Report by Finance and Capital Committee (B) 04-25-2024

Washington Metropolitan Area Transit Authority Board Action/Information Summary

Action O Information	Document Number: 205720	Resolution: ● Yes ○ No
----------------------	-------------------------------	---------------------------

Presentation Name:

Recommendation of FY2025 Budget and FY2025-2030 CIP

Project Manager:

Yetunde Olumide

Project Department:

Finance

Purpose/Key Highlights:

The FY2025 Recommended Budget and FY2025-2030 Capital Improvement Program advance our Strategic Transformation Plan goals of **service excellence**, **talented teams**, **regional opportunity and partnership**, and **sustainability**. **Metro's service and safety improvements are working**. In FY2024, service improved, crime decreased, and ridership grew as Metro continues toward the goal to deliver the modern, world-class transit system the region deserves **Metro is focused on optimizing service to deliver the most useful network within available resources**. Staff will present and recommend approval of the FY2025 Operating and Capital Budgets and FY2025-2030 Capital Improvement Program, the Public Hearing Staff Report, the FY2025 Title VI Equity Analysis and Debt Management Policy Guidelines.

Interested Parties:

No interested parties identified.

Background:

Metro plays a pivotal role in the economic vitality of the National Capital Region, supporting revitalization and connecting customers to new activity centers. As the region grows, public transportation will be critical to local businesses, residents and visitors. Dedicated capital funding in 2018 enabled Metro to address long-neglected work, returning the system to a state of good repair. However, the pandemic destabilized the existing operating model, both reducing ridership and triggering historic inflation.

In February 2023, Metro adopted its Strategic Transformation Plan *Your Metro, the Way Forward*. The plan identified four strategic goals: **Service Excellence**, **Talented Teams**, **Regional Opportunity & Partnership**, and **Sustainability**. This plan was developed by the Board of Directors and Metro management to guide decision-making over the next three years. The plan establishes clear priorities for Metro, expands transparency around performance metrics, and promotes collaboration with our teams and partners.

Metro's goal is to provide the region with a world-class integrated transit system offering all-day, safe, customer focused service through modernized vehicles and infrastructure. While recent service improvements, simpler fares, and renewed emphasis on customer experience are growing ridership and customer satisfaction, additional targeted investments in transit are needed for the region to meet its economic, mobility, housing, environmental and growth goals.

Rising inflation, as well as the subsidy reduction Metro provided to the jurisdictions amid the pandemic crisis, has eroded the value of Metro's operating and capital funding significantly contributing to the operating deficit. Despite proactive management actions taken by Metro to control expenses, Metro faced a structural funding operating shortfall of \$750 million in FY2025, a deficit equal to more than 25 percent of the operating budget. This deficit is primarily driven by three categories: the jurisdictional subsidy credit provided in 2020, inflationary pressures driving higher labor and non-labor expenses, and the decline of revenue due to lower ridership.

Discussion:

The WMATA Compact requires Metro adopt a balanced budget annually. In December 2023, staff presented the FY2025 GM/CEO's Proposed Budget to the Board of Directors that confronted the fiscal deficit within the existing subsidy funding model through substantial service cuts and fare increases. Following coordination with jurisdictional partners, Metro revised its FY2025 operating budget based on additional funding from the jurisdictions to avoid the severe service cuts from the initial FY2025 Proposed Budget.

The FY2025 Proposed Budget presented an unrecognizable Metro due to unprecedented service cuts across all modes to close the operating deficit. The FY2025 proposed service cuts to Metrobus included a decrease in service by approximately 33 percent in each jurisdiction, with 67 Metrobus lines eliminated entirely and a reduction in service on 41 lines. Metrorail service cuts included longer headways across the system, turnbacks on the Red Line and Silver Line, the closure of 10 stations, and a 10 p.m. closing time across the system. MetroAccess service was reduced to reflect only the legally required service area and hours based on the decreased Metrorail and Metrobus service levels. Additionally, the FY2025 Proposed Budget included a 25 percent increase in fares and 20 percent increase in parking fees. Closing this deficit through major service cuts and fare increases risked halting the ridership recovery and included steep reductions in maintenance, police presence, and customer service functions. Customers would have faced severe crowding, longer police response times, and more frequent elevator and escalator outages. These service cuts were below current capacity needs and would likely have triggered a death spiral of a loss of ridership, detrimentally impacting the region through worse traffic, reduced access to jobs and opportunities, and more pollution. In addition, these budget cuts threatened to eliminate over 2,200 Metro positions.

Fortunately, in collaboration with jurisdictional partners, the necessary funding will be provided to prevent these draconian cuts. Service across all modes in the FY2025 Recommended Budget will continue FY2024 Approved Budget service plans levels with only modest changes. As part of its forward-looking plan, this FY2025 Recommended Budget will optimize service through targeted rail service cuts and a redesigned bus network focused on delivering the most useful network with available resources. Metro is adapting rail and bus service frequency to how customers travel, increasing customer access to jobs and opportunity, and managing railcar and bus fleets to deliver high asset utilization. Targeted service changes and fare adjustments from the FY2024 Approved Budget include modest increases in headways for the Orange Line peak, off-peak and weekend service, as well as a slight increase to the Green and Yellow Line weekend headway. Additional adjustments to the FY2024 Approved Budget include increased use of six-car trains and a two-hour peak period. Further, the sustainable fare policy will increase weekday fares across all modes by 12.5 percent and reduce fare evasion with system-wide investment in new faregates and increased fare enforcement. Late night and weekend fares for Metrorail will increase by up to 25 percent, resulting in a fare range from \$2.25 to \$2.50.

Metro's ridership continues to recover from the impacts of the pandemic demonstrating significant year-over-year gains; however, changes in the mix of trips has reduced average fares and passenger revenue below budgeted amounts. As post-pandemic ridership patterns continue to evolve, ridership projections are updated. Based on current patterns, Metro projects ending FY2024 with 232.5 million trips. Due to targeted service cuts and fare increases, the FY2025 Recommended Budget projects 226.6 million trips, slightly lower than FY2024 current projections though above the FY2024 Approved Budget ridership of 223.7 million trips.

Jurisdictional partners have committed an additional \$463 million above the legislatively mandated three percent subsidy increase to sustain operations and support continued growth. The FY2025 Recommended Operating Budget is \$2,335.2 million (excluding debt service and reimbursables), a 30 percent increase from the FY2025 Proposed Budget, and prevents the reduction of over 2,200 positions. The FY2025 Recommended Operating Budget gross expenses (expenses before preventive maintenance transfers) are flat compared to the FY2024 Operating Budget. Robust financial management continues to identify operating and administrative efficiencies to ensure proactive management of expenses. Reductions in consulting services and related contracts, savings in digital transformation, improved asset management and administrative efficiencies have yielded an additional \$50 million in savings in FY2025 without impacting safety or direct services. In addition, Metro will implement a salary and wage freeze in FY2025 for non-represented positions.

The FY2025 Recommended Budget adopts a regional approach that requires collaboration and contributions from all stakeholders:

Metro: Salary and wage freeze, recurring administrative efficiencies, and other capital administrative efficiencies resulting in \$113 million in savings for FY2025

Customers: At least 12.5 percent fare increase on regular Metrobus, Metrorail, and MetroAccess beginning in FY2025, and up to 25 percent on late nights and weekends (\$2.50 cap)

Jurisdictions: Additional jurisdictional operating investments to help close the budget gap

Additionally, Metro will increase the use of preventive maintenance to fully close the operating deficit in FY2025. Preventive maintenance expenses originate in the operating budget but are eligible for reimbursement from the capital budget, subject to Federal Transit Administration (FTA) approval. The annual budget establishes the maximum amount of preventive maintenance costs to be transferred from the operating budget to the capital budget. While this can provide relief on the operating budget, it decreases capital funding for infrastructure projects and will accelerate Metro's looming capital deficit.

In addition to expenses to fund Metrorail, Metrobus and MetroAccess operations, the total FY2025 Recommended Operating Budget also includes \$72.2 million in debt service and \$15.3 million budget in reimbursable projects for a total recommended operating budget of \$2,422.7 million.

The FY2025 Recommended Capital Budget is \$2,567 million, including debt service and revenue loss from capital projects. Although Metro's FY2025 Capital Budget is currently fully funded, future funding constraints will shrink the capital program, leaving state of good repair and modernization needs unmet, as well as reduce reliability. Metro is currently projecting an \$11.1 billion (excluding revenue loss from capital projects and debt service) Capital Improvement Program (CIP) for FY2025-FY2030. While this CIP addresses critical overdue needs, it results in a declining capacity for state of good repair and modernization investments especially when dedicated funding debt capacity is exhausted.

Metro advances capital projects and annual capital maintenance programs to restore, sustain, and modernize the system. The program also includes annual preventive maintenance transfers from the operating budget to the capital budget. Priorities of the six-year capital plan include:

- Investing in the system to modernize and provide safe, efficient, and reliable service for customers, employees and the region
- Addressing the backlog of overdue state of good repair needs
- Sustaining safety and reliability through recurring maintenance, rehabilitation, and replacement programs

- Maintaining financial stewardship and ensure audit compliance
- Reducing capital administrative expenses (by \$25 million annually)
- Supporting a sustainable and more equitable future for the region

As the available capital funding decreases, Metro becomes unable to address more and more state of good repair needs, increasing the backlog and jeopardizing the safety and reliability of the system through recurring asset failures. Excessive use of preventive maintenance transfers reduces capacity for other capital investments in the long-term, putting at risk priority investments such as the full-scale Heavy Repair and Overhaul Facility, the 8000-Series Fleet of the Future, Zero-Emission Buses and Garages, Next-Gen Automation and Signaling, and the Blue/Orange/Silver Corridor.

Metro's \$5.0 billion combined FY2025 Recommended Budget incorporates targeted service adjustments and fare increases, as well as continued cost reductions and robust financial management for both operating and capital expenses. Metro remains dedicated to providing the region with world class service that advances regional goals, meets our customers' needs and provides a sustainable future.

Public Participation

Four public hearings, three in-person and one virtual, were held to solicit public feedback on the FY2025 Proposed Budget as well as revisions to the Proposed Budget based on jurisdictional commitments for additional funding.

Title VI Equity Analysis

Title VI Equity Analysis for changes in the FY2025 Recommended Budget concluded no potential disparate impact on minority or low-income riders.

Funding Impact:

Board action is required to approve the FY2025 Budget and the FY2025-2030 CIP. FY2025 Operating Budget Impact - \$2.4 billion FY2025 Capital Budget Impact - \$2.6 billion FY2025 Total Impact - \$5.0 billion

Previous Actions:

Staff presented the GM/CEO FY2025 Proposed Budget to the Board of Directors in December 2023.

In January 2024, the Board of Directors authorized Metro to conduct public hearings and public participation activities on the FY2025 Proposed Operating and Capital Budgets. The public engagement sessions were conducted in February 2024.

Next Steps:

Staff will begin implementation of the FY2025 budget following approval by the Board of Directors.

Recommendation:

Approval to: Accept the FY2025 Budget, Public Hearing Staff Report and Title VI Equity Analysis

SUBJECT: ADOPTION OF FISCAL YEAR 2025 OPERATING AND CAPITAL BUDGETS, FARE AND SERVICE CHANGES, AND FISCAL YEAR 2025-2030 CAPITAL IMPROVEMENT PROGRAM, APPROVAL OF TITLE VI EQUITY ANALYSIS AND PUBLIC PARTICIPATION REPORT, AND APPROVAL OF DEBT MANAGEMENT POLICY GUIDELINES

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, Compact Sections 23 and 24 require the Board of Directors to adopt a balanced capital budget and a balanced operating budget each year; and

WHEREAS, The Board has reviewed and considered the General Manager and Chief Executive Officer's proposed fiscal year (FY) 2025 operating and capital budgets and FY 2025-2030 Capital Improvement Program (CIP); and

WHEREAS, Pursuant to the Public Participation Plan, the Board of Directors held four public hearings on February 26, 27, 28 and 29, 2024 (one was held in an area served by the Northern Virginia Transportation Commission pursuant to VA Acts of Assembly Ch. 854 Enact. Cl. 8 and one held virtually), on the proposed FY 2025 operating and capital budgets, the fare and service changes, and the FY 2025-2030 CIP as well as public outreach for the Title VI equity analysis; and

WHEREAS, Following the public hearings, staff prepared a Public Participation Report (Attachment A) and Title VI equity analysis (Attachment B) on the proposed service and fare changes using the data from the new ridership survey, which showed that the proposed changes do not result in a disparate impact on minority populations or a disproportionate burden on low-income populations; and

WHEREAS, The Passenger Rail Investment and Improvement Act (PRIIA) funding which was re-authorized in Sections 30019(b) and (c) of the Infrastructure Investment and Jobs Act of 2021 requires the Secretary of Transportation to use \$5 million of the PRIIA allocation to WMATA exclusively for WMATA's Office of Inspector General (OIG) for each fiscal year in which WMATA makes available \$5 million in non-federal funds for use exclusively by the OIG; and

WHEREAS, The WMATA Dedicated Funding Grant Agreement with the District of Columbia requires the Board to consider whether the most recent approved Federal Transit Administration indirect cost rates described in Attachment G are appropriate to apply to the capital program funded by the contributing jurisdictions; and

WHEREAS, The WMATA Dedicated Funding Grant Agreement with Maryland requires the Board to adopt a debt management policy and then review and approve that policy annually; and

WHEREAS, The proposed FY 2025 capital budget includes the issuance of debt (including the issuance of bonds) as a partial funding source; and

WHEREAS, WMATA intends to reimburse itself from bond proceeds, if and when issued, for eligible expenditures on CIP projects incurred before the issuance of the bonds noted as debt in Attachment F of this resolution to the extent permitted by the Internal Revenue Code of 1986 and applicable IRS regulations; and

WHEREAS, In June 2010, the Board adopted a ³/₄ mile zone from fixed route service for the provision of MetroAccess Service (Res. 2010-31); and

WHEREAS, Pursuant to the 24-hour Metrobus reimbursable agreement, WMATA is providing the District of Columbia Metrobus service levels above the existing service plans as of July 2023 and WMATA plans to continue to provide such additional service so long as the District of Columbia continues to fund such additional service or until there is a change in the operating subsidy formula or a network-wide service revision;

WHEREAS, Legislation has passed in the legislatures of the Commonwealth of Virginia and State of Maryland to suspend the 3% annual limit on increases to their respective shares of WMATA's operating budget subsidy for FY 2025;

NOW, THEREFORE, be it

RESOLVED, That the Board of Directors approves the Public Participation Report on the proposed FY 2025 operating and capital budgets and FY 2025-2030 Capital Improvement Program, set forth in Attachment A; and be it further

RESOLVED, That the Board of Directors approves the Title VI equity analysis set forth in Attachment B; and be it further

RESOLVED, That the Board of Directors adopts the FY 2025 operating budget (inclusive of all operating reimbursable projects) of \$2.4 billion, with revenues, expenses, and subsidies detailed in Attachments C and D using the Board-approved subsidy formulae; and be it further

RESOLVED, That the Board of Directors adopts the fare and service changes set forth in Attachment E with the Rail Service changes becoming effective June 1, 2024, to assist with the Summer 2024 Red Line Construction; and be it further

RESOLVED, That the ³/₄ mile zone for the provision of MetroAccess service in Resolution 2010-31 is suspended until June 30, 2026, to freeze the existing paratransit service area as it exists and allow staff to evaluate the impact of Metrobus service changes on paratransit service; and be it further

RESOLVED, That the Board reserves the right, as part of this public hearing process, to revise fare and service changes approved in this Resolution prior to July 1, 2024, based on changes in the amount of funding from the jurisdictions but no changes shall exceed those contained in the public hearing docket for this public hearing process; and be it further

RESOLVED, That the General Manager and Chief Executive Officer or designee is authorized to negotiate and execute a reimbursable agreement for the District of Columbia to fully fund the operational costs of the Daily 24-Hour Metrobus Service Reimbursable Program, substantially in the form as was approved by the Board in Resolution 2023-36; and be it further

RESOLVED, That \$533,633 from the District's existing Reimbursable Operating Agreement paid in WMATA's FY 2024 will be recognized and applied in WMATA's FY2025 for the purposes of continuing the 24-Hour Overnight Bus Network in the District of Columbia; and be it further

RESOLVED, That the Board of Directors adopts the FY 2025 capital budget of \$2.6 billion and the FY 2025-2030 Capital Improvement Program of \$13.3 billion as set forth in Attachment F; and be it further

RESOLVED, That the Board of Directors adopts the Debt Management Policy Guidelines, as shown in Attachment H; and be it further

RESOLVED, That the Board of Directors authorizes the General Manager and Chief Executive Officer, the Executive Vice President and Chief Financial Officer, or their designees to: 1) execute agreements with municipal finance professionals, including underwriters; and 2) draft preliminary bond offering documents for the issuance of tax exempt Dedicated Revenue Bonds through a negotiated sale method in a principal amount not to exceed the amount of debt contained in the adopted FY 2025 capital budget; and be it further

RESOLVED, That the Board of Directors authorizes staff to reimburse itself from bond proceeds, if and when issued, for eligible expenditures on Capital Improvement Program projects incurred before the issuance of the bonds noted as debt in Attachment F of this

resolution to the extent permitted by the Internal Revenue Code of 1986 and applicable IRS regulations; and be it further

RESOLVED, That as required by Section 30019(c) of the Infrastructure Investment and Jobs Act of 2021, which amends the requirements of the Passenger Rail Infrastructure Investment Act, at least \$5 million of non-federal funds shall be provided from the operating budget for use exclusively by the Office of Inspector General in addition to any other non-federal funds necessary to match any unspent Passenger Rail Infrastructure Investment Act funds allocated for the use of the Office of the Inspector General from a prior fiscal year; and be it further

RESOLVED, That the Board of Directors approves one or more transfers in an aggregate amount not to exceed \$181.4 million of operating expenses from the FY 2025 operating budget to the FY 2025 capital budget for the payment of eligible preventive maintenance expenditures so transferred; and be it further

RESOLVED, That the Board of Directors has considered the use of the most recent Federal Transit Administration-approved indirect cost rate set and directs staff to apply that indirect cost rate set as described in Attachment G to all projects, including those funded by jurisdictional capital contributions in the FY 2025 capital budget; provided, however, staff is authorized to apply the proposed FY 2025 rate set so long as it does not exceed the most recent FTA-approved rates, and further provided, that if the FTA approves a different rate set during the fiscal year then that new rate set shall be used without further action of the Board of Directors so long as the new rate set does not cause an increase in the subsidy paid by any jurisdiction; and be it further

RESOLVED, That the Board of Directors authorizes the General Manager and Chief Executive Officer to reprogram up to \$10 million in capital funding to support operating revenue losses caused by service disruptions associated with major capital projects; and be it further

RESOLVED, That \$72.2 million of debt service payments resulting from the issuance of Series 2017A, 2017B, and 2018 bonds are due from and allocated to the participating jurisdictions as set forth in Attachment D; and be it further

RESOLVED, That the table in Section 601 of the Procurement Guiding Principles (Attachment A to Res. 2021-07) entitled "Non-Procurement Activities Requiring Board Approval" is amended by deleting the fourth bullet ("Nonannual State or Federal Grants with match requirements") under the "Other" column; and be it further

RESOLVED, That in order to implement the FY 2025 capital budget and the FY 2025 operating budget, the General Manager and Chief Executive Officer, the Executive Vice President and Chief Financial Officer, or their designees are authorized to: (1) file and execute grant applications and accept grants or other financial assistance on behalf of WMATA for funds from the federal government or any other public or private entity

regardless of whether a local match is required without further action by the Board of Directors, so long as the acceptance of such grant or other financial assistance does not result in the increase in expenditures above the approved FY 2025-2030 Capital Improvement Program or the approved FY 2025 operating budget or otherwise require approval by the Board of Directors; (2) conduct public hearings at any time during FY 2025 in furtherance of the implementation of the FY 2025-2030 Capital Improvement Program; and (3) execute and file the annual Federal Transit Administration Certifications and Assurances as a prerequisite to the submission of federal grant applications; and be it finally

RESOLVED, That to allow staff to timely apply for FY 2025 grants, this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

i.

EXECUTIVE SUMMARY

Metro focuses on providing safe, reliable, and affordable transit to the region; however, the Fiscal Year 2025 (FY2025) proposed budget approved by the Board for public feedback reflected a \$750 million deficit. The proposed FY2025 budget included plans to eliminate the deficit through:

- various cost-saving measures, including cutting inefficient service and administrative operations;
- increasing fares;
- performing cost-saving initiatives;
- seeking additional support from other jurisdictions; and
- shifting funds from other programs.

During the public comment period, jurisdictional partners worked to secure additional funding while Metro collected feedback on the original budget proposal.

Details about the proposed service changes can be found in the FY2025 Budget Staff Report and in WMATA Docket B24-01: Proposed FY2025 Capital Improvement Program and Federal FY2025 Grant Applications; and B24-02: Proposed FY2025 Operating Budget and Associated Service and Fare Proposals, which are posted online at <u>wmata.com/budget</u>.

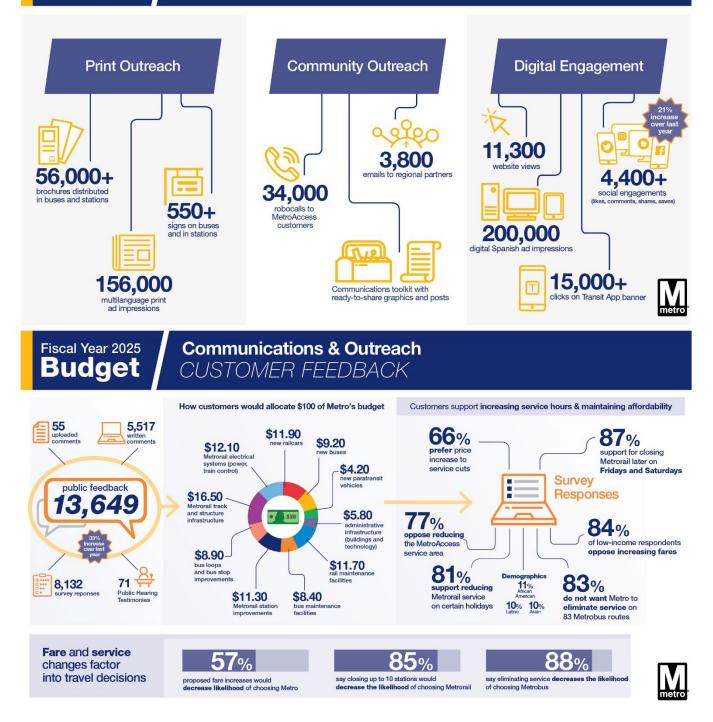

The following report includes an overview of the communications and outreach efforts and a summary of the public input received. Additional public feedback analysis and a complete transcript of written comments can be found in the appendices listed here:

Appendix A: Written Comments, Letters, and Testimony

Appendix B: Customer Feedback on Proposals

ENGAGEMENT AT A GLANCE

Fiscal Year 2025 Budget **Community Outreach and Engagement Tactics** BY THE NUMBERS

PUBLIC ENGAGEMENT RESULTS

In total, Metro received 13,649 public comments and responses on the proposed budget. More than 97% of the feedback was received via the online survey tool. This included:

- 8,132 survey completes
- 55 uploaded comments submitted through the survey or sent to the Board Secretary's Office
- 71 testimonies delivered at the public hearings

We received 33% more comments for this year's fiscal year budget than last year.

Survey Responses

Out of the more than 8,000 survey responses, 72% of respondents are current Metrobus riders and 81.5% are current Metrorail riders (measured as having traveled in the last week). The team worked to gather diverse voices, with 10% of respondents identifying as Hispanic, 11% African American, and 10% Asian.

Survey respondents expressed high approval for increasing service hours and maintaining affordability:

- 66% prefer price increases to service cuts
- 87% support for closing Metrorail later on Fridays and Saturdays
- 84% oppose increasing fares

Overall, the survey respondents demonstrated that reducing service would have a bigger impact on travel decisions compared to fare changes. Over 80% of respondents said eliminating bus service or closing stations would decrease their likelihood of choosing Metro. However, when faced with a decision between fare increases or service cuts, two thirds of respondents would choose fare increases.

Written Comments

- Nearly 70% of written comments provided as part of the online survey related to system service, including bus, rail, or overall system feedback
- 58.5% of comments included mention of bus service
- About 12% of comments were related to Capital or Operating Budget

See Appendix A: Written Comments, Letters, and Testimony and Appendix B: Customer Feedback on Proposals for more information.

COMMUNICATIONS AND OUTREACH OVERVIEW

The FY2025 budget communications and outreach effort was designed to encourage public feedback from customers, stakeholders, and community members across Metro's 1,500-square-mile service area. Communications were guided by Metro's Board-approved Public Participation Plan (PPP), which meets or exceeds all Federal Transit Administration (FTA) requirements. Efforts included outreach across the system and in the community, multilanguage advertisements, and Spanish-language digital ads.

Many of the communications and outreach tactics occurred during the official public comment period timeframe, Monday, February 12 - 5 p.m. Tuesday, March 5, 2024.

The communications and outreach plan included the following efforts:

- Stakeholder engagement
- Targeted marketing and media
- Public Hearings

Metro established communications and outreach goals to ensure that communications were open and transparent and led to public understanding of:

- What the proposed changes were
- Why changes were proposed
- How the public could comment on the proposed changes
- When the changes could go into effect

Feedback was collected through the following sources during the public comment period:

- Online surveys
- Comments received at the Public Hearings through in-person or virtual testimony
- Written comments received online and delivered to the Board Secretary's Office

A summary of the over 13,000 public comments and responses received can be found in the Public Input Results section at the end of this document, and Appendices A and B.

STAKEHOLDER ENGAGEMENT

To reach customers and community members across Metro's service area, Metro staff engaged stakeholders to help amplify the FY2025 budget messaging and collect feedback from a wide variety of individuals across the region. A comprehensive outreach effort was made to inform and connect with elected officials, jurisdictional partner staff, business leaders, transit advocates, and community-based organizations (CBOs). Metro provided stakeholders with a "communications toolkit" to help amplify the FY2025 budget messaging.

Elected Official and Stakeholder Emails

Metro sent FY2025 budget email

communications to 3,795 individuals –state and local elected officials, jurisdictional staff, community partners, places of worship, event venues, business improvement districts, apartment and residences, schools, shopping areas, social service organizations and more.

The first round of email communications was sent the week of February 12 to inform stakeholders of the overall budget situation and provide a look-ahead timeline of key milestones, including when and how the public could provide feedback.

The February edition of *Metro Update*, Metro's stakeholder and community based organization (CBO) email, reached nearly 3,000 community

stakeholders within local BID/Civic Associations, businesses, event venues, government facility/agencies, hospitals/medical services, hotels, places of worship, multi-unit residential buildings, schools, shopping centers, and transportation partners, in addition to nearly 1,000 government stakeholders in DC, Maryland, and Virginia. Metro staff followed up on emails and phone calls from stakeholders in reply to these emails.

Committee Briefings and Meetings

The **Riders Advisory Council (RAC)** received briefings from project staff about the budget proposal and public comment period at their January, February, and March 2024 meetings. The **Accessibility Advisory Committee (AAC)** received regular updates throughout the budget process, including briefings at its January and February 2024 meetings. Additionally, the **Joint Coordinating Committee (JCC)**, comprised of staff from regional jurisdictions, participated in sessions to discuss the budget proposals with Metro staff.

Employee Communications

Several email communications to employees ensured they had the opportunity to learn about FY2025 budget proposals. Three email updates about the budget and its impact on employees were sent to employees between December 2023 and February 2024.

The General Manager and CEO also participated in the *MetroVoices* podcast on January 23, 2024, to discuss 2023 highlights and the status of the FY2025 budget.

Communications Toolkit

The stakeholder email contained links to a communications toolkit hosted on the budget webpage with information that stakeholders could share. The toolkit included messaging, graphics, printable brochures, and customer information flyers in multiple languages. Metro also provided sample social media posts encouraging the public to comment on the budget. These posts were designed as cut-and-paste solutions in English and Spanish that stakeholders could easily share through their social media channels to encourage people to share their thoughts on the proposals.

Customer Engagement

Due to efforts to reduce contracted street team costs, in-person outreach was conducted internally with Metro Ambassadors. Identified by their yellow and black Metro attire, these Ambassadors shared information and answered questions about the FY2025 budget.

Between February 20-28 during high ridership periods, Ambassadors distributed an estimated 6,000 brochures to customers at top high ridership bus-rail transfer stations and at the three stations closest to the in-person public hearings during the specific dates/times when the hearings occurred.

Staff were strategically placed to reach the most customers at the following stations: Gallery PI-Chinatown, Southern Avenue, Anacostia, East Falls Church, Ballston-MU, Metro Center, Dupont Circle, Farragut North, King St-Old Town, Pentagon City, Fort Totten, Brookland-CUA, Silver Spring, L'Enfant Plaza, and Court House.

34,000 robocalls were also made to MetroAccess customers informing them about the budget hearings.

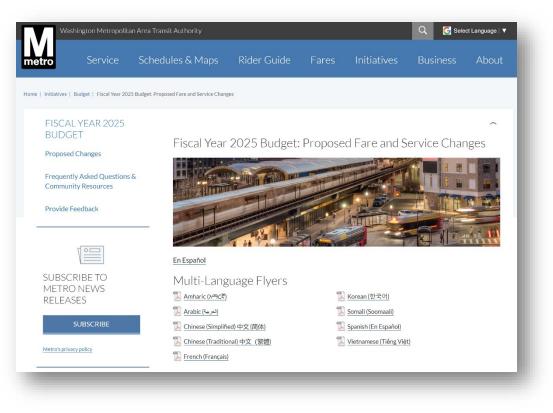

TARGETED MARKETING AND MEDIA

Metro used targeted marketing and media strategies to increase awareness and encourage feedback on the proposed budget.

Website

The budget webpage (<u>wmata.com/budget</u>) served as the central location for information on the budget proposal and comment period. The page was fully translated into Spanish, and customer information notices were posted in eight additional languages: Amharic, Arabic, Chinese (Simplified and Traditional), French, Korean, Somali, and Vietnamese.

Links to content were available for the public to review, including Metro's FY2025 Budget Book, detailed maps of proposed bus and rail service changes, and the Public Hearing notice. The web page was also the primary channel for collecting feedback because customers could access the online survey in English and Spanish and submit written comments and upload letters. The Public Hearings were streamed live on the FY2025 budget web page and Metro's YouTube page.

The FY2025 budget page received over 11,300 views and 8,500 individual visitors during the public comment period. The average time on the page was just under two minutes. Half of the users accessed the site from their desktop computers, and the other half accessed it from their mobile devices.

Survey Tool

Metro's primary method for collecting feedback was the online survey tool. The survey tool, available in English and Spanish via <u>wmata.com/budget</u>, provided the public a way to provide feedback by answering the survey questions, submitting open-ended comments, or uploading documents. Individuals who required additional language assistance were encouraged to call Metro's Customer Relations Department so a representative could assist them with taking the survey with the help of an interpreter.

In total, 8,132 respondents took the survey, with 85 in Spanish. An average of over 75 percent of respondents indicated that they rode Metrorail or Metrobus within the past seven days. Nearly 8.5 percent of respondents had utilized MetroAccess service within the past seven days. A full report on the feedback received through the survey tool is available in Appendices A and B.

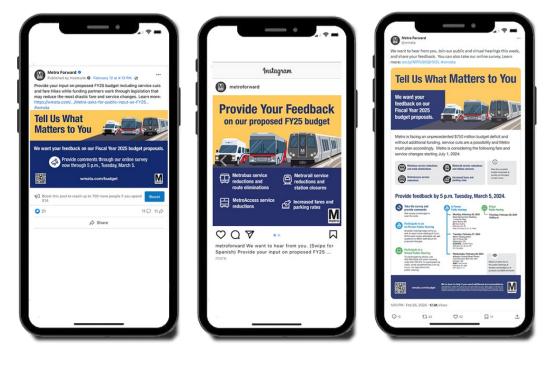

Digital and Print Communications

A mix of paid advertising and owned/earned media was used to promote the budget proposals and encourage public feedback. Paid advertising focused on getting the message out in languages other than English. Metro issued a press release marking the start of the public comment period and used X, Instagram, and Facebook to promote public comment opportunities.

Social Media

Metro published social media content in English and Spanish to amplify budget messaging and reach customers across the region. Owned social media posts resulted in more than 4,400 engagements (likes, comments, shares, saves) across all platforms.

Digital Ads

Metro ran targeted English and Spanish-language advertisements from February 19 to March 5, 2024. The ads, which directed people to the online survey, appeared in apps and mobile and desktop devices.

In-app banners displayed on the Transit app's home screen from February 14 to March 5, 2024, offering content in both English and Spanish. **1,212 respondents completed the budget survey because of the Transit app banner.**

Digital Advertising Stats

Media	Language	Run Dates	Details
High-Impact Mobile Banner Ads (Stack Adapt)	Spanish	2/19-3/5/24	Total impressions: 200,000
Transit App Banner Ads	English/ Spanish	2/19 – 3/05/24	Total impressions: 155,359 Total engagements: 15,305 Click-through rate: 9.9%

Print Advertising

Paid advertisements were placed in publications covering multiple languages: The Washington Afro, Atref, Doi Nay, El Tiempo Latino, Washington China News, Korean Times, and Washington Informer.

Publication	Language	Run Dates	Total Est. Impressions
Washington Afro	English	2/24/2024	25,000

Print and Digital Signage

Information was posted in English and Spanish throughout the system to communicate the budget proposal and encourage feedback from customers regionwide, including:

- Paper signs posted at all 91 Metrorail stations •
- Digital screens, including digital passenger information screens in mezzanines •
- Signs and brochures in bus information centers onboard all Metrobuses •
- Signs onboard all MetroAccess vehicles

Media Relations

To complement advertising and social media promotion, Metro published a <u>press release</u> on February 12 to 7,000+ media representatives and stakeholders to generate earned media coverage to reach a region-wide audience. The release announced the opening of the public comment period and provided details about Metro's in-person and online public hearings. This release resulted in 16 media mentions.

