Metro has been so well recently and ridership increasing is a good indicator that people approve of	
what wmata is doing. If you cut service, ridership is only going to decrease even more, and that will also affect your next budget. I don?t agree with fare increases, but I am on board with creating some of tax	
that specifically funds wmata for the dmv	Operating Budget, Management and Spending
Service cuts make the system unusable, leading to downward spiral. Fix through fares, not service	
people will continue to use the system.	Bus Service
We need more funding from MD and VA	Capital Budget
Please don't cut services! Willing to pay more more good, safe Metro service. I know times are tough	
now but things will get better.	Fare Evasion/Safety/Crime
I ride the metro to work everyday. I take the bus from home to run errands daily. I will stop riding	
metro if fares are increased this drastically. I moved here to drive less. That's been very effective for nearly 10 years. I don't want to have to move	Bus Service
to drive less again.	Miscellaneous
I like the recent security and safety improvements. That should always be a very high priority.	Fare Evasion/Safety/Crime
Shame on Metro for threatening the public like this. WMATA is unreliable as is, so curious to see how	
you can make it worse.	Rail Service
Frequency cuts will destroy DC. All other options should be considered first. Station closures, turn	
backs, reduced hours are not ideal but tolerable if trains continue to run at good frequency when the	
system is open. Wealthier commuter; primarily take MetroRail Silver line from DC to VA for work. Strong preference to	Bus Service
maintain commute feasibility (cost and frequency) versus driving. Love metro rail; use metro bus only	
when no alternative	Bus Service
If I can?t get a train in a reasonable amount of time (already questionable) then there?s no point in	
taking metro at all.	Rail Service
I am so sorry for the shortfall. Rather than cut those to outlying areas like past Silver Spring to	
Glenmont, please consider cutting service in DC where there are more commuting options. Riders have	
limited options to go to outlying stations and if you cut service and raise prices you are essentially	
creating a negative incentive. We may as well drive. Thanks for operating such a lovely public transportation system. Hope partners will rally to meet the shortfall.	Rail Service
DCPS students depend on metro to get to and from school, and cutting heavily used routes such as M4	
would have a significant, detrimental impact on students going to and from Alice Deal Middle School	
and Jackson Reed High School. This would be a major disservice to students.	Bus Service
These services are relied upon by constituents across the board and socioeconomic standings. Public	
transit and walkable infrastructure, in combination with bicycle infrastructure and pedestrian safety	
measures are the only way that any city, let alone one of the Washington metropolitan area?s size, can	
even dream of becoming both environmentally responsible and reducing vehicular injuries and deaths.	
Access to such public infrastructure is at the core of the basic social contract that we as taxpayers and	
residents are entitled to, even at cost (drawing on funds built on both vehicular-based taxes such as	
emissions or otherwise, to funding that should be demanded of federal agencies and extra- state/district entities whose own representatives are part of this geographical community). While the	
political realities of the situation are dire given the district and WMATA?s organizational and	
governmental position, simply put, removing these entitlements, by extension leaving the social	
contract unfulfilled, will have massive consequences on the basic material conditions of this city and	
community?s residents in the long term, ranging from more limited economic mobility to an increase in	
car-infrastructure related casualties.	Fare Evasion/Safety/Crime
Please consider the affects of fare increases and station closures in relation to underprivileged areas of	
DC already.	Fares/Fees/Parking
My two middle schoolers take the M4 twice every single weekday. None of the kids are asked to swipe their cards so I?m sure your rider data does not at all reflect the actual need. Please please please do	
not eliminate it!	Bus Service
Keep services. Raise prices as needed. A robust public transit system is so important. Fight for dedicated	
bus lanes to improve reliability. If bus arrivals were more reliable they would be far more an attractive	
option, but we need to infrastructure to make it happen. Don't close metro stations, open more (infill)	
to increase density.	Bus Service
The m4 bus is the ONLY bus that services my neighborhood as the e6 had already been cut. Families	
depend on this bus for school travel and for work commuting. Cutting out the bus also cuts metro	
revenue. If this bus is cut, I would not metro to/from work.	Bus Service
Find a better way to serve the community in which these services are intended to serve. Cutting routes	
and increasing fares are making it harder for people to reach their job & home. People work all times of the day and night and barely can afford to get there	Bus Service
Find more funding. People want rail.	Capital Budget
As a commuter from Baltimore City, an area with no emphasis on headways and reliable bus service,	
I've seen in real-time that to people taking transit, timing is everything. More trains and buses running	
more frequently presents transit as a viable enough option to replace driving in areas where those	
things are plentiful. Waiting 15-20mins for a bus or train presents transit as a waste of tax dollars,	
frustrating, and a hinderance on someone's day, as opposed to what it should be - a useful tool. Cutting	
services on popular lines, especially lines where transfers are likely and necessary, will only lose	
WMATA more money in the future. Fare increases, while annoying, can and will be changed as the	
economy ebbs and flows. Loss of confidence in system will not. You lose that, you lose your metro	Rus Service
system. HEADWAYS HEADWAYS HEADWAYS! stop sending money to israel and run the metro as is. Give raises to metro staff. And make the public	Bus Service
stop sending money to israel and run the metro as is. Give raises to metro staff. And make the public transit system functional for all the people in DC who need affordable methods of getting to and from	
their jobs. Without metro some people cannot afford to go to work!! Uber is more expensive than what	
some make on one shift of work. Fix that!	Rail Service
Cutting any metro service should be a last resort and not a first option. Metro should instead focus its	
budget on maintaining high quality transit service and not building more lines or stations or procuring	
more vehicles. Metro should also work with local and federal partners to identify and implement a	
dedicated source of funding	Operating Budget, Management and Spending
One more helpful approach to the budget shortfall would be making sure bus fare machines work. I	
haven?t done a scientific study, but would say that about every one in four rides,I?m waived on	
because the machine isn?t working, as are the rest of the passengers. I?m also opposed to an M4	Operating Budget Management and Spending
shutdown. It is an important school route for students traveling to Deal Middle School.	Operating Budget, Management and Spending

My name is Jasper Wilson, and I was in top 1% of wmata users in 2023. Having the S2 run so frequently	
has helped me regularly this school year with my commute from 16th and Euclid to Blair high school on	
weekday mornings. Without the S2 running so frequently, I would have to pay really close attention to	
timing my commute in order to make it to Blair on time. Those 10 minutes would be difference	
between me getting to Blair relaxed, and with time to prepare for my first class without rushing vs.	
missing an S2 and hoping I get an S9 soon after. The transfer to Flashbuses at Sarbanes is often slow.	
Selfishly, less-frequent S2s would make my daily morning commute less reliable. Please reconsider	
cutting the frequency of that route. Best, Jasper Wilson	Bus Service
If I can	Miscellaneous
Do not cut the T2 line on River Rd. We will be left without public transport	Bus Service
If service is cut, the cycle started with covid of low ridership and thus lower revenue will restart, as less	Rail Service
people will be willing to ride metro. Each time Metro asks for money, I'd also like them to highlight ways in which they can improve their	Kall Service
stewardship of the funds they already have. When it makes the news that you let certifications for your	
operators lapse, it really makes me less willing to support unfettered spending increases. It's also a	
really bad look for a fare increase to go into effect when the eastern red line will have no service north	
of Fort Totten for the entire summer and into the fall. I used to commute solely via Metro to Metro	
Center and to Navy Yard, but will forego ALL trips to the downtown for the entire length of the red line	
outage. Combined with fare increases (I do not get commuter benefits) and exceptionally large travel	
times (Metro has not responded to a comment I left on Facebook about shuttle bus travel times from	
Glenmont to Fort Totten) in the summer, Metro is simply not a travel option for me.	Bus Service
Have there been studies done to show the impact that these specific changes would have on low-wage	
commuters and students who rely on public transportation but can?t afford fare increases or who work	
late? Wages and salaries are not increasing at the same rate as inflation or expenses. Higher income	
riders and tourists will always be able to choose other transportation options but the life and soul of	
metro are the daily commuters who need public transportation to get to work or school or daycare.	
The 10pm closure is especially concerning since that will hit students and lower wage jobs the most	
(UDC - DC?s public school - holds classes until 9:30pm during the week). Metro should be taking into	
account the needs of these demographics first and foremost since they are, by necessity or otherwise,	
the most loyal riders.	Operating Budget, Management and Spending
Thank you for all that you do. Public transportation should be FREE!	Miscellaneous
The whole point of a transit system is to provide connectivity throughout the network. Eliminating or	
reducing services greatly impacts the users of the system (especially lower income people who may be	
dependent on the system for basic needs, such as getting food or going to work). Decreasing service on	
a system that?s already considered by some inconvenient is a disastrous choice. Eliminating bus routes	
is completely unacceptable (two of them I use regularly, and was a factor in the location where I live).	
To hear about fare increases is frustrating, especially given the lower costs in other transit systems	
around the country and the world. And once again, it greatly impacts lower-income people. Overall I?m	
incredibly disappointed by these options and nervous about how I can get around in the future	Bus Service
Metro really should get more funding by MD and VA and not cut service to solve these issues. Metro is	
already INCREDIBLY expensive. Raising fares more is not sustainable.	Capital Budget
This is against the encouragement of in-person works. Please consider raising the fares rather than	
cutting the services.	Fares/Fees/Parking
The proposal eliminates the bus routes that I primarily take and would mean I do not use the metro. I	
do not want to uber, but I will not have a choice unless I decide to drive myself.	Bus Service
Increase station lighting and keep escalators and elevators in good order. Improve audio

If leaders are serious about Vision Zero, climate goals, and the other myriad benefits of reducing vehicle miles traveled, they should be giving the system dedicated funding. A tough stance on fare evasion is needed. Very often it seems that people have the means to pay but don't feel they have to. Also if there needs to be cuts to service it should be proportional to the states that are not contributing a fair share to the functioning of the system. Aka constituents in VA and MD should bare the majority of service cuts if they are not going to invest more money into the system. It should be considered to alter the buses in order to have more space for parents/guardians who board with baby strollers. I also highly suggest to consider installing any type or smoke/fung detectors because drug use has increased on both metro and metro buses. If find it an outrage that the nation's capitol has such an ineffective and overpriced metro. We deserve better than asking whether we want to pay more or not get to work on time. How dare you. Find a better way, I'm buying a bike. Monday-Thursday 5am to 11pm. Friday and Saturday 5am to 1am. Sunday 6am to 10pm Please reduce the weekend services not the weekday nor the rush hour to support in-person workers. We all realize this is a ploy to pry more money out of DC, VA, and MD govts. Please stop threatening it, no one believes you anymore. our poor budget officers are forced every year to put up this charade and then you get the money you are looking for after derailing a couple of trains. So this time I anw oting for shutting down all the buses. Do it. I dare you. Commont	Catagory
Comment Increase public funding of transit service please!! Thousands of people depend on itbut most	Category
importantly, the most vulnerable people in our region REQUIRE it to be able to live any decent life	
where we can work, travel, and participate in the community.	Capital Budget
Dude, this sucks.	Miscellaneous
Hundreds of us seniors rely on the N2 and N4 bus service, and I am deeply pleased that you have	
decided to leave the routes untouched. Losing Sat/Sun service on the N6 is a small sacrifice to make. THANK YOU FOR KEEPING OUR TRANSPORTATION LIFELINE IN PLACE!!!	Bus Service
Do not eliminate the M4. Our children need it to get to school	Bus Service Bus Service
Fare increase with daily fare cap	Fares/Fees/Parking
Don?t eliminate the T2 Route. I ride that bus to visit family, when I get a car fixed, and to get to kids?	
activities. I am writing to you today to express how vital the T2 Metrobus route is to our community.	
This is a vital for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus is the only reliable public transportation to this part of the County, which is critical for the	
County?s economy. This bus service is a crucial support for our area. Please consider all efforts to	
protect full T2 Metrobus for the many riders who require this service to get to work, school, and other	
activities. Thank you for your time and consideration.	Bus Service
The T2 route is essential to the Carderock Springs neighborhood because it serves as our only connector	
to public transportation in the DMV area. If we lose the T2 bus people without cars or no longer able to drive will be left with only pricey options to get around the area. This will not only impact seniors on a	
tight budget but also those people who provide essential services in our area and don?t own cars	
themselves or, for a number of reasons are unable to drive Perhaps this survey should include	
questions regarding the hours of most frequent use and then adjust the size of the equipment used to	
fit the ridership.	Operating Budget, Management and Spending
Cutting service in response to funding issues is a sure fire way to put metro in the transit death spiral. D4 and d8 are essential. D4 brings NE people downtown easily and d8 connects to Union station is	Capital Budget
invaluable	Rail Service
Metro is the lifeblood of DC. Any and all impacts to service, pricing, and schedules will immediately	
impact riders from the lowest socioeconomic backgrounds the most, and only trickle up the	
socioeconomic ladder from there. These are our often our essential service workers, but more	
importantly they are our most vulnerable community members, especially with staggering inflation and	
a nationwide housing crisis. Changes to metro will impact those individuals first and likely ripple out to dozens of other essential DC services and communities.	Rail Service
Do not cut service, do not cut service area, do not adversely impact Metro access, even if fixed route	
services change.	Bus Service
You're going to make the service worse AND more expensive??? This is insane. SEVEN DOLLARS? Are	
you kidding? Take the money going towards building those barriers over the turnstyles/paying for the	
security officers and use that. I already switched from metro to bus to commute to work even though it	
takes ~20 minutes longer because the rush hour metro price is simply unaffordable as it is. What psychopath thinks people are going to pay SEVEN DOLLARS to take one trip on the metro. This is	
insulting.	Bus Service
Increasing metro rates at a higher percentage than national inflation rate is frankly irresponsible and	
will lead to even lower usage of the metro system as well as an increase in rate avoidments. I advocate	
for public transit all the time and moved to a city so that I would not need to depend on my car every	
day. However, I will end my monthly unlimited pass if rates go up at the proposed 12.5%. The increased rate would no longer be financially feasible for me to take the metro to work.	Operating Budget Mapagement and Granding
More police officers in sight. Riding the trains. That?s how more riders will come back	Operating Budget, Management and Spending Rail Service

Metro needs more accountability as an organization. Rail Service	
I think it?s terrifying that so many cuts are proposed. I am already upset with not being able to get	
home safely by riding Metrorail during late nights. I?m a professional Urban Planner and I can tell you	
for a fact that reducing service will lead to reduced ridership, which will lead to an even greater budget	
shortfall. You?ll cause a negative cycle of disinvestment and will ruin one of the best transit systems in	
the world! Please, please do not implement service cuts. The only proposed change that is positive and	
in the correct direction is extending late night and weekend hours. Why build all this infrastructure if	
you?re not going to use it to its full potential? Operating Budget, Management and Spending	
The proposed cuts in service would cause even less people to ride Metro, which would make future	
budget deficits even worse! To attract more ridership and therefore garner more support for increased	
funding, Metro must maintain its model of excellence in transit for the nation. Traffic is already	
horrendous and reduced Metro service will only exacerbate that problem. Additionally, all of the	
development and investment around Metro stations will struggle due to reductions in service. This	
would be detrimental to our entire region; even for those who don?t utilize WMATA services. Operating Budget, Management and Spending	
Cutting the T2 bus will negatively impact our aging community as well as support service providers. Bus Service	
Your route decisions impact low income riders with limited commute options. Some of these	
individuals work in the service industry and your ections will negatively impact downtown businesses.	
Some of your questions are pointless as you have already eliminated some bus routes and cut rail Bus Service Bus S	
Please keep the T2 service along River Road in MD. It?s a critical service for me and others who need to	
use public transit. I also encourage Metro to work with the state of MD (since River Road is a state	
road) to improve safety by installing more cross walks across River Road (especially at Carderock	
Springs Drive and Fenway Drive) and reducing the speed limit from 40 to 35 MPH. It can be hazardous	
crossing the fast moving River Road. Fare Evasion/Safety/Crime	
I?m really disappointed. There are thousands of people working on low wages, how would all these	
people afford fare changes, service elimination. I think Metro should really think twice before adopting	
these proposals. Operating Budget, Management and Spending	
The local DMV and federal government should provide more to keep Metro afloat. It needs to receive	
the same TLC the local highways get. I'm grateful for your service that's what I rely on All my years in this country being a Foreigner what I Rail Service	
In graterin tor your service that is what reey on An ing years in this county being a rolegine what is see some bus rout are overstaffed and under staffed then they show up one after another not good	
Also the fare is reasonable enough for iders to pay after and not having to jump gate or bore in on	
your fare fare card these are people going work and other places i bet their phone has service ok the	
condition of bus and trains are filthy spit funkyness of homeless sleeping to and no seats are scornful	
contained of ball taking and taking bet analyzed an indexed accepting to the indexed accepting t	
due to Biden stupid decisions on freeing up give an inch thy take a joint every one getting so high and	
none smokers gasping for air not fair there's a place and time for everything under the sun clean Air bus	
and trains please I like that I can travel via this mode of transportation I appreciate it also some train	
cars could be less accounting to crowd and get cleaned up long time rider and oberserver THANK YOU Bus Service	
PLEASE DO NOT CUT SERVICEI We desperately need a functioning public transit system and if we	
continue to cut metro services we'll end up with an unusable system that will collapse due to no	
ridership. Our economy and society depends on reliable and efficient rail and bus infrastructure! Get	
Virginia to get its together Bus Service	
Fare evasion and non-working fare boxes on metro buses are a major loss of revenue. I frequently see	
many people not pay a fare on the bus and frequently the fare box does not work for those that do	
intend to pay. Resolving these two items would help as well with lost revenue Bus Service	
My employer pays my metro costs for commuting so increase away but offer discounted fares for	
people who need it. Seems like bus bunching is still an issue. Wait times matter. Bus Service	
I think metro lines to airports need to run earlier, especially on weekends. My husband is a pilot at DCA.	
We live in Pentagon City and it's ridiculous that he has to pay to uber to airport most weekends	
because metro starts so late. This is a commonly complained about issue on the DC and Nova	
subreddits, so clearly it's a big problem throughout the city. I also wish that the groups metro transit	
police who are standing around near the fare gates, sometimes grabbing people for fare evading, were	
instead patrolling inside railcars. As a woman who travels during off hours often, I never feel safe when I'm on the metro alone. Fares/Fees/Parking

have the ability to go with her friends to the town, as well as to go to her dance classes (at Dawn	
Crafton Dance Connection) independently. I was planning to take them again sometime soon, to the	
Friendship Heights subway stop, and down into DC, so they learn to use public transport a bit now that	
our older is reaching an independent age. I really hope the T2 bus line won't be cancelled. Doing so	
would cut off our whole community from the public transport system. I had not realized this was being	
considered until I heard from neighbors recently, nor that this line was thought to be insufficiently	
used. I would be in favor of increased fares if needed to support the public transport service, as well as	
improvements to access to the bus stops within our neighborhood (whether by WMATA or by our	
neighborhood) to make access easier for some of our neighbors. Thank you for reading. Bus Service	
Cuts to the Metro system (bus and rail) will hurt residents, visitors, and prospective residents. I moved	
here because of the public transit infrastructure; other young professionals will think twice about the	
DMV without a fast, safe, frequent, and reliable transit system. Bus Service	
Please retain the T2 route-it is important for my community and my own household specifically Bus Service	
Th M4 is the only bus that serves Deal Middle School and Jackson Reed High School. With no bus	1
service, there would be massive traffic increase with no infrastructure to support parent drop off and	
many kids who?s parents can?t drive them would be forced to walk long distance in all weather Bus Service	

Comment	Category
Eliminating metro bus routes, closing stations, and severely curtailing services like the options outlined	
in this plan will only cause Metro profits to continue to fall and hurt the population in the area who	
don't have the means to afford alternate sources of transportation, which in turn will bring significant	
financial inequity to the area. Leaving populations stranded without a secure, reliable means of public	
transportation is inexcusable.	Operating Budget, Management and Spending
The T2 line needs to stay, as it is the only way that people who don't own their own transportation can	
access those areas of town.	Bus Service
My teenage child takes the T2 to and from his public school every day, and when my child is on the bus	
there are at least a half-dozen or more students on the bus as well. There are also many long time	
workers in Potomac Village on the bus and who have no other way to access their jobs. Any cuts to the	
T2 line will hurt a lot of people. There are no alternative routes in the area. This is the only public bus	
that goes through this entire part of the county. We are surprised this is being considered as part of the	
cuts and feel like the number of buses in this region should instead be increased.	Bus Service
Metro service is a necessity for various types of people, including people with disabilities that rely	
heavily or solely on Metro to commute to work or school, doctors, grocery stores, pharmacy and social	
outings. Without service or a reduction of service lines or times the amount of people affected would	
be detrimental to DMV and the loss of independence for people with disabilities and others would be	
the cost of Metro's reduction or loss of service lines.	Fares/Fees/Parking
I believe bus stops need major improvement and that the inside of buses need better maintenance and	
cleaning.	Bus Service
Glover park residents rely on Metrobus to connect to the rest of the city. For senior citizens,,such as	
myself, eliminating the D2 line and shortening the 33 line would greatly restrict my ability to access the	
city. Having to transfer to Metrorail to get to frequently visited destinations would greatly reduce my	
willingness to use Metro. I would use drive or use a taxi service instead. Please reconsider cuts to	
Glover Park service!	Bus Service
Please don't cut the 96 bus line!	Bus Service
Improve your online apps: we want to see actual SCHEDULES for metrorail trains. Also, your online	
account app should be more accurate & be in sych with what we see on the turnstiles; at present, they	
are NOT in sych. Example on the first point using TripPlanner: if I want to see the train time that's later	
than 6pm but earlier than 6:15, I would like to see the schedule shown on screen instead of guessing	
	Rail Service
what time to enter in TripPlanner.	
Please consider needs of intermodal riders that make MARC train connections in Rockville. rush hour	Rus Service
service cuts on red line will make it more difficult to make necessary connections	Bus Service
The worst idea is to close the station at 10pm. This would cause so many issues with travel within DC.	
There are numerous concerts and events that get out past 10 and you would be disservicing thousands	
of people.	Rail Service
I take the H8 route to church every Sunday and the bus includes many other passengers, a great deal of	
them elderly. I oppose weekend service cuts to the H8 for this reason,	Bus Service
I believe that eliminating the 96 Metro route will heavily impact access to the Washington National	
Cathedral for folks that live outside of the 30's route. Additionally, the only access that the folks	
utilizing the 96 route would have to the location would be to ride the red line to Tenleytown and either	
walk (around a 20 minute walk) or take one of the buses down to the Cathedral. As an advocate for	
ADEI, I believe that this heavily contradicts what we should be doing - which is make locations and	
spaces more readily available.	Bus Service
Metro is an essential service. Please do what you can to maintain service, especially to more	
socioeconomically disadvantaged areas.	Rail Service
The slider on the previous question about making changes through fare increase or service cuts was not	
clear to me. I was trying to indicate that I would much prefer fare increases over service cuts.	Bus Service
Whatever you all do, please remember you're a public service, not a tool for the wealthy. Everything in	
DC goes towards making the city a playground for the wealthy, metro included. Working people need	
the train at unpopular hours.	Rail Service
Cutting service and raising rates will only make the situation worse as you make driving more	
attractive, further decreasing ridership and accessibility to those most in need. The money saving	
proposals you've put forward look disaterous. Please figure it out, this is such a fantastic system and	
one of the reasons I moved to the area.	MetroAccess
Please do not close metro stations	Rail Service
The N2 and N4 bus lines service a densely populated corridor that runs from AU through Cathedral	
Heights along New Mexico, Cathedral and Massachusetts Avenues. This area is home to many students	
and elderly residents who rely on Metrobus for some or all of their transportation. Do not cut or reduce	Rus Service
these lines.	Bus Service
I think being presented with worse service and/or higher fares is a lose-lose situation. I hope the DMV	
governments provide y'all with the necessary funding because pushing those problems onto riders	Conital Budget
hurts everyone. I love metro and would hate to see it get worse The Metrobus T2 route is the only public transport that links our Carderock Springs neighborhood of	Capital Budget
about 500 houses to both the Metro subway system at Friendship Heights and Rockville stations, and	
to Rockville town center, which is the closest urban area with restaurants, shopping centers, gyms,	
coffee shops, etc to our neighborhood. Our neighborhood is full of teens and young adults, as well as	
seniors. This bus route provides essential mobility to not only families but also independence to our	
young people and seniors. Just the other week I took my kids, who are 13 and 9, to Rockville Town	
Center on the T2 bus, to get them accustomed to being having this option, and for our teenager to	
have the ability to go with her friends to the town, as well as to go to her dance classes (at Dawn	
Crafton Dance Connection) independently. I was planning to take them again sometime soon, to the	
Friendship Heights subway stop, and down into DC, so they learn to use public transport a bit now that	
our older is reaching an independent age. I really hope the T2 bus line won't be cancelled. Doing so	
would cut off our whole community from the public transport system. I had not realized this was being	
considered until I heard from neighbors recently, nor that this line was thought to be insufficiently	
used. I would be in favor of increased fares if needed to support the public transport service, as well as	
improvements to access to the bus stops within our neighborhood (whether by WMATA or by our	
neighborhood) to make access easier for some of our neighbors.	Bus Service
Metro parking should be free. You have giant, empty parking garages. Charging for parking	
disincentivizes using metro and incentives taking up nearby free parking that should go to other drivers.	
The Vienna parking garage is NEVER more than 10% full but people are parking on the street!	Fares/Fees/Parking
I generally prefer reduced frequency on MetroRail to any other types of service cuts.	Bus Service
Service cuts would just make the city more crowded with cars and result in more problems.	Bus Service
More efficiency no way 2 buses or trains should be coming back to back while they isn't anything going	
More efficiency no way 2 buses or trains should be coming back to back while they isn't anything going the other way.	Bus Service

Comment Good morning, Please do not, under any circumstance, eliminate bus route T2. I live in Carderock Springs and it?s my only lifeline as far as public transportation is concerned. Note that the Walkability access to amenities) index for our neighborhood is only 11/100. So you know that cars or public transportation is required to do anything outside the community (groceries, doctors appointments, work, school, etc.). Many users of T2 cannot drive. Besides, it would be extremely costly to drive and	Category
Springs and it?s my only lifeline as far as public transportation is concerned. Note that the Walkability access to amenities) index for our neighborhood is only 11/100. access to amenities) index for our neighborhood is only 11/100. So you know that cars or public transportation is required to do anything outside the community (groceries, doctors appointments,	
transportation is required to do anything outside the community (groceries, doctors appointments,	
work school etc.) Many users of T2 cannot drive Recides it would be extremely costly to drive and	
park at Friendship Heights metro all day. If that?s metro you take to work downtown. Also note, pleas	e
that our neighborhood has a higher than average number of seniors, i.e., 23 + %. (Average is 17-18%).	
Most seniors I know in my neighborhood can no longer drive. And they are dependent on caretakers who arrive by bus. I would prefer a fare increase rather than elimination of this vital T2 route. Please	
reconsider its elimination. Thank you!	Bus Service
Thanks for trying your best to navigate the hostile politics of the neighboring states.	Miscellaneous
By cutting the 96, the D6, and the X8, Metro would be cutting three of the only bus routes that go	
through the north-eastern parts of Capitol Hill and connect parts of the city east of the river to the rest	
of DC	Bus Service
I'm handicapped & take MetroAccess to get to my medical appointments. MetroAccess is critical to mu because I have no other way of getting to medical appointments. I usually get picked up between 6:00	
am & 8:00 am in the morning & return anytime in the afternoon.	MetroAccess
After unsuccessful attempts to part at Wiehle-Reston metro, for which I had to pay to exit, I gave up o	
parking at your facilities and my husband now drops me off; there is no convenient bus service	
between my home and your stations. I balance the cost and time factor of taking Metro against the	
cost of tolls on the Dulles Toll Road; Metro takes longer, but cheaper, driving is shorter and more	
expensive. Then again, I'm not your core customer, the person who commutes regularly and needs a	
decent bus service to survive. Thank you for the chance to comment. My children rely on M4 to go to/from school. How come the city consider eliminating this route?? Is	Bus Service
there a plan for school buses?	Bus Service
Keep the T2 in Maryland. Many people use it to travel to and from work	Bus Service
I think bus service should be preserved particularly. Buses are cheaper and they run to more areas in	
the city that the trains don?t reach. Increasing bus service could help people adjust their schedules to	
accommodate for increased prices or delayed time on metro rail. So many people rely on the bus	
service? I take a bus nearly every day. Either way, I think it would be a terrible idea to raise prices or cu	it
services on BOTH metro rail and bus. One had to compensate for the other or no one will use either and you?ll fall into a deficit spiral and everything will fall apart. PLEASE keep the trains open past 10pr	
on weekdays. That?s so early, and frankly cutting off the train option is VERY UNSAFE because more	
people will choose to walk home later at night. Women, particularly, could face increased risks.	Bus Service
I am writing to you today to express how vital the T2 Metrobus route is to our Potomac Maryland	
community. This is a vital route for many individuals, businesses and families to access Potomac and	
Bethesda. The T2 Metrobus is the only reliable public transportation to this part of the County, which	is
critical for the County?s economy. This bus service is a crucial support for our area. Please consider all	
efforts to protect full T2 Metrobus for the many riders who require this service to get to work, school,	Due Camilan
and other activities. Thank you for your time and consideration. Susan Garcia The problem isn't Metro. The problem is cars on the road. We need to charge tolls for driving on ALL	Bus Service
major thoroughfares in the Metro service area. We should subsidize Metro, not driving.	Fares/Fees/Parking
The proposed cuts will affect my neighborhood of Glover Park. We currently only have the D2, the 31	
and 33. That's it. We're not near a train. We rely on those buses to get us to other parts of town and/o	r
to Metro rail stations. Not everyone has an option to bike, drive, or walk, and cabs are expensive.	
Personally, I have those options. However, many people who depend on a robust public transportation	
service. Improving our public transportation will go a long way to keep our city safer and cleaner. How	?
Less car traffic! If anything, we should add MORE public transportation options. Please rethink the proposed cuts to service.	Bus Service
I would prefer fare enforcement to fare increases and fare increases to service cuts.	Bus Service
Metrobus is essential to many people in this city. The budget problems are extreme and the	
municipalities/states should be supporting you more. Until that time, fare increases are definitely	
required to ensure service continues. I do not have a car; limiting my metrobus options means I do not	
get to important things throughout the city, thus driving down weekend revenue. Please consider	
raising fares instead of changing/eliminating routes.	Operating Budget, Management and Spending
The buses already don?t run nearly often enough. Public transit is all but completely unreliable here. Metro needs to concentrate on the lines they have now, instead of trying to expanded other lines, the	Bus Service
also need to start cleaning the trains more, stop hiring lazy people, stop letting people jump the gates,	
ride metro Monday thru Friday, starting from New Carrollton to Farragut West, the service is terrible,	
the trains are nasty, and they are not doing anything about people jumping the gates, but want to go	
up on the fares, that's why they are loosing so much money, people are jumping the gates at New	
Carrollton station all the time, it's sad, if I could get to work another way I would. 'METRO	Fares/Fees/Parking
I am dismayed by the proposal to eliminate the 22A and 22F routes that service South Fairlington. I bought a house here 14 years ago and have lived in the neighborhood 17 year in large part because of	
bought a nouse here 14 years ago and have lived in the heighborhood 17 year in large part because of the accessibility of Metrobus. Our service has been cut and chipped away and become even less	
reliable over the years and now I'm being punished for using public transportation. Already the 22A	
has been extended to make the ride much longer. I'm truly outraged. The rug is being pulled out from	
under us and all you're doing is going to push people to use more cars. It should not be this hard to ge	t
to a Metrorail station. This is a large part of your own doing, too. Making service so infrequent and	
inconvenient that people ride less and now you have an excuse to eliminate it. With these changes,	
there will be no bus that services South Fairlington, a community of thousands with many people who work in the city. At this point, the closest antions are over in North Fairlington with the 7A a good 2/A	
work in the city. At this point, the closest options are over in North Fairlington with the 7A, a good 3/4 to1 mile for the farther ends of South Fairlington, or the DASH 36 bus, which is slightly closer but only	
runs during rush hour. Walking up from Shirlington for the ART buses? It would add at least 20, likely	
more, minutes to an already 40-minute commute (on a good day!). Not feasible. Just to get from	
Arlington to downtown D.C.! Sending people to other bus stops is less than ideal for people who	
cannot walk that far for health reasons or have a lot to carry or in inclement weather. Or who want to	
get home in any reasonable amount of time. I am sitting here and actually wondering how I can	
conceivably make my commute work. We have one car. We're not driving it into work every day to sit	
conceivably make my commute work. We have one car. We're not driving it into work every day to sit in traffic and then in a garage, and it needs to be available to get my kid from school. Figure something

PLEASE do not cut the 52 it is so crowded as is Bus Service	
The weekend flat fare and weekday after 9:30pm flat fare of \$2 should be retained. Additionally, Metro	
should promote its monthly passes more so that people are paying more to Metro ensuring that fares	
are captured but also so the riders are getting better value. If headways are increased to 15-20 mins on	
the Green Line, then the Yellow Line to Greenbelt needs to be restored. The uptown Green Line	
stations like U Street/African American Civil War Memorial/Cardozo, Georgia Ave-Petworth, and	
Columbia Heights have experienced massive growth, and running six car trains every 20 minutes on the	
weekends will result in crush conditions without the Yellow Line. Fares/Fees/Parking	
I live in neighborhood that feels isolated, no close amenities. We are considered to have a walkability	
score of 11/100. I often see neighbors walking to use the Metrobus, including a young man with autism	
and a young woman with Down?s Syndrome. This is a direct service to them to provide independence. We also have more than the average community?s number of elderly that may not be able to drive	
themself. We have many people who come to the neighborhood to provide home health and other	
unemeen. We have many people who come to the neighborhood to provide nome nearth and outer services via the metrobus. Although I don't have a current need, I see and support the value in having	
Services via une merodous. Autologi i dont i nave a cument neco, i see and support die value in naving increased transportation access and know that one day, i will likely use it myself. Bus Service	
The previous question about how to address budget shortfalls did not include the most obvious option:	
force Maryland and Virgina to pay their fare share. Operating Budget, Management and Spending	
Don?t cut the 22A or the 22F - Fairlington needs reliable bus service for commuters to connect with	
Metrorail at the Pentagon Bus Service	
Please don't reduce service. 20-30 minute wait times would absolutely kill the metro. I love public	
transit, and even I would struggle to wait that long with any level of frequency. I would much rather	
pay twice as much than wait twice as long. Also bring the Yellow Line back to Columbia Heights please Bus Service	
We cannot stress enough how valuable this T2 MetroBus resource is for the Carderock Springs	
community, both owners, renters and employees. If the route is eliminated, it would mean that	
WMATA and the State of Maryland have taken away a tool that we use to recruit and retain top talent to provide hospitality to you each and every day. Bus Service	
to provide hospitality to you each and every day. Bus Service If these cuts are made it would automatically decrease a lot of metro riders use of the metro. Rail Service	
It these cuts are made it would automatically decrease a lot of metro riders use of the metro. Rall service It?s not feasible for everyone who takes the 22A and 22F to take the 7A if those routes are eliminated.	
At minimum, it's a 10 minute walk between the closes 12A/22F to pard much longer for the further	
As immunding it is a 10 minute waik between the closes 224/21 stop and much longer for the further stops.	
I wantvo say that I appreciate the high quality of service that the metro provides abd I appreciate all of	
the workers that make it possible! You set an example for the rest of the country! Thank you Rail Service	
I use Metro Access for different kinds of trips including going to work, to the doctor, and to the gym. I	
would rather that the Metro Access fairs would be increased as opposed to Metro Access service being	
cut. MetroAccess	
Fare rises are better than service cuts. Bus Service	
Metro shouldn't punish riders who always pay their fares for those who evade fairs and contribute to	
the budget shortfall. Raising prices on those who pay is not the right thing to do. Maybe you should let	
your station managers or guards actually do something about those who jump the turnstiles. Operating Budget, Management and Spending	
PLEASE KEEP THE T2 BUS ROUTE INTACT Bus Service	

