Resolution:  
☐ Yes ☒ No

**Presentation Name:**

FY2025 Q1 Service Excellence Report

**Project Manager:**

Jordan Holt

**Project Department:**

Performance Data and Research

**Purpose/Key Highlights:**

Update the Board on FY2025 key performance indicators (KPIs) from July 2024 through September 2024 aligned to Metro's Strategic Transformation Plan, Goal 1: Service Excellence.

Key Highlights:

- Met or trended in the right direction for two-thirds of Service Excellence KPIs in FY25 Q1
- Ridership grew 9% in FY25 Q1 compared to last year
- Record high customer satisfaction on bus and rail
- Serious crime across the bus and rail system is down 40% compared to last year
- Bus and rail real-time information accuracy improved thanks to algorithm adjustments
- Service reliability remains an area of focus, with rail automation and bus priority targeting improvements

**Interested Parties:**

There are no Interested Parties in this matter.

**Background:**

The Service Excellence Report describes Metro's performance on a suite of key performance indicators—or "measures"—that align to the Service Excellence goal

and objectives in the Strategic Transformation Plan (STP). The report provides transparency and progress-monitoring on efforts to improve safety and security, reliability, and convenience. Metro's Board and management collaboratively selected these measures as part of STP development. The STP includes targets for each measure that identify desired level of performance by 2028, and Metro management has set specific targets for FY25 that make progress towards these end-states while factoring in resource availability and milestones for relevant initiatives and actions. The Service Excellence Report continues efforts since 2010 to transparently report performance for key operational and safety measures.

The report provides results for the following measures:

- Customer satisfaction for MetroAccess, bus, and rail
- Security measures
  - Part 1 Crime rate
  - Transit worker assault rate
  - Rail and bus customer perception: safety from crime
- Safety measures
  - Customer injury rate
  - Employee injury rate
  - Crowding on rail and bus
- Reliability measures
  - On-time performance for rail, bus, and MetroAccess
  - Scheduled service delivered for rail, bus, and MetroAccess
  - Planned service delivered (compared to budgeted service levels) for rail
  - Elevator and escalator availability
- Customer convenience measures
  - Real-time prediction accuracy for rail and bus
  - Real-time prediction availability for bus
  - Rail and bus customer satisfaction with vehicle cleanliness
  - Percent of customers using bicycles to access the rail system

The customer injury rate and transit worker assault rate are also measures in Metro's Agency Safety Plan.

This report compares performance on the measures for the period of July 2024 through September 2024 to the targets that Metro set for the fiscal year. Metro developed these targets in line with Federal Transit Administration guidance while using historical data, long-term targets, and peer benchmarking—with an approach of continuous improvement. For most measures, Metro set targets that aim to improve from FY24 performance levels and/or trends over the past two to three years.

- Customer satisfaction targets aim to:
  - Maintain strong performance for rail
  - Improve over typical performance over last two years for bus and MetroAccess
- Safety targets aim to:
  - Reduce rates from FY21-24 by five percent for customer injuries

- Reduce rates from FY21-24 by 13 percent for employee injuries
  - Achieve levels set in the STP for crowding: no more than five percent of customer time spent in crowded conditions
- Security targets aim to:
  - Reduce the rate from CY23 by five percent for Part 1 Crime
  - Reduce the rate by three percent compared to the last 15 months for transit worker assaults
  - Make progress toward STP targets for customer perception of safety from crime by improving over average levels over past 24 months
- Reliability targets aim to:
  - Make progress toward the targets in the STP for on-time performance, improving by 1-3 percentage points compared to FY24
  - Achieve STP targets for bus and MetroAccess percent of scheduled service delivered and maintain FY24 performance levels for rail service delivery
  - Achieve STP target for escalator availability and maintain FY24 performance levels for elevator availability
- Customer convenience targets aim to:
  - Improve performance from FY24 for real-time information accuracy/availability
  - Make progress toward STP targets for customer satisfaction with the cleanliness of vehicles by improving over average levels of the past 24 months

Metro uses this performance data in its operations to inform decision-making. Safety staff and the Police Department use multiple datasets to monitor safety and security activities that impact employees and the riding public. Within Operations and Infrastructure, staff actively monitors these measures through a series of “Stat” performance review meetings that encourage data-driven analysis and decision-making. These activities all contribute to Metro’s performance-based planning and programming approach.

## **Discussion:**

### **Total ridership grew nine percent year-over-year**

Customers took 64.4 million trips across rail, bus, and MetroAccess in Q1 of FY25, a nine percent increase from the same period in FY24. Ridership was almost evenly split between bus and rail. September had the strongest weekday ridership since 2020, with 850,000 average combined trips on bus and rail. Federal employee ridership was up 23 percent in September compared to last year, with about 68,000 trips on an average weekday. Ridership on MetroAccess-branded vehicles decreased by 13 percent compared to FY24 Q1, as almost 50 percent of all requested trips were on third-party Abilities Ride partners.