DC News Now, 2/13/23

PoPville, 2/13/24

PUBLIC HEARINGS

As part of the FY2025 budget process, the public had the opportunity to participate in one virtual or three in-person Public Hearings to provide testimony, learn more about, and submit comments on the proposed FY2025 capital improvement program and federal FY2025 grant applications as well as the FY2025 operating budget and associated service and fare proposals. All hearings were broadcasted online at <u>youtube.com/metroforward</u>.

Prior to the hearing, the public could attend a one-hour open house staffed by Metro's subject matter experts to answer questions. Those who wished to submit virtual testimony could preregister to participate by video or call in during the hearing to submit audio-only testimony. American Sign Language (ASL) interpretation was provided at each of the Public Hearings.

WRITTEN COMMENTS, LETTERS, AND TESTIMONY

Comments Distribution by Category

Written Comments from Survey

Comment	Catagony
Comment Many of these changes would not fully deter me from using the metrorail but would make my travels	Category
more inconvenient and annoying throughout the weekdays/ weekend	Rail Service
Keep service, get needed funding	Capital Budget
Increase Wages for Workers	Operating Budget, Management and Spending
New York City's subway fares aren't nearly as expensive as your Metro's. Stop squeezing your customers	
and manage your business better. Wmata is not just a vital and critical to the daily federal capital region. It?s also a national symbol of	Rail Service
America?s national pride. It?s a shame Wmata has to go through this every time. I hope Congress and	
the local jurisdictions will bring this budget issues to an end, which will give peace and stability to the	
hard working men and women of the Wmata workforce.	Operating Budget, Management and Spending
I think Metro should increase pay for its employees, close at 11pm seven days a week and have better	
shifts for employees. Metro does not take care of its employees and treats them like slaves. I would	
love to have a better Metro that takes care of its employees, puts them first, increase its wages and create a better work environment for its employees.	Operating Rudget Management and Sponding
I would encourage exploring running more frequent trains over shorter sections of track, reducing wait	Operating Budget, Management and Spending
times to 5 min or less in the city center (and/or other areas of high ridership). Then run less frequent	
trains to the end of line - timing them to coincide with high ridership (morning and afternoon rush, at	
close of bars). Convenience will increase ridership. A tax on commuter cars (see London) could also pay	
for Metro enhancements. Thank you!	Rail Service
Public transportation is needed. People need to get to and from all day and all year round. People	
depend on metro to get to work to provide for there families. Your loved ones use this platform to get around. To be honest some routes need to added on Sundays and running faster not shorter.	Bus Service
See survey	Miscellaneous
Not in favor or proposal	Miscellaneous
Is the current fare appropriate? I hope the method remains the same.	Fares/Fees/Parking
My Metrobus lines to Metrorail are critical to reaching my job. Eliminating the 08W or 21C would be a	
major blow to my job.	Bus Service
metro needs a different model of funding and a way to guarantee there won't be massive rate hikes or	
service disruptions that will disproportionately affect the people who need to use metro to manage a daily life in this already very expensive metro area	Capital Budget
All proposals are self-inflicted wounds that only serve to further deteriorate Metro's ridership levels.	copital badget
Metro needs to run more trains, reliably, at a price people can afford. Between parking at metro and	
current fares, it is currently the same price for me to park downtown. Increased prices and/or fewer	
trains will only push me, and others into their cars and Metro's shortfalls will continue. Further, these	
proposals will only harm poor/lower class workers who do not have alternative means of	
transportation. Many of these people do not work 9-5 and rely on later Metro service to get to and	
from work. It's not overly complicated - just create a reliable product that runs frequently. 15-20	
minute wait times in the capital of the United States is an absolute joke of a proposal, and one that Metro should be embarrassed about even considering.	Fares/Fees/Parking
The Metro is imperative for those who use it. I would rather pay a little extra to get the same or better	raies/rees/raiking
services.	Rail Service
I think the idea of consolidating bus lines and terminating lines when they begin overlapping with	
Metro is a good idea and should be pursued regardless of Metro's funding situation. It would allow	
Metro to operate more frequent service for less money, with an overall minimal impact to riders once	
they acclimated to the change of needing to transfer to Metrorail to finish their trip.	Bus Service
Wmata needs to enhance safety for the riding public as well as there employees. I see transit officers	
standing around doing nothing especially with fare invaders. Also I would like to see more officers on the trains.	Fare Evasion/Safety/Crime
Make Cuts from the Upper Management	Operating Budget, Management and Spending
Please do not cut or reduce the 52, 74, or P6 buses. I take them all regularly for work and for errands.	
They are the only routes to/from SW which is a fast growing neighborhood. Thank you.	Bus Service
METRO needs to work harder to institute a dedicated sales tax; whether it be lobbying or marketing, it	
needs to happen. The constant of having to beg for funds from various municipalities is unsustainable and leads to shortfalls in budgets!!	Operating Budget, Management and Spending
Don't cut P6 bus service. Want more metro rail and bus service, willing to pay more personally but	
aware that is not option for everyone. Would prefer income tax over fare increase. Removing access to	
service worse than increasing fare, removes choice from the customer. I'm sure budget proposal was	
made by very smart people so I support that- don't see how allocation question could be reasonably	
answered by average customer even after hour of looking at budget docs online.	Operating Budget, Management and Spending
Public transit is a public good, it exists to serve the city and outlying areas in ways that are	
environmentally sustainable and equitable to lower income people in our community. It?s one of the most valuable investments our city can make, and I hope resources can be found from other sections of	
the budget to support WMATA?s shortfall, instead of reducing WMATA?s budget drastically	Operating Budget, Management and Spending
Metro is such an asset to the DMV! I think WMATA has done such a great job these past few years	
improving and expanding service. It would be a real shame to backslide. I hope you get the funding you	
need via budget allocations? I think it?s fundamentally unrealistic and untenable to expect public	
transit to pay for itself via fares, especially as we try to become less car-dependent as a society. Public	
transportation should be treated as a public amenity. Thank you for making the DMV more accessible to visitors and residents!	Operating Budget, Management and Spending
People need metrorail and metrobus to run reliably and frequently. Decreased service cuts could harm	operating baaget, Management and Spending
people who have to make transfers, which already can be difficult to plan for.	Bus Service
I wouldn't mind the fare increases so much if there was a push to inform low income, students, seniors,	
etc. about discount options and services that might be available. Especially given how common fare	
evasion is, I imagine a large portion of the people who evade paying are eligible for these discount	
options. I would absolutely rather pay more for each trip, rather than have service reduced. In fact, I would	Fare Evasion/Safety/Crime
gladly pay even more to have more trains running and/or for trains to run much later on weekends	Rail Service
The end user shouldn't have to suffer financially it should be the city or local government's pockets. We	
pay to much taxes to not be reaping the benefits of our taxes. Our money should be used wisely by

Comment	Category
While I understand that the budget is the way that it is right now, I believe that metro should be	
operated as a public service and not something that needs to worry about making money. Therefore,	
instead of service reductions, which are never good, or fare increases, Metro's budget should be taken	
from a permanent pool of tax money that fully funds metro without question. The idea of reducing or eliminating metro is frankly ridiculous and it is simply the wrong way to look at transit in general. We	
do not apply these same budget considerations when thinking about car infrastructure.	Operating Budget, Management and Spending
Cutting service will only decrease ridership, raising fares will decrease ridership and increase fare	
invaders.	Fares/Fees/Parking
I ride the 8W (and sometimes the 21C) to the Pentagon to take the Yellow Line to Gallery Place to get	
to work and back home. What buses will provide service from the west end of Alexandria to the	
Pentagon if these routes are canceled?	Bus Service
Please keep the rush hour service and just cut times during the weekend	Service Levels
Decreasing service is only a short term solution since it will encourage people to use other forms of	
transportation. They may never return.	Service Levels
I appreciate trying to make it work while on a small budget. However, this is not the way to do it. Many	
people are likely to turn away from using the metro and riding busses if there are none to ride in the	
first place with the service cuts. I hope you cam figure out a way to solve this issue by taking a different	
approach.	Operating Budget, Management and Spending
I do not support cutting service to make up for the budget shortfall. This is a public good and it should	
not be expected to turn a profit like a business. By cutting the budget, you are telling Washingtonians	
that you don?t care about them or their transit needs. If you are looking to cut expenses, cut the	
salaries of your top executives who are making 200k a year and probably don?t even ride the metro. If	
you have to cut service, reduce frequency in Maryland or Virginia, since I think they?re the root cause	
of your budget shortfall. By threatening to cut off service to Maryland and Virginia until they increase their funding to where it needs to be to address the budget shortfall, you will mobilize groups with lots	
of power and influence that could put the pressure on their respective governments to increase the funding. The Government of Washington DC has supported metro and offered them a vital lifeline,	
don?t punish the taxpayers in DC because out of state governments are not providing adequate	Operating Budget, Management and Spending
Stop the free rides for passengers, they take advantage of the service that WMATA provide to the	
public. Give Metrobus operators more protection.	Bus Service
V14 and F14 routes are my regular ways to/ from work and i want them to be maintained since there is	
no other service from capitol heights to malboro pike	Bus Service
Why raise the fare if people were not paying when the fare was lower. Make the bus free and raise the	
fare on the rail. That way you can monitor and enforce fare evasion at train stations because it's	
impossible to do it on the bus.	Bus Service
The M4 and the D6 are the only busses near me and they're both proposed to be removed. I don't have	
a car and without them it will be much harder for me to get to work	Bus Service
Please don't take away the T2 route. It's the only bus service through this area and a lot of workers and	
students use this route faithfully everyday and without it they would need to rideshare or walk to get	
to and from as most of this demographic don't live in said area. It would cause a huge stress on these	
people and also the schools and businesses in that area.	Bus Service
Stop letting people on the bus who don't pay	Bus Service
Service cuts and fare increases are both terrible ideas. Go ask the federal government for money.	
They're giving out tons of tax credits for electric vehicles.	Bus Service
I use the S2 a lot and if you?re cutting that you?re cutting off a lot of residents and people who use it	Due Canida
regularly Cutting or cimplifying routed is good. Cutting frequency of convice is your your your had them a daily	Bus Service
Cutting or simplifying routes is good. Cutting frequency of service is very, very, very bad. I am a daily	
commuter, but entirely on the Red line north of Grosvenor. The recent speed limit increase has been great, but I would really hate to have to stand at hus stops and metro platforms in the cold for any

Cutting service will decrease ridership more which in tell still short of money coming into Metro system If fares higher then improve bus service hours It?s to late for metro to do fare increases, there not going to pay. Holding the workers accountable with a pay freeze isn?t going to help. There are to many managers in most of these departments making 6 figures and doing absolutely nothing. If you have management positions opened there going to feel them so they don?t lose them. The VA 21C already operates on a shortened schedule and does operate all day long. The morning schedule should not change at all but I would propose the evening chance to 2-6pm vice 4-8pm. It is a very frequented bus being that it is direct transportation to and from the Pentagon. Which of course is the largest low-rise office building in the western hemisphere. Implement strict fare payment among passengers The greater the greater the frequency and coverage and the better the connections, the more people will use public transportation TELLE MSTOP PUTTING MONEY TO POLICE Metro should make absolutely no cuts to service, should make fares free for all users, and make the metro operate 24/7 like every other decent city. Instructing your employees NOT to say anything to people constantly breaking the law & not paying their fare is stupidest thing WMATA has ever done & whoever came up with it should be DISMISSED or demoted IMMEDIATELYI It?s not a safety issue as you pay & train them well to use a certain decorum in those situations. However you should have your Transit Police being more proactive in maintaining law & order. In fact, for the immediate future have every Transit folicer write at least 1 ticket or arrest per week along with their normal duties. I think there needs to be a better way to fund this system. Public transit should be a right that is easily	
accessible to all, both in price and service. We shouldn't have to sacrifice one for the other, or sacrifice	
either at all! I'd rather have a tax introduced than put this burden on the backs of folks who need the	
service the most and probably have the fewest resources. Metro just needs to do better	Fare Evasion/Safety/Crime Rail Service
Metro should focus on making smart purchases with the advice of drivers and technicians who deal	Rall Service
with the vehicles and equipment everyday.	Rail Service
Given that the DC, MD, and VA area has no alternative mass transit system, getting to and from home,	
and office, and other activities may be somewhat challenging, and considerably more expensive. It	
occurs to me that Metro's fares have been increasing substantially for quite some time now, and	
Metrorail's increasing unreliability might make one wonder (I certainly do) exactly what it is that is	
driving these cost increases. If this has to do with the pensions of retired Metro employees, then I feel	
that WMATA has a responsibility to be out front and transparent about that. I do not believe that the	
cost increases are necessary as often as they are occurring, and I would be curious as to what the final	
results from public input to surveys such as this indicate.	Miscellaneous
Do not freeze the wages of workers. For mistakes of people in the office	Operating Budget, Management and Spending
S2 needs to run every 20 mins instead of 30 please :) more 52 or 54 would be prudent too - I never see that bus less than packed	Bus Service
Making these cuts hurts the people and workers. Will the GM not take a pay increase and lead by	Bus service
example? The answer to this is NO increase fare let the workers and the working public benefit from	
the service Metro provides.	Fares/Fees/Parking
Metro is a public good that keeps DC and the surrounding areas running. Metro needs increased	
funding to prevent traffic, climate change, and to increase equity	Capital Budget
This is absolutely ridiculous that the main public transportation system in the city is proposing to cut	
service and increase costs even more. Make everybody ACTUALLY PAY!!! Stop letting people not pay	
and use the metro. Seriously, you can figure out how to still PROVIDE PUBLIC TRANSPORTATION TO	
THE CITY. This is INCREDIBLY frustrating. I?m in disbelief that this is even a survey.	Service Levels
Wage freeze can not be a solution; rather it is another headache for metro family struggling with	
inflation.	Rail Service
The fares for MetroBus and MetroRail should be much lower for students, young adults, seniors, etc. I	
would ride both MetroBus and MetroRail so much more if they ran more frequently, especially on weekends. I also wish there were additional bus routes and rail routes across the city. I rely on the	
weekends. I also wish there were additional bus routes and rail routes across the city. I rely on the MetroRail to get to work, and under the proposal to cut stations with low ridership, I would not be able	
to get to work anymore.	Bus Service
l just want Metro run safe for customers and employees?	Fare Evasion/Safety/Crime
Enforce the fare evasion laws you'll have the money	Fare Evasion/Safety/Crime
I use Metro rail all the time. I don't mind paying a little bit more to have good service. I would love it if	
all the jurisdictions - especially Maryland and Virginia would increase their support for Metro. When	
the system works, it is terrific. However, between long waits for trains, broken escalators, fare evaders	
who jump over the entrances and exits, panhandlers on the cars, people who eat and drink and leave	
their garbage for others to pick up- there are challenges with the comfort and security I feel on the	
system. Bottom line- if things run on time, and the trains are relatively clean- it is a great way to get	
around the city. If fares need to rise to support some of the infrastruture - I am OK with that as long as	
these increases are reasonable.	Fare Evasion/Safety/Crime
METRO NEEDS TO FIND A SOLUTION TO KEEP THE ROUTES AND TRY TO FIND A WAY TO OPEN THE	
METRO STATIONS EARLIER SO YOU CAN CATCH A 0600 flight. People depend on those runs to get to	
and from work. ANY CUTS WOUD EFFECT PEOPLE LIVELIHOOD.	Bus Service
Consider that metro has changed from a hub and spoke commuter system to bring workers to	
downtown. But now it allows greater flexibility in transit needs for those that need it	Bus Service
Increased Fares would cripple working folks. Hold the Non Paying Customers Accountable. Increase	
advertising. Raising Parking would cripple the working Folk. Reducing Service, makes trains and Buses	
Crowded, and putting folks Less than 6 feet apart. Metro should focus more in their employees and cut cost in some of the capital proyects and their	Bus Service
unnecessary spending.	Operating Budget, Management and Spending
I don?t agree with cutting wages. Those workers work hard on a daily basis whether it?s rail buses,	
maintenance or custodial.	Operating Budget, Management and Spending
When will Metro get it right? So much progress could have been achieved during Covid, but yet here	
we are again with more cuts and unhappy customers. So many cities around the world offer FREE	
public transportation to its residents. Why can't DC do the same ?? Wait times and fares are already	
outrageous enough.	Fares/Fees/Parking
Don?t cut routes and don?t layoff employees	Bus Service
Metro's budget shortfall should not be made up on the backs of it's customers or workers.	Operating Budget, Management and Spending
Continue to pursue and lobby for dedicated, reliable funding sources as opposed to having to scramble	
to find the necessary funding to avoid drastically reduced service levels.	Capital Budget
No cuts to bus routes.	Bus Service
Provide Station and Station Manager Safety	Fare Evasion/Safety/Crime
Discussing pay freezes is unconscionable in this era of extreme inflation. How can Metro reasonably	
argue that inflation is the cause of funding issues and then proceed to pass the problem on to their	
own workers? There should be absolutely zero bus service cuts - as the post-public health emergency bus service rebounds have shown, bus service is the lifeline of this region's transport system. Finally,	
stop wasting money on CBTC - this will bring zero benefit to Metro while costing a literal fortune.	
Continue investing in upgrades and renewals to your existing train control infrastructure which was	
already designed to maximize system throughput.	Bus Service
Do not eliminate any service. Propose budget cuts on executive staff members and consolidate	
departments, eliminate redundancy/repetition of jobs.	Operating Budget, Management and Spending
If Metro decides it wants to increase ridership in buses and rail, it is a no brainer that more frequent	
service, and not the opposite, should be provided. It is ridiculous that in today's world, when every	
effort should be made to cut emissions and promote public transport, Metro decides to do precisely	
the opposite - cut or eliminate bus services. This is not something I would have expected in the capital	
of the USA. Additionally, this would be an ageist (discriminatory) policy, since older folks who cannot	
drive will face reduced or inconvenient access to public bus transport. On all fronts, these are bad	
policies that don't reflect well on Metro's or the city's leadership. It is very disappointing to even having	
to fill out this survey.	Service Levels
I know tough decisions are coming, service and reliability should not be a consideration. Thank you.	Service Levels
Metro should find other avenues for its budget shortfalls. Cutting service and or increasing fare for its customers is not an option. Metro have miss manage government funds nurchasing new rail casts that	
customers is not an option. Metro have miss manage government funds purchasing new rail carts that was coming off the tracks, which they had to retrofit. Furthermore metro was giving out 5k sign on	
bonus for new employees. All of that makes a metro problem. Not us, the riders/customers.	Operating Budget, Management and Spending
	1
Don't cut anything. Raise the fare and increase police officers to help fare evasion	Fare Evasion/Safety/Crime

Comment	Category
WMATA owes the public its absolute best effort to not implement ANY service cuts whatsoever, unless	
as an ultimate last resort?as WMATA exists as the ONLY mode of transportation for most of it?s	
customers.	Bus Service
I know that the supervision side is extremely heavy. It absolutely makes no sense to have so many	
supervisors on rail side. Why have a super independent and an assistant superintendent. Half the time	
they are not even at work. You wanna save a ton of money look into how many supervisors are on the	
premises in railside especially mro. Most of them not doing anything. You also have aa mechanics sitting	
around doing clerical work. They could be on the floor working. The amount of overtime being handed	
out especially at Brentwood is a total waste of money. Half the time they are sleeping in their cars. You	
have a total break down in efficiency of the department. I really want to see metro succeed for my	
future. But at the current trajectory I don?t see how it?s feasible. It is not the same company it was	
10years ago.	Rail Service
Do not under any circumstances re-allocate funding that is used to pay the hardworking people that	
keep these systems running. Metro would be nothing without its workers.	Capital Budget
There are many DC citizens who rely on the metro to get to work, school, doctor?s appointments, etc.	
Reducing the hours and increasing the time between trains would negatively affect tens of thousands	
of people. Please do not make it more difficult to access the metro and do not close stations. Everyone	
in DC has a right to live their lives as they need.	Rail Service
You cannot cut service. Period. If people stop riding metro, which they will because its extremely easy	
to drive and park in DC and the surrounding areas, they will not come back to the system. Raising rates	
is not as bad as cutting service, but frankly its embarrassing to ask for more money when service is as	
mediocre as it is now. I can't go more than a week of riding metro without a train breaking down or	
having a 10+ minute delay. Figure it out with governments, find a way to work with the democratic	
federal admin to get some money. Look for grants, sell advertisements, whatever needs to be done to	
INCREASE service and keep fares stable. On the idea of a redline turnback at Grosvenor, thats an	
insanely bad idea. The development around north bethesda is extremely important, not just because I	
live there, but because there is extremely dense housing near the metro stations north of it. People	
commute in from Rockville, Twinbrook, and North Bethesda and they rely on train service. If we have to	
wait 15 minutes on the platform for a train and pay \$7 to get to DC then we will drive	Fares/Fees/Parking
Y?all need to pick ppl who wanna do their job. Especially the 80. It?s always late	Bus Service
L2 service southbound in the evenings is unreliable- how can this happen on a major thoroughfare in	
the capital of the free world? SHAMEFUL	Fares/Fees/Parking
the trains need to run til 3am on the weekend like they used to! and i am EXTREMELY opposed to	
cutting weekend bus services, especially the 83 and 86. i dont live in bowie anymore but if yall had	
stopped b21/22 buses i would have had no way of getting to work or home. those buses arent crowded	
often but they are rarely EMPTY. people DO use those buses. cutting services hours or frequency of	
buses would majorly impact ppl who rely on them for work and just getting around. im also extremely	
opposed to fare increases. we're literally in a recession right now and you want to charge people MORE	
for buses that can barely be on time every day? please.	Bus Service
Appreciate the question asking how we would spend the budget. But we have no clue of the level of	
efforts for each. So they are almost all wrong for sure	Operating Budget, Management and Spending
Turnbacks are good. Ashburn, Dulles, Glenmont, etc. don't need service every 12-15 minutes. For	
buses, routes can be made more direct instead of being shortened. For example, the 42/43 don't need	
to detour down Virginia Ave, they can just travel along F street from 21st to 18th (walking these three	
blocks is often faster than taking the bus between these stops anyway).	Bus Service
Metro keeps the city alive. Metro should focus on taking action against the non-paying customers by	
	Pue Consist
the bus driver themselves or other means necessary rather than cutting services.	Bus Service
Part of the reason for decreased ridership is declines in service and decreased safety. Further lowering	
service and raising rates may seem necessary but those measures will further discourage people from	
using the system. We need to invest not only in the infrastructure but in increasing ridership. Money	
spent on making the experience better through shorter waits, greater capacity to get people	
everywhere we want to go when we want to go for both work and personal travel, ensuring passenger	
safety, and replacing old decrepit rail cars, will bring riders back and keep our Metro-served	Fare Evasion/Safety/Crime
Metro keeps DMV alive: Stricter laws against non-paying customers by the bus driver themselves or	
other means is what?s needed. Paying customers shouldn?t have to suffer because people do not pay.	Bus Service
I'm willing to pay much higher fares. I need Metrobus service to get to my job.	Bus Service
unless employees get paid more, how are they (we) supposed to afford public transportation?????	Operating Budget, Management and Spending
Metro should stay open till 2 on the weekend that way it will help people and cause less drunk drivers	
and the second	Rail Service
Bus routes 43 & 42 are essential for me and my neighbors to reach DuPont from Adams Morgan	Rail Service
neighborhood. Cutting service will greatly affect our ability to move around the city as we have no rail	
stops nearby. Please consider not changing service to bus lines 42 & 43.	Bus Service
I am a Virginia resident making more than \$100,000. I would be HAPPY to pay more in taxes to support	
Metro service. I'm very sorry the Metro has been put in such a difficult position.	Rail Service
make Metro free and stop charging absurd prices for services that people use for travel you spineless	
	Rail Service
It is important that if Metro makes any decisions based on ridership numbers, it also analyzes decisions	
with an equity measure. For example, a bus route may have lower ridership than another but serve a	
more transit-dependent or vulnerable community. Cutting that bus route would cause more immediate	
harm than one with more ridership serving choice riders.	Bus Service
Just don't affect 49,48, or 26 and we good	Miscellaneous
Running metrobus and/or metrorail until 2am on F/Sa will greatly help DC nightlife. As it currently	
stands, everyone is very reliant on a rideshare app to safely get home since public transit quickly closes,	
even on weekends. Increasing public transit options for weekend late nights is also likely to cut down	
on drunk driving since it will be easy to hop on a metrobus or metrorail for low cost instead of the high-	
price, high-demand rideshares (though an increased fare for these late nights is also a sensible	Bus Service
I already pay the max price and spend over 45 minutes to get to work using the metro. The increase is	
outrageous, and the possibility of having to wait over 15 minutes for a train also seems unreasonable.	Rail Service
You are literally planning to eliminate my main ways to get to work. Please for the love of god don?t do	
You are literally planning to eliminate my main ways to get to work. Please for the love of god don?t do that the buses are already unreliable as is.	Bus Service

Closing the newly opened stations would be catastrophic for the communities that are growing around them. Ridership needs to grow over time	Rail Service
Please increase 17K services. The ridership has been high. Thank you!	Service Levels
Need to increase service on R2 metrobus. Its almost never on time! Metro security needs to be better	
aware of people that hop turnstiles and those that tailgate! I see it every day and it infuriates me!	
Secirity need to spread out across all of the turnstiles rather than standing around in a group shooting	
the crap and pay better attention. Arrest all of the people that jump or tailgate! If I have to pay so	
doesn't everyone else! Metro wouldn't have to make cuts if this is better policed!	Bus Service
Please remember that many people other than just commuters really rely on metro access. Not	
addressed in this are the desperate need for maintenance of easily located elevator and escalators (especially up escalators) that maintain power so people with disabilities can use them. An app that	
actually functions is also very important.	MetroAccess
Service is the best it?s ever been, please avoid cutting	Service Levels
It?s hard to have an opinion on closure of stations without further information on which stations - this	
information needs to be provided to individuals as soon as possible and should take into consideration	
bus route alternatives as well	Bus Service
Find funding and have DC, Virginia and Maryland contribute more	Capital Budget
Find cheap ways to make bus lanes! The current state of bus lanes in D.C. is pitiful, if you do that,	
especially in an area like Georgetown, where M Street desperately needs traffic calming and to remove the on-street parking. It's a shame that WMATA is made up of, at the highest levels, such soft,	
suburban-oriented people. You need some proper transit users on there, leverage your weight in those	
places. Don't get caught up in the silly things.	Bus Service
Metro services need to remember that folks depend on them to get to and from work, school, for	
family care needs, cutting service and hours takes away from the folks who most need to use metro to	
make a living.	Rail Service
Driving is already cheaper, why bother at this point.	Miscellaneous
As someone who cannot drive for health reasons I don?t think eliminating bus routes are a good idea.	
People like me rely on public transportation for work.	Bus Service
Don?t get rid of any buses that we take I definitely suggest avoiding fare increases as much as possible. \$7.50 one way for a few mile ride is	Bus Service
exorbitantly high considering Metro is not a true passenger train like Amtrak. I'm sure people would	
rather have fewer trains than a 25% fare increase. I also suggest avoiding service cuts during morning	
rush hour, since at least on the orange and silver lines trains can already be very crowded. I like the	
idea of later service on the weekends, but it's already very sketchy and unsafe to take the metro after	
rush hour, and I know very few people who would choose to take it alone at 1am, so maybe an	
increased police presence who will actually do something could be beneficial.	Bus Service
I do not think it should increase the fares for trains and buses because there are people who need to	
get places, but are on a budget. And trains and buses should definitely not have reduced services	
because people need to get places, even late at night.	Operating Budget, Management and Spending
Increased metro rail and metro bus services are what has allowed me to live car-free in DC without losing my mind. I am willing to stomach higher fees, though I am aware others may not be easily able	
to afford them, but cutting service will certainly help to lose regional trust and ridership.	Bus Service
Need to address systemic issue of riders jumping through the fare gates and not paying fares. Wide	
spread issue not consistently enforced and negatively impacts revenue.	Fares/Fees/Parking
Having frequent service is CRUCIAL to being competitive with other modes for more complex trips. If	
every transfer adds, say, ten minutes, Metro is not worth taking.	Bus Service
Stop spending so much money on metro police and enhancements to fare gates. They don't matter,	
Stop spending so much money on metro police and enhancements to fare gates. They don't matter, metro is safe enough without police actively patrolling, people who jump the fare gates aren't going to	
Stop spending so much money on metro police and enhancements to fare gates. They don't matter, metro is safe enough without police actively patrolling, people who jump the fare gates aren't going to pay anyways so why spend money preventing them. Regular, reliable service is what matters. Please	
Stop spending so much money on metro police and enhancements to fare gates. They don't matter, metro is safe enough without police actively patrolling, people who jump the fare gates aren't going to pay anyways so why spend money preventing them. Regular, reliable service is what matters. Please prioritize regular reliable service over cosmetic enhancements.	Operating Budget, Management and Spending
Stop spending so much money on metro police and enhancements to fare gates. Inflation has decimated people?s savings and wages are lower than ever. The people who will be most affected by service cuts and fare increases are poor with little alternative options. Any fare increases are a shakedown of the most vulnerable people in the city. Any service cuts will strand people who live in cheaper, less popular neighborhoods. Make the city raise taxes on rich people. Get Congress to hand you more money. We all have to make the city urus with the little money we have. Yall better do the same. Fare increases, while annoying, are better than service cuts. I use the 83/86 Metro Bus to commute to work on the weekends. The buses on this route already run VCRY infrequently on the weekends, as it is, and road improvements on Baltimore Ave often cause delays, already. I sincerely hope you will not cut weekend service nor weekday frequencies on these two routes, which service many Metro Bus dependent neighborhoods along their routes. Thank You! Easise parking costs before fare increases. I would be worth puse by guardians. As a cyclist, I often have to use the accessible gate to fit with my bike, but these are the gates that are most often hopp	Operating Budget, Management and Spending Bus Service Operating Budget, Management and Spending Bus Service Bus Service Fares/Fees/Parking Miscellaneous
Stop spending so much money on metro police and enhancements to fare gates. They don't matter, metro is safe enough without police actively patrolling, people who jump the fare gates aren't going to pay anyways so why spend money preventing them. Regular, reliable service is what matters. Please prioritize regular reliable service over cosmetic enhancements. Too many people rely on public transportation for you all to want to cut bus lines and eliminate them on the weekends. What about the people who work weekends? What?s the plan for those who avoid paying for these services? Do you only penalise users who pay? There definitely have to be more options than reduce service or increase fares. New York charges a flat rate of like \$2.50 for the subway and it?s open 24/7. Something is being horribly mismanged for our much smaller metro system to be so underfunded. Inflation has decimated people?s savings and wages are lower than ever. The people who will be most affected by service cuts and fare increases are poor with little alternative options. Any fare increases are a shakedown of the most vulnerable people in the city. Any service cuts will strand people who live in cheaper, less popular neighborhoods. Make the city laise taxes on rich people. Get Congress to hand you more money. We all have to make the city unives with the little money we have. Yall better do the same. Comment Why doesn't the person in the metro booth speak Spanish?	Category Rail Service
	Kall Service Fares/Fees/Parking
Send me pre paid metro cards if fare is increasing I berly can make it to work C21, C22, C26 are only buses that run on the route they run on. There are no transfers along the route	i or caji coaji di Nilig
except metro stations.	Bus Service
I believe the Metro system is of critical benefit to those of the DMV's area who are most at risk.	
Decreasing service reduces the number of people able to use the service. Increasing fares means at risk	
populations may not be able to afford the service, again reducing who utilizes the service. I don't see	
how changing the availability or cost to these populations will increase those utilizing the service. Taxes	
or adjustments to those who might be more able to pay in other areas makes more sense to promoting	
this vital service in the DMV area.	Fares/Fees/Parking
Please leave the metro fares the way they are now	Fares/Fees/Parking
Things are fine just as they are; there shouldn't be any changes. I support raising fares to maintain level of service.	Miscellaneous Fares/Fees/Parking
I like many metro users pay our fare's rightfully when we pass through the gates. But, there are many	raies/rees/raiking
more who don't pay and we who pay, have to witness the act of people not paying their fares, but still	
get the benefits of using the metrorail. How can we who pay our fares be punished for WMATA's	
shortfall in budget all the while other's who don't pay are not impeded on? If fares go up from what it	
is today, people like me may wonder, why should I pay extra to use metrorail when there are other's	
who don't pay at all?	Operating Budget, Management and Spending
Eliminating Friday and Saturday night service and decreasing rush hour frequency would severely	
decrease overall ridership. If the metro is not seen as a reliable, easy, and quick mode of transport	
people will default to rideshare or other services. Similarly, raising prices too much will have the same outcome. An uber from Arlington to DC is on average \$20-30 and fits 4 people for \$5-8 per person,	
keeping rates below this especially in the evenings is important. Late night Ubers from DC back to	
Arlington are \$50+ so increasing service after 12 should attract many riders.	Bus Service
I want a system with better headways and late night service.	Bus Service
I think keeping increased service (8 minutes or better on metrorail, 15 minutes or better on metrobus)	
are the most critical aspect to continuing to grow ridership	Bus Service
Metro is a necessary service to the DMV area. The service should be as frequent as possible while still	
maintaining a low fare such that the system remains affordable and accessible to as many people as	
possible. Achieving a source of dedicated funding should be the utmost priority going forward.	Capital Budget
It?s difficult to try and decide this. I?m in a position where I can afford to and prefer price increase over	
service cuts but know there are a lot of people who can?t afford the cents being added will ruin their entire budgets. I know you all have thought this over extensively, it?s just a very aggravating position	
the local governments have put all of us folks who us the metro in. Regardless, thank you for trying	
your best.	Operating Budget, Management and Spending
Public transportation isn't supposed to be a profit center, it's supposed to be a public service and it's	
integral to people who don't live in places where cars are feasible due to limited space. I would rather	
pay a little more than have people be stranded because service stops running, but this is something	
that should be getting solved at the government level with tax dollars, frankly, and there should be	
more encouragement for people to use the metro instead of driving by making stuff like parking	
overnight easier or more accessible instead of more expensive or more difficult. We *want* people	
taking the metro instead of driving drunk at night. We *want* people parking their car and knowing	
they can safely rely on public transit instead of clogging roads with more cars and the air with more	Ferra /Ferra /Derline
exaust, causing more road damage by wear, etc. Reducing bus routes, increasing fare prices, or closing stations more strongly impacts the DMV	Fares/Fees/Parking
population who are financially challenged, and increases the inequality in our community. This hurts	
those who need public transit the most.	Operating Budget, Management and Spending
They need to do more about the people who are not paying	Miscellaneous
I literally go two stops, Pentagon City to lenfant, and it costs me 2.25. It's ridiculous	Fares/Fees/Parking
Metro System is useful for those that don't have their own modes of transport. This also allows	
individuals to reduce their carbon footprint. If any, attempts should be made to improve and increase	
the service of metro rails and bus and not make these budget cuts	Operating Budget, Management and Spending
If fare increases were implemented, I would like to see increased support for low income residents as	
well to ensure that our most vulnerable populations still have reliable access to public transport	Fares/Fees/Parking
If you eliminate the D6 you are ruining my life. It?s how I get to both work and school. I can?t afford to buy a car and the nearest metro stop is a far walk for me. Stop prioritizing suburban commuters and	
prioritize the people who actually live in DC and form its tax base. If you eliminate the D6 I will commit	
a ritual form of self-immolation on a metro train.	Rail Service
I prefer increasing fares to increase revenue, rather than making cuts to service. I feel that will have an	
overall negative impact on ridership and further reduce revenue. I also feel WMATA needs to continue	
making progress on eliminating the fare evasion problem. It isn't fair that honest people are going to	
have to pay more of their hard earned money to offset the costs imposed by people who feel they	
should ride for free. Metro also needs to continue efforts to provide reduced fare programs for low	
income groups, seniors and students.	Fare Evasion/Safety/Crime
I would rather avoid service cuts especially in the hours of metro operation. The hours are already more	
limited than preferred, especially on the weekends, and that is the biggest deterrent for not taking the	
metro- the risk of it not being available for both legs of my trip due to restricted hours. A small increase in fare would be annoying, but I would still take the train. Cutting or limiting the service would	
guarantee I would use other methods of transport.	Bus Service
You all cannot get rid of K2 bus line, doing so would severely limit students, staff, and caregivers' ability	
to get to/from Capital City PCS to/from Ft. Totten or Takoma metro stations. Students and staff have	
enough to worry about, how they are going to get to work and school shouldn't be something they	
have to worry about	Bus Service
PLEASE - do not decrease or cancel any of the 42 or 43 buses! We live in a very busy neighborhood	
(Adams Morgan) & depend on these buses to get around. It was & is devastating ehen Metro stopped	
our 42 and 43 buses terminating Downtown at the Public Library!!!! I do not know one person who	
takes the 42 and/or 43 buses to the Kennedy Center.	Bus Service
I live in DC but do not work in another state, making less than DC minimum wage. I take the metro to work 4-5 times/week. If the metro rail prices increase and the services decrease, I will move out of DC.	
	Rail Service

