastating if it was eliminated since	
there already isn't a metro train station there. It's really convenient for Georgetown residents and	
students because it stops right in front of campus gates and runs more frequently and consistently than	
our campus buses which have very limited availability.	Bus Service
Eliminating the G2 route would take away one of the very few points of access through public	
transportation to Georgetown and would make the area increasingly difficult to access.	Bus Service
Please do not cut the 42/43! I use that route 99% of the time!!	Bus Service
PLEASE DO NOT GET RID OF THE D2 AND D6, AND PLEASE DON'T CHANGE THE ROUTE OF THE 33. AS	Due Camina
SOMEONE WHO LIVES IN GEORGETOWN, THESE ROUTES ARE MY LIFELINES. Please retain at least one bus route that goes to the Georgetown University campus	Bus Service Bus Service

I live in Laurel Maryland and it will hurt me that you (Metro) took away the 89M and 27 line from that area. I take the 89M from Greenbelt Station to the end of the line of the South Laurel Park Ridle Lot. 1 move here recently and I found out the it was a bus service around the corner from my Senior Complex If you can cut back the hours on the weekday knowing it doesn't run on the weekend. Example from Greenbelt Station 5:45 am till 10:15 pm can the bus run from 6:30 am to 6:30 pm on Monday thru Friday. From the South Laurel Park &Ride Lot can it run from 6:05 am till 6:05 pm that on weekday also. Please if you cut the bus to Greenbelt and from the South Laurel Park & Ride Lot awe senior on live close to the area we will be able to go to the do our shopping and medical appointments as well and to get on the Greenbelt line for a day out with friend and family. Please take in account what I am saying to you. Thank you. Please don't cut G2. Please don to eliminate the existing direct G2 Metrobus route to the Georgetown's front gates at 3700 O St. NW. Working graduate students need this bus stop. I think the proposal makes some sense given that you all are not being properly funded. Hopefully legislators get on yall to get funded. That being said I think one ought to consider two things. One, yall inefficient as hell with your money. Just general wasting of funding provided. Do better. Two, I think that metro ought to consider what its duties are. If it's more of a porvimental Tole, implying access to all to the service, then perhaps you need to lobby harder for funding or raise fares. If it's more of a private business, then cutting lines is probably better. That being said I don't think cutting a station is not that high presumably. Like, I don't think that's where your savings are, unless there's some gross mismanagement of funds going on. I don't think cutting routes is necessarily a bad idea, but I do think reducing service and increasing fares is. Honestly our fare is pretty expensive too. However I will note	Bus Service Bus Service Bus Service Bus Service Bus Service Fare Evasion/Safety/Crime

Example from Greenbelt Station 5:45 am till 10:15 pm can the bus run from 6:30 am to 6:30 pm on Monday thru Friday. From the South Laurel Park & Ride Lot can it run from 6:05 am till 6:05 pm that on weekday also. Please if you cut the bus to Greenbelt and from the South Laurel Park & Ride Lot we Senior on live close to the area we will be able to go to the do our shopping and medical appointments as well and to get on the Greenbelt line for a day out with friend and family. Please take in account what I am saying to you. Thank you. Please don't cut G2. Please don't cut G2. Please do not eliminate the existing direct G2 Metrobus route to the Georgetown's front gates at 3700 O St. NW. Working graduate students need this bus stop. I think the proposal makes some sense given that you all are not being properly funded. Hopefully legislators get on yall to get funded. That being said I think one ought to consider two things. One, yall inefficient as hell with your money. Just general wasting of funding provided. Do better. Two, I think that metro ought to consider what its duties are. If it's more of a governmental role, implying access to all to the service, then perhaps you need to lobby harder for funding or raise fares. If it's more of a private business, then cutting lines is probably better. That being said I don't think cutting stations is a great idea. It would definitely look bad and also I think the marginal cost of running a station is not that high presumably. Like, I don't think that's where your savings are, unless there's some gross mismanagement of funds going on. I don't think tutting routes is necessarily a bad id	Bus Service
I live in Laurel Maryland and it will hurt me that you (Metro) took away the 89M and 27 line from that area. I take the 89M from Greenbelt Station to the end of the line of the South Laurel Park Ridle Lot. I move here recently and I found out the it was a bus service around the corner from my Senior Complex If you can cut back the hours on the weekday knowing it doesn't run on the weekend. Example from Greenbelt Station 5:45 am till 10:15 pm can the bus run from 6:30 am to 6:30 pm on Monday thru Friday. From the South Laurel Park & Ride Lot can it run from 6:05 am till 6:05 pm that on weekday also. I think it is vital for metro rail to find the money to maintain the current level of service at a minimum.	
Having a well maintained, reliable metro service is a critical part of what makes Washington DC an	
appealing Metro area to attract people and business.	Bus Service
The proposals to eliminate the G2, D2, and D6 would eliminate virtually all public transit access from	
Georgetown University?s campus. As a Georgetown undergraduate student, I recognize that the	
student body represents a great deal of socioeconomic privilege, but I urge you to consider low-income students and working graduate students living in lower-cost areas of D.C who would be cut-off from	
campus by this change. Georgetown?s shuttles run very infrequently (often > 1hr) and are limited to	
those with university affiliation. The D2 is the only bus route servicing Glover Park, a neighborhood	
where many students seeking lower-cost housing live that can be upwards of a 45 minute walk from	
parts of campus. The D6 is the ONLY route connecting both Sibley Hospital and Georgetown Hospital to	
downtown DC?s public transportation network, which would not only disservice thousands of	
healthcare workers but also patients and families. I understand resources are limited, but eliminating	
essential routes to schools and hospitals is a mistake.	Bus Service
G2 bus is absolutely essential for Georgetown employees.	Bus Service
The D6 should absolutely not be eliminated. This line is used heavily by residents of Capitol Hill to get	
to work and school. Metro is not a viable option. Please consider service reductions over completely	
eliminating this line.	Bus Service
The changes proposed to the different services through cuts are extremely drastic and would render	
the public transit system almost useless for most of the trips I make. A lot of areas I often visit would be	
without any service or such limited service that I would not be able to travel to them without resorting	
to other transportation means. Furthermore, the area where I live would essentially loose almost all	
access to any form of public transit, and it would isolate me and other residents, and prevent them	
from making the trips necessary to work, live, visit friends and all other aspects of life. If these changes	
were to be implemented, I would probably have to move out of my current place, and most likely to	
another city, in another state given the proposed cuts to public transit. This would also increase the car	
traffic, that is already very mad in DC, and lead to more noise, more pollution, traffic jams and street	
safety issue. I would also like to point out that cutting service to lightly used lines (whether metro or	
bus) is not a wise idea. If these are low ridership stations and lines, they provide essential services for	
the people who depend on them and are important for the well being of the neighborhoods and communities that are served by them. The impact of a public transit service is bigger than only the	
people that are using it, it impacts everyone by decreasing car dependency, making streets safer and	
cleaner, and by contributing to the connection of those areas to others in the DMV area. I understand	
that drastic budget cuts need to be made due to funding issues but the changes proposed would	
essentially sign the death of WMATA public transit system, since a lot of users won't be able to use it or	
depend on it anymore, and choose other means of transportation or move out. This, in turn, would	
lead to a spiral of death where service cuts and price increase would lead to decrease ridership that	
would lead to more cuts and fare increases.	Operating Budget, Management and Spending
Please don?t cut off Georgetown from the rest of the city	Bus Service
Please do not remove the G2 route! As a Georgetown student, it is very very useful to get into and	
around DC, particularly to transfer to the Dupont circle metro.	Bus Service
The G2, D2, and D6 are all routes I take because there are no other bus services or metro stations	
nearby that are convenient (i.e. removing these routes would make it incredibly difficult to travel.	Bus Service
Dedicated funding is necessary to avert this continual crisis of cuts which are borne by the most	
disadvantaged residents in the region.	Capital Budget
Please don?t eliminate the G2 route as a Georgetown student, considering we already don?t have a	
subway it is my only means of getting off campus	Bus Service
The G2 is a critical metrobus route connecting Shaw and Logan Circle neighborhoods to Georgetown	
University. Should you eliminate the G2 route, there is not a single next best solution for connecting	
these neighborhoods to Georgetown or anywhere west of Dupont circle. This is a critical access issue,	
and I cannot understand why WMATA is considering eliminating the G2 without providing any	
alternative service for this route. Please save the G2.	Bus Service

around DC since I have no car and rely on public transport I am college student that lives in the Georgetown area and attends Georgetown University with only night classes. I work in the middle DC and rely heavily on 33, DG, G2, and D2 to get in & out of the Georgetown area. If I don't have access to those lines then I will not be able to go to work or school, especially since I do not own a car and there is no metro service in the area. I am a 'low vision' individual and am ineligible for a drivers license. I rely on metro to get around town, especially to my workplace in Georgetown. Eliminating G2 would create a great extra burden and cost me extra money to take Ubers and taxis to my workplace. And as a general rule, there should be MORE public transit in DC, not less. I favor a moderate fare increase to help make that happen. Please don't get rid of G2 or D2 bus lines - some university students without access to cars rely on this service to get around States of Virginia and Maryland needs to step up and help with the budget shortfall. There is no alternative route to Georgetown U. The bus is the only option because there is no subway Virginia and Maryland have got to chip in more. At the same time, some of DC?s most important workers live in those states and rely on metro rail/bus service to get to DC to work. If fares go up, it can't fall on that population. These proposals are absolutely draconian, seem over punitive on the District, and would crater ridership. I am shocked by them. I hope Maryland and Virginia can step up to do their part so we can keep this essential service running smoothly! Good, frequent, reliable transit is one of DC's best attributes Fare increases are just going to lead to more people hopping the turnstiles. I understand there are budget issues, but we are tax payers in this city, it shouldn?t be taken out on us. Please do not get rid of the G2 Metrobus stop at the gates of Georgetown University. Horrible. Commont	Catagory
Comment Don?t eliminate the busses 33,31,D2 and G2	Category Bus Service
Please don?t remove the D6 route, I use it to get to campus every day. It cuts a forty minute walk into	DR3 2614106
about a ten minute commute.	Bus Service
I wouldn't mind if the G2 maybe ran less often, but eliminating it completely would really cut off	
Georgetown students from the rest of the city considering that we don't have a Metro Station.	Rail Service
Hi There I am a senior who has recently moved to Laurel South side area. The 89M and the Z7 is the bus	
that run around the corner Senior Complex I move too. Please hear me out I am always take the 89M	
to and from Greenbelt that I move into the area because the service. The bus do not run on the	
weekend at all I understand but their are some folk (seniors) who does taking on the weekday. If you	
just cut back the hours the be helpful for us. Use the 89M to our appointment, shopping, or out for a day on the town. Please if you cut that bus service we will have other way to get around. Thank you	
please from a seniors who use your service thank you for your time and patience.	Bus Service
Any route affecting service to an area with limited service already (ie Georgetown) should not be under	
consideration to be cut	Bus Service
Please do not get rid of G2; it is the only public transportation method for Georgetown affliated	
individuals (12,000+ students, faculty, workers) and also provides access to M street and other areas in	
the Georgetown area.	Bus Service
Service cuts are a bad idea. I can't speak for every one of the proposed cuts, but some of these buses	
don't show up on time and have long wait times as it is, and cutting service would only make that worse, not to mention that eliminating rush hour service or the number of buses will make the crowds	
unbearable. There is also no point in eliminating the D2, D6, AND G2. It is already a hassle to get in and	
out of Georgetown/Glover Park by Metro as it is, why you would eliminate all but one (the 33) of the	
bus routes that go there is beyond me. Lastly, regarding the price increasesI understand they are	
necessary, but they do nothing if people just ignore paying them, which is a big problem on the buses.	
A way to better enforce this if possible wouldn't be a bad idea	Bus Service
YOU CANNOT ELIMINATE THE G2. IT IS VITAL FOR PEOPLE TO GET TO WORK AND CONNECTION BY	
GEORGETOWN TO THE REST OF DC.	Bus Service
Please, do not cut service. If the only other option is to increase fares, then just do that.	Fares/Fees/Parking
The G2 route is the only way to get to the Georgetown neighborhood and Georgetown campus and is a fundamental way students, faculty, and staff get to the university. There is no metrorail service and so	
this bus route is absolutely necessary. Please don't cut this line.	Bus Service
I rely on g12 for work, as does my wife. Eliminating that would ruin a lot of people's work commutes	
and would put many of us in a bind, maybe even out of work. Please do not do that to us, I'm begging	Bus Service
Metrobus should not get rid of those proposed bus routes.	Bus Service
taxpayers should make up the difference in budget. public transit is a public service. it benefits not only	
the transit riders but also drivers (by reducing traffic), walkers, bikers, kids playing in the community	
and all community members. it benefits tourists and tourism for the DC area if it is convenient. it also	
works towards reducing emissions, driving fatalities, and should be affordable and convenient. there	On-orting Dudget Management and Counding
should also be fare programs for economically disadvantaged individuals and children under 18. please do not cut off certain communities from access to the bus lines! i rely on services like the G2	Operating Budget, Management and Spending
every day and i will not be able to get to where i need to without it	Bus Service
Please don?t eliminate the g2	Bus Service
Removing the G2 bus line will render public transit to Georgetown university unattainable. This would	
significantly impact my life as I work there and take public transit. It is shameful DC transit is	
considering removing access from our university. I condemn any effort to remove the G2 and wish	
malice on all those who support it.	Bus Service
I am horrified at the thought of not having the G2 service. It is vital to the the student community and others in Georgetown. The buses are habitually quite full (indeed just last week so full that the a	
morning bus didn't even stop at P and 17). The G2 bus is important for both transport and personal	
safety reasons - just look at the number of Police reports surrounding the Georgetown University	
campus area.	Bus Service
If you cut service to the G12 I will need to sell my house and buy a different one because I don?t drive	
and rely entirely on public transit. This would be enormously difficult to me. Having the G12 bus stop	
right outside my house was a primary reason I bought my house, I would never have bought here if the	
G12 didn?t exist.	Bus Service
As a student of Georgetown University, I would urge Metro to not eliminate the G2, D2, and D6	
Metrobus routes. These are the most accessible routes for members of the Georgetown University community?including students, faculty, and staff?to use to get to the rest of DC. Especially since there	
is no Metro stop close to the university, it is important that these bus routes, especially the G2, be	
preserved.	Bus Service
There are no rail alternatives to the D2 and D6 so this would be a major disruption to me. I use them to	
get to the Dupont Circle metro and there is no alternative.	Rail Service
I take the G2 DC Metrobus every Sunday, so I can go to church. I don?t feel comfortable taking an Uber	
nor do I want to pay a lot for the ride there. The metro stop is conveniently place just outside of	
Georgetown University (the campus I am from). Removing this stop would make it difficult for me to attend church on Sundays. Additionally, it would make it harder to commute around DC in general	
attend church on Sundays. Additionally, it would make it harder to commute around DC in general without that stop there.	Bus Service
I enjoy not having a car in the city and Metro makes that possible. But increasing the fare while	
decreasing service, especially as people have returned to the office and are using Metro more seem to	
work against our shared goal. I already deal with rush hour overcrowding more mornings and evenings	
than not. So if these changes were to be made, it seems things would get significantly worse and force	
people to find non-Metro alternatives.	Fares/Fees/Parking
I rely on metro heavily. I live in DC and do not own a car. Any service cuts to Metro, especially on the	
Red and Orange lines, would have a deleterious effect on my quality of life. It would make it much	
harder for me to get to work and to go around on the weekends. Metro is the lifeblood of DC and the	Pue Convien
surrounding suburbs, and needs to be fully funded!	Bus Service

Comment	Category
Cancelling the D2 will limit many people who live in Glover Park to commute to Dupont directly for	
work and access the metro. There are two reasons why D2 should not be removed. 1. By removing it	
WMATA assumes everyone has a car (many of us who live in Glover Park and Georgetown ARE NOT	
HOME OWNERS WITH A CAR!) or people are able to walk all the way around observatory circle to N6(or	
new replacing route). Adding a longer walk distance to people's commute is not helping with improving transportation. 2. From a gender perspective removing D2 will create a negative impact on women and	
young kids. The walk around observatory circle to make it to N6 for Dupont is very dark and unsafe for	
women who would need to commute at night and especially in winter where sunset is 4:30, so would	
really not want to face assault or get mugged given that DC IS NOT THAT SAFE! Same goes for the D6,	
are you expecting students to all have cars to commute across town especially highschoolers who live	
in NE/SE and need D6/D2 to Dupont for metro (the elimination of these routes could easily become a	
class and racial discrimination issue.) Finally, on the guestions whether we consumers would prefer a	
fare increase or cancellation of routes I find that to be an offensive question as it takes the	
responsibility from WMATA to provide accessible transportation to each neighborhood to consumers	
responsibility. I as a TAX PAYING DC resident wonder where that transportation funds are going? At this	
rate if routes to be cancelled it should be our right to demand tax refunds from DC as it obviously not	
going where they are meant to go (Public Services) and is going to private pockets. o I urge WMATA to	
think about how removing D2 will impact non-car holders and run a gender analysis on how	
transportation decisions can improve or worsen women's safety. I highly suggest that someone at	
WMATA if not already read the book (Invisible Women: Data Bias in a World Designed for Men by	
Caroline Criado Perez). The book looks at several studies that show how projects that are deigned to be	
gender neutral end up being not gender neutral due to biased data.	Bus Service
Please don?t cut routes or shorten service. You?re making transportation even more inaccessible. I go	
to Georgetown University and I rely on G2 and other nearby bus stops to travel to and from there.	
Georgetown is already an inaccessible area with limited access to the metro. Getting rid of the G2	
would make it even more inaccessible! A lot of people rely on that route, and I feel like proposing the entire route to be cut is not fair to DC residents. I understand the budget shortfall but this is not the	
way. Please try your best to find another alternative to the problem. Don?t mess with the routes!	Operating Budget, Management and Spending
This will impact low-income students at Georgetown University. Without an accessible Metrobus route,	Persona source management and spending
many would be deprived of an education and opportunities.	Bus Service
Please don?t eliminate or shorten bus routes that go through Georgetown and Glover Park! We don?t	
have a metro station, so this would significantly reduce our access to public transportation. I would	
likely leave DC if the D2 and D6 are eliminated and the route of the 33 (a VERY popular route) is	
shortened. Furthermore, many people rely on the D6 to access the hospital. As a medical student, I	
know this poses a huge risk to heath, and I strongly urge Metro to reconsider these changes.	Bus Service
Eliminating the D2 bus will completely cut off much of the Glover Park neighborhood from public	Bus Service
I don't want the G2 bus route to go away.	Bus Service
This completely eliminates ANY public transportations to the west end of Ward 3, including two	
hospitals and several schools. How will workers get to work? How witll kids get to school? DC ihas	
opened a new HS and is considering a new middle school on the D6 route. The traffic increase without	
buses will be untenable!	Bus Service
Too many passengers don't pay fare, too many of them on buses. Get federal dollars, too much tax	
Federal money go to Ukraine.	Bus Service
My commute too and from work in Georgetown university is using the only Metrobus available that	
takes me to work, the G2. If the G2 is eliminated, it will severely impact my daily commute to and from work. Dont eliminate it.	Rus Service
I wish that the government funded the metro better via higher taxes on the richest members of our	Bus Service
societyl; however, I would be happier with increasing the fair then cutting service. A lot of people use	
those services to get to work.	Rail Service
The decision to cut the G2 line is going to have a huge effect on the access that Georgetown University	
students have to the broader DC area. It is a vital transportation service for many students.	Bus Service
You cannot possibile think of eliminating buses like D2, D6 and G2 that serve crucial institutions like	
Georgetown University Hospital, Sibley Hospital and Georgetown University. How can you cut off	
hospitals and a university from people of all ages and backgrounds who need to get there with public	
transportation for a variety of reasons (work, health issues, etc)? I urge you to keep those lines as they	
are now.	Bus Service
You're insane to consider cutting these bus lanes, especially to Georgetown	Bus Service
Eliminating the D6, D2, and G2 metrobus lines will severely impact access between the Dupont Circle	
Red Line and Georgetown University, Georgetown University Hospital, Sibley Memorial Hospital, and	
numerous high schools in the area. Notably, eliminating the D6 line would severely impact access to	
Sibley Hospital and Georgetown University Hospital by patients and hospital staff. During peak	
commuting times, the D6 is often full and frequently runs late due to high volume, which seems to	
provide clear evidence of heavy use on this line. Throughout the later weekday afternoons, the D2 and D6 huses are filled hereing capacity with students from Duke Ellipston School of the Arts as well as	
D6 buses are filled beyond capacity with students from Duke Ellington School of the Arts, as well as patients and employees traveling between Sibley and Georgetown locations and Dupont Circle. When	
considering ridership demand, I strongly urge WMATA to consider the service it provides to D.C.'s high	
school students, many of whom take public transportation but may be exempted from fare-collection	
and thus may not be tallied in ridership totals.	Bus Service
To eliminate the D2, D6, and G2 lines is completely asinine. Not only do 1000s of folks in Georgetown,	
Glover Park, Friendship heights rely on these to commute to work every day, but 1000s of students at	
Georgetown and at DC public schools rely on these routes to get to school safely each day. The answer	
to Metro's failings to balance their budget should in no way be to limit access to metrobus services,	
particularly to areas of this city do not have access to the Metrorail. We need these routes!	Operating Budget, Management and Spending
First of all I don't think that a budget shortfall is a problem for a publicly provided transportation. I	
think we should be allocating funds from the people through taxation or another form of collection	
rather than independently marking up the cost of public transportation or limiting service, so the last	
question rubs me the wrong way.	Operating Budget, Management and Spending
My husband and I are Foxhall Village residents and eliminating the D6 line would kill our current	
childcare situation. Our nanny lives in the Dupont Circle neighborhood and does not drive. The D6 is	
her, and our, lifeline for that reason. It is the only bus line that reaches our community and I use it all	
the time to get downtown, as a convenient, inexpensive and environmentally-friendly alternative to	Pue Convico
driving our car.	Bus Service
For Georgetown students, G2 is very important to us. Fare raises are better than cutting service Please don't cut back on Metro Access. it is truly difficult enough for us disabled people to get around	Fares/Fees/Parking
Please don't cut back on Metro Access. It is truly difficult enough for us disabled people to get around even with the paratransit services. If these are cut we will have no hope of being able to get around the	
DMV. Signed an 11 year Metro Access client.	MetroAccess
Georgetown already does not have its own metro rail station. Eliminating crucial bus routes for	
students who utilize them for class, work, and practice, is discriminating endean bus roles in the students who utilize them for class, work, and practice, is discriminating endean bus roles in the students who utilize them for class.	
from luxury. This makes it even harder for low-income students to provide for themselves. Shameful.	Bus Service
G2 is a MUST for Georgetown University students, teachers, and faculty!	Bus Service

Comment	Category
These cuts are so massive they seem totally unacceptable to me as a frequent user of the city's bus	
system. Buses are about accessibility and the city has an interest in keeping people out of cars and off	
the roads. I am totally fine with increasing fares, even selectively on the routes that are facing	
cancellation. Just keep those buses running, they are a lifeline. Enforce fare evasion on buses. I know it may be a small amount of money in the grand scheme of	Bus Service
things but on many buses the number of people boarding without paying the fare is will over 50%. I'm	
willing to pay more as long as others do their share.	Bus Service
Make cuts to metrorail before considering cuts to bus service. Rail riders tend to have cars, bus riders	
do not.	Bus Service
If you reduce service too much, people will stop riding. It's critical to build a product that people want	
to use over other means of transportation.	Service Levels
If you eliminate the G2, I and many other Georgetown University faculty and staff and grad students	
will have literally no way to get to work. Owning a car in the district is expensive and inconvenient and	
parking by campus is nearly impossible, so switching to driving is not a viable option for many of us. It's	
also not an option for many of our international and disabled faculty and students who are unable to	
drive for all sorts of reasons. This is an embarrassing proposal. DC should be supporting its flagship	
research University with at least minimal transportation options. This would be enough to make me	
consider leaving for a different university and city altogether as I seriously have no idea how I would get	
to my job.	Fares/Fees/Parking
You are proposing to get rid of all the routes that service the georgetown neighborhood. I need these	
to get to and from my job. You are making dc more and more inaccesible	Bus Service
Please do not cut lines, as it would affect areas that are already underserviced by public transportation	
options. Particularly the G2, where students do not have Metrorail access to Georgetown University and are reliant on Metrobus.	Bus Service
Please don't get rid of the G2.	Bus Service
The D2 and G2 routes are essential routes for students and many other individuals to access the	
Georgetown community and university. Eliminating or reducing these routes would have a major	
decreased in accessibility to an area that already does not have a metro station.	Bus Service
Please don't eliminate the lines G2 and D2. They are the only lines linking Georgetown / Glover Park	
with Dupont Circle and downtown. They are essential and many people, including students, university	
workers and residents rely on them daily for their commute.	Bus Service
For non-car owners who live in the District, a system that enables us to go where we need to go is	
essential. And for the District in general, easy connection between neighborhoods and community	
members is the key to the success of our city.	Miscellaneous
georgetown is already so difficult to get in and out of, please don?t do this	Bus Service
It is completely unfair and disappointing to hear that D.C. is considering FULLY cutting off Georgetown /	
Glover Park / Foxhall & Palisades from the MetroBus. The area where majority of students live and lack	
car access and pay for their fares. Shameful decision.	Bus Service
The metrobus proposals for cutting service to the D2, D6, and G2 would remove ALL bus service to	
Georgetown neighborhoods. Without a metro stop in the neighborhood, how are people suppose to	Due Carrier
get to work???? It would kill business. Georgetown needs accessible bus routes please keep them if you can!	Bus Service Bus Service
Neither service cuts nor fare increases are a good solution to budgetary shortfalls.	Operating Budget, Management and Spending
It is crucial to continue a sufficient level of Metrobus service around the Georgetown University	
campus. I very much object to the proposal tocompletely eliminate the existing direct G2 Metrobus	
route to the University?s front gates at 3700 O St. NW. I also am opposed to eliminating the D2 and D6	
Metrobus route, and combining the 31 and 33 into one route.	Bus Service
DO NOT CUT THE G2 OR D6 BUS STUDENTS WILL LITERALLY HAVE NO WAY TO GET TO GEORGETOWN	
UNIVERSITY.	Bus Service
Put pressure on the government to fund through more taxes on cars. Metro and busses are a public	
service and should not be degraded. Even drivers benefit from more people using metro, but if it costs	
more or is unreliable, more people will drive and Uber.	Bus Service
Please keep service in Georgetown/directly accessible to Georgetown Unviersity's campus we literally	
have no other options except for Metrobus. I love the D2 it is my favorite bus line please don't take it	
away I use it a lot.	Bus Service
For a public transit system to function, it needs to offer convenient, safe, and frequent service to beat out cars and rideshare. Cutting service will not fix a public transit system's problems. Instead, it will stall	
the problem and lead to even less ridership, leading to a negative cycle where service is systematically	
cut. Consider fare increases rather than service cuts, please.	Bus Service
96 bus is my primary method of transit with no bus offering even a similar route at all	Bus Service
Do not take away G2 please because so many Georgetown students use that route and we have no	
other options close by. Thanks	Bus Service
Why aren?t local stakeholders investing more? What can be done to move the needle on that?	Miscellaneous
If the choice is between higher fares vs. cutting service, there FIRST also needs to be better enforcing of	
fares on Metrobus. On a regular basis, I see plenty of riders not even bothering to tap the machine on	
their way into the bus. There's also a lot of malfunctioning card machines that don't properly scan the	
The set of	
Smartrip cards, either. I'm not necessarily asking for more policing of fare-skippers, and in an ideal

Reducing and eliminating service just perpetuates itself. When the bus is not convenient or available, people will not ride it. Eliminating and reducing routes will only lead to a less equitable and less sustainable transit service. To be honest these route cuts could actually lead to me moving to another city entirely. The G2 bus is an integral part of my commute to Georgetown University. It is so convenient! Cutting such aroute would probably inpact my use of the Metrorail system as well, as I would probably choose to drive (I have parking privileges near the University) instead of commute by public transit. Do not eliminate the G2- it is the single most direct way for many Georgetown sudents to get to and	Bus Service Bus Service Bus Service Bus Service Bus Service
world public transportation would just be free to riders, supported by adequate funding from the government. Also, I don't understand why the G2 line to Georgetown University's campus is always at risk of being cut. It's the only line that goes straight to the front gates of the university, and seeing that Georgetown to is a huge employer, lots of people depend on this line to get to campus. Additionally, because of lack of space on campus and restrictions on student housing in the immediate area surrounding Georgetown, many students now have had to find off-campus parking deeper in DC. Plenty of these students, too, rely on the G2 line. Please don't make it harder to get across DCI These proposed cuts would make it impossible to get to Georgetown university. I ride the G2 several times a week and depend on it! Please don't cut off all the routes that go to Georgetown/Burleith! Please don't cut off all the routes that go to Georgetown/Burleith! Please don't cut off all the routes that go to Georgetown/Burleith! Please don't cut off all the routes they are Please and to continue living car free in DCI Reducing and eliminating service just perpetuates itself. When the bus is not convenient or available, people will not ride it. Eliminating and reducing routes will only lead to a less equitable and less sustainable transit service. To be honest these route cuts could actually lead to me moving to another city entirely. The G2 bus is an integral part of my commute to Georgetown University. It is so convenient! Cutting such a route would probably impact my use of the Metrorail system as well, as I would probably choose to drive (I have parking privileges near the University) sintead of commute by public transit. Do not eliminate the G2: it is the single most direct way for many Georgetown students to get to and from campus. This would make it more difficult for Georgetown students to live in DC.	Bus Service

Comment	Category
Please keep the G2 bus. It is integral to keeping Georgetown University accessible and necessary for	Category
students and staff transportation	Bus Service
I would like metro to receive more funding from the DC government and not be a service that needs to	
be profitable. It is a public good and an asset to the city that needs to remain affordable and accessible.	
It?s important for equity that metro buses and trains continue to run often, as well as for climate change. Reduced metro service will leave lower income individuals with no option and higher income	
individuals choosing Ubers, thus enhancing car emissions, single vehicle trips, and greenhouse gases, as	
well as traffic. We need metro to improve service frequency and reliability while keeping fares low in	
order for DC to be a safe, fun, and fair place to live.	Bus Service
Do not cut the G2, D2 and D6 buses!	Bus Service
Please do not cut G2 Eliminating the D2 puts a ton of people in a metro desert. If you?re gonna go through with this, don?t	Bus Service
touch the D2	Bus Service
Many of the proposed cuts decrease access to the Georgetown/Glover park area and would impact	
many people working, commuting for school and people wanting to visit georgetown area	Bus Service
please don't cut off g2; that is Georgetown university's main access to dc.	Bus Service
Please do not reduce services during rush hour and try to keep the fares low. People from all walks of	Form / Form / Porting
life use Metro, please remember that. The G2 is a route I take on a regular basis to get to and from Georgetown University. Additionally, there	Fares/Fees/Parking
are many coworkers and employees who rely on the G2 to get to and off campus. The shuttle drop off	
on 37th St. NW is incredibly convenient to staff and students alike. The next closest bus does not leave	
an accessible route for anyone with accessibility issues as all other routes drop off at the bottom of a	
large hill or in unsafe places due to the amount of traffic in the neighborhood.	Bus Service
Extending metrorail hours will boost ridership, especially among the young community that still makes	
DC vibrant. However, much ridership is still deterred due to the massive public safety issues. I regularly	
see people doing drugs, high on drugs, jumping the faregate, and other illicit activities such as smoking on the metro. Metro Police need to enforce the laws harder, and ensure criminals do not have free	
reign in and around our shared public transportation infrastructure. This problem is especially bad on	
the green line stations.	Fare Evasion/Safety/Crime
We neednthe metro to be open later, not close earlier.	Bus Service
What else can riders do to convince others to give money to WMATA?	Miscellaneous
I use the G12 daily to get to school. The trains during rush hour are often PACKED. Eliminating rush	
hour scheduling will encourage commuters to use alternative transportation and lower ridership. You will get more riders if the Metro is MORE convenient, not less.	Rail Service
will get more riders if the Metro is MORE convenient, not less. Reducing access to bus routes, especially the T2, would be catastrophic for many DC and DMV	
residents. For anyone that does not have the option of driving a car to their location, they depend upon	
the metro bus and metro rail to get to their destinations. These routes are integral to the lives of DMV	
residents as well as the success of local businesses in the area, as well as the ability for people with	
fewer means to travel and work. My grandmother currently lives in a care facility that, unless you take	
a car, can only be accessed via the T2. If the employees at her facility cannot get to work, my	
grandmother and all of the other residents would suffer. I implore you to please not go through with	Pue Carrier
this change, as it would negatively impact so many DMV residents. As a student of Georgetown University, the decision to remove routes that take students to and from	Bus Service
campus (ex. G2 and D6) would be incredibly detrimental to the community. I use G2 for the majority of	
my travel in D.C., and without it I would be forced to take inconvenient and expensive Ubers. I know	
many students who would not be able to afford more expensive travel measures, and I think it is	
essential that the G2 route in particular stay in place. I urge you to please consider keeping it.	Bus Service
Cutting public transportation will make it significantly challenging for working class families to afford	
traveling around DC. Cutting the G2 service and D6 will make public transportation to Georgetown	
virtually non existent making the lack of public transportation already worse. The G2 especially is critical for Georgetown students that do not live on campus many students who	Bus Service
do not have financial constraints tend to live closer to campus in the GEorgetown neighborhood, but	
students trying to find more affordable housing often move farther away and rely on routes like the G2,	
D2, and D6 to get to campus. Considering there is no metro stop near campus and Georgetown	
transportation runs to only a select few locations throughout the city, cutting service on the	
aforementioned lines would pose real challenges for students trying to commute from off-campus	
housing or to internships (many of which are already posing a financial strain considering the time	
commitment without pay). Please, please, please keep the G2 or at least make sure another line is added to include stops at Georgetown's main gates.	Operating Budget Management and Spending
Please don't eliminate the G2 bus. It's as a vital public transport option from Georgetown across the	Operating Budget, Management and Spending
city. Also, please install more tall gates in metro stations to reduce fare evasion. It's a disgrace to see so	
many people jump over the shorter gates.	Bus Service
Canceling the G2 is completely unacceptable - there is no other route connecting Georgetown with the	
Dupont / Adams Morgan part of town. I use this route twice/day, every single weekday, to get to work.	Due Comies
(The routes using M Street, such as the DC Circulator, are prohibitively slow.) I do not understand how you can possibly suggest cutting the D31 bus route, which hundreds of kids	Bus Service
I do not understand how you can possibly suggest cutting the U31 bus route, which hundreds of kids use every day to travel to/from school. You need to find better solutions.	Bus Service
G2 and D6 are vital routes for students at Georgetown University to access the city. Please don?t cut	
them since students do not have alternative forms of access.	Bus Service
Stop people from taking the Metro rail or Metrobuses for free.	Bus Service
Please do not get rid of D2, D6, or G2 bus routes. Lots of the Georgetown community rely on these	
routes for their daily needs and lives.	Bus Service
I?m a student and Georgetown University, and the main way I can access the Red Line is at Dupont Circle. Right now, the D2, D6, and G2 are all vital in terms of getting me from campus to the metro, and	
I use them all multiple times a week. Getting rid of those routes would make my commutes significantly	
longer, and would cut the University off from the city. Please maintain those routes, for all the students	
who use them every day.	Bus Service
I would be devastated if metro cuts G2, D2, and D6 service. I live in Georgetown and am wholly	
dependent on the bus system to get to work and to friends' apartments. I currently take the G2 every	
morning to get to work and take either the D2/D6/G2 to get home. I also use it to connect me to the	
red line. Otherwise, I'd have to walk 30 minutes with my laptop on my back. To see my friends in	
Adams Morgan, I take the G2 to the 42/43. I don't have a car and am a student so I don't know what I'd do without my bus routes. I love the DC buses and would rather pay more than lose them.	Bus Service
Routes like L2 and S2 are really popular, reducing and shortening their service would be really	
detrimental to many residents and commuters.	Bus Service
Please don?t cut the G2	Bus Service
Do not remove Metrobus for D2 (glover park bus), G2 (Georgetown bus) and 33/36 federal triangle bus.	
that i use to get literally EVERYWHERE bc we don?t have a metro at GeorgeTown University!!!! We	Due Comise
disapprove of this proposal The planned cuts would isolate my neighborhood from the rest of the city	Bus Service Bus Service

There are many other students who live in my building (and more in my neighborhood) who would be impacted the same way. G2 is vital for access to Georgetown University's Hilltop campus. Employees and students use this route frequently and there are very few other options to get to Georgetown University. and parking is extremely limited. D6 is the most important route for me and connects Georgetown Hospital with so much of DC, there is not a good metro rail line that replaces it. I am strongly opposed to closing metro rail stations outright. I also think one train every 15 minutes for rush hour weekday service is not acceptable particularly if there is a desire to increase ridership. I am willing to pay a bit more to maintain levels of service. Also closing the metro at 10pm would reduce ridership to theaters, sporting venues, etc near stations who have late night events with a lot of people. Why take the metro there if I can?t get home afterwards? You should invest in high speed train to Baltimore. Also please introduce express trains instead of closing certain stations Please keep the G2 or some other service between Georgetown University and Logan Circle. This is the only public tra	Bus Service Operating Budget, Management and Spending Bus Service Bus Service Bus Service Rail Service Rail Service Bus Service Bus Service
Please don't eliminate G2, 31 and 33 metro bus routes. Bus Service Increase cost of parking ? particularly in MD and VAI Metro is a valuable public resource that should be supported by those states more. Cutting service seems like a bad idea because it will decrease local usage, particularly for those who primarily or often use WMATA for things outside of their commute. Bus Service Longer wait times really dissuade people from using the system when they might otherwise, which is a big long term loss. Live tracking for buses and metros has improved I?m happy about that as I time my travel to the bus or metro. I use Transit and BusETA (transit has a better interface even though I know technically Bus ETA is most accurate). WMATA has had lots of improvements! Keep the focus on strong safety controls and necessary capital improvements to keep the system moving forward. WMATA does	Impact the quality of life around the city. Save the G2 bus route Make MD and VA chip in Can the budget shortfall be addressed by getting governments and businesses to pay - instead of rate increases (Which really just affect people who don't have white-collar jobs, which pay for transit) or service cuts (which disproportionately affect lower income riders and neighborhoods). Perhaps a tax on vehicles entering DC or a parking tax could be allocated to metro. The impacted bus routes and rail reductions would adversely impact my life by eliminating all routes for my daily commute to Georgetown and Glover Park I will not be able to get to school with the proposed cuts. I chose an apartment next to the D6, D2 and G2 because I go to Georgetown University and do not have a car. I cannot afford taxis every day. There are many other students who live in my building (and more in my neighborhood) who would be Impacted the same way. G2 is vital for access to Georgetown University's Hilltop campus. Employees and students use this route frequently and there are very few other options to get to Georgetown University. and parking is extremely limited. Comment	Category
I use the metro daily for work and going back home. Cutting the bus that I use will impact me, also increasing fares because I do not get a salary increase or help with metro fares. Metro running every 15	
mins its not ideal for someone that has to commute from MD to DC or viceversa	Bus Service
Start recommending the rude driver that leave people that run or try to flag the bus down and the	
driver look you in the face and keep.gpimg	Bus Service
Too much considering the number of employees on their phones or chatting with one another -	
decrease the workforce	Miscellaneous
Please be mindful that many residential bus routes are the main transportation for residents that don't	Due Capita
own cars- (Which are seniors who depend on public transportation) If you can find a way to make the bus times more reliable, then having less frequent service is okay. It's	Bus Service
just such a pain when you miss a bus by 1-2 minutes and then have to wait 20-30 minutes for the next	
one.	Bus Service
I frequently rely on the G2 Metrobus route from Dupont Circle to Georgetown University. My commute	
times would be vastly higher if the proposed route was in fact eliminated.	Bus Service
Eliminating the G2 bus and other Georgetown services will make it impossible for me and many of my	
colleagues to continue attending school next year. There?s simply no public transportation that takes us near campus other than the G2 and D31/33 buses. With no metro stop near campus, this is a silly	
idea that is going to have an extremely detrimental impact on a population that relies heavily on	
affordable and accessible transport.	Bus Service
The proposed service cuts would cause Metrobus to be a rather unusable transit option for so much of	
DC's population and would be a major shame for the city. The scale of cuts is a bit ridiculous.	Bus Service
Please do not remove the G2 bus route - it is a vital connector for the many students, staff, visitors,	
tourists, and community members who use the route to get into Georgetown, which is historically a	Due Carrier
transit desert. Please don't remove this vital link to the community! Please do not cut the G2 line. it is vital for students and employees at Georgetown and Howard	Bus Service
University. In addition to students and professors, this also includes campus worker/support staff like	
those in the hospitality/dining/cleaning/utility services departments.	Bus Service
If you want to boost ridership and revenue, you need to have bus infrastructure that makes riding the	
bus convenient. With the proposed bus route changes, ridership will decrease and you will continue to	
loose funds. Bus routes need to be affordable and well connected to the city and its neighborhoods and	
also be timely (i.e. not running once every hour). Unless busses are not seen as the most convenient	
transportation option, residents will to seek alternative modes of transportation that will continue to	Due Carrier
handicap the effectiveness of the city's public transport. D6 is the only bus service in the Foxhall and Palisades neighborhoods. It is essential to provide	Bus Service
transportation to the many schools in the area, such as the new MacArthur High School, and to three	
main hospitals: George Washington University, Medstar Georgetown, and Sibley.	Bus Service
I cannot commute to work if certain bus lines like the G2 were to cut stops from its route meaning I	
would have to move. Cutting down service and increasing fares makes the city extremely inaccessible	
for residents as a whole and would most like promote higher rates of fare evasion and decrease respect	
for public transit as a whole which I feel would negatively impact the city	Bus Service
You guys doing great	Miscellaneous
please don't reduce weekday morning and evening rush service. It would make commuting to work	Service Levels
much harder. The G2, D2, and D6 are the easiest way to get into and out of the Georgetown area and they already	
only run every 30 minutes during not rush hour times, I take them everyday and I do not know how I	
would be able to move about the city otherwise.	Bus Service
More frequency please!	Bus Service
I would prefer you use the capital fund to lower fares, expand hours on weekend nights, and stop	
making unnecessary infrastructure improvements like those new displays at bus stops that don?t even	
work.	Bus Service
Please don't cut G2 bus, the D2 from Glover Park or the D6 on Reservoir Rd. This will eliminate ALL public transportation options near the Main Campus. Given that University students, faculty, and staff	
have very limited options for getting to campus right now, cutting these routes would make it even	
harder for many in our community.	Bus Service
Please do not remove all bus routes to/around the Georgetown main campus! Many students, faculty	
and staff rely on these!	Bus Service
Don?t penalize people who are walking to the metro and biking. Raise the cost on parking dramatically.	
Cars are terrible. Also, don?t penalize DC residents with these fare increases and schedule cuts. Make	
VA and MD governments pay more. VA and MD Commuters need to pay more than DC residents. I love	Due Camies
the metro rail and metro bus. I love using them for work and leisure. Please don?t cut service!!!! The G2, D2 and D6 are the only public transportation options I have to reach Georgetown University,	Bus Service
including faculty and staff. Please don?t end those services!	Bus Service
These service cuts on lines like the S2 and G2 would make it impossible for me to commute to work and	
therefore I would be forced to move. Decreasing service and increasing fares will only prompt increased	
fare evasion and disrespect for public transit services	Bus Service
Please do not cut the only way for federal employees to get down to Foggy Bottom and Potomac Park	
area. If Bowser and Biden want us in the office, we have to be able to get to the office.	Miscellaneous
The G2 bus is significant especially seeing as there is no metro service to Georgetown. The Georgetown shuttles already take up most of the slack from Metro by providing service at no cost to the city	
shuttles already take up most of the slack from Metro by providing service at no cost to the city between metrorail and the campus. Metro should do the decent thing and maintain the G2 route.	Bus Service
I use to love taking the 16Y. It came frequently during rush hour, and on either side of my commute, I	
never worried about catching it. Now every day is a trial. I have all the apps to guess when my bus will	
come - it could be 20-40 mins between arrivals. And if I miss it, I really miss it. The solution to	
increasing ridership is not less, but more! London has buses that come every 5 mins. It?s amazing! And	
easy! I don?t expect Metro to become London, but I know I would use Metrobus and rail more if the	
service was more frequent. It is the wait times, both for transfers and frequency, that make it frustrating and Lultimately and up spending more for an Liber.	Rus Sanira
frustrating and I ultimately end up spending more for an Uber. Good public transit is essential for a city; in Europe, even small towns have good bus service. Use the	Bus Service
Covid money for public transport. Stop wasting money on 'green' pavement when the city forces the	
destruction of backyards while 3rd-flooring residential neighborhoods. Older people can't use scooters	
and bikes, and poor people have no option but buses. Fire 50 % of your admins and all DEI. Charge the	
Feds!	Bus Service
	Bus Service
Please DO NOT ELIMINATE THE D6 BUS LINE!! This is important for us!!!	
Please find the money, don?t cut the service ! DC area has a lot of people and more of them should	Dell Carrier
Please find the money, don?t cut the service ! DC area has a lot of people and more of them should chose Metro. Be worthy! We love you	Rail Service
Please find the money, don?t cut the service ! DC area has a lot of people and more of them should chose Metro. Be worthy! We love you Do not close G2 route!!	Bus Service
Please find the money, don?t cut the service ! DC area has a lot of people and more of them should chose Metro. Be worthy! We love you	Bus Service

Comment	Category
The reason I don't ride WMATA (metrorail, metrobus, etc.) much is because it's already too expensive,	
too slow, not frequent enough, and not reliable. WMATA's proposals are all non-starters. I realize we	
live in America, where labor is too expensive (every American wants a high wage), labor is not as skilled	
or efficient as overseas (Americans want to work their shift and go home; Americans don't often apply	
ingenuity to their work), and large municipal projects require unrealistic political consensus building.	
However, having seen the public transit in democratic nations (South Korea, Japan, Taiwan) and even	
non-democratic nations (Thailand, China) overseas, I have to ask how come they can have nice things	
and we the capital of the #1 nation in the world (and a free country) can't have nice things? Japan can	
run their metro-rail system with trains arriving every 3-6 minutes on the dotwhere the culture is one	
such that a train departing 20 seconds EARLY requires an apology to the customers. The questions I	
would love to have Metrorail's leadership answer are: 1) how can we learn from other nations that	
have world-class and/or next generation public transit systems? 2) How can we expand beyond	
thinking in the two-dimensional, binary choice of raising fares or cutting service? Please give me a third	
or fourth choice. That's what I would expect out of leadership at my companycan WMATA leadership	
Do not cut or change the D2, D6, G2, 1A, or 1B I'm a student and my ONLY way of going to GEORGETOWN university from where I live is through D6.	Bus Service
There is NO other metrobus that services MacArthur Blvd NW. Please DO NOT REMOVE D6 and alter	Due Capita
31,33	Bus Service Service Levels
Keep the 80! Brings people to the hospital! I would like to see routes being merged/combined rather than cut - particularly if it isolates entire	
neighborhoods. For example, cutting G2, D2 and D6 cuts off Georgetown from Dupont and a large part	
of the city entirely. Dupont station is the closest metro station to Georgetown and should remain	
connected by bus.	Bus Service
Cutting Bus service will further the increase the use of single person vehicles, increase vehicle	Bus Service
emissions, reduce air quality, and most importantly create disadvantage people who don't own	
vehicles and rely on your buses to get their to their place of employment and other critical services	Bus Service
I think if every station had barriers to entry and exit, and everyone therefore had to pay their fare, we	
wouldn?t need to hike prices for everyone.	Fares/Fees/Parking
MAKE CUTS IN SERVICE WHERE THE ROUTES ARE UNDER UTILIZED AND MAKE A SMALL INCREASE IN	
FARES.	Bus Service
I take the G2 every day. It is the only public service to Georgetown and I live in Columbia Heights.	Bus Service
Why are you going to waste your limited money by building a second entrance to Crystal City Metro	
that is not needed? Please cancel that project and spend the money instead on making sure you keep	
enough trains running. We don't need an extra entrance in Crystal City.	Rail Service
G12 is very important to my community and it would seriously impact lives in a negative way if it were	
gone.	Bus Service
Elimination of D2 and G2 would eliminate our ability to get across down and/or to the red line easily	
making the city less accessible to those of us that reside in the Georgetown area, which doesn?t have a	
metro.	Bus Service
If you take out the G2 I will riot	Bus Service
There should neither be fare/prince increases NOR service cuts. There should be an increase in Metro	
budgets. As the DMV is an area in high need of equitable public transport, there should not be a	
decrease in services provided that would do so. The fare prices should be lowered, and service hours	
should be increased, along with a pay increase for WMATA workers.	Operating Budget, Management and Spending
G12 is needed to get to work in a minority area. Please do not cut. You will put people in a bind trying	
to get to work.	Bus Service
If the G12 is canceled I and many of my neighbors would be unable to get to work	Bus Service
Eliminating the G2, D6, and D2 is insane. These are the only public transit options available to students	
at Georgetown University, you can?t strand us like this.	Bus Service
You claim to have reduced fare evasion. Anecdotally, I see people hop the gate every single day and	
your station managers appear to be on their phones playing games. Escalators at the stations I use	
I'' The second

most are constantly out of order - often for long periods of time with no one working on them. If you go through with the fair hike it will be cheaper to pay for parking or uber. Please don't cut the G2 service. This is a crucial, crucial link for Georgetown University (and neighborhood) to the rest of the city. Elimination of this would be a massive problem! Reducing bus service to encourage transfers is bad for travel because transfers take a long time and it significantly lengthens the total duration. If service cuts happen across the board, that would make the reliance on transfers even less reliable and more time consuming. The bus routes as well as every metror station are extremely important for last mike connections. Personally I spend a lot of my public transit commute on the ?last mile? and transfers ? If service cuts make it so I have to spend much longer on public transit transfers and covering the last mile, I?ll be forced to switch modes and drive. We do not need to have any cuts on any bus at all. If they do not then you might just have to bring another sources like another company. To take over the metrobus completely and get rid of these disrespectful bus drivers. That do not care about there jobs at all. If they do not then do a better job and screen prospective personnel. To treat people with respect much better. Those of us who go to the Georgetown Campus need bus service to campus Cutting the service discriminates among those who cannot afford Uber or Lyft. I usually take the bus on Sunday Usually the bus has a significant number of riders, including not only student but workers in low income jobs. Do not cut this service. Please do not tu G2, D2, and D6!! It is the only routes I can use as a Georgetown University student, and this would hinder simple errands I need to perform! 	Put strong effort into fare stealers who jump over the gates and station managers do nothing.	Fares/Fees/Parking

Comment	Category
This is unfortunate we should be disincentivizing driving to get more people to use the great metro	
system. Bring up the no right on red sooner for cars, charge congestion pricing etc and get more	Conital Durdent
investment into metro given it covers three jurisdictions! It would be absolutely unfair to entirely eliminate the G2 service, as it is the only direct route to	Capital Budget
Georgetown campus main gates. As a young woman taking night classes, this offers a safe option and	
without it people might feel compelled to pay for over-priced rideshares. Condensing the 31 and 33	
routes also impacts direct commutes from residential neighborhoods to downtown DC, further	
complicating the public transportation process. And then eliminating weekend service of the N2, N4,	
and N6 routes also makes it incredibly hard to get around and forces people to turn to expensive	Bus Service
I ride the bus a few times a t week. Imam shocked and anger that many passengers just walk on and do	
not pay. It is discouraging and contributes to a sense of lawlessness on the buses. I also, ride Metro and	
and shocked at how many people evade paying.	Bus Service
fare increases are not ideal but are not a backbreaker, especially when Metro has great programs for	
low income riders. Service cuts must be avoided at all costs! The most important factors for people	
taking transit is reliability and frequency, and if these are impacted, we will enter a death spiral.	Bus Service
the line of M4 is vital for seniors in all the area ,please do not think of eliminating it. This line connect	
schools and hospital wth our area. We lost line E6 and do not possibly effort an other transportation	
loss.	Bus Service
Shutting down the G2 and consolidating the 31 and 33 will render Georgetown University students and	
Georgetown neighborhood residents unable to take any efficient public transport. This neighborhood is already so isolated by lack of Metrorail access that more cuts to service here would be extremely	
harmful.	Rail Service
I am a graduate student at Georgetown university and the proposed cuts to the G2, D2, and D6 bus	
routes, in particular, would make it EXTREMELY difficult to commute to campus for my classes every	
day. I find these proposed cuts particularly preposterous considering Georgetown doesn?t have a	
metrorail station either, leaving people with practically no option to commute to the area. Additionally,	
this clearly runs very counter to any climate initiatives to reduce the amount of people commuting by	
car (for those lucky enough to even have a car - which neither I, not the majority of my classmates, do).	Bus Service
Maximize bus and rail capacity. Eliminate empty buses. Install fare evasion gates at ALL stations. Rotate	
security to metro stations and crack down on all the freeloaders. Cut back to six-car trains after rush	
hours.	Bus Service
Please don't further cut off Georgetown University from public transport by getting rid of the G2, D2,	
and D6	Bus Service
When metrics or information did you use to make these proposed route decreases or route	
elimination? It is hard to understand why certain routes were chosen or in the case of station closures	
those stations were selected with seeing the metrics. I suggest a link to this information be added to	
each page of the survey for easy access to the information.	Miscellaneous
You want to be more expensive and provide less service. Makes no sense	Service Levels
Take into consideration the people who rely on Metrorail and Metrobus exclusively for their	
transportation needs when you consider making these drastic changes.	Bus Service
Service cuts and fare increases impact the people who need services most ? low income, public	
transport populations. I?m not in favor of anything that impacts those populations. Public	Rue Capitan
transportation should be free to low income riders (if not to everyone). Removal of the G2, D2, and D6 routes would be very difficult for Georgetown students as we use these	Bus Service
modes of transportation to access areas of DC. At least one route should continue to stop here.	Bus Service
indues of transportation to access areas of DC. At least one route should continue to stop here.

D6 bus line is very important. Connects to Metro from Palisades enabling students to go to other schools. I've noticed major improvements in bus reliability and speed in recent years with infrastructure improvements, making me confident enough in it to make it my primary commute method. The way to get people on transit is to make it work better, not worse. Service cuts are absolutely the wrong direction. 20 and 30 minutes is a very long time to wait outside in the cold, heat, and rain. No one should wait more than 15 minutes ever. Make our policy makers give up their cars for 3 months in winter and see what they value after doing that. Government funding for metro should be increased rather than decreased, with service improvements and expansion, and no fare increase Washington, DC will never be a world-class city with an expensive public transportation system that is agonizingly slow. Make a metro stop that goes to Georgetown. You need to stop being anti racist towards communities that use the metro to go to school or get groceries. Georgetown presents unique geological challenges to a metro stop a stop to quadruple that of other redine stops back in the 1970s when Metro first opened here. Although I do not use the bus every day, I do use the G12 bus sometimes and it helps me when I don't have access to a car. Please do not cut off bus access to people who need it. The G2 line is my only way to and from work. Please do not eliminate it.	Bus Service Bus Service Capital Budget Miscellaneous Fares/Fees/Parking Bus Service

Government funding for metro should be increased rather than decreased, with service improvements and expansion, and no fare increase. Washington, DC will never be a world-class city with an expensive public transportation system that is agonizingly slow. Make a metro stop that goes to Georgetown. You need to stop being anti racist towards communities that use the metro to go to school or get groceries. Georgetown presents unique geological challenges to a metro stop. Aside from the political challenges because its local residents oppose the addition of one, the cost of a stop was close to quadruple that of other redline stops back in the 1970s when Metro first opened here. Although I do not use the bus every day, I do use the G12 bus sometimes and it helps me when I don't have access to a car. Please do not cut off bus access to people who need I. The most common evening shift is 3 mto 11µm. Cutting weekday service to 10µm would significantly impact many people who rely on rail service and built more bike lines. Don't get rid of the G2 pleaseII tit's one of the few bus options Georgetown University students have. burth this sucks If buses run less frequently ridership will decline further, which will result in yet more cuts down the road. If you want people to use public transportation, it has to be convenient to do so. Many people would prefer to pay an extra 50 cents n	Bus Service Bus Service Capital Budget Miscellaneous Fares/Fees/Parking Bus Service
D6 bus line is very important. Connects to Metro from Palisades enabling students to go to other schools. I've noticed major improvements in bus reliability and speed in recent years with infrastructure improvements, making me confident enough in it to make it my primary commute method. The way to get people on transit is to make it work better, not worse. Service cuts are absolutely the wrong direction. 20 and 30 minutes is a very long time to wait outside in the cold, heat, and rain. No one should wait more than 15 minutes ever. Make our policy makers give up their cars for 3 months in winter and see what they value after doing that. Government funding for metro should be increased rather than decreased, with service improvements and expansion, and no fare increase with an expensive public transportation system that is agonizingly slow. Make a metro stop that goes to Georgetown. You need to stop being anti racist towards communities that use the metro to go to school or get groceries. Comment	Category
The fundamental problem for Metro customers is that beyond a certain point, the quality of service is	
so low, the coverage is so low, and the waiting times are so long, that we will not use the service even if	
were free. It is just not worth the aggregation. The only way Metro can raise ridership is to improve the	
service, which means more trains and buses, not fewer. If ridership increases a lot, then you will not	
have to raise the fares as much. But you have to make the service drastically better. You cannot raise	
ridership enough by lowering prices. People for whom prices matter that much are already not paying	
and are free-riding on the system. By cutting service, you will lose customers who are actually paying	
for the service.	Bus Service
These changes severely curtail accessible public transit for the Georgetown University campus.	
Implementing them would make it extremely difficult for students to have affordable and reliable	
transportation.	Bus Service
The proposed cuts and reductions in bus service would increase traffic congestion and pollution during	
rush hours, as more people would drive their cars.	Bus Service
You can get rid of everything else just not the G2 PLEASE.	Bus Service
My daughter rides the D6 to Hardy every day. So do many other kids. The bus is packed with kids!! My	
husband takes the M4 to tenleytown to go to work. Without these buses we?d be in a public	
transportation desert. Please don?t get rid of them!!!!	Bus Service
Service is already fairly slow with fares higher than transit in other major metro areas. Please consider	basschiet
the people of the area and all of the tourists who benefit from consistent and accessible service, which	
is greatly being put at risk with these proposals. People rely on this service to get to their jobs and	Fares/Faas/Darking
families and much more.	Fares/Fees/Parking
Please don't eliminate G2 for Georgetown University	Bus Service
My child relies on the D6 to get to Hardy Middle School from Palisades. If you eliminate it she will not	
be able to get to school	Bus Service
Eliminating the D2, D6, and G2 bus would severely limit Georgetown students' ability to use public	
transportation, forcing them to find other methods.	Bus Service
Sibley Hospital and Georgetown Medstar Hospital have no transport access other than the D2 and D6	
lines; it is critical to keep these lines. They serve patients from Wards 2, 3, 7, and 8.	Bus Service
My bus use is seasonal, so there are months when I don't use the bus, but when I am riding, I ride	
regularly. Having a bus stop nearby influenced my home purchase back when I was commuting	
regularly into DC, and it was very convenient to ride to the New Carrollton Metrorail station. My line is	
the G12, and it is great having easy access to the metrorail stations on that line. I used to take the B30	
from Greenbelt metro station to BWI.	Bus Service
Thank you for the survey.	Miscellaneous
It would be highly detrimental to people who cannot afford to have a car (or prefer public	
transportation for other reasons, notably environmental reasons) that certain neighborhoods no longer	
have bus or rail service, or that service hours/frequency is drastically curtailed.	Bus Service
My family uses the M4, T2 and L8 to go to school. If these bus lines are discontinued, my children	
won?t be able to continue attending school. Unfortunately there is no metro station near my house nor	
near one of the schools, so there is no alternative public transit if these lines are discontinued	Bus Service
Please don?t cut critical bus lines like 96, D2 and L2! Don?t cut redline hours. Please make bus and	Bus service
metro more reliable and frequent	Bus Service
The reason there is a shortfall in the budget is because far too much money in this city goes towards	
the police. If people do not have reliable public transportation in this city, that will decrease peoples	
ability to access jobs and other needed resources, which we know increases crime. Do not cut our	
metro rail or buses.	Operating Budget, Management and Spending
The proposed cuts would be disastrous for commuters, and would accelerate a death spiral that	
predatedbut was certainly exacerbated byCOVID-19. The only way to get stable ridership and rider	
income is by having buses and trains come frequently and reliably. With the number of people in the	
area who have avoided buying cars and instead using rideshare and other options, there is a much	
higher potential rider base than there was even 5 or 10 years ago. But cutting service will make them	
flee the Metro system rather than becoming its biggest supporters. The proposed bus cuts in particular	
seem to turn a Metrobus system into a 1950s era commuter bus for the men in gray suits. It would be	
horrific.	Bus Service
Consider including the following concepts in FY25 budget: 1) After 7 pm Friday flat \$2.50 fare (or	
whatever weekend fare becomes in FY25) to stimulate leisure ridership on Friday evening when full	
fares are charged until late evening. 2) Increase >15-mile trip fares at a larger rate +25% than <15-mile	
trip fares. Consider holding <3 mile fares to FY24 levels 3) Consider implementing with member	
jurisdictions a regional property tax opt-in system that would give free rides for entire household	
systemwide for each tax year for the price of the additional levy 4) Consider selling a DCA and IAD day	
pass (rail fare to or from each airport and a day-pass included for one price) 5) A may price per month	
pass (rail fare to or from each airport and a day-pass included for one price) 5) A max price per month fare capping system should be implemented in concert with increases in max Metrorail fares for lower

The power of the system comes from its size and flexibility. If you start closing stations you will lose dedicated riders, likely permanently ,especially considering the tens to hundreds of millions of dollars invested in those stations that would then sit unused and possibly fall into disrepair. Please consider the buses that students use particularly to MacArthur HS in Ward 3 metro need em examinate the shuttle bus p99 employee buses b97 employees shuttle bus your general manager doesn't have that on your postposals I am a Georgetown student planning on using the D6 stop on Reservoir Rd to commute to work every day this summer. Please do not cut D6 line.	Fares/Fees/Parking Bus Service Bus Service Bus Service
fare capping system should be implemented in concert with increases in max Metrorail fares for lower income riders. This max price would be pegged to their AGI in the SNAP program. 6) Ultra-short trips across jurisdictions without good transit alternatives (i.e. Huntington to Eisenhower Ave., Rosslyn to Foggy Bottom) should be made free (with Smartrip tap in/out) to stimulate ridership. Base rail fare could be reintroduced in two fiscal years between these stations. It is unclear to me how closing a station will save any meaningful amount of money. If it is that urgent to temporarily reduce costs, Metro should consider having some lower ridership stations have no full time station manager and instead install more cameras and have assistance available by phone. In more than 20 years of riding metro i have only ever asked a station manager for help when a MetroCard wasn't working, and that could be addressed with remote assistance. It is also patently unfair to be asking people for their opinion on closing metrorail stations you will lose dedicated riders, likely permanently , especially considering the tens to hundreds of millions of dollars invested in those stations that would then sit unused and possibly fall into disrepair. Comment	Category
I would prefer a small fare increase vs. eliminating service. I would rather have reduced service than a total elimination of particular bus lines. I actively use the D2, D6, and G2 Metrobus lines and am	
decidedly opposed to the elimination of those routes. I use a combination of those for work multiple	
times per week and also on the weekend. Ideally, no cuts to service, but if you have to, I'd prefer	
reduced service (for example, the D2 running every 15 min during peak hours vs. every 10 min; or every	
30 min during late evening vs. current rate). Those are the only lines reaching into west Georgetown	
and Georgetown University, a major employer in DC and also connected to the hospital. Losing	
connection also prevents students and residents from the area from traveling eastward into downtown	
DC, which drives business and revenue.	Bus Service
Both D6 and M4 routes are crucial for students in different Middle Schools and High Schools. My two	
children commute to and from school using D6 and M4 everyday. They are the two of the very few routes serving the Palisades area and this part of NW DC and doing away with these routes would leave	
no public transit option for us.	Bus Service
your general manager should have need the b97 and P99 employee shuttle bus on there with the rest	
of the bus been eliminate to . That unacceptable went your general manager doesn't care about	Bus Service
The G2, 52,54,63,64,90,92, and 96 bus routes are my usual routes and if this is cut it?s going to cause	
serious hardship for me and a lot of people. There are still many people who aren?t mobile in the DMV	
area and Metro should consider this and look for a way to sort the budget deficit out, it won?t be such	
a bad idea if the bus fares are increased but cutting it out completely is going to cause serious hardship.	
Please reconsider this decision especially for the students and elderly people who rely on public transport to get to where they are going.	Operating Rudget Management and Geopling
I am strongly opposed to the proposed service cuts by MetroBus. The budgetary shortfall should be	Operating Budget, Management and Spending
addressed by alternate means, specifically fare hikes and additional city support. A number of the	
proposed changes will affect the poorest and the vulnerable the most, especially students - who would	
be forced to walk long distances or choose unsafe alternatives to transport.	Operating Budget, Management and Spending
The Georgetown neighborhood already has limited MetroAccess. Removing the G2, D2, and D6 buses	
would greatly affect Georgetown community members and student ability to travel into the city and	
access the Metrorail. I would be strongly against this proposal to remove service hours.	Bus Service
I work at Georgetown University. The proposed changes would make it impossible for me to take public	
transportation to work. I don't drive so I would have to pay about \$30-40 in rideshare fares to get to and from campus. Moreover the proposed changes would make it more difficult for my family and I to	
get around the city.	Fares/Fees/Parking
Please do not decrease the use of 31/33 or G2. I use them to go to work multiple times a week.	Bus Service
This is a disaster to public transport. The M4 is the main school bus for hundreds of kids and is always	
packed. I would have expected additional buses set up, not elimination. One issue could be that the	
kids are asked by drivers not to scan their cards as it delays boarding so the huge use of this line would	
not be captured by the fare card scanning system. M4 absolutely needs to stay in operation, and ideally	
increase its frequency. Please consider fare increases rather than cutting main routes.	Bus Service
1) STOP Letting People Ride For Free. MAKE Them PAY Their FARES !!! 2) FIRE Drivers/Staff/'Security'	
Who Simply Shrug When People Smoke Pot On The Buses. Trains. Platforms. 3) Protect The Sane Non	
Drug Using People From The Insane. Druggies. That Use Metro As Their Partying/Sleeping Place Gosh, 'LowRidership'LMAO. HIGH Ridership. They're Just Not PAYING. Those That Would Pay, Skip	
Using Metro BECAUSE 'Service' Is BAD. STOP Trying To Demand More Money. STOP ! Blackmail !	
Tactics. FIX Your People. FIX The BAD SERVICE. FIX The WASTE. STOP The 'PC' Nonsense And Just DO	Bus Service
Metrobus service is really bad and not reliable at all,	Bus Service
We need D6 to serve palisades. Elderly schoolchildren public workers use it frequently	Bus Service
I would focus on making the experience better to increase ridership. Cleaner rail cars/stations and more

Unfortunately there are too many who disrespect others, cuss loudly in front of children, play loud music, or trash the place. The G12 is the ONLY bus that serves Ridge Road in old Greenbelt. Frankly, I would end up driving instead of catching the county 11 bus. Not everyone has that option. If you *must* cut the G12, *PLEASE* add Ridge road to the G14 route, or negotiate with PG to route the county 11 bus to run D2 and D6 are vital to these neighborhoods. If dc eliminates the d6 bus line, I will no longer be able to get throughout the city using public transportation. This will be disastrous for my family. The M4 is completely packed every weekday with children going to Deal M5. The city does not provide school bus transport. How are those kids going to get to school under this plan? I have a student who takes the D6 from the Palisades to Hardy Middle School and that bus route is the only option available currently to go to/from school. Without the D6 she wouldn?t have any to get home from school that wouldn?t involve us hiring someone to pick her up as there isn?t another bus line that runs through our neighborhood. Eliminating the 12P route will have drastic impacts on military and civilian members who work at the pentagon. Consider increasing fares instead of eliminating the service of g12 and either enforce fare payments or increase fares instead of shutting it down. A lot of people in Greenbelt need the g12 service. You guys are amazing Please consider the fact that seniors, the disabled and low income riders rely on bus service to get to work, drs, shopping and other quality of life destinations and that it is extremely difficult to meet additional costs and deal with service cus. Our lives are challenging already. Please don?t make things	Fares/Fees/Parking Bus Service

Comment	Category
It would significantly impact my family in our ability to keep our jobs and get our child to childcare. If	
bus routes were unavailable this would be devastating to our family and likely require one member of	
our family to stop working in order to manage childcare.	Bus Service
I find it important to keep Metrobus routes such as the G2 and D2 because they allow access to	
Georgetown to the larger DC area, which is important for those living and working in other areas of dc	Dis Casa las
who need to access the Georgetown neighborhood and university.	Bus Service
It is really frustrating that there was enough funding to install those new fare doors but not enough to keep lines running. Keeping the service the same should have been the priority. The whole Glover	
Park/Burleith/Georgetown neighborhood is already fairly inaccessible and not everyone can afford	
alternative means of transportation like ubering. I depended on these lines (G2,D2,D6,33) heavily	
throughout my four years from getting to work to being able to go out into the rest of the city without	
spending the majority of my paycheck on the transportation. Also knowing that the majority of people	
who use these lines are not students and those who more fully depend on transportation than students	
will. Georgetown is a well off school, this will disproportionately impact the employees, and financially	
insecure students that already have a difficult transition into Georgetown's culture. While I may be	
impacted and all my friends who use these lines, our dependability on these lines is much smaller than	
its adverse impact on others. I?m graduating and moving before these changes take place, but this is	
important enough for me to fill this out.	Operating Budget, Management and Spending
Eliminating 22f and 22a would eliminate all of the routes that travel through South Fairlington. The	
only remaining option is 7a which it across the highway, and it is already a crowded but that you are	
proposing reducing the service of. I think this proposal effectively cuts off the Fairlington Community	
from getting public transportation to the metro. It?s a nightmare.	Bus Service
Eliminating the 96 would be drastic - the only alternative for me to get to where I need to go (when the	Sub Sch Hee
96 is delayed, which is often) is driving or taking a ride share. Others may not have the resources to do	
that. I live on 29th ST NW - I fear that there's a perception that everyone is rich in NW DC, so that's	
where cuts should be made, but I have a lot of elderly neighbors who rely on that bus for essential	
appointments, grocery shopping, etc. During the day on the weekend, that bus is half full of older	
women with grocery carts, and in the evenings, there are a lot of students. There are a lot of regular	
riders on this bus, this would be a terrible decision.	Bus Service
Please don?t get rid of the G2	Bus Service
This plan will negatively impact my community in Wheaton. Both my husband and I commute into DC,	
which takes 40-60 minutes total. Breaking up the red line so that north of silver spring is another train	
and increasing wait times will add up to 25 minutes to our commutes. That's almost an additional hour	
every day spent waiting for trains, and 3 hours total commuting. That plus increased fares would	
probably leave us reliant on one car (difficult considering we work different hours) since \$15 plus 3	
hours each to commute would no longer make metro worthwhile. I suspect that these changes will also	
make the trains less safe as less people would be riding, leaving the vulnerable more exposed to the	
dangerous people on the trains.	Fares/Fees/Parking
Eliminating D2, D6 and G2 would negatively impact those commuters who work at Georgetown	
University and this area of DC that is not served by a metrorail station close by.	Rail Service
Please do not reduce bus service along Connecticut Avenue crossing the MD/DC border. There are	
already so few stops and infrequent buses. I would take the bus about 4-5 times a week if it were more	
reliable and frequent.	Bus Service
Don?t get rid of the g2.	Bus Service
M4 is vital for public school transportation work travel to reduce driving.	Bus Service
People avoid paying when they get on the metro and buses If you could require customers to pay,	
there would be less need to cut vital bus totes fir paying customers. It?s just not fair. G2 is a vital bus	
line that crosses Washington, from Howard to Georgetown. This proposed cut will force many people	
to take Ubers. That would bd ridiculous. The people who take the G2 don?t own cars (workers,	
students). Please keep the G2 as is. Thank you.	Bus Service
The G2 line is incredibly important for Georgetown students and residents. The area is already	
extremely inaccessible due to the lack of a subway stop; eliminating one of our main bus routes would	
significantly reduce the connectedness of this community with the rest of D.C. As a student who loves	
the arts and experiencing what the district has to offer, I have no doubt that taking away this bus	
would be synonymous with taking away the ability to travel, SPECIFICALLY to low-medium income	
students while upper income residents turn to other third party services such as Uber.	Bus Service
I would love for Metro to address the exponential increase in fare evaders. It's outrageous how many	
people I see on a daily basis jumping (or walking through) the gates without paying and with impunity.