### **Record highs for rail and bus customer satisfaction driven by good, all-day**

## **frequent service and improvements in personal safety**

Rail customer satisfaction was 92 percent in Q1, exceeding target of no less than 85 percent and achieving the highest levels in Metro history for the second consecutive quarter. The largest improvements were in the areas of reliability/consistency and cleanliness, which increased from 82 percent to 86 percent, and from 68 percent to 74 percent, respectively. Metro is investing in automation to make rail trips faster and reliable. In addition, projects are underway to address improvement opportunities identified by customers in the quarterly survey.

Enforce rules and fare payment: Rail fare evasion is down 82 percent, correlated with the completion on September 18 of 1,200 faregate retrofits that make it harder to enter the system without paying, alongside increased enforcement.

Improve service frequency: In December 2024, Metro will increase frequency on the Green and Yellow lines, operating trains every 6 minutes all weekday until 9:30pm. In addition, Metro is advancing automation to increase train speeds and reliability to make customer trips faster. The average customer trip is 26 seconds faster since auto doors was implemented on all lines in early July. While rail customer on-time performance missed the target of 91 percent, results improved over the course of Q1. In addition, the accuracy of real-time arrival predictions at terminals, stops following merge points, and in single-tracking zones improved as a result of newly implemented changes, allowing accuracy to hit a record 97.9 percent in September.

Increase police presence: Over 100 Special Police Officers are deployed daily in the rail system, monitoring both platforms and trains. The percent of customers who say they feel unsafe about trains continued to fall in Q1, dropping to seven percent compared to 21 percent in FY24 Q1.

Cleaner train cars: In FY24 Q4 Q4, revamped cleaning process and procedures, upgraded cleaning solutions, improved tooling, and the start of a twice-weekly Supervisor audit program resulted in customer satisfaction with train cleanliness jumping to 74 percent in FY25 Q1, a 15 percentage point improvement over FY24 Q1 and meeting target.

Bus customer satisfaction was 83 percent in Q4, meeting target of no less than 74 percent and achieving the highest levels since WMATA began tracking the metric. Satisfaction with rider experience factors (including safety from crime and harassment, wait times, travel times, and cleanliness) remained fairly constant compared to FY24 Q4. Metro is advancing projects in areas where customers suggest opportunities for continued improvement.

Improve on-time performance and reduce missed trips: Bus on-time performance was 76.2 percent in FY25 Q1, missing the target of 77 percent. Traffic is the biggest cause of late buses, and Metro is partnering with jurisdictions to add priority treatments on the busiest – and slowest – corridors. In Q1, Metro, Maryland Department of Transportation, and Montgomery County agreed to extend the pilot of almost seven miles of bus lanes along Georgie Avenue and Colesville Rd. installed this summer to

support shuttle bus operations during the Red Line construction work, the lanes helped increase throughput along the corridor by 10 percent and increased median bus speeds by 16.5 percent while having minimal impact to cars. Metro staff are also implementing tailored interventions on the ten worst-performing bus routes, including schedule changes and active supervision. Metro also just missed the target reducing missed trips, with 97.8 percent of scheduled service delivered. Operator availability was the primary cause of missed trips, with staffing levels still recovering from the Spring 2024 hiring freeze. In FY25 Q1, 77 operators graduated from new operator training.

Improve real-time prediction availability and accuracy: Metro released an updated version of its prediction algorithm in FY25 Q1 that led to a record high 91 percent of accurate predictions in September. Metro provided real-time predictions for 92.4 percent of bus trips in FY25 Q1, just shy of the target of 93 percent.

Cleaner buses: Sixty-four percent of customers in Q1 were satisfied with bus cleanliness on their last trip, missing the target of no less than 70 percent. Metro began installing easier-to-clean vinyl seats on the bus fleet, with seven percent installed so far, and completion scheduled in 2025. Additional weekly cleaning for flu season will begin in October. Staff are in the process of procuring services to add daily spot cleanings at the end of each line, starting at the 12 busiest bus terminals.

MetroAccess customer satisfaction was 79 percent in Q1, meeting target. On-time performance is a key driver of overall satisfaction. An increase in late trips is believed to be the primary driver for the decline in satisfaction; on-time performance fell to 89 percent in Q1, missing the target of 92 percent, as operations were transitioned from five contractors to one to be more cost-effective. MetroAccess also missed the target for missed trips: 97.75 percent of scheduled service was provided, short of the target of 99.25 percent. Eighty percent of MetroAccess customers felt it was easy to make a reservation, an increase from 72 percent last quarter, and 96 percent of customers were satisfied with how helpful their MetroAccess driver was.