Don't increase fares. Don't cut service. Allocate more money to the budget. My taxes pay for freeway improvements, they can pay for better public transit as well. High fares are a regressive form of	
taxation that penalize poor people for not affording cars.	Operating Budget, Management and Spending
DC will die without a healthy metro. I take the metro almost every day to and from work. I do not work	
in DC, make less than DC minimum wage, and will move out if the Metrorail service decreases or if	
prices increase.	Rail Service
Why is metro only free for POCs?	Rail Service
Please raise fares and try to get Montgomery County to pay fares instead of that ridiculous pandemic-	
era free transit option for them. Stop running 8-car trains off-peak; that might save some money. Really	
rather pay \$2.25 or even \$2.50 one-way than service cuts. Some of us have no drivers' license and no	
cars and we depend on Metro. It's getting better; don't screw it up and don't provide so much service as you did prepandemic I would say.	Bus Service
The metro is essential to DC. Cops are not. Cut the police budget to fully fund the metro without	Bus service
increases in fares or decreases in service.	Operating Budget, Management and Spending
Many students like me and my friends that use the metro bus?s during school days but also on the	
weekend. If I where to lose this form of transportation it would decrease my use and other students	
use of metro bus?s due to lack of connectivity. Please let student be able to have transportation.	Bus Service
Either increase fares or parking but not both. The metro needs to keep drivers out of DC and making it	
far more expensive for a commuter to park and ride will encourage more people to just drive into the	
city and park, further deteriorating traffic and decreasing metro usage.	Fares/Fees/Parking
Please don't cut the 96 and the K2.	Bus Service
Dear Transportation Committee Chair and Members, My name is Julia Evans, and I am writing to you today to express my concern about WMATA?s proposed cut to the K2 bus line. I work at Capital City	
Public Charter School in Ward 4 (100 Peabody St. NW). We serve more than 1,000 students in PreK3-	
12th grade in one building. Families from every Ward in the city (with the majority in 1, 4, and 5) come	
to Capital City to seek out a high quality, rigorous education for their family. Many of our students, and	
even staff, rely on the K2 bus to get them to/from school as Capital City is a 20-30-min walk from the	
Ft. Totten or Takoma metro stations. They take the metro to Ft. Totten and then the K2 to get to	
Capital City, which is the only bus option from the metro. The K2 is actually the closest bus stop to our	
school building and is regularly packed with students, staff, and caregivers during the 8am-9am and	
3pm-4pm hours. The loss of the K2 bus line will have a significant negative impact on our community?s	
ability to get to/from school on time. Many of our high school students rely on the K2 to not only get	
home after school, but to get to their part-time jobs. I am concerned that WMATA has never reached	
out to school staff, students, or caregivers about the K2 line and the possibility of cutting that line. How	
can WMATA put the K2 on the chopping block without consulting those who use it the most? What	
alternatives has WMATA proposed to support the large number of students, staff, and caregivers that	
rely on the K2 to get to/from school? I hope that you will ask WMATA to keep the K2 line and question	
them about their reasoning for cutting the line without any outreach to the impacted communities, like	
ours. Thank you for taking into account our concern. Sincerely, Julia Evans Student at capital city	Miscellaneous
I would like bus fare to not increase.	Bus Service
I ride the k2 to school everyday and need this bus to get home too Alot of times I go to use my metrocard and it always sends me to see station manager and sometimes I	Bus Service

Metro and busses should be free to DC residents and WMATA should act in a way to make that possible without jeopardizing service. Virginia and Maryland have a responsibility to contribute more heavily to	these major cuts? This feels like poor planning and poor transparency on the decision-making process here. 2. Poor ridership on new stations should not be considered for closure - they are new! Many communities are not even connected to these stations by walking paths or bike lanes (I personally live right near Innovation Metro Station, but the path is blocked by trees). 3. Reducing reliability of the metro will not promote ridership, please ensure that there are frequent trains and buses during rush hours. This is critical. 4. Invest in the communities around metro stations (not necessarily in momey but in partnership and advocacy) - be on TOP of Bowser to bring these issues to the forefront, botther her until she listens and takes the time to understand these issues, think outside the box to solve these problems, invest in your staff to solve these lesions will impact not only your budget, but the culture and character of this city. WMATA leadership can do better. Many people such as myself rely on public transportation to go to our jobs, our schools, and run day-to-day errands. The budget cuts for the metro service are unacceptable. Increased fare and reduced stations and routes puts an undue burden on low socioeconomic communities. I do not have a car nor drive so how am I supposed to get around the city? After Covid, the city has struggled to restore its business and vitality. Most people work from home which hurts local businesses and creates a sense of loneliness. With these proposed changes, the current problems will only worsen. You are what you eat. If public transport service deteriorates: ridership will continue to go down. I hope the impact on the overall economy and accessibility regionally is taken into consideration! Comment	Category
As both a student and resident at American University who lives near Cathedral Heights, please do NOT cut the N2, N6, N4 weekend service. It is already difficult enough to rely on public transit, to cut these	
services would greatly limit the ability of residents to go out during the weekend. Additionally, I	
anticipate people would be more likely to rely on ride share services and independent automobiles to	
get around on the weekends, making weekend traffic even more of a nightmare.	Bus Service
Thank you for the help you provide with public transportation because there are those of us who have	Missellappour
no way to get to our jobs or medical appointments. You help us a lot; thank you. Both bus and rail are vital services in the district and surrounding cities. Current users having to find	Miscellaneous
alternative methods of transit will only make traffic worse. Users of WMATA and non-users alike should	
support fully funding the system.	Bus Service
Before increasing fares, Metro must answer a very simple question: why should I pay for Metrorail	
when every time I take the Metro I see someone go through the fare gate without paying and Metro	
employees don't do anything about it? The more Metro increases fares, the more likely I am to just stop paying altogether as there is clearly no serious consequence. If everyone who rides Metrorail paid,	
prehaps we would not need a fare increase. But they do not, so those who pay are being asked to	
subsidize others. Metro's budget should focus on combatting fare evasion through more of the taller	
fare gates, increased security, and getting the DC government to take it seriously with penalties.	Operating Budget, Management and Spending
Decreasing the frequency of bus and rail times would drastically impact the people that use these systems as their sole method of transportation. As a person who depends on the system to get to	
college, I beg that you take into consideration the citizens that depends on the system to get to	
livelihood. Especially people with unconventional working hours(past 10pm). I often use the buses past	
this time and these cuts would leave me stranded at night. I am a young woman that would be in	
constant danger if these cuts were made.	Bus Service
I want my taxes spent on the metro rail system. Creating further incentives/dissentives for people to	
choose the rails over driving would be preferable to service cuts. If you don?t work/live in DC maybe you pay a toll to drive instead of parking and taking the train	Bus Service
budget cut :(fare too high :(Operating Budget, Management and Spending
PLEASE keep weekend service of the 62 and 63 routes	Bus Service
The proposed bus lines cuts to force people to use metro rail is disappointing. They add to commuting	
time with transfers and will lead to increased car use and traffic. In many cases you?re forcing people to make multiple transfers which is frustrating cause the last thing people want to do after a long day is	
wait a half hour for a bus after the metro.	Bus Service
Please remember that low income folks also need to get to high income places to work.	Miscellaneous
Service cuts will greatly impact those commuting to and from work. Caution should be used when	
adressing shortfalls in that manner	Bus Service
Consider larger fare hikes for longer train trips, while keeping base price at or near current rates. Suburban residents who commute into DC for work are generally better able to pay higher fares. Those	
who live in the city and rely on the train for mobility throughout their lives are also the people less able	
to pay higher fares.	Fares/Fees/Parking
These all seem like pretty awful ideas that will disproportionately impact low income people.	Miscellaneous
I agree with Randy that we need a region-wide transit tax to fund Metro - the current funding structure	Consider Durdwork
is asinine. Increasing park and ride fare and parking costs will further decrease weekday use of the metro. In many	Capital Budget
cases the cost of a parking lot already rivals the cost of fare.	Fares/Fees/Parking
Please don?t make cuts and if you increase fares (which I support) please make it easier for people who	
can?t afford the fares to still use bus/metro.	Bus Service
If Metro Rail starts closing stations or reducing hours and frequency of trains, it will put itself onto a death spiral. People will find alternatives.	Bus Service
Keep moving us safely throughout the DMV area and thanks for the rides	Fare Evasion/Safety/Crime

I know you guys are trying to survive, but service cuts aren?t the answer. That will lead to lower ridership rates and an even lower budget next fiscal year. I think the fare evasion gates are a good idea to protect revenue streams. Decreasing police presence is also a good idea considering that they don?t actually do anything to prevent crime and make people safer. It?s just a waste of money, albeit an incremental one. Also, trains could be cleaner. Hirring a full time sanitation crew to clean the trains inside out every two weeks would make a huge difference in attracting new riders. Also, don?t close stations in DC. Virgnia and Maryland, fine, but those low ridership stations like deadwood and Minnesota ave are where the poorest people live and they need to get around too. Closing their stations is not the answer even if it costs more. Excrease fair not service Recognizing the serious challenges ahead, I think overall the narrative of decreasing service to make the budget balance is the opposite of the direction the region needs to go in supporting a vital transportation network. Would like to see how Metro is working to find administrative and other efficiencies alongside these proposals too. While I understand the budget deficit is high, cutting service may alleviate this problem in the short term but aggravate it in the long. If buses and trains aren?t convenient, riders aren?t likely to continue using the system. Lower ridership will expound the budget deficit. Higher fares are peilel low to take it to get to work every day and so do countless other people considering it?s packed like sardines during rush hour. That?s not even to mention the number of children who take it to get to work every day and so do countless other people considering it?s packed like sardines during rush hour. Comment	Catagony
Comment You can raise the price my employer pays for it.	Category Miscellaneous
Metro Rail should be cheaper than it is, it?s rare for most people to get to work on time already with	
the services being normal.	Rail Service
Any additional funding sources. Reliability, keeping short wait times, maintaining cleanliness and safety	
in the system, eliminating fare evasion, enforcing penalties for fare evasion (but don?t spend more on	
policing than is being saved)?these are the things that will keep people like me using the Metro much	
more than fare increases. For low-income or disabled riders (which I?m neither), I would be open to a	
pilot program that offers them a price reduction.	Fare Evasion/Safety/Crime
Don?t do this, people depend on it. Cutting the D6 route would alienate an entire portion of the city and eliminate an essential bus route	Miscellaneous
for children going to Key Elementary, Our Lady of Victory and other local schools. The only option open	
for me and many others to commute to our jobs downtown would be to walk (50+ minutes), Uber or	
bike (no dedicated bike paths). In addition, cutting the 33 would further alienate this area.	Bus Service
A lot of these buses give access to areas and people who would otherwise have no way of getting from	
point a to point be or making it much more inconvenient. I take the 96 almost everyday, and often	
twice a day. I also take the 42, 43, and L2 from Adams Morgan to Farragut Square a few times a week.	
There are always lots of people on the bus, and a service cut would be devastating. Please do not cut	
these busses!!!	Bus Service
put kids ride free on apple wallet so kids can?t forget their physical cards and jump the gates	Fare Evasion/Safety/Crime
Part of the budget should definitely go towards putting in better fare gates on the metro I would rather have a longer wait time to get a bus/metro than to not have service at all and I?d rather not have fare	
increases	Operating Budget, Management and Spending
They should have more bus routes to help people get to were they are going even in this very cold	
weather they shouldn't have to sit and freeze. But they need to make every bus route where you wait	
an hour to at least 30 min so that way it's more effective	Bus Service
Totally understand why you would cut the X8 route but it is the route I take to work every day! I	
obviously can?t speak for others but I would be willing to pay more like \$4-5 per bus (or metro) ride.	
Obviously there are a large number of people who take the bus but do not pay, and there would be a	
number of people who might 1) not pay who would have otherwise paid if it was cheaper but still ride	
and 2) not ride because it?s too expensive. But maybe there is a higher price point sweet spot. Not	
sure. Regardless I am willing to may more than \$2 per ride for the bus.	Bus Service
Some of the bus lines are already under served You basically want to cut all the bus routes that connect my area, Lanier Heights/ADMO across town	Bus Service
(S2, L2. 42,43,96). I don't take the bus a lot but I like to take it on weekends, inclement weather, when	
I have an injury like I do right now. Yesterday I waited over 25 minutes to get on a bus at 4pm outside	
Columbia heights metro. This isn?t sustainable city transport. The only real way for me to get to work is	
wmata. I walk some days but that?s 1 hour and 5 minutes and I don?t feel safe biking in this city. I?m	
required to go to the office 3 days a week and it alreay takes me 40 minutes to go in. More if I just miss	
a green train because I can?t take yellow anymore. If you made the trains less often, I?d feel even more	
unsafe on them with the crowds and have to time life better or be late everywhere. The signs outside	
metro don?t even work anymore to know when the train is coming. We need to create societal value	
for public transit.	Bus Service
I believe that if you enforce people to pay their fares on the buses and rails we would not have these	
	Bus Service
That last question was WRONG. You should not pass the financial pain again onto riders (who are now not the wealthy federal worker commuters, but working class people. Fares are never going to cover	
expenses to operate transit. You shouldn?t cut service transportation is a public utility. Secure more	
government funding from Maryland, DC, Virginia, Federal. Just a rider and doesn?t matter what I say.	
You can rename stations on political will, but somehow can?t secure funding?? Reliable and	
predictable service delivery will bring more passengers. My trips can be 30 or 120+ minutes.	Operating Budget, Management and Spending
I hate paying when no one else seems to. Cutting the 89M would mess a whole lot of people up as	
there are not many ways to get to Largo or Columbia via Metro and RTA is extremely unreliable. If	
everyone paid the fare on bus and trains you would have more money	Bus Service
Plz keep 2B route it is essential. Also with the 29K & N, keep them every 40 mins these are busy route	
lines. 28A & 1A should still run past midnight aswell.	Bus Service
All of the lines of metro and bus I take are packed. The problem is fare evasion. These solutions do not	
fix the problem. If nobody pays no matter how much you charge you won't make money. This is an embarrassment of leadership. DC public transportation is already a mockery compared to other big	
cities and now you're proposing making it worse. Fix fair evasion, that's the answer and it's clear to	
everyone except those making decision.	Bus Service
The Metro is how I commute every day to work, to buy things, to go to my appointments, and to see	
friends and loved ones. Without a request service or with more expensive service I won?t be able to	
rely on it and I?d probably turn to alternatives like walking or using car sharing apps. But there are a lot	
of people for whom metro is their only way of moving around. They may have disabilities or cannot	
afford other modes of transportation for example. I want WMATA to consider those people first when	
thinking about fare increases or service changes. I want them to fight harder to get funding from local	
and federal governments to keep transportation as accessible as possible. There is a lot of wealth in this	
region with new high rises every day and some of the most powerful companies in the world	
headquartered here. It makes no sense then that we cannot redistribute this wealth to ensure everyone, including those very wealthy people, can safely move around.	Capital Budget
Habemos personas que salimos de trabajar de Washington a las 11:20 y vamos para Maryland	Capital Budget Miscellaneous
Keep it cost effective as possible. It should not be expensive to get around the DMV.	Fares/Fees/Parking
Please extend K6 route until Randolph Rd. Rotation of K6 from New Hampshire Ave - Old Columbia Pike	······································
- Stewart Ln - Lockwood Dr - New Hampshire Ave is always empty. So instead if K6 extends to Randolph	
Rd that could assist in reducing C8 service.	Bus Service
You always take about closing later but instead you should consider opening earlier. Metro is a	
commuter system. Most people commute in the morning. More people could use the system if it	
opened earlier. You also suggested raising bike locker prices. You should consider charging people who	
bring bikes in the system. Bikers take up 3-5 spaces on trains so they should be charged more.	Rail Service
I use the Metro every day, and everything is fine, the only problem is that sometimes it takes too long.	Fare Evasion/Safety/Crime
Metro needs to start going after all these people that don?t pay their fair is not fair for those of us that pay our metro fair they have to pay but people who don?t have to pay are allowed to get away with	
not paying!!	Rail Service
I do not own a car and solely rely on Metro, so I am forced to tolerate any changes to keep the system	
running, but I vastly prefer a fare increase to a reduction or elimination of service.	Fares/Fees/Parking
I really hope service isn?t affected, and if not expanded. Honestly have a more simple system where	
getting onto the system is one flat fare, even if it is higher. I would support a higher fare if it meant	
maintaining or improving services. I also think that sponsoring and encouraging more businesses and	
agencies to pay for public transit stipend is extremely beneficial.	Bus Service

1 This is No Way to End 50 years of Transit Service that Metrobuses and Metrorail have Provided to the	
Region! Disgusting Disgraceful! 2 The Main Reason we're here if because of LACK of ENFORCEMENT of	
GATE JUMPING! 3 Choose to Piggyback off CharmPass instead of that useless Smartrip App! Smartrip	
could be Added to CharmPass, allowing those who don't have a Smartrip Card to Pay their Fares from a	
Bank/Card Account or Jurisdictional Government Social Services' Account. It's also currently being used for MARC and MTA Commuter buses and the MTA BaltimoreLink System. This could potentially ease	
GATE JUMPING by those who don't have or can't afford a Smartrip Card. 4 Please Try Harder to get the	
Necessary Funding. These DRACONIAN CUTS are DISCRIMINATORY, Targeting LOWER INCOME and	
MINORITY RIDERS, SENIORS, and PERSONS WITH DISABILITIES, who have NO OTHER OPTIONS to	
Metrobuses! 5 Transit Police MUST COLLECT CAMERA FOOTAGE from All INCIDENTS REPORTED to them	
by Riders and Drivers. Not Just from Victims who Report. Not All Victims Realize they're Victims, nor do	
Victims Feel Safe Reporting. 6 Don't Allow for Drivers to be Intimidated by Bullying Riders who want to	
Carry Out their Violence and Inappropriate Behavior on Metrobuses! 7 We NEED ALL of our buses	
Running! MANY of us have NO OTHER OPTIONS!!!	Bus Service
keep at it its good stuff	Miscellaneous
1 Metrobus is 50 years old. And Now you Decide to Destroy it Forever??! 2 The Reason we're here in	
the first place is because of LACK of ENFORCEMENT of GATE JUMPERS!! 3 Transit Police are Not	
Cracking Down on Inappropriate Behavior involving a person Attacking/Violating another person on	
Metrobuses, probably Not on Metrorail either!!! More Camera Footage of Such Inappropriate Behavior	
should be Collected without Waiting for a Victim to Report. Not All Victims Realize Victimization nor	
are Safe Reporting. However, If a Rider(s) who would be Considered a Witness, who Also Felt	
Victimized were to Report, Camera Footage Should be Collected, and an Incident Report Written up	
Automatically!! 4 Piggyback off of MTA's CharmPass for those who don't have access to a Smartrip Card	
instead of the Useless Smartrip App. CharmPass is good on MARC and MTA Commuter buses as well as	
the MTA BaltimoreLink System. Perhaps CharmPass could be Linked to a Jurisdictional Government	
Social Services' Account to help pay Transit Fares in Lieu of GATE Jumping. 5 Please Try a Little Harder	
to get Funding or our Transit System. MANY of us have NO OTHER OPTIONS!!!!! Cutting Bus and Rail,	
Raising Fares is a Very DISCRIMINATORY Policy!!! These DRACONIAN CUTS would Make TRANSIT	
AFFORDABLE ONLY for those who are FINANCIALLY WELL OFF, and Don't Usually Ride Anyway.	Operating Budget, Management and Spending
Please also take into consideration about where vulnerable residents live when deciding which	
Metrobus routes to eliminate or shorten in the annual proposed budget! For instance, the Ward 4	
family homeless shelter is on 5th & Kennedy Sts. NW and the 62/63 bus route services these residents!	
By eliminating//shortening these routes, these vulnerable resident may not be able to transport	
themselves safely.	Operating Budget, Management and Spending
Clean up busses and metro cars and stations. Make it sparkle and shine and more people will cime	
back. how about more spacing in between bus stops, every 4 or 6 blocks instead of every block?	Bus Service
I unequivocally oppose any fare increases or service cuts. I, like thousands of others in the DMV, rely	
solely on Metro when I cannot walk to my destination. The negative impacts of fare increases or service	
cuts inevitably affect the people who most rely on the system (e.g., people with disabilities, poor and	
working class people, young people, the elderly, and visitors). If it costs more and takes longer to get	
where people need to go, they often simply won?t. This means fewer errands and office visits and less	
social activity, which means not only less revenue from fares but also less revenue from the taxes	
people would pay by doing and spending more. This threatens the health and vibrancy of our	
communities, and only sets us up to atrophy the public transit system and the communities that rely on it. Better buses and trains = better cities = better communities. As mentioned, WMATA is an integral	
part of our region's economy, connecting millions of people across the DMV area and directly	
employing over 9,000 Amalgamated Transit Union (ATU) workers. Extensive, reliable, and equitable	
public transit ensures that nurses can get to hospitals, teachers can get to classrooms, federal	
employees can go to agencies, and visitors from across the world can explore our nation's capital. In	
short, the metro system underpins the lives of nearly every person in the DMV area and is a beacon of	
pride for our community. Allowing any of these cutbacks to be enacted would have negative ripple	
effects for years to come. Again, cutting metro services will likely lead to fewer riders as people shift to	
more reliable transportation options, meaning less revenue from fares, and likely another round of	
budget cuts, creating a perilous death spiral. Moreover, it would also likely mean higher extraneous	
costs in other areas and less revenue from other taxes. Save our metro!	Operating Budget, Management and Spending
i would like to see a list of what to stations would be closed as soon as possible, negarating the other	
changes, I believe your best bet is to increase prices as opposed to gutting service during your weekday	
hours of operation. If you want to commuters, who form the most of your rider base, to use the	
system, you should try to impact them the least. Many get subsidies to use metro from their jobs, and	
so would be less agitated by fare increases than if they?re stuck waiting for trains. To give you an	
example, I use metro to get from an end of line station to downtown DC for work. That is a LONG	
commute for me - about an hour and a half on the trains. If it were made longer, I don't think I would	
take the metro anymore because it?s already such a long ride. Also, please don?t take my bike locker	
from me - I think the annual fee is reasonable and I need my locker! Finally, because there?s nowhere	
else I can really provide extra feedback, I want to provide it here, because it is the most important thing	
for me when I decide how I do my commute. I can handle fare increases, or service cuts, but I grow	
increasingly concerned about my safety. I believe there should be visible police presence on all	
platforms, and preferably on trains. I have been harassed, I know people who have been assaulted or shared similar horrifying experiences on trains like you wouldn?t believe to the point they stopped	
riding the metro. Generally the offending party is not caught, from what I understand. This is what	
scares me, and numerous people I know, from using metro more, and I would like to see WMATA make	
rider safety from crime a bigger focus. Installing the new fare gates to orecent farejumpers was a good	
first step as from what I understand they were a significant contributor to crime. But more needs to be	
done. Actively increasing police presence, taking action to combat crimes that are seen or reported,	
and stopping farejumpers from doing whatever they want should be prioritized. Even simple things like	
people freely smoking weed on the trains causes problems, as if others see no consequences for those	
actions, it makes individuals feel like they can get away with breaking rules or committing crimes	
themselves. There needs to be more enforcement of the rules, or the system risks driving away the	
commuters who you are trying to lure back. Other countries are able to do this, and it keeps people in	
check. I commuted daily to work using the subway system in Berlin. I never experienced harassment, or	
crime, or saw anyone flagrantly break rules because those rules were aggressively enforced. To give an	
example, tickets in the Berlin subway system operate on an honor system: you can buy tickets at	
stations and could technically ride the train without buying one. However, plainclothed employees

I unequivocally oppose any fare increases or service cuts. I, like thousands of other people in the DMV,	
rely solely on Metro to get around when I cannot walk to my destination. Fare increases and service	
cuts inevitably have the most negative impacts on those who rely on Metro the most (e.g., people with	
disabilities, poor and working class people, young people, the elderly, and visitors). The cost of literally everything has gone up, and if people cannot get to where they want to go and it costs more to get	
there, they often simply won?t go. This would mean lower ridership, fewer appointments and errands,	
less social activity, and thus, less access to critical goods and services and less spending in the	
community on vital necessities or even leisure. This threatens not only the health and vibrancy of our	
community, but also the local economy and tax revenue. This could mean higher extraneous costs arise	
in other areas and result in a lower budget in the future, potentially starting a dangerous cycle that will	
atrophy the public transit system and the people and communities that rely on it. Better buses and	
trains = better cities = better communities. As mentioned, WMATA is an integral part of our region's	
economy. The system connects millions of people across the DMV area and directly employs over 9,000	
Amalgamated Transit Union (ATU) workers. Extensive, reliable, and equitable public transit ensures	
that nurses can get to hospitals, teachers can get to classrooms, federal employees can go to agencies,	
and visitors from across the world can explore our nation's capital. In short, the metro system underpins the lives of nearly every person in the DMV area and is a beacon of pride for our community.	
Allowing any of the proposed cutbacks to be enacted would have negative ripple effects for years to	
come. Again, cutting metro services will likely lead to fewer riders as people shift to more reliable	
transportation options, meaning less revenue from fares, and likely another round of budget cuts,	
creating a perilous death spiral. Moreover, not only would there be less revenue from fares to pay into	
the system, but less revenue in the form of other taxes people wouldn?t pay if they engage in less	Operating Budget, Management and Spending
Right now, the fares are cheap and I worry that reducing metro service could start a death spiral that	
kills it. I love the fact that I don?t need a car to live in the city because the metro is so reliable.	Fares/Fees/Parking
Insulting that none of the budget mentions fare evaders. Also don?t shutdown deanwood station.	
Close cheverly instead. Cheverly is a parking lot tucked in the middle of nowhere. Deanwood is right	
next to the community center, a school, and most people in the neighborhood don?t have cars. Plus more transit oriented housing is being developed immediately north of the station.	Operating Rudget Management and Spending
WMATA sends mixed messages: bus lines now running 24/7 but we're cutting service get it	Operating Budget, Management and Spending
together, people, and meet your service level commitments. If you're not reliable, you're not a viable	
choice. What's the cost of maintaining the fare system? Consider the Helsinki model: expected to buy	
ticket electronically, no fare terminals/turnstiles, inspectors spot-check your ticket on the train/bus,	
heavy fines if no ticket.	Bus Service
While probably an equity issue, increasing the fare is more desirable than service cuts.	Bus Service
Don't cut service & cause a transit death spiral	Service Levels
Take money from highway construction and give it Metro. Develop WMATA land around the stations	
and make a fortune. Keep away from the death spiral!	Rail Service
WMATA's services are crucial to my way of life. I can't imagine living in q DC without Metro after 10 PM	Due Camilan
or without the G8 on weekends. It's unconscionable. You have people that take the metro to go to work and come home and some of us work late at night.	Bus Service
The thought of the metro closing earlier than midnight shouldn't even be a thing. Yall need to focus on	
putting these fare gates in and stop letting these crackheads who do nothing but ride The rails and	
harass people all day in the system. Why do we, the working class, have to suffer because yall won't do	
anything about the peke hopping the fare gates? Look to New York's subway system. They are 24 hours	
and maintained! Why is the capital of the united states' transit lacking so badly?? Yall who are here	
making these proposals, garunteed aren't taking the metro every day, or if you are it's maybe a few	
stops here and there. Yall don't see these people jumping the gates at Greenbelt or these crackheads	
begging at Metro Center or Union Station. If yall did, you would be working to have Metro PD more	
present on the mezzanine level, where they need to be, stopping these folks from dodging the fares.	Fares/Fees/Parking
Si llegara aumentar los presios tambiÂ,n tienen que tener mas seguridad menos retrasos y avisos si va ver retrasos o si no funcionan	Miscellaneous
The D6 is the only bus route that runs through my neighborhood. If the route is eliminated, I and other	Wiscenarieous
residents without cars will have no affordable travel alternatives, so we may end up being forced to	
move altogether.

