## WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

# **Washington Metropolitan Area Transit Authority**

Proposed Fiscal Year 2012 Annual Budget

# Rebuilding the Foundation

Submitted to the Metro Board of Directors

January 13, 2011

# General Manager's Message

Every day, more than a million passenger trips aboard Metro trains and buses enable people in the region to commute to work, get to the doctor, shop for groceries, meet family members, travel to the airport, visit tourism sites, and attend public events. As the backbone of the region, Metro is the connecting transportation carrier, a major employer, and a powerful economic engine supporting the Washington area's economy and attracting transit oriented development -- contributing nearly \$40 billion to the local jurisdictions.

Over the past year, Metro has been making significant progress rebuilding its foundation including safety, service reliability, and financial stability. Through a Board and Management led series of strategic investments and organizational changes, the agency has started to turn around its safety culture, address NTSB recommendations, acquire new rolling stock, and rehabilitate aging rail and bus infrastructure – the nuts and bolts work of returning the system to a state of good repair to ensure current and continued safe operations.

Accordingly, the multi-year capital program properly focuses on advancing more than 140 projects that will rehabilitate and improve today's infrastructure and equipment – as well as plan for future expansion, including the new extension to Dulles airport. The program is aggressive but not unconstrained, and I note that expanding capacity on the existing system would require additional funding.

While doing more, we are simultaneously becoming more resource efficient. More than 91 cents of every operating dollar directly funds core services, with only 9 cents funding support functions. Over the last three years, Metro has implemented \$165 million in business efficiencies through consolidations, suspending non-essential programs, and automating certain functions. In the coming fiscal year, my proposed budget accounts for the elimination and restructuring of an additional \$74.2 million in operating budget requirements without adversely impacting customers.

Last year, rather than bear service reductions, our customers said they preferred to contribute more to support core services and they stepped up support for Metro by

shouldering a fare increase that will generate approximately \$100 million this year. The jurisdictions also stepped up support by increasing contributions by \$25 million.

Even with an aggressive program of management efficiencies, in the coming year Metro faces substantial cost drivers, including wages and fringes, paratransit service growth, and the FY2010 carryover that, in total, increase the base budget by \$85.8 million.

To ensure Metro stays on the path of improvement and maintains core services to support the economic growth of the region, my proposed budget continues today's levels of service on all modes, as well as funds a robust capital program, without raising fares. Therefore, I am recommending identifying \$72.5 million of additional funding to maintain services. I am proposing a number of alternatives to consider for the funding including the reserve for wages, additional jurisdictional contributions, increasing commercial revenues through monetized ground leases and marketing station naming rights; and funding preventive maintenance at the FY2010 levels.

Investment in Metro recognizes the agency's role as an economic driver for the region, as well as a commitment to ensure the continued mobility of commuters and visitors. In addition, fully funding Metro's operating budget is vital to building upon the FY2011 foundation that supports a new safety culture, a robust schedule of services for riders, and sound management with a goal of restoring public confidence in Metro as the nation's model transit system.

Richard K. Sarles General Manager

# **Metro Board of Directors**

Metro is governed by a 16-member Board of Directors composed of eight voting and eight alternate members. Maryland, the District of Columbia, Virginia and the federal government each appoint two voting members and two alternate members.

In January 2011, some of the jurisdictions are going through the process of selecting new members. Once the composition of the Board of Directors is finalized, the budget document will be updated with a complete list of the Board members.

# Chapter I. Introduction to the Washington Metropolitan Area Transit Authority

#### **Metro Profile**

#### History in Brief

Metro was created in 1967 by an interstate compact creating a tri-jurisdiction operation. Construction of the Metrorail system began in 1969 and the first phase of Metrorail operation began in 1976.

Metro added a second transit service to its network in 1973 when, under direction from the U.S. Congress, it acquired four area bus systems and created Metrobus.

In 1994, Metro added a third transit service when it began providing MetroAccess, a paratransit service for people with disabilities unable to use fixed route transit service.

Metro completed the originally planned 103-mile Metrorail system in early 2001. In 2004, Metro expanded the system, opening the Blue Line extension to Largo Town Center and New York Ave-Florida Ave-Gallaudet U station on the Red Line. The expansion brought the Metrorail system to its current 86 stations and 106 miles.

#### Sequence of Metrorail Openings

The first Metrorail line opened was the Red line consisting of 4.5 miles from Farragut North to Rhode Island Avenue. By July 1977, the Blue and Orange lines were added with service between National Airport and the Stadium-Armory. This added 11.8 miles and 17 new stations to Metro's rail operation. With continued development, in 1983 the Yellow line was added with service from Gallery Place-Chinatown to the Pentagon, adding 3.3 miles and one station. In 1991, the Green line was added providing service from Gallery Place to U St/African-American Civil War Memorial/Cardozo. In 2001, the Green Line was extended to Branch Avenue. In 2004, the current system was completed with the openings of the Largo Town Center and Morgan Boulevard on the Blue line and the New York Avenue station on the Red line, respectively. Currently, the extension to Dulles International Airport is being constructed in two phases. Phase One is scheduled for opening in 2013 adding four stations to Metro's rail operations. For Phase Two, an additional six stations are expected to open in 2016. For additional details of the Metrorail system, see Table 1.1.

#### Metro Facts

- Metro maintains the second largest rail system, the sixth largest bus system and the sixth largest paratransit service in the nation.
- Metro service area size is 1500 square miles with a population 3.5 million people.
- The proposed FY2012 budget is \$2.48 billion with an operating budget of \$1.5 billion, reimbursable budget of \$.04 billion and a capital budget of \$0.85 billion.
- Known as "America's Transit System," average weekday passenger trips on Metrorail and Metrobus total nearly 1.2 million.
- Metro has spurred over \$37 billion of economic development at or adjacent to Metro property.
- More than half of Metrorail stations serve federal facilities and approximately 40 percent of Metro's peak period customers are federal employees.
- Metro's transit zone consists of the District of Columbia, the suburban Maryland counties of Montgomery and Prince George's and the Northern Virginia counties of Arlington, Fairfax and Loudon and the cities of Alexandria, Fairfax and Falls Church.

#### Metrobus

Metrobus operates bus service on over 320 routes on over 160 lines throughout the Metro region utilizing 11,624 bus stops and 2,398 shelters. All buses are accessible to people with disabilities and bike racks are available for use on all buses. More and more, Metro is purchasing buses that make use of improvements in bus technology, including hybrid, clean diesel, and compressed natural gas (CNG). The entire bus fleet is equipped with two-way radio links to the operations control center, emergency radio silent alarms, and automatic vehicle locators. The Next Bus service provides customers information on Metrobus arrival times at a particular bus stop. It uses satellite technology to find specific locations of a bus and sends the estimated arrival time of the bus to customers via mobile devices. In addition, security cameras are installed on 803 buses. Currently, the fleet comprises 1,500 buses of varying sizes and capacities. In FY2012, more than 121 million trips are projected to be taken on Metrobus.

#### Metrorail

The Metrorail system is a rapid transit system that consists of 106.3 route miles and 86 passenger stations and a fleet of over 1,100 rail cars. Service is operated from 5 AM to midnight Monday through Thursday, from 5 AM to 3 AM on Friday, from 7 AM to 3 AM on Saturday, and from 7 AM to midnight on Sunday. In FY2012, Metrorail is projected to provide more than 218 million passenger trips. The system comprises three main types of structures: subway, surface and aerial. The subway (or underground) sections consist of 50.5 route miles and 47 stations. The surface sections comprise 46.31 miles and 33 stations, and the aerial sections consist of 9.22 route miles and six stations. While there are three types of structures, they operate as one unified system with seamless service to the passenger.

Metrorail service is operated over five lines: Blue, Green, Orange, Red and Yellow. All Metrorail stations and rail cars are accessible to passengers with disabilities. There are 588 escalators and 235 elevators in the Metrorail system. The Wheaton Station on the Red Line has the longest escalator in the Western Hemisphere, at 230 feet long. The Forest Glen Station, also on the Red Line, is the deepest station in the system (196 feet or 21 stories) with high speed elevators that take less than 20 seconds to travel from the street to the platform.

The system is extensively equipped with communication systems that facilitate the flow of information to and from the passenger. All stations are equipped with digital signs that show next train arrival times, system status and time of day. The system operations control center is equipped with two-way radios for constant communication with all train operators in service, as well as hotlines to police and fire departments in all of the jurisdictions served by Metro. Public address systems on all trains and platforms facilitate communications from Metrorail train operators and station managers. Also, passenger-to-train operator intercoms are located inside all rail cars, one at each end, and there are passenger-to-station manager intercoms on all station platforms and landings and in all elevators.

#### Vertical Transportation

Metro's design places high reliance on vertical mobility. Customers access Metrorail via escalators or elevators to the train platform, while elevators provide an accessible path of travel for persons with disabilities, seniors, customers with strollers, travelers carrying luggage and other riders.

Metro is the single largest vertical transportation operator in North America. They operate almost 900 pieces of equipment: 589 escalators and 271 elevators and deliver over 3 million trips each weekday

#### MetroAccess

MetroAccess is a shared-ride, door-to-door paratransit service for people whose disability prevents them from using bus or rail. The MetroAccess system operates a fleet of over 600 vans and sedans and provides 2.1 million passenger trips annually. Service is available seven days a week, from 5 AM to midnight Monday through Thursday, from 5 AM to 3 AM on Friday, from 7 AM to 3 AM on Saturday, and from 7 AM to midnight on Sunday.

Table 1.1

Blue	To Largo Town Center	2	3.2	12/18/2004
Red	New York Ave	1	0.0	11/20/2004

#### **Oversight**

Metro oversight is provided by both internal and external office/committee/administration; these are:

- The Federal Transit Administration (FTA)
- The Tri-state Oversight Committee (TOC)
- The Office of Inspector General (OIG)

#### Federal Transit Administration

The Federal Transit Administration (FTA) is an agency within the United States Department of Transportation that provides financial and technical assistance to local public transit systems.

The Federal government, through the FTA, provides financial assistance to develop new transit systems and improve, maintain, and operate existing systems. FTA monitors grants to state and local transit providers, primarily through its ten regional offices. These grantees are responsible for managing their programs in accordance with Federal requirements, and FTA is responsible for ensuring that grantees follow Federal mandates along with statutory and administrative requirements.

#### Tri-State Oversight Committee

Metro's Tri-state Oversight Committee (TOC) was created by state-level agencies in Virginia, Maryland and the District of Columbia to jointly oversee rail safety and security at Metro. The TOC reviews and approves Metro's safety and security plans, rail accident investigation procedures and final accident reports and conducts audits among other oversight activities. In addition, the TOC independently evaluates the overall compliance of Metro's rail safety and security efforts with its plans and procedures. In doing so, this committee fulfills the states' responsibilities under 49 Code of Federal Regulations, Part 659, which requires such oversight programs for rail transit systems like Metro that receive federal funding. For any deficiencies identified by TOC, Metro is required to propose corrective action plans for TOC's approval and implement them to TOC's satisfaction.

#### Metro Office of the Inspector General

The Office of Inspector General (OIG), authorized by the Metro Board of Directors in April 2006, supervises and conducts independent and objective audits, investigations, and reviews of Metro programs and operations to promote economy, efficiency, and effectiveness, as well as to prevent and detect fraud, waste, and abuse in such programs and operations. The Inspector General provides advice to the Board of Directors and General Manager to assist in achieving the highest levels of program and operational performance in Metro.

#### **Advisory**

Metro advisory organizations include:

- The Riders' Advisory Council (RAC)
- The Jurisdictional Coordinating Committee (JCC)
- The Accessibility Advisory Committee (AAC)

#### Riders' Advisory Council

On September 22, 2005, the Metro Board established a Riders' Advisory Council (RAC). The Council allows Metro customers an unprecedented level of input on bus, rail and paratransit service. The 21-member council includes six representatives from Maryland, Virginia, and the District of Columbia, two at-large members, and the chair of Metro's Accessibility Advisory Committee.

#### Jurisdictional Coordinating Committee

The Jurisdictional Coordinating Committee (JCC) consists of staff members from the jurisdictions supporting Metro. The JCC was established by the Board of Directors to facilitate the exchange of information between jurisdictions and Metro staff. Meeting agendas are established by Metro staff and the JCC chairman and include items referred by the Board or Metro staff, as well as items requested by JCC members.

#### Accessibility Advisory Committee

Metro's Accessibility Advisory Committee (AAC) was created to address the needs of senior citizens and customers with disabilities. Its efforts have resulted in numerous service upgrades including gap reducers, which make it easier for customers who use wheelchairs to board Metrorail trains.

#### Metro's Strategic Plan

The vision of Washington Metropolitan Area Transit Authority (Metro) is "Rebuilding the Foundation". The primary mission of Metro which flows from its vision is to provide the nation's safest transit service to our customers and improve the quality of life in the Washington metropolitan area. To address Metro's dynamic operating environment, the Board of Directors adopted a resolution on September 30, 2010, that clearly places safety at the forefront of the transit agency's mission. Metro established a strategic framework in which to provide direction to achieve its mission and identified five strategic goals and twelve objectives.

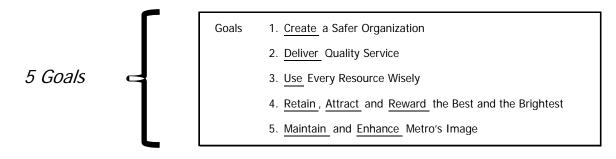

**Vision:** Rebuilding the Foundation

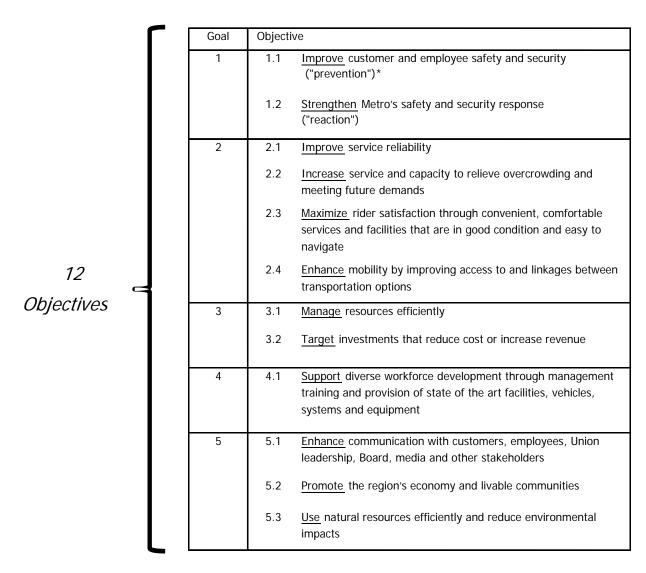

**Mission:** Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area.

#### Values:

- Safety and Security
- Professionalism
- Integrity
- Continuous Improvement
- Respect for All

The strategic framework is summarized as follows:

<sup>\*</sup>WMATA Board of Directors System Safety Policy states:

<sup>1.</sup> To avoid loss of life, injury of persons and damage or loss of property;

<sup>2.</sup> To instill a commitment to safety in all WMATA employees and contractor personnel; and

<sup>3.</sup> To provide for the identification and control of safety hazards, the study of safety requirements, the design, installation and fabrication of safe equipment, facilities, systems, and vehicles, and a systematic approach to the analysis and surveillance of operational safety for facilities, systems, vehicles and equipment.

#### **Transit Regional Planning**

The Washington Metropolitan Area encompasses over 4,000 square miles in the District of Columbia, suburban Maryland and Northern Virginia. The Washington Metropolitan region is home to five million people and three million jobs<sup>1</sup>. The region's public transportation system is well used by residents, visitors and businesses, carrying six percent of daily trips and 17 percent of commuting trips in 2008<sup>1</sup>. During the morning peak period, 43 percent of commute trips to the region's core use transit including 32 percent on Metrorail, eight percent on bus and three percent on commuter rail<sup>2</sup>. In FY2011, ridership on Metrorail and Metrobus is budgeted to reach 340 million trips annually.

Metro, as the primary transit operator providing service across state lines, is an integral member of the regional transportation planning process. Article VI of the Metro Compact gives Metro the power to adopt a Mass Transit Plan for the Metro service zone and directs Metro to participate in the region's continuous, comprehensive transportation planning process. Metro's regional planning function encompasses the preparation of transit system plans in partnership with other regional transit providers, conducting system-planning analysis and transportation studies, communication of transit needs to regional planning bodies, and participation in planning processes at the regional and sub-regional levels. Metro has a particular responsibility to ensure that the region's transit providers needs, both capital and operating, are reflected during the establishment of the Mass Transit Plan and that the region achieves a balanced system of transportation.

Metro coordinates with its regional partners to determine transit-based priorities and projects. The Metro Board of Directors, composed of members from the Compact jurisdictions, helps determine those priorities and provides policy direction. The Metro Jurisdictional Coordinating Committee (JCC) brings in the jurisdictions to coordinate on various budget and operational issues on a monthly basis. Internal planning and programming are designed to work within this institutional framework.

The National Capital Regional Transportation Planning Board (TPB) is the federally designated Metropolitan Planning Organization (MPO) to coordinate transportation planning and funding. The TPB serves as a forum for the region to develop transportation plans, policies and actions, and to set regional transportation priorities through the Financially Constrained Long Range Plan (CLRP) and the 6-Year Transportation Improvement Plan (TIP). The TPB also provides technical resources for planning and policy making. Metro is one of the implementing agencies in the TPB planning process and is a voting member of the TPB. Metro is also an active member of the TPB Technical Committee and several subcommittees such as Travel Forecasting, Bicycle and Pedestrian, Regional Bus, and Regional Transportation Demand Management (TDM) Marketing.

In addition to activities at the TPB, Metro coordinates with jurisdictional partners in multiple venues. The Northern Virginia Transportation Authority (NVTA) is responsible for developing a Northern Virginia Regional Transportation Plan, allocating transportation funds and providing interagency coordination in Northern Virginia. The Northern Virginia Transportation Commission (NVTC) coordinates transit finance and operations in Northern Virginia. Metro

works with both NVTA and NVTC on important transit funding and corridor development initiatives to enhance public transit service and ensure integration of transit in highway investments.

In addition to activities at the TPB, Metro coordinates with jurisdictional partners in multiple venues. Metro works with DOT and planning staff in DC, MD, and VA on important local plans and project development initiatives to enhance public transit service and ensure integration of transit in highway investments.

#### Census Information

Demographics for the Washington Metropolitan Statistic Area will be updated for the Approved FY2012 Budget, after census data is fully released.

#### **Economy**

Unemployment in the Washington Metropolitan Statistic Area in FY2009 was 3.8 percent in July; by fiscal year-end, unemployment reached 6.1 percent. Since then, the region's unemployment rate has continued to remain high due to the economic downturn. Total unemployment for the first quarter of 2011 was six percent. While it is anticipated that total employment in the region will gradually increase, unemployment during FY2012 is expected to continue to be between six and seven percent.<sup>3</sup>

Unemployment in the District of Columbia experienced an even greater impact than the economy. At the start of FY2009, July 2008, unemployment in the District of Columbia was 6.6 percent, reaching 12.0 percent by January 2010. The DC unemployment rate averaged 9.9 percent for the first quarter of FY2011.<sup>3</sup>

#### **Organization Chart**

#### **Human Capital Summary**

Human capital is a way of defining and categorizing people's skills and abilities and how they are used to accomplish the goals and objectives of the organization. At Metro, the management of human capital involves workforce planning and investment, and is aligned with the strategic plan and integrated with the core vision of "Rebuilding the Foundation".

