

# Our Winter Shutdown is complete — one day ahead of schedule and under budget!

Here's what we accomplished by the numbers:

- **3,200** feet of track bed cleaned, enhancing safety and performance.
- **2,800** feet of restraining rail removed, improving track geometry for smoother rides.
- **2,340** feet of rail replaced, improving reliability and safety.
- **1,824** fasteners and 1,278 studs replaced, ensuring tracks are securely held in place.
- **932** linear feet of new grout pads, stabilizing track infrastructure.
- **197** square feet of concrete restored, reinforcing station and track structures.
- **78** insulators and 45 insulator pads replaced, protecting and stabilizing the powered third rail.
- **14** leaks stopped, improving water management and keeping tunnels dry.