Please note majority of DC and our neighbourhood doesn?t have any cars and we all using only public transportation The D6, D2, and G2 buses are the only bus lines currently serving a significant portion of the lower end of Ward 3. Not only are they highly utilized today for students traveling back and forth to school and hospital workers at slibley Hospital, but would be a critical component to any Ward 3 plan that seriously contemplates meeting the city-wide affordable housing goals. With DCPS recently opening MacAthur high school and many students from across the district traveling by bus to get their education, there would be a major disconnect between the executive branch and WMATA if the school was left in a transit desert. These are critical areas to maintain public transit in. I rely heavily on Metrorali and service cuts are not the solution to fixing years of malpractice and neglect to the system. WMATA needs to improve overall management and accountability within the system. I hope that WMATA resolves it's issues and becomes the transit organization that the DMV needs to continue to meet the needs of a modern city. As a resident of Glover Park, the D2 and 31/33 routes are my only transportation options to leave my neighborhood. The elimination of the D2 bus, in particular, would cause financial hardship and force me to move because I rely on the D2 for my commute to work. I also depend on regular bus service using the 31/33 lines, and the proposed change would make mamy of my daily activities more difficult. Please do not cut bus services to communities that do not have metro access!! Not enforcin	Capital Budget Bus Service Bus Service Bus Service Operating Budget, Management and Spending Operating Budget, Management and Spending
This is creating a culture of lawlessness that is dangerous for those of us who follow the rules. Metro needs service expansion not cuts. With all the taxes dc collects, stop funding cops and start funding services. D6 is the only bus serving our community, cutting it down you are cutting access to hospitals and any other access to elder people and a lot of people without transportation. Please note majority of DC and our neighbourhood doesn?t have any cars and we all using only public transportation The D6, D2, and G2 buses are the only bus lines currently serving a significant portion of the lower end of Ward 3. Not only are they highly utilized today for students traveling back and forth to school and hospital workers at Sibley Hospital, but would be a critical component to any Ward 3 plan that seriously contemplates meeting the city-wide affordable housing goals. Please do not reduce accessibility to neighborhoods that are already not connected to the metro. It will only incentive people to move away and it will further reduce your revenues even more. People will not	
want to live in DC if these changes are made.	MetroAccess
What about charging the fare? I?m one of the 30% paying every time I ride. The D6 is a lifeline to older	
residents of Georgetown and low paid medical at GU and Sibley Hospitals. It?s loss would be huge.	Fares/Fees/Parking
If we could capture the fares for people who routinely jump the turn styles, how would that impact the	
budget? It is VERY FRUSTRATING to see so many people (often young people) just push through the entry/exit gates at stations. It makes me wish I had a tazer so I could gently zap them and say hey, pay	
the fare. (not likely to act on this, just trying to figure out how to get their attention so they know what	
they are doing is unlawful and has consequences for others.	Operating Budget, Management and Spending
Please do not eliminate the quality of service, frequency, or bus routes. Instead, focus on finding a	-
private public partnership to fund your budget shortfall. DO NOT transfer the costs onto consumers,	
most of which are low income, and rely heavily on WMATA?s services.	Operating Budget, Management and Spending
Do not cut the bus lines, and do not cut service times. I will not take the metro if it's not convenient, which means it runs often	Bus Service
I do not support fare increases or reducing service to stations.	Fares/Fees/Parking
I often see riders NOT paying when boarding the bus. Is it possible for reduced fare/subsidized fare that	
does NOT impact the budget?	Operating Budget, Management and Spending
raise fares on rail but not on buses, which poor folks use much more	Bus Service
The thought of reducing service to save money is rather silly as that won't fix the budget problem beyond temporarily. Reducing service reduces ridership, which reduces revenue, which likely reduces	
margins, which demands further service cuts. Raise prices, offer discounts to our vulnerable	
populations, and move on.	Operating Budget, Management and Spending
Cutting off the bus services that are connected with Georgetown University will present a significant	-
hardship to its employees, especially given a lack of a metro stop (and on-campus parking is limited and	
astronomical).	Bus Service
Metro is what truly sets D.C. apart as a livable and accessible city. The proposed service cuts particularly on Metrorailwould be devastating for ridership.	Bus Service
G12 route serves children attending Greenbelt Elementary School and also many senior citizens living in	
this area (there are many one bedroom homes here). I am a senior citizen and may lose my drivers	
license due to health conditions. I need to have the G12 route available.	Bus Service
Public transportation should be publicly funded. The people who can least afford to pay are the ones	
who most need public transportation. And we all benefit from widespread use of public transportation,	Missellapaous
not just the riders. The G2 is the only public transit option for students living in Shaw, Logan Circle, and nearby	Miscellaneous
neighborhoods to commute to Georgetown. Students are constrained in their expenses and transit	
options already. Eliminating the G2 without providing students any public transit alternative would be	
an incredible disservice and disappointment.	Rail Service
If you eliminate the M4 and D6, you eliminate our neighborhood?s only public transportation and the	Due Comine
only public transportation for students to reach our neighborhood public middle and high schools. I appreciate having access to MetroBus and MetroRail. I have lived in the DMV since 2008 and have	Bus Service
commuted to work via public transit that entire time. My family and I use rail and bus to get to	
downtown DC and to the airport on a regular basis. I would rather see greater taxes on car use within	
DC and restrictions on where cars can go in order to increase use and ridership. While I prefer increases	
in fares versus decreases in service, I find it difficult to make an informed decision without	
understanding how low ridership is for some routes versus others.	Bus Service
Cutting service only leads to further decreases in revenue. Increase rates, give discounts to vulnerable residents, and move on.	Service Levels
We need to continue improving Metro so more people use it. Improve system and add bus lanes,	
congestion charges, etc to force higher usage. Do not cut metro quality of service.	Bus Service
Please keep the 63 bus going to and from downtown. Do not end it at Petworth. It is how many people	
in the neighborhood, including me, get to and from work.	Bus Service
Don't isolate the Georgetown neighborhood. Students frequently utilize the bus system I prefer Metro to address its budget shortfall through increases to the cost of driving: increase in tolls,	Bus Service

of gas, increase in tax to pay for roads and repairs and risk of killing people. Please don't cut service on the 42 and 43!1 take it all the time all the way from Mt. Pleasant to the Kennedy Centerl It?s my favorite bus route! I need the G2 bus in order to get to work everyday! Shared scooter (and bike) rental companies are negatively impacting metro ridership. I never see this discussed in the press. Tax these companies! You can?t eliminate the G2! That is a huge way that people get to Georgetown which has no metro stop! That is a crazy suggestion! Consistent service will trump everything else. The G2 is the only way I can access my place of employment (Georgetown). This is an absolutely vital service line. Decreasing service creates a cycle where fewer people can take the metro & creating less demand. Increasing reliable & affordable service allows people to rely on public transit We have several household employees and a nearby hospital (Georgetown University Hospital) that rely on public transportation. The D2 and D6 are crucial to our community. I would vastly prefer fare increases with enough notice - especially for those who use a monthly unlimited pass with SmartBenefits. I Feel like I can't say much about the bus routes now but I will be moving to an area where I will most likely use buses more to get to Metrorail stations (around Alexandria, King St, Van Dorn) but I'm not sure of what routes Please don't teliminate the G2 route Many of the Metrobus lines with proposed changes (or cuts) are ones I use frequently. DC is a metro friendly/walkable city - but if these changes are implemented you will be stranding folks. Please do not eliminate services. It's already hard enough to commute into DC without the proposed service cuts. We get that funding is necessary from DMV government partners, but cutting service on lines necessary for DC employees to commute into DC isn't it! cut weekends & late night before weekday commute, please! I ride the U4 Bus and the Orange line on the metro several times a week. These routes are very helpful	
for me, and my family to get to and from work and to drop off my child at school. The U4 is the only	
public transit option that is within my neighborhood (River Terrace, NE, D.C.) and it is used by many people in our neighborhood daily. If this bus service was eliminated it would greatly impact many of	
the people in my neighborhood's ability to move throughout the city and live their daily lives. Many	
kids use this bus to get to and from school. Especially because DC does not provide typical school bus	
service I think it is critical that Metrobus service is available to people, who may have very limited, or	
no other options for getting their children to school - ESPECIALLY FOR NEIGHBORHOODS THAT DO NOT	
HAVE CLOSE OTHER ACCESS TO METRORAIL STATIONS OR OTHER BUSLINES. Also, many, many times	
when I ride the bus the fare-taker system is not working properly and so the bus driver lets me get on	
for free. This is a serious issue that should be addressed. Fixing these machines and ensuring that they	
work consistently would be a very straightforward way for the WMATA to make more money. I also	
notice people coming on the bus and simply not paying, which is a separate issue that I do not know the answers for, but I think needs solutions as well.	Bus Service
If the 74 bus is eliminated there must be a replacement to service the southwest area.	Bus Service
Virginia needs to stop being a cheap skate.	Miscellaneous
Maryland and Virginia need to ultimately pay for its ridership. Fare evasion is a large problem;	
therefore there need to be ways to prevent fate evasion. As well as some free options - like the	
streetcar on Benning rd NE	Fare Evasion/Safety/Crime
Please do not cut the 74. It is an important route providing bus access to Southwest. Years ago Metro	
rook away the 70 routes that connected Southwest to Georgia Avenue. This is unfair to the community.	Bus Service
The G2 line is an extremely important point of access to the Metro bus system for Georgetown	
students, faculty, and staff, and eliminating the service would have a significant negative impact on the ability for community members to travel off campus.	Bus Service
Do not get rid of G2. A lot of Georgetown students use this to get to campus. Terminating such route	
will cause a lot of citizens of the DC area to stop using the metro and will lead to a boycott.	Bus Service
The infrastructure that I utilize and service schedules I adhere in my usual commutes is currently	
adequate. Barring additional funding from governments to cover financial shortfall, I think an increase	
in fare price is justified.	Operating Budget, Management and Spending
Please do not eliminate the 74. Metro already cut bus service to SW years ago. This would worsen	
access.	Bus Service
Without the M4 my neighborhood will be a transportation desert	Bus Service
My children use the D6 bus to get to their zoned public schools. There are no other public transportation options within two miles of my home. This would greatly disadvantage their ability to	
attend Key ES, Hardy MS, and MacArthur HS. DCPS would need to provide 'yellow buses' for these	
students on these routes, or an alternative metrobus line is absolutely essential.	Bus Service
Please do not cut the G2, D2 and D6, 33 and 31 bus lines as those are critical for people traveling	
through Georgetown. I use those frequently!	Bus Service
Without the Metro, I no other way to get to and from work. I cannot afford a consistent rideshare	
charge and prefer the consistency Metrorail provides.	Rail Service
D2 and D6 provide direct access to MedStar Georgetown University Hospital. Several associates use this	
to get to work, as do several patients for transportation to/from the hospital, appointments, visit loved ones, etc.	Rus Sanisa
Metro needs to invest more into rail and busing to decongest this area, not decrease or eliminate	Bus Service
service. It would be a poor decision to make it even harder to get to work, school, hospitals, and	
grocery stores.	Bus Service
Stopping the D6 would be very detrimental to the DMV community as many patients and staff	
members rely on the route to get to MedStar Georgetown University hospital. This would adversely	
affect the patient populations health, as a huge portion of the patient population relies on public	
transportation. Please, do not stop the d6 bus route.	Bus Service
this will significantly impact my ability to get to work	Miscellaneous
Georgetown Hospital already doesn't have a metrorail stop. By reducing access (by eliminating the D6 and D2 operations) it will limit access to the hospital for associates AND patients.	Rail Service
Eliminating the D2 and D6 will severely reduce the possible options of transportation to Georgetown	
University Hospital. This is a service desperately needed by many, especially since there are no Metro	
trains within any distance of the hospital.	Rail Service
Your biggest issue/opportunity is metrorail parking. You have many many commuters who who use kiss-	
n-ride because there is zero parking at stations. This greatly diminishes your customer satisfaction and	
usage. You know that right? You need to establish parking infrastructure and offer a monthly fee. You	
will then have a budget surplus. No matter what you charge it will be cheaper than the toll roads.	Operating Budget, Management and Spending
The D6 and D2 is a critical artery for patients and associates of either MedStar Georgetown or Sibley hospital. Additionally, the D2 provides access to Metrorail / redline for neighborhoods without	
Metrorail access.	Rail Service
The D6 and D2 are essential routes for everyone that works at Georgetown hospital and patients of the	
hospital. It is literally the only public transportation to the hospital. If these routes are cut, I don?t	
know how any workers or patients will be able to get to the hospital. This will disproportionately affect	
people in lower socioeconomic status who cannot afford to drive or take a taxi/Uber.	Bus Service
As an essential employee of MedStar Georgetown University Hospital, I use the D6 and D2 routes up to	
10 times per week. Cutting these routes would significantly impact my ability to get to my place of	
employment, where I provide care for some of D.C.'s most vulnerable residents. I highly encourage	
WMATA to reconsider cutting these service lines, or any service line that provides direct transportation to D.C.'s hospitals.	Bus Service
D6 provides patients and staff access to MGUH and Sibley Hospital? with no other comparable ways to	
access these hospitals.	Bus Service
D2 and D6 are important bus routes for the Georgetown community	Bus Service
The D6 is the only bus that provides service to Medstar Georgetown and my current form of	
transportation to get to the hospital. If this bus route were to be cut, there would be no metro access	
to get to this hospital (rail or bus) and it would negatively impact employees and patients. This route is	
always VERY busy, so not sure why it has been selected as a route to be eliminated.	Bus Service
I will not be able to get to school if you remove the d2 and the d6 and change the routes of the 42,43 and I2. I will need to drive everywhere and it will be both more expensive and much worse for the	
environment. Around 500 kids depend on the d2 and d6 to get to school every. We need those buses to	
access our education because the nearest metro station is a 30 minute walk away.	Bus Service
The D6 and D2 buses are really the only forms of public transportation to and from Georgetown	
Hospital from off campus. This limits people's ability to access the hospital for their needs, and	
discriminates against a population that would largely rely on public transportation for hospital services.	
I do not support eliminating these lines.	Bus Service
I do not support eliminating these lines. Eliminating the D6 bus would be terrible. I use that bus to get to work at Georgetown University	Bus Service
I do not support eliminating these lines. Eliminating the D6 bus would be terrible. I use that bus to get to work at Georgetown University Hospital. Lots of students ride the D6 to get to their schools. One of the schools is the Duke Ellington	Bus Service
I do not support eliminating these lines. Eliminating the D6 bus would be terrible. I use that bus to get to work at Georgetown University	Bus Service Bus Service

Comment	Category
If we cut the services, the metro will die. We need to maintain high reliability and frequent service to	
ensure that ridership doesn't plummet. Having a robust metro system is absolutely vital to the DMV. We cannot make cuts. People depend on these services to get to work, appointments, ect. This is also	
	Due Convine
important to limit the number of cars on the roadways. Cutting the 96, L2, G2 would cut my usual daily bus ridership to zero. Between Connecticut Ave and	Bus Service
metro stops is extremely challenging for transit users with physical disabilities and cutting the L2 and	
96 would cut these neighborhoods off from easy access to other parts of the city. This would	
dramatically lower my quality of life and I would have to consider leaving my neighborhood.	Bus Service
STOP LOSING MONEY. YOUR ORGANIZATION IS IRRESPONSIBLE.	Miscellaneous
The D6 And the D2 are crucial to metro riders and patients going to and from Medstar Georgetown	
University Hospital and Sibley Hospital. To Discontinue these services would be a major disservice to	
the citizens who depend on public transportation to get to work and to doctors appointmentsnot to	
mention those who do not drive that need to go to the hospital to visit friends and loved ones. A HUGE	
DIS SERVICE TO ELIMINATE THE D6 AND D2 I have bern using the D6 route. a long time, eliminating this route would affect my commute to work	Bus Service
very badly	Bus Service
Please do not eliminate the G2 and D6 routes, these routes are relied on by Georgetown University	
Staff, Faculty, and Grad students who cannot afford to live close to the campus.	Bus Service
D2 and D6 lead to medstar Georgetown University Hospital further decreasing healthcare access	
disproportionately to those reliant on metro which historically has been lower socioeconomic and	
underserved communities. Patients already struggle to get to the hospital due to lack of metro rail (and	
we all know the racism in dc?s history that lead to the lack of metrorail in Georgetown) and this would	
further exacerbate the problem. This is not a good look for DC further stopping those who need it most	
from accessing healthcare. The second closest hospital is GW which is for profit and does not take	
many of the insurances patients have. Additionally many employees are reliant on the bus to go to and	
from work due to the lack of parking space and traffic congestion leading to the hospital. This would	Due Comise
increase congestion worsening ambulance response times and potentially put people?s lives at risk. The D2 is the only bus that goes to Glover Park. A good number of people uses it as part of their	Bus Service
commutes.	Bus Service
Please do not change any routes which would further reduce access to Georgetown. With no metrorail	
access, bus routes are the only transportation option available for the many people who work and	
study in that neighborhood.	Bus Service
Eliminating the D2, D6, and X8 lines would severely impact the residents of DC access to major stops	
like local hospitals, Union Station, and other stops relative to grocery stores, medical offices, etc. This	
would be an extreme disservice to the community, especially those without vehicles to compensate for	
lack of available public transit.	Rail Service
Eliminating the D6 and D2 routes will severely affect both the patients and employees at MedStar	
Georgetown University Hospital. Many people rely on Metro service to get to the hospital 7 days a	
week, especially since there is no Metro rail service in the Georgetown area of DC.	Bus Service
Please don't cut the D2/D6 Metrobus is the last line of defense providing the most freedom-of-movement for disabled and low-	Bus Service
income residents and represents the most accessible and flexible transportation option, and covers the	
most city area geographically. There are valid reasons why riders such as myself eschew using	
Metrorail, especially because of limited coverage and the inconvenience of mixing and timing travel at	
subway and surface level. Increased wait times at bus stops hurt those who can't afford Uber/Lyft. Bus	
route curtailments and eliminations only serve to increase existing congestion on our roadways, and to	
constrict our ability to get around, and at worst, eliminate destinations that were once reachable. One	
of the biggest failures of WMATA is its continual failure to listen to and understand its ridership,	
especially the unique and critical role bus transportation plays. To you, it's mostly about economics: a	
dedicated funding source, blah, blah, blah. To us, bus transportation is a lifeline and freedom to travel	
around the city. Recent bus line route changes such as the head scratchers of what was done to the 80	
and 42 bus lines in the last two years or so, for instance, beg the question of what criteria you use to	
devise and change (read destroy) travel patterns and access to city destinations. With traditionally	
lousy east-west bus route planning (tons of options downtown and on U Street NW, but far and few	
between mid-city like G2 and G8, and mixed results above U Street NW with the H buses), you now	
want to fix what ain't broken to achieve what end? Sometimes, the most 'efficient' or 'logical' routes do	
not meet the needs of your customers. And don't get me started on the 'accuracy' your bus route rider 'statistics' by altering routes based on supposed 'low ridership'. Bus operators don't always log non-	
paying riders, so it's a wonder you even know what number of riders actually is. I could go on and on,	
but it probably won't make much difference. You and your so-called 'transportation experts' will find a	
	Miscellaneous
I work at Medstar Georgetown hospital- our employees and patients rely on the D6 and D2 to get to	
the hospital to work and seek care. Elimination of these routes would severely damage accessibility to	
Georgetown Hospital AND Georgetown in general, as there is no metro at all in this part of town. I	
strongly urge Metro to reconsider the elimination of these routes- our community depends on	
metrobus accessibility.	Bus Service
FIND THE MONEY WMATA!!!!! WHY ARE THE RIDERS BEING MADE TO SUFFER FOR YOUR LACK OF FISCAL ACCOUNTABILITY??? CUT YOUR SALARIES!! TAKE METRO YOURSELVES!!!!ONLY THE PEOPLE	
WHO NEED METRO ARE SUFFERING WITH ALL OF YOUR DRASTIC CUTS!!!!	Rail Service
Eliminating bus routes D6 and D2 to georgetown would eliminate thousands of patients and associates	
ability to access their healthcare and employment. PLEASE DO NOT eliminate these routes. Georgetown	
is already hard enough to get to as is. Additionally, increasing time between trains is not only	
discouraging, but will immediately discourage me from using the metro. My commute is already very	
long and at this time makes me have very limited options ot use the metro. It is already very bus and	
impacts my comfort and feeling of comfort in this public atmosphere. Please consider to continue the	
trains at it's current frequency, especially on green line.	Bus Service
Eliminating routes that transport riders to healthcare and education where there is no metro train	
station nearby is baffling. Without the D6, I never would have been able to get to my job at the	
hospital. Eliminating these routes will significantly impact patients who need healthcare, employees	
who need to work, and students needing their education who do not have cars or easy access to the hospital and university.	Bus Service
Decreasing public transportation goes against getting more people to ise public transportation, reduce	
congestion, and impacts on climate change.	Miscellaneous
By cutting the D2 and D6 buslines, you greatly impact how patients and employees get to MedStar	- ···· •
Georgetown University Hospital. I would on the Labor & Delivery floor, and have several employees	
that can only get to work via bus who will no longer be able to attend their jobs. Additionally since	
there are no longer any maternity hospitals in the eastern half of the city, MANY of our patients and	
visitors make use of the bus to get to the hospital. Eliminating these routes would only exacerbate the	
maternal health care crisis in the east half of this city. More patients would have to resort to calling	
ambulances for non-emergency calls, leading to over-usage of critical resources that would best be	
used elsewhere. Getting rid of these bus lines is something that WMATA routinely threatens, and it is a	

Comment	Category
Cutting services would make it more difficult for people already struggling to get to work throughout	Construction of the second s
the city. It would only make matters worse.	Service Levels
Please don?t eliminate the D2 or D6 so many people including me rely on it for everyday use for school and work it would make life so much more difficult	Bus Service
Please don't eliminate the D6 Bus!! It is a vital community bus route that would negatively impact	Bus service
Thanks for helping us to transport us safe	Fare Evasion/Safety/Crime
if you discontinue the g2 ill kill myself and you will all have blood on your hands	Bus Service
I am a manager in NW DC, and employ many associates with low socioeconomic status and limited	
resources. They rely upon the D2 and D6 routes in order to provide clinical care and support services for	
critical health needs. They do not own cars, and no parking is available if they were to obtain cars. If	
these routes are eliminated or even reduced, these individuals will be out of work, and I will not be	
able to hire other associates to provide crucial healthcare services. This would impose undue burden on	
many potential employees and residents.	Bus Service
I would urge Metro not to elimate bus routes that are the only bus route serving a particular	
neighborhood, especially the D6 in Palisades. The D2 in Glover Park is at least complemented by the D1, but the D6 is the only route servicing that neighborhood.	Bus Service
I'm a social worker at MedStar Georgetown. The only buses that go by Georgetown are the D2 and D6.	Busservice
It is VITAL that these lines run not only for staff but for our patients and visitors as well.	Bus Service
The individuals that will be affected by this are in low income and front-line service positions at their	
employer and would have a significant impact on their commute to work and job security if they do not	
have metro transportation and reasonable fare rates.	Fare Evasion/Safety/Crime
I work at Georgetown Hospital. I do not drive. I take the metro from Northeast DC to Georgetown. The	
U4 Is the only bus to get from Sherrif Road to Minnesota Ave Metro. It is a short route but a needed	
route. Public transportation should not be cut around facilities like Hospitals or Schools. Dupont circle	
is the closest DC metro to Georgetown Hospital. and the D6 and D2 are the only buses that come close.	
This would seriously not be good for me as well as for other employees that use public transportation	
to get to work.	Bus Service
D6 and D2 are vital to so many getting to Georgetown University Hospital that work here or need to get	
to the hospital. It would really hurt associates here since parking is especially an issue at our work and	Rus Sanira
many choose to live bus distance away . Send me smart rip with money to pay my fare	Bus Service Fares/Fees/Parking
The D2 and D6 bus routes directly affect patients and associates at Medstar Georgetown University	
Hospital- there is no metro train nearby. Please consider keeping these routes.	Bus Service
Eliminating the G2 will be very bad for students at Georgetown and DC community members	Bus Service
how can the city possibly be considering cutting a bus line that serves a hospital??? (D6)	Bus Service
Please do not eliminate the G2 busline! This is the third time in recent years that you have asked for	
input on this, and the answer is a resounding NO!!! to eliminating the G2. The route is vital to	
Georgetown University students, faculty, staff and visitors. The University is inaccessible by subway,	
and now you want to make it inaccessible by bus as well? This doesn't make any sense. In the first	
place, the bus is primarily used by people who work at the university (or in Georgetown) and come	
from other parts of the city. You are proposing to make working people's commutes significantly longer and less convenient. I work in the Car Barn. With your proposed changes the closest bus stop is 5 or 6	
blocks away from the Car Barn (and 3 or 4 blocks from Healy Gates). There are older people and people	
with disabilities who take the bus and now they would have to walk several blocks from the bus stop to	
get to a major university in the city? I have been on the bus when travelers from other parts of the	
United States or foreign countries are coming to visit Georgetown. Now they have to walk several	
blocks through a neighborhood to get to the campus? Why would a major city make its most	
prestigious university so inconvenient to public transportation? Is your goal to have people stop using	
public transportation? And what about the fact that now everyone who wants to go to Georgetown is	
dropped off on the corner of a residential neighborhood? I don't see how that's good for the	
Georgetown neighbors, especially since many of the people getting off the bus will have no idea where	
they are going. Suddenly there will be flocks of people blocking the intersection of 35th and Q. The G2	
bus connects Georgetown with the rest of the city. Think of the name of the line: Georgetown-Howard.	
That is symbolic. Do not further isolate Georgetown from the rest of the city. The G2 bus benefits	
people from other parts of the city. The 'rich Georgetown residents' never ride the bus. It doesn't	
benefit them. But it does benefit people who work and study and visit Georgetown, and these people are from all walks of life, all parts of the city, and varying levels of physical mobility. It would be a	
shame to cut Georgetown off from them! This is a short-sighted decision that is bad for the city of	
Washington DC, not just Georgetown. PLEASE DO NOT ELIMINATE THE G2 BUSLINE, AND DO NOT	
ELIMINATE THE STOPS AT HEALY CIRCLE AND THE CAR BARN!!!!!!!!!	Bus Service
I prefer service cuts to frequency rather than eliminating lines of service completely. Please do not cut	
the D2, D6, and G2 as that nearly isolates Glover Park and Palisades neighborhoods from transit. I also	
use the 42/43 to get to and from Kennedy Center as it connects to the red line and do not want cuts to	
that service.	Bus Service
The whole point of the metro is to help the citizens commute. Cutting lines is no helping literally	
anyone, you are just making people mad. Increase prices and leave the metro routes how they are.	Bus Service
Stop wasting your funds on cops and fare gates that don?t anything other than punish the people who actually use your service. Increase the service frequency in your NW area bus lines, and make the buses	
	Bus Service
free like you promised. The D2 and D6 busses are imperative to the functionality of MedStar Georgetown University Hospital.	
Not only does this help our patients get to their appointments/leave the hospital after their stay, the	
majority of MGUH associates use these busses to get to and from work. This change is extremely	
concerning to the functionality of MGUH as it would decrease staffing and be unsafe for patients.	Bus Service
Of all of these, the 96 cut, followed by the 42/43/L2 changes are the most impactful to my ability to use	
the system. I am willing to pay more fares to keep the system up.	Fares/Fees/Parking
The D2 and D6 are needed by many students to get too and from school every day, if these buses are	
discontinued, it will negatively impact students? ability to get to school.	Bus Service
Please, please, please just increase the fares. Subsidize them for people who truly can't pay. Keep	
installing higher gates to prevent fare evasion. Cutting service is a horrific idea (coming from someone	
with an advanced degree in public policy analysis).	Fare Evasion/Safety/Crime
Reduction in metro rail is not what this country needs. Highways have not gotten more efficient despite	
massive investments, parking in the DC area has continued to become less available and increasingly	
unaffordable prices. A decrease in rail service makes the city less attractive to tourists and encourages me to move elsewhere.	Earos/Eaos/Parking
me to move elsewhere. SAFETY ! Please invest in safety ! The system is over run by dangerous people fare avoiders	Fares/Fees/Parking Fare Evasion/Safety/Crime
D6 and D2 should not be elimated due to the frequency it used by the community, especially on the	i are Evasion/Sarety/Ullille
fact of its location. Metrorail fares should not be increased to compensate for other areas within the	
metro system.	Bus Service
Please don?t get rid of the D2 I?m not trying to walk to school with big instrument	Bus Service

Comment	Category
Please do not cut the G12 route - it provides a vital - and one of the ONLY links between Old Greenbelt	
and the Greenbelt metro. Many folks in Old Greenbelt do not drive or own cars, and this would be	
extremely detrimental to their ability to get around.	Bus Service
Please do not eliminate the D6 bus - it serves two hospitals in the District and would negatively impact	
access to care for vulnerable populations.	Bus Service
Please keep the D6 route. It drops off in front of both Georgetown and Sibley hospital and is so	
convenient in any area of the city that doesnt have metro access	Bus Service
I am a nurse at the Georgetown hospital and NEED the D2/D6 to get to and from work. Considering the	
fact that bus routes in and out of Georgetown are already limited AND there is no metro train in	
Georgetown, it is crucial for health care workers in DC that these lines remain open.	Bus Service
I do not want service cuts or fare increases - certainly not fare increases for service when it's poor,	
trains are delayed etc. I understand reducing/eliminating routes with low ridership and prefer that	
option first (provided that metro is proactive in its community engagement). If metro fares went up, I	
would take the bus over the rail. I do not have a car, so I don't have many alternatives besides Uber -	
which I've found spotty lately (for the places I go). And it's getting more expensive.	Bus Service
For the nation?s capital it?d be embarrassing not to have a world class transit service. I?m taking this	
survey the day it?s announced the Purple Line is pushed to December 2027. While that?s not a WMATA	
project it speaks to the political will of the DMV to fund transit. I love metro. I want to see it become	
the best it can be. You all keep doing excellent work and hopefully Annapolis and Richmond will wake	Service Levels
If D2 and D6 routes are removed the residents palisades have to means of transportation to get to	
metro or close to downtown and vice versa for residents and employees trying to reach the	
Georgetown Hospital, Sibley Hospital, and the new MacArthur High School.	Bus Service
Need to balance fare increases with service cuts to the extent possible. Also take into consideration	
how service cuts impact the proportion of riders that have transfers (especially on Yellow/Green Line).	
Eventually, when wait times are too long people will abandon transit. It is imperative for the region to	
come up with a comprehensive approach to DEDICATED revenue to support metro service.	Bus Service
I'm tired of routinely paying my higher full fare during rush hour only to watch the lack of enforcement	
of turnstile evaders and vagrants roaming within the system.	Fares/Fees/Parking
I understand the need to economize but cutting or eliminating route negatively impacts those of us	
who are most dependent on rail and bus to live our lives. Without routes as they currently exist, many	
low income workers will it have transportation to work other than private vehicles or ride share both of	
which are expensive. I, for one would not be able to access doctors, family and friends, pharmacies or	
entertainment unless someone was willing to drive me. Like many seniors. I am in a fixed income. I	
don?t want to spend my golden years stuck at home because metro had cut services and raised fares.	
Please take the needs of handicapped and disabled riders into account, as well as those of us who	
depend on the bus and rail everyday. Thank you.	Bus Service
You can't cut service. No way.	Service Levels
They have to change administrators, improve their financial situation by cutting staff, and making work	
efficient.	Operating Budget, Management and Spending
I regularly use the G2 bus to commute to and from work at Georgetown. This is the only convenient	
and reliable bus route to meet my, and many other Georgetown employees' commuting needs,	
and stalls show that the set direct means will be for the Construction of Physics at the Construction of	
especially since there isn't any direct metro rail service into Georgetown. Eliminating the G2 bus route

My commutes to and from work would be severely impacted if a lot of these bus routes were cut. The metro workers, ie: station managers, bus drivers and train operators are all rude as to everyone and they make really Good money to treat ppl so badly that pay for the service they render, so that it from they smart The Huntington metro manager on duty wouldn't let me use restroom when I was pregnant I I peed as going out exit and he thought that was so funnyl Fat dough dough Not having services, especially the MetroRail services, after midnight is a horrible idea. It would hinder people's independence and the accessibility of the city. It would would create a huge problem for those who work 2-4 jobs to support their family in this ridiculous economy. It would surely be discriminatory towards those who struggle financially. I also think the lack of rush hour MetroRail services disaster. It is already so crowded during the peak hours, that taking that away while lowering the frequency of service would put a huge strain on the Metro system. I frequently traveled on Friday afternoons and Sunday afternoons to and from my parents house in Virginia using the Red Line. Even during arguably non-peak our times, it is still incredibly crowded. It would be downright dangerous to reduce the frequency of services during peak hours, because people make frantic to get off on their stop, pushing people to the floor knocking them down. People's jobs would be impacted if they miss one train and have to wait 15 minutes, since it would reflect negatively on their commitment to their position. Additionally, many health clinics have a grace period of 15 minutes. If even one hiccup were to happen along their journey (and we all know we need to plan for multiple hiccups, especially when using public transit)	Bus Service Bus Service
would severely negatively impact myself and others who rely on the G2 bus to get to and from work. I would not bother with my auto refills on my SmartTrip anymore, in favor of saving the money to take more ride shares or rent a bike. My commutes to and from work would be severely impacted if a lot of these bus routes were cut. The metro workers, ie: station managers, bus drivers and train operators are all rude as to everyone and they make really Good money to treat ppl so badly that pay for the service they render, so that it from they smart The Huntington metro manager on duty wouldn't let me use restroom when I was pregnant I I peed as going out exit and he thought that was so funnyl Fat dough dough Not having services, especially the MetroRail services, after midnight is a horrible idea. I'm willing to pay more for clean and safe transit, and right now, both are a crap shoot. If you are going	
to reduce services times, trains have to run on a schedulei.e. I could rely on my train arriving at 10:20 a.m. or, if I miss that, 10:35 a.m. Next Train is okay, but the more time between trains, the more	
reliable it needs to be so people can plan ahead. I have entered at my station when both NextTrain and	
the boards read 'Train leaving in 5 minutes' only to have the train pull out of the station as I'm going up	
the escalator. Then it's anyone's guess when the next will arrive. Parking should be free or reduced at	
furthermost stations on weekends to encourage ridership into the city. Otherwise, it gets nearly as	
expensive as Uber.	Fares/Fees/Parking
please don?t remove D6 :(The only reason L can live in this sity without a car is due to the metro and hus infrastructure. The	Bus Service
The only reason I can live in this city without a car is due to the metro and bus infrastructure. The 31/33 bus line has a very high ridership at all times of day and the route should not be shortened! It	
will highly affect my ability to navigate the city along with hundreds of other NW DC residents! I also	
work at Georgetown Hospital and our staff would be heavily impacted if there were any changes made	
to the D2 and D6 bus lines since there are stops directly in front of our facility. Please continue to	
provide that service so that we can continue to care for our sick and less fortunate citizens. Thank you!	Bus Service
I am so beyond disappointing that these cuts and fare increases and even being considered. I loose 40%	
of my paycheck to taxes, I have to pay for parking and to drive on so many roads, and now I won?t be able to affordably get to work and possibly won?t be able to get to work at all. If you cut the P6, how	
do you suggest I get to work. You can be the one to inform my employer that I will be late to work	
because I have to walk three miles there. It is so evident that this city and the government does not	
care about their residents in any way. I am leaving DC after my lease is up in May. I can barely afford to	
live here after taxes and now it is clear that life here isn?t sustainable. Figure out how to provide public	
transportation to your residents with out punishing them and making their lives worse, it?s your one	Four (Four (Derline
job. These cuts are CRAZY and will make a city that is already going down hill so much worse. These are the	Fares/Fees/Parking
kinds of changes that would make myself and many others who want to support this city and it?s	
economic growth leave entirely. The city government is out of control and it?s quickly becoming	
impossible to live in a place that doesn?t respect its residents? time or money. Get it together, DC,	
before it?s too late.	Bus Service
Fix the gate jumping	Miscellaneous
You absolutely cannot get rid of the D6 and D2 bus routes. They are essential for many workers and	
patients to get to the MedStar Georgetown hospital. I like many people who need the bus don't have a car. I bike when I can, but can't at time especially during the winter months. Without the bus I would	
have no way to get to work. I work in the emergency room and many people on the bus also work	
essential positions. Patients also rely on the bus to get to and from the hospital.	Bus Service
I care most about the orange silver lines metrolines , I care most about service.	Bus Service
Metro should place emphasis on supporting areas where working class and low-income workers are	
located. It is unclear why Metro cannot seems to manage its work within budget and makes the public	
suspicious that there is waste or fraud. We have fewer lines, fewer trains, higher costs than other	
subway systems. I'd rather see more buses and routes than trains, but the bus routes are odd and not sufficient to get folks around the city in a way that makes sense.	Operating Budget, Management and Spending
As a high school student I depend on metro/bus to transport myself. I don?t have anyone to drive me	
to the places I need to be, many times I have to be at Virginia or Maryland or DC due to circumstances	
of life, if the service is cut down it will not only affect me but many people who cannot use a car to get	
to places and have already a very hard commute. Please don?t cut down the service (if nescesary I	
believe that there could be a community event organized, like a concert/performance so that funds	Due Cervier
may be collected to compensate for the shortage) Fare evasion has become so prevalent. It?s been so frustrating and infuriating. Here?s hoping Metro	Bus Service
finds ways to prevent it on Metro buses and Metro rail.	Bus Service
Start actually requiring people to pay for the bus and you would see a change in your shortfalls - maybe	
10% of people who get on the bus pay at this point.	Bus Service
Removing both D2 and G2 bus lines would make traveling to Georgetown very difficult. As a student at	
Georgetown University, I rely on these bus lines to get to and from the campus, since I live off of P	
street. These buses are always packed which shows the high usage of these routes. Removing these lines would severely impact many students' travel time, routes, and travel expenses. Additionally,	
removing both G2 and D2 would make it very hard to travel to and from the Georgetown	
neighborhood broadly. It would make Georgetown even more inaccessible since it doesn't have a	Bus Service
After being told that the metrobus would be free this year, to see a rise in fare prices is absurd. I luckily	
can afford the fares but as alternate transportation is already difficult to come by for lower income	
communities (especially to get to work to then be able to pay those fares), I'm abhorred at the fare	
increases. Additionally, the proposed route changes and cuts for the Metro bus, especially the removal of the G2 bus, would significantly decrease accessibility to and from Georgetown - an area already too	
hard to access via public transit. I work in Georgetown and take the G2 almost every day. Without the	
metro bus, I won't be able to get to work within a reasonable commute unless I take my car - but there	
is such a lack of parking that that is unreasonable. Where there is parking, it is \$15 or more. I barely	
make enough to live month to month. I can't afford to drive to work, pay to park, and then have most	
of my paycheck go to straight back into getting to work again. Outside of the workers in Georgetown,	
students desperately need transit options into downtown DC and other universities. Getting rid of the	
G2 will isolate young adults in a very vulnerable way. I think metro should leave the bus routes alone due to the fact the metro cuts would impact people in	Bus Service
traveling to work and about the metro area. I think metro should leave the bus a because i see metro	
losing more money with the changes.	Bus Service
There are DCPS schools that are ONLY accessible via the G2, D2, or D6. These need to stay.	Bus Service
The Georgetown area is so hard to get to given that it has no metro rail stop so eliminating bus routes	
would make it near impossible! This is a huge detriment for students, hospital staff, and patients who	
rely on the metro buses to get to school/work/the hospital. Glover park already is not well served by public transportation. Getting rid of the D2 would greatly	Bus Service
disadvantage Glover Park residence since we have such little access to public transportation.	Bus Service
The D2 is absolutely essential for Glover Park residents. Eliminating it, or changing the route, would	
severely inhibit my ability to get to work. The transportation options in the neighborhood are already	
very limited, and this route change would completely cut us off from Metro access. I would far rather	
have an increased fare than to have this route eliminated. Please, do not make this change!	Bus Service
Please do not eliminate the d2 and lessen 31/33 lines. Glover park does not have metro rail access and I	
rely on these bus lines to get everywhere, especially work and this would severely inconvenience everyone in the neighborhood. The 33/31 lines are always extremely busy in the morning and evenings	
as many people use them as commuter lines, this change could screw people over.	Bus Service

Comment	Category
An entire DC neighborhood, Glover Park, relies on the D2 and 31/33 routes to commute to work and	
get into downtown. The proposal to cut or limit all three routes is absolutely ridiculous, and would	
result in (1) more remote work, leading to less spending for businesses downtown, and (2) people	
leaving the neighborhood, hurting businesses in a part of town that?s already less trafficked than the	
rest of the city. Do not eliminate the D2 route, it is the only option for those of us that cannot afford	
the high rental prices near Metro stations. To cut an entire neighborhood off from DC public transit	
except for 1 line that doesn?t run very frequently is a complete joke, not even mentioning that the	
combined 31/33 line would become even more crowded and difficult to access than it is now.	Bus Service
It would be devastating to the Glover Park Community if you discontinue the D2. There is no metro in	
the neighborhood, which would make it very difficult to have transportation without a car, which many	
people do not have.	Bus Service
Increase the tickets, enforce people who don?t have tickets, not stop services. It?s common sense!	Service Levels
More bus stops need seating and shelter. The D2, 31, 33 lines are the only way people living in the	
Glover Park area can get anywhere in DC since we have no Metro. Eliminating these buses would	
isolate all of those people!	Bus Service
Eliminating the bus routes will not solve any problems. People use the D2 and 33 lines in order to be	
connected to the rest of the district since there isn't ANY metro stations in the Glover Park and	
Georgetown neighborhoods. It will make the district less accessible and it will be truly unhelpful for	
those routes to be eliminated. Maybe instead of pulling routes that people USE, maybe use the \$526.1	
million budget that was given to the Metropolitan Police department.	Operating Budget, Management and Spending
The D2 route is a vital link in my transportation system. I use it three or four days each week to get to	
Wisconsin Ave on my way downtown. 31 and 33 are critical to getting downtown from stops on	
Wisconsin Avenue and for getting from Foggy Bottom back to Glover Park at night. I would be willing to	
increase my senior rate in order to keep the service.	Bus Service
I currently live in Glover Park, which is mainly serviced by the D2, D6, 33, and 31 buses. This	
neighborhood is infuriatingly difficult to travel in and out of due to not having a metro stop closer than	
an hour away walking. Without the service of these four bus lines, it will be next to impossible for me	
or anyone else in this neighborhood to get anywhere within DC in any sort of timely manner. As it is, I	
already have to travel up to 40-50 minutes to get to my place of work in downtown DC, and this is	
often in the early morning (before 6 am) when traffic is not a factor. Please know that the elimination	
of these bus routes will pose significant hardship upon the people living in this area.	Bus Service
Really disappointed in these proposals- as it will likely disproportionately affect low-income	
communities of color who rely heavily on public transportation to get to their workplaces/to make their	
livelihoods. on top of this, it would be highly off putting to many potential residents of the city and	
deter them away from moving here if the public transportation system is both less frequent, less	
accessible, less connected all while being more expensive.	Fares/Fees/Parking
please do not eradicate the G2, D2, 31, and 33 lines they are the only way folks in Glover Park and	
Georgetown, as well as Georgetown students, can have equitable access to Metro services!!	Bus Service
The service cuts proposal would really over Glover Park. One bus line for an area that already feels	
underserved with public transit options. If anything, could there be an improved bus line that connects	
Glover Park to Red Line stops? Might as well allow the people here to have some option if you're going	
to completely strip away their public transport options East/West	Bus Service
That last question's format was confusing. I prefer fare hikes to service cuts, though I know not	
everyone can afford more expensive fares. Service cuts seems like they'd hurt more people but metro	
should examine post-covid evidence on what would have more negative effects on ridershipprice vs.	Bus Service

Cutting down on public bus transportation, especially in areas without much transport already (without metro stops), is one of the best ways to drive more people out of the city and raise costs. These proposed changes would disproportionately affect low-income people. Public transit most benefits the public when it runs sufficiently often, to a wide variety of locations, with very little downtime, and is very affordable. If you have to screw with people?s lives, I hope you will mimize the impact on people without other options. D2 and D6 elimination will significantly decrease patient access to MedStar Georgetown University Hospital and be detrimental to access to medical care for vulnerable patients Massively prefer price increase to service reduction, though I imagine any solution will require some mixture. Metro service is in such a pleasantly usable place currently, it would be unfortunate to see it diminished. Make metro free for all!!!!! And please don't keep the Silver spring metro closed for very long. If you eliminate the D2 31/33 routes the mwyself and hundreds of people have no way of getting to our jobs and our houses. You would leave the entirety of glover park without a bus route running through i	Bus Service Bus Service Rail Service Bus Service Additional Service Bus Service Bus Service Bus Service Bus Service Bus Service
I live in a part of Glover Park with very few transit options, and the proposed plan eliminates the D2, and reduces the 33 which are my only ways to get downtown via metro please do not eliminate the D6 and D2 routes. Students and workers need the bus routes, this is very important for us. I am an employee and was a student and getting to GU is already hard! Hopefully regional parties assist for all of their residents that take metro daily or for special events these cuts will also affect them especially as we hit Baseball season. Removing the D2/G2 bus rounds would have a serious impact on Georgetown University employees. Please reconsider cutting this route! Serve neighborhoods that are from from metrorail I know that DC is struggling right now, so I am even more disappointed in these proposed actions. Serve neighborhoods that are from from metrorail I know that DC is struggling right now, so I am even more disappointed in these proposed actions. Cutting down on public bus transportation, especially in areas without much transport already (without metro stops), is one of the best ways to drive more people out of the city and raise costs. These proposed changes would disproportionately affect low-income people. Public transit most benefits the public when it runs sufficiently often, to a wide variety of locations, with very little downtime, and is very affordable. If you have to screw with people?s lives, I hope you will minimize the impact on people without other options. D2 and D6 elimination will significantly decrease patient access to MedStar Georgetown University Hospital and be detrimental to access to medical care for vulnerable patients Massively prefer price increase to service reduction, though I imagine any solution will require some mixture. Metro service is in such a pleasantly usable place currently, it would be unfortunate to see it diminished. Make metro free for all!!!!! And please don't keep the Silver spring metro closed for very long. If you eliminate the D2 31/33 routes then myself and hundreds of people have no way of getting to our jobs and our houses. You would leave the entirety of glover park without a bus route running through	Bus Service Bus Se
I live in a part of Glover Park with very few transit options, and the proposed plan eliminates the D2, and reduces the 33 which are my only ways to get downtown via metro please do not eliminate the D6 and D2 routes. Students and workers need the bus routes, this is very important for us. I am an employee and was a student and getting to GU is already hard! Hopefully regional parties assist for all of their residents that take metro daily or for special events these cuts will also affect them especially as we hit Baseball season. Removing the D2/G2 bus rounds would have a serious impact on Georgetown University employees. Please reconsider cutting this route! Serve neighborhoods that are from from metrorail I know that DC is struggling right now, so I am even more disappointed in these proposed actions. Cutting down on public bus transportation, especially in areas without much transport already (without metro stops), is one of the best ways to drive more people out of the city and raise costs. With the planed coming of the FBI building to greenbelt it is churlish to remove transportation from the area. Whenever G14 doesn't show up commuters get on the G12 casing overcrowding. There is high traffic of people that have to travel from New Carrollton to get to Greenbelt station. Metro is becoming a Public Inconvenience. Then a lot of people commute to	will be zero, i.e. no public transportation near me to take people in my neighborhood (Berwyn Heights/College Park Estates/Yarrow) to any of the 3 Metrorail stations that the R12 bus serves. I think that's a real shame. Maybe you need other lines of revenue like sponsorship. Or you need to give things specialty train wraps and cards for cherry blossom festival. I think raising the fees is ridiculous. Stop the fare evasion. Don?t cut service lines Public transportation is fundamental; we will find the budget? together!!! Getting rid of the G12 route would create a hardship traveling to and from work We need more funding for public transportation, not less. Public transportation shouldn't be some money-making scheme. It should be an essential service, and an investment in our community. The proposals would again cut off Glover Park, Wesley Heights and Georgetown from public transportation. We would end up with almost unusable service on weekdays and no service on weekends. Duke Ellington School and Hardy Middle School would be severely affected, as would access to Georgetown University Hospital and Sibley Hospital, affecting staff as well as patients and visitors. I regularly take busses in the neighborhood and whole there certainly are times they are less frequented, mornings and evenings they are absolutely packed. Outside of rush hour they become unreliable and thus people choose other means of transportation, but this is due to WMATA's failure to provide reliable services, not a lack of interest on the side of the customers. Comment	Category
My life will be somewhat affected but I can ride my bike or walk to work if needed. My high schooler?s	
life and those of many of her friends will be really severely affected because their commutes to school via the 32/36 and the 33, and the D6 and D2. Students who attend Basis, Latin PCS, Hardy MS, and	
many other schools will be very affected by this. Don?t you have data on who uses the service? Can?t	
you figure out how to better serve DC?s youth who, God knows, have enough to deal with? I also find it	
deeply upsetting that in a city that constantly finds money for billionaire sports team owners can?t	
support transit for its students and working poor who depend on transit. Shameful!!!	Bus Service
I live in a part of DC that does not have Metro access (Glover Park). I am reliant on the bus system to	
get to work, to shop, to see friends etc. The proposed service cuts would cut off direct bus service to my	
neighborhood and severly limit options of remaining bus service. Already, it is impossible to get on a 33	
bus between 8am and 8:45am because of the many school kids on the bus. If you curtail the service, how do you expect all the people along the Wisconsin Ave corridor that take the bus now (meaning	
they need to go where Metro doesn't go), to get around? Also, if you change the bus route to end at	
Foggy Bottom (thus forcing people to transfer) and then at the same time reduce Metro service you will	
have overflowing metro stations and no trains to take people anywhere. All I want is to live in a city	
that allows for people who don't own a car to be able to move around using public transit - and do so	
without ridiculous wait times and being stuck on clogged roads. But your proposal will do just that. It	
will put those with cars back on the street because they can afford to drive themselves out of public transit misery. Meanwhile those of us reliant on buses will struggle even more to use the system	
because it is being cut to the point that it becomes unusable. Please do not cut off neighborhoods from	
vital bus service, especially if it's the only mode of public transit that is offered.	Bus Service
i need the d6, d2, 96, x8, and frequent redline metros to get to school. don?t take that away.	Rail Service
Metro wasted tax payers money so much in the past 10 years and now you want to cut services that	
people used to get to work. Get rid of the rude bus drivers instead	Bus Service
this will affect many students who rely on public transportation to get to school. please don?t cut	
necessary train and bus services for students, particularly those of us that are working class and have no other options. i support slight fare increases. students have access to kids ride free cards, and fares	
no other options. I support slight fare increases, students have access to kids ride free cards, and fares wouldn?t affect us, but decreased service would	Bus Service
I would love to use metro more to both commute to work via bus and to go downtown from my home	
in northern silver spring (near the Glenmont metro). However, the C8 bus route is so unreliable I often	
end up waiting more than an hour for a bus, which makes commuting impossible. It also makes travel	
down town by metro rail more difficult. I usually end up driving after the bus never arrives.	Bus Service
Eliminating D2 will confine its current users only to private cars and taxis.	Bus Service
Hey man please please please dont cut the lines I gotta get to school, see my family, go shopping, get	
home. please dont close N2,4,6 Those are my lifeline to graduate school. do price increase if you need to or allocate other areas of the budget	Operating Budget, Management and Spending
These proposals disproportionately affect black and brown communities. The removal or limit of lines	
like the D6 and 80 will make it harder for people to get to work and school. The proposals are not in the	
best interest of the most vulnerable people.	Bus Service
Strongly oppose any plan to eliminate the D6 bus line, which is the sole source of public transportation	
for myself, my family, and my neighborhood.	Bus Service
I am one of many Glover Park residents who rely on the D2 (and 31/33) to get into town and to access Metro stations on a regular basis. Lam shocked that we are considering eliminating and (or reducing	
Metro stations on a regular basis. I am shocked that we are considering eliminating and/or reducing service on these lines. For our family, these lines are critical. We do not have a high salary and do not	
own a car, like many of our neighbors. Without regular service on these lines we will be forced to rely	
on costly ride share services, further burdening our wallets and our already taxed/congested	
thoroughfares. At a time when we ought to be considering financial constraints for families and climate	
impacts, I feel we are moving in the wrong direction. (I am confident that I speak for many of my	
neighbors and colleagues in this neighborhood.) Thank you for your consideration.	Operating Budget, Management and Spending
You cannot leave a large portion of the city/population without any bus service. The D2 and D6 routes	
are the only routes to two major hospitals and many private and public schools. Many people, like myself, do not own a verhicle and the bus is our only mode of transportation. This, for me, is a choice	
since the public transportation has been wonderful my entire life (born and raised Washingtonian) and	
having a vehicle was not necessary. It seems that this is your go to everytime there are budget cuts.	
Why? I am confused how you can have such disregard for us.	Operating Budget, Management and Spending
Please keep the service as is on Z6. It is the only bus that services Riderwood via Gracefield Calverton	-
/Cherry Hill RD to Silver Spring. As a low income senior citizen who doesn't drive metro is the affordable	
means to navigate on weekend to church and shopping center and to visit friends. Please keep the	
Saturday and Sunday service. Please. God bless you if it comes to that, I believe it is better to run a good service at a higher fare, than to cut service while	Bus Service
maintaining current fares. Reduced service could trigger a 'death spiral' by driving passengers away,	
resulting in further revenue loss and additional service cuts. Rinse, repeat.	Bus Service
I am not in favor the frequent price changes by WMATA. It has been impacting various life including	
lower incoming family who are seeking opportunity for their family. This change will not be in favor for	
public due to several mechanic issues with train and often delays. that already cause a significant	
impact to people who uses metro to work. instead of increasing fee for next fÂisicas year of 2025, focus	
should be on current issue that negatively affecting our public. By changing the price you are depriving the public. everything is expensive now a days why increase price for metro.	Pail Service
the public, everything is expensive now a days why increase price for metro. Not Comment	Rail Service Miscellaneous
You cannot cut services vital to this city?s working class and other groups who rely on transit (like the	
G2 bus for students and all services east of the Anacostia). Find the funding to do better. Fare increases	
are a tax on the poor. Service cuts make people?s lives harder when they already rely heavily on your	
transit to get to work and home.	Bus Service
I live in Foxhall Village and catch the D6 to work at the same time five days per week. If there is no D6	
available when I leave work (not always at the same time) I will take the D2 instead and walk the 10	
minutes to my house from near Duke Ellington School. I am VERY concerned that both of these routes are to be eliminated - the buses I catch are always very well patronised, by city workers and school	
children. If they are to be eliminated but replaced by a new bus route this should be communicated	
ASAP so that we can make plans. I have no other way of getting to my workplace on 16th Street NW if	
those bus routes are eliminated. I have had to walk home from work a few times because of service	
disruptions and it takes an hour. I cannot commute on foot every day. I cannot afford parking in the	
city. I cannot afford ride share. My job does not allow me to work from home and so I am entirely	
dependent on the D6 to maintain my employment. Please start communicating your plans for bus	
services in the Palisades, Foxhall and Georgetown University neighbourhoods as soon as possible.	Bus Service
Metrobus has been a vital part of my life in DC and I am not in favor of eliminating routes. If needed, perhaps run fewer buses.	Bus Service
pernaps run rener buses.	log serves

Comment	Category
I notice that there was no mention of personnel cuts. The people who set in the boxes at stations, with the exception of those who are at DCA and a few at Union station, do nothing. They do not answer	
questions. They do not fix broken faregates. They do not confront or track farejumpers. They do not call	
clean-up crew when they are alerted to broken glass in the station at the entrance to an escalator. All	
they do is watch TikTok. They should all be let go, and then metro can save on paying their salaries and	
their retirement. Separately, the most important service to keep, in my perspective is rush hour service.	
This one should fund itself! And since so many people using it have their benefits paid by work, all	
these customers are price-insensitive, no matter how much they complain. I support fare increases?a	
base DC metro fare costs less than NYC, SF, Chicago, or Boston, and honestly the service is already	
better than any of those so it should cost MORE.	Fares/Fees/Parking
I reside in a DC neighborhood serviced by a single Metrobus route (D6) that is on the proposed elimination list and no Metrorail or Circulator. My child and classmates rely on this Metrobus to	
commute to their in boundary DC public school and it is also my primary means to commute to my DC	
office.	Bus Service
I?m fortunate to be on a line with frequent runs, and worry about the cuts to other lines that people	
truly depend on. Why is ridership down? Longer waits erratic arrival and departure times (worst in the	
evenings) send people to their phones to catch ride shares. I depend on 31,33 and H4 frequently?can?t	
imagine in other parts of the city seeing that cut.	Bus Service
The D6 bus route is the only WMATA transportation to Medstar Georgetown Hospital and Sibley	
Memorial Hospital, resulting in a major workforce disruption to an already stretched healthcare workforce. As stated in the proposed cuts, there is no alternative public transportation route for the D6	
bus route.	Bus Service
Metrorail and Metrob£s should lessen service frequency on major federal holidays (e.g., Christmas	
Day, New Year?s Day, Thanksgiving Day).	Bus Service
1. The Metro Access map is impossible to read/understand. Both my father and brother use Metro	
Access and I can?t figure out if the proposed changes will affect them. 2. Re new buses: I?m a senior	
and the so-called ?priority? seats are often unavailable because they?re occupied by a) teenagers, who	
should flat out be prohibited from sitting there unless disabled; or b) families with strollers. Those	
families, in turn, have nowhere to move to because they would have to carry a stroller and kids up steps to even reach the back of the bus. So I hope, in procuring new buses, you will pick a better design	
& have stroller families enter from their rear. 3) BIGGEST issue for me in riding buses is that they too	
often reek of smoke or previous smoking (weed being the most recent problem). I don't ride nearly as	
much as I used to ? I?d rather walk a few miles than breathe that crap. You need to address that.	Bus Service
Please do not eliminate the bus routes to Georgetown hospital-D2 and D6. Patients and hospital	
employees rely on this transportation and it is critical to keep, especially in an area with low parking	
availability and growing patient and employee population with the new building addition! Thank you	
for considering.	Bus Service
It?s reasonable to reduce services based on the ridership, such as frequency and hours of operations but to eliminate a metrobus line that would leave residents with no option is not acceptable. If	
Metrobus eliminates 22A and 22F, there will be no bus service within Fairlington south of 1395. Given	
that there are many senior citizens in the neighborhood and many people do use the bus to commute	
to Pentagon, this is a major concern from an accessibility and equity perspective.	Bus Service
Any cuts to metro services is absolutely unacceptable and would have devastating consequences for	
DC. I really hope Metro can get the funding it needs and it?s ridiculous that critical public transit	
services get cut when incredibly wasteful projects like highway expansions are regularly greenlit? if	
there is any way to help, please let us know!	Capital Budget
No changes to the L2 Metrobus. It is important to users and the neighborhoods to have the L2 service available. Making the suggested changes would be de facto punishment to those who ride the bus and	
who live and/or work in the area.	Bus Service
Service reduction/elimination during the daytime would affect children's commute to school and to	
other activities, which I think is important to avoid.	Bus Service
problem of asking bus riders to rely on connections is that DC buses sadly do NOT generally run on time	
(I presume this is because there are no bus lanes). This combined with sometimes long wait times	
between buses means that the likelihood of making an efficient connection is very low. This can	
drastically increase the amount of time one needs to budget to get to a certain location by a certain	
time. For example, with just one bus ride taking 35min, if the bus comes every 15min, I need to budget	
at least 35+15=50min to be there on time (to account for the uncertain arrival time of the bus), plus	
any difference time between when I can arrive and when I need to arrive by, thereby needing to leave	
about 1h before I need to get to my destination. If I need to make a coercion, all bets are off. I now	
need to add buffer time for both the first and second bus, to account for their respective uncertain arrival time and patchy schedules. Let?s say it?s one 20min bus ride followed by one 15min bus ride.	
Each bus comes every 15min (an optimistic estimate). I may wait up to 15min for each, if I?m unlucky.	
This means I now need to budget 15+20+15+15=65min at least. So now my 35min bus ride has	
morphed into almost twice that. If buses are less frequent than every 15min, it gets even harder and	
unreliable. I may get into a situation where on any given day I may be 30min early or 30min late for the	
exact same route. Medical appointments don?t allow for more than 15min of lateness before they get	
cancelled and you?re charged a cancellation fee. If this is for work or to catch a train, obviously there is	
a need to be there on time. So, maybe I?m now considering just walking, taking an Uber, or just going	
to a different place that can be reached by Metro or without an unreliable bus connection. Where we	
can go to affordably from NW DC if we don?t drive is already so restricted. It affects everything - where I can live, work, play, get medical care, etc. We need more frequent and reliable buses/trains on	
Wisconsin Ave, not the reverse. And I know it?s not in WMATA?s power, but for Pete?s sake, why	
aren?t there priority bus lanes already?. It would give more incentive for people to actually use the	
buses, if buses rode on time and could cut through traffic in at least some busy spots! Finally ? sorry to	
hear about the budget issues. One thing I notice is that a lot of the buses have card readers that don?t	
work, so people ride for free. I don?t mind riding for free obviously, but if we?re at the point of needing	
to cut service? I don?t know, how about fixing the card readers so people can actually pay their fare? :-	
/ I also see people jump over the fare gates (right under the nose of the person watching the station,	Operating Budget Management and Spending
who just lets it happen?). Presumably that?s just a drop in the bucket compared to the level of The 96 has few riders during morning rush hour but is a lifesaver at Union Station when Metrorail isn't	Operating Budget, Management and Spending
running. N2-N6, 31 seem to be primarily used by people commuting to and from downtown during	
rush hour. Bring back rush hour only 37 to get people downtown and back quickly. I think it had only a	Rail Service

Yall are doing things that will lead to a longterm decrease in rider ship. What have other metro areas done in similar situations? Metro accessibility is a major reason most of my circle doesn't ride. Also	
physical safety at some stations.	Fare Evasion/Safety/Crime
Yall are doing things that will decrease ridership in the long run. The reason my friends and I don't use	
metro as often is accessibility and physical safety.	Fare Evasion/Safety/Crime
Metro is critical service in the DC metro region. Residents make basic decisions like where they choose to live based on the availability of metro indeed if they will even live in the region. Businesses make	
decisions based on metro and metro As we all know, includes buses. I am saddened indeed appalled to	
see how a once great system is being ravaged eliminating a service critical to the residents of the	Bus Service
The d6 bus is critical to my getting to and from work and would hugely impact my travel. As a dc tax	
paying resident and home owner I employ you to keep this route. This is a hospital route passing by	
george washington hospital, georgetown university hospital and sibley hospital. It should be a major	
inner city route to help those in need meet their health access. Stopping this route will impact health access to myself and the community	Bus Service
It is unconscionable to reduce public transit service in a major world capital in light of climate change,	bus service
high crime and increasing inflation. By removing all service to areas with no metro stop, the city is	
making pockets completely isolated to residents who have only the option of driving or staying home -	
no longer participating in the economy. It is also an intellectually dishonest choice to suggest one must	
choose between fare hikes or loss of service. The affected municipalities could choose to invest further	
in public transit - just as European countries do! Tax all the developers profiting from construction and earmark a portion of those funds to a thriving public transit system. This proposal is undemocratic and	
penalizes the young, old, disabled, immigrant and low-income who have the greatest need for a low	
cost, accessible, connected, public transit system. Save the D2, D4, D6, and 30 lines! But save ALL	
transit ? invest, innovate and lead to make DC truly a world-class city.	Fare Evasion/Safety/Crime
I have lived in the DMV for more than 20 yrs and have never owned a car. Eliminating weekend service	
on the N2,4,6 would force me to purchase one. Once I have a car, my need for metro would be	
reduced. Additionally, it would be fiscally irresponsible for me to take Metro in most situations, given that I will have already spent money on the car. Also, asking about use of the N2,4 on the weekends is	
misleading, since only the N6 runs during those times. Decreasing Metrobus service or increasing	
metrobus fares generally would have an inequitable effect on communities throughout the DMV, given	
that individuals of color and those with financial resources are more likely to take the bus. Additionally,	
reducing the availability of public transportation is contrary to decreasing energy consumption and	
reducing our carbon footprint. Those of us who can afford it will purchase vehicles, thereby increasing pollution. It will also have significant negative effects on the price of real estate proximate to Metro	
stations and make such properties less appealing and increase the need for parking. This is also counter	
to the plans implemented by city leaders in recent years.	Operating Budget, Management and Spending
The proposed service cuts would basically eliminate commute/travel options via public transport for	
Glover Park residents. Many rely on route D2 to go to work, come home, and connect to metrorail	
service at DuPont circle. It is the only route Glover Park has after D1 got eliminated during the	
pandemic. Piling up to a combined route 31 and 33 only reaching Foggy Bottom plus an elimination of route D6, the FY25 proposal is leaving an entire neighborhood such limited - if not completely	
eliminated - means to commute and go around. That should not be the way when considering changes	
to the public transit program. WMATA could and should consider alternatives to address budget	
shortfalls such as fare increase or maybe a peak hour surcharge on metrobus, as oppose to massively	
cutting and reducing services.	Operating Budget, Management and Spending
Im on lift please don't cut that. I would not be able to go to work with out it. Most of the cuts are in the	
buses around anacostia. It's not right to cut out the buses for the people who live here, in favor of the tourists.	Bus Service

We need more service, not less. If you want people to be happy with and ride the system, it needs to	
be more available not less. Longer wait times means more walking for me (I guess good for exercise!).	
The fare evasion needs to be stopped. The busses need new seats that aren't cloth. And crime in the	
system needs to be taken care of. Keep the programs for free or reduced rides for seniors, students,	
and low-income. But raise the fare a little on people who can afford it. For most of us, it's still cheaper	
than owning a care.	Bus Service
These cuts will only hurt poor riders, since wealthy people usually drive. Eliminating routes, cutting	
night service, and increasing wait times between buses will create new safety threats for people who are relying on your buses to get to work and school. Please appeal to MD, VA, and DC governments that	
the capital region of the world's wealthiest country should not cut public transportation and endanger	
the most vulnerable populations who rely on these buses to live their lives. They should contribute	
more to WMATA's budget.	Operating Budget, Management and Spending
PLEASE DO NOT CUT THE D6 I NEED THAT BUS TO GET TO SCHOOL I LIVE ON THE OTHER SIDE OF THE	
CITY AND IT IS A LIFESAVER	Bus Service
I work at Medstar Georgetown University Hospital. The removal of the D6 line would greatly affect the	
way staff members and patients are able to get to the hospital.	Bus Service
Please keep the bus route to the pentagon from Burke, 18J, 18P. One line has already been cut and it?s	
been terrible. There is not a close metro in Burke, only the VRE which is extremely limited. Burke NEEDS	
to be kept at least with the busses, we really need a metro out this way.	Bus Service
Public transit is vital for transportation for individuals to get to and from work as well as to and from	
economically dense areas. With the growing wealth gap I honestly think metro bus and rail services	
should become free, what happened to the proposal for free bus services? Why is it that this survey is	
asking to choose between higher fares or less service? Why did you spend millions on upgrading fare	
gates instead of dumping that money into covering services for some established amount of time?	Service Levels
Please do not remove the R12 Or G12 service as it will inhibit my ability to get to work on time and cost	
more money out of pocket to get home. The reason I use metro bus is because it is reliable and close by	
me to take me where I need to go. I love the bus route service please do not stop the R12 specifically	Bus Service
Please do not shut down R12 and g12 service as I need them to get to work and home. Cutting services	
will drastically increase the time it takes to get from point A to point B. Taking metro after these service	
cuts will be useless	Bus Service
Good morning: A lot of us here at Medstar Georgetown University Hospital Ride those buses (D2 D6) to	
come to work Professionals housekeeper the Service Department Nurses ETC, is a Crazy Idea to remove	
Those Buses. Also, you have the Sibling Hospital down the street, Those Patients and Employees Will be	Rus Somico
Affected also. Thank you This is very hard but some of us can stand the fare increases so that we have a functioning metro	Bus Service
system in the nation's capital.	Fares/Fees/Parking
It wouldn't be fair to eliminate the metro access to the working class that need or preferer to take the	raies/rees/raiking
Bus for work. Please be considerate of others in need. Thank you!	Bus Service
As a Georgetown student, the G2 route is an extremely useful and convenient bus for connecting our	
neighborhood to the rest of DC. Please do not eliminate the one bus that goes to Georgetown.	Bus Service
I like riding the metro bus and the train but in my area Green belt area sometimes the buses do not	
show up on time. Sometimes you have to wait the next hour for the next bus to come and this is on	
weekdays and weekends sometimes the bus drivers even pass you by why you stand at the bus stop	
Something needs to be done about increase but also y'all need to get on your bus drops and have a	
direct number where we can call to complain. Thank you.	Bus Service
MAKE IT FREE AND CHARGE MD AND VA MORE	Miscellaneous
Please do not mess with the 31, 33, D2, N2, N4, N6. I rely on these bus lines for my jobs and school. You	
would be drastically changing my life just to save some money. I appreciate your work and time, please	
show some appreciation for your service users too.	Bus Service
Palisades has no other transportation option other than D6, other than bicycles. I am too old to ride a	
bike. If I don?t have the D6, I will be unable to access the Metro, go to work, go downtown, etc. D6 is it	
for the Palisades after you took away the D5, which only ran at rush hour anyway. WMATA/DC Council	
must do something about fare evaders too. Too many people who can pay (use with smart phones for	
example) choose not to do so. This started during Covid.	Fares/Fees/Parking
18p is our reliable bus erviceto the pentagon	Bus Service
I do not understand the way the previous question was constructed. I prefer budget requirements be	
addressed 75% through fare increases, not by service cuts. 31 and 33 buses already are crowded. New residential complexes are being constructed on Wisconsin Avenue which will increase ridership. Senior	
citizens, poor people, and students use buses more than metrorail because buses service our	
neighborhoods. Previous service changes to 30 rte busses make it harder to get downtown without	
transferring or walking farther than a 68 year old woman wants to walk alone. When I ride the bus, I	
notice at least 1/3 of the passengers don't pay. Why don't you focus on how to collect fares. Please do	
not change service on the 31, and 33 buses.	Operating Budget, Management and Spending
I rely on just one route (D2) to be able to make it to work. I don't know what I'll do if this service is cut.	
It is particularly important for all of us living in Glover Park particularly parents with babies, children	
and students that take the bus to be able to take their classes. We Would literally be isolated from	
effective public transportation services as we don't have a lot of options already. We would have to go	
through a longer and less safe commute. Please don't cut the D2 bus route as you would greatly affect	
the entire Glover Park community that relies on it to move around the city.	Bus Service
Is there any way to receive more federal funding for budgeting? I think cuts of any form will harm a lot	
of people	Operating Budget, Management and Spending

The way in how I would address a problem or situation by the bus operators and train operators in thanking all customers more with big bright smiles and also making sure everything comes on time to keep everyone happy and paying cost to not want to raise prices due to fare invasions throughout metro system. More 36 in the morning and afternoon Don?t cut 42 or d61 Make more express bus routes and fewer stops. There are too many stops on the 33 bus route and it takes too long. Cutting the D4 and reducing service on the D8 will make it really hard for those of us who depend on the K St buses. The E2 is also really important for getting up to the Target and other shopping. However, merging and simplifying bus lines might be helpful for visitors and help focus on high traffic segments. Maybe we could even bring in more express buses? In general, fewer bus routes, shorter bus routes, and more infrequent bus routes are bad for our community. Especially for people who rely on the bus to get around the city, or just to get to the places they need to be (work, school, hospital, etc). The people with the least flexibility are harmed the most. Certain neighborhoods seem like they will particularly be affected, and that will fall hardest on seniors	Bus Service Miscellaneous Bus Service Bus Service

Comment	Category
I am in strong support of opening the metro at 6 am on weekends! Many people in the service industry work weekends and have to take Ubers they cannot afford.	Rail Service
SAFETY on BUS and RAIL very HiGH PRIORITY the things that go on is totally ridiculous	Bus Service
Im sorry it has come to this	Miscellaneous
G2 is vital for people going to Georgetown. 31 and 33 are great routes to go through different	Wiscenarieous
locations. If considering merging make sure frequency is still high	Bus Service
This is a bad, bad, bad budget. Most severe service cuts I've ever seen in 25 years. WMATA is	
abandoning Metrobus with this budget. Cities in Europe don't have this problem.	Operating Budget, Management and Spending
The city should reallocate funds from other departments such as MetroPD to make up for the lack of	
funds to public transit, and should certainly not cut any existing services.	Rail Service
Without the D2 service, Glover Park residents who do not live near Wisconsin Ave. will not have any	
public transportation options. Some Glover Park residents are elderly and disabled and rely on the D2.	
Many Georgetown students also rely on this bus route to get to class.	Bus Service
I rely completely on the D2 to commute and would need to move if the line is cut.	Bus Service
The 33 bus is an important line to get to downtown from Friendship Heights, Georgetown and NW DC.	
That bus takes riders to the Ronald Reagan Building, the federal and DC courts, and other stops along	
PENN Ave.	Bus Service
These proposed cuts and increases drastically impact people who do not have access to moving around	
DC freely due to income inequalities and student status. These proposed changes would be	
disadvantaging who would have really no other efficient and cost effective way of getting to their jobs,	
schools, and internships. And what, for pickleball courts? that?s ridiculous and will only continue to	
gentrify DC driving so many people out of it.	Fares/Fees/Parking
Cutting the D2 service AND reducing 31/33 service would leave Glover Park with extremely limited	
public transportation. It makes no sense to stop the 33 at Foggy Bottom and not at least take it some of the way into the CRD.	
the way into the CBD. The G12 is the only metro by me, It?s the way me and many others get around to Work, school, church,	Bus Service
The G12 is the only metro by me, It?s the way me and many others get around to Work, school, church, Shopping, and etc.	Bus Service
Please don?t cut services to the bus. It?s my only form of transportation. I take the D2 to work	
everyday and don?t have a metro near me. I would rather you charge me more than take away our	
service and access to the buses.	Bus Service
This is so wrong to take away already expensive access from people who need it.	MetroAccess
Please don't cancel the G-12, R-12 routes which go through Greenbelt/Roosevelt Center. Many of our	
community members rely on them for transportation to Metro or Beltway Plaza.	Bus Service
Eliminating the D2 and G2 in addition to decreasing service on the 31/33 routes cuts off	
Georgetown/Glover Park from Metro access and affects everyone who commutes out of Glover	
Park/Georgetown for work. This is so stupid. Do better.	Bus Service
Please do not eliminate the 96 bus route.	Bus Service
I love metro. It is part of what makes living in Washington D.C. so great. Please do what you can to	
keep it as it is or improve it for our D.C. residents!	Rail Service
If the T2 bus goes away my family will have to purchase a car.	Bus Service
Eliminating the D2 and D6 will leave elderly people with no other choice but to walk over to Wisconsin	
Avenue. Depending on where you live in Glover Park, that could be five or six blocks away. Older people	
who were able to take the D2 and D6 to Georgetown and Sibley Hospitals will now have to take a cab.	Bus Service
DO NOT ELIMINATE G2 BUS ROUTE, it is literally my life line to get to campus and there would no other	
convenient way to get to campus.	Bus Service
Eliminating all of the G2, D2, and D6 routes has a major impact on connecting to Wisconsin Ave, Glover	
Park, Burleith, and Georgetown neighborhoods, where I frequent daily for work and on weekends. It	
also further alienates Georgetown University and MedStar Georgetown University Hospital, taking away accessibility from employees, patients, students, local residents, and visitors both to that	
neighborhood and for their access to reach the rest of DC and participate in economic activity. My	
prioritization - 1) keep G2. 2) keep D2 (could reduce frequency in non-rush hours/or frequency overall)	
3) keep/reduce D6	Bus Service
My Metro riding patterns have changed considerably due to an increase in work from home. I have that	
luxury. However, many of the people affected by these proposals likely do not. They are the most	
vulnerable to these changes and most in need of Metro. Metro benefits us all by reducing traffic,	
pollution, and enabling workers we depend on to get to work. I would rather see an increase in taxes	
on the (ultra)wealthy than poor people unable to get to work.	Rail Service
More security in trains.	Fare Evasion/Safety/Crime
Our region already suffers from severe traffic congestion and reliable, frequent Metro service is a	
critical part of how my household accesses work and recreation activities. We are a one-car household	
with the other member commuting daily into DC from Maryland, and reducing service on the	
Green/Yellow lines and G12 Metrobus in particular, especially during weekdays and rush hour, would	
severely impact our entire household's ability to continue commuting to work. We are proud and	
enthusiastic users of public transit, but because of the constraints of our work hours and other	
obligations, are forced to make other arrangements using cars when service is cut, because we simply	
cannot afford the time it will take to continue trying to use Metro when these routes are decreased.	
This is already the reason we often choose cars to access DC on weekends, because of how reduced	
Metro service can be. We strongly urge Metro not to cut routes and in fact, if possible, to increase frequency. In particular, having G12 convice continue on the half hour along Ridge Rd through 8 PM on	
frequency. In particular, having G12 service continue on the half hour along Ridge Rd through 8 PM on weekdays would be of great benefit to our community. It would also help if the G14 were rerouted to	
cover the areas currently covered by G12.	Bus Service
The cost of rides shares are extremely too high and the D6 and X8 fiscally responsible choices to get to	
work. I don?t understand how it makes sense to completely eliminate bus routes that help individuals	
get to work and doctors appointments. I think it?s unfair to people the are budgeting trying to make	
ends meet.	Operating Budget, Management and Spending
I will not be able to get to my job nor home without the D6 or the V14! I'd rather pay more. And would	
you consider opening metro rail at 5am to 10am 7 days a week, instead of 6 for those who have to be	
at work at 6 am who travel from Maryland to DC everyday?? I would pay any amount for that to	
happen. I can not walk very far and the removal of these buses would force me to quit my job.	Bus Service
I'm an employee of Georgetown University Hospital and as an employee I travel by way of metro, so to	
end the D6 route will be very inconvenient for me as well as any patient being discharged that has no	
transportation. It effects a whole community!	Bus Service
Increasing fares and decreasing services are both unacceptable. Metro should be free to everyone,	
accessible, and should have more stations in the DMV, not fewer. To do this, DC needs to stop spending	
money on superfluous things. Why does DC's money go to sports stadiums or to line the pockets of	
administration officials? DC residents want safe, efficient, free public transport.	Operating Budget, Management and Spending
Please consider keeping the busses in areas without metro service (for instance, Georgetown/Glover	Due Camies
Park) My position as a federal emergency response official requires me to work at any day and at any hour,	Bus Service
My position as a federal emergency response official requires me to work at any day and at any hour, regardless of holidays. I utilize the Metrorail to get to and from work, so some of the proposed changes	
will heavily affect my usage of the Metrorail.	Rail Service
with nearing an electring dadge of the interformit.	

