General Manager's Message

There are times when the best way to move forward is really to go back to basics. In the coming years, we must rebuild the pillars of Metro. We must rebuild our safety program, service reliability and customer service program, as well as reinforce our financial foundation.

This budget was developed with great attention being paid to the rebuilding effort and specifically to our three pillars. This budget also started with the guidance of the Metro Board and reflects great consideration to the preferences of our passengers, who told us clearly that continued safe service was their paramount concern.

We have already taken a number of decisive actions to satisfy our most pressing safety priorities, including implementing recommendations of the National Transportation Safety Board. This budget allows us to continue this important work, and also puts us on a path to establishing an organizational safety culture that is dedicated to preventing incidents before they ever occur.

In the coming year we will continue advanced training by the Transportation Safety Institute for employees in our safety department and throughout the organization, to ensure we are keeping up with the latest advances in transit safety. We will complete the implementation of our Safety Measurement System, which will allow us to rigorously track, identify and monitor progress on addressing existing and potential safety concerns. We will conduct the training needed to implement an improved Roadway Worker Protection Program and the newly revised rulebook for rail operations, and we will institute a suicide prevention program.

Along with all of these initiatives that will help build our safety culture, we are also enlisting the involvement of our employees, who are our eyes and ears for safety. This year, we will communicate our reinforced Whisteblower policy, encourage continued use of our newly established hotline and begin work to establish a program and procedures for the reporting of near misses without punitive consequences.

Of course, the heart of Metro is the trains, buses and infrastructure, which we have also started rebuilding. This year, thanks to additional funding contributions from the federal government and jurisdictions, Metro is embarking on one of the largest capital budget programs since its completion.

The primary focus of the nearly \$1 billion allocated in FY2011 is repairing our core infrastructure, which ultimately will mean a safer and more reliable service for the millions of travelers who depend upon us.

Among the important customer amenity and service work that will continue in the next year is the repair of our escalators and elevators. In the coming years on the Red Line, we will rehabilitate 46 escalators and 22 elevators, and we will replace another six

escalators. Our future plans also involve the replacement of three escalators and the rehabilitation of 90 escalators and 22 elevators on the Blue and Orange Lines.

To improve the reliability for our rail customers, we will continue the project to upgrade portions of the Red Line between Dupont Circle and Silver Spring Metrorail stations and we will begin the upgrade of the Blue Line between Ronald Reagan Washington National Airport and Stadium-Armory Metrorail stations.

For our bus customers, we are putting new buses in service. We are also rehabilitating bus garages, the oldest of which is over a century old, and we will move forward on replacing the Royal Street, Southeastern and Southern garages as part of our long-term capital plan.

Our success in improving safety and reliability truly hinges on our ability to reach our third goal, which is to create stable financing for Metro. This year, marks the start of a budget that was made possible through cost reductions, increased revenue provided by customers, continued contributions by our partner jurisdictions, federal grants, and funds from the American Recovery and Reinvestment Act. This year also marks the first year of a new six-year capital funding agreement, which allowed for the \$1 billion FY2011 capital program.

Ultimately, though, we must initiate a regional discussion of Metro's long-term fiscal outlook to identify both challenges and solutions. Concurrently, we will be working to fully integrate the financial and mission critical systems to reinforce accountability and transparency for Metro.

There is much to do in the year ahead. As we move forward, we appreciate the assistance from our funding and oversight partners, and most of all we appreciate the support of our riders. Providing safe and reliable transit service to our riders is the Metro mission at its most basic, and the basics will continue to move us forward.

K. Sale

Richard R. Sarles General Manager

Chapter 1. Introduction to the Washington Metropolitan Area Transit Authority

Metro Profile

History in Brief

Metro was created in 1967 by interstate compact creating a tri-jurisdiction operation. Construction of the Metrorail system began in 1969 and the first phase of Metrorail operation began in 1976.

Metro added a second transit service to its network in 1973 when, under direction from the U.S. Congress, it acquired four area bus systems and created Metrobus.

In 1994, Metro added a third transit service when it began providing MetroAccess, a paratransit service for people with disabilities unable to use fixed route transit service.

Metro completed the originally planned 103-mile Metrorail system in early 2001. In 2004, Metro expanded the system, opening the Blue Line extension to Largo Town Center and New York Ave-Florida Ave-Gallaudet U station on the Red Line. The expansion brought the Metrorail system to its current 86 stations and 106 miles.

