

**WMATA RFQ17-215 CY**  
**Amendment 0003**

Amendment 0003 is issued to publish the following Q&A dated August 18<sup>th</sup>, 2017.

**Question:**

Being that it appears this is a custom fixture and not in our standard catalog of products, it seems from the RFQ that we can provide fixture cut sheets and supplementary documents showing that we have complied with the individual requirements of the specs from other products we have produced. Is this correct?

**Answer:**

Yes

**Question:**

Please comment on timeline for sample.

**Answer:**

As stated in the RFQ documents it is WMATA's intention to pre-qualify manufacturers for each fixture category and for manufacturers to submit cut sheets of existing fixtures which most closely demonstrate the manufacturer's ability to meet the requirements outlined in the RFQ and specifications. Manufacturers selected to provide a sample will have up to 10 calendar days to provide a standard "off the self" fixture sample that the manufacturer believes demonstrates their ability to produce the fixture as specified by WMATA's requirements. The provided sample is not required to be a prototype of the requirements outlined in the RFQ and specifications.

At this time, there is not a Project. The sole purpose of this RFQ is to pre-qualify manufacturers that can produce LED fixtures for WMATA in anticipation of a future project.