Comment	Category
Crowding during peak times are already bad. Cuts would make both rail and bus service nearly	Due Carrier
unusable at times. Make the wealthy pay their fair share of taxes. Use that fair share to make up for the windfall.	Bus Service Miscellaneous
I was referred to this survey via a QR code on the D2 bus stop closest to make up for the windrah.	Wiscenarieous
not 100% sure of all the logistics, having access to good public transport is something very important to	
me as someone with brain issues that make driving an impossibility, and preserving the D2 bus line is	
especially important to me due to its convenient placement. However, metro access is important for	
countless people - people with disabilities, those who cannot afford a car, teenagers who can?t drive	
yet but are establishing some form of independence, etc. Not to mention it?s better for the	
environment! The solid public transport is one part I really love about living in DC.	Miscellaneous
Elimination of D6 would have a serious negative impact on a neighborhood that has no access to Metro subway or rail, and is essential to both students routes to school and daily commerce.	Bus Service
I'd urge strongly that eliminating/consolidating the D2, D6, 31, 33, and especially the G2 would	Bus Service
seriously decrease usage in the Georgetown area especially. Many students and residential community	
members that I personally know use the G2, D2, and D6 routes every day in order to get home, and	
have no alternative Metrobus routes if these were to be eliminated. I use all of these routes, the 31,	
and 33 at least once a week, and would rarely if ever take the Metrobus if the changes proposed were	Bus Service
Cuts to the N lines, D2 and 32, 33, and 36 lines services simultaneously would have terrible impacts on	
parts of upper NW DC (e.g., Glover Park) that are not served by other lines. Many seniors and those	
wirh disabilities, including service workers, depend on these lines, including on weekends. Keep 18P!! Burke doesn?t have many bus options and 18P is very important for the military	Bus Service Bus Service
None.	Miscellaneous
Some of these proposals would absolutely devastate my ability to exist in DC. For the sake of	
convenience or even as the only option, I would have to use increased ride shares or look into buying a	
private vehicle instead of using public transit.	Miscellaneous
It is completely unacceptable to leave the entire Glover Park Neighbourhood without adequate public	
transportation options. The drastic reductions that were already made in the past significantly	
impacted the livelihoods of families. My travel time to the office has doubled from 30 to 60 minutes	
because of the D4 service reductions. Maintaining the current service of D2 and 33 must be prioritized.	Bus Service
Why was I asked about the E2, which no longer exists, rather than the E4? I oppose any reduction in service on the M4 or E4 or change of route on the E4, and I favor restoration of the E6.	Bus Service
Metro has really become unsafe and unreliable over the years!	Fare Evasion/Safety/Crime
Fund it	Miscellaneous
These proposals would make it nonsensical to ride the train. Most would likely just have to buy a car	
and ridership would drastically suffer. These proposed cuts are a horrendous idea.	Rail Service
I want as much service as possible, but if there are certain times of day where demand is really low, I	
understand there being less service during those times.	Service Levels
The D2 is the only bus that goes through Glover Park and is the way I get to work. I also take it to	
Dupont Circle to connect to the Metro. To eliminate the D2 bus is to section off a large majority of a	
neighborhood and reduce their transportation options. It?s unacceptable. The D2 connects to multiple schools in the area and takes students to them every day. It cannot be eliminated.	Bus Service
(1) Most of the attention regarding fare evasion has been focussed on Metrorail. Every single time I get	bus service
on a bus these days I see people walking right past the farebox. This was not happening with such	
frequency before the pandemic, and I suspect it?s a holdover from when bus fares were made free	
during that time. (2) I do not understand why Metro decided to install additional fareboxes at the rear	
door of buses. That just encourages people to get on and NOT pay the fare, because they?re no longer	
walking past the driver. (3) Three times in the past two weeks I have gotten on a bus that has the old	
farebox, the new farebox, and the additional farebox at the rear door, but none of them were	
operative. What good is new technology if it?s already unusable? As a DC resident and an employee of the Institute for Transportation and Development Policy, I oppose	Bus Service
the majority of these proposals because they are inequitable and unsustainable. These service cuts and	
fare increases will especially harm low-income individuals who have no access to cars and and are	
forced to contend with poorer service and more expensive trips, as well as low-income people who	
have to commute into DC. They will also push riders away from using the Metro, forcing WMATA into a	
deadly spiral of lower revenue and ridership that leads to even more service cuts. This will in turn push	
DC further from its climate goals; as of 2019, 40% of the District's CO2 emissions were from	
transportation, and these changes will lead to those who do have cars to use them more often. That	
will not only worsen DC's terrible traffic, but increase the District's CO2 emissions and worsen air	
quality. WMATA needs FULL funding from DC, MD, and VA in the short term, in addition to long-term, sustainable funding sources.	Bus Service
please don?t cut or change the D2! we need that route	Bus Service Bus Service
The D2 is really critical for me to access other parts of DC from my neighborhood Glover Park, which	
doesn't have many other public transportation options. I think many of my neighbors feel similarly.	
Thanks so much for considering these comments.	Bus Service
A balance between find increasing fare and cutting services is a logical solution. But increasing fares	
AND cutting services doesn't make sense to anyone. Especially, with inflation being on the rise for	
several years now. Eliminating some people's only reliable way of getting home is NONSENSE. How can	
we live in a city where it should be convenient to get around, yet, choosing to eliminate their most important way of being convenient? DO BETTER!	Earos/Eoos/Parking
Important way of being convenient? DO BETTER! Many neighbors use the M4 to access Metro. Metro would not be accessible without bus service and	Fares/Fees/Parking
adequate parking	Bus Service
If you all cut my bus routes in my neighborhood I really would be walking from friendship heights	
subway or dupont circle subway all the way to 41st Street NW and it wouldn't be no buses in my	
neighborhood.	Bus Service
We depend on buses for transportation! You are proposing elimination of all glover park buses! You will	
isolate us from city!	Bus Service
I have lived in DC since 1975, using bus and rail to get to/from work for decades. Naturally I am	
distressed at the elimination of the E6 which was our way to get to our ?Civic Core? at Connecticut Ave?library, community center, drugstore, bank and grocery. Eliminating the M4 is of another	
magnitude entirely. It?s used by students and by many workers, including staff here at Knollwood, our	
retirement home. This is a major bus route. Hopefully it can be saved.	Bus Service
The proposal cancels all transport into georgetown which will limit access to the university and cause	
an issue for students living on campus or living in the city and trying to reach campus.	Bus Service
M4 is the only bus in our neighborhood and many students use it to get to/from school.	Bus Service
Don?t cut the M4. Kids use it as a school bus, adults use it to commute, and seniors use it to travel	Bus Service
I rely heavilh on the D2 bus and it's connection to the red line to get to work and anywhere else in the	
city really. Please please do not cut it is critical to me being able to live where I live now and I don't want to move. Additionally, terminating the 33 line at Potomac Park or foggy bottom would sever a	
huge swath of the city off from bus access and would also have a major negative impact on my and my	
neighbors quality of life. PLEASE do not cut the D2 i would happily pay higher fares if it meant I would	
still have access to the one bus line that serves my neighborhood.	Bus Service

Comment	Category
Eliminating the M4 would most directly impact students who attend Deal and Jackson reed. This is egregious considering DCPS does not provide school buses.	Bus Service
D2, D6, and G2 are integral lines for thousands of university students who do not have cars.	Bus service
Georgetown University administration claims that the private buses it provides are sufficient, but those	
buses are unreliable, spaced too far out from each other, and only go to a handful of locations. They	
are wholly insufficient to provide adequate transportation options for the university students. Please	
don?t leave us behind ? the vast majority of us do not have cars and many of us rely on the Wisconsin	
Avenue buses (31, 33) or the DuPont buses (D2, D6) to commute to jobs and internships.	Bus Service
I am a Georgetown University student and I rely on the G2, 31, and 33 to get around and to work. I also	
rely on the T2 when I am home in Maryland. Please do not cut these. I need them.	Bus Service
I chose my place of residence based on the bus route, having it cut will impact my work.	Bus Service
Maybe if y?all make the states like Maryland pay their fair share to metro and also implemented revenue to the service via taxes then there wouldn?t be such a shortfall and you wouldn?t have to pass	
the punishment onto the hard working citizens who rely on your services to literally survive and live	
because they don?t own cars. I don?t have a car and would be absolutely devastated if metro	
drastically cut anything. Metro is the reason I moved to dc. Please don?t destroy it because of	
government incompetence and penny pinching legislation. Please	Rail Service
I would like for metro bus / rail to run 24, hrs, or go back to the 3 to 4 am, service that it use to have,	
these through that you have or changes IT DONTMAKE ANY SENSE, to me or the public , just go ahead	
and do, a fare increase, we need our transportation, people work different shifts, and have other	
business, to take care of, everybody don?t have a nine to five job, coffee & a secretary,,	Bus Service
The D2 and 30 series buslines are essential to serving Hardy Middle School as well as Duke Ellington	
High School. Given that DCPS does not run a bus service, you would be making it very difficult for kids to get to school. Also the D2 and the 30s series buses are the primary way for people to get from Glover	
Park to metros at Dupont Circle and Tenleytown. People use the bus - it is an essential service.	
Ridership on these buslines is severely undercounted because most school kids do not show a 'kids ride	
free' pass. If school and metrobus made sure every child had one of these, they would get an accuate	
picture of how widely used these buses are.	Bus Service
Cutting routes like D6 & D2 would make it impossible for my child to get to school.	Bus Service
The D2, D6, 31 and 33 all provide integral transport to an entire community in the Glover Park area,	
including hundreds, if not thousands, of DCPS students attending Hardy Middle, Stoddert Elementary,	
MacArthur HS, and Duke Ellington School of the Arts, as well as faculty, staff, and families of those	
school communities. In addition, another set of residents in the Glover Park area along the D2 route, in	
particular, rely on the D2 almost exclusively. There is not a single morning or afternoon where my bus is	
not very busy with commuters. Perhaps that means limited service throughout the day, but cutting altogether is out of the question for the D2 and D6.	Bus Service
Customers work on the weekends Customers work late Safety issues	Fare Evasion/Safety/Crime
Cutting service ? especially on the weekends and evenings after work hours ? will further drive down	
usage. The other significant factor affecting ridership is safety. When riders are being mugged,	
assaulted, or worse within blocks of the metro, it deters people like me from using the metro with my	
family.	Fare Evasion/Safety/Crime
I strongly oppose Metrobus service and route cuts. I support fare increase as a way to address budget	
deficit

Metro should be working to offer riders frequent service, expanded hours, weekend service, nearby bus	Bus Service
Keep Georgetown Accessible to Public transport! Please do not eliminate bus routes G2, D2, D6, 31, 33. Georgetown students and faculty rely heavily on these lines for transportation especially since there is not a metro stop currently in use to service this area Cutting the D6 and D2 would eliminate the only public transportation option for traveling to Medstar Georgetown University Hospital. This would likely negatively affect the community as it would be more difficult for people to visit their loved ones in the hospital. It would also make it more difficult for staff workers who rely on metrobus to get to and from work. As a Georgetown University student, please do not cut the D6, D2, G2, and 31/33 bus routes. These are the only accessible public transit routes to campus. Cutting these lines cuts Georgetown students off from D.C. and makes it more difficult for staff and faculty to get to work. Allow equitable access from Georgetown?s University hilltop campus. It?s already difficult enough as is Cutting access to a hospital or even to areas that people have been accessing for years and you just stop. Everybody cannot afford parking daily, but they can afford taking the bus and train especially if it's easier to commute to keep the traffic down. Especially to a hospital entrance where some loved ones only way to get to see another that's attending the hospital is through metro you're allowing that to stop as well. Metro should be working to offer riders frequent service, expanded hours, weekend service, nearby bus stops, and a robust network that allow riders to travel safely, quickly, and easily to all parts of the city. Keep Georgetown Accessible to Public transport! Please do not eliminate bus routes G2, D2, D6, 31, 33. Georgetown students and faculty rely heavily on these lines for transportation especially since there is not a metro stop currently in use to service this area Cutting the D6 and D2 would eliminate the only public transportation option for traveling to Medstar Georgetown University Hospital. This would likely negatively affect the community as it would be more difficult for people to visit their loved ones in the hospital. It would also make it more difficult for staff workers who rely on metrobus to get to and from work. As a Georgetown University student, please do not cut the D6, D2, G2, and 31/33 bus routes. These are the only accessible public transit routes to campus. Cutting these lines cuts Georgetown students off from D.C. and makes it more difficult for staff and faculty to get to work. Allow equitable access from Georgetown?s University hilltop campus. It?s already difficult enough as is Cutting access to a hospital or even to areas that people have been accessing for years and you just stop. Everybody cannot afford parking daily, but they can afford taking the bus and train especially if it's easier to commute to keep the traffic down. Especially to a hospital entrance where some loved ones only way to get to see another that's attending the hospital is through metro you're allowing that to stop as well. Metro should be working to offer riders frequent service, expanded hours, weekend service, nearby bus stops, and a robust network that allow riders to travel safely, quickly, and easily to all parts of the city. I?m from Georgetown University and I know many people who couldn?t afford the service cuts because they simply would have no way to come to work to make a living. I strongly encourage you all to not implement these proposals, especially the ones impacting Georgetown service. This is only further perpetuating inequities in the DC area. Most importantly though, this impa	Bus Service

Comment	Category
if you cut out my busses I will not be able to go see my family or go to church or go to vote or visit friends. I am a wheelchair user and rely heavily on the buses to get around as although I sometimes use	
metroaccess, you have to book it ahead of time and sometimes I just want to go whenever or make a	
decision suddenly. I enjoy bus rides through DC and my companions help do the tie downs in the bus.	
Most drivers are very helpful and wait until the tie down is finished before starting the bus. I don't like	
the subway as there are no tie downs, the elevators are stinky, and we often can't find the elevator or it	
is hard to find, and the subway costs more and doesn't really go to where i want to go. Please don't cut off public transport access to Georgetown! You would be isolating an entire	Bus Service
community from the rest of DC, and DC from Georgetown. Public transportation must be an option!!!	Bus Service
The M4 line is critical to our children?s ability to get to school. Since DC does not offer school busing, it	
is critical that you maintain the M4 line to allow kids of working families to get to school!	Bus Service
please don?t stop g12 i need to see my friends	Miscellaneous
Do not cut the G2 and D6 buses to Georgetown. Students need them and if there are no bus routes to campus then it was significantly decrease the opportunities students have to engage with DC, work,	
and attend school.	Bus Service
Please consider the impact on the in-person works	Miscellaneous
I go to school on Metro/bus every day. If the service cuts were to happen, my commute would go from	
an hour to around 1.5. If I take the bus and you limit service around metro stations, I will have to walk	
about 25-30 minutes every time I go to and from school. My family cannot drive and getting to school	Bus Soniso
is already a struggle. If my attendance suffers, my privileges at school are lost and I get detention. Glover Park has already lost the D1, 30N and 30S. WMATA has inaccurate data regarding the D2, D6, 33	Bus Service
and 31 bus lines because they are used by hundreds of students from Duke Ellington, Hardy Middle	
School, and others yet very few students scan their cards. Be more diligent about fare evaders and get	
better data to form these drastic decisions.	Bus Service
The rail and bus service reductions proposed are unacceptable and will make Metro unable to serve the needs of the region. We need to be investing in more frequent service and reliable service.	Ruc Service
Enforce the fees better and ticket people. Don't make the paying customers suffer because of them by	Bus Service
raking away crucial bus lines like the d2 that take many people to and from work and kids to school.	Bus Service
The D6 bus route is essential for many front line hospital workers to get to Georgetown Hospital, as	
there is no convenient way to get there via metro rail, especially on Saturdays and Sundays when	
MetroRail doesn?t open until 7am, and most shift workers have to be at the hospital by 7am.	
Eliminating it would make it extremely difficult to get to and from work every day for many people who don?t own a car. Please keep it!	Bus Service
Preferred order of actions: Increasing revenue, reducing waste, increasing fares, then, and only after	
these three have really been implemented, service cuts (maybe).	Bus Service
D6 and D4 bus is on the Georgetown bus line. A lot of employees, visitors and patients depend on these	
2 routes faithfully.	Bus Service
I think public transportation needs to be prioritized much more than it is currently. The money needed to prevent these issues should be pulled from other, less necessary, places in the budget instead of	
being passed on to riders or implementing service cuts. The people that would be affected by these	
two, arguably awful, options, are overwhelmingly in lower income brackets, elderly, and/or disabled.	
The fact that one of the proposals is to halve wait times in predominantly white areas while cutting	
services, some of them drastically, in predominantly black areas, shows such an obvious bias and utter	
disregard for residents as a whole that it?s disturbing to even read. Find the money to avoid these cuts and fare increases, stop this blatant pandering to tourists and predominantly white areas while	
harming the residents that rely on your services the most, and prioritize expanding public	
transportation instead of cutting it back.	Operating Budget, Management and Spending
Specifically the elimination of the G2 line would severely impact my day to day life. Considering the	
difficulty of traveling from Georgetown, the G2 is essentially the only reliable options for getting into	
the center of the city and accessing the metro, on weekends especially. Uber or other car services are just not a sustainable or affordable option for daily travel, especially for students. Eliminating the G2	
would make Georgetown more isolated than it already is.	Bus Service
I am a Georgetown student and on campus it is already rather difficult to find cheap and efficient ways	
to get into the city. Any changes in timing and length of routes like the G2 or the 33 would make	
traveling into the city that much harder and discourage people who might otherwise do so.	Bus Service
Please don't eliminate G2! It's essential for us Georgetown students to get into DC!	Bus Service
Find a way to recoup your losses that doesn?t hurt the people of this city. Try taking some of the money out of your pockets and fixing the problems you caused.	Fare Evasion/Safety/Crime
Metro should be ashamed of themselves. You need to get the governments of DC, MD, VA, and the	· · · · · · · · · · · · · · · · · · ·
Federal to establish a permanent tax to provide a funding source. Instead of begging these	
governments for funding every year.	Capital Budget
The highest priority should be maintaining frequent bus and train service throughout the system. Lack of frequent public transportation encourages the shift to cars. If you want fewer car trips, make it	
easier and cheaper for people to take public transportation. We?re investing in bike lanes throughout	
the metro area even though they are barely used. Because we want to encourage bike ridership and	
discourage car use. We need to do the same with our public transit system, even if it is not currently	
heavily used. In fact, increase the service with shuttles to main bus lines. I?m in my late 60s and not	
likely to switch to bikes, but I?d gladly give up my car trips if public transport were a viable option. I understand that ridership is down due to more people working from home. So please consider	
increasing bus service in residential areas so people can get around locally so they do t have to use cars.	
This will serve older people who won?t be able to bike, disabled people and families with young	
children, who won?t be able to bike. If you really want people to use cars less you must provide a	
viable alternative ? not take those alternatives away. Look at Oaris, New York and other big cities. They	
have frequent public transportation via multiple modes at inexpensive prices. Taking away service in DCs public transit system is counter to the city?s goal of fewer car trips. Start with fixing the budget,	
which clearly is not enough to maintain existing service. Support the priorities you are pushing on the	
public. If you can afford bike lanes that are barely used you can afford to keep busy lines that are barely	
used operating. And remember this the priority is fewer car trips you must provide alternatives.	Operating Budget, Management and Spending
	Bus Service
Increase prices don?t decrease lines. Especially in/around Burke VA where there is zero other public	Rue Service
transport. Options. without the bus i may move to virginia to work	Bus Service Bus Service
DC buses need more security officers to make us feel safe riding the bus. Too many people come on	
screaming, acting irrational, and making the ride feel uncomfortable. The D6 bus is critical for my family	
to go to the hospital for regular checkups. Cutting this service would impact our costs and family access	Due Comine
to healthcare. G12 is an important route for commuters and students.	Bus Service Bus Service
	pas service

Comment	Category
I am concerned about the possible closure of ANY Metro stations. Proposed changes to bus services in NoVa are also problematic: Cutting service on Columbia Pike, cutting service through Fairlington and	
Alexandria, removing direct access to DC, cutting hours. Metroway serves the eastern edge; 10A is west	
of Route 1. These are very different neighborhood. Asking riders to move to Metroway route will not	
work. Your changes will not work if the Monumental Area project moves forward - Metro and bus	
service to Potomac Yard is already too slim. We need improved bus and Metro service that connects	
the entire region easily and efficiently for all riders, at all hours, especially for those who rely on WMATA services for commuting. The DMV budgets need to support these critical WMATA services if we	
are to thrive and become car-free or car-light! THANK YOU and good luck.	Operating Budget, Management and Spending
The proposed changes would seriously impede upon public transportation. As a Georgetown student, I	
rely on buses to get through the city. Please do not take away this resource!	Bus Service
I think Metro provides excellent service and customers should be willing to pay for that service.	Rail Service
Please consider how Metro supports people getting to work M6 is my main means of transportation, I am a senior and I don't drive. M6 is my lifeline.	Rail Service Bus Service
Challenging times I see. I wish there was an increased and improved dedicated funding stream from the	bus service
3 'state' governments and federal governments.	Capital Budget
As a 82 year old woman without car living in the Glover Park area, the services of D2, 31, and 33 buses	
are a lifeline for my everyday life. It allows me to get to my physicians and my dentist. In suppressing	
D2 and reducing the services of 31 and 33, you force me to use cab services and you cause a detrimental dent in my budget. I live on Soc Sec. Benefits Remember that we do not have m,etro rail in	
Glover Park. You should think of all the people who do not have a car-young and old - living in areas not	
serviced by Metro-Rail !!!	Operating Budget, Management and Spending
Reliability and consistency of service timing are consistently ranked as the most important factors for	
customer experience when using transit. Infrequent and unreliable service can lead to a feedback loop	
of reduced ridership. I strongly urge increasing fares while keeping the fundamentals of reliable service,	
which guarantees access and frequent use by a base of riders. Increasing fares also isn?t necessarily a regressive economic policy - real wages have increased on average since pre-pandemic levels, with the	
bottom 90% seeing the highest rise in real wages (accounting for inflation!). Also I hope that Metro is	
able to lobby for more money from VA and MD. I know this a tough policy decision, best of luck!	Operating Budget, Management and Spending
Metro fares have been more than reasonable. They could be raised to maintain service levels, which	r
are critical to keeping the region moving. The D2 is an anchor for the neighborhood of Glover Park, and ridership data may be undercounting	Fares/Fees/Parking
utilization of the D2 given that so many minors (who don?t need to pay fare) use it to get home from	
school. I would have to consider getting a car or moving neighborhoods if the D2 is cut, because it?s	
what helps me get to groceries and the Metro. The 31/33 stop is too far a walk for a lot of my senior	
and mobility-impaired neighbors who live deeper in Glover Park.	Fares/Fees/Parking
D2 and D6 are critical bus lines for me.	Bus Service
Eliminating the M4 will leave an enormous area of Chevy Chase without any bus service at all. Kids rely on it to get to school. I rely on it to get to the metro to work. This really leaves us without ANY options.	Bus Service
People rely on it - find the money and use it better.	Miscellaneous
PLEASE do not cut the D2 or the L2	Bus Service
Please keep the G2! It is a great service that Georgetown students and staff NEED (especially since we	
have no metro stop). Same goes for D6!	Bus Service
Cut lines in rich neighborhoods where people have alternate modes of transportation Eliminating bus routes throughout DC would not work in favor for DC Metro. People rely on these buses	Bus Service
to get to their destinations whether that is work, school, etc. I, myself, ride the D2 everyday?morning	
and afternoon. Eliminating this bus for me, along with others in the Glover Park area would be an	
absolute nightmare. The D2 is the only bus that rides through this neighborhood. Metro needs to think	
about how this will impact and deter residents from moving here. I can see this ending poorly and	
causing mass exodus of people to move out of the city. DC only has so much available parking?driving is not an option for many people who rely on public transportation.	Bus Service
Bus D2 : Glover park residence have no alternative than to take he D2 to head into town and reach	bus service
thee metro. If you cut the d2 you cut the dupont metro access to most residents.	Bus Service
WMATA is arguably the best public transit system in North America, and is the key the rebuilding DC	
and making it a more accessible place. This is the system in our nation?s capital, and represents us on a	Control De José
world stage. We should be increasing our investment into WMATA, not cut it. I rely on the D2 to get to and from work each day, and I use it often on evenings and weekends. It?s	Capital Budget
renoval would take away my primary means of transport.	Bus Service
Maybe raise the fare from \$2.00 to \$2.50 for Metrorail and cap it at \$2.00 for all bus routes.	Bus Service
I hope the leadership in metro considers various factors into low ridership and payment to explore	
collaborative ventures with District agencies and businesses. For example, some people don't pay	
because they can't afford it and there are no repercussions. Wmata could partner with local employers	
to have sponsored metro cards to encourage ridership. Another example is the cleanliness and safety of metro. Some people are turned off and rather take Uber because the ride is not comfortable.	Bus Service
These proposals must take into account that many bus riders are essential workers who need	
transportation on weekends and at night. We can't plan our public transportation system to serve only	
the needs of M-F 9-5 office workers. We need to serve those who work in the healthcare, service, call	
center, public safety, and other key sectors. Shuttering 10 stations is a terrible idea because 1) people	
rely on that access to Metrorail, 2) people rely on transfers to Metrobus at that stations, 3) we've invested significant resources (funds, materials, time) in building and maintaining those stations.	
WMATA, keep working to improve quality, frequency, reliability, safety, security so more riders return!	
Ridership increases will help Metro avoid the fiscal cliff.	Bus Service
Don?t cut the only bus line that connects Glover Park to the Metro	Bus Service
Please consider raising the fare but all of these routes are utilized by someone, not just myself.	Bus Service
I have really enjoyed the \$2 flat fare on the weekend for metro rails. It would be great even if the fares increased to \$2.50 to have this stay a flat fare. I also think that fare evasion still needs to be addressed	
as fare increases are considered. Thank you.	Fare Evasion/Safety/Crime
Please do NOT cut service areas, and minimize cuts to hours! Please keep G2 ? it?s one of the only few	
ways Georgetown students can go to anywhere else in DC, especially on weekends. The proposed cuts	
are to lines that have been lifesavers for me when I urgently needed to get to places and didn?t have	
an alternate way of transportation.	Bus Service
Safety is a huge issue. Metro needs to do a lot more to protect riders at stations and on trains. More police and security presence is a must. Also greater access to emergency phones and the	
implementation of cameras on rail cars.	Fare Evasion/Safety/Crime
Stop people jumping the barriers at Metro stations properly. You're losing a fortune in rail fares	
because it's still so easy to skip over a ticket gate.	Fares/Fees/Parking
If there is a budget problem, Metro must control fare evasion first, without cutting any service or	
limiting hours. I rely especially on N2, N6, N4 service on a daily basis, and I know a lot of people who do. Also, I have been seeing an increasing number of people not paying on buses lately, please find a	
as make been seeing an increasing number of people not paying on buses latery, piedse linu a	Operating Budget, Management and Spending
solution for that without cutting service.	Operating Budget, Management and Spending

Comment	Category
These cuts would leave the Glover Park neighborhood in DC with significantly less public transit options. Please do not do this.	Miscellaneous
Please do NOT eliminate route 96 - it is the only way for many residents around Tenleytown/Wisconsin	Iniscentificous
Ave to get to many destinations. We rely on this route A LOT. N2 and N6 are also super-important	
services for many people in our neighborhood - we do not have close metro stations and rely on buses	
often. If need be, better increase fares rather than cut services.	Bus Service
Reducing frequencies has the result of reducing confidence in the service; reliability is a problem when	
the occasional unexpected personnel or equipment problem results in further extension of wait times. I	
would like to add (even though this is not a part of your proposal) that my most frequently used bus	
	Bus Service
These changes would make it extremely difficult to access Georgetown on public transportation and	Due Camilea
would severely impact the ability of the people who work there to access their jobs The D2,D6 would impact me getting around in DC as a resident if eliminated.	Bus Service Bus Service
Please maintain service into neighborhoods (D2, for example) that do not have Metro accessibility;	Bus service
these are our lifeline. I am a very regular Metrobus rider and I solely rely on public transportation since	
I do not have a vehicle.	Bus Service
We live in a dynamic environment in which mass transit needs to play an ever increasing role to get us	
where we need to go. If we are going to reduce, delay and cancel how will that effect our ability to	
grow and provide a wonderful environment????? Mass transit is one of the most important part of our	
community. Also, the busses need to adhere to their schedules.	Bus Service
The survey and in the December 2023 budget proposed to the Board present the reductions in	
Metrobus services presented in	Operating Budget, Management and Spending
The D2, the D6, and the G2 are essential to the operation of Georgetown University Hospital. I know	
personally many workers who rely on those routes for transportation to work. The Hospital is already plagued by understaffing and any additional difficulty in properly staffing or staffing our hospital will be	
felt directly by the patients.	Bus Service
Ypu would hurt students at Duke Ellington and Hardy Middle School	Miscellaneous
I use the R12 to commute to the College Park Metro Station. During the morning and evening the bus is	
full. Service in the afternoon is inconsistent and I've had to wait nearly an hour for a bus that is	
scheduled to come every 30 minutes. Eliminating this bus line would leave neighborhoods serviced by	
the R12 without Metro bus service. My concern is that Metro doesn't have full data on the ridership,	
too many riders bypass paying the fare and there are days when the fare machine aren't operational.	Bus Service
Please do not cut service line times and make longer wait times. The best way to increase riders is to	
add hours until 3 or 4am so everyone can use the metro after coming back. Uber and Lyft get an insane	
amount of riders and money just because of this. Look at places like echostage and soundcheck and	
when they close.	Rail Service
Way too many route cuts. Buses are a vital part of getting around the city The fares are very low and a few fare readers dont work. Increase fare to 3.00 would be fine and make	Bus Service
sure fare readers work. You really can't eliminate service to Sibley and Georgetown Hospitals that	
would be awful as many staff rely on buses to get to work. Shame on you for even suggesting this	Bus Service
Maybe y?all should stop spending your money on shares and offshore accounts and start putting it	
towards the people.	Operating Budget, Management and Spending
G2 and 33 service is crucial to connecting Georgetown University to the city, cutting Metrobus service	
to an area of the city with no Metro service is a ridiculous idea.	Bus Service
Please don?t get rid of the X8. It?s the only bus by where I live and the only transit that allows me to	
get to work at the Capitol. It?s already unreliable and infrequent but eliminating it completely would	
make it impossible for me to get to work. I use the Maryland and Neale stop since I live in the Union	
Heights apartment building and it?s been lifesaving please please don?t remove service. Take out some	
close stops or something but please don?t remove that line G2 is essential in my weekly travel.	Bus Service
Metro is broken and cannot be fixed. You have folks that must leave on the train at 5:00 am in the	Bus Service
morning and there are times folks have to work late until 11:00 pm and you must have a way to return	
to your Metro Station that the left from in the morning in order for them to return to their vehicles to	
go home. Metro needs to increase security on all trains and stations so that metro riders will feel safe.	
Metro must ensure that the parking lots have pot holes fixed and the gates leaving the parking lot are	
operational. Metro needs to make sure that folks who are entering the station or leaving that people	
behind cannot slip through the fare gate without paying their fare and piggy back off the person that is	
paying their fares every day. Kisok employees must pay more attention to what is happening in their	
station and walk around their area and be helpful to customers who needs assistance and act like	
nothing is happening at their stations. If there are delays or closures on Metro due to maintenance	
then you must ensure that buses are available and that the staff can direct riders to the exact bus that	Rus Conviso
they need to take to get to their destiations without delays. They fight to keep the services at the same price or with a minimum change.	Bus Service Fare Evasion/Safety/Crime
As someone who uses metro rail and bus on a daily basis to get to and from work these proposed cuts	n are evasion/sarcty/chille
are not only preposterous but they?re harmful to every citizen in the city that commutes. Removing	
bus routes like the D6 that take people to two major dc hospitals is criminal and so harmful to lower	
income patrons who use the bus and don?t have cars to get to appointments. Stopping the L2 at the	
income patrons who use the bus and don?t have cars to get to appointments. Stopping the L2 at the duke Ellington bridge instead of having it go all the way down to Farragut west makes it so difficult for

Comment	Category
The R12 bus route is very beneficial for the children who attend College Park Academy, as this is a PGCPS charter school which does not provide bus service. Children are to get to and from school either	
by their parents or parents pay for private transportation. However there are plenty of parents whose	
work schedules do not allow them to do drop off/pick up and their budgets don?t allow for private	
transportation. We rely on public transportation for our children to get charter school education. This	
R12 bus route is integral for these children.	Operating Budget, Management and Spending
Please don?t change the G2 route!	Bus Service
Please don't forget that children also use buses in DC to go to school, including coming back after hours	
from sports activities and clubs. Cutting service would be a real shame, and we need MORE service to some areas like the Palisades/MacArthur school.	Rus Service
My children use the D2. D6 and all the 30 buses to get to and from school Mon-Fri. By cutting these	Bus Service
routes you are eliminating my children and others who use the Metrobus system to travel up and down	
the Wisconsin and D routes, which they rely on. Where we are located there is not metro train or other	
public transportation options. You are hindering bus schedules that kids and others rely on daily to get	
through the city in our neighborhood.	Bus Service
Some of these proposed changes would be essentially gutting the Metro service as a whole. It would be	
devastating for our ability to use the Metro to travel across the city reliably. I live in NW, and it would	
become an enormous burden to get across the city if the 96, H2, N2, N4, N6, and D30s buses were all	
eliminated or even significantly reduced. It's so upsetting as a resident of DC that public transit might become so much worse, when DC really should be a city with one of the best and most reliable transit	
systems in the country. The Metro shouldn't be a service that is expected to turn a profit; it's a public	
service. Budget deficits should be solved by an increased budget from the city, not by turning the Metro	
into a husk of what it could be! If that's out of the Metro's hands, then the least worst choice, I guess,	
would be minor fare increases and merging routes with low ridership - but doing everything you can so	
that the people who rely on those routes don't suffer hardship as a result. It's frankly heartbreaking	
that the city has decided the Metro is such a low priority that it would rather make it close to useless	
rather than give it greater priority in the city's budget.	Operating Budget, Management and Spending
Weneed MORE not less METROBUS TRANSPORTATION	Bus Service
D2 is the ONLY bus in our neighborhood, used by many twice a day to get to schools and downtown/ metro- HOW CAN YOU CANCEL THIS SERVICE?	Bus Service
Please don?t cut the D2. It is a lifeline for the neighborhood to work, school and the rest of the city	Bus Service
Do not eliminate the D2 it is our only local. We haven?t a metro!	Bus Service
I remember when metros ran every 5-10 minutes prepandemic and wish we could get back to those	
wait times! I also strongly agree with the proposal to extend the time the metro is open. It would be	
useful for many reasons but especially those who have early or late flights from DCA or IAD.	Bus Service
Do not get rid of the D2 Tons of kids at my school need to get to school	Bus Service
Please do not shut down the D2. It is an essential lifeline for me. That will destroy my ability to live in	
Glover park.	Bus Service
Public transit is a public service. Decreasing services can further isolate communities and decrease residents access to necessary services. It's better to raise the price especially for people who can afford	
it then leave communities without vital transit services.	Bus Service
It would be great for me, probably, if you didn't get rid of the d2 because that's how I get to work.	
Generally I'm in favor of increased bus service over more Metro stations and service because of the cost	
but I understand why it's more popular to add Metro stations	Bus Service
I ride public transportation exclusively. It?s my only means of getting around. I never learned to drive. I	
believe in sustainability and do my best to maintain a low carbon footprint as possible. If I miss my bus,	
I walk to my destination. My employer doesn?t want to hear excuses for my tardiness. It takes me 1.5	
hours one way to get to work on time. The bus and train delays lately have made it difficult to arrive on time. I think that fare increases or cutting services will continue decreasing ridership. Please think very	
carefully about the effect of decreasing Metro Access Services as this will affect the most vulnerable	
population in the D.C. metropolitan area. The elderly and disabled really need this service and it seems	
cruel and discriminatory not to mention unnecessary to cut it or decrease it. If increasing the fares is	
the only way to achieve a balanced budget then I would rather you did that instead of cutting and

If you cut the M4 bus out of Haworth and Barnaby Woods, you are completely stranding neighborhood school children and seniors who depend on the line for transportation—to and from public school, Sibley medical services, and especially from METRO. You will make the area a public transportation desert. The notion that public transportation has to pay for itself is ludicrous. So many people depend on Metro. Reducing service and/or raising fares is like draining the area of its life blood. The 3 Metro jurisdictions need to step up and properly fund Metro. Otherwise, it will be on life-support and will be on an ever-downward death spiral. The D2 bus is the only bus that connects myself and my family directly to the rest of DC. Removing the service would be detrimental to accessing the metro in Dupont as there is no metro in Glover Park. Please do not do it.	Bus Service Bus Service Bus Service
discontinuing bus and rail services. Many people have cars but most use Metro services also. When Metro rail opened up in 1976, I was one of the first to ride on it. Even though I lived in Maryland, I took a ride into D.C. just for the experience. I still ride into D.C. from Maryland using both Metrobus and Metrorail but it is a necessity. Please reconsider these onerous proposals and come up with a new proposal that would work for all. Thank you for the opportunity to share my thoughts. If you cut the M4 bus out of Haworth and Barnaby Woods, you are completely stranding neighborhood school children and seniors who depend on the line for transportation—to and from public school, Sibley medical services, and especially from METRO. You will make the area a public transportation desert. The notion that public transportation has to pay for itself is ludicrous. So many people depend on Metro. Reducing service and/or raising fraes is like draining the area of its life blood. The 3 Metro jurisdictions need to step up and properly fund Metro. Otherwise, it will be on life-support and will be on an ever-downward death spiral. The D2 bus is the only bus that connects myself and my family directly to the rest of DC. Removing the service would be detrimental to accessing the metro in Dupont as there is no metro in Glover Park. Please do not do it. Eliminating the d6 route will be very detrimental to the staff of Georgetown and Sibley Hospitals because it's the only bus that services these two hospitals. The bus also needs to run more frequently after 7 and 11 pm. Many of these proposed routes for elimination will be a heavy burden on working people, seniors and those who do not have a car or choose to reduce their driving. These cuts are onerous! Get USDOT to provide more funding. The feds are pushing for more employees to return to the office, so they should foot the bill for metro in my opinion. You are proposing to cut bus routes that serve harder to reach areas as well as arteries that cut across the city. I?ve seen kids riding the bus getting to school (metro rail not convenient) and service workers such as grocery store employees using the bus. Eliminating routes will actually make it less likely that people will take public transit and put more cars on the road, which is the opposite effect of what the city is trying to do. DC, Maryland, and Virginia need to make contributions to adequately fund metro transit. Please keep the D6 route, it's the only one that hundreds of kids use to get to schools all over NW. It is lunacy to cut this route there are others that can be eliminated with much less catastrophic inconvenience for families. I used metro buses are very helpful for me compared to the rails, but would prefer the Green and Red lines to not have reduced service as they are already packed pretty often between Shaw-Howard and College Park, especially during rush hour. Luse metrorail and metrobus and want to see the service continue and in fact improve.	Capital Budget Bus Service Bus Service Bus Service
to doctors' offices along the Wisconsin Avenue corridor, I'll no long be able to ride farther into Maryland for other necessities. If the M4 bus is eliminated, I'll no longer be able to go to Sibiley Hospital for doctors' appointments, etc. Riding a bus is not only an affordable convenience but also an important amenity that, undoubtedly, assures my independence. The possibility of being stranded in a neighborhood that is not especially walkable to grocery stores, to the library and community center, and to a restaurant is unthinkable and frightening. The weather isn't always ingratiating and trying to navigate the pavement to these places can be time-consuming, strenuous, and dangerous. How is WMATA improving the quality of life by removing opportunities to be independent and, therefore, productive while 'aging in place?' Removing the M4 route would dramatically increase car traffic in upper northwest as it is the only source of transpiration to Lackson Reed and Deal. It would also eliminate our ability to use metro since it is a 2.5mile walk from th3 neighborhood to either friendship or tenley. So cutting he bus route would	cutting weekend service for the N2, N4, and N6 buses GUARANTEES no bus service to Dupont Circle! Also, why do you propose restricting the 33 bus to the stops between Friendship Heights and Foggy Bottom when the 31 bus already covers that same limited route? By eliminating the D6 bus AND cutting service to the 33 bus, you are effectively doing away with crosstown travel, which forces commuters to transfer to the Metro whether they want to or not. If Metro TRULY wants to save money, it can start by arresting and prosecuting passengers who jump over the turnstiles in the Metro, and who board Metrobuses without paying their fare. Get USDOT to provide more funding. The feds are pushing for more employees to return to the office, so they should foot the bill for metro in my opinion. If Metro TRULY wants to save money, it can start by arresting and prosecuting passengers who jump over the turnstiles in the Metro, and who board Metrobuses without paying their fare. Get USDOT to provide more funding. The feds are pushing for more employees to return to the office, so they should foot the bill for metro in my opinion. You are proposing to cut bus routes that serve harder to reach areas as well as arteries that cut across the city. 1?ve seen kids riding the bus getting to school (metro rail not convenient) and service workers such as grocery store employees using the bus. Eliminating routes will actually make it less likely that people will take public transit and put more cars on the road, which is the opposite effect of what the city is trying to do. DC, Maryland, and Virginia need to make contributions to adequately fund metro transit. Please keep the D6 route, it's the only one that hundreds of kids use to get to schools all over NW. It is lunacy to cut this route - there are others that can be eliminated with much less catastrophic inconvenience for families. I used metro buses more often to get to school and work as the rail does not always reach where I need to go. The buses are very helpful for me compared to the rails, but would prefer the Green and Red lines to not have reduced service as they are already packed pretty often between Shaw-Howard and College Park, especially during rush hour. I use metrorail and metrobus and want to see the service continue and in fact improve. Eliminating bus E4 and M4 bus service: Using a netword and in fact i	Capital Budget Bus Service Bus Service Bus Service Bus Service
	cutting weekend service for the N2, N4, and N6 buses GUARANTEES no bus service to Dupont Circle! Also, why do you propose restricting the 33 bus to the stops between Friendship Heights and Foggy Bottom when the 31 bus already covers that same limited route? By eliminating the D6 bus AND cutting service to the 33 bus, you are effectively doing away with crosstown travel, which forces commuters to transfer to the Metro whether they want to or not. If Metro TRULY wants to save money, it can start by arresting and prosecuting passengers who jump over the turnstiles in the Metro, and who board Metrobuses without paying their fare. Get USDOT to provide more funding. The feds are pushing for more employees to return to the office, so they should foot the bill for metro in my opinion. Comment	Category
Bus routes such as the D2, D6, 33, and G2 are essential for many of those in Ward 2 without cars who	
need to enter downtown DC. I rely on the D6 for work and having the 33 & D6 cut would be	
devastating, crippling my ability to make a living. Cutting busses in areas where there is no Metrorail	
could be catastrophic for thousands of residents. I understand that Metro is doing the best it can with	
what it is budgeted, but please reconsider this proposal. Additionally, increasing parking costs and	
increasing the use of fare gates is much more preferable than cutting service.	Operating Budget, Management and Spending
Keep E line buses running so there is at least some bus service for Chevy Chase DC	Bus Service
Please do not eliminate the M4 and E4 bus lines! My family has used those lines consistently for nearly	
30 years, both to get to school and to commute. If anything, we would like INCREASED frequency of	
service, to include weekends. The construction of fields at Nebraska and Utah Aves by the Maret school	Due Canilan
only makes this all the more imperative. Thank you. I ride the G12 to and from Greenbelt Metro Station fairly frequently and sometimes to the New	Bus Service
Carrollton Metro Station. I'm especially concerned about the effect of the cut on evening service, which	
will mean considerably longer waits on the way back from Metrorail trips, an hour long after 6:30 p.m.	
when TheBus stops running. I have a car I can drive in lieu of the bus but many residents do not, and	
it'd increase my carbon footprint more than I care to if I have to drive more.	Bus Service
Please, please do not cut the M4 or E2 or E4 bus service. Thank you.	Bus Service
Please do not eliminate the R12 route there are so many of us in the berwyn/greenbelt/college park	
area that rely on it as the only way to get to the metro to continue our commute into DC. Please!	Bus Service
Cutting the D2, D6 as well as reducing the 31 & 33 is isolating a neighborhood as welll as directly	
affecting students abilities to get to school. Provide better service. More people will ride.	Bus Service
Why would you remove any of these routes? Get rid of frivolous spending on pickleball courts and	
helping more billionaire sports owners!	Bus Service
Portions of NW ward 3 will left w/no public transport if proposals proceed, leave D6 alone	Bus Service
Please do NOT get rid of the G2 bus route. I use that bus route often to get to Georgetown.	Bus Service
Please don?t get rid of the M4 or the E4!!!!	Bus Service
You are eliminating almost all service through Georgetown. Please explain and justify. if we are to have	
public service than both buses and trains must run even when ridership may dip. Perhaps reallocate	
budget to providing safe, efficient and widely available public transportation rather than expensive	
administrative costs.	Operating Budget, Management and Spending
The N2 N4 and N6 buses go past some of the largest apt buildings in the city. Only The Westchester and	
The Towers (just two of these buildings) have over a 1000 apts. In addition, the buses go through the	
middle of American Univeristy. This area has no Metrorail. Many people who live here do not drive due to age.	Bus Service
Things are outrageous prices from rent utilities to food don't no where folks are going to get it	Bus service Miscellaneous
The D2 bus route is the main way to get downtown for many in Glover Park neighborhood. The	wiscenarieous
proposed changes substantially increase commute time by going north to Tenley and add longer, more	
costly commutes to get downtown. Please consider keeping the D2.	Bus Service
Please please don?t take away the D6, it?s the only way I feel safe getting to and from work.	Bus Service
Please, please please do NOT cut the M4 bus line from McKinley and Conn. Ave NW to Friendship	
Heights. Its been in use for over 80 yrs. I use it and its my and thousands of other elderly folks only	
means of getting over to the Doctor's offices at Friendship Heights and Wisc. Ave NW . Also many	
students use that M4 line getting back & forth from school to home. PLEASE KEEP THE M4 SCHEDULE	
AS IT IS.tHAN YOU.	Bus Service
There are over 1700 students at Alice Deal Middle School and over 2000 students at Jackson-Reed High	
School. The M4 bus is their school bus. Sometimes the buses are so crowded that they skip over	
students waiting - my kids have had to wait for a 2nd, 3rd, and even 4th bus to get a ride home. The	
idea of eliminating the route is preposterous. Do you really want 1500 cars converging on 2 schools, a	
block apart, that open and close at the same time?! Chevy Chase will be a bus desert and the traffic on	
Nebraska Ave is already insane from the Maryland cars driving in and out. Similarly, Palisades stands to	
be a bus desert and they have a new MacArthur HS. Maybe you could have smaller, cheaper buses sort	
of like the size of Metro Access in the middle hours? But if we want people out of cars, we need	
reliable, frequent, and cheap buses.	Bus Service
Public transportation in a major city is a right. In a city where folks are encouraged to lessen their	
carbon footprint and avoid contributing to the country?s worst traffic, any move towards increasing	
fares or cutting service would be a tragedy. Leaders in this country fear countries with strong social services, and yet the cost of DC metro rivals that of the Copenhagen metro system. The only way	
forward is to DECREASE fares and INCREASE metro and bus services. You?re already building the Purple	
Line, why would you seriously consider cutting existing services?	Bus Service
I rely on the G12 bus to commute to and from work. Without the G12, many residents in the Greenbelt	
area would be without public access to the metro. The G 12 bus is crowded during the morning and	
afternoon commute and metro would leave many people stranded without the G12 bus, and many	
people would also lose their job for being unable to commute to work in a timely manner or at all if the	
G12 bus route is eliminated. The impact of eliminating G12 bus service would be dire for the residents	
of Greenbelt and surrounding communities. I would rather Metro increase fares than eliminate service.	
I urge you, please DO NOT eliminate G12 bus service. Thank you for your consideration.	Bus Service
I think it is terrible to cut any bus services. People need this service. Shame on Metro. Maybe find ways	
to stop people avoiding paying for the service. I have seem far too many times of people avoiding fare	
and bus drivers allowing it!! Now you are wanting to cut service because of your short fall for NOT	
STOPPING this fare avoidance. Maybe if you all would be proactive rather than turn a blinds eye to fare	
avoidance you all wouldn?t be in this situation and punishing the people who need this service and pay	
for it daily. SHAME ON YOU!!	Bus Service
Our neighborhood relies on the M4 for students to get to school and for residents in general to get to	
Metro (now only at Tenleytown) or to doctor appointments and shopping. We will have no way other	
than driving or Uber type arrangements to do these things. We have to have some sort of Metrobus	
service in our neighborhood> It's bad enough you got rid of the E6 bus that we used to get to	Rus Sanira
Friendship Heights where my doctors are. We moved here because of reasonable bus service. If the M4 is eliminated or route changed, we will no longer have a route from our neighborhood to the	Bus Service
Metro subway service. The E6 was eliminated during the pandemic and it is now a sever hardship for	
older residents to get to the Friendship Heights metro, grocery shopping and doctor appts. The fear is	
that we will no longer have any bus service through upper Northwest DC.	Bus Service
Fare dodging and jumping the metro gates is more frequent than I have ever seen it in the 20 years I've	
lived in DC. Downtown stations have added gate doors, but many stations have not. Gate doors or	
some other effort to stop fare dodging would also have a significant impact.	Fares/Fees/Parking
BZA approved zoning changes to 5901 Utah Ave NW #7, Washington, DC 20015 (Episcopol Center for	
Children) to allow Maret School to lease the 7acre field to build a sports facility. The local residents	
argued that this would be detrimental to the surrounding neignborhood that boarders the fields -	
especially traffic and parking. The BZA decision to approve was based on access to Metro services to	
help aviod parking and traffic issues. Metro, the BZA and our city leaders need to work together to	
understand the impact of these decisions on the people that live here and pay taxes.	Fares/Fees/Parking

important to keep people riding metro Bus Service		
	important to keep people riding metro	Bus Service

Comment	Category
Please keep the M4. It?s a vital way for folks without cars and either limited mobility or capacity to	
carry a lot to get from Connecticut Ave to Friendship Heights in a short period of time. Also, there are	
many doctor?s offices in Friendship Heights that elderly people on Connecticut Ave will have trouble	
accessing without the bus. Not everyone who lives in NW is wealthy and can afford to get an uber/taxi/	
etc and with an increasingly aging population the need is only likely to become greater.	Bus Service
Keep the D6 Metro bus line open.	Bus Service
As a Washington Metropolitan Area Transit Authority (WMATA) D2 bus rider and resident of Glover	
Park for over 32 years, I am strongly opposed to the loss of the WMATA D2 bus line. The proposal to	
lose the existing WMATA D2 bus line is short sighted and poorly planned. I question the data used to determine this action that would eliminate the D2 bus line. The D2 bus line is the only mass transit	
option available to serve residents, workers and visitors in the Glover Park, Burleith and upper	
Georgetown neighborhoods. Currently, the existing WMATA D2 bus line provides Glover Park residents	
with a direct connection to the Dupont Circle Redline Metro station which creates a vital link for	
residents to citywide jobs, services, educational and health care opportunities. By eliminating the	
existing WMATA D2 bus line, existing and future bus riders will seek quicker and faster options of travel	
such as private automobile or car services. Additional automobiles on roadways will increase the area?	
carbon footprint and air pollution levels as well as add to the city's already congested roadways. The D2	
bus line is efficient and extremely reliable in providing transit service to the Glover Park and	
surrounding neighborhoods. Its loss would impact the following individuals: ? Downtown workers and	
workers who connect to the Dupont Circle Redline Metro station for jobs located outside the	
downtown business core; ? Students at middle and high schools: Hardy, Duke Ellington, Georgetown	
Visitation School and at universities such as, Georgetown, George Washington, Catholic, Johns Hopkins,	
and Trinity; ? Residents seeking health care at downtown doctor?s offices, outpatient clinics, and	
hospitals; ? Low-income residents, residents of color, or foreign nationals, posted at embassies or	
international organizations, who do not own a car; Service workers who come into the Glover Park and	
surrounding neighborhoods; and ? Residents with disabilities who are D2 bus line dependent for their	
daily services and needs. WMATA should be arresting fare evaders which is one reason for the revenue	
shortfall instead of cutting D2 bus line service to residents who pay and need the bus service for their	
livelihoods. This proposal is completely short sighted and irresponsible and will only further antagonize	Bus Service
Many many kids in Chevy Chase and friendship heights use the M4, D31, 32 and 33 to get to school	
(Alice Deal Middle School and Jackson Reed HS) every day. This cut woudl have a devstating effect on	
families being able to get their children to school on time.	Bus Service
M4 and E2 buses are used by older persons and many without cars to get to work and doc appts in	
Friendship Hts. We are too far from metros to use them. The E6 is missed by me and others and no	
public input was solicited for this cut. Many will retire in Chevy Chase and will need public	
transportation to get anywhere in the city.	Bus Service
Many older folks who will retire in the Chevy Chase area found the elimination of E6 already a burden	
and cannot get to doc appts on Wisconsin Ave. Cutting E2 and M4 poses another problem for them and	
students getting to schools as well as day workers such as house cleaners getting to work. We live too	
far from metro stations to get there without buses	Bus Service
Elimination of the G12 and R12 routes cripples Greenbelt residents? use of Metrobus AND Metrorail.	
Specifically, the G12 bus route gets residents to/from the Greenbelt and New Carrollton Metro stations	
(and the R12 goes from the Greenbelt Metro to Deanwood Metro stations). These deliveries of people	
to Metrorail stations are critical! How are people supposed to get to work, especially those who do not	
drive a car and hence cannot get to the Metrorail parking lots from their homes? My son, who lives in	
Greenbelt, cannot drive a car by reason of a disability. But he is a dedicated federal government worker	
who relies on the G12 Metrobus and Metrorail to get him to work in Rockville on a 90-minute	
commute. He is a real fan of the Metro system (bus and rail), and enjoys his independent travel to and	
from his workplace. Please, please, don?t take that away from him! And please do not take the G12	
and R12 bus lines away from other Greenbelters. In addition to the issue of access to the New	
Carrollton and Greenbelt Metro stations, people depend on these lines for travel to Dr.s? Hospital and	
Greenway Plaza, for example. As a final comment, rather than eliminate or greatly reduce Metrobus	
and Metrorail service, please consider raising the fares to cover at least some substantial fraction of the	
shortfall in Metro's annual operating budget. The best solution involves the DC-MD-VA governments	
supplying more money to the Metro system. It is a disgrace that Metro has to be put in the position of	
considering draconian service cuts. Does Metro really want to make my son's work situation that stressful? That difficult? I pray the answer is 'no.' Don't do that to my son, and don't do that to	
thousands of other Greenbelt residents who rely on the G12 and R12 bus routes.	Operation Budget Management and Counding
	Operating Budget, Management and Spending
I strongly oppose the elimination or reduction of service on the M4, which provides critical transportation services to many in my area, particularly seniors who rely on it to reach Connecticut	
Avenue, where their doctors, grocery stores and drug stores, banks, library, and recreational	
opportunities are located.	Bus Service
As Disabled rider I rely on Metro Access to get to work and critical appointments.	MetroAccess
1. Unless you provide better safety at metro stations, make arrests of those jumping even your	
improved fare-styles, arrest those punks who turn the escalators off and no one ever notices, and	
provide buses that can handle the disabled, you could say ride for free and I wouldnt get on unless I	
absolutely had too. Too much crime, period. A shame for the nation's capital city.	Bus Service
Create Express Bus Service every 30 minutes from 6 am to 8 pm from Bethesda or Medical Center(Red)	
to Tysons (Silver) to increase ridership to Dulles, etc. Also, adopt a system like New York City that uses	
regular credit card payments rather than the SmartCards. It would be much easier for everyone.	Bus Service
Thank you for the survey. It shows that the service that I have received is well thought out and an on	
going work in progress.	Service Levels
Please do what is right	Miscellaneous
You missed something important The train workers need more training and higher salaries. They need	
inspiration to do their jobs better . I also don?t know if more maintenance will require more areas that	
will take away land that should be used for natural areas.	Rail Service
Georgetown University students already have limited options for public transit, please keep our campus	
accessible and support District youth who use public transit daily.	Bus Service
Don?t cut people and school kids off from taking the bus.	Bus Service
Give Georgetown University greater bus and metro access. Students want to use public transportation,	Due Camies
and gladly want to do so, but we are not given the option.	Bus Service
The proposed changes in the Maryland would be devastating to the most transit dependent	
populations. They are also the ones who will be excluded from participating in this survey. Do better.

Comment	Category
Some of the bus routes being considered for elimination are essential connectors for school children	
and elderly to get to metro rail for longer distance travel or direct connection to groceries, doctors and other essentials for living in the city.	Bus Service
Decreasing service on bus routes and metro rails will just make fewer people take the metro as it	
becomes increasingly less practical for people. It?s already so hard to get to and from work in a timely	
manner and the metro is already such a huge cut of my budget.	Operating Budget, Management and Spending
PLEASE do not remove the D2. I depend on this to go to work and the grocery store every day.	Bus Service
In the media it doesn't sound like Metro is doing everything it can to help riders. So many rely on Metro and many would be stranded without it. More cars would be on the road. There are few, if any, viable	
options to travel. Riders should come first. Money should be allocated to safety too to.reduce crime	
and drug use in the system.	Fare Evasion/Safety/Crime
PLEASE do not reduce or remove the D2. I need this to go to work and get groceries.	Bus Service
Do not change the E4 line	Bus Service
Metro should be addressing fare evasion with effective solutions that stop jumping over gates before	
increasing prices or reducing operations. Otherwise this problem is perpetuating these issues. I regularly rely on the metro to get around DC, as I do not have a car. I have a disability that allows me	Fare Evasion/Safety/Crime
to get to the station most of the time, but the excessive standing required for lower service times	
would likely harm me. I use the metro to get to work, church, and all social gatherings. It's crucial to	
my ability to navigate the city, these impacts in service reductions would greatly decrease my ability to	
get out of the house.	Rail Service
The D2 route is the only metro bus route to serve Glover Park, including kids who attend Hardy Middle	
School. It is also the main way in which Glover Park residents may access metro rail through Dupont	
Circle Stopping service would cut an entire neighborhood off from public transport. Please continue this service!	Bus Service
Reducing or eliminating the G2, D6, and D2 lines would make georgetown university completely	
inaccessible by public transport. this is unacceptable and inequitable.	Bus Service
D2 could be less frequent, not at night, and only on weekdays. Necessary for kids to get to school, and	
people to get to work.	Bus Service
DO NOT ELIMINATE THE G2 ROUTE for the love of struggling grad students	Bus Service
Climate change is affecting our lives already and the true emergency is not to cut in public transportation but INCREASE it. We need less cars and more rail/ buses/ metro. Make it better and	
more affordable and people will use it. We need more not less. And these cuts will impact people of	
colors and/ or poor neighborhoods first. Those who need more public transportation.	Bus Service
Cutting the n2/n4/n6 service line on the weekend keeps most of cathedral heights area from being able	
to access downtown dc on the weekends!	Service Levels
Frequent, reliable scheduled bus service is essential to the success of the entire Metro/Metrobus	
system. Reducing frequency and cutting bus routes will weaken ridership/use of the entire system. DON?T GET RID OF THE M4!!!!!!!!	Bus Service Bus Service
Glover Park is cut off from metrorail and the metro bus is our only option to take public transport. I rely	
on the bus to get to work, doctor?s appointments etc. and there is a huge population in our	
neighborhood that does as well. These changes would be crippling to our day to day lives. I have	
boarded many buses where the smart trip tap pad doesn?t work so everybody is just allowed to ride for	
free. I would recommend fixing those and marginally raising fair prices to close the budget gap instead	
of taking routes and service away for DC citizens who need it. Eliminating the d2 would have a tremendous impact on the residents of this area, single parents/	Operating Budget, Management and Spending
working parents without access to vehicles. Please reconsider this proposal. We already have limited access to public transportation and the need for the d2 is significant. I would pay an increased fare or

Comment	Category
Why not implement fares for those using highways, in order to raise the budget? Why does the burden	
of the budget have to fall on the people who cannot afford other options? If you decrease services you	
are creating obstacles for someone trying to get to their job, trying to see family, trying to engage with	
their city and community. When you increase fares you force people to have to decide between a bus	
ride and eating, a metro ride or lunch, for many a metro or bus ride is the transit to their job, to their	
life. While the city?s car congestion increases, while it becomes more and more difficult for those native to dc to access their city, you are also limiting where people can access. How else are people	
expected to access their city, you are also limiting where people can access. How else are people expected to access the city if you reduce services?	Operating Budget, Management and Spending
The D6 and D2 metro buses are integral to employees at MedStar, the largest healthcare organization	
in the DC area, to get to work. Please reconsider eliminating these lines as it will cause a major problem	
for healthcare workers to get to work and serve the community.	Bus Service
Please keep the D2. In this area, we are very metrob£s dependent because there is no metro line	
nearby.	Bus Service
Please don?t cut the D2 my family and I use that bus everyday to get home from school and work. Their	
closest metro rail is 30mins walk away. That would disrupt us tremendously and many others in the	
Glover Park community	Bus Service
fund metro rather than putting money in the pockets of these predatory developers that are gentrifying	
the city and raising rent prices. fund affordable housing so people like me can actually AFFORD to live	
and work in the city. increase our quality of life, that's why we pay taxes. there is so much waste and	
corruption in spending, it is truly disgusting and the local and federal government officials should be	
ashamed of being so greedy.	Operating Budget, Management and Spending
I understand the need for budget cuts and appreciate the work you all are doing to keep the metro	
running to begin with. I rely on the metro to get just about anywhere. Rush hour on the red line at metro center and Farragut north get particularly crowded already so having fewer trains that come less	
often will make that worse.	Operating Budget, Management and Spending
Eliminating the D2 would cut off a vital route for Glover Park, where there is no Metro alternative. As	
would shortening the 31/33.	Bus Service
If you eliminate the d2 and d6 then hundreds of kids will have no way to get to school, on top of this	
the d6 is an incredibly inconsistent bus, and needs to be handled.	Bus Service
Surgical service cuts + fare payment enforcement please.	Bus Service
Please do not eliminate the T2 bus in Maryland. It is used widely by students and residents to travel	
down River Road to Friendship Heights. There is not another viable route available.	Bus Service
I work, among many others, work at Medstar Georgetown. This bus already comes ever 30-45 minutes	
when I get off work, at 11:30. To keep it short, we as healthcare workers need the D2, D6, and G2. I	
also need the E2. Please do not get rid of these buses	Bus Service
The M4 is the ONLY bus that goes in and out of my neighborhood (Barnaby Woods, DC), and I have	
relied on the M4, in particular to get around the city. It already is somewhat unreliable (doesn't stop at	
the relevant bus stop, seems to miss departure times), the last departure from Tenleytown is very early	
(requiring going to Friendship Heights instead and walking 45 minutes home), and doesn't run on	
weekends. There used to be an E bus option with a longer walk, but that no longer seems available. I mixed up the E2 with another E route in my earlier reply.	Rus Soniso
D6 is an essential route in DC. It might not be heavily used but the individuals who use this route are	Bus Service
reliant on the public transport system. If this route is discontinued, there are no other public transport	
options.	Bus Service
These proposed changes to both fares and service are unacceptable. They will force the loyal	
commuters currently taking Metro back into their automobiles. It will further exasperate low ridership	
by having workers double-down on Work From Home in lieu of coming into the office/ into the city for	
work. For some of the commuters further out from the city, the double-punch of a rider rate increase	
and parking rate increase will mean that the economics of driving to a parking garage may make more	
sense. The fact that service will be cut and time will be potentially double between cars means trains	
will be packed, which will increase the time it takes to unload and reload passengers at every stop. At	
certain point - it all stops making sense and people will simply abandon Metro into a death-spiral. Good	
Luck to those responsible for this decision - I will stop riding if this moves forward.	Fares/Fees/Parking
I would like to specifically address the elimination of the D2 bus line. The majority of my neighborhood	
relies on this bus line in order to easily move between our neighborhood (Glover Park) and the rest of	
DC. I rely on it every single day in order to access the redline and be able to go to work. Without it, my daily life would be significantly impacted to the point that I?d have to move to another neighborhood.	
Additionally, as a rider, I see just how much my line is used. Buses tend to be packed during peak hours,	
as many of us here rely specifically on the D2 to move around our neighborhood, go to work, and	Bus Service
Consider increasing other activities such as commuter tax, HOV incentives.	Bus Service
The N2/N6 bus route is incredibly important for giving metro access to seniors and people with low	
mobility. I live over a mile away from the nearest metro rail station and the next closest bus line is half	
a mile up hill. Eliminating the N2/N6 on the weekends would severely restrict me and a lot of residents	
in the many apartment buildings surrounding me. Please don?t cut weekend service of the route.	Bus Service
I desperately need the D2, D6 and 33. if you get rid of them I will cry. thank u for your consideration.	Bus Service
Do not decrease service of D2 it is the most helpful bus in Glover Park area to access community	
through Dupont	Bus Service
Please keep the D2 and D6 buses on the weekend. Hospital employees need to get to work	Bus Service
d2, d6, s2, s9 would impact staff ability to get to work	Miscellaneous
Please don't cut services to 33 and N Busses. I use those every day and if they are cut I won't be able to use them to get to and from work. It doesn't makes sense to cut back on busses in areas not served by	
the metro.	Bus Service
Please do not eliminate metrobus service D6, and to a lesser extent D2 and G2. D6 is heavily used by	
both patients & employees of MedStar Georgetown Hospital. This is a vital route to the hospital and	
must persist. Thank you!	Bus Service
D2 route is the only one that connects Glover Park to the rest of the metro network with the	
connection from Glover Park to Dupont. It would be very damaging for peoples commutes to drop or	
change the itinerary of this line.	Bus Service
We use the D2, D6, and G2 buses REGULARLY out at Georgetown and around glover park. Removing	
these routes would be incredibly inconvenient to getting around the area since there is no metro rail	
here. I also live in the Wheaton area and it would be very inconvenient to decrease red line	
trains/intervals of arrival to this location. Less personally, fare increases are a significant step that	
reduce accessibility to this important public service for so many people. Please reconsider!!	Bus Service
Enough is enough! While the U.S. pours billions into military spending, Virginia and D.C. residents	
drown in exorbitant taxes. Our hard-earned money disappears into a black hole of defense budgets	
while essential services like Metro buses are left to wither. It's a disgrace! Prioritize people over war machines and invest in our communities, not endless warfare. Our tax dollars deserve better than this	
shameful misallocation of funds.	Operating Budget, Management and Spending
Can we please stop reducing public transit options in a city largely focused on commuters? If budget is	
the concern, hire better lawyers and ask for a bigger budget.	Operating Budget, Management and Spending

What a stupid idea during Covid-19 to install Fare Gates that are smaller and shorter than the original Fare Gate, and now for a year to keep promising 'Saloon Style' larger Fare Gates - and now to have the balls to ask for a multi-million-dollar Fare Increase coupled with Service Cuts. What jerks. When I'm riding Metrorail and see people of all skin colors and socioeconomic statuses jumping the Fare Gates for the fun of it, while I gladly pay my Fare religiously, it makes me feel as stupid as that Metrorail Executive who ordered the smaller, shorter Fare Gates when the electronic targets were installed during Covid-19. I mean, who's zooming who here? You want millions of dollars in Fare Increases while enabling and damn near encouraging riders to jump the Fare Gate? Do you think we are that stupid? You bet I'm angry. Metrorail announced the 'Saloon Style Fare Gate' demonstration project in August 2023 - and absolutely no progress has been made while millions of dollars of revenue have been siphoned off by Fare Jumpers. This isn't equity - it's an inducement for more crime on Metrorail. You bet I'm angry. In the allocation of the Budget that you requested, I stipulated in my own estimates that 35% of your budget should be invested in Stations - and that's what it will take to install your dams Saloon Style Fare Gates if you do it this year, quickly, and at least do it before you have the nuts to come back and ask for another Fare Increase in a year or two. You bet I'm angry. The signs at Fort Totten Station indicating that the Saloon Style Fare Gate demonstration project is underway also display the text intended for Rider-Readers that says, 'We Hear You. 'No, you don't hear me or us. Every time a Fare Jumper steals my money by jumping your smaller, shorter Fare Gates, that says to me, Metrorail doesn't hear a damn thing from anybody, and they		Bus Service
Gates that are smaller and shorter than the original Fare Gate, and now for a year to keep promising Saloon Style' larger Fare Gates - and now to have the balls to ask for a multi-million-dollar Fare Increase coupled with Service Cuts. The M4 route is the only option for retirees choosing to remain in their homes that allows them to minimize use of automobiles. Milday service could be reduced. Fares could be increased. Proposing to eliminate service entirely only promotes greater traffic congestion. Overall, current metro service is just ok. I'd be very disappointed to see it take further steps backwards. G2 route to Georgetown University is a crucial route that needs to be preserved. Many students use it. Definitely maintain the bus routes like the G2. Increase fees if need be. Maybe we should cut other funds in the city like the police budget to ensure we still have funds for transportation. A lot of people rely on public transit. My little cousins use the buses to get around and to go to work. One of my homise uses a wheelchair and appreciates the ramps for the buses and the elevators for the trains. Please keep the public transit open because that lets them go around town without having to get a special Uber or a person with a specialized van to pick them up. I love the Metro, please keep it upl We have my favorite metro system in the country! My child relies on the MA, D31, D33, and D34 to get to and from our home near Military Rd & Nebraska Ave and Alice Deal Middle School. My other child, who has a physical disability and will attend Alice Deal Middle School. In a few years will absolutely rely on these bus lines every single day (she does not require paratransit, but redes these Metrobus lines since she cannot walk the mile to school.) PLEASE DO NOT ELIMINATE THESE BUS LINES: MA, D31, D33, and D34 as many, many children rely on them to		operating budget, Management and Spending
Georgetown University Hospital will be adversely affected! Bus Service You must end consideration of eliminating the M4 bus route. It's the only service in this neighborhood and essential for students, caregivers, commuters. The M4 route is the only option for retirees choosing to remain in their homes that allows them to minimize use of automobiles. Midday service could be reduced. Fares could be increased. Proposing to eliminate service entirely only promotes greater traffic congestion. Bus Service Overall, current metro service is just ok. Comment	Category
As a senior citizen, I depend on the M4 and L2 to get to my doctor's offices downtown and to Sibley	
Hospital. This proposed reduction in service will really hurt me and other seniors who depend on the	
bus. The other group who will be affected negatively are the students who depend on the bus to get to	
school each day. Metro could cut costs by using smaller buses during light ridership times.	Bus Service

ADVISORY NEIGHBORHOOD COMMISSION 3C GOVERNMENT OF THE DISTRICT OF COLUMBIA

CLEVELAND PARK • MASSACHUSETTS AVENUE HEIGHTS • WOODLAND-NORMANSTONE • WOODLEY PARK

Single Member District Commissioners 01-Hayden Gise; 02-Adam Prinzo; 03-Janell Pagats 04-Roric McCorristin; 05-Sauleh Siddiqui; 06-Tammy Gordon 07-Gawain Kripke; 08-Rick Nash P.O. Box 4966 Washington, DC 20008 Website http://www.anc3c.org Email all@anc3c.org

ANC 3C Resolution 2024-CONSENT Resolution in Support of a Sustainable Budget for WMATA

WHEREAS, the Washington Metropolitan Area Transit Authority (WMATA) provides essential transit access to and from our community;

WHEREAS, ANC 3C has long supported robust public transit in Ward 3 and for our neighborhoods;¹

WHEREAS, the ANC 3C community benefits tremendously from the Cleveland Park and Woodley Park Metro stations which residents and visitors use to shop, dine, worship, or socialize in the area, as well as to visit the National Zoo, which hosts nearly two million visitors a year;

WHEREAS, in the urban neighborhoods we represent, many residents do not own cars, meaning they rely on transit service for far more than commuting to and from work, including for trips to medical and dental appointments, houses of worship, shopping and entertainment destinations, visits with family and friends, and myriad other purposes;

WHEREAS, the District of Columbia Government has long-promoted car-free living and District residents have, as a result, relied on assurances that transit services would be available as they made the decisions to purchase or rent their homes, and often to accept higher prices or rents that result from proximity to frequent transit service;

WHEREAS ANC3C has called for WMATA's "Visionary Network proposal" to maintain and expand bus routes that serve Woodley Park and Cleveland Park, including passing a <u>resolution</u> in May 2023²;

WHEREAS, in December the General Manager of Metro released a proposal for FY25 that would reconcile a \$750 million operating budget deficit with radical reductions in Metrorail and Metrobus service;

¹ <u>https://anc3c.org/wp-content/uploads/2020/12/ANC3C-Resolution-2020-015-Regarding-WMATA-Budget.pdf</u>

² https://anc3c.org/wp-content/uploads/2023/05/ANC3C-Resolution-2023-CONSENT-WMATA-Visionary-Network.pdf

WHEREAS, the Cleveland Park station previously has been identified for closure if severe budget cuts are required by WMATA, in addition to a variety of service reductions³;

WHEREAS, WMATA has proposed to <u>eliminate the 96 and D6 bus</u> as part of budget cuts, as well as reductions to 31/33 and D6 bus lines which are critical for students to attend neighborhood schools including Hardy Middle School, Macarthur High School, and Jackson-Reed High School; DCPS currently provides no public school buses to support student access to these schools;

WHEREAS, the current 31/33 service along Wisconsin Avenue NW is insufficient for people who need to commute to or from downtown, especially coming from downtown in the evening;

WHEREAS, Metro is unique among transit agencies in the United States in that it is legally required to pass a balanced budget every year, yet has no independent or dedicated funding stream;

THEREFORE BE IT RESOLVED, that ANC 3C finds the cuts proposed by the General Manager unacceptable and urges the WMATA Board to reject this proposal;

BE IT FURTHER RESOLVED, that ANC 3C recognizes the dire financial straits facing WMATA and calls upon the Mayor and the Council to secure additional funding for WMATA in coordination with Maryland and Virginia also contributing a commensurate amount;

BE IT FURTHER RESOLVED, that ANC 3C calls upon the Mayor and the Council to work with counterparts in Maryland and Virginia to secure a sustainable and dedicated source of funding for WMATA, which we urge to not have a disproportionate impact on lower-income individuals;

BE IT RESOLVED, the Commission opposes the elimination of the 96 bus route and calls upon WMATA to restore the route with at minimum medium frequency⁴;

BE IT FURTHER RESOLVED, ANC 3C asks the L1 bus route to be restored in the Visionary Network and reiterates the request made via <u>resolution</u>⁵ passed January 19, 2022;

BE IT FURTHER RESOLVED, the Commission asks north-south service on Wisconsin Avenue NW for lines similar to the 31 and 33 buses be increased in the Visionary Network and be increased in the near term, regardless of when and how WMATA implements the visionary network;

BE IT FURTHER RESOLVED, that the Commission asks the Mayor of the District of Columbia and the Council of the District of Columbia to stipulate that none of the District's funding for WMATA go to

revamping or redesigning the Potomac Yards Metro stop in Virginia in anticipation the potential move of Monumental Sports & Entertainment (MSE);

BE IT FURTHER RESOLVED, that the ANC authorizes the Chair and the Commissioners for 3C05 and 3C07 to represent the Commission on this matter.