### **Serious crime across the system is down 40 percent compared to last year**

Part 1 crime rose slightly in FY25 Q1 after hitting the lowest level in five years in FY24 Q4FY24 but remains down 40 percent from FY24 Q1. All types of crime have fallen, with the biggest decreases in motor vehicle theft and aggravated assault. These results reflect focus on enforcement and visibility, enhanced surveillance of the more than 30,000 cameras in the system, and engaging and involving the community.

The Secure DC Bill enacted in March 2024 brought enhanced penalties for both evading fare and transit worker assaults. The rate of transit worker assaults missed target in Q1 with 47.8 assaults per 10 million vehicle revenue miles, 87 percent involving employees and 13 percent involving contractors. Mental and emotional stress related to witnessing community violence remains the most common type of employee injury. An increase in stress-related injuries is the primary reason the employee injury increased relative to FY24 Q1, missing target. The customer injury rate, which improved (decreased) 13 percent compared to last year, met target during

Q1. Slips/trips/falls are the most common injury type, accounting for about 75 percent.

**Funding Impact:**

There is no funding impact from presenting this information to the Board.

**Previous Actions:**

September 2024 – Presentation of the FY2024 Q1-Q4 Service Excellence Report

**Next Steps:**

January 2024 – Presentation of the FY2025 Q2 Service Excellence Report

**Recommendation:**

# FY25 Q1 Service Excellence Report

Safety and Operations  
Committee

# Service Excellence, a strategic goal from Your Metro, the Way Forward

Focus today

### Service excellence

Deliver safe, reliable, convenient, equitable, accessible, and enjoyable service for customers.

### Talented teams

Attract, develop, and retain top talent where individuals feel valued, supported, and proud of their contribution.

### Regional opportunity & partnership

Design transit service to move more people and equitably connect a growing region.

### Sustainability

Manage resources responsibly to achieve a sustainable operating, capital, and environmental model.

## Objectives of Service Excellence Goal

**Safety & security** | Ensure all customers and employees feel safe and secure using and delivering services

**Reliability** | Provide dependable service that the community trusts

**Convenience** | Deliver frequent and accessible service that modernizes and enhances the customer experience

## Highlights

- Record high customer satisfaction on rail and bus
  - 92% Rail Customer Satisfaction
  - 83% Bus Customer Satisfaction
- Ridership grew 9% in FY25 Q1, marking 42 consecutive months of growth
- Serious crime across the bus and rail system is down 40% compared to FY24 Q1
- Service reliability remains an area of focus, with rail automation and bus priority targeting improvements
- Bus and rail real-time prediction accuracy improved

Metro met or trended in the right direction for **two-thirds of its Service Excellence KPIs** in FY25 Q1

Metric	Result	Right trend? Q4 vs. Q1	Featured	Metric	Result	Right trend? Q4 vs. Q1	Featured
Goal 1: Service excellence				Objective 1B: Reliability			
Customer satisfaction				On-time performance			
Metrorail	● 92%		+	Metrorail	● 87.4%		+

				Metrobus	● 64%		
				Last-mile connectivity / bicycle access			
					● 1.4% (2022)		

# Customer Satisfaction

# Customer satisfaction met target for all three modes in Q1, hitting record highs on Metrorail and Metrobus

## ● Metrorail

92% in Q1, exceeding target of no less than 85%

- Q1 results for Metrorail were again the highest in history
- Compared to last quarter, satisfaction with train cleanliness improved the most, followed by reliability of train service
- Most frequent suggestions for improvement: enforce rules and fare payment, improve service frequency, increase police presence, and better cleaning of train cars

## ● Metrobus

83% in Q1, exceeding target of no less than 75%

- Q1 results for Metrobus were the highest in history
- The share of DC Metrobus customers who are satisfied overall with their last trip increased significantly from last quarter, from 74% to 83%
- Most frequent suggestions for improvement: shorter wait times/better on-time performance, cleaner buses, improved safety from crime or harassment

## ● MetroAccess

79% in Q1, meeting target of no less than 79%

- Q1 results for MetroAccess remained on target
- Decrease in customer satisfaction driven by an increase in late trips
- 80% of customers thought it was easy to make a reservation, up 8 percentage points from last quarter
- 96% of customers satisfied with helpfulness of their MetroAccess driver

# Ridership

## Ridership continues to grow – September marks 42 consecutive months year-over-year

- September had strongest weekday ridership since 2020: 850,000 average combined trips on bus and rail
- Federal employee ridership up 23% compared to September 2023: 68,000 trips on an average weekday
- An average of 7,400 fans took Metro to each Nationals game this season, a total of nearly 600,000 trips

### All ridership | Rail | Bus

**64.4 million trips in Q1**  
**9% higher** than Q1 FY24  
**796,000** average weekday customers

**32.2 million trips on rail**  
**7% higher** than Q1 FY24  
**397,000** average weekday customers

**31.9 million trips on bus**  
**12% higher** than Q1 FY24  
**394,000** average weekday customers

**0.3 million trips on MetroAccess**  
**14% lower** than Q1 FY24  
**4,100** average weekday customers

Note: As of January 2023, Metrorail ridership reports all (tap and non-tap) ridership.

