

Expanded Summer Shutdown

- As Metro continues to experience historically low ridership, we have worked with our contractors and regional partners to combine the schedules of two major capital projects in Virginia:
 - **Platform Improvement Project** at four Orange Line stations
 - MWAA's work to connect the new **Silver Line Phase 2** segment with the existing Metrorail network
- Ridership at stations west of Ballston down approx. 95%

Expanded Summer Shutdown

Beginning May 23:

- All stations west of Ballston closed
- Orange Line between Ballston & New Carrollton
- No Silver Line service
- Free shuttle service

Expanded Summer Shutdown

- This is about two things: **working smarter and working safer.**
- Closing these stations to get the work done will allow us to:
 - Limit the exposure of our frontline staff and contractors
 - Mitigate delays to our capital program
 - Minimize inconvenience to the public when riders return
- We encourage customers to visit wmata.com/platforms for more information, including shuttle maps and the option to sign up for email updates.