Attested by

Janell Pagats Chair, on February 20, 2024

This resolution was approved by voice vote on February 20, 2024, at a scheduled and noticed public meeting of ANC 3C at which a quorum (a minimum of 5 of 8 commissioners) was present.

I wrote to metro to complain before, there's nothing to upload.

I am a veteran metro rider and am deeply disappointed how unclean metro has become: Tiles are filthy, elevators and escalators are ignored. I remember metro crew maintaining and sanitizing high-touch areas. Where have the budget been spent where at minimum Top-Notch Commercial Floor Cleaning Machines can't be visibly used. The Pentagon tiles are nasty looking, just atrocious.

revamping or redesigning the Potomac Yards Metro stop in Virginia in anticipation the potential move of Monumental Sports & Entertainment (MSE);

BE IT FURTHER RESOLVED, that the ANC authorizes the Chair and the Commissioners for 3C05 and 3C07 to represent the Commission on this matter.

Attested by

Janell Pagats Chair, on February 20, 2024

This resolution was approved by voice vote on February 20, 2024, at a scheduled and noticed public meeting of ANC 3C at which a quorum (a minimum of 5 of 8 commissioners) was present.

WMATA

February 23, 2024

To whom it may concern,

I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital route for many individuals, businesses, and families to access top employers in Montgomery County, the top-paying county in the State of Maryland. The T2 Metrobus is the only reliable public transportation to parts of Potomac and Bethesda, where many jobs offer distinct and comprehensive benefits. My colleagues at Congressional Country Club risk losing access to these great jobs if WMATA cuts service.

Please consider all efforts to protect the full T2 Metrobus for the many riders who require this service to get to work. Thank you for your time and consideration.

Venus Jordan

John Ewers

23 February 2024

Dear Washington Metropolitan Area Transit Authority:

Having been advised that WMATA is contemplating closing the T2 Metrobus route, I write today to express how vital to our community that route is. It is a vital route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus is the only reliable and affordable public transportation to that part of the County, which is critical for the County's economy and for the livelihoods of those who use public transportation to and from that area.

Please consider all efforts to protect full T2 Metrobus for the many riders who require this service to get to work, school, and other activities.

Thank you for your time and consideration.

To whom it may concern:

I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus is the only reliable public transportation to this part of the County, which is critical for the County's economy. This bus service is a crucial support for our area.

Subject:	Please DO NOT cut Metro services in Prince George
Date:	Friday, February 23, 2024 3:42:24 PM

I am writing to express my deep concern regarding the proposed public transportation service cuts within the WMATA system. As a resident and regular user of WMATA services, I strongly oppose any reductions to our public transit network.

Public transportation is an essential lifeline for countless individuals in our community, providing access to employment, education, healthcare, and essential services. Any cuts to bus routes, train frequencies, or other services would disproportionately impact low-income communities, seniors, individuals with disabilities, and essential workers who rely on public transit to meet their daily needs.

Reduced service levels would not only inconvenience passengers but also exacerbate traffic congestion, environmental pollution, and economic inequality. It is imperative that WMATA continues to prioritize the accessibility, affordability, and reliability of public transportation for all residents across the Washington metropolitan area.

As a responsible steward of public transportation, WMATA has a duty to uphold its commitment to serving the needs of the diverse population it serves. I implore you to prioritize the well-being and mobility of riders by preserving and enhancing our public transit services.

Thank you for your attention to this urgent matter. I trust that WMATA will take into account the concerns of residents and passengers as it makes decisions regarding the future of our transit system.

Regards,

Mary Mason

Phil Sahady

Potomac, MD 20854

To Whom It May Concern,

This letter is to express how vital the T2 Metrobus route is to our community. This is a vital route for many individuals, businesses, and families to access both Potomac and Bethesda. The T2 Metrobus is the only reliable public transportation to this part of the County, which is critical for the County's economy. Including servicing nearby schools (e.g., Norwood and Holy Child). This bus service is a crucial support for our area and eliminating it would cause great hard to the students and parents of these school and surrounding businesses and homes.

Please consider all efforts to protect full T2 Metrobus for the many riders who require this service to get to work, school, and other activities. Thank you for your time and consideration.

Do You Expect Me To Talk?

Posted by Alan Suderman on Aug. 10, 2010 at 6:38 pm

The D.C. Council is moving to try to force one of the subjects of its parks contracts probe to be more forthcoming with special investigator **Robert Trout**.

In pursuit of details on the murky contracts that have <u>enriched</u> Mayor Adrian Fenty's fraternity pals, Trout wants Banneker Ventures' Omar Karim to start talking about his law firm, Liberty Law Group. Liberty Law made payments of \$600,000 to Liberty Industries, which is owned by another Fenty friend, Sinclair Skinner, the *Post* has <u>reported</u>.

During his testimony before Trout in April, Skinner said those payments were not related to the parks contracts. Ward 5 Councilmember **Harry Thomas Jr.** said Karim, who has already been deposed by Trout, is singing the same tune. So today, Thomas asked the council to reconvene Thursday to consider legislation that would allow Trout to get a court order compelling Karim to answer questions and turn over records related to Liberty Law. LL has a call into Karim's attorney, **A. Scott Bolden**, and will update as necessary. Chances are D.C. Council Chairman **Vincent Gray**—who, after all, has an election to win—won't stand in the way if Thomas wants the council to chew on the parks investigation a bit more.

After the jump, read Thomas' letter to Gray:

I am writing to request an Additional Legislative Meeting for this Thursday, August 12, 2010, to consider the, "Enforcement of Subpoena of Omar Karim Resolution of 2010." The Committee on Libraries, Parks and Recreation has scheduled an Additional Committee Meeting on August 12th to consider and vote on the measure prior to its consideration by the Council.

After conferring with the Committee's Special Counsel pursuant to the, "Committee on Libraries, Parks and Recreation Budget Transparency Investigation Resolution of 2009," it was determined that compelling the testimony of Mr. Omar Karim, Founder of Banneker Ventures, LLC, is vital to the integrity and completion of the investigative report. This resolution will authorize the Special Counsel to address this matter in Superior Court.

Vincent Gray, The Friendly Looking Vampire

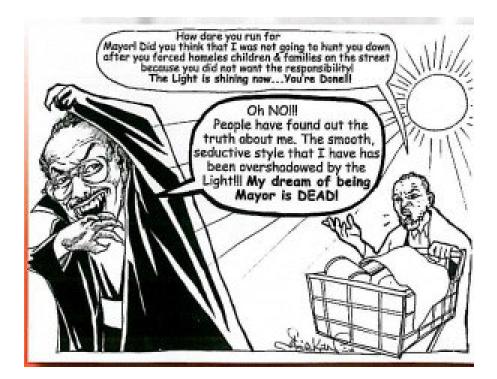

Posted by Alan Suderman on Aug. 10, 2010 at 1:53 pm

Folks have been tough on Mayor **Adrian Fenty** lately—booing him at forums (and at funerals), slapping <u>posters</u> mocking him up <u>around</u> Adams Morgan, voting against him at straw polls. At times like these, a guy needs to know he's got a friend he can count on.

Fortunately for Fenty, he's got **Ron Moten**.

Just in time for the mayoral primary, the Peaceaholics founder (whose group has reportedly received <u>\$8 million</u> in city contracts in the last four years) has dropped a new issue of *The Otherside Magazine*, a publication whose chief purpose seems to be to convince people that they don't really want to vote for **Vincent Gray**, after all. Take these two cartoons, featuring Gray as a friendly looking vampire:

We Could Do Better!" But In 1991, I seduced the people of the District to let look what we got in return for letting him run 1/3 of the city's budget! ine run D.H.S. I was responsible for the city's Needy, Foster Care, HIV/AI.D.S., He let the children in foster care down by losing millions of dollars in Federal Funds to foster care because he chose not to fill out the paperwork the homeless & much morel He foiled thousands of sick IV/ALD.5, patients by goin va years without a director, hile his employees used the funds for personal use

Eat your heart out, **Tom Toles**! Much like the Moten-produced rap <u>songs</u>, these cartoons are heavy on talking points, light on any real artistic inspiration. (Though LL chuckled at the B-movie dialogue in the second one.)

Also in *The Otherside* is the "true story" behind the Fenty administration's ill-fated attempt to donate a fire truck and ambulance to a resort town in the Dominican Republic. The magazine correctly points out that the Dominican Republic is on the same island as Haiti, but boldly claims that neither country has "emergency service vehicles," and that if only the fire truck donation had gone through, the earthquake response in Haiti might have gone smoother. (LL went to Haiti in 2001 and cannot recall if he saw a firetruck or an ambulance during his visit.)

"We have seen where Haiti could have put fire truck and the ambulance to great use during the earthquake that struck its residents," the magazine reports, not entirely grammatically.

Moten was passing out *The Otherside* last night at the <u>Ward 8 forum</u>. He says he printed up 10,000 copies. | Store Located | Stard Feedback | Careers | Verticen Thirthfinity | Contact Like | Advertises with Uk | Privacy Policy | Terms and Conditions

As much local politics as humanly possible. Send your tips, releases, stories, events, etc. to lips@washingtoncitypaper.com. And get LL Daily sent straight to your inbox every morning! IN CASE YOU MISSED IT:

- Gray Campaign Gets Punked.
- Speak Up, Omar
- Gray Auditions for True Blood

Good morning, sweet readers! LL saw a beaver swimming in Rock Creek today while walking his (and Kytja's) dogs. A beaver! LL likes to think it was a sign from <u>Eywa</u> that she is pleased with his work. News time:

Race To The Mayoral Mansion Your Own House: Man, was there a lot of mayoral election-related news yesterday. But before LL gets to it, he has a request: How about conducting a friggin' poll on the mayor's race, *WaPo*? When was the last one you did? 2008? What are we not paying you for?!

Money Money: Some late night tweeters first broke the news that D.C. Council Chairman and mayoral hopeful Vincent Gray had won the money race during the last fundraising cycle by more than a two to one margin over Mayor **Adrian Fenty**. Gray raised \$707,911 compared to Fenty's \$308,545 since June 11. Now, that's good news for Gray, but don't forget that Fenty has crushed any chance Gray ever had of outraising him long before Gray got in the race. As of last night, Fenty had raised \$4.68 million compared to Gray's \$1.275 million. And Fenty still has about \$1.3 million more than Gray in the all important "cash on hand" category. Mike DeBonis notes that Fenty has spent a "cool" million making and producing campaign ads and another \$800,000 on salaries and stipends. Other neat tweet facts: Bill Clinton's old golf partner Vernon Jordan gave \$250 to Gray, while Facebook founder Mark Zuckerberg gave to Fenty. More Parks Drama: LL has this story about the D.C. Council moving towards forcing Fenty frat brother Omar Karim to be more forthcoming to special investigator Robert Trout about his law firm, Liberty Law Group. Another Fenty pal, Sinclair Skinner, has also been mum about the \$600,000 Liberty Law paid to Skinner's Liberty Industries, saying those payments had nothing to do with the park contracts the council is investigating.

It's Suing Time: The Fraternal Order of Police filed suit Tuesday against the city over a delayed FOIA request it submitted to find out how MPD and Peaceaholics work together. "The request, filed with the Office of Chief Technology Officer, seeks all documents between Jan. 1 2007 and July 17, related to how the police department responds to requests from Peaceoholics and whether the agency uses government resources to assist the group. The request also seeks information on whether the police department has ever evaluated whether Peaceoholics is effective," reports Tim Craig at the *Post*. Ron Moten, the co-founder of Peaceaholics, tells Craig the lawsuit is politically motivated, and FOP head Kris Baumann is just trying to bash Fenty around before the election. The FOP is backing Gray. Attorney General Peter Nickles tells *The Examiner's* Freeman Klopott the exact same thing. Baumann tells Klopott he's just trying to figure out what is so great about Moten. "Ron Moten has put himself out there for Fenty," Baumann told *The Examiner*. "I find it inexplicable that the mayor would not produce documents that could support Moten's position."

From the vault, here's a clip from a October 2009 *City Paper* cover <u>story</u> on the Peaceaholics describing the scene after a shooting: "If you're not familiar with Moten and his group, you're not familiar with crime in the District. When asked who's in charge of the scene at Alabama and Congress, an officer replies, 'Probably that dude from Peaceoholics; he's the big boss around here.' Standing nearby, a police lieutenant says she has no idea what Moten is doing. "He didn't speak to me or any of my officers," she says.

Craig notes that the *Post* filed a similar FOIA in June with the Department of Youth Rehabilitation Services. "In 2006, DYRS had \$119,000 in contracts with Peaceholics. By 2008, those contracts swelled to nearly \$1 million. In 2009, DYRS had \$675,000 in contracts with Peaceholics to 'reduce youth violence' and enhance 'youth's ability to

navigate day-to-day realities and environmental situations,' according to the agency's FOIA response." And Klopott follows up: "But documents obtained by *The Examiner* show that Peaceoholics also receives cash indirectly from the agency. The nonprofit is a member of the East of the River Police Community Partnership, which received a twoyear DYRS contract valued at about \$3 million in 2009. It's not clear how much of the cash landed in Peaceoholics' hands. Moten has close ties to the Rev. **Donald Isaac**, who heads East of River."

You've Just Been GOPED: The D.C. GOP filed a complaint with the Office of Campaign Finance that Gray ads appearing in *Hill Rag* don't have the required campaign disclosure statements on them, Craig reports. More interesting than the complaint is what LL touched on in his piece about Leo Alexander, and Craig susses out in more detail: D.C. Republicans love Fenty (well, they love schools Chancellor Michelle Rhee, so they like Fenty). "It's not unusual for local GOP or Democratic committees to needle candidates in contested primaries from opposing parties. The D.C. Republican Committee, however, has been singularly focused on Gray for months. Last year, the committee filed a complaint with the Office of Campaign Finance after it was discovered Gray had used his official council stationary to solicit a donation from the D.C. Democratic State Committee. The board cleared Gray of any wrongdoing this spring, but the local GOP is appealing that decision. While he stopped short of a formal endorsement, the executive director of the D.C. Republican Committee told the Washington Post before Gray got into the race in March that the party would not be fielding a candidate this year because most city Republicans support Fenty." Is Your Refrigerator Running?: Late in the day, the Gray campaign puts out a release saying some rascal has hijacked their phone lines and is crank calling people and hanging up. Police said they were investigating. LL blames the phone company. Not Good Enough!: The Post's Ann Marimow finally gives some press to the longneglected Ward 5 race, where the young challengers to Councilmember Harry Thomas Jr. say he's not doing enough to bring in new businesses or city money into the ward. Marimow had her work cut out for her trying to make this story exciting, as there's a probably a reason why no one has been paying attention to it. "His opponents in the Sept. 14 primary—Delano Hunter, a community organizer; Kenyan McDuffie, a former government lawyer; and Tracey Turner, an information technology consultant-said that Thomas has been unresponsive to those who are not politically connected and that his clashes with the administration of Mayor Adrian M. Fenty (D) have been primarily about scoring political points. ... To his supporters, Thomas is highly accessible and responsive. He stays in touch by iPad from the council dais, as well as through Facebook and the cellphone number he lists on his business card. When seniors were left without electricity after a powerful storm last month, he negotiated \$39-a-night hotel rooms. He 'tore down doors' to make sure the city's Water and Sewer Authority was responsive to flood victims in Bloomingdale, said John Frye, a former advisory neighborhood commissioner and labor leader who retired from the water agency in March." Of note: "Thomas isn't coy about his ambitions. If council member Kwame R. Brown (D) is successful in his bid to succeed Vincent C. Gray as council chairman, and a special election is held for Brown's at-large seat, Thomas said, 'I will consider that a very real opportunity."

You Left Something Out: Gay-rights advocate Lane Hudson calls out the *Post* editorial for not mentioning council chairman hopeful Vincent Orange's comments four years ago on gay marriage. "It was baffling to read *The Post*'s endorsement of Vincent Orange for D.C. Council chairman [editorial, Aug. 9] and see no mention of his bigoted comments on marriage equality when he ran for mayor four years ago. Referring to his opponents in the mayoral election, Mr. Orange said, 'I am the only one that is opposed to same-sex marriage. The other four, they say they believe in God, they go to church, but they're also for same-sex marriage . . . I don't think they're morally fit to run this city.' Mr. Orange clarified his views when he told *The Post*: 'If you believe in God, the Bible says be fruitful and multiply. I'm saying same-sex marriage is not condoned by the Bible.' Mr. Orange did not understand the separation of church and state. Of course, since making these discriminatory statements and losing the mayoral race, Mr. Orange claims to have seen the light. He now says his views on God and church are fully compatible with gay marriage; he had a revelation while lobbying for Pepco."

development, calling it disingenuous and odious. "Gray has called the 14-page document 'dynamic and far reaching.' But in it he just regurgitates current programs and policies while proposing to expand government, establish task forces, 'better coordinate' existing agencies and groups, and hold summits."

Neibauer wraps up other races' fundraising [WBJ]

Nate Beeler is great [*Examiner*]

Rhee says she likes D.C. more than Sacramento [<u>Georgetown Dish</u>] Give us our statues! [<u>Post</u>]

Testimony to the WMATA Board re FY25 Budget February 26, 2024

My name is Cheryl Cort and I am the Policy Director for the Coalition for Smarter Growth. CSG is leading an 18-group non-profit coalition and teaming with the business community to support Metro funding.

We thank WMATA for its hard work to identify cost savings and efficiencies to reduce the \$750 million operating budget gap. We also thank the jurisdictions for proposing \$480 million in additional operating funding for FY25. This includes the \$150 million promised by Governor Moore and key state legislators.

But we urge our elected leaders to do more to reduce and even close the entire gap. We all know that failure to close the entire gap will still mean some service cuts, fare hikes, impact on the workforce, and delays in the capital program.

Metro is critical to our region's economy, access to jobs and opportunity, the functioning of our entire transportation system, and to fighting climate change. Transit should be our region's top transportation funding priority and more funding should be shifted from highways to transit.

The pandemic and growth in telecommuting could undermine our region's long-standing goals for a sustainable, equitable, transit-oriented future. So, we strongly support the agency's commitment to all-day frequent, reliable, safe rail and bus service, and a simplified fare structure, as the best way to restore ridership.

Frequent, all-day bus and rail service is critical for all sectors of our workforce, providing access to jobs and opportunity, saving household transportation costs, attracting the next generation workforce, and enhancing our economic competitiveness. Metro is key to supporting transit-oriented communities and supporting car-free and car-lite living, reducing our greenhouse gas emissions.

Without additional revenues beyond the \$480 million now proposed, Metro faces hard choices. We believe service cuts and fare hikes should be minimized to the maximum extent possible. This means living with the shift of capital funds to preventative maintenance and delaying some capital projects. But we hope that this shift can be limited to FY25.

We urge our region's officials to come to an agreement by December 2024 on a long-term dedicated funding solution for Metro. We should act while officials are focused on the issue, and CSG would like to be at the table for these discussions. Thank you.

Written Comments of Mike Litt, Sierra Club District of Columbia Chapter

For the Washington Metropolitan Area Transit Authority (WMATA) FY25 Proposed Budget Public Hearing

27 February 2024

Metro Board of Directors, thank you for the opportunity to submit comments for Metro's FY25 Proposed Budget. My name is Mike Litt. I am a car-free renter in Ward 6 and Chair of the Sierra Club DC Chapter's Sustainable Transportation Committee. Sierra Club is America's largest and most influential grassroots environmental organization, with millions of members and supporters. Here in DC, we have about 3,000 dues-paying members and many thousands of supporters.

According to the District of Columbia's *Multimodal Long-Range Transportation Plan*, also known as <u>moveDC</u>, transportation is the District's second highest source of GHG emissions, accounting for 21% of such emissions. WMATA, which operates public transit facilities that help move around 700,000 people in the DC metro area <u>every day</u>, therefore plays a critical role in meeting the District's goals for a 60% reduction in GHG emissions by 2030 and carbon neutrality by 2045, as required by the legally binding <u>DC Climate Commitment</u> <u>Amendment Act</u>. Meeting our national and local carbon reduction goals and improving air quality and health will require both shifting more trips away from vehicles and making sure that vehicle trips—including those on transit vehicles—are powered by clean energy.

Budget shortfall

Metro is the lifeblood of DC's economy and an essential service for DC residents and workers, suburban commuters, and the Federal government. It is a part of what makes the DMV area a special place to live and is critical to having a climate smart transportation system, where people can get around the District as sustainably as possible. It should be treated as such and fully funded as the priority it should be. The unrevised proposed FY25 budget would, instead, gut our transit system, slashing Metrobus lines in half, decreasing frequency on all Metrorail lines to every 15 minutes on weekdays and 20 minutes on weekends, closing 10 Metrorail stations, eliminating 1900 staff positions, and increasing fares by 25% across the board.

We appreciate the enormous challenge of identifying and weighing cost reductions and the revisions you have made to the proposed budget, in light of \$480 million in additional commitments so far from DC, Maryland, and Virginia. However, even with those extra contributions, including DC's more than fair share of \$200 million, there would still be some service cuts and a <u>\$164 million</u> preventive maintenance transfer from the operations budget to the capital budget in FY25 and a forecasted \$174 million transfer in FY26. Such annual transfers would cut into capital budget funding for critical infrastructure projects to ensure Metro's safety, reliability, and sustainability.

We urge regional leaders to <u>shift funding</u> away from highway expansion in order to fully fund the remaining gap in Metro's budget. According to Metro's proposed <u>FY25 Proposed Budget Book</u>, annual transfers could mean Metro reaches its debt limit in FY28, two years before the end of its Six-Year Capital Improvement Program (CIP). A capital budget shortfall would jeopardize projects to rehabilitate facilities, infrastructure and systems, electrify bus garages, and deploy zero-emission buses. The \$11 billion in capital funding for FY2015-FY2030 was already \$6 billion short of identified funding needs to begin with. The CIP must not be allowed to be left unfunded. Furthermore, capital funds will need to be identified for the 10-year capital plan and beyond to ensure a long-term state of good repair of the system and full, on-time deployment of Metro's zero-emission bus program. As Metro alarmingly notes, "Long-term increases in the state of good repair backlog will cause Metro to move away from a proactive asset replacement strategy and risk increases in reliability and safety incidents."

Ultimately, Metro needs dedicated funding like other transit authorities. Sierra Club is part of the <u>Fund Metro!</u> coalition, which has <u>called for</u> standardizing reporting from WMATA to provide more transparency and solving the lack of adequate long-term dedicated funding once and for all by the end of the year. We look forward to working with regional leaders to identify all viable options for stable, dedicated funding to finally put an end to the continuous cycle of budget shortfalls and looming transit death spirals.

While we appreciate the need to look for cost savings everywhere possible, we ask that WMATA reconsider its proposal to replace cloth seats with vinyl seats, as vinyl interiors have been <u>reported</u> to release elevated levels of vinyl chloride, a known carcinogen.

Service improvements

We applaud WMATA and its staff for tremendous service improvements in the past year, including:

- Increased service frequency on all six rail lines, running more train service than it has in its 47-year history
- Completing phase 2 of its data-driven <u>Better Bus Network Redesign</u>
- Celebrating the grand opening of the Potomac Yard-VT Metrorail Station
- Launching 24/7 bus service on 14 routes

It's no wonder Metro ridership increased <u>more than 30%</u> in 2023. To increase ridership even more, we support expanded weekend Metrorail hours and also encourage WMATA to work toward high-frequency service across the system, defined by *moveDC* as a five minute or lower wait for rail and 10 minutes or lower for buses.

WMATA should continually prioritize those areas of highest need in order to improve the District as a whole. According to <u>moveDC</u>, the areas in the District with the greatest transportation needs are defined by factors such as residents' proximity to frequent transit service and their commute times. People of color, low-income residents, and people with disabilities make up a larger percentage of the population in areas with greater transportation needs than in other neighborhoods in the District.

We also support the Bicycle and Pedestrian Facility Rehabilitation CIP in the proposed capital budget, which would improve pedestrian access and replace bicycle facilities at Metrorail stations.

The DC Council's <u>emergency legislation</u> to impose <u>\$100 fines</u> to finally enforce the joint District Department of Transportation (DDOT)/Metro Clear Lanes Project has been a welcome and much-needed relief to improve bus travel times and bus stop safety. As we mentioned in our <u>testimony</u> in the DDOT Performance Oversight

Hearing, we ask DDOT to publish data on changes in illegal and obstructive activity in bus lanes and bus travel times as Clear Lanes enforcement goes into full effect this year.

Safety

Despite great strides made over the last year, we are concerned that Metro only met 12 of its 27 Service Excellence Measures on its <u>performance scorecard</u> for <u>Q1 FY24</u>. We are particularly concerned that customer assaults more than doubled compared to the same period in FY23, and that bus customer injuries spiked in September, double the normal occurrence in a month.

We appreciate the information in the proposed budget that shows how some capital projects are expected to improve safety, as measured by employee and customer injury rate performance targets. The final budget should also note all operations and capital projects that are expected to help meet targets for other safety metrics, including crime, assaults, rail collisions, derailments, fire incidents, and red signal overruns.

Electrification

We applaud WMATA's progress, since last year's performance oversight hearing, toward transitioning to a zero-emission bus fleet, including the following notable achievements:

- Releasing its <u>Zero-Emission Bus Transition Plan</u>, which moved up WMATA's target date for reaching a 100 percent zero-emission fleet from 2045 to 2042 and stopping the purchase of fossil fuel buses from 2030 to 2027.
- Receiving a <u>\$104 million</u> Low or No Emission Vehicle grant, the largest awarded by the Federal Transit Administration last year. Sierra Club is proud to have supported WMATA's successful grant application with a letter of support and would be happy to help again with applications for additional <u>available</u> <u>funding</u>.
- Rolling out its <u>first two electric buses</u> to hit the street. We were proud to have unveiled one of those buses with WMATA at last fall's <u>National Drive Electric Week event</u> in DC.

It is essential that WMATA move more rapidly to electrify its bus fleet, in order to comply with the DC Climate Commitment Amendment Act, meet WMATA's own sustainability goals, and improve air quality for District residents. Placing two electric buses on the road is a starting point; the pace of zero-emission bus adoption must increase going forward.

Mayor Bowser, Chair Mendelson, and Councilmember Allen, have called on WMATA to freeze new capital projects that do not contribute to a state of good repair. However, WMATA must not delay its electrification projects and zero-emission transition. We appreciate that <u>WMATA has committed</u> to continuing modernization of the Bladensburg, Cinder Bed, and Northern bus garages, including opening the Northern bus garage as Metro's first all-electric bus facility. The proposed FY25 budget's spending on the Bladensburg and Northern bus garage projects are largely paid for by federal grants, and FY25 spending on the Cinder Bed project is entirely paid for by federal grants. We also urge WMATA to stick to its plan of acquiring 25 40-foot Battery Electric Buses (BEB) in FY25, in addition to its expected delivery of 10 remaining BEBs from its pilot program. As a reminder, as a <u>Sierra Club report</u> on WMATA's bus fleet shows, there would be a savings of at least \$350 million over a 15-year time period if 50% of WMATA's fleet were electric.

We would also like to see a timeline for Metro's transition of its service and maintenance vehicles to zero-emission vehicles, as mentioned in the description of the Service Vehicle Acquisition Program (CIP0009) of the proposed capital budget.

Sustainability targets

The Sustainability/Resiliency Program (CIP0212) description of the proposed capital budget says Metro is developing a Sustainability Action Plan and completing a decarbonization strategy as part of the *Energy Action Plan*. We would like to know the timeline for the release of each, especially since the targets in the *Energy Action Plan*, introduced in 2019, were expected to be achieved by 2025.

Metro's <u>Strategic Transformation Plan</u>, released last February, includes metrics and targets for GHG per revenue mile, water use per revenue mile, percent of renewable (carbon-free) electricity, percent of fleet that is zero-emission, and number of facilities with green certifications. We would like to see progress on achieving the goals for these metrics.

In relation to its metric on GHG emissions—this data and documentation should be readily accessible to and viewable by the public. For calculating GHG emissions, we recommend that WMATA use Argonne National Laboratory's Alternative Fuel Life-Cycle Environmental and Economic Transportation (<u>AFLEET</u>) tool. It is also important that this data be refreshed on a periodic basis and the latest refresh date be displayed. WMATA may want to look into using data visualization software like Qlik Sense or Tableau, which can be set to automatically refresh and can be embedded in a web page.

WMATA is a part of what makes the DMV area a special place to live. We make these recommendations with enormous gratitude to WMATA's entire workforce for keeping Metro running despite significant challenges over the past few years. We look forward to continuing to work with WMATA so that Metro can keep serving as the arteries of the Washington metropolitan area, with sustainable public transportation, including zero-emission buses, in the District taking on a greater share of the trips that people make every day. We can be reached at <u>clean.transportation@dc.sierraclub.org</u>. Thank you for taking the time to consider these comments.

RE: Elimination of the M4 Bus in Washington

To Whom It May Concern:

The idea of reducing public transportation in a major metropolitan city makes little sense and more so, at this location.

The City government intends to rebuild the civic core at the corner of McKinley and Connecticut Avenue with housing and the public amenities of a library and community center as part of this new development. There will be far more limited parking which means the public amenities will not be able to be accessed as they are now both by the M4 bus and private car.

The M4 bus is a feeder to Metro; operates as a school bus for children going to Deal Middle School and Jackson Reed High School; connects those in the neighborhood with access to retail; reduces car traffic, car accidents and the stress of driving. It also fosters neighborliness.

This neighborhood has an aging population with intent of many to age in place. Knollwood, a home for seniors, uses this line.

On another note, the M4 bus was cited by Maret School as a critical component of its transportation plan to its proposed (and now under construction) accessory-use school sports field at the corner of Utah and Nebraska Avenues. The Maret School campus is nearly four miles away. There is already rush hour traffic stress on Nebraska Avenue due to the fact that Rock Creek Beach Drive is now closed. There will be stress on the neighborhood parking when the Episcopal Center for Children reopens as we are told it will in fall of 2024. And, when the Maret school sports project is finished this fall, the traffic and parking will be further stressed.

Public Transportation is a critical component of the social network and well being. That is a proven quality. Otherwise, those without transportation or the ability to drive become isolated.

The biggest threat to our planet is global warming. Why would we willing contribute to that? Per the World Resources Institute, *"Public transport is one of the best, most cost-effective solutions available to address today's climate and development challenges. Buses and trains can reduce greenhouse gas (GHG) emissions by up to two-thirds per passenger, per kilometer compared to private vehicles."*

The budgetary shortfall could be relieved by other cuts. Taking away from public transportation is short-sighted for the many reasons stated. Please retain the M4 bus.

Regards,

cc: Commissioner Bruce Sherman, ANC 3/4G SMD02

GOOD EVENING and thank you for this opportunity to speak.

- My name is Sandra Neuzil.
- I live in Reston, Virginia.

Although I am on the Metro ACCESSIBILITY ADVISORY COMMITTEE ...,

I speak tonight as an individual person who is LEGALLY BLIND, who relies on Metro ACCESS, Metro RAIL and Metro BUS.

I am asking WMATA, within the ULTIMATE CONSTRAINTS of the 2025 budget, to MAINTAIN as much ...

- GEOGRAPHIC COVERAGE and
- HOURS of SERVICE

for Metro RAIL and BUS as possible ...,

SO THAT ... the GEOGRAPHIC AREA and HOURS of SERVICE of Metro ACCESS are maintained to the MAXIMUM EXTENT possible.

I rely on Metro to go to locations in Maryland, DC, and Virginia ... where I work part time and volunteer as an ADVOCATE for people who have LOW VISION and BLINDNESS.

Some destinations are NEW to me ... and some I go to more than once.

- I RELY on Metro ACCESS to get me to UNFAMILIAR locations, and
- to GO AFTER DARK.

Once I am familiar with a location, I will GLADLY use fixed route Metro RAIL which

gives me MORE FLEXIBILITY and

• SAVES MONEY for Metro.

If WMATA is forced to make RAIL and BUS service

- slightly LESS FREQUENT, or
- make TRAINS SHORTER, or
- INCREASE FARES SLIGHTLY

That could be more palatable ...

if Wmata continues fixed route services

- in as WIDE A GEOGRAPHIC AREA,
- SEVEN DAYS A WEEK, and

• as many HOURS OF THE DAY as is FISCALLY POSSIBLE ... and thus maintain ... FULL METRO and METRO ACCESS Service that ALL riders depend on to be fully engaged citizens who can go to and from medical appointments and work, and who contribute to the vibrant DMV. Thank you February 28, 2024

February 27, 2024

Board of Directors Washington Metropolitan Area Transit Authority 300 7th Street, S.W. Washington, D.C. 20024

Re: Proposed Service Changes Impacting ANC 7B in the FY25 Budget

Dear Members of the Washington Metropolitan Area Transit Authority (WMATA) Board,

My name is Travis Swanson, Commissioner for Single Member District 7B03 and Chair of ANC 7B's Committee on Transportation. I am submitting this testimony to express strong opposition to the proposed FY25 service cuts in ANC 7B. While this testimony represents my perspectives as an elected commissioner and chair of the ANC 7B Committee on Transportation, it is crucial to clarify that I am not presenting the views of ANC 7B as a whole in this testimony.

I want to bring your attention to several critical concerns related to the proposed service changes that will have a profound impact on the residents of ANC 7B. The proposed service cuts, if implemented, will adversely affect the daily lives of ANC 7B residents in the following ways:

Bus Routes 32 and 36 Changes:

• Ending Bus Routes 32 and 36 at L'Enfant Plaza, requiring riders to transfer to metro rail, will increase both commute time and cost. The added expense of using rail over the bus alone places an undue burden on residents of ANC 7B, as well as requiring many residents to make multiple transfers to reach their final destination.

Elimination of Route M6:

• The proposed elimination of Route M6, with suggested alternatives on Routes 32 or 36, leaves many residents without service. Notably, the stretch of Pennsylvania Avenue between Southern Avenue and Branch Avenue, where Route M6 is the sole option for reaching the Potomac Avenue Metro Station, will face a significant service gap. This is particularly concerning as Route 32 turns off Pennsylvania Avenue at 25th Street, and Route 36 turns off Pennsylvania Avenue at Branch Avenue, creating a noticeable void in service for residents east of Branch Avenue.

Changes to Route V4:

• The decision to end Route V4 at Potomac Avenue Station instead of continuing to the Navy Yard Station will impact residents relying on this route for essential access to jobs, entertainment, and medical care in the Navy Yard community.

Elimination of Additional Routes:

• Routes A31, A32, D51, S35, V7, W3, and W8, scheduled for elimination, directly serve ANC 7B, affecting our residents' mobility and access to essential services as well as other communities in our ward.

Concerns about Fare Model Shift:

• The proposed service changes appear to signal a shift toward a system where buses primarily transport individuals to MetroRail stations. This approach raises concerns, especially given the fare model in Washington, D.C., where the train costs more than the bus. Wards 7 and 8, with the lowest median household incomes and car ownership rates in the District, will be disproportionately affected by the proposed changes.

Historical Assurance Discrepancies:

Previous assurances, such as those made when Routes 30N, 30S, 34, 24 and 39 were cut, have not proven accurate. ANC 7B has experienced decreased service, longer wait times, and disrupted commutes, contradicting WMATA's earlier promises.

Assurance Discrepancies in Specific Instances:

- Elimination of Route 39: WMATA assured us that the impact of cutting Route 39 would be minimal, emphasizing that Route M6 would seamlessly fill the gap on Pennsylvania Avenue east of Branch Avenue. However, it is disconcerting to observe Route M6 now under consideration for elimination with no viable alternative.
- Elimination of Routes 30N and 30S: Similarly, when Routes 30N and 30S were cut, we were told that accessing Georgetown, Glover Park, and Friendship Heights would remain easy through a smooth alternative by taking Route 32 or 36 downtown and transferring to Routes 31 or 33. However, the current proposal lacks overlap between Routes 32/36 and Routes 31/33, leaving our communities without the promised connectivity.
- Elimination of Route 34: Furthermore, the assurance that frequencies on Routes 32 and 36 would be increased to 10-minute intervals after Route 34 was cut seems to hold true only where the routes overlap, almost exclusively west of the Anacostia River.

Over the years, Ward 7 has been consistently assured that proposed changes would have minimal impact; however, the stark reality contradicts these assurances. Instead of experiencing minimal disruption, our community has witnessed decreased services, resulting in prolonged wait times and extended commutes. Adding to the distress, alternative services implemented in response to past cuts are now at risk of elimination.

I strongly urge the WMATA Board to reconsider and outright reject the proposed service cuts. The residents of Wards 7 and 8, already grappling with socio-economic challenges, should not shoulder the burdens of these aggressive changes. It is imperative to prioritize affordable and efficient transportation options that cater to the unique needs of our communities.

I appreciate your attention to this matter and sincerely hope for a comprehensive and equitable resolution that safeguards the essential transportation services crucial for the well-being of ANC 7B residents.

Sincerely,

Te R. Sum

Travis R. Swanson Commissioner, ANC 7B03 Chair, ANC 7B Committee on Transportation

GOVERNMENT OF THE DISTRICT OF COLUMBIA

ADVISORY NEIGHBORHOOD COMMISSION 3A

Resolution Regarding WMATA FY2025 Budget

We appreciate the effort that WMATA and local and state leaders have been making to provide additional funds for the regional transit system to maintain effective operations in FY2025. It seems clear that WMATA, the three jurisdictions, communities and riders do not want to see the dramatic reductions in spending and services that would be necessary to deal with a \$750 million shortfall in funding, as the Docket continues to show. The elimination of over half the transit services would create unacceptable consequences for hundreds of thousands of residents, workers and visitors, business establishments and institutions, and would jeopardize the long-term function and viability of public transportation in the Washington, DC, metropolitan area.

The majority of residents in our ANC do not live in convenient walking distance from a Metrorail station so our area is highly dependent on quality bus service. If WMATA made the cuts in bus service proposed in the December 2023 draft budget (and repeated in the current Docket), would significantly reduce the quality of life, mobility and access for a large share of the individuals trying to travel to and from our area for the full range of purposes, and remove one of the primary reasons for many people to choose to locate in the area. Those changes would include:

- complete loss of bus service on the 96 and M4 and D2 routes
- elimination of weekend service on the N2/N4/N6 route

- truncation of the 33 route at Foggy Bottom/Potomac Park rather than Federal Triangle/Archives which are the current terminus, which would force most riders bound to downtown to make a transfer or walk a considerable distance to their destination and would end all direct bus-to-bus transfers between upper Northwest and either Southwest or Southeast Washington.

We have attached more detailed information on the routes our constituents use and need.

We want to emphasize that with additional funding for FY2025, WMATA needs and must work urgently to maintain essential services at reasonable fares, and keep the foundation of the public transportation system functioning as the basis for building up and improving future services, meeting transportation and energy and climate goals, and continuing to retain and increase the ridership base.

It is very important not to diminish or destroy the utility of the Metrobus services in particular in a shortterm crisis, when the effect could be losing long-term ridership and confidence and trust in the WMATA system as a whole.

In addition, WMATA continues to plan for moving forward with its "Better Bus Initiative" and is still working toward issuing a revised "Visionary Network" map for the future regional bus system. WMATA committed to releasing the new map, based on the extensive and sweeping comments received on the preliminary network map in spring 2023. WMATA also has promised to conduct additional community engagement and provide for a public comment period on the new network map, as well as the expected Year One adjustments to begin implementing the Better Bus plans some time in calendar year 2024. It is essential that WMATA carry out those commitments as it would other public comment processes for the budget, and pay close attention to the comments. This is not just a one-year budget proposal, it is the roadmap for the next 30 years and must be carefully considered, with the needs of current riders and future riders in mind.

Advisory Neighborhood Commissioners (January 1, 2023-December 31, 2024)www.anc3a.org3A013A023A033A043A05Thaddeus Bradley-LewisJudy HavemannHans MillerJeremy Del MoralAnn Lane Mladinov

Our DC Councilmember Matt Frumin provided clear and strong comments on the potential impacts of major losses in bus service in the preliminary Network Map, and we hope that the revised map will not make the same devastating reductions in service that we saw in the preliminary map.

WMATA should not be carrying out short-term changes that will jeopardize the future functioning and utility of the regional transit system. When WMATA develops an operational plan to go along with the revised budget--we hope with the promised \$480 million in hand from the three jurisdictions--the staff and Board need to adopt a set of operating changes that will not decimate the system by terminating vital bus services that our neighborhoods need and the transit network as a whole needs in order to keep functioning as an effective regional system. That includes fares and services. Sharp rate increases will also hurt riders who most need economical service.

When WMATA completes the FY 2025 budget and focuses on the revised network map and proposed Year One changes to be implemented in FY2025 under the Better Bus Initiative, it will be just as important for the staff and Board to follow the same principles. Many of the changes in the December 2023 Budget and in the Better Bus Preliminary Visionary Network have involved cutting back key services to neighborhoods that do not have acceptable public transit alternatives for reaching to and from important points. That does not inspire confidence in WMATA's understanding of the vital role these buses play in providing access and mobility to people who have made their lives in the neighborhood, made investments in living there, and rely on public transit because they do not have a private vehicle and/or do not have safe and economical alternatives. The same is true in all the wards, particularly around the edges of the District, where the topography is hilly and streets often curve to follow the ridges and contours of the hills.

Efforts to "straighten out bus routes" may sound reasonable but too often those general statements end up meaning elimination of neighborhood buses if they have hills and/or multiple turns onto small residential streets--even where the residential streets are lined with a dense cluster of row homes and apartments. That includes a number of Metrobus routes serving our area, in fact all but the lines on Wisconsin Avenue, Connecticut Avenue, and maybe Massachusetts Avenue. Paring back to service on those major streets is not enough to serve all the far-flung neighborhoods, including many that currently have bus service, have multi-family dwellings including buildings that are not high income, and have many people who want and need transit in order to meet their transportation requirements. Cutting out these services is not the way to a better future for neighborhoods and households' health and well-being, for the District's housing policy and economy, education and employment, or for the environment and energy conservation.

Bus service is the foundation of the transit system and the essential transportation for reaching the "grass roots" customers (many of whom are seniors or have mobility challenges, cannot walk long distances or ride bicycles or scooters, especially with parcels, with children, and/or in inclement weather). That's the reality, and wishing for straight routes and a rectilinear network of bus lines is not going to meet all those needs adequately to satisfy District goals and objectives.

The DC Circulator is not designed to serve that kind of market either. It is the job of the regional transit system to serve medium-size markets when no other form of public transportation can. Those routes may not be as remunerative as a high frequency bus line on a major arterial. But the network of bus lines feeds Metrorail and also feeds the bus lines on priority corridors. Local bus routes make it possible for people to live in the apartments off the main corridors, along Glover Archbold Park, Cathedral Avenue, etc., and get to stores and schools and other establishments that are not on the main streets. WMATA cannot abandon all of these routes and still be an effective, people-centered transit system.

It is also vitally important to have a sense about the prospects for the future of the transit system. Multifamily developments are continuing to go in on main arterials while at the same time small apartment and condominium buildings are adding units and ADUs are being built throughout the neighborhoods. The District is still coming out of the COVID-19 period when so many residents were working from home. Many workplaces are asking employees to come to the office just two days a week, but that is changing. Year One of a transformative bus network plan is not the best time to cut off the arms of your feeder network because pre-COVID-19 riders are still adjusting and deciding about returning to work. It can be hard to recapture bus riders after service is removed. They lose their habit of using public transit and they lose their faith in public transit.

BE IT RESOLVED THAT:

• WMATA should not adopt the devastating cuts in Metrobus services that were proposed in the December 2023 budget, either in the revised FY2025 budget or in subsequent operating changes within the Better Bus process. That includes the drastic changes affecting our area, including elimination of the 96. M4, D2, D6, and G2; elimination of weekend service on the N-line; and truncation of the 31/33 at Foggy Bottom/Potomac Park that were included in the Docket released on February 8. Those changes would leave many people and neighborhoods without vital public transit service, and hurt the overall transit network and transportation system, cutting off connections and forcing more people either to use private motor vehicles or car-hire services or be left with no reasonable transportation options at prices they can afford.

• WMATA must assure that it maintains the vital Metrobus services that riders now rely on throughout our area, not only on major arterials but also serving high density residential neighborhoods that have long been bus-dependent, to make it possible for people to reach key destinations by transit, whether for work, school, shopping, medical appointments, recreation, etc. Those are principles WMATA has expressed in the budget documents and the Better Bus Initiative, and should remain top priorities. • WMATA must also meet its commitment to issue its revised Better Bus "Visionary Network" for full public comment and take the comments into account in any map of the future system that it decides to implement. As part of that public review and comment process, WMATA should also reflect public comments in is recommendations for "Year One" changes under the Better Bus Initiative, and take care not to eliminate or reduce vital lines needed for current and future riders.

We hope WMATA will continue to hear the voices and the needs of the people they serve, and work with the District and the other jurisdictions to shore up the funding for the transit system and ensure that WMATA services can be maintained and improved for the short and long term.

W MAL

Chair

and Mladirov Secretary

This resolution was approved by the Commission by a vote of 4 - 0 at a duly noticed public meeting on February 20, 2024, at which a quorum was present. (Three of the five Commissioners constitute a quorum.) By the same vote, the Commission designated the Chair or his designee(s) to represent the Commission on this matter.

DETAILS OF BUS SERVICES AND NEEDS OF ANC 3A

ANC 3A was established to serve a densely settled area in the middle of Ward 3, including portions of Cathedral Heights, Cathedral Commons, McLean Gardens, City Ridge, and north Cleveland Park that are located near Wisconsin Avenue as well as areas in Cathedral Heights, Wesley Heights/Westover Place, Berkshire-Greenbriar and Ward Circle along Massachusetts Avenue, and Nebraska Avenue from Ward Circle to south Tenley Circle, none of which are directly served by Metro.

Our area depends on:

- the 30-series of buses on Wisconsin
- N2, N4 and N6 running along Massachusetts Avenue between Friendship Heights and Dupont Circle-Farragut Square, including the Idaho/Cathedral/New Mexico/Nebraska loop
- M4 running between Tenleytown and Sibley Hospital
- 96 running from Tenley Circle through our neighborhood and on to Woodley Park, Adams Morgan, the U Street corridor, Union Station, and beyond.
- D2 between North Glover Park-Cathedral Heights to Dupont Circle

Our Commission area has a very high proportion of apartment buildings and condominiums, in addition to some row houses and a few blocks of detached and semi-detached homes. Many of the apartments and condominiums are on the major arterials of Wisconsin and Massachusetts Avenue, but the high density residences extend along Cathedral Avenue and into the interior of the neighborhoods. As in many neighborhoods in the District, the streets are narrow, there is very little off-street parking such as in alleys, parking is difficult, and many residents do not have cars. The population includes many residents who are over 65, people with disabilities, families with young children, young professionals, and college or graduate students. The U.S. Census also shows that the average household income is lower than in most other areas of Ward 3, and the share of people of color is higher. We have some economical housing and the businesses and residential development also provide jobs for essential workers, both from this area and across the region. That means the Metrobus routes are serving a broad population who currently need and are going to continue to need public transit. Additional residential and commercial development is already underway and planned, which will increase the demand and importance of frequent and reliable bus service.

The spatial patterns we see in the Washington region, including the location of commercial development and decisions on where to live and work, were not based on analysis of how far apart analysts believe transit lines should be or what the most ideal transit map would look like. They were based on factors of history, geography, economic conditions, and public and private sector development actions; family and household situations, finances, job options; taxes and other laws and regulations; tastes and preferences; and random occurrences that would be difficult to model or predict. The region we see is the result of decades of decisions by individuals, households, businesses and institutions, as well as federal, state, and local government. The patterns may not seem "rational" or "logical," but that is not uncommon with the spatial structure of most metropolitan areas. Bus systems cannot entirely reshape the communities they serve; their job is not to dictate where people go, but to make increasing numbers of movements possible by public transit that is clean, safe, reliable and efficient, and serves as an alternative to using private motor vehicles.

The preliminary draft "Visionary Network" map of Metrobus routes serving our area would have numerous detrimental effects.

It is important to start with the role played by current Metrobus services to evaluate future options:

- service on the Priority Corridor of Wisconsin Avenue,
- service along Massachusetts Avenue and adjoining areas currently reached by N2, N4, and N6
- service from Cathedral Commons, McLean Gardens, and Cathedral Heights on the 96 to Woodley Metro and beyond
- frequent and direct service between North Glover Park and other interior blocks of that neighborhood and Dupont Circle Metro now provided by the D2.
- service to Friendship Heights and to Dupont Circle from Cathedral Avenue between Idaho Avenue and Glover Archbold Park and New Mexico Avenue
- all service on Western Avenue in NW Washington, DC
- convenient service between Knollwood/Barnaby Woods and Chevy Chase/Friendship Heights
- 1. Wisconsin Avenue

The "Visionary Network" map would reduce the number of 30-series bus routes down to just one route, DC100, all the way down Wisconsin Avenue, and would remove the one-bus option for getting to and from Potomac Park/State Department. The DC100 also would threaten the reliability of bus service on Wisconsin by stretching the northern end of the route beyond Friendship Heights into Bethesda. This is one of the Priority Transit Corridors in the District, and the most heavily traveled Metrobus route in the area, serving some of the most dense residential and commercial areas west of Rock Creek Park, so frequent, reliable, efficient service is essential to support the community, local economy, quality of life and environment.

2. Cathedral Avenue loop (Cathedral Avenue between Idaho Avenue and Glover-Archbold Park as well as New Mexico Avenue) and Massachusetts Avenue between AU/Ward Circle and Westmoreland Circle These locations would no longer have direct one-bus access to Friendship Heights, or to Dupont Circle and Farragut Square, which are prime sites for workplaces downtown, restaurants, museums, and other tourist sites, and an important connection point for other buses. Anyone going to and from points on Cathedral Avenue between New Mexico Avenue and Massachusetts Avenue would have only the low-frequency DC300 (described as running at least every 30 minutes) between Woodley Park Metro and Bethesda, which would severely curtail the transit options for commuters. To get a bus to Dupont Circle, people in those blocks would have to walk to a point on Massachusetts Avenue somewhere southeast of Ward Circle.

For Spring Valley residents and workers, including those going to and from the large proposed Ladybird residential complex at 48th and Yuma, as well as students, visitors, and patients at the many clinics in that area, there would be no connection to the Metro at Friendship Heights other than by walking 14 to 16 blocks. Residents living along Western Avenue between Friendship Heights and Massachusetts Avenue would not have any transit service at all; they would have to walk to Massachusetts Avenue to catch a bus to Bethesda or to the southeast on Massachusetts, or walk to Friendship Heights for a bus or Metro.

3. Cathedral Commons, McLean Gardens, and Cathedral Heights

People going to and from these locations currently can use the 96 service which runs on Wisconsin Avenue from Tenleytown to the Cathedral on Wisconsin Avenue, southeast to Woodley Park Metro, and beyond to Adams Morgan, the U Steet corridor, Union Station, and Capitol Hill/Stadium Armory. That is a bus that Cathedral Heights, McLean Gardens, and western Cathedral Heights residents use to get across town, from many locations that are not otherwise served by transit. The Visionary Map eliminates that service and instead shows an east-west route across Cathedral Avenue (the DC300 mentioned above) that reaches hardly any of the current riders on the 96, and would not provide a good substitute for either the 96 or the N2/N6.

- the D2, which reaches into the interior of Glover Park as far north as Cathedral Heights and provides a direct link to the Dupont Circle Metro

Dupont Circle is a common origin-destination point for large numbers of workers and students and a center for shopping, restaurants, museums, institutions of learning, and other attractors for residents, visitors, and employees. Instead of the current D2 route, the preliminary "Visionary Network" map shows a new bus route DC 201 that runs through nearly every other neighborhood in Ward 3 from the far northeast corner along Rock Creek Park through Tenleytown using the congested streets and intersections of Nebraska, Military Road, Wisconsin and Massachusetts Avenue to Wesley Heights, then winding through Glover Park to Reservoir Road and then west to MacArthur Boulevard, before turning south and then east along Canal Road and M Street in Georgetown, one of the most congested routes in the District, to Foggy Bottom Metro. The route may be designed to provide access to the new DCPS high school on MacArthur Boulevard but it would take people in our area on a long, circuitous route through a series of neighborhoods in Ward 3 without providing frequent, reliable, and efficient transportation to and from points that the large majority of riders in our area need to go, such as the Dupont Circle Metro. - M4 serving Nebraska Avenue between Tenley Circle and Sibley Hospital

The M4 offers an important link from Wisconsin Avenue and Tenleytown/AU Park to the hospital in Palisades, and offers service to riders to and from points in ANC 3A, between Tenley Circle and Ward Circle. But there are other aspects of the M4 service today and the similar service that would be offered on the DC200 or DC201. In the preliminary draft Visionary Network map. During COVID-19, WMATA extended M4 service northeast of Tenley Circle, as a form of "substitute service" to riders on the E6 route, which had been running between the Knollwood retirement community and Friendship Heights. In late 2019 and early 2020, threatened elimination of the E6 provoked strong and vocal protests from residents in upper Northwest along Oregon Avenue bordering Rock Creek Park, including Knollwood on Oregon Avenue and residential areas along Western Avenue in the Chevy Chase neighborhood. Their trips for groceries and other shopping, and the local community center and public library are all concentrated in Chevy Chase commercial area, and beyond that in nearby Friendship Heights where many residents shop and have medical appointments. Workers in Chevy Chase also made use of the E6 to get to their jobs. Those facts apparently were persuasive to the WMATA Board, which voted in March 2020 to maintain the E6 service—just as COVID-19 required all but a few public transit services to shut down.

The M4 is sometimes described as a substitute for the E6, but it does not provide an adequate replacement for the previous E6 Metrobus services for getting people to and from the points they want to reach between Barnaby Woods, Chevy Chase and Friendship Heights. In the preliminary Visionary Network map:

DC 200 would run from Fort Totten on Missouri Avenue and Military Road west to Nebraska Avenue across Rock Creek Park and then southwest on Nebraska through Tenley Circle to Sibley Hospital.
 DC 201 would follow the previous E6 route from Knollwood at the northeastern edge up to Western Avenue and then south west to Tenley Circle (not Chevy Chase Circle or Friendship Heights) on Nebraska as far as New Mexico Avenue, then wind down through Wesley Heights and Glover Park on New Mexico/Tunlaw/37th Street to Reservoir Road, west on Reservoir Road to MacArthur Boulevard where the new DCPS high school is planned to open in August 2023, around the high school to Canal Road, east on Canal Road to M Street through Georgetown to Foggy Bottom Metro.

- DC 203 would run from Brookland across Missouri Avenue and Military Road across Rock Creek Park to Friendship Heights (not serving upper Chevy Chase/Barnaby Woods).

- DC 300 would run from Bethesda Metro south to Little Falls Parkway, west on River Road to Westbard and down Westbard to Massachusetts Avenue, southeast on Massachusetts to Nebraska Avenue, south on Nebraska to New Mexico Avenue, east on Cathedral Avenue to Massachusetts, east on Garfield Street to Cleveland Avenue, and southeast to Woodley Metro and east on Calvert Street across Rock Creek Park to the bus transfer point at the east end of the Duke Ellington Bridge.

From the perspective of most riders on existing Metrobus routes, it is hard to see the justification for offering the circuitous DC 201 running the entire length of the District west of Rock Creek Park as the only bus service to the interior blocks of Glover Park, and eliminating the direct service between that neighborhood and Dupont Circle, their closest Metro. There is no compelling reason to link Knollwood or Barnaby Woods to the new high school on MacArthur Boulevard, which is far out of boundary for local students, while failing to get riders to and from the grocery stores, medical offices, community center, library, and their closest Metro. The very long and circuitous routes in the preliminary draft Visionary Network map would take riders out of the way but not get them to and from places they want and need to go. Those routes do not fulfil the stated Better Bus objectives of more frequent and efficient bus service to and from places people are trying to go.

Those long circuitous routes also seem to violate the principles WMATA has used as the primary justification for eliminating services that our community and others across the District have used and depended on for decades, the 30N and 30S cross-town service between upper Northwest and points along Independence Avenue and Pennsylvania Avenue near the National Mall, Capitol Hill, southeast on Pennsylvania Avenue and across the Anacostia River to Naylor Road and Southern Avenue. District leaders and founders of WMATA made a commitment five decades ago when WMATA was being established, to maintain those vital bus connections between neighborhoods and people across the District. But WMATA Board members and staff went back on those commitments during COVID-19, eliminating the 30N and 30S because they said that long routes are inefficient, the buses get caught in congestion through the day, and cannot maintain a reliable schedule. The 31 and 33 buses are notorious for the same thing, even though they no longer operate across the Mall or across town. But in the meantime, residents, essential workers, students, shoppers, tourists, and others in our area are suffering the loss of important services that many of us used throughout previous decades to make important trips via public transit.

February 29, 2024

To Whom it May Concern at WMATA:

I am writing to you today to voice my great concern about the possibility of the T2 Metrobus route being eliminated.

I want to stress the vital role that the T2 Metrobus route plays in the community. This is a key route for many individuals and families to access a large and bustling swath of DC, Potomac and Rockville. As you know, this bus provides access to students and staff at several schools including Walt Whitman High School, Bullis School, and Ritche Park Elementary School and also to key facilities such as libraries and community centers. The bus is particularly vital to the economy of the many shops, restaurants, offices and two country clubs along River Road.

To summarize, the T2 Metrobus is the most reliable public transportation to this part of the County, and without it people in the area will face barriers to accessing places of employment, education and recreation.

Please protect this bus line for the many riders who require this service to get to work, school, and other activities.

Sincerely,

Charles C. Wilkes

DONALD G. DRUMMER VICE CHAIR

COUNCILMEMBER ERIC OLSON SECRETARY-TREASURER

March 1, 2024

Mr. Paul Smedberg, Chair Board of Directors Washington Metropolitan Area Transit Authority 300 7th Street SW Washington, DC 20024

Dear Chair Smedberg:

I am writing today in my capacity as Chair of the Washington Suburban Transit Commission ("Commission") regarding the Washington Metropolitan Area Transit Authority's FY2025 operating budget. As you are aware, the Commission coordinates mass transit programs with the Montgomery and Prince George's County governments, the Washington Metropolitan Area Transit Authority (WMATA), and the Maryland Department of Transportation, and acts as the financial conduit for funding of WMATA. As such, the Commission has a strong interest in the policy issues affecting Marylanders in the FY2025 budget.

Thanks to Governor Wes Moore's leadership and the actions of leaders in the District and Virginia, the General Manager's revised budget proposal presented during the week of January 29 incorporates at least \$450 million in new jurisdictional funding to partially address the FY25 fiscal cliff. This additional funding, alongside the General Manager's proposed service, fare, and fiscal management policies, serves to address the current funding crisis affected WMATA for FY2025. Thus, to be clear, the \$450 million in added subsidies provided by the three jurisdictions serves to solve the "fiscal crisis" in our view for FY2025 without major service reductions proposed, including the introduction of turnbacks on the Red Line and Silver Line serving Maryland and cuts to Metrobus routes in Prince George's and Montgomery Counties. We greatly appreciate Governor Moore and Secretary Wiedefeld's leading position in this funding discussion. This additional funding level will increase Maryland's FY25 operating subsidy to \$638 million.

In concert with the 450 million in additional subsidy, WMATA proposes to close the FY25 budget gap through modest changes to service, fare, and fiscal policies. That includes a 12.5% weekday fare increase for bus and rail (with parking rates held constant), alongside weekend and late-night fares going up by 25%. This fare increase would raise \$24 million. There will also be modest rail service reductions including more six-car trains, reduced peak hour operations, and adjusted peak headways. Preventive maintenance (PM) transfer levels would also increase relative to the Board policy baseline to \$164 million in FY25.

While the FY25 budget negotiations appear substantially resolved, the Commission notes

two ongoing areas for resolution. The current proposed subsidy levels by each jurisdiction are not consistent with the current WMATA subsidy formula. As a result, if the District's \$200 million contribution remains its upper limit, then the total subsidies available to WMATA are likely to decrease by \$17 million. At the same time, WMATA's assumption that all represented employees will see 0% raises in FY25 is inconsistent with past negotiations. Therefore, the Commission expects that some portion of the assumed \$38 million in associated labor savings may not be able to be realized. The Commission recommends that the additional dollars ultimately needed for FY25 be offset by additional PM transfer, rather than further service or fare changes.

While the FY25 solution appears close at hand, the Commission recognizes that many of the same fiscal challenges will confront the region for FY26. As WMATA begins to consider the FY26 budget, the Commission expresses a desire for Metro to work closely with the State of Maryland, Montgomery and Prince George's Counties, and WSTC on major policy issues of concern to us, including any potential Metrorail turnbacks in Maryland, station closures, MetroAccess eligibility changes, bus service reductions, or fare increases for long-distance commuters.

As it relates to the capital budget, the Commission wants to emphasize the need for new funding sources beginning in FY29, at the point at which the 2018 dedicated funding's bonding capacity will be exhausted. To postpone that day for as long as possible, the WMATA capital budget needs to focus on the essential state of good repair projects. Doing so may require delaying or spreading out over additional years of new capital projects, including the 8000 series train cars and the zero-emission bus conversion, the latter of which the Maryland Transit Administration has delayed in its current budget.

As evidenced by this year's regional discussion, there is clearly a need for a longer-term solution to WMATA's operating and capital budget funding. The Commission encourages WMATA, the State of Maryland, and our regional partners in identifying a solution and moving toward implementing it in 2025.

We greatly appreciate your attention to this letter. We stand ready to work with you on the future of WMATA as we look for a sustainable funding model to support transit in the region for years to come.

Sincerely,

Michael Goldman Chair Washington Suburban Transit Commission CC: Joe McAndrew, Assistant Secretary, MDOT Donald Drummer, Vice Chair, WSTC Councilmember Eric Olson, Secretary – Treasurer, WSTC Thomas Graham, Commissioner, WSTC Ray Briscuso, Jr., Commissioner, WSTC Tom Hucker, Commissioner, WSTC Drew Morrison, Acting Director, Washington Area Transit Office, MDOT

Re: WMATA FY25 Budget: Consistent, Reliable, Frequent Bus and Rail Service is the Priority

Dear Chair Smedberg:

Thank you for the opportunity to provide feedback on the proposed FY2025 budget on behalf of the City of Alexandria's Transportation Commission. We applaud the proposed budget's delicate balance of aggressive cost saving proposals, targeted service reduction techniques, and reasonable fare increases.

The Commission appreciates that the revised FY2025 proposed operating budget avoids many of the draconian cuts to Metrorail and Metrobus service and frequencies called for in the General Manager's proposed budget, including that the revisions sustain critical bus services such as the 8W to parts of Alexandria which do not have access to Metrorail. It is of the utmost importance that the WMATA budget maintain **reliable service** and **convenient frequencies** that continue to serve all riders, especially at a time when transit ridership is increasing across the region. **This must remain a top priority regionwide**.

The Commission also understands the need to increase fares to keep pace with inflation, and the importance of installing new faregates system-wide to reduce fare evasion. Please remember that these measures to ensure all riders fairly pay their way must be in lockstep with increased use of Metro Lift and Senior reduced-fare programs to help our riders most in need.

WMATA's request for more subsidy funding from jurisdictional partners at the local level would normally cause concern, especially while accepting existing or reduced service levels. However, the Commission understands that the FY2025 operating budget shortfall is a regional issue which

requires a regional solution from all partners, and we have consistently championed local investment in the Metrorail and Metrobus systems during local budget deliberations.

Looking ahead, the Commission urges WMATA to pay special attention to future budgets because of the absence of dedicated funding and to continue to work closely with compact partners and jurisdictions to look at alternative funding approaches. The objective: increase budget stability and certainty to ensure that transit continues to serve the region's transportation needs. Only with that certainty can regional residents and workers truly build their lives around alternatives to driving alone, thereby realizing congestion reduction, greenhouse gas emissions reduction, and equity for all well into the future.

Sincerely,

M. M.M.

Melissa McMahon Transportation Commission Chair

February 26, 2024

Paul C. Smedberg, Chair Board of Directors Washington Metropolitan Area Transit Authority 600 5th Street, NW Washington, DC 20001 boardofdirectors@wmata.com

RE: WMATA's FY25 Proposed Fare and Service Changes

Dear Mr. Smedberg:

The Greenbelt City Council would like to thank you for the opportunity to comment on Metro's proposed FY25 fare and service changes and their potential impacts to the City of Greenbelt. We recognize the unprecedented budget deficit Metro faces in the coming fiscal year, and the City remains a strong advocate for continued and improved Metrobus, Metrorail, and MetroAccess service for our residents. In the proposed budget, we appreciate Metro's commitment to improving the safety, reliability, and affordability of its system via the capital budget.

Unfortunately, the proposed service plan would dramatically—and detrimentally—affect Greenbelt residents, businesses, and the region as a whole. In particular, there are many residents within our communities, especially lower-income residents, who do not drive and rely solely on Metro who will be disproportionately hurt by these service reductions. As you are aware, the City has worked through restructuring of its bus service a number of times, and we understand the challenges and complexity of such an undertaking, including the tradeoffs between variables like bus frequency and coverage.

The proposed elimination of Metrobus routes G12 and R12 would directly and adversely affect some of Greenbelt's most vulnerable residents, including those living in Equity Emphasis Areas (EEA) as defined by the Metropolitan Washington Council of Government's (MWCOG) Transportation Planning Board (TPB). As you are no doubt aware, EEAs are a regional planning concept adopted by the MWCOG Board of Directors to elevate equity, and they comprise census tracts that contain higher concentrations of low-income or minority residents compared to the rest of the region. They also have a higher share of individuals with disabilities and who commute by public transportation— exactly those community members who should not face cuts like those proposed. We believe it is also important to note that Metrobus G12 was originally developed in collaboration with the City and local transit advocates and provides vital service to areas of the City that are otherwise not served by transit.

While Metro's proposed budget identifies TheBus 16 and 15X and Metrobus G14 as providing alternative service for the loss of the Metrobus G12 to Doctors Hospital and Hanover Parkway South of Greenbelt Road, these are not truly viable alternatives for many of our residents. Metrobus G14, TheBus 16, and TheBus 15X do not serve Ridge Road, Hanover Parkway north of Greenbelt Road, Mandan Road, and Ora Glen Drive. Service on Ridge Road would be limited to the area between Westway and Gardenway. Riders who currently access bus service along Hanover Parkway north of Greenbelt Road, Mandan Road, and Ora Glen Drive would be forced to seek service at the nearest stop along Greenbelt Road or Hanover Parkway south of Greenbelt Road. In addition, these routes do not serve Ivy Lane, Lastner Lane, and Ridge Road which are currently serviced by the Metrobus G12. TheBus 16 also has fewer operating hours than the Metrobus G12 and does not operate on Sundays, and TheBus 15X provides only limited weekday, rush-hour service.

Additionally, both the G12 and R12 serve Greenbelt Metro Station, recently selected as the new location for the FBI Headquarters. The City believes that it would be shortsighted to eliminate and/or otherwise reduce Metrobus service to and from this critical transit hub that will soon transform into a key regional transit-oriented development (TOD) center.

We understand the looming deficit WMATA faces if additional funding is not secured, and we thank you for the opportunity to comment on behalf of the City of Greenbelt's transit riders. If you have any questions, please contact Ms. Jaime Fearer, Assistant Planning Director, at 240-542-2040 or <u>ifearer@greenbeltmd.gov</u>.

Sincerely,

Emmett V. Jord Mayor

March 1, 2024

Mr. Paul Smedberg, Chair Washington Metropolitan Area Transit Authority Board of Directors 300 7th Street, SW Washington, DC 20024

RE: Arlington County's Comments on the Proposed Fiscal Year 2025 WMATA Budget

Dear Mr. Smedberg:

On behalf of Arlington County, I am writing to express our concerns about the long-term sustainability of the Washington Metropolitan Area Transit Authority (WMATA) and the significant challenges presented in the FY 2025 proposed budget.

We fully recognize the difficult financial situation WMATA faces and appreciate the additional funding provided by the Commonwealth of Virginia. However, future budgets will still include substantial deficits, and the reliance on using capital funds for operating expenses is concerning. This is not a sustainable practice and will only lead to further problems down the road. Arlington County agrees that Metro should be a world-class transit system, but Metro cannot attain that status if it takes shortcuts and allows the system to devolve.

Recently, the three jurisdictions (and their sub-jurisdictions) have been focused on finding avenues to bridge this funding gap, and that appears to have helped secure additional funding from state legislators. But we now need to look inward at the expenses that WMATA incurs.

WMATA is a service provider and should be focused solely on that function. Arlington County urges WMATA to thoroughly review all expenses to identify areas where costs can be reduced without impacting essential services. We also believe that the Better Bus Network Redesign holds great promise for improving efficiency and reducing costs. Arlington County is hopeful that the Better Bus Network Redesign will be a powerful tool to build a more efficient, less costly means to transport customers from their origins to their destinations. We believe that if the system can operate more efficiently while ensuring safety, reliability, and frequency, it will increase ridership and reduce costs. However, now that Arlington has adopted its Transit Strategic Plan (TSP), we request a thorough cross-walk of the Network Redesign and our TSP before implementation to confirm no major gaps in service within Arlington County.

 DEPARTMENT OF ENVIRONMENTAL SERVICES

 Division of Transportation and Development Services

 Transit Bureau
 2100 Clarendon Blvd., Suite 900, Arlington, VA 22201

 TEL 703-228-3681
 FAX 703-228-3509

We were discouraged by the proposed service reductions on the Columbia Pike corridor, the elimination of the 3Y, and the proposed alterations to the Metroway line that were presented in the General Manager's Proposed FY 2025 Budget. Service changes on Columbia Pike would have a significant negative impact on ridership, traffic congestion, and equity. We understand the need to make difficult choices, but we urge WMATA to find alternative solutions that do not disproportionately burden certain communities and push customers to single occupancy vehicles. In the event of such service adjustments, we recommend utilizing the Commuter-Choice-awarded grant funds to increase the frequency of the 16M service, thereby mitigating the impact of reduced service on the 16A/C/E routes.

Arlington County is committed to working hand-in-hand with WMATA to find solutions to the agency's financial challenges. We rely on WMATA to provide regional service to the people who live, visit, and work here, and experience with WMATA the wellness of its system. A Metro success is an Arlington success. Likewise, a Metro failure is an Arlington failure. A fiscal failure at WMATA is not an option. We urge WMATA to start working on reducing the funding gap for FY 2026 now. We encourage WMATA to adopt a balanced budget that addresses the agency's financial problems without sacrificing essential services or placing an undue burden on riders.

Sincerely,

Hui Wang Director of Transportation Division

Cc; Lynn M. Rivers, Transportation Chief Kirk Dand, WMATA Service Coordinator 3/1/2024

Dear WATA:

I understand budget cuts due to income shortfalls, however, I implore you not to do so on the backs of one of the most vulnerable members of society. Too often, individuals on the margins of life bear the brunt of decisions made in a boardroom. This decision will have far-reaching consequences for those who will be affected for many years to come.

Disabled individuals depend greatly on the services of Metro Access. The ability to have some vestiges of independence in traveling around the DMV area means a great deal to this population. They do not have to depend on family or friends to transport them to their desired appointments for business or pleasure.

My son uses Metro Access to travel to and from work several times a week. To say your services are greatly appreciated is an understatement! He beams at the ability to schedule his rides and always follows up with the Where is My Ride personnel whenever there is a delay. He takes pride in telling me, "I can do it, or I handled it".

As the mother of a disabled adult child, it gives me great comfort to know that he is safe and secure with a Metro Access Driver as he comes and goes. They are trained professionals who have maintained a big role in transporting my son safely for more than fourteen (14) years.

To have paratransit transportation services greatly reduced or many routes deleted would be a travesty to this population that depends so heavily upon it.

Please reconsider reducing Metro Access Services and seek budget cuts elsewhere, perhaps installing wire grinds in the subway stations to prevent people from jumping the rails and riding for free.

Thank you for all you currently do to support this population. May it continue for eternity.

Sincerely,

Eleanor L. Bonner

Sharlene Mobley

March 1, 2024

Washington Metropolitan Area Transit 300 7th Street SW Washington, DC 20024

The Metrobus M6 route plays a crucial role in ensuring the safe and efficient transportation of my travels (Sharlene Mobley) to and from work, medical appointments, social events, entertainment, visiting family and grocery store.

However, there are budget situations that WMATA may find it necessary to request a change in the services (bus, rail, Access route) to better you're your budget needs and circumstances.

To address this matter professionally and effectively, I would like to give some comments and possible solutions:

A. Fare Evasion –

- a. Can advertisements about All should pay to ride the Metrobus and Metrorail in the DMV area for social media, Yahoo and other search engines that would not give a cost. Insert on your website. If you do have promotional funds available insert an article in local newspapers.
- b. Can the National guards help the metro transit police maintain and control evasion and be safe at the same time?
- c. I see so many people not paying even individuals that work in the federal government that get transit subsidy. One gentleman expressed to me that he saw on Yahoo that payment is required on the Metrobus. And got mad at me for paying.
- d. Even if VA, MD, DC pays the requested amount that doesn't help all the WMATA budget pay and operational cost. Customers need to pay to help with WMATA cost. You are providing a service that is crucial and needed by me to travel all over the DMV area. To many of the buses that are on the termination list are routes I need to travel. I do not have a car and I do not use Uber. I will pay for a taxi every now and then

but that can be very costly. The WMATA is reasonable, and I have been using this system since 1975 when I came here for college.

- B. Safety Concerns
 - a. Having the M6 a half a block from my residence is very easy to travel. Especially, since I am a budget analyst, I have late night and early mornings to perform my assignments/task.
 - b. To get people to pay, there should be protection and individual in authority for these customers to pay or told that they can't ride.
 - c. Also, not causing issues for the riders that do pay and especially protection for the bus drivers that are performing their jobs.
- C. Unforeseen Circumstances
 - a. COVID caused a lot of these non-payment issues in so many cities. During that time, it was the way to not pay on transit.
 - b. Meanwhile, WMATA had signage notices to state that fare payment will begin on the date way in advance. You gave notice. But so many people didn't care.
 - c. WMATA provides a service and services should receive payment. How people don't understand this fundament procedure.
- D. Convenience and Efficiency
 - a. Stopping or terminating rail service and bus service will not be convenience or efficiency.
 - b. Bus drivers losing jobs is not convenient or efficient.
 - c. Definitely, not convenient or efficient for riders.
 - d. Most of the areas that termination, most of those people will be stuck in their residential areas.
- E. Conclusion
 - a. Thanks for this opportunity to send this letter for my concerns to be on record for the 2025 WMATA Budget Proposal.
 - b. Please keep me informed of any developments or decisions made regarding this matter.
 - c. I understand that this request may require careful consideration and collaboration with the Metro transportation department.