# Safety and Security

# Part 1 Crime down 40% compared to FY24 Q1, meeting target

## Part 1 Crime | All Modes

4.9 Part 1 Crimes per 1 million customers, meeting target of no more than 7.8

FY24 Q1 to FY25 Q1

Trend of top four Part 1 Crime types by count

Installation of taller faregates at all 98 stations reduced fare evasion by 82%. Fare enforcement led to recovery of 16 illegal guns and 250 active-warrant arrests

Crisis Intervention Team squads have made 6,000+ safety contacts, helped over 450 people with mental health concerns in the last two years

# Reliability

# Access OTP missed target in Q1 during transition to more cost-effective service delivery model

● **On-time Pickup Performance | Access**  
89.2% of on-time pick-ups, just missing target of no less than 92.0%

- OTP dipped as operations were transitioned from five contractors to one to be more cost-effective
- Key actions to improve:
  - Assigned dispatchers to monitor specific drivers and deliver performance reports
  - Shifted nearly half of all MetroAccess trips to Abilities-Ride, our alternative to taking standard paratransit service

Over 92% of dedicated MetroAccess trips are faster or just as long as than an equivalent trip on rail or bus

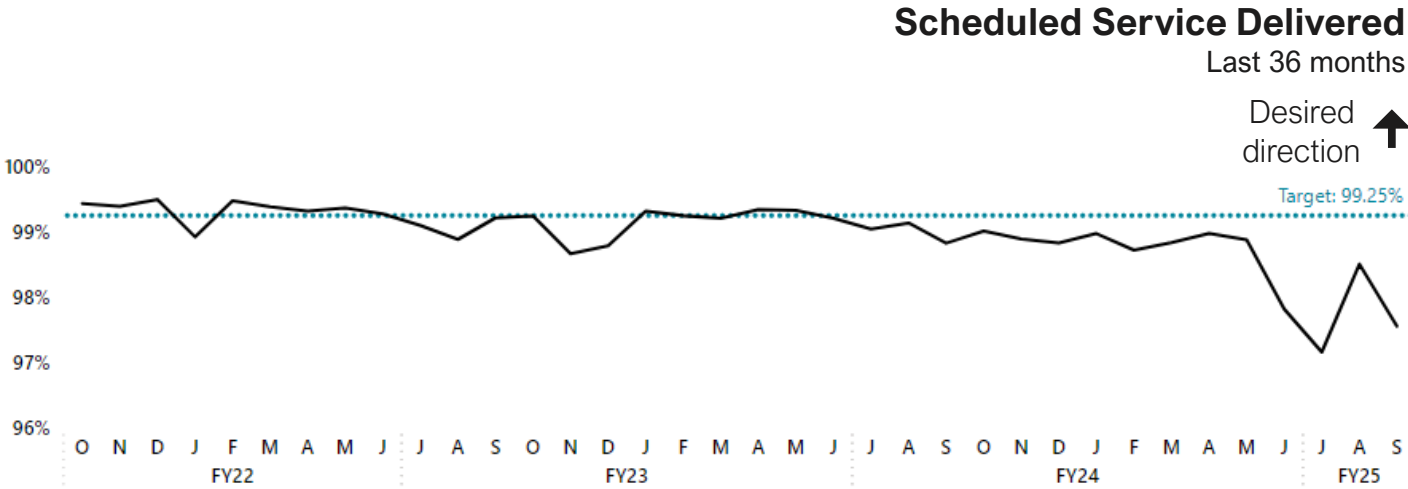

# Access delivers over 2,800 trips per day on dedicated service and misses fewer than 70

## Scheduled Service Delivered | Access

97.75% of scheduled service delivered, missing target of no less than 99.25%

- 86% of missed trips caused by a customer not taking a ride that arrived too late after the pick-up window
- 14% of missed trips caused by the driver not waiting long enough for the customer
- Q1 performance saw a drop due to business model transitions

MetroAccess service area is within three-quarters of a mile of any rail station or bus stop

# Bus on-time performance just missed target in Q1, driven by a larger than typical seasonal drop in September, particularly in the AM Peak