Comment	Category
22A and 22F are the only bus lines near me. I take those buses to work, metro, and church. I do not have a car. If those bus lines are removed I will have to rely on cabs and ride share apps which will be	
incredibly burdensome. The 22A and 22F serves the Fairlington community, many of which rely on the	
buses to take them around the area or work (large pentagon employee community).	Bus Service
Please don't eliminate buses, NOT everybody likes metrorail	Bus Service
I take the M4 every single day and to not have it would drastically change my life. I even wish we had it	
on weekends. Same goes with the L2 and any shortening of that route. I depend on that bus, as do many others who don?t live off the red line.	Bus Service
Please keep the following routes openR12, F1, F8, C2. Also, keep the following stations open All	
stations leading up to Gallery Place Chinatown from the Green/Yellow line, as well as keep Cheverly	
open.	Bus Service
The news reported that METRO is losing millions annually because of individuals not paying for bus rides. Simply expand the system to require payment from everyone. Why should honest individuals	
receive inferior service because of the actions of dishonest ones?	Bus Service
The T2 is a much needed route to service areas where many service people need to get to work-	Bus Service
Where is the plans to reduce staffing and any bonus structures in place for leadership? Is it possible to	
know what internal financial changes were made before taking these drastic measures.	Operating Budget, Management and Spending
Our Public Transit System Is Essential To Our Communities And To Our Economy !! Adequately Publicly Fund Our Public Transit System In The DC Metro Area !! Instead of implementing service cuts and	
instead of implementing price increases, Allocate More Federal/State/Local Government Revenues To	
Fund Improved Public Transit !!	Bus Service
Service cuts will result in a transit death spiral and kill the system, and subsequently the city.	Bus Service
Our neighborhood is far from any services or grocery. There are no sidewalks. We rely on the bus to get food.	Bus Service
I really believe that Metro should consider not cutting these resources for riders who primarily if not	Bus service
some move to locations because of the accessibility to move through out the DMV. If the buses are cut,	
rail turns back around and doesn't show up, or paratransit is not available that takes away the	
livelihood of my family member going to and from work. That is a problem.	Bus Service
I think Metro should consider cutting executives' salaries since all these cuts and fare increases affect hardworking people who also work nights and weekends.	Fares/Fees/Parking
Please retain the existing bus network, it's really critical to keeping the city connected. I'll give you an	
example - my parents are refugees from Ukraine, they don't drive or speak English, and have depended	
on the D6 bus to connect them to the farthest parts of the city where Metro is not an option. Their	
mobility would be hugely affected without this service. Lots of people in DC, including myself, can	
afford pay more for public transit. So long as we keep safety nets or subsidies in place for the poorer commuters, hopefully we can find a balance without losing existing services.	Bus Service
Please consider the elderly who live on fixed incomes and depend on busses to get to grocery stores	
and medical appointments during the week and have to wait to make a connection to get where they	
are going and are afraid of travel at night.	Bus Service
I am a power wheelchair user who needs Metrobus and Metrorail to be available to me whenever I wish to travel. I use MetroAccess as a backup plan. I need bus service to be available when Metrorail	
elevators are out of service. Just because I frequent certain service areas right now does not mean that	
I won?t go new places served by WMATA services in the near future. Service cuts especially earlier	
closing times for Metrorail and Metrobus absolutely make me want to cry!!! I work full-time and	
primarily want to go to out to theaters and restaurants with friends outside of work time. Lots of	
theatrical events don?t end much before 11 pm. I also have to allow extra time in the event of Metrorail problems including elevator outages.I won?t be able to do anything but go to work if these	
service cuts are implemented. I can?t drive and I don?t think that there are many wheelchair accessible	
taxi or ride-sharing services available to me. I will become a shut-in significantly disabled person	
without good and reliable access to transportation. None of my family or friends own a wheelchair	Bus Service
Please do not eliminate the buses, many people who cannot afford cars and need them for doctor appointments as well as work and for groceries rely on the bus. The most underserved populations rely	
on buses and are a lifeline in their communities. It is preferable to increase fares than eliminate services	
or routes of reducing hours	Bus Service
Are there not budget savings you could make by having better contracting procedures and controls?	
Plus, why do riders of Metro Access pay less than people who take rail or bus? Should they not pay their cost or if subsidized, only subsidized to the same fares as rail?	Operating Budget, Management and Spending
Please do not cut service.	Service Levels
M4 bus addresses critical transportation needs for our Deal and Jackson Reed student population.	
Removing that route would increase cars on the roads taking kids to school causing more	
traffic/congestion on the roads. And without other transportation options parents would have to figure out how to get kids to school.	
Get your operating expenses under control. Metro can?t be everything to everyone, so do what you do	Bus Service
best for the greatest amount of riders and stop expecting the local taxpayers to bail you out when you	
try to do everything.	Rail Service
Please beg for more money for the government?s so that these cuts don?t need to happen!!!	Miscellaneous
many people use metroaccess to get to and from work, as I have done for years and addition, it?s often the only medical transportation available on a non-emergency basis. Do you think you?re saving money	
by cutting the service but the overall situation will cause a reduction in taxes when people with	
disabilities, can?t get to work and can?t pay taxes because they lose their jobs. that he would cut the	
service is unconscionable especially since you already cut the service a few years ago because of a	
MetraRail accident that had nothing to do with metroaccess. Stop making metroaccess pay for cuts and other services. Anything else is discriminatory to people with disabilities.	MetroAccess
No turnbacks! People paying the most for fares will get less service.	Fares/Fees/Parking
Please do not cut late night service. I have been in unsafe positions from being stuck at someone else?s	
home because the metro stopped running at night.	Bus Service
In my mind, since all of the jurisdictions and the feds won't pay their fair share, I think Metro ought to	
go up a considerable amount, or an amount commensurate with other transit systems on the east coast, and ensure riders that there won't be another fare increase for at least two years, and that the	
transfer time between buses be returned to 2 hours if not increased to 3 hours.	Bus Service
If you remove T2 line, I won't be able to go to my work. I'm making my wages by using this line. Take it	
away and I have to look for new job and it's not fair! I love where I work and I need to take care of my	One section Durlet's Management and Cronding
family by working there. If you cancel some of these routes, you?ll have to provide school buses for DC school children.	Operating Budget, Management and Spending
Cancelling them would eliminate transportation options for kids.	Bus Service
Cancening them would emminate transportation options for kids.	
Please don't get rid of the 96 or N2/N4 weekend service! I use those a lot.	Bus Service

Comment	Category
An efficient, reliable, safe and affordable public transit system is an essential service for any self	
respecting city. More so for a city that if viewed by many, when convenient, as 'the capital of the free world'. However from all the cities that I visited, many in less affluent countries, none has a bus system	
as dysfunctional as in Washington DC. I'm excluding of course the very professional and pleasant	
women and men that drive the few busses that are still in circulation. Basically I put all this buss service	
reduction debacle on the leadership of the transit system and the elected officials that are supposed to	
have some level of intertest and oversight.	Bus Service
The T2 bus (Maryland) between Rockville and Friendship Heights is necessary especially to the service	
employees and workers in the Kenwood Station Shopping Center and the newly opened Westbard	
Square (Giant) building. In the next two years at Westbard Square there will be a 6 story mixed use	
rental apartment building and 75 townhouses. Another 27 townhouses and a 6 story Kensington Senior Living Center will be completed within a block of the T2 stop at River Road and Brookside. Montgomery	
County is also in the process of talks to develop River Road from the Beltway to the DC line. T2 is and	
will be an important way for people to get to work, sometimes the only way.	Bus Service
Please keep it open at nights. It?s by far the safest way to travel at night	Fare Evasion/Safety/Crime
Please don?t shut down stations. As is, there are locations within D.C. that are extremely metro	
inaccessible, and closing stations would only make the situation worse. It also seems like an incredible	
waste to have functioning stations sit idle.	Rail Service
I ride metro rail almost exclusively instead of metro buses because I find metro rail to be more consistent and I believe metro rail to be more environmentally conscious. I believe that most	
individuals prefer metro rail over bus. I believe it would be extremely detrimental to ridership to reduce	
rail service. Consistent service is critical to metro rail ridership. Additionally, I believe metro rail should	
take additional steps to improve fare enforcement as I often see individuals avoid payment by forcing	
their way through turnstiles. Ensuring fare enforcement may bridge some of the budget shortfall. That	
said, I would be willing to pay more per ride to ensure consistent rail service.	Operating Budget, Management and Spending
Jurisdictions must step up to provide sufficient funding for Metro to be able to provide service needed	
by residents who do not have/cannot afford other options. Metro is a critical transportation option in this area. Its services have major impacts on traffic	Capital Budget
congestion and the business hubs.	Bus Service
The previous screen of the survey was inaccessible to screen reading access technology. I do not believe	
I correctly gave an answer to the question. I would be disappointed to see service cuts to the system.	
Also, I would like to see changes in the train stations themselves having verbal announcements of when	
trains arrive. As someone who is blind, it is extremely difficult to be able to tell where to get the train	
and what train is arriving at what time. This information is visually shown on the signboards. It should	
be provided audibly to those who cannot see the information. Because the train station do not have	
this available, I do not ride the train as much as I would if the information were provided. I should not have to use my phone to get the information. The information should be provided in the environment.	
Also, taking out my phone in the train station may not be a safe thing to do at certain times. I would	
also like to see improvements of stop announcements when I am on the train. It is often very hard to	
hear that information and I also don't ride the train as much as I would now if that information were	
clearly communicated. It is stressful not to be completely sure when my stop is coming along my	
journey and wonder if I will be able to know when it is time to get off. I really would like to take the	
train more than I do now, but currently, I do not feel that I can do so safely.	Service Levels
Keep the M4 Keep the M4! It is critical for students at DCPS!	Bus Service Bus Service
We need to increase funding for Metro	Capital Budget
First get everyone to pay. Many people just jump over the fare gets. Get enforcement. Also streamline

If we decrease the amount of service by cutting lines and increasing wait times we will only further decrease the use of public transit which is bad for traffic, the environment, and our communities. We need a robust public transit system! Middle school and high school kids take the M4 bus to and from school. This bus is a necessity for Closing stations should be the last possible option. It will decrease ridership further and have a	Capital Budget Bus Service Bus Service Bus Service Fare Evasion/Safety/Crime Bus Service Fares/Fares/Parking Bus Service Bus Service Bus Service Bus Service Bus Service
covering for each other? We need a funding stream that doesn?t force these choices on the city?s most vulnerable populations. Metro?s proposals cut all service to Glover Park. I don?t understand what we?re supposed to do or how we?re supposed to get to work if Metro cancels the D2 line and reduces service on the 31 and 33 buses. Bus service on these lines is already so slow and infrequent that it is difficult to commute on. I guess I would have to move or start driving to work? Taking away the D2 would also mean I would have to walk 25 minutes to reach the closest bus, and would have no way to get to DuPont circle or the Red Line in under an hour. Our children rely on the M4 bus every single day. Since DCPS provides no school busing and we are not able to drive them, and the Metrorail is not close by, they would be left with no options other than a 1 hour walk each way to and from school, which would negatively impact their education. Fare increases in the absence of fare evasion enforcement is unacceptable Later weekend hours is HUGE. People generally leave on weekends around 2:30 and 1:00 closing is not good Please ensure that families are aware of programs if they cannot afford metro fares. If we decrease the use of public transit which is bad for traffic, the environment, and our communities. We need a robust public transit system! Middle school and high school kids take the M4 bus to and from school. This bus is a necessity for Closing stations should be the last possible option. It will decrease ridership further and have a detrimental effect on whole neighborhoods.	Capital Budget Bus Service Bases/Fees/Parking Bus Service

Comment	Category
WMATA needs a complete overhaul of management & the board. Metro was a hot mess before the	
pandemic. Covid simply exposed how much of a mess. There are many very safe, efficient, well-run	
public transportation systems in other parts of the world. What are they doing right? Perhaps hire the	
people that are running those systems? Something, other than pr spin, has to change for WMATA to	
remain relevant. Otherwise, people will continue to choose to drive vs using Metro. When taking	
metro, rail or bus, takes 2-3 times longer than driving people will choose to drive. It?s simple	
economics?time is money.	Bus Service
Do not cut operating stations, increase fare or reduce trains/frequency but keep all stations	Bus Service
I?m disagree with proposals. This will effect people who work or visit family overnight. The increase	
may also affect people who income in low and can?t afford the increase. I understand the need for the	A Provide and a second s
changes however I look at the peoples needs more. The proposed service cuts will harm many groups that already face barriers, including people with	Miscellaneous
disabilities. The social costs of these cutsthrough such channels as higher unemployment, reduced	
income, increased isolation, and worse health accesswill almost certainly outweigh any budgetary	
savings. These social costs will also spillover into many other areas of community life and reduce the	
qualify of life for everyone in the DMV area.	Operating Budget Management and Sponding
Public transportation, even marginal routes, is important to help under served communities	Operating Budget, Management and Spending
transportation, even marginar ouces, is important to help under served communities transportation needs and to reduce environmental impact of gas-powered car use. Also, what kind of	
world leader are we, if we can't keep a decent public transportation system going in the DMV area that	
has frequent and convenient service and that is safe and clean!	Rus Service
If the reason for increasing fares stem behind individuals not paying for metro, increase police presence	Bus Service
and blockades at metro stops. We need a strong system to ensure we reach our destinations on time	
for those who always use public transportation, like me.	Fares/Fees/Parking
I think increasing the base fare is fair - and in line with other cities. What I most object to is raising the	
maximum fare to such a high rate: \$7.50 is ridiculous. The difference between base and maximum fares	
are too wide/great. In addition, fares shouldn't be based only on distance. NYC has a flat fee for all	
fares, regardless of distance. It's not fair that the base fare (\$5.50 round trip) is so drastically different	
from the maximum round trip of \$15. \$15?!! It's ridiculous to have a subway that's priced more like	
Amtrak or a commuter rail than a city train.	Fares/Fees/Parking
Low vision client??	Miscellaneous
The fares need to seriously be in consideration of being reduced not increased!! Bring back the old fare	
prices if not lower but certainly not an increase in fare prices! As they are far too high for those on low	
income or low class. Most of us are already struggling to pay rent, afford utility bills and groceries let	
alone metro fare. It cost \$300-\$400 a month on bus/metro rails getting back and forth to work daily!	
Not including doctor appointments etc. That?s the monthly price for some cars and insurances! I	
should get a car at that point but can?t! That leaves most of us literally living paycheck to paycheck as	
we have nothing left nothing in checking or savings. The rich get rich and the poor stay poor! Virginias	
minimum wage of \$12 vs the cost of living? The minimum wage before was \$7.20!! Most make 20-30k	
and plenty of people who make less than that (5k -15k), and average income needed to live in VA	
45k,65k, or more. DC/MD you need to make 35k-50k a bit more flexible but still most can barely afford	
to live let alone paying \$300-\$400 for metro fares. I?ve moved 6 times since 2020 as it?s hard to afford	
living paycheck to paycheck! The new gates will not stop people from fare invasion as the fare is simply	
too high for us to afford. Lower fares seems like a better solution not fare increases and new gates !! As	
for service changes I can agree you can reduce service as having the Fairfax connector for most routes	
run from 5 or 6 am well until 12 am or 4 am is quite much as they don?t get the time they would like to	
rest and or spend time with their families, the Fairfax connector should stop running same time as the	
Rex bus or other metro bus routes, 12am at the lastest and they should get holidays off if requested	
without penalty or anything. Service should certainly be reduced on holidays so they can spend time	
with their families. The Fairfax connector buses could use an update or upgrade to seating	
arrangements and personally seating on all buses should be replaced every few years as they collect a	
lot of germs and dirt and dust and the pretty patterns don?t hide them all. I have a video of my friend	
hitting a seat with her foot and you can see dust, dirt and debris just lift off like smoke and that?s very	
disgusting! I see people put down news paper or plastic bags before sitting down as you don?t know	
what you can carry home. Security measures should be put in place for Fairfax connectors as the buses	
get pretty dirty especially the 171 on Richmond hwy and people disrespect the drivers simply doing	Bus Service
Stop wasting money on saloon door fare gates. Those millions of dollars could have been much better	
spent. People who want to avoid fares will find a way - money from fares is a small part of WMTA?s	
budget anyway. Focus on creating more frequent and reliable services to attract ridership. Service cuts	
now, when ridership is increasing, is a bad idea. Also stop paying cops to patrol the Metro. They don?t	
do anything useful.	Operating Budget, Management and Spending
As a DMV native I have been using the Metro since I was able to recognize I was on a train or a bus (2	
years old) I am now 23. It would be a huge inconvenience and a slap in the face to the citizens you	
serve to cause such major changes to your rail/bus system. Hopefully you can find other solutions that	
don't put Black/Brown communities at a higher disadvantage with these changes. Hopefully you can	
find solutions that will try to meet your customers 80% of the way. Hopefully the committee can learn	
to empathize and come up with better solutions to fit the everyday working man and woman,	
students, etc.	Bus Service
please protect service for those of is who live in the city? we need Metrorail at all stops all days of the	Dell Care for
week. Ears increase will help WMATA more since many federal employees reseive transit henefits. Cutting	Rail Service
Fare increase will help WMATA more, since many federal employees receive transit benefits. Cutting	Fares/Faas/Darking
service means people will be driving more to work.	Fares/Fees/Parking
I'd suggest reducing the frequency of busses from 5 times an hour to 4 times an hour. The S2, 42/43, and L2 are all important busses for areas that are not linked to the city through a metro	Bus Service
rail station, with many people living in NW also working around Farragut Square. Also, people are not	
taking the Metro rail as often because of crimeinvest in better security cameras and policing.	Bus Service
	pas service

Comment	Category
MetroAccess? policy of having to be 3/4 of a mile from a bus stop or Metro station has got to go, since	
it prevents riders, like myself, from traveling anywhere in Loudoun County and some cities in the DMV.	
When Metro finally opened in Loudoun in November 2022, it looked like it would bring some relief for	
MetroAccess riders and they could finally be allowed to travel anywhere in the county, but	
unfortunately it didn?t, all because of that dreaded policy, and that?s just so wrong. MetroAccess	
riders can?t be denied trips to Loudoun County or anywhere in the DMV, all because of a dreaded	
policy. They should be allowed to use MetroAccess to travel to the county to visit a family member or	
friend that lives down there or to go to a place that?s located down there. That way they don?t have to	
spend money on an Uber or Lyft or depend on a family member or friend to take them to and from the	
county. WMATA should contact the Loudoun County Government and urge them to get funds from	
them so that they could approve MetroAccess service and start serving the entire county, especially all	
of Leesburg and some cities that pass Leesburg, like Lovettsville, Belmont, Broadlands, etc? Service	
should be done on both weekdays and weekends. The MetroAccess service hours should not be the	
same as equivalent fixed route bus and rail service. They shouldn't close the system at 10pm everyday,	
and the proposed service area of MetroAccess should not depend on the day and time, because clients	
should be allowed to travel at any time and come home at any time. If a client?s job requires him/her	
to work late, like until midnight or later, then MetroAccess should still operate at those times so that	
clients could find a way to get home, so it?s best that the MetroAccess service hours don?t change at	
all. I would like to make a suggestion. Now that Metro is operating in Loudoun County, then WMATA	
should lean on trying to bring Metro to Prince William County, since I have a feeling it deserves to be	
there. May they please contact the Prince William County Government and urge them to approve	
Metro and get funds from them. Also, I think MetroAccess riders should automatically be allowed to	
use Omniride Access so that they could travel to Prince William County to visit family and friends that	
live down there and also go to a place down there so that they won?t have to depend on an Uber or	
Lyft or a family or friend to take them to and from there. I hope they can start going to Fairfax or	Bus Service
Increase the budget!	Operating Budget, Management and Spending
The one that would really impact me is metro access service. I depend on it heavily to get to and from	
work, also to get me to school. If metro access were to reduce the area within which they serve, and or	
the hours they would operate, it would impact so many people beyond just me. I am unable to read	
the map that is shown, as it is not screen reader friendly as far as I know. However, this has the	
potential to have widespread consequences to many people with disabilities, who also depend upon	
metro access to get to and from important obligations. Such as work, doctor's appointments, school	
etc. Reducing hours would be unfavorable as well. For example, if a client has an early flight they need	
to catch, the inability to take metro access could place a huge financial burden upon that person. Who,	
if they are living on SSI or other fixed income, may not have the resources to pay for an uber or a lyft.	
That then goes to fair increases as well. While metro access does provide affordable transportation, fair	
increases would put a burden on so many people financially. Again, since so many people who are	
disabled, live on a fixed income, and they must also account for rent and other bills such as utilities. An	
increase in fairs could make it difficult for people to attend important appointments, simply because	
they do not have the financial means to pay to go somewhere on a weekly basis.	Operating Budget, Management and Spending
I can't go to work and move around the city without the METRO services, being a foreigner without a	
car license. Then I absolutely need the service AND at a decent price	Rail Service

I'd be willing to pay extra for rush hour trips just to support those extra trains (like surge pricing!) Keep pushing MD and VA to contribute their fair share. I am in favor of a regional tax! Metro is the heart of the city and should do more, not less to support the people who support them. Cities must encourage public transportation. Better for traffic, better for the environment, better for sense of community. Other countries, like Japan, are doing this so much better than we are. Metro is hould keep the 167 service. This is the only non-stop route available for when I go to the office. Instead, it should get rid of all the supervisors who, from my vantage point, just sit in their vehicles texting and writing up bus operators because they happen to be early. Why not put those supervisors behind the wheel to increase bus service?everyday the 16Y is late in the evening rush?even on low my fare to get from point A to point B with the current system? Replace this with a simpler flat fare for Metro or, alternatively, a peak / off peak system with a flat rate for each. The only bus route I use is REX. Fairfax connector is on strike. Without Rex I can't get to metroraik right now. It would be Wonderful to increase customer service with a Smile and diplomacy, Attitudes from Metros staff is at an all time Low! curt, rude, short tempered, & disrespectful Ma is used as a public school transportation route for both Deal middle school and Jackson Reed high school - how will these kids get to school??? Why not put those supervisors behind the wheel to increase bus service?everyday the 16Y is late in the evening rush?even on low traffic days. One other point?simplify the metro rail fares. Why do I need to do calculus to figure out my fare to get from point A to point B with the current system? Replace this with a simpler flat fare for Metro or, alternatively, a peak / off peak system with a flat rate for each. The only bus route I use is REX. Fairfax connector is on strike. Without Rex I can't get to metroraik right now. It would be Wonderful to increase customer service with a Smile and diplomacy, Attitudes from Metros staff is at an all time Low! curt, rude, short tempered, & disrespectful M4 is used as a public school transportation. I need the train. What I do not like is those who skip the fare. It is not fair. Sometimes I see the Metro force in uniform but this pre	Fares/Fees/Parking Miscellaneous Rail Service Miscellaneous Bus Service Bus Service

WMATA generated tremendous ill will by cutting back to only six car trains on most lines in February,	
with no honest advanced warning or opportunity for customer input. I do not trust WMATA to fairly	
consider the impact of any of these proposed changes on the customer experience. Fare increases	
should not be done as a percentage increase anymore. Your highest fares are already too high, and	
when you start taking about increasing round trip fares by \$3, you're putting too much of the burden	
on customers with long commutes. You really need to address the problem posed by having three lines	
share the tunnel between Rosslyn and Foggy Bottom. It makes operating those lines extremely	
inefficient. You need to fix the endless switching problems and signal problems that cause regular	
delays during peak service hours.	Fares/Fees/Parking
I've been riding the 16Y for months and it is one of the best routes. It takes the people of Virginia into	
their DC jobs at a quick and seamless rate. After the governments (based on DCs request) to have all	
telework employees return to work into the city, cutting lines seems like a counterintuitive step. If DC	
wants more people to spend money in DC, you have to give them a way to get into DC!	Bus Service
Keep t2 bus	Bus Service
Service reductions will affect ridership, which will affect revenue. The best change I?ve seen in the last	
year is more reliable, frequent service, making Metro the best way to get around. If service was cut and	
frequency reduced it would be harmful. Most people need to get somewhere on time and need to have	
a method they can trust. We choose trains and buses because we either don?t want to or can?t drive.	Bus Service
My only option is route 22 22a or 22c. If they are eliminated I will have to drive everywhere	Bus Service
Stop the daily freeloader riders	Miscellaneous
Fix fare boxes on buses, and you?ve got to increase enforcement of penalties for fare jumping. I?m not	
a big proponent of police enforcement, but it does seem that for right or for wrong, many who would	
use Metro will not because of perceived danger/whatever they think is posed by 'disorder' on bus and	
train, so unfortunately I think visibly ticketing fare jumpers is worth doing. Also, I think you've got to do	
fare interoperability with MARC and VRE, or at least do a transfer like you do to and from RideOn and	
ART and other similar regional transit authorities	Bus Service
Metro allows affordable access to everyone who use it. Public transportation should really be	
subsidized more by the government.	Rail Service
Not good	Miscellaneous
I take the Metro to get to and from work. If it is not operating at reasonable convenient intervals I can't	
use it.	Rail Service
Metro fares are already borderline prohibitively expense for commuters with long trips. With this	
increase, it will be cheaper for me to drive my car all the way into DC and pay to park in a garage than	
what I currently do, which is park at Vienna metro and take the train into DC. Making public	
transportation the most expensive option is a bad idea.	Fares/Fees/Parking
T2 line is essential service for Carderock neighborhood access, especially for elderly neighbors who	
want to live in place. Walkability score for neighborhood is 11/100. Also bus line is essential for care	
workers to arrive to Carderock and would impact that employment. River road is already a heavy traffic	
road so eliminating bus service would have negative impact on traffic.	Bus Service
This survey seems designed to lead respondents by not showing the budget impact of each change and	
by only presenting a choice between fares and service, leaving out other possible options like cuts to	
non-operating departments, negotiating with labor, efficiency improvements, etc.	Operating Budget, Management and Spending
Eliminating the D2 and 33 to federal triangle would severely impact my commute and access to the	
also Dath as then existing consists M/AATA should be seen for a stability of the form	
city. Rather than cutting service WMATA should increase fares and identify other funding strategies.

It is shameful that the capital of the USA cannot provide transport to to its tax paying citizens. As a 92-year-old, changes in the N bus schedule would limit what I can do Just rise the bus and train fair at Metro station to make the money Metro is losing lots of money due to people who jump the fare gates and ride without paying. I have service to be free, make that announcement so that the rest of us cans top paying. Metro should be given more funding by the states I have another suggestion - stop just passively watching people jump the gates I see it EVERY SINGLE DAY and no one does a thing about it	Bus Service Bus Service Bus Service Bus Service Bus Service Bus Service Fares/Fees/Parking Capital Budget
Public transit is a public good and should be treated as such. These changes would likely force people to choose other transit options thus lowering the amount of fares collected. More reliable service will increase ridership. Both service cuts and increased fares will only drive the ridership down First, the T2 bus is the primary route for use of service workers to Bethesda and Potomac and is a low cost option for these service providers. Eliminating this would be a burden on these workers. Second, this bus provides support to teens in the community going to Bethesda and other activities. These are teens that are not yet driving or unable to drive. This provides a means for them to move about the area. All evel of independence which is needed. Third, this buss is the link for commuters gong to work and without another means of transport. Lastly, this is the only link of public transport to the area. If from any connection the metro area. Please do not eliminate this important connection for our community. For the past 30 years metro has been cutting routes and services regardless of the fact that less public transport to its tax paying citizens. As a 92-year-old, changes in the N bus schedule would limit what I can do lust rise the bus and train fair at Metro station to make the money Metro is losing lots of money due to people who jump the fare gates and ride without paying. I have seen on attempt to enforce the paying of fares. The more people know that they can skip paying without consequences, the more people will do it, and the more money will be lost. If Metro wants service to be free, make that announcement so that the rest of us can stop paying. Metro should be given more thoring about it, meanwhile, I'm here, scanning my pass for \$12.00 a day, plus parking. You keep raising the rates, it'll be cheaper to drive and pay for parking downtown. For those of us that are required to come into the office for at least 4-5 days each week, you are effectively increasing our rates another SS0 per month. Comment	Category
I do not support elimination of the T2 route. I commute for work on weekdays from Carderock Springs	
in MD off of River Road. To get to Metrorail, I have 4 options, 1 - Rideon 32, 2 - Metrobus T2, 3 - self- drive and park, 4 - taxi / uber. Rideon 32 runs a limited schedule and generally works. I am dependent	
on T2 to use mass transit when Rideon 32 does not run (e.g., late or cancelled) or for hours outside of	
Rideon 32 (e.g., 12noon travel or after 7:30PM Monday through Friday). When I want to stay	
downtown past 7:30pm, for things such as dinner, then I am dependent on T2 or taxi or driving and	
parking in the morning. While the T2 and Rideon 32 stations are on opposite parts of the	
neighborhood, I have had to walk through the neighborhood when Rideon 32 failed to show and I	
ended up taking T2. T2 is a critical part of my ability to limit my car usage and cancelling T2 would	
result in my driving more frequently and necessitating increased parking demands for another car at or	
near Metrorail stations. You should consider the compounding impacts, such as my increased parking	
need and my addition to traffic congestion, on the Metrorail system when considering changes. I'd	
recommend reduced service to T2 before cutting altogether. Also, I live alone, so I do not have	
someone in my household to carpool or to combine driving.	Bus Service
3Y bus is a commuter route serving north Arlington. Suggest reducing the number of trips rather than	
eliminate. ART 55 bus is not a good substitute as it is much less reliable than the 3Y bus and the 3Y bus	
provides access to government offices near Constitution Ave. Reduce trains from 8 to 6 cars. Work with	
the states to increase the penalties for fare evasion and widely advertise the penalties. OK to raise fares. I think that the fares for seniors are very fair and I am OK paying a bit more-cheaper than getting	
another car or taking taxis/Ubers! I very much appreciate the work of all WMATA employees to provide	
us the system thaat we have today. Very happy overall.	Bus Service
The DMV governments should be fully funding metro!! It is a public service, it is supposed to be losing	
money. The metro system is one of the best parts of living in DC!	Capital Budget
Metro will be the only way to live car-free in a country that only builds for and around the cars. Taking	and the second
service away from metro financially will just push me to continue using my car or force me to use it	
more often when those trips are currently being replaced by metro or metrobus trips due the	
headways that make it feasible to run daily life errands via public transit.	Operating Budget, Management and Spending
Dc is the nation?s capitol yet our metro is behind Chicago, New York and other major cities. It?s	
expensive to the point it?s easier to drive than to ride the metro. What?s the point of even having	
public transit when it just connected another major airport but can?t connect to Baltimore and still	
	Operating Budget, Management and Spending
I want to express enthusiastic support to Metro's regional partners for funding Metro's budget.	
MetroRail and MetroBus are crucial services for many many people and both fare increases and service	Occurring Durlant Management and Case II in
cuts would dramatically impact us.	Operating Budget, Management and Spending
More tax money from Va md and dc to develop metro system. Benefitting the earth, car traffic, and	Dell Carrier
people of all socioeconomic statuses. We need to go in to the office more frequently and the service cutdown would significantly impact our	Rail Service
willingness to make it	Bus Service
I love my metro access service right now. Instead of cutting service maybe you should increase the fare.	
Please don?t cut the service.	MetroAccess
Hopefully only modest decreases in FREQUENCY of all service and only modest fare and parking fee	
increases will be necessary.	Bus Service
It is essential that service cuts be avoided. As a city DC is already far too car dependent and far too	
many people regularly rely on personal vehiles as it is. Reducing service will not only reduce ridership in	
the shortterm, it will also reduce public trust in the system and push more people to rely on cars and	
car ownership to get around the city. This would have disastrous consequences to traffic, pedestrian	
and bicyclist safety, and emissions and air pollution. DC cannot be a modern, livable, vibrant city	
without a robust, extensive, and reliable public transit system or with so many people relying on sprawl	
and cars. Cutting service is a short term budget fix with terrible long term consequences.	Operating Budget, Management and Spending
I am sorry that we are all in this situation. I do think WMATA should explore all the possibilities. While I	
am blessed to be able to afford rate increases, everyone is not. I would prefer a rent increase over	
cutting services because those who need it the most, who are already suffering will continue to brunt	
the true cost. I also think some of these questions need to have the ability to explain an answer, if

NOW you are dropping the 8 car trains and giving us 6 car trains JUST when everyone is starting to go back to work. Dig a big hole and drop your system into Both fare increases and service cuts would be disastrous for the most vulnerable communities in DC. Bus routes, especially, are vital to people who don?t live or work near to a metro station. And metro wait time can already be in excess of 15-20 minutes, especially with frequent delays. While I personally would be able to handle the proposed fare increases, many other DC residents would not. There doesn't seem to be any fare collection on many bus routes. Instead of cutting service frequency for peak hours and on well-used routes (e.g. S2, metrorail) I would advocate for cutting less-used routes and reducing stop frequency Many people use the bus without scanning the fare box, I see it multiple times every time I use the bus. If you are better at enforcing this maybe you won?t need to charge extra to those who analculally do pay. Service cuts to stations with low ridership will just drive away the customers who can only use those to deter fare jumpers is what happens at the Herndon station weekdays around 8 am: the station manager is out in the area before the faregates, smilling and talking to people. I have never seen anyone jump a gate while he is there. The real issue most of the stations have is visibility of the station employees - you are a lot less likely to jump a	Bus Service Fares/Fees/Parking Bus Service Bus Service Bus Service Bus Service Bus Service Fares/Fees/Parking Fares/Fees/Parking
1. Address those who don?t pay (it?s lost revenue) 2. Sell renewable and time limited advertising space on rail & bus (revenue) 3. Address the rudeness, apathy, inconsiderate behavior & attitude of several employees. Some are great, many are not Metro should not cut well-used services and needs to consider its impact on lower-income workers. WMATA - What a miserable system you have crafted. I'm used to the NYC transit system - 10 car trains, 24/7 service, decent fares - been in existence for over 100 years. Your Podunk transit system is laughable. I'm surprised it has made it this far. NOW you are dropping the 8 car trains and giving us 6 car trains JUST when everyone is starting to go back to work. Dig a big hole and drop your system into Both fare increases and service cuts would be disastrous for the most vulnerable communities in DC. Bus routes, especially, are vital to people who don?t live or work near to a metro station. And metro wait time can already be in excess of 15-20 minutes, especially with frequent delays. While I personally would be able to handle the proposed fare increases, many other DC residents would not. There doesn't seem to be any fare collection on many bus routes. 25% is excessive. The fare increase vs service cuts is unrealistic. Service cuts are not an option. It is Metro grandstanding in order to get fare increases or justify service cuts. Should address improving	
efficiencies and giving summary on what isn?t getting done without and what is being done internally	
to help solve the funding problem, without citizens having to weed through the budget. Metro seen as	
always taking without giving back. Need to get Congress to appropriate funds to metro and pressure	
States to establish permanent funding lines.	Operating Budget, Management and Spending
Take some money out of the MPD budget.	Operating Budget, Management and Spending
Making all these proposed cuts will send WMATA into a death spiral of lower frequencies leading to	
lower demand leading to less revenue and increased car traffic, which will lead to more cuts and less	A 45 11
demand, etc. metrorail is a public service not a private business, obsessing over budget and profitability is wrong, just	Miscellaneous
provide the service of public transit as best you can, and stop trying to increase the fare, if anything you	
all need to be decreasing the fare if not removing it. always worried about your budget, stop the	
corruption within your organization, buying these expensive new trains that don't even work for	
billions off of a collusion deal and firing your engineers who recognize safety fallacies before having to	
decomission them anyway and how much are the upper levels of administration getting paid? vs the	
operators? exactly. do better yall	Operating Budget, Management and Spending
Just put those new gates at every station, especially the ones where all the poor Hispanic and black	
people live cause let?s be honest no white or Asian people jump gates	Rail Service
Please do not enact service cuts. That would be disastrous for my daily commute. My husband and I chose our house specifically because it provided access to the Glenmont metro station. I depend on it	
daily to get to work, particularly given the state of DC traffic. You?re taking away a literal lifeline. And	
doing things like increasing time between trains or turning certain trains back is equally catastrophic. It	
means more time away from family, more wasted time commuting. You?re taking away a service that	
tens of thousands of us depend on and is critical to keeping downtown alive.	Bus Service
Please do not cut bus routes, for many DC residents who cannot afford or choose not to have a car for	
environmental reasons, busses are the only way to get to work and cutting routes could turn a 30	
minute commute into over an hour	Bus Service
Metro uses up way too much budget and isn't used enough. We need to lower the Metro budget and	Operation Dudent Measurement and Second 1999
cut unnecessary services. Changes should be reasonably balanced between service changes and fare increases. Riders on	Operating Budget, Management and Spending
alternative schedules (very early or late, midday) and those that do not live in high density areas are	
likely to switch to ridesharing or other means harming public transit usage.	Fares/Fees/Parking
Has no one involved with Metro ever heard of Walmart? Instead of creasing fares or cutting service,	
you should be CUTING fares to increase ridership.	Fares/Fees/Parking
increasing rates and cutting services, while feeling like necessary measures, will only gut the system and	
make it inaccessible to those who rely on it the most. Also, wait times increasing to 20 minutes seems	
ineffective when many riders use the metro for short rides. I think very few people would want to wait	
20+ minutes for a metro when they can take a taxi, or Uber for a short ride.	Rail Service
Please don't cut rush hour service. The metro is already crowded and uncomfortable during rush hour. Please don't cut weekend bus service either. the bus is often the most convenient way to get around	
the city, but it needs to be reliable for folks to use it.	Bus Service
Randy Clarke is doing a great job. He has a friendly personality and a nice butt!	Miscellaneous
Please don?t change L2 service. We already lost L1.