Comment	Category
This system has turned into a fiscal mess. The system is supposed to be a public transportation system	
and a low-cost alternative to driving to areas in and around Washington DC. The cost to park and ride	
on this rail system has turned into an over-priced system that has failed the local public. It has turned	
into fiscal black hole that serves no one and has lost the trust of the people. The price is so high that many of the young riders and criminals dodge paying for this transportation and steal from the	
remaining paying public to offset any decent youth jobs or training programs in DC. Most riders today	
when riding the system are afraid of the criminal element and the lawlessness observed by the black	
youth riding the system. The lack of police presence or arrests made on these juvenile delinquents to	
combat this problem leads to lack of ridership. High prices and high crime rates are a major problem for	
this system and finding alternative funding solutions will not fix the low ridership numbers.	Fare Evasion/Safety/Crime
The population and traffic congestion continues to grow in the area, and the region needs Metro.	
Please consider salary cuts for the people at the top.	Rail Service
DO NOT CUT SERVICE whatever you can do. Raise fares, get money from states, get philanthropy	
money, advertise like hell in the metro, whatever. But service cuts will cause a transit doom loop that	
will be near impossible to recover from	Bus Service
I think service cuts is detrimental no matter what, providing access to as many people for as long a time	
as possible is good. Also would maintain having suburbs come in and spend in dc and vice versa so the	
region gets more tax revenue flow. I could understand fair hikes up to 25% for long distance but station	
to two stations down should be cheap no matter where. Some buses may be redundant at high	
frequencies which is understandable. Charge companies when their rail car products fail, have stringent	Due Carvina
requirements. If service gets worse (less frequent, less reliable), I will stop riding. But service can be reduced (fewer	Bus Service
bus stops, fewer metro stops) and not be worsened. As long as transit trips are cheaper than ride share,	
I would pay more to keep service at least as frequent as it is now.	Bus Service
WMATA has been set up to fail by state leadership in Virginia and Maryland for too long. It's unfair to	
the whole region, but DC residents seem to get the worst of it. Anyway I can afford to pay my fares, so I	
will, even if they go up. I don't support punishing poorer people who can't but still need to get around,	
so please don't bring in wasteful expensive police like New York does.	Fares/Fees/Parking
Earlier opening and later closing on weekends would tend to be beneficial because regular Metro riders	
are disproportionately working class and thus disproportionately likely to be working early, late and	
weekend shifts and in need of Metro during those hours. Higher parking prices I also approve of	
because they would tend to discourage car use and so help the transition to a greener city.	Fares/Fees/Parking
Please done cut the G2 bus route. Also I would like if you invested in cleaning/maintaining the stations	
more. Some of the downtown stations smell like urine and are riddled with homeless people.	Bus Service
What arrangements have you made with DC, specifically DCPS regarding ridership for the kids in the	
city using the bus system to get to school. I have a child that rides the metro to school daily. I asked if they are required to tap into the bus system, and they mentioned the bus driver does NOT require	
them to do so. Which on data analysis if Metro is looking to cut routes based on this data input, your	
operators are skewing the information for which you make decisions. Wondering if this is accounted for	
in another fashion and/or if routes that service DCPS will be available during those school hours that	
correspond with typical work commuting hours. As a suggestion for finding funding: As an organization	
that is affiliated and intertwined with the local/Federal government, why isn't anyone speaking about	
subsidies and furthermore taxing people as a measure of funding public transportation? Could be as	
simple as taxing every vehicle in the local counties with Metro access; whenever someone purchases,	
leases or registers their vehicle. As non-users of public transit grows the traffic congestion grows and as	
the producers of this issue and not using public transit, this is your way of evening things out for those	
that need it and also your penalty for not using it.	Bus Service
Send this feedback to DMV politicians. Metro users support stable funding for WMATA. Cutting service	
means fewer people will uae the aytem making the problem worse. Reduce parking fees and more	
people will ride.	Service Levels
I would not mind a minimal increase of fares to get to work however, it will create a financial hardship	
for most of your ridership. I would like metro to focus on the safety of the trains and on the safety of	
the passengers. I also worry about the accessibility in the stations for people who have disabilities and are unable to take the escalators as sometimes the elevators are out of service. I appreciate your	
consideration. Thank you.	Operating Budget, Management and Spending
WMATA needs to ask for budget increases from the collective DMV (DC, MD, VA) area. People need to	
work in the office instead of from home. Secondly, DC is the nations capital, it looks really bad when a	
global international city does not have a functioning transportation system. I've lived in Denver, NYC,	
Chicago and LA. There is no reason why metro should close at 10 pm. Why is metro proposing to close	
at 10pm in the year 2024? This is incredibly backward. Metro needs to cut the bloat of the upper level	
management admin positions. And if those positions are absolutely necessary, raise the fare, get more	
money from the feds and local states and find a way to continue operating Metroaccess and the buses	
and trains at pre-pandemic levels. Lobby the mayors and governors and the feds to put people back to	
work in person. The idea of the nations capital shutting down at 10pm is ridiculous. Finally, cutting too	
many bus lines affects lower income persons, retirees and those of us who use public transportation to	
lower gas emissions and carbon emissions for the climate change purposes.	Operating Budget, Management and Spending
I don't know how, but please: you must find a way to maintain service (no service cuts) without	
increasing fares. Cutting service or increasing fees would BOTH reduce the amount of faith people put

I also know people need to feel safe on Metro. The security guards on platforms is a good touch. Metro is very important to me and the frequency of buses and trains is very important to the high quality of Metro service. The previous question is a logical fallacy. Metro can fix its budget issue by requesting a permanent funding tax from all 3 municipalities. The idea that the only way for metro to fix its budgetary issues is by either cutting services or increasing fares is false. You need to control your budget and stop overpaying executives. Why continue to brag that you have the highest paid CEO of any transportation system in the country when he obviously is incapable of doing the job. Why are you continuing to reward his Idiocy with money rather than redirecting those funds at fixing the overall problem? Didn't 'you guy just decrease the fare? Anyway, do not decrease service. The root of urban sustainability is accessibility. And that is especially critical for people who may be disabled. Increase fare instead. I would prefer fare increases vastly to service cuts. While I am happy to pay more to keep the current level of service, I am worried that others would be unwilling or unable to afford price increases, and thus ridership would decrease. The jurisdictions should fund metro, this is ridiculous You should prioritize equity when making service cut. You shouldn?t cut or modify a single bus that operates in wards 7 or 8 of Washington DC. Buses in wards 7 and 8 have high utilization because there	Bus Service Operating Budget, Management and Spending Fares/Fees/Parking Bus Service

If Metro addressed these two, and maybe did a bigger pull towards bus service (which is cheaper than metro and gets you more direct) it would possibly see a higher increase. However, the increased level of no safety for women has been a large hinderance for my community. I'd encourage possibly more ridership efforts also going to lower income communities that heavily rely on bus. Make the buses there more frequent, while possibly not doing buses as frequently in higher income neighborhoods that likely can afford other options like ride share more frequently. I don't think that increasing the times between rail and bus service will make anyone WAMTA fans. Focus on getting people to places around the city and neighborhoods more frequently, and safely. I know it's a hard	cars, increasing fairs and no protection or safety for it's passengers. I use metrobus, route 22F daily to go to the Pentagon for work. I'm hopeful that this route will Please make sure to plan and save capital funding to ensure that the metro rail system is safe and reliable. Having a future safety risk or a rail crash from lack of maintenance or capital funds will cause a further reduction in use of the system. Dramatic Abd excessive reduction of the region's public transit network. Would seriously set back the regional economy and, like all such proposals, would hurt those at the bottom of the economic ladder the hardest. It's particularly outrageous to remove service form areas such as Bowie, where the s if service cuts on rail are imposed, request improvement of Metro apps and websites to have accurate and up-to-date next train information. You need to figure out a way to prevent the folks that don't pay their fare. Instead of putting a penalty on paying customers you should be finding solution to make the unpaid riders held accountable. The lower the fares the higher amount of ridership! I purchased my home with Metrorail proximity (Red Line) as a specific criterion, and as I work in healthcare and commute at early/late hours, I rely on the expanded service to get to work - as do most of the commuters on my usual morning train. Losing coverage on the Red Line would mandate that I	Bus Service Fare Evasion/Safety/Crime Service Levels Bus Service Fares/Fees/Parking
ridership due to more work from home days following the COVID-19 pandemic. Yet, a lot of the reasons people don't ride WMATA bus or metro rail anymore isn't because of the service being bad, it's because it isn't a) frequent enough to get you to places on time; b) women in particular don't feel same on the transit system due to increased crime and lack of security at stations late at night on metro rail platforms. If Metro addressed these two, and maybe did a bigger pull towards bus service (which is cheaper than metro and gets you more direct) it would possibly see a higher increase. Having a future safety risk or a rail crash from lack of maintenance or capital funds will cause a further reduction in use of the system. Dramatic Abd excessive reduction of the region's public transit network. Would seriously set back the regional economy and, like all such proposals, would hurt those at the bottom of the economic ladder the hardest. It's particularly outrageous to remove service form areas such as Bowie, where the s if service cuts on rail are imposed, request improvement of Metro apps and websites to have accurate and up-to-date next train information. You need to figure out a way to prevent the folks that don?t pay their fare. Instead of putting a penalty on paying customers you should be finding solution to make the unpaid riders held accountable. The lower the fares the higher amount of ridership! I purchased my home with Metrorail proximity (Red Line) as a specific criterion, and as I work in healthcare and commute at early/late hours, I rely on the expanded service to get to work - as do most of the commuters on my usual morning train. Losing coverage on the Red Line would mandate that I drive to work, which would cost me an unacceptable amount of time and money in traffic delays, parking access, and staff garage fees. I have no problem paying extra for the service, but it needs to be available. I understand the budget struggles of WMATA, particularly in a city that has seen significantly lower ridership due to more work from home days following the COVID-19 pandemic. Yet, a lot of the reasons people don't ride WMATA bus or metro rail anymore isn't because of the service being bad, it's because it isn' a) frequent enough to get you to places on time; b) women in particular don't feel same on	Bus Service Fare Evasion/Safety/Crime Service Levels Bus Service Fares/Fees/Parking Fares/Fees/Parking Fares/Fees/Parking

Metro should really look at restructuring it's pricing model. The distance model doesn't do itself any favors and makes it more confusing for folks to budget and plan. Absolute flat values for transit would	
most likely be an incentive. This would be an enormous drain probably, but reconfiguring cars and	
seating may also be of help. Having something like NYCs train seating would benefit riders during heavy	
times. It feels like people forget benches seat two people.	Operating Budget, Management and Spending
For the average rider, the total cost for riding the metro is double the listed rate (there and back). At \$2	
(or \$4 round trip) metro is reasonably priced for it's service, however at higher rates, the constant closures/disruptions in scheduling, especially when a trip requires one or two transfers makes it more	
efficient to uber/lyft to and from my destination. As a customer who uses Metro three or four times a	
week after work for social events, a lot of the proposed changes (fee increase, decreased service hours,	
etc.) would cause me to either jump the gate, not go to social events, or look into uber/lyft more.	
Ultimately, when think about your decisions, understand that the budget cuts listed will decrease an	
already decreasing revenue. In Germany a couple summers ago they tried decreasing fares, and found	
that ridership increased dramatically. When \$2 weekend fares were implemented did ridership increase	
over the weekend? It might be worth considering if increasing reliability so people can make it to and from work on time, or making the metro cost comparable to gas for a car ride, would increase	Operating Budget, Management and Spending
I know your hands are tied, and I really hope that as a region these troubles can be leveraged to	
develop a dedicated funding source for the future of Metro. You all have done a fantastic job given the	
cards you were dealt, and I really want to say I support your work.	Capital Budget
The proposed metro bus changes completely remove my neighborhood (SW) from the bus system. This	
should be reconsidered.	Bus Service
Make the trains safe (in terms of passengers and engineering), frequent, clean, and efficient and	
nothing else will matter. I can deal with slow elevators, broken escalators, and old announcement boards if Leap get to my destination guickly and cafely. Focus on these two things and the WMATA will	
boards if I can get to my destination quickly and safely. Focus on those two things and the WMATA will continue to get people of multiple demographics to use it.	Rail Service
i love you metro system please dont change :(Rail Service
The service is already inconsistent and shoddy, I?d rather pay an extra dollar if my train actually comes	
at a reasonable frequency.	Bus Service
Please don't make any cutes to the 52, 52, 74, and other bus routes serving the Southwest Waterfront	
area. These are vital connections between our community and downtown DC.	Bus Service
Decreasing service patterns will quickly erode ridership, and without ridership there is no hope for recovery from a short-term budget issue. However much increasing fares hurts, if we have to choose,	
increasing fares is the only choice here that makes sense. Really want to see an investment in haunting	
the Marca who manage WMATA?s budget and won?t increase its budget through taxation. Raising	
fares hurts poor riders (I?m not one now, but I was, and will probably be again someday), and cutting	
services destroys public transit.	Operating Budget, Management and Spending
If Metro makes it difficult to travel, ridership will continue to fall, and only continue to exacerbate the	
budget shortfall issues. And personally speaking, door to door, if I catch a train right as it is approaching	
the station, my commute to work is 25 minutes now that there are plenty of red line trains running	
especially during rush hour! But before the ramp up, it used to be almost 40-45 minutes for that same commute if I had to wait 15-20 minutes for a train. That is not reliable train service and it would be just	
as fast for me to walk in those 45 minutes!	Operating Budget, Management and Spending
Red Line turnbacks at Silver Spring would target non-white and working class people for horrendous	
service compared to more affluent populations on the rest of the line. And of course these non-white	
and working class people at e.g. Wheaton and Glenmont already pay the most to ride, so the proposed	
changes to service and fares would be extra-super racist and unfair. I think enacting almost any of	
Metro?s proposed changes would guarantee an area recession: riders fleeing Metro, packed roads	
resulting in accidents/delays/stress/economic loss, and eventually people with other options leaving the DC metro area. I?m considering leaving if service degenerates while fares increase. Without	
frequent and fairly-priced Metro service, this area will regress.	Fares/Fees/Parking
People are already figuring out how to get where they are going as if Metro doesn't exist. A partially	
functioning system with a poor safety culture is not something I want to risk my life, or my precious	
time on. I dont care it may be greener, it can't take me an hour to get home from work when I live only	
3.5 miles away. But with the delays between trains, the breakdowns, the overcrowding, it's just not a	
reliable or viable option. The stress alone also makes this unworkable.	Fare Evasion/Safety/Crime
Both of the options are bad. You need to lobby more money from governments. Easier said than done, but you have a service to uphold to the people, and I'm sure you can make the govts aware of this	Service Levels
Thanks for all you do to keep Metro running. These surveys are important and hopefully are helpful.	Miscellaneous
Cutting bus service should absolutely not be an option at all, but especially when there are no other	
transit options to the areas served by parts of the bus routes. Not everyone and everything in the area	
is located by a metro train stop.	Bus Service
Please prioritize finding additional funding sources over service cuts or fare increases. Revenue only	
represents approximately 16% of total expense for the 2025 forecast. As the majority of the funding	
comes from other sources, it should be incumbent on WMATA to identify other means of closing the gap than service cuts or fare increases. If such measures are necessary, increasing operating hours is by	
far the most tenable option. This is a measure WMATA should consider regardless, as it likely would	
have a positive effect on ridership recovery overtime regardless - an area WMATA has identified as	
important in the wake of the Covid-19 pandemic.	Bus Service
So many comments. I don't know how you expect Metro to thrive if you cut services. The wait times are	
already longer than in other major cities. If you want to increase Metro ridership, you should increase	
services and also move forward with the enhancements to downtown that would reduce cars and	
traffic. Next, I don't know that Metro has an accurate accounting of ridership because the fare station on Metrobuses are often not working. If Metro did have an accurate accounting of ridership, I suspect	
that some bus lines (like P6) would not even be considered for cutting. Third, I would be happy to pay	
	1

Many of these routes are integral to both adults and students getting to work and school every day. While I understand that cutting some routes makes sense on paper, the real impact is detrimental to	
the mobility of lower and middle classes in DC. Cutting service is a bad choice that will hurt DC, most	
likely disproportionately hurting low income residents and residents of color.	Bus Service
I am in favor of implementing a county level tax for regions that use the public transport system, as	
those living in the areas have relatively higher income and also benefits most from the services. Service cuts threaten a downward spiral in ridership we should prioritize public spending on metro.	Service Levels Bus Service
Metrorail was a pain to take during the COVID-19 service frequency reductions with trains as much as	bus service
20-30 minutes apart. Riders do not want to see such low frequencies again due to possible service cuts.	
Driving a car in the District has its risks due to increased carjacking rates, and we need to have viable	
public transit as an option. This is the capital of the United States of America, proper public transit	
service should not be hard to fund, especially when the country is pumping countless dollars into unnecessary overseas military operations that don't directly benefit our citizens. We the people deserve	
better than to be subject to Metro service cuts.	Bus Service
In my opinion, irrespective of how significantly it contributes to closing the budget gap, it will be great	
to see increased ridership in Metro. But for this I think a drastic improvement in system reliability is	
needed. On a multi-leg trip, at least one leg is almost sure to involve a delay (train arrived late, train stuck during operation etc). As often as not, if I go to a station at random, there are passenger	
announcements regarding delays (including residual). Every weekend brings single-tracking and	
modified operations on anywhere between 1 and 6 lines. While significant improvements have taken	
place since Randy Clarke assumed the GM's position, honestly, much more is needed if Metro is to	
achieve record high ridership. The target has to be every train trip of a day within two minutes of its	
schedule at every station, every day. While this is ambitious, at least some perfect days would be a good target to start from (I doubt that Metro has had even one in the last 365 days). For this reason I	
allocated all of the hypothetical budget to rail maintenance activities. There has to be significant	
improvement in reliability, and after that, a suitable marketing campaign to attract customers.	Operating Budget, Management and Spending
Metro should focus on it's core service which is providing a high-quality, timely commuter service.	
Extending hours on the weekends is a luxury, but one the system cannot afford. Ridership during the	
week dwarfs the weekend ridership. Late-night ridership is extremely low outside of a few select events. While I would love a thriving weekend service, we don't presently have the resources to pursue	
lower-return services. For now, the core service should be the focus.	Bus Service
if you reinforce fare avoiding people you will be able to tackle some of the issues. cut salaries . diversify	
personnel etc etc	Fares/Fees/Parking
DC City Council needs to properly fund WMATA and not fund other pointless projects in the city. DC metro access is critical to DC thriving as a city. Enforcing metro fares is also critical, to date too many	
people just don?t even pay to ride the metro, putting the cost burden on law abiding citizens. As a DC	
resident, that is unacceptable.	MetroAccess
Please do not eliminate bus service in SW as this proposal would do! Maintain/extend service along p6,	
74 and 52 routes! If you cut the P6, 74, and 52, you cut off SW from the use of the bus toward downtown. Only leaves the	Bus Service
circulator.	Bus Service
I am a teacher in DC and I have many students that take public transportation to school. The proposed	
cuts would greatly impact mine and my students ability to get to school.	Miscellaneous
Metro should be free at point of service and be funded by progressive taxes. That would eliminate	
concerns about fare evasion and ensure steady revenue. Everyone benefits from a robust metro system, even people who don?t ride it. Cutting service would make using metro far less attractive and	
initiate a death spiral.

I think University students should get free metro, some of us need to go home and the metro is our only form of transportation and we?re broke college students I would welcome reasonable service cuts if the cost to travel remains as is. It's already expensive to travel to Virginia from Maryland and back. If your costs go up, I'm not sure how I'll get to work. Eliminating P6 and south end of 52 routes would eliminate almost all bus service between SW and downtown. While the area has ample access to trains, buses are often more accessible for those with limited mobility and are essential when elevators are unavailable to access the trains. SW is home to a rapidly expanding population, including many low-income families and individuals. I am a school teacher. The only way I, and many of my students, can get to school is the K2 bus. I cannot afford for this service to be eliminated. The cost is way too high for an individual metro rider. What is the point in having public transportation that isn't inexpensive and convenient to the rider. And if you don't have those 2 what is the point in having a train system. If there are cuts to the frequency of trains during rush hour times people will be less inclined to use metro to get to work thus decreasing ridership even more than it already it. I am begging you not to turn around at Silver Spring. It would dramatically impact my commute, my ability to enjoy the city outside of work. We are already going to be hit by the closures all summer, and	Rail Service Bus Service Bus Service Fares/Fees/Parking Bus Service
I think University students should get free metro, some of us need to go home and the metro is our only form of transportation and we?re broke college students I would velcome reasonable service cuts if the cost to travel remains as is. What is the point in having public transportation that isn't inexpensive and convenient to the rider. And if you don't have those 2 what is the point in having a train system. If there are cuts to the frequency of trains during rush hour times people will be less inclined to use metro to get to work thus decreasing ridership even more than it already it. I am begging you not to turn around at Silver Spring. It would dramatically impact my commute, my ability to enjoy the city outside of work. We are already going to be hit by the closures all summer, and it would be horrendous to go through that only to have dramatically worse service. Metro is a public service. It is incumbent upon DC, MD, and VA to fund public services. Increasing prices will hurt low income people the most and disincentivize everyone who has a choice from taking metro. With less services provided people will use it less and the budget shortfall will only get worse. I rely on the Metro for commuting and would be more likely to use ride sharing apps instead if the Metro become more unreliable. It is going to be ha	Rail Service Bus Service Bus Service Fares/Fees/Parking Bus Service Bus Service Bus Service Operating Budget, Management and Spending
I think University students should get free metro, some of us need to go home and the metro is our only form of transportation and we?re broke college students I would welcome reasonable service cuts if the cost to travel remains as is. It's already expensive to travel to Virginia from Maryland and back. If your costs go up, I'm not sure how I'll get to work. Eliminating P6 and south end of 52 routes would eliminate almost all bus service between SW and downtown. While the area has ample access to trains, buses are often more accessible for those with limited mobility and are essential when elevators are unavailable to access the trains. SW is home to a rapidly expanding population, including many low-income families and individuals. I am a school teacher. The only way I, and many of my students, can get to school is the K2 bus. I cannot afford for this service to be eliminated. The cost is way too high for an individual metro rider. What is the point in having public transportation that isn't inexpensive and convenient to the rider. And if you don't have those 2 what is the point in having a train system. If there are cuts to the frequency of trains during rush hour times people will be less inclined to use metro to get to work thus decreasing ridership even more than it already it. I am begging you not to turn around at Silver Spring. It would dramatically impact my commute, my ability to enjoy the city outside of work. We are already going to be hit by the closures all summer, and it would be horrendous to go through that only to have dramatically worse service. Metro for commuting and would be more likely to use ride sharing apps instead if the Metro become more unreliable. It is going to be hard pressed to ask those that pay to pay more when Metro has done little to effectively address fare evasion on the rail and absolutely nothing on the bus. Ridership may be up, but paying customers can see that in some stations and some bus lines only 20-percent paying their fare. Before you think about raising fare prices, Metro needs to do a better job of one of the main reasons	
for their budget shortfall, which is fare evasion. You spend what has to be a big chunk of change of a	
handful of fare gate revisions, which seem to have little to no effect on the issue.	Operating Budget, Management and Spending
Rather than cutting bus routes from the current system, I would rather see implementation of the	
Better Bus network. I support fare increases to \$2.50 flat rate on the weekends, with smaller fare	
increases for weekday service. I do not support any service cuts that see service frequency drop below 1	
train every 10 minutes.	Bus Service
I hate that wmata is being put in this situation. I firmly believe that reducing service will create the	basservice
'doomspiral' and those that can take other modes (single occupancy vehicles) will do it, which is bad for	
everyone, and most importantly, riders who rely on wmata to get to work, school, see friends, will be	
again disproportionally affected by these eliminations and cuts, further isolating them physically,	
socially and economically. As parking downtown continues to be basically free- it is a tough sell to	
those with vehicles to not drive when the metro costs \$7 for a one-way trip. I am a huge believer that	
frequent, reliable service is the best way to move forward. If a bus ran outside my building ever 15	
minutes, I would take it to do all my errands and get to work already it only runs every hour (and not	
weekends, when I want to take it) and if it runs any less frequently I will not even consider taking it.	
Same for the metro- waiting for up to 20 minutes at an outside, cold, dark station is not something I	
am going to do. Please protect current riders, and thank you to your bus and rail drivers for all they do	
for us.	Bus Service
Publish which stops you would close - this will impact my response to the survey. Also, why build like	
10 new silver line stops just to close 10 other stops?	Miscellaneous
My biggest concerns with taking the metro are safety and reliability. Without these two issues being	
	Fare Evasion /Safety/Crime
addressed, it will be hard to justify raising fares.	Fare Evasion/Safety/Crime
I completely understand how Metro has to make these proposals as WMATA relies heavily on non-	
secured funding on a yearly basis, causing this issue of a budget shortfall to happen way too often. For	
me as a metrorail user, safety is always the top priority, followed by service. Closing low ridership	
stations, while not ideal, seems to be an effective way to manage the budget without having a	
detrimental impact to service. However, decreasing service on the Red line between Grosvenor-Shady	
Grove would impact me directly, so decreasing service on the Red, Orange, Blue or Silver lines seems	
like it would have a much greater impact on people's behaviors when it comes to ridership (compared	
to closing low ridership stations). Keeping rush hour service on weekdays and decreasing weekend	
service seems like it would be another effective strategy that has a lower impact.	Operating Budget, Management and Spending
Metro should not be looking for cuts to service or fare hikes to make up their budget short-fall. They	
should be firing people who made procurement decisions regarding new 7700 series trains that	
don't stay on the track and turnstiles that allow riders to skip paying fares. These are Metro's internal	
failings. Fire some of the executives and hire-ups that made these choices. Have your new CEO take a

I hope local governments realize just how important having access to reliable and affordable transportation is to the communities. Please tell us how to advocate for better Metro funding. You keep raising prices and nothing is improving. Meanwhile you still have massive numbers of people jumping the turnstile. Make them pay, stop making your paying customers foot the bill for the thieves, who not only rode for free but create hostile environments on your trains and degrade the service.	Fares/Fees/Parking Rail Service Capital Budget Fares/Fees/Parking Operating Budget, Management and Spending Rail Service Capital Budget
Start cracking down on fare evaders at Gallery Place. Out of 20 fares, I?m the only one who pays. Metro wouldn?t need to increase fare if they properly collected fares Please keep the increased service during rush hour on metro lines. Decreased service in between is likely okay for most commuters. About 15 yrs ago you had 1/2 trains turn back at Grosvenor and it seemed fine, that's probably an easy change metro could reinstate as someone without a car, I'm reliant on Metro for my commute. It would be incredibly difficult if service was cut to 15 minute increments during rush hour Decrease the service in proportion to the funding received from the entities which pay into the system. If Virginia doesn't want to contribute, cut service in their area. Do we need the silver line running out to a field in Ashburn if they aren't going to fund it. Why should service suffer for DC residents that use it as our main mode of transportation because we have to cater to suburbanites 25+ miles outside the city who use it sparingly. Fare increases and an increase in parking fares would greatly impact those of us who don?t receive subsidies from the federal government. I?m totally against any increase with the exception of weekend fare increases. Metro is the backbone of the region, service cannot be cut/reduced as it will cause a death spiral. There must be a dedicated organization in charge of the metro budget. I absolutely love the metro. There are several ways to strengthen the farebox system, which refers to the equipment used to collect	
and manage fares in public transportation. Here are some strategies: 1. Modernize the fare collection	
system: Implement a modern, efficient, and user-friendly fare collection system that utilizes the latest	
technology such as contactless payment options (e.g., smartcards, mobile payments, or QR codes). This ensures quick and convenient fare collection for passengers and reduces opportunities for fare evasion.	
 Enhance fare enforcement: Increase the presence of fare inspectors or transit police to deter fare 	
evasion and enforce fare payment. Regular inspections and strict penalties for fare evaders can	
discourage individuals from attempting to skip paying fares. 3. Improve farebox design and	
functionality: Ensure that fareboxes are designed to be durable, easy to use, and resistant to tampering	
or vandalism. Regular maintenance and repair should also be conducted to keep them in optimal	
working condition. 4. Introduce fare incentives: Offer incentives or discounts for regular fare payers,	
such as discounted passes or loyalty programs. This encourages passengers to pay their fare and	
rewards them for their compliance with the system. 5. Engage in public education campaigns: Raise	
awareness about the importance of paying fares and the negative consequences of fare evasion	
through public education campaigns. Highlight the benefits of a well-funded public transportation	
system and the role played by fare revenues in maintaining quality service. 6. Implement effective	
auditing systems: Regularly audit and monitor farebox transactions to detect any irregularities, identify	
potential revenue leaks, and ensure accountability. Advanced auditing systems can help identify trends	
and patterns of fare evasion, aiding in targeted enforcement efforts. 7. Collaborate with law	
enforcement agencies: Collaborate with local law enforcement agencies to share information,	
intelligence, and resources to combat fare evasion effectively. This can involve joint operations,	
intelligence-sharing mechanisms, or targeted enforcement activities. 8. Consider fare integration and	
interoperability: Work towards a fare integration system across various modes of public transportation,	
enabling passengers to use a single ticket or payment method for multiple services. This simplifies fare	
collection and reduces the likelihood of evasion. Overall, strengthening the farebox system requires a	
combination of technological advancements, strict enforcement, incentives, and public education to	Ears Evision/Safety/Crime
ensure reliable fare collection and increased revenue for public transportation authorities. Please crack down fare invasion. No matter how much amount of fare you plan to increase, you still	Fare Evasion/Safety/Crime
lose money because so many people don?t pay their fares at all. They just hop on the buses and jump	
through the subway gates without being stopped by anyone. Metro staffers and bus drivers are unable	
to stop them so please think of a way to reduce this type of behavior or you will keep losing money.	Bus Service
Enforce fare payments! Fix fareboxes on buses.	Bus Service
To address budgeting shortfalls, WMATA could sell ad space in their metro cars like how they do in	
NY?s subways. There is a lot of space in the car they could sell to advertisers. Additionally, WMATA	
should work expeditiously to remove their surface oarking and convert to mixed use development or	
dense housing. The more housing near transit stops, the greater the number of metro users. People	
would be willing to pay more, especially the people who are not low-income or students. It?s more	
convenient and cost effective not to own a car with the way metro is run in DC for most of DC.	
However, if you increase wait times, then people will forgo metro because of convenience. You are	
going to drive more people away with bad wait times over cost of ridership. As long as you provide the	
same subsidized pricing for low income DC residents and senior and students. Have you thought about	
cutting ?security? staff at the metro stations? I haven?t seen them stop fare evasion. We need	
dedicated bus lanes. Riders need dynamic GTFS feed so they know where bus locations are. Reliability	
is part of convenient service. Most people I know won?t ride the bus because when they go on Google	
Maps, they don?t know when the bus is actually picking them up. Bus fare evasion is not as pervasive	
as metro fare evasion. Busses have broken payment systems. Finally, incentivize people to buy annual,	
monthly, metro card deposit. People are used to these memberships where they constantly try to get	
their moneys worth. It?ll convince hybrid workers that a membership with unlimited rides is good for	
trips they make outside of their work commute. You need to find a way to stop people getting on the bus and riding for free. One out of 5 people	Operating Budget, Management and Spending
actually pay the fare. Increase police presence at all fare gates to stop gate jumpers going in and out	
the Metro station	Bus Service
Do NOT cut service at all. It will crash ridership and destroy transit in this city, further exacerbating the	
long-term outlook of Metro's budget.	Operating Budget, Management and Spending
The red line has been killing it for my commute the last few months. Y'all are doing great. Please	
maintain the amazing service. I'll pay more. Good luck plugging the gap. We're all rooting for you!!	Bus Service
I don?t want to see any urban stations in Arlington close. It would be detrimental to Northern Virginia	
and would lead to even more traffic on the road. Fewer people out in the suburbs use metro, so if you	
are going to close stations please look at those rather than closing stations in Arlington that are	Rail Service
I stand here at 11:40pm on the gallery place platform. Thankful that the metro runs this late but	
unhappy that I had to wait 15 minutes for the train to arrive. Personally as a citizen and frequent metro	
user of DC I don?t think metro service cuts are viable. I would at all cost avoid using the metro (which I	
currently use multiple times a week) because other forms of transportation would become much more	
efficient. I would even go as far as simply moving out of D.C. Being able to easily access the city and	
work through metro is such an essential part of living in D.C. if I had to wait 15 minutes when taking	
the metro I would never want to travel across D.C., at least not by metro. Fare increases are a more	
viable option but are unfair and inequitable as public transit should be easily accessible to all. D.C is	
already seeing a crime increase. If the metro doesn?t provide good access to the city people will move	Rus Service
out at a higher rate, including me. I love the metro. But some of these changes would affect how I get to and from work! I also don?t	Bus Service
make enough money to pay for increased fares or other modes of transportation.	Fares/Fees/Parking
Don?t cut service and start a death spiral - raise revenue, whatever you need to do. Find the money.	Service Levels
Offering reliable and comprehensive public transit is invaluable. It keeps riders safe, and means valuing	
those in the DMV area who are unable to use cars as a primary means of transit, whether it be due to	
disability or finances. Public transit protects the poor and underprivileged of the city. It is also a huge	
way of combatting climate change city wide. Please care about the people who live here!	Fare Evasion/Safety/Crime
For the love of everything holy find a way to fund it. Any of these options will destroy ridership and	
provide an excuse to hit metro further	Rail Service
Providing the same amount of service levels or better will be imperative in keeping public opinion up as	
well as ridership. As opposed to technological advances (new screens, r&d for new trains/buses), which	
are nice, they are not as important as getting riders to/from their destination efficiently and safely	Bus Service
I think metro is doing a great job. Please don?t cut service particularly on bus lines. Many people do not	
pay their fares on buses so that actual ridership may not be reflected in the numbers.	Bus Service
Just raise my taxes and make the metro cheaper and more frequent	Rail Service
The budget should support the metro and strive to keep it affordable and a competitive alternative to	
driving. Would significantly profer face increases over any consist during ruch hourd. It would also be great	Operating Budget, Management and Spending
Would significantly prefer fare increases over any service cuts during rush hours! It would also be great	
if the metro was open later on weekends, since 1 am is not that useful (most folks have oither already)	
if the metro was open later on weekends, since 1am is not that useful (most folks have either already gone home for the night by then or are staving out much later).	Bus Service
if the metro was open later on weekends, since 1am is not that useful (most folks have either already gone home for the night by then or are staying out much later). Enforce fare payments on rail and bus	Bus Service Bus Service

confusing manner. it put forth two proposals then asked you if you agreed with ?the? proposal (just for the future) 2. please do not cut service. It will suck to have to pay more but having a patchwork systemMetroAccesswill be even worse. 3. thank you for everything you do. 4. please do not cut service. Itank you.MetroAccessit is clear in this survey the focus of WMATA and the upcoming budget is to decrease overall public transport service rather than increase it throughout. The focus on public transport is to be able to get people transported throughout the region. There should not be any option presented that further decreases overall idership.MetroAccessPlease don't cut late night service on the metro. I have used metro after 10PM fairly frequently in my time as a DC resident. I would buve if the metro could stay open until 2AM on fridays and saturdays. that would do well to alleviate traffic issues caused by ride share users.Derating Budget, Management and Spending1) Service cuts should be the last option. Frequency of service is a key determinant of whether people that have a choice. The goal of our transit would then become welfare - used only by those who have no other choice. The goal of our transit would be fast, frequent service that makes transit the prefered option for riders. 2) The capital budget should be gravery and increased. WMATA in the past pot itself into a deep hole from deferred maintenance due to cuts capital spending. We should learn from that experience that cuts to the capital account are a bad idea. Derating Budget, Management and SpendingOperating Budget, Management and Spending0Derating Budget, Management and SpendingOperating Budget, Management and Spending1) Service cuts should be fast riger ride act perieder divinterour and have a long commute. <td>aren?t going to pay higher ones and it simply punishes those paying fares. In my opinion, if you make severe cutbacks in the service schedules and/or raise fares 25 percent, you will drive people back to their cars and it will help to justify people continuing to work from home resulting in lower ridership. Reducing rail service and/or raising fares by 25 percent would be a big blow to those in the DMV that are dependent on public transportation to get to and from work. Finally, I get very frustrated that WMATA continues to expand the rail system when it is clearly having problems maintaining the current rail system both physically and financially. Why is reducing expense not an option? If WMATA has to constantly beg for additional funds, the entire system needs cost cutting issues addressed first, before fee increase or reducing service. Cutting service will result in a death spiral for Metro are transit. I would rather pay more to keep the service as close to current levels as possible, and I believe the majority of public transit users would agree. Metro trains are already infrequent enough. Folks cannot rely on your service. What about smaller trains but more of them? We are the nation?s Capitol after all, yet have a public transport system far inferior to that of other US cities and most of the world. If you are going to be closing lines or cutting services, you?II need to add in bus services. Folks have made their homes and livelihoods around this transportation. As a family with a Saturday worker, we support earlier opening on Saturday. It is tight already, but If there is the slightest disruption we have to drive in instead. Take some lessons from NYC Transit Authority. 1. the question about metro access service (asking to choose between two proposals) was worded in a confusing manner. It put forth two proposals then asked you if you agreed with ?the? proposal (just for the future] 2. please do not cut service. It will suck to have to pay more but having a patchwork system will be	Operating Budget, Management and Spending Fares/Fees/Parking Rail Service Bus Service Miscellaneous MetroAccess
that have a choice of whether to use transit will actually choose transit. Infrequent service will drive ridership down among those who have a choice. Transit would then become welfare - used only by those who have no other choice. The goal of our transit system should be fast, frequent service that makes transit the preferred option for riders. 2) The capital budget should be preserved and increased. WMATA in the past got itself into a deep hole from deferred maintenance due to cuts to capital spending. We should learn from that experience that cuts to the capital account are a bad load. Derating Budget, Management and Spending Metro needs to consider a flat rate per ride people who take shorter rides tend to live in the city or are tourists and can afford it more than people who live further our and have a long commute. No one pays. All ages jump or push through the turnstiles. While 1?m not against higher fares, this may exacerbate that problem. DO NOT eliminate the d6l It is the only transit that helps people in my neighborhood and kids use it to	aren?t going to pay higher ones and it simply punishes those paying fares. In my opinion, if you make severe cutbacks in the service schedules and/or raise fares 25 percent, you will drive people back to their cars and it will help to justify people continuing to work from home resulting in lower ridership. Reducing rail service and/or raising fares by 25 percent would be a big blow to those in the DMV that are dependent on public transportation to get to and from work. Finally, I get very frustrated that WMATA continues to expand the rail system when it is clearly having problems maintaining the current rail system both physically and financially. Why is reducing expense not an option? If WMATA has to constantly beg for additional funds, the entire system needs cost cutting issues addressed first, before fee increase or reducing service. Cutting service will result in a death spiral for Metro area transit. I would rather pay more to keep the service as close to current levels as possible, and I believe the majority of public transit users would agree. Metro trains are already infrequent enough. Folks cannot rely on your service. What about smaller trains but more of them? We are the nation?s Capitol after all, yet have a public transport system far inferior to that of other US cities and most of the world. If you are going to be closing lines or cutting services, you?II need to add in bus services. Folks have made their homes and livelihoods around this transportation. As a family with a Saturday worker, we support earlier opening on Saturday. It is tight already, but If there is the slightest disruption we have to drive in instead. As a family with a Saturday worker, we support earlier opening on Saturday. It is tight already, but If there is the slightest disruption we have to drive in instead. Take some lessons from NYC Transit Authority. 1. the question about metro access service (asking to choose between two proposals) was worded in a confusing manner. It put forth two proposals then asked you if you agreed with 7the? proposal (just for the future) 2. please do not cut service. It will suck to have to pay more but having a patchwork system will b	Operating Budget, Management and Spending Fares/Fees/Parking Rail Service Bus Service Miscellaneous MetroAccess Operating Budget, Management and Spending Bus Service Operating Budget, Management and Spending Bus Service Operating Budget, Management and Spending Bus Service Fares/Fees/Parking