- **On-time Performance | Bus**  
76.2% on time, missing target of 78%
- On September weekdays, performance dropped to its lowest levels in years during both the AM Peak (75.1%) and the PM Peak (66.6%) time periods due to buses running late
- The proportion of late buses increased by the most percentage points on Tuesdays from September 2023 to 2024
- When buses are running very late, street operations and the control center can make changes to trips to try to get buses back on schedule

In the AM Peak on weekdays, OTP was consistently around 79% until September, when it dropped to 75%

**Weekday regional average traffic speeds worsened by 4% in AM peak and by 5% in PM peak from September 2023 to September 2024**

# Percent of service delivered just missed target in FY25 due to operator availability

- **Service Delivered | Bus**
- 97.8% of scheduled service delivered, just missing target of no less than 98%
- Operator availability is the primary cause of missed trips, with staffing levels still recovering from February 2024 hiring freeze
  - Fridays and weekends have the most missed trips due to operator availability
  - In FY25 Q1, 77 bus operators graduated from new operator training and there are 164 more projected to graduate in Q2

## Operator availability continues to be a leading cause of missed trips

Number of missed trips due to operator availability

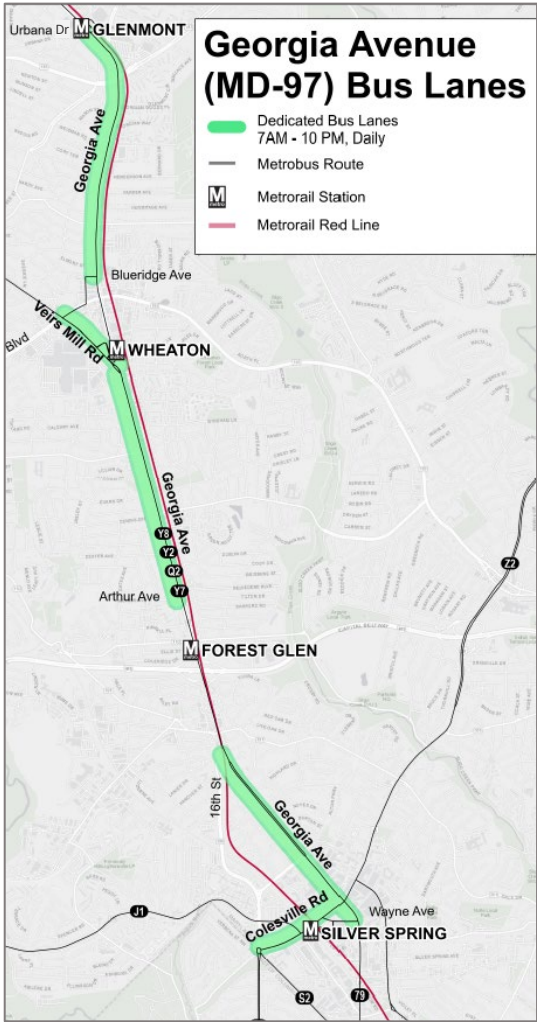

**Recently-approved 4-year contract with Metro’s largest union, Amalgamated Transit Union Local 689, is expected to improve operator availability**

# Georgia Ave (MD-97) Bus Lane Pilot extended through December in order to continue evaluating performance

## Results from the Summer:

- **Increased Throughput:** 900 more people per hour moved on Georgia Ave (10% higher than last year)
- **More Bus Riders:** 20% of people on MD-97 rode buses vs 4% in summer 2023. Shuttle riders boosted these numbers
- **Better Bus Speeds:** Up to 16.5% increase in median bus speeds in the dedicated lanes
- **Minimal Impact to Cars:** Car speeds dropped slightly during rush hour but held steady around 20 mph. Four fewer crashes in summer 2024 vs summer 2023

Project partners will review performance and collect community feedback on the future status of the bus lanes after pilot concludes

# Bus prediction accuracy exceeded target and hit record high in September due to upgraded prediction algorithm

- Real-time Arrival Accuracy | Bus

89.0% of predictions were accurate, meeting target of no less than 86.5%

▪

Prediction accuracy improved by about 4 percentage points after an August 2024 prediction algorithm upgrade

▪

Upgraded algorithm allows for detailed data validation and tuning to address problem areas

▪

Staff are benchmarking peer properties to identify opportunities to improve info availability and accuracy during detours

Several routes experienced 8 to 15 percentage point improvements

W47

+10.3%

D31

+8.3%

# Rail on-time performance improved through Q1, but missed target

## On-time Performance | Rail

87.4% on time, missing target of no less than 91%

- OTP improved with the completion of capital work at Reagan National and launch of auto doors
- Main drivers of late trips: service disruptions (9.6%), planned track work (0.5%), and customer behavior or late trips not linked to an incident (2.5%)
- Key actions to improve:
  - Begin Automatic Train Operations on the Red Line
  - Return to design speeds, which would reduce run times by up to 2.2 minutes