Even if you're cutting back service, please consider running late night rail service to 2 AM. I haven't used Metro on Friday or Saturday nights since 2016 since the 3 AM service was cut back for SafeTrack. I could use Metro o toget to DC currently, but I don't because I live by Reston Town Center Metro. An Uber back home is normally \$60-100, depending on the night, so it's too expensive (even at my income level of \$100,000/yr). Do not let metro enter a death loop. Traffic is already horrendous in this area. If the system fails, it would only get worse. Jurisdictions need to provide the additional money to offset budget increases, service cuts, or fare increases will just diminish ridership. Multiyear funding is critical I want the system to be consistent and reliable. If that means service cuts or fare hikes, I will adjust accordingly. But please don't take us back to the days with constant delays and the trains stopping and starting all the time. The trains may not run as frequently these days but I know they will come and get me whe	Bus Service Miscellaneous Bus Service Rail Service Rail Service Rail Service Operating Budget, Management and Spending
Eliminating the B routes would stop all service for Metro-bus and Metro Access in Bowie. This is a need for employment and services which will put a number of disabled people back at home without access to jobs, doctors appointments, etc. This would be a tragedy if it goes through Please, please don't cut service to the SW/Wharf area. Make the 74 bus go all the way to Dupont Circle rather than stopping at the convention center. We need the 52 to go even more often. The people who use the buses are often disabled or very poor. Increase the services, not decrease them. Put on smaller /cheaper buses if need be. I deeply oppose cutting metro rail services in any way. Many people to include myself heavily rely on affordable Metro rail for transportation to work, school and many other places. With trains taking longer to arrive also contribute to unsafe Metro environments. These are just a few of the reasons Metro service should NOT be cut and NO metro stops should be eliminated! Even if you're cutting back service, please consider running late night rail service to 2 AM. I haven't used Metro on Friday or Saturday nights since 2016 since the 3 AM service was cut back for SafeTrack. Reducing service would be a huge mistake. The main reason to have a transit system is to provide people with a convenient alternative to driving, so making Metro less convenient and accessible by	
increasing time between trains and decreasing the number of stations would completely defeat the	
purpose of the service even existing. Given how many people in the area rely on Metro to get to work	
and leisure destinations (sports, museums, restaurants, etc.) combined with the infrastructure in place	
to handle traffic and parking, I confidently predict that proposed cuts to Metro services would have	
catastrophic effects on the area's economy with people being unable to get to work or be able to go This whole thing really sucks. I guess I'd rather pay more than take a ride share which will inherently be	Fares/Fees/Parking
more money but no one is getting paid more while also being asked to come into the office more	
frequently. The people who rely on public transit to get to their jobs can't pay more.	Miscellaneous
Service cuts will severely increase mine and many others commute times. I urge you to keep service	
times shorter during rush hour.	Bus Service
Please do not decrease the frequency of which Silver Line MetroRail Trains operate, this will decrease	Due Comito
my likelihood of using MetroRail and Driving to work instead. I am in favor of higher taxes to cover the shortfall. Access should be a public service and shouldn't	Bus Service
depend on ridership. Make it free and cover the cost with a tax increase.	Fares/Fees/Parking
The Silver line already is troublesome because it is the only line to get to certain areas and runs less	
frequently. Please avoid service cuts to the Silver line	Bus Service
Public transit needs to be funded through taxes far beyond what it receives through fares. Taxes in cars	
entering DC could both reduce congestion and provide funds for buses and rail service. I typically travel	Bus Sanisa
by foot or bike because of the infrequent departures of buses and rail. Please increase fares and save the MetroBus lines. Many people, including myself, and required to	Bus Service
commute from Virginia into DC at least three days a week. Eliminating routes like the 21C would	
increase my travel time every day by an hour. That is time away from work and family that cannot be	
replaced. Please increase fare costs as necessary and find other methods of funding?we rely on	
Metrobus and rail to get to work in the efficient and responsible way that benefits everyone.	Bus Service
The metro is my only way of getting around the city and having increased fares and no service after 10pm would have a drastic negative impact on my life.	Fares/Fees/Parking
You want to make the Metro more expensive AND less accessible? Ya'll have to be out of your GD	n on con riccon right
minds. I like to take the Metro to work, but I'll NEVER use it with these proposals.	Rail Service
1. Public Engagement: Engage with the public through surveys, town hall meetings, and other outreach	
efforts to explain the reasons for the fare increase and gather feedback from riders. 2. Transparency: Be	
transparent about the financial challenges facing WMATA and the specific reasons for the fare increase. Provide clear and detailed information about how the additional revenue will be used to improve	
service and infrastructure. 3. Communication: Develop a comprehensive communication plan to inform	
riders about the fare increase, including signage at stations, announcements on trains and buses, and	
updates on the WMATA website and social media channels. 4. Accountability: Hold WMATA	
accountable for delivering on the promised improvements in service and infrastructure that are funded	
by the fare increase. Regularly update riders on progress and address any concerns or complaints	
promptly. 5. Collaboration: Work with local government officials, advocacy groups, and other stakeholders to build support for the fare increase and ensure that it is implemented effectively. 6. Fare	
Structure: Consider implementing a more equitable fare structure that takes into account riders' ability	
to pay, such as offering discounts for low-income riders or implementing a sliding scale based on	
income. 7. Service Improvements: Use the additional revenue from the fare increase to make tangible	
improvements to service, such as increasing frequency of trains and buses, reducing wait times, and	
enhancing overall rider experience. 8. Accessibility: Ensure that the fare increase does not	
disproportionately impact low-income riders or communities that rely heavily on public transportation. Consider implementing programs to provide assistance or discounts to those who may be financially	Operating Budget, Management and Spending
Work on delays during rush hours on main routes Enforcement of fares on rides is necessary	Operating Budget, Management and Spending Bus Service
I am writing to express my deep concern regarding the proposed cuts within the WMATA system. As a	
resident and regular user of WMATA services, I strongly oppose any reductions to our public transit	
network. Public transportation is an essential lifeline for countless individuals in our community,	
providing access to employment, education, healthcare, and essential services. Any cuts to bus routes,	
train frequencies, or other services would disproportionately impact low-income communities, seniors, individuals with disabilities, and essential workers who rely on public transit to meet their daily needs.	
Reduced service levels would not only inconvenience passengers but also exacerbate traffic congestion,	
environmental pollution, and economic inequality. It is imperative that WMATA continues to prioritize	
the accessibility, affordability, and reliability of public transportation for all residents across the	
Washington metropolitan area. As a responsible steward of public transportation, WMATA has a duty	
to uphold its commitment to serving the needs of the diverse population it serves. I implore you to	, I

I understand that you need to increase fares, but 25% it?s TOO MUCH Cutting the D2 would drastically change my and my family's day to day lives. Please keep the D2. Also, retain the 31 and 33 as they exist! You already eliminated the 30N and 30S. These buses are FULL and	Bus Service Operating Budget, Management and Spending Bus Service Service Levels Rail Service Bus Service Bus Service

Comment	Category
If you remove or decrease bus lines, you will make my life extremely difficult. I take the D2 and/or 33 to	
work daily. If you remove these lines, or change their routes, my commute will be unbearable. I also	
rely on those buses over the weekend and some late evenings. You?re providing a public service and	
should serve the public.	Bus Service
Please do not cut the D6. It?s the only crosstown bus close to my home and we use it all the time. Older people need buses. Buses are easier to get on and off than rail. Bus service can reduce street	Bus Service
traffic congestion especially when it is frequent and comprehensive in coverage.	Bus Service
Reduced and costly service has made me not want to take the Metro anymore.	Fares/Fees/Parking
You're eliminating or severely reducing bus services through Georgetown and Adams Morgan - two	
neighborhoods that are highly dependent on bus service as they are further away from rail stops.	
Reinstate the G2 (this bus is always packed) and ensure regular service on 42 and 96. Also, S2 buses are	
already overcrowded and typically have to turn passengers away during rush hour.	Bus Service
Please save the G2!!! It's the only direct public transit option to Georgetown University's campus.	Bus Service
I understand the budget constraints that metro is dealing with are severe, but the proposed cuts of bus	
lines, rail stop, and service are so dramatic as to remove the viability of WMATA public transport as a	
main means transportation.	Operating Budget, Management and Spending
I think it?s a mistake to cut Metrorail/metro bus services and it?s preferable to maintain current	
services with fare increases if the budget cuts must occur. Fare and budget increases for metrorail and	
bus services would be ideal, to improve/expand services, rather than cutting services.	Operating Budget, Management and Spending
Raise taxes to fund public transportation, which should be free at point of use	Miscellaneous
I use the Metro Red Line 5 to 6 days a week for work and pleasure. Closing during the week at 10 pm	
could affect dining out, thus affecting local businesses, i.e., restaurants. An 11 pm closure would be	
more consistent with when restaurants stop serving. Most on the agenda should be putting up barriers at the toll stations so that riders cannot get in or out without paying their fare. I see how much \$\$	
At the foll stations so that riders cannot get in or out without paying their fare. I see now much \$\$ Metro is losing on a daily basis just listening to the alarm going off every time someone jumps over.	
This is extremely frustrating to those of us who pay daily both ways.	Bus Service
Cut the administrative budget.	Operating Budget, Management and Spending
I am senior who relies on public transportation for my daily living.	Miscellaneous
I use the metro every day to commute from my home (near U st green line station) to work in Wheaton	
on the red line. The frequency of service is critical, and so are all the stops operating. I do not own a car	
but would be forced to buy one if my commute is so thoroughly implicated by decreased frequency	
and/or closed stations. I am very upset given that the metro was a significant reason I moved to DC for	
quality of life. I would prefer an increase in fare prices to cuts in service.	Bus Service
It is too expensive	Miscellaneous
The proposed service cuts will eliminate all bus service in the Southwest waterfront area. When I ride	
the bus I notice that more than half of the riders don't tap fare cards, but I see no effort to enforce	
paying fares.	Bus Service
For students like me, increasing fare price will be hard on us. I would rather to reduce the service	
operations for non peak hours because we can always check the schedule of the train before hand and	
schedule our trip timely. Also, this way it saves more electricity and operational costs since the coach	
do not always full. when it's running. Only when it's during rush/peak hours current service should be	
maintained.	Fares/Fees/Parking
42 Disconder the limit of the 226 and 226. We shall the application that exact of the in Existing to a set to the	Miscellaneous
Please don't eliminate 22f and 22a. It's really the only way that most of us in Fairlington can get to the pentagon easily and safely, and then to other parts of the city.	Fare Evasion/Safety/Crime
Metrobus needs to fix its application which is so erratic to use. It is not reliable and deters people from	
using the bus. Also half the fare machines don?t work so a lot of revenue is lost this way. Drivers also	
turn a blind eye on passengers who don?t pay even when the machines are working. This also applies	
to Metrorail where people jump the turnstiles systematically.	Bus Service
I use P6 and 74 from SW to downtown locations, and rode the P6 to federal government job for years.	
Eliminating these routes would adversely effect many SW federal government workers who use them	
daily.	Bus Service
Find other ways to fund the metro besides displacing the cost onto its users.	Fares/Fees/Parking
Please keep metro reliable for DC commuters and the climate crisis	Bus Service
Work with DC and MD to make fare evasion punishable with jail time. Additionally, cut admin staff.	Fare Evasion/Safety/Crime
Service should be free. Find the money.	Service Levels
I know that the mayor canceled the Southwest Circulator last year but the council reinstated it. I use	
that bus often and would hate to see it discontinued. How about using smaller buses?	Bus Service
Save the 74! It's the only bus route out of ever more populated Buzzards Point, connecting to soccer and baseball stadiums, Wharf, Mall, booming 7th Street commercial area. It's a relatively short route,	
and baseball stadiums, Wharf, Mall, booming /th Street commercial area. It's a relatively short route, so consider making it free to attract more customers. It links to Green, Yellow, Blue, Silver, Orange, and	
so consider making it free to attract more customers. It links to Green, Yellow, Blue, Silver, Orange, and Red Metro lines making it a crucial transport link. Also, you need to clean up the online Metro	
schedule app. It's swamped with stupid ads and very user unfriendly. Before the ads, it was a very	
efficient tool for navigating Metro. Now it stinks!	Bus Service
Please DO NOT decrease frequency of service!!! Please prioritize preserving the frequency of service.	
The only reason why cuts to that could not affect my choices is because I do not have other choices.	Bus Service
I strongly disagree with fare increases and service cuts because there is always something wrong with	
the services that are provided now. Everyday I take the train and bus to commute everywhere,	
especially to and from work, and there is always some sort of delay that interrupts the service, people	
are already struggling to pay for all the different rates we are forced to pay. Find another way and	
improve what is in place now before making drastic changes that will significantly impact how people	
commute around and in/out the DC metro area.	Bus Service
Please do not eliminate the circulator between L?fante plaza and eastern market.	Miscellaneous
I can't believe you are considering cutting bus lines like the P6 and the D6, which are heavily used! The	
D6, for example, is the only public transportation to two of the city?s major hospitals! (Sibley and Georgetown) The P6 line is one of the only lines to serve Southwest and southeast DC I And Lines like	
Georgetown). The P6 line is one of the only lines to serve Southwest and southeast DC ! And Lines like the 74 would be much more used if they ran more frequently than once every half hour! That is true of	
all bus service! I also don?t understand how you can make decisions about bus ridership when half the	
time the fair boxes don't work and so collect no data . Same goes for Metro rail where fares are often	
not collected? speaking of which, how long will it be before you install ?jump proof? gates on all your	
most heavily used stations? To talk about raising fairs when you aren?t even bothering to collect them	
because of widespread fare evasion is really ridiculous. Finally, to cut bus service when Metrorail is	
widely perceived as a lawless, dangerous system is particularly unfortunate for older people such as	
myself who mostly don?t feel very comfortable riding the rails anymore.	Bus Service
Keep working and subway pay just your staff	Miscellaneous
As a responsible steward of public transportation, WMATA must uphold its commitment to serving the	
needs of the diverse population it serves. I implore you to prioritize the well-being and mobility of	
riders by preserving and enhancing our public transit services.	Service Levels
Trains are already full at rush hour	Rail Service
Allocate more resources to metro service - after all, we pay taxes and it?s good for the environment	Rail Service

Comment	Category
These changes are the exact reason people don't want to ride the Metro. In order for people to take	
public transit you need more trains/buses that come at shorter intervals. I don't think cutting down on	
fare evaders will matter much compared to the loss of people riding the train and busses with these	
service cuts. I really urge (begging) you guys not to make these changes, it impacts so many people, and the planet.	Bus Service
Sorry, but I can't believe that a solution to fully fund and expand funding can't be found! This is a	
regional failure and a conversation we should not even be having.	Capital Budget
Make driving more expensive. Increase tolls, raise the price of parking, reduce options for driving in the	
city. ALL these should come before a reduction in service or increase in fare	Fares/Fees/Parking
Lots of my co-workers rely on the Metro Bus route T2 to get to and from work everyday and the	
elimination of this route would leave them with little or no options to get back and forth to work	Bus Service
Do NOT shift maintenance money to operations. Maintenance cannot be3 deferred any more. Do NOT	
cut staff. You are already short of staff.	Miscellaneous Bus Service
Please keep the routes! Some lines are already limited No	Miscellaneous
As a low vision person, I?m highly depending on MetroAcess. I?m hoping to continue to use	INISCENTINEOUS
MeteoAcess and the new proposal will work for the best. Thank you Selam	Rail Service
The train service cuts would ruin the off peak non-work ridership numbers that the world is moving to	
with telework. The bus cuts would be even worse. Living in Adams Morgan would ruin the	
neighborhood as it becomes particularly difficult to go anywhere during the weekday and nearly	
impossible on the weekends without increasing transit time significantly. Based on the description of	
the cuts, the L2 will no longer go towards downtown and the 42, 43 will be cut entirely. This means the	
Mt Pleasant and Dupont commercial corridor would be inaccessible, and all the transfer points from	
there ? Georgetown, Palisades, anything in the BOS corridor will take significantly more time to reach.	
Meanwhile with 96 being cut and the 90 with more limited coverage (and poor reliability), we lose reliability in reaching neighboring U St, Woodley Park, Tenleytown and beyond. There are already few	
cross-town corridors in DC and removing the 96 would only worsen the divide between NW and NE. If	
anything, we need more buses and better reliability along this corridor. One improvement is that the	
90 could easily extend to the Woodley Park metro stop while keeping the Ellington Bridge turn around.	
With service ending at the station, the driver could cross the bridge for his break or for swapping.	
Currently I am overall pleased with the transportation system in DC. One of the reasons I moved here	
was that DC is known for being one of the few places in the US where one could be car-free. Adding	
onto that, the future of WMATA seemed bright and hopeful with the increase in service since the	
pandemic allowing DC to become a national leader (and respectable across the globe).	Bus Service
Please don?t reduce M4 and D6. You just built MacArthur high. Two family members and I travel from	
AU Park to that area and back every weekday. We would use transit to get there some weekends, too, if it were easier.	Bus Service
Please take accessibility and historic policies cutting off certain neighborhoods from transit options	Bus service
when choosing where to make budget cuts.	Operating Budget, Management and Spending
Please continue to make it difficult to jump over Metro gates. It is so discouraging to see riders avoiding	
payment with impunity.	Rail Service
Please not delete route T2 is the only route to my work	Bus Service
Reducing service is not going to boost ridership. If the metro is infrequent or unreliable, ridership will	
die. Waiting 15+ minutes for the next train will send me to a taxi every time.	Rail Service
You're already well aware of the risk of a death spiral here. I personally would use it much more if it ran	
lister on uncloade Net inst 2 cm. but over 2 cm uncid be ideal. They i would actual be a constant	
later on weekends. Not just 2 a.m., but even 3 a.m. would be ideal. Then I would never have any reason to drive into the city I know many others who feel the same way. Stopping service at 1 a m is a major

Cutting metro service when more jobs are requiring workers to return to office will put a strain on commuters, metro employees, traffic on the roads, etc. Decisions on many of the above items should be based on ridership data, not respondents opinions. In particular, the budget allocations require considerable data and info from safety reports which most respondents do not have. However, I do appreciate the opportunity to give my preferences. I expects the survey results to be made published along with the response rates. 22F is a lifeline for many commuters in Fairlington, please do not remove this service. Please keep the 22A and 22F - this is how our family gets to work daily. Please don't reduce the M4 and D6 buses. You just built MacArthur high. Three of my family members travel from AU Park to that aree and back every weekday. We would use transit to get there on	Bus Service Bus Service Bus Service Operating Budget, Management and Spending Rail Service Operating Budget, Management and Spending Bus Service Operating Budget, Management and Spending Bus Service
to drive into the city. I know many others who feel the same way. Stopping service at 1 a.m. is a major barrier, and closing at 10 p.m. would make to unusable for many people. I chose to not buy car and save environment because of my ability to take the busses. If cut, metro will be useless to me The 16 Y is always packed. It only runs during rush-hour anyway, so there?s not a lot of times when it runs that it isn?t busy. It is much faster to take the 16 Y into Washington than to take another 16 to Metro train. I would bet that you were making money on the 16Y. For me, I would rather drive than take the other 16s to Metro. Cutting service just creates a doom loop. No one wants to pay more for less Please consider keeping busses in the less metro accessible areas (for instance, Glover park/Georgetown)! Cutting service and hiking fares isn't the answer to your budget shortfall and is only going to further decrease ridership. Focus on making Metro safe to ride again and making MD & VA and all riders pay their fair share. Also, you are proposing to eliminate or reduce all of the metrobus lines that service SW DC - feels discriminatory to me! Cutting metro service when more jobs are requiring workers to return to office will put a strain on commuters, metro employees, traffic on the roads, etc. Decisions on many of the above items should be based on ridership data, not respondents opinions. Comment	Category
Metrorail and Metrobus are critical to maintaining a good quality of life in DC and the metro area. I've	
used Metrorail and Metrobus since the mid-1980s. It deserves to be fully funded and positioned to lead	
our nation's transition to a zero-emission future. I applaud WMATA for expanding bus service and	
improving rail service on all lines over the last few years during the COVID-19 pandemic and other	
challenges. However, instead of cutting service or increasing fares (which may disproportionately hurt	
low-income riders) I strongly urge WMATA to work with regional leaders to secure dedicated, long-term	
funding for Metrobus and Metrorail. I worry that without swift action, our region will enter a transit	
death spiral, where service cuts lead to decreased ridership and lower fare revenue. As a resident of	
Glover Park, Washington DC, I am a regular user of the D2 line. It is a lifeline to the Metrorail system	
and connects our neighborhood to the rest of the DC region. Over time, our bus service has been cut	
drastically. I strongly urge WMATA to keep the D2 service and oppose cuts. In the long term, I encourage WMATA to continue adoption of a system-wide bus electrification effort. Doing so will	
reduce air pollution and the health risks associated with it. It will also reduce greenhouse gases that	
contribute to climate change. Thank you for considering my comments.	Bus Service
This is all insane and I hope the governmentgives you more money Ted Leonsis!!!!	Miscellaneous
Do not cut service. Currently the existing service outside of weekdays already makes my daily activities	
challenging and makes me and my friends less likely to even attempt riding the metro. The constant	
single tracking is frustrating and makes it inconvenient to ride. Fare increases make me want to not ride	
the metro because it is no longer cost efficient. DO NOT INCREASE FARES OR CUT SERVICE! It will not	
increase margins, it will reduce ridership significantly. It also will contribute directly to climate change.	Fares/Fees/Parking
Raising fare would financially impact me. I take Silver from Courthouse/Clarendon out to Innovation	
Center for work, so I?m already paying the max of \$12 a day. Food is already so expensive and	
sometimes I don?t have enough money for metro if I want to eat. Charging me \$15 a day is insane and	
would ruin me. Please don't do this!	Operating Budget, Management and Spending
I currently live in Glover Park and frequently use the bus to get to Georgetown, George Washington	
University, and my job in DuPont. This cut would SIGNIFICANTLY impact me and make me reconsider	
living in the district. I can?t park my car anywhere in the places I commute, and I potentially may not	
even be able to take the bus in. What?s the point when I can get a remote job and not have to do this	
once I graduate? These strides will make myself and my neighbors reconsider living in the District	
especially on top of everything else (homelessness, crime, overall decline of quality of life etc).	Bus Service
Metro has received continual support from local and federal governments over the past several years.	
It is terrible that these funds have not been well used, and we are again faced with the threat of	
massive cuts to service or massive fare hikes. The current path is unsustainable.	Fares/Fees/Parking
Reducing any services (both routes and frequency) will only make people less likely to ever use metro. It	1
will further destroy its reputation for being a reliable transportation option. Why don?t you wait and	
see how much extra revenue is received from the new fare evasion gates?	Bus Service
The 74 bus line is used lots more in SW area than the p6! I think so!? Please keep n2, n6, and n8 on	
Mass Ave, NW too ?? Thank So much!!	Bus Service
Please don?t increase wait times, especially on the red line. A lot of commuters in Maryland, including	
me, rely on the short wait times. The commute is long enough as is without having to wait for the train	
Fewer people will move to Maryland if you increase metro wait times. Also, please don?t eliminate	
rush hour service. The trains get too crowded and it is a public health concern. There have been	
multiple times where I couldn't fit in a train during rush hour. Finally, this survey should have a rank	
choice option. No one is going to say they are in favor of service cuts. You should make people select	
the service sub-show on most encoded. The lat	
the service cuts they are most opposed to. Thanks!	Service Levels

Cutting service and expanding wait times – particulary for those needing to change trains since 20-minute waits could mean 40 or more minutes of just waiting in a station. This will only decrease of people know that driving and searching for parking is faster than Metro. Likewise, increase of people wading fares on Metrobus, jumping over gates at Metrorail do think that the increase of people vading fares on Metrobus, gurping passengers who rely on the	Bus Service Bus Service Bus Service
(1) Keeping the system in 'A State of Good Repair' should be a top priority. (2) I am often in downtown DC on weekends and holidays, but rarely on weekdays. My casual observation is that on weekends and holidays many Metrobuses run with many seats empty. It seems that some data-driven reductions of bus service could be made and impact few riders. (3) Many D.C. Circulator routes duplicate Metrobus routes; having two taxpayer-subsidized bus operations competing with each other is a poor use of public funds. I ride metro daily to go to work early morning at 545 am. the G 12 & G 14 is necessary in my area. When moneys are short, it would make more sense to increase the frequency of trains. Dependable and consistent trains for which you don't have to wait more than 5 or 6 minutes (as in Europe) would increase ridership greatly. Cutting service and expanding wait times – particulary for those needing to change trains since 20-minute waits could mean 40 or more minutes of just waiting in a station. This will only decrease ridership as people know that driving and searching for parking is faster than Metro. Likewise, increase buses between Metro stations. Lastly, find a sane and consistent way to fund Metro. I do think that the increase of people evading fares on Metrobus, jumping over gates at Metrorail which results on financial loss should not be reflected on honest paying passengers who rely on the system. Allocating more budget on fare enforcement and having enforced and scary fines might help.	Bus Service Rail Service

(1) Keeping the system in 'A State of Good Repair' should be a top priority. (2) I am often in downtown DC on weekends and holidays, but rarely on weekdays. My casual observation is that on weekends and holidays many Metrobuses run with many seats empty. It seems that some data-driven reductions of bus service could be made and impact few riders. (3) Many D.C. Circulator routes duplicate Metrobus routes; having two taxpayer-subsidized bus operations competing with each other is a poor use of public funds. Iride metro daily to go to work early morning at 545 am. the G 12 & G 14 is necessary in my area. When moneys are short, it would make more sense to increase the frequency of trains. Dependable and consistent trains for which you don't have to wait more than 5 or 6 minutes (as in Europe) would increase ridership greatly. Cutting service and expanding wait times – particulary for those needing to change trains since 20-minute waits could mean 40 or more minutes of just waiting in a station. This will only decrease ridership as people know that driving and searching for parking is faster than Metro. Likewise, increase buses between Metro stations. Lastly, find a sane and consistent way to fund Metro. I do think that the increase of people evading fares on Metrobus, jumping over gates at Metrorail which results on financial loss should not be reflected on honest paying passengers who rely on the system. Allocating more budget on fare enforcement and having enforced and scary fines might help. Asking the public to weight in on percent capital budget to spend on what is ridiculous. We don't have the required info on hand? Like which things are in the worst conditions on those need the money. Asking that question in this survey does not inspire confidence in Metro?s decision making ability. For the H9 bus cut, are you aware that two additional schools are being built on Taylor NE right across	
from Archbishop Carroll, opening in Fall 2024 and Fall 2025? We anticipate H9 ridership to expand	
significantly with teachers/staff of both new schools and students of the new Latin high school campus.	
In fact we are gearing up to advocate for *more* H9s and more frequent H8 in the mornings at least. It	
is a terrible time to cut that line. If it goes away we may need a different new bus/shuttle to come down to Taylor from Fort Totten, which would offer commute connection with 3 lines rather than just	
Red. The previous slider question is not clear- if I slide mostly to right does that mean mostly through	
service cuts or the greater percentage of the bar being fare increases? You may not be able to use that	
data without clearer instructions. I think cutting the least used routes, stops, times and days is better	
than raising prices.	Bus Service
I really would prefer if services remained the same without fare hikes.	Fares/Fees/Parking
Unfortunately, service cuts will cause a negative feedback loop where I will start to rule Metro out	
entirely as viable for my transportation needs. Don't forget that these service cuts compound where	
transfers are required. It would be good to invest more, regardless of cuts, on continuing to improve	
headways and timing for connections (i.e., even if the headways are longer, make sure that connection	
times remain reasonable). Rather, I hope WMATA continues to consider new revenue sources (e.g.,	
owned development near Metro stations) to continue to maintain service levels and make the agency	
more resilient. In parallel, WMATA should continue to address operational challenges that, if resolved,	
could drive cost savings, such as overtime.	Service Levels
Please do not eliminate the M4 bus. So many students rely on the M4 to get to Deal/Jackson Reed and	
Tenley Metro/Connecticut Ave (to transfer to L2) to get to other schools, work, and volunteer activities downtown. Work with DCPS.	Bus Service
No station closures. No screwing over end of the line rides. No parking increases.	Fares/Fees/Parking
Cut down on fare evaders. Increase fines. Increase efficiency in staffing - particularly management and	n or court or writing
hq staff. Get concessions from unions on salaries and retirement benefits.	Operating Budget, Management and Spending
Eliminating the M4 will dramatically affect a huge swath of upper Northwest, leaving us with no way to	
get to Metrorail.	Rail Service
Please don't eliminate the J1. The J2 is very crowded and does not get me close enough to my work. I	
have long covid and can't walk very far.	Bus Service
Service cuts to the D2 and D6 will stop my child from being able to use Metro to get to school. This	
needs to be reconsidered.	Bus Service
Metro management is to blame for a reduction in ridership. The agency does not take the	
consideration of riders into account. Decreased service will negatively impact those of us who are	
dependent on it to get around, seniors, low income individuals and people with disabilities. More	
emphasis is needed on meeting those needs and in training reputable drivers/operators. Many drivers	
are unable to answer passenger queries regarding transfers and routes and they take no action when	
riders are discourteous round or loud. They need to be better trained and perhaps metro security	
should be on the buses. The way things are being run is putting the lives of vulnerable people at risk and damaging your reputation as well as that of the national capital. It?s disgraceful.	Rus Sonico
Cutting the two routes 74 and P6 from the SW section of town is an outrage. How in the world do you	Bus Service
expect residents who live south of the mall to get into town for work, school or doctor appointments?	
Why don't you enforce fares instead? I pay my fare and observe many just walking onto the 74 bus and	
flouting the rules. This is true for many of the bus routes. Of course you're low on funds. You're not	
collecting fares!	Bus Service
We need greater frequency of trains and all stops open. If raising fares allows for that - great. But	
closing stations and decreasing frequency will only push higher income people into cars and private	Bus Service
The people most impacted are likely not to respond to this survey.	Miscellaneous
Please consider the changing patterns of transit usage when making these cuts! Cutting service	
dramatically in non-commute peaks further reduces likelihood of people to use transit for all purposes	
and reduces quality of life for people who rely on transit in the DC area.	Bus Service
Raise tolls by 100% to get fewer drivers and raise revenue for WMATA. This is the way. Half of the riders don?t pay for rail fares in the first place. Dramatically increasing the pricing for those	Miscellaneous
of us that do pay is only a punishment on law-abiding citizens and would result in a dramatic DECREASE	
in rail riders.	Fares/Fees/Parking
Randy Clarke, CEO of WMATA, makes more money (\$485K base salary as of 2022) than the president of	
the United States (\$400K). I?d venture to say the country?s president has more responsibilities than	
Mr. Clarke. Perhaps we can find budget cuts in C-suite compensation.	Operating Budget, Management and Spending

My child uses Metrobus to get to school and some of the proposed changes will impact her ability to get to school on time. Metrobus serves as a shadow school bus system and that must be taken into account with any of the proposed changes. This will effect the working class that do ride the train or bus. The silder wouldn't load on the previous question, but I would prefer fare increases over service cuts - people are used to price increases, but decreasing service will just lead to fewer and fewer riders due to Metro being much more of a hassle to use. In a region like ours, mass transit is essential and TOP priority over any highway expansion project or parking project. Town centers around metro Stops: Metro needs to rent the land it owns around the metro stop so to developers to build town centers, rather than rent to cars - like is done in Japan where a metro stop opens directly in to mixed use space. That rent revenue can pay for some of these cost/service issues. First - access to metro services (bike lockers, parking spots, train and bus availability) MUST be	Bus Service Bus Service Bus Service Bus Service
96 is essential for students at AU and the D2 is basically the school bus for Duke Ellington. It would make getting to school nearly impossible for those kids. Please keep these in place. What options are you offering for all the students who need to take a bus from DuPont circle metro to Duke Ellington school? The only two options are being eliminated. Please do make aware of WMATA considering the termination of routes and 74 through Hello, I've recently been made aware of WMATA considering the termination of routes and 74 through	Please do not change the D6 bus route, as many of our patients rely on this form of transportation for their healthcare at MedStar Georgetown 17 dl like to offer comments in support of the Metro Access Travel Training program. This program was the single thing that allowed me to use the bus and metro independently. Before receiving training, I was too scared to ride the bus because I wasn't sure how to find it or make sure I got off at the right stop. But when Bridget told me that nearly every bus stopped at a metro station, I became much more confident. She showed me how to find the bus stop, and even how to check when the next bus was coming in live time. She was able to give me tactile Braille maps of the metro and that has enabled me to go new places on my own. The program is such an important backstop for people who live in DC and Maryland and may struggle to access orientation and mobility training through neab services. When I lived in Maryland, before moving to DC, the WMATA program was easier to access than the DORS program and was absolutely critical when I needed training on how to get to a new job. I wouldn?t have been able to keep my job without that training. And now that I?m in DC, we have very limited travel trainers available through nehab services, and sometimes you can get travel training through groups, get to job interviews, or get to medical appointments. I already submitted a survey, but I wanted to specifically address how important this program is to those of us who need it. My quality of life, employment, and access to medical care have all improved drastically since receiving training and I tell all of my blind and disabled friends that it?2 and hostor route to our community. Eliminating the D2 would be very chaotic for many students who go to DCPS schools. We do not have a	
car and there is no bike lane from DuPont Circle to Duke Ellington where my son is at school from 8:30	
to 5pm. We, and presumable one hundred or so others would then be clogging the Georgetown streets	
with our crappy cars we did not want to buy in order to get our kids to school. So cancelling the D2 is a	
very bad idea, and I also think you all know that.	Bus Service
Please don't cancel the D-2 bus. It is a wonderful part of Glover Park and provides the only reasonable	
access to downtown for many people.	Bus Service
I am not in favor of the elimination of M4 and E6 bus service, and the shortening of the L2 route.	Bus Service
In this time of high gas prices, why would you discontinue R12 bus route. Using public transportation	
needs to be encouraged not discouraged. It's bad enough that there is no longer service to BWI from	
the Greenbelt Metro Station. Keep this bus route and any others you are planning to eliminate. Get	
more cars off the road and offer the service to those who don't have cars. Don't raise fares as that just	
makes it harder for everyone as they try to pay bills, buy groceries etc. As everything has gone up in	
price, public transportation should still be available at a reasonable price.	Bus Service
It is a horrible injustice that the R12 route through Berwyn Heights is being considered for elimination.	
This is a very diverse primarily Latino community that really needs and currently utilizes this route. This	
is a particularly ugly case of WMATA taking advantage of a vulnerable hardworking population that	
doesn?t have the resources to complain in person or in meetings virtual or otherwise.	Bus Service
I was wondering if there?s some kind of agreement with a portion of DC?s population?. Out of 10	
passengers, only 3 pay fare? The rest (men/women; young/old) just walk by? drivers seem to comply	Earos/Eaos/Darking
with this ?modality??. No wonder metro is going broke?. ?	Fares/Fees/Parking
Keep the M4 route!	Bus Service
Keep the L2, M4 and E4 routes in their current form! They are critical routes for our community. If	
anything, the routes should have greater service, not less, to encourage more ridership and to better	Bus Service
serve our neighborhoods. Please do not close the Forest Glen Station. It is one of the safest stations and also one of the easiest	
suburban stations for bike or scooter connections. It also generates parking revenue. I will switch to	
MARC if Forest Glen closes.	Fares/Fees/Parking
I strongly object to the consolidation of 31 and 33 bus routes. My child takes these buses every day to	i urcaji ecaji urking
and from school in another ward. This consolidation will make her commute to and from school	
extremely difficult. Buses are ALREADY very crowded and don't run frequently enough. This	
consolidation will cause extreme hardship to my family	Bus Service
WMATA is already by its (historical and) recent scheduling screw-ups creating a perfect death spiral and	
the current budgetary offering is yet another gift of chaos and alternative commuting incentive. Where	
Metro should have focused was on integrating cross jurisdictions; instead, Metro has encouraged /	
continued balkanization.	Operating Budget, Management and Spending
Please do NOT get rid of the G2/any public transportation that is close to Georgetown University. It is	
hard enough already to get around with the few infrequent stops of the buses, and you want to take	
away the only bus we have that actually comes to our campus?! If I don?t have the G2 or the other	
buses, I literally have NO OTHER OPTION than to pay an exorbitant amount of money to get	
ANYWHERE. It?s already upsetting that Georgetown Uni doesn?t have a metro(though I understand	
this isn?t your fault), but we cannot have the only public transportation near us taken away as well.	
Even though Georgetown has provided buses, at times- especially on weekends (WHEN I WANT TO GO	
OUT AND EXPLORE) they are INCREDIBLY unreliable?.PLEASE DO NOT TAKE THE G2 OR THE OTHER	Bus Service
if the D6 bus is eliminated, I will no longer have a way to get to work. For the patients that I care for, I	
fear that providers will no longer be able to sustainably get to work. The elimination of this route is	
unacceptable.	Bus Service
Cutting the D2 and the D6 (among many other routes) would be detrimental to the many students and	
neighbors that rely on these buses to get to work and school. It?s insane that the city is budgeting	
money for luxury things like pickleball courts and billionaire sports owners tax breaks, but not funding	
necessary infrastructure and transportation.	Operating Budget, Management and Spending
My16-year old son on takes the D2 regularly to connect to the Red Line at Dupont Circle that gets him	
to and from school near Fort Totten. It is essential to his life as a student, student-athlete, and student-	
artist, as it enables him not only to get to school, but also to participate in afterschool and weekend	
activities. I'm not sure how my family, with two working parents, would manage without it.	Bus Service
I do not want to see NH2 route disrupted. I am okay with reducing metrorail times and low use dates to	
ensure we dont have an increase in cost.	Bus Service
I am writing to strongly oppose any change in bus services for the 30, 31, 33, 96, and N2, N4, and N6	
buses I am on the board of directors of the Chancery Apartment Tenant Association. We have 206	
apartments in our building, which represents well over 300 people because we have many families.	
Children rely on the 30 buses to get to Hardy middle school in Georgetown. There is no way to get to	
that school by Metro. What will these children do? Many parents in my building do not have a car	
because they cannot afford one and anyway there is no parking available in this neighborhood.	
Therefore they rely on the bus as the only way for their kids to get to school. Many people have only	
one way to get to work and that is using one of the above buses. We are between the red line	
Tenleytown, red line Dupont Circle, and blue line GW Metro stations. Some people do take the bus to	
the stations and transfer to metro rail; others just go as far as Dupont Circle or downtown DC and get	
off the bus. Either way, the buses are vital to their transportation into work. If you eliminate all of	
these, how will we get to the metro stations?! It is about a 10-minute ride on the N buses to Dupont	
Circle where people can also catch a red line train. It is about 15 minutes for the bus to go through	
Georgetown and get to the GW station and another five minutes to get into downtown. There is no other way of reaching their destinations that is quicker than the bus On behalf of the three hundred	
persons in our apartment building, and the members of the Association, we beg you to reconsider	
eliminating these services. The buses are already very crowded so you will be leaving many, many riders	1
with no options. Respectfully submitted, Katherine Murray Secretary of the Board of Directors Chancery Apartment Tenant Association 3130 Wisconsin Ave. NW Washington DC 20016	Bus Service
I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital	
route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus	
is the only reliable public transportation to this part of the County, which is critical for the County?s	
economy. This hus service is a crucial support for our area. Please consider all efforts to protect full T2	
economy. This bus service is a crucial support for our area. Please consider all efforts to protect full T2 Metrobus for the many riders who require this service to get to work school and other activities	
Metrobus for the many riders who require this service to get to work, school, and other activities.