Human capital is not just the number of people employed, but the various costs associated with such employment — often referred to as personnel costs. Metro's personnel costs fall into one of two major categories, labor or fringe benefit costs.

Labor costs make up approximately 70 percent of all personnel costs. Labor costs include regular and overtime pay for operations employees, as well as salaries for management, professional, and administrative personnel. The proposed FY2012 labor budget for salary and wages is \$831.4 million including the operating and capital budgets. This makes up 35 percent of the total budget.

Fringe benefit costs at Metro comprise the personnel-related expenses incurred by an employer that are above and beyond the cost of employee pay. Metro's fringe benefits are comprised of the health insurance and pension plans required by collective bargaining agreements and retain a professional workforce, plus government mandated costs such as unemployment insurance and payroll taxes. The proposed FY2012 fringe benefits budget is \$375.5 million, which makes up 15.8 percent of the total budget.

The following tables provide a detailed, three-year comparison of total human capital requirements for Metro. The proposed staffing requirement for FY2012 is 11,237, consisting of 10,232 operating positions and 1,005 capital funded positions. The majority of the position changes are related to capital projects. Major changes in budgeted positions are:

- 92 positions for management and implementation of the capital program, including the technical skills program. This includes positions added during FY2011 (Resolutions No. 2010-53 and No. 2010-74 Management of the CIP and Resolution No. 2010-54 Orange/Blue Rehabilitation)
- 66 positions for Information Technology capital projects, including the data center
- 40 positions for the Neutral Host project (Resolution No. 2010-69) to be paid for by the carriers as a reimbursable project
- 34 positions for Bus scheduling
- 25 positions for the Integrated Financial Systems project
- 17 positions for security at the bus garages (Resolution No. 2010-57)

Table 1.2 shows a breakdown, by department, of the staffing levels for FY2010-FY2012.

Table 1.2

## Chapter II. Budget Summary

Management's proposed \$2.37 billion for FY2012 allows Metro to continue on the path of improvement by maintaining its core services to provide over a million trips a day and ensuring a critical link in the economic growth and vitality of the whole region. At the same time, the budget positions Metro to implement its highest priority of safety improvement and investment in state of good repair.

As such, the budget prepares Metro to implement the largest capital program since the construction of the Metrorail system. Mindful of these tough economic times and the need to put each dollar to good use, Management has also continued to tighten up the operating budget. Over the last three years, Metro has implemented \$165 million in efficiencies. This year, there are an additional \$74.2 million in operating budget adjustments.

Metro's overall budget includes the operating portion of \$1.5 billion, which provides for the personnel, supplies, fuel and propulsion power, and services needed to operate Metrobus, Metrorail, and MetroAccess. Funding for the operating budget comes primarily from passenger fares and subsidies from Metro's state and local government partners.

The proposed FY2012 capital budget of \$851 million provides for the assets and infrastructure to support Metrobus, Metrorail, and MetroAccess service. Funding for the capital budget comes from federal grants, Metro's state and local government partners, and debt.

#### **FY2012 Initiatives**

Priorities for FY2012 budget include:

- Implementing the largest capital program since the construction of the Metrorail system
- Continuing FY2011 safety investments, including addressing all recommendations of the National Transportation Safety Board
- Advancing the replacement of the 1000 series rail cars
- Promoting the use of public transit
- Rehabilitating rail and bus infrastructure to improve safety and reliability

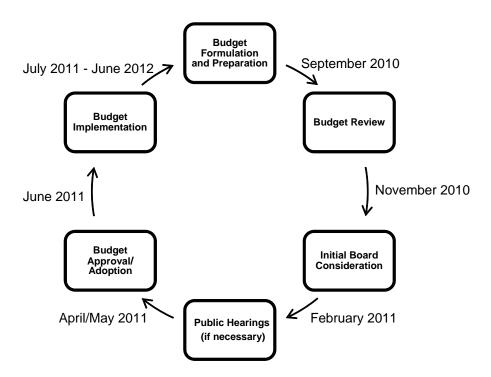

#### The FY2012 Budget in Brief

• With over a million trips each day, Metrorail, and Metrobus serve a population of 3.5 million within a 1,500 square-mile area.

- The \$1.5 billion Operating Budget, with 51 percent from passenger fares and parking and
   46 percent from State and Local Governments, supports Metrobus, Metrorail, and
   MetroAccess operations across Virginia, Maryland, and the District of Columbia
- The \$851 million capital budget, while substantial, meets only currently known safety and state-of-good-repair needs, and does not meet other known capital needs including system expansion projects
- The \$39 million operating and capital reimbursable funds projects on behalf of local governments including the DC Circulator
- Labor costs for the operating and capital budget, including fringe benefits, will cost a projected \$1.2 billion in FY2012

#### **BUDGET PROCESS**

Metro begins planning its budget in August of the previous fiscal year. The budget is adopted in June and the fiscal year begins on July 1. Budgeting for the fiscal year is divided into four phases: budget formulation and preparation, budget reviews, budget adoption and budget implementation/amendments.

#### **Budget Formulation and Preparation**

- Initial planning, development of assumptions, preparation of instructions and training materials began in September
- The FY2012 budget kickoff meeting was held with all departments in October 2010
- Departments submitted their operating budget requests to the Office of Management and Budget Services (OMBS) in November 2010
- Capital Improvement Program expense and labor requests were submitted by departments to the assigned budget office for approval prior to being included in the department's budget

#### Budget Calendar FY2012

- Presentation of proposed budget to Finance and Administration (FA) Committee occurs on January 13, 2011
- Board will review the budget from February through May
- Public hearings, if necessary, will be held during the months of March and April
- Board adopts the Operating and Capital budgets for FY2012 in June 2011
- Fiscal year 2012 begins on July 1, 2011

#### SOURCES AND USES OF FUNDS – OPERATING/CAPITAL COMBINED

A total of \$2.37 billion has been budgeted, for the operating (\$1.5 billion), operating and capital reimbursable (\$38.7 million) and capital (\$851.1 million) budgets. The breakdown of the combined budgets is shown in the pie chart and table below.

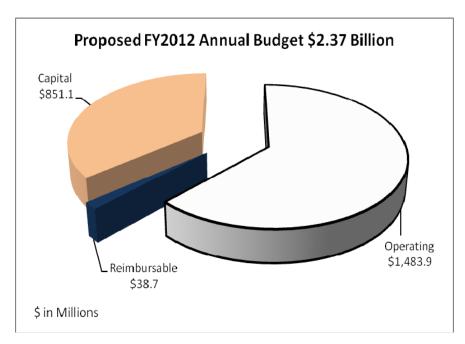

Table 2.1 **Summary of Expenditures by Program** 

		3						
(Dollars in Millions)	Fiscal 2010				Fiscal 2011			
		<u>Actual</u>	<u>Amended</u>		<u> </u>	roposed		
Operating Budget								
<ul> <li>Metrobus</li> </ul>	\$	489.2	\$	537.9	\$	532.5		
<ul> <li>Metrorail</li> </ul>		789.6		822.3		813.9		
<ul> <li>MetroAccess</li> </ul>		98.6		103.7		119.6		
Subtotal	\$	1,377.4	\$	1,463.9	\$	1,466.0		
Debt Service/Other		(16.6)		(12.0)		18.0		
Subtotal	\$	1,360.8	\$	1,451.9	\$	1,483.9		
Reimbursable Budget								
<ul> <li>Operating Reimbursable Projects</li> </ul>		-		19.0		35.7		
Capital Reimbursable Projects		35.4		3.0		3.0		
Subtotal	\$	35.4	\$	22.0	\$	38.7		
Capital Budget								
<ul> <li>Capital Improvement Program</li> </ul>	\$	-	\$	709.3	\$	836.7		
<ul> <li>Metro Matters</li> </ul>		382.6		-				
<ul> <li>Metro Matters Rollover</li> </ul>		-		131.8		14.4		
<ul> <li>ARRA "Stimulus" Program (1)</li> </ul>		82.0		-		-		
• Safety & Security Program (2)		0.8		3.4				
Subtotal	\$	465.4	\$	844.5	\$	851.1		
Total	\$	1,861.6	\$	2,318.3	\$	2,373.7		
					_			

Note 1: The ARRA program is an obligation based program. The budget approved in FY2009 was \$201.8 million of which \$82.0 million was expended in FY2010.

Note 2: The Safety and Security program is an obligation based program. The budget approved in FY2010 was \$60.8 million of which \$0.8 million was expended in FY2010.

The sources of funding for the operating and capital budgets combined are broken down into categories. These categories are:

- Fares and parking (\$764.0 million)
- Federal funding (\$248.0 million formula and \$150.0 million PRIIA)
- State and local jurisdictions (total of \$1,020.8 million, consisting of \$676.6 million operating budget, \$23.8 million reimbursable and \$320.4 million capital)
- Other funding, including advertising, joint development projects, and grants (\$190.8 million)

#### The budget is comprised of the:

- Operating budget, for the operation of Metro Rail, Bus, and Access
- Operating and capital reimbursable projects that are advanced and paid for by local jurisdictions
- Capital budget to renew and improve infrastructure

## Chapter III. Sources of Funds

This chapter provides information on the sources of funds for the Proposed Fiscal Year 2012 Annual Budget. Also included is an explanation of the allocation of the operating subsidy and capital budget contribution provided to Metro by state and local government partners.

#### Fiscal Year 2012 Proposed Revenues

The proposed operating revenue for FY2012 is \$807.3 million, consisting of FY2012 projected passenger revenues of \$709.2 million and non-passenger revenue of \$98.1 million.

Table 3.1

Revenue by Account						
FY2009 - Proposed FY2012						
(Dollars in Thousands)	Actual <u>2009</u>	Actual <u>2010</u>	Approved Budget <u>2011</u>	Proposed Budget <u>2012</u>	Variance to \$ Change	<u>Variance</u>

Total Revenue	\$ 759,231	\$ 752,978	\$ 831,183	\$ 807,346	(\$ 23,837)	-2.9%

<sup>&</sup>lt;sup>1</sup> Revenue from ATMs, Antennas, and other

The Proposed FY2012 budget uses the FY2011 budgeted ridership as a base, with several modifications to ridership projections for Bus, Rail and Access, as well as adjustments in average fares based on FY2011 year to date experience.

#### **Passenger Revenues**

Total projected passenger revenue for FY2012 is \$709.2 million. This includes \$124.7 million in bus passenger revenue, \$578.2 million in rail passenger revenue, and MetroAccess revenue of \$6.3 million. Parking revenue for the year is budgeted at \$47.8 million, the FY2011 level. The other passenger revenue category is \$7.0 million; which is comprised of reimbursements from the District of Columbia (DC) and the DC school subsidy.

<sup>&</sup>lt;sup>2</sup> Bicycle locker, Cellular Telephones, Vending Machines, and Subrogation

<sup>&</sup>lt;sup>3</sup> Payphones; SE Garage Settlement; Safe, Clean & Reliable; and Charter

#### Metrobus

The projected bus passenger revenue for FY2012 of \$124.7 million is \$12.1 million less than the FY2011 Budget. In addition, the bus passenger revenue projection for FY2012 is reduced by \$5.0 million due to revenue sharing with regional bus systems for the regional bus pass on SmarTrip®.

FY2012 bus system ridership growth is projected at slightly less than one percent ridership above current projected FY2011 levels, with total bus ridership in FY2012 projected at 121.9 million trips. There are no changes in bus fares proposed for FY2012.

#### Metrorail

The projected rail passenger revenue for FY2012 of \$578.2 million is \$13.8 million less than the Budget for FY2011 of \$592 million. Adjustments to the approved FY2011 rail ridership projection of 219 million trips are a result of continuing economic downturn. The base adjusted rail ridership projection, based on actual rail ridership to date, is 216 million trips, 3 million trips less than the approved budget. Ridership growth projections for FY2012 of 1.25 percent above the FY2011 projection is expected to generate additional trips in FY2012 of 2.7 million, resulting in projected total ridership for FY2012 of 218.8 million trips.

#### MetroAccess

MetroAccess passenger revenue for FY2012 is estimated at \$6.3 million with 2.5 million trips. This is an increase in Access passenger revenue of \$0.4 million and a decrease of 225,000 trips from the total of 2.7 million trips in the Approved FY2011 Budget. Revisions to the approved ridership and revenue totals for FY2012 include the planned implementation of supplemental zone fares.

Table 3.2

Passenger Revenue			
(Dollars in Thousands)			
	<u>Metrorail</u>	<u>Metrobus</u>	<u>MetroAccess</u>
Base (including fare increase revenue)	\$592,013.0	\$136,872.0	\$5,815.4
Adjustment to Ridership/Revenue (as of Nov 2010)	(\$21,018.0)	(\$8,373.0)	\$0.0
Revised Base Passenger Revenue	\$570,995.0	\$128,499.0	\$5,815.4
FY2012 Ridership Growth	\$7,191.0	\$1,243.9	\$436.4
Adjustment for Bus Revenue Sharing	\$0.0	-\$5,000.0	\$0.0
Proposed FY2012 Passenger Revenue	\$578,186.0	\$124,742.9	\$6,251.8
Percentage Ridership Growth from Base to FY2012	1.26%	0.97%	7.50%
Projected Ridership (in millions of trips)	218.8	121.9	2.5

#### **Other Passenger Revenue**

#### District of Columbia School Subsidy

The total District of Columbia School Subsidy for FY2012 is \$5.0 million, \$2.9 million for Metrobus and \$2.1 million for Metrorail. This revenue category also includes an additional \$2 million reimbursement for reduced bus fares in the District of Columbia.

Table 3.3
Ridership by Service: FY2009 - FY2012

(Trips in Thousands)	FY 2009 <u>Actual</u>	FY2010 <u>Actual</u>	FY2011 Budget	Proposed FY2012 Budget
Metrorail Ridership <sup>1</sup>	222,858	217,219	219,000	218,774
Metrobus Ridership <sup>2</sup>	133,774	123,670	127,590	121,926
MetroAccess Ridership <sup>3</sup>	2,108	2,382	2,725	2,491
Total	358,741	343,271	349,315	343,191

Note: <sup>1</sup>Metrorail ridership is based on linked trips

Unlinked trips are total boardings. Linked trips are the total number of complete trips from origin to destination, including transfers.

#### **Parking**

Parking revenue for FY2012 is projected at \$47.8 million, the same level as FY2011. No changes are proposed for FY2012.

#### **Non-Passenger Revenue**

#### Advertising

The current advertising contract began in FY2011. FY2012 is the second year of the new contract which includes two components: the minimum value of Metro's advertising inventory valued at \$13 million and supplemental advertising inventory estimated at \$2 million.

#### Joint Development

The FY2012 Joint Development revenue allocated to the operating budget is \$6.5 million, the same as FY2011.

<sup>&</sup>lt;sup>2</sup>Metrobus ridership is based on unlinked trips

<sup>&</sup>lt;sup>3</sup>MetroAccess ridership is based on total passengers

#### Other Revenue

Other revenue in the proposed FY2012 budget includes vending machines, ATM revenue, cellular telephones, bike locker fees, subrogation collections, car sharing revenue, and antenna revenue. These combined revenue sources are expected to contribute \$6.3 million to the FY2012 non-passenger revenues, an increase of \$1.7 million above the total for FY2011. Revisions to revenue projections for ATM revenue account for the majority of the increase in FY2012.

FY2012 is the third year of car sharing revenue, which is expected to generate \$340,000 over the five years of the contract, for the use of car sharing spaces at Metro Kiss & Ride locations throughout the Metrorail system. The budgeted revenue for FY2012 is \$57,000, an amount that did not change from FY2011.

#### **Employee Parking**

Employee parking revenue for FY2012 includes no change over FY2011; it reflects parking fees at the Jackson Graham Building.

#### Interest Revenue

For FY2012, the proposed budget for interest revenue is \$0.5 million, the same as FY2011.

#### Fiber Optics

Initiated in September 1986, the Metro Fiber Optic Program was designed to allow for the installation, operation and maintenance of a fiber optic-based telecommunication network which utilized the excess capacity within the Metro right-of-way. As part of the compensation package, Metro receives, in a separate fiber optic cable, a number of fibers for its own use. For FY2012, fiber optic revenue is projected at \$14.8 million, the same as FY2011.

#### Metro Fares and Fees - Effective June 27, 2010

#### **MetroAccess Fares**

<ul> <li>MetroAccess fare (within ADA 3/4 mile service corridor) <sup>5</sup></li> <li>Maximum fare</li> <li>Supplemental zone fares</li> </ul>	varies \$7.00 \$2.00 - \$4.00
Parking Fees	
District of Columbia	\$3.25 - \$4.25
Montgomery County	\$4.00 - \$4.75
· Prince George's County	\$4.25
· Virginia	\$4.50
Monthly reserved parking fee	\$65.00
Parking meters \$1.00/60 minutes	\$1.00
New Carrollton county garage base and surcharge fees	\$70.00/\$15.00
Non-Metro Rider parking fees	\$8.25 - \$25.00
Others Face	
Other Fees	

- Bicycle locker rental

\$200.00 (annual)

<sup>&</sup>lt;sup>1</sup> Regular fares are in effect from opening through 9:30 a.m., from 3:00 to 7:00 p.m. Monday through Friday, and from midnight until closing Friday and Saturdays nights, except on national holidays.

<sup>&</sup>lt;sup>2</sup> Peak-of-the-peak hours are from 7:30 a.m. to 9:00 a.m. and from 4:30 p.m. to 6:00 p.m.

<sup>&</sup>lt;sup>3</sup> Reduced fares are in effect from 9:31 a.m. through 2:59 p.m. and from 7:01 p.m. until closing, Monday through Thursday. Reduced fares are also in effect from 7:01 p.m. until 11:59 p.m. on Fridays and apply all day Saturday (except for midnight to close), Sunday, and national holidays.

<sup>&</sup>lt;sup>4</sup> Metro's portion of the Transit Link Cards on VRE, MARC and MTA.

<sup>&</sup>lt;sup>5</sup> MetroAccess fare is twice the equivalent fixed route fare.