**Customer trips are 26 seconds faster on average since Auto Doors launched systemwide on July 8**

## Automatic Train Operations will make customer trips faster and smoother

- Automatic Train Operations (ATO) will help trains operate more safely and efficiently through automatic control of trains' acceleration, deceleration, and speed
- **ATO rollout will begin in December (pending WMSC concurrence) on the Red Line with qualified operators**
- Customers may notice:
  - Closer adherence to schedule
  - Initially, some trains may hold at key stations because:
    - ATO trains are faster and may catch up to trains operating in manual ahead of them
    - Operators and control center staff may hold trains to keep them on schedule
    - Once ATO is fully implemented, a new Red Line schedule will be implemented and will reduce the need for trains to hold to stay on schedule
- Once ATO is fully implemented, trips up to **6-12 seconds faster per station**

# Escalator availability met target with the best performance this quarter in over three years

- **Escalator Availability | Rail System**  
95.0% availability, meeting target of no less than 93.0%
  - Availability increased by 0.6 percentage points (~4 units) since the same time last fiscal year as some capital projects conclude
  - Nine escalators were unavailable in Q1 because they are being replaced, part of the replacement program of 139 escalators by 2028

Three escalators at Benning Road were replaced one month ahead of schedule

● Target met ● Target just missed ● Target missed ● No target

# Appendix | Additional Measures

# **Safety and Security** | Additional Measures

# Transit worker assaults just missed target at 47.8 assaults per 10M revenue miles

- **Transit Worker Assault Rate**  
47.8 assaults per 10M revenue miles, missing target of no more than 46.2
  - 183 Assaults in FY25 Q1:
    - 79% (145) were physical, 21% (38) were non-physical
    - 87% (159) involved employees, 13% (24) contractors
  - To address safety concerns, Crisis Intervention Team (CIT) members walked car-to-car on 3,675 trains, on 675 buses, and end-to-end on 1,313 platforms to check on customers and operators and increase public visibility

Note: The Transit Worker Assault rate follows the definitions in the Federal Transit Administration National Public Transportation Safety Plan, and that definition changed significantly for FY25. Transit Workers include employees, contractors and volunteers working on behalf of the agency. Assaults can be physical or non-physical (e.g., verbal) and do not have to result in an injury.

# Customer perception of safety on trains and buses improved compared to last quarter

## ● Customer Perception of Safety from Crime or Harassment | Bus Target: 14%, Rail Target: 16%

Percent of customer survey responses who rated their perception of safety from harassment or crime on the train/bus of their last trip as "1" or "2" on a five-point scale where 1= "not at all safe" and 5= "very safe"

The percent of customers dissatisfied with safety from crime aboard trains decreased to 7%, meeting target of 16% or less

The percent of customers dissatisfied with safety from crime aboard buses slightly decreased to 13%, meeting target of 14% or less

MTPD hosted 357 community and youth events in FY25 Q1

Desired direction ↓

# Customer injury rate met target during Q1 and is 13% lower than Q1 FY24. 75% of all customer injuries are slips/trips/falls

- **Customer Injury Rate | All modes**  
24.0 injuries per 10M revenue miles, meeting target of no more than 24.0
  - 93 injuries in Q1: 51% Metrobus (47 injuries), 48% Metrorail (45), 1% MetroAccess (1)
  - 75% of injuries are slips/trips/falls: 31% on Metrobus, 22% on escalators, 22% in stations or on trains, and 1% on MetroAccess
  - 20% of injuries are collision-related
  - Actions to improve: make customer-facing safety announcements, procure bus collision-avoidance technologies, coach bus operators on safe driving behaviors

**Colorful handrails encourage customers to hold on when walking on escalators, newest installed at Eisenhower Station in Q1**

# Employee injury rate missed target, increased 3% over FY24 Q1 primarily due to an increase in stress injuries

- **Employee Injury Rate | All modes**  
6.8 injuries per 200,000 employee hours, missing target of no more than 6.0
- 215 injuries in Q1. Top injury types: stress (27%), collision (23%), strain (14%), and slip/trip/fall (13%). Stress injuries are more frequent on Rail, accounting for 35%
  - Compared with FY24 Q1: 8% increase in Rail injuries, 3% increase in Bus
  - Key initiatives to improve: Bus Operator Assault Prevention Training, video slip/trip/fall campaign at Rail Transportation facilities

**Rail completed a comprehensive employee injury risk assessment that identified 8 hazards; working on implementing 20 mitigations identified**

# Rail crowding remained below target in Q1 thanks to frequent service

## Crowding | Rail

0.8% of passenger minutes were spent in crowded conditions (>100 passengers per car during peak periods), meeting target of no more than 5%