Metro Facts

- Metro maintains the second largest rail system, the sixth largest bus system and the sixth largest paratransit service in the nation.
- Metro service area size is 1500 square miles with a population 3.5 million people.
- FY2011 budget is \$2.2 billion with an operating budget of \$1.5 billion and a capital budget of \$0.7 billion.
- Known as "America's Transit System," average weekday passenger trips on Metrorail and Metrobus total nearly 1.2 million.

- Metro has spurred over \$25 billion of economic development at or adjacent to Metro property.
- More than half of Metrorail stations serve federal facilities and approximately 40 percent of Metro's peak period customers are federal employees.
- Metro's transit zone consists of the District of Columbia, the suburban Maryland counties of Montgomery and Prince George's and the Northern Virginia counties of Arlington, Fairfax and Loudon and the cities of Alexandria, Fairfax and Falls Church.

Metrobus

Metrobus operates bus service on 320 routes on 135 lines throughout the Metro region utilizing 12,000 bus stops and 2,398 shelters. All buses are accessible to people with disabilities and bike racks are available for use on all buses. The entire bus fleet is equipped with two-way radio links to the operations control center, emergency radio silent alarms, and automatic vehicle locators. The Next Bus service provides customers information on Metrobus arrival times at a particular bus stop. It uses satellite technology to find specific locations of a bus and sends the estimated arrival time of the bus to customers via mobile devices. In addition, security cameras are installed on 803 buses. Currently, the fleet comprises 1,480 buses of varying sizes and capacities. In FY2009, more than 133 million trips were taken on Metrobus.

Metrorail

The Metrorail system is a rapid transit system that consists of 106.3 route miles and 86 passenger stations and a fleet of over 1,100 rail cars. Service is operated from 5 AM to midnight Monday through Thursday, from 5 AM to 3 AM on Friday, from 7 AM to 3 AM on Saturday, and from 7 AM to midnight on Sunday. In FY2009, Metrorail provided more than 222 million passenger trips. The system comprises three main types of structures: subway, surface and aerial. The subway (or underground) sections consist of 50.5 route miles and 47 stations. The surface sections comprise 46.31 miles and 33 stations, and the aerial sections consist of 9.22 route miles and 6 stations. While there are three types of structures, they operate as one unified system with seamless service to the passenger.

Metrorail service is operated over five lines: Blue, Green, Orange, Red and Yellow. All Metrorail stations and rail cars are accessible to positions with disabilities. There are 588 escalators and 235 elevators in the Metrorail system. The Wheaton Station on the Red Line has the longest escalator in the Western Hemisphere, at 230 feet long. The Forest Glen Station, also on the Red Line, is the deepest station in the system (196 feet or 21 stories) with high speed elevators that take less than 20 seconds to travel from the street to the platform.

The system is extensively equipped with communication systems that facilitate the flow of information to and from the passenger. All stations are equipped with digital signs

that show next train arrival times, system status and time of day. The system operations control center is equipped with two-way radios for constant communication with all train operators in service, as well as hotlines to police and fire departments in all of the jurisdictions served by Metro. Public address systems on all trains and platforms facilitate communications from Metrorail train operators and station managers. Also, passenger-to-train operator intercoms are located inside all rail cars, one at each end, and there are passenger-to-station manager intercoms on all station platforms and landings and in all elevators.