I am against the elimination of the D2 route and the consolidation of the 31 & 33 routes. It would	
greatly impact the kids at duke Ellington, my daughter and her friends rely on it for school	
transportation. So many kids would be negatively impacted by this, please do not eliminate the route!	Bus Service
To Whom It May Concern: We do not have easy access to Metro being between Tenleytown on the red	
line and GW on the blue line so we must have bus access to Dupont Circle. We are seniors living in the	
Chancery apartment building with at least 300 people and 206 units. It is vital for most of the tenants	
to reach their jobs by bus, the children to go to school by bus, and seniors, many of whom have	
mobility issues and low incomes, to go to Dr appointments, shop, etc by bus. The buses are almost	
always very crowded. Please don't take away our buses. Thank you. Kind regards, Margaret((Peg) Egan	
Harold Erickson 3130 Wisconsin Ave NW #806 Washington DC 20016 252-497-0676	Bus Service

Comment	Category
The shortening of the 33 bus route would make it a lot less useful for downtown commuters since it	
would end at Foggy Bottom. The cutting of the 96 bus would eliminate service to areas that are not well-served by Metro. These cuts and the reduction in service levels on Metrorail makes taking public	
transit less feasible. People will drive more or won't be able to take up opportunities for work or school	
if transit isn't reliable and convenient. Metro needs to invest more in service levels, not cut service.	Bus Service
The D2 and D6 metrobus ridership serves Duke Ellington SoA, MacArthur HS, and Hardy MS. Any	
ridership data used in this decision may not be accurate - STUDENTS typically do not scan their	
KidsRideFree card	Bus Service
Greetings, I've been a resident of Ward 3 since I became a DC resident in 1961, back when the buses	
were operated by DC Transit. The neighborhoods of Chevy Chase, Barnaby Woods, and Hawthorne	
have large concentrations of seniors, many who live in individual homes, some for many decades, and some living in apartments. Many of them are reliant on the buses, but without buses going through the	
neighborhood, these folks would have to drive everywhere. Prior to the pandemic, we used to have	
three routes that ran through our neighborhood, the E4, E6, and M4, plus a bus that would take up u	
Coonective Avenue to Kensington and Aspen Hill. With the proposed cuts, we would only have one, the	
E4, which doesn't help folks in Barnaby Woods or Hawthorne M4 - Elimination of the M4 line would	
mean no DC bus service down Nebraska Avenue and (along with the the elimination of the D6 line) to	
Sibley Hospital), the only hospital in our area. Also, hundreds of school children rely on the bus and	
they would be out of luck. You've already eliminated the E6 line E4. I want to verify that you're	
keeping the section of the E4 that runs on McKinley Street, and not re-routing it to stay on Military	
Road. If you made that change, nearly the entire triangle (Military, Western, and Rock Creek Park)	
would be a bus desert L8 Elimination of service along Conn Av from the DC Line would eliminate trips to Konsington (to Koicar, for example). Wheaten and Acore Hill, Beducing buset to only be forder: to	
to Kensington (to Kaiser, for example), Wheaton and Aspen Hill. Reducing buses to only be feeders to and from Metro stations, would for example mean that, to make a trip to Wheaton Plaza would require	
a bus to the Metro, a ride all the way around the Red Line to Wheaton and another bus. It could take	
seniors as many as 3 buses to get to Kensington We need a community bus line that snakes through	
the streets of these neighbrhoods and takes us to Friendship Heights Metro. Ride On does a good job	
with this sort of things, perhaps you could partner with them. General comments: - Comparison has	
been made to other cities, such as NYC and SF. Bicycles in those other cities only work in areas outside	
downtown areas, if there is a robust bus network. In those cities, buses blanket the entire cities. In the	
SF (49 square miles), there is a bus stop within a quarter-mile of every home If the Mayor and others	
want to reduce reliance on cars, then transit needs to serve more people not less. And yet there has	
been a continuous reduction of our services over the years, as you can see from the maps.	Bus Service
Please do not close Forest Glen Metro!!!! People live where they live because of proximity to metro. Shutting down stations is not the answer- more housing near stations is!!! Montgomery county is	
expanding dense housing options around Forest Glen. This is a reversal of where we should be going in	
the DMV area. Ridiculous.	Rail Service
This is regarding the elimination of D6 & D2 bus routes ! This is a bus service that benefits lots of the	
Georgetown hospital & employees esp the hospital staff! Highly recommend you find the budget to	
keep it running !	Operating Budget, Management and Spending
the deadline. You may find the words in this testimony to be more of a rant and have, as the kids	
would say, ?no filter.? To learn that the WMATA has proposed budget cuts to public transportation in	
the greater DMV area is disheartening, unencouraging, and down right sickening. I have become a	
commuter from Howard County to Montgomery County, and sometimes Washington, D.C., since I have	
started working my job as an arts administrator at a Theatre for Young Audiences in Montgomery	
County. My job description entails going out to the community at large to create partnerships with	
individuals and organizations, and to bring new audiences to theatre. As a person without a working	
vehicle, and working a job in a non profit, commuting between multiple areas has become exhausting	
not just for my body, but for my wallet as well. I have to get up mega early to take one commuter bus	
to cross counties, and multiple metro buses to get to my office or other organizations for meetings. My organization does have commuter benefits, but only up to a certain limit. And with the proposed cuts,	
as well as the rate hikes and time changes, that would severely impact my ability to physically reach the	
great and outstanding community of the DMV, let alone get to my office. And THERE IS NO WAY ON	
GOD?S GREEN EARTH THAT I CAN AFFORD TO PAY FOR A RIDESHARE APP SUCH AS UBER OR LYFT TO	
GO EVERYWHERE EVERYDAY. But let me not make this about me. We can talk about the families that	
don?t make a livable wage in these stressful financial times to afford a car and have to pinch pennies	
just to get around during their day to day. We can talk about the people who have disabilities or a	
physical ailment and rely on public transit. We can talk about the people who will be vulnerable and	
unsafe waiting for the expensive and limited public transit that you're threatening to create. We can talk about the kide who rake on public transit to get to school. We can talk about the kide who can?t	
talk about the kids who rely on public transit to get to school. We can talk about the kids who can?t access our incredible and engaging programming at our theatre, or any educational/recreational	
programming, because their parents may not have cars and can?t afford reliable public transportation	
or a rideshare app. Thus creating a generation of children who have no outlets, and who turn to	
destructive behavior, and create an abundance of issues that you see in our community today. The	
proposed budget cuts, rate hikes, and all of your ?business saving plans? do nothing but cut jobs for	
people, keep the common human being broke/stressed/depressed, and, if you haven?t properly done	
your research and analysis, contribute to an already crippling and unsustainable society. If you think	
times are hard now, just wait until these cuts are approved. To use another euphemism from the young	Operating Budget, Management and Spending
Please do not cut service or make route modifications to the 42 and 43 lines! These are extremely	
popular and well used lines and are a vital lifeline for the Adams Morgan and Foggy Bottom neighborhoods. Many people, such as myself use these lines to get around over the weekends. Also,	
ending the 42 and 43 at Farragut Square, instead of extending into Foggy Bottom, is a huge mistake.	
The majority of people who use the 42 and 43 during rush hour actually work south and west of	
Farragut Square. Previously, when the routes ended Farragut Suguare, the majority of people would	
have to walk south and east many blocks to their workplace. The extension into Foggy Bottom solves	Bus Service
please don't eliminate the M4 bus route!	Bus Service
Please do not cut the 96 bus. It is the only public transit connecting neighborhoods such as Woodley	
Park, Adams Morgan, and Columbia Heights. Kids who attend Oyster-Adams need this bus to get from	
Woodley Park to the Adams campus or from Adams Morgan to the Oyster campus.	Bus Service
As one of the rare millennial homeowners in the area, I bought my house to be close to public transportation. Closing the Earest Close station would cause incredible bardship for my family and limit.	
transportation. Closing the Forest Glen station would cause incredible hardship for my family and limit	
our ability to do many things. Do not close the Forest Glan station - it is vital to the paighborhood and	
our ability to do many things. Do not close the Forest Glen station - it is vital to the neighborhood and encourages development that is sustainable.	Rail Service

Comment	Category
I want to give my comment about the strong impact that will have on my house and family if they cut	
the R12 service in Berwyn Heights MD. My husband, me and my mom (80 years) we use the R12 bus to	
connect with the Metro service in College Park. If they cut the service we will not be able to access the	
subway. My mom uses the Metro Access service, to come home. Part of the rules is that there is a bus	
line in proximity. If you cut the R12, are you going to cut our use of Metro Access, too? In the neighborhood there is a large percentage of old people who use Metro Access. This will leave you	
unable to go to medical consultations. That is not fair. We ask that to the maximum, they only cut	
express routes or that only the bus comes every hour, but do not cut the route (R12) completely.	Bus Service
Ending the bus service for R12 in Berwyn Heights, MD will adversely impact my entire family. My	
husband uses the R12 bus to commute to his job via the College Park Metro Station. This will add at	
least 45 minutes to his commute, and put him danger by having to walk from the metro station to our	
home. We only have one car, and when it is in use, the R12 is the only way for me to travel to grocery	
stores in the local area and neighborhood. The town of Berwyn Heights, does not have sidewalks, and	
has very limited lighting. The only choice I have is to walk in a fully dark path along Lake Artemesia, or	
have to walk on the neighborhood streets, past neighbors who have screamed racist chants at me,	
because I'm Indigenous. I will have to walk at least 40 minutes the long way to get to the metro station.	
Finally, my 80+ year old mother visits me and we go to her doctor appointments using the Metro	
Access. Part of the regulations is that we both live near bus routes. Will her ability to use Metro Access to my house, be stopped if you cut the R12 route? Almost 20% of our Town's population is elderly, and	
need Metro Access and the bus system to go to doctors visits. Cutting this route completely will	
adversely impact their health. At the very maximum, you should only consider reducing the frequency	
in schedules, maybe to every hour or 2 hours. But please DO NOT cut the R12 bus all together. Perhaps,	
if you spent less funds fixing the same entry to the station escalator at the College Park Metro, you can	
save money and maintain the R12 bus route. Thank you, we hope you listen to your bus riders, and tax	Bus Service
I also wanted to comment that many times the problem in a train station because it has to affect the	
service in many stations and that there are delays in the service of the other stations because the lack	
of preparation for those unforeseen events makes it often arrive Late to work or other appointments	
for missing planning we hope that the changes will benefit all users also to thank for the opportunity to	
provide that you can comment on the changes they want to make. He also wanted to say that in some bus lines in Alexandria there are some drivers who do their jobs reluctant other times do not pay	
attention when people want to go down are doing work as force and I think they are paid for driving	
the Buses should be more friendly.	Bus Service
Unclear if the changes in area would allow me to get to doctor appointments and work. For example,	
could I travel from Reston to West Springfield? I don?t mind the increase to \$5. If not, this greatly	
decreases my ability to use this service and get to locations. Another example is a doctor in Sterling	
from Reston. I think the proposed changes help those living and needing to get to work and doctor	
appointments within the 3/4 mile of metro but that doesn?t work for me. Would leave me without	
transportation options for critical things.	Rail Service
Why the hell do we pay all these taxes just for the bus not run on time . This is disrespectful and you	
guys are playing with people's time	Bus Service
Metro is ridiculously irresponsible. Always late, any temperature they are still inconsiderate of the	Due Comine
customers You may raise fares and even cancel or re-rout some bus routes. But it makes no sense what so ever to	Bus Service
cancel metro stations. The train is already going through those stations and areas are booming and	
growing around those stations, which means that more people will be using the metro. People are	
bulging and buying next to metro stations so that they can use it. They are working to bring you more	
traffic and business and shutting down stations would only reduce the accessibility to the system and	
less riders. So please make the right decision and keep those metro station open and make them more	
accessible.	Bus Service
The G2, D2, and D6 Metrobus routes are fundamental for transit to and from Georgetown University.	
No other route, apart from the Circulator and Metrobuses on M St. come within 33rd street for direct	
assistance to students and staff members of the University, as well as residents within the area.	
Removing all three lines would force this population without a direct line of transit to the Dupont Circle metro station (D2), downtown eastern DC (D6), and Logan Circle/Howard University (G2). If you need	
to cut one of these lines, the D2 is the one to cut, as its service route along the populous areas of	
Georgetown/Dupont is already covered by the D6. Until Georgetown has a metro station, please do not	
deprive us of the limited transportation routes we currently have. Thank you.	Bus Service
I am a Georgetown student and these proposed changes greatly affect my ability to commute to work	
and participate in activities in DC. Not only would this effect me but also so many other students and	
faculty at Georgetown. We already don't have a metro stop, which makes it very hard to commute, but	
now the proposals would take away the only three buses that come to Georgetown.	Bus Service
As a Georgetown student, I can confidently say this would be a horrible reduction in our access to the	
greater DC area. Not all of us can afford Ubers and getting a public transportation at the front of our school makes getting around the city extremely convenient. It is already extremely difficult to find the	
few public transportation options that exist in Georgetown and this change would be absolutely	
terrible for Georgetown students and residents that rely on these buses!!!	Bus Service
The G2 bus is the primary method of access to downtown and Dupont Circle for Georgetown students.	
Given that we do not have a metro stop, eliminating the G2 would isolate us from the city. Please	
consider keeping the bus! Thank you	Bus Service
Please do not eliminate the G2 metro bus. It is the only way I can reliably get to and from Georgetown	
University. Without access to this bus my ability go to class will be significantly reduced.	Bus Service
The G2 bus is currently the ONLY form of WAMATA transit that services Georgetown University. For	
those who live further out in Washington, DC the G2 is the most reliable method of reaching campus. It is vital to integrating Georgetown neighborhood with the rest of DC. It is ridiculous that any cuts would	
is vital to integrating Georgetown neighborhood with the rest of DC. It is ridiculous that any cuts would be proposed to this line, if anything this line would benefit from more frequent service. The	
Georgetown University campus is currently extremely inaccessible from a majority of neighborhoods in	
DC, by increasing services, more students would be able to live in other parts of DC and commute to	
the university but by eliminating service complete, students will be restricted to the more expensive	
neighborhoods of Dupont and Geoergetown for campus housing, exacerbating housing needs in these	
neighborhoods and leading to more housing insecurity for students. The elimination of the G2 line	
would be anti -student and anti-education. Boo	Bus Service
I support keeping the G2 metro bus line in service. This is a crucial public transportation route for staff	
and other community members needing to reach Georgetown University and the Georgetown	
neighborhood, a place with limited rail service and costly parking. Thank you for considering.	Bus Service
The G2 line is a critical public transportation open to access Georgetown as neighborhood and	
Georgetown University in particular. There are no other public transport options that residents, graduate students, or undergraduate students have to access these areas from northern parts of NE	
and NW neighborhoods. Eliminating this line would be a grave misstep and would inconvenience	
thousands of students, DC residents, and tourists. Please reconsider this change.	Bus Service

Comment	Category
Eliminating the G2 direct line to Georgetown University's front gates will further isolate low-income	
Georgetown students from accessing DC for internships and leisure activities. The campus shuttle buses	
already don't offer service on certain days, and not all of us are loaded enough to pay Uber fees every time we want to go into DC. Please please reconsider this change.	Bus Service
G2 services the student community in Georgetown, allowing us access to greater DC for jobs and	Bus Service
internships. There is no metro stop in Georgetown, so we have to rely on bus services. If G2 and D2	
were both eliminated, students would be severely and adversely affected. Please reconsider this	
decision. Students would have no public transportation option if these routes were canceled, imposing	
huge financial costs and time burdens on students.	Operating Budget, Management and Spending
The Georgetown community relies on the G2 bus system, and its elimination would be catastrophic.	
The workers who depend on the G2 bus system would be left with no alternative transportation,	
potentially endangering their job and leaving District families without a source of income. The students who rely on the G2 to access grocery stores, pharmacies, places of work, and more would be left	
isolated with no alternative connections. Those who are low-income and/or disabled would be the	
worst affected. It is tremendously important that these groups particularly have access to the	
educational and professional opportunities in the Georgetown community. The ramifications of this	Bus Service
The Georgetown community and university students depend on the G2 route, alongside the 31 and 33	
routes, for access to the District. The elimination of the G2 route would eliminate the most accessible	
(and only) bus route directly connected to campus; combining the 31 and 33 routes would reduce	
service for our community, too. I oppose the decision of WMATA to alter these routes; I hope they	
make a revision that reflects the interests of Georgetown's 7000+ students and associated community	Dis Casa las
members, too. The G2, D2, and D6 are essential routes that the WMATA needs to keep. The Georgetown area is	Bus Service
already incredibly inaccessible, and by proposing to remove these stops, hundreds of residents,	
students and employees in the area will suffer. These stops are also heavily in use and one of the sole	
ways that people in and out of the area can get to Georgetown University?s campus. Do not eliminate	
these routes. Thank you.	Bus Service
D2 is a very important route for me and all others who live in Glover Park. Please do not remove this	
service - I utilize it a lot and would really impact my daily commute and schedule.	Bus Service
As someone who frequently uses the G2 Metrobus to the Georgetown Neighborhood, it is an injustice	
to eliminate this stop going to the Georgetown University campus from the new routes. Many college	
students rely on public transport as a less expensive alternative for transportation. How can we afford to get to our off-campus jobs now, particularly since Georgetown does not have a metro stop? This	
to get to our off-campus jobs now, particularly since Georgetown does not have a metro stop? This move would alienate an entire community from the rest of DC. I strongly implore you to re think this	Bus Service
KEEP THE G2	Bus Service Bus Service
I'm highly against the proposal to eliminate bus route G2. It's an essential route that allows me and	
other college students here at Georgetown to access work opportunities and internships in other parts	
of the city during the year. Lots of students also use it to commute from their residence to campus.	Bus Service
Do not eliminate the G2 bus route - there is no other way to get to the Georgetown campus that	
doesn't involve an uncomfortable amount of walking. As a Georgetown student with a disability, this	
route is vital to ensuring I can go from the city to Georgetown and vice versa.	Bus Service
Please keep the G2 route the same!	Bus Service
The proposal to remove the G2 bus stop in front of Georgetown university is a horrible idea. Many students use the public transportation system and Georgetown does not have a metro stop so	
eliminating the bus stop would cut Georgetown students off from the rest of the city. It's unfair to	
those like myself who use the G2 bus multiple times a week to get to jobs. I am not the only person	
against this proposal. Please consider that the G2 bus stop in front of Georgetown allows for a more	
educated and involved community. Thank you.	Bus Service
PLEASE don't get rid of the G2 bus route! It would seriously limit our ability, as students at GU, to get	
into the rest of DC as transportation near the university is already minimal. Not having a metro makes	
us rely on busses like G2	Bus Service
Recently found out that there was a proposal to eliminate the G2 bus route, and I wanted to express my opposition to this removal. The G2 bus route is one that I, like many students at Georgetown and	
Howard Universities, use frequently, and would be disappointed to see gone. Thank you for your	
consideration.	Bus Service
Do not get rid of the G2 route to Georgetown University. This will make the campus completely	
inaccessible as they are no alternate public transportation options to the campus.	Bus Service
PLEASE DO NOT GET RID OF THE G2, D2, and D6 BUSES!!! I am a Georgetown student, and as it is the	
Georgetown neighborhood does not have many public transit options. the G2 is the only one that	
comes to campus, and this is a huge safety concern for people and women especially who are	
commuting alone at night because we would have to walk 15 minutes to the nearest 33. Also, a lot of people on campus use the G2 to get to Dupont circle to get to the metro, and without this it is even	
more inaccessible. I use the D2 and D6 to get around the city and to different appointments because I	
live off campus. This is a huge safety concern if we remove the buses, and also unfair and inaccessible	
for our community. Please please keep them. Thank you.	Bus Service
please keep the D2 its the only way i can get to work and school and the hospital and literally	
everywhere. i will be really upset if the D2 gets cancelled	Bus Service
The G2 line if a thoroughfare for georgetown students in DC past duport circle. To take away this route	
cripples the ability of DC residents who are seeking higher education, but do not have the resources to	
pay for rent in the high end Georgetown, DuPont Circle, and Glover Park neighborhoods. To take away	
this bus route is a hindrance to upward mobility that education provides and reinforces the class separation related to DC?s not having a metro stop in Georgetown	Bus Service
Separation related to DC7s not having a metro stop in Georgetown My name is Libra Robinson I live in Washington DC and I am a legally blind Metro Access user. I utilize	
this wonderful service not only to conduct my personal business but most importantly to travel safely	
and independently as a blind woman. The proposed budget cut in operating hours, removal of some	
bust stops and closing of Metro Rail stations would profoundly impact me and so many other riders. I	
do understand that operating WAMATA, the necessity for employees and the intricacies required for	
operation is a huge undertaking. I am wholeheartedly requesting as you make your final decision that	
you not only look at the bottom line, but you also be mindful not to leave your customers behind.	
Thank you in advance for your consideration and thank you for all you do!	Operating Budget, Management and Spending
The proposed elimination of the G2 route is a very bad idea. It is an essential bus/route for many	
people. There are numerous North-South bus routes (and metro lines), but East-West routes are lacking. The elimination of the G2, an important one, would make commuting and navigating DC much	
harder for so many. Please reconsider.	Bus Service
The G2, D2, and D6 Metrobus routes are the only routes connecting the Georgetown University campus	
with the rest of the D.C. area. Please do not end these services. They are essential to providing	
accessible transportation for students all around the District.	Bus Service
Keep G2 at Georgetown gates	Bus Service
Is Georgetown not isolated enough? I know that the rich twats of this neighborhood hate the idea of	
anyone who is not old and rich stepping foot into this neighborhood, but we were a University first. We	
already lost out on a metro stop, don't take away our one connection to the outside world.	Bus Service

Comment	Category Rue Service
Please do not get rid of the G2 stop in Georgetown!!!!!!! Would really hurt the students. Now WHY would you propose cutting service in Georgetown of all places. We have no underground	Bus Service
public transport, so there?s no way of getting around to the rest of the city without either driving or	
getting on a bus. The buses are not only clean but super efficient! They?re fast and usually on time. I	
love them and would hate to see the G2 leave our neighborhood, as well as the 31 and 33 routes being	
consolidated. I understand there may be budget shortfalls in the city, but that should NEVER come at	
the expense of public transport. I?m not one of the rich Georgetown residents, I can tel you that much.	
I DEPEND on cheap options to get around.	Operating Budget, Management and Spending
The G2 is absolutely necessary for me to get to work. Even on early Saturday morning, other students	
and adults need the G2 to get to the Dupont Metro Station. Georgetown University, does not provide	
frequent weekend transportation to surrounding metro centers. Georgetown also does not have access to non-bus modes of public transportation. Further, at night on weekends, both the D2 and G2 are	
packed as people come back to Georgetown making it even more necessary to have these stops. Me	
most also keep in mind older/disabled members and visitors of the community who cannot walk long	
distances to get back to campus. With most of the back of our campus blocked off, people struggle to	
get through the back to seek farther bus stops due to hospital traffic.	Bus Service
I strongly oppose service cuts to the D2, D6, G2, 31, 33 and 96 routes. These bus lines are the only way I	
am able to commute to my job at Georgetown University and are vital for the students and staff that	
work there.	Bus Service
Please do not remove the G2 bus. Many people who live and work in Georgetown rely on this route to commute and connect to the center of the city	Bus Service
Accessibility and safe travel to the Georgetown area would be almost eliminated by these proposed	Bus seivice
changes. This is not only disruptive to student/Georgetown community members to be able to travel to	
other parts of the city, but it is also a safety issue for those who cannot afford ubers and will have to	
walk that distance.	Fare Evasion/Safety/Crime
Please please please don't get rid of the G2 bus, it's one of the main and few ways I am able to	
commute to places I need to.	Bus Service
Please save the G2, D2, and D6 buses. As a DC resident without a car who works at Georgetown	
University, these routes (especially the G2) are essential to my being able to live and work in DC.	Bus Service
Eliminating the G2 and D2/D6 bus routes to Georgetown would have catastrophic effects on the diversity and on the working staff members at Georgetown as well as off campus seniors/juniors who	
travel to work from campus and internships back and forth. The Gus bus can be an inefficient and	
nonreliable way to campus for georgetown students and is not even usable to those who are guests of	
the neighborhood. I am disappointed that metro is trying to further suppress diverse communities	
access to this neighborhood and hopefully will find someone else to talk to i am disgusted by these	
proposed changes.	Bus Service
I am a first year Masters student studying at Georgetown University. I live in Columbia Heights and	
have to commute down 14th street to the G2 that comes every 30 minutes on P street. When I miss	
that G2 bus, I have to wait 30 minutes for the next one, making me late for class and often waiting for	
transportation for over an hour and a half everyday. Cutting the G2 bus is cutting my lifeline to my	
education. I NEED this bus to transport to school otherwise an Uber often costs \$15-20 each way. This is not feasible for a young adult that is working full time as well as attending classes full time. Cutting	
the G2 will cause an uproar in the community as it is the lifeline for students. Georgetown is as much as	
a residential area as it is a university and we need a way to get there and improve accessibility in the	
Capitol of the United States. The G2 is the bus that takes me home after my lab ends at 10pm every	
week. Without it I would have to walk in a crime prone area in the dark as a young petite woman	
alone. Cutting the G2 is cutting the lifeline of commuter students.	Bus Service
Every night I leave Georgetown University through the G2, I am accompanied by an elderly man that	
works at GU. He takes the same route as I do to travel home each night before coming back early	
morning for work again. Everyday he is on the G2 religiously for as long as he?s worked there. Cutting	
the G2 is cutting his way into his livelihood and the support he has to provide for his family. Do not cut the G2 as you are decreasing accessibility to both workers and students alike	Bus Service
I am very much against the proposed elimination of the N buses on the weekend. The N bus covers a	Bus service
wide area in Northwest DC and for many people this bus is the only way to get to American University,	
shopping areas, and the library in this section of DC. It also takes residents to the Metro in Tenleytown	
and Bethesda. This bus transports a diverse group of citizensyoung and oldwho will definitely be	
poorlly impacted by its elimination.	Bus Service
Please keep the G2 bus as it is the only convenient option for Georgetown University staff and students	Bus Service
Please keep the G2 for Georgetown college students! Public transportation is already so incredibly	
limited in that area If the G2 Route is removed I will not be able to get to class at Georgetown University. I live on New	Bus Service
Jersey Ave and the G2 is the reason I am able to live where I live, so far away from school. I take this	
route four days of the week. It would be catastrophic to my time.	Bus Service
Please keep the G2 line - lots of Georgetown students and employees rely on it	Bus Service
DO NOT REMOVE G2. IM FROM GEORGETOWN I USE IT WEEKLY.	Bus Service
The G2 bus cannot and should not be terminated as it provides the only public transportation system	
that links the rest of the city to Georgetown. Targeting a minority group by removing the accessibility of	
a transportation mode is injustice, it is discriminatory and does not coincide with EEO guidelines.	Bus Service
Do not let Georgetown close down G2. Many workers use that bus to travel home from work leaving them stranded.	Bus Conviso
them stranded. The connection of the G2 bus to the Georgetown University campus is a vital link that needs to be kept	Bus Service
even amid budget and fare challenges. Besides providing the connection from Dupont Circle that is fast	
and reliable, it is something that can be depended on in the wee hours or the late hours. It is a vital link	
for many of Georgetown's service employees. It has always been the best way to get from point A to	
Georgetown when I am on public transit. And it is an integral part of my very connection to	
Georgetown University. The G2 brought my mother to and from campus in the 1970s as a commuting	
student from Baltimore. For the sake of Hoyas present and especially future, please do not sever this	Operating Budget, Management and Spending
Really love the G2 bus- It's the main way I get around Georgetown from Adams Morgan!! Please	
consider that it is the only way around there for me since there is no metro!!	Bus Service
I am writing to express my concern regarding the proposed cancelation of the G2 metro bus route.	
Georgetown already suffers from a lack of access to the rest of the region without having a relevant metro stop. Removing the G2 bus route would remove a critical part of the infrastructure of this	
neighborhood, impacting residents, students, and employees working in the neighborhood. To remove	
the G2 route would be a spit in the face of the many hardworking tax payers who depend on WMATA	
and the G2 route to provide for their families and explore the city.	Bus Service
Please do not eliminate the G2 bus route. It is vital for accessing the city for Georgetown students such	
as myself and countless others.	Bus Service
As a student at Georgetown University, I rely on the G2 and D6 metrobus for easy transport into DC, so	
that internship opportunities in the city are easily accessible to me. The removal of the G2 bus line	
would greatly impact my university experience and my ability to participate in DC enrichment	Bus Service
opportunities.	

Comment	Category
I rely on the G2 bus to commute to Georgetown University and do not know of or have any alternative	
budget that would be so reliable to go between the Logan circle and Shaw neighborhood directly to	
one of the largest employers in the District. This must be reconsidered!	Operating Budget, Management and Spending
February 29, 2024 To Whom it May Concern at WMATA: I am writing to you today to voice my great	
concern about the possibility of the T2 Metrobus route being eliminated. I want to stress the vital role	
that the T2 Metrobus route plays in the community. This is a key route for many individuals and	
families to access a large and bustling swath of DC, Potomac and Rockville. As you know, this bus	
provides access to students and staff at several schools including Walt Whitman High School, Bullis	
School, and Ritchie Park Elementary School and also to key facilities such as libraries and community	
centers. The bus is particularly vital to the economy of the many shops, restaurants, offices and two	
country clubs along River Road. To summarize, the T2 Metrobus is the most reliable public	
transportation to this part of the County, and without it people in the area will face barriers to	
accessing places of employment, education and recreation. Please protect this bus line for the many	
riders who require this service to get to work, school, and other activities. Sincerely, Charles C. Wilkes	Bus Service
Please don't eliminate G2 to Georgetown University. Thanks!	Bus Service
Please do not eliminate the G2 Metrobus service at the University's front gates and other G2 stops in	
the Georgetown neighborhood. Georgetown is already constrained from a public transit standpoint,	
and adjustments to public transit from campus could afford to increase in availability not decrease.	
These are a critical link to connecting Georgetown students to DC at large and for helping staff enjoy	
more affordable public transit options. Thank you for this consideration.	Bus Service
Hello, I've learned of the recent proposed changes that would eliminate the existing direct G2	
Metrobus route to Georgetown University?s front gates. I disagree with this decision as it would place a	
great burden on those living in Georgetown to access an efficient transportation route. For residents of	
the neighborhood, students, and faculty and staff, G2 is the only efficient option to get from Dupont	
Circle or deeper DC to the campus. Without a close metro stop, it makes public transportation very	
difficult. Please do not close this service.	Bus Service
I am DISMAYED by the recurring attempt to cancel the D2 bus for budget cuts. I use this bus every day	
to get to work, and have for the past 6 years, across 4 different jobs. It is unclear to me how it is logical	
or equitable to make the bus free while cutting service lines, effectively leaving people who live in	
Glover Park stranded. I am irate. This makes no sense and is shameful. Put a toll on incoming Virginia	
drivers, if you have to! They don't do ticket reciprocity anyways! Tax me more! Literally do anything but	
take away this bus. If you can't make the BUS work, what are you doing???	Operating Budget, Management and Spending
I think the G2 metro bus provides a much needed access route to georgetown including the university	
that is leveraged by otherwise underserved communities that have trouble gaining access to that area.	
don't think this route should be cut.	Bus Service
I am strongly against the elimination of the G2 bus route. As a Georgetown University student, the G2	
bus is the main connection of the university to the public transportation system of DC. If this route	
were eliminated, I would have no connection to the DC public transit system.	Bus Service
Before Metro propose any fare and service charges here is something for you to think about and	
consider. How can it be justified for to ask for a fare increase when you have fare evaders on a daily	
basis? How much longer are law abiding tax payers front those individuals? I take the same route every	
day 4 days a week. Within those 30 min every day the same people get on without paying that?s \$10	
within that 30 min time frame. Multiple that over the whole year and all the other bus routes within	
the metro system. And on top of that 9 out of 10 bus operators don?t even ask the passenger to pay	
they just walk buy. Why should I pay then or even asked to pay more? Unbelievable that metro asked	
this from the ridership	Bus Service
Do not close G2 route in front of Georgetown. Students need public transportation to get into DC and	
the surrounding area.	Bus Service
Georgetown needs G2 route	Bus Service
Georgetown students need G2 bus route!!	Bus Service
Please do not omit the G2 Bus from DC?s public transit scheme. It?s already hard enough to get off	
campus and into the city without a metro stop. Removing this bus line will make it harder for students	
and staff to get into the city. DC prides itself on its diversity, and removing this bus line creates a barrior	
to cultural monility.	Bus Service
I would like to see the commuter 220 bus maintained as a route and not eliminated from service. It is	
valuable for people like me who live an hour outside the city and do what I can to reduce traffic and