Table 3.6 Transit Pass Program

# **Metrobus Passes**

Weekly Metrobus Flash Pass	Valid for unlimited travel on regular Metrobus service during the designated seven-day period and valid for base fare towards Express fare.	\$15.00
Weekly Senior Metrobus Flash Pass	Valid for unlimited travel by eligible patrons on Metrobus during the designated seven-day period on regular and express service.	\$7.50
Weekly Disabled Metrobus Flash Pass	Valid for unlimited travel by eligible patrons on Metrobus during the designated seven-day period on regular and express service.	\$7.50

# **Metrorail Passes**

SmartStudent Pass (Monthly)	Unlimited travel on Metrobus and Metrorail for students under 19 years of age who live and attend school in the District of Columbia. Passes are accepted in the District as payment of regular fare.	\$30.00
Student SmarTrip <sup>®</sup> Card	Offered to students traveling primarily by bus to and from school. Initially sold for \$6.25, the price of ten school tokens. Token script must be presented and the card must be registered to the student. Each student will be limited to a single card. A lost card costs \$5.00 to replace. The card acts as a stored value card and will deduct a student fare with each ride. It can be used for student fares on both bus and rail.	\$7.50
One Day Pass	Valid for unlimited travel for one day. The pass is valid after 9:30 a.m. on weekdays and all day on Saturday, Sunday, and national holidays.	\$9.00
Weekly Short Trip Pass	Valid for trips costing up to \$3.05 during regular fare hours (a.m. opening - 9:30 a.m. and 3:00 p.m7:00 p.m. on weekdays, 2:00 a.m. to 3:00 a.m. Fridays and Saturdays). Good for any full fare trip at all other times. If a trip costs more than \$3.05 during regular fare hours, patrons must use the Exitfare machine to add the additional fare. The week starts with the first gate entry and includes the next six days.	\$30.35
Weekly Fast Pass	Valid for unlimited travel throughout the Metrorail system. The week starts with the first gate entry and includes the next six days.	\$45.00

Table 3.7 Other Fare Products and Policies

SmarTrip <sup>®</sup>	A re-usable contactless smart card which is designed for long-term use on Metrorail, Metrobus, and Metro Parking. Functions similar to a regular farecard. Sold for \$5 and when registered can be replaced with existing value if lost or stolen. The card will hold a maximum of \$300.00.
Senior Farecards	Available to qualified seniors (age 65 or older). A Metro senior ID card, or valid Medicare card and photo ID are required for purchase.
Disabled Farecards	Available to qualified people with disabilities. A MetroAccess Photo ID card, Metro Disabled ID card, or valid Medicare card and photo ID are required for purchase.
Student Farecards	Available for \$9.50 to qualified students at selected Metro Sales Outlets. The farecards are good for 10 rides within the District of Columbia.
MetroAccess Farecards	Five pre-encoded \$3.00 farecards packaged and sold to MetroAccess customers for \$15.00.
Pre-encoded Farecards	Sold through authorized sales outlets for \$10.00 and \$20.00.
Tokens/Regular	Regular adult tokens are on sale for all patrons at \$1.70 per token. Tokens are sold in packages of ten (10) at a cost of \$17.00. Note, bus-to-bus transfers are not allowed for bus trips paid with tokens.
Transit Link Cards	Fare media sold by MARC, VRE, and MTA, providing for monthly multi-modal travel valid for unlimited Metrorail and regular Metrobus during the month of issue. Passes may be used for Metrobus Express Service by paying an additional \$2.15 per boarding.
SmartBenefits®	Provides for the electronic delivery of monthly transit benefits from employers to employees and transit providers. Program is designed to deliver benefits as specified by the employer on monthly basis to the employees' designated SmarTrip® card. Vanpool participants are able to use this facility to designate their benefit to a van operator.
SmartBenefits® Vouchers	For use by transit benefit providers. Sold in denominations of \$1.00, \$10.00, and \$30.00. Vouchers contain no Metrorail value and are transferable only for the purchase of fare media from authorized transit providers or their sales agents.
Permit Parking	Monthly reserved program provides permit holders a guaranteed space on weekdays at a specified lot until 10:00 a.m. Reserved permits are sold for \$65.00 per month. Reserved parking patrons pay the established daily rate for the lot upon exit or entry. Reserved parking patrons (arriving before 10:00 a.m.) unable to find a reserved space may park at a parking meter but must pay the metered rate.
Early Opening and Late Closing for Special Events	Metro has established a fixed fee to be charged to event organizers based on the cost of operating the Metrorail system for early openings and late closings. The fee is adjusted periodically to reflect changes in operating costs. Event organizers make a deposit with Metro based on the number of additional hours of service requested; Metro reimburses the event organizer for any incremental passenger revenue that are collected, not to exceed the amount deposited.

# Allocation of State and Local Support

State and local funds account for approximately 40 percent of the funding for Metro's annual operating and capital budgets according to the approved subsidy calculation, described below.

### **Operating Budget**

The operating budget subsidy is allocated to the jurisdictional funding partners using six subsidy allocation formulas:

- 1. Regional bus subsidy allocation
- 2. Non-regional bus subsidy allocation
- 3. Rail maximum fare subsidy allocation
- 4. Rail base subsidy allocation
- 5. Paratransit subsidy allocation
- 6. Debt service allocation

# Formulas 1 and 2: Regional and Non-Regional Bus Subsidy Allocations

The Metrobus subsidy is allocated using two distribution formulas. All bus routes are classified as being either <u>regional</u> or <u>non-regional</u>, based on route characteristics. Regional bus routes generally provide transportation between jurisdictions. Regional bus routes may also include bus routes that serve major activity centers that operate on major arterial streets, and carry high volumes of riders either in one jurisdiction or in multiple jurisdictions. The following are the specific criteria used by the Regional Mobility Panel to classify bus routes.

- Inter-jurisdictional routes are defined as regional. Defining characteristics of inter-jurisdictional routes:
  - o Cross a jurisdictional (independent city, county, state) boundary;
  - o Penetrate at least two jurisdictions by more than one-half mile in each; and
  - Operate "open door" (allows boarding and alighting) over at least a portion of the line in two or more jurisdictions
- If a route does not qualify as regional under the inter-jurisdictional definition, then it must meet at least two of the following three criteria to be regional:
  - Arterial Streets: Operates for a considerable distance on an arterial street and a substantial portion (usually a majority) of riders use stops on the arterial street. Routes which operate for a short distance on an arterial incidental to their service area are not included
  - O Regional Activity Center: Serves one or more regional activity centers. A conservative definition of regional activity centers is used, including only those where there is virtually universal agreement as to their regional character. Routes which feed Metrorail stations, but which do not directly serve any regional activity center, are not considered to be regional
  - o Cost Effectiveness: Annual boarding's per annual platform hour greater than 30 applied consistently in all jurisdictions

Routes which do not meet the criteria described above are classified as non-regional. Regional and non-regional bus subsidy is allocated to the jurisdictions using the following formulas.

• **Regional Bus Subsidy Allocation**. The distribution of regional bus subsidy to the jurisdictions is based on a weighted, four-factor formula in the following proportions:

1.	Density weighted population	25%
2.	Revenue hours	25%
3.	Revenue miles	35%
4.	Average weekday ridership	15%

Density weighted population is determined by taking the urbanized area population distribution for the compact area (50 percent weighting) and combining that with the weighted population density (urbanized population divided by area). Basically, the formula prorates the urbanized population distribution by people per square mile.

The revenue hour's factor is determined by taking the annual revenue hours assigned to each jurisdiction divided by the total regional revenue hours. The revenue miles factor is determined by taking total revenue miles (end-of-year schedule) assigned to each jurisdiction divided by the total regional revenue miles. Ridership is determined by taking the average weekday ridership (month of May sample) for each jurisdiction divided by the total average weekday ridership.

- **Non-Regional Bus Subsidy Allocation**. The distribution of non-regional bus subsidy to the jurisdictions is computed as follows:
  - 1. Identify the costs of all Metrobus service, regional and non-regional.
  - 2. Identify the costs which would accrue for regional Metrobus service if no non-regional bus service were provided.
  - 3. Determine the costs of non-regional service by subtracting the regional Metrobus costs from the costs of all Metrobus service.
  - 4. Divide the costs of non-regional service as computed in step three by total platform hours for non-regional service.
  - 5. Identify the non-regional platform hours for each jurisdiction.
  - 6. Multiply the platform hours for each jurisdiction by the hourly rate.
  - 7. Determine the revenue for each jurisdiction.
  - 8. Subtract from costs the revenue as determined in step seven.

### Formulas 3 and 4: Rail Maximum Fare and Base Subsidy Allocations

The rail subsidy consists of two components: the maximum fare component and the base rail component. The total maximum fare subsidy is deducted from the total rail subsidy, and the result is allocated based on the base subsidy formula.

• Maximum Fare Subsidy Allocation. The maximum fare portion of the rail subsidy is designed to recognize the "taper" and "cap" features of the Metrorail fare structure. The taper feature is reflected in the diminishing cost per mile for trips greater than six miles, and the cap is reflected in the maximum fare of \$5.00. The subsidy for the maximum fare is calculated as the difference between the regular fare that would have been paid if the taper and cap features were not available, and the actual fare paid with the taper and cap.

Once the maximum fare subsidy is calculated, the benefiting jurisdictions are allocated one-half the calculated amount, based on the percent of riders from the individual jurisdiction who benefit from the taper and cap. These percentages are calculated from the data taken from the Metrorail Passenger Survey. The remaining half of the maximum fare subsidy is incorporated into the rail base subsidy.

• Rail Base Subsidy Allocation. The base subsidy allocation for Metrorail service is based on three elements in equal proportions:

1.	Density weighted population	33.3%
2.	Number of rail stations	33.3%
3.	Average weekly ridership	33.3%

Density weighted population is determined by taking the urbanized area population distribution for the compact area (50 percent weighted) and combining that with the weighted population density (urbanized population divided by area). This calculation is the same for the regional bus subsidy allocation as it is for the rail base subsidy allocation. The rail stations factor is calculated by taking the number of stations, or portions of stations, assigned to each jurisdiction, divided by the total number of stations in the system. Ridership is calculated by taking the system average weekday ridership (month of May sample) times the jurisdictional ridership distribution, as determined by the rail passenger survey. Only persons who reside in the compact area are included in the distribution.

#### Formula 5: Paratransit Subsidy Allocation

Paratransit subsidy is allocated to the jurisdictions using a two factor formula with suballocations used for the Virginia jurisdictions.

- 1. Direct Costs. The contract carriers' actual per trip, reservation and eligibility charges will be allocated directly to the jurisdictions.
- 2. Overhead Costs. All other (non-direct) costs of the paratransit program will be allocated in proportion to the direct costs.

Virginia sub-allocations of direct costs require that per trip charges be adjusted to reflect the average time of trips provided for each jurisdiction. Overhead costs assigned to Virginia jurisdictions will be sub-allocated based on the direct cost allocation as calculated above.

#### Formula 6: Rail Construction Debt Service Allocation

Debt service charges are allocated to the jurisdictions based on the rail construction formula for the Adopted Regional System, using data developed for the Proposed Financial Plan, August 1978. The local shares remain as set forth in the Ancillary Bond Repayment Agreements, and were not revised as the data used for the rail construction was updated.

### Capital Budget

Metro's jurisdictional partners support the capital budget by providing the required local match on federal formula grants, federal dedicated funding, and federal discretionary funding, and by providing "system performance funds" which allows Metro to have a larger capital budget than would otherwise be possible with only federal funding and required local matches. The allocation of this support (both the match and the system performance funds) to the specific jurisdictions is governed by the Capital Funding Agreement which was adopted by the local jurisdictions and the Metro Board of Directors in June 2010.

Under the terms of the Capital Funding Agreement, each jurisdiction's percent contribution, as determined by the formula used to compute the Metro FY2011 capital budget, will be recalculated every three years to reflect the then-current proposed Operating Budget allocation and applied prospectively to the three subsequent Annual Work Plans. The FY2011 Operations Allocation formula allocated Metrobus, Metrorail, Paratransit, and Dedicated Funding costs as follows:

- The Rail allocation formula will apply to Rail projects and debt issued for Rail projects
- The Bus allocation formula will apply to Bus projects and debt issued for Bus projects
- The Paratransit formula will apply to Paratransit projects and debt issued for Paratransit projects
- An average of the Rail and Bus allocation formulas will apply to general financing expenditures and for project expenditures that cannot be allocated to Rail, Bus, or Paratransit
- Dedicated Funding projects will be divided equally among the District of Columbia, State of Maryland, and Commonwealth of Virginia subject to the provisions of the various

state laws establishing dedicated funding sources to match federal funds made available under the Passenger Rail Investment and Improvement Act (PRIIA) of 2008

### Capital Grants

Federal grants support the Capital Improvement Program (CIP) and have expedited the initiation of additional projects through the American Recovery and Reinvestment Act of 2009 (ARRA) and the Passenger Rail Investment and Improvement Act of 2008 (PRIIA). Annual, PRIIA, and ARRA grants have been allocated to Metro primarily through long-standing federal formulas. For the formula allocation, annual and PRIIA grants require a match while ARRA grants are fully funded by the Federal government. Additional federal support for the CIP comes from the discretionary earmark related to the Largo Full Funding Grant Agreement and from federal highway funds flexed to FTA on behalf of the Commonwealth of Virginia.

#### **FY2012 Subsidy**

The FY2012 subsidy projection is \$693.2 million, an increase of \$72.5 million over the FY2011 level. This includes:

- The FY2012 subsidy for Metrobus, Metrorail, and MetroAccess is \$627.9 million
- Debt service payments are budgeted at \$48.7 million
- The FY2010 carry-forward is \$16.6 million

#### **Debt Service**

In October 2003, Metro issued \$163.5 million of Gross Revenue Transit Refunding Bonds, Series-2003, to refund the callable portion of Metro's outstanding Gross Revenue Transit Refunding Bonds, Series-1993. The final maturity for the 1993 bonds was in FY2011. The annual jurisdictional debt service payment on the 2003 bond series is \$27.5 million and the final maturity is in FY2015.

In November 2003, Metro issued \$35.6 million of Gross Revenue Transit Bonds, Series 2003-B. The bonds provided for semi-annual payments of interest and annual principal payments, and the final maturity was in FY2011. The proceeds of the bonds were used to accelerate the vertical transportation modernization program. The vertical transportation modernization program is an integral part of Metro's Capital Improvement Program designed to provide for system-wide escalator maintenance, escalator rehabilitation and elevator rehabilitation. The terms of the new bond issuances are set forth in the Gross Revenue Transit Bond Refunding Resolution and Official Statement.

In June 2009, Metro issued \$243.0 million of Gross Revenue Transit Refunding Bonds, Series 2009-A and \$55.0 million of Build America Bonds, Series 2009-B. Bond proceeds net of premiums/discounts totaled \$309.9 million. The bonds provide for semi-annual payments of interest and annual payments of principal, with final maturity in July 2034. The net annual jurisdictional debt service payment on the bonds is \$21.0 million, reflecting an annual credit of \$1.4 million for the Series B, Build America Bonds. Five jurisdictions opted out of the bond issuance and provided \$115.0 million in funding to bring total proceeds related to the bond issuance to \$425.0 million.

Metro previously maintained a \$330 million commercial paper program to provide funds for the Metro Matters Program. Payment of all maturing commercial paper was guaranteed by an irrevocable letter of credit. In June 2009, Metro retired the \$330.0 million commercial paper program. At the time of bond settlement commercial paper outstanding totaled \$314.5 million. All proceeds from the Series 2009-A Bond issuance and a portion of the proceeds from the jurisdiction opt out were utilized to retire the commercial paper. The remaining \$107.5 million from the jurisdiction opt out and Series 2009-B proceeds will finance non-complete Metro Matters capital projects.

During FY10 Metro increased its line of credit availability from \$250 million to \$300 million. The lines of credit may be used to fund operating and capital cash flow needs. In addition, during FY10 Metro secured a six-year credit facility for \$300 million, specifically to support the procurement of the 7000 Series rail cars.

Metro is required to make semi-annual payments of principal and interest on each Series of Bonds. There are certain covenants associated with these outstanding bonds with which Metro must comply. The most significant are:

- Metro must punctually pay principal and interest according to provisions in the bond document
- Except for certain instances, Metro cannot sell, mortgage, lease or otherwise dispose of transit system assets without filing a certification by the General Manager and Treasurer

- with the Trustee and Bond Insurers that such action will not impede or restrict the operation of the transit system
- Metro must at all times maintain certain insurance or self-insurance covering the assets and operations of the transit system

#### Debt Policy/Metro's Borrowing Powers

As per Metro's Compact, Metro may borrow money in pursuit of its mission. All such bonds and evidences of indebtedness are payable solely out of the properties of revenues of Metro. The bonds and other obligations of Metro, except as may be otherwise provided in the indenture under which they were issued, are direct and general obligations of Metro and the full faith and credit of Metro are pledged for the prompt payment of the debt service.

#### New Capital Bonds

The Capital Improvement Program (CIP) is a six-year program (FY2012-FY2017) for \$5.0 billion. To support the CIP, long-term borrowing maybe required. This borrowing is not anticipated to happen until FY2013. See Tables 3.13 for projected debt strategy, Table 3.14 for projected debt issuances, and Table 3.15 for projected jurisdictional contribution.

Table 3.10 provides a summary of Metro's gross revenue refunding bonds and gross revenue transit bonds.

<sup>\*</sup>Projected debt will be utilized for Rail projects; the Rail jurisdictional funding allocation percentages have been utilized in these calculations.

Debt Assumptions

1. Issuance costs are assumed to equal a fixed \$650,000 payment plus 0.75% of the par value of the issuance.

Debt Assumptions

1. Debt maturity is assumed to be 25 years.

2. Principal repayment structure is based on 14.5 year average age of debt.

3. Issuance costs are assumed to equal a fixed \$650,000 payment plus 0.75% of the par value of the issuance.

#### **Grants**

In FY2011, Metro entered a new era in grant funding with the addition of \$150 million in Federal funds accompanied by \$150 million in dedicated local match funds. With the Federal annual formula allocations, grant funding for the FY2012 capital program will approach \$400 million or over half of the total budget for the Capital Improvement Program (CIP). During Metro Matters, grant funding remained below \$275 million per year and less than half of the budget.

In FY2012, Metro will continue to pursue smaller federal grants that are awarded through competition or regional cooperation. Numerous grant-funded projects will be ongoing in FY2012 for capital and operational security enhancements.

#### **Operating Grants**

Additional funding for the operating budget may be awarded through competitive or cooperative grants. Currently, Metro is pursuing funding to enhance operations through grants, within the Departments of Access Services and Metro Transit Police. Both departments participate in regional planning organizations for their respective disciplines. The regional planning bodies cooperatively establish priorities for grant funds that are allocated to the region from federal agencies. With the assistance of the Grants Management Branch in the Office of the Treasurer, Metro creates grant applications in order to compete for a portion of the federal awards granted to the National Capital region.

# Capital Grants

Federal grants support the CIP and have expedited the initiation of additional projects through the American Recovery and Reinvestment Act of 2009 (ARRA). Annual and ARRA grants have been allocated to Metro primarily through long-standing federal formulas. For the formula allocation, annual grants require a match while ARRA grants are fully funded by the federal government. Additional federal support for the CIP comes from federal highway funds flexed to FTA on behalf of the Commonwealth of Virginia.

#### Local Match Requirements

Matching funds requirements for grants varies by grantor, program, and purpose. Federal Transit Administration (FTA) formula grants require matching funds for 20 percent of the cost and PRIIA grants require matching funds for 50 percent of the cost. The ARRA allocation is an exception where formula funds require no matching funds. Competitive grants from FTA require zero to 20 percent local match. Security grants, which fund both capital and operating activities, usually require no local share.

### FTA GRANTS (AUTHORIZED BY U.S.C. 49)

#### **Formula**

# • Large Urbanized Area Formula Grant Program (Section 5307)

- Capital Improvement Program activities include but are not limited to planning, engineering, bus and rail vehicle purchase and rehabilitation, construction of maintenance and passenger facilities, rail track, signals, communications acquisitions and upgrades, and preventive maintenance.
- Some Americans with Disabilities Act complementary paratransit service costs are considered capital costs under 5307.
- At least one percent of the funding apportioned to each area must be used for transit enhancement activities (i.e. historic preservation, landscaping, public art, pedestrian access, bicycle access, and enhanced access for persons with disabilities)

# • Rail Modernization and Fixed Guideway (Section 5309)

Capital improvement projects may include modernization and improvement of rail and bus fixed guideway systems (i.e. purchase and rehabilitation of rolling stock, track, line equipment, structures, signals and communications, power equipment and substations, passenger stations and terminals, security equipment and systems, maintenance facilities and equipment, operational support equipment, computer hardware and software, system extensions, and preventive maintenance).