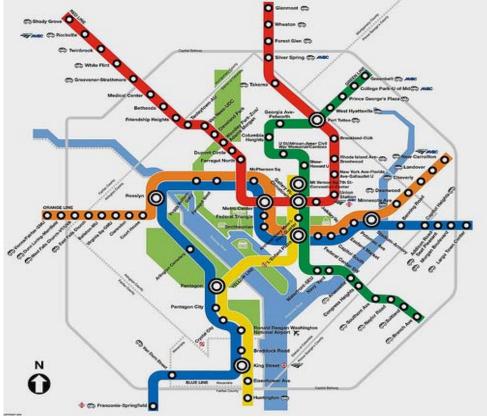

Sequence of Metrorail Openings

Metro began its construction of the Metrorail system in 1969 and the first phase of Metrorail operation began in 1976. The first line opened was the Red line consisting of 4.5 miles from Farragut North to Rhode Island Avenue. By July 1977, the Blue and Orange lines were added with service between National Airport and the Stadium-Armory. This added 11.8 miles and 17 new stations to Metro's rail operation. With continued development, in 1983 the Yellow line was added with service from Gallery Place-Chinatown to the Pentagon, adding 3.3 miles and one station. In 1991, the Green line was added providing service from Gallery Place to U St/African-American Civil War Memorial/Cardozo. In 2004, the current system was completed with the openings of the Largo Town Center and the New York Avenue stations on the Blue and Red lines, respectively. Currently, the Silver line, along the Dulles corridor, is being constructed in two phases. Phase One is scheduled for opening in 2014 adding four stations to Metro's rail operations. For Phase Two, an additional 6 stations are expected to open in 2016. For additional details of the Metrorail system, please see the table and the maps below.

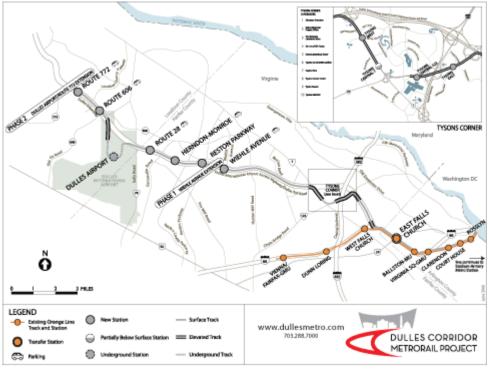

Table 1.1	
Sequence of Metrorail Openings	

Line	Segment	Stations	Miles	Date

Existing Metrorail Map

Future Silver Line/Dulles Corridor Metrorail

MetroAccess

MetroAccess is a shared-ride, door-to-door paratransit service for people whose disability prevents them from using bus or rail. The MetroAccess system operates a fleet of over 600 vans and sedans and provides 2.1 million passenger trips annually. Service is available seven days a week, from 5 AM to midnight Monday through Thursday, from 5 AM to 3 AM on Friday, from 7 AM to 3 AM on Saturday, and from 7 AM to midnight on Sunday.

Metro Board of Directors and Agency Oversight

Board of Directors

Metro is governed by a 16-member Board of Directors composed of eight voting and eight alternate members. Maryland, the District of Columbia, Virginia and the federal government each appoint two voting members and two alternate members. Below is the existing Board.

Peter Benjamin, Chairman, joined the Metro Board in April 2007 as Principal Director, representing Montgomery County, Maryland. Mr. Benjamin previously served as Metro's Chief Financial Officer from 1993-2006.

Catherine Hudgins, First Vice Chairman, joined the Metro Board in January 2004 as an Alternate Director, representing Fairfax County, Virginia. She now serves as a Principal Director. Mrs. Hudgins was elected to the Fairfax County Board of Supervisors in November 1999.

Neil Albert, Second Vice Chairman joined the Metro Board in October 2008 as a Principal Director, representing the District of Columbia. He is the District of Columbia's City Administrator.

Mortimer L. Downey joined the Board in January 2010 as the first member appointed by the federal government. Since 2001, he has been a transportation consultant, working on a wide variety of institutional, financial and organizational issues for public and private clients both foreign and domestic.

Elizabeth M. Hewlett joined the Metro Board in April 2007 as a Principal Director, representing Prince George's County, Maryland. She is currently a partner in the law firm of Shipley, Horne & Hewlett, P.A.

Christopher Zimmerman has served on the Metro Board as a Principal Director, representing Arlington County, Virginia, since January 1998. He has been a member of the Arlington County Board since 1996.

Jim Graham joined the Metro Board in January 1999 and represents the District of Columbia as a Principal Director. Mr. Graham serves on the Council of the District of Columbia, representing Ward One.

Gordon Linton joined the Metro Board in May 2004 as Alternate Director representing Montgomery County, Maryland. Mr. Linton is a Senior Advisor and owner of 200consult Transportation Solutions.

Jeffrey C. McKay joined the Metro Board in January 2008, as an Alternate Director from Fairfax County, Virginia. Mr. McKay currently serves on the Fairfax County Board of Supervisors and represents the Lee District.

Anthony R. Giancola joined the Metro Board in February 2007, as an Alternate Director representing the District of Columbia. Since 1993, he has served as the Executive Director of the National Association of County Engineers.