I know the L2 parallels the subway for some of its route but the subway isn't always running, especially on weekends when Metro does its track work. I don't have a car. Please don't make these cuts. They are very bad because now they are not working the connector must solve that problem they have with drivers. In Fairfax. The G2, D6 and D2 bus routes are integral to the Georgetown community and our ability to access the city and vice versa. Eliminating them be detrimental to a lively, moving DC. This is the second instance in recent years that I am providing feedback on Metro's proposals to severely cut Gerogetown off from public transportation routes. Every time, the community responds because so many of us do not have alternative modes of transportation. Metro is making a serious error in considering to eliminate the G2 line. This line serves as the only transit option for many people who live between Truxton Circle and Georgetown, getting around inadequate Metro rail service between these two places. I depend on the line to get to and from class in Georgetown, and I know many other students do as well. Please consider keeping the G2 line. Please maintain the G2 line. As an off campus student with accessibility concerns I would have no way	Bus Service Fare Evasion/Safety/Crime Miscellaneous Rail Service
valuable for people like me who live an hour outside the city and do what I can to reduce traffic and congestion on our roads. I would like to encourage our politicians to keep this route. I strongly urge you not to eliminate the M4 bus line and reduce the route of the L2. I live at Connecticut & Brandywine NW. Most of my doctors are at Sibley Hospital. The only way I can get there is by riding the M4. Please don't eliminate it. As to the L2: Wisconsin Ave is well served by the 31, 33 and N2 buses. Conn Ave has only the L2. I know the L2 parallels the subway for some of its route but the subway isn't always running, especially on weekends when Metro does its track work. I don't have a car. Please don't make these cuts. Metro is beyond horrible!!! You want us to pay a fare for a bus that was 1. Not on time 15-30 mins late	
2. There's no ?operator? but you just seen them they decided to take a break when their the best bus	
3. No type of respect towards the passengers the bus operators are very disrespectful	Bus Service
I strongly urge that the G2 bus route remain in operation. This route is a lifeline for myself and other	
Georgetown University workers who cannot afford other forms of transportation. The Other route that serves Georgetown is on the far side of campus and would add almost an hour both ways to my already	
difficult commute.	
Please keep the G2, D6, and D2 lines. They are important to Georgetown students. Without those	Bus Service
buses and a metro rail stop nearby, there is literally no way to get to other parts of the city within a	
reasonable amount of time on a budget. Those options make the city as a whole more accessible.	Operating Budget, Management and Spending
just install a full fair gate so people can't jump the gates anymore. don't move costs onto people who	
have already been paying	Fares/Fees/Parking
PLEASE do not eliminate the G2 and nearby routes!!	Bus Service
I agree with the proposals for the benefit of all	Miscellaneous
Please do not eliminate the G2 bus to Georgetown University. Countless students rely on it for	
transportation to and from campus.	Bus Service
DO NOT GET RIDE OF THE G2 DO NOT GET RIDE OF THE D6 GEORGETOWN UNIVERSITY NEEDS THOSES	
BUSES	Bus Service
I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital	
route for many individuals, businesses and families to access top employers in Montgomery County,	
the top-paying county in the State of Maryland. The T2 Metrobus is the only reliable public	
transportation to parts of Potomac and Bethesda, where many jobs offer distinct and comprehensive	
benefits. My colleagues at Congressional Country Club risk losing access to these great jobs if WMATA	
cuts service. Please consider all efforts to protect full T2 Metrobus for the many riders who require this	
service to get to work. Thank you for your time and consideration. Sincerely, Chris Tessone Silver	Bus Service
Hi, reduction in 52/54 service past Metro Center will make it much harder and more expensive for the	
large number of young federal employees who live in and around Columbia Heights to get to their	
workplaces. This is potentially hundreds if not thousands of critical federal employees who could be	
negatively impacted. We already struggle to attract and retain talent; I worry about the impact on	
mission-critical programs from changes like this that have a real adverse impact on quality of life and	
impose material economic costs on those who pursue public service. I would strongly encourage	
WMATA to reconsider this proposal.	Fares/Fees/Parking
I often use the D6 route to commute between Foxhall/Palisades and Georgetown/Dupont Circle. Under	
the newly proposed routes, there is no way to connect from Foxhall and/or Palisades to these	
locations. Of particular concern is the lack of a bus connection from these neighborhoods to the Metro	
if the service between Sibley hospital and Dupont Circle is stopped. Because of this, I would	
recommend the the western half of the D6 route be maintained under the new service changes.	Bus Service
The D6 Bus route is an essentially traversing the city and accessing critical points that cannot be	
reached by Metro. Absent these routes, one would need to drive or take uber, both expensive options	
that have serious impacts on the environment, traffic and equity. These are three issues that require	
improvement, not compounding affects.	Bus Service
Please don't eliminate key routes like the D2 and G2 which are essential for people to get around,	
especially in areas NOT served by metrorail.	Bus Service
I and many residents of Greenbelt depend on the G12 to access locations along Ridge Road, so	
eliminating the G12 would be detrimental to your customers. If someone misses the G14 to get to the	
Greenbelt Metro Station (GMS), currently we need to wait only about half an hour to catch a G12 to	
that same destination. If the G12 were eliminated, the G14 would be the only option to get to the	
GMS, and customers would need to wait an entire hour if they missed the G14, which happens often	
because drivers often arrive as much as 10 minutes early to bus stops. For me personally, I depend on	
the G12 to get from my home to the Greenbelt Animal Shelter, where I volunteer. If the G12 were	
eliminated, I would not be able to get to the Animal Shelter, thus denying me of a volunteer	
opportunity and the cats of a devoted animal lover. Regarding discontinuing weekend service for both	
the 83 and the 86, this is overkill, meaning both routes should not be eliminated on weekends. I often	
depend on the 83 or 86 to get from the College Park Metro Station to sporting events at the University	
of Maryland, so discontinuing these routes would mean that I, and probably many other fans, could	
not get to sporting events on the weekend. My recommendation is that WMATA raise fares as it has	
proposed, then see how doing this has helped its budget. Discontinuing routes that customers depend	
on should be the very last thing WMATA considers.	Operating Budget, Management and Spending
Maybe you guys wouldn?t be in financial trouble if you actually made people pay at the gates, instead	
of literally doing nothing when people jump the gate. (Seen firsthand at College Park-UMD, Fort Totten,	Operation Budget Measurement and Constitute
Silver Spring, and Forest Glen stations, but i?m sure it also happens elsewhere)	Operating Budget, Management and Spending
Will Metro do the MINIMUM and change the entries to the subway so that users STOP sneaking in without paying? I'm so sick and tired of seeing people pat pay. No wonder Metro has a deficit. This has	
without paying? I'm so sick and tired of seeing people not pay. No wonder Metro has a deficit. This has been going on for decades and Metro does pretty much NOTHING? Are you kidding me. Also, Metro	
failed to properly maintain the system and now using it is a nightmare because you never know what's	
working on not. You can't plan as a user.	Fare Evasion/Safety/Crime
The D2 and D6 bus are critical for two things that are very important to me. My daughter goes to DESA	
and the bus is the only way for her to get to school. I work at Georgetown hospital and commute by	
bus. Changing the bus routes would negatively impact patient care and access to that hospital.	Bus Service
I would like Metro to take in consideration for all of those elderly and handicapped individuals who are	
taking the bus and train. The cuts to the D2 in front of Georgetown Hospital would SEVERLY affect	
employees and our patients. Every day on the train I see fare hoppers and mainly the youth! It is unfair	
that those riders who are paying everyday have to pay the price. Stop the youth from riding on the	
train and the bus and you will see an increase in your budget and less crime among the youth!	Operating Budget, Management and Spending
please do not eliminate the D6 route. It's the only way I have to get to work at Georgetown Hospital on	
my night shifts. I dont have a car. Being able to take the D6 to and from work was the reason I was able	
to take this social work job. When I ride the bus in the evenings, it is always crowded. It is an essential	
cross-town bus.	Bus Service
I use the G 12 and the R 12buses to get from greenbelt 19 Ridge Rd. to the Greenbelt Metro Station. I	
would very much like to continue bus service from my address to the Greenbelt Metro Station.	Bus Service
Please do not discontinue the g2 bus. It?s the only way to get to the Georgetown main campus	Bus Service
I don't think they should increase the cost because many people are decimated	Fares/Fees/Parking
The d6 route to Georgetown university is my only reliable transport to getting to work everyday. There	
are no other metro buses or even metro trains to allow us to get to that side of dc. Please reconsider	
removing this stop because it will cause many employers to not get to work	Bus Service
Why are we getting so many cuts? This can really affect communities in DMV.	Miscellaneous
Hello, I am writing regarding the proposed service changes in eliminating the D6 metro bus. I think this	
idea needs to be reconsidered as patients and workers rely on this affordable Transportaion. This bus	
route covers 2 hospitals: Georgetown University Hospital and Sibley Hospital. This will make a huge	
negative impact in getting to and from work if these plans move forward.	Bus Service

Comment	Category
This is the main transportation for many individuals in the area. Why would you eliminate transport	A discollar source
during this time of need? It is not logical. Thank you very much. Elimination of the N buses on the weekend along Cathedral Avenue will impact the ability of many	Miscellaneous
seniors to get to their appointments and destinations. Many people cannot walk up the steep hill to get	
to the buses on Wisconsin or Mass Aves to go downtown or to get to Metro at Tenleytown of	
Friendship Heights. This population is not likely to use bikeshare, scooters, or even ride shares (which	
are a whole other issue). Please don't take this valuable lifeline away.	Bus Service
Reducing service while increasing prices is not just. Why punish those that actually rely on your service?	
You will just drive paying customers away. Do not shut down stations. How will those displaced get to	
their destination when you are proposing at the same time to consolidate routes and have less	
frequent trips? The heart of DC, the livelihood of DC starts with reliable train service. If you shut the rail	
service early, how will people get to/from concerts, basketball games, hockey games, etc? God forbid	
the Wizards force a game into Overtime, but because you stop rail service at 10pm, that means	
everyone in the arena who rely on WMATA for transportation has to make the difficult choice of either	
being stranded downtown, or leave early and miss out. Why are the costs always being pushed to the	
consumer when it was not the consumer's fault that you are having a budgeting problem? How about	
you try innovative solutions. You like to wrap train cars for special occasions, why not offer ad space on	
the outside of a train? You could have several businesses advertise their businesses through a wrap on	
the outside of a train car like you do for buses. Or offering to run audio ads through the speaker system	
onboard the train? There are several avenues you could take to address the budgeting issue without	
raising prices or cutting service. Speaking of onboard the train, as you currently do for buses, you	
should display the current time. Nothing worse than being stuck on a train in a middle of an	
underground tunnel with no concept of time. Bring back the rush hour promise, hold yourselves	
accountable to provide better service. Explore automatic self-propelling trains during off-peak hours. Instead of the useless security in the orange vests at metro stations, and useless managers in the box	
that do nothing to prevent fare jumpers, put that budget towards allowing more frequent trains.	
Extend the yellow line to Ft Totten. Stopping the trains at Mt Vernon has done nothing but cause more	
delays. I still haven't heard what the reason was for that. Whatever it is, it is not working. Metro please	
try harder to save our service, and come up with solutions with the customer's best interest at heart,	
not the pockets of greedy CEOs.	Operating Budget, Management and Spending
Proposing to cut D6, G2, and D2 service lines from the metro bus is horrific. As a Registered Nurse living	
in DC and working in Georgetown without a car using public transportation for work (12 hour day and	
night shift) you would be removing EVERY public means of transportation for me to get to work. There	
is no Metro to Georgetown which already is difficult to navigate but to remove the metro buses would	
be catastrophic. It would leave me and many others with no choice to have to change jobs/hospital or	
consider leaving DC. Ride share is not an option due to expense and unreliability. DC is not a public	
transportation friendly city when compared to NYC but the Metro Buses help bridge the gap. Taking	
away all public transportation to a major hospital is absolutely atrocious and will have huge negative	
impact on so many individuals and businesses.	Bus Service
I am writing in regards to the proposal to eliminate the D2 Bus Line. Due to rising expenses to live in	
Washington DC, I made the decision to sell my car last year. Even with those savings, I am still living	
paycheck to paycheck. My current commute from Glover Park to my job in Herndon is 98 minutes one-	
way. The elimination of the D2 bus line would significantly increase an already extended commute. If	
Glover Park was to lose the D2 bus line and solely rely upon a 31/33 combination route, I would have no choice but to leave a neighborhood I have grown to love. Please reconsider cutting the D2 bus line.	Rus Sanisa
I rely on the D2 route to go to my job and provide income to my family. I routinely need to go to	Bus Service
Georgetown and DuPont from Glover Park, which is an area that WMATA only provides access to	
through the D2 bus. I do not have the car nor do I have the means to purchase a car. I rely on the D2.	
Please do not cut funding for this route.	Bus Service
Reducing the hours to close at 10 is shooting yourself in the foot! Most night time events go past 10PM.	
You'd be killing the already depleted businesses in downtown. This would include bars, restaurants,	
theaters and sporting events. I can speak for sporting events as I am a season ticket holder for both the	
Washington Capitals and the Washington Nationals. I take metro to work and then attend games. Even	
with pitch counts etc; games go past 10pm. With overtime, way past! NO HAVING OWNERS PAY FOR	
OVERTIME IS NOT AN OPTION BECAUSE THEIR LEAGUES FORBID THEM FROM DOING SO. WHO WILL	
WANT TO GO DOWNTOWN, IF YOU CAN'T ENJOY A NIGHT OUT AT AN EVENT!	Bus Service
The mayor would like to reduce car traffic, and made sure to add polls all over the roads to make DC	
non-drivable city, and forcing us DC resident to take public transportation or bikes. Most of us who rely	
on public transportation and are far from metro now are faced with prospective of not having basic	
way to get away around the city, go to school, go to work. The mayor is trying to remove work from	
home and at the same time you are reducing our mobility. Not everyone can afford a car (which became exorbitantly priced) or pay Uber or lift. This is true in Burlieth or Glover park	Pail Service
Eliminating the entire D2 shuts out a large portion of community especially elderly persons that will	Rail Service
have to walk up to a mile and up a hill to be connected to the closest bus line. Also, providing no direct	
access to DuPont circle cuts out valuable shopping opportunity	Bus Service
The elimination of the D2 and G2 bus lines would have severe implications for public transit in the	
Georgetown area, which already is hampered by a lack of a Metro stop. We should make it easier for	
residents to access public transit, not harder.	Bus Service
There are several metrobus and metrorail terminations that I say do not terminate. This was limited me	
so within the DC area. I don't use Uber or those services because they can add in cost. The Metro and	
Rail are reasonable. On your survey you ask How would this increase use of Metro or decrease in	
Metro. It didn't make sense when you totally depend on WMATA. If it is not there - I could pay for a cab	
some times but that cost would not be able to continue for all the places I depend on Metro to go	
everyday. A box should have WOULD You be Stuck. Please keep the services open. Think of ways to get	
riders to pay. Get VA, MD, DC to pay their part and get the riders to pay their part. I do understand the	
increase in fare. WMATA is providing a service. People pay for their cell phone service, utilities,	
mortgage etc. Why doesn't the logical hit in their heads that WMATA is a services pay your part. DO	Coming Levels
NOT TERMINATE any of those lines or cut time of night services to get to and fro work at least to	Service Levels
Please do not stop service to the D2 bus. It's the only public transportation we have in Glover Park and	
students use it extensively throughout the school week. Our community is mixed with students, young	
professionals and families. We otherwise have no way to reach the Metro line from Glover Park. I would not be able to commute to work and I will have to move. Thank you	Bus Service
My daughter attends Duke Ellington and we live in Cheverly, I work as a nurse. The only way she can	
get to school is the metro train and bus line. Not only does the increase affect us, I?m already strained	
financially, but cuts to the bus line would make it so she wouldn?t have a bus to get to school from the	
redline. How would I get her reasonably safely to and from school. Currently, she takes two buses and	
two trains to get to and from school.	Operating Budget, Management and Spending
If you eliminate the G12 bus route, I request that you modify the G14 route to cover the G12 stops.	Bus Service

Comment	Category
I recognize that Metro has financial challenges and needs to take measures to improve financial	
conditions. While I fully support Metro and its efforts to continue operations I am generally not in favor	
of service reductions except in cases where ridership has degraded to a level that reducing or	
eliminating some routes would have little or no impact to the community. Instead of service	
reductions, I believe Metro should provide better, more reliable, safer service and should do a better	
job collecting fares for all riders using the Metro system. As a regular Metro train and Metro bus rider I	
regularly see people of use the service but do not either pay or scan their Metro card. The new full- sized fare gates, where deployed, I assume have helped but these should be expanded to all stations.	
More proactive measures on Metro busses should also be taken. Metro should consider staffing busses	
with safety employees to monitor fare collection on busses with citation authority, as they do in many	
European cities. I assume that with the enhanced fare collection, Metro could pay for the employee,	
thereby creating more jobs and there would be an increase in overall fare revenue to fund operations. I	
also support a limited fare increase. Metro is a vital service to the citizens of the District and I believe	
driving increased ridership through more-available, more-reliable, safer services where all riders pay, is	
a better approach than the reduction of service. Thank you for the great and challenging public service	
you provide to our city and surrounding areas!	Operating Budget, Management and Spending
Hello! I am a student of Georgetown University and the G2 bus route is one of the few ways we are	
able to access the city. With no close metro stops, I?ve often relied on the G2 to get places. Please	
don?t eliminate the route!	Bus Service
I write this to express how vital the route of Metrobus T2 is for our community. This route is vital for	
many individuals, businesses and families for whom they may have access to main employers in	
Montgomery County, which is one of the highest salary counties in the state of Maryland. The	
Metrobus T2 is the only form of public transportation that is safe in the areas of Potomac and Bethesda, where many works offer distinguished and comprehensive benefits. My co -workers in	
Congressional Country Club run the risk of losing access to these works if Wmata cuts the service.	
Please are asked to consider any effort in order to protect the T2 Metrobus in their enterity for all users	
who need this service to reach their workplaces. Thanks for your time and consideration. Please, we	
	Bus Service
Please do not remove the D2 and D6, as many students from Duke Ellington School of the Arts use the	
routes to get from further parts of the city to school every single day. We already have problems with	
lateness due to how long our routes are, please don't make it worse. Some of us may not even be able	
to attend school if these routes are cut.	Bus Service
Terrible service, inaccurate timing, worthless.	Service Levels
Removing the D2 service would make cross-town metro access extremely difficult and would require	
instead a bus all the way to Foggy Bottom with a transfer to the Red Line (to do the same thing that the	
D2 offers). This would place Glover Park residents in a difficult place public transportation-wise. Cutting	
bus service into downtown (via 33/31 consolidation) would further impact commutes/other trips.	Bus Service
Bad service	Service Levels
Please consider keeping 22a and 22f bus routes through Fairlington, in Arlington VA. Even with service reduced this critical bus path takes many to the pentagon metro and keeps cars off the road. We need	
it weekdays for sure.	Bus Service
I hope that you will not eliminate the 96 bus which provides important connectivity between Jackson-	bus service
Reed HS, Woodly Park, Adams Morgan, and across the Potomac! It is a very long bus route. Maybe split	
it in two, but don't eliminate it. Also I would not like to see cuts to the 30 buses, which bring kids to the	
HS and home, including in the evenings after sports or other activities.	Bus Service
The proposed cuts to the D2 bus route would essentially cut off metro service to the residents in Glover	
Park, forcing people to drive or ride share adding more traffic to the already congested roads.	
Eliminating service entirely, instead of just cutting back service to rush hours and weekends, would	
hinder the ability of many folks to get to work or into downtown for commerce purposes on the	
weekend. If the city is committed to revitalizing downtown, cutting off service for a large proportion of	
people isn?t going to help.	Bus Service
D6 route is the only public transportation available to MedStar Georgetown University Hospital!!	
Eliminating this route will severely negatively impact our patients and employees!! Without metro train	
access, the bus is the only option for a vast majority of patients who are discharged throughout the day	
(and all hours of the night). Please consider keeping access to our hospital, or expanding metro train	
access	Bus Service
I?m against it. Please do not cut the D2 line Line work on it so, so heavily to live every portion of my life. I would rather nav	Miscellaneous
Please do not cut the D2 line I rely on it so, so heavily to live every portion of my life. I would rather pay	Fares/Fees/Parking
double the fare if it meant I could still have access to it. The proposed elimination of the G2, D2, D6, and the combination of the 31/33 routes is not a good	n arcon coon arking
idea. As a university student these routes are essential for helping me navigating the city and I, as well	
as many other students use them regularly.	Bus Service
counting to work is going to be difficult and expensive on weekends because those of us taking the	
Buse to work over the weekend will be paying more to come to work. We will be taking a taxi or Uber	
to work from Duppong circle. This might Couse me to look for another job.	Bus Service
Please return yellow line service north of Mt. Vernon. I live off of Ft. Totten and can no longer take a	
direct line to my job in Virginia or to the airport. Contrary to what Randy Clarke believes, people with	
small children like me do not want to transfer at Mt. Vernon to get on a crowded yellow line to get to	
the airport. I now drive to my job because of the hassle of the transfer. Reducing service is not	
?equitable? and please do not try to insult our intelligence by claiming that?s why you?re cutting	en tente de
service.	Service Levels
Please keep the M4 bus serving our community. The M4 bus is essential to livelihood of residents who go to place of business or come to support residents; seniors who travel to hospitals & doctors;	
go to place of business or come to support residents; seniors who travel to hospitals & doctors; students who travel to schools?to name a few! M4 service also reduces automobile traffic & air	Bus Service
Please don't cut the G12 bus service. I am low-income and disabled and rely on the bus to get to	
Greenbelt Metro to go to work. Also, consider selling the large busses that ply this route and replacing	
them with smaller hybrid or hydrogen powered buses. The large ones are often carrying one or two	
passengers and at most 30. They are never full. A lot of wasted capacity and fuel, plus a lot of air and	
noise pollution in the neighborhoods they pass through many times per day. Thank you for your careful	
consideration.	Bus Service
The d2 and the d6 buses are critical access points for MedStar Georgetown Hosptial. Elimination of	
these routes should be revisited. These routes are important for the health and safety of DMV	Bus Service
I have 3 kids who attend DC public schools and with this cut to the D2 my kids will not be able to get to	
school. In every other part of the US, the public school provides bus transportation to get kids to and	
from school. How is DCPS going to get the kids to school if WMATA cut bus service?	Bus Service
from school. How is DCPS going to get the kids to school if WMATA cut bus service? Please don?t Eli me Nate the D2 bus route. It?s hard enough to get around from Glover Park as it is!	Bus Service Bus Service
from school. How is DCPS going to get the kids to school if WMATA cut bus service? Please don?t Eli me Nate the D2 bus route. It?s hard enough to get around from Glover Park as it is! The G2 bus stop is very important for Georgetown students and service workers to reach the greater DC

Comment	Category
Glover Park is a neighborhood filled with working families and college students. By eliminating the D2	
bus route, you are cutting the connection from Glover Park to Du Pont Circle, where many people work	
and college students take internships. Yes, they could hop on the 33 bus and add a walk to their	
commute, but the 33 bus is usually overcrowded as is. Du Pont Circle is known for its vibrant night life,	
and by cutting the D2, you?re making it more difficult and potentially more dangerous for those college	
students and other young adults to get home safely after a night out, especially if they don?t have the means to order an Uber or Lyft. The D2 is also a direct link to a Metro station for residents from Glover	
Park, Georgetown, Burleith, and other surrounding areas. The D2 serves as a primary form of	
transportation to and from the many schools on the route for so many young people. Cutting this route	
would be a major inconvenience to hundreds of people.	Bus Service
My son and I take the D2 daily. With no local train you cannot take the bus away that gets us to DuPont	
and allows us access to the rest of the city. This is maddening. Taking bus service away will reduce city	
access even more!	Bus Service
I am a senior and have lived in Glover park since 1970?s. I use the D2 and D6. The elimination of these	
routes would be life changing for me. I would have to consider moving from my current home on 41	
Street. The bus is my only transportation. Limited mobility makes is extremely difficult to walk to	
Wisconsin avenue to use the 30 buses. Since I am on a fixed income, your proposed reduction of all bus	
lines will increase my fares. You are forcing DC residents to use the Metro and thus increase our cost.	
This creates issues for all low income individuals and retirees on fixed incomes. The elimation of the D2	
will leave the residents in the Glover Park community no easy access to transportation. We need to	
retain this last means of transportation for this area as you have eliminated all the other lines that previously served this community.	Bus Service
Please do not discontinue the D6 bus. Many Capitol Hill 5th-12th grade students ride the D6 to and	Bus service
from Basis DC Public Charter school. They would not have easy access to school without this line!	Bus Service
The Chevy Chase area has no M4 bus service on weekends. We need a weekend option so we won't	
have to drive. Also, the middle school and high school kids depend on the M4 for their way to school.	
There is no way cars for the schools can fit on the crowded roads - we need kids on the buses and	
parents/teens not driving. Tenleytown to Ct Ave is a nightmare right now and would be much worse if	
there were no bus service.	Bus Service
I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital	
route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus	
is the only reliable public transportation to this part of the County, which is critical for the County?s	
economy. This bus service is a crucial support for our area. Please consider all efforts to protect full T2	
Metrobus for the many riders who require this service to get to work, school, and other activities.	
Thank you for your time and consideration. Laurelie M. Wallace	Bus Service
I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital	
route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus	
is the only reliable public transportation to this part of the County, which is critical for the County's economy. This bus service is a crucial support for our area. Please consider all efforts to protect full T2	
Metrobus for the many riders who require this service to get to work, school, and other activities.	
Thank you for your time and consideration.	Bus Service
M4 is a vital connection for the neighborhood north of Military and west of Rock Creek Park to	
Tennleytown. Almost every middle and high school student in the neighborhood takes that bus either	
going directly to Deale and Jackson Reed, or to connect with other bus or metro lines to other schools	
in the city. Adults also use this bus on a daily basis to get to work, doctors appointments and shopping.	
Additional route limitations for buses which cross Military and go down Nebraska would make this	
problem even worse. Leave our M4 bus alone!	Bus Service
I think that eliminating the d2 bus would degrade the quality of life in Glover Park since there is no	
metro nearby. It would negatively affect seniors (I am 84) and affect service help in my apartment	
building and others nearby. Many people are trying to live in the area without a car. This will cause	
more pollution. I would prefer higher bus fares. I am a native of Washington, DC but now I think	
remaining here was an unfortunate decision. My taxes are very high but necessary urban services such	Due Convice
as transportation are disappearing Eliminate or even reduce the M4 and E4?????? Are you kidding?? Why are you cutting out such a	Bus Service
large segment of the city from bus service? And how exactly are students going to get to/from school?	
The buses are full with kids!!! Please reconsider!	Bus Service
Please please donot cancel the M4. We need it! Others need it! Very very important to keep it!	Bus service
Do not cut the G2 route. I take this bus twice a day, every day, and it is the only way I can get to school	
via public transport. This is the only bus stop near Georgetown University, and the school?s employees	
and students depend on this bus to take them to and from work/school. This bus is ALWAYS packed	
and crowded coming from Georgetown in the evenings and to Georgetown in the mornings. It would	
be a complete and total failure of public service if you cut this bus route.	Bus Service
Why are you increasing the prices so much? DC is already one of the most expensive cities in the world,	
and the BUS is supposed to be a low cost public transit option. Changing the fare from \$2 to \$2.50 per	
ride makes an already ridiculously expensive option for the service you receive even more expensive.	
This is ridiculous	Bus Service
It is devastating to contemplate the elimination of the M4 route, which I depend on for getting to and	
from Friendship Heights for doctor's appointment and to catch the Metro. It is also very surprising and disappointing that no alternative service is planned to replace it. Likewise to see the D31-34 routes	
eliminated. I depend on Metrobuses on Military Road, going to and from Friendship Heights,	
Tenlevtown and Van Ness/UDC. I know budgets are tight, but PLEASE reconsider.	Operating Budget, Management and Spending
The M4 provides daily transportation to hundreds of kids in my neighborhood who use it to get to	operating outget, management and openang
school at Deal and Jackson Reede. How you could consider cutting a bus route that is the sole means of	
transportation for DCPS students is truly ridiculous. Unless the district plans to start providing school	
buses families will be completely out of options. This, plus the mayors massive budget cut feels like	
another blow to public school students	Operating Budget, Management and Spending
I want to voice my opposition to the city's plan to suspend the G2 route to Georgetown University. It is	
one of the few public transport options accessible in the neighbourhood and used by staff and	Bus Service
I live in McLean Gardens where it is a 20 minute walk to the nearest metro stops, so I rely heavily on	
the bus routes. I completely disagree with eliminating the 96 bus route. Similarly, by stopping weekend	
service of the N2, N4, and N6 bus routes, it will make it far more difficult and time consuming to get to	
Dupont on the weekend. Please reconsider these planned service changes.	Bus Service
The M4 is the only bus that serves the elderly in all the apartments buildings on upper Conn. Ave NW to	
get over to their doctors at Friendship Heights, as well as many students both grade school and American University. Leave the M4 bus as it is!	Bus Service
Please do not get rid of the M4 and E4 bus routes. I and my neighbors use both and need them to get	
to work and the doctor!!!! Thank you!!!	Bus Service
	1

Comment	Category
I am writing to express continued support for maintaining the T2 Metrobus route. This route is vital to many individuals, businesses as well as families. Given there is no viable subway option, deleting the T2	
Metrobus line would have an inequitable and discriminatory impact. Deleting the T2 Metrobus line	
would thwart the goals of inclusive living and working community, as those without car transportation	
would be foreclosed from living or working in the areas currently serviced by the T2 Metrobus line.	
Many resident of any affordable housing components added in future developments served by this	
route would essentially be stranded. The T2 Metrobus route is very important means of transportation	
for many employees served by businesses along this route. Each stop along the route is important;	
please preserve all of them. Thank you for you consideration.	Bus Service
I am writing to you today to express how vital the T2 Metrobus route is to our community. This is a vital route for many individuals, businesses and families to access Potomac and Bethesda. The T2 Metrobus	
is the only reliable public transportation to this part of the County, which is critical for the County?s	
economy. This bus service is a crucial support for our area. Please consider all efforts to protect full T2	
Metrobus for the many riders who require this service to get to work, school, and other activities.	
Thank you for your time and consideration. This route is integral to the continuation of improved	
livelihood and lifestyles for many different people. Thank you.	Bus Service
Please do not eliminate the G2 metro stop to Georgetown University or Car Barn. This is a great route	
for visitors, staff, and students and its elimination would increase emissions and traffic throughout the	
area. Regarding elimination of route D6 - alternate is listed as taking metro from Dupont Circle to Stadium	Bus Service
Armor. What about the alternate from Sibley to Dupont? An alternated bus route must be developed	
for this portion. Perhaps D6 should just be shortened to cover this portion of the route.	Bus Service
The G@ bus route is one of the few public transportation line for employees of Georgetown University.	
There are no metro lines into Georgetown and few bus lines that drop off near campus. This would be a	
real blow as this is one of the areas largest employers. It wouldn't just affect students, it would also	
affect faculty and staff.	Bus Service
As a DCPS employee and DCPS parent of a student attending Duke Ellington School of the Arts, I would	
like to ask you to keep the bus lines traveling from Dupont Circle metro to Duke Ellington area (D2, D6	Due Camina
and G2) available for students and staff. My comments are divided into two parts - the problems that eliminating the D2 line will create, and a	Bus Service
suggestion for increasing revenues. In terms of the former, I live on 41st Street NW in Glover Park. As is	
the case for many in the area, my wife and I do not have a car. The D2 bus is THE bus that serves our	
building/neighborhood, which the current proposal will eliminate. The D2 bus connects us with	
Wisconsin Avenue and ultimately takes us to Dupont Circle, where we can connect with the Red Line.	
Without the D2, we would have a 6-block walk to Wisconsin Avenue to the 30-line buses, whose service	
the current proposal apparently will reduce. Walking to Wisconsin Avenue is not something that	
seniors in our neighborhood should doing, particularly in inclement weather. Please, DO NOT ELIMINTE	
THE D2 BUS LINE. In terms of suggestions, my wife and I have noticed that many individuals appear to	
be riding the buses for free. The word must be out that if you simply walk on the bus, the driver will not	
stop you and ask you to pay. I can understand drivers not wanting to be put in the role of driver/police officer, but there must be some other system to ensure collection of fares (e.g., turnstiles). It is hard to	
imagine people jumping a turnstile on a bus. It is not so hard to image this in a metro station, however.	
We have seen this many times. And recent efforts to make it more difficult for people to do this by	
enclosing some open spaces at the entry points in metro stations is far from perfect, as we continue to	
see individuals jumping barriers. FIX THIS PROBLEM! Roger Volkema 2520 41st Street NW, #5	Bus Service
The D2 route being taken from our neighborhood is outrageous. This is the only bus that gets us hard	
workers in the community to and from DuPont circle from the glover park neighborhood. This would	
effect our morning commutes drastically.	Bus Service
I would not be able to survive if you cut the D2, 33 AND 31 bus routes. I am completely dependent on	
these routes to go to work, school and be with family. Reduction in service will hurt all the wrong people.	Bus Service Service Levels
Parking fees should increase faster than fares.	Fares/Fees/Parking
Closing the D6 and D2 would be detrimental to several patients who require that bus to get to	
Georgetown Hospital and Sibley hospital for primary care and inpatient services. There absolutely	
needs to be an option for people to get to Georgetown so they can continue to receive healthcare.	Bus Service
Georgetown is already a difficult-to-reach neighborhood via public transit, cutting the the service	
routes in and out of Georgetown will have the unintended effect of further excluding residents of the	
District from access to the area.	Bus Service
Eliminating two of the most popular routes into Georgetown will force commuters to consider ride	
share or taking their private vehicles, neither of which is economical for commuters or healthy for the environment. As someone who frequently takes these routes during morning and evening rush hour,	
they are always packed. If service cuts are required, perhaps just run routes in the morning and	
afternoon/evening during rush hour.	Bus Service
stop fair evasion or open the gates for all to ride free It's stealing and it's taken too lightly even with	
the new equipment.	Fare Evasion/Safety/Crime
Cuts hurt all the groups that need it the most.	Miscellaneous
If the proposed Metrobus/Rail cuts are implemented, OUR ENTIRE NEIGHBORHOOD WILL HAVE NO BUS	
OR RAIL OPTIONS! HOW CAN METRO CALL ITSELF A TRANSPORTTION SYSTEM AND PROVIDE ZERO	Due Carrier
BUS/RAIL OPTIONS 24/7 356?	Bus Service
My kids can?t get to school without the M4 Please don?t cut the D2!! I use it everyday.	Bus Service Bus Service
Your general manager do not have the P99 or b97 shuttle bus on there to be eliminated that were all	
the unnecessary bus on the line and they bus operator drive the shuttle bus around metro employee	
have car that unacceptable we ride metro bus and rail and we ask the public do have cars at all	Bus Service
Critical for work. Taxis too expensive Am healthcare workers. Would hate to be forced to move states	
as no green option to get to work safely. Bike travel is still dangerous. See so many coming into the er

I am writing express my support for full service on M4 and M6 routes. As an elderly person who will be	
depending on these routes, it will cause hardship if they are not operated with full service. Metro	
should be required to do an impact study to determine the effect upon the elderly and handicapped of	
curtailing service on these routes.	Bus Service
Metro needs to implement review of overtime to better manage abuse by (a noted small) portion of its	
workforce that bilks the system for 10s if not 100s of thousands of dollars.	Bus Service
I can live with the price increases to operate Metro but the service cuts would drastically reduce my	
time using Metro. I live in the far suburban area and the current Metro timetable is already pressing me	
with time restraints coming to and going to work. Additional wait times would definitely hamper my	
traveling times on Metro. I would most definitely move to Marc.	Bus Service
Don?t cut the hospital bus line d6	Bus Service
Please don?t cut G2 I?m a Georgetown student and that takes me right to school	Bus Service
Not having the 28A in Virginia after the strike with the 703 would leave NOVA to DC commuters	
(mornings and evenings) without a bus to get them to the metro station. Closing lines earlier on	
weekends would force me to choose Uber over metrobus or rail when I go out at night in D.C since ten	
pm is when most events start.	Bus Service
Maintenance and infrastructure. NO increase in administrative costs. Concentrate on the basics of	
maintenance and increase technology to identify weaknesses and vulnerabilities in the infrastructure.	
Recognize the contributions made by staff and employees.	Fares/Fees/Parking
We need our local bus service for shopping and other life activities.	Bus Service
The cut of 96 and changes to the 30 series would certainly adversely affect persons living in Wards 6, 7,	
and 8 who work in Wards 2,3,and 4. We need to support these residents.	Miscellaneous
Please keep the bus schedule of N2,N4,N6 as usual	Bus Service
I'd rather get cuts than pay more by far	Miscellaneous
I sincerely hope that Metro considers these proposed budget cuts. Your proposals completely impact	
the Georgetown University community. If the G2 service were to be unlimited, I have no idea how I	
would get to work. I have been relying on the G2 bus for the past 7 years. Please DO NOT get rid of the	
G2, that way we can keep our jobs and contribute to this city that is already rapidly declining with	
public transportation and safety of DC community members. If you will eliminate the G2 bus, then	
please provide a direct bus route from the Columbia Heights metro or Georgia/Petworth metro station	
DIRECTLY to the Georgetown University front gates. Thank you.	Operating Budget, Management and Spending
The G2 metrobus route is essential to the Georgetown University community, particularly staff, faculty,	
and graduate students who don't live in the Georgetown neighborhood like most of the	
undergraduates. Many people use this route to get to Georgetown University everyday, and eliminating	
it would drastically impact many people who rely on this service.	Bus Service
Please make Maryland and Virginia pay taxpayer dollars towards the budget, as they use the metro	
system as well!!!	Operating Budget, Management and Spending
Please do not get rid of the M4, N2, N4, N6, 31 and 33. Thousands of students use it daily and on the	
weekends in order to get to class and internships/jobs. It would be the worst decision to get rid of	
these lines because it would affect thousands of students negatively and prevent them from getting to	
class on time or getting to internships/jobs.	Bus Service
Keep the D6	Bus Service
Given that weekend ridership bounced back relatively better than weekday ridership, there should be	
consideration given when making any service changes. And it would be likely for weekend ridership to	
lincrease even more during the summer, when cuts are alleged to take place. Also there should be a	
increase even more during the summer, when cuts are alleged to take place. Also there should be a very reasonable balance with service cuts because availability is what helps for a transit system to