Comment	Category
Riders shouldn't be forced to chose between service cuts and increased prices. Metro shouldn't be run	
like a for-profit business because it's an essential service (i.e. its purpose is to get people places, not to	
make money). It should be fully funded by the government and completely free to all. If the powers-	
that-be truly cared about climate change and socio-economic equality, they'd do everything they can to protect mass transit. Instead, more and more workers are being forced to either drive into work or	
allow themselves to be priced out of the city. Disgusting.	Bus Service
Eliminating all the routes through Georgetown and Glover Park (D2, D6, G2, 31, 33) is unacceptable.	
These neighborhoods are not well served by transit as it is. This proposal will eliminate all access these	
neighborhoods have to public transit. How is this even a serious suggestion?	Bus Service
Metro is very inexpensive but at many stations, it seems the nobody pays. I?ve seen men in suits jump	
over. Seems it?s considered free.	Rail Service
Don?t close any metro stations or close the system early. Metro should run later not close earlier.	
People need a cheap and reliable way to get home when they go out at night.	Rail Service
One of the things that makes WMATA great is the fact that the service is good - cutting the service will	
turn away people from using WMATA; you must increase fares to offset the budget.	Operating Budget, Management and Spending
Closing stations or removing bus lines/routes is not the way to go in a city the size of DC.	
Washingtonians rely on public transportation to get us to work, doctor appointments, grocery stores,	
hospitals, and etc. You will only hurt the community by taking away stations and bus routes. Closures	
will lead people to buy personal vehicles and you will just be dealing with additional budget issues in	
upcoming years.	Operating Budget, Management and Spending
I also support some sort of regional tax to ensure that metro can make service more frequent (both rail	Rus Sanisa
and bus) The prices of metro service are already too high. I spend \$12 per day to get to and from work.	Bus Service
Additional price hikes would make it too difficult to get to and from work. Service cuts would mean it	
would take too long to get where I need to go. The metro should be a public good that our tax dollars	
fund. It is not meant to run on it's own.	Bus Service
Andy should have moved to Capitol Hill, instead he has to ride the unreliable Metro with the homeboys	
and Gonzaga boiz. Cut away, I drive.	Rail Service
We need more money from DC, VA, and MD. These are not acceptable changes.	Miscellaneous
If you make the system run too infrequently then people just won?t use it. That?s death spiral territory.	Miscellaneous
This is your fault. You have mismanaged the system for decades and now you expect everyone else to	
bail you out? If you can't afford to operate, perhaps it's because you're so terrible that nobody rides	
you. You have lost your sense of mission and become a jobs program for incompetent people. Live	
within your means and be realistic about how you have broken the system.	Miscellaneous
Please don?t limit bus service!	Bus Service
The metro is a public service. It?s there to serve the public and it cannot do that if we have increased	
wait times in the train and bus. It?s unacceptable that leadership is so quick to increase fares/reduce	
service when yall spent millions in your fancy little fare gates (that don?t even work). I rely on the	
metro to commute to work 5 days a week and the reduced service will not only impact my work schedule, I will not be able to afford to commute to work.	Bus Service
The reality is, I don't own a car and totally rely on Metrorail to get around the city, get groceries, and	Bus Service
get to work. Service cuts would be devastating for me.	Bus Service
No one will read this. So I?II be frank for no good reason. A lot of the proposed ?solutions? are	busseivice
problems. 1. I would like to have an income based fare. I?m happy to pay more if it meant others	
didn?t have a fare increase 2. I?d rather have rolling blackouts of service that we can plan around then	
a daily roulette of a 15-20 min wait and over crowded cars 3. Whose idea was the purple line. I don?t	
think the entire population of metro users should have to suffer because of ineffectual Maryland state	
governance. 4. Fare evasion- figure out who needs financial support/subsidies and who is jumping	
gates because it?s cool. Like e-cigarettes. Def not encouraging punitive punishment - create a pathway	
for restorative justice for people who evade fares who have financial ability to pay. 5. Speaking of	
which - how much \$ goes to metro cops. Like maybe less cops. Cops have not demonstrated an effect	
on reducing or addressing crime and violence. Cops should be local jurisdiction responsibility.	Operating Budget, Management and Spending
There should be no cuts in service or fare increases. DC and other well served urban areas in the DMV	
should institute a congestion fee for all passenger cars. A gasoline tax should be enacted in all counties	
served by WMATA to support this vital infrastructure. Other taxes such as on tires and new cars sold in	
WMATA served counties should be enacted to internalize the cost of selecting ow density	Form /Form /Deriving
transportation options. Maintenance funds of tertiary roads should also be diverted to subsidize	Fares/Fees/Parking
I think if you actually prosecuted fare hoppers you wouldn?t have this experience. The number of times	
I see station managers turn a blind eye when it happens blatantly in front of them or when they open doors to help these people not pay is ridiculous. Why am I paying if clearly no one else is. Same for the	
bus? they don?t even require you swipe your card anymore	Bus Service
Would prefer a completely free public transportation system that would make it easier for everyone	
(locals, visitors, tourists) to easily use the transit system. Could also make it possible to use a credit card	
to pay for fares instead of the WMATA cards (reduces production of the cards and having to fill it up	
again if low on fares; additionally helps locals / tourists not have to figure out the system). Trains and	
buses should run longer. Columbia Heights should get back on two lines as it is the most densely	
populated part of the city. Would be helpful to prioritize buses by closing lanes to cars and have only	
bikes and buses able to travel. More bike locking stations at metro stations, such as the airports and	
Union station. Trains should run more frequently (comparative cities can run trains in their subways so	
the longest wait is 6 minutes).	Bus Service
I appreciate Metro's current focus on reliability and frequency. I hope that future changes will continue	
to prioritize improving these - I am willing to pay a bit more if i can be confident that the train or bus	
will be there when I need it.	Bus Service
Most important thing for me is that rush hour rail and bus service isn't cut, would support fairly	Rus Sanisa
significant service reductions and slight fare increases outside of rush hour and during weekends. I ride the 96 to work regularly and would strongly advocate it not be cut!	Bus Service
	Miscellaneous
I personally have not used the metro rail service in quite some time mainly due to now being fully remote. However, the proposals put forward in this budget paint a very dark picture for the metro?s	
future. If even some of these proposals were to be put into effect, I doubt I would ever choose to ride	
metro again.	Operating Budget, Management and Spending
Glover Park is already poorly served by metro. Cutting service further will lead to total collapse as	
nobody can reasonably use intermittent or spotty service as reliable transportation. Even if it?s three	
people on the bus. This is how those three people travel. Buses are sometimes simply a public good.	
None of this should be seen as a profit center. It is a public service. Just because it is a r relatively	
wealthy area doesn?t mean everyone has a car. Or money for Uber. Better reliable service will improve	
ridership. You know this.	Bus Service
ndersnip. Tod know this.	

Comment	Category
As a Glover Park resident, I find any an all efforts to cut bus service to the neighborhood to be	
completely unacceptable. The neighborhood as it is already does not have a Metrorail station and bus	
is the only form of public transportation that the neighborhood has. The D2 bus route is absolutely	
critical in connecting the neighborhood with the rest of the city by connecting us with the Red Line at	
Dupont Circle. Additionally, dozens of DC public school children use the bus daily to bring them to and	
from school from homes both within the neighborhood and from neighborhoods distant to Glover Park	
(e.g. Duke Ellington students). This proposal to cut the bus to Glover Park comes up every budget	
session, but please I beg the city to not cut the neighborhood off from the rest of the city, as the effects	
will be tremendously negative and will greatly impact the live-ability of the neighborhood.	Operating Budget, Management and Spending
No service cuts on red line between 4:30 and 5:30 in order to get to Union Station to connect with	
MARC train	Bus Service
We need to cut down on fare evasion. That has to be the highest priority.	Fare Evasion/Safety/Crime
Prioritize bus and rail service in central DC to keep it frequent in time and in space. Sacrifice commuter	
service between the suburbs and DC. The suburbanites have to have cars anyway to get around in the	
suburbs so they can drive into DC and pay to park in garages if they have to. We DC residents often don't have cars and must rely on public transit in our own neighborhoods, and we typically have very	
little interest in access to the suburbs.	Bus Service
There isn?t parking in dc so people want to use metro don?t make it worse by cutting service. I?m still	Bus service
mad that yellow stops at mt. Vernon square instead of going to greenbelt. This has made me choose to	
drive to the airport instead of metro. Further reducing service will only cause more people to drive	
loosing more customers and reducing demand for metro and further reducing fare revenue. Also when	
I ride metro at least 25% of people are not paying, there?s your missing revenue. Metro is dirty	
unreliable and unsafe as is make it better and people will use it.	Fares/Fees/Parking
The metro is extremely expensive for what it currently provides. As is, it?s unsafe, dirty, and unreliable.	······································
If the prices increase and the parking increases, and the metro frequency decreases, the value is not	
there. It already isn?t there. I will become car reliant. Maybe WMATA should look at how countries in	
Europe do it?	Bus Service
Demand funding from Fed govt, VA and MD. Metro is the lifeline for a majority of citizens and makes	
the DMV the DMV. Cutting services hollows out profit and makes living in an fun and complex city	
boring and sad.	Capital Budget
Eliminating service, especially to routes that are the only public transit option for entire areas of the	
district will have huge lasting impacts on populations on those neighborhoods cutting them off from	
the rest of the district and isolating them and eliminating job opportunities outside of their	
neighborhood. Eliminating the D6, for example, would cut off large parts of the district west of	
Georgetown that have no other public transportation options.	Bus Service
Please implement the Better Bus plan. Metrobus service is okay at best and could be a lot more	
frequent and efficient. Cutting bus and rail service unless there is too much redundancy won't do	
anything to get ridership. Also, investing in the new part of the Silver Line is important because	
ridership is lagging and the train is much slower than driving except during rush hour.	Bus Service
I use the bus to get to work, go to doctors appointments, go to movies, spend time with friends. If you	
cut service too much more people will use Uber and Lyft.	Bus Service
Accelerate and prioritize train automation on all lines as quickly as possible. This should be a no	
brainiersooner you return to full automation the better for everyone.	Rail Service
The plan to cut service may very well cause a cascade of metro avoidance that only future metro cuts	
can remedy until lines run every 20-30 mins and effectively no one uses the metro	
contremedy undimines run every 20-50 mins and effectively no one uses the metro	Bus Service

Please bring back service on the S1 bus route. Transit systems only serve communities when they are frequent, convenient, reliable, and safe. Without these things, ridership will drop as people find alternate means of transport. This will create more traffic and traffic violence, will derail DC?s efforts to combat climate change, and will add new expenses to former riders whose only other options are ride share or private vehicles. Combination of all proposals?cut service on weekends to very underutilized metro stations (bottom 5- 10); reduce weekend and holiday service a little but still offer it; raise parking rates (charge an extra couple dollars) and metro rates (minimally). Make sure Virginia contributes significant funding if the Potomac Yard arena plans go through. The cuts in SW, especially the P6, will leave a significant number of people without easy access to other routes. Please bring back service on the S1 bus route. Transit systems only serve communities when they are frequent, convenient, reliable, and safe. Without these things, ridership will drop as people find alternate means of transport. This will create more traffic and traffic violence, will derail DC?s efforts to combat climate change, and will add new expenses to former riders whose only other options are ride share or private vehicles. Combination of all proposals?cut service on weekends to very underutilized metro stations (bottom 5- 10); reduce weekend and holiday service a little but still offer it; raise parking rates (charge an extra couple dollars) and metro rates (minimally). Make sure Virginia contributes significant funding if the Potomac Yard arena plans go through. The cuts in SW, especially the P6, will leave a significant number of people without easy access to other routes. A large number of people with disabilities live in SW along that line service reductions should be allocated based on funding - i.e. if Maryland doesn't want to pay their fair share, cut service in MD. Prefer metrobus service cuts to metrorail service cuts. Charge more for any routes that start in one jurisdiction and end in another. Routes within DC should always be cheaper. No Bus Routes should be cut. You are driving people away in using public transportation. 80% of the people going through my station jump the turnstile. I pay every time but it will show low ridership. Put the tail gates in everywhere as if my station closes, I will move out of the DMV. I will get on a bus and pay and be the only one who does for the entire trip. Raise the rates and enforce the fair jumpers to support those of us who pay, rely on the metro to get to work and deserve trains frequent More security In my NE Capitol Hill neighborhood, which is not well service. I moved to DC from another state specifically because of the Metro. I left a car-centric environment to be free of having to drive as much, especially to work. Draconian changes to the schedule (eliminating	
early morning or late night trains) would necessitate me having to drive to DCA or IAD for trip reports.	
I?d rather pay more for continued service as is (which can be pretty pathetic on Blue and Silver lines)	
then face service cuts, driving, spending more time in traffic, on tolls, on gas and polluting the	
environment more. I know I?m of a financial means to absorb these fare increases, but fare increases	
and service cuts disproportionately affect the working poor and middle class. Service cuts will only drive remote workers to continue working from home at a time the city needs to be getting people back to	
the offices and restaurants.	Operating Budget, Management and Spending
Between DC, VA, and MD - how much is each state paying into Metro's services? All of these proposed	
cuts seem to presume that only commuters use Metro, therefore it's useless to run any buses or trains	
in the District on weekends or in evenings. Three quarters of a million people live in the district. We use	
metrobus and rail as our mode of transportation. Any cuts to service or budget issues should be considered in partnership with DC DDOT, DMV and parking enforcement, who make it too easy and	
inexpensive to drive and own cars in what should be a metropolitan walkable city. Not every	
neighborhood or area, of course, but I have lived in many large and mid-sized citiesmany without a	
robust metrorail and metrobus service and even then they all made it incredibly more difficult to own	
and park cars. It's insane we're leaving all of that revenue on the table - revenue that could be shared	
to support public transportation. try going after the fare jumpers to increase your revenue. I see it almost every trip. Your fares are quite	Operating Budget, Management and Spending
high compared to other regions, and the cuts in service simply make you not relevant. I don't want to	
sit around in a station for way too long to board a jam packed metro car.	Fares/Fees/Parking
As a daily commuter in two directions I witness at least 50% of riders of both the bus and the metro not	
paying. The 64 is packed every week day but most people don?t pay. Address truancy and you?ll fix the	Operation Budget Measurement and Counding
budget problems I don't like the idea of the metro pricing out any riders, but the proposals to cut services instead of	Operating Budget, Management and Spending
raising prices seem like it would make the system pretty much unworkable. Who cares if riding it is	
affordable if it won't get you where you want to go at the time you need to be there?	Rail Service
While the budget constraints are very real and serious, I think that both fare increases (to fares which	
are already more expensive than most big cities) and service reduction will be detrimental to ridership	
and the health of DC Don't eliminate the 96 bus. PLEAAAAAAAAAAAASE	Operating Budget, Management and Spending Bus Service
I am 81 years old and it?s very difficult for me to use the subway so I use the buses. Waiting at a bus	
stop and getting on off the bus. I?m less likely to get harmed, than trying to get on the trains. I consider	
this a major attack on seniors and people who depend on the buses to go to work. I think you should	
get more money from city Council and the mayor, if the mayor has cut transportation, she is also cut	
Education without buses. DC is going to go downhill really fast and the number of cars will increase substantially. This is a very bad situation.	Bus Service
Decreasing service quality will further decrease ridership and revenue. Improved reliability of the	Bus Service
service and high frequency during weekday peak hours will increase ridership. Also reduce fare evasion!	Fare Evasion/Safety/Crime
You provide an essential service. I'm fortunate in that I can pay more, and I find that your prices are so	
low for what I receive in return. I think many people, if they were honest, would probably agree.	Fare Evasion/Safety/Crime
Due to health reasons, I have no choice but to use Metroid to get to and from work. I prefer route reductions to route elimination as that means I can still get around, even if it takes longer.	Bus Service
Increasing wait time on many of these lines would tank ridership and lead to even worse issues in the	Bus service
long-term. Transit is absolutely necessary for this city and gutting it like this is unacceptable and	Bus Service
Cutting service and increasing fares is an awful proposal when service is already low compared to many	
metro services and fares are high.	Fares/Fees/Parking
I would love to use the busses more but they are constantly delayed and sometimes don't show up. There are also often technical issues.	Bus Service
I stopped riding metro rail after you decided to eliminate yellow line service north of Mt. Vernon	
Square, thereby eliminating a direct line to both my job in Virginia and to the airport. The ?equity?

arguments of privileging stations with low ridership and high fare evasion rates on the green line are nonsensical and an insult to riders who actually pay their fare. ?But you can transfer from green at Mt. Vernon!? is also nonsensical and shows that GM Clarke has no clue what it?s like trying to travel with a young child and three suitcases. I don't like driving but don?t have a choice after GM Clarke chose to make my commute more difficult than it needs to be. The metro fare is already high. We would appreciate keeping the price fixed for now. I understand the trade-offs and hardships WMATA is going through without a dedicated recurring funding stream. However, the generally recent service increases on Metrorail have been really beneficial to traveling the area and I hope there is a very great priority in maintaining high levels of service that are commensurate with the importance and size of this region. Even though it might not affect my traveling patterns, allowing metro to consistently and frequently run within poorer neighborhoods and to run early in the day and late in the evenings so that service industry people (not just 9-5 white collar workers) who take metro have the ability to do that is important to building a healthy city that is not prioritizing car ridership over much more sustainable keeping frequency high is the key to maintaining ridership. We need more public transportation services not less if we really want to build a city that sees less and less car activity. If buses and metrorail were more frequent, combined with more restrictions on cars / traffic into the city, we could move towards a more sustainable future. As a non-car family, we rely on the 62 bus on weekends to get to Georgia Ave for shopping, the metro and other buses. Stopping services on routes like that really hinders mobility around the city. We?re not getting paid enough to keep up with the constant increase in price. And rail and bus service cuts after 12am and at stops like Silver Spring make travel around the DMV part	Fares/Fees/Parking Capital Budget Bus Service Bus Service Bus Service

There needs to be more MEtro Transit Police at bus stops. I ride the bus daily and there are very, very	
few(and getting to be less and less) people paying. Most people don't even think of paying. If there	
were Police at the bus stops making sure they paid before getting on the bus, you could shorten the	
budget. I have never seen anyone enforce payment since COVID on the buses. You have installed	
barriers at Metrorail stations but continue to do nothing about all the people riding the buses without	
paying. I have an option on two bus routes each day and it is the same on both buses where people	
dont even stop anymore. Drivers don't want to be put in that situation to have to tell them to pay. Me	
and a friend counted 20 people getting on the bus last week without paying while going 10 stopsIt	
	perating Budget, Management and Spending
Metro's service to the region is fundamental, and cuts to service will negatively impact life across the	
board, but especially lower income residents whose work often starts before and ends after the normal 9-5 work day.	il Can ian

Wash Metro needs to increase public transportation options not decrease. In particular they should	
support areas where Metro has not built a Metro stop or line. For example Georgetown, Burleth,	
Glover Park. We need to make our city more accessible and reduce car usage. More pedestrian friendly	
streets and more bus lanes to increase usage. A bus every 30 mins? Honestly who would be able to rely	
on that service for work or play or anything? Late night service? How are late shift workers going to get	
	is Service
I ride metro every day to commute and as my main transit on the weekends (I do not have a car). I am	
a federal employee so weekly commuting costs are absorbed by the federal government and fare	
changes would be too. From my perspective, metro fares are low especially compared to other urban	
areas (New York), that being said, keeping ridership is important. I think its also important that lines	
and hours remain open, particularly so that workers earning less can get to their jobs no matter the	
time. And as we try to transition from such a car intensive city I think its important that we keep as	
much of the infrastructure up and running as possible, even if that means higher fares. I am also	
curious as to when the last fare increase was, from my memory feels like its been a base rate of \$2	
	res/Fees/Parking
	is Service
I use the red line to get to/from work 4-5 days a week, and it's been super convenient to know that my	
wait til will rarely be more than 5 minutes. I have two kids in daycare and on days when I need to pick them up, I need to know I will be able to make it in time before daycare closes. Significantly increasing	
the time between trains would make it much harder for me to get my kids on time, meaning I'd likely

Comment	Category
The parking increases seem to be reasonable, over other fare increases. Would parking still be free on the weekends? If there are ways to consolidate overlapping bus routes that have reasonable wait times	
on corridors to save money, I would support that. I don't support the drastic fare increases proposed.	
Maybe a base of \$2.00 to \$2.10, but not \$2.50. I don't support turn backs on the red line AT ALL, but	
with limited resources I would prefer turnback's on the western side on the red line as opposed to the	
east side. I also don't support turnback's that neglect the Largo station.	Bus Service
It is illogical to make red line commuters bear the brunt of cuts via turnbacks at Silver Spring instead of	
just reducing headways across the system.	Bus Service
do not reduce service!	Service Levels
I would like to keep routes open if possible Enough of the hysteria and scare tactics. If you want to cut waste, fraud, and abuse, maybe your	Bus Service
administrative and managerial employees could work harder and smarter.	Bus Service
I rely on the bus and metro to commute because I can?t drive and the buses especially haven?t been	
consistent or super fast so this change would make it way more difficult to get home	Bus Service
keep red line and yellow line the same service frequency	Bus Service
Do whatever it takes to force DC/MD/VA to properly fund Metro/MetroBus. Not just enough to keep it	
alive, but to continue making the all improvements it needs.	Bus Service
Overall, I am a big fan off public transport and what WMATA brings to the area! One thing I missed is	
reliability. Whatever the hours and/or frequency is, having bus and train show up at the time it is scheduled to, is key. Have bus drivers ride on time, leave on time and if needed pause if they're ahead	
of schedule. Implement automatic train control ASAP to have a smoother and more reliable (on time)	
ride. Invest some of your money in that please.	Bus Service
I rely on the bus and metro to get my kids to school and myself to work everyday. I rely on the bus and	
metro to go out on the weekends to various places around DC. It is vital to the region, and car-	
dependency is a scourge on the region.	Bus Service
I work for Amazon along with thousands of other workers who rely on the Metro to get into work. If	
Metro were to cut service it would seriously impair my ability to get to work and would have an	Deil Canvier
adverse impact on the company who just spent billions of dollars on relocating here. The D6 is a crucial bus line and should be maintained! It is always busy and it helps so many people get	Rail Service
to work in downtown areas from capitol hill and from NW DC.	Bus Service
Metrobus and Metrorail are the transportation backbone of our region. We deserve a fully-funded, low-	
fare and high-service system and should not accept any service cuts or fare increases. In fact, we should	
be working towards expanding the system with one of the line re-routing options outlined in the Blue	
Orange Silver Capacity Study. We should also have secure, direct tax funding for WMATA. I applaud	
WMATA's efforts to aggressively message the funding shortcomings. Please keep up the strong	
advocacy for our transit system!	Bus Service
Metro need to consider the people who currently use metro. Day and eve/night jobs. Anyone else is a	
bonus rider. Also increasing fare are not gonna help the budget but hurt the current riders purse. Stop putting the money in areas not needed. As i noticed these monitors on some buses indicating streets	
and stop. The monitors are not being put to use. What/ who were those for? Im sure there could be	
more cuts start from the higher paying position. Also metro access customers need you all most. And	
they function unreliable as is. People i know have ho utilize the service.	Operating Budget, Management and Spending
Do not reduce quality of life no matter what. QOL can only maintain or increase. To achieve that, just	
increase travel rates.	Miscellaneous
Please don't make cuts to the P6 or 80 buses. If you change the 80 bus route, please make sure it still	
goes downtown (such as via E street as was proposed on better bus) Stop cutting rail service and bus lines! You lose customers by doing this, and then who will pay your	Bus Service
higher fares. When service is unreliable, people don?t want to gamble and choose other options.	Bus Service
Raise the max fare beyond \$7.50, especially for the silver line (which I use). Due to the price cap, the	
fares are the same for going 10 stops or another 8 more (10 miles)or whatever it is. Ashburn should	
cost more than Reston or Tysons for a trip into DC. Currently they do not.	Fares/Fees/Parking
Increase personal vehicle tax and fund public transit. Metro should not need to be run like common	
corporation that needs to make profit. It's a system that should encourage public transportation and	
discourage personal cars around the DC area. It's congested enough already! Increasing cost and	
cutting service will only increase more car usage and will lead to more congestion, pollution, accidents!	Fares/Fees/Parking
Given the amount of crime and costs to properly staff security to meaningfully impact riders perception of safety, It would be nice to cut service at 11pm/midnight for most of the week and certainly on the	
1	
weekends. As many people are wary of riding that late given the crime in the area. I don't think there is

Comment	Category
I couldn?t imagine offering such a horrible service/experience that you lose customers and then	
thinking the answer is EVEN WORSE service. Metrorail is constantly down, constantly delayed, and	
rarely safe. Instead of making things worse, make things better and attract customers. Rebuild the	
crushed infrastructure when you have these lines constantly closed. We already pay wmata way too	
much for the horrid service offered. Do not make it the publics problem that you failed to offer a	
worthwhile service by increasing our fares. You will just have to reduce service and increase fares again	
because you lost even more customers. This is a self-fulfilling demise. Consider getting rid of the top management and replace them with someone who will do something to fix the ship instead of sink the	
ship quicker. Your leadership is a joke and its insulting to ask us to fill this survey out and give us only	
two options ?increase fares? or ?decrease service? and not give us the option to vote to get rid of the	
management who put you in this situation in the first place.	Service Levels
(Metrorail) Cutting service should only be the last resort option, followed by closing or reducing hours	
at less busy stations.	Bus Service
My kids take metrorail and bus to school. Eliminating morning rush service and some of the afternoon	
bus cuts will make this really hard to do. We take metro rail and bus to work. The lack of rush hour	
service makes it harder to use metro to get to work on time. And when the parking plus rail fare gets	
high enough, plenty of people will opt to drive and park downtown.	Bus Service
Anything that makes the cost of riding the train the same as the cost of my parking means I will end up	
driving. Taking metro is a benefit to me because it costs less than parking. If fares increase by 2 dollars	
for a one way trip (I currently pay \$5 each way) then there is no savings for taking Metro and i would	
have the comfort of my own car with my music. In addition, decreasing service so I would have to wait	
longer at the station or have more crowded trains also does not make metro a better option than	
driving. Finally, reducing late night service so Metro closes before my events (sports, concerts, etc)	
finish means I won't even consider using it to travel to an event if I would have to leave early to catch	
the train. Real cities have real service that gets people where they need to go and doesn't leave them	Fares/Faas/Parking
stranded at the end of the night. I know that this might be a security question, but I wonder if there is a safe way to make sure that	Fares/Fees/Parking
people pay their fares on buses and the metro. I would feel cheated if I had to suffer from service cuts	
because people refuse to pay the fares.	Bus Service
Instead of eliminating so many services, why not consolidate them to prioritize service during weekday	
rush hours, e.g. 6-9am and 3-6pm? After all, reducing vehicular traffic is a primary reason for the	
existence of the Metro bus and rail system. Furthermore, these service cuts do not account for the	
probability of more of the local workforce returning to the office during the coming years. Thank you.	Bus Service
If you must cut I think it's better to cut a service entirely than reduce frequency. As a public transit rider	
I plan using frequency to gauge how long my trip is. The absolute maximum I would wait is 12 minutes.	
After that, it's usually just easier to get a taxi. A system that arrives at 20 minute increments may as	
well not exist.	Bus Service
Please do more about those who avoid paying fares to use of Metro services; I see turnstile jumpers	
frequently with no repercussion and while I know there is a budget shortfall, the idea of raising rates	
for those who pay when this is an ongoing issue is frustrating.	Operating Budget, Management and Spending
Impossible to evaluate station closures without knowing which stations would close. At a previous	
board meeting, a member requested that this be decided by the time you solicit feedback, but it seems	
like this has not occurred. Cutting the 96 in particular would be disastrous. It is a critical connection for	
my daily needs, and it gets really busy! Designing a bus network around forcing people to transfer to rail is not a way to grow ridership. I support fare increases, but consider options besides simply	
increasing everything by a flat percentage. Fare structures should be tailored to maximize ridership and	
get people back on the system. For example, I'd encourage smaller increases for passes, and potentially	
implementing automatic fare capping, to avoid placing the burden on those who use Metro the most.	Miscellaneous
I often feel unsafe on Metrorail and Metrobus; there is still too much fare evasion, crime, and	
disruptive behavior. If you can address those problems, and keep the system running reliably, it will be	
much easier to keep me as a passenger. Otherwise, I will start driving to work, which would generally	
be faster than Metro, though it would add to my expenses and require me to sit in traffic.	Bus Service
The G2 bus route is a very important route for Georgetown's economy and to connect neighborhoods	
to Georgetown where there is no existing metro stop. It is particularly important to connect the Shaw,	
Logan Circle, Dupont, and Georgetown neighborhoods. There are a ton of businesses and multiple	
grocery stores along the route which make it essential for these 4 neighborhoods. Additionally,	
removing the rush hour service within the downtown area is a terrible idea for the mental health and	
safety of commuters. The trains are already so packed with the additional rush hour service and would	
reach unsafe levels if there were less trains. Perhaps not all of the trains during rush hour go to the end	
of the line, but near downtown would be disastrous to remove rush hour service. There is also a need for bus education in this city. People actually think the bus is free and that the bill making the bus free	
went into effect or will soon. Almost no one pays the fare and the bus drivers encourage this often.	
Even people that can afford to pay for the bus and DO pay for the metro do not pay for the bus.	
Consider a PR campaign to remind people that they do have to pay for the bus and that the city never	
made the bus free. Since safety and crime is a large concern for many metro riders, especially women,	
consider adding emergency call buttons to each train car and several in each station. If these exist,	
there needs to be more education around their existence. A campaign around metro emphasizing	
safety would go a long way. The metro app is horrible and there are several big missed opportunities to	
bring in advertising revenue. A more attractive and functional app is a great platform to bring in larger	
advertising dollars. You can also implement surveys on the app to ask about rider's recollection of	
recent ads in the metro since more ROI data would be more attractive to serious advertisers. Thank	Service Levels
One of the best things about this city is the Metro. It is easily the 2nd best in the US and one of the	
reasons I moved here. Do not cut service, that is a slippery slope to it getting worse and worse	Rail Service
I think cutting services, especially stops and closing early will be the biggest detriment to the metro	
line. While no one likes fare increases it is still significantly cheaper then driving and parking in the city	
and I think most commuters will continue to use the service. As a woman, if service was cut to end a 10	
p.m. with no security or staff after 9 p.m., I would stop using the metro and use an alternate form of	
transportation after 8 p.m. given safety concerns. The metro should not be open without staff or	Ears Evision /Safety/Crime
security. I would advocate for anything over those security concerns.	Fare Evasion/Safety/Crime
I rely on metro to get to work so please don?t cut service short. Sometimes I already have to wait a long time for transfers. I?m willing to pay more to keep the services on Blue and Orange/Silver lines.	Bus Service
I understand that Metro is facing hardships in regards to ridership and access but placing more	
accountability on the cities that support it (financially) and finding better ways to address fare evasion	
(making the metro free for certain communities or free all together) I think would help people feel	
better about accessing.choosing metro as they would feel like it's been better supported by those who	
use it/want it to be used	Operating Budget, Management and Spending

