

Rockville Canopy Replacement Project

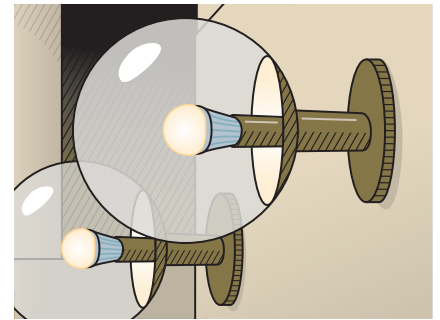

August 2021

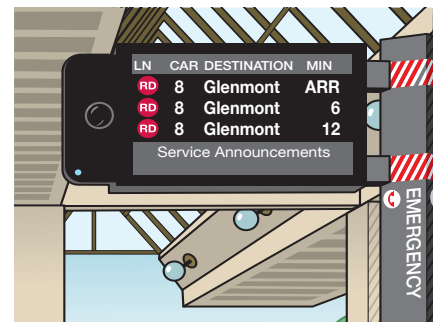

Overview

Metro will demolish and rebuild the aging concrete canopy structure over the Rockville Station platform, which needs repairs due to the progressive corrosion and roof leaks. As a result, Shady Grove and Rockville stations will be closed from Sept. 11-Dec. 4, 2021. Free shuttle bus service will be provided for riders at the closed stations.

Once the project is completed, customers will benefit from a brand new canopy, made with weatherproof glass fiber reinforced concrete (GFRC). Additional customer experience improvements will also be made to the canopy, including new, more efficient LED lights, an upgraded speaker system for station announcements, new digital screens for passenger information and new CCTV cameras for improved security.

Improved lighting

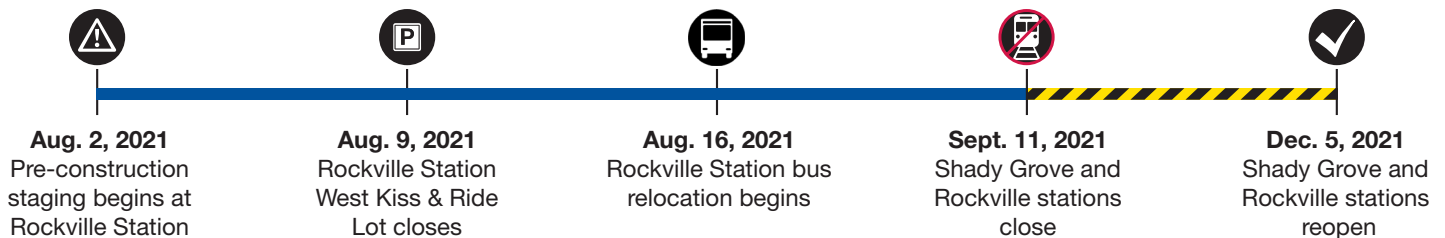

New Passenger Information Displays (PIDs)

Capital Improvement Program

The Rockville Canopy Replacement Project is funded through Metro's 6-year, \$12.3 billion Capital Improvement Program, which invests in system safety, reliability and the region's economy. Metro's capital investments are organized into six major categories, with this project part of the Track and Structures Rehabilitation category.

Project Timeline*

*During the station closures, construction will occur 24/7.