Marcel C. Acosta joined the Metro Board in January 2010 as an Alternate Director representing the federal government. Mr. Acosta is the Executive Director of the National Capital Planning Commission (NCPC), the federal government's central planning agency for the National Capital Region.

Marcell Solomon joined the Metro Board in March 2003 as an Alternate Director from Prince George's County, Maryland. Mr. Solomon currently practices law at Solomon & Martin in Greenbelt, Maryland.

William D. Euille joined the Metro Board in July 2000 as an Alternate Director representing the City of Alexandria, Virginia. Mr. Euille is currently the Mayor of Alexandria and has served on the Alexandria City Council since May 1994.

Michael A. Brown joined the Metro Board in November 2008 as an Alternate Director, representing the District of Columbia. He serves as an At-Large Member of the Council of the District of Columbia, and he is currently the Managing Director for Government Affairs at the law firm of Edwards, Angell, Palmer & Dodge.

Agency Oversight

Metro is overseen by both internal and external office/committees; these are:

- The Office of Inspector General (OIG)
- The Riders' Advisory Council (RAC)
- The Jurisdictional Coordinating Committee (JCC)
- Accessibility Advisory Committee (AAC)

Metro Office of the Inspector General

The Office of Inspector General (OIG), authorized by the Metro Board of Directors in April 2006, supervises and conducts independent and objective audits, investigations, and reviews of Metro programs and operations to promote economy, efficiency, and effectiveness, as well as to prevent and detect fraud, waste, and abuse in such programs and operations. The Inspector General provides advice to the Board of Directors and General Manager to assist in achieving the highest levels of program and operational performance in Metro. Helen Lew, Metro's first Inspector General, has served in that capacity since May 2007.

Riders' Advisory Council

On September 22, 2005, the Metro Board established a Riders' Advisory Council (RAC). The council allows Metro customers an unprecedented level of input on bus, rail and paratransit service. The 21-member council includes six representatives from Maryland, Virginia, and the District of Columbia, two at-large members, and the chair of Metro's Accessibility Advisory Committee. Francis DeBernardo currently serves as chairman.

Jurisdictional Coordinating Committee

The Jurisdictional Coordinating Committee (JCC) consists of staff members from the jurisdictions supporting Metro. The JCC was established by the Board of Directors to facilitate the exchange of information between jurisdictions and Metro staff. Meeting agendas are established by Metro staff and the JCC chairman and include items referred by the Board or Metro staff, as well as items requested by JCC members. Aaron Overman, representing the District of Columbia, currently serves as JCC chairman.

Accessibility Advisory Committee

Metro's Accessibility Advisory Committee (AAC) was created to address the needs of senior citizens and customers with disabilities. Its efforts have resulted in numerous service upgrades including gap reducers, which make it easier for customers who use wheelchairs to board Metrorail trains. Patrick Sheehan currently serves as chairman.

Tristate Oversight Committee

Metro's Tri-state Oversight Committee (TOC) was created by state-level agencies in Virginia, Maryland and the District of Columbia to jointly oversea rail safety and security at Metro. The TOC reviews and approves Metro's safety and security plans, rail accident investigation procedures and final accident reports and conducts audits among other oversight activities. In addition, the TOC independently evaluates the overall compliance of Metro's rail safety and security efforts with its plans and procedures. In doing so, this committee fulfills the states' responsibilities under 49 Code of Federal Regulations, Part 659, which requires such oversight programs for rail transit systems like Metro that receive federal funding. For any deficiencies identified by TOC, Metro is required to propose corrective action plans for TOC's approval and implement them to TOC's satisfaction. The committee is chaired by Matt Bassett.

Metro's Strategic Plan

The vision of Washington Metropolitan Area Transit Authority (Metro) is "Rebuilding the Foundation". The primary mission of Metro which flows from its vision is to provide the nation's safest transit service to our customers and improve the quality of life in the Washington metropolitan area. In achieving this overarching mission Metro has received praise as well as criticism regarding strategic planning. Metro does not appraise the criticism or praise lightly. To address Metro's dynamic operating environment, the Board of Directors is revising the strategic plan. Currently, Metro has established a strategic framework in which to provide direction to achieve its mission. Metro has identified five strategic goals and twelve concrete steps (objectives) to achieve these goals.