# Dedicated Funding

#### • Passenger Rail Investment and Improvement Act of 2008 (P.L. 110-432)

The Federal FY2010 appropriation requires that Metro place highest priority on "investments that will improve the safety of the system, including but not limited to fixing the track signal system, replacing the 1000 series cars, installing guarded turnouts, purchasing equipment for the wayside worker protection, and installation of rollback protection on rails cars lacking this upgraded safety feature.

#### Competitive

- Job Access and Reverse Commute program (JARC) (Section 5316) and New Freedom (Section 5317)
  - o Provides funding for six trainers to deliver two-week long intensive training courses for using transit
- Research, Development, Demonstration, and Deployment Projects (Section 5312)
  - Energy Storage Demonstration Program for Rail Transit Vehicle Operation will
    examine the feasibility and cost-effectiveness of installing an energy storage system
    capable of using regenerated brake energy

#### AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009 (ARRA)

#### Formula

- ARRA Transit Capital Assistance
  - o Funds were allocated according to the formula for Section 5307 funds
  - o ARRA projects are subject to the same eligibility requirements as the projects funded by annual appropriations under Section 5307
  - o One-percent of the grant must be spent on transit enhancements
- ARRA Fixed Guideway Infrastructure Improvement
  - There are seven tiers within Section 5309 for funding allocation. Due to insufficient funding only tiers one, two, three and four received allocation. ARRA projects are subject to the same eligibility requirements as the projects funded by annual appropriations under Section 5309

#### **SECURITY GRANTS**

- Competitively awarded by the Department of Homeland Security based on cooperatively determined regional security priorities:
  - Transit Security Grant Program (TSGP) is funding enhancement of the alternate operations control center coupled with surveillance on bus and rail among other projects
  - o Urbanized Area Security Initiative (UASI) funds are enhancing communications systems that are shared among Metro and other emergency responders in the region

# Chapter IV. Operating Budget

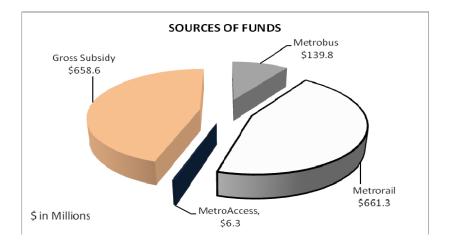

This chapter provides information on Metro's three primary services – Metrobus, Metrorail and MetroAccess. Operating expenses, anticipated revenues, and subsidy are provided for each service. Operating expenses for each service include its share of administrative costs. More specific department-by-department data is provided in Chapter V.

All of Metro's expenditures are allocated to the Metro Bus, Rail, Access modes, the capital budget, or the reimbursable budget. This chapter presents revenues and expenditures for the Bus, Rail, and Access modes.

# Sources and Uses of Funds by Mode Operating Budget Fiscal Year 2012 Proposed: \$1.5 Billion

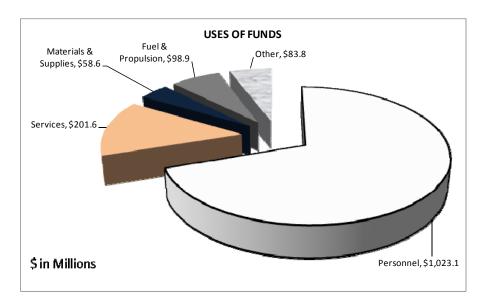

#### Where it Comes From

The largest source of funding comes from Metrorail, \$661.3 million or 45 percent. The majority of the Metrorail revenue is from passenger revenue. Jurisdictional subsidies are the second largest source of total revenue. The gross subsidy is \$658.6 million or 44.9 percent. For FY2012, \$716.2 million or 48.9 percent of funds is projected to come from passengers.

#### Where it Goes

Personnel costs make up the largest operating budget expenditure category at \$1,023 million or 69.8 percent followed by Services with expenses totaling \$201.6 million or 13.7 percent.

Note: Excludes Reimbursable Operating Projects

For the period from FY2009 to FY2012, total passenger revenue continues to be the main source of revenue growing by \$87.4 million or 13.9 percent. Gross subsidy grew by \$57.3 million or 10.1 percent in FY2010, by \$8.3 million or 1.3 percent in FY2011, and by \$25.9 million or 4.1 percent for FY2012.

Personnel costs for the operating budget are projected to increase by \$11.3 million or 1.1 percent in FY2012 over FY2011 amount to \$1.02 billion. These cost increases are driven by a combination of union contract increases and changes in staffing levels. Service expenses have grown by \$13.0 million, or 7.1 percent, in FY2012 over the FY2011 to amount of \$201.6 million. These increases are due mainly to the additional demand and costs for the paratransit service.

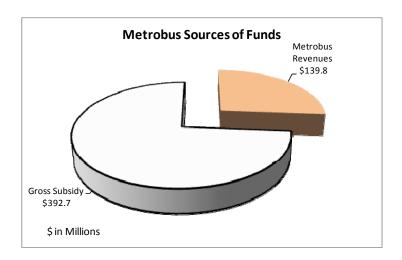

# Operating Budget by Mode: Metrobus

# Metrobus Fiscal Year 2012 Proposed: \$532.5 Million

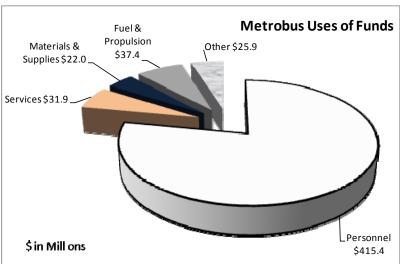

#### Where it Comes From

For the FY2012 Proposed Budget, Metrobus is funded mainly by gross subsidy of \$392.7 million, or 73.7 percent, of total expenditures.

#### Where it Goes

Personnel expenses make up the largest portion of the budget at \$415.4 million, or 78 percent, for FY2012.

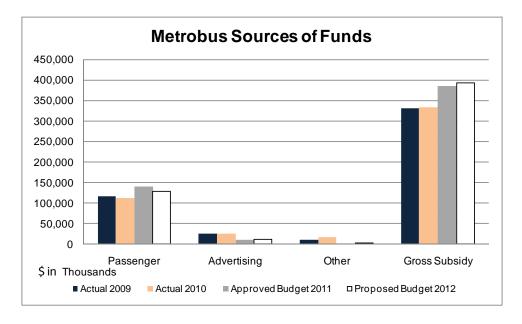

Note: Excludes reimbursable operating projects

Gross subsidy is the main source of funding for Metrobus. Subsidy grew by \$52.2 million or 15.6 percent in FY2011 and is projected to increase by \$6.6 million or 1.7 percent in FY2012.

Personnel costs grew in the operating budget by \$25.5 million or 6.6 percent in FY2011 and are projected to grow by \$1.7 million or 0.4 percent in FY2012. Services grew by \$9.0 million or 39.5 percent in FY2011 and are projected to grow by \$65,000 or 0.2 percent in FY2012. Materials and Supplies grew by \$2 million or 6.6 percent in FY2011; they are projected to decrease by \$7.6 million or 2.6 percent in FY2012. Other expenses remain relatively flat.

# Operating Budget by Mode: Metrorail

# Metrorail Fiscal Year 2012 Proposed: \$813.9 Million

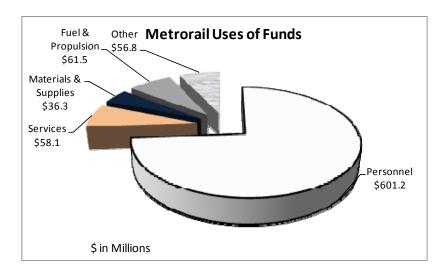

#### Where it Comes From

Revenues from Metrorail of \$661.3 million are the main source of funding, the largest of which is passenger revenues. The gross subsidy is 19 percent of expenditures.

#### Where it Goes

Personnel expenses make up the largest portion of the budget at \$601.2 million, or 73.9 percent, for FY2012.

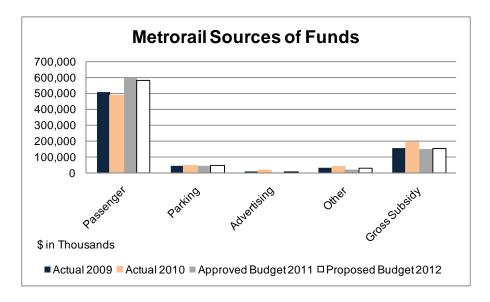

Note: Excludes reimbursable operating Projects

- Passenger revenue continues to be the main source of revenue, \$578.2 million in FY2012.
- The projected subsidy for FY2012 is \$152.6 million, an increase of \$3.9 million, mainly due to slower passenger revenue growth.

- Personnel costs in the operating budget grew by \$18.3 million or 3.2 percent in FY2011 and are projected to grow by \$7.9 million or 1.3 percent in FY2012.
- Other areas with significant variances were:
  - o Material and Supplies with an decrease of \$14.3 million or 26.2 percent in FY2011 and a projected decrease of \$4 million or 9.8 percent in FY2012
  - Casualty and Liability Insurance grew by \$6.9 million or 37.9 percent in FY2011 and is expected to decline by \$9.3 million or 37.1 percent in FY2012 due to a decrease in projected claims

# Operating Budget by Mode: MetroAccess

# MetroAccess Fiscal Year 2012 Proposed Budget: \$119.6 Million

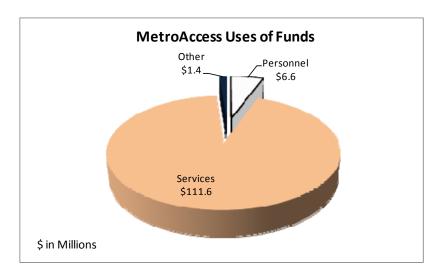

#### Where it Comes From

For FY2012, MetroAccess is funded mainly by gross subsidy of \$113.3 million, or 94.8 percent, of the proposed budget.

## Where it Goes

For FY2012, the majority of the budget is related to the paratransit services contract with MV Transportation. Services are expected to be \$111.6 million, or 93.3 percent, of the budget.

Note: Excludes reimbursable operating projects

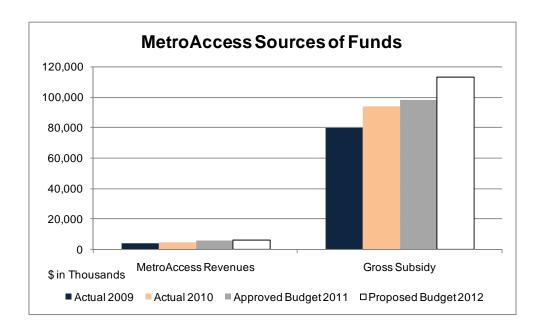

IV-15

# Chapter V. Department Budgets

This chapter provides goals, objectives, staffing and line-item budgets for each department in the Proposed Fiscal Year 2012 Operating Budget.

Note: Historical data (FY2009-FY2010) presented may not accurately reflect the departments' previous budget/actual due to corporate reorganization. This does not affect the overall total for Metro.

In the following tables displaying "operating cost by *mode*," mode and operating unit are synonymous.

## **Budget Tables**

Each department description is followed by two budget tables.

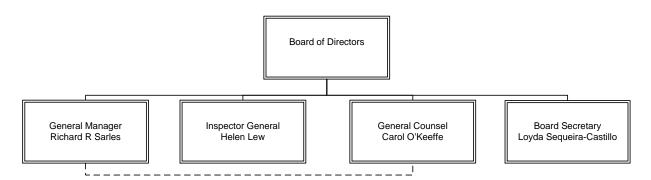

## **Multi-year Operating Expense**

This table presents the department's personnel and non-personnel proposed expense budget for FY2012. It also provides actuals for FY2010 and Approved Budget for FY2011.

## **Operating Expense by Mode**

This table presents the department's proposed expense budget for FY2012 by the three operating modes, Bus, Rail and MetroAccess. Discretionary cost reductions are decreases from the department's initial budget request.

## **Independent Offices**

## **General Manager**

(Dollars in Thousands)	Actual <u>2010</u>	Approved Budget <u>2011</u>	Proposed Budget FY2012	\$ Change	<u>Variance</u>
PERSONNEL COST	\$1,287	\$1,273	\$1,142	(\$131)	-10.3%
NON-PERSONNEL COST	333	329	310	(19)	-5.8%
TOTAL COST	\$1,620	\$1,602	\$1,452	(\$150)	-9.4%
BUDGETED POSITIONS	6	8	7	-1	-12.5%

## **Description**

The General Manager serves as the chief executive officer for Metro, overseeing the operation of a fleet of 1100 trains, 1500 buses, and over 600 MetroAccess vehicles in Virginia, Maryland and the District of Columbia, providing nearly 1.2 million trips each day. In support of the nation's second largest rail transit system and sixth largest bus network, the General Manager is responsible for directing an annual \$1.5 billion operating budget and a six year capital budget of \$5 billion. The General Manager also oversees a workforce of more than 10,000 employees.

Since being appointed Interim General Manager on April 3, 2010, Richard Sarles has set the agency on course to improve safety, customer service reliability, and financial stability. He has led the agency toward an improved safety culture and open communication including strengthening the safety department, expanding training agency-wide, establishing a new Roadway Worker Protection program, creating a safety hotline, enhancing the Whistleblower Protection policy, as well as establishing a new employee safety recognition program. Under his leadership, Metro achieved a six year capital funding agreement and reestablished a capital management program. Metro's \$5 billion six-year capital improvement program is dedicated to improving safety, customer reliability and state-of good repair. To enhance transparency and

public accountability, the General Manager established an online *Vital Signs* performance measurement system.

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

The General Manager's department reduced headcount by one resulting in a decrease in personnel expenses.

## **Inspector General**

(Dollars in Thousands)	Actual <u>2010</u>	Approved Budget <u>2011</u>	Proposed Budget <u>FY2012</u>	\$ Change	<u>Variance</u>
PERSONNEL COST	\$3,091	\$3,127	\$3,131	\$4	0.1%
NON-PERSONNEL COST	295	402	367	(35)	-8.7%
TOTAL COST	\$3,386	\$3,529	\$3,498	(\$31)	-0.9%
BUDGETED POSITIONS	29	29	29	0	0.0%

## **Description**

The Office of Inspector General (OIG) is an independent office that reports to the Metro Board of Directors. OIG is modeled after the Federal Office of Inspector General to advance Metro's goals of accountability and transparency. OIG conducts audits, program evaluations, and investigations of Metro operations and activities, while keeping the Board fully informed about any deficiencies or fraud identified, as well as the necessity for and progress of corrective action.

## **Mission Statement**

The Office of Inspector General (OIG) supervises and conducts independent and objective audits, investigations, and other reviews of the Washington Metropolitan Area Transit Authority's programs and operations to promote economy, efficiency, and effectiveness, as well as to prevent and detect fraud, waste, and abuse in its programs and operations. OIG provides advice to the Board and General Manager to assist in achieving the highest levels of program and operational performance in Metro.

#### **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

Materials and Supplies costs were reduced based on lower printing costs. OIG also reduced travel related expenses.

#### **Cost Reductions**

OIG reduced contract maintenance costs based on its contractual obligations.

## **General Counsel**

(Dollars in Thousands)	Actual <u>2010</u>	Approved Budget <u>2011</u>	Proposed Budget <u>FY2012</u>	\$ Change	<u>Variance</u>
PERSONNEL COST	\$4,508	\$4,528	\$4,628	\$100	2.2%
NON-PERSONNEL COST	12,630	996	943	(53)	-5.3%
TOTAL COST	\$17,138	\$5,524	\$5,571	\$47	0.9%
BUDGETED POSITIONS	40	40	41	1	2.5%

## **Description**

The role of the office of General Counsel (COUN) is not only to protect Metro's legal interests, but to serve as a pro-active problem-solving and problem-avoidance resource for Metro's policymakers and managers. COUN's organizational structure has been developed specifically to meet these objectives and to provide an effective mechanism for providing required legal services at the lowest possible cost.

#### **Mission Statement**

The mission of the General Counsel is to plan, direct, and provide substantially all of the legal services provided to Metro.

#### The Office of General Counsel:

- Renders legal advice on procurement/contractual matters
- Prepares agreements between Metro and public or private organizations
- Actively participates in the joint development process
- Defends Metro in litigation
- Renders legal advice on specific policy and operational matters
- Interprets Metro's Compact
- Assists in the acquisition and sale of real property
- Provides day-to-day legal advice to Metro's Board of Directors, officers, and managers on a wide range of issues
- Renders legal advice on employment matters

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

Budgeted expenses for the General Counsel reflect a slight year over year increase due to increased costs of continued services.

## **Discretionary Cost Reductions**

General Counsel decreased the expense budget of its initial request for Professional and Technical Services, reducing its use of outside counsel and consultants for litigation.

## **Board Secretary**

(Dollars in Thousands)	Actual <u>2010</u>	Approved Budget <u>2011</u>	Proposed Budget <u>FY2012</u>	\$ Change	<u>Variance</u>
PERSONNEL COST	\$409	\$410	\$425	\$15	3.6%
NON-PERSONNEL COST	153	157	147	(11)	-6.7%
TOTAL COST	\$562	\$567	\$571	\$4	0.7%
BUDGETED POSITIONS	5	5	5	0	0.0%

## **Description**

The Office of the Secretary (SECT) is an independent office that reports to the Metro Board of Directors. SECT is responsible for the coordinating, reviewing and distributing of Metro Board materials; recording and maintaining official records of Board actions and resolutions at meetings; publishing legal notices and arranging public hearings approved by the Board; working proactively with the General Manager and his staff to carry out the policies, goals and initiatives of the Metro Board; and serving as liaison between the Board, the Riders' Advisory Council, Metro, and its riders.

#### **Mission Statement**

The mission of the Office of the Secretary is to provide high-quality, comprehensive and administrative support services to the Metro Board of Directors; including responsive, accurate and timely guidance to the Board, the Riders' Advisory Council, and Metro staff with a focus on accountability, transparency, regionalism and customer value.

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

Budgeted expenses for the SECT increased at a rate slightly less than the cost of inflation.

## **Discretionary Cost Reductions**

SECT reduced subscriptions and dues, meetings, and travel related expenses.

## **Description**

The Department of Bus Services operates bus service in the District of Columbia, Maryland and Virginia on over 320 routes within a 1,500 square mile area. As of November 2010, Metrobus fleet was comprised of 1,491 buses serving 11,750 bus stops and an average weekday ridership of over 400,000. Department of Bus Services is responsible for all functions of bus service including operations, fleet maintenance, scheduling, and planning. In addition, Department of Bus Services manages the DC Circulator contract. The Department of Bus Services has a staff of 3,920 positions.

#### **Mission Statement and Objectives**

The Department of Bus Services supports WMATA's mission adopted by the Board of Directors on September 30, 2010 which states: "Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area."

The Department of Bus Services supports all five agency goals and twelve supporting objectives listed in WMATA's Strategic Framework. To track progress towards these goals and objectives, Department of Bus Services reports on the following set of key performance indicators in the monthly Vital Signs Report:

- Bus On-Time Performance
- Bus Fleet Reliability
- Passenger Injury Rate
- Employee Injury Rate
- Customer Comment Rate

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

Services increased due to higher costs for the maintenance of cameras and the Trapeze system. Reduction in Material and Supplies is related to the capitalization of bus parts.

## **Discretionary Cost Reductions**

Bus Services is conducting additional training to improve schedule optimization. In time, this schedule optimization will decrease overtime expenses. Bus Services is also working with the Human Resources department to increase its recruiting efforts for bus operators.