Sincerely, <u>Sharlene Mobley</u> Sharlene Mobley

Michaela Platzer

Washington, DC 20015 March 2, 2024

Dear General Manager Clarke:

As you know, Metrobus service that once crossed the heart of the Chevy Chase DC Community has dwindled and is in danger of rapidly disappearing despite WMATA's strategic goal of delivering safe, equitable, and reliable transit to the riding public across the city. Parts of our community have become a bus desert forcing even the most avid bus riders to travel by car.

My most immediate concern is Metro's decision to eliminate the E6 during covid. As you likely know, Barnaby Woods and Hawthorne have few public bus transit options. WMATA discontinued the E6 despite strong community opposition and eliminated the route without following the public input process of previous years when WMATA proposed the E6 for elimination—at least four or five times in the past decade.¹

For many decades, the E6 operated between Friendship Heights and the Knollwood Life Plan Community at 6200 Oregon Avenue, NW. The E6 was the only route connecting the neighborhoods of Barnaby Woods and Hawthorne as well as Knollwood to the Chevy Chase civic core (the commercial corridor and the heart of the community's retail stores, restaurants, grocery stores (Safeway and Magruder's), CVS, a movie theater (the Avalon), public library, the Chevy Chase Community Center, and more), Lafayette Elementary School, and Friendship Heights (a commercial corridor with retail, restaurants, grocery stores (Amazon Fresh and Whole Foods), medical offices, and Red Line metro access) at the other end 2.5 miles away. This route was taken away from us.

The E6 carried an average of more than 300 riders per day, according to WMATA, in the years prior to the pandemic, and in some of those years more than 450.² This translates into many fewer individual cars on the road, a benefit to all. Any decline in E6 ridership prior to the pandemic was correlated with factors such as WMATA's decision to double the wait time for an E6 bus from every 20 minutes to a 40-minute wait, not

² E6 Metrobus ridership figures are from WMATA's Ridership Data Portal, <u>https://www.wmata.com/initiatives/ridership-portal/</u>.

¹ On each previous occasion, WMATA provided the required notice, held the required meeting, and after considering the public's comments, changed its mind about terminating the E6, a lifeline for many residents, including seniors, students, and disabled riders. WMATA had no authority to terminate the E6 without notifying our community, holding a hearing to obtain our comments, and considering those comments in its deliberations. To remedy this, WMATA should revisit the E6 termination in compliance with the public input requirement.

insufficient demand. Because it took less time to walk to/from Friendship Heights along parts of the E6 route, some riders stopped using the E6 except during rush hour.

Road closures due to construction on Oregon Avenue, NW, before covid meant the standard E6 route was in place only intermittently for more than three years. This created persistent uncertainty about where and when riders could catch the E6, thus resulting in a decline in riders from earlier years. Simply put, any decline in E6 ridership due to these factors, among others, supports a need for more frequent buses, not the elimination of bus service.

Residents who once used the E6 route must now choose between the lesser of two evils in getting to Connecticut Avenue, the L2, or the Friendship Heights metro station walking a considerable distance (2 miles or more) or bearing the inconvenience and expense of parking near Connecticut Avenue, where permitted, or in Friendship Heights.

Restoring bus service from Barnaby Woods/Hawthorne/Knollwood to Friendship Heights would cut the commutes for many people by at least 30 minutes and once again allow access to Connecticut Avenue's commercial establishments and the Friendship Heights commercial core.

A second concern, and equally distressing, is Metro's proposal to eliminate or change the M4 route. A portion of the M4 route weaves through Chevy Chase neighborhoods during the week at roughly 30-40 minute intervals, except for more frequent service (about every 10 minutes) to accommodate school children and during rush hour, from Knollwood to Western and Oregon Avenue then on to Pinehurst Circle with stops along Utah and Nebraska Avenues to the Tenleytown metro station.

The M4 is the remaining bus route that travels through the Barnaby Woods and Hawthorne neighborhoods for those who live nearby, averaging up to 1,100 riders per day during the week (no weekend service) in 2023.³ Changes to the M4 route, including possible elimination, would leave hundreds of Chevy Chase students with no bus service to Deal or Jackson-Reed. Many weekday commuters would also lose this critical public transit option.

The western portion of the M4 route—from Tenley to Pinehurst Circle and on to Knollwood—is vital, and, if anything, needs weekend service if the Chevy Chase

³ Since 2019, average daily boardings on Metrobus are measured by passenger counting devices on-board the vehicles.

community is not to become totally car-dependent, a real danger if WMATA implements its draconian budget plan, this year or in coming years.

The M4 is not a replacement line for the E6 because it does not serve Western Avenue, Broad Branch Road, McKinley Street, the commercial corridors at Connecticut Avenue and the Friendship Heights metro station.

To avoid a neighborhood bus desert, I strong urge WMATA to keep local community buses in place that serve an important segment of the population for the public good, which should be offset by the most heavily traveled routes that could absorb the costs. Community buses must be an essential part of the District's multi-modal transportation system.

WMATA must consider its primary competition, the automobile, a preferred mode of transit for many people across DC. In my opinion, Metrobus should offer riders frequent service (wait times for riders of no more than 15 minutes), expanded hours, weekend service, nearby bus stops, and a robust network that allows them to travel safely, quickly, and easily to all parts of the city. This more than anything would drive demand and encourage more people to choose buses and metro transit rather than cars.

The current proposed budget for FY2025, its subsequent revised budget, and the proposed "Better Bus Network" plan are all counter to WMATA's core mission—to provide transit to all who need it and to ensure that residents in neighborhoods such as Hawthorne and Barnaby Woods and residents at Knollwood have access to public transit to get to work, medical appointments, school, or for leisure (restaurants, museums, sports events, etc.).

I urge WMATA to reinstate service on the E6 bus immediately as the current M4 bus service does not offer reasonably comparable service to our community. I also urge WMATA to support the continuation of the M4 route. A bus desert helps nothing and hurts many, particularly as the District of Columbia aims to decrease the use of cars by its residents and to increase the use of public transit.

Sincerely,

Michaela Platzer

Let's keep at top of mind the reasons for a public transportation system as important as WMATA to exist, which include bringing people together for all kinds of reasons—economic (jobs), social (visits and events), cultural, education, medical, and many others—in short, for life (not just commuting). Also, at a time when there is a dire need to reduce carbon emissions, which cannot be done without providing sufficient access and equity, a healthy regional public transportation is a necessity.

Contrary to what has been expressed, as a regular rider (bus and train) for several years, I have seen people from a variety of backgrounds using public transportation, bus and train, depending on the destination and time of day.

Talk of possible devastating cuts—and the extensive cuts that have been proposed would be devastating, to the point of missing the point of a public transportation system—is premature if everything has not been carried out to maintain and increase revenue (including not wasting funds).

I must commend WMATA for beginning to add the more effective train fare turnstiles, which I've seen at Pentagon City and Suitland, the latter added more recently. While not perfect, they're significantly more effective than their predecessors. More of them need to be added to more stations this year.

More people at the Suitland station are using their smart cards for the turnstiles than before the (actually) new and improved turnstiles were installed. So, although the station may be in an area where many passengers are low income, if they're taking the train every day, they can afford to use a monthly pass—indeed, such a pass would save these riders money (and time).

As I mentioned at a recent WMATA hearing, I am dumbfounded as to why WMATA has refused to promote its monthly pass, which could be an even more consistent revenue stream. It has been said that it's because many riders are low income and thus wouldn't use one; I beg to differ, and the recent uptick of (primarily) "low income" riders legitimately riding the train, due in part to the improved turnstiles, shows that there's a market for these passes that has been ignored, due to an incorrect assumption.

Also, there's been a promotion to more affluent train riders of the use of Apple Pay and Google Pay to pay for train rides, which is fine. However, these are merely payment methods. If many of these people have smart trip cards (or a smart trip card app), they should also be encouraged to purchase monthly passes, as it would be an additional convenience. Also, as a monthly pass is prepaid, the more people are encouraged to purchase passes (whether or not their employers pay for one), the more often they are tempted to use the system (if only to psychologically justify having purchased one), which is what we all want.

Yes, WMATA needs to procure additional funding from the local jurisdictions and federal government, and such efforts to increase these revenue sources should continue to be pursued. However, these jurisdictions may be looking at WMATA and its efforts—or perceived non efforts—to gain revenue, and partly make decisions on whether to provide additional funds on whether it is perceived that WMATA attempts to obtain more revenue from other resources (internally) first.

A smaller, less significant revenue source (probably goes more toward passenger counting) is bus fare. Many people have noticed that extensive bus fare evasion has continued although service is back to normal, post pandemic. One reason for the continued high bus fare evasion that has not been mentioned, as far as I am aware, is simply that the bus fare boxes, whether the "old" ones or the newer, digital ones, often do not work; I would guess that they're not working about 25 percent of the time in any given week.

Another reason for bus fare evasion (that I have heard several times) is simply to protest against the bus' late arrival. (Note: Those new, digital (and thus, expensive) BusETA signs at Suitland metro and other stations are not effective. For some reason, these signs seem to work much better when they are at bus stops which are not at metro stations.)

My longstanding concern about BusETA is that (it is claimed, when I ask) that the GPS trackers are often broken. However, due to how BusETA actually performs, it seems more likely that it is often turned off en route, often when a bus is within 10 minutes or so of the station, I have noticed. As I have estimated how soon it takes me to reach the nearest bus stop from home (depending on the time of year, weather), I know whether or not I can make it to the bus stop in time, with time to spare. However, far too often, I leave the house right after checking BusETA, with plenty of time to spare, make it to the stop, look at BusETA, and it will tell me the bus will arrive in a few minutes (in less than 10 minutes). Then, suddenly, when the bus should arrive, and I check BusETA again, it says not that the bus will arrive in 0 minutes (which simply means it's coming around the corner), but that it will arrive in, say, 39 minutes! (This has happened on weekday mornings, several times; this scenario happened the other day, in fact.)

This scenario plays out a number of ways. Some days, the bus arrives in a few minutes anyway, in much less than the 39 minutes claimed, often in five or ten minutes. (I know this because I now generally wait for the bus to arrive. Several times in the past, when seeing such a BusETA claim on a weekday, I started walking up the hill and was passed by the (allegedly nonexistent) bus! Also, I now tend to wait because I also consult the DC Transit app, which, for some reason, is often more accurate and consistent with bus arrival times than BusETA! (Another rider told me about that app.) Thus, I often know that the bus is coming, but that app isn't always correct either. (Also, BusETA also has a weird quirk—even if you drag it to your cell phone home screen, it will eventually kick itself off your screen, meaning you have to add it to your home screen again (which I had to do recently); I haven't had to do this with DC Transit, or with most other apps on my phone. Weird.

The problem with the frankly lackadaisical attitude toward whether GPS trackers work (or remain turned on for the entire route) is that this makes BusETA less than trustworthy, which consequently makes bus service itself less reliable (or at least makes it perceived to be less reliable, which can affect whether people decide to use public transportation).

Better use of WMATA's resources is also needed.

The recent foray into "improving" signage at Metro stations is a bust. The new signage (which I've seen at L'Enfant Plaza) has confused even me; the only way I know where to go is that I've been in that station so many times, and get off the train at about the same spot when going home, that I know which direction to turn to

```
Page 2 of 4
```

transfer to the other train. However, the first couple of times I arrived at L'Enfant with the new signage, I was unsure what I was looking at, and knew that if I hadn't been to L'Enfant in a while, I might not know which direction to go. In the past couple of weeks at L'Enfant, I overheard a couple of people ask directions. Last week, after a young woman asked a police officer which direction to go, I asked the officer whether she noticed more people getting confused, and she mentioned that she's gotten a lot more questions about what direction to go to catch the train recently. This suggests that the new signage is actually counterproductive (and changes to signage are not cheap). It has been said that the new signage is to keep up with other (international) subway systems. Really? Aren't those systems more simple, akin to the traditional Metro signage?

I won't lob the insult that the people who signed off on these signage changes don't use the subway. More problematic is that they do not seem to have a grasp of graphics and semiotics. Average men and women, including WMATA employees and contractors, would be greatly helped by perusing the (brief) works of graphic designer Robin Williams, particularly her *The Non-Designer's Design Book—Design and Typographical Principles for the Visual Novice*. (Indeed, even reading pages 53 and 54 of her *The PC is not a Typewriter* might prove helpful.) Williams provides helpful explanations of how and why to use certain typographic/graphic conventions, as well as provides illustrations of these explanations, and how they improve readability.

Obviously, the new signage is not working for its designed purpose—to quickly provide clear information on where to catch the next train, or to exits. Please change the L'Enfant Plaza signage back to the original signage system. No one who uses the metro uses "North," "South," "East," or "West" to describe where a train is; this is just causing confusion. Please don't be obstinate about this mistake, which the "improved" signage is, a mistake, an expensive mistake. Own up to it, ditch the newer signage, and cut your losses.

Another relatively minor (maybe) bleeding of money is at some of the outdoor metro stations, where often the street lights (in both the bus bay sections and other outdoor areas) are often on during broad daylight on sunny days. I don't know what type of lights these are, or what type of sensors they have, but since this affects many lights at several stations, this may be more than pocket change. I have seen such lights on under such circumstances at Fort Totten, Southern Avenue, Branch Avenue, and Suitland. Properly working outdoor lighting should provide some savings, while not significant, noticeable operational savings nonetheless.

Now, concerning the **D14** (Suitland-Oxon Hill) bus route, which has been proposed to be eliminated. The problem with this proposed elimination is that its proposal is not consistent with WMATA's stated commitment to equity, as it runs squarely within an equity emphasis area. As mentioned on page 26 of WMATA's *Bus Service Guidelines – Metrobus* (final, December 2020),

The Metropolitan Washington Council of Governments developed Equity Emphasis Areas (Figure 3) to identify small geographic areas that have significant concentrations of low-income, minority populations, or both.⁶ Combined, transit providers in the WMATA Transit Zone should provide some level of transit service within one quarter mile of 95 percent of the Equity Emphasis Areas.

Moreover, according to page 754 of the FY 2023 Annual Line Performance Report, the D14 is classified as a "framework" route with an overall grade of "B." Again, according to the Bus Service Guidelines – Metrobus Page **3** of **4**

(page 6): "Framework Routes are the backbone of bus service, allowing riders to travel along major corridors/streets and access the region." This describes the D14 to a T, as it serves senior riders, students, and workers. It takes riders to Suitland Federal Center, a community center, a middle school, a social security office, Andrews Air Force Base, a Latino supermarket, Aldi, a senior social service office and community center, a medical building that houses a Veterans Administration office, a Giant Food, as well as between residences and between two metro stations. It is the only route that travels down Suitland Road, and travels down much of Allentown Road (a busy commercial corridor). Its absence would deprive many citizens of needed access to various activities, services, and businesses, violating the spirit of the stated commitment to equity and access.

This proposal, to drop the D14, is particularly galling as, according to WMATA's own data, D14 riders tend to be low income households (78%), and 98% are people of color (page 755 of *FY 2023 Annual Line Performance Report*).

Eliminating the D14 bus route would achieve a couple of poor outcomes. It would provide increased hardship to seniors and others who currently may not own cars, constricting their activities; some might be tempted to buy cars, which could mean more cars on the road, increasing congestion and emissions, and draining their pockets even more. Even if (proposed former D14) riders took the occasional Uber or Lyft, again, that's increased financial hardship for a population that currently has financial difficulties; this would worsen them.

Again, let's keep the **D14** (Suitland-Oxon Hill) bus route, and keep it in its entirety, running seven days a week, for all the above mentioned reasons.

Moreover, as much as possible, please re-double efforts to increase revenue, and to stop wasting/bleeding money (i.e., "improved" yet more confusing new signage) before there is talk of tearing WMATA to shreds via eliminating bus routes, killing the system by a thousand cuts.

Concerned,

Aurelia Glenn

TO: WMATA FROM: Charles T. Hathway RE: T2 Metrobus DATE: 3/04/24

I am writing to express continued support for maintaining the T2 Metrobus route. This route is vital to many individuals, businesses as well as families. Given there is no viable subway option, deleting the T2 Metrobus line would have an inequitable and discriminatory impact. Deleting the T2 Metrobus line would thwart the goals of inclusive living and working community, as those without car transportation would be foreclosed from living or working in the areas currently serviced by the T2 Metrobus line. Many resident of any affordable housing components added in future developments served by this route would essentially be stranded.

The T2 Metrobus route is very important means of transportation for many employees served by businesses along this route.

Each stop along the route is important; please preserve all of them. Thank you for you consideration.

I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus is the only reliable public transportation to this part of the County, which is critical for the County's economy. This bus service is a crucial support for our area.

Please consider all efforts to protect full T2 Metrobus for the many riders who require this service to get to work, school, and other activities. Thank you for your time and consideration.

Thank you.

Aje'na Amaro

Hello!

I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital route for many individuals, businesses and families to access top employers in Montgomery County, the top-paying county in the State of Maryland. The T2 Metrobus is the only reliable public transportation to parts of Potomac and Bethesda, where many jobs offer distinct and comprehensive benefits. My colleagues at Congressional Country Club risk losing access to these great jobs if WMATA cuts service.

Please help us save T2 Metrobus for the many riders and hard workers who require this service to get to work. Thank you for your time and consideration.

Aje'na

Hearing on WMATA FY25 Budget, 2/27/24, 6 pm Testimony

My name is Judith Farley. I live in Southwest and belong to the Waterfront Village, a neighborhood organization which supports residents aged 60+ who live in SW DC and Navy Yard. It offers critical home and health services and hosts educational, wellness, and social events to keep our neighbors engaged in the community.

I am testifying tonight to stress that metrobus routes 74, P6, and 52 are lifelines to our Southwesters, many of whom have no cars. These routes MUST stay in operation.

As you know, statistical analysis and anecdotal evidence demonstrate the dangers of isolation to this aging demographic.¹ Making connections in SW means relying on the 74 and P6 to get us to the places that keep us healthy and involved in the broader community.

Some examples: Our residents, especially those living in old SW and Buzzard Point, use the 74 regularly to go to medical and dental appointments; to the MLK library, the Smithsonian museums, National Archives and the Convention Center; to eat at restaurants along 7th St. NW and Chinatown; to shepherd grandchildren to and from school; and even to WMATA hearings.

¹ Axios DC, 2/26/24, "1 Big Thing: Lonely in DC."

The 74 connects with other bus routes on Pennsylvania Ave., E and H Sts., and the Circulator. Heading east, it stops at our Village office, Arena Stage, Nats Park, Safeway, Harris Teeter, St. Matthew Lutheran, St. Augustine Episcopal, Westminster Presbyterian, Christ United Methodist, St. Vincent DePaul Catholic churches, and the Buddhist Meditation Center. (So you can see that even God wants WMATA to keep these buses running).

The P6 is the only bus that goes along M St. SW to 11th St. SE, to take us to Harris Teeter, Trader Joe's, and Eastern Market. It goes north to the Mall, more Smithsonians, Botanic Gardens, the Main Library, the E St. Theater, Ford's Theatre, the Hudson Institute, Macy's, the Bloomingdale Farmers' Market, and connects us with all four quadrants in the city. The 52 starts at L'Enfant Plaza and runs along 14th St. and down to the Wharf, with its many venues, restaurants, workers, and tourists.

Currently, we have the Circulator, with its very limited reach for Southwesters. It may also be discontinued. If that happens, we will be without public transportation on M St. except for rail, which is unfriendly to people with mobility difficulties. When I first moved to SW, three buses ran along M. Now we are down to one, and if that leaves, none.

SW residents use buses instead of Waterfront Metro. Everything south of M is residential, where so many live. The buses easily accommodate wheelchairs, walkers, and at the other end of the Page 2 SW demographic, baby strollers. Bus drivers wait until older people are seated before driving off; they secure wheelchairs and lower ramps for people who need that help.

Metrorail cannot provide these services. And when station elevators are out of order, braving the escalators with walkers and strollers can be dangerous. Platforms and cars are often crowded; passengers do not always wait for the slower among us.

Finally, we understand that funding has been tentatively committed to keep the 74, P6, and 52 running in FY25. We thank you for this extension but know that this is a temporary reprieve. We hope you can find a permanent solution for SW. By doing so, WMATA will contribute greatly to the health, safety, and wellbeing of our SW and Navy Yard residents.

I am happy to answer your questions.

Submitted by Judith Farley SW resident

TESTIMONY

On the

Proposed 2025 Metro Budget

Submitted by Phillippa Mezile Resident, District of Columbia February 26, 2024

I am a resident of the District of Columbia and I am a person with a disability. My testimony is to implore the Metro Board of Directors to fully fund Metro and not to reduce the service area for Metro Access, which is vital to the viability of the disability community. Metro Access allows a person with a disability and/or a senior citizen to have the same opportunities available to any person who has no limiting disability.

This includes the ability to travel to and from a workplace in support of their own financial viability. Metro Access is critical to some who need lifesaving dialysis, cancer treatments or other medical services. It also enables persons with disabilities to get to and from church, to be engaged in community and volunteer activities, to venture to social gatherings with family and friends, to transport groceries, etcetera and to be a participant in the lifeblood of the community.

As a person with a disability, Metro Access has enabled me to fully thrive in service to my community. I am active in my church, I have served in the foster grandparent program mentoring youngsters, I can get to and from

2

3

medical appointments, I am active in service projects with my sorority, I am a volunteer with the AARP Senior Medicare Patrol program training seniors to spot Medicare billing fraud and abuse, and I participate in a plethora of other activities. I also have served as a voice for the disability community for several years on a Metro committee. None of this would be possible without Metro and most of it would not be possible without Metro Access.

While I appreciate that the budget pressures may require reduced spending and/or increased revenue, I am asking that it not be done at the expense of Metro Access customers. These customers often have no other access to transportation services. I understand there is consideration to cut fixed route bus and rail services, but this also could adversely impact Metro Access customers whose service area is determined by current fixed routes. The savings by cutting metro access is quite minimal in relation to the devastating impact it would have on Merto Access customers.

There is no rationale to reducing the service area. Does it make sense that a person who currently gets picked up from their home, transported to their job or a medical appointment and back home would suddenly be forced to navigate the added expense, difficult and time-consuming task of adding in travel to and from a new pick-up point because their home is suddenly outside the service area? This is beyond senseless; it is cruel. Persons with disabilities have enjoyed these services but budget cuts now threaten to pull the rug out from under them.

I invite each of you to close your eyes for a moment and imagine if this was the extent of your vision as it is for some blind and nearly so for persons with low vision. Or imagine that your mobility is primarily restricted to the chair you are seated in as it is for so many who are wheelchair users or have other mobility challenges.

It is critical that no one should be relegated to a life of isolation or limited activity simply because they have a disability. Metro, and specifically Metro

3

Access, is critical to preventing a sense of isolation and to inspire active participation in the community.

If it is necessary to increase prices, I ask that it be a minimal increase and remain at a flat rate.

Anything short of full funding for Metro and Metro Access is tantamount to not only disrupting but possibly destroying the right to work, the right to critical medical services and the right to fully serve and participate in our communities. it also borders on infringing on the constitutional right to the pursuit of happiness.

Please carefully plan before you act and do not act to isolate and further hamstring a community of persons with disabilities who are in vital need of public transportation services.

Thank you.

3

3

I am fully in favor of just about any new source of funding for the Metro, including larger concessions from the local jurisdictions. That said, I think the most important funding issue is the elephant in the room, fare evasion.

I have been riding Metro regularly for over 30 years. In most of that time, up until the last few years, I think I saw people jumping over the turnstile a grand total of 3 or 4 times. Now, I see multiple people jumping over turnstiles almost every time I ride. This is a disgrace. Worst of all, many fare evaders take advantage of the extra-wide lane for wheelchair users, and push their way through the wider gates, often damaging them. This saddens me, since I am sure this means they are down for repair more often, making them of less use to the people for whom they are intended.

I simply refuse to believe that this behavior has to be tolerated in the name of some kind of solidarity with the poor. I am not rich myself by any means, but somehow in all those three decades, I have always found the money to pay my fare, and I have plenty of company in that regard. I am completely in favor of giving participants in programs like SNAP discounts on Metro fare, and ask that these discounts be expanded, to serve lower-income residents of the area better.

Lastly, I am pleased to see the pilot programs that Metro has implemented to make fare evasion harder, and I ask that they be improved and rolled out to more stations. The plexiglas gates are a good idea in principle, and I am sure they deter some fare evasion, but they need to be hardened; I have seen people simply force their way through them. Granted, measures like these will cost money themselves in the short run, but I believe they will pay for themselves given enough time.

Thank you for reading my comment. It is submitted solely in my capacity as a private citizen who happens to be a frequent Metro rider.

Tony Porco Savage, MD 20763 I live in Ward 1, at 16th and Kalorama NW. This is at least a mile from the nearest metrorail stations. I am 76 years old and have lived here since 1988. I do not have a drivers license and cannot ride a bicycle. I am retired, so live on social security and pension income. While I no longer commute to a job I do have a life, participate in exercise classes and volunteer activities, frequently go downtown, etc., relying on the buses to get around [not able to afford Lyft rides for more than an occasional trip and not able to walk really long distances].

I am writing to address the negative impact some of the proposed changes to bus service in Ward 1 would have. My primary concern is the stoppage of the L2 at Woodley Park. It will come as no surprise that residents of Wards 2 an 3 [the latter being the wealthiest ward in the city] have ready access to facilities and services that those of us on the wrong side of the park do not. Nor do they have any need to cross over to our side. But there are literally no exercise programs for seniors in Ward 1. We have DPR rec centers, but the nearest DPR senior classes are at Chevy Chase Community Center. There are SilverSneakers classes at Van Ness. There are no in-person classes for seniors at the Y on 13th Street NW. And Iona Senior Services in Tenleytown is for Wards 2 and 3 – I can attend the classes but I have to get to them.

If you turn the L2 around at Woodley Park, you will essentially cut off access to all the services on Connecticut Avenue. Not to mention access to the Red Line metro at Woodley Park, and with your proposed elimination of the 96 bus that makes it extremely difficult to get to Tenleytown. It takes me half an hour to walk to Woodley Park. It's a real treat in winter or in the rain. Did I mention I'm 76? Your plan is tailored to getting commuters north of the park to and from metrorail. Unfortunately it completely cuts off access for the rest of us, it's like raising the drawbridge over the castle moat so the peasants can't storm the castle.

I also urge you to reconsider eliminating weekend service on the 42/43. These are heavily used routes taking Ward 1 residents from Mount Pleasant through Adams Morgan [my neighborhood], down Connecticut Avenue into Ward 2 and Dupont Circle [my doctors are at MedStar Lafayette]. [I have never been on a Kennedy Center bus that had more than one other passenger, I assume you think that it's only for commuters to Potomac Park, which has no rail service?] Combined with the above-mentioned elimination of the L2 below Woodley Park, we'll be pretty much stranded on weekends ...

While I have your attention, your online survey tool is poorly designed, making it impossible to answer accurately. You ask if cancelling (for example) the 96 or G2 bus would increase or decrease the likelihood of choosing Metrobus over other travel options. There are no realistic rail options to get to Georgetown, having to take rail to Tenleytown would triple travel time, and paying for a Lyft every time I need to get to Wards 2 and 3 is unrealistic, so I answered "I don't know". Which is not accurate.

Finally, why does Metro have it in for the 96? Every time there's a financial crisis the 96 gets put on the chopping block. As a rider I know for a fact that it has a healthy ridership, not that you would know by the lack of fare payment, but eliminating the route is not the solution to that problem.

I urge you to recognize that metrobus is not just a means to get riders to a rail station. For many of us it IS our means of transportation.

Thank you for your attention.

Marc Elrich County Executive Christopher R. Conklin Director

March 5, 2024

Mr. Paul C. Smedberg, Chair Washington Metropolitan Area Transit Authority Office of the Secretary Sect 2E P. O. Box 44390 Washington, DC 20026-4390

RE: FY25 Budget

Dear Mr. Smedberg:

Montgomery County Department of Transportation (MCDOT) supports the revised FY25 Proposed Budget presented to the Washington Metropolitan Area Transit Authority (WMATA) Board of Directors on February 8, 2024. The revised budget assumes that the funding jurisdictions will increase their subsidy by \$480 million for FY25, which is above the 3% operating budget cap. With this additional subsidy contribution and increase in preventive maintenance, WMATA reports that there will not be any significant reductions in rail, bus, and MetroAccess service. For Montgomery County, all Metrobus service will continue and there will be no Metrorail turnbacks at Grosvenor and Silver Spring. The revised budget is a good interim approach for FY25, but WMATA will need to identify solutions for FY26 and beyond.

MCDOT supports the continued need for a dedicated funding source for Metro for FY26 and beyond that does not come at the expense of long-distance riders. The revised FY25 budget also proposes fare increases of at least 12.5% in FY25 and another 12.5% for FY26 to generate additional revenue, but the fare increase comes with a loss in ridership when the system is recovering from COVID. Parking rates remain unchanged to facilitate the return of long-distance ridership.

To fill operating budget shortfalls, WMATA proposes deferral of capital expenditures. Metro has emphasized capital spending on addressing the backlog of state-of-good repair projects. With overall funding shortfalls and interim budget strategies, MCDOT assumes WMATA will defer or reconsider some capital projects.

MCDOT wants to emphasize the role of Metro's transit service in providing mobility to County residents, employees, and visitors. Metro service is essential in helping the County meet

Office of the Director

Mr. Paul C. Smedberg March 5, 2023 Page 2 of 2

its strategic goals as articulated in its Climate Action Plan, Vision Zero Action Plan, and Thrive Montgomery 2050. WMATA provides the essential transit backbone for the region, and MCDOT leverages this service to increase access and mobility for its Ride On bus passengers. Together, all transit serving Montgomery County and the greater region must continue to be safe, reliable, and affordable. The region must continue to work together to solve Metro's long-term funding needs.

Sincerely,

MAS

Christopher R. Conklin Director

GOVERNMENT OF THE DISTRICT OF COLUMBIA

Advisory Neighborhood Commission 3B Glover Park and Cathedral Heights

Resolution Regarding WMATA's Proposed FY25 Cuts in Bus and Metro Service

It is ANC3B's understanding that the docket WMATA has posted for the implementation of its FY25 budget is a worst-case scenario should the District, Maryland and Virginia fail to sufficiently increase their contributions to WMATA's operating budget. We have been assured that the District is prepared to allocate up to an extra \$200 million, and believe that if Maryland and Virginia deliver on their proposed increases, WMATA should be able to at least sustain service at current levels, and even perhaps improve it throughout the region.

To ensure that WMATA's budget works for the people it serves, the ANC supports the fiscal recommendations in the February 1, 2024, letter to WMATA from DC Mayor Bowser and Council Chairman Mendelson, especially the DC government's effort to revisit the WMATA funding formula. For example, there is a fundamental misunderstanding of equity, and the role of transit in our region's future in the WMATA Board's plan to raise transit fares higher than parking rates.

That said, as the representative voice for the District neighborhoods of Glover Park, Cathedral Heights and Wesley Heights, ANC3B is advocating in the strongest possible way for WMATA to better serve areas like ours that have limited or no access to Metro. To be specific, in resolving this funding crisis and moving forward to restore service where cuts were threatened, we urge WMATA to maintain and/or improve the following bus lines:

<u>D2 running through Glover Park to the Dupont Circle metro</u>. The ANC does not support the changes to this line proposed in the 2023 Better Bus initiative. This bus line as it currently runs is the one public transportation option available to the majority of residents of Glover Park, providing the only access to a Metro stop convenient to downtown, and it is essential for transportation of students from all over the city to Hardy Middle School in Burleith.

<u>30-series buses on the priority corridor of Wisconsin Avenue</u>. These buses serve the commercial corridors that line Wisconsin from Georgetown to Friendship Heights, providing downtown connectivity and service for workers as well as residents. ANC3B is supportive of the 24-hour service previously proposed for this bus line but going forward we urge WMATA to increase the frequency of service on this well-used and often crowded bus route.

<u>N-series buses that run along Massachusetts and Cathedral Avenues</u> providing access to Friendship Heights and Dupont Circle metros. These buses reach into high-density residential areas, providing essential access to convenient metro stops and commercial areas that people would only be able to reach otherwise by car.

WWW.ANC3B.ORG

3B03

W. GLOVER PARK

MELISSA LANE

3B01 N. Glover Park Kevin Lavezzo 3B02 E. Glover Park Jackie Blumenthal EMAIL: ANC3BMAIL@GMAIL.COM

3B04 Cathedral heights J. Kevin Carroll 3B05 S. Glover Park Gupi Howie 3B06 Cathedral Heights Ben Bergmann <u>Cross-city buses such as the 96</u>, which is the only option for this area to reach Woodley Park, Adams Morgan, and the U Street corridor, all popular destinations with limited parking.

The ANC refers WMATA to its May 22, 2023, letter which contains detailed comments on the changes to these routes proposed in the Better Bus Visionary Plan. In this letter, the ANC also opposes the circuitous route proposed for a new 201 line aimed at providing access to the new MacArthur High School in Palisades. Additionally, the ANC refers WMATA to the resolution on this matter passed by ANC3A, dated February 21, 2024, in which the many concerns ANC3B shares with ANC3A and other adjoining neighborhoods, are explored in greater detail.

At every turn in both its recent annual budget processes and in proposing the Better Bus Visionary Plan, WMATA has sought to cut bus lines that connect ANC3B's neighborhoods to Metro stations and downtown. This ANC and large numbers of affected residents have urged WMATA during comment periods and at other times to continue the bus service so many of us depend on, specifically the D2. Ward 3 Councilmember Matt Frumin has joined us in providing clear and strong comments on the real life impacts of potential losses in bus service: residents unable to get to work, seniors unable to get to supermarkets or doctor appointments, public school students unable to get to school. The need for reliable, accessible bus service is even more critical as the District enacts policies to discourage individual vehicle useage.

Therefore, ANC3B resolves to advise WMATA of our opposition to the radical cuts proposed as a consequence of WMATA's current fiscal crisis, and urges WMATA and the DMV to work in partnership to guarantee that our region's transportation services meet the needs of the Washington metropolitan area in a fair and equitable manner. Any plan to increase revenue should be distributed in a way that places the burden on those most able to afford it. Specifically, the ANC believes that the cost of parking at Metro facilities should rise as fast as fares, if not faster.

The ANC further stresses the need for WMATA to maintain bus service in the Glover Park, Cathedral Heights and Wesley Heights neighborhoods, specifically the D2, 30-series, N-lines, and the 96 bus, on the routes they currently run at a minimum, and even better, with increased frequency and reliability.

Commissioner Carroll or his designee is authorized to act on behalf of ANC3B on this matter. This resolution was adopted by a vote of 5-0 (1 absent) at a duly-noticed, public meeting of ANC3B on Monday, March 4, 2024, at which a quorum was present. (A quorum is 4 of the 6 member of the Commission.)

gebre Burner that

Welson & Dave

Melissa Lane, Secretary

CC: Mayor Muriel Bowser Councilchairman Phil Mendelson Ward 3 Councilmember Matt Frumin

We represent the DC hub of Sunrise Movement, a national organization fighting for climate justice, social justice, and a transformation of our shared society. We are writing to oppose the 2025 WMATA budget proposal and present evidence that these fare and service changes would have dire consequences for the future of the DMV public transit system. As young residents of the DC area, we are conscious that public transportation is essential to the health, accessibility, and socio-economic well-being of our city. Public transportation is regularly used by 38.6% of DC's population,¹ and lower-income, BIPOC, and immigrant communities tend to rely on this service.² It is also a pillar of clean transit, something that DC has to commit to expanding and improving if we are to effectively address our climate crisis.³

A drastic change to our Metro system would undercut these benefits and detrimentally affect not only the riders from all the aforementioned communities, but also the Metro system as a whole. In our efforts to mobilize for sweeping climate policy action, we are dedicated to fighting for access to fair and equitable access to public transportation and organizing for WMATA to make this right a reality. We recognize that WMATA currently faces a major budget deficit but **strongly urge that WMATA does not implement these severe fare and service changes for the following reasons**:

- 1. <u>The proposed service cuts are an unsustainable environmental solution to WMATA's budget</u> <u>deficit</u>. This is the time to invest in our future, not simply react to present crises. Public transportation is the most environmentally conscious and democratic form of transportation. It is a public service, essential to the welfare of this city and its residents.
 - A. 40% of carbon pollution in DC comes from transportation, mainly due to the District's terrible car traffic. You cannot threaten public transportation without forgoing the climate goals set out in the Clean Energy Amendment Act of 2018, the Sustainable DC Program, and more.⁴

https://howwerespond.aaas.org/community-spotlight/washington-d-c-transportation-policies-cut-pollution-and-greent nhouse-gases/.

- B. The proposed cuts and changes in service not only pose a significant inconvenience but also increase wait times for workers, residents, and visitors needing to commute, **driving those who are able to seek other methods of transportation away. Cuts will encourage the use of personal or for-hire vehicles, which will increase carbon and air quality emissions.⁵**
- C. We must further commit to our public transportation system, not divest from it.
- 2. The proposed service cuts are an unsustainable financial solution to WMATA's budget deficit.
 - a. These changes would, in part, raise the base fare up to 25%- a change that has been shown in the past to drive riders away from otherwise beneficial public transport systems⁶. In 2021, the fare only barely constituted 25% of the overall funding for the Metro, and counterintuitively, raising the rate might actually lower the percentage of the Metro system that can be funded by the fare, as raised rates are likely to drive away riders.
 - B. Riders will also be driven away due to reductions in frequency and station closures. It is more difficult to recover from imposed closures and a reputation of unreliable and inconvenient service, which can stick around much longer than changes in demand. Again, this will lower Metro's fare revenues.
 - **c.** This is not the first time Metro is contemplating severe service cuts, demonstrating that this is a fundamentally unsustainable position. WMATA needs a long-term, sustainable funding source.
- 3. <u>These cuts will be detrimental to the DC residents who rely on the Metro</u>, but will especially impact:
 - **a.** Disabled riders, who will have dramatically reduced access to the MetroAccess program. They will be severely impacted and in some cases cut off from the broader Metro system. Reducing MetroAccess service area and hours could impact up to 9000 current customers, and could harm the "safety net" and economic opportunities that MetroAccess provides, according to WMATA's Accessibility Advisory Committee.⁷
 - b. Black, Latinx, and lower-income residents, who in some cases rely on public transport to commute to their workplaces and will be more severely impacted by the proposed fare rate increases- despite the fare contributing just a quarter of the overall funding. As of 2022, 83% of Metrobus customers were minority groups and 50% had a household income of \$30,000 or less.⁸ By removing bus lines and reducing bus service, these groups' mobility would be adversely affected. WMATA's proposed budget has not undergone a Title VI equity analysis, and it must not be implemented without such analysis.
 - **c.** Students in the District, who may have the access to their education impaired, which would have drastic consequences for their futures and mental wellbeing. DC does not

⁸ WMATA, "Title VI Equity Analysis – Service and Fare Changes FY2024 Operating Budget",

https://www.wmata.com/initiatives/budget/upload/FY24-Budget-Draft-Title-VI-Analysis-2023-04-05.pdf

provide most students with school buses, so many young people rely on public transit⁹ to get to school. This could exacerbate the truancy issues that face the District at the moment, as some students would be literally unable to access their place of education.

- **d.** People who rely on the Metro to commute to their place of work; they may be cut off from convenient or affordable access to their workplaces, making their lives and jobs exponentially more difficult.
- e. Metro workers, who would experience job cuts and wage freezes. Metro workers keep this essential service running, and it is unfair to force them to bear the burden of WMATA's fiscal woes.
- 4. <u>This proposal elicits the following safety concerns:</u>
 - **a.** Longer waits will lead to crowded trains and buses, creating a greater risk for COVID cases and making commutes uncomfortable and unsafe. This is especially problematic for elderly or immunocompromised people.
 - **b.** Moving funding away from the capital (infrastructure) budget will reduce WMATA's ability to conduct preventive maintenance. This means that there is heightened potential for malfunctions, accidents, and injury.

We urge WMATA to reconsider its proposal, as implementing such drastic fare and service changes to our public transportation system will have dire consequences for our climate, our most vulnerable residents, and for the long-term sustainability of WMATA itself. In order to secure an equitable and prosperous future for the DMV, WMATA must not move forward with the current budget proposal for FY25. We must ensure full funding for the Metro system in perpetuity, through sustainable funding sources that do not overburden the most marginalized. In the event that some changes are unavoidable for FY25, we ask WMATA to consider the impact public transit access will have on marginalized communities as the most important metric to inform service changes.

ALEXANDRIA TRANSIT COMPANY

Paul Smedberg, Chair WMATA Board of Directors 300 7th St SW Washington, DC 20024

March 4, 2024

Re: WMATA FY25 Budget: Consistent, Reliable, Frequent Bus and Rail Service is the Priority

Dear Chair Smedberg:

Thank you for the opportunity to provide feedback on the proposed FY2025 budget. The Board of Directors of the Alexandria Transit Company (ATC) applauds the proposed budget's delicate balance of aggressive cost saving proposals, targeted service reduction techniques, and reasonable fare increases.

The Board appreciates that the revised FY2025 proposed operating budget avoids many of the draconian cuts to Metrorail and Metrobus service and frequencies called for in the General Manager's proposed budget, including that the revisions sustain critical bus services such as the 8W to parts of Alexandria which do not have access to Metrorail. It is of the utmost importance that the WMATA budget maintains reliable service and convenient frequencies that continue to serve all riders, especially at a time when transit ridership is increasing across the region. This must remain a top priority regionwide.

The Board also understands the need to increase fares to keep pace with inflation, and the importance of installing new faregates system-wide to reduce fare evasion. Please remember that these measures to ensure all riders fairly pay their way must be in lockstep with increased use of Metro Lift and Senior reduced-fare programs to help our riders most in need.

WMATA's request for more subsidy funding from jurisdictional partners at the local level would normally cause concern, especially while accepting existing or reduced service levels. However, the FY2025 operating budget shortfall is a regional issue which requires a regional solution from all partners, and the Board has consistently championed local investment in the Metrorail and Metrobus systems during local budget deliberations.

Looking ahead, the Board urges WMATA to pay special attention to future budgets because of the absence of dedicated funding and to continue to work closely with compact partners and jurisdictions to look at alternative funding approaches. The objective should be to increase budget stability and certainty to ensure that transit continues to serve the region's transportation needs. Only with that certainty can regional residents and workers truly build their lives around alternatives to driving alone, thereby realizing congestion reduction, greenhouse gas emissions reduction, and equity for all well into the future.

Sincerely,

David Kaplan Chair, Alexandria Transit Company

Re: Comments on Proposed Fiscal Year 2025 WMATA Budget (Docket B24-01 and B24-02)

Dear Chair Smedberg:

On behalf of the Northern Virginia Transportation Commission (NVTC) WMATA Committee, I write to convey our comments regarding WMATA's proposed FY 2025 Operating Budget and FY 2025-2030 Capital Improvement Program. We support WMATA's efforts in producing a revised FY 2025 proposed budget proposal that provides frequent, reliable service, includes moderate fare increases and contains \$113 million in cost savings to minimize the financial burden on funding jurisdictions. However, we are concerned that the additional subsidy amounts by Virginia, Maryland and the District of Columbia are inconsistent with traditional subsidy allocation formulae, and NVTC does not support creating a new subsidy allocation methodology this late in the budget process.

Shared Sacrifice to Fund WMATA in the Short-Term

Finding a short-term solution for the next two years requires shared sacrifice from riders, workers and our funding jurisdictions who are facing their own post-pandemic structural funding challenges, similar to what WMATA experienced over the last few years. As NVTC jurisdictions grapple with declining commercial office assessments and their own budget gaps, they are considering significant property tax increases, demonstrating our ongoing shared commitment with the Commonwealth to fund WMATA.

Focus on a Long-Term, Sustainable Funding Solution

NVTC recognizes the importance of maintaining world-class transit in Northern Virginia and remains committed to a sustainable, cost-effective WMATA system. Not only does WMATA provide access to employment centers, support regional environmental goals and enhance the quality of life of our region's residents, our Value of Northern Virginia Transit to the Commonwealth estimated that Metrorail accounts for approximately \$1 billion in statewide economic impact each year. In Virginia, funding WMATA is a joint partnership between NVTC localities and the Commonwealth. As Virginia, Maryland and the District of Columbia have made promising progress towards identifying additional funding to close the FY 2025 operating budget gap, **NVTC and the region must remain focused on a long-term, sustainable funding solution for WMATA and other transit providers in Northern Virginia**. We are pleased that WMATA may be able to avoid the draconian service cuts, station closures and layoffs outlined in the General Manager's original proposed budget in December 2023 that would have imperiled WMATA's ongoing ridership recovery and brought the region to a halt.

<u>NVTC Supports WMATA's Efforts to Strategically Reduce Service, Optimize Fares and Control Costs in</u> <u>the Revised FY 2025 Proposed Budget</u>

To make the revised FY 2025 proposed budget (introduced February 8, 2024) a reality, NVTC continues to work with partners in Virginia to rebaseline the 3% cap and seek additional state aid to help close the budget gap in FY 2025 and FY 2026. NVTC is also generally supportive of the targeted Metrorail service cuts, moderate fare increases and strengthened fare enforcement outlined in the revised FY 2025 proposed budget.

NVTC supports the strategic service reductions to Metrorail as a way to efficiently deliver frequent service for riders and better reflect current post-pandemic ridership patterns. We urge WMATA to continue to find efficiencies in where and when to deliver service while continuing to maintain and grow ridership as customers return to the system as we have seen in recent ridership growth on the Silver Line. We are eager to learn more about the Year One Redesigned Metrobus network which will reallocate existing resources to deliver more value to the region. With Metrorail fare evasion rates of 5% in Virginia, 14% in DC, and 19% in Maryland from January 1, 2023, to June 30, 2023, NVTC supports WMATA's efforts to reduce fare evasion with the installation of system-wide high-barrier faregates and increased fare enforcement. Reducing fare evasion is important to the safety and security of the WMATA system in addition to increasing fare revenues. We encourage similar attention to fare evasion on the Metrobus system.

NVTC supports the proposed 12.5% fare increase with up to 25% fare increases on late nights and weekends to adjust fares to reflect inflation and as a means to recover additional revenue while still maintaining a healthy ridership recovery. We encourage WMATA and the region to enroll eligible riders in Metro Lift, WMATA's low-income fare pass. Even as fares increase, Metro Lift will provide eligible riders in need with 50% discounted rides. The revised proposed FY 2025 budget offers fare increases that successfully balance the needs of short and long-distance riders. However, in any future fare policy decisions on Metrorail fares and parking fees, we urge WMATA to avoid overburdening long-distance riders as they have not returned to Metrorail as quickly as other riders.

We commend WMATA for identifying **\$113 million in FY 2025 capital and operating budget cost savings measures** to complement the \$308 million in cumulative operating budget cost savings between FY 2018 and FY 2024. WMATA must continue to identify administrative and operating efficiencies and mechanisms to control costs across all modes and to also identify efficiencies in its capital program. NVTC supports the FY 2025-2030 Capital Improvement Program's (CIP) focus on addressing critical state of good repair needs and supports the proposed FY 2025 preventive maintenance (PM) transfer to help fully fund the operating budget; however, **we urgently remind WMATA and the region this funding lever should not be utilized in perpetuity** since it would accelerate the exhaustion point of dedicated capital funding bond capacity and threaten longer-term state-of-good-repair and modernization needs in the capital program. Even though this exhaustion point is several years away, we recognize that the current capital program and CIP is funding constrained and **a long-term solution for capital is needed**.

Maintain the Current, Board-Approved Subsidy Allocation Formula for FY 2025

In the context of this year's budget and the short-term work we are engaged in, NVTC is concerned that the additional subsidy amounts proposed by the District of Columbia are not consistent with the traditional WMATA Board approved subsidy allocation formulae and **NVTC does not support creating a new subsidy allocation methodology this late in the budget process**.

With the pending rebaselining of the 3% operating cap, our jurisdictions expect WMATA to calculate the FY 2025 operating subsidy using the traditional subsidy allocation formulae which would provide a detailed breakdown of the subsidy by mode (Metrorail, Metrobus, and MetroAccess). NVTC localities offer a wealth of supplemental bus and paratransit services that reduce their need for Metrobus and MetroAccess services, and having an accurate accounting of their subsidy obligations to WMATA by mode is critical for them to important policy decisions around costs and service of their local systems.

NVTC looks forward to engaging with WMATA and the region to update the WMATA Board approved subsidy allocation formulae for use in future budgets. Indeed, if the region is to be successful in redesigning the Metrobus network, a new Metrobus subsidy allocation formula is fundamental to that effort.

NVTC Remains Committed to a Long-Term, Sustainable Funding Solution for Transit in Northern Virginia

While securing short-term (FY 2025) funding is critical, NVTC and the region must accelerate our collective efforts toward developing a long-term, sustainable funding solution for WMATA; in Virginia, that solution must include VRE and the other transit agencies in Northern Virginia who are also facing post-pandemic structural financial challenges. The work of NVTC's Metro Funding and Reform Working Group and the Metro Funding, Reform, and Accountability recommendations in NVTC's <u>2023 Report on the Performance and Condition of WMATA</u> provide the background, technical support and direction to find these solutions. The Virginia General Assembly is considering legislation that would create a Joint House of Delegates and Senate subcommittee to study and potentially recommend a dedicated funding package for WMATA and Northern Virginia transit agencies. This effort by the General Assembly represents a critical path towards finding those solutions. NVTC and its partner jurisdictions are committed to WMATA's success and its role as a transit leader in the region.

NVTC also encourages the Federal government to accelerate its return to office efforts while ensuring that the return is spread across the entire workweek. WMATA, VRE and our local transit systems move

the Federal workforce, and those riders are vital role to the ongoing financial health and success of transit in Northern Virginia. Please do not hesitate to contact me or NVTC Executive Director Kate Mattice if you have any questions or concerns.

Sincerely,

Walter Alcorn Chair, WMATA Committee

SUBJECT: WMATA Proposed FY 2025 Operating Budget

Dear Sir/Madam:

March 5, 2024

The City of Rockville would like to thank you for the opportunity to comment on the Washington Metropolitan Area Transit Authority (WMATA) Proposed FY 2025 Operating Budget and Associated Service and Fare Proposals. While Rockville understands the difficulties in balancing a budget, the City's Mayor and Council strongly believes that WMATA plays a very important role in the transportation network in the Washington Metropolitan area, and it is necessary to continue this role at the highest level. The City of Rockville (City) supports WMATA's efforts to continue providing adequate services that benefit the community in Rockville and surrounding neighborhoods, not just as a transit service, but also for safety, health, economics, and environmental benefits.

The City residents and visitors have already suffered from some recent cuts in service, and would appreciate if WMATA reevaluates the additional proposed cuts, which are significant and would strongly impact Rockville residents, visitors and businesses. The City would specifically like to advocate for the following:

- 1. Keep the Route T2 line between Rockville Metro and Friendship Heights. While Ride On currently provides weekend T2 service, this service is not provided during weekdays. This service would impact Rockville businesses as many of the workers depend on this service to reach their jobs. This is an important service for equity.
- 2. Keep the after-midnight service for routes C2 and C4, between Twinbrook Metro and Greenbelt Metro. This is an important service for safety and equity.
- 3. The City has concerns about decreasing Metrobus service hours by approximately 33 percent in each jurisdiction, increasing the time between trains serving across the system, turnbacks on the Red Line and Silver Line, the closure of 10 stations, and a 10 p.m. daily closing time across the system. This represents major cutbacks and will have serious implications on customers traveling to/from Rockville. Those cuts should be reevaluated, eliminated, or significantly reduced.
- 4. Having the red line trains turning back at Silver Spring will result in 15-minute headways between Shady Grove and Glenmont on weekdays and 20-minute headways on weekends and holidays. There is also a proposed reduction of 13 trains at rush hour, which represents serious impact on riders.
- 5. The City would also like to take this opportunity to request funding the improvements necessary to open the Twinbrook station tunnel 24 hours as an important safety measure.

The Office of the Board Corporate Secretary, SECT 2E March 5, 2024 Page 2

Office of the Board Secretary March 5, 2024 Page Two

Thank you for your consideration of this testimony and we hope that WMATA will reevaluate those cuts in service and will continue to provide the very important role in the transportation network in the Washington Metropolitan area.

Sincerely,

N anissa Valui a

Rockville Mayor and Council

Tim Weiler

Tucson, AZ 85743

Thomas Graham WMATA Board of Directors Washington Metropolitan Area Transit Authority 300 7th Avenue SW Washington, DC 20024

Dear Director Graham,

Earlier this month, I started noticing that for FY 2025, WMATA may possibly have to provide service cutbacks, fare increases, layoffs, and so on as a result of an unprecedented \$750 million budget shortfall. This is of grave concern to me for, despite the fact that I reside in the State of Arizona, I follow public transit news across the country and have preferred to ride upon the Metrorail every time I visited Washington, D.C. With regard to Metrorail, what bothers me is the possibility of 10 stations closing down due to lack of funds to maintain and keep them open. As WMATA has several stations within Washington, DC, Virginia, and Maryland, I am greatly concerned that these stations may face the potential of shutting their gates for an undetermined period of time. What if these stations were permanently closed and never to open again? I admit that I somewhat shudder at the possibility of this occurring. Said stations could become eyesores and fall victim to blight which would require monitoring to see to it that there are no levels of criminal activity.

I am aware that the FY 2025 budget would take effect on July 1, 2024. I hope a solution can be found across all parties and funding entities involved that no doomsday scenario would come to pass. The people of Washington, DC, Virginia, and Maryland deserve to have a reliable transportation source in the Metrorail system and I pray that such a source will not disappear for good in the years to come.

Thank you for your time in reading this letter and all the best of luck moving forward.

Very Sincerely,

No los

Tim Weiler

JEFFREY C. MCKAY CHAIRMAN

March 5, 2024

Paul Smedberg, Chair Washington Metropolitan Area Transit Authority Board of Directors 300 7th Street SW Washington, DC 20024

Reference: Washington Metropolitan Area Transit Authority FY 2025 Operating Budget and Associated Fare and Service Changes and FY 2025-2030 Capital Improvement Program

Dear Mr. Smedberg:

On behalf of the Fairfax County Board of Supervisors (the Board), I am writing to share our comments and concerns regarding the Washington Metropolitan Area Transit Authority's (WMATA) proposed FY 2025 Operating Budget and Associated Fare and Service Changes, as well as the FY 2025-2030 Capital Improvement Program (CIP). This letter focuses on four areas: the long-term viability of WMATA's operating and capital budgets, the need to maintain the three-percent cap on expenditures, and the FY 2025 proposed service cuts.

The Board is deeply concerned about FY 2025 and future WMATA budgets – both operating and capital. The current financial path is unsustainable, which we have known for some time. Just a few short years ago, the Commonwealth and the County made a historic commitment to fund WMATA's capital program, which would free up funding to support future operating budgets. Unfortunately, the increasing use of these funds to make debt service payments and the need to use Preventative Maintenance funds to support operating expenses, when combined with inflation, is depreciating the annual value of that contribution. Efforts to complete long deferred capital maintenance and to convert the bus fleet to zero-emissions are now at risk.

While we were addressing WMATA's capital needs, a three-percent cap on annual operating costs was adopted by the Commonwealth to ensure operating budgets grew in a responsible and predictable manner. The need for the three-percent cap is evident now more than ever, as costs are spiraling out of control. The Board asks WMATA to redouble efforts to control costs and the cap is an important tool for doing so.

WMATA staff and the WMATA Board must work even more closely with jurisdictional partners about how best to address these historic budget challenges. In addition to controlling costs, we would encourage WMATA to continue efforts to identify and secure non-fare and non-jurisdictional revenues. The region's citizens and our economic viability depend on a fully functional Metro system.

Regarding fare box revenues, the Board understands that fares and parking rates have not risen in many years and are not keeping up with inflation. The Board recommends phasing the increase to the maximum fare from \$6.00 to \$7.50 over two years to smooth the impact. Conversely, the Board encourages WMATA to re-examine maintaining the parking rate, as opposed to raising it from \$3.40 to \$5.95. The impact of raising the parking rates while simultaneously increasing the maximum fare will dissuade ridership when the system is already struggling to regain ridership as it is.

Mr. Paul Smedberg March 5, 2024 Page 2

Maintaining current levels of service while serving fewer passengers, coupled with an unprecedented budget shortfall, is unsustainable. The initial proposed FY 2025 Operating Budget, with associated fare and service changes, and the FY 2025-2030 CIP reflect this reality. However, the Board takes issue with elements of WMATA's initial budget approach to solving the budget crisis. The use of the maximum amount of Preventative Maintenance funding to support operating expenses for FY 2025 is generally not a sound strategy and should not be used more than one fiscal year. Moreover, the initial service cuts to Metrorail and Metrobus proposed in this budget are severe and not equitably dispersed.

The Fairfax County Board of Supervisors is hopeful that the WMATA compact jurisdictions are able to secure the additional funding necessary to prevent the most severe service cuts contained in the initial budget proposal. For example, WMATA simply cannot shut down 10 Metrorail Stations, many of which may be on the Silver Line. Eliminating critical transit access for commuters to Washington D.C. will only have negative consequences. Fairfax County commuters, in particular, will be severely impacted by this proposal. Fairfax County reoriented Connector bus routes to serve these new stations. Closures would force the County to re-route Connector services again, which would make trips longer and more time-consuming. Commuters may have little choice but to take their cars, which will further congest roadways and add to poor air quality. Commuters who give up on Metrorail as a viable alternative may never come back to the system.

Proposed cuts to Metrobus service are also equally problematic. Every single Metrobus route in Fairfax County will either be eliminated or reduced, according to the initial proposed budget. That is not acceptable, especially considering that Metrobus ridership is almost back to pre-pandemic levels. If Metrorail services are cut, low-income passengers, in particular, must have a transit alternative that they can fall back on. This budget proposal would be a disaster for the most vulnerable populations in our County and in the WMATA service area. Also, the Board is concerned that Fairfax County and the other outlying jurisdictions are taking the brunt of the proposed service cuts. Any proposed service cuts should be more equitably distributed among the regional partners. Furthermore, proposed service eliminations or cuts should be explained in greater detail, with justifications provided. This budget offers no such explanations or justifications, it just creates more equity issues. As the largest majority minority jurisdiction in the Commonwealth, Fairfax County's residents who are low income and people of color make up the majority of the county's Metrobus riders, consistent with WMATA rider trends regionally. Unable to afford to live near where they work, Metrobus service is essential and to ignore the needs of these riders could cause further strain as they are key contributors to the regional economy.

WMATA's proposal to reduce the service area of MetroAccess to conform to the federally prescribed area, threefourths of a mile from fixed route service or a rail station, is also a poor idea. Fairfax County, as well as other counties within the WMATA service area, has transit dependent populations that fall outside of these boundaries. They cannot simply be cut off from critical transportation to jobs, medical appointments, and other important services. On the other hand, the need for MetroAccess service hours to mirror the rest of the fixed-route system is understandable.

In summary, the Fairfax County Board of Supervisors acknowledges that WMATA is confronted with significant challenges after the last several years and is now trying to continue to rebuild ridership and restore confidence in the system. It is imperative that WMATA communicate regularly and often with jurisdictional partners, who are standing ready to work to help fix this problem, and I implore you as the general manager to be present during meetings as we work on a sustainable funding appropriations approach for years to come.

Thank you for your consideration of the Fairfax County Board's comments. We request a formal response to this letter and assurance that you and your staff will make every effort to maintain robust lines of communication throughout the adoption of the FY 2025 budget and beyond. If you have any questions, please call Brent Riddle at (571) 393-0183 or me at (703) 324-2321.

Mr. Paul C. Smedberg, Chairman Office of the Board Secretary Washington Metropolitan Area Transit Authority 600 5th Street, N.W. Washington, D.C. 20001

Re: Testimony by the City of Bowie's City Council regarding the Washington Metropolitan Area Transit Authority's Proposed Fiscal Year 2025 Operating Budget and Associated Services and Fare Proposals, Docket Number B24-2

Dear Mr. Smedberg:

We are reaching out to you to express our serious concern with the recommendation in the proposed Fiscal Year 2025 budget for the Washington Metropolitan Area Transit Authority ("WMATA") to eliminate three bus routes and curtail bus route in the City of Bowie area. According to the proposed budget, WMATA plans on eliminating bus routes B21 and B22 (Bowie State University Lines), bus route B24 (Bowie-Belair Line), bus route 27 (Bowie-New Carrollton Line) and curtailing the bus route for bus line C28 (New Carrolton-Pointer Ridge).

These proposed cuts would have a detrimental effect on the residents of Bowie by leaving the City with even more limited transit options. These limited transit options would impact low-income, elderly, and disabled residents. Likewise, the elimination of the bus routes will have a profound impact on Bowie State University and its students. As a vital mode of transportation for many students, these bus routes provide crucial access to educational opportunities, employment, and essential services. Without them, students may face increased difficulties in commuting to campus, resulting in potential barriers to their academic success and overall well-being. In addition, for those students who rely on public transportation due to financial constraints or lack of personal vehicles, the elimination of these routes could further exacerbate existing challenges and inequalities.

The repercussions of these cuts cannot be overstated. They will force more residents into singleoccupancy vehicles, leading to increased traffic congestion, higher greenhouse gas emissions, and longer commutes. Such actions directly contradict the goals of your Bus Transformation Project, aimed at reducing congestion, emissions, and improving transit accessibility and efficiency. These cuts are also in opposition to the MWCOG's Transportation Planning Board's Visualize 2050 where incentives to drive less and use more public transportation are part of the goals. As a member of the MWCOG's Transportation Planning Board, it would seem that you are working against the goals instead of supporting the goals. Moreover, these routes are integral to Bowie's future transportation plans, as outlined in our collaborative efforts with the Maryland National Capital Park and Planning Commission ("MNCPPC") and Prince George's County in the Bowie Master Plan. Our vision involves an integrated transportation network encompassing roads, rail, bus transit, and trails. Eliminating these routes undermines this vision and jeopardizes the City's development goals.

The City of Bowie also encourages you to better communicate the details and effects these proposed cuts will have on the communities affected. We feel that it is important to engage the communities in issues that affect their daily lives. We request that you revise your recommendation and maintain all the proposed bus routes in the interest of our residents.

We look forward to working with you to meet our shared goal of a better transportation system for all residents and their communities.

Sincerely,

Smothy J- Al-

Bowie City Council Timothy J. Adams Mayor

GEORGETOWN UNIVERSITY

March 5, 2024

Office of the Board Secretary Washington Metropolitan Area Transit Authority 300 7th Street, SW Washington, DC 20024

To Whom It May Concern:

Thank you for the opportunity to submit comments regarding the recent proposal by the Washington Metropolitan Area Transit Authority (WMATA) to eliminate several Metrobus routes that serve the Georgetown neighborhood as part of WMATA's proposed service changes for fiscal year 2025. On behalf of Georgetown University (Georgetown), I write to share our strong objection to WMATA's proposal to eliminate the existing G2 route (P Street-LeDroit Park), D2 route (Glover Park-Dupont Circle), and D6 route (Sibley Hospital-Stadium Armory).

Georgetown has been an anchor institution in the greater Washington, DC, community since 1789 and is the District's largest private employer. As a global research university with ten schools and an affiliated hospital, our historic university serves as a regional hub. Approximately 17,000 Georgetown undergraduate and graduate students take classes across multiple locations in DC. Our university is the workplace of thousands of faculty and staff in the District of Columbia and throughout the region, and thousands of visitors attend public events hosted by the university each year.

Many of Georgetown's thousands of students, faculty, and staff depend on Metrobus for their daily commutes. In an average week, Georgetown and MedStar Georgetown University Hospital generate an estimated 13,500 Metrobus trips. Because the Georgetown neighborhood does not have a Metrorail station, we are particularly dependent on Metrobus. Access to a dependable and accessible public transportation system is essential to our University community and relates directly to matters of equity, sustainability, accessibility, and quality of life.

By eliminating the G2, D2, and D6, WMATA's proposal would eliminate all current Metrobus stops that service the university's main entrance at 37th and O Streets NW, the Car Barn at Prospect and 36th Streets NW, and the university's northern entrance at 38th Street and Reservoir Road NW. Under this proposal, anyone traveling to Georgetown's campus via Metrobus would have to walk nearly half a mile from the nearest bus stop to reach campus. To move access to Metrobus service farther away from our campus – when such a ride is often just one leg of a rider's total commute – will strongly disincentivize use of public transportation, promote the use of single occupancy vehicles and rideshares, and increase parking and congestion in the neighborhoods surrounding the university. Removing the university's only

nearby access points for public transportation would also be prohibitive for individuals with disabilities or mobility restrictions and will end up further taxing WMATA's already-stressed Metro Access program.

Elimination of these stops would also severely undermine Georgetown's partnership with WMATA through the <u>Hoya Transit Program</u>. The university has invested more than half a million dollars to provide Metro passes to students over the past two years. In the last year, Georgetown students took more than 14,000 rides on the G2, D2, and D6 thanks to the convenience of these bus stops.

Eliminating the above-mentioned routes would also undermine critical transportation priorities and commitments the university has established through our <u>Campus Plan</u>, which was developed in partnership with community leaders and the DC Government. These commitments recognize our shared goals of reducing traffic, promoting sustainability, and contributing to the quality of life for our neighbors. Preserving the current routes is essential to ensuring Georgetown is able to meet the ambitious transportation goals established in our Campus Plan.

Finally, WMATA's proposed changes would also affect public transportation use as it continues to recover from the effects of the pandemic. Post-pandemic ridership of the G2 shows a clear increase in daily entries year-over-year from 2020-2024 as community members use this route to access Georgetown's campus and travel into the city. Ridership of the D2 and D6, especially during weekday service, shows growing reliance on these bus lines for commuters to the Georgetown neighborhood and beyond. All three routes are nearing their pre-pandemic levels of ridership.

WMATA has previously proposed changes to the G2 and D2/D6 lines that would have similarly impacted public transportation access to Georgetown's campus if they were enacted. For good reasons, these proposals were consistently and soundly rejected by WMATA leadership. We respectfully request that WMATA once again take steps to preserve the current service routes of the G2, D2, and D6 lines.

Thank you for your consideration.

Respectfully,

David Am

David B. Green Senior Vice President and Chief Operating Officer Co-Chair, Georgetown Community Partnership

Paul Smedberg, Chair Washington Metropolitan Area Transit Authority (WMATA) Board of Directors 300 7th Street SW Washington, D.C. 20024

Re: Proposed FY2025 Budget/City of Falls Church Public Comment

Dear Chair Smedberg:

The City of Falls Church has long supported transit and the vital benefits it provides to our region. We understand the budgetary challenges of the \$750M operating funding gap, with proposed reduction to \$480M gap, which resulted from the end of COVID-19 federal relief funds and loss of ridership. The City remains extremely concerned that the strategy to reduce the gap is one of shifting one-time funds to operating expenses, imposing severe service cuts, and expecting localities to pay for the funding gap. Therefore, the City supports WMATA's continued review of internal efficiency and detailed cost analysis for the near-term mitigation as well as advocating to the Commonwealth of Virginia for long-term dedicated funding solution. As WMATA works to reduce budget shortfalls the City notes:

- 1) Areas of Support
 - a. Right size rail and bus service levels to demand along with:
 - a. No service reductions to the East Falls Church and West Falls Church Metrorail Stations as station closures or turn-arounds are considered:
 - b. No service reductions to bus route 28A;
 - c. Preserve reliable bus service (higher frequency service and on-time) since bus service generally supports the most vulnerable and/or transit dependent riders for job access;
 - b. Implement permanent fare increases that balance ridership and revenue with fare optimization and enforcement for improved cost recovery; support enrollment in Metro Lift;
 - c. Ensuring Title VI compliance provide system-wide benefits;
 - d. Continue the critical capital program and CIP to advance goals of safety, reliability, and state of good repair;

- e. Support WMATA and the regions effort to seek additional funding from the Commonwealth of Virginia for maximum amount possible and at minimum a 50/50 split of \$65M for FY25 and \$84.5M for FY26;
- f. Support a state code temporary two-year suspension of the 3% cap requirement for FY25 and FY26 for fiscal response flexibility so WMATA is able to receive additional and needed funding above 3% level increase; 3% cap is a valuable cost containment tool that encourages innovation and operational efficiency analysis; and
- g. Support studying the long-term funding needs and cost-containment measures if the region and state come together to solve the FY25 and 26 funding gap, there will still be large deficits and structural budget problems in FY27 and beyond. It is necessary to study long-term funding needs as well as cost-containment measures.
- 2) Areas of Concern
 - a. Insufficient internal ongoing efficiencies identified to date necessitating additional analysis;
 - b. Using one-time federal funds for operating vs retaining commitment to capital reinvestment;
 - c. Assessment and renegotiation of collective bargaining agreements specifically that pension liability should be calculated on base salary only, without including overtime and bonus;
 - d. The City does not support the estimated 14% increase in the City's operating budget subsidy, which is a direct impact on City taxpayers and needs to be reduced with WMATA cost containment and Commonwealth of Virginia increased funding; and
 - e. City continues to support local revenues for the capital program remaining unchanged from the current fiscal year.

The City looks forward to working with WMATA and the other funding jurisdictions to balance needs with a sustainable level of jurisdictional support as part of the FY2025 budget process as well as long term dedicated funding solution.

Sincerely,

Letty Hardi Mayor

DC Amplified. Life Simplified.

WMATA Public Hearing FY2025 Budget Virtual Hearing Wednesday, March 5, 2024

My name is Emeka Moneme, president of the Capitol Riverfront BID. On behalf of the undersigned stakeholders in Buzzard Point, I am here to speak on the proposed service changes to Route 74 in the District of Columbia. Route 74 (Convention Center-Southwest Waterfront), which runs from downtown DC to Buzzard Point is proposed to be eliminated. I am writing to you to advocate for the retention of funding for the 74 bus line in the 2025 budget. This bus line serves as a vital lifeline for residents in our community who are not in close proximity to Metrorail lines and rely on public transportation for their daily commute to work and school.

Capitol Riverfront includes everything south of Interstate 695 in Southeast DC down to the Anacostia River between Fort McNair and South Capitol Street SE to the Phillip Sousa Bridge. This area is home to over 20,000 people, provides jobs for 36,000 people, has 7.1 million square feet of office space, 1,400 hotel rooms and 88 restaurants. It also boasts hundreds of events, 10 acres of parks and programmed space, retail, restaurants, and activities that support an outdoor and active lifestyle year-round. It offers places and experiences that people in this region and visitors seek out in the District.

Within Capitol Riverfront, Buzzard Point is a rapidly developing subarea catalyzed by the opening of Audi Field, access to the water, and proximity of the Capitol Riverfront's urban neighborhood amenities. Capitol Riverfront itself is approximately 73% built-out on our way to over 35 million square feet of new development. Currently, over 1,300 apartment and condominium units have delivered in Buzzard Point, with approximately 1,600 residential units and over 85,000 SF of restaurant/retail space under construction. Over the next 12 months, Buzzard Point will transition from emerging to an active, high density, mixed-use urban neighborhood and riverfront destination, approaching a population of nearly 5,000 residents by end of 2025.

At buildout, Buzzard Point is expected to have over 5,000 new residential units, several new hotels, new office space, additional retail, and entertainment uses, and play host to a variety of stadium activities beyond DC United home games. Buzzard Point could be home to over **7,500** new residents. However, Buzzard Point is on a peninsula and does not have great connectivity to adjacent neighborhoods and transit service.

While Audi Field and Nationals Ballpark are walkable from either the Waterfront or Navy Yard/Ballpark Metro stations for events, it is less convenient for residents and workers in Capitol Riverfront and Buzzard Point on a day-to-day basis. DC Central Kitchen is a prime example of this need.

DC Central Kitchen (DCCK) is an iconic nonprofit and social enterprise that combats hunger and poverty through job training and job creation. The organization provides hands-on culinary job training for individuals facing high barriers to employment while creating living wage jobs and bringing nutritious, dignified food where it is most needed. DCCK is located at the southernmost tip of Buzzard Point and the 74 bus provides an essential lifeline and access to work for many of its employees.

Furthermore, retaining funding for the 74 bus line aligns with WMATA's commitment to equity and accessibility. As a public transportation agency, it is crucial to ensure that all residents, regardless of their socio-economic status or geographic location, have access to reliable and affordable transportation options. Cutting funding for the 74 bus line would disproportionately impact low-income residents and exacerbate existing transportation inequalities.

It for these reasons that the Capitol Riverfront BID has historically advocated for better accessibility through transit connectivity. **We do not support the proposed elimination of WMATA Bus Route 74. It will impair the accessibility of Buzzard Point and limit the mobility of this growing residential, employee, and visitor population.** This essential bus service will allow new residents and employees, as well visitors to the soccer stadium and restaurant/retail offerings and the riverfront, a chance to arrive without a car. There is very little public parking in Buzzard Point, and none was built to support Audi Field.

We also encourage WMATA and the District of Columbia to collaborate and seek creative solutions to ensure the accessibility of the neighborhood and mobility of its residents and workers. In addition to Metrobus service, Capitol Riverfront is served by the DC Circulator's Eastern Market-L'Enfant Plaza bus line and micro-mobility service provided through the Mobility Innovation District (District MID). There may be opportunities to collaboratively and efficiently deploy resources and transit to and throughout the Capitol Riverfront.

To summarize:

- The Capitol Riverfront BID and its stakeholders are in strong opposition to the elimination of Bus 74 service into Buzzard Point.
- We admonish WMATA and DDOT to recognize the residential and commercial growth in Buzzard Point and identify solutions to the immediate and clear transit service needs of the neighborhood.

Thank you for the opportunity to testify in opposition to the proposed extension elimination of WMATA bus line 74 as part of WMATA's FY2025 Operating Budget.

Very sincerely,

Emeka Moneme Capitol Riverfront BID

Comments on WMATA Proposed FY2025 Budget From Ann Lane Mladinov, Commissioner, ANC3A05 2819 39th Street NW, Washington, Dc March 5, 2024

As a resident of Washington, DC, living in Cathedral Heights neighborhood, for many years I have relied on Metrobus to get to work, to meetings, to grocery stores and other shops, medical appointments, and other essential destinations that are beyond walking distance.

I have spent most of my career working on transportation, including as an Industry Analyst and Economist at the USDOT, after getting a master's in City and Regional Planning specializing in Transportation. I also have been serving my community in Glover Park-Cathedral Heights for nearly 10 years as an Advisory Neighborhood Commissioner, in ANC 3B from 2014-2022 and in ANC 3A from 2022-2024. Transportation has always been one of the major issues that my ANC has been called on to address. And every year that WMATA proposes to adjust Metrobus routes and services, residents and businesses in my neighborhood have faced significant effects, driving the ANC Commissioners to keep up with the details of budget and operating decisions and taking a position on behalf of the community and the well-being of the District residents as a whole.