Comment	Category
All things considered, I would prefer fare increases to service cuts. WMATA should not do both and	
should not cut service. As it is, early bird parking in downtown DC is available for as low as \$15/day. I believe that increasing fares and decreasing service would lead many more people to drive to work,	
leading to further budget difficulties for WMATA. Separately, please do not close Forest Glen or	
decrease service to stations beyond Silver Spring.	Operating Budget, Management and Spending
You are cutting off bus access to a vital thoroughfare in the city with the proposed bus cuts. I work a 9	
to 5 and rely on those buses to commute between two different job sites. Other buses I use for errands	
(I live near Howard U). This will not be useful to the thousands of citizens who live in that area and rely	
on the bus!	Bus Service
25% fare increase if 8 times the annual inflation rate. Unconscionable. Irresponsible.	Fares/Fees/Parking
I take the bus rides quite often these days. I can say that about 70% of the costumers do not pay for their rides. They just pass a driver. It depends a bit on a route in the city. Often card readers (dont know	
the name of the machine) on board of buses do not work. I am not in a position to judge if people are	
not able to afford the fare or they just do not care because it is so easy to get away with it but it creates	
a culture of complete indifference toward the rules. Would WMATA collect more money if the fare is \$	
0.75 and is somehow enforced (with subsidy for students, seniors, kids and people under poverty level)	
than now and even higher fare in the future?	Bus Service
My family relies heavily on the 96 bus for doctor's and dentists appointments in two different	
neighborhoods, and trips to the U St. corridor, Adams Morgan, and the northern Dupont Circle area for	
entertainment and dining. The bus route is from our perspective a unique route that crosses over	
several major arterial streets and enables our transportation in ways that others don't. Please retain this valuable route.	Bus Service
My wife and I are aged 75 & 76. We use the M4 and E4 on average 5-6 times per week and the 62 and	
54 once or twice a week. Eliminating these services will affect our quality of life and ability to access	
retail (shops) and recreational (Takoma Aquatic Center) facilities.	Bus Service
Have to make sure to prevent stall jumpers.	Miscellaneous
Along with reasonable fare increases, contine efforts to increase local government subsidies, address	
turnstile jumpers, speed up public transit (where possible, lanes dedicated to buses, taxis, Uber etc). I	
use Metro bus and rail frequently instead of driving, let?s keep giving others reasons to leave their cars	Due Comine
at home. Stop expanding Metro rail and address the needs of hsers who only have access to Metro Bus for work,	Bus Service
stop expanding metro rail and address the needs of nsers who only have access to metro bus for work, medical appointments and to maintain quality of life!!!!	Bus Service
Living in Glover Park, there is already limited public transportation given the lack of metro access. The	
metrobus service is critical for myself and most other Glover Park residents to commute and travel to	
other parts of the city, as well as parts of Maryland and Virginia. While I'm sure budget cuts are	
necessary in some areas, it would be extremely unfair to Glover Park residents to cut services (or	
increase prices, but under the circumstances increased fares would be better than services cut). If	
anything, this part of Washington DC requires increased services to account for the lack of metro	
access. Thank you so much for your consideration!	Operating Budget, Management and Spending
I am concerned about decay of station infrastructure and overall safety and quality of station maintenance, at stations such as Rockville. I have only observed this station in particular, so I can?t	
speak to others, but at this station I routinely see public misbehavior, have experienced theft (stolen	
bicycle wheel), and fear that the building itself is not in good structural condition, which could affect	
the safety of the passengers in the future. The sidewalk lights are often out. So I ask WMATA to make a	
thorough assessment of both short term issues (keeping stations clean and properly lit, ensuring safety	
of passengers), as well as long term (performing detailed building and infrastructure conditions	
assessments in order to determine and prioritize repairs).	Fare Evasion/Safety/Crime
Service cuts or fare increases is not a real choice. DC, MD, VA, and the federal government need to fund	
Metro so that it provides optimal service. And Metro workers deserve the salary and benefits to keep	
the system running. It is not fair that workers have to endure salary freezes when they keep Metro running. It is ridiculous that every year, customers are presented with this fake choice of fare increases	
or service cuts and threatened with service cuts. This is no way to run a transit system.	Bus Service
WHAT IS WRONG WITH YOU CUTTING THE 1C AND 2B?	Miscellaneous
As a rider I have no idea of the ridership upon which you make these proposed decisions so the survey	
is guess work. Access to safe, efficient, frequent service is what would allow me to give up my car and	
use metro. It is already not adequate so any negative changes to service, or increase in prices without	
improving service defeats the option of using the metro for anything other than an occasional trip to	
DC events	Service Levels
As a senior the MS is a lifeline for my travel. In general, I find the proposed bus system changes	
regressive as they affect those with the feest alternatives and greatest need (e.g. shift employees, seniors, etc.)	Bus Service
It is cheaper to use the car and pollute than taking the subway for two or more. Lousy service and	
expensive.	Rail Service
Service people use the buses - eliminating these buses hurts the less fortunate in our society.	Bus Service
the 63 bus provide an important service between Takoma and Petworth and the downtown area.	
Without these buses, that trip would require 2 transfers. The buses go by many schools including	
Coolidge/Wells/Whittier, Barnard, Roosevelt/McFarland, and probably others, and help connect these	Due Comise
schools to the wider community. Please reconsider the proposed cuts to the 63 bus! It seems like Metro is attempting to curtail public transportation access to many of the area's university	Bus Service
campuses and workers commuting from the suburbs. Eliminating entire routes will prevent people	
from attempting to use public transportation and is disadvantaging those individuals without access to	
a personal vehicle. We should be aiming to constantly add more routes and connect more lines to	
provide commuters with access to all areas of the region with public transportation.	Bus Service
Eliminating or curtailing service in the nw region would only encourage people to use their cars more.	
In a more affluent neighborhood users have more choices if the transit service is not convenient and	
they will exercise it making the traffic, parking and the environmental issues even worse. For those	
coming into the region their commutes would become longer and more complicated penalizing those with no other transportation options who are trying to access jobs and other services.	Fares/Fees/Parking
Please dont cut the N2/N4/N6 or 31/33 service in any capacity I need them :(Bus Service
Please bring back the D1 route, possibly instead of the D2 route.	Bus Service
Do not close the Forest Glen station!	Rail Service
Public transit is essential, especially to marginalized communities. Cutting service would be a huge	
mistake.	Service Levels
Please do whatever you have to do to get the right budget so many people in the DMV rely on you and	
we love you. Shame on the people in charge not providing enough \$ to keep a good thing going	Operating Budget, Management and Spending
the d6 and d2 buses are essential to commuting out of the Georgetown (and surrounding parts) due to	
lack of Metrorail access. many essential workers use this route for their transportation to the hospital and it would not benefit staffing shortages, it would hurt them even more.	Bus Service
The Metro is an important institution in this city and probably the single biggest force against car	
traffic. Without the metro the city would die. Let working class people get to work for free.	Fare Evasion/Safety/Crime

Comment Category Please consider all efforts to protect full T2 Metrobus for the many riders who require this service to get to work. Thank you for your time and consideration. Bus Service The point of Metro is not to make money it's to make DC livable. This isn't y'all's fault, but you can't slash service and expect the fiscal problems to go away. Waiting longer for trains or having less convenient bus routes will only DECREASE ridership in the long run, and you'll be at the same cliff again. Personally, I don't care at all if Metro is in debt. Bowser was going to give \$500 million to Ted Leonsis, surely we can muster up some money to save Metro. You cannot cut your way out of a customer problem. If metro had BETTER service, cleaner systems, safer rides, and was designed to move people around DC and not just commuters into and out of DC, it would retain customers. But that's not fixable in the short term. I'm saying you should NOT cut service because that will only exacerbate your ridership problem. Think of the other goals Vision 0 for traific deaths, reducing the area's carbon footprint, reviving downtown, attracting new businesses. All of those require a good

exacerbate your ridership problem. Think of the other goals Vision 0 for traffic deaths, reducing the	
area's carbon footprint, reviving downtown, attracting new businesses. All of those require a good	
metro system. Please don't make these cuts. Bus Service	
I'm worried about how these changes will impact people in DC, especially the most vulnerable	
populations due to their housing locations, work situations, and financial situations. Operating Budget, Management and Spending	
Eliminating bus route G2 would have direct negative effects on a patient population that relies on that	
bus line to go to Georgetown University Hospital. This would make going to appointments more	
difficult and more expensive for patients that are already vulnerable in our healthcare system. Bus Service	
Please don?t get rid of the d2 and 33/31 that?s the only way I have go get to school Miscellaneous	
Glovernpark needs the d2, make higher fares. Decrease time but do not eliminate it. We have no	
Metrol Not everyone can walk to the 33/31. Fares/Fees/Parking	
Keep L8 Bus Service	
I am particularly concerned about the proposed elimination of Metrobus #D2 - the only public	
transportation that connects my neighborhood - Glover Park - with metro - (Dupont). This bus route is	
an all important link to Metro and downtown. Without it residents will have to choose more expensive	
and private transport Bus Service	
Public transportation is the correrstone of accessibility, sustainability, and urban design. You must	
prioritize its subsistence at affordable levels with constant service. The repercussions of increasing	
fares, decreasing service, and/or just not having an acceptable budget would impact us DC residents	
beyond measure. Operating Budget, Management and Spending	
No increase on fares or service cuts, please! Bus Service Bus Service	
Metro has very difficult decision to make while still providing quality service, maintenance and	
reasonable fares to its ridership, parking, bikes, and Metro Access. Metro will eventually receive federal	
funding; it moves the government and government employees in this region. This region realizes on	
government employees for its business services. In addition to DMV visitors. Bus Service	
I've seen a lot of people get on metrobuses without paying or showing ID and I don't understand why. Bus Service	
The T2 bus route provides an invaluable link to our suburban neighborhood to two urban centers,	
Rockville and Friendship Heights. This gives many residents in our neighborhood and environs access to	
the subway and access to their places of employment. Our neighborhood is also bordered by high	
traffic roads unsafe for walking or biking, so commuting on foot or by bike is not a realistic option. The	
T2 is a vital lifeline for us, please keep it going! Bus Service	
eliminating the D6 and D2 bus routes completely cuts Georgetown University and Glover Park out of	
the metro system. The D2 is the easiest way for Glover Park residents to access the DuPont metro	
station. The D6 is the only bus route to the MedStar Georgetown University Hospital. Without the D6	
many patients from other parts of the city will be stuck in the Glover Park Georgetown area without	
means to get home. This route also helps employees get to an from work. The D6 and D2 can not be	
eliminated from the bus routes. Bus Service	
I would prefer fare increases in lieu of closing stations or reducing services. Fares/Fees/Parking	
You ask about the impact elimination of various bus routes would have on my 'choice' of	
transportation method, when in fact there IS no other realistic or affordable alternative. I am a senior,	
don't drive, don't ride a bicycle, live in Ward 1 (Adams Morgan) which is a rail desert - the nearest rail	
station is a mile or more away and these bus cuts remove connections to Wards 2 and 3. My doctors	
are in 2, my exercise programs are in 3, how do you expect us to get downtown on weekends without	
the 43/43? And what do you have against the 96, which appears on the 'cut' list every time? I ride it	
frequently and ridership is quite healthy. Don't base your cuts on bogus ridership figures caused by Bus Service	
Eliminating the E2 would cause the loss of a key cross town route. It allows residents of Chevy Chase to	
easily access metro train service at Friendship Heights (and eliminating the L2 would make that even	
worse by eliminating access to Van Ness station and south). It also allows residents of northeast speedy	
access to work and shopping in upper northwest. In short, elimination of either route would be insane.	
While I don't use the M4, eliminating that route would eliminate bus service for Chevy Chase children	
to attend both Deal and Jackson Reed. I see many kids go by my house on Broad Branch on the way to	
the MR4 at Nebraska. At a minimum there should be service tied to school hours. Bus Service	
am a Metrorail rider and I am sick and tired of the fare evaders. Why do I bother tapping my card with	
the rampant evasion? It?s ridiculous. If fares make up such little of WMATA?s income, then just make	
the system free for all of us. THEN I would accept service cuts. I?m tired of a \$15+ round trip while so	
many freeload off the current system. You?II lose my patronage soon if this isn?t addressed. Bus Service	
Please do not eliminate the M4 bus line. You eliminated the E6 during the last round of cuts. The M4 is	
the only bus I can take from Pinehurst Circle to metrorail. Bus Service	
I think that reducing public transit in the city would increase drunk driving incidents, make it harder for	
people to get to work, and severely limit the access people have to other resources in the city. MetroAccess	
Cutting routes D2 and D6 would further cut the Georgetown area out of the public transportation	
system. This would be a huge mistake and would eliminate the routes that I intend to take frequently	
in the future (when my office, among other parts of Georgetown University) moves downtown. In the	
midst of a climate crisis and questions about the future of downtown, DC should be investing in	
expanding access to public transportation rather than cutting it. Bus Service	
please do not get rid of N2 I'm begging Bus Service	
The D6 is used to get to macarthur high school. No other option is available. Many people depend on	
the N6 on the weekend to get around and would be stranded without it. Tje 96 is the only way some	
people can get across town. If you must cut times that is one thing. Completely elimating the route is Bus Service	
The D6 and G2 buses are very important to me. I also believe that the price should not go up as it is	
already expensive Bus Service	
Please continue to fight for increased service. Cuts in service will lead to a death spiral, period. Fare Evasion/Safety/Crime	
Please retain the T2 service, which provides vital access to a part of the County not otherwise served by	
reliable public transportation. Bus Service	
reliable public transportation. Bus Service I don't think increasing fares will make a substantial difference aside from angering the minority that	
reliable public transportation. Bus Service I don't think increasing fares will make a substantial difference aside from angering the minority that pays their fares. Instead, fare evasion should be more strongly punished. Fare Evasion/Safety/Crime	
reliable public transportation. Bus Service I don't think increasing fares will make a substantial difference aside from angering the minority that pays their fares. Instead, fare evasion should be more strongly punished. Fare Evasion/Safety/Crime R12 is essential for myself, and my children to get to the metro station that would otherwise require a Fare Evasion/Safety/Crime	
reliable public transportation. Bus Service I don't think increasing fares will make a substantial difference aside from angering the minority that pays their fares. Instead, fare evasion should be more strongly punished. Fare Evasion/Safety/Crime

I wish the question asked what my budget priorities Operating Budget, Management and Spending My 17 year old son takes the h6 to Brookland, the red line to Dupont then the D2 to school at Duke Ellington School of the Arts. Your current proposal has cuts to all of those modes of transportation including the two bus lines. How exactly is he supposed to get to school? I and afford an Uber everyday. How are teachers supposed to get to school? Bus Service Metro?s budget should be much higher, so that a choice between service cuts and fare increases shouldn? The med to exist. Operating Budget, Management and Spending Metro should get the money we are spending on war and genocide and fund transportation for the Operating Budget, Management and Spending		Rus Samira
I think that Metro needs to be fully funded both for environmental and for equity reasons as many don't have access to a car and would see employment opportunities and quality of life significantly decrease if this plan happened. Also, I don't know how to answer the question about budget distribution as I don't know the current costs. I wish the question asked what my budget priorities My 17 year old son takes the h6 to Brookland, the red line to Dupont then the D2 to school at Duke Ellington School of the Arts. Your current proposal has cuts to all of those modes of transportation including the two bus lines. How exactly is he supposed to get to school? I can't afford an Uber everyday. How are teachers supposed to get to school? I can't afford an Uber everyday. How are teachers supposed to get to school? Comment	Category
The Metro is already completely unusable to anyone who wants to go in and out of or around the city	
for recreation on the weekend. The metro needs to expand service to get more people to ride it, not	
slash times and hike prices to bail itself out. Build a better product and people will buy it. It does also seem to me that a regular, easy-to-understand schedule will lead to higher ridership than elaborate	
schedules, blackout times and rush hour services. I don't know.	Capital Budget
I live in DC, in part, because the transit is good. Don't make it bad. I need it.	Miscellaneous
Increasing demand of in person works	Miscellaneous
PLEASE do not get rid of the D2 bus. Hundreds of students rely on that bus to get to schools in	
Northwest. If you remove that bus, it will result in parents having to drive their children to school. This	
will further congest DC streets, disadvantage families who rely on cost-effective transportation to get to	
school, and impact families who do not have flexible work hours.	Bus Service
Enforcing payments of fares would reduce the need for service cuts. Many people, including those who	
do not appear to be poor, are not paying. The proposed changes would cripple the workforce that depends on Metro to get to work, and increase	Bus Service
car traffic to horrific levels. Federal and local government need to step up support of this essential	
service.	Rail Service
Eliminating or reducing service on the D2 and D6 would be catastrophic for DCPS students at the Duke	
Ellington School of the Arts. The vast majority of students live outside of Ward 2 and rely on public	
transit to get to and from school every day (a long day that runs from 8:30 to 5). The burden on	
families, and the resulting traffic and climate impacts, would be terrible for the students and their	
families as well as local residents.	Bus Service
The D2 and D6. Are essential for students and other residents along the routes Reliable, timely service is the defining feature of a well-functioning metro system. Besides DC, I have	Bus Service
lived in and used metro systems in Toronto, NYC, and London. In all of those cities, the wait time for a	
train is 5-6 minutes or less. 10 minutes would be a very long wait. 15 minutes would be considered	
dysfunctional. And as for closing stations, that too would compromise a well-functioning system. As	
you well know, large numbers of people jump the turnstiles. Stop that, increase fares 30-35%, provide	
very big discounts to students and smaller discounts to those living in or near poverty, and keep the	
service timely; that's my advice.	Fares/Fees/Parking
Increase prices with worse service ? There is no way you can motivate this.	Service Levels
bring back pre covid service !!!!!!!! 10 pm is ridiculous and unsafe to do for locals living in the city. if	
you close at 10 pm that means i?ll walk 30 min alone and that?s unsafe. i chose metro because it?s a safe commute. 15 minutes between trains is also ridiculous at that point i?d walk or uber.	Rail Service
IT IS VERY CRITICAL FOR THE T2 TO REMAIN IN FULL OPERATION, THAT IS MY TEAMS ONLY	
TRANSPORTATION BEFORE 7AM AND AFTER MIDNIGHT. PLEASE REINFORCE THE T2 LINE TO REMAIN IN	
FULL OPERATION BASED ON THE SCHEDULE AND NOT REDUCE OR REMOVE THE T2 BUS FROM	
OPERATING. THANK YOU IN ADVANCE FOR THE APPROVAL TO KEEP THE T2 IN OPERATION	Bus Service
Discontinuing bus routes in and around the Greenbelt, College Park, and Berwyn Heights areas are	
short sighted and will cause deep impacts to communities that rely on these routes. Some of these	
routes like C12 and R12 connect communities that otherwise may not have safe routes to walk or get	
around. It may also be short sighted because of the announcement of additional federal agencies	
making plans on building office spaces in the Greenbelt and College Park areas. The D2 serves students from all wards that attend the magnet high school Duke Ellington, and many	Bus Service
students take this from DuPont Metro. It?s imperative that kids, many of whom already have a long	
journey on what?s, reach school in time. This bus also serves many students at Hardy Middle school,	
coming both from DuPont metro and Glover Park. If DC cannot provide school buses it should at a	
minimum ensure public buses serve these routes	Bus Service
Metro should do a better job of making sure people actually pay when they get on the bus. A lot of the	
time, the driver doesn?t stop people who walk on without paying, especially homeless people.	Bus Service
PLEASE DO NOT CUT THE D 2 BUS I work across the river in Anacostia and am a civil servant. Eliminating the D2 would severly hamper by	Bus Service
ability to commute to and from work.	Fares/Fees/Parking
people won't be able to get to work, doctor appts, or hospitals	Miscellaneous
I would like to see meaningful changes to address fare evasion: either make the system pay what you	
choose OR actually enforce the payment of fares.	Fare Evasion/Safety/Crime
Increase rushour train frequency of Orange, Silver, and Blue Lines. Make all rush hour Orange and Silver	
trains 8 cars. Create a Virginia Route (hybrid Silver or Orange without a transfer at Rosslyn to continue	
on Blue) - platform space is limited and with the proposed new arena in Alexandria, WMATA is	
unprepared to accommodate a mass transfer at Rosslyn.	Bus Service
it is unconscionable that each and every year, Metro threatens to cut bus service in my area (and most other areas of the city) yet they demand ever greater amounts of subsidies from DC, MD and VA which	
are paid for from our taxes. At the same time, the QUALITY of service as not appreciably improved nor	
is it likely to in the near future. If that's not bad enough, Metro seems hellbent on massive, costly	
expansion of the Metro subway system which is much more costly than bus service. Its all about 'build	
	Bus Service
baby build' rather than pursuing cost effective service delivery	
The D2 is our only neighborhood bus. You keep trying to cut it. Stop.	Bus Service
The D2 is our only neighborhood bus. You keep trying to cut it. Stop. I gratefully ride the D2 five to 10 times a week	
The D2 is our only neighborhood bus. You keep trying to cut it. Stop. I gratefully ride the D2 five to 10 times a week Let the taxpayers share in these costs, which will reduce some of the negative effects of climate	Bus Service Bus Service

It is vital to keep those going with regular times as in years past. Not to eliminate. Plr make more jobs, train more drivers. Recruit recent graduates. Instead of cutting times, routes that are in the middle of the city plz retain those. Need to enforce punishment for fare evaders so paying customers' service doesn't erode. Frequency of train, particularly during rush hour, is vital. I would gladly pay more to keep service frequency up. Parking fares could even be increased more than proposed, maybe 25%. This proposed change would really affect myself and my child gretting to work/school. We use the 32,36,M6, F14, D6, 63 every single day! How would we travel to get to work and school especially if we have to travel across town and our jobs don?t give us metro fare? The D2 and D6 busses cannot be terminated! They are vital to getting many dedicated students to and from school quickly and safely. The G8 bus is also very important to many that 1 have talked to and 1 personally use it more on weekneds than anything else Increasing fare and cutting service of metro buses will make some area of the DC area extremely	Bus Service
The D2 is our only neighborhood bus. You keep trying to cut it. Stop. I gratefully ride the D2 five to 10 times a week Let the taxpayers share in these costs, which will reduce some of the negative effects of climate change. Don't put the entire burden on the people who don't drive cars, anyway, please. Please keep the D2 bus line. It is Glover Park's most convenient metro resource. My child takes the D2 twice a day, five days a week to get to school. If you eliminate the D2 and D6 bus lines, there will be N0 BUSES that service Duke Ellington School of the Arts. The school location is not metro accessible and students must take either the D2 or D6 from Dupont Circle. The D2 is vital for my DCPS student to get to and from school every day and she starts with the 42 or 42 in Mt Pleasant. With MANY other students. It is vital to keep those going with regular times as in years past . Not to eliminate. Plz make more jobs, train more drivers. Recruit recent graduates. Instead of cutting times, routes that are in the middle of the city plz retain those. Need to enforce punishment for fare evaders so paying customers' service doesn't erode. Comment	Category
Most, if not all, students at the performing arts high school Duke Ellington School of the Arts (located in Georgetown) use the bus routes proposed to be eliminated to get to school. Eliminating these bus	
routes would be a major disservice to those students.	Bus Service
Some of these buses after are key transportation to a vast group of ages. Older people (60+) might not	
be able to travel with ease nor will kids be able to either. It creates an inconvenience to those and puts	
people in danger to different areas they might?ve not went to if the services weren?t cut.	Bus Service
I frequently use the 10A bus, and I am opposed to the proposed merger with Metroway. The current routing is an important and well used connection between Pentagon City/Crystal City, Arlandria, Del	
Ray, and Old Town. The current routing should not be changed. Additionally, this idea was originally	
proposed as part of the bus redesign community engagement to be combined with ADDITIONAL service	
on the 10B bus. Proposing this cut now is disingenuous and undermines public trust in the process. The	
proposal will be a devastating loss of bus service to Arlandria and Del Ray. This bus line provides critical	
service for neighborhood residents including underserved service workers in Arlandria. Other service is not an adequate replacement due to frequency, hours of operation, and bus capacity.	Due Capita
This is a disappointing proposal when considered to large capital metro systems around the world,	Bus Service
which run far cheaper and much more frequently around the world. Having to wait 15-20 minutes	
between trains in the nation?s capital and the surrounding area is not a metro system, but rather is	
more similar to a suburban rail system (compare Paris France?s Metro v RER). For example, even having	
lived in Paris France even on days where there were strikes in France in which only 1/3 of the regular service was assured, that itself was still more frequent than some of the proposals herein. Further, the	
increase in metro fees is effectively a regressive tax on the poor, working class individuals who depend	
on the infrastructure to get to work. Limiting the stops and metro frequency adds to an already busy	
day when one is trying to make ends meet and juggle multiple obligations. Finally, it?s a shame that in	
an increasing age of climate awareness that these proposal are effective encouraging more carbon	
heavy ways of transportation.	Bus Service
I hope WMATA does not cut service or reduce fares but instead expands service and reduces them. It needs proper funding from Maryland, DC, and Virginia to address the shortfall and add to the budget	
for improvements.	Operating Budget, Management and Spending
The D2 (and D6) is a key bus connecting the redline to Georgetown area. This is how my children get to	
school and it would make it very difficult and extend my daughters already 1.25 hour commute for this	
bus to be removed. The changes proposed impact both my children from getting to an from school. I	
remind metro that public tranportation is the only way that kids get to school and that separate busing	Bus Service
is not provided. The changes on the 80 and G8 will also lengthen her commute times. If you get rid of the D2 bus service, the majority of my entire school will have absolutely no way to get	
home on time, forcing many young people onto possibly dangerous routes in the dark as the school	
gets out at 4:55. Without the D2 my route would take two hours, I would get home at 7 PM, I am a	
young girl and this could be VERY dangerous for me and my friends as well as incredibly impractical for	
my work schedule as a full time student.	Bus Service
Please do not cut the D2, G2 or D6. I have no car in DC and these would prevent me from traveling to work.	Bus Service
I ride D6 to go to Ellington every day of the week this route make it so I can get to school (along with	
many other students)on time every day losing this route would be detrimental to how I get to school	
every day	Bus Service
A lot of the proposed bus routes for elimination or route changes are essential routes for students.	
These proposed changes would interfere drastically with students? ability to travel to school in a timely	
manor. Please consider maintaining routes that service students at least during before and after school	
manor. Please consider maintaining routes that service students at least during before and after school times. It's better to decrease frequency on these routes than eliminate or change them. I urge you to

The feds and local jurisdictions should step up their support. It is an investment that may take a while to see results, ut it should work. Riders are used to thinking of Metro as too infrequent to be convenient and too expensive to be attractive. Shameful. The G12 and R12 routes provide essential service to the communities of Greenbelt, Lanham, New Carrollton, College Park, and areas in between. In particular, the G12 provides critical access to two Metro stations: Greenbelt (Green LIne) and New Carrollton (Orange Line). For persons without a car or persons who cannot drive due to a disability or age, the Metrobus service is a lifeline, enabiling those persons to access the Metro lines for transportation to work, school, shopping, family visits, or leisure activities. The elimination of the G12 and R12 lines seems especially shortsighted right now, given that the Purple Line is under construction. When the Purple Line is completed, it will create impossible, for those without a car or the ability to drive. In an era when public policy is increasing turning to public transportation as a means to eliminate highway congestion and additional harm to our climet, the elimination of bus service makes no sense. A final note: the G12 route includes as top at Doctors Hospital. Luminis Health in Lanham on the way to and from New Carrollton. This is an important service for those seeking medical care at the doctors' offices adjacent to the Hospital. Without the bus, these patients would have to resort to taxis or ride sharing options that may not be affordable. Persens with disabilities will b	Bus Service Capital Budget
times. It?s better to decrease frequency on these routes than eliminate or change them. I urge you to bear in mind the students who will suffer at the hand of these changes before making any final decisions. Cutting out D6 & G2 will further isolate the Georgetown community. It is shameful to be the subway service in the nation's capital and be: 1) so very expensive and 2) so infrequent. Doing the opposite would drive more ridership. The feds and local jurisdictions should step up their support. It is an investment that may take a while to see results, ut it should work. Riders are used to thinking of Metro as too infrequent to be convenient and too expensive to be attractive. Shameful. Only cut some of the buses that are not used at all by riders. Keep the actual price and make sure every	curegory
body pay.	Bus Service
I use the Forest Glen Metro regularly and would hate to see closures there. It gets trains infrequently enough already!	Rail Service
Buses are essential to cathedral, Wesley heights, glover park, and Georgetown	Bus Service
Focus on safety and assess and prioritize equity. Safety inspections and repairs/upgrades should be #1	
priority. Bus line cuts will have the greatest hit on lower-income communities that have marginalized	
and underserved for generations. Maintain sufficient bus service, including for shift workers that work late hours. Do not make fancy upgrades to metro stations.	Bus Service
The G12 is used by kids to go to Greenbelt Elementary School and Eleanor Roosevelt HS. The G12 is the	
only bus that passes Greenbelt ES. Maybe WMATA could partner with school systems to help with their	
transportation problems, where WMATA is already stopping near a school, in exchange for some	Bus Service
The stations and lines you want to cut are critical for our working citizens who can?t afford to drive. Quality rail and bus service is better for the environment - you?ll be forcing people to take environment	
harming transportation. Perhaps take a closer look at the budget; there has to be some option between	
decreasing service and raising fares both of which harm citizens and the planet by decreasing ridership.	
You?re also going to hurt yourselves - decreasing ridership = decreasing revenue. I am sorry Metro is facing a budget shortfall, but cutting off whole neighborhoods from public	Operating Budget, Management and Spending
transportation options is not the answer. I pay a senior rate for bus service and am willing to have my	
fare increased, if it would guarantee retaining service in my neighborhood.	Operating Budget, Management and Spending
If automation of the trains occurs (which will help with not feeling nauseous from the braking and accelerating currently frequently experienced in metro), that will result in fewer train operators, it	
seems like a prime opportunity for WMATA to utilize those cost-savings to offset come proposed cuts.	
Also, it seems people think buses are free (and metro too). It would seem that enforcement of fare	
evasion laws would greatly assist with the budget shortfall. I?ve been on buses where one person paid and nine others just walked on. I hope WMATA is thinking about ways to not put staff safety in	
jeopardy though to use technology and infrastructure to address this growing issue.	Operating Budget, Management and Spending
How about fixing the non-functioning card readers on buses? Why raise fares when you won?t be	
collecting many of them anyway? Maintenance matters.	Bus Service
the T2 is the only route to serve my neighborhood. If it is removed it will effect my property value and make it much more expensive to get around. It would reduce the likelihood I could get anyone to do	
cleaning work at my home and make it impossible for me to stay in my home as I get older and	
eventually give up my car or am unable to pay parking fees in DC.	Bus Service
It is fundamentally inequitable to propose to raise fares by 25%, and parking by only 20%. Clearly a 1% increase in fares would raise more than the same for parking, but those with cars are clearly better off	
than the many customers who do not have them at all. Any increase in costs to riders should fall more	
heavily on those with a greater ability to pay. The buses serving Glover Park, Cathedral Heights, Wesley	
Heights and other areas not served by MetroRail cannot be abandoned while the wealthy suburbs	
continue to have rail service. The D6 bus line is incredibly critical to the grade 5-12 transportation between Capitol Hill neighborhood	Bus Service
and both BASIS DC and Washington Latin Charter schools!	Bus Service
An increase in pricing would end up costing way more than paid parking in downtown DC. It?s already	
about the same price for me ? and many companies pay for free parking (including mine). Longer wait times and a more expensive trip gives me no incentive to use metro rail or bus ? despite maybe being a	
slightly shorter commute. I would end up just driving downtown to work.	Bus Service
If you cut the D2 line and reduce service for the 31 and 33, that's essentially all of Georgetown that	
does not have Metro access in a timely and reliable manner, as we do not have a Metro station within any reasonable walking distance. Please, please consider that when making cuts so you don't strand	
people who are trying to get to work.	MetroAccess
VA and MD need to pay their share.	Miscellaneous
The area of largest concern to me would be potentially closing 10 metro stations. For me and my husband, the location of the Forest Glen metro station played a significant role in deciding where we	
would buy a home. Especially as we grow our family, having a reliable, public transportation option	
nearby is vital and is one of the key reasons we love the neighborhood we live in.	Rail Service
Are people still not paying by jumping over fare card stands? That loss has to be recovered before	n In
paying riders are penalized for this continuing blatant theft. Please do not cut the 16Y service. It is the only route along Columbia Pike that provides direct rush hour	Fares/Fees/Parking
service into DC and is consistently busy. It is the reason I purchased my home and would directly	
impact my commute to work. If service were to be cut, I would not continue to use Metro or Metrobus	
and would instead choose to drive thus adding yet another car to the roads. Please do not discontinue this route, many people depend on it.	Bus Service
The bus route that my family relies on to get to doctor's appointments is one of the routes eliminated	
by the proposals. That route is one of the ways that we have been able to reduce our car dependence,	
which is something we value about living in the city. I hope that WMATA can avoid the death spiral of cutting service and raising fares. Our family can afford higher fares without significant changes to our	
budget. However, we are concerned for other families in the area who do not have the same slack in	
their budget and hope that the reduced fare rates will include them.	Operating Budget, Management and Spending
The availability of NH2 from National Harbor is the reason I chose to live at National Harbor. Without NH2 - I have no easy way to get to work without having to ride the bus out of my way and more than	
doubling my time.	Bus Service
There must be other ways of seeking funding to address this issue. Metro is an essential service. I know	
several people who will lose their jobs and/or have to move and/or be unable to access NEEDED food,	Capital Budget
aging, health, and basic needs services because of these changes, including home-bound seniors. Real people use Metrobus for school and jobs. If prices need to be raised, so be it, but eliminating a	Capital Budget
vital public service is not acceptable	Bus Service
The 33 is a very popular route, running from downtown to neighborhoods during commuting hours.	
The proposal would effectively change the 33 route into the 31's current route, but the 31 is not as popular of a route, so the change will not improve WMATA's budget deficit. It would likely only cause	
WMATA's deficit to continue to grow, because of less ridership. The D2 is the most efficient way for	
residents of Glover Park to access a subway line. Other options take much longer. Perhaps more	
limitations on bus passengers who do not pay to ride would help raise WMATA's income. 1. Stop all 24 hrs bus services. 2. Drop SNAP smarttrip card program since it's a scam & OVERCHARGES	Operating Budget, Management and Spending
PATRONS FOR RAIL USEAGE. 3. Stop reducing patrons services in predominantly ethnic/ poor areas who	
daily living & work travel relies on WMATA. 4. This why more patrons are using Ubers & Lyfts as	
transportation. While I use metro bus and metro rail for use outside of work, I think retaining services for low-income	Bus Service
workers and students is essential.	Bus Service

If you cut services as proposed here, you will lose even more riders and set off a negative funding spiral.	
Therefore, it would be better to maintain services and raise fairsbut offer subsidies so those least able	
to afford it will not be harmed. Also, if installing better gates to stop fare jumpers is raising additional revenue, please be sure to install in all stations. Thank you for considering public opinion on this critical	
matter. Ensuring sufficient metro service is imperative to the well-being of our communities!	Capital Budget
The metro and bus is one thing the government should oversee and overall it?s not great. Service is	
inconsistent and bus stops and metro stations are dirty and dangerous. Many people rely on it for	
transportation and reducing service is a great way to upset the public	Bus Service
I think what's confusing is how contradictory many of these proposals are: for instance, how is there a	
proposal for extended metrorail hours on the weekend and simultaneous proposals for reduced service	
hours/more infrequent service? Having lived in many major cities around the world, I don't understand	
why WMATA has such infrequent service, even if its budget is lower than elsewhere. My biggest issue is how high fares are. It often feels as though riders are penalized for systemic failures to acquire funding	
when it is not our fault. All this is doing is discouraging people from taking public transportation and	
consequently potentially causing more traffic and more reliance on cars to the detriment of the	
environment. Not to mention the fact that so many people rely on public transit, especially in lower-	
income areas, and these routes are often the first affected by proposals to cut or minimize service. The	
fact that so many riders evade fares, including people in high-paying jobs who absolutely could be	
paying, means that fares are likely already too high, but fare evasion probably needs to be more	
addressed if the issue is not having money. I use NH2 bus a couple times a month month or so to get to trains at King Street & then to DCA Airport	Operating Budget, Management and Spending
& Fashion Mall (Pentagon City) & Tysons Corner. Cutting this bus service means I will just drive to	
theses places.	Bus Service
I use NH2 at least three times a week to go from National Harbor to King Street. It is a key access point	
for me to go to work in the city. NH1 takes twice as long, and the Green line at Southern Station is	
further away for me to downtown. NH2 also gives me the ability to use public transportation to DCA	
and IAD. If NH2 is cut, my ridership on Metro probably drops 85%. I would rather see a 50% price	
increase than lose the NH2 bus.	Bus Service
The bus service through Georgetown is very important since there is no metro service there. I take the	
G2, D2, D6 multiple times a week. I take senior audit classes at Georgetown University, have all my	
doctors at Georgetown Medstar Hospital and am a parishioner at Holy Trinity Church (which has almost 7000 active families) so use the bus on Sundays for Mass and other days for other church events. I also	
use the .N2, N4 or N6 to go up to Friendship Heights for classes.	Bus Service
Do not cut the D2 line. Many in the Glover Park neighborhood depend on it, including school children,	
downtown office commuters and elderly.	Bus Service
When I have to take metro, I have to take it. But sometimes the trips already feel long, especially when	
I have to make a couple of changes.	Rail Service
Please reconsider cutting service to Georgetown's campus and to Mt. Pleasant and Columbia Heights.	
These are crucial thoroughfares to access parts of the city.	Fares/Fees/Parking
I was filling out this survey because of the proposed elimination of the M-4 bus route. But the M-4 bus elimination is not included in this survey. The survey seems to be badly flawed! I strongly oppose the	
elimination is not included in this survey. The survey seems to be bady hawed: I strongly oppose the	Miscellaneous
Combine the NH1 and NH2 routes to have buses travel between Southern Ave and King St Metro	INISCENENEOUS
stations. Instead of having the suggested MW1 route go from Braddock Rd Metro station to 1st St-	
Fayette to Potomac Ave-Richmond Hwy, go from Braddock Rd Metro station, go west on Braddock Rd,	
go north on Mt Vernon, go east on Monroe Ave, go north on the ramp to Potomac Ave-Richmond Hwy