Table 5.9

## **Description**

The Deputy General Manager Operations (DGMO) directs the daily operation of the Metrorail, MetroAccess, and Elevators and Escalators; and manages the Metro Capital Improvement Program (CIP) which includes infrastructure renewal, engineering, and design.

## **Mission Statement and Objectives**

The Deputy General Manager's office supports Metro's mission adopted by the Board of Directors on September 30, 2010 which states: "Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area."

The Deputy General Manager's office supports all five agency goals and twelve supporting objectives listed in Metro's Strategic Framework. To track progress towards these goals and objectives, the Deputy General Manager's office reports on the following set of key performance indicators in the monthly Vital Signs Report:

- Rail On-Time Performance
- Rail Fleet Reliability
- MetroAccess On-Time Performance
- Escalator System Availability
- Elevator System Availability
- Passenger Injury Rate
- Employee Injury Rate
- Customer Comment Rate

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

The Office of Operations training was transferred from the Department of Rail to the Deputy General Manager's office, resulting in an increase in Personnel and Material and Supplies expenses for DGMO. The headcount transferred for training also includes headcount for students.

## **Description**

The Department of Rail Transportation (RAIL) provides rail service across 106 miles of track and 86 rail stations, 40 of which are in DC, 26 in Maryland and 20 in Virginia. The Department of Rail Transportation is responsible for all facets of rail operations including the train operators, operations control center, training, and scheduling.

## **Mission Statement and Objectives**

The Department of Rail Transportation supports Metro's mission adopted by the Board of Directors on September 30, 2010 which states: "Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area."

The Department of Rail Transportation supports all five agency goals and twelve supporting objectives listed in Metro's Strategic Framework. To track progress towards these goals and objectives, the Department of Rail Transportation reports on the following set of key performance indicators in the monthly Vital Signs Report:

- Rail On-Time Performance
- Rail Fleet Reliability
- Passenger Injury Rate
- Employee Injury Rate
- Customer Comment Rate

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

RAIL transferred the Office of Operations training to the Department of DGMO; as a result all related personnel expenses were transferred out of Rail and into DGMO.

## **Discretionary Cost Reductions**

RAIL reduced costs in the FY2012 budget that had been designated for re-printing of the Metrorail Handbook. The printing of the handbook is to be finalized in FY2011; accordingly, Material and Supplies costs for re-printing will not be incurred in FY2012.

## **Description**

The Department of Transit Infrastructure and Engineering Services (TIES) is responsible for maintenance of Metro's 106 miles of track, 86 stations, 1,118 rail cars, 588 station escalators and 237 station and parking garage elevators. TIES also manages the Metro Capital Improvement Program (CIP).

## **Mission Statement and Objectives**

The Department of Transit Infrastructure and Engineering Services (TIES) supports Metro's mission adopted by the Board of Directors on September 30, 2010 which states: "Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area."

The Department of Transit Infrastructure and Engineering Services supports all five agency goals and twelve supporting objectives listed in Metro's Strategic Framework. To track progress towards these goals and objectives, TIES reports on the following set of key performance indicators in the monthly Vital Signs Report:

- Rail On-Time Performance
- Rail Fleet Reliability
- Escalator System Availability
- Elevator System Availability
- Passenger Injury Rate
- Employee Injury Rate
- Customer Comment Rate

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

Cost reductions outlined below decreased the budget for personnel and non-personnel expenses. Contract Maintenance and Utilities increased according to cost of inflation.

## **Discretionary Cost Reductions**

Transit Infrastructure and Engineering Services reduced the projection for fuel and propulsion costs by \$6.8 million due to favorable market pricing. In addition, Labor and Material and Supplies expenses totaling \$9 million attributed to the Greenbelt Annex and Brentwood overhaul facilities were allocated to capital projects, decreasing the operating budget.

## **Description**

The Department of Access Services (ACCS) ensures the accessibility of public transportation including all Metro facilities and Metro-owned bus stops, vertical transportation, fixed-route transit, and equipment for people with disabilities and senior citizens. Access Services also administers Metro's Reduced Fare Program for people with disabilities and seniors, as well as the Free Ride Program for customers who are conditionally eligible for paratransit service. The department, through its three program offices, (ADA Programs, Eligibility Certification and MetroAccess Service), ensures the continuous improvement of all of Metro's accessible services and facilities. These improvements benefit the public and have important safety ramifications. Continually promoting and educating people with disabilities on the safe and independent use of Metro's accessible fixed-route services helps ensure that paratransit services are conserved for those individuals who truly need them.

## **Mission Statement and Objectives**

The Department of Access Services (ACCS) supports Metro's mission adopted by the Board of Directors which states: "Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area."

ACCS has also developed a department specific mission which states ACCS will ensure that:

- Metro's services are delivered
- Metro's personnel are trained
- Metro's equipment is maintained
- Metro's facilities are designed to provide safe, reliable, and accessible transportation to senior citizens and people with disabilities.

The Department of Access Services supports all five agency goals and twelve supporting objectives listed in Metro's Strategic Framework. To track progress towards these goals and objectives, ACCS reports on the following set of key performance indicators in the monthly Vital Signs Report:

- MetroAccess On-Time Performance
- Passenger Injury Rate
- Employee Injury Rate
- Customer Comment Rate

## **Proposed FY2012 Department Budget**

## **Adjustments from Approved FY2011 Budget**

Costs for services are expected to grow due to increases in ridership and the cost to provide the service.

### **Description**

The Office of Performance (CPO) furthers the use of performance information to guide decisions, to promote Metro's benefits in the region and to unify employees to accomplish the goals of the agency. This department also represents the organization in labor relation engagements which comprise of collective bargaining; providing guidance on Metro's policies and procedures which impact the unionized workforce; grievance arbitration representation; and all other labor relations responsibilities.

# **Mission Statement and Objectives**

The Office of Performance (CPO) supports Metro's mission adopted by the Board of Directors on September 30, 2010 which states: "Metro operates and maintains a safe, reliable and effective transit system that enhances mobility, improves the quality of life, and stimulates economic development in the Washington metropolitan area."

The Office of Performance supports all five agency goals and twelve supporting objectives listed in Metro's Strategic Framework. To track progress towards these goals and objectives, Office of Performance prepares the monthly Vital Signs Report and related presentations providing information on the following 12 performance measures:

- Bus On-Time Performance
- Bus Fleet Reliability
- Rail On-Time Performance
- Rail Fleet Reliability
- MetroAccess On-Time Performance
- Escalator System Availability
- Elevator System Availability
- Passenger Injury Rate
- Employee Injury Rate
- Crime Rate
- Arrests, Citations and Summons
- Customer Comment Rate

### **Proposed FY2012 Department Budget**

# **Adjustments from Approved FY2011 Budget**

Budgeted expenses for CPO decreased in services related to contracts for consulting services.

# **Discretionary Cost Reductions**

CPO has reduced the Dues and Subscriptions and Travel related expenses from its initial budget submission.

# **Description**

The Deputy General Manager of Administration and Chief Financial Officer (DGMA/CFO) is responsible for managing, developing, and administering the financial position and administrative functions of Metro, including the collection of revenues and other income, the disbursements of all payments, federal grants management, investment of funds, financing and borrowing, purchasing of all goods and services required by Metro, and accounting for financial transactions, assets, liabilities, payables, and receivables. In addition the department also develops the Capital Improvement Program (CIP) and Operating Budgets, manages expenditures, and calculates and bills local jurisdictions for their contributions. It is also responsible for the financial reporting to various outside agencies, as well as to the Board of Directors.

The department is also responsible for the strategic management and development of Information Technology (IT), Human Resources (HR), and Planning and Joint Development (PLJD) departments. HR is responsible for the proper management and deployment of staff resources, recruitment and talent management, performance management, and the overall development of the Human Resource Management Strategy. IT includes the implementation and development of the technology strategy for Metro, which will focus on aligning business and IT investments towards mission critical systems and the establishment of the overall structure for the governance and criteria for those investments. PLJD manages the Metro's long range planning and strategic framework that promote transit development, while linking Metro's long term capital investment to its goals.

# **Description**

The Department of Financial Services (CFO) is responsible for the financial integrity of Metro, including the collection of revenues and other income, the purchasing of all goods and services required by Metro, and accounting for the financial transactions of assets and liabilities. In addition, the CFO is also responsible for Federal grant management, as well as cash and risk management.

# Mission Statement and Objectives

The mission of Financial Services is to establish an integrated finance organization which turns around the current burdened transactional business model to a Value Analyzing Business Focus by connecting mission critical systems, workflow and processes which support the financial, administrative and operations of Metro.

This will result in creating a resource efficient organization, adding value by delivering quality service, maintaining and enhancing Metro's image, and retaining and recruiting the best and

brightest. An integrated organization will be effective in managing Risk Scenario's and the Development of Mission Critical Systems which support the goal of safety and operations.

The measures of Financial Services are linked to Metro's five strategic goals and related objectives. The strategic framework used to achieve these goals and their respective measures to assess progress are:

- Manage Metro's assets efficiently by completing the annual financial budget
- Receive guidance from the Board for the development of the FY2012 Operating and Capital budgets, present Proposed Budget to the Board by January 2011 and gain approval by June 30, 2011
- Manage agency assets by presenting to the Board a financial methodology to evaluate performance based upon return-on-investment and cost-benefit analysis, linking strategic goals to the day to day operations
- Target investments that generate revenue by identifying at least one new revenue generating initiative in FY2011
- Apply concepts and framework to use in development of performance objectives and targets:
  - o Simplify operations
  - o Integrate mission critical systems which support operations
  - o Establish standards in process and workflow
  - o Create leadership opportunities for employees
  - o Access resources, cross functional departments and outside experts
  - o Provide cross function and specialized training and development
  - o Be responsive to the customer
  - Get connected to the customer
  - o Develop appropriate performance measures and mitigate and analyze risk

#### **Proposed FY2012 Department Budget**

#### Adjustments from Approved FY2011 Budget

CFO budget reductions, related to casualty and liability, are partially offset by increases in services related to third party risks.

#### **Discretionary Cost Reductions**

The Claims budget is based on the most recent actuarial report. Additionally, travel related expenses are reduced.

# **Description**

The Department of Information Technology (IT) ensures that Metro has the technical infrastructure required to support continuous safety and operational improvements as well as the tools to communicate more effectively with our riders.

# **Mission Statement and Objectives**

The mission of IT is to serve as a strategic asset for Metro as it embarks on its mission.

The Department of Information Technology's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goals in which IT Services will play a role of material support are: Deliver Quality Service and Use Every Resource Wisely. IT will support these goals by:

- Assuring that Metro's website aids external and internal customers, as well as, supporting the SmarTrip® website
- Provide IT infrastructure that supports Metro's mission and implement standards for hardware and software utilities
- Improve the use of technology throughout Metro
- Maintain Geographic Information System for the Washington Metropolitan area
- Safeguard Metro's IT system
- Manage and implement ongoing IT projects

# **Proposed FY2012 Department Budget**

### **Adjustments from Approved FY2011 Budget**

The FY2012 Proposed Budget adds 99 positions for capital and reimbursable projects and adds a net of one position to the operating budget. The proposed budget also decreases Contract Maintenance and increases Materials and Supplies.

### **Description**

The Department of Human Resources (HR) provides:

- Strategic human capital management guidance and administration
- Talent acquisition planning, employee relations and workforce planning
- Organizational development, training, succession planning and performance management
- Medical services and regulatory compliance
- Workforce diversity and compliance
- Policy development and change management
- Compensation and benefits program administration and services
- HR information systems and services

# **Mission Statement and Objectives**

The Human Resources Department develops and sustains programs, policies, and strategies which enhance organizational effectiveness and maximize the potential of the organization and employees to advance the mission, goals and objectives of Metro. We support and promote a workplace that fosters respect, trust, equity, diversity, personal and professional development, and collaboration.

The Department of Human Resources' goals are linked to Metro's five strategic goals. The applicable departmental goals are: Create a Safer Organization, Deliver Quality Service, Use Every Resource Wisely, Retain and Attract the Best and Brightest, and Maintain and Enhance Metro's Image. The specific initiatives linked to the strategic goals are:

- Implement and manage Metro's commitment to the principles of equal opportunity, affirmative action, and equal access in a discrimination-free environment including compliance with Title VI and Title VII and other employment laws and requirements
- Plan and develop a Suicide Prevention Program designated to reduce incidents of suicide through awareness training of front-line employees and other focused outreach efforts
- Address transit operator vacancy gap through enhanced recruitment strategies
- Conduct and complete salary system assessment and develop recommendations as a baseline for strategic plans for the pay system
- Support Metro's staffing needs via external recruitment and the internal competitive job bidding process
- Review and update human resource policies and procedures to align with industry best practices and reflect Metro's strategic goals and objectives
- Provide essential leadership and support to the Human Resources systems and program elements of the Integrated Financial Organization (IFO) Project
- Assess, frame and implement a mission-focused employee training and development program
- Review medical evaluations and clearance processes with special emphasis on preemployment physicals, train operators recertification and revised compliance standards per Department of Transportation/Federal Transportation Administration recommendations

### **Proposed FY2012 Department Budget**

# **Adjustments from Approved FY2011 Budget**

The minor year over year decrease in HR is related to cost allocation of indirect departments.

Table 5.25

<sup>\*</sup>In FY2011, Parking was moved to this department. FY2010 actual cost shown above reflects this change, however, FY2010 headcount shown above, does not reflect the impact of the reorganization.

### **Description**

The Department of Planning and Joint Development (PLJD) is responsible for:

- Developing transit and land development plans and studies that advance the Metro mission
- Executing mobility improvements through participation in regional and local planning activities
- Planning studies and technical analyses to identify, evaluate, and advance transit improvement projects that are best aligned with Metro's vision and strategic goals
- Acquiring, managing, developing, and disposing of real property in support of Metrorail, Metrobus, and MetroAccess
- Implementing innovative programs that generate revenue and promote transit use
- Safely and efficiently manage Metro's parking operations
- Utilizing Metro's parking assets efficiently to advance strategic goals

# **Mission Statement and Objectives**

The mission of Planning and Joint Development is to develop and support a long-range vision for transit services and transit asset development that enhances livable communities and promotes Metro's role in the region. PLJD also supports Metro's operating and business functions through data analysis and program development. This mission supports Metro's strategic goals of delivering quality service; using every resource wisely, and retaining, maintaining, and enhancing Metro's image.

During FY2012, PLJD's mission will focus on the following key program initiatives:

- Developing a Long-Range Regional Transit Plan through the year 2040 and clearly communicating Metro's role in the area's mobility to the year 2040
- Implementing Metro's joint development guidelines by bringing along transit-oriented development (TOD) projects at Metro's Wheaton and New Carrollton stations; and managing the existing portfolio of TOD projects through the downturn to maximize the preservation of economic values and the realization of TOD design outcomes
- Developing a parking asset management strategy that increases the ridership benefits Metro realizes from its fixed parking assets over time; increases the benefits to riders from parking assets; and minimizes the cost to Metro on a lifecycle basis of owning and maintaining its parking assets
- Developing pilot parking initiatives that seek to demonstrate or test new, more strategic approaches to managing Metro's parking assets

# **Proposed FY2012 Department Budget**

### **Adjustments from Approved FY2011 Budget**

For FY2012, the operating budget is reduced as capital planning activities will be funded in the capital budget.

# **Discretionary Cost Reductions**

PLJD has reduced its Material and Supplies and Miscellaneous budget from its initial budget submission to align with historical spending levels. In addition, a capital investment of new technology will provide cost savings in the parking contract.

### **Description**

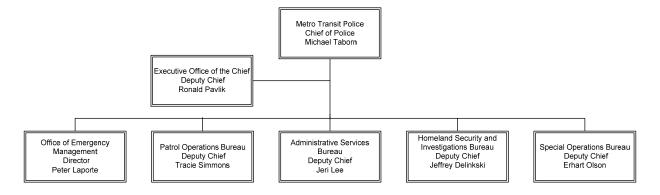

The Metro Transit Police Department (MTPD) is the only tri-state jurisdictional police department in the United States, operating in the District of Columbia, the Commonwealth of Virginia and the state of Maryland. The MTPD is tasked with protecting the customers and employees of the second largest rail system and sixth largest bus system in the United States. The MTPD consists of 458 sworn personnel and over 150 civilian personnel, which includes the Special Police Division. The MTPD provides protection for Metro riders, personnel, transit facilities and fare collection operations. MTPD officers have jurisdiction and the powers of arrest for crimes that occur in, on or against Metro facilities, encompassing over 1,500 square miles and serving a population of over 3 million people. MTPD deploys uniformed officers, casual clothes officers, motor officers, and canine officers to patrol Metrobuses and patrol Metrorail trains, stations, and parking lots. Additionally, the MTPD has a dedicated detective unit, auto theft unit, Special Response Team, and Anti-Terrorism Team.

MTPD members work proactively in the various communities and law enforcement entities throughout the National Capital Region (NCR) to reduce crimes within the Metro system. Furthermore, MTPD Members provide customers with awareness on how they can protect their personal belongings from theft and how to avoid becoming the victim of an assault or the victim of any criminal activity. The MTPD conducts awareness campaigns through various outreaches and provide an array of literature to customers that focus on safety and security.

MTPD plays a significant role in the National Capital Regions security, particularly in the prevention of threats to the transit system and providing emergency response when needed. Several of MTPD's prevention strategies are visible through uniformed patrol efforts, cameras in rail stations and on busses, and chemical and biological detection efforts, and most recently, random bag inspections. Finally, MTPD works in concert and collaboration with local law enforcement, federal partners in the region, to include the FBI, the local and National Joint Terrorism Task Force, the Department of Homeland Security (DHS), and the Transportation Security Administration (TSA).

An additional component of the MTPD is the Office of Emergency Management (OEM). The OEM works in concert with the MTPD and partners with first responders in the NCR, to respond to, timely mitigate and recover from emergency and/or unusual situations that occur within the region that directly affects Metro. OEM is responsible for maintaining Emergency Operations

Plans, serves as the clearing house for local law enforcement, federal partners, fire and military personnel on Metro familiarity related training. Additionally, the OEM works in collaboration with regional partners to acquire various federal grants to offset Metro's cost to maintain and purchase various safety related equipment, and to conduct large scale regional drills.

#### **Mission Statement and Objectives**

The mission of the Metro Transit Police Department is to provide protection for Metro patrons, personnel, transit facilities, and revenue.

The Metro Transit Police Department developed a departmental execution plan that is linked directly to Metro's strategic goals. All five of Metro's strategic goals are utilized for a basis for a comprehensive set of performance measures designed to:

- Improve customer security for customers and employees with no or low levels of crime
- Execute policies and procedures for violation of laws applicable to users of Metro's facilities
- Foster an environment for public safety
- Continuous improvement in safety for both customers and employees

### **Proposed FY2012 Department Budget**

# **Adjustments from Approved FY2011 Budget**

With approval from the Metro Board of Directors in Resolution No. 2010-57 in FY2011, MTPD added 17 Special Police Officer positions, increasing labor costs. As an offset, labor was decreased through grant funding. Metro Police received a grant from the Transportation Security Administration to fund its National Explosives Detection Canine Team program. Personnel expenses related to the grant were transferred from the operating budget to the reimbursable budget. In non-personnel expenses, services increased to fund additional employee training and development.

#### **Discretionary Cost Reductions**

The Metro Police Department made a number of cost reductions in personnel expenses. In addition, six positions currently filled by officers will be converted to civilian employee positions, resulting in personnel savings. MTPD reduced its overtime budget through more efficient deployment for special events.