This year with the dire financial challenges facing WMATA, I and my colleagues serving as Commissioners have again been raising strong concerns about the potential effects of proposals to reduce bus services used by residents, students, workers, and visitors to the areas we represent. That includes both ANC 3A and ANC 3B (which included my home until redistricting shifted the boundary in 2022). The neighborhoods I have served in ANC 3A and now in ANC 3B are highly dependent on Metrobus because the nearest Metrorail stations are a mile or more from most residents. ANC 3A and ANC 3B have both voted to take official positions to share with WMATA, expressing strong opposition to the changes contained in the Docket for the FY2025 budget and for any changes that would eliminate, significantly reduce, truncate or otherwise curtail access to Metrobus service for current and prospective riders in our community.

I am submitting these additional comments as an individual to expand on the concerns about the proposed WMATA FY 2025 budget. We all faced a somewhat similar situation in early 2020, when a much reduced budget was also proposed and the Board presented plans to the public for eliminating and/or consolidating a very large number of Metrobus routes in order to save money. At that time, I attended the forum WMATA held for ANC Commissioners and I participated in the community hearings in DC and adjoining jurisdictions to hear from all the witnesses. That was an excellent way to get a full sense of the role that Metrobus service plays in people's lives and the severe adverse consequences they were anticipating. A large number of riders and local officials worked together that year to share our concerns and WMATA listened.

When the final FY 2021 budget was presented to the Board for approval, the vast majority of Metrobus routes serving our area and across of the District had been restored. Very sadly for us all, the Board vote almost coincided with the shutdowns necessitated by COVID-19, and we almost instantly lost some of the routes that we had just successfully advocated for WMATA to preserve, and during the course of the following 3 years, we lost even more of those important services. Now the region is looking at similarly drastic proposals to curtail Metrobus services--in multiple cases, the same changes that were proposed for FY2022 when residents worked with WMATA to defeat those plans.

I recognized that times are different. Some residents who formerly rode the bus for their daily commute have never returned to working at the office, or only go to the office one or two days a week. Downtown buildings are only 40-60% occupied. Many young people chose to leave their apartments in downtown Washington and live and work outside the city. People's shopping patterns and recreation and leisure activity schedules have changed. WMATA's ridership has not returned to its pre-COVID levels, particularly on weekdays.

In the intervening years, the WMATA staff and partners also have undertaken a transformation project reflected in some of the Better Bus proposals released to date, which envision complete reconfiguration of the Metrobus system and other bus services in the region. The Better Bus "Visionary Network" and related operating plans are still in development, after an initial round of comments last summer, and WMATA has committed to sharing the revised map and near-term adjustments produced in that project. Robust Community Engagement reaching to all elements of the bus-riding public will be needed and essential for shaping those plans. That work will have to be brought into WMATA's the evaluations of further changes in Metrobus services as the new fiscal year progresses and the transportation and financial situation evolve over coming cycles.

I hope WMATA will continue to recognize the need for involving riders and the overall population in considering the future shape of our public transportation system for the region, and not take hasty action to make short-term changes that would cut off long-time riders who have relied on and sustained the system. That is why I emphasize in my comments below the importance of maintaining quality bus service to neighborhoods in the District that depend on Metrobus, and not eliminating key Metrobus routes that people use because they do not have access to Metrorail, or Metrorail does not serve the locations they need to reach.

As the staff and leadership of WMATA must know, Metrobus is the workhorse of the system, a fundamental feeder to Metrorail, and a lifeline for countless individuals and households who could not live, work, study, or continue to thrive in the Washington area without these services.

Thank you for the work that the Board and staff have done in developing a proposed budget and revised budget in this difficult year, and particularly for pursuing additional contributions from the District of Columbia, Maryland, and Virginia to support WMATA operations and capital investments in FY2025. In the face of a projected \$750 million shortfall, more funding is desperately needed to provide adequate public transit services across the region and carry out the basic mission of the Metrobus, Metrorail MetroACCESS. I hope and trust that much or all of the promised addition funding from the three jurisdictions will be delivered for FY2025, and WMATA will be able to develop a revised budget that sustains most services without harsh increases in fares for the people who need the service and can least afford to pay significantly more.

Maintaining a functional transit system is essential for the entire area, the economy, employment, education, cultural life, recreation, tourism, and the environment for the coming year and will make it possible to sustain the quality of life and the work of the government, businesses, schools, non-profits, and other institutions, as well as the regional transportation network for the longer term future. Students of government have long understood that one of the most difficult challenges is to operate regional services that span state lines. There is no constitutional provision for such entities to have taxing authority. If we could organize a "state of WMATA" and institute a dedicated tax to support transit, that would be a huge help. But that is not in the cards. We have to keep working together to find a substitute source of funds that is flexible and generous enough to meet the need.

KEY POINTS

• Metrobus routes provide vital services to dense DC neighborhoods outside practical walking distance of Metrorail.

• It is vital not to eliminate bus routes that are getting workers, students, families, and seniors to vital destinations, particularly if they would have no reasonable transit alternative.

• Commuting trips for work (or school or other purposes) often do not involve radial trips to and from downtown; other routes are needed that don't necessarily form a neat grid using arterial streets.

• Because of the region's geography as well as history, there are many neighborhoods around the edge of the District that have fairly densely populated blocks of apartments and homes that are not entirely along major corridors. They need Metrobus service too.

• To be viable for the long term, a transit system needs to offer frequent service on major corridors and regular service on feeder routes that people rely on. Without bus service, many neighborhoods could not survive and sustain their residents effectively.

• In this difficult budget year, WMATA needs to try to retain as many riders as possible in the FY2025 operating plan and in a similar vein develop a Better Bus network and preliminary action plan that will also continue to serve bus-dependent populations and neighborhoods.

• Plans for a revised Better Bus network map and Year One operating plan should get full public review and comment to ensure a high level of public understanding and feedback so the initial steps toward transforming the system will bring steady improvements without destroying important parts of the network and driving large numbers of rider to use private motor vehicles.

COMMENTS ROUTE BY ROUTE IN MY COMMUNITY

D2

The D2 is the essential route serving the interior of the Glover Park neighborhood, which occupies about a half mile square area bounded by Wisconsin Avenue on the east but not served by through routes running east and west or north and south between Cathedral Avenue and Whitehaven. The D2 takes workers to and from the Dupont Circle area to the east. The service is important for hundreds of people going to their place of employment, shopping, education, health care, museums, dining, entertainment and recreation, from Dupont Circle through upper Georgetown to Glover Park. The D2 serves Duke Ellington School of the Arts and Hardy Middle School, as well as most of the south, central, western and northern Glover Park neighborhood. It is a densely settled community of row homes and apartments both small and large, with many seniors as well as students and families. Apartments are particularly clustered long Glover Archbold Park, at the western edge of the neighborhood, and many of them do not have their own private motor vehicles, so they are heavy dependent on bus transit. As the WMATA staff has recognized themselves, there are no good public transit alternatives for people living 6 or 8 or 10 blocks from Wisconsin Avenue and Massachusetts Avenue, along streets that involve climbing up and down steep hills to reach the nearest arterials.

N2/4/6

This bus line serving constituents in my immediate ANC area also serves a large number of seniors and others living in high-rise apartments and condominiums on Cathedral Avenue as well as New Mexico Avenue, off a major arterial. The area is hilly and not all the residents can walk to Massachusetts or Wisconsin Avenue to use a bus to get to work, medical appointments, shops, restaurants, religious services, or the Iona Senior Services at Tenleytown or St. Alban's. The N bus line is an essential link for residents. If WMATA chose to remove that connection, or eliminate service on weekends (when the N6 currently is the only option, since the N2 and N4 only operate on weekdays), people would be left with no practical transit alternative. Contrary to some people's assumption, not all residents in this area are wealthy. In addition, many service workers including home aides or health aides who assist residents rely on transit to get to and from work, not just on weekdays but also on weekends.

M4

The M4 route runs from Knollwood near Rock Creek Park along the District's northern boundary with Maryland, through Tenleytown all the way to a large and highly respected private hospital now affiliated with Johns Hopkins, Sibley Hospital, located at the southern end of the Dalecarlia Parkway. If WMATA eliminated the M4 (as well as the D6, discussed below), there would be no transit service to this major center for health care services, including for workers who need to get to and from work. That would be a significant failure in the transit network.

D6

The only bus on MacArthur Boulevard in the District, serving the Palisades neighborhood as well as Foxhall Village and Reservoir Road into Georgetown. The Palisades area is developing an Increasing number of affordable apartments along MacArthur. In addition, the D6 is the only Metrobus route serving the newest DCPS public high school, MacArthur High School. Residents and several local ANCs had asked if WMATA could offer special buses to MacArthur but that has not been worked out

Special Buses Serving Deal Middle and Jackson-Reed High School

Losing these buses would be a tremendous loss for the students from east of Rock Creek Park who attend or plan to attend these high-quality schools, where out-of-boundary students make up a higher than average percentage of the student enrollment. Jackson-Reed is the largest high school in the District, and offers course work, athletics, and other activities that no other DCPS school can duplicate. Forcing the students and families to shift to another school for lack of affordable transportation would be a terrible loss. Flooding the limited number of roadways through Rock Creek Park with increased private motor vehicles to get students to and from school would also be a less than desirable alternative.

31/33

The original FY2025 budget reflected in the Docket would truncate the route of the 33, making Potomac Park/Foggy Bottom its eastern terminus rather than Federal Triangle/Archives. That would mean that the 30 line buses would no longer carry riders from upper NW to the heart of downtown, much less to Capital Hill or SW or SE. Riders who want to get to Federal Triangle or Metro Center/Gallery Place would have to transfer to Metro or a second bus. The proposed changes in bus routes 31/33, and 32 and 36 would also mean a significant loss in transit access for workers going from downtown or south of the National Mall to jobs or school in Georgetown or along Wisconsin Avenue. This would be a violation of WMATA's commitment to maintain long-standing bus connections between far SE and far NW, which the founders of WMATA had promised to continue when they took over the region's private bus lines. Jim Hamre knew this and shared the commitment with the ANC members, but he has retired, and

current planners do not appears to remember. Ending the 32 and 36 at Potomac Park was not ideal but at least there were some direct connections to the 30-line buses at Archives or in Foggy Bottom. The drastic cuts in the proposed FY 2025 budget would cut off the 32 and 36 at L'Enfant Plaza buses, leaving no logical way to connect to Wisconsin Avenue without transferring to Metrorail and then most likely another bus.

Dependence on Bus Service

Metrobuses are the primary feeder system for Metrorail.

As WMATA's reports have recognized, Metrobus is the essential transit service for neighborhoods around the District, not all of which are served by Metrorail. That is certainly the case in my area.

Ridership on Metrobus routes has returned to a higher share of pre-COVID levels, compared to Metrorail. Metrobus riders include more people of color, lower household income, and lower car ownership than Metrorail. It is clear that many people are relying on current Metrobus routes and services to get to essential destinations including work, school, shopping, medical care and other services. And riders with low and/or fixed incomes may choose to use Metrobus because the fares are more economical, the service feels safer and more personal, and in many cases they can get closer to their homes or destinations.

As the routes reach further toward the edges of the District, the neighborhoods have fewer businesses and office buildings and a larger share of residential buildings. Correspondingly, the street network includes more local residential streets and fewer arterial streets. And for the transit system to serve these outlying areas, Metrobuses have to operate on smaller streets. That may not create the ideal circumstances for transit service, but that is the reality, because of the historical development patterns in the Washington area and because of the topography.

Nature of the Geography

Washington, DC, was intentionally sited at the fall line of the Potomac River. That means the land rises up hills and rocky ridges in all directions.

That has also meant that toward the outer edges of the District, the street grid cannot always be a rectilinear grid, and it does not. There are winding streets along the contours of hills. The diagonal avenues with state names have to "kink" to match the geography.

There was a plan to build roadways down the middle of several parks in NW including Glover Archbold Park and Whitehaven Park, and add more parkways or high-speed boulevards to fill out the grid. But those roads were not built—to the benefit of the tree canopy, access to parks and recreation, and quality of life in adjoining neighborhoods.

Major bridges were built at several locations across Rock Creek Park but for the narrower valleys farther to the west, causeways were built across the stream valleys to extend Massachusetts Cathedral, and New Mexico Avenue through Glover Archbold Park.

As car ownership became more widespread, many of the areas around the park were developed as apartments, in some cases higher-rise buildings than any other nearby structures because the steep

grade of the lots allowed units to be built at the back of the properties on several floors below the ground floor entrances.

The Census shows that residential density in Glover Park and Cathedral Heights is higher than in most other neighborhoods in NW Washington west of Rock Creek Park, because of the number of apartment buildings, condominiums and row homes. That has contributed to high residential density off the main avenues such as Wisconsin Avenue.

No one can wish away the urban structure. Over time, physical development patterns can evolve and change. But all experts agree that most of the buildings now in place are going to continue to exist for decades to come; barring massive water level rise and catastrophic floods or storms or other disasters, most of the land to be developed in Washington has already been built on and the large proportion of the housing including homes and multi-family buildings that we see today will remain for decades, potentially with increased density. That is going to be the market that WMATA needs to serve.

Planners may look at the map and conclude that the bus system could operate more efficiently if it didn't have to serve all the routes now included in the WMATA map. It may well be that ridership could be higher if there were more frequent buses on arterial streets. Bus planners and decisionmakers in all three jurisdictions have to pay attention to the realities of where people live and where they need to go for work and other purposes.

I have not heard that WMATA has had new origin-destination study done. We know that not all jobs are located downtown, particularly post-pandemic. Many jobs are in suburban locations. And the work trips are no longer primarily radial. People travel in all directions to get to employment-whether east-west, north-south, or outside the jurisdiction, moving between DC and Maryland and Virginia. That is why MoveDC has emphasized improving cross-town transit services over the past 8 years, and why it continues to be essential to maintain services such as the 96, H2 and H4, D2, D6, G2, and of course the N2/4/6 which circles several key areas of NW Washington but fundamentally carries people in a northwest to southeast direction.

Over time, individuals can make different decisions about where they live and also where they work. But people are still going to be living in areas with large apartment developments. There are continually new families moving into the row homes. Residents are adding ADUs to their homes, and the apartment buildings and condominiums with 4 units are being expanded to 6 or 8 units in the neighborhood.

It won't make sense to abandon large numbers of regular riders in established neighborhoods and routes off the main corridors in order to shift the resources to priority corridors, if that means leaving most of the off-corridor riders without an acceptable transit alternative. The climate, energy and transportation policies are not compatible with driving large numbers people away from Metrobus and into using private motor vehicles because they have lost reasonable access to transit. What is the option that WMATA expects or advises where the docket calls for eliminating the Metrobus service, with a note that there is "No alternative transit," or a one-mile walk to the next nearest bus line.

If the WMATA staff has identified a bus route for elimination that would have no transit alternative, the planners should think again about including that change in the FY2025 operating plan.

And please do not propose to maintain a Metrobus route in the FY2025 budget and then come back within a few months with a Year One Better Bus plan that would to eliminate or radically reconfigure

one of our essential bus routes because it is not straight, or doesn't fit the ideal grid pattern or spacing between bus lines.

WMATA must provide a thoughtful and considered community engagement process and opportunity for public comment on a revised Better Bus network map and proposed Year One changes, as it is required to do on the budget. The Better Bus project represents a dramatic transformation in the regional bus system, which could permanently alter the services that are available to many locations in the District and beyond. The public voice must not be disregarded or ignored.

It is clear that some difficult adjustments have to be made by any public agency or service provider when needed funds are nowhere to be found. But WMATA needs to consider a full range of options for funding and for operations and investment, and weigh them carefully.

Thank you very much for your consideration.

TINO CALABIA, Chair Bus/Rail Subcommittee of the Washington Metropolitan Area Transit Authority's AAC

Board Chair Smedberg, other Board Members, GM/CEO Clarke, and staff.

Good evening, I'm Tino Calabia. I have the honor of chairing WMATA's Bus/Rail Subcommittee (B/RS) of your AAC. There are four points I wish to make:

FIRST, thank you, General Manager Clarke! In your first year, you quickly steered our transit system into the 21st Century future the Nation's Capital deserves. How? By, for example, moving WMATA out of the past by choosing to build the safer, more commodious open-gangway trains now under construction. You also tested fare gates that had only been relatively recently purchased, although they were actually a flawed, outdated model. You then had them reengineered into effective anti-fare-evasion toll gates, helping to save up to \$40 million yearly.

Such ideas were among those that some B/RS members e-mail around to each other and discussed as early as 2018 — but in vain at the time.

SECOND, emergency bailout funding. As of March 5th, the "Revised FY2025 Proposed Budget and FY2026 Forecast" chart (below) issued on February 8th by WMATA's Finance and Capital Committee is incorrect. The column, "Additional Regional Investment," shows Virginia's share of what would be funding to ease WATA's fiscal crisis as \$130 million. But, today's Washington Post page A1 story reports that Virginia's Senate budget bill "... *included no new funding for the Metro transit system.*"*

Much earlier, the *Washington Post*^{**} had already reported that Virginia Senate Pro Tempore and the Finance and Appropriations Committee Chair L. Louise Lucas:

"<u>stripped the arena language</u> — as well as Metro transit funding seen as key to the project — from the Senate's state budget bill.

In the same article, the Post reported strong opposition by unions against building a sports arena in Alexandria.

Whether Virginia's emergency funding for WMATA is restored seems dependent on 1) Senate Lucas's views and determination to get her way; and/or 2) the tug-of-war between Governor Youngkin and the District of Columbia over whether Washington DC's Capitol One Sports Arena is moved to Alexandria or remains in Washington.

THIRD: dedicated funding: The February 27th *Washington Post* headlined a front-page article: "D.C. officials unveil \$400M plan to fix D.C.'s ailing downtown."*** Minus headlines and captions, the article's text consists of 1,429 words. Only 18 allude to WMATA. But to me, the most notable are the 18 words: "... dedicated funding for the bus system and Metrorail in the face of the transit system's budget shortfall."

So thank you, Mayor Bowser, for the \$200 million you've promised to help lower the huge estimated shortfall WMATA faces and also for mentioning "dedicated funding" in the

Post. Once WMATA's current crisis is past, you and the heads of the jurisdictions of Maryland and Virginia need to negotiate and establish dedicated funding for WMATA's transit system, as other systems have to rely on.

FOURTH: During last week's three days of hearings, B/RS Members and our colleagues and leaders on the AAC's Metro Access Subcommittee described how the damages to WMATA's budget can threaten Metro Access services. As just one example: Any Metro Bus routes eliminated will cut back on the geographic scope of the areas where Metro Access vehicles now travel to pick up wheelchair users and other persons with disabilities heretofore served by those vehicles.

Please, I trust that you Board Members and top staff will take care to ensure that such cutbacks in WMATA's Metro Access services will be minimized no matter how much damage is sustained due to any WMATA budget shortfall that remains this coming July 1st.

Revised Testimony First Presented at WMATA headquarters, Feb. 27, 2024

HEARING TESTIMONIES

Metro Hearing #655

Dockets B24-01 and B24-02: FY2025 Proposed Operating and Capital Budgets and FY2025-2030 Capital Improvement Plan

Silver Spring Civic Building at Veterans' Plaza

Silver Spring, Maryland

February 26, 2024

1. Montgomery County Council Member Evan Glass

Good evening, Commissioner Drummer, nice to see you, nice to see, uh, our WMATA officials. And most importantly, it's nice to see everybody who's joined us this evening. I'm Evan Glass, I'm a member of the Montgomery County Council and I chair the Transportation and Environment Committee. And I know how important our Metro system is, not only to the residents of Montgomery County, but to the entire DC region.

The Metro system is one of the world's greatest public transit systems, and that requires investment and care and we need to continue providing our system with all of the efforts that it needs. Not only to get all of us around on a daily basis, to work, to school, but also to accommodate all the tourists we have from around the world.

Now, before I continue, I want to say thank you to Governor Wes Moore, who was the first statewide leader in the region to pledge Maryland support for this system, offering \$150 million, which has been matched and then some by Governor... Mayor Bowser in the District and I know that all eyes are watching across the Potomac to make sure that our friends in the Commonwealth step up as well. But this is a regional system that requires regional action and support. And I am proud to pledge Montgomery County's support and the State of Maryland's support to do what we have to do to get people moving throughout the region.

I want to provide some data points with regard to the Metro system and our sister system in Montgomery County, our RideOn system, which takes about 58,000 people around our county on the buses, many of which end up on Metrorail or even on the Metrobus itself. But, when we talk about transit, it's not only about getting to work, getting to school, and doing what everyone has to do in their daily lives, but it's also about equity. With regard to the RideOn system here, because those are the statistics I have, here in Montgomery County, the average household income is approximately \$110,000. And the people who ride on Metrobus every day, have a household income of one-third of that, \$35,000. So when we talk about public transportation, yes it is regional connectivity, but it's also about equity, making sure that people who depend on it, who don't have cars or choose to live the car-free existence, have the opportunity to get where they need to go in a, uh, fair way.

Bottom line here is that we need to make sure that our Metro system remains safe, remains frequent and remains affordable. We live in a beautifully diverse community, we have some of the highest car-free rates, not only in the region here in Montgomery County, but across the country as well. And the way that we'll maintain that and the way we'll maintain equitable policies and the way we will get to our carbon-free goals in the near future and make sure that we have a sustainable environment is to continue to support public transportation.

And I will just share with everybody who's here in the audience – it is wonderful to have you all here for this regional conversation. I welcome you to come to Rockville as well, because we will be taking up the County's budget in the coming weeks and public transportation is an important of our county budget as well. So I look forward to hearing from you in Rockville, thank you all for your service and let's continue making WMATA, Metrorail and Metrobus a world-class public transportation system. We know it is and will remain, so, thank you.

2. Michael Goldman, Chair Washington Suburban Transit Commission

Thank you Director Drummer. For the record, my name is Michael Goldman and I am Chair of the Washington Suburban Transit Commission this year. It's an honor to follow my colleague from Montgomery County, Evan Glass, in testifying before you this evening.

2

As Chair I am speaking tonight to express our strong interest in the policy issues affecting Marylanders, in WMATA's FY25 budget. Thanks to Governor Wes Moore's leadership and the leaders in the District and Virginia, there will be, as pointed out, \$450 million in additional subsidy to help solve the fiscal crisis for FY2025.

The General Manger's revised budget proposal for this '25 fiscal year, released in late January, incorporates this additional funding. In our view, the additional subsidy resolves major service reduction risks that were in the original General Manager's budget, including Red Line and Silver Line turnbacks in Maryland, cuts to Metrobus routes in Montgomery and Prince George's County. So, I'd like to thank Governor Moore and Secretary Wiedefeld' s leading position in this important funding discussion.

The additional funding, to be sure, will increase Maryland's FY25 operating subsidy to an astonishing \$638 million for the year. But, with the \$450 million in added funding, WMATA proposes to close the FY25 \$750 budget gap through very modest changes in service, fares, and fiscal policies. As a result, the FY25 budget negotiations, in our opinion, seem close to being resolved.

But, we know two ongoing areas of concern that need to be resolved. The proposed subsidy totals for each jurisdiction are not consistent with WMATA's current subsidy formula. If the District's \$200 million remains the upper limit, versus Maryland's \$150 million, total subsidies are likely to decrease by \$17 million. In addition, WMATA's assumption that all represented employees will see zero raises in FY25, is inconsistent with past negotiating history. The Commission expects that some of the assume \$38 million in labor savings will not be realized. The Commission recommends, therefore, that additional dollars needed for these items for FY25 be offset by additional Preventative Maintenance transfers instead of further service or fare changes.

Also, the WSTC recognizes that many of these fiscal challenges will affect the region again for the FY26 budget cycle as well. Specifically, we continue to oppose Metrorail turnbacks in Maryland, any station closures, MetroAccess eligibility changes, bus service reductions and fare increases for our long-distance commuters. Now, regarding the capital budget, the Commission emphasizes the need for new funding sources starting in FY29, which is when the 2018 dedicated funding bonding capacity will be exhausted. The WMATA capital budget needs to focus, in our opinion, on essential state-of-good-repair projects in light of that fiscal constraint. WMATA should consider delaying new capital projects, including the 8000-series railcars and the zero-emission bus conversion in light of that restrictions. There is clearly a need for longer-term solutions to WMATA's operating and capital budget funding needs. The Commission encourages WMATA, the State of Maryland and our regional partners to identify a solution and implement it in 2025. Thank you for your time.

3. Ben Ross

Good evening, I'm Ben Ross, I'm Chair of the Maryland Transit Opportunities Coalition, which is a statewide coalition of transit riders, transit advocates and transit workers. I'd like to say that Metro is in danger. We have a new budget that puts off the worst, the really deadly cuts that were first proposed, but it only really provides a little more than half of the money to fill the gap. And the rest of the money is provided by kicking the can down the road, and creating a problem that's coming in another year, two years, three years. And Metro is too important to do that.

Metro is the key to the Washington area's and especially Montgomery County's and Prince George's County's economic advantage. If you look where the investment is, it's at Metro stations. And we have this great opportunity coming with the Purple Line and we're very glad that MDOT has made progress in expanding MARC service. So, we have the chance to have this countywide transit network, but you have to run the service to take advantage of it. And we need to fill the whole gap. This is just not enough, the \$450 million. And you up here, this is not your doing. I know that you would love to have more money. It is the doing, at this point, of the legislature. Maryland state So. what we at Transit Opportunities Coalition and our Montgomery County affiliate, Action Committee Transit, what we are doing is urging everyone to write to their state senator and ask that... tell them that the \$150 million is not enough to get us to where we need to be. We need more money; we don't need to kick the can down the road. This is the key to the livability and the economic success of Montgomery County. So, I would urge everyone in the audience here to take this flyer and click on this QR code and sent a message to your state senators... they are the ones that have the money, not you three, and tell them to fully fund Metro. Thank you.

4. Patrick Sheehan

Thank you very much. My name is Pat Sheehan, I am the Chair of the, Metro's Accessibility Advisory Committee and I would like to focus on people with disabilities as the constituent group that we serve. We have stated three or four things that I think are critical. One is, rather than focus on the "doomsday budget" which is going to impact so many people, we want to see Metro fully funded. If the doomsday budget or fiscal cliff comes into effect, 9,000 of the 36,000 people that ride MetroAccess will lose service. These people don't have the option to get on a bike or get in their car or whatever else. MetroAccess is their safety net and there are no other options for this group.

So, I am encouraged to hear that the service area for MetroAccess, under the revised budget, will be kept. And I think that's important. These folks need to get to dialysis, they need to get to the doctor's, they need to get to grocery stores, and entertainment, and church. And you can't take that away from them. The service hour needs also to be kept so you don't have holes in the middle of your service. It is a very critical function for this group of people.

We have talked with the disability community in DC, and in Maryland and in Virginia, and they are coming out and letting folks know that for them, the transportation, Metro service, particularly MetroAccess, is something we need to keep, we need to keep intact; we need to run it with the same, in the same service area and with the same schedule as we currently have. We also understand that the multi-year budget is going to be critical and we are happy to work with members of the Board to be able to influence that as best we can.

Thank you very much for allowing me to testify and thank you for working with the disability community to support them and keep that safety net for MetroAccess. Thank you.

5. Joel Ryerson

Good evening, panel. My name is Joel Ryerson. I've been utilizing the system for 45 years, and it's the only... it's the lifeline for everybody, me and my fellow ridership members. I hope they don't cut the bus service out. They have a proposal on the C8, on the 70, I hope they don't do that. I use it to go to the University of Maryland, different meetings, my work...and I don't mind paying more, but don't cut the bus service or the train services.

The budget and the capital budget - I'm glad about the governors and the mayor of DC - hope they help you out, having that budget. Thank you, have a good evening.

6. David Owens

Good evening to you all. My name is Dave Owens, I'm a resident in Fort Washington, Maryland. So, your budget proposal, which focuses on rate hikes and service reductions and the need for a long-term dedicated revenue source is predictable, and I say it's predictable because the system currently ignores a large swath of the DMV right now. I'm a Southern Maryland resident, and as a Southern Maryland resident, it is difficult to ask me to advocate for something that, in my opinion, currently is not designed to help me.

I understand it's impossible to put Metrorail service everywhere, but according to the US Census, there are close to a half-million people currently living in Southern Maryland, and yet, there is no Metrorail service near us. Instead, each day, more than 100,000, I really should say hundreds of thousands of cars, travel along MD 210 and MD 5/301. Every day. In gridlock. It results in a lower quality of life. Now, not all of these people would use Metrorail, but some would. I would. And that new revenue source could help close some of the budget deficit gaps.

I, quite frankly, am tired of hearing about funding shortages, economic development, the love of the environment, green concepts... when you come to these meetings, and we've got a large swath of people in Southern Maryland who we don't even acknowledge and we don't have a Metro there for them. And it's their job to get on buses to get to Metro station. Leaders from multiple states and the District have long believed buses are enough in Southern Maryland. It's not true. I believe WMATA should work with the State of Maryland to build more Metrorail in Southern Maryland, along MD 210 and MD 5/301. This would increase ridership, change transportation habits, balance economic equity, and help clean up our environment. We've got enough roads, we don't need more car traffic.

Finally, I want to give, I want to give the current WMATA leadership some credit, I really do. You've inherited some difficult challenges and you haven't run from them. Your CEO is on the news all the time, and I respect him for that. But bold solutions are required here. Please, expand Metrorail into Southern Maryland, despite the current budget deficit. If it takes more taxes, do it. The money we recover in the future will help make up for it. I believe that strategy will transform the system into a valued asset for all DMV residents, and it might motivate more of us to advocate for you for a dedicated revenue plan. Thank you.

7. Rob Malone

Good evening, I'm Rob Malone. I'm the CEO for the ARC of Prince George's County. Thank you for the opportunity to speak to you tonight. Let me hold it up (the microphone), because I'm probably a little too tall.

I heard about the budget proposal last week, and just hearing about it I almost had a heart attack. If not a heart attack, I certainly had heartburn. The ARC of Prince George's County supports about 350 people with intellectual and developmental disabilities. They rely on MetroAccess, which means that we rely on MetroAccess. They can't get to our services without the support system of MetroAccess.

We're also a vendor under the Abilities Ride Program, and my understanding is that if the initial cuts would have gone through, that we would have not been able to have the resources to provide transportation, to assist those people in getting where they need to go in lieu of using MetroAccess, saving you all staff and resources.

I'm thrilled today because I didn't know... I'd heard that there was some money put on the table, but wasn't sure what it was. So, I am extremely glad. I feel better already that it is not as dire as before, but I've got to tell you just seeing it and just having a gut reaction... to just know that our region would even think about kicking people with disabilities off of significant their main mode of transportation was frightening. It really was frightening. I could not believe what I was reading. So, I want to ask that you continue to prioritize the intellectual and developmental community, or the disability community at-large.

I echo and sign on to Mr. Sheehan's comments, I think they were spot on. And thank you for your leadership and support and for allowing us to have a voice this evening. I appreciate it.

8. Paul Semelfort

Evening everyone, members of the Board. I'm Paul Semelfort, I'm a member of the Accessibility Advisory Committee and I'm speaking as an individual. As we have discussed, Pat Sheehan and other colleagues after, we need to fully fund Metro. We really need, with MetroAccess, to maintain our service area, maintain the hours of service as-is, and maintain the flat fare. For people with disabilities, this is their lifeline, in terms of transportation.

You want us to be productive citizens, of this community and DMV - we don't have the options to drive or to have cars. This is quality of life for us. It's horrifying to even hear, the... utter proposal, that we may not be picked up, possibly a quarter of us, about 9000, in front of our homes to get to where we need to go safely. The possibility we can't get to work or dialysis or be picked up from those sites, to see the proposed service area map really hits a lot of the customers in Prince George's, Montgomery and Fairfax County in terms of possible cuts to service. Please don't go there with us. We are, want to be productive citizens. I am a teacher and I want to go be a productive human being and teach and inspire children. And that is it, thank you.

9. Michelle Lindsey

Good afternoon, everybody. My name is Michelle Lindsey and I'm here representing the disability community. We didn't ask to be in this position, but we are here, and we are still competent and able to go out there to fend for ourselves, to work and so forth. We need our transportation to be able to do that. We don't want to be reliant on the government to give us any handouts or anything. We are still able to work, we want to go out and work, want to go to the supermarket, church, anywhere we want to go. MetroAccess has been a source of comfort for us, taking us to and from, door-to-door, and we would like you guys to please dig deeper in funding this system so that it can stay in place for us to be able to do our daily activities. Thank you very much.

10. Debbie Brown

I'm Debbie Brown and I live in Rockville, Maryland. And I use, I'm a blind person, I use a white cane, I use Metrobus and Metrorail. When I started using the system there was no MetroAccess, so I had to learn how to use it. So, and I am out there when it is 20-degrees and pouring down rain, I've got to go to work, and I am out there, and when some of these folks are out in their cars, I'm out there on that bus and on the rail.

So, this system, and, I filled out that survey and it says, y'know, would this or that change, change your habits, and I said, well, I don't have a choice. Unless you cut the service out completely, it's not going to change my habits, because I'm going to use it no matter what it costs and whatever, because I have to if I intend to go to work and the other places I need to go like shopping and whatever.

So, y'know, that the cuts that you do, they really can, y'know – I have friends who use MetroAccess and they said after July, I don't know what I'm going to do, I can't go to work. Well, people who don't go to work don't pay taxes, rather, y'know, it is really rather foolish to cut people's livelihood out. So, when you do this, you are affecting people, and people with disabilities, contrary to what people believe, do work, so you need to be careful about cutting services to people with disabilities. And we really would like to keep the system functioning, the services that are available to people with disabilities, y'know, keep those stop annunciators working. And, so, I would like to thank you all for hearing us tonight and please consider the people with disabilities in all the services that you perform.

11. Cheryl Cort

Thank you. My name is Cheryl Cort, I'm the policy director for the Coalition for Smarter Growth. We are leading an eighteen-group non-profit coalition and teaming with the business community to support Metro funding. We want to thank WMATA for its hard work to identify cost savings and efficiencies to reduce the \$750 million operating budget gap. We also thank the jurisdictions for proposing \$480 million in additional operating funding for FY25. This includes the \$150 million promised by Governor Moore and key state legislators. But we urge our elected leaders to do more to reduce and even close the entire gap. We all know that failure to close the entire gap will mean some service cuts, fare hikes, impact on the workforce and delays to the capital program.

Metro is critical to our region's economy, access to jobs and opportunity and functioning of our entire transportation system, and fighting climate change. Transit should be our region's top transportation funding priority and more funding should be shifted from highways to transit. The pandemic and arowth in telework could undermine our region's longstanding goals for sustainable, equitable transit-oriented future. So we strongly support the agency's commitment to all-day, frequent, reliable, safe rail and bus service and simplified fare structure as the best way to restore ridership. Frequent all-day service for bus and rail is critical for all sectors of the workforce, providing access to jobs and opportunity, saving household transportation costs, attracting the nextgeneration workforce and enhancing our economic competitiveness.

Metro is key to supporting transit-oriented communities and supporting car-free and car-lite living, reducing our greenhouse gas emissions. Without additional revenue beyond the \$480 million now proposed, Metro faces hard choices. We believe service cuts and fare hikes should be minimized to the maximum extent possible; this means living with the shift of capital funds from...to preventive maintenance and delaying some capital projects. But we hope that this shift can be limited to FY25. We are urging our region's officials to come to an agreement by December 2024 on long-term, dedicated, on a long-term, dedicated funding source solution for Metro. We should act while officials are focused on the issue and CSG would like to be a part of these discussions. Thank you.

12. Rochelle Harrod

My name is Rochelle Harrod, and normally when I come to events like this, I would normally say I'm representing Independence Now where we do peer counseling and support for people with disabilities. But today, I have to honestly say I'm representing myself as an individual also because these budget cuts will affect me personally.

I've got a little story for you. So, like everyone else, I would love to see Metro fully funded. Why? Because I'm a native Washingtonian. I've been riding Metro as a person with a disability who's a wheelchair user since I was fourteen. I've been riding MetroAccess since its inception almost 32 years ago. Independence means freedom, and so if you cut the services, you will cut our independence. And just to share a little bit of my personal story - I see that some of the bus routes I used from my childhood home that my brother now lives in are being cut. The 62, the 63 and the 64 will no longer have weekend service, which means I will no longer have access to visiting my family unless I take off and visit them during the week.

And not only that, my parents live at the cutoff point between Southern Maryland and Prince George's County, and that means since the budget cuts say that grandfathered in service will be eliminated, won't be able to see my parents neither. So I support a fully-funded Metro the way it was intended to be. And as one of our consumers, Michelle Lindsey said, we didn't ask to be this way and we fight hard and strive hard to be productive, tax-paying citizens. How dare you take that away. And no, we know you're not the ones responsible, but there should be more people with disabilities behind the table making the decisions so that these cuts aren't even put on the table. Thank you.

13. Ed Gitterman

OK folks, my name is Ed "MTA New York" Gitterman. That's right, New York. Currently in Bethesda and I regret moving down here.

First thing I feel right now is that "doomsday scenario" is just another scare tactic to get the area governments to bail WMATA out of its budget woes right now and it's like about the equivalent of going to the states and even DC crying poverty, and I think what's going to happen is, is that you're not going to get totally bailed out and you're just going to slap a Band-Aid on for this budget year as well coming up which is FY25.

As far as the area itself, I believe, and I'll try and be as quick as I can, the epicenter for public transit in this area is Washington, DC. I don't think any of the suburban areas would have transit if it was not for Washington, DC, no matter who is running the transit system. However, at the same time, I want to be careful to tell you folks that this is not exactly a transit-friendly environment, and when I start hearing about gentrifications in the big cities, including New York and DC, it worries me, because you're just going to be pushing low-income people out into areas that may be hostile to transit. And I think you better be careful what you decide to cut out, as far as bus and even rapid transit service in the suburban areas, because I don't see any time soon you really partnering up with companies like Uber, Lyft or any taxicab service, or even changing the rules for MetroAccess as an alternative.

But anyway, that's pretty much all I can say right now since I don't have a written statement. By the way, I got junkcalled by MetroAccess a couple of days ago. Thank you.

14. Elizabeth Norman

Good evening, everyone, my name is Elizabeth Norman, I am the president, CEO and CFO of me. I am representing those of us who use MetroAccess. A couple of months ago I ran into a gentleman, and he said where he's from, that there are blind people - but they don't have canes, they don't have anybody to take them anywhere. And so I said, well what happens to them? He said, they just curl up in the corner and die.

MetroAccess is very important to those of us, as has been said, to those of us who have disabilities. It's God who adds years to our life and He adds life to our years. And I think one of the tools that He's using is MetroAccess. Unless you have a disability, you don't know what it's like trying to call somebody, saying hey, can you take me to the doctor, can you take me to the grocery store, can you take me here, can you take me there. You have no idea what it's like. So MetroAccess eliminates all of that. And we can go and do things, and enjoy, in freedom, not having to rely on anyone to take us places, and I appreciate that. I think God for that - it means so much to us. It's one thing to have to deal with a disability, but then it's another not to be able to function and do those types of things that you need to do to survive. We need to go these different places.

So, I want to first thank God for the money that came in that's amazing, that's awesome. I think God that He touched those who agreed to donate the money that has already come in. And so, since God has the answer to all of life's problems, I just encourage anybody who's a believer in God to keep praying, let God show us where the money's coming from, show us how to get the rest of the money, and how to teach those who are in charge, and those who are making decisions, to incorporate statues that Metro, the whole Metro system can run perpetually without any issues whatsoever. Thank you.

15. Denise Rush

Good evening. My name is Denise Rush and I am the Vice Chair of the AAC Committee and Vice Chair for the MetroAccess service. We need dedicated funding. Overdue, long overdue. We cannot have the service area for MetroAccess change, the hours, everything, we need it to stay the same. We do not have options to get in our cars or get on the bus, we just have MetroAccess. That's why we applied for it, we need it.

We did not ask to have a disability, but we do. And we go to work, we go to church, we go to concerts, we go eat, we live, just like everybody else. We're already disabled and now you're trying to disable us, just cut us off or eliminate service. God is not pleased with that; He will not be pleased if you do that. Please consider keeping MetroAccess as it is. Thank you.

16. Ethan Ableman

Hello, this is Ethan Ableman and I'd like to comment on the proposed fare hikes. First, if there was a choice between cutting service and raising fares, I strongly support raising fares by a reasonable amount, which I generally support the proposal of 12.5% in the revised budget. But, this does not change the fact that any fare increase will hurt and the pain will not be felt equally. If you're like me, don't own a car and rely on bus and rail to get around, a flat 12.5% increase may as well be a 12.5% increase to your transportation budget. And as you know, people without cars are more likely to be low-income and have a larger portion of their budget affected. So, while I support the fare increase, I would encourage WMATA to do all it can to divert the pain from transit-dependent riders.

I offer one small proposal which has been implemented in numerous other transit agencies, which is fare capping. The system with fare capping, if you spend a certain amount in a given day, week and/or month, future trips are free. You can think of it as a replacement for the unlimited passes WMATA currently offers. If an unlimited pass would've made sense, you automatically get it. And a recent study even suggested that a monthly fare cap led to increased ridership in two U.S. cities.

I'm sure there other fare policies you could consider to lessen the burden on WMATA's most-vulnerable users, including the transit-dependent, low-income and people with disabilities. I simply want to suggest that WMATA staff try to think creatively beyond a simple flat percentage increase when considering how to raise fares equitably. Thank you for your time.

17. Sarah Harper

Good evening, Board and everyone that has been able to be here. I think that, I've been to these hearings for thirty or forty years now and Metro doesn't really listen to any of us and they still do their cuts, but it's still important for us to be here. And what I think is very important is, is that public transportation should be subsidized, it should not be set up as a profit and loss business. We need public transportation – not all of... just everyone that's here, but all of the ones that have not been able to get here that need the public transportation.

I think that there is a different way to get more money, and Metro has not chose to do that. And that is to tax the developers on their properties. Metro gets a lot of development around the Metro stations, because then it attracts customers and attracts businesses. But Metro will not do that, and that is a source of income that's left on the table.

Cutting bus and rail will impact thousands of riders and this will create problems for them to get to work. It'll mean a drop off of customers to the businesses that have grown up near the rail stations. And I have a sign, and I'm going to show it to you guys and then I'm going to turn it around so everyone sees it. "Metro: Tax developers, no layoffs."

18. Ancil Torres

Hello? Good evening, welcome to downtown Silver Spring, essentially my backyard. I am a blind MetroAccess rider. I've been using the system now for about twenty years. And prior to going to MetroAccess meetings I was always, y'know, puzzled about why was the system so messed up. It has gotten better - amen to that. Thanks for the work that MetroAccess staff has done, I appreciate it very much. You're probably surprised hearing this from me, but that is, my life has improved because of what MetroAccess is doing.

However, my concern, my big concern is honesty in Metro budgeting. When it comes to MetroAccess priorities, Metrorail and Metrobus priorities. The reason why I say this is that WMATA asks all the stakeholders to contribute large sums of money for MetroAccess – over \$200 million. However, about 40% of that is never spent. We in the disabled community who depend on MetroAccess are underfunded in MetroAccess. So therefore we receive lower-quality vehicles, lower quality in all kinds of things they try to do for us. And that is unacceptable, because when the money is not used at MetroAccess, where does it go? It goes back to Metro/WMATA and that money is spent on bus/rail.

I don't have a problem with money being spent on bus/rail. My issue is that, why are we being sacrificed? We are being told, being advertised to the stakeholders, "Give us more money because we have to help all the disabled people." You threaten the disabled people here, you threaten them that their services are going to be diminished and fares are going to be increased. Well, don't get me started on fares. Their fares are going to be increased so that we should come cry-, so that we come crying here, "Oh, don't, don't cut the disabled, because all of this is going to happen."

Well, the truth is, and I want my blind friends on the AAC to look into this, I want Washington Post to look into this, and I would like the Government Accountability Office to look into this: there is no truth in WMATA budgeting, and the disabled are being pimped to raise money for Metro. And when we get the money, what is going on with the money? It is being funneled over to bus and rail. That is not fair, it is not right, and it must be fixed. (Microphone cuts out)... from WMATA and MetroAccess. Thank you very much.

20. Lois Staves

Good evening. My name is Lois, Lois Staves. I'm a board member of Ideas Foundation, which is a 501(c)3 in the State of Maryland. We are a support group for blind and low-vision persons. We usually have about thirty, thirty-five persons on our calls every Tuesday and Thursday. Most of the people are retired, older residents of PG County. I, myself. live in Fort Washington, have been a homeowner for forty-three years.

Life didn't start this way for most of us, y'know. Glaucoma, different diseases that have taken over our lives as we've aged. We're asked to age-in-place, y'know. I love my home, I want to stay in my home. I've raised my children, my grandchildren, now I'm working on great-grandchildren. But if MetroAccess is cut, it will make it virtually impossible for me to be there.

I want to be a viable part of my community. I go out to training centers, I go out to health clubs, I, I live life. I don't want to give up life, that's very important to me. I think that keeps us alive, living life. So I ask for all consideration for MetroAccess. We don't have the opportunity to opt for a vehicle in the driveway and the parking lot, that's not an option for us. We depend on public transportation. We depend on bus/rail, we depend on MetroAccess. I appreciate your consideration.

21. Alice Lanier

Hello everyone, my name is Alice Lanier. I'm here as a resident, I live in Bowie, Maryland. I'm listening to everyone speak today and I don't know if what I have to say is appropriate for this venue, but I'm going to say it anyway.

I joined a, a telephone, telephone conversation on Monday. It was a teleconference call for WMATA, excuse me sometimes I stumble when I speak, but anyway... and they were encouraging everyone to come to this meeting; it was encouraged to come here to voice our opinions and to pose our questions and, and have our comments. Now the thing that I, I noticed, they gave a number out, the, the, not the toll-free, the (301) 352number that we're all familiar with for MetroAccess. And you were to press number seven and the five and get a summary of where the hearings are to be held and the dates. But that's all you got. You got no information about timeframes, which is important, critical. You know why? Because I had to make transportation arrangements to get here, something that was encouraged to do on that phone call. And here I am, and my bus will be here at 7:30, I made a 7:30 appointment, or pickup time, because the telephone information that you all provided did not give that information.

So, I'm bringing this up to say this: you know, it's efficiencies like this, gaps in information, because I can only make decisions for my life with, armed with all the information provided, and if you exclude information, then my options become limited. So if you end tonight at 10 o'clock, guess what, Alice Lanier left at 7:30, because that's when her car, her bus came and picked her up.

The other thing I wanted to bring to your attention, when you're giving these meetings over the phone, it's very important, I didn't get there on-time, and I'm sure there are a lot of us who don't get where we're supposed to be on-time, OK, for transportation reasons or whatever. It would be really nice for the people who are moderating these meetings, facilitating these meetings, to give housekeeping rules throughout the process. In other words, I came in at quarter after four. No one told us how to raise our hand, if you were on the call and you were blind, because no one said it. So it would nice, periodically, throughout presentations, if the moderator or facilitator, whoever is in charge, periodically tells us how we are to participate through the process.

And, you know, I said a lot and I have more to say, but I'll come to another meeting to do that. Thank you very much.

22. Amber Woods

Good evening, everyone. First, I want to say thank you to everyone who attended this very important meeting. I think all need to be informed and transparency is definitely welldeserved. I have been a Prince George's County resident, DMV area, for about all my life, forty years of it. I became disabled in 2015, so officially this has been my battle personally.

I represent, I'm a member of the Commission for Individuals with Disabilities in Prince George's County. As well, I am the president of the National Harbor Chapter, National Federation of the Blind of Maryland. I live in Prince George's County, and I see a lot of places that are rural. And a lot people who also mentioned the grandfathering out, alarms me. A lot of our buses in our rural areas are being cut all the time and threaten to be nonexistent. Therefore, a lot of us who are in the disabilities community will no longer have access.

Another issue I have noticed is that, it was mentioned and reflected by members earlier, who had mentioned about serving in their churches, serving in their communities, I know a lot of them. A lot of them are seniors who actually put in their dues, as they say. And, I think now, they should definitely live their best lives. As well as persons with disabilities, we still, even though we have not reached that golden age of seniorhood, if you will, a lot of us have a lot to contribute, as what you have mentioned, I do serve in my community, so well. And I would love to continue to do so. So please, let us work together, the DMV. Also, I'm asking out for our legislative and also looking for more creative ways, maybe even grants, federal grants that can help in rural areas to get bus services. Thank you very much.

23. Derrick Nabors

Thank you for this. Good evening, everyone. My name's Derrick Nabors, I'm a political organizer for ATU Local 689. Local 689 represents, I'm sorry, should I start from the beginning?

Good evening, all. My name's Derrick Nabors, I'm a political organizer for ATU Local 689. Local 689 represents over 15,000 transit workers and retirees across the DC metropolitan area, including many dedicated, hard-working WMATA employees, I am one. And, as we all know, our members in our region faced unprecedented challenges over the last few years. Nonetheless, transit workers have faithfully stayed on the job and kept our region afloat, even through the worst pandemic in over a century.

Since then, we have seen reduced ridership, record inflation, increases in violence and a system pushed to the physical break, with a stated deficit hundreds of millions of dollars deep. Let me be clear, finding a solution to Metro's longstanding, systemic funding problem is essential. However, the solution cannot be, must not fall on the backs of workingclass people. It cannot fall on our members, who were deemed front line heroes, additionally it cannot fall on the working Washingtonians who need reliable service to pick up their kids, to get to work, and to navigate this great city.

And definitely freezing wages for transit workers, is a short-sighted proposal in this budget. Telling your workers their pay is frozen until further notice, in the midst of a national CDL shortage and an upsurge in violence towards transit workers, is a recipe for disaster. Newer workers will go elsewhere to find jobs and guaranteed pay raises and work more safely. Older workers will retire; you'll undoubtedly be facing a shortage of drivers, mechanics, which I am one, and station managers that will translate into service cuts for the public.

On a similar note, another proposal on the table is taking \$165 million in preventive maintenance funds to cover holes in operations. This practice is dangerous. It risks lives and the security of riders, workers and the system alike.

I'd also like to say that large fare increases will also hit working and middle-class people the hardest. We need for Metro to push as hard as it can to make sure every legislator here in Maryland knows how vital the Metro, how vital it is to fund Metro without these measures. Local 689 runs a worldclass and vital public service, let's fund it accordingly.

I have given 264 months of my life to Metro, I've ridden the system since DC Transit, here's a token here. And y'know, our kids say how important it is, with the upcoming tourist season, you've got cherry blossoms, you've got the Easter season, July 4^{th} , Nats games, Caps and a Formula One race coming up this summer. So, notwithstanding the fact we have summer concerts series, which they normally keep Metro open later. (Microphone cuts out)

24. Eli Chadwick

Hello, my name is Eli Chadwick, pronouns he or they. I'd like to thank my comrades in the disability community and with Amalgamated Transit Union. I'm here today only representing myself, but I am both a person with disabilities who's not allowed to drive and a union member. I am in SEIU Local 722; we're out of Washington Hospital Center and Children's National. I'm also a student at Montgomery College.

As a member of all those groups, we need transit. We need transit that can get us places, such as to school, to work, to the grocery store, and we need a transit system that does not forget people with disabilities or forget its union workers and the raises they deserve.

For example, often times I am working on the weekends, from 7 a.m. to 7:30 p.m. and I cannot get to work. I cannot get to work because the train does not open until seven in the system designed to help morning. A transit workers. especially essential workers who cannot work from home, get to work, should allow them to get to work when they need to, including 6 a.m. shifts for our environmental services comrades, 7 a.m. for me. And the, even for example, transit turnaround on the Red Line would prevent my classmates from aetting from their homes in the District, in Montgomery County, in Prince George's County, to Rockville by Metro. And they would not be able to continue their education, they may have to drop out, continuing the cycle of poverty.

So, there are these, you can say, oh, to have this service, to have the service for my MetroAccess, my Metro transit, typical transit such as bus or rail, and to permit me to get to work, permit me to get to school, it is worth it to take funds from wherever it needs to go and put them into offering these services for people who live and work in Washington. But, we cannot forget the workers.

I had the experience of being a patient at my own hospital, our comrades in ATU are also riding their own system. They need to be able to afford to do that, afford to feed themselves, in order to maintain the system, the great system we deserve. Thank you.

25. Chris Vroome

Good evening, thank you for this opportunity to speak. For the past seven years I've been a resident of Montgomery County and for most of that time I've been a nurse working in this region's emergency departments. For the record, I'd like to remind everyone that Maryland currently endures some of the longest ER wait times in the nation.

Many other speakers at this event have spoken of the effects that these cuts would have on the disadvantaged communities. But I want to speak more broadly on the effect these cuts could have to our health care services in general. Many of our most vulnerable patients rely on the MetroAccess and Metro services in order to even get to the doctor. Many patients use the Metro service, in general, to get to the emergency room or the hospital for less-than-emergent care. Without access to these services, these patients would often, would probably have to further strain our already-strained EMS services.

Hospitals employ thousands of workers, and while it's easy to focus on the doctors and nurses, they generally earn wages that are adequate for cars, so most of them drive. I'm talking about thousands of environmental service technicians, surgical technicians, sterile technicians, janitors. These people are necessary for the hospitals to function at all and they often work odd hours and they work twenty-four hour shifts. Or they work, they work shorter shifts that revolve around the entire clock. Even, if these people cannot get to work, hospitals cannot function. Even if you are wealthy, even if you are affluential, losing the ability of many of these workers to get to these hospitals could lead to loss of services later in the night or even on the weekend. These Metro effects, these Metro cuts effect everyone, no matter where you stand.

26. Virgilia Collins

Hi, my name's Virgilia Collins and the reason why I want to keep the Metrobus and Metrorail and MetroAccess system. because, before… well, I live in Temple Hills, Maryland, which is along Branch Avenue and it's in-between three Metro subway stations and I live on five different bus lines, four of them are Metrobuses. And, before they brought the Green Line Metro where I live, I used to work at nighttime, and me and a lot of other, group of people, we had to walk from DC into Maryland, and these were people I didn't even know, and everybody just walking, because there was no subway, there was no bus to even go into DC at that time of night. So, that's one reason, so y'know, if you cut the Metrobus and the Metrorail, then I'll have to revert back to walking, y'know I walk anyway, because I don't like waiting for the bus. But I have a bad back, as you saw it was hard for me to stand up. so sometimes it's hard for me to stand up and walk, so I can't be walking everywhere like I used to when I was younger and in good health, better health, y'know, so.

And it's not just the distance, it's also the time of day, y'know. There are times where I had to catch, I caught a MetroAccess one time as late or as early as 1:30 in the morning because I went to an event, y'know, so…that's right.

And I'm just not speaking for myself, but there are other people like my sister's who's disabled. She lives in Hyattsville, Maryland, works all the way in Langley Park, Virginia, McLean, Virginia. She catches MetroAccess and I heard them talk about maybe not starting Metro, I don't know if it's MetroAccess or the buses, y'know, until eight o'clock in the morning, and she has to be there at six, so that means she won't be able to, she'll be late for work.

So, I would rather, I would prefer if you maybe not cut out the buses but maybe cut back on the time, you know how long you have to wait and cut back on some of the times, you know, twenty minutes, maybe cut it back to thirty minutes. I'd rather for you to do that than to cut it out completely. And of course some buses, they go.. I had to catch, if I had to catch a bus, if I didn't catch Metro I would have to catch, what, one bus and three Metro, two buses and two Metro trains just to get here. That's a lot of transportation, that's a lot of, you know, what you call having to transfer. So, you know, that's the reason... I can't remember everything I want to say since I didn't write it down, but that's one of the reasons why I wanted to keep, keep Metro, all three of them.

And one reason why you might be losing money is because people jumping the gates at the Metro stations, you know, so, you know, we have, we have to make up for that, so, you know, we shouldn't, we shouldn't have to, we shouldn't have to pay for what someone else is doing. Thank you.

27. Joyce Brooks

Good evening, everyone. I want to thank you for the opportunity to come to this event. But I want to say that I appreciate MetroAccess. I've been on many paratransits in differing states and I have to applaud you - anything, everything you have in life is not perfect.

But I'm going to tell a little story about myself. I had the privilege of working in the federal government for forty-two years. I started losing my sight and if it wasn't for MetroAccess, I wouldn't be able to complete my tour of having forty-two years. So I really appreciate that. As a parent, I have a son with special needs. He uses MetroAccess and that helps him with his independence.

Myself, personally, I am part of a support group with Lois Staves, Inspirational Three Support Group. We have had that group, next month's will be ten years. Our people, our blind community, depend on MetroAccess. We do not need any cuts, any shortage of buses. I am one of the ones, then been, being privy to, being grandfathered in and I love it. And then don't mess with that. And also, I would like to say, do not strip us of our independence. Do not take away our hope. If you strip us of our independence, what do we have left? Everyone has said here, we enjoy going to plays, we enjoy going out, we didn't ask for this. Please, I'm begging you, do not strip us of our independence! Do not do that! Thank you.

Metro Hearing #656

Dockets B24-01 and B24-02: FY2025 Proposed Operating and Capital Budgets and FY2025-2030 Capital Improvement Plan

Metro L'Enfant Headquarters

Washington, DC

February 27, 2024

1. Fredrica Kramer, ANC 6D07

Thank you. Good evening. I am Fredrica Kramer, Advisory Neighborhood Commissioner for ANC 6D07, and Chair of ANC 6D in Southwest Washington. I'm testifying today for 6D07 on the potential loss of the 74 bus to residents and communities, commuters in my district. My Single-Member District runs south from M Street SW to, to and through Buzzard Point, to the Anacostia River and the 74 provides the only bus service to that community.

Buzzard Point is a peninsula, squeezed between South Capitol Street, the Potomac River and the Anacostia at its southern end. It was mostly a forgotten industrial zone with a few government buildings until Audi Field was built. It's now home to the DC soccer team, DC United, 1500 new residents, another 1100 almost online and another 2000 designed. approved, and awaiting construction. That's nearly 4000 units, that's just the units, not the multiples of people who live, or who already live or will live in them, and will be at least 6000 when redevelopment of Buzzard Point is done. It may be even more if planned office spaces change to residential as developers rethink their post-pandemic landscape.

Just north of the, this massive redevelopment is Old Southwest, with three public housing complexes, many low- and moderate-income households who rely the 74 to get to shopping, work and other parts of the city. There are also

three buildings, one massive, and two with 100% affordable housing, just north of Potomac Avenue, two others are about to break ground. There may be an implicit assumption that the new residents who will make Buzzard Point their home won't need the bus - they'll have cars, they'll use Metro or their bicvcles - not so. Buzzard Point is about a mile from both the Navy Yard and Waterfront Metro stations, the bus is the way, is the way one with mobility issues, whether personal or strollers or others, can get close to transit and home both ways. Garage parking is extremely limited and expensive and street parking is typically metered twenty-four hours. The new residents are not all moneyed, which is exactly the kind of iconic demographic diversity that our Southwest Small Area Plan has triumphed, now part of the D.C Comp Plan and it aims to preserve and that we and our ANC have fought to preserve. And multiple means of public transportation is the glue that holds it all together.

Restaurants are not the, residents, residents are not the only ones who use the 74 in Buzzard Point. Over 300 construction crew typically work on a building daily; there are three going up now. Others come daily to D.C. Central Kitchen which has moved its entire headquarters, catering operation and training center to Buzzard Point. There are three new restaurants in River Pointe, 2121 Second Street, that bring workers, first construction, then staff and then patrons. Eagle Academy Public Charter School is in the Watermark at 1900 Half Street and of course thousands attend games at Audi Field.

My focus today is on the residents and daily entrants into Buzzard Point. I've not focused on the other fully half of my constituents in Carrollsburg II complexes, River Park, the Valo, St. James, Fort McNair, who may ride the 74 to points north and east. Those closer to the Metro but with, with frailty or compromised mobility find the Metro problematic and the bus and Metro drivers a willing and necessary assist to get to and, to, on and off without risk or injury.

WMATA may claim that the 74 has met with so many challenges from ongoing construction or soccer games at Audi that periodically create route changes and challenges to the

drivers; I get emails daily about missed, missed buses, and have been in an ongoing meeting with WMATA, one of the developers and construction teams to craft a viable solution to the interruptions. I thank WMATA's Bryant McClary and the team for their diligence. We think we have a solution. Their persistence in trying to find a strategy for continued service of the 74 is testament itself to their understand of the critical need for that line. I understand Councilman Allen has gotten a commitment from WMATA to continue service in this coming budget. I also understand the 74 has been and continues to be a target for elimination with each budget cycle. We've done our part, the developers have done their part, your staff has done its part to facilitate continued service and to help WMATA understand the critical importance of the line. Metrorail and bicycles are no substitute for surface bus, bus service. To repeat the 74 is the only public transit to serve this peninsula; it's time WMATA could do its part to understand its role to, and commit to making the service a reality. Thank you - I thought I rushed through it the best I could.

2. Travis R. Swanson, ANC 7B03

Good evening, esteemed members of the WMATA Board. My name is Travis Swanson. ANC Commissioner for Single-Member District 7B03 in the Randle Highlands community east of the Anacostia River. I'm also the Chair of ANC 7B's Committee on Transportation. I'm here today strona to express my opposition to the Proposed FY25 service cuts in ANC 7B. Please note my testimony reflects my perspective as the Commissioner for 7B03 as well as the Chairperson for the ANC 7B Committee on Transportation; it does not necessarily reflect that of the Commission as a whole.

I'd like to draw your attention to several critical concerns related to the proposed service changes that will have a profound impact on the daily lives of ANC 7B residents. Ending bus Routes 32 and 36 at L'Enfant Plaza rather than the Foggy Bottom Metro station or Potomac Park, would require riders to transfer to the Metrorail station, significantly increasing both their commute times and cost. This additional expense places and undue burden on residents of ANC 7B, forcing many of them to make multiple transfers to reach their final destination.

The proposed elimination of Route M6, with suggested alternates as Routes 32 and 36, leaves a substantial number of residents without service, particularly concerning a stretch of Pennsylvania Avenue between Southern Avenue and Branch Avenue, where the M6 route is the sole option for reaching the Potomac Avenue Metro station. This leaves a noticeable void in the service area for residents who live east of Branch Avenue off the Pennsylvania Avenue corridor. And, this is because they are suggesting the 32 route and 36 as an alternative, but the 32 turns onto 25th Street, the 36 turns on Branch Avenue, leaving the M6 the only one continuing east on Pennsylvania Avenue.

Ending Route V4 at the Potomac Avenue Metro station instead of continuing on to the Navy Yard station will impact residents of 7B who rely on this route to access essential service such as jobs, entertainment and medical care in the Navy Yard community. Additional routes in ANC 7B slated for elimination are Routes A31, A32, D51. S35, V4, W3 and W8, all scheduled for elimination, directly service 7B and affecting our residents' mobility and access to essential services.

I also have concerns about the fare model shift. The proposed service changes seem to signal a shift towards a system where buses would primarily transport individuals to Metrorail stations versus to their final destination. This approach raises concerns for me, especially given the fare model used in Washington, DC where trains cost more than buses, versus a model like New York City uses where buses and trains are the same price and it's a free transfer. Wards 7 and 8 currently have the lowest median household income in District as well as the lowest car ownership rates in the District and they will be disproportionately affected by these changes.

Next, I'd like to address historical assurance discrepancies. Previous assurances such as those made when Routes 30N, 30S, 34 and 39 were cut have not proven accurate. ANC 7B has experienced decreased services, longer wait times, disrupted commutes, contradicting WMATA's earlier promises. WMATA

assured us that the impact of cutting Route 39 would be minimal, emphasizing that Route M6 would seamlessly fill the gaps on Pennsylvania Avenue east of Branch Avenue. However, it's disconcerning to observe Route M6 under consideration for elimination without any viable alternatives. Similarly, when Routes 30S and 30N were cut. we were told that accessing Georgetown, Glover Park and Friendship Heights would remain easy through a smooth transfer alternative by taking Routes 32 or 36 downtown and transferring to Routes 31 or 33. However, the current proposal lacks overlap between Routes 32, 36 and Routes 31, 33 leaving our community without the promised connectivity. Furthermore, the assurance that frequencies on Route 32 and 36 would be increased to tenminute intervals after Route 34 was cut seems to hold true only where these two routes overlap, which is almost exclusively west of the Anacostia River; there is exactly one stop east of the Anacostia River that is served by both before those routes split.

Over the years, Ward 7 has been consistent, has been consistently assured that proposed changes would have minimal impact. However, the stark reality contracts, contradicts these assurances. Instead of experiencing minimal disruptions, our community has witnessed decreased services, resulting in prolonged wait times and extended commutes. Adding to the distress, alternative services implemented in response to past cuts are now at risk of elimination.

In conclusion, I strongly urge the WMATA Board to reconsider and outright reject these proposed service cuts. The residents of Wards 7 and 8, already grappling with social, socio-economical challenges, should not shoulder the burdens of these aggressive changes. It is imperative to prioritize affordable and efficient transportation options that cater to the unique needs of our community. I appreciate your attention to this matter. I do have a written copy of my testimony today for your records and welcome any questions. Thank you.

3. James Nash, ANC 3/4G03

OK, thank you for this chance to talk to you. My name is James Nash, I'm ANC Commissioner for ANC 3/4G, Single-Member District 03, and the Chair of the Emerging Transportation Committee in our ANC. I am here representing my views only, and not those of the Commission as a whole, although I think they would probably all agree with me, but...

OK. My first view is to object to the elimination of the M4 bus. We lost the E6 recently and we're still reeling from that. That happened during the pandemic and many people are still upset about that. The M4 would create a bus desert in the Barnaby Woods community particularly; that is a place with no bus service and several, probably two miles from the nearest Metro station. And I know that equity is a factor in determining what routes are to be cut, and that may hurt people in the Chevy Chase area and we are perhaps seen as over-privileged. However, I think equity should also have a geographical component, and when there is no public transportation at all, for miles, that is un- inequitable. And I want to remind you all that many people living in our area are senior citizens or disabled and are unable to drive, even, whether they can afford it or not isn't necessarily so crucial.

My second point is to protest, or, rather object to the proposed reduction in service on the Connecticut Avenue line. the L2. As many other people have said, this would require people to transfer from the bus to the Metro at Woodlev Park. And there are two problems with this: number one, the added expense and time and trouble, if you are elderly, getting off the bus and onto the Metro, especially at night, is hazardous and problematic. And number two, Metro, as I'm sure you're aware, turns west after Van Ness, and so, if you take the Metro, you're not going to end up on Connecticut Avenue anymore, you're going to end up on Wisconsin Avenue, and that's a long way from Barnaby Woods, that's a long way from where I live. So, you know, the bus goes up Connecticut, Metro, the Metrorail does not, so that is a dumb thing to do in my opinion, it's going to hurt people who live in Chevv Chase. And that's it. Thank you once again for giving me the chance to tell you what things are like in Chevy Chase.

4. Rhonda Hamilton, ANC 6D08

Good evening, everyone. My name again is Rhonda Hamilton. I represent 6D08, which includes our residents along Delaware Avenue, my Single-Member District extends all the way down to part of Buzzard Point which I share with Commissioner Kramer. She did a good job outlining the concerns for the loss of the bus. I understand that we're going to have the bus extended because of our Councilmember's efforts for another year.

I was a part of the original team of community leaders and members who worked with WMATA on introducing the 74 bus to the community, which was many years ago. It was designed to be a neighborhood-serving bus and we need that bus to be kept fully operational. We have grown tremendously since we've introduced that route, you know, we have two major stadiums. Most of the residents that I represent live in either public or subsidized housing; they're very dependent on the bus. They need the bus to get to or from school, a lot of our schoolchildren depend on the bus; it's their school bus, it's how they get to school. A lot of our seniors are aging in place, they've given up their cars. So, they need these bus routes to get to and from their medical appointments and it also continues to keep their sense of independency, because they can get to, in and out of the community.

The bus has played a vital role in our community; it has enabled us to be able to get, also to and from the Metro and different places. And one of my colleagues had mentioned that you all designed a lot of the bus routes to get to and from the Metro, however, they do need to be destinations, people want to get home. I grew up in the city and that's how we got around, we got around going on the bus. You know, I caught the Metro very later on in my life, but I was very dependent on the bus, and a lot of my constituents are. And so, my plea for you is to allow us to have this bus beyond just one year. Every year since this bus was introduced, we're always fighting to keep it. We have lost more than we have gained with all of the new growth and development; we have not received the necessary services and support to allow our community to continue to grow and thrive, and transportation, as you all know, is critical to that. In my opinion, we should be sitting down with you talking about ways that we can extend our bus service and to make it better and more improved to service the community, and not be pleading and begging and asking for it to be extended every single year. We receive very consistent service with the 74 bus and also the 52 and the P6 bus; we need those buses. But at the same time, it's very difficult for us when we come and we're faced with losing that, because we lose a lot with that. People lose their ability to get to and from the critical places that they need to get to.

And so my hope and request to you is to please extend this service, keep the Delaware Avenue loop. One of the things in the proposal is to eliminate that Delaware Avenue loop. That's where a lot of our seniors are, that's where a lot of our children are. If you eliminate that route, you take that bus away from them and they have to walk two and three blocks over, and that's a concern. Safety is critical. A lot of times the bus routes are, unfortunately, they may not be well-lit, along the route, but if you have a bus that's close to where you are and you can get over, get off and dash into your home or just walk across the street, that's a benefit. So, I'm just hoping you will continue to keep our buses for our workers. Our workers need to get to... there's a, we're a destination, so a lot of visitors come in the community and there's no place to park. But most importantly, we need to just be reassured that we can continue to get in and out of our community because none of us want to be locked into our community and a lot of us, physically, cannot walk ten and fifteen minutes to get to a Metro. And then sometimes when you get to a Metro, having to access it, to do downstairs, imagine people in walkers and wheelchairs, they're having to try to get to a Metro or being dependent on their loved ones to take them somewhere because they don't have a bus that services them.

So this, to me, is a critical issue, and we just ask that you continue to work with us and continue to have our bus, the

74, again the 52 and the P6, but most critically, this bus is needed because it's the only bus that services this end of our community, so please continue to help us to keep it, not only this year, but years to come, for the hope and the sake of the community, because we need it.

5. Mike Golash

Good evening. My name is Mike Golash, I'm a former president of Local 689, I'm speaking here tonight on behalf of Local 689. Local 689 represents 15,000 transit workers and retirees across the DC Metro area, including many dedicated and hardworking 9000 WMATA employees

a]] know, our members, and reaion faced As we our few unprecedented challenges over the last vears. Nonetheless, transit workers have faithfully stayed on the job and kept our region afloat, even though the worst pandemic in over a century occurred.

WMATA provides an essential service to the region. Its services promote development, help businesses prosper, reduce congestion and pollution, and transport hundred of thousands of workers to their jobs every day. We often characterize the payments by the local governments for this service as a subsidy; this is wrong. The payments are made for a service which adds value to the region; to provide a safe and reliable service which the region demands and Metro is striving to provide, provides, and provides cost money.

What is the most efficient way to provide additional revenue for the Authority? One proposal is to raise fares. This is will lead wrona. It to fewer riders and place а disproportionate burden on low-wage workers, particularly those that are not eligible for SNAP benefits. A better approach is first to fight for a federal operating payment. The federal government encourages workers to ride this system; the federal government should be billed for the difference in fares paid by the government workers and the true cost of the service that we provide. Second, there needs to be a tax on development and businesses that benefit from the services that Metro provides. Dr. Green at Howard, who will speak later, the Northern Virginia Transportation Con-Committee, and others, have studied the value-creation over

the years, and it amounts to billions of dollars. The local governments need to pass legislation to capture some of this value on a regular basis.

Let me be clear, finding solutions to Metro's long-standing and systemic funding problems is essential, however, the solution cannot and must not fall on the backs of workingclass people. It cannot fall on our members, who were deemed front-line heroes. Additionally, it cannot fall on the working Washingtonians, who need reliable service to pick up their kids, to get to work, and to navigate the city, this great city.

When Metro was created in 1973, the vision of the future was one of a unified transit system. That vision broke down almost immediately with the creation of RideOn. In the 1970-, 1990s, with the Regional Mobility Panel, more steps were taken to balkanize the bus system. As this was created, many inefficient and duplicate services. As we move forward with the idea of better transit systems, we need to return then to the original vision of one unified system, meeting the needs of all residents in the DMV. We live in one... there is no excuses for not improving our transit system. Thank you.

6. Jake Goodman

What you see in this bag, tonight, is a bunch of brochures that we have been passing out for the past, past few weeks, regarding the situation that is happening here tonight. The situation that has been threatening this area for quite some time with drastic \$750 million budget cuts.

My name is Jake Goodman, and I'm with the Action Committee for Transit. Part of what you're about to hear right now, is part of our, of our testimony, but then a part if that is also my own... information.

So, I'd like to remind everyone that we talk a lot about fare evasion in the Metro system, but, in reality, the biggest fare evaders, not many of them are here tonight, are the representatives of the Metro-, are the Maryland, D.C. and Virginia government. They need to pay their fair share in order to keep this system running, because we all love Metro and we want to see it thrive. What is already being offered is simply not enough. There needs to be pressure to have more of the budget be covered by them. I encourage everyone to scan the QR code – if you don't have this already, please see me after – because I encourage everyone to talk to their Virginia delegates or Virginia senators, talk to their Maryland senators, talk to their D.C. councilmembers about what is going on here, and get them to take action, legislative action. Also, because reductions, at the end of the day they are the only ones who can fix this. Reductions in service will only make things worse here. We cannot, I repeat, we cannot be closing at 10 p.m. every night, closing stations, ten stations, that is unacceptable, we cannot, should not even be closing one. And we should also be having more frequencies. Lower frequencies is unacceptable and will lead to low ridership.

We need to raise parking fares, to utilize local bus, to encourage people to utilize local buses more. We should have more local buses in operation, more bus-, instead of cutting lines, we need to have the buses running. Because what we're seeing here is just unacceptable, and the only people who can change it are in the Wilson Building, in Annapolis and Richmond, and we need to do everything in our power to change it. So, I encourage you, if you are, if you don't have this already, please talk to me after this meeting. And also, I am happy to provide the testimony I have provided here in an email if anyone needs it. Thank you, everyone. And, also, vote for me for state delegate in 2026, from Maryland.

7. Mike Litt

Hi, my name is Mike Litt. I am a car-free Metro rider and the Chair of the Sierra Club D.C. Chapter Sustainable Transportation Committee. I'll walk through the main points of our more-detailed comments, starting with Metro's budget shortfall.

Metro is critical to having a climate-smart transportation system here in the DMV. Metro must be fully funded; as a priority, it should be. The proposed budget would instead gut our transit system. We appreciate the revisions you have made in light of commitments so far from Maryland, D.C. and Virginia. However, there would still be some service cuts and hundreds of millions of dollars in annual transfers from the operations budget to the capital budget which would cut into critical infrastructure projects to ensure Metro's safety, reliability and sustainability. So, we urge regional leaders to shift funding away from highway expansion to fully fund the remaining gap in Metro's budget.

Sierra Club is part of the "Fund Metro Coalition," which has also called for solving the lack of adequate, long-term and dedicated funding, once and for all, by the end of this year.

I'll note one line item - we ask that Metro reconsider replacing cloth seats with vinyl seats, as vinyl has been reported to release elevated levels of vinyl chloride, a known carcinogen.

On to service improvements. We applaud Metro and its staff for tremendous service improvements in the past year that have helped increase ridership more than 30%. To expand it even more, we support expanded weekend Metrorail hours and also encourage Metro to work towards systemwide highfrequency service, defined by Move DC as at least every five minutes for rail and at least every ten minutes for buses.