- July saw the highest crowding since November of 2023 – crowding on July 4 was 10x higher than the average day
- Crowding is mostly likely to occur 8-9am and 5-6pm in the system core, and immediately following sporting events
- Key actions:
  - Schedule 8-car trains for most crowded trips (40% of all service)
  - Increase frequency on Green and Yellow Lines to 6 min all-day weekdays
  - Add extra trips for special events
  - Space in 8Ks for bikes, strollers, luggage

Example: Green Line Crowding after the 9/28 Nationals Game against the Phillies

Time:	6:20 PM	6:25 PM	6:28 PM	6:33 PM	6:40 PM	6:49 PM	6:57 PM	6:59 PM	7:05 PM	7:13 PM	7:15 PM	7:20 PM	7:25 PM	7:29 PM	7:36 PM	7:44 PM

# Crowding increased in September as school returned from summer break and students ride during peak times; however, crowding is lower than this time last year

## ● Crowding | Bus

- 3.2% of passenger minutes were spent in crowded conditions (>40 passengers on bus), meeting target of no more than 5%
- Lower crowding this September than last year despite higher ridership indicates bus service is meeting passenger demand
  - Crowding is most likely to occur in the PM Peak on weekdays when people return from school or work
  - Increased frequency helps mitigate crowding; over 40% of customer trips occur on routes with 12 min or better frequencies

### FY24 Top 10 Most Crowded Bus Routes by Passenger Minutes

% of Passenger Time in Crowded Conditions

**Crowding is concentrated: 11 of 188 routes account for over half of customer time spent in crowded conditions aboard buses**

# **Service Reliability** | Additional Measures

# Nearly 98% of rail scheduled stops were delivered in Q1, exceeding target, with only 75,000 of 3.2 million scheduled stops missed

## ● Scheduled Stops Delivered | Rail

97.7% stops delivered, meeting target of no less than 97%

- Most missed stops are due to service disruptions. The top three types are: rail vehicles, customer incidents, and signals
- Key actions to sustain performance: begin 7000-series Scheduled Maintenance Program (rehab and overhaul), and continue rail operator recruitment and training program

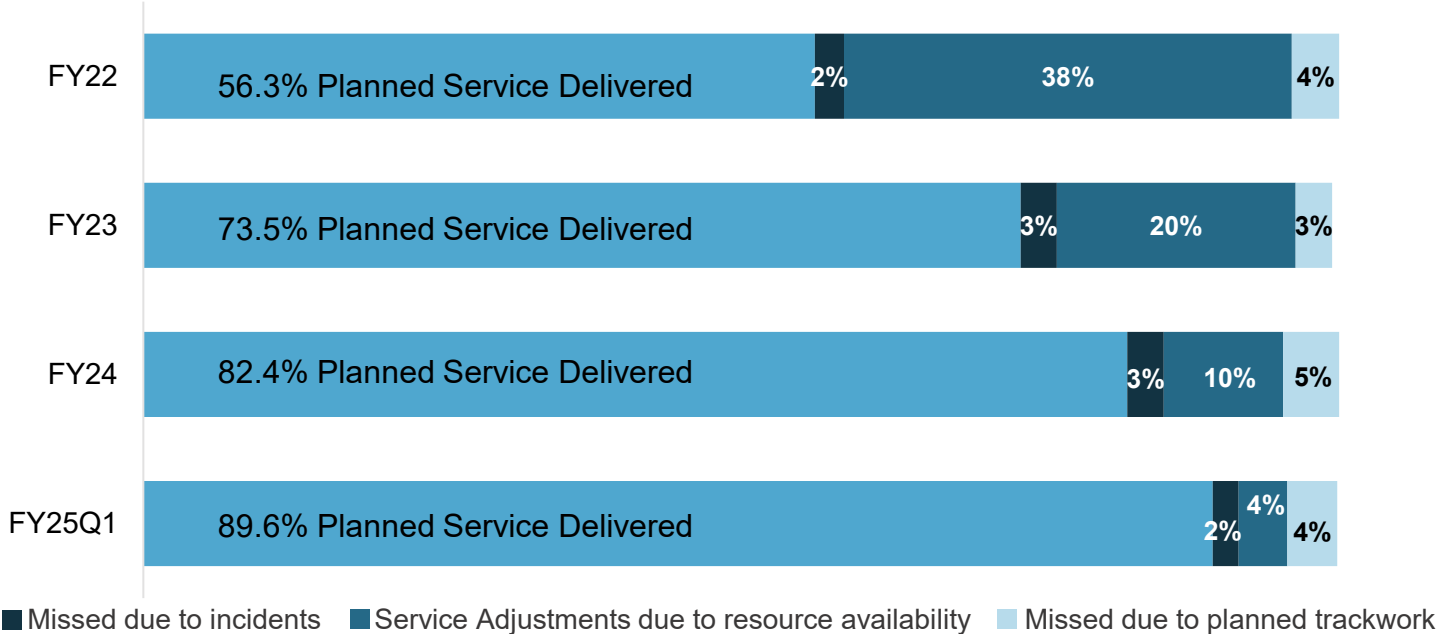

36 train operators certified in Q1 FY25 with 57 more in training, helping to reduce missed service due to operator availability