### **Description**

The Department of System Safety & Environmental Management (SAFE) services the Metro System with implementation and management of programs vital to ensuring our employees, customers and surrounding communities are safe. Programs include:

- System safety program plan
- Occupation safety and health
- Accident and incident investigation / corrective actions
- Hazard management
- Internal safety audits
- Construction safety
- Safety (and security) certification of projects
- Safety data collection and analysis
- Industrial hygiene & environmental protection
- Safety & occupational training
- Regulatory compliance
- Quality assurance & compliance

SAFE has a staff complement of 59 highly educated and experienced personnel with advanced degrees in Safety, Electrical Engineering, Environmental Engineering, and Business Administration; in addition to other safety, engineering, technical and business-related fields. The staff includes a Certified Safety and Security Director (WSO-CSSD), and Senior Associate Staff Instructors for FTA's Transportation Safety Institute (TSI). On average the employees have 17 years of transit experience, ten years of safety experience, and 13 years at Metro, providing a strong depth of institutional knowledge.

#### **Mission Statement and Objectives**

The mission of the System Safety & Environmental Management department is to ensure that Metro's Bus, Rail, and Access systems and other facilities are operationally safe and environmentally sound for all our employees, customers and surrounding communities.

The department measures are linked to Metro's General Manager's goals and related objectives. The overall goal is always zero accidents, injuries and fatalities. In striving to accomplish that goal, SAFE is creating a corporate safety culture involving all levels, from the Board of Directors to every employee regardless of position or location.

### **Proposed FY2012 Department Budget**

# **Adjustments from Approved FY2011 Budget**

Due to recent reorganizations, the proper cost allocation of all offices within SAFE resulted in a reduction in the operating budget and an increase in the cost allocated to the capital budget. Overall, the SAFE budget has increased by \$504.4 thousand.

<sup>\*</sup>In FY2011, the Office of Customer Service (CSVC) was moved to this department. That office had actual spending of \$6.8 million in FY2010. For FY2011, the office had an approved budget of \$7.3 million and 73 positions. FY2010 headcount shown above, does not reflect the impact of the reorganization.

#### **Description**

The Department of Customer Service, Communications and Marketing (CSCM) is responsible for communicating, marketing and informing customers, employees, public officials and other stakeholders about Metro's services, programs and policies. Through its marketing and communications work, CSCM supports the growth of Metro ridership and revenues. CSCM also serves as the customer advocate within Metro by seeking input through research and representing customer opinions received through letters, phone calls and other avenues. With its Customer Service Center, CSCM also responds to more than six million customer comments or information requests a year. Offices within the CSCM department include public relations, government affairs, marketing and advertising, board communications, customer service, and community relations.

### Office of Public Relations (PREL)

The Office of Public Relations develops and implements strategic communications programs that inform internal and external stakeholders. In particular, this office:

- Educates the riding public about service expansion, changes, and special programs
- Serves as an in-house news agency to inform the public about corporate management and Board actions regarding safety, security and operating policies
- Responds to approximately 500 media requests a month, serving as official "spokesperson" for Metro

- Engages customers in two-way communication through Twitter, Facebook, blogs and other social media outlets
- Informs riders through customer communications programs, and working in partnership with Metro's rail and bus operations
- Develops and implements employee communications programs and initiatives
- Supports internal Metro staff with communication support, including providing writing, video and photography services, and maintaining the agency's archives

# Office of Marketing and Advertising (MKTG)

Marketing develops and implements marketing programs that support current riders and attract new customers, to build ridership and revenue. Marketing also generates revenue outside of the farebox through the sale of advertising on Metrobus and in the Metrorail system, merchandising and other programs. In particular, the Office of Marketing and Advertising:

- Develops and implements strategic marketing initiatives to inform customers about changes or the launch of new services or policy initiatives
- Creates approximately 25 partnership promotions annually to build ridership
- Supports internal and external communications needs through the creation of over 200 graphics products annually
- Oversees the generation of more than \$15 million a year resulting from the sale of advertising space on Metrobuses and in the Metrorail system
- Promotes and supports the SmartBenefits<sup>®</sup> program that includes over 5,000 employers and 285,000 commuters in the region

# **Replication and Digitizing Services (RADS)**

Within the Office of Marketing and Advertising, CSCM operates Metro's in-house printing plant, offering cost-effective and efficient design, printing and reproduction service for internal Metro customers. Annual projects completed by RADs include:

- Printing five million copies of the Metro Pocket Guides, and 500,000 copies of Your Guide To Metro and the Nation's Capital which are distributed in Metrorail stations, hotels, libraries, regional transit stores, national AAA offices, Travelers Aid Desks at Union Station and area airports, convention centers, and Capitol Hill offices
- Printing over three million copies of pocket bus and rail timetables covering the 146 bus lines and all rail lines and over 120,000 copies of the Metro System Route Maps depicting the entire Metrobus and Metrorail system, which are provided to Metrorail stations, hotels, regional libraries, area convention centers, regional transit stores, universities and Capitol Hill offices
- Printing of all internal Metro forms for use by operations and support offices
- Printing of collateral materials to support special events

#### **Customer Research**

The Office of Customer Research is charged with gathering and communicating customer opinions to improve Metro's services and programs and ensure that they meet customer requirements and preferences. The office gains input by:

- Overseeing a quarterly customer satisfaction survey of Metrobus, Metrorail and MetroAccess riders
- Overseeing outside research experts who conduct qualitative research such as focus groups to identify preferences and opinions on particular topics
- Identifying research requirements or projects to ensure customer input in equipment design and service development
- Serving as an advisor to internal staff seeking guidance on customer opinions

# **Office of Customer Service (CSVC)**

The Office of Customer Service serves as Metro's primary call center, responding to customer comments, providing information and maintaining the Metro's lost and found program. Specific duties of CSVC include:

- Maintaining and managing Metro's web Trip Planner to help customers plan more than 21 million trips annually on Metrorail, Metrobus and connecting carriers
- Providing service information to six million customers through the information call center
- Handling 70,000 customer comments each year received by Customer Relations via telephone, Metro's web site emails and letters
- Managing the lost-and-found program which accounts for over 42,000 items lost in the Metro system annually
- Managing Metro's central telephone switchboard by routing more than 104,000 calls to the appropriate Metro office or individual annually
- Maintaining, updating and providing training for over 100 system users on Metro's Customer Relationship Management System (CRM)

### **Office of Government Relations (GOVR)**

The Office of Government Relations maintains ongoing relationships with Metro's partners in the federal, state and local governments to ensure funding policies and programs that assist Metro in better serving its customers by:

 Providing information to stakeholders at all levels of government related to a range of subjects, such as the capital and operating needs of Metro, legislation and regulations that promote the use of transit in the National Capital Region, and actions local departments of transportation can take to improve transit operations

- Responding to questions or requests from the Board of Directors and Metro managers on important federal, state and local government issues that affect Metro
- Identifying and facilitating the award of grants to offset operating budget expenditures or to fund projects listed in Metro's Capital Needs Inventory
- Working with the Metro Transit Police Department in identifying grants and programs to assist with MTPD's Security program
- Coordinating with Metro offices to respond to concerns raised by elected officials community groups, and stakeholders
- Assisting internal Metro offices on a variety of planning, land use, permitting, and other activities with state and local governments

# **Community Relations (CREL)**

The Community Relations staff is the face of Metro in the region's local communities, developing relationships and seeking community input to Metro's decision-making. Among many activities, CREL:

- Coordinates transit service planning such as adding train or bus service and extending the system hours of operation for 13-15 major capital region events a year, such as the Cherry Blossom Festival, National Marathon, Race for the Cure, the Marine Corps Marathon and the Army 10-miler, one time rallies and sporting events
- Serves as liaison to arrange for needed service with regional sporting venues, including Nationals Ballpark, Verizon Center and Fed Ex Field
- Oversees planning for major construction projects and trackwork resulting in approximately six to eight rail shutdowns to ensure that customers are supported and needs are addressed
- Manages Metro's Information Program (MIP), which provides added administrative customer service staff during construction projects, special events and holidays
- Gathers input and informs the region's community and neighborhood groups of service and policies changes by regular contact through a database of key stakeholders

#### **Mission Statement and Objectives**

The mission of the Department of Customer Service, Communications and Marketing is to build trust, confidence and loyalty in the Metro brand.

CSCM supports four of Metro's strategic goals:

- Create a safer organization
- Deliver quality service
- Use every resource wisely
- Maintain and enhance Metro's image

The department's additional objectives are to:

- Deliver consistent, coordinated messages through integrated strategic communications and marketing plans
- Lead customer service improvement with research, trend analysis and involvement
- Inform Metro customers through more direct communications
- Drive ridership growth and new market development
- Enhance employee communications
- Improve immediate information distribution through digital media
- Support Metro's government affairs agenda
- Collaborate within Metro to be responsive to internal partners

### **Proposed FY2012 Department Budget**

#### Adjustments from Approved FY2011 Budget

In FY2012, CSCM will reprioritize its programs to expand customer research and public information outreach, as well as improve responsiveness of customer service, without increasing its budget. Increases for salaries, wages, and inflation in non-personnel costs were offset by reductions in other non-personnel accounts. Personnel expenses increased due to a position transfer from another department and budget adjustments within the office of Customer Service. Overtime funding was adjusted as a result of funds being moved from wage accounts into overtime.

#### **Discretionary Cost Reductions**

Customer Service, Communications and Marketing reduced expenses associated with temp help services, and Material and Supplies. In addition, CSCM decreased the budget for outside printing expenses.

# Chapter VI. Capital Program

This chapter provides information on the capital program for the Proposed Fiscal Year 2012 annual budget. It focuses on the Capital Improvement Program (CIP) for FY2011 to FY2017.

Metro is investing \$5 billion over six years in more than 122 projects to advance safety and state of good repair needs on the system. The first priority of the program is completing National Transportation Safety Board (NTSB) recommendations, as well as improvements proposed by the Federal Transit Administration and independent assessors.

The FY2012 program of work includes vital state of good repair projects, including the rehabilitation of aging infrastructure and rolling stock modernization. The Capital Improvement Program invests \$851 million in FY2012 to ensure safety and improve reliability, including:

- Installing 30 turnouts, 15,000 direct fixation fasteners, and 8,000 cross ties
- Retrofitting 2,700 feet of track floating slabs
- Rehabilitating 5,000 feet of track pads and shock absorbers
- Rehabilitating 5 miles of third rail
- Rehabilitating 10 miles of running rail
- Installing 50,000 tracks fasteners and anchor bolts
- Track circuit replacements
- Rehabilitating 12 Metro stations
- Replacement of 100 Metro buses and rehabilitation of 100 more

Through FY2017, Metro plans to invest almost \$1 billion in recommendations made by the NTSB, including replacement of the 1000 Series railcars, replacement of track circuits, replacement of power cables, design, operational, and maintenance controls to address potential Automatic Train Control (ATC) system failures, cable insulation testing, and removing the unnecessary Metrorail wayside maintenance communication system in order to eliminate its potential for interfering with the proper functioning of the train control system.

#### CAPITAL PROGRAM

The Capital Program includes the Capital Improvement Program (CIP), Reimbursable Projects Program, American Recovery and Reinvestment Act Program (ARRA), and the Safety and Security Program. For information only purposes the ARRA and Safety and Security Program are shown in Appendix A.

### Capital Improvement Program

The \$5 billion Capital Improvement Program (CIP) is a six-year base program derived from on the 10-year \$11.4 billion Capital Needs Inventory (CNI) prioritization results, committed project funding, and other policy considerations. The six year base program that was derived from the CNI was the FY2011-2016 CIP. The goal of this CIP, as with the previous one, is to provide safe, reliable, and clean service.

The Capital Funding Agreement (CFA) that established the base CIP also allows for a six year rolling capital program. The six year CIP that was developed for FY2012-2017 presented here represents \$5.1 billion in planned expenditures.

The Capital Improvement Program (CIP) is the fundable, executable CNI program. The CIP provides a blue print of annually planned work and associated cost.

The CIP addresses Metro's physical asset requirements. The CIP has adopted the CNI categories structure. The nine CIP categories are (1) Vehicles/Vehicle Parts, (2) Rail System Infrastructure Rehabilitation, (3) Maintenance Facilities, (4) Systems and Technology, (5) Track and Structure, (6) Passenger Facilities, (7) Maintenance Equipment, (8) Other Facilities and (9) Project Management and Support.

Funds to support the CIP come from three primary sources: Federal appropriations, state and local contributions, and long and short-term borrowing. Federal appropriations include two Federal Transit Administration formula grants and dedicated Federal funds. The dedicated federal funds were approved under the Passenger Rail Investment and Improvement Act (PRIIA) of 2008 (P.L. 110-432, sometimes known as the "dedicated funding bill"). It authorized \$1.5 billion over ten years for Metro's capital and preventive maintenance projects, to be matched dollar-for-dollar by the Metro Compact jurisdictions. The Appropriations Act placed certain conditions on the use of those funds, requiring that Metro place the highest priority on "investments that will improve the safety of the system, including but not limited to fixing the track signal system, replacing the 1000 series rail cars, installing guarded turnouts, buying equipment for wayside worker protection, and installing rollback protection on cars that are not equipped with this safety feature."

### Reimbursable Projects

The reimbursable Project Development Program funds planning studies for new transit services for high priority corridors, station access and capacity improvements, and pre-development

planning in support of joint development in the District of Columbia, Maryland, and Virginia. Each jurisdiction contributes to the \$3.0 million funding level and approves the program priorities.

### Summary of the Financial Plan

The Financial Plan for the Capital Improvement Program is built on the following assumptions:

- <u>Federal Formula Grants</u> assumes a 0% annual growth rate in FY2012 and 2013 and between 2.5% and 3.5% thereafter, through FY2017. The CFA assumed a 4%-5% growth rate between FY2011 and 2016. This reduced growth forecast was implemented in anticipation of reduced Federal transportation funding expectations for transportation.
- <u>Federal Dedicated Funds</u> assumes \$150.0 million from the federal government and \$150.0 million from state and local contributors.
- System Performance Funds (previously called Local Additional Funds) were assumed to be capped at \$107.6 million each year in the Capital Funding Agreement put into effect in June 2010. Given the downward revision in federal funding growth rate assumption and consequently local match, system performance funds were increased to make up for the loss of the match amount, such that the total State and Local contribution (match + system performance) in any given year of the CIP, remains consistent with the agreed levels in the Capital Funding Agreement.
- <u>State and Local Contributions</u> for formula grants and local additional were estimated by grouping projects into bus, rail, bus/rail, and access categories and distributing the cost based on the FY2010 operating subsidy allocation.
- Miscellaneous CIP Funding is the anticipated proceeds from the sale of real estate.
- <u>Metro Matters Roll Over</u> is funding rolled over from the Metro Matters period (FY2005-2010) into the Capital Funding Agreement period.
- <u>Metro Matters Residual Funding</u>, as a result of the Metro Matters reconciliation concluded in the second quarter of FY2011, an additional \$43 million of Metro Matters residual funding was made available for the current CIP.
- <u>FY2011 CIP Rollover</u> represents \$89.7 million in <u>unexpended FY2011 CIP funds</u>. The <u>funds are anticipated to be fully spent in FY2012</u>.
- <u>Debt</u> assumes the issuance of a 25-year, tax-exempt, gross transit revenue bond. Total debt between FY2011 and FY2016 remains within the \$440 million established in the CFA period. An additional \$91 million in debt is planned in FY2017.

### Jurisdiction's Allocated Contribution

Each Contributing Jurisdiction's Allocated Contribution is based on the approved Annual Work Plan, which is an expenditure-based plan, and any subsequent adjustments derived from the Annual Budget Reconciliation Process. The Contributing Jurisdictions are billed each quarter based on an expenditure forecast by quarter according to the Annual Work Plan.

It is projected that Metro will under-spend the FY2011 budget by \$89.7 million, and those expenditures will be made in FY2012. As a result, the jurisdictional contributions were lowered for FY2011, and will increase in FY2012 per the Annual Work Plan.

Per the Capital Funding Agreement (CFA), jurisdictional contributions will be adjusted again in Fall 2012 according to actual and projected capital expenditures.

### **Development of the Capital Needs Inventory (CNI)**

The ten year Capital Needs Inventory (FY2011 – FY2020) was developed based on accounting for life-cycle costs, current conditions, and future demand. This agency-wide, "bottom-up" inventory was designed to produce a comprehensive picture of Metro's future capital needs. The over \$11 billion, ten year Capital Needs Inventory (CNI) was prioritized based on agency goals and strategic objectives and presented to the Board on October 8, 2009.

Subsequently, the prioritized ten-year Capital Needs Inventory effort was used to create a constrained \$5 billion six-year Capital Improvement Program (FY2011 – FY2016) that addresses Metro's most critical capital funding needs. Indeed, the Capital Improvement Program as a whole reflects a higher portion of "state of good performance" projects than the Capital Needs Inventory.

### **Budget Authority for FY2012**

To provide the most up-to-date information on the Capital Program, this document includes the proposed budget for FY2012 of \$854.1 million with \$851.1 million for CIP (including \$14.4 million of Metro Matters Rollover and \$89.7 million of FY2011 CIP Rollover) and \$3.0 million for reimbursable projects. The FY2011 forecast and proposed FY 2012 budget, along with forecasted expenditures for FY2013 through FY2017, provides a complete overview of the Capital Improvement Program.

**Project:** Automatic Vehicle Location Equipment Replacement

ID:

Sponsor Dept.:	BUS	ELT Manager:	Jack Requa	Operating Impact:
Managing Dept.:	BMNT	Proj. Manager:	Jonathan Walker	Maintenance savings of approximately \$1,000,000 per year in FY13-16 based on anticipated
Proj. Category:	Vehicles/ Vehicle Parts	Proj. Type:	Bus	warranty vs. current costs to maintain.
Project Description	ո։			•
This project will begin	n the replacement of Automa	itic Vehicle Location (A'	VL) equipment on buses that	at was installed in 2002. The equipment, which allows monitoring of bus locations, supports Next
Bus, and provides con	mputer aided dispatch inform	ation. The equipment	has a life span of 7-10 year	and is at the end of its useful life.

FY2012 Planned Activities:

1. Finalize testing and begin on board equipment installation 2. Complete Buss Operations Control Center Computer aided dispatch 3. Continue on board equipment installation 4. Continue on board equipment installation and backend infrastructure requirements

Project: Bus Repairables ID: CIP 008

Project Information				
Sponsor Dept.:	BUS	ELT Manager:	Jack Requa	Operating Impact:
Managing Dept.:	BMNT	Proj. Manager:	Darin Welt	Neutral. These parts and assemblies keep buses in service.
Proj. Category:	Vehicles/ Vehicle Parts	Proj. Type:	Bus	
Drainet Deceription				<u> </u>

Project Description:
This project provides the components necessary to rehabilitate buses. The bus rehabilitation components to be purchased are needed to replace the repairable supply of replacement items such as farebox assemblies, radiator assemblies, alternators, and driver seats when the core is beyond economical repair or when the composition of the fleet changes. Bus rehabilitation components are also needed for engines and transmissions when technical changes are dictated by EPA regulations.

#### FY2012 Planned Activities:

Replace repairable bus components no longer repairable or past their useful life including but not limited to: alternators, transmissions, coolers, driver's seats, radiator assemblies, cylinder heads, door and fan motors. Specific elements of the program include: replacement of engines as part of mid-life overhaul; destination sign replacement; hybrid/electric battery replacement as part of the mid-life overhaul; replacement of fareboxes during mid-life overhaul; and replacement of soot filters as part of mid-life overhaul.