On to safety. We are concerned that customer assaults in Q1 FY24 more than doubled compared to the same period in FY23, and that bus customer injuries spiked in September, double the normal occurrence in a month. The final budget should note all projects that are expected to help meet the, meet different safety targets.

On to electrification. We applaud Metro's progress in the past year toward transitioning to a zero-emission bus fleet, which it should not delay. We appreciate that Metro has committed to continuing modernization of the Bladensburg and Cinder Bed bus garages and opening the Northern Bus Garage as Metro's first all-electric bus facility. As a Sierra Club report shows, there would be a savings of at least \$350 million over a fifteen-year time period if 50% of Metro's fleet were electric. And finally, we'd like to know the timeline for the release of Metro's Sustainability Action Plan and decarbonization strategy, and the progress that's been made towards sustainability targets in Metro's Strategic Transformation Plan. Thank you.

8. Bryson Kloesel

Members of the Board, I stand before you today deeply concerned about the proposed budget adjustments for Fiscal Year 2025. The \$750 million budget deficit facing WMATA demands decisive action, but the current strategy, marked by severe service cuts, fare hikes, and the reallocation of capital funds threatens the fabric of the transit system and the community it serves. Specifically, the proposed service reductions impacting Foggy Bottom, a vital hub for students, health care workers and government employees are particularly alarming. The area, serving as a link to George Washington University hospitals and numerous federal agencies relies heavily on consistent and efficient public transit. The reduction of routes here are not, not only hinders the daily commutes of thousands, but also affects the broader economic and social fabric of the community.

The proposed 25% fare increase and 20% parking rate hike, while financially justifiable on paper, neglect the broader implications on accessibility and affordability of public transit. The introduction of Metro Lift in 2023 was commendable and, was a commendable step in supporting lowincome residents, yet the significant fare increases will inevitably erode the progress, making it harder for many to access essential services and opportunities.

I urge the Board to consider alternative solutions that balance fiscal responsibility with the preservation of services. includes additional essential This revenue services, additional revenue sources, enhancing efficiency without compromising service quality, and advocating for increased support from federal, state, and local governments. The choices we make today will define the path of public transit in our region. Let us choose the path that upholds our commitments to providing safe, reliable and accessible transportation for all. Thank you.

9. Rodney Green

Good evening. I'm Rodney Green, I'm a professor of economics at Howard University, and happy to be here to talk to you about Metro. I wrote a book about Metro, about its, about the development possibilities for its subway stations, back about thirty years ago, and I've also conducted a study more recently about the need for a windfall value-added tax on land near Metrorail stations, in order to finance, in order to finance Metro.

\$750 million, you know, that's just a little bit more than Donald Trump has to pay, right? But you know, we have a lot of Donald Trumps right here in Washington, D.C. We have billionaires in this town, and they can pay. Now, I don't know if we're able to make that happen, but I think we should bear in mind that this is a serious problem facing the entire city. I have a copy of the study if anybody would like to see it. OK, well, I can send it around, too – and it's just a, a small pilot project we did some time ago.

Now the question is who should pay for this \$750 million as well as for the dedicated funding of Metro? Well, I think that the people who benefit the most from it – those are the rich people, those are the developers, those are the sports teams owners, that makes millions and millions of dollars, practically every week, from Metro's access availability. But the reality is that we live in a vastly unequal society. We have a society where the burden of financing most government activity comes down on those least able to pay, the working class, especially Black and Latin workers, and it also, also the disabled and those who are facing all kinds of other problems with their mobility. Metro workers are part of that, are a key part of that working class, as well as the workers who ride the buses every day to get to work, and, or take the subway. These are the very people who've been hit the hardest by the recent economic crisis, the 9% inflation that we had recently and so on.

Yet in this capitalist society that we live in, it's the rich that hold the political power. And they won't give up a dime without a fight. Again, take a look at Donald Trump. What this means is that it's going to be a fight. And that means that you, the Board, as representing the Board, should take that fight to the various jurisdictions to insist that they figure out a way to make the rich pay. If you don't do that, then I think other side of it is, that the working class will respond itself, in fact there should be more resistance to any kinds of attacks on them. We see resistance as rising; strikes in Loudoun County, Fairfax County, the Circulator and MetroAccess are a mere taste of things to come, as a new 689 contract comes up this summer. Don't attack 689, don't attack the workers by abolishing routes. And the main thing is…if you sow the wind, you will reap the wheel, whirl-, whirlwind. I had a great ending there. Thank you.

10. Thomas Mangrum

O.K. I'm Thomas Mangrum, Access Chair of Project Action and I serve on the WMATA advisory board. I'm here to talk about the buses and MetroAccess.

With MetroAccess, for the services y'all have going out into Maryland and the buses stop running early out there, for the buses that going to be still running. Don't assume that people with physical disabilities just work during the day. So you got some people that got subscription trips, that work at night, get off of work late at night, when the buses done stop running, because now, with the budget, when the buses stop running, that's when MetroAccess will stop running. So, if they stop running in some places at six, or seven o'clock, that's when MetroAccess stop running. So, you need to let people know, that have subscription trips now, that they might need to talk to their boss so they could adjust their working time. Because when you have a disability, it's hard to hold onto a job or what have you. Because like, the least little thing can take your job away, the weather, snow. People get fired because they can't get to work in the snow.

So, and then with Metro and then with the bus routes they is going to cut, make sure you have something covering, covering them signs, because you still want to have the Metro sign there, although the bus is not going to be running there, because you don't want people waiting outside for a bus that's not going to show up, you see. So, make sure you have something like that set up. And also, for the subway stations, any changes y'all going to do, make sure the security knows about that. Because especially for those of us that deal, that, have used mobility equipment, like myself, experience a station, L'Enfant, where security didn't know where I could go to get out, or what have you, so sent me to a side where you can't use it, but it had a gate for wheelchairs, but it was going nowhere, or what have you, so security, Metro security didn't even know. And then you've got signage leading people to the wrong area, what have you. So, make sure y'all, straighten out that, also, because when you got people with mobility equipment, (inaudible) our chairs don't run forever, people can't walk forever, so they need to know what is the quickest way to get out. So please let people know about these things. Thank you.

11. Judith Farley

My name, my name is Judith Farley. I live in Southwest and belong to the Waterfront Village, a neighborhood organization which supports residents, age sixty and older, who live in Southwest and Navy Yard. I am testifying tonight to stress that Metrobus Routes 74, P6 and 52 are lifelines for our Southwesters, many of whom have no cars. These routes must stay in operation.

Statistical analysis and anecdotal evidence demonstrate the dangers of isolation to this aging demographic. Our residents, especially those in Old Southwest and Buzzard Point, use the 74 regularly for medical and dental appointments, the MLK Library, Smithsonian museums, the National Archives, convention center, restaurants along 7th Street NW and Chinatown, to shepherd grandchildren to and from school, and even to WMATA hearings.

The 74 stops at our village office, Arena Stage, Nats Park, Safeway, St. Matthew Lutheran, St. Augustine Episcopal, Westminster Presbyterian, Christ United Methodist, St. Vincent de Paul Catholic churches and the Buddhist meditation center. So, you can see, even God wants you to keep these buses running.

P6 is the only bus that goes along M Street to 11th Street, SE, to Harris Teeter, Trader Joe's, Eastern Market. It goes to the Mall, Botanic Gardens, the main library, the E Street Theater, Ford's Theater, Macy's, Bloomingdale Farmers' Market and connects us with all four quadrants in the city.

The 52 starts at L'Enfant Plaza, goes along 14th Street and to the Wharf with its many workers. If we lose the Circulator,

we will be without public transportation on M Street except for rail, which is unfriendly to people with mobility issues. Southwest residents use buses instead of Waterfront Metro because the buses easily accommodate wheelchairs, walkers, baby strollers, because the bus drivers wait until older people are seated before driving off, they secure wheelchairs and lower ramps for people who need that help. Metrorail cannot provide these services. When station elevators are out of order, using the escalators with walkers and strollers can be dangerous; platforms and cars are often crowded and difficult. Thank you.

12. Sandra Neuzil

O.K. Thank you for this second opportunity to speak tonight. I am Sandra Neuzil, although I am on the Metro Accessibility Advisory Committee, I speak tonight as an individual person who is legally blind, who relies on MetroAccess, Metrorail and Metrobus. I'm asking WMATA, within the ultimate constraints of the 2025 budget, to maintain as much geographic coverage and hours of service for Metrobus, Metrorail, as possible, so that the geographic area and hours of service of MetroAccess are maintained to the maximum extent possible.

I rely on Metro to visit locations in Maryland, D.C. and Virginia, where I work part-time and volunteer as an advocate for people who have low vision and blindness. Like I said, I am legally blind, and Metro access is important to me. Some destinations are new to me, and some I go to more than once. I rely on MetroAccess to get to new and unfamiliar locations and to go after dark. Once I am familiar with a location, I will gladly use fixed-route Metro service, which gives me more flexibility and saves Metro a lot of money.

If WMATA is forced to make rail and bus service slightly less frequent, or make trains shorter, or increase fares slightly, that could be more palatable if WMATA continues fixed-route services in as wide a geographic area seven days a week, and as many hours of the day as is fiscally possible, and thus maintain full Metro and MetroAccess services that all riders depend on to be fully-engaged citizens who can go to and from medical appointments and work and contribute to this vibrant DMV community. Thank you.

13. Tino Calabia

Good evening. When I prepared my testimony, I thought maybe Mr. Smedberg and also Randy Clarke would be here, so my prepared testimony addresses them, so I'll pretend like they're here.

One of the things I wanted to do is to thank Randy Clarke for bringing us into the 21st Century, be deciding to construct, by deciding to construct open gangway trains, they're safer and they're more commodious. He also did something about the fare evasion problem, and I thank him for that. He came in and there were new fare evasion, faregates and, but they were obsolete and they didn't do the work, so he had to go and reexamine and make a prototype and then he has set up new, better faregate things.

My second point is regarding funding. Today's Washington Post headlined a front page article, "D.C. Officials Unveil \$400 Million Plan to Fix D.C.'s Ailing Downtown." That's a quote from the first page of today's Post. Minus headlines and captions, the text consists of 1,429 words. Only eighteen allude to WMATA, but to me the most notable are the eighteen words, "Dedicated funding for the bus system and Metrorail in the face of the transit system's shortfall." I second that. So, thank you, Mayor Bowser, first of all for the \$200 million to help lower the huge estimated shortfall that WMATA faces, and also for mentioning dedicated funding.

But wait, unfortunately, WMATA Finance Committee's February 8th document was followed up ten days later by a Richmond Times-Dispatch article saying, "The Virginia State House budget includes \$149.5 million for the Metro transit system, something Youngkin's (that is Governor Youngkin's) budget and the Senate versions do not include." Several days later, the Washington Post added that State Senator, Finance and Appropriations Commissioner Lucas blocked additional... well my time is up, but you get the point. Oh, I'm sorry... has blocked the money for, the, the money needed to help make up for our shortfall. So we've got to do something about that, or you can put it half-mast, the Virginia flag that's over there.

13. Sam-Allison Jensen

Hi, my name is Sam-Allison Jensen. I'm going to start off by saying thank you to all of our Board members and transit executives who have worked endlessly around the clock to improve my Metro over the last year and who continue to fight for funding. It means a lot to me. Metro means a lot to me.

I live right here in our Nation's Capital, and I rely on Metrorail more than anything else to carry me throughout all three regions – Maryland, Washington, D.C. and Virginia – whether it's for leisure or work. Sometimes I'm required to travel in and out of each region to participate in various work projects that can end as late as ten p.m., when Metro would be scheduled to close.

Although I heavily rely on Metrorail, I'm starting to get more rider experience on our Metrobus system. If we face the dreaded consequences of the budget deficit, neither would be as reliable for me as they are today.

I understand that we have to take necessary actions to help generate revenue, such as a fare increase, which I, personally, have no issue with, since I'm willing to do whatever to support and contribute to keeping my Metro afloat.

And correct me if I'm wrong on this topic, but I also read in the budget docket that Metro will be shifting capital cover operating expenses. meaning that could funds to v[dizzog maintenance project, which postpone sounds concerning to me. I think I can speak for everyone when I say we deserve a safe and reliable system. Metro has undergone a complete 360 under General Manger and CEO Randy Clarke's leadership last year, to the point where standing on the bus stop and platform feels like a new era, a breath of fresh air, if you will. If we face the consequences of this budget deficit beginning this summer, it won't feel this way. with a significant decrease in frequent and reliable service that we were once promised and given. In fact, it will feel depressing and dreadful, and I'm not looking forward to

experiencing these changes as a customer; no one is. Not only is Metro the transit agency that moves me throughout all three regions, but the public transit nerd in me considers and values it as my safe space. Again, I'm asking you to continue to fight like hell, alongside us, your customers, for your funding. And if there are any elected officials or politicians that are currently present in this room or watching this online, please hear our voices loud and clearly. I'm begging and pleading for you to come together to help close the financial gap and fund our Metro. The motto is, "Your Metro," or in this case, "My Metro, the Way Forward," not "Metro, the way backwards." Thank you.

14. Liana Steinberg-Casper

Hello. I really thought the most stressful part of today would be public speaking, so... My name is Liana Steinberg-Casper, and I am a volunteer with the D.C. hub of Sunrise movement, and today I am here to urge you to fully fund the Metro and avoid fares and making any cuts or reductions in services. Even with the partial funding that would protect against major bus line elimination and Metro stop shutdowns, measures of the current proposed plan would still lead to less frequent, more expensive, more crowded and potentially less safe trains and buses. This is unacceptable to residents of the DMV who rely on this transit to get to work, to school and to other services.

If these reductions are enacted, those who cannot afford any other mode of transportation will be left in the dust, and those who can afford to switch to a high-polluting vehicle will, exacerbating both D.C.'s already-major traffic problems and the urgent threat of climate change. Forty percent of carbon pollution in D.C. already comes from transportation, mostly from this traffic. Our city cannot reach our climate goals and justly transition away from fossil fuels without making public transit a priority.

As someone who just moved to the DMV a few months ago from the San Diego suburbs, one of my favorite parts of living and working here has been the easy access to clean, safe, affordable and reliable public transit. I was so disappointed that the plan this Authority has put forth for Fiscal '25 would remove much of that access, making trains and buses more dangerous, less affordable and less reliable for the people who depend on them. I have spent most of my life in a city that doesn't invest nearly enough in public transit and have seen people suffer because of it. I sincerely hope I do not have to see that, that city government's mistakes replicated here.

Now more than ever is the time to fully fund public transit rather than divesting from it, to ensure an equitable and sustainable future for all residents of the DMV. Thank you.

15. Linda Green

Good evening. I'm a physician and somewhere along the line I realized that public health was actually a lot more important to people's health than my person private practice at Prince George's Hospital. But I would like to say that public transportation is one of the major social deterrent of health that public health people talk about and maintaining and expanding public transportation in the DMV requires the funding that many people have spoken about tonight.

But we have to figure out how to do that, and making fares more expensive is not the solution and cutting routes is not the solution. Many people rely on all of this in Prince George's County to get their medical care as well as for the many other things people have spoken about.

Developers benefit from public transit and should be contributing much more to the services. Housing, sports and entertainment venues and businesses are examples of this benefit. Of course the federal government could contribute much more as well, and the, young man that wants to run for office and wants the jurisdictions to pay more is exactly right.

I would like to say that, at some point there was an expansion of bus service in Prince George's County and it was really great. And I was talking to someone outside about the T18, which is a great route, and I've learned unfortunately, that it's going to probably stop at midnight, which would impact a lot of the community of working people in Mt. Rainier, Hyattsville, Bladensburg and so forth. So, I'm really concerned that any of these cutbacks in services will make people's jobs more difficult and their health worse.

Researchers have increasingly documented the health benefits of public transportation. Studies, as the young woman just said, show clear linkages between lower levels of air pollution, improved safety and higher physical activity levels. Compared to private vehicles, public transportation produces 95% less carbon monoxide, 92% fewer volatile organic compounds, and 45% less carbon dioxide per passenger. And from the point of view of safety, public transportation is prob-, roughly one-twenty-fifth that associated with private automobiles when it comes to pedestrian safety and so forth.

I did want to point out that one of the things I've done is talk to the MetroAccess workers in Landover last year. As some of you may realize, COVID still is around, and the experience of that group of workers kind of echoes what Mike Golash said, these guys worked really hard throughout the pandemic to transport people for medical care. And they, often had too many people in the van so that the risk of infection was greater and the transportation times were much longer. This needs to be looked at very carefully and MetroAccess really needs to be expanded. Funding is critical for both the riders and the operators in that system.

16. Rico Dancy

Good afternoon. For people who's on a walker, people who's on a walker, go to a doctor's appointment, who go to church, who go to the grocery store, who depend on MetroAccess, if you increase the fare for people who's on, for people who get Social Security, SSI, fixed income just to make ends meet, especially people who's on dialysis, OK. My wife is on dialysis, OK? So, I am her caretaker every day, with me working a full-time job and me taking care of her, a fulltime job. If they cut or increase MetroAccess, if we, for people with a disability who don't have cars, what do we tell them? Unless Metro is going to take the people to all their appointments in their personal cars, then we want to tell them, send them a clear message, because this is the reason why I have to put my hat in for Congress, because if we keep on electing the same people, we get the same results. And we, please listen to us, we are people. People with a disability live this every single day. I want someone to pay attention to us. Thank you.

17. Bill Orleans

Good evening, all. Last night, not very well, but I was listening to the testimony as I left the building to go elsewhere for another meeting. I did not hear, nor have I heard tonight, nor do I expect it will be said tomorrow night and/or Thursday, that we're happy to have any one of the several bus routes we use every week, eliminated. We're happy, if we're an Access rider, we're happy to lose access to Access because the bus routes that have been eliminated will move us beyond three-quarters of a mile from fixed-route service will be out of luck, and we're happy that headways between trains will be extended and they will close earlier at night, or just happy. And also, we're happy to pay more for our service. I haven't heard anybody say that. If anybody has said that, next time I see you Ms. Loh, I hope you'll tell me that somebody said that.

I certainly agree with others that the \$480 million promised, I understand the check's not even in the mail as yet, by the jurisdictions, is insufficient. Now, I have my own ideas as to who should pay for an expanded Metro, but I'll leave that aside for the moment. Certainly, the jurisdictions see to it that they cough up more than \$480 million.

I don't know that anybody that is on the receiving end of the \$246 million dollars in debt service next year, or the nearly \$2 billion in debt service over the course of the next several years, is really interested, really cares that much about the quality of transit service in, in the WMATA's transit zone. Some of them may live here, but they're not reliant on transit service – they can get by fine and dandy if all those bus routes are eliminated, if the trains are less frequent and if people can't ride Access because they're beyond three-quarters of a mile. I certainly think Governor Moore, my state, Maryland, and all the other executives and legislative so-and-sos, should respond to this need, which apparently is

real. I've conceded to the Board previously, that this year's "the sky is falling" budget scenario may be more true than it has been when the sky was falling in recent, previous years. But Governor Moore should offer more to WMATA and we should be relieved of this concern.

18. Denise Dubose

Hello. I am a MetroAccess rider. I don't really ride the bus, rail, I mean the Metrobus or the Metrorail, but I'm a very avid MetroAccess rider. And I feel as though, if you all cut out our services, that would-, we're already incapacitated to a degree already, and if you do that, that's going to incapacitate us any more. And that's not fair to us. We have a regular life. Like, I don't work, but I, I'm doing something everyday - I go to appointments, I go to therapy, I go to the gym, I go to the pool, I have grandchildren, I go places with them. So, if you do that, we already have a medical condition that we're dealing with, so if you incapacitate us that way, that will make our life even more difficult.

We want to live a regular life just like everybody else and we deserve that. And I understand you have to have budget cuts, but that should not be part of it. You need to find a different way, some other kind of conclusion to come to, to as to not incapacitate us any more. And you just went down on the fares, to \$4, now you're saying you're going to go back up. Most of us are on Social Security disability or we have very limited budgets. So if you do that, that will incapacitate us in a second way. So, how many times are we supposed to get these cutbacks; that makes a major difference in our lives and I don't think that should be happening. You have to start taking us into consideration - your elders, your people with disabilities, all of that, because, you never know, someday, one day, any of y'all, God willing, could be in our situation. And what would you want somebody to do for you? Would you want somebody to incapacitate you even more than you already are? Or help further your situation in a more accomado- situation. We should not have to be forced to not live our lives, to go to our appointments, to do the things we need to do, just because the government, Metro, whoever, says they don't have the money. Find it. Do what you

got to do, cut back some other way, do something different, but we should not have to suffer because of that. It's not fair. Thank you.

19. Phillippa Mezile

Hi, good evening, everyone. I just wanted to say... My name is Phillippa Mezile, first of all. I'm a resident of the District of Columbia. I'm speaking on behalf of myself and the lowvision community; I'm also a member of the Metro AAC committee. I just want to say, I'm opposed to any type of service cut, any type of service area cut, particularly as it impacts on MetroAccess users. Some of the, if you cut the service area for bus and rail, other people need the bus and rail just as well as we do, but if you cut the service area, then you've reduced the service area for MetroAccess.

Now, I would like each of you, just for a moment, close your eyes. I promise I won't hurt you. Just close your eyes for one moment. Imagine that that's the extent of your vision and that MetroAccess has been picking you up from your home, and taking you somewhere and bringing you back, and now all of a sudden. and this is what I consider the most inane and insane portion of this recommendation, if the service area's cut: suddenly, if you're outside of the service area, you're going to have to transport yourself to a pick-up point, then wait for something to pick you up from there, take you where you're going, bring you back to the pick-up point and get you back home. Now that is just ridiculous. It would be difficult, it would be time-consuming, it would be expensive. And I urge you to just not cut the service area for people. And, like I said, if you have to cut service, don't cut the service area: carve it out and keep it as it is, currently serving people.

Other thing is.. Oh, I also wanted you to imagine, you're sitting in the chair and that chair is the extent of your mobility. That, if someone doesn't get you in that chair and take you somewhere, you're just stuck in that chair, and that's the case for a lot of people. You need to be able to transport. People need to go to their life-saving dialysis, cancer treatments, medical appointments, etc. I, for one, use MetroAccess, I use bus and rail, I'm a very active volunteer in my community. I've served as a foster grandparent, which would not have been possible if hadn't been for MetroAccess taking me to the training and then to the locations. I'm on the Senior Medicare Patrol program, which helps cut, teach seniors how to recognize fraud and abuse on their Medicare billing statements. I volunteer with my church, I volunteer with my sorority, which is very active in the community. So, I would not be able to do most of that, if any of that, if the MetroAccess service were cut. Don't cut.. O.K., in my last ten seconds, I'm just going to say, Metro cops rock, and since I can't be charged with being sexist, you are the best looking board of directors I've ever seen.

20. Patricia Bishop

Good afternoon, everyone. My name is Patricia Bishop. I am going to also give you my AKA, it's "Good Trouble." I represent it, so does the people who have spoke before me. I would appreciate if each and every one of y'all in Metro get in good trouble right along with us. Don't make these changes to harm anyone, as far as MetroAccess, but definitely subways and the 74 bus on Delaware and anywhere else in the Southwest area, where it is definitely needed, because we have disabled, young and old, we have seniors that have walkers, canes and wheelchairs. How can we expect for them, or any of us, to go down to 4^{th} Street, in the scorching hot weather, or the freezing weather, to get that bus, that is normally to circulate throughout Southwest area, the way it has been. Please continue that bus line. It is beneficial to us. because we need to get to the store, grocery stores, even to get to the 79 to go up Georgia Avenue to Wal-Mart. To get to doctor's appointments, dialysis, as it was spoken, get our kids back and forth to school, in the morning and in the evening.

I'm sorry, y'all, but I have to stop, because it's really frustrating. This is not my first time being here about the 74 being continued. They wanted to take the bus stop away the last time I was here. I fought and I came here and spoke up for that bus stop to remain at Delaware, because that is a location where, there are several homes and apartment buildings right there that we need to have that bus stop right there in order to get safely to our front door.

I also use the 74. I'd rather not push my shopping cart back down to Safeway and back up, just to get my groceries home. I'd rather to be able to get on that 74 bus to do that, which would be more convenient for me and others that live in the neighborhood. People's walkers have broken trying to push groceries down the street, when they need that bus right there, to be even more safer for them, so that they can get back and forth to where they live. And, once again, I appreciate y'all listening to me. Support the good trouble that we all have came here to speak of to y'all, and join us.

21. Jermaine Franks

How's it going, everyone. I've got to say, that tow truck incident was definitely a scare. Definitely thank the first responders for that, their response.

I wanted to talk about, what is it, the V4 line. It's not... it stops running at, I believe, twelve o'clock, I believe. I would like it for it to be, what is it, on the twenty-fourhour schedule, because you've got the X2, the W4, and a couple other lines on the twenty-four-hour schedule. That would definitely help out with that. And another thing I didn't know, was it, like my aunt Pat was saying, she was talking about the 47 being stopped. Please don't cut that line, I didn't even know that was being cut from the regular schedules, and stuff like that. The buses still need to be, because I live in Ward 8, they still need to be cleaned and stuff like that, because I be getting on some of the buses and they just be filthy, and stuff like that, and not properly, like all the way cleaned. That would, for surely help as well.

I've got like twenty-two seconds left. I just want to appreciate, like, to have, like this opportunity to speak to you, to the Board members, and that's it. Have a great night.

22. Janice Samuel

Good evening. My name is Janice Samuel. I'm a member of the National Federation of the Blind of the District of Columbia and the National Federation of the Blind of Maryland. I'm not here in an official capacity; I will be delivering my personal testimony.

So, good evening. I was told to cut out my introduction and get straight to the point, so here it goes. As a member of the visually impaired community. I strongly advocate against any reduction in these vital paratransit services, which are crucial when ensuring equal access to transportation for individuals with disabilities. For many of us who are blind or visually impaired. MetroAccess paratransit services are not just a convenience, but a lifeline that enables us to maintain our independence, access employment opportunities, education, health care services and participate fully in all aspects of community life. These services provide us with the freedom travel independently, accessing to essential services, visiting friends and family, and engaging in social and recreational activities.

I could not have come here this evening without MetroAccess. Cutting MetroAccess paratransit services would have а disproportionate impact on the blind and visually impaired community, exacerbating the need, or the existing barriers that we have in transportation, excuse me. It would further isolate us, limit our ability to contribute and participate in the workforce, hinder our contributions to the local and hinder participation in economy. our community activities. thereby perpetuating inequality and discrimination.

The \$750 million budget deficit should not be balanced on the backs of the most vulnerable members of our society. Instead, I urge you to have the audacity to implement alternative solutions that prioritize the needs of individuals with disabilities and uphold our fundamental rights to accessible transportation within the Washington, D.C. metropolitan area. I implore you to consider the long-term implications of these cuts and the detrimental effects it would have on those who rely on MetroAccess paratransit services. I urge you to work towards securing sustainable funding for these essential services and to prioritize the preservation of accessibility for all members of our community. This is the most powerful city in the planet. Please, there is no reason this should be cut.

22. Matthew Exline

Clearly neither real nor imagined fears will dampen our support for Metro or our enthusiasm for our rights to speak out this evening. Ladies and gentlemen, I could speak about how Metro is the engine the powers the economy of this region; I don't think I have to convince you of that. I could talk about how Metro provides mobility for all different members of our community; but I think that's already been covered.

I will, instead, talk about a couple of things that haven't been covered, a few general and a few specific. Generally, I'd like to address first, the topic of fare evasion, which has been alluded to, but not talked about enough. It's tempting, I think, to think about how much you're going to charge for fare in terms of what you need, but that's not really how the customers who ride your service actually look at it. Instead, think of your system as a store. The problem is that the service that you sell in your store is very easy for people to steal, and people are stealing it left and right. And if you don't have enough money coming in, then you need to figure out how to stop people from stealing from you so much without criminalizing people, creating more violent confrontations and so forth. The new faregates are a great step in the right direction. Those need to be in every single station across the whole network.

You also need to find some way to keep people from stealing fares on the buses, too. I'm not sure how to do that, but that might be something you want to look at.

I'd also like to talk specifically about fare cuts, or, excuse me, the service cuts on the Blue and Silver line. The proposed plan is going to result in a significant cut in service. As it is currently, with the Blue and Silver line in Prince George's County, with those two running concurrently, you have a situation where you can basically walk in and a train's going to come along within five minutes. That's a really high quality of service, and it's a real benefit to people like me who commute every day, to anyone in the region. With the Silver Line, under this plan, stopping, and not going on into Prince George's County, and the Blue Line running less frequently, you're cutting frequency from every three-to-five minutes to every fifteen minutes, which is a significant decrease in service, has an impact on people's ability to commute. Thank you.

23. Aurelia Glenn

Good evening. Underlying all this premature talk of service cuts, because that should not be trotted out first, due to the purpose and nature of public transportation, is revenue. People have already talked about dedicated funding sources, which is needed, as well as contributions from local jurisdictions. But, WMATA's contribution to this also needs to be addressed. As a user, I don't understand WMATA's seeming refusal to publicize its monthly passes as a consistent revenue stream for its passengers. It's convenient, it saves money, yet it is not, and has not been consistently promoted.

I can look on my wi-fi in the morning and see an ad for a young lady advertising WMATA merch. How much money is that bringing in to Metro? But nothing promoting consistent, monthly revenue from passengers, your riders, who know how this system works and works well; we want it to continue to do so.

The other problem, which I think could-, surrounding service, bus service specifically, is that, the GPS trackers don't always work. Because that works in conjunction with the BusETA, and if it's not, if they're not working you don't know if a bus is coming, which renders, kind of, BusETA useless. And you know, you need, you need to know that a bus is actually coming in order for the system to really work and be useful. Also, I've had, actually, better luck with the DC Transit app in knowing when a bus is coming, better than with BusETA. There have been a number of times BusETA did not report a bus coming that the DC Transit app did, which is incredible and not helpful at all.

I do want to specifically talk about the D14 bus line, which is scheduled to be cut. That doesn't make any sense, since it's a framework route, one which is, according to your Bus Transformation project, is a bus line that is a backbone of bus service, and that allowing riders to travel along major corridors, streets and access the region. Why is that even, why is it even on the table for being cut? It accesses, you know, seniors, it goes to a Social Security office, it goes to a medical center which has a veterans' office, Andrews, a Giant, Aldi's, Latino supermarkets, two schools... D14 should not be cut, it goes to the federal, Suitland Federal Center. I don't understand, according to your own guidelines, it should not be cut. Thank you.

24. Maevyn Farrell

Hello, my name is... Hello, WMATA staff and my fellow concerned advocates. My name is Maevyn Farrell and I'm a seventh grader at Alice Deal Middle School. I'm here to address the issue that we are all acutely aware of – the proposal that WMATA is showcasing will not only affect me, but many others in my school community. Specifically, the buses D31, D32, D33, D34, the M4 and the W45 are proposed to be cut. These six bus lines are but a few, compared to the other lines that could also be cut. So many other schoolkids at my school, including myself, use these buses to and from school every day. Removing these lines would not only affect the amount of kids coming to school on-time or even at all, but it will also affect the safety of the children.

On a weekly basis, all the D30 buses and the M4 are full to capacity, both to and from school. Students rely on these buses as a mode of transportation, just as they would a textbook for curriculum, or a pencil or pen for expression of thought. Removing these lines would disrupt students' educations, futures and the opportunities that school has to offer. DCPS is already struggling with tardies and absences, and by eliminating these bus routes, they probably will worsen.

Safety is another element that will be affected. As a heightchallenged middle school girl, it is already hard enough to just walk along without feeling unsafe. Just imagine how all the other kids would be affected by this and how they feel. The Metrobuses and trains struggle with violence and crime, wait, already struggle, so putting a bunch of students on them does not seem like the right solution. I acknowledge that other DCPS schools don't have dedicated bus routes for their students to take, though there are regular routes that students use to get to other public schools and charters schools that would also be affected by this proposal. Shouldn't we be focusing on their bus service? Why are we making students' commute even harder?

So, consider this. I wake up at five- I have to wake up at 5:30 a.m., get ready, eat breakfast, and make my lunch and leave. But then I have to take three buses – the 54, to the E4, to the M4, oh wait, but I can't, because the M4 is also being cut. So then I have to walk the rest of the mile to get to school, and when I finally get there, most likely late, I'm exhausted. Then on my way home, I have to do the same thing. And this would happen to so many other kids, or even adults, that rely on these lines. This would also affect my, this would affect my safety, by getting home after dark, my education, like not having enough time to do my homework, and my rest, like having no sleep time.

Education, safety and convenience are all impacted by the elimination of the D30 buses, the W45 and the M4, which will have an everlasting effect on students' families all around. Thank you.

25. Neils Pemberton

Hello, my name is Neils Pemberton, good evening. Since 2009 I've been working for the Washington Nationals on game days. Many of these games are in the evenings and they usually end between ten and ten-thirty p.m. I need to have the Metro available to take me home after ten thirty p.m. If Metro stops at ten p.m., I will be forced to give up my job. My needs are not negotiable, I'm sorry. This is how important Metro late night service is to me.

I am completely dependent on transit and have been a protransit advocate in the 1990s. I'm now looking for another job, because I do not trust Virginia's state government to do the right thing. With that, I'll lose my job.

26. Denise Rush

Good evening. My name is Denise Rush. I'm Vice Chair of the AAC Committee and Vice Chair of MetroAccess. I've been riding the service for twenty-four years. It has been my lifeline. It helped me pay my mortgage, it helped me retire from a law firm, and I've had great experiences – we must have full funding and dedicated funding. I don't know how you're going to figure it out, but one of the suggestions, every business owner that MetroAccess, Metrorail, Metrobus takes someone to, they should be paying something for the money they're making, because Metro is making them money by getting us there.

If you're going to cut the service for handicapped people who don't have the option to get in their car, or get on the bus, or Metro, well, I shouldn't have gotten on the floor, I should've, you're shooting me, you're killing us, our independence. So, I should've stayed up and maybe that bullet would've hit me, or whatever, and just lay down and die, because there are going to be a lot of people who are going feel like they have been shot, and they've lost their life. So I hope you don't do that.

But MetroAccess came for when the earthquake, they came for me in the deep snow. They were, they are my lifeline and they should be commended. No, they're not perfect, but your husband's not perfect, your daughter's not perfect, nothing's perfect, but something is better than nothing. Thank you.

27. Virgilia Collins

Hi, my name's Virgilia Collins. I'm here because there's I was told there are going to be some bus service and Metrorail cuts, cuts or Metrorail closings, and I live in-between three Metrorails – Suitland, Naylor Road and Southern Avenue, and I live on five bus lines, four of them which are Metrobus lines. And I've been living where I live for almost twentynine years.

When I first moved there, there were no bus service or even Metro. I used to work at night, I had to walk from D.C. into Maryland. I live near Iverson Mall; that's a long walk from Naylor Road and Southern Avenue, Naylor, Branch, Southern Avenue and Branch Avenue, Wheeler Road and Southern Avenue. I even walked from Eastover Shopping Center. And I also lived in Hyattsville, Maryland, one time before they brought the Metro train, the Green Line Metro. And the buses on the weekends, Eastover and Hyattsville, they stopped running around eight-thirty, nine o'clock. And I had to walk from the Metro, from the Brookland Metro to, going towards P.G. Plaza, and that took almost an hour.

And, and also, I used to have to walk, now one time, you're talking about cutting bus fare. I remember when I couldn't even afford bus fare, I had to walk to work, and that took an hour or a half-hour depending on where I worked.

And other things, like I went to the meeting in Silver Spring, and if it hadn't been for MetroAccess, I would have had to catch two buses and two trains to get there. And so that's, you know, it didn't take me long to get here today, because I live right on the Green line, the Metro's right down the street. But there are some places that are too far out, you know, where, you know, you can't walk to. Plus, if the weather is bad, like if it's raining or snowing. And plus back then, you know, a long time ago, I was in good health, so I was able to walk, but right now, my health is deteriorating, so I'm not able to, sometimes it's hard for me to stand up and walk. So, you know, that's the reason why, you know I want you to keep, you know, the buses and trains running, even if you have to cut back on, you know, wait time, you know.

And the fare, I don't have a problem with you going up twenty, twenty cents, because there was about, fare was about twentyfive cents when I started riding the bus and that's been since '73. So if I've had in fifty years, you know, if you go up on the, plus they never went up on the fare every year, but let's say if they did, it would only be five cents every year, so I don't have a problem with this. But I just do, I'm concerned about the buses, rail, MetroAccess also. Thank you.

27. Victoria Maronquin Vasquez

Good evening everyone. So, my name's Victoria. So, I live in Capitol Heights at Addison Road, the middle, so, from Maryland. So, I'm housekeeping for the Line Hotel, I'm working here from D.C. I'm using the 96 everyday, so I would like please, no cutting, because we need it. Especially in Saturday and Sunday, the Metro train is open seven, and I'm starting to work six, so I'm using the bus. Thank you so much, I appreciate it.

28. William Covington

I've got a sermon for you today. My name is William Covington. I belong to the National Federation of the Blind, the blind community, low vision, etc. My appeal is simply this: if the Mayor can come up with \$500 million for a baseball team, and a hockey team to stay in this, Washington, D.C. I don't know if you guys have access to her, but I would simply appeal to the psychological. And that is to say, when things are cut, anxiety rises and depression sets in. It's a challenge enough to be visually impaired and have to live with the lateness of MetroAccess, bus and the rail. But, without it, like water from the sky, the flower dies. So, I would not want to see a lot of people go into depression. And that's simply my appeal. Think about the mindset, the isolation, and the types of things and anxieties people will go through when they can't get out. Remember the pandemic? That's all I've got to say. Thanks.

Metro Hearing #657

Dockets B24-01 and B24-02: FY2025 Proposed Operating and Capital Budgets and FY2025-2030 Capital Improvement Plan

Arlington County Government Center

Arlington, Virginia

February 28, 2024

1. Takis Karantonis

So, thank you for, for holding this meeting her tonight. My name is Takis Karantonis. I am Vice Chair of the Arlington County Board, but first and foremost I am a rider of WMATA for many years... for all the two, twenty years that I have been in this region and living in Arlington. I cannot believe that we are here discussing what we are discussing. We are discussing the major, the very basic infrastructure of our region, a region of over, more than six million that depend on the ability to provide public people This unprecedented to even transportation service. is discuss eliminating 67 of 135 lines in our bus system. knowing how many riders there are, knowing how many, how much of our ridership came back after the pandemic. How, how, how, how important this is for so many households.

Metrorail is not just a commuter system. Neither is bus system, the bus system a commuter system. It is a basic infrastructure of our economy, of the way, of our way of life here in the Washington DC general metropolitan area. It is very critical to Arlington, all of it. I believe that about 60% of our bus service is intertwined with. with WMATA. I use it every day, to come to this office here and I can just, cannot imagine that we can go forward with this, with this budget proposal. It is of course, as an elected official now, it's of course part of my job to make everything in our power, to find solutions here, most importantly, viable and sustainable solutions for the future. But I implore you to review and revise the budget and do everything you can to get the, elected officials of this tri-state region to fix the gap.

1

2. Luke Etienne

I'm Luke Etienne. I'm a student at the George Washington University. It's my first year living here in the DC metropolitan area and Metro has, of course, been, you know, crucial to my experience and the experience of many other students who live here. So, I'm here to make known how this would, in particular, affect our student community. When I saw the public notice for this hearing, I decided to run a survey of fellow students and I got two hundred or so responses. And of those, almost nine in ten use Metrorail at least once a week and two in ten use it on the daily. We have half of our students use Metro to get to their job or to their internship and one in twelve use it to commute from home to school.

Eliminating service from various stations, cutting these dozens of bus lines would be a great inconvenience, to say the least. Eighty percent of respondents rated these changes as having a great deal of impact on their lives; only two percent said there would be little or no impact. Some comments that I received while running this survey include: "Metrorail is my lifeline and one of the main reasons I chose DC to study." "The increased time between trains and earlier closing time would make it basically impossible for me to continue with my extracurriculars." "The Metro is vital to the fabric of DC; what makes the city so accessible."

Obviously Metro is vital to our student and our voung professional populations. Not to mention that this would disproportionately affect those with lower incomes that also do not have access to a private vehicle. For those who rely on Metro, this will be a great hinderance to their mobility, to say the least. And for those who choose Metro, this will be another incentive to drive, which will add more to our congestion problem, which we all know does not need worsening. This will be an irreparable damage to Metro's image, at least for the next couple of years. Just as we're recovering ridership out of the pandemic, it's going to take a large hit. This will potentially cause a feedback loop, in which cuts lead to less ridership, which lead to cuts, which lead to less ridership; and none of us want to see.

The subsidies which I've, that were proposed by Maryland, Virginia, D.C., they're welcome, but we must find a longerterm solution. WE can't go back every year to these governments asking for more money, we must find a more long-term solution so that we can have a budget that we can work upon. Our nation's capital deserves a transport system that is the envy of the world and the only way to do so is to invest in it. Thank you.

3. RoseAnne Ashby

And good evening. I am representing the American Council of the Blind of Virginia. I am blind myself, and I live here in Arlington, Virginia. I want to say how very, very critical public transportation is for all people and for, particularly for people with disabilities – both paratransit services and fixed-route services. I personally use MetroAccess as well as Arlington STAR when I'm going to unfamiliar places and places where I cannot cross streets safely. I use those services probably four or five times a week. When I am familiar with an area I can use Metrobus and Metrorail, Metrorail as well. I'm very concerned about the elimination of bus routes, and, and Metrorail, closing Metrorail stations.

I'm very concerned about the service area being contracted. Now I thought I had understood from the presentation tonight, that in fact MetroAccess' service area may not be, elim-, diminished. I hope that is the case, I hope I heard that right. I particularly want to give kudos to Christiaan Blake. Under his leadership, MetroAccess has really become very responsive to the consumer. I particularly love the option that we now have to take Ubers some of the time.

For people with disabilities, transportation is essential. We, some of us cannot drive, some of us cannot use taxis if we have physical disabilities, we cannot necessarily use conventional taxis. So, accessible public transit, both paratransit and fixed-route are so critical for people with disabilities. For employment, for going to medical appointments, for social services and for all kinds of things. So, again, I urge you to work with the, the others in the area, Virginia, Maryland, and D.C., ACBVA, my organization, is working with our delegates in the state of Virginia. We want to see those additional funds go to WMATA. And again, thank you for what you do and thank you for the opportunity to speak.

4. Donald Barrett

Thank you all for the opportunity to speak. My name is Donald Barrett and I just turned seventy-two. And you all wonder, well, why are you mentioning that? I guess I want to say, that for the first time in my life, because of the Abilities Ride program from MetroAccess, I feel fully and completely independent. You know, as a blind person all my life, I've gotten rides from families and friends and cabs and other kinds of paratransit situations, but this program, the Abilities Ride program is just outstanding and beyond any reproach. It's the kind of independence that touches your heart and your soul, makes you feel like a full, fully-fledged, free, happy and independent individual. I think, probably those who don't use MetroAccess services, don't even realize how meaningful it is to go where you need to go, and sometimes want to go, without any restrictions.

And, it's certainly not a situation of taking advantage of a program, it's utilizing a service that's been brilliantly crafted to work and work well. And I just have to, and wanted to say thank you – thank you to WMATA, thank you to MetroAccess, thank you to Christiaan Blake, thank you to everyone who had the forward-thinking wisdom and compassion to be willing to formulate a program like this that helps so many people and has made us feel so very, very independent, happy, and makes, makes life an exciting prospect due to being able to get where you need to go when you need to go there. And with that I'll stop, and I just want to express my deep and heartfelt thanks to all of you. Thank you so much.

5. Joseph DePhillips

Hi, good evening, I'm Joseph DePhillips and I'm a consumer from the City of Arlington, County of Arlington, and I want to thank each of you as well. I believe Mr. Smed-, Mr. Smedberg, you and I are both Nutmeggers, originally. Connecticut. Aren't you from Connecticut? Rocky Hill, I think? Weathersfield. I want to thank each of you, including Bryna. Bryna knows what's it's like to use paratransit and how beneficial it is. And one more shout out to Mr. Karatonis, thank you. And not only is he advocating for public conveyances, but also pararransit. Just as previous speakers have said, Don and RoseAnne, forty-three years ago when I came to Washington – forty? More than that now, 1977, if I wanted to go from Capitol Hill to Laurel, Maryland or Beltsville on a Sunday, it would take three Metrobuses. Now, I feel, even though I've never driven in my life, I feel I can go anywhere I want and I can lead a pretty normal existence.

Before I talk a little more about the benefits of MetroAccess, and believe me, it's come a long way. At one time, you all have seen the press, someone could be on there for four hours and have the potential to run out of, of oxygen. But one thing I'd like to see is MetroAccess tighten up on the membership a little bit. When you have such a good service as MetroAccess has become, I'm afraid that sometimes MetroAccess has lost the original vision for the ADA, which is to treat the most severely disabled. Now it seems, if grandma has a hangnail or forearm shiver, if they go to the correct physician, they can be gualified. And I'd like to see. I'd like... at one point the evaluation process for MetroAccess was much more stringent and it seems, seems to have fallen off a bit. And I say that, I don't want anyone to be hurt, but I'm afraid there are people using the service that it wasn't originally intended for.

As far as Uber and MetroAccess, if I have to, I don't mind paying a little more. But I urge you not to cut the service area or the time. Sometime you're out on a Friday and Saturday night and you can't get home until 11:50 and in some cases on o'clock. Again, I'd just like to commend each of you and let you know how important it is in my life, not only for MetroAccess and for the paratransit, but to be able to ride the subway, either at a reduced charge or free-of-charge. I feel with the combination, I can again lead a normal life. If I have an errand, if I have to go to services, or anything that you need to do, employment. And again, please consider not to cut the service area and the timeframe. Thank you very much.

5

6. Doris Ray

Good evening, Mr. Chairman and members of the WMATA Board, as well as WMATA staff that are here, and other elected and local officials. My name is Doris Ray and I'm here representing the ENDepedence Center of Northern Virginia, a community resource and advocacy center that is run by and for people with disabilities living in Arlington, Fairfax and Loudoun Counties and the independent cities of Alexandria, Fairfax and Falls Church, and area that has a population of 2.4 million people and spreads over about a thousand miles, I do believe, square miles.

And, we want to first say that we appreciate, people with disabilities, the thousands who live here in this metropolitan area, the Metrobus, Metrorail and MetroAccess services provided by WMATA. And, we also understand the unprecedented budget issues and shortfall that we face together as a community. We ask of you to reconsider, as you are making the final cuts to the budget, that may ultimately be necessary, that you consider the effect of eliminating bus routes, cutting back on service areas, cutting back on operational hours, of Metrorail and cutting back on the service area for MetroAccess, as well as raising fares will have on people with disabilities and the broader community, particularly those individuals who are marginally economically capable of affording this. Some of us having modest incomes, some of us have low incomes and very low incomes and we rely on MetroAccess and Metrobus and Metrorail to get to - because we don't drive. a large majority of us don't drive, we rely on it to have jobs, keep jobs, go to the school, get educated and trained and also, just do the basics of life.

And so, we have many questions about this process. One is with regard to the service area, well you be including the partner, the partners like Fairfax Connector, in, in the service area you will redefine because of any budget cuts? We also ask you to go to our state officials and go back to your local governments and make sure that they fully fund-We are there fighting with you. ENDependence of Northern Virginia traveled with our consumers down to Richmond and spoke to our legislators from Northern Virginia and we'll be sending them our messages during this conference committee. We're working with you. Don't cut the services we need, and to say as a person, please don't cut the 2B and the 1C - those are long-line services and the 1C takes me to my government center in Fairfax County and you're going to take that away... (Microphone cuts out).

7. Pierre Hayford

Good evening. My name is Pierre Hayford. I'm a resident of Price George's County, Maryland. I'm also a student and I'm an employee. I use Metrorail and bus service several times a week for ... sorry ... for school, work and leisure. I find it disappointing that a system as vital as WMATA is still without any dedicated funding source from a11 three jurisdictions. Ι thank that... thank a11 three Ι jurisdictions for pledging additional funds on top of the ones from last year, but there's a lot more that needs to be done to close the deficit.

The leadership of Randy Clarke, the WMATA General Manager, has been absolutely astounding this year, and to have the improvements made to the system completely take a oneeighty due to the service cuts would have a lasting negative effect on WMATA's credibility that it's worked so hard to repair and earn.

Shifting capital funds to cover the operating expenses for Fiscal Year 2025 is a risk that, that could constrain improvements for the future. Gutting vital maintenance projects and overhaul stuff will represent another risk for everybody, whether you're a customer or driver. Regarding fare increases, I support measures such as increasing parking fees at stations and, while I have no issue paying an increased fare, hundreds of thousands do not have that luxury. I urge the Board to find another alternative method of generating that revenue. A suggestion I have is to raise the vehicle registration fees for each jurisdiction on larger and heavier vehicles which have become popular in recent years, or increasing the taxes on businesses or development projects centered around Metro stations. The District Council has also decided to study the proposal of congestion pricing in downtown. If that were to become a reality, I highly advise the Board to look at, to tell the

District Council to set aside a dedicated portion of these revenues, this revenue, for WMATA. The potential measures are not as swift in recovery as some of the revised budget plan's options, but it would create a less-harmful impact on riders who may not be as financially flexible to weather an extended period of hiked fares.

Accessible and affordable public transportation is an equity issue and, now more that ever, with the rising inflation and costs of skyrocket-, cost-of-living skyrocketing, I'm sorry, it's dire to ensure that people are not left behind. Metro's a really power-, very powerful economic tool. Bethesda, Rockville, Reston Town Center, and Arlington through Ballston corridor are a]] hiahlvsuccessful examples of transit-oriented development. These are all suburbs of the District, yet Metrorail has allowed developers to transform these locations into residential and office hubs.

WMATA's one of the few systems to be fully built-out of its original plan, and we've already done the hard work. We just need to make sure it's fully funded.

8. Siawash Azizzada

Good evening. My name is Siawash. I just live around the, around the corner here in Court House. THank you for taking the time to hear us out. WE just moved to this neighborhood two months ago and chose specifically this neighborhood due to its access to public transit and the proximity to both my job and my wife' job.

My wife and I are both trying to live a car-lite life. We own a car, but, unfortunately because of still the circumstances. Moving to this neighborhood has been, and being able to use Metro every day, for everyday life, has been a drastic quality-of-life improvement. We use both the two buses that come right here and Silver and Orange Lines. In the last two months, we've pretty much replaced almost 90% of our car trips with Metro, just due to the accessible are around here. We plan our amenities that medical appointments, errands, grocery shopping and just being able to explore the city, because of the guick headways that currently exist on Metro. If these new service cuts are implemented, we'll be forced back to using our cars and add to the congestion that plagues this area for so many years. The DMV area is some of the most in-demand in the country. We deserve and demand a world-class Metro system.

I don't understand why we don't bat an eye when billions are spent widening highways and Metro only gets scraps. If we care about big problems like climate change or giving everyone an equal access to opportunity, Metro is and should be a major contributor to solving that.

9. Alex Mendelsohn

Hello, my name is Alex Mendelsohn and I'm here representing myself. I'm a local high school student in Arlington County and WMATA plays an important part in my life. And I'd like think that I'm giving all high school students a voice who don't own a car and rely on public transportation for independence.

Along with being a transit enthusiast, Metro and Metrobus transport me and my peers across the region, whether that be to school, extracurricular activities or social gatherings. I'd like to take moment to appreciate how much WMATA has improved over the last few years, specifically referencing improved service levels and an ambition to take on projects related to the customer experience. A healthy public transit system is key for our region. That being said, I'd like to reflect on WMATA"s budget proposals for Fiscal Year 2025.

As for funding, it is imperative that WMATA's able to pass a budget that will sustain today's service levels. It looks as though WMATA will be able to get most of the money it needs for the next fiscal year. However, it is uncertain if funding will make it past the Virginia Senate at this point. I strongly encourage, urge the Virginia Senate to make sure WMATA has enough funding to sustain existing service levels. Despite this, if small fare increases and a preventative maintenance transfer is part of the short-term solution, I would be OK with that. However, it is essential that preventative maintenance transfers are only used to bridge the gap for the next year or two, as taking resources from the capital budget will only hurt the system's state of good repair.

9

In the long term, it is important that, it is important to establish a dedicated funding structure. As part of this, I fully support establishing a regional sales tax or similar mechanism to ensure this agency has reliable funding, and I would encourage our local and state leaders to pursue such a policy.

As for fare and parking adjustments, while they make up a relatively small portion of the budget, they are important mechanisms that WMATA can use to help raise revenue. To address the existing shortfall, I support the proposed 12.5% increase in the general fares. However, I would like to caution against raising the maximum fare for Metrorail, as increasing fares on a trip type that is struggling to return to pre-pandemic levels is bad for ridership growth. Also, I am willing to support raising the cap on late-night and weekend fares as much as, to as much as \$2.50 or \$3 on the rail svstem. Lastly, WMATA shou1d prioritize implementing open payment and fare capping systems.

As for parking, WMATA should implement a dynamic pricing system at the lots it owns so it can better take advantage of existing space. Also, Metro should use the long-term and overnight parking facilities to provide overnight and, overnight and multi-day parking.

service Ι As for and operations, have three main suggestions: First, I would like to make sure WMATA is focused on implementing the Better Bus Network Redesign as quickly as possible. An improved network has the ability to boost both bus and rail ridership at no additional cost. Specifically, Ι want to emphasize the importance of improving, eliminating or consolidate routes that operate less frequently than thirty minutes. Lastly, WMATA should increase operating efficiencies by closing the Cinder Bed bus division on weekends, operating the REX and 29 buses out of a surrounding division.

Moving on to the Capital Improvement Program, I would like to place a lot of emphasis on fleet expansion. Ordering new buses and the 8000 Series railcars should be a priority for the upcoming year, as it will improve the system by replacing an aging fleet and allow for service increases. Also, I'd like to caution against a rushed transition to a fully electric bus fleet. These buses are expensive and require more space to store, and the way for WMATA to best meet environmental goals is to provide more service to take cars off our roads.

Thank you for the opportunity to speak today, and if it's OK, could I provide each member of the panel a copy of my speech?

10. Steven Kaffen

Hi, I'm Steve Kaffen. This is the, actually, this is the eighth consecutive year that I've been testifying, formally. Actually, I just flew back from Brazil this morning in order to be able to testify, so it's good to be here. This is an important time to testify.

Just to let you know, because I'm proud of my 2023 statistics: I rode, I took 573 bus trips and visited twenty rail stations, and this is as user, certainly not as an auditor; almost 2000 miles of travel, in the top 1%. And so, you know, I love this system and so it's good that we have this opportunity every year to talk. There's no way I'm going to get through all of this, but I'll, I'll leave the, you know, that's what, that's what we do. I'm on the Best Bus initiative, I was on the Bus Transformation project, I'm on the Accessibility Advisory Committee, I'm vice chair of the Bus/Rail Committee, but, my comments are my own.

I want to state first, and, as you know, and this bothers me tremendously, even though I'm not a user, a substantial number of MetroAccess users will actually be losing service, if the, if the worst case scenario is implemented. You know, it, it, it, to take away service for people who depend for their lives on a particular, on a particular kind of service, when they have it, is, the word is unconscionable. And so, I know we can find a way to do a grandfathering in or what have you, or maybe it may not be necessary, but it's an extremely disturbing and important thing for those, for those who use MetroAccess and for those who don't.

The other thing I'd like to mention quickly is, that, that, I believe that we can learn from our experience and do better such that next year we don't have as much cost to

fill in. I think WMATA should set up a "rider experience committee," working with Sarah or working with Sarah or working with an ombudsman. I'm glad, I'm sure people would volunteer. Thev'd 1ook at prospective changes and expenditures from a rider standpoint. There are numerous expenditures, that, needed not to be made, shouldn't have been made, and were just wrong. And I'm going to list them out and I'll present them there. But if we can cut these back, next year we don't have as much severity to look at. Thank you, thank you very much.

11. Brian Gannon

Good evening, Metro Board members and staff. My name is Brian Gannon, I'm a resident right here in Arlington County. I love having the access to the corridor right here, having easy access to Metrorail and various ART and Metrobus routes. I'm a very frequent rider; I commute by Metrorail three to four times a week out to Reston. I've been riding the Silver Line pretty much since Phase I opened up, I guess about it's been about ten years now. So I do rely on that – it's great not having to drive and deal with the tolls and the traffic and all that, so I hope that service frequencies can be maintained. I know that the worst service cuts, hopefully, are not on the table so much anymore, but I would like not to see service cuts, station closures, early closings, any of that.

I do recognize a fare increase is pretty likely. I hope it can be minimized, especially for long-distance riders who got hit pretty hard with last year's fare increase. It adds up after a while and I know that's a burden for some people.

I know the budget proposal also calls for the increased use of six-car trains; I hope that can be looked at. You've been running six-car trains pretty much the last week-anda-half exclusively, and the crowding has been noticeable in terms of on my commute, trains have been really packed that head out towards Tysons. I hope eight-car trains can be maintained. I mean, you've spent years and years promising eight-car trains, and this is coming from someone who remembers when you used to run four-car trains during the rush hour back in the '80s and '90s. So, it's been great, so hopefully we can keep what we've got and not take a step backwards. And like others, I really hope dedicated funding is something that comes through so we're not doing this year after year. Appreciate the opportunity to speak. Thank you very much.

12. William Wong

Hi everyone, I'm William Wong. Thank you, everyone, for letting me testify. I'm representing myself. But, I just wanted to say as someone who commutes from Innovation Center to Metro three days a week to get to work in D.C., the proposed service cuts would be absolutely terrible in my case. I've had, like, over 6800 miles of Metrorail last year and having either like twenty-minute service cuts or a twelve- or like twenty-five percent fare increase would not be optimal for me. I believe, I calculated, so not having to drive into D.C. every days, taking into account toll roads, fees, parking, etc., etc., I was able to save \$14,000 from not having to drive into D.C. every day, and so having those service cuts would make Metro less of a viable option for me to get into work, and so, I heavily disagree with them.

I'm glad we don't have the proposed draconian cuts, hopefully, based on the funding provided by D.C., Virginia, and Maryland, although the 12.5% increase is not something I'm that happy about, although I recognize the possible necessity of it. Although I would like to say, that many others have said here, that getting a dedicated source of funding, either through say, like having Metro advocate either for a regional tax or increasing ridership by just develop-, increasing density and development around the Silver Line stations would be lovely, so that we don't have to have this meeting every year and so that I don't have to endure 12.5% fare increases every year.

13. Lisa Brown

Good evening, everyone. My name is Lisa Brown, and I live in D.C. between Woodridge and Brookland station, I mean, Brookland and Woodridge. I have a lot to say, but I'm going to keep it short. But I'm going to write it down.

In our area, they're trying to make it more dense, more apartments, and have, encourage people to use Metro. And in

our area they took every bus line out; it was gone and they said no alternatives. So, I'd have to walk to the Rhode Island, or I'd have to walk to Brookland or Fort Totten; all my back-ups were eliminated. And we have a lot of seniors back there, disabled, me, I go to work, kids go to school. All our bus lines were H6, E2, were eliminated. That's not good. You know, we have to have some kind of way to get around and we're dependent on the bus. And I know for me, I moved here from Atlanta, and I bought my house specifically because it's near the bus line, because sometimes I don't want to drive. In Atlanta, you have to drive everywhere.

I'm a Nats season pass holder. I don't want you to mess with the train stations; I don't want you to cut the trains off early, and I got to miss part of my game. There's a lot of folks that probably Nats, you know. And you encourage us to take the train, I love it, but it you close at 9 o'clock, I'd have to leave before the game is over. And as a season pass ticket, as a season pass holder, that's a lot of money, you know, so, I want you to consider that. And you know, public transportation's public transportation it's for the people. All the lines may not make money, but that's not the point. it's the accessibility. And since the Metro train was built after, you've got to retrofit, people have to get to the train, and that's what a lot of our buses in Northeast - it's a lot of neighborhoods that you cannot walk to the Metro, so we need our buses just to get to the train. So, I like the Better Bus idea, but I didn't think we would have no bus. Thank you.

14. Patrick Sheehan

My name is Patrick Sheehan, I'm Chair of the AAC. And I think, as probably you've seen tonight, and it was apparent last night, and also on Monday night, a good number of people who have been before the mic have been disabled people and they are concerned about their ability to get around, their ability to use MetroAccess, their ability to use the Abilities Ride; they don't want to see the system cut. Under the fiscal cliff or doomsday scenario as we affectionately call it, you could lose up 9000 people out of the 36,000 people that ride MetroAccess if the service area's cut. So, as you've heard tonight from others, we do want to fully fund Metro, we want the service area to be intact and we need to keep the schedule intact.

Those are the basic things that we are interested in. because that area is a safety net for those individuals that need MetroAccess, that need the Abilities Ride, but the paratransit system. They don't have the ability to turn to a car to supplement their rides, so we need to have the safety net fully funded so the entire area is, is safe and efficient for those individuals. We had an individual come to the Accessibility Advisory Committee and she asked the Committee she said, "If my ride is cut, how do I get to my job? What do I do? Give me an answer, help me." And we didn't have an answer. We just said we didn't know. It made me feel very helpless for that individual because she's depending on our committee to help her get around. 9000 people like her could be in the same boat if this fiscal cliff, doomsday budget is enabled. The revised budget is better; I would like to make sure that's fully guaranteed, that all of the MetroAccess budget is not cut.

Lastly, I would say, you know, we've talked about Virginia, we've talked about D.C., and we've talked about Maryland, but surprisingly enough, I haven't heard anything about the federal government, and I don't know what we're doing with respect to that money that is being... the thirty... I forget what it was, \$30 million or so that they were asked to put in. I think that it's important, every penny counts, because I know, even with respect to staff at WMATA, who do excellent work, as you say all the time, they're being impacted because they're not going to be given raises. So, anyway, thank you for your work on this. My committee stands ready to work with you. Thank you very much.

15. Ben Lynn

Good evening. My name is Ben Lynn; I'm here on behalf of ATU Local 689. We represent over 15,000 transit workers and retirees across the DC Metro area, including 9000 WMATA employees..

And, as we all know, our members, and our region face unprecedented challenges, faced unprecedented challenges over the last few years. Nonetheless, transit workers have faithfully stayed on the job and kept our region afloat, even through the worst pandemic in over a century.

Since then, we have seen reduced ridership, record, but receding inflation, increases in violence and a system pushed to the physical brink, and a stated deficit hundreds of millions of dollars. Finding a solution to Metro's longterm and systemic funding problem is essential, however, the solution cannot and must not fall on the backs of working-class people. I cannot fall on the backs of the working, the workers either, especially because, you know, and just want to bring up during the pandemic they were called front-line heroes, because in the line many of our workers caught COVID, and a handful of them unfortunately passed away. But also the men and women and those across the region who rely on reliable service to pick up their kid, go to the groceries and go to school, navigate the region.

The freezing of wages for transit workers, is short-sighted proposal that's being tossed around, and telling the workers their pay is frozen until further notice, in the midst of a national CDL shortage and an upsurge in violence towards transit workers, is a recipe for disaster. Newer workers will go elsewhere to find jobs with guaranteed pay raises and more safety; older workers will simply retire, and there will a undoubtedly a shortage of operators, mechanics and so forth.

Another proposal on the table to move millions of dollars in preventive maintenance funds to cover holes in the operation is dangerous and risks the lives and security of riders, workers and the system alike.

And the, lastly the fare increases will hit low-income, working-class and middle-class people the hardest. We need Metro to continue to work, we acknowledge the great work they have done so far to try push every elected official across the region, in the Commonwealth, in the State of Maryland and D.C. to help come up with a designated funding as well as to pursue a long-term dedicated funding measure. Local 689 members run a world-class and vital public service, let's not fund it with low-grade priority. Thank you.

16. Stewart Schwartz

Thank you, Chair Smedberg, appreciate this. Mv name is Stewart Schwarz. I am the executive director for the Coalition for Smarter Growth. We're a twenty-seven year-old non-profit. We're leading. leading an eighteen-group Metro funding, coalition focused on and teaming with business groups and ATU 689 to support more funding for the agency. We thank you all for your hard work to identify cost savings and efficiencies to reduce the operating budget gap and we thank the jurisdictions who have proposed \$480 million in additional operating funding for FY25. including \$130 million proposed by Virginia, split fiftyfifty with Northern Virginia. In this case, though, the State would only provide \$65 million: they're talking about \$84.5 million in the House for the following year.

But we urge our elected officials to do more to reduce and even close the entire gap. Failure to do so means the service cuts we've heard about tonight and fare hikes. impact on the workforce, delays in the capital program. It's honestly disappointing the state statute requires a fifty-fifty split on Virginia's share of WMATA funding and that the state's being asked to provide so little. We need to contrast this to the \$150 million appropriated last year as extra money for widening just eight miles of I-64 near Williamsburg, and \$322 million proposed to buy tolls down, not necessarily a bad cause, but they're also going to use \$130 million of that to cover unpaid tolls, including by some of the wealthiest folks, and they're going to take \$165 million from the proposed arena revenues, in the future, from Northern Virginia to bring to Hampton Roads. So it all contrasts with what they're willing to put in to Metro and we can do more.

strongly commit to Metro's commitment to We all-day. frequent, reliable, safe rail and bus service as the best way to increase ridership. In fact, Metrobus ridership has returned, much of it is now exceeding pre-pandemic levels, especially on weekends. And the Better Bus Initiative, including the bus network redesign offers an opportunity to Alexandria's transform our bus system, iust as transformation of DASH was so successful. Frequent all-day and rail service critical to all sectors of the bus workforce, providing access to jobs and opportunity, saving household transportation costs and attracting the next generation workforce, not to mention enhancing our economic competitiveness. Metro's key to supporting transit-oriented communities, and supporting car-free and car-lite living, reducing our greenhouse gas emissions. Numerous Fortune 500 companies have located here because of the Metro system.

Without additional revenues, we are going to face hard choices. We would love to see the service cuts and fare hikes minimized to the maximum extent possible, and as well the shift in capital funds to preventative maintenance. We also urge the region to come to an agreement by December '24 on the long-term solution, we can't wait any longer. And, you're focused on the issue, the region is committed to locating 75% of jobs and housing in high-capacity Metro stations, they've committed to 50% reduction in greenhouse gas emissions by 2030 and to addressing regional inequities and to focus on access to opportunity. Hard to do all of that without Metro. Thank you.

17. Mallory Brown

Hello, my name is Malloy Brown. I live in Ward Four, on the S2/S9 line. I'm a young professional working in Reston. Every day that I go into the office, I ride for three hours on the Metro and I'm one of many people who may end up without access to my place of employment due to the budget cuts you all are discussing today. I want to speak to the human aspects of these budget decisions. Most nights the buses I ride are packed full of tired, hard-working people, mainly people of color. I want to ask you, when the bus doesn't show up for these workers, when the train is so late that she might miss her shift, when he arrives at the Metro stop to find it closed because information about changing service is unreliable and hardly ever translated to Spanish, where do you want us to go? When budget cuts leave is us stranded on street corners in the freezing cold, how should we get home? We can't afford to pay for Ubers and Lyft, nor can the planet afford the emissions, nor can our patience afford the extra traffic.

The Metro is the lifeblood of the city and it's one of the most beautiful train systems in the entire U.S. It keeps the DMV economy running, it brings customers into the city and it brings workers safely home. The city as a whole will lose money if the Metro is cut. As it is, the Metro needs more funding, not less. Ironically, I was here late today in part because of Metro delays. Metro workers deserve higher raises for their labor, not freezes, as they are true public servants.

I also came today to demand that no one, especially not our elected officials, obfuscate the truth of the city budget situation to the people gathered here today. The truth is that the city has money to pay for the Metro, and I know that we do because the city has money enough for the paychecks of officers who pointed guns at Aaron Bushnell as he burned beside the embassy this week. The city has money enough for the weapons that they used to kill Antoine Gilmore as he slept in his car on Florida Avenue in 2021. While Mayor Bowser says that we have money enough to increase the already-bloated police budget and room to spare to give to foreign militaries committing genocide, we won't be lied to that the city can't be paying for our ride home on the bus.

I want to ask you, please, to keep fighting for more budget for the Metro. We rely on it. And I want to ask you to please show that Black and Brown lives matter to this administration. Please put the people and the planet over profits here. And it's shortsighted to say that we won't use money by cutting off the leaves of the tree that we use to survive in this city. The Metro is one of the few services that genuinely helps everyone. I love the Metro. I came here on the Metro. I wrote this on the Metro, and I want to see you invest in the Metro more. Thank you, so much, for hearing me and giving me the opportunity to speak today.

18. Dylan Harvey

I said, firstly, I want to begin by thanking you and every other supportive stakeholder throughout the region who had assisted in the creation and maintenance of our regional transit services. Originally, I actually had zero interest in speaking here. As a student who works at the Maryland legislature full-time, the last thing I wanted to do an hour after work is speak about something I've discussed at work.

But, I wanted to take a moment to stress the importance of creating communities that are less car-reliant and have stronger ties to alternative services such as Metrorail and the Metrobus. When my 2003 Acura TL with 300,000+ miles inevitably broke down became a pain like no other. The Green Line, as you all know, terminates in Greenbelt, so as a Laurel resident, I had to rely on an alternative service to gain access to the Metrorail system. This alternative service, at the time I thought, would be the 89M bus from South Laurel. But. due to the construction in mν communities, even though a bus route that is only two miles away from my house was a forty-four minute walk, or bike, or, there was no alternative bus to get there. My bus, the bus route that I had to use instead, was the RTA's 302, which took me to Greenbelt, then I had to catch the C2 to College Park. My car route to College Park was originally around twenty-five minutes, my bus route was an hour-andfifteen.

As a full-time student, I have to rely on an 8:15 shuttle from College Park to get to work every day. As a higherlevel employee now, that isn't sustainable anymore and I'm forced to Uber. But even when I try to go to class, I run into the inevitable barrier of someone of a lower income, of just not having access to the school that I got into and I currently try to pay for. It adds another burden upon me and I want to make sure that it's understood, I recognize that every single one of do not want to cut certain services and do not want a smaller budget. That's kind of the point of this whole hearing. And I didn't want to try and pretend like I had a better understanding of the budget than you all - I'm a policy student and I failed Econ - I'm not going to pretend like I do. But I just wanted to say that when you all advocate for a better budget or increased service, that we recognize that building communities that are more sustainable and more livable doesn't just help the residents there, it also helps WMATA's ridership.

19. Virgilia Collins

Hi, my name's Virgilia Collins. It's my third time here - I went to the one in Silver Spring and also D.C. And I just want you to know how important it is to have bus service where I live - I live in-between three Metrobus, rails - five bus lines, four of them are Metro buses. And, but before the Metrorails came to where I live, back in '95, I forgot what year they, it opened up, I used to work at nighttime, and I had to walk from D.C. into Maryland, you know, like Branch Avenue and Southern Avenue, or Southern Avenue, Naylor Road. And I've walked from Eastover Shopping Center – I live near Iverson Mall – and I've walked from Southeast, Southern Avenue near Wheeler Road and 23rd Parkway. This was at nighttime; those are long walks. And I used to have to work because I couldn't afford bus fare. And that took about an hour.

Then I used to live near the Hyatt-, near the Green Line Metro in Hyattsville before they brought the subway there, I had to walk if I missed the bus. On weekends, the buses stopped at eight-thirty or nine-thirty; so I had to walk and that took an hour. So, that's one of the reasons I don't want you to cut the rails, and as far as MetroAccess, the same thing. I caught the Metro train here and also vesterday when I went to D.C. And, but then when I went to Silver Spring, I could have caught the train, but I caught MetroAccess because I would've had to catch two buses and two trains, and I don't know how long that would've taken. So I'm saying that to say that I can't walk everywhere. I don't mind walking, but my health is deteriorating. When I was younger and I didn't have a problem walking, but now I can sometimes, it's hard for me to stand up, more or less walk, so that's another reason why I need the bus and MetroAccess.

And, as far as the fare. I think the last time, I mean, Metro fare, on the bus that is, didn't go up ever year. And when I started riding it, in '73, it was like a quarter and it went up forty cents and that was a lot of money back then. So, I don't know, if, I really don't have a problem with you raising the fare, you know, if it's just twenty cents. I don't know you said twenty cents or twenty percent, but if it's just twenty cents, think how long that's been from a quarter to now, two dollars. And if you were to raise the fare every year, divide fifty into two dollars, that's only about five cents, five cents a year, so I have no problem with that one. But, I just, my main concern is keeping the, not cutting the bus service and the Metrorail and maybe cutting back on how long, how often they run, but don't cut them out completely. Thank you.

20. Paul Semelfort

Good evening. I'm Paul Semelfort and I'm speaking as an individual tonight. I am a member of the Accessibility the MetroAccess Advisorv Committee and subcommittee chairperson. So, I'm speaking tonight, of course, about MetroAccess. I know there's been, sort of, a proposed cut to the service area. I know that you, at least for possibly next year, is going to be able to preserve it, which is but this type of cut should never, never great. be considered for the most vulnerable population who needs to get around.

And, being a teacher of students with disabilities, and hearing the person from the ARC in Silver Spring say, the same students I teach, you're cutting off our soul, you're cutting off our independence, our way of life. We don't have another way to get around; the majority of us do not have cars to get around. You're cutting off our life, when we do these types of changes. You know, I hear customers come to my meetings, saying, "I don't know whether or not I may be picked up to get to work or from my home if these changes to through." Or critical medical places. We're asking, begging, please we've got to find better ways to do this, and working with you to do that. And that's all I have to say.

Metro Hearing #658

Dockets B24-01 and B24-02: FY2025 Proposed Operating and Capital Budgets and FY2025-2030 Capital Improvement Plan

Virtual/Online Only

February 29, 2024

1. Kevin O'Brien

All right. Hello, everybody, my name is Kevin O'Brien - a DC resident and organizer with the Washington Area Bicyclist Association. Perhaps counterintuitively, I find being a bicycling advocate also means being a transit advocate, because the two modes complement each other directly and indirectly. Directly, transit, and Metrorail in particular, allows bicyclists like me to reach more corners of the region more quickly. A typical journey for me might be biking the one mile to my nearest Metro station, taking Metro across the Potomac into Virginia, and then bicycling another mile or two to my destination. The twenty-, thirty-, or forty-minute walk on each end of those journeys turns into an easy, breezy eight- or ten-minute ride.

Metro's embrace of bicycling, multimodal, over the last several years in the form of allowing bikes on trains at all hours, its thoughtful consideration of the unique needs of bicyclists and multimodal users in its new train car designs and the significant investments in bike storage at stations has truly been one of the most exciting developments for me since moving to the region nearly ten years ago.

But the indirect benefits of transit to bicycling are perhaps more consequential. Every person taking transit is a person who might otherwise be driving, and I think we can all agree that more cars on the road is the exact opposite of what our region needs. More cars worsen already bad congestion and saps valuable time from our daily lives. It increases carbon emissions and air pollution, with the burden falling most heavily on low-income communities and communities of color living nearest our highways. And it exacerbates the risks of roadway violence that continue to claim the lives of more pedestrians and bicyclists, year after year, despite promises from area leaders to stem the tide.