Comment	Category
Eliminating of reducing bus service on the D2, 31, 33 would heavily impact a large amount of school children who would not have easy access to other modes of transportation. That is NOT a desire of this	
and many other tax payers who's child is a student within DCPS and needs reliable bus service to and	
from school.	Bus Service
I do not have a car and rely on Metro rail and Metro bus for transportation. I do not ride share because	
I believe the gig economy is a race to the bottom. I am also resentful of the drivers disregard to traffic	
laws. It is so frustrating that in a time of climate change and impending disaster, all the power rests	
with people with cars while those who value a decent public transit system get totally screwed. Why do	
we constantly have to beg local government to not slash the services we depend on to move us to and	
from our jobs so that we can pay Federal and DC taxes?	Bus Service
US and region governents should use other parts of the tax base (e.g. property tax, income tax, gas tax)	
to increase the WMATA budget and avoid the need for fare increases and service cuts. Fare increases are effectively a regressive tax, since they make Metro more costly to those who rely on it most without	
regard to their income and wealth. We should fund public services like Metro through primarily	
through progressive taxes such as income tax.	Operating Budget, Management and Spending
The M4 is the only public transportation that reaches a large portion of Chevy Chase. Eliminating it will	
mean no public transportation available to large numbers of students, commuters and non-drivers.	Bus Service
I missed what you were proposing for the 96 route. It is important for connecting neighborhoods,	
bringing people like me to Adam's Morgan and U street for dining and nightlife and people from various	
places to those places and to Cleveland Park for employment.	Bus Service
Thank you for considering public feedback. Continued robust Metro service is so important to our	
community, our economy, and the environment.	Service Levels
The National Harbor need public transportation. NH2 should Not be on the chopping block! Would suggest aiming to avoid significant service cuts, especially things such as lengthening the wait	Miscellaneous
times during rush hour, or eliminating popular bus routes.	Bus Service
Other western countries have much better public transportation than us. We have a lot more resources	
than those countries. I think we can learn a lot from them on how they were able to grow their public	
transportation, keep it at a lower cost and have relatively much less budgetary constraints.	Operating Budget, Management and Spending
Save Metro for the most residents it provides vital services to please.	Rail Service
Increasing fares will only penalize and criminalize poor people. for many, the current fares are not	
affordable. for a busy city such as dc, it is still very behind in its effectiveness and price range. Most	
people prefer to commute, but if prices keep increasing, more people will shift into rideshare and	
carpooling, because you?ll at least get comfort while you need to commute. Common residents	Due Comise
shouldn?t have to pay the heavy price of bad city planning and money management. Please do not remove D2, D6 or change 33. These routes serve a part of the city that does not have	Bus Service
metro service and are critical to daily job commutes.	Bus Service
Need the early and late service to get to work because I do not own a car.	Bus Service
Please do not eliminate L8. It?s highly convenient for those of us who commute to Friendshio Heights	
from MoCo. We are a one-car family and would likely have to change to two cars if this route is	
eliminated.	Bus Service
Please do not cut the buses that go through Georgetown! There is already no metro and so many	
students and workers rely on these buses.	Bus Service
Please do NOT cut metrobus services along P and Q street. Georgetown does not have metrorail service	
and so buses D2 and D6 are the key public transport for the residents here. It is VITAL to keep the	
service of D2 and D6	Bus Service
THis proposed budget will harm many working people in the DMV. It is unconscionable that so many routes are eliminated or reduced service. THis is the capital of the USA and our metro system should be	
world class. It's disgraceful that you are reducing service on buses, upon which so many residents rely.	
Most pepole using buses are DMV residents as opposed to metro, which is used by residents and	
visitors. I will end up driving or taking lyft rides, adding more to pollution if you proceed wiht this plan.	
It's a disgrace to the citizens.	Operating Budget, Management and Spending
Drivers frequently don't collect fares. Don't reduce service, collect fares.	Fares/Fees/Parking
Public transit is vital to DC?s survival. Cutting hours and raising prices negatively affects working class	
people like me who are the backbone of this city. Public transit is the only affordable way to get place	
to place in the city and for many it?s the only reliable way to get to work and home in a timely manner.	
I am begging you not to reduce hours. The hours are already limited as is, please do not make it worse.	Fares/Fees/Parking
The removal of the G2, D2, and D6 will seriously reduce the ability to travel to Georgetown, where	Dell Carrier
there is also no metrorail service. What will be the impact on the price of Metro Senior Citizen SmartTrin passes? What ten Metrorail	Rail Service
What will be the impact on the price of Metro Senior Citizen Smart rip passes? What ten Metrorail stations will be closed? Has wmata mobalized businesses/neighborhoods, etc that depend/or will	
depend on Metro to contact their elected officials (city, state) and tell them it's important to FUND	
Metro?? If not, why not??	Bus Service
The best proposal on this list is the extension of service hours on the weekend. How much revenue is	
Metro losing to Uber/Lyft/etc. because Metro closes at 1am and bars close later?	Bus Service
Some of these proposed Metrobus cuts, especially in conjunction with possible station cuts will render	
large parts of the city impassible to those reliant on public transportation. Parts of even NW DC will be	
impassable by those without cars. No public transportation to Sibley Hospital is shameful.	Bus Service
It seems that more poorer sections of the DMV will have a tougher time getting to work and around the city if these changes take affect	Miscellaneous
the city if these changes take affect. Please fight hard to get more funding. I have lived in the DMV for the past 5 years and this is the first	Miscellaneous
year where I have truly enjoyed being on Metro; I would hate to see WMATA move backward.	Capital Budget
I am extremely concerned about the extreme service cuts proposed, especially in areas that already	
have very limited transit options. I don't drive, and only one Metrobus stops within a mile of my home.	
That's the R12, which is currently on the list to be eliminated. The next closest buses don't operate on	
weekends, so I'd have to walk for the better part of an hour to reach a Metro station. It's even more	
concerning to consider that my closest station could also be closed, cutting me off from public transit	
even more. I understand that the budget issues are severe, so things cannot stay as-is, but radically	
slashing transit will hurt people throughout the region who cannot afford cars or expensive ride-sharing	
services. I hope through additional funding, and careful balancing of fare increases, service reductions, and other measures, Metro can weather this storm.	Operating Budget, Management and Spending
Metro is most likely losing a lot of money due to fare invaders. Maybe this is what should be addressed.	
D6 is vital for patients accessing Medstar Georgetown Hospital, g2 is vital for employees of the hospital	
and the university	Bus Service
I live in Greenbelt, and I rely on the G12 Metrobus to take me to the Greenbelt Metro Station when I go	
to work in North Bethesda. I have a disability and cannot drive a car. I have been taking the G12	
Metrobus for many years, and it is very important in my working life. It makes no sense to shut down a	
Metrobus line that takes so many people to Metrorail stations like Greenbelt, because that causes a	
reduction in ridership on the Metrorail as well. Please do not make it harder for me to do my job. I am	
a dedicated federal government worker who likes what he's doing. Please keep the G12 line running! Thank you!	Bus Service

Feels like this plan affects lower income areas of service disproportionately. I don't see much happening in wealthier sections of mpntgimery County or Northern Virginia. Or at least it seems to have lower impact there. Please do not eliminate the G2 bus line, it is very necessary for Georgetown University students, faculty, and staff and has good ridership numbers. There is no good reason to eliminate it. Furthermore, please do not ever increase wait times on the Metrorail. No one will ride it if they have to wait longer between trains. Ilive carfree and rely primarily on Metrobus for transport. I strongly prefer bus over rail, and I would rather pay a higher fare than endure service cuts. Also, I'm opposed to bus stop removal ('consolidation') because it also is a reduction in service. I hope you will find funds to cover your budget shortfall and not have to cut service. Thank you Do not make cuts to Metro bus service on which many citizens, particularly senior citizens and essential workers heavily depend. In DC the mayor encourages is to give up cars; this means we take the bus instead of driving. Buses go where the subavay doesn't. We do not need metro services in National Harbort II Proposing Service cuts as people are still coming out of the pandemic seems counterintuitive. Pushing people away from public transportation is environmentally irresponsible. I am over 65, and rely heavily on bus and metro rail. Reducing/eliminating routes 33, 31, 96, will directly impact my ability to access doctors, community activities, museums, theater, and public events. Increase parking fees for SUVs (see Paris, France example); Switch to 100% electric buses faster; Incentivize all DC businesses to fund public transportation for sole citine and pollution crises	Service Levels Bus Service Operating Budget, Management and Spending Bus Service Rail Service Bus Service Bus Service
Put a toll and make people from Md and VA pay to drive through the city on the major streets from the highway. Take the revenue and put it toward metro rail and bus improvements! We pay tolls to drive/commute through VA, why not reciprocate Bus Service Real Service I agree on the changes of bus schedules and shorten routes that do not fall because sometimes they travel empty, but the routes16a and 28 A, are very interesting because we need many people, this is my grasias opinion and that soon solve everything with success. God bless you Bus Service Get the gate jumping and fare evading criminals out of the system and then advertise it to gain riders. Please do not close Forest Glen station This is preposterous that Metro has been so badly mismanaged. The entire management and staff have to be fired and start fresh with new crew and ideas. If other countries can operate a functional Metro i's such a shame the public transport of the capital of the most powerful country in the world is being so badly mismanaged.	who live in the Palisades and rely on the D6 bus to get to campus. Or at least it seems to have lower impact there. Please do not eliminate the G2 bus line, it is very necessary for Georgetown University students, faculty, and staff and has good ridership numbers. There is no good reason to eliminate it. Furthermore, please do not ever increase wait times on the Metrorail. No one will ride it if they have to wait longer between trains. I live carfree and rely primarily on Metrobus for transport. I strongly prefer bus over rail, and I would rather pay a higher fare than endure service cuts. Also, I'm opposed to bus stop removal (consolidation') because it also is a reduction in service. I hope you will find funds to cover your budget shortfall and not have to cut service. Thank you Do not make cuts to Metro bus service on which many citizens, particularly senior citizens and essential workers heavily depend. In D C the mayor encourages is to give up cars; this means we take the bus instead of driving. Buses go where the subway doesn't. We do not need metro services in National Harbor! Proposing Service cuts as people are still coming out of the pandemic seems counterintuitive. Pushing people away from public transportation is environmentally irresponsible. I am over 65, and rely heavily on bus and metro rail. Reducing/eliminating routes 33, 31, 96, will directly impact my ability to access doctors, community activities, museums, theater, and public events. Increase parking fees for SUVs (see Paris, France example); Switch to 100% electric buses faster; Increntivize all DC businesses to fund public transportation for their employees; Create an e	Service Levels Bus Service Operating Budget, Management and Spending Bus Service Rail Service Bus Service Centry Service Bus Service Centry Service Bus Service Centry Service

DC want to fine my condo up to \$2M because it isn?t green enough and yet it wants to reduce or eliminate bus service?!?! I?m so opposed to elimination of the 96, the N2/4/6, and cutbacks to the bus	
lines along Wisconsin and into downtown. The district needs to spend my tax dollars on transit and	
REAL services (including police services and homelessness), not the bureaucracy that sits around	
dreaming up unfair and ineffective policies that provide no services and only increase my expenses.	Bus Service
I take the bus to Capitol Hill for work each day. My commute is now longer since WMATA cut the 30	
and 37 bus routes after the pandemic. I transfer to the 36 bus from the 33 at 13th and Penn Ave or	
take the Metro from Federal Triangle the rest of the way. At night my reverse commute is much longer due to crowded buses and wait times. Right now, it?s almost 90 minutes to travel 6 miles in the	
evening even if I use Metro rail part of the trip. Changes to the 31,33, 96, N4, N6 and 3Y will impact and	
further lengthen my commute. Thank you.	Bus Service
Enough people already struggle with fairs unfortunately I think raising them will only worsen the issues	
resulting in money wasted on fair gates/other protection measures.	Miscellaneous
I?m a mom who uses metro for work and metro to take my son to school. This will effect my commute	
greatly if metro cuts service to the F8 and the 86 please do not cut G2 and D6. It is already hard to access Georgetown through public transit. Thank you.	Bus Service Bus Service
If you cut the d6,d2,62, and 63 busses, i wont be able to get to school at all.	Bus Service
All jurisdictions (Maryland, Virginia, and DC) should be required to fund a specific amount (a	
percentage?) each year. Operating and maintenance costs will increase over time. I expect fares would	
increase due to the increased operating and maintenance costs.	Fares/Fees/Parking
My daughter will have no way to get to her DCPS high school If you cut the D2 and D6. Since DC does	Buc Sonvice
not provide school buses the Metro Bus is her only way of transport to and from school. There is growing need for transit in PG county with lots of development coming. Please prioritize the	Bus Service
green line and bus routes within that region to support the population.	Bus Service
I commute to work everyday using the 96 bus in at least one direction - without it I would have to	
consider getting a car which I want to avoid & cannot afford. The 96 bus service & frequency on S2 and	
weekend service on 42 & 43 were critical in my decision to live at my current address - if wmata want	
to keep people using their services, reducing these services will have a significant detrimental impact	Bus Service
the d2 and the d6 are used by so many students at duke ellington if you cut BOTH of them how will we get to school?	Miscellaneous
With Metro being some people's only form of transportation, fare hikes and service elimination would	
crumble a lot of livelihoods. Most people use Metro because they cannot afford a vehicle. Especially	
with the way inflation is, and with literally everything on the rise. A suggestion I have is coming up with	
programs to help people at least TRY to afford the price hikes that will eventually come. My other	
issues are reducing services for places like D2, R4, V8, X8, etc. Without these routes, so many people	
would have to walk miles just to reach their homes. It's unfair and unacceptable for people trying to	
make a living, and they're unable to determine how they will make it to their jobs or even to the grocery stores for food. Please reconsider making cuts or changes to other places.	Bus Service
im working at georgetown have to catch p12 on weekend to get to stadium to catch d6 to get to work	Bus Service
in yes this will impact me because everybody doent drive dont always have lyft or uber money please	
think about people depened on these routes ther alot of people that come georgetown hosptial that	
dont drive.	Bus Service
A Lot Of people will be affected on these proposals elderly people Handicapped persons who does. not	
have any other means of transportation to get to the hospital. or even to perform their activities of daily living. A lot of my coworkers. As well as myself . who has to work at Medstar Georgetown	
University Hospital . Who depend on public transportation to get to and from work .	MetroAccess
please do not eliminate the only service over the Wilson Bridge NH2 this will leave zero transit options	
between PG County and Alexandria	Service Levels
Do not eliminate D2 - it?s the only bus servicing the neighborhood and connecting it to the red line	Bus Service
Please reconsider yellow line turnbacks. Those of us who live on the northern end of the green line experience crowding and delays. We can no longer easily transfer to red line because delays near Mt.	
Vernon cause us to have to wait several extra minutes. It takes almost double the amount of time to	
get to National Airport. With the yellow line running to Fort Totten and past Mt Vernon it used to take	
about 25 minutes to get to the airport. Now you have to build in at least an extra 20 or more minutes.	
Reducing bus service in busy areas is not a good idea. There are a lot of seniors who cannot walk	
several blocks to get to metro, but they can walk to their corner to catch a bus. Bus drivers help seniors	
to board. Metro is very challenging for those with mobility issues because folks get impatient during rush hour. Also, if metro keeps hiking up fares out to the suburbs those folks will drive instead of take	
metro and our roads will be even more congested and polluted.	Bus Service
I am in an area of town where without metro rail access and rely on the metro is to be connected to	
other areas of town as the most affordable option. As taxpayers, we should have access to public	
transportation in our neighborhood, especially given the number of schools and the presence of	
hospitals in our area.	Rail Service
In my opinion I think that if they ask me about routes that I do not frequent very often I will say that they close them and that I keep the ones I used in the same way that if they ask someone who does not	
they close them and that I keep the ones I used in the same way that if they ask someone who does not use my route, they will say that they close it. On the other hand, in my case, the R12 bus is very	
important for me in particular that I am going to the doctor is an affordable means of transport.	Bus Service
This is absurd, too many people (especially students) rely on these bus routes.	Bus Service
Please do not get rid of the M4. It is the only bus serving our neighborhood and is a lifeline for seniors	
as well as students heading to Deal MS and Jackson-Reed HS. The Military Ave bus lines are critical too.	
Thanks for your consideration. You cannot just take a whole route of busses away. There should be other ways to find fundings. Most	Bus Service
of the metro systems in the world work in deficit. The point is not to be profitable, but to provide	
public means of transportation to the population. You should be working with VA and MD to	
understand what can be done to encourage people to use metrorail/metro buses more, instead of	
cutting the service. Also work on infrastructure to make rides cheaper, electric vs fuel, and so on. Look	
	Rus Convico
into other metro systems in the world such as Singapore and how they achieved profitable results.	Bus Service
Eliminating the D2 and D6 bus lines would severely impact my ability to commute and get around my	bus service

Some of the bus routes service multiple schools where no metro stops are close e.g. D2 and D6 (5 public schools among them a new high school with no other public transportation option). Children	
would not be able to get to and from school if these bus routes were eliminated.	Bus Service
STOP SENDING \$ TO ISRAEL AND MAYBE WE COULD FUND PUBLIC TRANSIT??!!!!	Miscellaneous
The Glover Park area already does not have ready metro access. Removing bus routes and/or increasing fares will make it incredibly difficult for residents of this area to access public transportation in DC.	Bus Service
budget cuts is going to make my commute to work harder. your making it hard for people without car	bus service
in the community to get to the hospital. your not helping the community your actually making	
everything worse .	Operating Budget, Management and Spending
Please do not cut lines, as for our entire neighborhood the D2 bus is the only public transportation that a lot of people use it as a regular commute, on daily bases.	Bus Service
Service cuts make metro much more unappealing to anyone who has a choice. And for climate change	bus service
and community sake, we should be making public transit more vital and comprehensive.	Bus Service
Cutting frequency to the extent would be devastating to ridership and the functioning of the system as	
a whole. If late night service got cut it would deeply impact my ability to enjoy the city at night and avoid using rideshare and reducing frequencies would make my trip to work more difficult with more	
waiting and a longer wait time when transferring. Some of the frequencies proposed are more fitting	
for a light rail system in a mid-sized American city. As the nations capital city, we need to set an	
example and operate the world class system to the fullest extent with the highest frequencies as early and as late into the day as maintenance needs will allow. Replacing the 6000 series with the 8000	
series should still be a capital budget priority. The budget shortfall will not be forever, Metro needs to	
maintain critical services as best possible so people still maintain their commute patterns and	
inclination to take transit. I support more fare increases over service cuts, taking transit will always be	
cheaper and more sustainable than ride share services or driving, if people can pay \$20 to park or \$10- 30 for an Uber/Lyft/Taxi, people can afford a slight fare increase for transit, as it will still be significantly	Operating Budget Management and Spending
As a disabled rider I need access to both bus lines and the metro services at their current run time. If	
the bus lines which bring you closer to the metro rails are shutdown that will make it a lot harder to	
have access to any form of public transportation. I also don't think it?s best to decrease or eliminate	
and weekend services or holiday services because there are still people who rely on the buses!! and the metro rail	Bus Service
Reducing service could lead to a death spiral for the system. Ridership can only increase if the bus or	
train is there to use and the nearby station is open.	Bus Service
Do not cut 96	Miscellaneous
I currently live near a close-in suburban Metro station, and I do not own a car I rely on Metro for my transit to work, and to see friends and family. If I have to wait 15 minutes in between trains on	
weekdays, I'm honestly not sure what I will do. That doesn't seem like a reasonable length of time to	
wait, if you have to get to work on time. I'm not sure if I'll need to finally buy a car (which I don't want	
to do), or what. But I don't think I'd be able to rely on Metro. If Metrorail service is cut, I fear it will	
send the system into a death spiral. And Uber will be laughing all the way to the bank. Please keep the D6! It is so important to me!	Rail Service Bus Service
The ridership counts recorded by fares are not accurate for the bus routes. I frequently ride the F4, F8,	
83, and 86 buses. There is a large percentage of riders who do not pay the fares, but these busses are	
often full	Bus Service
Metro is a public service, and DMV residents have a right to good public transit system. Accessible Transit is racial justice, economic justice, disability Justice, and so much more. Don't cut WMATA.	Rail Service
I am a graduate student at Georgetown University. I do not have the means to live in the university's	
vicinity due to the high costs of housing. Eliminating G2, D2 and D6 Metrobus lines to school would	
double the time it takes me to get there, thereby forcing me to take the metro all the way to Rosslyn station, Virginia, and walk the remaining 25 minutes across the bridge to school. This would impose	
significant additional stress to my everyday life. It seems most unfair to deprive students from access to	
their university. Thank you for your consideration.	Bus Service
Dependent on the Metro would increase, but there is not evidence Metro service would improve,	Rail Service
metro and bus are my only ways to commute to my job, my son's activities and also we take metro during weekends cause we cannot afford cars, this is why we choose to live in the DMV are and always	
have been living near metro stations we also believe that it helps to decrease traffic and pollution,	
metro budget should really be increased and reconsidered	Operating Budget, Management and Spending
Please don?t eliminate or reduce service on bus lines. In this age of climate crisis we need more bus	
and metro service, not less! What are the politics behind this? I feel like public transit is one of the few things that work in this city.	Bus Service
How is it that your budget is getting cut? Just get a bigger budget.	Operating Budget, Management and Spending
Metro trains and buses are my primary means of transportation in the DMV. I am a senior citizen and	
do not own a car. Many employees are dependent on Metro bus and rail for transportation to their jobs. Reducing routes	Bus Service
and reducing accessibility will have a negative financial impact on these families. Students and	
temporary workers are also dependent on the Metro. Fare increases will be more tolerated in	
comparison to route changes. DC is well known for its public transportation system and it is a plus for	
the economy. Please don?t change the routes or schedules. Thank you. metro in dc is very important, please don?t cut service	Operating Budget, Management and Spending Rail Service
Have the jurisdictions contribute morr	Kall Service Miscellaneous
I have been relying on the D2 for my daily commute to graduate school and now to work for the past	
three years. The termination of the bus service would negatively effect my commute.	Bus Service
People rely on public transit in this high cost of living city - we need reliable transportation like metro rail and metro bus. We don't need new cars or trains - we need low fare prices and increased service.	Bus Service
Georgetown doesn't have a metro in walking distance so many people rely on the bus to get to work,	
to the hospital, and to transfer to a metro line. Please do not eliminate the public transit in	
Georgetown, especially D2 and D6. Many people also use these buses to travel to and from the hospital	
for admission, visiting family members, or work. Please be aware that certain people rely on late night and early morning service to get to work - please	Bus Service
keep this in mind, especially buses/rails that service lower income areas.	Bus Service
Stop funding increases for law enforcement while cutting basic transportation services for everyone e	Capital Budget
I think that y?all should find other alternatives to finding that doesn?t lead to service cuts or fare	
increases. Ppl have work, school, and other obligations and it will only make our commutes a lot tougher.	Bus Service
Metro is already one of the most costly systems in the nation. I may have to look for work outside of	
the district where I can take Ride On to get to work if the proposed changes go into effect. The district	
government is recalling their employees and having us work in the office 4 days a week. The Health department just moved and my commute of the proposed changes go into effect would cost me over	
\$20?a day. 4 times a week, 4 weeks a month. That is cost prohibitive!	Fares/Fees/Parking

Comment	Category
I would not like either service cuts OR price raising. I am physically disabled and it already takes so	
much to walk to the nearest bus and stand for long periods of time. Raising the price would only serve	
to put an undue burden on struggling, working class people. We should not suffer because the city has its priorities in the wrong places. Think of the people please!!	Bus Service
Increase the budget literally so few people can afford to live let alone commute to where they need to	
be, this affects almost everyone and people can barely afford basic necessities, increase the budget and	
keep the existing routes and don?t increase the fare	Operating Budget, Management and Spending
People really struggle to make ends meet in this city/region. The Metro is their/our lifeline and the	
frequency helps us save time so we can make it to work, so we can make it to our families, and so that	
we can do every-day tasks as timely as possible. Despite the crime, the low ridership etc. this is still an essential service in DC that needs to maintain current service levels.	Fare Evasion/Safety/Crime
Is there a way to address some of the use issues by having less overlap of bus routes? For example, the	
42 used to have a different route than the 43. They have a larger overlap now, which may by excessive.	Bus Service
Please please please don't take away the D6 and D2! I'll pay more money to ride, I don't mind.	Bus Service
1?d prefer that Metro be funded through taxes and road tolls	Rail Service
I would prefer that Metro improve its efficiency, increasing productivity and reducing costs instead of	
reducing transport services. For those of us that need to switch metro lines - if service is sparser, the transfer and total time can	Fares/Fees/Parking
become much longer.	Bus Service
Strong opposition to eliminating late night Metro service and decreasing frequent of Metro trains	
during rush hour! Also the proposed increase of fares on express buses seems too much. Decreasing	
frequency of bus service on underutilized lines and modest far increases seems the best way to address	
budget shortfalls. Thanks!	Operating Budget, Management and Spending
I understand why it's framed this way, but it's very, very frustrating to pretend that 'fare increases' and	
'service reductions' are the only options available to address the budget issues, and that limiting one necessarily means increasing the other. Public transit should be sufficiently funded to make sure any	
and every person who can benefit from it gets to; this is an equity issue, an economic issue, a climate	
issue, and a moral one. Reducing the frequency and quality of service will necessarily drive prospective	
riders to other forms of transportation such as cars and Ubers that will increase congestion on our	
roads, pollution in our air, and danger to pedestrians in the DMV. That reduced ridership will likely	
result in lower fare revenue (even with an increase in fares!), further reducing the ability to provide	
even decent service in the future. The *only* sensible solution here is to *increase* ridership by improving service, reducing and/or eliminating fares, and funding these initiatives via budget increases.	Operating Budget Management and Spending
Please consider posting more Metro maps around every station. Many times I have to check my phone	
to remind myself and plan my route. Please enforce no eating on the train and security to enforce rules	
and pay attention	Bus Service
The wording in many of these questions is unfortunate. The decisions to cut services will not impact	
people?s decision to use Metro when they have no other choice. It will just increase hardship on	
working people and people with disabilities. The choice between cutting services versus raising fares is disingenuous. Public transport needs to be heavily subsidized. And degrading services leads to	
decreased ridership which you then use to further degrade services. Change the framing to increase	
services and build a world premier transit system that people WANT to use.	Fares/Fees/Parking
Do more to stop fare evasion	Fare Evasion/Safety/Crime
The D6 and D2 are vital to both of the commutes of my children (attending Duke Ellington and BASIS	
from Hill East) - they will not be able to get to school without them! Ridership on these busses seems	
lower than it is because students are not typically asked to swipe their kids ride free cards - I'm not saying they should be pushed to do so as that would slow the morning process, but please find a way	
to estimate this additional ridership and take it into account. As DC taxpayers we do not invest in	
school busses for public schools so this is in effect the school bus - PLEASE KEEP THE D6 and D2!	Bus Service
I live in Glover Park where the nearest metro station is an hour walk. We already have such limited	
options for metro service here and now you are wanting to take away our only means of leaving the	
area if we don?t have a car or aren?t able to walk Most important to me: - keeping Metrorail late service - keeping commuter buses running fully through	Rail Service
downtown (personally, the 52/54) I have loved what WMATA has done under Randy so far, and will be	
pushing where I can for DC/VA/MD to make up the budget shortfalls - I trust WMATA under Randy to	
allocate such funding efficiently & effectively. Please feel free to contact me for any further comment -	
jack.p.koppa@gmail.com	Operating Budget, Management and Spending
All the best! The work you do is important.	Miscellaneous
D2 and D6 are crucial for patients and employees of Medstar Georgetown! Patients rely on these bus routes to receive their life saving treatments!	Bus Service
After the pandemic I see excessive abuse of people jumping the turnstiles, thus NOT paying. It is not fair	
that you keep asking for increases but you don't stop this abuse! Also, the subway floors, walls, and	
seats are disgustingly dirty. If you want more money, clean up the place. Also, numerous times my	
connector train would arrive and it was impossible for me to exit my train and make it to the connector	
train within the allotted time. There seems o be NO consideration and No accommodation for	
travelers. You keep wanting more but you don't enforce the rules nor try to accommodate travelers with accessible time between connections. You are starting to act like Amtrack - no accountability -	
with accessible time between connections. You are starting to act like Amtrack - no accountability - wake up and help.	Bus Service
I thought busses were supposed to be free by now	Bus Service
Please do not cut any services.	Miscellaneous
Please do not eliminate the D2 and D6 buses. I am a healthcare worker for Georgetown Univ. Hospital	
and I am absolutely certain that these bus routes are essential for GU employees to get to and from	
work, as well as for patients to have access to the hospital and get discharged safely home from the hospital after their stay. If anything, these bus routes should have increased frequency of service ? They	
hospital after their stay. If anything, these bus routes should have increased frequency of service? They come only every 30minutes, but the need is much greater than this. Eliminating these bus routes would	
be detrimental for our workers and patients and decrease the accessibility of the hospital, which is not	
fair for the community. Healthcare is important for all.	Bus Service
Enforce collecting fares. Issue no trespass orders to metro rail fare evaders and instruct metro bus	
drivers not to pull away from the stop until everyone pays or gets off.	Bus Service
keep the 52, 54 and d6 line please. It is a vital transport for work.	Miscellaneous Pail Service
Please take some actions to make sure people are paying for metro services if you're short of money Maryland and Virginia need to pay their fair share. We go through this mess almost every budget	Rail Service
season, and it's ridiculous.	Operating Budget, Management and Spending
Changes to buses running through the center of the city will take this excellent service and make it	
mediocreand push people like mewho can afford taxisto take those instead. These changes will	
reduce ridership and increase cars on the road.	Bus Service
Please do your best to make sure riders pay for the service. There are many people I witness that get on	
the bus and do not pay.	Bus Service

Comment	Category
I know the part of the 42/43 bus route that you're proposing to cut is new as of a few years ago, but it's	
already proving to be extremely useful. It has provided the first (and only) convenient way to get	
between my apartment in Mt Pleasant and the Kennedy Center area, and has allowed me to see	
doctors that are in that area whose offices would be very hard to get to if the bus were no longer on that route. So, I hope you do not change or cut the southern end of the 42/43 bus routes.	Bus Service
It is currently expensive and challenging to utilize the mass transit systems (bus, train, bikes, parking);	
therefore, proposing service cuts puts me and many of my colleagues at a disadvantage especially	
when my work site moved an hour to two hours travel time away from my home. Unfortunately, I	
would vote for some fare increase with a cap on 10%, rather than service cuts.	Bus Service
Decreases in the availability and frequency of public transit would make DC less appealing of a city to	
live in.	Bus Service
DO NOT RAISE FARE PRICES OR SERVICE HOURS!!!	Fares/Fees/Parking
Stop making customers suffer because you don?t want to actually put in the work yourself. Your	
employees are lazy and incompetent, while management is inept and making changes that will tank	Onersting Dudget Measurent and Counting
the system. Ridership is increasing and now you want to cut BACK service? Stupid stupid. 75% is a huge increase. I already pay \$6 one-way (\$12 roundtrip) a 75% increase would make the	Operating Budget, Management and Spending
\$10.50 one-way (\$21 roundtrip). By that amount, it would be more affordable to drive.	Miscellaneous
Would love to see a transition to more electric buses. Additionally, would there be programs in place to	
support children/youth, elderly, disabled, and lower-income residents access metro services (bus/rail)	
in the event of fare increases?	Bus Service
Cutting bus lines that service hospitals (such as the D6) is criminal.	Bus Service
I firmly believe that for environmental, social, and economic justice, a well functioning, efficient, and	
widely available public transportation system is vital to our community. Just like we pay for car-based	
infrastructure, we need to support public transportation. We must make public transportation as	
efficient (or more efficient) than car-based transportation	Miscellaneous
Wondering if there are better ways to address the huge increase in fare jumpers not just because it obviously means less revenue for WMATA but because it's so prevalent it makes those of us who	
actually pay our fares feel like chumps, sort of a broken windows phenomenon? Also I feel like rather	
than cutting service and increasing fares (or in addition) that those who choose to drive and park	
should be subsidizing WMATA instead of transit riders effectively subsidizing driving (i.e. when we take	
transit it reduces the need for building and maintaining more infrastructure for roads but that is rarely	
ackknowledged).	Fares/Fees/Parking
Please don't cut service to the S2- these busses are ALWAYS packed to the brim duirng weekdays and I	
often need to wait for 2-3 busses to go by before I can get on. The 42 and 43 are also Critical lines	
which are otherwise not well serviced by metrorail. Cutting these on the weekend would essentially cut	
me off from using all metro services on the weekend. Cutting service is likely to cause people to choose	
cars over public transportation.	Bus Service
Increase the fare for those able to pay, stop penalizing those who cannot (including through the use of these horrible fare gateswith extra barriers often placed at Metro stops that unfairly target Black and	
Brown people), and look for ways to increase service. Often, the greatest determining factor in my use	
of WMATA is whether I should pay for an Uber or wait 20+ minutes for a bus/train. A more reliable	
schedule, not a cut schedule, would increase my ridership.	Bus Service
Public transportation is extremely important in DC. Cutting large accessibility for people who live in	
areas that may seem a little out of the way. Affects some people in ways that you may not know.	
Everyone is trying their best to live and get by with the rising costs of everyone. And the people who	
depend on public transportation are some of the most affected people in the rising of costs we?re	
experiencing today. Truthfully the metro should be owned by the state and it should have tax funding	
so it?s free to everyone. But unfortunately it is not. Do what you can so some people are not left in	
poverty and unable to get to work, feed their kids, go home, etc. I myself depended on some routes out	
of the way and had to wait up to an hour for one bus to come take me 15 min down the street. In the freezing cold. Just to get to work it took me almost 2 hours. Imagine if they completely cut my bus out.	
Now I can?t get to work, can?t pay fares, can?t pay for an uber. Nothing. My situation I was safe and	
my work schedule allowed me to leave around 6-7pm some people don?t leave work until 10pm or	
later. They can't afford to have no metro coming after 9-10pm. Or imagine there is a drunk women	
trying to get home safely using public transit. But they stopped running at 9 pm. How will she get	
home? Its not safe and it?s careless to cut in such massive ways.	
	Bus Service
Please address fare evasion problems across the DMV. I am concern that WMATA is increasing fares for	
those who pay while those who don't pay ride free. This is an equity problem!	Bus Service Fare Evasion/Safety/Crime

As a DC Gov employee I don't support service cuts or fare increases because of the following: 1. I don't	
have a car and rely entirely on public transportation; 2. Our telework is being decreased, meaning we	
need an more regular access to public transportation; 3. Our DC Gov office was just relocated which	
has increased the commute time for the majority of my office, myself included. This means that metro	
service cuts and/or fare increases would impact our ability to get to/from work on time/within a	
reasonable time and further increase the amount we spend to get to work - we are already losing staff	
due to these changes, and cutting metro services and/or increasing fares will likely lead to further	
staffing loss. 4. For those of us who have health issues and need to visit their doctor's offices	
frequently, which means during weekdays and typical business hours, we need to be able to get to and	
from our appointments quickly to avoid missing more time at work.	Bus Service
Please do not continue cutting services to bus lines that are connected to Columbia Heights. This area	
already has a lot of traffic and bus lines are used for commutes. Also, please do not cut bus services to	
	Bus Service
Frequent service is very important to my decision when using metro.	Bus Service
Hit Maryland and Virginia up for a larger contribution	Miscellaneous
Prosecute fare jumpers and provide better service	Fares/Fees/Parking
Cutting service frequency on common lines means metro will utterly fail. If metro can't deliver a	
SINGLE route with frequent trains, why should anyone ever assume they can take metro. Please also	Due Contine
invest in safety.	Bus Service
Prefer more frequent service with higher fares. Eliminating or cutting back on service will drive away fare-paying customers and put Metro in a doom loop. Many can pay higher fares (including fed	
government as employer) and local jurisdictions can provide subsidies for citizens who can?t afford it, if	
those jurisdictions choose to do so.	Fares/Fees/Parking
	Rail Service
please don't close stations or decrease service Please don't cut the G8, I literally bought a house because of how close it is to that bus line and it is a	
lifesaver in making the city accessible to me and my family.	Bus Service
Smaller buses were utilized for a while on D2 some years ago. That would work except for rush-hour.	
We are trying to use cars less, buses more. Please don?t eliminate the D2 route. We need service to	
Stoddert Elementary school.	Bus Service
It is absolutely imperative not to cut service frequency. Service is already so infrequent and inconsistent	
on many combined routes that it makes it difficult to use any Metro trip that involves a transfer for any	
purpose that has a specific schedule. The way to make a public transit system work is to make it so that	
the use of the system is desirable and easy, not bargain-basement cheap. Public transit is not a 2nd-	
class system for people too poor to afford a car, it should be considered the premier way to access	
most places in the city. While there may be some few people for whom fare increases are difficult to	
handle, there are far more people whose livelihood and well being depends on consistent and reliable	
access to transportation. Furthermore, any modal shifts to transit and away from cars have many social	
benefits- reducing pollution, CO2, road wear, and even reducing traffic to improve the situation for the	
remaining car users.	Bus Service
For the 50 years I have lived in Georgetown, the D2, D6, and G2 buses have been my lifeline. I do not	
drive, and believe in public transportation as crucial to urban sustainability. Please do not cut these	
routes so vital to our neighborhood and our city.	Bus Service
Please DO NOT eliminate the D6!!! This is the primary way I get to work at MGUH. Without this bus	
route I will literally have no way to get to work. So many patients and employees here use that bus line	
it would be such a huge problem if it was removed.	Bus Service
I'm elderly and retired and co not own a car so I desperately need the bus services as they currently are	Bus Service
Reducing frequency of service is a bad solution. It may lead to a death spiral of declining ridership.	
Frequent buses and trains are what make metro useful.	Bus Service
Frequency is freedom. Keeping fares low but slashing service would only mean that lower income	
residents of the DMV can't rely on Metro service for the daily needs. People need sufficient frequency	
to rely on using Metro for work, errand, and leisure trips.	Bus Service
I strongly reject the proposed shortening of the 52 bus line. This line provides direct access for federal	
employees to get to work, which is a big goal of the mayor. In addition, it provides connection to and	
from the wharf for after work and weekend activitÂ,s. It this line we?re to be shortened, I would	
telework more often and visit the wharf business less often. The metro access is not close to the wharf	Due Camilae
and does not feel safe at night. Please do not shorten the 52 bus line.	Bus Service
I am very happy to pay more to ride metro but more needs to be done on fare evasion. It's absurd how	
few people pay to ride the train and there is absolutely no enforcement. Station managers and private	
security just watch people hop the turnstiles and do nothing. Without ensuring people pay their fares there will be a lot more resistance to paying more.	Earo Evacion/Safety/Crime
Please avoid decreasing how often metro rail trains arrive at specific stations. If necessary, instead you	Fare Evasion/Safety/Crime
should cut low-use stations or raise prices. Decreasing train frequency could make metro nearly	
unusable, and result in significantly lower ridership.	Bus Service
Increase the fares, make service better, build more housing around stations. Better service will equal	
more riders, more riders equals more revenue. Can then cut fares or further expand service. Add	
stations, building more housing around stations, increase ridership, rinse and repeat.	Fares/Fees/Parking
If we get rid of the bus (old greenbelt) then we have no connection to the metro. That means fewer	
passengers for you. I like the idea of reducing the frequency of buses. I think access to the metro should	
increase, not decrease. Thanks!	Bus Service
Cutting service routes directly affects people?s daily routines and schedules, negatively affecting	
people?s access to jobs, food, education, and healthcare? not to mention eliminating transportation all	
together for the disabled who cannot drive. This will cause an increase in ride shares, purchasing of	
cars, and migration out of the DMV due to people having no other option.	Bus Service
Please don?t cut rail service frequencies. It would be suicidal, and I would mostly stop riding.	Rail Service
I support more funding and at the margin service frequency is more important than low fares.	Capital Budget
Fare increases preferred to service cuts. Why not cut weekend 42 but keep 43? 43 serves most of same	
stops and not far to walk from Metro to bus stops at CT Ave & S St or CT & N St	Bus Service
I believe strongly in good public transportation for all, including paratransit for people with disabilities.	
The Metro Washington area is difficult to navigate in a car. I am willing to pay more for services but	
don't want cuts in service (frequency, days of service). Please work to eliminate fare evasion.	Fare Evasion/Safety/Crime
Please do not cut the N6 on weekends. It is vital to my travel downtown from American University. I	
also would be very upset if stations began to close at 10pm at all days. I often use the metro past 9 or	
10 pm on weekends and even weekdays. It would add a lot more stress to my schedule if I knew I had	
10 pm on weekends and even weekdays. It would add a lot more stress to my schedule if I knew I had to be on the metro much before 10 if I want to get home using metro.	Rail Service