Comment	Category
The Metrobus service through and around Kings Park West is already skeletal and has been consistently	
cut and consolidated since 2017. We are most likely one of the only community with passengers who	
actually pay to ride the bus (and a much higher rate). Why would you cut service from customers who	
actually pay the fare? Metro only wants to operate in DC anyway is how it always appears when service reductions are on the table. Our County provider does a much better job at providing reliable bus	
service so why not turn over all of the VA routes to those providers?	Bus Service
All ate more money to metro system and less to car infrastructure	Rail Service
Too many service cuts will increase car traffic and is environmentally unsustainable, and makes it even	
more difficult to get around because traffic will be worse	Bus Service
I would encourage Metro to be realistic about any service cut, route changes, and fare increases. I think	
it's realistic to keep the increased metrorail frequency during rush hour. However, with the merging of	
bus routes, I get concerned that my usual metrobus won't arrive as frequently and this will delay my daily schedule as I rely on the metrobus to get to work. Lastly, the fare increase for metrorail seems	
astronomical. People rely on the metro because it's affordable and keeps cars off the road. If I'm	
debating between a \$7.50 metro ride that'll take 45 minutes or an \$8 rideshare that'll get me there in	
20, then I really have no incentive to take the metro. I understand a fare increase, but asking for an	
extra \$5 from folks in these times is disappointing and misguided.	Bus Service
Please do not reduce week day frequency! I know many (including) myself that use the metro for work	
commute and it would seriously impact all of us negatively!	Bus Service
Drastic fare increases and service cuts have been proven to be wildly shortsighted as they ultimately	
decrease ridership, don?t generate the assumed revenue and cause a doom loop. Public transit should	
not have to break even on fare revenue as that ignores the multiple other benefits it provides for both transit riders and non transit riders (less traffic congestion, climate benefits, social mobility benefits,	
etc.). Metro should have a long term sustainable funding source by the governments involved and then	
should be held accountable for safety, quality and reliability. With constrained funds, I would be also	
more focused on existing service reliability than huge cost expansions of the network.	Bus Service
Metro is a public good and relies upon network effect to share the costs over the ridership for	
economies of scale. If metro cuts rail service hours and drastically reduces frequency, it becomes	
unreliable for use and ridership will plummet into a death spiral. If quality of life issues continue to be	
ignored (blatant fare evasion next to indifferent station managers who can?t act due to insufficient public safety staff) ridership will decrease and that will be hard to recover. Late night hours into and	
out of DC for metro rail are important for encouraging DC nightlife and safety of patrons. I live in	
Ballston and would have to limit my Uber use as it surges once metro stops. 10p service stop is nuts.	
Closing stations is nuts. Metro is a great system, and is a key part of quality of life in DC. No additional	
funding should pay for the potential new complex at Potomac Yards. If they want extra service (or a	
bigger station) they should pay for it.	Fare Evasion/Safety/Crime
Many of us live near Metro lines and would need to consider moving if service cuts are made. Do not	
do anything drastic!	Bus Service
Please give thought to equity in your proposals. You're preparing to reduce frequency on the outer part	
of the red line where people need the metro service more and also fall into lower socioeconomic levels (while charging them more already). Who exactly do you seek to serve?	Bus Service
Metro service is more important. Service cut would make me rely more on VRE getting into DC faster.	Bus service
Driving sometimes maybe an option, but do not want it due to high gas price. I get smartrip benefits.	
Frequency currently are the same and good for the most part. Do something about fare evaders, if	
caught piggbacking or any form fine them harsh. I think you are too soft on fare evaders. Metro needs	
to be more reliable like on signals. I been to other cities like Seoul, Tokyo, Hong Kong and they are	
better maintained.	Bus Service
They are extremely dumb. You spent how much money on these turn styles to stop fare evasion and	
people still jump them (and others) without any consequences. It's ridiculous. You're screwing over	Fore Function (Cofeet, (Colore
your customers in the worst way possible. Perhaps address ways to increase ridership, including rider safety, as opposed to these more drastic	Fare Evasion/Safety/Crime
options.	Fare Evasion/Safety/Crime
Try to focus cuts on the rich, least vulnerable areas.	Miscellaneous
If y'all go ahead with most of these proposals, more people will drive drunk, traffic and parking in the	
DMV will get worse, and more people will move out of the DMV. DC, MD, and VA should raise taxes to	
address WMATA's budgetary issues rather than cutting services and increasing prices for working-class	
people.	Operating Budget, Management and Spending
Opening at 6am on the weekends would be excellent, I think that is one of the best proposals. Additionally, I'd much rather see fare increases than cuts to service/operating times	Fares/Fees/Parking
Additionally, I'd much rather see fare increases than cuts to service/operating times. Emphasis on metro rail safety is needed	Fares/Fees/Parking Fare Evasion/Safety/Crime
Please setup an entity with the ability to levy taxes so that metro can have consistent funding	Capital Budget
The Metro is a vital part of my commute in DC on most days. What truly irks me is that I work, pay	
taxes, and try to make a living here as an immigrant to this great country and city. While I pay my dues	
to ride the Metro, without fail, EVERY SINGLE time, there is at least one or, most times, multiple fare	
evaders nonchalantly strolling through the gate. How much revenue is lost by this consistent practice?	
Let us also consider the context here; these are not some idiotic school kids who think it's cool to fight the system or whatever cretinous ideology they may hold; they're people from all walks of life. A large	
the system or whatever cretinous ideology they may hold; they're people from all walks of life. A large number often wear \$200+ sneakers, the newest fashion, and are clearly not living in abject poverty or	
are part of the homeless community. I know the newly installed fare gates (Fort Totten, for example)	
are supposed to curb this behavior, but if the evaders face harsher consequences, perhaps they would	
be more reluctant to abuse the kindness of the system so blatantly. I used to live in New York City and	
ride the subway to work every day. On multiple occasions, plainclothes subway police officers arrested	
fare evaders even when they already made it inside the carriage and the train had left the station. They	
did this professionally yet loudly and very publicly. Without holding a Ph.D. in Psychology, I can bet that	
everyone in that carriage witnessing this play out in front of them would think twice about evading the	
fare from that point forward. Folks are quick to point to 'their god-given rights' in this great country.	
Someone's rights are always someone else's responsibilities. This is an irrefutable law. As a law-abiding, fare-paying Metro user, that does not strike me as being fair.	Rus Service
Fare increases but also prosecuting fare jumpers and making the system safer	Bus Service Fares/Fees/Parking
I use the bike lockers five days per week to commute. Not offering annual passes and not providing	······································
assurance that there will be an available locker for me when I arrive would screw me, and ultimately	
would result in me not using them at all.	Bus Service
Ridership will go off a cliff if these go through. State and local governments must act immediately.	Miscellaneous

Comment	Category
Decreasing service will only feed into the negative stereotypes around Metrorail service. The service	
over the past year, or really since 2022, has been fantastic relative to even before the pandemic (as I	
can remember it). Overall service should, ideally, not be a point of compromise, because if it gets worse, fewer people may use it, and future budget shortfalls may only compound on one another	
through a lack of faith in the Metrorail system. New Yorkers get on just fine with a \$2.75 flat fee, so if	
that were the minimum with smaller increases (topping out at \$7 or something) maybe that would be	
better. Some new demand studies might need to be done for that. I do not want our second-only-to-	
NYC rail system to falter. It?s so good and in many ways beats out NYC, falling short only in the realms	
of relative access to stations and service. If the service falters, we?d be in big trouble. Thanks for all that	Operating Budget, Management and Spending
Security on Metro needs to be dealt with. I stopped using it not because of service frequency but	
because the trains are now routinely full of homeless, truants and criminals. It?s more frightening. I?ve	
seen people fight, eat, and urinate on the Metro. Hire DC police. Throw people in jail for stealing or Metro will go the way of MARTA in Atlanta (not a good thing) - anyone with a job and money will avoid	
it	Fare Evasion/Safety/Crime
Service now isn't reliable or timely, cutting Service would cause further rider decline. We can't get	
where we need to go without delay.	Service Levels
Get more money from DC, VA, MD, and Federal Govt. Preference would be no cuts, no fare increases,	
but more publicly funded. Cuts and fare increases mainly hurt poorer people.	Fares/Fees/Parking
REALLY need a line that connects northern Virginia, Arlington, neighborhoods (shirlington, glens rd., to	A 4' 11
Clarendon, courthouse, king st in Alexandria) I strongly prefer fare increases rather than service cuts to carry out Metro's Budget	Miscellaneous Operating Budget, Management and Speeding
I prefer not to have to decide between increased fares and service cuts. Public transport should be a	Operating Budget, Management and Spending
public good in my view.	Bus Service
At the end of the day, I just know you all are trying your best. Just please don't get rid of past midnight	
buses, I like many people depend on them to get home safely after work.	Bus Service
If fare revenue (via increased fare prices) will somehow address the budget shortfall, can more not be	
done to prevent fare evasion instead? Both increased fares and reduces services instill fear in me of a	
death spiral in overall ridership. Surely there are more innovative solutions. What about flat fares for all	
Metrorail trips, coupled with gates that provide easy egress from stations but prevent access to the	On antian Dudant Management and Sanadian
platforms without payment? Do more to stop fare evasion. I still see it nearly everyday I ride.	Operating Budget, Management and Spending Fare Evasion/Safety/Crime
Further evaluating buses that runs on a same segment as other transit agencies (circulator; RideOn; The	
bus; ART; Fairfax Connector etc.), reduce or eliminate the service of such routes.	Bus Service
Metro does absolutely nothing to stop fare evaders. I watch as people (sometimes even groups) push	
right through or jump turnstiles. The alarm sounds and the employees don't even flinch. Even when	
police are nearby, nobody moves. I pay for 100% of my trips and yet there are others who never pay	
with zero repercussions. It is a disgrace.	Fares/Fees/Parking
Please do not cut frequency and weekend service. Eliminating extremely low ridership routes might be	
better than a systemwide reduction. I sincerely local decision makers get their heads together to find Metro a sustainable and sufficient	Bus Service
source of funding. Too many rely on the system for it to be treated as an afterthought.	Capital Budget
The proposal would only reduce riders and also increase hostility towards metro which would reduce	
any desire to continue any metro funding	Capital Budget
This is greatly disappointing as I?m dealing with low-income stress and the need to commute to varied	
locations for onsite work through a temp/contracting agency.	Bus Service
Metro's going into a death spiral.	Rail Service
I don?t mind increasing fares but please don?t cut service, it?s already not that great. Also consider

I moved to the city to use the Metro services of both bus and rail. Thank you for everything you do to get me to work everyday. I think the drivers of cars should pay higher gas taxes to compensate for the shortage. The public transportation infrastructure is amazing and more people residing in the area should use these services to balance the cost to operate and save the planet. Raise the current faregates in the rail stations. The current new ones at Ft. Totten people can still jump over them. Why not have a fare gate	Fares/Fees/Parking Operating Budget, Management and Spending Bus Service Bus Service
I don?t mind increasing fares but please don?t cut service, it?s already not that great. Also consider automatic trains! France has switched to trains that don?t require conductors and it?s working for Metro has historically received budget funds from surrounding jurisdictions and DC, has had fair increases already, parking is not the same from station to station and it has also increased. Metro needs to look at where the money has gone in the past and what do you have to show for it? Increases at the size you are proposing are ridiculous and the burden it would put on riders would only decrease at the size you are proposing are ridiculous and the burden it would put on riders would only decrease the desire to have to use the system. People without the personal budgets for this will suffer. Others who can avoid use of it will. Items that were not addressed that need to be are safety from crime, increased police presence on trains, fair jumping, school students getting free rides and causing choas and creating hostile environments on the trains and in the stations, homelessness, overcrowded trains with no thought to health or physical safety. Please do not fall into the trap of increasing fares and decreasing service—this will drive people away and into cars, if they have a choice. For those of us who depend on buses and trains because we have no other transportation options, this would make the DC metro area unliveable for many people. And please, please do not eliminate the G12. This is an important route for the Greenbelt community and is a link to Drs. Hospital in Lanham. Comment	
Comment Began enforcing fares, you will see a dramatic increase in revenue. Give bus operators the authority to	Category
refuse service to passengers who don?t pay.	Bus Service
Metro is an essential service and cutting it off at 10pm while both increasing fare and reducing service	
is a punishing suggestion to people who cannot afford or prefer not to buy cars. Surely there is funding	
that can be found (like reducing police funding) that could be better spent on the metro	Capital Budget
I take the 96 bus to and from school every day. I have met so many different kinds of people on it and is	
so much faster than the metro!!! i love the bus drivers on my route and there are so many people that rely on it!!!!	Bus Service
I will happily pay for good service. I will not use a system that cuts the only bus routes I take. If I cannot	
take the R4 or G8 on the weekends to the metro station, why would I ever use it? Bus service is the	
feeder for metrorail!	Bus Service
Perhaps stoppong the numerous fare jumpers would go a long way. Today I saw no less than 5 fare	
jumpers. Why should those of us who are less agile have to pay? Additionally the lack of police and	
enforcement will only raise the crime rate (assualts and robberies). Do we really need a Bronx episode before something is done?	Fare Evasion/Safety/Crime
If you implement ANY of these changes, say goodbye to your ridership.	Miscellaneous
	Miscellaneous
Reduce service and increase fare so that metro pays for itself.	Fares/Fees/Parking
Please increase the N2 N4 N6 service especially on weekends - you cannot eliminate it. Current	
frequency is every 35 minutes which is too infrequent and not reliable (if one bus is not running then	
huge gap in service), reduces ridership even though buses are relatively busy. Increase to every 15 20	
minutes. Please keep the 96 key lifeline for us in NW DC, and dont cut the 31 33 they should run	Rus Sanisa
downtown - you need a bus running along Pennsylvania Ave Do more to catch and punish fair jumpers. It?s not fair that we always have to pay for their crimes.	Bus Service Fare Evasion/Safety/Crime
The buses east of the Anacostia River seem to always be on the chopping block but there are people	
here who take the 32 to work each day and have no other way to get work. Please reconsider making	
changes to the 32 line.	Bus Service
More Money needs to be put in a para transit in metro access.	MetroAccess
I rely completely on the H6 bus. On Sunday mornings, I need to use the H8 and my husband uses the	
G8 whenever the Brookland station is closed (which is pretty frequent).	Bus Service
Please know that all Metro employees and the service as a whole is doing an amazing job. I genuinely wish this situation is overcome soon!	Pail Caprica
This situation is overcome soon! This survey was structured entirely as a tradeoff between service cuts and fare increases, but future	Rail Service
surveys should include questions about other forms of revenue increases. I would prefer not to cut	
service because each time you cut service the system becomes less useful and less people ride it, which	
then forces additional cuts. I would prefer to decrease fares on metro, expand service and add	
additional sources of revenue. I would like a survey on adding a gas tax as a revenue source and	
reallocating resources from other areas of local government budgets.	Operating Budget, Management and Spending
more signage for fare discounts for marginalized communities, taller fare gates because there are a lot	
of unpaid fares even at stations with the new fare gates, don?t reduce service to close the metro before 10 pm	Fares/Fees/Parking
As much as possible, the Metrorail capital budget should NOT be used to fill budgetary holes in the	raies/rees/raiking
operating budget. The region passed the dedicated funding for capital expenditures so that WMATA	
could do the work of getting the system into a state of good repair.	Operating Budget, Management and Spending
I do not understand how cutting so many services would ever result in anything other than even more	
budget shortfalls in the future.	Operating Budget, Management and Spending
Eliminating or reducing service is a death spiral for any transit system. Fewer options force people to	Consider Lough
look for alternatives and they are less likely to return to the transit system if service improves I dont care why but these proposed service cuts are insane. It's not OUR fault there is a budget	Service Levels
shortfall, dont make us suffer.	Operating Budget, Management and Spending
Please keep the silver line. I need it to go to work	Miscellaneous
I don?t use metro often anymore because of the crime. I was almost stabbed one night on a train. Lots	
of people smoke weed in trains, trash the stations. There are no consequences - just jump the gate and	
break stuff! I want to see service cuts. I don?t want my tax dollars funding free transit for fare beaters.	
Until there is law enforcement in the system I?m not going to use it.	Bus Service
Frequent metro service is vital to me getting to and from work, to and from dc, and living my life.	Dell Carrier
Cutting service is bad and should be a last resort. Reducing service on 29K/N will be significantly detrimental to people traveling on the Duke St corridor,	Rail Service
particularly on weekends when Dash 30 is less frequent. I'm also concerned that my Metro station, Van	
Dorn, will be closed, which will basically mean I will need to drive to work and can't take public	
transportation anymore.	Rail Service
Name and shame every politician who causes the budget cuts to vote them out	Operating Budget, Management and Spending
Please do all required construction during times when Metro is closed. If operating times will be	
limited, there at least should not be service disruptions and hassles. Also: Do what other businesses do -	- Rus Sanira
increase fares if you must, and then make generous discounts available to those who qualify. Don't cut 11Y service.	Bus Service Service Levels
One day They will Bring back Old School Metrobuses on the regular Routes in DC Maryland and Va.	Bus Service
1 I said it wouldn't affect my riding Metrobus because I don't have any other options! It's either ride the	
bus or stay home. I don't want to stay home! 2 We would not be in this position if the Metrorail FARE	
EVASION On STEROIDS were Properly Addressed!! 3 Start using CharmPass instead of that Smartrip App	
which doesn't work very well anyway. I love CharmPass. I can get my Senior Discount on MARC and the	
MTA Commuter buses. It can be used for regular Transit fares in the MTA BaltimoreLink System. I am	
sure adding Smartrip wouldn't be a big deal. This includes Discount Passes too. Metro Frequency reduced will cause overcrowding. Traffic is bad enough and hard enough. Traveling by	Bus Service
car is too expensive and gas is getting too high. I would take the metro more.	Bus Service
Decreasing the accessibility and affordability of using the metro system decimates the ability of workers	
and tourists to efficiently navigate the city. It additionally increases the demands (and fares) of cabs,	
rideshare, and parking for people who must supplement because of WMATAs (lack of offerings) to fit	
their needs. Ridership is down due to the unreliability and dramtic pricing variance of traveling through	
the system. Consistent efficiencent schedules and flat rasonable fairs. WMATA should be the cheapest	
and fastest public transportation option for travelers in the dmv. It is neither.	Fares/Fees/Parking
No cuts to Metro rail service. No cuts in waiting times, no frequency cuts, no station closures, no	
closing earlier or opening later, no train turn backs. Metro needs to be getting to the goal where there are trains every 3-5 minutes on every line throughout the system. The idea of waits of 10-15 minutes is	
ridiculous and is a ridership killer. We need to do everything we can to increase frequency of trains and	
to increase ridership. While in London I was amazed to see a train every 1-3 minutes and Metro really	
needs to strive to do better. They should also go to war with the union. This union constantly holds	
metro back by keeping horrible employees working and they're driving up costs by being inflexible. I'd	
like to see fully automated trains in the future and I know these people will be an impediment to that.	Bus Service

Comment	Category
Cutting and reducing service will contribute to a negative experience which will create a negative	
feedback cycle leading to lower ridership. As long as Metro is reliable, I will take it. If it is unreliable and	Construction of the second s
wait times increase, I will pay extra to take rideshare or get others to drive me. Metro should be open later on weekends	Service Levels Bus Service
Maryland and Virginia need to commit more stable funding to a system that's a huge economic benefit	Bus Service
to the region. DC needs to make more disadvantageous for non-residents to use a car inside the city	
and favor the use of public transit whenever possible. Other things that would help are the following: 1.	
Change the fare system to a zone-based fare system, like for other metro systems around the world. 2.	
Simplify the pass system so that a single pass works on Metrorail, Metrobus and on the Maryland and	
Virginia bus routes that allow the use of Smartrip cards to pay fares. 2. Implement a more flexible	
system of monthly passes for both Metrorail and Metrobus: the current system is very rigid and not at	
all economically convenient (e.g. if I'm not going to the office EVERY day for the entire month, the	
monthly pass is more expensive than paying for single rides). 3. Allow for the option of multi-month	
passes, especially convenient for summer interns and students (e.g. 3 month passes for the summer). 3.	
Implement a YEARLY pass that's both flexible and economically convenient: if I could get a yearly (365	
day) pass for the price of 6 monthly passes, I'd do it on a whim.	Bus Service
Very sick of this. For the love of god it together. Service cuts are short sighted decisions that are going to harm the growth of the Region long term.	Miscellaneous
Many employers are requiring employees to return to office, local municipalities are pushing through	
initiatives to increase density in the DMV as well as build a new stadium in Virginia, and this does not	
support those needs. I will consider moving away from the DMV if metro service degrades to the point	
that I have to drive more frequently. One of the main reasons we chose to live in this area was because	
we would not have to drive often.	Bus Service
Thank you!	Miscellaneous
These changes would greatly reduce the utility of Metro. WMATA should prioritize maintaining service	
levels.	Rail Service
If everyone who used the bus and the metro paid for their rides, we may not need any fare increases or	
adjustments in schedules! I use both the Metro and buses in DC. I am tired of seeing people not paying	
their fares with no consequences! In France and many other countries in Europe, police check if people	
have paid for their passages. They board the trains and buses periodically. If someone has not paid,	Due Consist
they are fined.	Bus Service
T18 With my disability, it's hard enough to use metro, why should I pay more for less service? Elevators and	Bus Service
Escalators continuely break down. Accessibility is lacking EVERYWHERE. The disabled can never catch a	
break! Can you at least improve the accessibility standards before making drastic fare or service	
changes? Can we get that first? I'm so used to being let down. NOONE CARES UNTIL IT	
INCONVENIENCES YOU TOO.	Fares/Fees/Parking
I take the h2/h4 to work and home everyday. I am estimating at least 80% of riders do not pay their	
fare. Please, please do something about that. If that is just one bus route, cannot imagine all of the	Bus Service
If some bus routes must be eliminate reroute the surviving routes to provide as much coverage in areas	
where service was removed as possible. Do not simply eliminate routes; change the surviving routes to	
compensate for the lost service.	Bus Service
1 I said it wouldn't affect my riding Metrobus. The Deal is I HAVE NO OTHER OPTIONS! It's Metrobus or	
Stay Home! I don't wish to stay home! 2 Maybe we'd not be in this position it WMATA would Address	
the Metrorail FARE EVASION on STEROIDS! 3 Use something like MTA's CharmPass instead of that	
dumb Smartrip App which doesn't work that well anyway. I love CharmPass. I use it on MARC and the	
Commuter buses. It has a way to pay for the MTA BaltimoreLink System too. I don't see why WMATA	
couldn't add Smartrip to it as well. Please fight for a regional tax instead of service cuts.	Bus Service Bus Service
I use the metro to commute to work. A decrease in service and increase in prices would drastically

By closing statins, you are making sure we have no way to get around Personally. I believe that Metrorail stations should be kept open at all costs, even if it means cutting some bus routes. This is because cities and municipalities like Arlington, Fairfax, etc. can augment the lack of bus routes with their own bus systems but realistically, there is no alternatives for the Metrorail. I do support keeping the stations open earlier even if it means having them close earlier since a common complaint I have had about the Metrorail system is that it opens at 7am on the weekends whereas other forms of transit (Amtrak) have plenty of trains before then. Finally however, I think some effort should be placed by WMATA to remove the need for a balanced budget to begin with. This requirement is not befitting a public service nor is it asked upon public utilities or other public gods. Do better making everyone pay the correct fare, so that the folks who actually pay to use the facilities aren't penalized for others' wrongdoings. And consider offering discounts for regular ridership to incentivise paying of fares and riding metrorail/bus. Thank you! Increased rates will cause more gate jumping which continues to occur too frequently and needs to be addressed. Payers shouldn?t subsidize non-payers Get MD and VA to share costs. It is unfair to folks trying to get to and from work. Service cuts and line eliminations will lead to more income issues down the road Fare increases should be tied to inflation rates. I would prefer the budget be made through fare increases than service cuts; reduced frequency is much more of a deterrent to riding than the former. Please do a much better job of catching the people who jump the gates! I think it would be better to fine those who jump the turnstiles and avoid paying. I see this everyday and no one does anything	Rail Service Miscellaneous Operating Budget, Management and Spending Bus Service Miscellaneous Fares/Fees/Parking Bus Service Fares/Fees/Parking Operating Budget, Management and Spending Fare Evasion/Safety/Crime

I am retired and can be flexible in riding the Metro. I hope that we can maintain adequate service for	
all those riding the metro to get to and from work, with special emphasis on ensuring that low income workers are not disenfranchised.	Fares/Fees/Parking
Fare prices should increase, and the governments should provide subsidies for low-income families in	rares/rees/rarking
the region. More exploratory work needed to consolidate redundant processes (e.g., multiple	
departments tracking external CAPS in separate software tools and identify opportunities to enforce	
the management of inventory in the Maximo system and enforce warranties compliance to reduce	
substantial costs.	Operating Budget, Management and Spending
Serve the community.	Miscellaneous
Instead of reducing service on all lines, reduce it on the lines that has the most underused stations	
(Silver Line). Reduce the train service but run the Yellow Line back to Greenbelt so that the turnaround	
at Mt Vernon Square no longer exists. It's causing a lot of backups on both sides of the tracks. It's okay	
to decrease service on the Metrobus routes but to eliminate routes altogether, especially to	
underserved communities, is horrible. How will students get to school in DC if routes are eliminated? I am not in a position where a small increase in fare will impact my travel choices. What will is the	Bus Service
availability of routes and connections. Please make cutting service your last option.	Bus Service
I take the metro to work and everyday I see multiple people jumping over the turnstile and not paying	Bus Service
anything, often when there is a metro officer standing by, who does nothing. Either install turnstiles	
that are harder to evade fairs, or start enforcing. Metro is abrogating its responsibility to not do	
anything about the fair evaders. What incentive, besides being an honest person, is there to pay the	
fair when others simply hop over or walk through the turnstile at the end? It's totally not fair. Maybe	
you can provide the fair skippers with a subsidized pass, mostly they just don't want to pay. And to hike	
up the rates for people who do pay, that's crazy.	Rail Service
The trains are absolutely packed on weekday mornings. Please don't put us through this whole thing	
again. The \$2 fee after 9:30pm and on weekends has been a godsend. I was on the verge of selling my	
car because of inflation and rising insurance rates. To see this proposal for severe cuts now is shocking	
and very concerning and upsetting. If Metro insists on going through with this, we'll all have to	Rail Service
collectively think about switching to jobs that do not require us to commute every day. Thank you for inviting public input. I just moved to DC and I moved here because of the transit system.	
I'd rather not drive or pay for a rideshare when I can take public transit. Our living costs have gone up	
and saving on transit it one way to balance our budget. Maybe if the high school students used their	
passes more often (instead of jumping the turnstiles), we would have better data and could justify the	
costs for Metro.	Operating Budget, Management and Spending
this constant lack of funding is absurd in my opinion, Metro is the pumping blood of the capital of this	
country yet it lacks funding just to operate day-to-day operations. Metro should cover so much more of	
the DC area than it currently does, and it's embarrassing how impractical it is to take the metro	
anywhere in DC besides the the national mall, GWU, and federal offices.	Capital Budget
These proposed changes are drastic. I would prefer more modest cuts to service combined with modest	
fare increases. The unions also need to pitch in.	Fares/Fees/Parking
At Tysons Corner Station I notice almost none of the younger riders pay. Reduce fare evasion would be	
the best solution. Wherever rail service reductions are necessary, I would suggest allocating higher capacity vehicles to	Fare Evasion/Safety/Crime
the routes that are seeing reduced service intervals, in order to alleviate the crowding generated by	
longer headways. If fewer trains are being run, then more of them can be eight-car trains. This	
(combined with some coordinating signage) would encourage people to spread out along the station	
platform, reducing crowding thereon as well as the crowding on the train cars themselves. Reducing a	
bus service is much worse than reducing a train service, as buses tend to serve communities that are	
already economically disadvantaged, whose residents often don't have reliable personal	
transportation. A bus going from half-hourly to hourly service will have a severe impact on citizens in its	
catchment area?disrupted schedules will lead to lost sleep, reduced family time, and possibly loss of	
employment. Furthermore, the crowding at bus stations cannot be alleviated by lengthening	
buses?there are only so many long wheelbase and/or articulated buses in Metrobus's fleet, and what	
little capacity they add would not account for the increase in crowing caused by less frequent service.	
Furthermore, buses contribute significantly to reducing congestion on roadways where they operate. If any bus service is to be canceled, it ought to be any bus service whose passengers are (demographically	
speaking) wealthy enough to operate a personal motor vehicle and who would likely take the region's	
toll roads on their commute. As some of the toll road money feeds back into the public transportation	
systems of the area, this would help public transit to remain an instrument of equity, and not	Bus Service
I think that reducing service on all rail and bus lines is a terrible choice. Reducing the frequency of trains	
and closing metro at 10pm will only make the current issues worse. I know for me, personally, this will	
cause me delays in getting to and from work during the week and make me more likely to either	
purchase a car or turn to other modes of more reliable transportation.	Bus Service
Metro should address the budget deficit through fare increases or instituting turn backs (Stadium	
Armory, Grosvenor, etc.) whenever possible to preserve the most frequency in the core of the system.	Operating Budget, Management and Spending
Preserving train frequency for weekday commuters (orange line particularly) is priority one, along with	
rail infrastructure investments to make this possible. Fare evasion reduction changes are great, but still	
not in effect at downtown DC stations I see this at every day (Eastern Market I specifically have in mind). Uniformed personnel just seem like they?re there to prevent fights, having never stopped	
anyone when I am there.	Fare Evasion/Safety/Crime
I?d rather pay more for quality service than less for worse service. Paying more for less service is going	n are Evasion/sarety/chille
to tank the system. I know you need help from governments, and I hope you get it, but you have steps	
you can take.	Service Levels
You guys rock	Miscellaneous
Fate increases are never popular, and may be necessary, but WMATA really needs to consider increases	
only at the top end of possible fares. Making metro more expensive to use across the board will make it	
pointless for short trips (1-2 station trips, for example). I frequently take blue from Braddock to Van	
Dorn, paying \$2.55 each way. Bumping this up any further will probably make me just drive as it will no	
longer be price efficient. But I would still go Braddock-DC with an extra \$0.50 on each trip Just	
something to consider here that across-the-board fare increases might not be the proper answer.	Fares/Fees/Parking
Everything is very bad on the metro and buses; it's disgusting to get on the buses and metro. Please do not dismantle, defund ,or disrupt the vital mission that we provide the communities that we	Bus Service

You need to extend service on the yellow line from Mt. Vernon Sq all the way up to Greenbelt again. As	
a commuter, I am constantly having to wait for very long segments of yellow line trains to finally get a green line train that can get me to U Street. It makes no sense for the line to just end in the middle of	
DC when there are so many people who live in the northern neighborhoods of DC that are forced to	
transfer and further extend their commute just because the Metro decided to make this change when	
it was working just fine before. Providing yellow line service through Greenbelt would better serve the	
public in providing more frequent service where the need for an unnecessary transfer can save people	
from added time commuting and stress.	Rail Service
Very good service. The only thing needed is cleaning inside the metros. Many people urinate inside, and	
then it smells like urine. Thank you. There needs to be a push for people to retire only. Thats the budget at. Too many people in one	Bus Service Operating Budget, Management and Spending
I do not know how any body can propose a wage freeze during these inflationary times. Maybe you do	
not go grocery shopping or need to buy an automobile. Or maybe you have no idea about raising	
children and the costs involved in doing so.	Fares/Fees/Parking
Always give priority to the vulnerable and working class, as we all need underground transportation,	
fairness, and support for those with low or minimum wages.	Operating Budget, Management and Spending