As a bicyclist, the last thing I want to see is an extra ten, fifty or a hundred thousand daily car trips as a result of reduced transit. If you care about the climate, if you care about livability, if you care about roadway safety and Vision Zero, then you have to care about Metro. We need to be putting more money into our transit system, expanding, rather than reducing service hours and frequency to get more folks out of their cars and onto transit. Cuts to service, especially Metrobus, means farther walks for riders, longer waits alongside often busy roadways, and more exposure to vehicular and other types of violence. Station closures means a smaller travel radius, a smaller world, for the tens of thousands of people just like me, without a car.

As a bicyclist, as an environmentalist, as a frequent transit rider, and most importantly as a resident who loves living her, I implore WMATA and our local jurisdictions to continue working to permanently right the fiscal ship to avoid, at all costs, these most drastic cuts and scenarios that have been proposed, and to avoid, to the greatest extent possible, any short-term budgetary sleight of hands that punts a long-term fix and risks future investments and repairs. Appreciate the work you've done and look forward to, um, getting closer.

2. Barbara Glick

Yeah, hi. I want to one hundred percent agree with what Kevin said, a hundred percent. Everything.

But I wanted to address something else. I wanted to address the fact that fares are being evaded, and it's not fair to cut services for those of us who pay for fares. I go on buses often and the fareboxes are not working. I try to pay, I'm trying to pay, most people are so happy that the driver just waves them back, don't pay if the farebox is not working. So, you have a lot of uncollected fares.

I'm tired of going into the Metro, seeing people just, right in front of the station manager, walk right over the, the, faregate, the gate. Why isn't that being addressed? Why isn't fare evasion being addressed? In Luxembourg, all public transportation is free, because of all the reasons that Kevin said. So, we should be increasing our, and this is going to... our access. Why aren't you addressing fare evasion? It's, it's so unfair for those of us who are honest. You know, you want to make it free for everybody? Fine. You want to give farecards to people who y'know are eligible? That's fine.

But the station managers should be empowered, they are disempowered to, to do anything. Right in front of them, they go right in front of them, I see it every day, many, many people, they go right over the fare, the uh, the thing. That's not being addressed, only fare increases are being addressed, and budget cuts. And this is going to unfairly punish those of us with lower income, who cannot, whether you have a car or not people should be riding public transit to get people off the road for all the reasons Kevin said. So, I would like to know why Metro is not addressing fare evasion. That's a big source of lost revenue, and it's not fair to continue this way without addressing that.

3. Andrea Toney

OK, my name is Andrea Toney, and I'm a chair of the Adults with Developmental Disabilities Citizens' Advisory Committee. We're a volunteer advisory committee created by the Maryland legislature and we're based in Prince George's County. We vehemently oppose the proposed Metrobus cuts in Prince George's County and resulting MetroAccess cuts, particularly in the Bowie, Mitchellville, Upper Marlboro and Laurel areas. We believe these cuts fly in the face of transit equity, since these cuts will create transit deserts for whole ZIP codes in places like Mitchellville and Bowie.

We understand that MetroAccess service is tied to fixed-route service and cannot fathom that WMATA planners have proposed cuts where Prince George's County citizens simply do not have any other alternative for transit service. We believe that the proposed bus cuts demonstrate a lack of concern for the citizens. with most vulnerable people developmental disabilities who use MetroAccess. People with developmental disabilities use MetroAccess to go to jobs, often minimum wage, to go to doctor's and therapy appointments, participate in federal and Maryland DDA-funded provider programs and self-directed activities, to shop and remain connected to their families and communities. We understand that simply cutting bus service might seem efficient, but cutting bus service to whole ZIP codes in Prince George's County will result in the creation of transit deserts, where citizens in Prince George's who rely on bus, a bus, or use MetroAccess will not be able to retain jobs, go to doctor's or therapy appointments, go to grocery stores, or do anything except stay at home.

The proposed cuts will hearken back to a time when people with developmental disabilities simply just stayed at home, did not work, were not full members of their community and are plagued by obesity and other health problems because of a lack of mobility. We recommend that WMATA planners consider other alternatives like: increasing bus headways systemwide or on multiple bus lines; lengthening bus routes rather than excluding whole ZIP codes in Prince George's County from any Metrobus and MetroAccess service; expediting the roll out of fare evasion devices and innovative ways to address this problem.

We believe that no municipality would simply recommend cutting police, fire, hospital, or other needed services for citizens in a certain ZIP code or neighborhood while other areas continue to receive these services. We do not believe that WMATA should exclude citizens in Mitchellville, Bowie and other areas of Prince George's County from receiving any Metrobus and any MetroAccess service as a cost-cutting measure. Transit service matters, people with developmental disabilities matter, and WMATA should not create transit deserts.

4. Mamie Small

Good afternoon. Thank you so much. I just want to bring it to your attention that these lines and the times that you are cutting for the riders that might be working to help their families at night and you're cutting the source of transportation at night. What kind of transportation can be provided for them to be able to get to and from work at night after hours or on weekends.

Is there a possibility that you could possibly do a MetroAccess for those people? They can call MetroAccess and make arrangements to have transportation to and from work late at night or on the routes that you are cutting so that they might be able to get to and from work to take care of their families. That is my comment.

5. Matthew Girardi

Good afternoon, all. My name is Mathew Girardi and I am Political and Communications Director for ATU Local 689 and I'm here to speak on Docket B24-02. Local 689 represents over 15,000 transit workers and retirees across the DC Metro area, including over 9000 dedicated and hard-working WMATA employees and retirees.

And, as we all know, our members, and our region faced unprecedented challenges over the last few years. Nonetheless, transit workers have faithfully stayed on the job and kept our region afloat, even through the worst pandemic in over a century.

Since then, we have seen reduced ridership, record inflation, increases in violence and a system pushed to the physical brink, with a stated deficit hundreds of millions of dollars deep. We have been the essential workers to the essential workers. Let me be clear, finding a solution to Metro's longterm and systemic funding problem is essential. It must include regional dedicated funding as well as finally putting real commitments to operating assistance on the table from the federal government. However, the solution cannot and must not fall on the backs of working-class people. It cannot fall on our members, who are, have been deemed front line heroes. Additionally it cannot fall on working-class people, who need reliable service to pick up their kids, to get to work, and to navigate this region.

Let me be clear, indefinitely freezing wages for transit workers, is a short-sighted proposal in this budget. Telling your workers their pay is frozen until further notice, in the midst of a national CDL shortage and an upsurge in violence towards transit workers, is a recipe for disaster. Newer workers will go elsewhere to find jobs with guaranteed pay raises and more safety; older workers will retire. Thus we will undoubtedly be facing a shortage of operators, mechanics and station managers that will translate into service cuts for the public. On a similar note, another proposal on the table is taking \$165 million in preventive maintenance funds to cover holes in operations. This practice is dangerous. And it risks the lives and security of riders, workers and the system alike.

I'll also say that large fare increases of between 12.5% to 25% will hit low-income, working-class and middle-class people the hardest. We need Metro to push as hard as it can to make sure that every elected official in this region knows how vital it is to fund Metro fully, and without these measures, including our federal partners. Local 689 members run a world-class and vital public service, let's not fund it like a low-grate priority. Thank you.

6.Cal Simone

Hi, I have a question before I start, and then I want to share my screen. So, my understanding, I think I understood that are saying you're not rolling back any of the bus routes that you're cancelling – is that right? Or are you still planning to eliminate a large number of bus routes? I just need that question answered. Because my comments, half of my comments are based on that. Alright.

So, my name is Cal Simone. I am not representing any organization. But I am a long-term resident of Ward 3, in Rock Creek West. I've been riding the buses since 1961 when buses were operated by DC Transit. So, the first part of my comments will pertain to three particular routes and I'm going to share my screen to do this.

Let's see… I'm going to try to figure this out as I go. Hopefully this will work. I have no idea if my screen is being shared. You can see a map? OK, good.

The first one is the M4, which you've probably gotten comments from before. Here is the before picture of our service, this is, I think, prior to the pandemic, at this point we only had three routes going through our area, this area up here, which is about to be turned into a bus desert. We had the E4, the M4 and the E6. The E6 is gone, and I'll let others comment on that, but you're proposing removing the M4, which now runs down Nebraska Avenue and all the way to Sibley. First of all, eliminating access to Sibley hospital, with the removal of that and the removal of the D6, there's no bus service, no DC bus service to Sibley.

Which, this neighborhood up here, that I'm circling my mouse around, is, is the highest concentration of seniors in the area. Many of them live individual homes, some of them live in apartment buildings, but they rely on transit. The M4 is also used by school kids, as was the E6 and the E4. Well, that leaves us in the new map, with just one map, which is the E4. And I also want to make sure that the E4 stays routed along McKinley Street and not rerouted to Military Road because that'll make this whole area, this whole triangle up here. So you have this big area which will turn into a bus desert, you know, and then this one down here, near Sibley, will be a bus desert as well. So those are my comments about those individual...

There's one more route, which is the L8; I don't have it on the map, but it's also gone from the new plan. There's no way to get from the District up to Kensington to Kaiser, for example. There's no easy way to get to Wheaton or Aspen Hill without having to do it.

And lastly, many of the changes require a bus, to a Metro, perhaps to another Metro, to another bus. I mean, to get from here to Wheaton would require a bus from here, around, Red Line all the way to Wheaton. It's nuts.

So, that's the first thing. I'm going to stop sharing my screen - how do I do that? Stop sharing, OK.

Last comments I'll make is about the general state of transit. The City of San Francisco, people keep comparing this city to other cities, this is 49 square miles, has, has a bus stop within a quarter mile of every single household in the city. I would love to see a bus that just snakes through Chevy Chase and snakes through some of these other areas, that just runs every twenty or thirty minutes that goes through the neighborhood, picking up people and taking them to the nearest Metro station, that would be great. In this case would be Friendship Heights.

Lastly, if the mayor wants to reduce reliance on cars, it cannot reduce bus service; we cannot reduce service near, nearly entirely to the largely concentration of seniors who depend on those cars. And as another speaker said before, bicycle service in those other cities, San Francisco, New York, only works if you have a robust bus system... That's my final comment that robust service is needed to support the bicycle network as well.

7. Kevin Hsu

Kevin Hsu, living in Loudoun County, representing myself. One suggestion that I had was that the two airports that MWAA, the Metropolitan Washington Airports Authoring manages, being National and Dulles, see a combined fifty million passengers as of 2023, so why not push for, like an additional \$15 user fee added to like every ticket, crossing, through those airports, which would immediately close the \$750 million gap. And if that's not allowed, lobby the FAA or Congress to allow for such transit-supporting fees. And unlike a gasoline tax, air travel isn't going away any time soon, such fees are... (unintelligible).

8. Melissa Schweisguth

Hi, thank you, sorry, I had to get out of a work meeting, just to jump off and do this call. So, thank you very much for taking my feedback, my name is Melissa Schweisguth and I live in Hyattsville, Maryland. That's, it's District 2 in Prince George's County, and really just wanted to express, you know, number one, concern for all the proposed cuts. And I want to let you know, I'm certainly, I have been advocating and I continue to advocate for full funding for Metro from my state. I'm begetting my county officials, also, to, to support that.

I'm very much a supporter of public transit, I count on WMATA to get to and from work. I wind up running and biking, bike commuting a lot, but definitely, you know, use it to get home. Have used the bus, have been really excited to discover some of, some of the bus routes. But I'm very concerned about the proposed cuts, particularly in Prince George's, proposing to eliminate 67 bus lines total, and 22 of those are in Prince George's County. Our county has a lot of lower-income individuals who really depend on bus transit. Our county is very dependent on WMATA for bus transit. So 22 of those routes you're proposing to cut are in our county. Also concerned about the Silver Line turnbacks, and the, particularly with the rail system shutting down at ten. We saw what, what those early shutdowns did to the economy and to folks, particularly working, working folks, shift folks before. If these cuts go through they'll impact about 14,000 people in my county, particularly the transit-dependent households in South County and along our Blue Line. So, I just wanted to ask you to please, please reverse these cuts. And please continue to advocate for full funding and help us advocate for full funding, and thanks for all you do. Thanks for taking my comments, I really appreciate it.

9.Heidi Case

Thank you so much. My name is Heidi Case. I live in the District, Ward 2. I was on, ten years ago, 2013-2015, on WMATA's Accessibility Advisory Committee. I am a wheelchair user. Since then, advocating for accessible transportation is one of my primary focuses. For the last three years, I chaired DC's Multi-modal Accessibility Advisory Committee, appointed by the mayor to advise DDOT on these kinds of issues. I've chaired, also in the last several years, the Taxi Accessibility Advisory Committee and worked closely with Christiaan Blake on Transport DC, the taxi alternative to MetroAccess.

I'm very concerned about some of the cuts, even under the newer projected budget. About a year ago, MetroAccess begin using taxis, and then eventually, even Uber, to prom-, as an alternative to... that they actually, utilized for specific MetroAccess trips, but none of them are vehicles that wheelchair users can have. So, for about a year now, that's been going on, and the inequity is that that was considered a pilot and everyone able to use that alternative got free trips, and no one in a wheelchair could. Some of Metro's reasons were not to pull the limited number of wheelchair cabs off the street.

Now, understand, in the new budget, you intend to ever increase those numbers. I'm concerned about further segregating wheelchair-user services from people who do not, and the difference in quality. When taxis and Uber does it, you can pick when you, and let them know when you want them to come. That doesn't happen for using MetroAccess vans. The concern I see in this newest budget about cutting escalator and elevator repair costs is concerning because I do use public transit whenever I can. I hear the time, I want to say, it costs you \$50 to take me on MetroAccess, free if I take bus and rail, so don't screw my ability to do that by cutting elevator repairs. That's not even fiscally responsible. Thank you so much for letting me speak.

10. Asha Madgison

Good afternoon. My name is Asha Madgison. The biggest problem is we take everything away from those that have nothing and give it to people that have more. We cannot completely cut routes or stations because people will not be able to get to work or will have to walk hours. Some people are already walking much more than half an hour. If this is passed, I will have absolutely no transportation on the weekend. It is better to decrease service on routes and Metro, rather than to eliminate them, so that everyone can get to work.

Similarly, fare evasion is the last thing we should be worried about. People do not evade because it is fun to jump the gate. They do it because they need to get work. The point of public transportation is to commute people, not to harass the poor. Again, it is better for it to be a little bit harder for everyone than to completely cut some people off.

It is ridiculous we're even having this conversation. We all, including the leaders of transportation, need to make so much more noise about taking military money and giving it to transportation. Vote for Marianne Williamson for president. Cease fire, now. Thank you so much.

11. Terry Powers

Hi, my name is Terry Powers. I'm a board member of the Sligo Creek Chapter of the NFB of Maryland. My big concern is MetroAccess. There are very many people that depend on MetroAccess to get to work, to get to medical appointments, to get to, like, you know, like activities, like meetings and social activities – that's the word I was looking for there. And MetroAccess depends on where the bus route is in regards to your home and we cannot afford to get these routes cut, because...

I'm a blind, multi-handicapped person and I depend on MetroAccess for, like long distances, like to get to my NFB meeting, to get to the airport when I need to go on a trip, or many other things that are far away that I cannot afford to take a cab to.

And I agree with almost everything that's been said here today. The subways and the buses are very important things for all of us and we do need to reduce all the cars that are on the road and try to use buses as much as possible. The other thing is these bike lanes that have been created are very dangerous for blind and multi-handicapped people. Whoever came up with this idea never, like spoke to handicapped people and looked into the dangers involved with how a blind person's supposed to cross those bike lanes to get to a bus stop. Same thing with a wheelchair.

I'm just trying to let people know that MetroAccess is a very, very important thing to us. Thank you.

APPENDIX B

CUSTOMER FEEDBACK ON PROPOSALS

Appendix B: FY 2025 Budget – Customer Feedback on Proposals

Summary Results of Survey Responses Collected from Metrorail and Metrobus Riders through Public Outreach Efforts

Office of Customer Research Document Date: 3/14/2025

Executive Summary of Public Feedback from Customer Survey

The survey received over responses from customers. For each budget proposal respondents were asked: "Are you in favor of the above proposal?" The percentages of "Yes" versus "No" answers are summarized below.

Metrorail Service Proposals

- Decrease Metrorail Hours of Operation: Yes- 5%, No- 90%.
- Increase Metrorail Hours of Operation Weekends Latenight: Yes- 87%, No- 6%.
- Increase Metrorail Hours of Operation Weekend in the Morning: Yes- 72%, No- 9%.
- Close up to 10 Stations: Yes- 9%, No- 73%.
- Turn back Silver Line trains at Stadium-Armory: Yes-30%, No-20%.
- Turn back every other Red Line train at Grosvenor-Strathmore and Silver Spring: Yes-30%, No-37%.
- Decrease service on all lines weekdays every 15 minutes: Yes-8%, No- 85%.
- Decrease service on all lines weekends every 20 minutes: Yes- 8%, No- 84%.
- Eliminate Weekday Rush Hour Service on all Lines: Yes-9%, No-80%.
- Reducing service on certain holidays: Yes-81%, No-12%.

Metrobus Service Proposals

Note: high percentages of customers were "not sure" about the bus proposals, most likely because they were not impacted.

- Eliminate Service on 83 of 184 routes: Yes-4%, No-83%.
- Reduce Service on 51 of 184 routes: Yes-9%, No-60%.
- **Decrease Hours of Operation:** Yes-16%, No-37%.
- Decrease Days of Operation: Yes-8%, No-55%.
- Decrease Frequency on Select Routes: Yes-11%, No-48%.

Executive Summary of Public Feedback from Customer Survey

The survey received over responses from customers. For each budget proposal respondents were asked: "Are you in favor of the above proposal?" The percentages of "Yes" versus "No" answers are summarized below.

Fare Proposals

- Up to 25% fare increase: Yes- 24%, No 65%.
- Increase parking rates by 20%: Yes- 42%, No- 36%.
- Change Bike Locker rental fee: Yes- 40%, No- 24%.

MetroAccess Service Proposals

- Reduced service area due to a reduction in fixed-route bus service: Yes- 11%, No- 77%.
- Decrease the MetroAccess Hours: Yes- 35%, No- 42%.

Capital Budget Proposal

87% of respondents were in favor of using the capital budget as described in the proposal.

Public Feedback on FY2025 Fare and Service Proposals

WMATA's Office of Customer Research, in collaboration with the Budget Project Team and the External Relations team, gathered feedback from Metrorail and Metrobus customers – via an online survey – on fare and service changes contained in the FY2025 Budget Proposal.

The survey was in field from February 9, 2024 to March 5, 2024. Over 8132 respondents provided feedback to at least one proposal this included 85 responses to the Spanish language version of the survey. The survey collected feedback on the following:

A. Fare Changes

- Proposed Changes:
 - Increase all fares by 25% (with \$2.50 base fare)
 - Increase daily parking fees by 20%
 - Change the rental fee structure for bike lockers to a daily fee

B. MetroAccess

- Proposed Changes:
 - Reduce the MetroAccess service area due to cuts in the fixed bus network.
 - Provide MetroAccess service hours with those of equivalent fixed route bus and rail services.

C. Metrorail

- Proposed Changes:
 - Close 10 lower ridership stations
 - Turn back every other Red Line train at Grosvenor-Strathmore and Silver Spring
 - Turn back Silver Line trains at Stadium-Armory
 - Decrease service on all lines weekdays every 15 minutes, weekends every 20 minutes
 - Decrease Hours of operation: Close the rail system at 10 p.m. or keep existing rail system hours and open earlier and close later on weekends: open at 6 a.m. on Saturdays and Sundays, close at 2 a.m. on Fridays and Saturdays

D. Metrobus

• Proposed Changes:

E. Capital Budget Proposal

- Eliminate service on 83 of 184 routes
- Reduce service on 51 of 184 routes
- Decrease hours of operation on 25 routes
- Decrease days of operation on 20 routes
- Decrease frequency of service on 16 routes

Contents

- I. Fare Proposals (Slides 6-12)
 - i. Increase all fares by up to 25% (with \$2.50 base fare) (Slide 7-8)
 - ii. Increase daily parking fees by 20%(Slide 9-10)
 - iii. Change Bike Locker Rental Fee (Slide 11-12)
- II. MetroAccess Proposals (Slides 13-17)
 - i. MetroAccess Proposal 1: Reduced Service Area (Slides 14-15)

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

I. Fare Proposals

471 of 552

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

Metro is proposing to increase all fares by 25%:

- Metrorail fares would range from \$2.50 to \$7.50 on weekdays
- \$2.50 Metrorail flat fare on late-night/weekends
- Metrobus would have a \$2.50 base fare with an express bus fare of \$5.30.
- Where appropriate, the transfer discount from rail-to-bus and bus-to-rail will increase to \$2.50.
- The MetroAccess fare cap would increase to \$5.95.

Pass product prices will increase by an average of 25%, with variations in increases ranging from 15% to 35%, depending on the type of pass (e.g., bus pass, unlimited pass) and its duration (e.g., 1-day, 3-day, 7-day).

Are you in favor of the proposal above?

Response: Increase all fares by 25% (with \$2.50 base fare)

	Response Count	Yes	No	Not Sure
Responses Weighted to Match System Demographics*	-	21%	70%	10%
All Survey Respondents (Unweighted)	4320	24%	65%	12%
Notable Subset:

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

Fare Proposal 2: Increase daily parking fees by 20%

Question

Metro is proposing a 20% increase in daily parking fees, monthly reserved parking fees, and the hourly parking rate, with daily and monthly prices varying based on the station you park at.

The following table summarizes these increases:

	Before	After	
Daily Parking	\$3.00 to \$5.20	\$3.40 to \$5.95	
Fees	φ3.00 το φ5.20	φ3.40 t0 φ3.95	
Monthly			
reserved	\$45.00 to \$65.00	\$54.00 to \$78.00	
parking fees			
Hourly parking	\$1.00	\$1.20	
rate	φ1.00	φ1.20	

Are you in favor of the proposal above?

Response: Increase daily parking fees by 20%

Fare Proposals 3: Change Bike Locker Rental Fee

Question

Metro is proposing changing the rental fee for bicycle lockers from a \$120 annual fee to an hourly rental fee of \$0.05 per hour, up to a maximum of \$1.00 per day.

Annual bicycle locker rentals will no longer be offered. Instead, access to bicycle lockers will be provided on a first-come, first-served basis and can be requested on demand.

Are you in favor of the proposal above?

II. MetroAccess Proposals

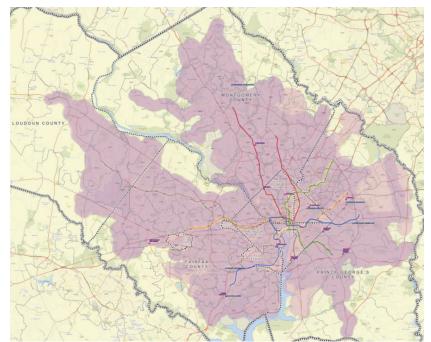

MetroAccess Proposal 1: Reduced Service Area

Question

Metro is proposing to shrink the MetroAccess service area due to cuts in the fixed bus network.

Federal law mandates paratransit service within ³/₄ of a mile of fixed route bus service and rail stations. About 20% of MetroAccess trips would be affected as they either exceed the current legally required service area or would fall outside it if the proposed FY25 budget bus and rail service cuts occur.

Are you in favor of this proposal?

Response: Reduced service area

	Response Count	Yes	No	Not Sure
Responses Weighted to Match System Demographics*	-	10%	78%	12%
All Survey Respondents	1108	11%	77%	12%

Protected Populations:				
Minority Respondents	340	6%	74%	20%
Low Income Respondents	205	5%	82%	14%

Question

If the proposal above were adopted, would that increase or decrease your likelihood of choosing MetroAccess over other travel options in the future?

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

MetroAccess Proposal 2: Decrease the MetroAccess Hours

Question

Metro is proposing to provide MetroAccess service throughout the same hours as equivalent fixed route bus and rail service.

As a reminder, Metro is considering two proposals for the rail system hours. The first option is to close the system at 10 p.m. every day. The second option maintains current hours but extends service on weekends, with the system opening at 6 a.m. on Saturdays and Sundays and closing at 2 a.m. on Fridays and Saturdays.

Metrobus routes will have varying hours, but almost all routes will still operate between 7 a.m. and 9 p.m. at a minimum.

As a result, the proposed service area of Metro Access will vary depending on the day and time.

Are you in favor of this proposal?

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

III. Metrobus Proposals

Metrobus Proposal 1: Eliminate Service on Metrobus

Question

Metro is proposing to eliminate the following Metrobus routes:

D.C.	Maryland	Virginia	
• 60	• 89M	• 1C	
• 74	• B21, B22	• 2B	
• 96	• B24	• 3F, 3Y	
• A31, A32, A33	• B27	• 8W	
• D2	• C11, C13	• 11Y	
• D6	• C12, C14	• 16Y	
• D31, D32, D33, D34	• D14	• 17B, 17M	
• D51	• F1	• 17G, 17K	
• E2	• F8	• 18G, 18J	
• G2	• F12	• 18P	
• H6	• F13	• 21C	
• K2	• F14	• 22A, 22F	
• M4	• G12	• 26A	
• M6	• H12	• 28F	
• P6	• J12	• 29G	
• S35	• K9	• REX	
• S41	• L8		
• U4	• NH2		
• U7	• P18		
• W1	• R12		
• W2, W3	• T2		
• W5	• V14		
• W6, W8	• W14		
• W45, W47	• Z2		
• X3	• Z7		
• X8			

Are you in favor of the above proposal?

Response: Eliminate Service on Metrobus

	Response Count	Yes	Νο	Not Sure
All Survey Responses Weighted to Match System Demographics*	-	5%	83%	11%
All Survey Responses Unweighted	6292	4%	83%	12%
Notable Subsets:				
Current Metrobus Riders	5355	4%	86%	10%
Current Riders of Proposed Routes	4678	2%	95%	3%
Protected Populations:				
Minority Respondents	1988	5%	83%	12%
Low Income Respondents	1125	4%	86%	10%

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information^{0,4}se⁵⁵² Slide 55.

Metrobus Proposal 1: Eliminate Service on Metrobus

Question

Would the above change increase or decrease your likelihood of choosing Metrobus over other travel options in the future?

Response: Eliminate Service on Metrobus

	Response Count	Increase Likelihood of Choosing Metrobus	Decrease Likelihood of Choosing Metrobus	No Impact on My Travel Choices
All Survey Responses Weighted to Match System Demographics*	-	3%	85%	12%
All Survey Responses Unweighted	5549	2%	88%	10%
Notable Subsets:				
Current Metrobus Riders	4828	2%	90%	8%
Current Riders of Proposed Routes	4541	1%	95%	3%
Protected Populations:				
Minority Respondents	1764	4%	86%	11%
Low Income Respondents	1025	3%	89%	8%

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Metrobus Proposal 2: Eliminate Metrobus Service on Parts of Route

Metro is proposing to eliminate certain routes, remove portions of routes or shorten routes where rail or bus transfers are available: The following routes or portions of routes would be eliminated or shortened where rail or bus transfers are possible: D.C. H8, H9 Eliminate Route H9: retain Route H8 V7, V8 Eliminate Route V7: retain Route V8 31.33 Service will terminate at Potomac Park near Foggy Bottom-GWU, excluding the previous stops at Federal Triangle and L'Enfant Plaza Metrorail stations, running between Friendship Heights and Potomac Park. 32, 36 Service will terminate at L'Enfant Plaza station, excluding the previous stops at Foggy Bottom-GWU, Farragut West, McPherson Sq and Archives stations, running between Southeast DC and L'Enfant Plaza. 42, 43 Service will terminate at Farragut Square, excluding the previous stops near Foggy Bottom-GWU, and at the Kennedy Center, running between Mt. Pleasant and Farragut Square 52, 54 Service will terminate at Metro Center station, excluding the previous stops at Smithsonian and L'Enfant Plaza stations, running between Takoma and Metro Center 62.63 Service will terminate at Georgia Ave-Petworth station, excluding the previous stops near U-Street, at Metro Center and at Federal Triangle stations, running between Takoma and Georgia Ave-Petworth 64 Service will terminate at Georgia Ave-Petworth station, excluding the previous stops near U-Street, at Metro Center and at Federal Triangle stations, running between Fort Totten and Georgia Ave-Petworth 80 Service will terminate at Union Station, excluding the previous stops near Chinatown, near Metro Center, at McPherson Sq and near Foggy-Bottom -GWU, running between Fort Totten and Union Station A4 Service will terminate at Congress Heights Station, excluding the previous stops northbound to Anacostia and southbound to WMATA Shepherd Parkway Metrobus Division, running between Fort Drum and Congress Heights Station G8 Service will terminate at Shaw-Howard U station, excluding the previous stops near Metro Center, at McPherson Sq and at Farragut Square, running between Avondale and Shaw-Howard U. L2 Service will terminate at the Duke Ellington Bridge, near the Woodley Park station, excluding the previous stops at Dupont Circle and at Farragut Square, running between Chevy Chase Circle and Duke Ellington Bridge. V4 Service will operate between Capitol Heights and Potomac Ave X9 Service will operate between Gallery PI-Chinatown and Minnesota Ave Maryland C21, C22, C26, Combine into Route C29, with weekday service between Addison Rd and Bowie State University, Saturday service between Addison Rd and Pointer Ridge; eliminate Sunday service C29 J1, J2 Eliminate Route J1; retain Route J2 R1, R2 Eliminate Route R1: retain Route R2 A12 Eliminate Sunday-only service extension between Addison Rd and Capitol Heights T14 Service will operate between New Carrollton and Mt. Rainie Virginia 1A, 1B Eliminate Route 1B: retain Route 1A 10A Combine with Metroway into one route between Huntington and Pentagon via Braddock Rd, Potomac Yard, Crystal City, and Pentagon City 16A, 16C, 16E Combine into one route which will operate seven days a week Combine with Route 10A into one route between Huntington and Pentagon via Braddock Rd, Potomac Yard, Crystal City, and Pentagon Metroway Are you in favor of the above proposal?

Question

Response: Eliminate Metrobus Service on Parts of Route

	Response Count	Yes	No	Not Sure
All Survey Responses Weighted to Match System Demographics*	-	9%	60%	31%
All Survey Responses Unweighted	6111	9%	60%	31%
Notable Subsets:				
Current Metrobus Riders	5220	8%	63%	29%
Current Riders of Proposed Routes	3223	7%	81%	12%
Protected Populations:				
Minority Respondents	1937	9%	63%	28%
Low Income Respondents	1086	7%	66%	27%

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Metrobus Proposal 3: Decrease Hours of Operation

Question

Metro is proposing that the following routes would no longer have service after 12 a.m. (midnight):

The following routes would no longer have service after midnight:				
Maryland	Virginia			
• A12	• 1A, 1B			
• C2, C4	• 7A			
• D12	• 16A, 16C, 16E			
• F4	• 28A			
• J1, J2				
• K6				
• L12				
• P12				
• T18				
• Y2, Y7, Y8				
• Z6, Z8				
The following routes would red those of Sunday.	uce its Saturday service hours to match			
Maryland				
• R4				

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Response: Decrease Hours of Operation

	Response Count	Yes	Νο	Not Sure
All Survey Responses Weighted to Match System Demographics*	-	15%	44%	42%
All Survey Responses Unweighted	6163	16%	37%	47%
Notable Subsets:				
Current Metrobus Riders	5265	15%	38%	46%
Current Riders of Proposed Routes	739	8%	86%	6%
Protected Populations:				
Minority Respondents	1955	15%	44%	41%
Low Income Respondents	1106	12%	47%	41%

Metrobus Proposal 3: Decrease Hours of Operation

Question

Would the above change increase or decrease your likelihood of choosing Metrobus over other travel options in the future?

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Response: Decrease Hours of Operation

	Response Count	Increase Likelihood of Choosing Metrobus	Decrease Likelihood of Choosing Metrobus	No Impact on My Travel Choices
All Survey Responses Weighted to Match System Demographics*	-	3%	51%	45%
All Survey Responses Unweighted	3677	2%	44%	54%
Notable Subsets:				
Current Metrobus Riders	3171	3%	45%	52%
Current Riders of Proposed Routes	681	4%	88%	8%
Protected Populations:				
Minority Respondents	1280	4%	51%	45%
Low Income Respondents	736	5%	55%	40%

Metrobus Proposal 4: Decrease Weekend Service

Question

Metro is proposing that the following routes would no longer have Saturday or Sunday (weekend) service:

The following routes would no longer have Saturday or Sunday (weekend) service:

D.C.	Maryland
• 42, 43 • 62, 63 • 64 • D4 • G8 • N2, N4, N6	• 83, 86 • C8 • V12 • Z6
The following lines would no longer	have Sunday service:
D.C.	Maryland
• H8	• C21, C22, C26, C29

Are you in favor of the above proposal?

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Response: Decrease Weekend Service

	Response Count	Yes	No	Not Sure
All Survey Responses Weighted to Match System Demographics*	-	7%	56%	36%
All Survey Responses Unweighted	6127	8%	55%	38%
Notable Subsets:				
Current Metrobus Riders	5231	7%	57%	36%
Current Riders of Proposed Routes	1911	1%	95%	4%
Weekend Metrobus Riders	3818	6%	64%	31%
Protected Populations:				
Minority Respondents	1935	7%	58%	34%
Low Income Respondents	1088	7%	60%	33%

Metrobus Proposal 4: Decrease Weekend Service

Question

Would the above change increase or decrease your likelihood of choosing Metrobus over other travel options in the future?

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Response: Decrease Weekend Service

	Response Count	Increase Likelihood of Choosing Metrobus	Decrease Likelihood of Choosing Metrobus	No Impact on My Travel Choices
All Survey Responses Weighted to Match System Demographics*	-	2%	66%	31%
All Survey Responses Unweighted	4142	2%	65%	33%
Notable Subsets:				
Current Metrobus Riders	3628	2%	68%	30%
Current Riders of Proposed Routes	1836	1%	96%	4%
Weekend Metrobus Riders	2780	2%	74%	25%
Protected Populations:				
Minority Respondents	1400	3%	68%	30%
Low Income Respondents	790	3%	71% 511	26%

Metrobus Proposal 5: Decrease Frequency of Service

The following route	s would have reduced frequency, increasing the time between buses:
D.C.	
80	Service will at least run every 20 minutes instead of 12 minutes, running every 20 minutes or better from 7 a.m. to 9 p.m. daily.
D8	Service will at least run every 30 minutes instead of 20 minutes, running every 30 minutes or better from 7 a.m. to 9 p.m. daily.
S2	Service will at least run every 30 minutes instead of 20 minutes, running every 30 minutes or better from 7 a.m. to 9 p.m. daily.
Maryland	
A12	Service will run every 30 minutes instead of 20 minutes
C21, C22, C26, C29	Decrease frequency to every 60 minutes on weekdays
D12	Service will run every 30 minutes instead of 20 minutes
L12	Service will run every 30 minutes instead of 20 minutes during off-peak and weekend hours.
P12	Service will run every 20 minutes instead of 12 minutes during weekends
Z6, Z8	Decrease combined frequency to every 30 minutes on weekends
Virginia	
28A	Service frequency will change to every 15 minutes on Saturdays and every 20 minutes on Sundays, compared to the previous 12-minute frequency.
29K, 29N	Service will run on each route every 60 minutes instead of 40 minutes

Question

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Response: Decrease Frequency of Service

	Response Count	Yes	Νο	Not Sure
All Survey Responses Weighted to Match System Demographics*	-	11%	53%	36%
All Survey Responses Unweighted	6061	11%	48%	41%
Notable Subsets:

IV. Capital Budget

Capital Budget

Question

The proposed capital budget for FY25 is \$2.6 billion, which is part of the six-year \$13.3 billion Capital Improvement Program (CIP) budget.

Metro's capital investments are focused on six categories: rail-cars and rail-car facilities; rail systems; track and structure rehabilitation; bus, bus facilities and paratransit; stations and passenger facilities; and operations and business support.

Are you in favor of proposed capital budget of \$2.6 billion for FY2025, to be used for the purposes described above?

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Response: Capital Budget

	Response Count	Yes	No
Responses Weighted to Match System Demographics*	-	82%	18%
All Survey Respondents	2743	87%	13%
Notable Subset:			
Current Metrorail Riders	2443	87%	13%
Current Metrobus Riders	1832	86%	14%
Protected Populations:			
Minority Respondents	842	83%	17%
Low Income Respondents	367	79%	21%

Capital Budget

Response: Budget Allocation

If the decisions were up to you, how would you allocate Metro's capital budget funds across the investment(s) below? (You get a total of \$100 dollars to spend).

Question

- Buying new railcars
- Buying new buses
- Buying new paratransit vehicles
- Administrative infrastructure (buildings and technology)
- Rail maintenance facilities
- Bus maintenance facilities
- Metrorail station
 improvements
- Bus loops and bus stop improvements
- Metrorail track and structure
 infrastructure
- Metrorail electrical systems (power, train control)

	Response Count	Buying new railcars	Buying new buses	Buying new paratransit vehicles	Administrative infrastructure (buildings and technology)	Rail maintenance facilities	Bus maintenance facilities	Metrorail station improvements	Bus loops and bus stop improvements	and structure	Metrorail electrical systems (power, train control)
Responses Weighted to Match System Demographics*	-	\$12.00	\$10.10	\$4.50	\$5.80	\$11.30	\$8.50	\$11.60	\$9.70	\$15.30	\$11.30
All Survey Respondents	2678	\$11.90	\$9.20	\$4.20	\$5.80	\$11.70	\$8.40	\$11.30	\$8.90	\$16.50	\$12.10
Notable Subset:											
Current Metrorail Riders	2385	\$12.10	\$8.80	\$4.00	\$5.80	\$11.70	\$8.30	\$11.40	\$8.70	\$16.80	\$12.30
Current Metrobus Riders	1798	\$11.00	\$10.40	\$4.20	\$5.60	\$11.20	\$9.30	\$10.70	\$10.80	\$15.30	\$11.50
Current MetroAccess Riders	195	\$10.10	\$11.50	\$6.10	\$6.40	\$11.90	\$8.70	\$10.40	\$13.60	\$11.60	\$9.70
Protected Populations:											
Minority Respondents	825	\$11.50	\$9.90	\$4.70	\$6.40	\$11.70	\$8.90	\$11.00	\$10.10	\$14.60	\$11.10
Low Income Respond ents	368	\$10.20	\$10.60	\$4.90	\$5.90	\$11.30	\$9.80	\$11.10	\$13.30	516 of 552	\$9.90

V. Budget Priorities

Budget Priority

Question

Considering the proposed changes mentioned above, would you prefer Metro to address its budget shortfall through fare/price increases (on Metrorail and Metrobus) or service cuts?

	Response Count	Strongly Prefer Fare Increase	Prefer Fare Increase	Neutral / No Preference	Prefer Service Cuts	Strongly Prefer Service Cuts
Responses Weighted to Match System Demographics*	-	35%	25%	24%	8%	8%
All Survey Respondents	7523	39%	27%	21%	8%	5%
Notable Subset:						
Current Metrorail Riders	6157	39%	28%	21%	8%	5%
Current Metrobus Riders	5410	41%	27%	20%	7%	5%
Current MetroAccess Riders	596	35%	21%	26%	8%	10%
Protected Populations:						
Minority Respondents	2292	34%	24%	25%	9%	9%
Low Income Respondents	1190	31%	23%	25%	11%	10%

Response: Budget Priority

*Note: These percentages would obtain if the survey responses were properly adjusted to match the demographics from the 2022/2023 Metrorail Passenger Survey and/or the 2018 Metrobus Passenger Survey. For more information, see Slide 55.

Survey Sample

IV. Overall Survey Demographics

	Survey Demographics	Responses	%
Race and Ethnicity	African American or Black	754	11%
	White (not Latino)	4434	64%
	Latino	721	10%
	Asian	673	10%
	Native Hawaiian or other Pacific Islander	18	<1%
	Other / Mixed Race	360	5%
Income	Less than \$30,000	753	12%

- * Low income is now determined using the Federal Poverty Guidelines, which take into account both family/household size and household income.
- Larger households typically require higher incomes to cover basic needs like housing, food, and healthcare. As the number of dependents in a household grows, so does the financial burden.
- Here's the threshold for low income in the DMV region.

Persons in Family/ Household	200 Percent of Poverty Guideline ¹
1	\$29,160
2	\$39,440
3	\$49,720
4	\$60,000
5	\$70,280
6	\$80,560

V. All Survey Responses Weighted to Match System Demographics*

The rows marked All Survey Responses Weighted to Match System Demographics* reflect Washington Metropolitan Area Metrorail ridership population.

The design of the weighting plan was based on onboard survey data collected by the 2022-2023 Rail passenger survey and 2018 Bus passenger survey.

Weights were applied to the dataset to help balance the demographics of the survey, including **matching the poverty level, race, and jurisdiction to the actual Metrorail and Metrobus ridership population**.

Title VI Equity Analysis

Attachment B

Title VI Equity Analysis – Service and Fare Changes FY2025 Operating Budget

I. Background

The Federal Transit Administration (FTA) requires that transit agencies conduct an equity analysis to determine whether proposed permanent major service changes or fare changes will result in a disparate impact (DI) to minority customers or a disproportionate burden (DB) to low-income customers (FTA Circular 4702.1B). This requirement stems from the Civil Rights Act of 1964 which states that, "no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance." The purpose of the analysis is to determine whether the adverse effects of proposed major service changes or fare changes are disproportionately borne by minority or low-income customers, and alternatively, whether the positive benefits of proposed major service changes or fare changes are disproportionately received by non-minority and non-low-income customers. Such a finding is known as a disparate impact (DI) to minority customers or a disproportionate burden (DB) to low-income customers.

II. <u>Overview</u>

Following the Board of Director's adoption of the Public Hearing Docket for proposed service and fare changes in January of 2024, Metro received additional funds for operations. Consequently, Metro will no longer significantly reduce service levels.

The Revised FY2025 Proposed Budget no longer includes changes to Metrobus service. It does include a number of Metrorail service changes aimed at improving service efficiency. The Budget also includes fare changes that impact both Metrobus and Metrorail customers. Staff completed the Title VI equity analyses required for these service and fare changes and determined that the proposed changes do not result in a potential disparate impact (DI) for minority populations or a disproportionate burden (DB) for low-income populations.

III. <u>Title VI Analysis</u>

A. Data Sources and Methods

Service equity analyses are conducted on service reductions and service increases separately. The analysis is conducted separately for each mode, Metrorail and Metrobus, at the systemwide level. To assess the impact, the proposal is first evaluated to determine the combined number of customers the service changes will affect. The ratio of minority/low-income customers affected is then calculated for this same group of customers using demographic data collected from passenger surveys.¹

As of fall of 2023, approximately 83 percent of Metrobus customers are minority and 60 percent are low-income.² On Metrorail, 46 percent of customers are minority and 19 percent are low-income.²

In 2013, Metro's Board of Directors approved³ the thresholds used to identify potential DI and DB for service changes. There is a potential DI or DB if the percentage of minority or low-income customers impacted by the changes exceeds the mode's average share of minority/low-income customers by more than the applicable threshold percentage shown below. The applicable threshold is determined by the total number of daily customers impacted.

Table One: DI/DB Service Thresholds

Total Daily Customers Impacted	Threshold for Significant Disparity
Up to 10,000	8%
10,001 to 20,000	7%
20,001 to 40,000	6%
Over 40,000	5%

To assess the impacts of fare changes, an average fare paid by bus and rail customers by demographic group is calculated. The data are then merged with passenger survey data⁴ for the same customers and/or fare categories to create an average fare paid by demographic group (minority vs. non-minority, low-income vs. non-low-income).

Future fares are calculated with the same approach, except that the proposed fare policy changes are used in place of the current fares. The current average fare is then compared to the new average fare to determine the percentage change in fare by demographic group.

In Resolution 2013-27, the Board of Directors approved a DI/DB threshold of five percent for proposed fare changes, meaning that the average fare increase for minority/low-income customers cannot exceed the average fare increase for non-minority/non-low-income customers by more than five percent.

¹ Data sources: 2022 Metrorail Passenger Survey, 2018 Metrobus Passenger Survey

² Defined as 200% of the federal poverty level, adopted by the Metro Board of Directors as part of Metro's Title VI Program in December of 2023

³Resolution 2013-27

⁴ Data sources: 2022 Metrorail Passenger Survey, 2018 Metrobus Passenger Survey

B. FY2024 Service and Fare Proposals

The Revised FY2025 Budget proposal contains several rail service changes and fare changes that are subject to Title VI equity analyses.

Table Two: Major Policy Direction – Rail Service⁵

	Orange Line: Weekday peak service to operate every 10			
	minutes, with off-peak weekday and weekend service to operate every 12 minutes.			
Rail Service	Yellow and Green Line Service: Operate every eight			
	minutes (instead of six minutes) on weekends.			
	Holiday Service: Operate late-night weekend frequencies all			
	day on some holidays. ⁶			

Table Three: Major Policy Direction – Fares

Weekdey Pail	Base fare increase from \$2.00 to \$2.25	
Weekday Rail Fares	Max fare increase from \$6.00 to \$6.75	
	Milage change Increase from \$0.40 to \$0.45	
Weekend and Base fare increase from \$2.00 to \$2.25		
Late-Night Rail	e-Night Rail Max fare increase from \$2.00 to \$2.50	
FaresMilage change increase from \$0.40 to \$0.45		
	Increase bus fare from \$2.00 to \$2.25	
Other Fares	Increase bus-to-rail transfer discount from \$2.00 to \$2.25	
	Increased price for 1-,3-,7-Day and Monthly Passes	
	No change in parking rates	

C. <u>Results of Analysis – Rail Service Changes</u>

The Metrorail service changes are designed to improve efficiency. These proposed changes will impact fewer minority and low-income customers than the mode average. The service equity analysis evaluates the demographics of those customers who would experience longer wait times from decreased service frequency. Because the proposed service changes affect rail customers, Metro then compared that percentage to the mode average for Metrorail (45.8 percent minority; 18.7 percent low-income). On any given service day, the number of impacted customers is above 40,000; therefore, the threshold

⁵ Note the proposal also includes a modification to the length of peak period service. However, this change in service levels does not result in a major service change as service levels are not decreased by more than 20% on any given line

⁶ The analysis includes Thanksgiving, Christmas and up to two other holidays that would see a reduction in service frequencies between opening and 9:30 PM

for a finding of potential DI/DB is five percent.

	Minority Impacted Trips	Low-Income Impacted Trips
Impacted Ratio	43.2%	17.9%
Mode Average	45.8%	18.7%
Difference	-2.7%	-0.8%
Threshold	5.0%	5.0%
DI or DB	No	No

Table Four: DI/DB Test, Metrorail Service Changes

As shown in Table Four, the proposal impacts a group of customers that are less minority and less low-income than the mode average. Therefore, there is no finding of a potential DI for minority customers or potential DB for low-income customers.

D. <u>Results of Analysis – Fare Changes</u>

For the fare equity analysis, the FY2025 Operating Budget proposal includes a weekday fare structure with a base rail fare of \$2.25, a milage charge of \$0.45 and a maximum fare of \$6.75. It also includes a change in the base late-night and weekend fare from \$2.00 to \$2.25, with an increase of up to a \$2.50 maximum fare for other distanced-based fares during late-nights and weekends. On Metrobus, the base boarding charge would increase from \$2.00 to \$2.25. The analysis also includes an increase in the bus-to-rail transfer discount from \$2.00 to \$2.25 as well as an increase to the price of 1-,3- and 7- Day Passes and Monthly Passes. The equity analysis evaluates whether the average fare increase for minority/low-income customers exceeds the average fare increase for non-minority/non-low-income customers by more than five percent.

Table Five: DI/DB Test, Fare Proposal

	Minority	Non- Minority	Low- Income	Non-Low- Income
Current Av. Fare	\$2.51	\$2.91	\$2.11	\$2.91
Proposed Av. Fare	\$2.82	\$3.28	\$2.39	\$3.26
Average Change	12.4%	12.5%	13.0%	12.3%
Difference	-0.1%		0.7%	
Threshold	+5.0%		+5.0%	
DI/ DB	Νο		No	

As shown on Table Five, the proposal would increase the average fare paid by minority and non-minority customers by about the same amount. Therefore, there does not appear to be a potential DI to minority customers. The proposal would increase the average fare paid by low-income customers slightly more (by 0.7 percent) than their nonlow-income counterparts. However, since the difference is less than five percent, there is not a potential DB to low-income customers.

Appendix

Major Service Changes – Rail

Table A1: Metrorail Major Service Change Definitions

Parameters	Metrorail Definitions
Frequency	Any reduction in service relative to all-day (non-rush hour) approved service levels on any rail line
	Any increase in service of more than 20% on any rail line
	Any reduction in weekday rush hour service more than 20% on any rail line
Span	Change in span of 30 minutes or more
Coverage/ Availability	Any change in service pattern
,	Complete and permanent scheduled station closure for one or more days in a week; opening of a new station.
	Addition or abandonment of a line

Table A2: Metrorail Major Service Changes – FY2025

Parameters	Metrorail Definitions
Frequency	Changes in frequency Green, Yellow and Orange Lines
	Operate late-night weekend frequencies all day on some holidays

Attachment E

SERVICE AND FARE CHANGES

Metrorail Service Changes

1. Decrease Orange Line Frequency

Reduce Orange Line headways to every 10 minutes during the A.M. and P.M. Rush, from every 7.5 minutes on average. Reduce headways to every 12 minutes during off-peak hours, from every 10 minutes. Late night service would continue to operate every 15 minutes.

2. Decrease Weekend Green and Yellow Line Frequency

Reduce weekend service on the Green and Yellow Lines on weekends to every 8 minutes from opening to closing, from every 6 minutes until 9:30 p.m. and every 7.5 minutes after 9:30 p.m.

3. Decrease Duration of A.M. and P.M. Rush Service on all lines

Rush service would operate for approximately 2 hours each during the morning and afternoon rush hours, between approximately 7 a.m. to 9 a.m. in the morning and 4 p.m. to 6 p.m. in the afternoon.

4. Decrease Service on Select Holidays

Operate the rail system with Weekend Late Night service levels throughout the day during select low-ridership holidays, including Thanksgiving Day, Christmas Day, and up to two more holidays.

Line	<u>All Day Service</u> Weekdays	A.M./P.M. Rush Weekdays only 7-9 a.m. and 4-6 p.m.	<u>Late Night</u> <u>Service</u> Weekdays	<u>All Day</u> <u>Service</u> Weekends	<u>Late Night</u> Weekends
Red	6 min	5 min	10 min	6 min	10 min
Green, Yellow	6 min	6 min	7.5 min	8 min	8 min
Blue, Orange, Silver	12 min	10 min	15 min	12 min	15 min

FY2025 Metrorail Service Levels

All Day Service: Baseline service frequency from opening to 9:30 pm, seven days a week A.M./P.M. Rush Service: Increased service frequency between approximately 7 a.m. to 9 a.m. and 4 p.m. to 6 p.m., Monday-Friday

Late Night Service: Service frequency from 9:30 p.m. to Closing seven days a week

Fare Changes

1. Fares

Regular Metrorail and Metrobus fares are proposed to increase by 12.5%, resulting in a Metrorail fare range from \$2.25 to \$6.75 on weekdays and a \$2.25 base Metrobus fare. Late night and weekend Metrorail fares are proposed to increase by up to 25%, resulting in a fare range from \$2.25 to \$2.50. The MetroAccess fare cap is currently twice the Metrorail/Metrobus base fare. As a result of the proposed base fare change, the MetroAccess fare cap would increase by 12.5% to \$4.50.

2. Pass Products

Pass product prices will be increased as shown in the table below.

3. Parking Rates

No changes to parking fees are proposed. Metro is equipping bicycle lockers with an hourly rental feature, with a proposed rate of \$.05 per hour up to \$1.00 per day.

		FY2024 Fares/Fees	FY2025 Fares/Fees
Metro	rail Regular Fares ¹		
1	Boarding charge (up to 3 miles)	\$2.00	\$2.25
2	Composite mileage charge over 3 miles	\$0.40	\$0.45
3	Maximum fare	\$6.00	\$6.75
4	Reduced fare for senior/disabled/Metro Lift	\$1.00 - \$3.00	\$1.10 - \$3.35
Metro	rail Late Night and Weekend Fares ²		
5	Boarding charge (up to 3 miles)	\$2.00	\$2.25
6	Composite mileage charge over 3 miles		\$0.45

INDIRECT COST RATE PROPOSAL Table of FY2025 Budgeted Indirect Cost Rates

For FY2025, Metro prepared and submitted an Indirect Cost Rate Proposal (ICRP) to the Federal Transit Administration (FTA) on December 30, 2022. FTA provided provisional approval of the FY2025 ICRP dated April 3, 2024.

For FY2024, Metro prepared and submitted an ICRP to the FTA on December 29, 2022. FTA provided provisional approval of the FY2024 Indirect Cost Proposal dated June 14, 2023 to be applied for the period of July 1, 2023 to June 30, 2024. Given the respective timelines of budget formulation and ICRP submittal and FTA review, the FY2025 Budget Development used the rate set that was provisionally approved on June 14, 2023. The FY2025 ICRP, if approved as submitted, will establish the set of rates shown in the table below labeled FY2025 Rates. WMATA plans to apply the FY2025 rate set when approved by FTA. Until such approval, the FY2025 Provisionally Approved rate set shall be applied.

FY2024 Provisionally Approved Rates

Department/Area	Indirect Cost Rate
Access Services, Mode 10 – Paratransit (ACCESS)	200.35%
Bus Services - Transportation, Mode 01 (BTRA)	27.34%
Bus Services - Vehicle Maintenance, Mode 01 (BMNT)	38.06%
Rail Transportation Administration, Mode 02 (RTRA)	40.36%
Rail Maintenance, Mode 02 (CMNT)	62.17%
Rail Infrastructure and Facilities, Mode 02 (INFR)	59.61%
Metro Transit Police Department (MTPD)	41.00%
Customer Service, Communications, and Marketing (CSCM)	88.75%
Office of Inspector General (OIG)	64.25%
Blended Rate	42.48%
Overall Indirect Cost Rate with Carry-Forward	55.06%

FY2025 Provisionally Approved Rates

Department/Area	Indirect Cost Rate
Operating Labor (Combined BUS, RAIL, ACCESS, MTPD, CSCM)	46.33%
Office of Inspector General (OIG)	51.46%
Capital – Design/Engineering/Construction	50.08%
Capital – Other	49.52%

In executing the FY2025 Capital Budget and Six-Year CIP, Metro shall use the approved rate set shown above in anticipation of FTA's approval of the FY2025 ICRP. If FTA requires changes to the rate set as part of their approval, Metro shall use the FTA-approved rate set so long as the application of any FTA-approved rate set does not increase operating subsidy or capital contributions.

Federal Transit Administration REGION III Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia 1835 Market Street Suite 1910 Philadelphia, PA 19103 215-656-7100

April 3, 2024

Ms. Yetunde Olumide Chief Financial Officer Washington Metropolitan Area Transit Authority 600 Fifth Street, NW Washington, DC 20001

Re: FY 2025 Indirect Cost Rate Proposal - Provisional Approval

Dear Ms. Olumide:

This letter is written in response to Washington Metropolitan Area Transit Authority's (WMATA) FY 2025 Indirect Cost Rate Proposal (ICRP) dated December 21, 2023. FTA has contracted the services of Dickey & Associates, a Financial Management Oversight Contractor (FMOC), to perform the review of the submission.

In order to allow sufficient time for the review process, FTA is issuing a provisional approval of the FY 2025 ICRP until the review is complete. The blended indirect cost rate of 47.07%, as proposed in WMATA's FY 2025 ICRP and outlined in the table below, is provisionally approved by FTA for application to direct labor charged to FTA grants during WMATA's Fiscal Year 2025. This provisional approval will be in effect from July 1, 2024 until a final approval is provided but no later than June 30, 2025.

	FY20	25 PROJECTED INDIRECT		FY 20	25 PROJECTED DIRECT LABOR	INDIRECT COST RATE
Operating	\$	365,943,102.00	Operating Labor	\$	789,864,742.00	46.33%
Operating-OIG	\$	2,280,229.00	OIG	\$	4,431,384.00	51.46%
Total Operating Indirect Costs	\$	368,223,331.00	Total Operating Direct Labor	\$	794, 296, 126.00	46.36%
Capital-Design/Eng-Const	\$	41,321,049.00	Capital-Design/Eng-Const	\$	82,504,650.00	50.08%
Capital-Other	\$	63,666,420.00	Capital-Other	\$	128,573,171.00	49.52%
NET INDIRECT COSTS		473,210,799	NET LABOR EXPENDITURES		1,005,373,947	47.07%

FTA will inform WMATA of any necessary adjustments to the ICRP after the FMOC's review is complete and issue a final approval once all adjustments are made.

Ms. Olumide April 3, 2024

If you have any questions, please contact Kelly Tyler in the Washington, DC Metropolitan Office at (202) 366-3267 or via e-mail at kelly.tyler@dot.gov.

Sincerely,

Three Store for Carlos Control of Control of

Terry Garcia Crews Regional Administrator

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY Debt Management Policy Guidelines April 2024

I. Introduction

Section 101. Purpose

These Debt Management Policy Guidelines (the "Policy Guidelines") document the Washington Metropolitan Area Transit Authority's ("WMATA" or the "Authority") goals for the use of debt instruments and provides guidelines for the use of debt for financing the Authority's infrastructure and capital projects and other operational purposes. The Authority's overall guiding principles in issuing debt is to (a) identify transactions that utilize debt in the most efficient manner, (b) make timely debt service payments, and (c) achieve the lowest possible cost of capital and maintain high credit ratings and access to the capital markets.

Section 102. Authority, Scope and Review

WMATA is an interstate compact agency, and an agency and instrumentality of the District of Columbia, State of Maryland, and Commonwealth of Virginia. WMATA's continuing power to issue revenue bonds is set forth in Article IX of the Compact. Notwithstanding any provision of these Guidelines to the contrary, all debt obligations of WMATA will comply with the requirements of the Compact as well as all other applicable laws, regulations, and Board Resolutions.

These Policy Guidelines will be reviewed annually by the WMATA Board of Directors (the "Board") and any changes to the Policy Guidelines must be presented to and approved by the Board.

Section 103. Administration of Policy Guidelines

Both the Executive Vice President and Chief Financial Officer and the Vice President and Treasurer will be responsible for managing, implementing and reviewing the Policy Guidelines and recommending appropriate debt offerings including, if necessary, debt comparison analysis to the General Manager and Chief Executive Officer from time to time.

Section 104. General Best Interest of Authority

The General Manager and Chief Executive Officer will bring to the Board for approval prior to closing, any deviations from the Policy Guidelines that may be appropriate to address 1) changing financial goals, 2) emerging financial products/debt structures and 3) unique market opportunities.

II. General Debt Issuance Policies

Section 201. Use of Debt

WMATA will issue bonds for any lawful purpose. Bonds issued to fund WMATA's capital program may be used to fund expenses incurred on any project in the approved Six-Year Capital Improvement Plan, so long as bond proceeds are fully spent in accordance with applicable federal tax laws and regulations. Bond proceeds will not be used for ongoing operating needs except as provided for in this section. WMATA may use a mix of pay-as-you-go and debt to finance capital projects and other short and long-term financial needs of the Authority. The financing purpose will guide the type of debt WMATA uses, which may include:

Long-Term Debt: Long-term bonds/notes (instruments with a maturity of more than two years are preferred for financing essential capital activities including the acquisition, construction and rehabilitation of major capital assets. WMATA may issue Long-Term Debt with a maturity of forty (40) years or for a term equal to 120 percent of the average reasonably expected economic life of the CIP projects financed by tax-exempt bond proceeds, whichever is less.

Short-Term Debt: WMATA may use short-term bonds/notes (instruments with a maturity of two (2) years or less) as a cash management tool to provide interim financing to bridge temporary cash flow deficits within a fiscal year in either the operating or capital budget, and/or to reduce interest rate costs. Short-term debt obligations may include commercial paper, grant anticipation notes, working cash notes, variable rate bonds, bond anticipation notes, lines of credit as well as any other appropriate instruments.

Variable Rate Debt: In addition to fixed rate debt, WMATA may issue bonds/notes with a variable interest rate to 1) diversify its debt portfolio, 2) reduce interest costs, 3) improve its match of assets to liabilities, 4) provide budgetary relief or 5) allow grant funding flexibility to accommodate changes in debt service levels. The aggregate amount of WMATA's outstanding unhedged long-term variable ratedebt, however, is not authorized to exceed 20% of its outstanding long-term debt.

Direct Borrowing: Where direct borrowing/lending (such as TIFIA loans) would prove more economically beneficial, WMATA will consider direct loan obligations. However, WMATA will only proceed with a direct loan transaction if the transaction creates tangible benefits to WMATA.

Bond Premium: Bonds can be sold at par or as premium bonds or discount bonds. If bonds are sold with a premium, the premium shall be deposited to a Cost of Issuance Account to pay bond issuance costs, and, if applicable, any

residual premium will be transferred to a Capitalized Interest Account topay any capitalized debt service on the bonds; and, any further residual premium will be deposited into the Project Fund specific to that bond issue.

When issuing Gross Revenue Bonds, WMATA will attempt to "right-size" the issue so as to minimize any excess premium derived after covering 1) bond issuance costs; 2) and capitalized debt service, if any. Any remaining premium will be deposited to the project fund to satisfy the CIP Project Fund requirement.

Section 202. Financing Purposes

The Authority may issue debt for either new money or refunding purposes.

New Money Bonds: New money bonds may be issued to provide additional funding for essential capital activities or other activities suitable for bond financing, as detailed under Use of Debt.

Refunding Bonds: WMATA may issue refunding bonds to achieve debt service savings on its outstanding bonds by redeeming high interest rate debt with lower interest rate debt. WMATA may structure the savings from these bonds on a uniform, proportionate or accelerated basis depending on the Authority's financing goals. When refunding outstanding bonds, the Authority will generally seek a per bond net present value savings guideline of 3% based on market conditions. Refundings with lower savings rates may be appropriate to maximize overall financial objectives. Notwithstanding the above, the 3% savings guideline will not apply for bonds with a call date between one and three years from their stated maturity.

In certain instances, it may be advantageous for WMATA to issue refunding bonds that do not produce positive economic savings but serve to restructure debt or retire a bond issue in order to remove undesirable bond covenants. Prior to issuing such refunding bonds, WMATA will evaluate the benefits (both intangible and tangible) as well as the economic costs and compliance with existing bond covenants for approval by the Board.

Section 203. Issuance Processes

There are three basic processes for the issuance of long-term bonds:

• **Jurisdictional Capital Contribution Debt**. This form of debt may be issued using the process contained in the applicable Capital Funding Agreement which may provide for an opt-in option for the funding jurisdictions and formal agreement by the opting-in jurisdictions to fund that debt service. The security for these bonds will be WMATA's Gross Revenues as defined in the applicable bond resolution.

Dedicated Funding Debt. This form of debt may be issued with the approval of the Board without any jurisdictional input. The security for these bonds shall be the Dedicated Funding contributions received from the District of Columbia, the State of Maryland, and the Commonwealth of Virginia pursuant to the following legislative enactments: (a) from the District of Columbia under D.C. Official Code § 1-325.401 or any successor statute, as the same may be amended from time to time in the future;(b) from the State of Maryland under Md. Transportation Code Ann. § 10-205(g) or any successor statute, as the same may be amended from time to time; and (c) from the Commonwealth of Virginia under the Va. Code §33.2-3401.B or any successor statute, as the same may be amended from timeto time. Dedicated Funding shall also include funds paid by any of the District of Columbia, the State of Maryland, the Commonwealth of Virginia or any other Participating Jurisdiction in-lieu-of such amounts.

 Debt Secured by Other Revenue Sources. WMATA may issue debt secured by othersources of revenue not described above. The approval of the Board is the only approval necessary unless the source of revenue is from one or more of the local funding jurisdictions; in which case, those jurisdictions will have the same rights as under Jurisdictional Capital Contribution Debt.

Section 204. Combination of Security for Bonds

WMATA may issue bonds with one or more types of security provided that the issuance requirements and process for each type of security is met.

Section 205. Borrowing Capacity

In addition to complying with the financial covenants for outstanding Gross Revenue Transit Bonds authorized under the 2003 Gross Revenue Bond Resolution (2003-53) and subsequent supplemental resolutions and other applicable bond resolutions, the Authority will manage its debtto ensure sufficient revenues are available to meet its obligations under its various liens. WMATAwill monitor debt capacity and analyze impact of additional debt on the Authority's short- and long-term debt capacity. Any debt cap will be based on the overall needs of the Authority and the Debt Service Coverage requirements contained in anyapplicable bond resolution.

Senior and Junior Liens for each revenue source will be utilized in a manner that maximizes critical constraints, including cost and capacity, thus allowing for the most beneficial use of the revenue for the most efficient security structure. Prior to each lien, the Authority's Board will approve a maximum annual debt service ((MADS) ratio of pledged revenue divided by annual debt service) or other debt service coverage requirement necessary to satisfy the constraints.

Section 206. Use of Short-Term Debt

Short-Term Debt may be issued by WMATA. Lines of Credit not used for credit enhancement may be used for interim funding of the approved capital program or to ameliorate the impact of any shortfall in the Operating budget. When used in the capital program, the costs of such usage shall be charged to the applicable capital program or project. When a Line of Credit is used to ameliorate the impact of any shortfall in the Operating budget, the costs of such usage, including interest, shall be paid solely out of the Operating budget and charged to the jurisdiction or jurisdictions causing the need to use the Line of Credit or charged pursuant to the applicable subsidy formula when the use of the Line of Credit is from a non-jurisdictional requirement but never from any capital funds.

All forms of Short-Term Debt must be approved by the Board of Directors before closing; except thatLines of Credit meeting the following parameters may be issued without further Board action:

- Aggregate amount not to exceed \$500 million;
- The interest rate shall not exceed the then-current 30-day Secured Overnight FinancingRate ("SOFR") (or any generally accepted substitute for SOFR) plus margin of up to 7.00% per annum (calculated on the basis of an actual 360-day year);
- Have a term which is less than two years;
- Fees and transaction costs paid by WMATA on a Line of Credit may include the fee types and transaction costs contained in the existing Line of Credit program in effect upon passage of this policy and additional fee types and transaction costs (and each in amounts) which are reasonable and customary for the industry at the time of entering into a new or renewed Line of Credit; and
- If financial institution indemnification is required as a condition of

the Line of Credit, such indemnification shall have already been granted by the Board of Directors.

Section 207. Credit Ratings

WMATA's credit ratings goal is to achieve the best economic benefit from the Authority's debt issuances by attaining appropriate balance between minimizing borrowing cost and maximizing financial flexibility and result.

For existing bond programs, WMATA will attempt to maintain or improve current credit ratings without adversely affecting levels of debt that may be issued for any particular program. For new bond issuances, WMATA will generally seek investment grade ratings from at least two Nationally Recognized Statistical Rating Organizations. However, WMATA acknowledges that as market conditions and financing needs evolve, so should the Authority's credit ratings strategy. WMATA may accept a lower rating (and thus incur a modest financing cost differential) in order to gain flexibility needed to effect significant policy initiatives. The Authority will periodically review its credit rating strategy to see if market or capital plan developments warrant a revision in WMATA's approach to its ratings.

WMATA will strive to communicate regularly with rating agencies. As requested, the Authority will provide information to rating agencies, arrange regular conference calls to update rating analysts on significant financial developments and communicate with rating agencies prior to each WMATA public bond offering.

Section 208. Subordinate Liens

WMATA may determine that for some of its revenue sources it may be advantageous to issue subordinate lien debt. However, WMATA will only proceed with subordinate lien debt if the transaction creates tangible benefits to WMATA and is approved by the Board.

Section 209. Tax Status

WMATA has a preference for issuing debt on a tax-exempt basis to take advantage of interest costs savings compared to issuing taxable debt. However, WMATA may issue debt on a taxable or tax- exempt basis.

Section 210. Credit Enhancement

WMATA may secure credit enhancement for all or a portion of each bond issue. Credit enhancement may include municipal bond insurance or a letter/line of credit (which shall not be covered by Section 206 of this Debt Policy). The Executive Vice President and Chief Financial Officer or designees shall recommend use of credit enhancement considering such factors as economic benefit of the enhancement, and future secondary market trading conditions. WMATA will not secure credit enhancement unless the premium cost is less than the present value of the projected interest savings or if such credit enhancement improves capital market access and/or facilitates liquidity in the secondary market for the securities. For municipal bond insurance, or other forms of credit enhancement which are paid for with an upfront premium, WMATA will analyze the economic benefit both to the maturity of the bonds and to the first optional redemption date.

WMATA may also fund a debt service reserve fund to enhance the marketability of its bonds.

For bond issues that require a debt service reserve fund, WMATA may purchase a surety bond policy or letter of credit to satisfy the reserve fund requirement in lieu of funding.

III. Sustainability and Environmental, Social and Governance (ESG) Debt

As a mass transit system, WMATA promotes low carbon emissions and an environmentally friendly "green" platform encompassing its operations and infrastructure. The Authority's debt collateral attracts investors who want to contribute to its sustainable business model and may have mandates to invest in a socially responsible manner.

WMATA is under no obligation to certify any debt issuance as environmental, social or governance "ESG" bonds or as a compliance requirement, and can solely rely on its energy efficient and emissions reduction asset base to qualify its debt as "green" and socially responsible.

As WMATA fulfills its socially responsible objective with programs such as Metro Access, fares for low-income and disabled customers, subsidized student fare programs, and outreach programs to the low income and non-banked community, WMATA's investor relations, when appropriate, will emphasize its positive impact in the community to the Authority's investor base and highlight the Authority's federal mandate to serve lower income customers.

Debt issuances, when logical, are permitted to be marketed and labeled as "green", "sustainable", or ESG investment opportunities to potential investors. WMATA will leverage this marketing advantage to lower its cost of funds and/or to diversify investors when possible as the ESG market continues to grow worldwide.

IV. Method of Sale and Use of Professionals

Section 401. Method of Bond Sale

The General Manager & Chief Executive Officer or his designee may choose between the following three different bond sale methods: negotiated, competitive and private placement. A competitive sale is the preferred method of sale unless market conditions at the time of sale indicate a negotiated or private placement sale will result in lower overall cost to WMATA. In such cases, Board approval is required to proceed with a negotiated sale or private placement.

Factors which may be considered when determining the most efficient bond sale method include:

Bond market conditions	Bond structure	Market timing
Credit demand	Credit acceptance	Credit ratings
Use of proceeds	Bond size	Financing complexity
Desire to negotiatebond covenants	Credit enhancement participation	Credit Complexity

Section 402. Selection of Bond Financing Professionals

Bond Financial Advisory Professionals including firms that provide financial advisory and underwriting services to WMATA in connection with the issuance of debt shall be selected on a competitive basis to create pools of qualified vendors. The Executive Vice President and Chief Financial Officer or her designee have been delegated the authority to select Bond Financial Advisory professionals. The Authority will strive for diversity and provide opportunity for DBE firms, veteran owned, and other minority and women-owned firms as part of each underwriting team.

WMATA will select and retain at all times one or more independent registered municipal advisors (IRMAs) to review financing ideas provided to the Authority by Bond Underwriting Professionals. Further, concurrently with the planning for a debt issue, WMATA shall obtain the services of Bond Financial Advisory Professionals and, as needed, Bond Underwriting Professionals.

In addition to the above, WMATA may periodically solicit separately for specialized services, including short-term lending products, based on the financial needs of the Authority and market factors at the time of the solicitation. As the

market for financial institutions offering short-term lending products to governments evolve, WMATA may solicit bids for short-term borrowing programs from firms meeting the Compact requirements and whom the Authority deems viable at the time of the financing. WMATA requires its Bond Financial Advisory Professionals to provide services in accordance with all currently applicable Municipal Securities Rulemaking Board (MSRB) rules and any subsequent MSRB rulings or requirements.

V. Derivatives

Section 501. General Policy

Interest rate swaps and options (Swaps or Derivatives) are appropriate management tools that can assist WMATA to meet important financial objectives. Properly used, these instruments can help WMATA increase its financial flexibility, provide opportunities for interest rate savings, enhanced investment yields, or reduce interest rate risk through more effective matching of assets and liabilities. Derivatives for commodities used by WMATA also provide opportunities for financial benefit. The Executive Vice President and Chief Financial Officer or her designee must determine if the use of any Swap or hedging instrument is appropriate and warranted given the potential benefit, risks, and objectives of the Authority.

- WMATA may consider the use of a derivatives if it achieves one or more of the following objectives:
 - Provides specific risk mitigation not otherwise available;
 - Produces greater than expected interest rate savings or incremental yield over othermarket alternatives;
 - Results in improved capital structure or better asset/liability match.
- WMATA will not use derivative products that are speculative or create extraordinary leverage or risk; lack adequate liquidity; provide insufficient price transparency; or as investments.

WMATA will only do business with A+ or higher rated counterparties or counterparties whose obligations are supported by A+ or higher rated parties.

Section 502. Interest Rate Derivative Policy

Financial transactions using Swaps or other derivative products used in lieu of a fixed rate debt issueshould generate greater projected savings than the typical structure used by WMATA for fixed rate debt.

• WMATA will limit the total notional value of interest rate derivatives to an amount not toexceed twenty percent of total outstanding fixed rate debt and 100% of variable rate debt.

Section 503. Commodity Derivative Policy

WMATA is authorized to hedge or execute contracts for diesel fuel, electricity, CNG, carbon credits, and other commodities (excluding financial derivatives discussed above) that have a direct business relationship to WMATA's operations but not to exceed 95% of the expected use of the commodity to provide budget stability.

VI. Disclosure

WMATA will periodically review the requirements of the MSRB and the recommendations of the Government Finance Officers Association ("GFOA") including the GFOA recommendation that financial statements be prepared and presented according to generally accepted accounting principles.

The Authority will also comply with Rule 15c2-12 by filing its annual financial statements and other financial and operating data on the Electronic Municipal Market Access (EMMA) repository for the benefit of its bondholders within the timeframe required under each financing. WMATA will make its financial statements, annual budget and official statements available on its investor relations website. The Vice President and Treasurer will comply with all SEC requirements for disclosure by providing annual financial information and notices of material events as outlined in the Continuing Disclosure Agreement executed for each series of bonds.

VII. Post Issuance Considerations

Section 701. General Compliance Requirements

WMATA will comply with all debt covenants and comply with all post issuance tax requirements as detailed in the individual tax compliance certificate executed in connection with each bond or note sale. Specifically, WMATA will comply with Federal tax law to establish and maintain the exclusion from gross income tax on the Authority's bonds. WMATA will particularly focus on arbitrage requirements and will evaluate and ensure compliance with all applicable tax law during the debt issuance process, and on an ongoing basis thereafter, monitoring the Authority's debt portfolio in light of regulatory changes an case law, including arbitrage rules, including the Authority's arbitrage rebate position and any attendant rebate liability, as defined in § 148 of the Internal Revenue Code.

Section 702. Investment of Bond Proceeds

WMATA will invest the sale proceeds of its bonds in accordance with the provisions of the WMATA Compact and the Internal Revenue Code. WMATA will invest bond proceeds in a manner that allows proceeds to be available when needed. Interest earned on the investment of bond proceeds shall be deposited in the Project Fund applicable to bond proceeds.

Section 703. Trustee Relationships and Monitoring of Trustee Activities

The Vice President and Treasurer is responsible for monitoring trustee activities made on behalf of WMATA on a quarterly basis.