- Vision: Rebuilding the Foundation
- **Mission:** Provide the nation's best transit service to our customers and improve the quality of life in the Washington metropolitan area.

Values:

- Safety and Security
- Professionalism
- Integrity
- Continuous Improvement
- Respect for All

Goals 1. Create a Safer Organization 2. Deliver Quality Service 3. Use Every Resource Wisely 4. Retain. Attract and Reward the Best and the Brightest 5. Transit Regional Planning

The Washington Metropolitan Area encompasses over 4,000 square miles in the District of Columbia, suburban Maryland and Northern Virginia. The Washington Metropolitan region is home to five million people and three million jobs¹. The region's public transportation system is well used by residents, visitors and businesses, carrying six percent of daily trips and 17 percent of commuting trips in 2008¹. During the morning peak period, 43 percent of commute trips to the region's core use transit including 32 percent on Metrorail, eight percent on bus and three percent on commuter rail². Ridership on the Metro transit system has continued to rise in recent years; however ridership growth is now slower in the non-work transit use category and in the midday and evening off-peak periods. In FY2009, ridership on Metrorail and Metrobus reached 356 million trips annually.

Metro, as the primary transit operator providing service across state lines, is an integral member of the regional transportation planning process. Article VI of the Metro Compact gives Metro the power to adopt a Mass Transit Plan for the Metro service zone and directs Metro to participate in the region's continuous, comprehensive transportation planning process. Metro's regional planning function encompasses the preparation of transit system plans in partnership with other regional transit providers, conducting system-planning bodies, and participation in planning processes at the regional and sub-regional levels. Metro has a particular responsibility to ensure that the region's transit providers needs, both capital and operating, are reflected during the establishment of the Mass Transit Plan and that the region achieves a balanced system of transportation.

Metro coordinates with its regional partners to determine transit-based priorities and projects. The Metro Board of Directors, composed of members from the Compact jurisdictions, helps determine those priorities and provides policy direction. The Metro Jurisdictional Coordinating Committee (JCC) brings in the jurisdictions to coordinate on various budget and operational issues on a monthly basis. Internal planning and programming are designed to work within this institutional framework.

The National Capital Regional Transportation Planning Board (TPB) is the federally designated Metropolitan Planning Organization (MPO) to coordinate transportation planning and funding. The TPB serves as a forum for the region to develop transportation plans, policies and actions, and to set regional transportation priorities through the Financially Constrained Long Range Plan (CLRP) and the 6-Year Transportation Improvement Plan (TIP). The TPB also provides technical resources for planning and policy making. Metro is one of the implementing agencies in the TPB planning process and is a voting member of the TPB. Metro is also an active member of the TPB Technical Committee and several subcommittees such as Travel Forecasting, Bicycle and Pedestrian, Regional Bus, and Regional Transportation Demand Management (TDM) Marketing.

In addition to activities at the TPB, Metro coordinates with jurisdictional partners in multiple venues. The Northern Virginia Transportation Authority (NVTA) is responsible for developing a Northern Virginia Regional Transportation Plan, allocating transportation funds and providing interagency coordination in Northern Virginia. The Northern Virginia Transportation Commission (NVTC) coordinates transit finance and operations in Northern Virginia. Metro works with both NVTA and NVTC on important transit funding and corridor development initiatives to enhance public transit service and ensure integration of transit in highway investments.

Demographics

The population of the jurisdictions served by Metro totals five million people and includes four counties, three independent cities and one federal district¹. This area makes up most of the Washington Metropolitan area, the ninth largest metropolitan area of the country. As per the 2007 Census survey, the demographic profile of the Washington Metropolitan area is as follows:

- 51.7 percent of the population is White Non-Hispanic
- 26.3 percent is African American
- 11.6 percent is Hispanic
- 8.4 percent is Asian
- 2.0 percent is Mixed-Other

Between 2003 and 2007, the area grew by more than 275,700 people, 5.5 percent. In terms of education, 42.5 percent of Washington-area residents have a bachelor's degree and 19 percent have a graduate degree; the area also claims the highest percentage of PhDs nation-wide, at 2.5 percent of the population.

Economy

Employment in the Washington Metropolitan Statistic Area (WMSA) peaked in 2008 reaching 3.16 million jobs by June 2008. Since then, the region's employment experienced a slight decline due to the economic downturn that followed, presently at 3.10 million jobs. It is anticipated the total employment in the region will gradually bounce back to approximately 3.14 million jobs by late FY2011³.