Wo whom this may concern, There are MANY students who use the N2 and N4 bus lines during the	
week days to get to school from Wesley Heights/Spring Valley neighborhoods down to Hardy Middle	
School. Please do not reduce the times or cut these lines. It is vital for school kids to be able to get	
to/from school and reduces cars on the road during that hectic hour of morning and night. Please do	
NOT reduce these lines for our kid's sake. Thank you for considering thisAnnie Schwendinger	
Washington DC parent of 3 DCPS students who use the WMATA bus lines on a daily basis	Bus Service
Budget cuts will make an already unsafe transit system even worse. Less trains, more people crowded into trains. The unboused community is trying to stay warm and I sympathize with that, but should we	
into trains. The unhoused community is trying to stay warm and I sympathize with that, but should we be harassed when we are just tryin to get to/ from work? I stopped riding because I don?t feel safe. The	
young people are unruly and disrespectful. It?s just a mess!	Operating Budget, Management and Spending
It's not precise on some occasions, but it's efficient.	Miscellaneous
A4 is trash why send one bus knowing there are 2 routes ahead ft drum and anacoatia station the wait	
is always long	Bus Service
For some of the Metrobus routes that are proposed to be discontinued, they can be transferred to local	
transit agencies in order to cut down on operational costs. For example, route Z2 can be transferred to	
Montgomery County?s Ride On and the 17s/18s/1C/2B in VA can be transferred to Fairfax County?s Fairfax Connector. That way, no riders will be left behind.	Bus Service
Hello, good morning. For me, the vouchers don't work at the right time; they always come late or one	bus service
right after the other, so we have to wait longer for another to come. Apart from that, everything is fine.	Bus Service
It should not good up no more	Miscellaneous
Before increasing the fare, perhaps you should fix the problem/s within Metro. Buses never run on time	
or the trains. There?s always closing of stations etc because of some issue. I?m strongly considering	
getting a vehicle.	Bus Service
It would be devastating to eliminate the N4 and N6 metro buses on the weekends. Many use these	
buses as a means to get to work and will have to find alternative employment if those routes are cut. Also, there is still plenty of progress that can be made relating to fair evasion. As someone who	
regularly rides the metro, I still routinely see people jumping the pay gates. This is also done right by	
metro employees who choose to ignore it. More efforts can be made to cut down on this. This is one	
example of something that should be done prior to any cuts are implemented.	Bus Service
It would be magnificent if the charging were fair, but there are preferences. Latinos are forced to pay,	
while others are not. Fare evasion on busses is rampant. Drivers make no effort to deny service to those unwilling to pay.	Miscellaneous
This not only creates a bigger budget shortfall, but fosters and encourages a culture of theft,	
entitlement, lack of civic responsibility, and lack of any sense of ownership or responsibility for the	
condition of the busses themselves or the quality of the service for fellow riders among the ridership.	
This has to stop. Empower bus drivers to refuse service. Make it part of their job to do so. Their apathy	
only encourages more evasion.	Operating Budget, Management and Spending
The P6 bus line is the closest and most convenient line for my family to access travel to	
work/downtown as well as Navy Yard and the 52 bus is the other line I take to work. Eliminating these lines would be extremely inconvenient for me as I take them daily. Lalso use the 32/36 line to go to the	
lines would be extremely inconvenient for me as I take them daily. I also use the 32/36 line to go to the grocery store and visit capitol hill. I hope WMATA will continue these lines. Thank you.	Bus Service
Why not instead of increase fares crack down more on fare evaders and demand Virginia pay fare share	
or cut service to Dulles International Airport.	Fares/Fees/Parking
I was halfway through the survey when I came to the question ?would you prefer metro to address its	
deficit by increasing fares or decreasing service,? which I was really annoyed by. Metro should neither	
increase fares nor decrease service, since metro is an essential resource in DC and beyond. It?s	
disingenuous to shoehorn respondents into that question so that you have ?evidence? that ANYONE wants to pay more or go fewer places. There would be more money in the city if the Bowser admin	
(and surrounding jurisdictions) were less generous with police and real estate developers and high end	
restaurant lobbies and more generous with the many more ordinary, unrich ppl they have the honor of	
serving. If there?s a deficit it?s because rich pirates have been raiding our cities? budgets for decades,	
why don?t we put a stop to that instead of surveying ppl using a sliding scale to see if they want to get	
kicked more in the teeth or kicked more in the butt	Operating Budget, Management and Spending
I am deeply disappointed by the proposed budget and fare and service changes for the Washington Metro. The Metro is a vital public service that should be accessible to all regardless of income. It is	
Metro. The Metro is a vital public service that should be accessible to all, regardless of income. It is unacceptable that we are even considering raising fares when the Metro should ideally be free for all	
users. Furthermore, it is outrageous that the Metro service remains inefficient and slow. Commuters	
should not have to endure nearly 1.5 hours of travel time from Ashburn to Washington DC. To address	
these issues, it is imperative that the Metro invests in faster cars and improves service frequency.	
Passengers should not be subjected to lengthy wait times and overcrowded trains. Additionally, it is	
crucial to prioritize fair wages for Metro workers to ensure their retention and job satisfaction.	
Adjusting their pay to reflect the cost of living in the area is essential for their well-being and the overall quality of service provided. I urge the Washington Metro to reconsider its proposed budget and fare	
changes, prioritizing affordability, efficiency, and fair wages for its workers. Access to reliable and	
affordable public transportation is a fundamental right that should not be compromised.	Operating Budget, Management and Spending
I believe that Metro should cease the practice of allowing Federal employees in the NCR to use 60%	
Veteran Disability rates when using Smartbenefits from teh federal government as the means of	
payment for thier commute. The Federal Agencies are saving money on commuting for there	
EMPLOYED Civilians or Military negativly impacting METRO budgeting while saving teh government	
money through this loophole. I would mandate that a full fare card is required for employees using smartbenefits provided by federal agency!.	Operating Budget, Management and Spending

Given the proposed increases in fares, parking, and the reduction in service. It would increase the time	
to commute and cost of commute to the point where it is faster and less expensive to drive into metro	
center from Glenmont and pay for parking daily. Following the previous fare increases from FY 2024,	
the cost to commute to metro center plus parking already costs more than driving and parking. I	
commute daily into DC from Glenmont. Paying over \$400 a month to public transit is ridiculous. These	
increases would make me highly consider finding new employment closer to home rather than take	Fares/Fees/Parking
Metro and the three jurisdictions (DC, MD, and VA) need to find a way to dedicate funding for Metro so	
we don't have to go through the annual budget drama. The spectre of service cuts and fare hikes signal	
a death spiral for public transit in the DC area. Those who can find other alternatives to public transit	
will, and that means more cars on the roads and more calls for wideing and expanding roads. I also	
don't want to lose my busthe G12, and I am sure riders all over the Metro area would say the same	
thing about the buses on the chopping block. Come on people, we should be able to do better than	Operating Budget, Management and Spending
Typical yearly cycle. Claim a shortage, threaten to raise fares and cut service, people revolt, funding	
granted, WMATA continues to waste money. Repeat.	Capital Budget
The States of Maryland and Virginia, and the District of Columbia, collectively, must support Metro	
unreservedly. They must structure this support on the basis of relative demand for Metro service within	
their respective territories. They must accept their collective responsibility without allowing it to	
become a political football. Without responsible leadership, there is no vision.	Rail Service
1)Z6 weekday services currently runs every 30 minutes. I would appreciate if we could have more	
frequent buses. 2) Please hire bus drivers who have a good attitude. Some can be very rude. 3) Bus	
drivers need to enforce riders to not eat and leave their trash in the buses, as well as enforce not	
putting their phones on speaker mode to disturb other passengers. Many thanks.	Bus Service
1. WMATA must avoid increasing wait times for Metrorail AT ALL COSTS. As a downtown resident, I can	
tell you that a 15 minute wait for Metrorail would effectively render WMATA useless for me. In the case	
of 15 minute wait times, other options such as last-mile bike and scooter, or even walking, would be	
more efficient for me. I am not going to wait for a train from Foggy Bottom to Metro Center when I can	
simply rent an electric bike on any block outside my West End apt. WMATA should decrease Metrorail	
frequency as a last resort and prioritize increasing fares, cutting Metrobus, or cutting stations outside	
of D.C. proper before resorting to ANY decreased frequency in Metrorail, particularly downtown. 2.	
WMATA should prioritize keeping Metrorail stations in D.C. proper open past midnight ? do NOT end	
service at 10pm. I frequently use Metrorail in the late evening hours, and I believe cutting back on late	
night service would make it much more difficult to travel throughout the city, as well as put people in	
danger due to the surge in crime?people need a way to get home safely!! 3. If cuts in Metrobus stations	
or service; or increase in Metrobus fares can be used to prevent cuts to stations or service on Metrorail,	
I believe Metrorail should be prioritized over Metrobus. Metrorail is the pride of our city and is well-	
know as one of the best transit systems in the country. Decreasing frequency and cutting hours would	
confine Metrorail to a second or third-tier transit system. A strong subway system distinguishes D.C.	
from most other cities in the country and we should protect our leadership in this area!! 4. As a D.C.	
resident who takes advantage of my location near the Dupont Circle Metro on a daily basis by using the	
Red Line, I support the proposed Red Line switchbacks. I believe it is important to have high frequency	
for downtown stations.	Bus Service
2 things: 1) part of what?s causing people to drive instead of take Metro is gas prices are relatively low	
right now. It would make a lot of sense for Metro to try to secure funding through a gas tax/ tolls, since	
it?s the very service that?s offsetting the negative impacts of driving. It would have the added benefit	
of increasing ridership as well as generating funds. 2) As long as low-income riders who depend on	
metro are covered by some program, I think people can handle fare increases more than they can	
handle decreases in service. Most complaints I hear about the metro have to do with long trip times,	
not going to where people need to go, possible delays, and it being less comfortable than being in your	Consider Durdant
own car. I have never heard anybody say it was too expensive.	Capital Budget

If there is any part of the budget that could go to that, I would be supportive A real SHITIT A solution you have not proposed is reducing service but actually running the trains on a schedule. Many other cities have commuter rail that runs less often, but on a predictable schedule. Metro service is erratic, which means that if trains are only offered every 20-30 minutes and I arrive at a station just after a train has departed, I have to wait too long for another one, making it faster to drive to my destination. The lack of predictability is the biggest solvable problem Metro has. Run the trains less often, but on a predictable schedule. And you'll be able to keep or increase both commuter and off-hours traffic. Right now, Metro rail + parking costs so much that it only saves me 52/day compared to driving into DC. I appreciate that Metro is eco-friendly, but I have to deal with train delays, unsafe stations, and unpredictable service. If fares are increased, I won't hesita	Bus Service Bus Service COperating Budget, Management and Spending Miscellaneous Fares/Fees/Parking Bus Service Bus Service Bus Service
commuting times. If eliminated, DCPS should provide bus service for children or they will not have any other way to get to school from their homes. 74,52 and P6 are needed in Sw Waterfront 89M (87 89) needs to be restored otherwise folks that lives in the south laurel neighborhoods at the end of the line and those who don't have a car rely on the 89M and Z7 express to silver spring 96 goes through the city and is the best way for a group of elderly disabled to get to Union Station. I used to use it daily to get to work. My dentist is on that line. Lots of people use it to get groceries A lot of community members rely on the D6 to get to the hospitals at Georgetown and Sibley for both healthcare and work. Metro access is vital although 1 personally do not use it. 1 personally could pay slightly more and not be impacted by rising fare costs but that would present a barrier to those with lower income who rely on the current pricing structure. As a side note, 1 still do not have 100% confidence in the safety of the WMATA trains and tracks. If there is any part of the budget that could go to that, 1 would be supportive A real SHITTT A solution you have not proposed is reducing service but actually running the trains on a schedule. Many other cities have commuter rail that runs less often, but on a predictable schedule. Metro service is erratic, which means that if trains are only offered every 20-30 minutes and 1 arrive at a station just after a train has departed, I have to wait too long for another one, making it faster to drive to my destination. The lack of predictability is the biggest solvable problem Metro has. Run the trains less often, but on a predictable, reliable schedule, and you'll be able to keep or increase both commuter and off-hours traffic. Right now, Metro rail + parking costs os much that it only aves me 52/day compared to driving into DC. Commont	Catagony
Comment As a senior who doesn?t have a car, reliable and affordable access to public transportation is extremely	Category
important to me.	MetroAccess
As to the fare proposal, for the parts relevant to me and my understanding, just to be more round,	
setting the express bus routes to \$5.00; in terms of how it effects choices, there is often little choice for	
those of us dependent upon the system, it's more a question of whether the choice is available or not. Think that any cuts to the metro access service area should be as minimal as possible, even when	
allowed by the 3/4 mile rule. The map shows some areas where metro access vehicles would drive	
through to get from one serviced area to another, those should be incorporated instead of excluded	
from service. It would also be helpful to have a current service area map to be able to compare and	
contrast. As to the bus cuts, one is wary that things will not be done quite considerately, nor with the	
thorough thoughtfulness that such an extreme measure merits, that it will be simply hacked off	
haphazardly. Of course, it will be tough, so good luck At this point, it is cheaper to pay for parking in DC than taking the metro. It is no longer an accessible	Bus Service
option. If the fares increased I would probably just drive in.	Fares/Fees/Parking
Attempting to resolve budget shortfalls by reducing and eliminating services is, obviously, foolish.	
You're guaranteeing a continued, steady, death spiral. While it is true that, in isolation, simply	
providing access doesn't mean people will come (no 'Field of Dreams' logic), it's also true that the fewer	
places metro services go, and the more inconvenient they are to use, the fewer people will use them, increasing travel by auto (either by Uber/taxi or driving), and increase inequality in our city (by making	
metro services increasingly the choice only for those who cannot afford something better). DC needs	
coordinated policies that prioritize access via walking/biking and public transit, that means correcting	
morasses like H Street, and continued prioritization of the development of better bike lanes. As long as	
it is faster and more convenient to travel by car, people will travel by car. Make it faster and easier to	
travel any other way, and people will do so. But you have to do both. If you simply make it harder to	
travel by car and public transit is not an acceptable alternative, you'll simply infuriate everyone. Obviously this is not an easy or quickly achievable thing, but making the Metro worse only exacerbates	
the situation. The rail doesn't go enough places, buses can't move fast enough through the city, biking	
isn't continuous enough (and the weather doesn't support it for months out of the year), and too many	
main arteries are optimized for vehicles. Present a coordinated proposal for a vision of the city that	
makes this place more equitable and accessible for its residents, rich and poor alike, that reflects the	
reality: travel by walking, biking, or public transit is the only way to achieve mass, effective	
transportation in a dense, urban environment.	Operating Budget, Management and Spending
Before I retired I took the T2 back and forth between Friendship Heights and River Road. This route was	
essential to my commute and avoided my driving and paying parking near the Metro. This route serves a large number of neighborhoods and should not be cut.	Bus Service
Before I retired, I used the T2 every weekday morning and evening to travel between my home and the	
Friendship Heights Metro. I currently use the T2 during the day to get to the MÂ,tÂ,o. It?s obvious to	
me that eliminating the T2 would be devastating to the working people who use this bus to get to and	
from work, medical appointments, etc.	Bus Service
Better mentainance Stop extspan Budget cuts are unacceptable. Metros budget should be massively increased. We need all night service	Miscellaneous
and increased service during the day of we want to reduce car trips through the region to save the	
environment. We also need expansion of the system. A separate blue line through DC (and not the	
stupid loop y'all area proposing). We need the purple line to circle town via Tysons, Falls Church,	
Alexandria and the WW bridge. We need a completely new line roughly along rt 50 from Annapolis to	
South Riding. And we need a streetcar network in DC as well as on Columbia Pike. Metro needs to stop	
being the stopgap at the end of budgets and start becoming the solution to horrendous traffic and bad	
air in the region. Budget shortfall should be closed through fare increases, not service cuts. If hours are extended at	Operating Budget, Management and Spending
night fares should be increased during those times as opposed to lower flat fares. More needs to be	
done to address fare jumping and other fare evasion. Metro needs to curtail administrative costs, not	
cut money for repairs and maintenance. Poor maintenance leads to poor reputation; poor reputation	
leads to lower ridership; lower ridership leads to lower fares collected, and increases in budget	Operating Budget, Management and Spending
Budget shortfalls if they?re a problem should be addressed with attracting more riders to. Metro not	
less. And should added revenue b needed should come from higher parking fees, further clamping down on fare evasion and short fares, higher bike locker or rental fees, encouraging more folks to buy	
passes, and cost cutting savings and efficiency measures and improvements throughout the system	Operating Budget, Management and Spending
Bus service is a critical means for low wage employees to get to and from work. Cutting bus service will	
disproportionately affect low wage and poor people more than train service changes.	Bus Service
Bus service should be maintained in DC many of the bus cuts cut off bus service DC should put more	
dollars into bus service rather than subsidizing scooters, rental bikes etc since buses are more	Bur Convico
accessible to all including the elderly, children and people who can't ride bikes and scooters Buses don't wait for people or when you ring the stop bell they don't stop.	Bus Service Bus Service
Changing the rates is very good but that they put rules, many people only get on transport and do not	
pay and do not tell them anything you have to be even with everyone pays one that they all pay	Miscellaneous
Castillo	Miscellaneous
Claiming that 20 minute headways is ?good service? should be a firing offense for being so divorced	
from reality that it blows my mind. Decisionmakers on the metro should be required to commute using	Rus Sanira
metro and ride it regularly. They have to be culturally one with the straphangers. Closing stations and reducing service will only discourage daily riders and confuse those who only use	Bus Service
metro once in a while. We'll have to deal with fewer, more crowded trains, fewer stations, and less	
personnel presence. Stations that are closed for long periods of time will require repairs and burden	
the capital budget in future years. Making Metro harder to use will not encourage people to use it	
more, and will be seen as a waste of commuters' time and money.	Operating Budget, Management and Spending
college students depend on the metro service to get around!! please don?t raise the fares or cut the	Earos/Eass/Parking
prices. students at some universities don?t have the unlimited metro so without it we?d still have to Consider less peak period service on Fridays and Mondays given office occupancy levels. a 10-25%	Fares/Fees/Parking
service reduction on those days is possible.	Service Levels
Consider making the service better so that more riders decide to ride by increasing frequency and	
implement a free student pass to all students in DC, Maryland, and Virginia	Bus Service
Consumers rely on Public Transportation to get to and from work. Cutting much needed service routes	
would hurt metro and more people prone to taken uber and Lyft to their locations.	Bus Service
Control passenger aboard with harmful and prohibited substance for health (passengers with a smell of marijuana)	Miscellaneous
Could you provide a map of the proposed service changes?	Service Levels
Crack down on turnstile jumping, legalize new forms of revenue.	Miscellaneous
Cut administrative pay and positions. You wonder why so many people fare hop. Don?t increase fares	
and don?t reduce service. Do what Chicago does and run lines 24/7. Stop giving so many administrators	
easy jobs with comfortable pensions	Fares/Fees/Parking
Cut executive salaries. Decrease the perks.	Miscellaneous

Comment	Category Due Control of Control o
Don?t cut any lines! Please! I love the metro!	Bus Service
Don?t cut redline commuter hour frequency!!! Don?t cut T2 or L8 bus service?it?s already very infrequent and needed!!	Bus Service
don?t cut service :)	Service Levels
Don't cut service!	Service Levels
Don't eliminate the 96. There is no reasonable alternative.	Service Levels
Don?t get rid of the D6 please!!! Very important for getting across town!!!	Bus Service
Don?t make buses free. Seems like you need the money	Bus Service
DON?T TOUCH THE 33 BUS. SO NECESSARY AND ALWAYS FULL. Get federal funding please :)	Bus Service
Don't cut lines ir routes!	Bus Service
During weekdays, metro service cuts or fare increases would almost guarantee that my wife and I	
would drive to work instead of taking the metro. We enjoy the convenience and affordability of the	
metro when going to work but if prices increase it would be cheaper for us to drive to work and pay for	
parking. There are also already issues with the amount of people taking the train during rush hour so	
decreasing service would make metro travel more frustrating and dangerous. While the information	
provided states that fare avoidance has been reduced by 70% I still see people hopping the turnstile	
every time I ride. Instead of punishing the people who support the metro, more focus should be put on	
those who ruin it for the rest of us.	Bus Service
East west service should not be part of the but routes eliminated, such as 42, 96, D6. Those fill a gap	
that metro rail does not fill.	Bus Service
Eliminating and drastically shortening bus routes, as Metro proposes, would cut off many people and	
communities from much-needed public transportation. In particular, my family and I live in SW DC and	
rely on the p6, 52, and 54 routes regularly? all of which would be eliminated in our neighborhood by	
metro?s proposal. This would leave the entire southwest/ wharf/ waterfront area virtually without bus	
service, just as the area is growing and expanding? and reliable public transportation is needed more than once it would describe the owner transportation entires for work and recreational activities.	
than ever. It would drastically limit my own transportation options for work and recreational activities, and increase my commute time. As a lifelong DC-area resident who uses public transportation daily, I	
strongly urge metro to reject these bus service cuts.	Bus Service
eliminating and extremely reducing service for busses leaves people without vehicles all but stranded	
with the only options to walk for >1 hour to their destination, or to pay an insane price for ubers or	
other third party rideshares. It?s unacceptable to leave so many people without proper public transit	Bus Service
Eliminating that many bus routes is so drastic! Please reconsider - the metro just isn't that accessible in	
many parts of the city. We need the buses. Please do surveys on the actual routes themselves so that	
folks know what is being proposed (e.g., have this survey available electronically and on paper when	
you step onto the D6/96/and other 80+ routes).	Service Levels
Eliminating the 74 bus service and not replacing it with an alternative is simply ridiculous	Bus Service
Eliminating the T2 will cause a lot of hardship on people who don?t have cars who need to go out River	
Road to Falls Road and north to Rockville.	Bus Service
Elimination of the D6 route would be catastrophic for families in my neighborhood (12th and D NE	
area). The D6 is a mainstay in Capitol Hill, allowing folks in our neighborhood to get downtown. The	
walk to metro from my home is just under a mile (to either Easter Market or Union Station). The long	
walk is made worse by crime in the neighborhood being at a high. It is simply not safe to walk such a	
distance in Capitol Hill these days, particularly during the early morning or late evening commuting	
hours. I use the D6 nearly every day, as do many of my neighbors. Please do not cut the D6 line leaving	
us with no metro service to our neighborhood.	Bus Service

Hence, stoppping fa	Bus Service Miscellaneous Fares/Fees/Parking Bus Service Fares/Fees/Parking Bus Service Miscellaneous Bus Service Bus Service Bus Service Bus Service Capital Budget Bus Service
In some routes I agree I believe that Metro has data from where there is less concurrence and where there is a majority that does not pay the ticket, perhaps find a more effective payment method to prevent or pay. Actually any change that would affect all people who use public transport but we also understand that there must be changes Enforce fare payment. The proposal is good because there are many expenses in the Metro, it would be good that they demand the payment on the buses since many people travel for free, almost only 30% pay. I agree that Metro makes decisions that do not affect the travajadores q travajan in subway and an alato as a subway user and trains that are agan righteous canvians in everything that make decisions that we get out of all users and workers that are my opinion that is my opinion Everyone should not have to wait longer for service or pay more because DC and metro can stop fare evaders!!! Everything in this is about hard infrastructure but no info was provided on staffing levels, cleanliness, or administrative expenses. I think the public would appreciate knowing the cost of staffing, overtime hours, etc. Everything is going well so keep going Fare increases are far preferable to service changes. Service cutbacks will sharply reduce or terminate my use of the Metro transport system. PLEASE PRESERVE THE 96 METROBUS ROUTE IN DC, WHICH I USE FREQUENTLY. Firstly, do you really need to ask the public what they think about yet more fare increases? You don't already know? Secondly, you didn't give the right choices. The prefered choice is not between service cuts and fare increases. It's about using what you have more efficiently and effectively. Stop the fare jumpers and you'll fund your operation into infinity! Replace the sleeping attendants in the booths at netro stations with energized, active people. Hence, stopping fare jumping. Have more security in the stations and on the trains and you will stop all sorts of things and thereby increase ridership. I used to love the metro and too	Bus Service Miscellaneous Fares/Fees/Parking Bus Service Fares/Fees/Parking Bus Service Miscellaneous Bus Service Bus Service Bus Service Bus Service Capital Budget Bus Service

I would accet praying more than 34 per trip to help maintaining Bus Service	I absolutely rely on the 96 for my daily life! PLEASE don?t eliminate it! I really need it and I don?t have a	
I am a regular 8W/8Z (now 21C) to Pentagon since 2014. I was a top 2% metro user for 2023. Switching to Metro instead of driving improved my quality of life. I purchased my home in part due to proximity to the 8W (Taney Ave.) However, both lines are not funded for the next fiscal year. If I cannot use thes lines to commute, I will not use Metrorail to commute. I prefer taking Metro to driving and even teleworking, but I am not going to get in my car, deal with traffic, pay for gas and parking so that I can take a longer Metro rail ride from Alexandria to the District. In short, cutting bus routes is the transit death cycle, so don't do it. I have contacted my state senator and delegate and insisted they fund Metro. I have also talked to the mayor of Alexandria on the Yellow Line about the need to keep 8W/21C buses. Don't turn my neighborhood into a transit desert. I am a regular user of the P6, D8, 80, and G8 lines - my family moved specifically to be able to use the G8 to get to school, work, and our favorite restaurants and activities. I ride the G8 and other bus lines is one of the things that keeps us from having to drive. My fellow G8 passengers include many more of my elderly and low-income neighborhod use the G8 to get to and from school. Northeast DC is an incredible community that would be cut off from the rest of the city by these proposed bus cuts many parts of NE are not metro-accessible. I am a rider of MetroAccess services. Ever since I lost my ability to drive independently, I have been depending on MetroAccess services. I would accept paying more than \$4 per trip to help maintaining

This would increase confusion and reduce my ability as a blind passenger to ride independently and get	
to work and medical appointments. Additionally, reducing or eliminating service on critical lines such as	
the L8, L2, J1, J2, S9, and S2 that provide backup options to get to key locations when track work	
temporarily limits red line service would be disastrous. Priority should be given to allow access to key destinations such as malls, shopping centers, medical complexes, large employment centers, and	
transit hubs that provide local service. Cutting Red Line service at Grosvenor would complicate trips I	
take to medical offices in Shady Grove. Closing metro stations would be even worse and force people to	
relocate. I live near Cleveland Park, and if the station closed, I would need to move. Reducing service in	
Montgomery County would be very difficult because I have aging parents in Leisure World. Maryland	
has paid its share of the budget. Virginia is the one slacking, and I think Virginia needs to provide	
significant additional funds for WMATA, particularly in light of its plan to expand Potomac Yard to	
encompass the proposed sports complex. That cost should entirely be on Virginia, and really shouldn't	
happen anyway. Virginia has repeatedly chosen to neglect its transit infrastructure and not participate	
in region-wide transit initiatives, even within Virginia between Arlington and Alexandria. Residents have realized this and more transit-dependent people live in DC, Montgomery County, and PG County. I	
don't want to see any cuts to service beyond well-researched streamlining of service that benefits the	
community, but I would prioritize the needs of DC and Maryland residents simply because they have	
paid their fair share of WMATA funding and because they have chosen to live in jurisdictions that	
prioritize transit access. I have no issues with the Silver Line running between Ashburn and Stadium-	
Armory, and I think that makes a lot of sense. I am open to certain modifications of bus routes that	
eliminate unnecessary redundancy and provide increased access. For instance, there are many MARC	
train stops that do not have bus service within a five minute walk. Increasing bus service to access all	
MARC train stops would provide enhanced local options for commuters who need to connect further	
North. Additionally, working with MARC to integrate into the transit system for short rides (five stops or	
fewer) would service several neighborhoods that currently have poor Metro connectivity and in some	
cases also poor bus connectivity. However, if bus routes were extended to hit MARC train stops, the MARC train could be used for some trips that currently aren't reasonable via bus and Metro. This might	
require coordination with MARC regarding fee structure to allow this, but MARC operates in some	Operating Budget, Management and Spending
I am alarmed particularly by closing stations, some of which were just recently built using taxpayer	
dollars. Why build the stations in the first place for them to close a couple of years later? Also, closing	
the system at 10 pm will increase the likelihood of drunk driving accidents as people will drive to go out	
instead of taking public transportation. Finally, if you were to cut service during rush hour, many	
people would be incentivized to drive to work, making our roads impassible and our trains harder, if	
not impossible to board with more crowded cars.	Rail Service
I am disappointed that I continuously see Metro cut services for those of us who do not have reliable	
car transportation and are dependent on bus to get to work in D.C. from Virginia, particularly on the	
West End of Alexandria. We cannot have any more reduction in services! I actually prefer to take Metro	Bus Conviso
but recent changes have made it impossible for me to handle my usual schedule and get reliable I am entirely reliant on the D6 bus to get to my office, which I am now going in person at least 3 days	Bus Service
per week. There are also a lot of children reliant on the D6 for getting to school. For our neighborhood	
in Capitol Hill this leaves us stranded from getting downtown easily. I am also concerned about the	
people for whom there is no alternative transportation in our city and the most vulnerable people that	
will suffer through service cuts. As many people still need to get places, will this increase cars, taxis, and	
ride sharing services? In addition to the fact this costs more, there is increase in traffic and an	
environmental cost that is counter to what all other cities around the world are trying to do.	Bus Service

I am not in favor of sweeping service cuts that effectively leave a huge portion of the city (the African American population specifically) cut off from the rest of the city. Ask Murial Bowser to fund Metro so workers can get into the city if that is a priority for her. There is a budget surplus. I am ok paying more as long as reduced bus fare is readily available to anyone who needs it, and the price is income sensitive	Operating Budget, Management and Spending
I am honesty very sick of WMATA's budget issues. I have lived in the DC area for 20 years and it seems like WMATA has budget issues often. How is it that larger cities like NYC and Chicago can charge 52.50 per ride to ride from one end to the other of a city, yet, WMATA's fair continues to increase and is never enough. Why does WMATA propose fair hikes or a decrease in service every few years? How is it that WMATA never has a budget that's sufficient? Have you considered hiring more competent CFO staff? Have you considered maybe not paying \$100k to your employees to drive a bus? Have you considered fit me WMATA police who I still don't know what they do because they don't patrol stations or parking lots and we already have MPD? Something needs to change. Maybe bring in some think tankers or someone who truly knows how to think critically about WMATA's budget problems. Customers are tired of the answer being either to make us pay more money or to inconvenience us by decreasing service. I am honesty very sick of WMATA's budget issues. I have lived in the DC area for 20 years and it seems like WMATA has budget issues often. How is it that larger cities like NYC and Chicago can charge 52.50 per ride to ride from one end to the other of a city, yet, WMATA's fair continues to increase and is never enough. Why does WMATA propose fair hikes or a decrease in service every few years? How is it that WMATA never has a budget that's sufficient? Have you considered hiring more competent CFO staff? Have you considered maybe not paying \$100k to your employees to drive a bus? Have you considered getting rid of the WMATA police who I still don't know what they do because they don't patrol stations or parking lots and we already have MPD? Something needs to change. Maybe bring in some think tankers or someone who truly knows how to think critically about WMATA's budget problems. Customers are tired of the answer being either to make us pay more money or to inconvenience us by decreasing service. I am not in favor of sweeping service cuts that effectively leave a huge portion of the city (the African American population specifically) cut off from the rest of the city. Ask Murial Bowser to fund Metro so workers can get into the city if that is a priority for her. There is a budget surplus. I am ok paying more as long as reduced bus fare is readily available to anyone who needs it, and the price is income sensitive I am someone who must ride the Metro from Dunn Loring station because I need to be in Virginia Square. And the metro is the most convenient. I am fine with a slight increase in fare but not too I am using metro rail less frequently because of the smell of marijuana in the cars and stationssmoking in the trains and kids jumping the fare gates. It doesn't fee safe. I am very concerned with possible service cuts that would lead to long waits and packed trains. Those conditions would make me reconsider commuting to work via metro. I and many people do not have a car. Comment	Category
I currently commute from the Braddock Road station to the Downtown Largo station three days per	
week via Metro. Factoring in travel time from my house to Metro and then to my office, I spend over an	
hour each way on the commute. I do this in spite of owning a fully paid-off car with minimal running	
costs, having free parking at work, and the commute taking longer by Metro than it would by driving. I am also an urban planner by profession working in a suburban jurisdiction, so I understand the	
challenges of running a bus system with low ridership. However, while I have other options, many of	
our lower-income suburban residents do not. By further reducing the services to these communities	
and residents who rely on Metro service, we not only continue to do a disservice to many of our	
region's most vulnerable residents, but we also perpetuate the idea that public transportation is not	
reliable and thus discourage those who have other options from taking it. While I'm opposed to fare	
hikes, I'm even more dismayed at the concept of service cuts for this very reason.	Bus Service
I currently take the blue line to work daily and waiting ten minutes (or more) for my train on a regular	
basis makes my commute incredibly inconsistent and frustrating. I want to use metro, but having to	
consistently wait so long for my train, and the frequently have the wait times be longer than listed,	
makes it significantly more convenient to use other forms of transportation. Given the low frequency of	
blue line trains, I likely will stop using metro regularly if it continues. I would, however, continue to use	
metro if there were fare hikes but not reductions in service.	Bus Service
I depend on the 96 bus to get to and from work. I have no other public transport option (since my	
previous route, the 97, was eliminated. Please do not eliminate this route. It is always heavily	
populated during commute times.	Bus Service
I do not want to see service changed on any of the routes or services as many low income people rely	Due Camina
on these bus routes. I don?t think any proposals in here are unreasonable except for the 10pm rail closures, which would	Bus Service
have a major effect on service/hospitality workers. The bike locker rental change is really good.	Rail Service
I don't think the fare price should increase as it's already two dollars for a ride. The only thing that the	
metro proposal needs to worry about is fixing their vehicles for no accidents, maintaining their safety in	
metro transports.	Fare Evasion/Safety/Crime
I don't have a drivers license or car access, and I use the G8 to commute to work every day. Ending the	
line at Shaw would make it harder for me to get home in the evenings. I also work on the weekends, so	
eliminating bus service on weekends would force me to find another way to get to work.	Bus Service
I don't mind an increase to the base fare up to 2.50 (including weekends), but the longer trips shouldn't	
be increased in the same way, it's including people to drive/not pay.	Fares/Fees/Parking
I don't mind paying more, I use metro because it's climate friendly. However if it takes too long then I	
will be forced to drive instead	Rail Service
I don't ride the bus but my friends and neighbors do. Losing service in the neighborhood (D2 Glover	
Park) is a definite loss of livability and desirability. It will leave stranded a large area west of Wisconsin	
Avenue.	Bus Service
I don't want to see excessive rises in ridership cost but I am encouraging Metro to make the system safer.	Fares/Fees/Parking
I feel like public transport is a hugely important and benefits everyone. The more frequent and	rdies/rees/raiking
convenient bus routes are, the more likely people will be to take the bus.	Bus Service
I feel the metro prices should reduce a little	Rail Service
I greatly appreciate the D6 and have been able to reduce the number of cars in our household	
significantly because of this line. I really hope this line doesn't get cut!!	Bus Service
I have been a resident of Southwest DC for the past 10 years. For six years I commuted via the P6 bus	
which was always packed, especially with people traveling to the courthouse for critical appointments	
they could not miss. I now commute on the 52 bus, and occasionally take the 74 to meetings	
downtown. I see many of my neighbors on the bus daily. Frequent, convenient bus service is the part of	
what makes it possible to live in DC and not to rely on a car for commuting. Decreasing bus service will	
diminish the benefits of living in DC, increase reliance on cars, and disadvantage those in the	
community who need a reliable way to get to work without the high cost of owning a car. One final	
thought on Metro funding. I have Metro benefits through my employer. I dutifully tap the box every	
time I board a bus. But the technology is finnicky and bus drivers trying to keep to a schedule often	
wave people through rather than have them keep trying to tap until the fare goes through. On my bus	
routes, 90 percent or more of people tap to pay their fare but it appears to go through less than half the time. There is free money for WMATA if they can find a way to reliably collect bus fares. And for	
those of us who receive Metro benefits through our employer, higher fares are no problem at all and would be much desired if it helped sustain frequent bus service. Perhaps there is a way to charge higher	
Metrorail and Metrobus fares to people whose commutes are employer-funded and lower fares to	
lower-income bus users who don?t have that benefit.	Bus Service
I have been a user of metro acess since 2016. It?s my lifeline since my confinement to a wheelchair.	
The service is a necessity for me to get to doctors appointments therapy sssions and grocery shopping.	
Having the service has kept some normalcy in my life , without it I?m lost!!	Rail Service
I have impaired vision and I have family in DC. I depend on public transportation when visiting. The	
completeness and seamlessness of the system has been amazing when I visited. Disabled, blind, and	
vision impaired do find it difficult to change buses/trains and I?m sorry to see the system become more	
difficult to use.	Bus Service
I hope this survey helps relevant politicians understand the importance of public transport to the area	Miscellaneous
I like metro transit	Rail Service
I like the current route, it's easy to meet my transportation needs.	Bus Service
I like trains. I live in Adams Morgan, which is not well-served by the Metro and so bus service is crucial. I take the S2	Rail Service
and 42/43 on weekends all the time. I work outside of DC but I rely on the bus to get around DC on the	
weekend. Cutting or eliminating weekend service on these routes would make downtown DC	
inaccessible to me on weekends without driving.	Bus Service
I live in Hill East and the D6 is an essential service for transportation downtown for our community. It is	
a 20 minute walk to the metro, whereas the D6 offers convenient, safe, one-line service for essential	
travel. The bus is filled with a cross section (race, socio-economic, age, etc) of DC and our	
neighborhood, including the elderly, kids going to school, people going to their jobs, people going to	
Union Station, tourists, and others. Eliminating the D6, which has no viable replacement service for its

