

Monitoring Report

WMATA Bus Garage Monthly Report

March 2023

Noise Exceedances:

There continues to be numerous noise level exceedances at all hours of the day and all days of the week. Mic1 had 36% of its exceedances outside of working hours. Mic 2 recorded the highest noise levels of any location which were highest after working hours and on weekends. Mic3 had 25% exceedances coming outside of working hours. Mic4 35% exceedances coming outside of working hours. Mic5 had the had most exceedances with 51% coming outside of working hours.

Vibration Exceedances:

During the monitoring period there was one vibration exceedance event. Please see the date, time, and magnitude outlined below. Note the VM1 and VM 2 are set to flag an exceedance at a value on 0.2 inch per second (IPS) to alert for potential damage at the historic façade. This value is 1/10 of the value recognized for potential damage to sheetrock/plaster for adjacent properties and all exceedance readings are significantly below the 2 IPS threshold.

VM Sensor 1

VM-2 PVS 3/4/2023 12:13 1.2238

The exceedance of this magnitude on this date, was due to the instrumentation being struck inadvertently by a piece of equipment working adjacent to the instrument.

Air Quality/Dust Monitoring Exceedances:

There were 3 events during the March monitoring period. Of the three, DM 2 experienced a peak magnitude 44 micrograms per cubic meter on March 30. Please see the date, time, and magnitude outlined below.

DM Sensor 2

DM2_PM2.5 3/30/2023 6:25 44

DM Sensor 3

DM3_PM2.5 3/27/2023 11:38 41

DM3_PM2.5 3/27/2023 11:53 42

The exceedance on 3/30/2023 was outside of construction hours and is believed to be due to wind/outside factors associated with storms experienced in the region that evening.