# Almost 90% of planned service was delivered in Q1, better than target and best performance since FY19

**Planned Stops Delivered | Rail**  
89.6% stops delivered, meeting target of no less than 85%

- Adaptive service adjustments\* account for most missed service (4.2%), followed by planned service disruptions (extended shutdowns, weekend and weekday trackwork) (4.1%) and unplanned incidents (2.2%)
- The Red Line extended summer shutdown enabled crews to complete eight months of weekend closures and disruptions in 13 weeks

Removing the employee train will increase the time available for overnight trackwork by an estimated 30 minutes

\*Adaptive service adjustments cover temporary resource constraints that require modifications to our budgeted service plans

# Elevator availability met target, with 315 out of 320 elevators in service at any time

- Elevator Availability | Rail System**  
98.5% availability, meeting target of no less than 97.7%
  - Availability bolstered by quick repairs: Q1 average repair time was 1 hour and 15 minutes faster than the same time last year
  - 81% of stations met the elevator availability target, and over half of stations have at least 99% availability

**Metro will begin capital projects for 27 elevators in Q3 of FY25**

# **Convenience** | Additional Measures

# Bus real-time information availability exceeded target in September due to the improvements in the algorithm that allow for more trips to appear in trip planning apps

- **Real-time Info Availability | Bus**  
**92.4%** of trips had predictions available, just missing target of no less than **93.0%**
  - Lower info availability can be caused by missed trips or buses that are unable to transmit GPS data:
    - Missed trips: increased slightly in Q1
    - No Data Trips: The percentage of trips without GPS data fell to 3.5% in September, which is the lowest number since April 2023

Metro’s prediction algorithm provides real time data to customers by using available GPS and schedule data

# Rail real-time arrival prediction accuracy met target in Q1 with strong performance in September – the highest on record

- **Real-time Arrival Accuracy | Rail**  
97.3% of predictions were accurate, meeting target of no less than 97.0%
  - Accuracy improved beginning in July due to:
    - Single tracking zones: predictions account for number of expected trains passing through area, no longer show “DLY”
    - Terminals: predictions adjust if previous trip is running late
    - Merge points: better schedules reduce holding prior to merges

**54% of Metrorail customers used an online tool or app for their last trip: Google Maps (52%), WMATA Trip Planner (25%) and Apple Maps (20%)**

# Customer satisfaction with cleanliness

Desired  
direction 

## ● Metrorail

74% in Q1, exceeding target of no less than 64%

### Q1 results for Metrorail hit a record-high

- In late FY24, Metro revamped its cleaning processes and procedures, upgraded cleaning solutions, improved tooling and began twice weekly supervisor audit program
- Car Maintenance has received four responses to a Request For Information for exterior cleaning services to explore options for annual fleet-wide deep cleaning
- Car Maintenance anticipates awarding an End of Line Cleaning contract in Q2, which will dedicate additional resources to major interior cleaning activities

## ● Metrobus

64% in Q1, missing target of no less than 70%

### Q1 results for Metrobus remained about the same as the past two quarters

- Key actions to improve:
  - Continue to supplement standard nightly cleaning procedures with an interior deep cleaning of each bus every two weeks
  - Additional weekly disinfection of the whole bus during flu season
  - Complete installation of easier-to-clean vinyl seats on all 1,500 buses in CY2025

# Almost twice as many customers used bicycles to get to rail stations in 2022 compared to 2016

## Last-Mile Connectivity/Bicycle Access

1.4%, on track for 2030 target of 3.5%

- Metro surveys customers on what mode they used to access rail stations as part of the Rail Customer Survey. Next survey will be in 2025
- Event held in July 2024 at NoMa-Gallaudet U station to solicit feedback on storage upgrades for bikes at stations, which could improve access percentage
- Station bike parking upgrades to begin in Spring 2025
- New methodology being developed to increase frequency of reporting

**Metro and Prince George’s County were awarded \$500K to enhance pedestrian and bike connectivity to West Hyattsville station and nearby areas**

Feedback from our July 2024 event was positive regarding potential SmarTrip compatibility, accommodation for varied bike sizes, and built-in e-bike charging.