Comment	Category
We have some of the most expensive transit in the nation, despite its high utilization. Due to the cost	
of rent in our region, many users of Metro do, in fact, pay maximum fares - currently \$12 a day, \$60 a	
week, \$240 a month. It was ridiculous that it took until 2022-23 for WMATA to put in place a reduced fare option for low-income riders. Frequent, safe, reliable, affordable transportation is an essential	
service, and current trends indicate that Millennials and Gen Z prefer, and will gravitate towards,	
walkable spaces. Reduction in Metro services will drive this demographic away from DC, worsening the	
present trends in the District. The most vulnerable residents of the region disproportionately rely on	
transit, and reduction of services will always hurt them first, and most severely. DC is already infamous	
for its inequity, exacerbated by inaccessibility of transit for the most vulnerable residents of the District.	
Service reductions will make this problem worse. Fare increases are also not the answer. As previously	
mentioned, fares are already some of the most expensive in the country. Yet for the costs that DMV	
residents pay, we get a mismanaged transit system that is frequently unreliable. What other transit	
system in this country has to spend a year operating at 50% capacity due to the failure of those in	
charge to ensure that new trains are safe and compatible with our existing infrastructure? What other	
transit system in this country has invested millions of dollars into faregates more than once in 5 years	
because the faregates chosen were (obviously, to the naked eye) vulnerable to jumping? Fare increases	
amount to an attempt to punish Metro users for WMATA leadership's mistakes. If you want to balance	
the budget, focus first on fare enforcement. It is not only children who jump the faregates; I see	
multiple adults doing this every single time I use Metro. You cannot expect to recoup costs by raising	
fares if you are not even enforcing fares in the first place. Metro is one of the only attractive features of	
the region to young professionals, because despite all of these missteps, it continues to be widely	
considered reliable, safe, and clean compared to other major cities' transportation. Any reduction in	
service, or increase in fares, renders Metro a less attractive option. It also draws attention to the	
chronic mismanagement issue in WMATA, jeopardizing Metro's reputation. Work to ensure the	
commitment necessary to keep Metro operational from DC, MD, and VA - who all rely on Metro -	
without reductions in service or increases in fares. Do not allow the people who are responsible for	
keeping Metro safe and reliable (including WMATA) to foist responsibility for maintaining the service	
off on the public, who by and large do have the choice to move out of the region.	Operating Budget, Management and Spending

Please do not alter the 42, 43, and especially not the L2 as proposed. Be sure to keep weekend	Bus Service
Keep funds as is for patrons. You will lose service	Service Levels
Please do not cut metro rail service. Metro rail needs to be available to be useful.	Rail Service
Service should never be cut. The public needs to have their faith restored in a SAFE and RELIABLE metro	
system. Metro should have extended service hours and shorter wait times. Cutting service will turn	Fara Eussian /Safatu/Crima
more and more folks off to the system. I love the metro and I need the metro. Service cuts would cause huge backlogs of traffic for commuters,	Fare Evasion/Safety/Crime
having to go to stops much further away and with much fewer parking space. If we want to help the environment and improve urban/suburban mobility, I and I think many people are willing to pay more	
for metrorail/bus access. The closure of metro stations would be highly damaging to the relatively 'few'	
	Due Casilas
users of those metro stations. Please don't close them. PLEASE do not cut the D2, D6 and G2. You would effectively be cutting off Georgetown and Glover	Bus Service
Park. I am a senior citizen without a car and would have to move. There is no alternate way to get from	
Georgetown/Glover Park to Dupont Circle. It would require going to Foggy Bottom and taking the	
metro then changing lines, tripling or quadrupling the time and reducing the hours available. This	
would dramatically worsen the quality of life. If absolutely necessary, cut the D2 and retain the D6. This	
is a matter of utmost and life-changing importance to me.	Bus Service
Cutting service is not a sustainable option when many parts of the city are barely even serviced. Cuts	
will only increase racial and economic inequity	Service Levels
There's no reason that Metro should have to raise fare or decrease service just to improve. When the	
Metro was consistent, reliable and safe before Covid ridership was higher. Maybe try going back to	
that. Also there are other rail systems that work better than WMATA and they cost less for riders,	
maybe contact those jurisdictions to see what they are doing, why it's better and why they have	
increased usage (ie NY and Chicago).	Fares/Fees/Parking
Extending the yellow line to Fort Totten would increase the likelihood that I would use metro on a daily	
basis for my commute	Bus Service
Fares have already been increased. There was a re-shifting of bus routes for the 30 line buses a few	
years ago which resulted choosing less and less public transport as moving around town gets more	
complicated. Metro should start fighting bus fare evasion which has become rampant especially on	
buses. I take the bus regularly and less than half the people choose to pay, while the bus conductor	
chooses to look the other way.	Bus Service
I live in Largo and the blue line has problems on a weekly basis. Having the silver line as another option	
is very beneficial for my weekly commute to Rosslyn.	Bus Service
Washington DC is (was?) a world class city. World class cities require world class transit. End of	
comment.	Miscellaneous
Weekend free or low cost Metro parking is extremely important to me to using the system. I am also

Fare increases are a much better way of dealing with current budget shortfalls. I *do not own* a car, nor do most of my friends who live in DC. Having to pay more for transit services is one thing, but for	
them to just not exist for large swaths of the day would be debilitating to our quality of life. I know	
there will be some backlash from raising fares, but reducing service is a death-spiral for transit if people	
turn increasingly towards purchasing personal vehicles if they can no longer rely on transit to get them	
to work and other obligations. Thank you so much for the work you do!	Operating Budget, Management and Spending
If Metrorail wait times will increase to 15 minutes between trains, I will stop commuting from	
Alexandria to NoMa by MetroRail. I need to change from Yellow to Red lines on my commute. 15 minute wait times for two trains will add potentially 30 minutes to my commute, which is	Rail Service
The proposed elimination of the NH2 bus route, the sole public transportation link between National	
Harbor, Maryland, Alexandria, Virginia and Washington DC, is a decision that overlooks its critical	
importance to the local community, workforce, and tourism sector. This route does not merely connect	
three geographic locations; it supports a vibrant ecosystem comprising hotels, restaurants, and	
attractions that significantly contribute to the local economy. For many employees in these	
establishments, the NH2 is more than a convenience?it's a lifeline, making their daily commute affordable and feasible. Without it, the financial burden of paid parking could render employment	
untenable for a substantial segment of the workforce. Furthermore, National Harbor's appeal to	
visitors, who contribute to the area's economic vitality, hinges on its accessibility. The NH2 service is	
indispensable for tourists, especially those coming from or heading to the airports, facilitating a	
seamless connection to the broader Metrorail and Metrobus network. The discontinuation of this	
service not only threatens to disrupt this symbiotic relationship but also risks a decrease in Metrorail	
ridership, as NH2 stands as the singular conduit to the metro system for both residents and visitors. In essence, the removal of the NH2 bus route would erode the foundations of community accessibility,	
workforce sustainability, and economic growth, making its preservation not just a matter of	
convenience but a crucial investment in the region's future.	Operating Budget, Management and Spending
If service is cut to many of the proposed stations, lines, and stops, folks would be forced to buy cars	
they cannot afford (myself included), or move out of their apartment and into a place closer to a line	
that is open, which creates an overcrowding problem in an already overcrowded city.	Rail Service
The proposed cuts and changes significantly impact my ability to commute to weekly doctor's visits (chronic illnesses) and to my parents. I do not have a car and rely on the Metro and bus system for my	
healthcare transportation, to/from work in Grovesnor and Springfield, and to visit parents in	
Annandale. The listed cuts would force me to compromise my health and well-being by reducing my	
time to be with my healthcare professionals and family so that I can get home via WMATA systems.	Bus Service
Please devote some funding to increasing security presence and making riders feel safer in riding when.	Fare Evasion/Safety/Crime
Given the limited transportation options for those residing in Georgetown and Glover Park, including	
students (middle school, high school and college who come there from across the city), and for families without cars (like ours who rely exclusively on buses) - routes such as D2, D6, G2, 31, 33 - are our	
lifeline to access work, school and extracurricular. Cutting those will have a severely detrimental impact	
of families and students living and needing to reach the areas of Georgetown and Glover Park for	
school, work and recreation.	Bus Service
I would rather pay more for fares than have less service	Fares/Fees/Parking
need to make rush hour train service the priority to get more people back on metro and out of their	Rail Service
I believe that service cuts to MetroRail and MetroBus will result in worse conditions on the roads. We already live in a heavily populated, congested area. Increasing mass transit usage should be the priority.	
Cuts to Metro services would make these issues worse in the future. It would make MetroRail almost	
unusable in some situations.

Cutting the Foggy Bottom busses would impact many workers who need to get downtown from NW DC. Taking the train from Petworth to Foggy Bottom can involve at least 2 changes sometimes and then requires long walks from the metro to federal buildings south. The bus allows for a more direct and less stressful commute, with workers able to reach places like the Kennedy Center and the State Department or GWU without walking nearly a mile from the metro. Also, the Petworth and Silver Spring bound busses are a lifeline that also save blocks of walking (having been on crutches more than once, trying to walk the mile from my house near the old soldiers home to the petworth metro or down Georgia Ave). Losing these stops or changing frequency makes a big impact. The M4 Metrobus is one of the main, if not main, transport lines for a significant number of Deal MS and Jackson-Reed HS students. Eliminating this route will have a negative impact on school attendance, and place additional burdens on many families. G2 is my own way of public transportation to go to school at Georgetown University. If G2 stops at 37th and O as well as in front of Car Barn are eliminated, I would have no option to come to school. Georgetown already has very limited public transportation available. The elimination of G2 stops in Georgetown would be detrimental to the student body that replies on G2 for their commute to school. I don't drive and rely on Metrobus for most of my transportation needs. Please do not cut lines or service. You will be hurting so many people who cannot afford cars or Ubers and are disabled.	Bus Service
It?s unfortunate that these cuts need to be made. Every time I ride Meteobus the majority of riders	
don?t appear to pay.	Bus Service
Reducing service times and increasing fares is bad the environment and for people with low income	
and will lead to a further separation of the haves and have nots. Wasn't there a budget surplus within the past two years? So much so that there was legislation around	Fares/Fees/Parking
making DC bus fare free forever? What the hell happened? What the hell happened to all of your	
money? And where does the money from all the parking tickets go, huh? If fares were raised or services	
were cut, people would turn to alternate options, such as Ubers or driving or something - all of which is	
worse for the environment than public transit. So either way, you'd end up losing customers and	
money, it seems. DC has some of the best public transit in the entire United States. Don't it up.	Operating Budget, Management and Spending
A vibrant city needs frequent, reliable public transit. Anything less would be economically destructive.	Miscellaneous
Public transit is a public good. It is among the things that a citizen should reasonably expect to be paid	
through taxation. While this may be out of Metro?s control, rather than taking budget shortfalls as a given and running a public service as a business for profit, the governments in charge of funding Metro	
should give adequate funding so Metro can improve, rather than mitigate losses. Fares should not be	
Metro?s source of revenue.	Operating Budget, Management and Spending
I use the D2 every day and its elimination would be devastating in an area with no Metro stop. I also	
use the D6 fairly frequently.	Bus Service
Really hope you get the money you need to maintain service, bypassing the stations with lowest	
ridership is probably the easiest of the service cuts to stomach for me as a rider (and I would imagine	
for many others as well), so if service cuts are needed that should probably be first. Also not sure how effective fare increases would be in saving money bc of the tradeoff between less people riding when	
it's more expensive. Improving frequency/reliability on bus routes and ensuring that fare readers on	
buses are working could also be a big money-saver. I often opt to take a different mode of transit for	
certain trips (i.e. biking, taxi/rideshare, or even a long walk) because buses only come every 30 mins	
(G2, for example). I often take the circulator instead of the 52/54 buses as well to go between	
Columbia Heights and Franklin Park but would happily take the 52/54 if they were slightly more	
frequent/had less bunching issues. I would also say anecdotally, roughly 1/5 of the time I ride the bus I	
don't even have the option to pay because the fare reader doesn't work which I imagine loses a lot of	
revenue. The new fare readers are great though, especially when they're at the back door too.	
Generally WMATA is doing great and hope it receives the funding needed to expand service (especially bus service, train frequency has been super great recently for me though having longer hours would be	
great - both earlier and later), not cut it.	Bus Service
Why were we not able to find any additional information on the changes proposed to the NH-2 Route?	Bus Service
Public transit needs to be free and accessible for the people who need it most? the working class. For	
me, it is currently MORE expensive to take the train to and from work everyday than it is to own a car	
and pay for car insurance. That?s not how it should be! We need a bigger budget for the metro!	Operating Budget, Management and Spending
Please do not increase metro fare , Cost of living is already expensive.	Fares/Fees/Parking
The Glover Park neighborhood already has very limited metro bus access. To eliminate the D2 would	
cut this neighborhood off from public transit completely. Please do not cut this route. The G2 is the only line that serves west Georgetown, including Georgetown University, which has	Bus Service
thousands of students living on or near campus and is the largest private employer in DC. This would	
make commuting much more difficult for me and numerous colleagues.	Bus Service
I depend on the metro stop at Forest Glen station to get to work. Without service, or with slow service	
at this station, I would have to abandon metro as my primary mode of transport to work.	Rail Service
The elimination of bus routes in the Palisades and other far west service areas affects not only high	
school and Georgetown and American Uni students and staff but also elderly long time residents	
without a car. Metrobus service is what keeps me living in vibrant DC vs moving out further in the suburbs or to another large metropolitan city with good public transportation options. Please do not	
ignore the west side of DC. Thank you.	Bus Service
WMATA is vital for the DC region and for our daily lives, and it's sad to see the system struggle because	
of what seems like indifference from our local politicians. It has a direct impact on our quality of life	
and it's one of the best public goods that we enjoy as residents of the DMV. We need a vibrant, strong	
WMATA.	Miscellaneous
Because I work from home now, I have much less need of busses and trains than before. However, I	
have used the trains in the last 30 days, and have taken a bus about 40 days ago, a trip that would have	
have much more comparing by any contine. Withile these are more second that a second contains the second	
been much more expensive by car service. While there are many reasons that people use the system less than before, one of them is the poor service. For instance, in the time it takes to wait for a bus to

Commont	Calescom.
Comment The answer should be neither fare cuts nor service cuts, but increased funding from the jurisdictions	Category
involved.	Bus Service
I can understand the delays because of so much construction throughout the city but some of this lines	
like the G2 are needed in my community.	Bus Service
T2 is vitally important to me and to neighborhoods in Maryland. Without that bus line we will be cut	
off from public transportation. The T2 allows us to connect with Metro Rail. I don't know what we'll do without the T2	Bus Son iso
Please do not remove D2 and D6.	Bus Service Bus Service
People make choices about purchasing their homes based on proximity to a Metro location- closing	
stations would be exceptionally detrimental to people who count on using the Metro for work.	Rail Service
More trains more busses more rail repair more station repair.	Bus Service
Please do not close Metro stations; neighborhoods and communities rely on these stations for a variety	
of reasons and there are plans to encourage construction at these stations in an effort to reduce	
vehicular traffic. Forest Glen metro station is essential to keep open and maintain regular service to. It?s a critical part of	Rail Service
Maryland suburbs. Making it harder for riders to use metro by decreasing rush hour car frequency ans	
closing stations like Forest Glen will only hurt metros bottom line and create more car traffic. It also	
directly contradicts the mandates of the federal government for employees to return to more in person	
work especially in downtown DC.	Bus Service
Increasing fares, decreasing frequency is much more preferable to closing Metro rail stations.	Bus Service
Please stop trying to cut services and increase prices. Metro should be free and people need to take the	
train to get to various appointments and work cutting services makes it harder for everyone to get to	
where they need to go and creates unnecessary anxiety and worry for many people. Do better help the	Pail Convice
customers and keep the metro cheap and accessible! Keeping WMATA well funded should be a no brainer for our local politicians, yet here we are. A vital	Rail Service
service that has a positive impact on all of our daily lives, not only for riders but for non riders as well.	
We are a 1-car household thanks to the Red Line, its functioning has a direct correlation with my	
family's quality of life.	Rail Service
Please do not eliminate G2 route as that?s the only way I can get to campus.	Bus Service
Service cuts almost always precede a 'transit death spiral'; and, to repeat, the 2 airports MWAA	
manages (IAD, DCA) see a combined 50 million passengers as of 2023. Why not push for an additional \$15 user fee which would immediately close the \$750M gap, and if not, lobby the FAA / Congress to	
allow for such transit-supporting fees? Unlike a gasoline tax, since air travel isn?t going away anytime	
soon, such user fees are future-proof.	Bus Service
Please don't close stations! We walk to the Forest Glen Station to commute downtown and bought our	
house in this neighborhood 30 years ago specifically so we could walk to Metro.	Rail Service
The proposal to stop the service of D6 and D2, the only public transport available in Georgetown is	
suicidal for the countless residents who will be affected by the stoppage of that service. Please do NOT	
stop the service of D6 and D2. There are no metro rail in Georgetown. Without D6 and D2 residents'	
legs will be chopped, literally! I need the G2	Rail Service Bus Service
Please retain 26 weekend service. It is the only bus service on Galway and Calverton blvd. I am a senior	Bus service
citizen and rely on metro bus to go to Silver spring to my part time job on weekends. Uber is expensive.	Bus Service
please don't cut services; please tax more or charge more. thanks.	Service Levels
Please do not close any stations, I'd rather pay more. I bought a house to be close to a metro station	
and my work like is built around it. Don't wreck it please!	Rail Service
This is irrelevant. Punish the people that jump the fare gates and suddenly you will have the money you	
need. Weak leadership. Keep service high and charge for it.	Fares/Fees/Parking Service Levels
I think it?s incredibly ridiculous that metro could consider reducing service when bus routes and metro	
rail is currently never on time and out of service	Bus Service
Service is already very bad and mobility is so hard. I use the bus for work, for getting to medical	
appointments, and when I?m going out at night to avoid drinking and driving. I depend on the bus to	
get around the district and while it is far from perfect, it would negatively impact my quality of life as	
well as others who use and depend on these services. Those who work rely on Forest Glen station for their commutes. Pls do not close the station. On a	Bus Service
separate note, those who drink socially rely on Metro to to get them home safely and keep those who	
have been at a bar downtown from being on the roads. This is a community safety issue.	Fare Evasion/Safety/Crime
Please retain Z6 weekend service. I need it to go to work. I don?t drive and Uber is too expensive. If you	
have to raise the fare that would be better than cut service altogether.	Fares/Fees/Parking
I wish I knew the answer. But somehow we have to keep Metro running. This area is so dependent on	
Metro for so many reasons.	Rail Service
I rely on the G2 bus daily to commute from home to work at Georgetown University. I have no other choice.	Bus Service
Please keep z6 bus on weekend. Do not cut service. It is the only bus to go to metro station on from	
cherry hill road and broadbirch drive	Bus Service

Comment	Category
Please save the D2 D1 33 32 and 36 bus lines	Category Bus Service
we need to encourage more people not less to use transits. all of the options on the table are bad and	
will hurt the poor and those who cannot drive the hardest. these are not equitable solutions and will	
do little to help deal with the climate crisis. Your changes to the L2, 31 and 33 make no sense. You already eliminated the L1, which was the most	Miscellaneous
useful bus route for my commute. Terminating the L2 at the Ellington bridge and not offering a through	
route downtown seems foolish. Also, many folks who take the 33 continue on past Foggy Bottom and	
the bus is often packed - why would you eliminate that option?!	Bus Service
The proposals changing service on the 42, 43, and L2 bus lines would effectively create a bus dead zone	
in Adams Morgan and North Dupont circle during the weekends. People with disabilities and many	Due Camina
elderly people rely on the bus to travel. Metrobus service is very important to me, and I think, to the DC area generally. The proposal to shorten	Bus Service
and truncate certain linesfor me the 33 bus line in particularsubstantially reduces my ability to	
commute on weekdays to work and to downtown museums and events on weekends. In my	
experience, the majority of riders on the 33 take the bus from Wisconsin Avenue to beyond	
Washington Circle to downtown. Maintaining that is very valuable. I understand that this is necessary, but would encourage the metro staff and board to do everything	Bus Service
they can to prevent a death spiral of the system. Current off peak service is good and while lose of peak	
service is frustrating, less people travel at peak times.	Rail Service
Metrobus service is essential for the Palisades area of DC as well as down Wisconsin Avenue to	
Geogetown. Fare increases should be implemented.	Bus Service
Eliminating bus lines is absurd. Why do you want everyone to own a car?	Bus Service
Metrorail and Metrobus are integral parts of my life and how I get around. Service cuts are unacceptable and will force me and others to make tough decisions relating to how we live which will	
have profound impacts to the life and economy of the region as a whole.	Bus Service
Please kee z6. I need z6 for everything. Go to church and work and buy groceries. I don?t have car	Miscellaneous
These proposed changes are not in line with policies designed to push people back into the office.	
Increasing fares by this much would worsen vehicle traffic.	Fares/Fees/Parking
I strongly favor increased fares, more frequent service, and greater capital investment. I am strongly against cuts to core services and to the reduction or elimination of fares. For the metrobus system,	
eliminating and consolidating routes in order to provide more frequent service strikes me as a positive	
tradeoff. In general, I would like to see the metro system become a more attractive option for everyday	
commuters and transit users, even if that requires modest increases in fares.	Bus Service
I realized it is not up to WMATA to establish dedicated funding, however, it is past time for the	
jurisdictions DC, Va, Md, to stop putting all of us through this regular budget struggle. I hate to see WMATA cut service, either rail or bus, because our beautiful Metro is more than a tourist attraction; it	
is more than a weekend novelty. Plenty of the people who need the most and have the least rely on	
Metro and Metrobus and local/county transit partners to get to and from school, work, appointments,	
groceries, and other essential travel. It is a disgrace that WMATA has to fight this hard for funding every	
time. We the people must insist that Virginia and Maryland put in our fair share of the funding to a	
system we all benefit from. We can only have a safe and reliable transit system if we fund it.	Operating Budget, Management and Spending
PLease do not cut the service of D6 and D2. They are essential life line for Georgetown residents.	
Without those buses residents will be completely stuck and prejudiced against. There are no metro rail service in Georgetown, and these buses are the only service they rely on for everything	Bus Service
My children both use the D6 as their means of getting to school, as do most of the students at Hardy	
Middle School and MacArthur High School. I know that the drivers right now are not enforcing that kids	
use their Kids Ride Free card at the farebox, which in turn is creating a gap in the data that WMATA has	
about student riders. While it may look like there are very few riders, both of those schools fill D6 buses	
with their students on the way to and from school. I think it would be a real lack of forethought and support for DCPS students to close down these buses without understanding student ridership.	Bus Service
Decreasing bus service routes will decrease use of bus and metro services.	Bus Service
Please do all you can to help maintain bus service. One solution is to allow people to pay their fares	
instead of waving them through without paying.	Bus Service
Please do not get rid of the L2 or D6. These are very important bus lines.	Bus Service
If you eliminate D2, D6 and G2 it will be impossible to take the bus from Georgetown to DuPont Circle to connect with the red line. I frequently use 33 to get from Georgetown to the court, to Penn Quarter	
to the Mall. It would be a real loss to have this service curtailed.	Bus Service
D2 and D 6 are vital means of transport for all who live in Georgetown. Their service should not be	
stopped or curtailed under any circumstances. There is no metro rail service for this area. D6 and D2	
are the only means of transport people rely on. Please do no cut it	Rail Service
It's unconscionable to reduce/stop bus routes for nearly 50% of the busses. The poorest people have to	
live far out because of rental prices and take buses to do some of our most pressing jobs. For example look at how this will affect cleaners and orderlies at Sibley Hospital. The loss of fare revenue with the	
gates is ridiculous. And it could have been avoided if they had *originally* been made difficult to get	
through like they have in New York. It also thoroughly undercounts ridership. How on earth did this	
happen.	Bus Service
Why are we trying to decrease car emissions and cut bus routes? Also these routes are a lifeline for	
workers who don't drive and those who can't drive due to health or age.	Bus Service
Please don?t stop route 74. There is already no train station near the Audi stadium and many apartments being built in buzzardpoint. Without 74 routes thousands of residents will have no	
transportation	Bus Service
I would much prefer to pay a higher fare than accept lower service. Frequent service is much more	
important to ridership than fare cost.	Fares/Fees/Parking
For all people in the region, especially for students, low-to-modest income families and those who work	
in service, healthcare or hospitality, it is important that we have safe, reliable and affordable public transit. Public transit is necessary for the whole region to thrive. If service is curtailed and wait times	
extended, public school students will not likely make it to school in time. Please don't curtail service as	
the ones that will be hurt the most are most likely to be the people who need to get to hourly service	
jobs. Thank you.	Fare Evasion/Safety/Crime
I have returned to the city after a 7 year absence. The metro rail stations are in a shocking state of	
disrepair. The other thing that is shocking is an embedded culture of fare evasion. This has been addressed to some degree with infrastructure investments on the rail lines, but fare evasion is rampant	
addressed to some degree with infrastructure investments on the rail lines, but fare evasion is rampant on the bus lines. The drivers don't seem to care whether people pay or not. When you allow a culture	
of lawlessness the passengers pay less respect to other aspects of bus travel, such as cleanliness.	
Something needs to be done about fare evasion. This is theft, and it is hurting the quality of the rider	
experience for those of us who do ride and do pay.	Bus Service
it hinders us from getting to the other side of town.	Miscellaneous
Metro bus D6 and D2 are crucial for all residents in the area where there is no metro rail service. They	
should not be cut under any circumstances! If D6 and D2 buses stop functioning, people in the area will be seriously prejudiced against. These buses are the only means of transport for countless people. They	
have no cars either	Bus Service

The proposed elimination of the NH2 bus route, the sole public transportation link between National	
Harbor, Maryland, and Alexandria, Virginia, is a decision that overlooks its critical importance to the	
local community, workforce, and tourism sector. This route does not merely connect two geographic	
locations; it supports a vibrant ecosystem comprising hotels, restaurants, and attractions that	
significantly contribute to the local economy. For many employees in these establishments, the NH2 is	
more than a convenience?it's a lifeline, making their daily commute affordable and feasible. Without it,	
the financial burden of paid parking could render employment untenable for a substantial segment of	
the workforce. Furthermore, National Harbor's appeal to visitors, who contribute to the area's	
economic vitality, hinges on its accessibility. The NH2 service is indispensable for tourists, especially	
those coming from or heading to the airports, facilitating a seamless connection to the broader	
Metrorail and Metrobus network. The discontinuation of this service not only threatens to disrupt this	
symbiotic relationship but also risks a decrease in Metrorail ridership, as NH2 stands as the singular	
conduit to the metro system for both residents and visitors. In essence, the removal of the NH2 bus	
route would erode the foundations of community accessibility, workforce sustainability, and economic	
growth, making its preservation not just a matter of convenience but a crucial investment in the	Operating Budget, Management and Spending
I depend on the G2 bus for my work commute and to get to doctor's appointments. If the route is cut it	
will make my commute much longer and I will likely have to move.	Bus Service
What happened to free fares for DC residents? How about for low income or allow low income that	
don't qualify for SNAP to qualify for cheaper fares.	Fares/Fees/Parking
Public transportation is more environmentally friendly than cars so please don't cut the service. I use it	
almost in a daily basis.	Service Levels
Maryland and Virginia need to pay their fair share to maintain Metro.	Rail Service
Metro will put my safety and well being at risk if it cuts the R12 bus. Because it is the only way for me	
to access the College Park Metro Station safely, without being at risk of getting hit by a car, getting	
assaulted by walking in dark no sidewalk streets in the town of Berwyn Heights, MD, and putting me in	
harms way from racist homeowners who have threatened to harm me for walking in front of their	
house in my Indigenous skin, and as a female of color. Please do not cut the R12 line. My mom relies on	
Metro Access to go to her doctor appointments. By drastically changing the hours that she can use	
Metro Access you will put her health at risk. Metro has a direct beneficial impact on my 80 year old	
mom's health, by providing her with Metro Access. She has paid her taxes her entire life, it is not	
equitable for her to no longer have access to services she paid for. May I suggest metro spend less time	
in fixing vendor errors at fixing the same escalator for an entire year (College Park Metro). Or perhaps,	
stopping the double spending Metro did on replacing working fare machines, with new ones that do	
not stop people from jumping them without pay. Perhaps stop paying its top management, so much for	
a privileged CEO revolving door. Slightly reduce hours DO NOT CUT routes nor Metro Access. Thank you	Bus Service
15 minutes is a long time to wait, especially when making additional changes (at Metro Center or	
Gallery Place, e.g.) And during that period, sometimes the crowds build up and a rider may not be able	
to board. This is a very bad scenario for that rider.	Rail Service
Cut the roads budget not public transit.	Operating Budget, Management and Spending
Please consider keeping Metro Access funding and services. Many people with disabilities in	
Montgomery County do not drive and rely on this service to get to their jobs, schools, community	
events, and more. Thank you!	MetroAccess
I think, making a more competitive frequent, commuter pass, while raising rates for travelers, makes	
the most sense or DC residents	Bus Service
There is no need to have wmata copsthere should be Metro police instead because the wmata cops	
do absolutely nothing. The money for that should go towards the budget.	Operating Budget, Management and Spending

Sometimes weekends are the only time we can get places to do errands and not having service is a hardship. It is unacceptable to reduce and eliminate the d2 (and d6). Every time this idea comes up, there is a community backlash for these neighborhoods that are already underserved by metro access. Please ensure continued D2 access to glover park, to Georgetown, and to dupont circle. Changing this would mean that my only nearby bus route is taken away. There are so many reasons to move away from DC these days. And now there's no public transit access? Taking away metrobus service to key points for Georgetown and Glover Park residents is ridiculous, shortsighted, decreases safety, and is not in line with the services the city is obligated to provide with our tax dollars. The G1 is a critical resource to the students, faculty and staff of Georgetown University, DC's largest private employer. Regardless what decisions are finalized We need Metro in DC to operate efficiently.	Bus Service Bus Service Bus Service
new needs? Fares are already high, problems with malfunction trains, drivers not properly trained ect.etc. Why didn't we foresee this before now to be able to make well thought out decisions and not hasty ones as we are doing now. Stopped using Metro Access due to the inconsistency of the service. It's hard to keep up with the rising cost of using metro, but folks who don't have a car are really out of luck when you make these routes go away. Please ensure continued D2 access to glover park, to Georgetown, and to dupont circle. Changing this would mean that my only nearby bus route is taken away. There are so many reasons to move away from DC these days. And now there's no public transit access? Taking away metrobus service to key points for Georgetown and Glover Park residents is ridiculous, shortsighted, decreases safety, and is not in line with the services the city is obligated to provide with our tax dollars. The G2 is a critical resource to the students, faculty and staff of Georgetown University, DC's largest private employer. Regardless what decisions are finalized We need Metro in DC to operate efficiently. Ilike Metro and have taken it for years-but not lately due to increased crime in the stations and on Metro and have taken it for years-but not lately due to increased crime in the stations on eighborhood as it would reinstate the Circulator on 7th Street SW. I live in the Burleith/Glover Park neighborhood without a car and this proposal for metro bus would cut me off from the city. By cutting the D2, D6, and G2, the most reliable routes: D2, D6, and G2. Every mey on lave to taxes for my social and professional life. Your proposal would make the 33/31 the only route that serves my neighborhood, which is not	Bus Service Bus Service Bus Service Fare Evasion/Safety/Crime Bus Service Bus Service Derating Budget, Management and Spending Rail Service
new needs? Fares are already high, problems with malfunction trains, drivers not properly trained ect.etc. Why didn't we foresee this before now to be able to make well thought out decisions and not hasty ones as we are doing now. Stopped using Metro Access due to the inconsistency of the service. It's hard to keep up with the rising cost of using metro, but folks who don't have a car are really out of luck when you make these routes go away. Sometimes weekends are the only time we can get places to do errands and not having service is a hardship. It is unacceptable to reduce and eliminate the d2 (and d6). Every time this idea comes up, there is a community backlash for these neighborhoods that are already underserved by metro access. Please ensure continued D2 access to glover park, to Georgetown, and to dupont circle. Changing this would mean that my only nearby bus route is taken away. Metro rail systems should focus on maintaining buses and trains in between D.C and Maryland and cut	
short the trains towards Virginia since it?s further. Making a poll on the most used metros will help	Dis Casa las
determine which ones to cut the times for. As local DC resident I rely on Metro bus and metro extensively. My daughter relies on it to get to school	Bus Service
and back disruption of L2, 96, 42, 43 bus lines impact us a lot! Reduced hr of metro may reduce traffic	
to DuPont, Adams Morgan and impact businesses.	Bus Service
Dramatically decreasing service puts Metro into a death spiral. Less service leads to less ridership leads	bus service
to less service. If Washington DC is to be a vibrant, world class city, providing service to its residents	
and visitors from around the world, it must have reliable, wide-spread, reasonably frequent bus and	
subway service. Providing subway service at 15-minute intervals and creating bus deserts (Columbia Rd	
for instance) harms citizens who depend on public transportation, increases the likelihood they	
purchase cars (btw, notwithstanding assertions to the contrary, most aren't going to cycle), and turns	
DC into a cultural backwater on the international stage. Imagine Paris or London running a subway	
system on a 15 minute at best frequency? The winners in this plan are Uber and Lyft. The losers are	
those who depend on public transit and those who believe life in an urban area is better without a car.	Bus Service
Please do not cut service, there are so many people that depend on metro to get to	
work/activities/essential travel. Cutting service would be devastating to the region, as traffic will	
increase, while low income customers will pay the greatest burden. Public transport should not be	
profitable, but designed to benefit the community. Punishing the community for pitfalls that were	
mismanaged by WAMATA is not a good way to increase ridership.	Rail Service
I would like to see all people who jump the fare gate or refuse to pay for the bus arrested and then fine	
them an appropriate fine. Then use part of the fine, maybe 20% of it, to be given back to metro, so that	
people who actually pay their fare are not punished because of these thieves.	Bus Service
i think you people will lose a lot of money from the federal government because there are a lot of	
federal employees that use your syster daily	Operating Budget, Management and Spending
The proposed service cuts most deeply impact those with more limited transit choice and those more	1 U UUUU E UUE E E E E E E E E E E E E E
likely to be in working-class jobs (not typical 9-5). I will take an increase in fares over a reduction in	
service to those most deeply impacted by limited transportation options and other transportation	
equity issues any day.	Bus Service
Keep the G2 route. I need to get to Georgetown University	Bus Service
Eliminating all Metrobus routes in the neighborhoods in SW DC is a horrible idea! I no longer use the P6	
and 74 lines daily, but I do still use them regularly. So many people rely on public transportation to get	
to work, especially people who cannot work remotely and have non-standard (non-9 to 5) work hours.	
Eliminating or reducing late night bus and train service risks the health and safety of many of my	
neighbors and friends in the region. The proposed service cuts are outrageous, harmful, and	
irresponsible.	Bus Service
If you raise rates or cute service, i will reduce my ridership, get Maryland and Virginia to contribute	
more. Also no trains after 10 PM is ridiculous, people don't stop existing after a work day.	Rail Service
Charge a flat fee for metro rail and you?II get more ridership. Stop charging more for less service.	Rail Service
You?d be eliminating access to SW and warf when cutting 52, P6, and 74. It?s creating a huge economic	
gap. We are reducing parking spots AND reducing transportation access. It?s screwing over SW	
residents. Increase fares on trains, enforce it. Make busses free (ppl don?t pay it anyway)	Bus Service
Fare evasion, especially in train stations is rampant. I see it every day, and it must contribute largely to	
the deficit metro is facing. Reducing evasion, I believe, is a huge step in the right direction. Also, late	
night service on weekends is very much desired and needed and would gladly be utilized even at an	
increased fare rate.	Fare Evasion/Safety/Crime
Please make it safe, which it is NOT	Fare Evasion/Safety/Crime
Eliminating service and stations would be the biggest issue here. A lot of people commute to Tyson's	
Corner area for work, and not owning cars, rely a lot on metro. To be honest, this is one of the last	
things that should happen. I think customers would be fine paying more, but the government should	
pony up the money to take care of this issue.	Rail Service
If you need to cut a line in Greenbelt, cut G14 instead of G12. The latter connects people with facilities	
like hospitals, schools etc.	Bus Service
The majority of the people utilizing metro services on weekdays are commuters trying to get to work.	
Making it more difficult for us to get to/from work by reducing red line will be a nightmare. People	
drive in from Frederick to the Shady Grove stop- increasing the wait times will make the metro cars	
more full at Shady Grove so less people can get on them at later stops. It will just cause those other	
stops to have a longer wait time because people have to keep waiting for the next train. Increase the	
prices on weekends before weekdays. Benefit from tourism on weekends instead of taking advantage	
	Rail Service
of those of us that live here and have no other options.
