

ADVANCE NOTICE

Bus Shelter Replacement Program at Bus Loops System-Wide

The Washington Metropolitan Area Transit Authority (WMATA/Metro) is preparing to issue an Invitation for Bid (**IFB No. FRBIR255013/ALS**) to award a contract for bus shelter assembly and installation to advance the replacement of shelters pursuant to a newly developed set of performance specifications.

Background

The Washington Metropolitan Area Transit Authority (WMATA) is a public agency responsible for providing mass transit service to the Washington Metropolitan area and surrounding communities. WMATA operates fixed bus routes and rail services.

Bus Shelter Design

Constructed Bus Shelter

Opportunity

- Assemble and install new Bus Shelters in total quantity of **one hundred and ninety seven (197) units at twenty-seven (27) sites**.
- Bus shelter components shall be provided via a separate contract (by others) working in conjunction with this Design-Build Contract.
- The Builder will be responsible for assembly, installation, and to coordinate ordering of materials through the WMATA Contracting Officer's Technical Representatives (COTRs) for delivery to support both the assembly and installation. Additionally, some design related to site improvements such as concrete repair, conduit installation, and cabling maybe required at each site as identified by the Builder.

- Work within the Limits of Disturbance (LOD) for each includes, but is not limited to: Maintenance of Traffic, Demolition of existing bus shelters, replacement of concrete pads/foundations, electrical connections, and restoring of any disturbed area(s).
- Awarded firm will be required to take physical delivery of shelters from manufacturer and warehouse within 40 miles of 300 Seventh St SW, Washington, DC 20024.