Project: Track Welding Program

**ID**: CIP 018

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Michael Brown	Well maintained tracks maximize customers' satisfaction through convenient and comfortable
Proj. Category:	Track and Structures	Proj. Type:	Rail	rail services and minimize disruptions and service delays.

#### Project Description:

This project will improve the electrical conductivity of the rail, eliminate joint defects, reduce noise and wear, reduce maintenance and inspection costs, and help reduce cross tie fires by reducing the number of open rail joints throughout the rail system. This is an ongoing project. Currently there are approximately 1,750 open rail joints systemwide. As a result of running rail replacement, approximately 400 new open joints are created each year. The Flash Butt welding approach enables open joints to be welded at a much faster rate. In addition, the flash butt welding process allows for thermal adjustment to our track system, reducing the occurrences of track buckling and track pull parts, thus reducing delays and shutdown. Will result in 3000 welded joints. This project also includes additional budget and funding via ARRA funds, which are 100% reimbursable via that source.

FY2012 Planned Activities:	
Weld one hundred twenty-five (125) open rail joints.

Project: Track Floating Slab Rehabilitation

ID: CIP 019

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Michael Brown	Well maintained tracks maximize customers' satisfaction through convenient and comfortable
Proj. Category:	Track and Structures	Proj. Type:	Rail	rail services and minimize disruptions and service delays.
Donald of December Man				

This project will prevent service delays and speed restrictions due to differential settlement of the track structure and reduce noise and vibration to the surrounding building and structures by eplacing failed isolation pads and restore the track structure to the proper elevation. Metro has an inventory of 45,530 linear feet of floating slabs. This project will result in retrofit of 2700 linear feet in FY2012 and 16200 linear feet from FY2012-17

FY2012 Planned Activities:

tetrofit six hundred seventy-five (675) linear feet of floating slabs between Benning Road and Addison Road. Procure three thousand (3,000) isolator pads.

Project: Replacement of Rail Track Signage

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Larry E. Lee	Replacing worn, illegible graphics improve safety by warning employees, customers, and
Proj. Category:	Maintenance Equipment	Proj. Type:	Rail	emergency responder of Right-of-Way (ROW) hazards.

Project Description:
This project will replace old, illegible rail track graphic signs and various other signs indicating locations and warnings to employees, emergency responders, and the general public. Track graphics are essential for safe operations and emergency responses. Many signs throughout the Metrorail System are approximately 30 years old. Some of these signs require upgrading because they are damaged, deteriorated, or obsolete. The Right of Way (ROW) graphic signs are systemwide (on the ROW fence, chain markers, warning signs on tunnel vent shaft doors, third rail power warning

signs, track identification signs, etc.). Will result in replaceemtn of 18,000 chain markers and 3000 signs.

cure and install seven hundred fifty (750) chain markers. Procure and install one hundred twenty-five (125) safety signs.

**Project:** Track Pad/Shock Absorber Rehabilitation

**ID**: CIP 021

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Larry E. Lee	Well maintained tracks maximize customers' satisfaction through convenient and comfortable
Proj. Category:	Track and Structures	Proj. Type:	Rail	rail services and minimize disruptions and service delays.

Project Description:

This project will maintain track structure integrity by rehabilitating the grout/plinth pads. In addition, sections of track structure require rehabilitation to accept the new fasteners, switches, and switch machines required needed to sustain safe and efficient rail operations. Metro has an inventory of approximately 160 miles of grout pads (844,800 linear feet). Rehabilitation of the aerial grout pads is limited to the spring, summer and fall. During the winter months, STRC rehabilitates the grout pads in the Metro tunnels. The track geometry, cross-level, and gauge are maintained by the rail fasteners. The grout/plinth pads provide elevation and support for the running rails and are the main support for the rail fasteners. This project will result in rehabilitation of 5000 linear feet in FY2012 and 30000 linear feet from FY2012-17

#### FY2012 Planned Activities:

Repair one thousand two hundred fifty (1,250) linear feet of grout pads on Rhode Island Avenue, Grosvenor, Landover, D&G, Cheverly & Eisenhower Aerials. Procure cement material. Retrofit the trackbed for the new direct fixation fasteners and the switch machines. Procure (1) Prime Mover. (1) volumetric mixer. and (1) flatcar.

Project: Track Rehabilitation

CIP 024 ID:

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Michael Brown	Well maintained tracks maximize customers' satisfaction through convenient and comfortable
Proj. Category:	Track and Structures	Proj. Type:	Rail	rail services and minimize disruptions and service delays. Newer equipment reduces
				maintenance costs and the probability of breakdowns on mainline.

This project will fund the procurement of material and specialized equipment to facilitate the removal and installation of the track and switch panels which prevents service delays and speed restrictions. Track components require replacement when, based on industry standards, they become worn or unserviceable due to deterioration, excessive wear, or defects. Track & Structures System Maintenance rehabilitates the track infrastructure by replacing running rail, cross ties, direct fixation fasteners, third rail insulators, and turnouts annually. This project will result in 60 miles of third rail rehabilitation, purchase/ installation of 180 turnouts, 90,000 direct fixation fasteners and 48,000 crossties

FY2012 Planned Activities:
Install thirty (30) turnouts, 10 miles of running rail, fifteen thousand (15,000) direct fixation fasteners, eight thousand (8,000) cross ties, and five thousand (5,000) third rail insulator. Procure one (1) nobile maintenance unit.

Managing Dept.:	TSSM	Proj. Manager:	Michael Brown	Newer equipment reduces maintenance costs and the probability of breakdowns on mainline.
Proj. Category:	Maintenance Equipment	Proj. Type:	Rail	

#### Project Description:

This project funds the rehabilitation / replacement of heavy-duty track equipment. Track maintenance equipment is essential to deliver quality service and for the safe and efficient execution of the track rehabilitation work. Timely rehabilitation and replacement of self-propelled track equipment will ensure equipment reliability, reduce the probability of delays due to equipment breakdowns, and allow for efficient use of the right-of-way track time. This project funds the replacement of heavy-duty track equipment that has reached the end of its useful lifecycle and is no long economically feasible to maintain. Heavy-duty track equipment has a lead time of approximately 18 months. TSSM typically begin the procurement process in January prior to the planned fiscal year.

#### FY2012 Planned Activities:

1. Procurement Processing 2. Procure three (3) prime movers, three (3) multi-purpose handlers, five (5) flatcars, one (1) tie crane / inserter, three (3) diecer flats. 3. Procure three (3) locomotives & four (4) prime movers.

Project: Station/Tunnel Leak Mitigation

**ID**: CIP 026

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Larry E. Lee	Station and tunnel water leaks create slipping hazards for Metro's passengers and employees.
Proj. Category:	Track and Structures	Proj. Type:	Rail	In addition, water leaks deteriorate vital wayside system that leads to disruptions and service
				delays.
Project Description	n.			

This project will restore and maintain the structural integrity of the tunnel liners, preventing leaks and prevent the corrosion of wayside systems, equipment, and track components. Station Tunnel Leak Mitigation eliminates unsafe wet conditions for Metrorail passengers and prevents service delays resulting from water intrusion. This project will result in the mitigation of 10,200 leaks, 1,700 of

# FY2012 Planned Activities:

Repair one thousand seven hundred (1,700) leaks. Procure leak repair material. Procure leak repair material and one (1) manlift

Project: Fare Media Encoders

ID: CIP 032

Project Information				
Sponsor Dept.:	TRES	ELT Manager:	Carol Kissal	Operating Impact:
Managing Dept.:	TRES	Proj. Manager:	Buddy Jaggie	Newer equipment will require less maintenance and have a lower overall impact.
Proj. Category:	Systems and Technology	Proj. Type:	Rail	
Project Description	n·			

This project will replace 3 high-speed fare media encoders, which encode the various types of paper magnetic strip fare cards. The existing fare media encoders have exceeded their life expectancy by 5 years, and are obsolete to the point that parts must be re-engineered and created. Frequent breakdown of these machines results in lost productivity and overtime costs.

#### FY2012 Planned Activities: Continue installation for new high-speed fare media encoders. Transfer and install older fare media encoders in lower use sales and revenue sites

Project: Bus & Rail Asset Management Software

CIP 042

Project Information				
Sponsor Dept.:	IT	ELT Manager:	Suzanne Peck	Operating Impact:
Managing Dept.:	IT	Proj. Manager:	Robert Kramer	Lowering costs and lessening maintenance impact on customers.
Proj. Category:	Systems and Technology	Proj. Type:	Bus/Rail	
Project Description	··			

This project will fund Maximo, Metro's asset and work management tracking system which is critical to the operations of rail and bus. Maximo should be kept current for the lifecycle of the next CIP and implements modules for use in the field. It will also help Metro better manage its assets. This project also includes additional budget and funding via ARRA funds, which are 100% reimbursable via that source.

### FY2012 Planned Activities:

1. Consultant services to implement Warehouse Management System enhancement for training and new features. 2. Procure and deploy Maximo Software licenses to 100 additional users. 3. Procure Asset Navigator Scanning Services 4. Create Maximo data warehouse for legacy data; Integrate Maximo with PeopleSoft Customer Relations Management System and Geographic Information

Proj. Category:	Systems and Technology	Proj. Type:	Bus	

Project Description:
This project completes the deployment of centralized, field and on-board bus applications such as automatic vehicle maintenance, computer aided dispatch, and automatic vehicle location system. It also completes integration and normalization of all data that is required to meet customer information needs

#### FY2012 Planned Activities:

1. Complete Fleetwatch upgrade in remaining 3 garages. 2. Upgrade the current automatic vehicle locator system to current release. Implement bus system integration, between Transit Database, Clever Devices vehicle maintenance System, ACS Orbital vehicle locator dispatch systems and WMATA business systems. Trapeze improvement and release upgrade.

Project: Customer & Regional Integration

ID: CIP 044

Project Information				
Sponsor Dept.:	IT	ELT Manager:	Suzanne Peck	Operating Impact:
Managing Dept.:	IT	Proj. Manager:	Bill Burcham	This will result in more efficient operations.
Proj. Category:	Systems and Technology	Proj. Type:	Bus/Rail	
Project Description	n:			

This project will modernize and integrate systems for communicating with customers and regional partners in a wide variety of circumstances including normal operations, minor delays, major delays, and emergencies. The current Metro IT environment has arisen over the past 30 years in an ad-hoc manner. This project solves this daunting enterprise problem by developing and deploying an enterprise-wide Service Oriented Architecture (SOA) that will integrate information sharing authority-wide

### FY2012 Planned Activities:

1. Initiate and complete development of concept of operations for sharing GIS and schedule information across regional transit systems. 2. Perform system design and develop prototype for sharing GIS and schedule information across regional transit systems.

**Project:** Data Centers and Infrastructures

**ID**: CIP 045

Project Information				
Sponsor Dept.:	IT	ELT Manager:	Suzanne Peck	Operating Impact:
Managing Dept.:	IT	Proj. Manager:	Veronica Lipscombe	Enable WMATA to improve availability of the mission ciritcal systems
Proj. Category:	Systems and Technology	Proj. Type:	Bus/Rail	Implement Disaster Recovery capability for the critical systems
				Consolidate server resources and reduce operational costs

#### Project Description:

This project will bring the Data Center infrastructure up to date including an upgrade of the data center facility, the computer rooms, transition of enterprise platforms from mainframe to client-server, enterprise storage and the consolidation of redundant and costly server infrastructure. Without this investment, Metro's current applications and all the applications considered in this capital plan will suffer from unnecessary failures possibly impacting visible transit operations such as rail control, fare collection or passenger information services.

#### FY2012 Planned Activities:

1. Analyze Servers and Storage requirements 2. Maintain Servers and Storage 3. Procure addition! storage and systems components for expnasion 4. Procure tools for Systems Management 5. Procure Health Check Services 6. Provide Systems and Servers Support 7. Expand storage and systems. 8. Implement tools for Systems Management 9. Perform systems Health Checks 10. Provide Systems and Servers Support 11. Exercise DR with expanded systems. 2. Provide Systems and Servers Support

Project Information				
Sponsor Dept.:	IT	ELT Manager:	Suzanne Peck	Operating Impact:
Managing Dept.:	IT	Proj. Manager:	Bill Burcham	Authority-wide Document Management Architecture providing real-time access to documents
Proj. Category:	Systems and Technology	Proj. Type:	Bus/Rail	supporting requirements.

#### Project Description

This project provides for enterprise-wide document management for Metro, integration of the document management system with the major enterprise systems (such as PeopleSoft and Maximo) and compliance with Metro's proposed enterprise wide document retention. This project will support moving many manual paper based processes to electronic processes by enabling enterprise applications such as PeopleSoft and Maximo to easily be linked to electronic records and forms. It will enhance Metro's ability to respond to information request. This project also includes additional budget and funding via ARRA funds, which are 100% reimbursable via that source.

#### FY2012 Planned Activities:

Implement Electronic Document Management and perform scanning for one to two departments (schedule not fixed by department)

Project: Rail Rehabilitation Program

ID: CIP 063

Project Information				
Sponsor Dept.:	RAIL	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	CMNT	Proj. Manager:	Gene Garzone	These components keep railcars in service.
Proj. Category:	Vehicles/ Vehicle Parts	Proj. Type:	Rail	

Project Description:
This project provides for the annual procurement of major repairable rail car components to support the maintenance of the fleet in a state of good performance. Major railcar components must be switched out on a regular basis. While these assemblies can sometimes be refurbished and re-used, eventually they will have to be removed from use completely. Therefore, a certain quantity of new components must be acquired each year. Approximately one-fifth of the fleet or 225 cars are subject to heavy overhaul annually. Major heavy overhaul components include replacement of wheels, brake systems, traction motors and truck overhaul.

### FY2012 Planned Activities:

Perform heavy overhaul on railcar fleet. Purchase repairable parts to include traction motors, brake assemblies, couplers and air compressors.

**Project:** Southern Avenue Bus Garage Replacement

ID: CIP 084

Sponsor Dept.: ESVC ELT Manager: David Kubicek Operating Impact:  Managing Dept.: ESVC Proj. Manager: John Thomas  Proj. Category: Maintenance Facilities Proj. Type: Bus Uperating Impact:  The larger facility will likely consume more utilities than the existing facility. Maintenance Facilities Proj. Type: Bus Uperating Impact:  The larger facility will likely decrease in comparison to the existing old facility.	
Proj. Category: Maintenance Escilities Proj. Type: Rus the facility will likely decrease in comparison to the existing old facility	tenance of
rioj. Category. Waintenance racinties rioj. Type. bus pure racinty will likely decrease in companson to the existing old racinty.	

Project Description:
Replacement of the existing Southern Avenue Bus Garage with a facility that can hold up to 250 buses. This project will result in increased garage capacity, and additional CNG fueling facilities, diesel fuel lanes and gas pumps.

#### FY2012 Planned Activities:

1. Release to the public, the draft general plans and the environmental evaluation documents, then hold the public hearing. 2. Prepare and distribute the public hearing staff report and obtain Board approval for same. Make selection of winning proposal. 3. Commence with final design with acquisition of property. 4. Commence with construction.

Project: Royal Street Bus Garage Replacement (Cinder Bed Road)

ID: **CIP 085** 

Project Information				
Sponsor Dept.:	ESVC	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	ESVC	Proj. Manager:	John Thomas	Upon opening, the Cinder Bed Road bus garage will increase WMATA's inventory of facilities
Proj. Category:	Maintenance Facilities	Proj. Type:	Bus	that require maintenance, albeit minor in the case of a new facility. Also, utility costs will
				increase.
Draiget Description	n.			

This project is for the replacement of existing Royal Street Garage with LEED Silver facility at Cinder Bed Road with a capacity of 160 buses. This project includes land and CNG fueling capability. The existing garage is constrained in capacity and limited to the type of bus that can be operated and maintained at the facility. This project will result in increased garage capacity, and additional CNG fueling facilities, diesel fuel lanes and gas pumps. This project also includes additional budget and funding via Reimbursable funds, which are 100% reimbursable via that source.

commence with construction.

Project: Southeastern Bus Garage Replacement (DC Village)

CIP 086 ID:

Project Information				
Sponsor Dept.:	ESVC	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	ESVC	Proj. Manager:	John Thomas	Upon opening, the DC Village bus garage will increase WMATA's inventory of facilities that
Proj. Category:	Maintenance Facilities	Proj. Type:	Bus	require maintenance, albeit minor in the case of a new facility. Also, utility costs will increase
				with the additional facility.

#### Project Description:

This project is for the replacement of Southeastern Bus Garage on the site of D.C. Village. The Southeastern Bus Facility was sold to accommodate the development associated with the new Nationals baseball stadium. As part of the agreement for the original Southeastern facility, the District of Columbia was to provide land at the D.C. Village site for a new bus facility. This project will esult in increased garage capacity, and additional CNG fueling facilities, diesel fuel lanes and gas pumps. This project also includes additional budget and funding via Reimbursable and ARRA funds, which are 100% reimbursable via those sources

#### FY2012 Planned Activities:

1. Issue tasks to consultants for preparation of contract documents for CNG fueling equipment. 2. Finalize design and issue RFP for CNG fueling equipment. 3. Receive and review proposals for CNG fueling equipment. 4. Award and NTP for contract for design and installation of the CNG fueling equipment.

**Project:** Track Fasteners ID: CIP 089

Project Information				
Sponsor Dept.:	TSSM	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	TSSM	Proj. Manager:	Douglas Gibson	Well maintained tracks maximize customers' satisfaction through convenient and comfortable
Proj. Category:	Track and Structures	Proj. Type:	Rail	rail services and minimize disruptions and service delays.

Project Description:
This project replaces track fasteners that, when worn out, cause stray current and have often been found to be the cause of fires on the system. Track fasteners are an integral structural component of the track system that needs to be replaced periodically. Metro has an inventory of 504, 514 fasteners systemwide. This project will result in 300,000 track fasteners, 50,000 of which will be installed in FY2012.

Project: Rail Rehabilitation Tier 1: Dupont to Silver Spring

**ID:** CIP 107

Project Information Sponsor Dept.:	ESVC	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	ESVC	Proj. Manager:	Kenneth Spain	Operating costs will be reduced as a result of facility rehabilitation.
Proj. Category:	Rail System Infrastructure R	e Proj. Type:	Rail	
,		3 31		

Project Description:
This project is a rall line segment rehabilitation of the Red Line from DuPont to Silver Spring which includes 11 Stations with a route mileage of approximately 10 miles. Stations included in this contract were completed and put into service between 1976 and 1978. Work will include all systems and infrastructure to increase overall efficiency. This contract was approved by the Board on July 16, 2009. This project also includes additional budget and funding via ARRA funds, which are 100% reimbursable via that source.

### FY2012 Planned Activities:

Platform edge repairs at 4 above ground stations. Ph2: Rehab traction power, electrical in switch board rooms, ETS, ATC, communication, track fastener, ventilation, air conditioner, canopy roof, platform, lighting, public address and CCTV.

**Project:** FCC Radio Frequency Communication Changes

**ID**: CIP 136

Project Information Sponsor Dept.:	RAIL	ELT Manager:	David Kubicek	Operating Impact:
Managing Dept.:	ESVC	Proj. Manager:	Nicolas Dimitracopoulos	Maintenance costs may increase due to greater number of above ground antenna sites.
Proj. Category:	Maintenance Equipment	Proj. Type:	Rail	

Project Description:
This project will meet the new FCC "narrow banding" requirement that affects the agency's UHF radio system. The primary impact is to the infrastructure equipment (as opposed to the subscriber equipment - handheld and mobile radios).