i love the metro please don?t make cuts on it. the beltway and car-based emissions. our	Category
capital needs to lead by example and public transit has to be the future	Rail Service
I metro to work and don?t have a car. Service delays to the orange/silver/blue lines would be	
HORRIBLE. I don?t care how expensive the fare is as long as it is less than taking an Uber to and from	
work every day. I oppose eliminating the 96 and D6 routes.	Fares/Fees/Parking Bus Service
I really value the Metro and the service it provides for D.C. It gives the public great flexibility to travel	Bus service
where-ever as needed. It would be a great shame if service had been cut down greatly and it would	
decrease my approval of WMATA.	Rail Service
I really worry about the impact of bus service decreases, given that the bus system is able to serve	
lower-income passengers and neighborhoods in a way MetroRail doesn't. The lines on the block might not be highly traveled but they are essential lifelines to get to jobs and do essential activities like buying	
groceries. it's a well-documented phenomenon that resident sin Wards 8 and 7, who are served by just	
4 grocery stores in total, have to travel 45 minutes or an hour when they factor in bus transfers to get	
to a store. Don't make that worse. On the flip side, I live in ward 1 and commute to Buzzard Point in	
W6, served by the 74 bus that you plan to cut, so that's not great. And the challenge with my personal	
bus habits is more about the variety of people the bus serves. The lines I ride most frequently (70s,60s, 50s, and 40s) where ridership is mixed between wealthy residents who have the means to switch to	
ubers, rental bikes, or driving and parking when transit is not easily accessible - I can tell you the	
number of my peers (college educated, well-paid office jobs) who just gave up on transit in the	
pandemic and now will take an uber (creating traffic, pollution) when they used to take bus or rail. And	
I know that my neighbors who work in the service industry or other non-peak jobs are also reliant on	
evening and weekend service to get around. I still do some event work and really appreciate the fact	
that I can book a gig on a Friday or Saturday night and not worry about losing a chunk of my earnings to an uber to get home - that becomes even more important when that is your full-time job.	Bus Service
I rely heavily on the D6 route as one of the few east-west routes across the city	Bus service
I rely on the 42/43 busses to get me from where I live in Columbia Heights to where I work in Foggy	
Bottom. Diminishing these bus routes would severely undermine my commute and daily life, as well as	
those of my neighbors, with whom I ride the bus each day.	Bus Service
I rely on the D6 bus route twice a day for my morning commute to work to a federal agency. This would disrupt my plans and would I would have to find alternate routes / modes of travel.	Bus Service
I rely on the metro to get around, I don't drive, and work late periodically. If the service is cut, it would	
be difficult to get home	Bus Service
I represent many friends, coworkers, and neighbors in Glover Park and Georgetown and we strongly	
oppose elimination of D2 and D6 buses because it would impact our livelihoods. We propose reducing	
frequency of these two lines, big NO no elimination. I represent many other families and friends, coworkers, neighbors and other residents who live in	Bus Service
Glover Park and Georgetown. We strongly oppose the elimination of D2 and D6 Metrobus lines because	
it would negatively impact our livelihoods as we commute to and from work, school, grocery stores,	
doctors and hospitals, and family members, it would severe our connection to a major hub such as	
Dupont Circle Metro and thus also making a lot of us under-served by any public transportation. It	
would also be inconsistent with the goal of encouraging people to take public transportation more	
than owning personal vehicles. We suggest only changing the frequency and modernize the bus fleet	Dua Camina
used to use electric buses and buses that can have more passengers because of the adjusted I see that the D6 route might be cut completely. Please do not cut this route and others that serve	Bus Service
students in getting to school. The D6 is route is particularly important for MacArthur High School	
students, as it is only his route that serves the school. Without this route, the school is basically	
impossible to reach via public transportation.	Bus Service
I service should center around population centers. Frequency over coverage. The more service the	
better, but when the going gets tough like now, the suburbs shouldn?t be subsidized by great service, unless they pay their fair shares. The jurisdictions which do not contribute fairly to closing the gap	
should see the brunt of service cuts. Pay a fair share or don?t expect WMATA?s great service, I say. I	
hope that a steady funding stream is identified before if not right after these cuts go into effect.	Bus Service
I swear to god somebody somewhere needs to be yelled at and publicly embarrassed for cutting metro	
funding	Capital Budget
I take 92 bus and 32, 36 bus on my way to work and on weekend I take 92, 32,36, 52,54,42,43 to get around down town . I just like the bus service the way it is now. I'm afraid how to get around if	
decrease or eliminate bus service on weekend and holidays.	Bus Service
I think every dollar and ounce of energy should be spent on decreasing headway at metrorail stations.	
Waiting 15 minutes for a train is unacceptable. The target is 5 minutes or less at every station all day	
every day. If you hit that ridership will increase. Buses also have too many stops that are too close	
together. If bus stops are a mile apart then the max walk is half a mile. Stops every couple blocks is a huge pain in the stops.	Bus Service
I think it is unfair to both increase the bus fare as well as cutting routes. Many people use the routes	
because it is affordable for families without personal transportation.	Bus Service
I think people have places to go everyday of the week, so cutting out routes inconveniences us and we	
resort to expensive ubers and lyft	Bus Service
I think politicians should redirect funds from stuff like police and vanity projects and focus on building up stuff that is extremely important for society like public transit	Fare Evasion/Safety/Crime
I think some cuts should be also in employee salaries	Miscellaneous
I think that adjusting route times, and stops is a good route to take even if that will unfortunately mean	
fair increases. However I do not think cutting late & weekend service is beneficial to many of us who	
use the service. I do think adjusting the hours based on station traffic at those hours and then adjusting the train times leaving beginning and and routes would be a better design. Classing last applications	
the train times leaving beginning and end routes would be a better decision. Closing less popular stations slightly earlier, cutting the train routes shorter. Allowing the buses to fill in & increasing traffic	
at the stations that already have a healthy amount of traffic on late nights and weekends.	Bus Service
I think that cutting budget, reducing service costs, and increasing the fares by 25% is not the answer or	
solution to make for this situation.	Operating Budget, Management and Spending
I think that this would be very stupid of metro to do because for one thing not everybody has money in	Dell Carrier
Metro literally makes a lot of money, so why are you doing this to the people that are helping you out?. i think the silver line changes will be good, bus routes with transfers or rail alternatives is a fair cut, and	Kali Service
slight fair increases. I would ride metro more with later weekend night service, and would be less likely	
to take the metro to work with fare increases. I think persevering regular trains during rush hour is	
incredibly important.	Bus Service
I took the X2 this past Saturday, early evening. I am 45 and had my daughters, ages 5 and 10, with me.	
The amount of riders who crammed through the back door without paying was alarming. My suggestion is to make the bus free for riders, since anecdotally it seems to me few people pay for it	Rus Service
I totally depend on metro access and accessibilities ride program where I can get an uber or taxi as well	Bus Service
as a metro access car so taking away bus routes will eliminate where I can travel and i also use it for	
workdaily and doctor and therapy appointments	Bus Service

Comment	Category
I understand the budget but the metro runs the area. Most people can hardly afford to pay for the	
fares as it is. i believe there should be some type of reform. the cut in services will affect everyone	
drastically so if there?s any change than i believe the fares should increase a bit more.	Operating Budget, Management and Spending
I use 1A at 1am and if that changes I won?t have a way home. Metro will lose money if is does that	Dell Caralian
since I?m not the only one that uses 1A after 1am. I use Metrobus quite often. On average less than half the people boarding the bus pay the fare. Why do	Rail Service
the drivers do not ensure that people pay the fare? In times of a tight budget, why does WMATA fail to	
collect the fare in buses? I guess this proves that none of the executives of WMATA use Metrobuses. Or	
they just do not care.	Operating Budget, Management and Spending
I use Metrorail 5-6 days a week. The amount of cars Metrorail and Metrobus keep off the roads is	
amazing. I hope the DMV governments would realize the value of the Metro system as a cost saving	
measure for their respective DOTs. I worry any service cuts will cause a downward spiral of ridership	
and further cuts. Raising fares isn?t much better but Metro needs to keep system and buses reliable,	
safe, clean, with short headways to keep/grow ridership. Also transit-oriented development will stop	
occurring if developers think the local station will be less valuable to tenants or may be shut down	
completely.	Bus Service
I usually take metrorail to work (red line) anywhere between 7 am to 11 am 7 days a week. If I regularly	
had to wait more than 6 or so minutes (which I currently never do), I?d probably bike to work.	Rail Service
I want the price of the fares to stay, only increase for passes abd subscriptions and decrease for late night and weekends	
I want you to address your budget shortfall by enforcing fare payment. It is unacceptable to place the	Fares/Fees/Parking
burden of improvement on those already paying while those who evade continue to do so. You are	
engendering more crime.	Operating Budget, Management and Spending
I went years without needing a car while living in the city even though Metro wasn't extremely reliable.	
If DC wants to make the city more non-car friendly, we need better public transportation, and that	
means less wait time on rail and bus and more stops, as well as safer travel. If NYC can have good	
public transportation, why can't we? The service cuts are just going to make people find other means of	
transportation.	Bus Service
I will literally move to another city if you gut the metro	Rail Service
I would be much more likely to use bus service more frequently (including the 96 line I really really	
hope you do not cut) if it were more reliable. I lived in Chicago almost 20 years ago and it was easier to	
reliably track when a bus would arrive than it is here. Too many people rely on buses for WMATA to	
miss the opportunity to use them more and better. Thank you!	Bus Service
I would gladly pay double rather than see my state ransomed into covering the poor spending and	
development I've seen these last two years that I've lived in Virginia. Please don't cut the routes and	Due Carrier
lines anymore than absolutely necessary. I would like the rates to stay the same for Metro Access & to include up to 2:am on weekends	Bus Service MetroAccess
I would like to know what caused the Budget deficit currently causing said price hike and service cut	MelloAccess
proposals.	Operating Budget, Management and Spending
I would love to see metroail run rush hiour fares to continue with little fare increade	Fares/Fees/Parking
I would most prefer it if Metro could raise revenue from regional jurisdictions.	Rail Service
I would prefer the fare increase because some of my main routes of use face major changes and it	
would hurt me alot.	Bus Service
I would prefer to pay higher prices than to see metro cut services. The 96 bus was proposed as being	
cut from low ridership which is not the case. The bus is consistently packed but no one pays for it so I	
am assuming ridership data is skewed.	Bus Service
I would prefer you raise prices - and also make sure that all riders pay for their rides and do something	
to penalize the people who jump the terminals and don't pay for their trip. Please keep the D6 bus. It is	
important to our community.	Bus Service

Comment	Category
If metro would make the stations safer, and the bus service actually show up at the stops on time and the transit police don't be lazy with arresting fare evaders and ticketing cars going into the bus zones at	
the stations then I wouldn't be doing this survey	Service Levels
If the DC area governments (including VA and MD) allege that they want to have policies that are good	
for the environment, they must NOT make metro rides more expensive, or less frequent. If the fares were to increase any more I believe that ridership across the DMV would decrease	Rail Service
substantially, whereas with service cuts there would still be a decrease and ridership but not to the	
same extent.	Bus Service
If the goal was to inevitably lose more money, then these are brilliant proposals.	Miscellaneous
If the Mayor can find \$500 million for the Caps and Wizards, she can find money to preserve bus service? period.	Bus Service
If there will be no change in service schedule during rush/peak times there should be no extra cost to	
ride during peak hours.	Fares/Fees/Parking
If we want to reduce traffic, we need to give people viable, affordable public transportation options first. Building more and more roads is not the answer. Public transportation should look like it does in	
Europe: affordable, ubiquitous, reliable, widespread. Metro should go where people live and need to	
commute, e.g. put metro down the center of Rt. 66 to Gainesville instead of adding toll lanes; add the	
Purple line across the Potomac from Silver Spring to Tysons Corner. I know those options represent an	
enormous amount of money but we need to shift out priorities and are hard choices at some point. Sooner rather than later is cheaper.	Bus Service
If you are going to charge more for fares on the rail or bus put the money into the trains and buses and	bus service
the workers who are out here putting there life on the line because mental health is real and the	
operators have to deal with it everyday! So put money into the worker?s pockets so the will appreciate	
they job more If you increase fares people will only turn away from using the service (or hopping fare gates). This will	Bus Service
cause even more declines in use and profit.	Fares/Fees/Parking
If you keep increasing fairs and cutting services, you?ll end up losing more money in the long run. Stop	
using our taxes to fund genocide and make public transportation more accessible for everyone.	Service Levels
If you provide a service that has value then you shouldn't be afraid to charge for it. If you continue to lose lots of money on every additional train and bus you run, eventually you will run fewer trains and	
buses.	Bus Service
If you terminate service on buses to end at the city center and don?t provide an alternative that runs at	
a regular pace, the general public becomes out of luck. do better than service cuts please. If you would just enforce fare jumping laws, you would have the money.	Bus Service
If you would just enforce fare jumping laws, you would nave the money. If you?re going to increase the fare, at least make sure that things look better and are better equipped	Fares/Fees/Parking
and kept.	Fares/Fees/Parking
I'm hoping metro access will still take you to appointments that are farther out and don't go up on the	
fare	MetroAccess
Implement energy conservation: photocells for lights off during daylight hours for outdoor stations, reduce # of cars during off hours except for major events, turn-off constantly running escalators when	
not in use	Rail Service
In good, prosperous cities, the metro system is at the heart of their success. Doesn?t make any sense to	
me what they?re trying to do (service cuts and make fare more expensive). I guess the latter won?t matter that much to the good number of people that just jump over the turnstiles without paying. I	
would be careful making public transportation less good	Bus Service

In the above questions, I chose 'would not change my travel choices' only because I have no other choice. That's not a good place to be. Also, can we do something about twerdet. If people actually followed the law and paid their fare, it would help with the budget gap. It sucks for the rest of us fare-paying riders. In the future, please extend Metro bus to other parts of Maryland because THEBUS PG is extremely unreliable. Increase frequency with r	Bus Service Rail Service Rail Service Miscellaneous Operating Budget, Management and Spending Bus Service Bus Service Bus Service
In my opinion, too much focus on service for routes that are under utilized and less important to the majority of the Metro user population. Focus should be on safety first, then providing reliable service to the routes that routinely have the most paying users. In one of the wealthiest metropolitan areas in the country, this should not be an issue. In order for metro to continue the localities have to prove more money and I am in favor of that. However, metro cannot cut service so much that it become useless to ride. Many of these proposed cuts would make it useless. If I have a choice between driving and riding metro I need you to help me choose metro by providing reasonable service. In order to give informed feedback about metrorail station closure and whether or not I approve, it would need to be made more clear which stations are closing. The proposed metrorail changes document does not list which stations would close, making it difficult to provide informed feedback. Regardless, this change would be devastating to many riders. Additionally, I am vehemently opposed to fare increases and the metrorail closing at 10pm. I will quite literally never ride metrorail if I have to pay. 50 more just to have to take over an hour on the bus to get home past 10pm. While I have the privilege of having a car I could drive instead, so many others do not and would have to spend an unfathomable amount of time commuting at night, increasing stress and decreasing the quality of living. Increasing metro fare will only result in more traffic and more pollution from commuters who will	
inevitably resort to personal vehicles rather than metrorail. Keeping the fare the same or decreased will	
actually encourage more commuters to ride metrorail in turn increasing your profit. People cant keep	
spending a third of their paycheck on metrorail parking and fees.	Operating Budget, Management and Spending Service Levels
increasing rates and decreasing service will make you lose customers Increasing the metrorail fares is unethical. This is the opposite of progression. This is weaponized	
incompetence. It?s 2024, WMATA should be working to increase ridership as much as possible to	
reduce reliance on car driving. This means increasing the accessibility of the metro through efforts	
aimed at reducing metrorail fares. Frequent WMATA riders likely don?t have personal vehicles and may	
be facing economic hardship. It would be an absolute disservice to the people in the DMV to increase	
metrorail fares due to the incompetence of WMATA?s leadership to plan and budget accordingly.	
Don?t place the burden on the people who use the Metro rail daily and pay taxes that are going	
towards more reliable and improved public transportation. Don?t be another reason that makes it	
harder for low income folk to operate. Do better WMATA.	Operating Budget, Management and Spending
Inflation hit every other sector. It?s time for the DMV to acknowledge it and raise fares accordingly. Also, the fare gate jumping is still such an aggravating daily ritual. Please keep up the new gates and	
law enforcement.	Fares/Fees/Parking
Is there any way to get more money to you guys?? I?d really love to have both no increases for people	
who can't pay as well as the same service.	Service Levels
Isn?t obvious that we should be pouring public funds into public transit as opposed to subsidizing car	
use? This whole survey is based on seriously flawed logic.	Miscellaneous
It already costs me \$11.40 to get to and from work and \$5+ to park. If it costs more or if I have to wait	
longer I will just drive from now on.	Fares/Fees/Parking
It is absolutely asinine to raise fare rates. Period. The few of us who actually pay our fares currently	
watch 70% of metro riders jump gates and pay zero money. Your missing income is coming from the	
millions of fare skippers. I and everyone else who pays should NEVER be forced to pay higher fare	
increases when we already pay to watch others skip out on their payments. It's your responsibility to use the law enforcement provided to stand guard and press charges against ever single fare skipper.	
When you start 100% enforcement, you'll receive 100% payment on rider fares.	Fares/Fees/Parking
It is appealing to me that one of the few cities in America that has somewhat decent public transit is	n uncarn ecarn unking
looking to cut back service. I understand that moving things around like stopping service that overlaps,	
but we have a crisis of unaffordable transportation. We need metro rail service more often and for	
more hours of the day. If it ran earlier I and others could actually get to the airport for morning flights.	
Instead, expensive taxi/rideshare or if someone has a car they want to park, DCA is \$19 a day. The	
region's transportation issues are because there are too many cars on the road. The proposed changes	
would make traffic worse. We need better connected bus routes that run more often. Why have we	
made it easier for someone to get to DCA than to get to their grocery store? I know in the end it is	
about money and politics, but public transit should be there for everyone. My answers say I have not	
ridden in the last month. That is because I have moved. However these are issues I faces as I lived in the	
DMV and used the metro and bus systems. It is insane that there is not more permanent dedicated funding provided by the jurisdictions that	Bus Service
metro serves. Also real bus arrival times are already a mess, so it?s a toss up if less frequency would	
actually make service feel worse or not.	Bus Service
It may be worth considering rethinking the downtown DC bus network to be more Tangential, that may	
work well with the proposed bus route truncations.	Bus Service
It seems only about half the people even try to use the fare box (and often it is out of service) and the	
drivers don?t care. Perhaps you could invest more in having people on the bus for fare enforcement like	
they do in Europe and Asia. Another option would be figuring out how to do a lump sum transfer from	
employers that pay for transportation- maybe by having the company pay for a monthly pass rather

employers that pay for transportation- maybe by having the company pay for a monthly pass rather than loading a sum onto the card. That way it doesn't matter if the fare boxes are broken. Also, 1?m very concerned about the proposals to eliminate the d2 bus - I ride it frequently and it is often packed, especially during commute times. By eliminating it, I think a lot more people would drive which would be awful. It will be cheaper and faster for me to drive all the way downtown. I can park in my building for \$14. Your proposal tells me it will cost me \$25 to take commuter bus, whose service is also being drastically cut, and metro. I can't risk being stuck in metro due to broken doors, signal problems, police activity, etc., and then miss my commuter bus home. I'd prefer to sit on 270 or the beltway in the comfort of my own vehicle no matter how bad the traffic. After 20+ years of this crap, I'm done!! It would be great to go to flat fare only within the district. The transfer fee is problematic. It would be great to go to flat fare only within the district. The transfer fee is problematic. It would significantly hamper my ability to get to easily get to work if the time between service on the metro is increased. Additionally, it would be very difficult to get over to certain parts of the city if the G20 bus line is cut. It's disappointing that you can't get a good handle on the fare jumpers and rest of us suffer It's hard to expect people to want to use Metro services more, when talk is constantly around cutting them/making people wait. I understand the challenges of a tri-state public transportation system, but people in DC appreciate the Metro for what it offers and the more it offers, the more people will use it. Many of the proposed bus line cuts will affect DCPS students enormouslythe 42/43 for SWW; the D2,	
G2, and D6 for Duke Ellington and Hardy, etc. This will make it MUCH harder for kids to get to school	
and may even affect enrollments.	Bus Service
Many people at my job and in the neighborhood ride the 74. I do not see how cutting the 74 route is	
logical. V ST SW + 1ST ST SW is far away from any main road. I have seen small children, elderly, and	
handicapped people ride the 74.	Bus Service
Many people receive metro subsidies through work, so many would not mind fare increases. For those	
who can?t afford increased fare, there should be a means-tested way of securing discounted fares for	
them.	Fares/Fees/Parking
Maryland service is already slow and not dependable cutting service will make it harder than already is	Service Levels
Mass public transit must be a priority moving forward. In a time when concern over carbon emissions is	
at an all time high, metro should be at the forefront of increasing bus and rail service, making it as easy	
as possible to take public transit across the Washington metropolitan region. Metro should be keeping	
fares low in order to encourage new riders and existing riders to take metro, with an ultimate goal of	
eliminating fares. As the situation stands, new riders are being discouraged, while fare hikes and service	
cuts are causing current riders to aspire to car ownership. These steps backward are happening in a key	Bus Service
timeframe when metro should be expanding ridership like never before.	Bus Service
Mass transit should not be funded by fares at all, the participating governments should fund mass	Farm (Farm (Darking
transit out of taxes, just as they do for road building and maintenance. It seems to me that the Users of the Metro Bus feel, calm to know that we can use this means of	Fares/Fees/Parking
transport.	Bus Service
Metro Access at times do not care about the disability, who uses this service, the operators are rude,	Bus Service
and I was stranded at my location for pickup three occasions, not good for the disabled.	MetroAccess
Metro Access Service is an invaluable service for people with disabilities who have no other	Net OACCESS
transportation alternatives that will allow them to travel to and from work, medical appointments, and	
other places safely. Since using Metrobus/Rail poses significant challenges for those with disabilities, it's	
imperative that WMATA consider less disruptive options for the most vulnerable populations.	Bus Service
migerative that while the consider less disruptive options for the most valifierable populations.	
budget I don?t know if anyone other than an intern reads these surveys, but my experience is that	
government asks for public input after decisions have been made. I hope that?s not the case here.	
From the outside looking in, it seems every few years Metro talks about ?unprecedented deficits? and	
?modernizing? the system. Why can?t you fix it already? You need to make the public budget, the	
revised public budget documents, or whatever, understandable by your grandmother. For example,	
why did you make the comparison of the two service maps using a very pale grey border to show your	
changes and thus so difficult to see??? And why didn?t you explain to the public what?s the meaning	
of: ?Service delivery awarded by zone reducing providers from four to one or two. Re-launch non-	
dedicated service through micro-zone allocation.? My instincts tell me that reducing anything to ?one?	
is not good. And how are you making decisions without explaining how many ?people? will be	
impacted? No to MetroAccess Ridesharing: ridesharing just because someone is handicapped, and poor	
is not appropriate. Would Warren Buffet rideshare? However, taxi service vs metro access vehicles	
should be appropriate. Just leave MetroAccess alone. These are the most vulnerable people you serve.	
Provide the service. Shame on you for even considering any reductions/changes. No to a reduction in	
practical matters such as security, cleanliness, or human support when technology fails However,	
technology must be current especially if there is a catastrophic event Are you taking into consideration	
redundancy if one system/location goes down and there is no backup just because you wanted to save	
money? Get 134,400 business (13 Fortune 500 headquarters) to subsidize if they actually want their	
employees in-office and less teleworking ? which I suspect, in part, is the explanation of reduced	
ridership since Covid. Corporations whine about getting employees back into the office. They can just	
make it easier for employee transportation by helping achieve all the improvements to the metro	
system. If they want employees back, then they should help pay for it. Or is Metro afraid of the	
corporatists? lobbyists? Do this in DC and get your regional partners to do the same. In locations where	
buses are few and far between (set your own time limit), you need to provide low-maintenance	
benches. You never seem to think of the disabled or handicapped. Why don?t you show a comparison	
of the costs to contract out, versus bringing work in-house. Why take the risk of being gouged?	
Everyone knows business want to be close to MetroRail, why don?t you have a program that the real	
estate owners and businesses who want to locate near to you are required to pay you a fee ? at least	Operating Budget, Management and Spending
metro access/paratransit is a good idea but evry time I've used it, there are delays, no shows, I get to	
medical appointments late even with allowing extra time. I've found it very unreliable	MetroAccess
Metro authorities should prioritize reviewing their management and spending practices to optimize	
efficiency and cut costs. The lack of assistance from station employees and instances of fare evasion	
indicate systemic issues. Addressing these concerns requires reducing unnecessary expenditures and	
staff, ensuring resources are allocated effectively, and improving employee accountability to enhance	
service quality. Additionally, before considering fare increases or seeking additional funding, it's	
essential to demonstrate responsible financial stewardship and address existing operational	
shortcomings.	Operating Budget, Management and Spending
Metro Bus is very reliable and pleasant as a user I am satisfied with the service, with respect to the	
decrease in buses I would only like to be published in advance to the moment they make decisions so	
as not to affect any user, I return and repeat very satisfied with their service!!	Bus Service
Metro should teach people to pay the rate, not charge such a expensive rate so that people can buy	
their tickets. They are too many people who pass without paying and that is what affects the budget. In	
many stations there is no control and people are already customary not to pay, travel for free and also	
damage trains, buses, leave garbage, this also disappoints when using the service.	Operating Budget, Management and Spending
Metro does not need to decrease service or eliminate certain bus routes. This will affect workers,	
college students, other students and disabled people. Fare prices should not increase, unless metro	
plans on providing 24/7 service on buses and rail lines.	Bus Service
Metro is an essential resource that should be funded to its full capacity. Thank you for your efforts to	
collect comments and do serve the people of the DMV!	Rail Service
Metro is becoming too expensive to use on a normal basis. Its the same time/cost that it takes to drive	
into DC for work. If I had to pick, I would take my car, as I do not receive any subsidy from my	
employer. I understand that ALL public transit service across the nation ALWAYS run in the RED, but	
other cities/COUNTRIES do not look to reduce services or increase fares. In fact, many do not have a	
fare adjustment scale of prices depending on travel and instead just have one basic fee for usership. I	
would prefer a static user fee for riding the metro for one stop, or 15 stops, regardless of the distance.	
It is truly a shame that I will not look to take the metro in the future, as I enjoy the experience and	
hassle free ride. I have always raved about the DC metro and how great it is. I am afraid that I will not	
hassle free ride. I have always raved about the DC metro and how great it is. I am afraid that I will not consider this a great alternative for myself and/or visiting friends/individuals.	Fares/Fees/Parking
	Fares/Fees/Parking
consider this a great alternative for myself and/or visiting friends/individuals.	
consider this a great alternative for myself and/or visiting friends/individuals. Metro is doing a great job every day however without budget how can they provide better services.	

Comment	Category
Metro is essential to Ward 8. It is how my family travel around the DMV. Increased fares should keep	
the current status of our public transportation. Budget cuts would keep me from providing a range of historic adventures for my grandchildren. Going downtown to the museum are lessons best taught on	
person. Being a handicap person this is how I travel. I fo not drive anymore and none of my friends and	
family suited for my chair to travel in. Access to restaurants, historic figures, and parades. There are	
farms and wine vineyards to visit.	Operating Budget, Management and Spending
Metro is one of my favorite parts of DC. I think it?s important to continue to grow the metro system	
rather than cut the budget.	Operating Budget, Management and Spending
Metro is proposing cut service on the side of town where a lot of new developments are being built. I	
have lived all my life and plan to stay. I depend on public transportation with my fellow neighbors to	
get around the metropolitan areas. Please think about cuts especially when you are not affected	Dell Convine
because you drive. Thank you Metro is very important to the area and it is critical to quality of life.	Rail Service Rail Service
Metro is very important to the area and it is critical to quanty of me.	Rail Service
Metro Must demand that Jurisdictions be accountable for paying their fare share	Fares/Fees/Parking
Metro needs more funding. It is the lifeblood of the community and greater DMV area. People depend	
on it.	Capital Budget
Metro needs to be fully funded. Our politicians should not be ok with not funding Metro, and beginning	
a death spiral for public transit. WMATA has shows they can improve the system, and have done	
wonders with Randy Clark in charge. Fully fund Metro and let them continue to improve, bringing in	Constant
more ridership. Metro needs to have officers at the fare gates and ticket evaders instead of spending money for new	Capital Budget
gates that aren't fully effective. Also Smarttrip readers on busses don't work for the people that try to	
use them, and many people don't pay on the buses either.	Bus Service
Metro needs to make sure that passengers pay for their service. It seems that 90 percent of passengers	
are not paying fare whenever I used it.	Fares/Fees/Parking
Metro needs to take a look at cutting some of the senior positions salaries like the CEO and old GM and	
how much they are paying them. Don't go after the people who move the city and think it won't affect	
the whole system.	Rail Service
Metro provides fantastic bus and rail service in DC - and in the surrounding region that eases car traffic for those commuting to work and meets the needs of its low-income residents for travel to work	
as well as makes DC an attractive tourist location that a is very easy to navigate. Our local economy	
depends on this service. Cuts in this service will further problems with return to downtown offices and	
keeping our teams and other attractions downtown. Higher fares with support for low-income riders is	
a preferred option.	Bus Service
Metro service bus & train is my only way to and from work . I do not drive due to medical conditions.	Bus Service
Metro service is already pretty slow, expensive, and unreliable. I take it to commute and when possible,	
but the wait times and early closing are reasons it's no longer an automatic choice. If the service gets	
worse, I will probably just stay closer to home when possible and work from home a lot more.	Bus Service
Metro should enforce fare collection controls. Way too many jump the gates and don?t pay. Please	
invest more people towards this. Metro should have a set amount of funding it receives from the tri-state region and the federal	Fares/Fees/Parking
government. Ridership should increase if they lobby. for people to work in person.	Capital Budget
Metro should prioritize maintaining and expanding service in jurisdictions that meet their funding	
Iobligations to WMATA. You all are doing a great job, and I hope we can keep this service level! It allows

In my opinion, Metro likes to have constant threats to service cuts and fare hikes for the sole purpose of coercing more funding without budgeting accountability, knowing that most of the jurisdictions will eventually pony up more money. And then there's the legacy of lies. For example, when SmarTrip was introduced, we were promised 3-hour transfer windows, 1 ride debit allowance, etc., Run of that lasted very long. The 2-hour transfer window is especially annoying when trains and some bus routes (eg the R4) are constantly off-schedule and can easily add another hour to transit time; in 'the old days'	
me to live in a zero-car household in DC, which would not be possible with inferior service. Metro should use the land around the metro stations that goes for parking to instead more lucrative things like dense business, housing, and have some of the revenue go to them! Service cuts will mean more people use cars, leading to traffic and grid lock, road fatalities and waste. Disallow people from getting on bus if they don?t pay. Metro I don't know why no one there can properly read the room. I rarely take Metro anymore- and it's not totally about the rates, but let's start there. It's simply stupid that Metro constantly threatens to hike rates. Just a few months ago, Metro increased late-night service, and not long before that, Metro introduced the \$2 weekend fare; now, they're threatening to undo all of that. Did no one there do the math before it was introduced? It shouldn't take a genius to have read the writing on the wall and not s2 in the first place: If it needs to be \$2.50 now, it could've been \$2.50 then. In my opinion, Metro likes to have constant threats to service cuts and fare hikes for the sole purpose of coercing more funding without budgeting accountability, knowing that most of the jurisdictions will eventually pony up more money. And then there's the legacy of lies. For example, when SmarTrip was introduced, we were promised 3-hour transfer windows, 1 ride debit allowance, etc., etc. None of that lasted very long. The 2-hour transfer window is especially annoying when trains and some bus routes