#### FY2012 Planned Activities:

1. Contractor calculates narrow banding effect on CRCS coverage. Defines needs for remote RF sites 2. Specify eqpt and system configuration; Obtain above ground antenna sites

# Appendix A. Capital Program

This appendix includes information on three previously approved capital programs: the American Recovery and Reinvestment Act (ARRA) Capital Program, Reimbursable Projects, and Safety and Security Projects. Additionally, a summary of projects with multiple funding sources is provided.

# American Recovery and Reinvestment Act (ARRA) Capital Program

The American Recovery and Reinvestment Act (ARRA) was signed into law by President Obama on February 17, 2009. The legislation provides significant federal funding to infrastructure projects around the nation and stimulates the economy on both national and local levels.

The projects selected receive 100 percent federal funding; no local match is required. Metro's portion of the regional allocation is \$201.8 million. The Board approved the budget in March 2009. The legislation specifies that these projects be pursued expeditiously; to that end it is expected that these projects will be completed within three years. A total of \$82.0 million was expended in FY2010 and \$77.1 million is forecast to be spent in FY2011. It is anticipated that the remaining \$42.6 million will be exhausted in FY2012. Projects were prioritized and selected according to Metro's goals and the ability to meet the specific legislation requirements.

There are seven categories of ARRA projects as follows:

- Vehicles & Vehicle Parts includes replacement buses, MetroAccess vehicles, bus parts, and service vehicle replacements.
- Maintenance Facility projects replace, repair, and expand maintenance and garage capacity to maintain the existing fleet and meet growing transit demand.
- Passenger Facilities projects improve the safety and efficiency of stations.
- Safety and Security projects provide for an even safer environment for customers and employees.
- Replacement of Maintenance and Repair Equipment that has reached the end of its useful life is necessary in order to provide reliable service.
- Operations Systems are important for employee and customer safety, service efficiency, and exchange of reliable real-time information.
- Information Technology projects enhance system recovery in disaster situations and improve system efficiency.

Some of the major projects completed under the ARRA Capital Program include:

- Replacement of oldest buses (\$27.0 million) and bus components (\$2.5 million),
- Preventive maintenance (\$11.1 million)
- Service vehicle replacement (\$6.0 million)
- MetroAccess fleet expansion (\$3.8 million)
- Communications equipment for Operations Controls Center (\$2.3 million)

Because the entire \$201.8 million ARRA Capital Program was adopted by the Board in FY2009, no additional budget authority is required for FY2012. A forecast of expenditures for FY2012 is provided for informational purposes.

# **Reimbursable Projects**

Reimbursable projects are those unique projects for which separate funding has been arranged with Metro's jurisdictional partners. Reimbursable projects were authorized by prior Board actions and are displayed for informational purposes. Information for these existing reimbursable projects includes actual expenditures of \$1.2 billion through FY2010 as well as forecasted expenditures of \$128.4 million in FY2011. It is anticipated that \$138.5 million will be expended in FY2012. Although no additional budget authority is required for FY2012, an expenditure forecast is provided for informational purposes.

Some of the most prominent Reimbursable Projects in the FY2011 and FY2012 expenditure forecast include, but are not limited to the following:

- Dulles Metrorail extension design build which includes rail car procurement
- Southeast bus garage replacement
- Takoma Langley Park Center
- Glenmont parking facility

# **Safety and Security Projects**

The Metro Matters Funding Agreement adopted by the WMATA Board of Directors and the contributing jurisdictions in FY 2005 included a Security Program that was to be entirely funded by the federal government, mostly of which comes from the Department of Homeland Security. Under U.S. Department of Homeland Security grant regulations, grants may be expended over a period of 18 to 24 months.

Safety and Security projects were authorized by prior Board actions and are displayed for informational purposes. Information for these existing projects includes actual expenditures of \$0.8 million through FY2010 as well as forecasted expenditures of \$26.9 million in FY2011. It is anticipated that \$33.1 million will be expended in FY2012. The Safety and Security budget in Table A.3 was approved by the Board in FY2010 and although no additional budget authority is required for FY2012, an expenditure forecast is provided for informational purposes.

Some of the most prominent Safety and Security Projects in the FY2011 and FY2012 expenditure forecast include, but are not limited to the following:

- Bus Garage and Platform security
- Cameras for buses and rail cars
- CCV and Access Control
- Radio Redundancy Alternative Operation Control Center
- Vent Intrusion Detection

# Appendix D. Glossary of Terms

AAC

(Accessibility Advisory

Committee)

Metro's committee that was created to address the needs of senior citizens and customers with disabilities; efforts have resulted in numerous service upgrades including gap reducers, to make it easier for customers using wheelchairs to board Metrorail trains.

**Accounting Basis** 

The accounting principles and methods appropriate for a government enterprise fund. Financial statements are prepared on the accrual basis of accounting under which revenues and

expenses are recognized when earned or incurred.

Accrual

Basis of Accounting where revenues are recognized when they are measurable and earned. Expenses are recorded when incurred.

**ADA** 

(Americans With Disabilities Act)

Refers to Federal civil rights legislation passed in 1990 that requires public transportation services to be accessible to, and usable by, persons with disabilities. In compliance, Washington Metropolitan Area Transit Authority (Metro) operates Metrobus with a bus fleet equipped with passenger lifts and wheelchair tie downs, Metrorail with elevators and platforms that are ADA compliant and MetroAccess with a fleet of over 500 vans and sedans also equipped with lifts and tie downs.

Approved Budget

The revenue and expenditure plan approved by the Metro Board of Directors for a specific one year period starting on July 1.

**ART** 

Refers to the bus service that operates within Arlington County, Virginia, providing access to Metrorail and supplementing Metrobus with smaller, neighborhood-friendly vehicles.

Articulated bus Also see "Slinky" bus Refers to buses that have an "accordion" section in the middle that allows the bus to bend and flex (articulate). Articulated buses have more passenger capacity than standard 40-foot buses.

AGM

(Assistant General Manager)

An executive who reports directly to the General Manager or a Deputy General Manager of Metro.

Assets

Property owned by Metro which has monetary value with a future benefit.

**Balanced Budget** 

Refers to a budget where estimated revenues are equal to or

greater than estimated expenses.

Board of Directors The Board of Directors is a 16-member body composed of eight

voting and eight alternate members responsible for corporate

governance of Metro.

BOCC Bus Operations Control Center

Bond A written promise to pay a specified sum of money (face value) at

a specified future date and the proposed means of financing them.

Bond Proceeds Refers to additional local capital funds raised, when necessary, by

issuance of revenue bonds in the municipal markets.

Budget Refers to a financial operation embodying an estimate of revenues

and expenditures for a fiscal period of 12 months or longer. This

can be an operating or capital budget.

Budget Calendar Refers to a schedule of key dates for specific milestones in the

preparation and approval of a budget.

Budget Document Refers to the official written statement and the supporting

numbers prepared by the Financial staff for presentation for

approval by the Board.

Budget Message Refers to the general discussion of the budget document presented

in writing as an overview, usually by the head of the organization.

Bus Shelter A shelter for riders to wait for the bus, a canopy area with or

without bench seating. In addition, the shelter includes a display case with bus information for Metrobus riders and is equipped

with a trash receptacle.

Bus Stop Refers to a stop indicated by a sign for riders to wait for the bus.

CAFR

(Comprehensive Annual

Financial Report)

A report containing financial statements and statistical data that provides full disclosure of all material financial operations of Metro in conformity with generally accepted accounting

principles.

Capital Assets Assets of a material value and having a useful life of more than

one year. Also called fixed assets.

Capital Budget The portion of the budget that provides for the funding of

improvements, projects and major equipment purchases.

Capital Improvement Plan The six-year plan of capital projects to be completed by Metro.

Cash Basis Basis for keeping accounts whereby revenue and expense are

recorded on the books of account when received and paid, respectively, without regard to the period to which they apply.

Compact Refers to interstate compact creating Metro; this is a special type

of contract or agreement between the three jurisdictions within

which the organization operates.

Compressed Natural Gas

(CNG)

A natural gas fuel used in a clean engine technology.

Contingency Funds Operating and capital funds reserved for unexpected expenditures

during the fiscal year which were not addressed in the annual

budget.

Cost Allocation Refers to the assignment of expenses accounted for in one fund to

another fund. For example, certain operating expenses of a

division may be charged to a capital grant.

COLA Cost of Living Adjustment (COLA) for inflation for employees.

(Cost of Living Adjustment)

Deadhead A revenue vehicle, such as a train or bus, is incurring mileage, but

is not in revenue service to carry passengers. For example, a train

being repositioned to another yard for repairs.

Department A major organizational unit that has overall responsibility for an

operation or a group of operations within a functional area.

DGM An executive who reports directly to the General Manager.

(Deputy General Manager)

Deficit Refers to an excess of Liabilities over Assets or Expenses over

Revenue.

DC Circulator Refers to a bus route funded by the DC Government with support

from Metro to take persons to Washington, DC's premier cultural,

shopping, dining, and business destinations.

Diesel fuel Fuel composed of petroleum distillates that have a boiling point

and specific gravity higher than gasoline.

Division Refers to a garage and yard facility where buses are stored,

maintained, and dispatched into service.

throughout Fairfax County, Virginia and to Metrorail stations on the Orange, Blue and Yellow lines, including the

Pentagon.

Fare box recovery ratio Refers to the ratio of passenger fares (including inter-agency

agreements related to fares) to total operating costs.

Farecard Refers to a paper pass to ride Metrorail. A pass is gate-

activated the first time it is used and prints the last valid date on the pass. Farecards contain a set value. Trip values are

subtracted from the farecard upon exiting the station gate.

Flash Pass Metrobus pass valid for unlimited use for a designated

seven-day period.

Four-point securement

system

Refers to an onboard securement system for wheelchairs, three-wheel and four-wheel scooters. The system incorporates four seatbelt type straps that attach to the frame of a mobility device as a way to keep it from moving or

rolling while on the bus.

FTA

(Federal Transit Administration)

A federal administration within the U.S. Department of Transportation. The FTA provides stewardship of combined formula and discretionary programs to support a variety of locally planned, constructed, and operated public transportation systems throughout the United States.

**GAAP** 

(Generally Accepted Accounting Principles)

Accounting standards, revised periodically, to which both private and public organizations within the United States are expected to conform.

General Manager

(GM)

The chief executive officer of Metro who reports directly to the Board.

Head sign Refers to the sign above the front windshield of a bus

describing the line number or letter, its line name, and

destination.

Headway (Frequency)

Refers to time intervals between vehicles moving in the same direction on a particular route. Headway can change on a line during the day as rider demand changes.

#### **JCC**

(The Jurisdictional Coordinating Committee)

The staff members from the jurisdictions supporting Metro. The JCC was established by the Board of Directors to facilitate the exchange of information between jurisdictions and Metro.

#### KPI

(Key Performance Indicator)

A measurement used to assess the performance of operations and support departments based on targets set for management and staff; financial and non-financial benchmarks used to monitor performance and efficiency.

Kiss and ride

Refers to an area within a station where commuters are driven by private car and dropped off to board Metrobus or Metrorail.

Kneeling bus
Also see Passenger lift

Refers to a feature on all buses that lowers the floor to the curb or to near-curb level to make it easier for passengers to board, especially for seniors and persons with disabilities.

Layover time (Also known as Spot time)

Refers to time built into a schedule between arrival and departure for bus drivers to rest; minimum times are set by union contract. Layovers normally occur at each end of a route to allow for a driver's break and schedule recovery, but they may be scheduled at other points to allow for timed transfer connections.

Liability

A debt or legal obligation arising from transactions in the past which must be liquidated, renewed or refunded at a future date.

Linked/Unlinked trip

A linked trip is where a rider may transfer between types of vehicles (e.g., Metrobus and Metrorail), or multiple stops, such as stopping at a daycare center or store along a commute trip. An unlinked trip is a passenger trip taken on a single vehicle, such as a single bus ride.

Loop

Refers to a portion of a bus line where the driver operates a segment in one direction only. Passengers may only board on one side of the loop. Loops are sometimes required due to lack of pavement accessibility, or when no off street turnaround is available.

## Loudoun County Transit

The weekday bus service from Loudoun County, Virginia to Washington D.C., the Pentagon and Rosslyn from stops in Purcellville, Hamilton, Leesburg and Sterling. A reverse commute bus service is from West Falls Church to Loudoun County.

#### **MARC**

(Maryland Area Regional Commuter) A commuter rail system whose service areas include Harford County, Maryland; Baltimore City; Washington D.C.; Brunswick, Maryland; Frederick, Maryland and Martinsburg, West Virginia.

#### **MDBF**

(Mean Distance Between Failures) A key performance indicator that measures performance for bus, rail and paratransit. It measures the probability of failure per unit of time of items in operation; sometimes estimated as a ratio of the number of failures to the accumulated operating time for the items.

### **MDBSI**

(Mean Distance Between Service Interruptions)

A key performance indicator that measures performance for bus, rail and paratransit. It measures the miles traveled between any incidents which caused the customer to transfer between bus/rail for any reason, i.e. maintenance, accidents, occurrences, etc.

Metro

The Washington Area Metropolitan Transit Authority.

MetroAccess

The operating unit of Metro that offers service for eligible people with disabilities who are unable to use regular accessible Metrorail, Metrobus and local bus service (fixed route). Federal civil rights legislation passed in 1990 that requires public transportation services to be accessible to, and usable by, persons with disabilities. In compliance, MetroAccess operates a fleet of over 500 vans and sedans. The vans are equipped with passenger lifts and wheelchair tie-downs.

Metrobus

The operating unit of Metro that offers bus service on 332 routes on 180 lines throughout the Metro region. Buses currently running are made by Orion, New Flyer, Neoplan and NABI.

Metrorail

The operating unit of Metro that offers a subway system that consists of 106.3 route miles (subway, aerial and surface) and 86 passenger stations and a fleet of over 1,100 rail cars.

#### Modified Accrual Basis

An accounting method that combines accrual-basis accounting with cash-basis accounting. Modified accrual accounting recognizes revenues when they become available and measurable and, with a few exceptions, recognizes expenditures when liabilities are incurred.

#### Multimodal

Refers to the availability of multiple transportation options, especially within a system or corridor. A multimodal approach to transportation planning focuses on the most efficient way of getting people or goods from place to place by means other than privately owned vehicles; by bus, trolley, light rail, streetcar, cable car, and/or ferry systems.

#### **MTA**

(Maryland Transit Administration) Refers to the bus, light rail, and subway services in Maryland. MTA also operates the MARC train service.

#### Next Bus

Refers to the application that uses satellite technology for Metrobus locations to track the arrival times for bus operators and customers.

#### Office

An organizational until that falls under the structure of a department.

# Operations Control Center (OCC)

The operations center that facilitates monitoring and communications for Metrorail operations.

#### Park and Ride

Refers to the parking facility available for riders at Metrorail stations.

# Passenger Information Display System (PIDS)

Refers to signs located on each platform and mezzanine of every rail station to provide information to let customers know when the next trains are scheduled to arrive, alert customers to service delays, provide information about elevator outages, and identify how to make free shuttle arrangements when elevators are out of service.

#### **Paratransit**

Refers to scheduled service for people who cannot use regular fixed-route bus service. MetroAccess uses vans and sedans to provide this service in the Washington Metropolitan area.

# Passenger lift

Also see Kneeling bus

A mechanical device, either a lift or ramp, that allows wheelchair or scooter users, as well as other mobility-impaired passengers, to board a bus without climbing the steps.

Peak service Refers to weekday a.m. and p.m. service during commute hours

> that carries a maximum number of passengers. For Metrorail, peak hours are defined as the time between opening and 9:30 AM in the morning, and between 3 PM and 7 PM at night.

Personnel Services Refers to expenditure in the operating budget for salaries and

wages paid for services performed by Metro employees as well

as fringe benefits costs associated with their employment.

Platform hours The total scheduled time a bus spends from pull-out to pull-in

> at the division. Platform hours are used as a benchmark to calculate the efficiency of service by comparing "pay to

platform" hours.

Refers to the budget prepared with preliminary estimates by the Proposed Budget

GM for the consideration of the Metro Board.

Programmed Reader A machine that is attached to the fare gate/fare box where

magnetic fare media can be read on Metrorail and Metrobus.

An increase in fund assets from operational activity such as Revenue

passenger fares, parking and advertising.

Revenue Bonds A bond on which debt service is payable solely from a restricted

revenue source.

**Revenue Hours** 

(Also known as Revenue

Service)

Refers to all scheduled time bus/rail spends serving passengers, which can also be defined as platform hours minus deadhead and

layover time.

Refers to passengers who enter the system through the payment Revenue Passengers

of a fare.

Revenue trip

Refers to any linked or unlinked trip that generates revenue by Also see Linked/Unlinked trip cash payment, use of a pass, and/or any other means of payment.

Ride-On Refers to Montgomery County regional bus transit system in

Maryland.

D	٨		
ĸ	А	J.	

(Riders' Advisory Council)

A committee established by the Metro Board. The council allows Metro customers an unprecedented level of input on bus, rail and paratransit service. The 21-member council includes six representatives from Maryland, Virginia, and the District of Columbia, two at-large members, and the chair of Metro's Accessibility Advisory Committee.

## Round trip

(Also known as a cycle)

Refers to one inbound, plus one outbound trip (unless a loop route), equals one round trip or cycle.

"Slinky" bus

Also see Articulated bus

Refers to a nickname used by many passengers for the articulated bus.

SmartTrip<sup>®</sup>

Refers to a technology built and designed by Cubic Transportation Systems, Inc., a subsidiary of San Diego-based Cubic Corporation to add and deduct value from an electronically encoded card when a rider passes the card near a programmed reader on Metrobuses and at fare gates on Metrorail.

SmartStudent Pass

A monthly pass for unlimited travel on Metrobus and Metrorail for students under the age of 19 years of age who live and attend school in the District of Columbia.

Strategic buses

Refers to spare buses available for service in the event that a bus in route becomes out of service.

Subsidy

Refers to funding received from jurisdictional funding partners in the Washington Metropolitan area consisting of Washington, D.C., suburban Maryland (Montgomery County and Prince George's County) and Northern Virginia counties of Arlington, Fairfax and Loudoun and the Cities of Alexandria, Fairfax and Falls Church.

**TheBus** 

Prince George's County, Maryland weekday bus service to Metrorail Stations.

Transit advertising

Refers to ads posted on the exterior and interior of buses and rail cars.

TSI

(Transportation Safety

*Institute*)

A Federal Transit Administration-sponsored institute that conducts a full range of training programs in rail and bus safety and accident investigation.

#### Trunk line

A route operating along a major corridor that carries a large number of passengers and operates at headway frequencies of 15 minutes or less.

#### **VRE**

(Virginia Railway Express)

The commuter rail service that connects the Northern Virginia suburbs to Union Station in Washington, D. C., via two lines: the Fredericksburg Line from Fredericksburg, Virginia, and the Manassas Line from Broad Run/Airport station in Bristow, Virginia.

#### **WMATA**

(Also known as Metro)

Refers to the acronym used for Washington Metropolitan Area Transit Authority serving the Washington Metropolitan area which consists of Washington, D.C., suburban Maryland (Montgomery County and Prince Georges County) and Northern Virginia counties of Arlington, Fairfax and Loudoun and the cities of Alexandria, Fairfax and Falls Church.