Organizational Structure of Metro

Metro consists of the Board of Directors; four independent departments; four operational departments, Metrobus, Metrorail, MetroAccess and Transit Infrastructure and Engineering Services (TIES) of which three are headed by the Deputy General Manager of Operations (DGMO); four administrative departments, Financial Services, Human Resources, Planning and Joint Development and Information Technology headed the Deputy General Manager of Administration/Chief Financial Officer (DGMA/CFO); Safety; Metro Transit Police and Communications, Marketing and Customer Service. The FY2011 Operating Budget, structure, and staffing are summarized in the budget summary, organization chart and the staffing summary.

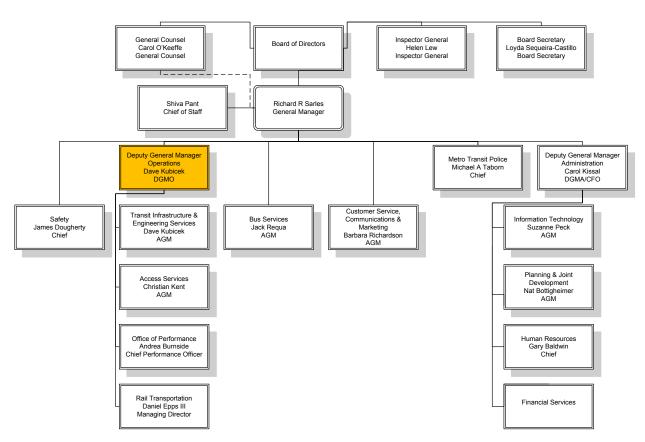

Overall, the FY2011 operating budget increased by 6.5 million or 6.3 percent over the actual for FY2010. This is due primarily the budgeted increase of 6.0 percent in personnel costs for FY2010 and FY2011 for the unionized staff along with the increased staffing level of 1.1 percent.

Organization Chart

Human Capital Summary

Human capital is a way of defining and categorizing peoples' skills and abilities and how they are used to accomplish the goals and objectives of the organization. At Metro, the management of human capital involves workforce planning, focuses on a renewable resource, involves investment, and is aligned with the strategic plan and integrated with the core mission of "Rebuilding the Foundation".

Human capital is not just the number of people employed, but the various costs associated with such employment — often referred to as personnel costs. Personnel costs at Metro fall into one of two major categories: labor or fringe benefit costs.

Labor costs make up approximately 70 percent of all personnel costs. Labor costs include regular and overtime pay for operations employees, as well as salaries for management, professional, and administrative personnel. The FY2011 labor budget is \$786.4 million.

Fringe benefit costs at Metro comprise the personnel-related expenses incurred by an employer that are above and beyond the cost of employee pay. Metro's fringe benefits are comprised of the health insurance and pension plans required to attract and retain a large professional workforce, plus government mandated costs such as unemployment insurance and payroll taxes. The FY2011 fringe benefits budget is \$344.2 million.

The Board approved staffing for FY2011 IS 10,974, consisting of 10,372 operating positions and 602 capital funded positions. Summarized in Table 1.2 is the breakdown by department and the staffing levels for FY2009, FY2010 and FY2011.

For FY2011, 121 positions were added or 1.1 percent over FY2010. The change in the work force is a combination of a reduction in force, predominantly in administration, new positions mainly in the capital area, and the reorganization of Metro. To balance the budget for FY2011, there was a reduction in force mainly in the Department of Financial Services (CFO) by 24 positions or 7.0 percent, Information Technology (IT) by two positions or 1.0 percent and Planning & Joint Development (PLJD) by 13 positions or 22.8 percent. In order to emphasize safety at Metro, there was an increase in staffing in the Department of Safety (SAFE) by 28 or 93.3 percent. Following the reorganization in August 2010, there was an increase in staffing levels in the Department of the Deputy General Manager of Operations (DGMO) and the Department of Customer Service, Communication and Marketing (CSCM) by 33 persons or 67.3 percent and 65 persons or 84.4 percent, respectively. The transfers to the DGMO are based mainly on transfers from Transit Infrastructure and Engineering System (TIES) while there was also a transfer of the Office of Customer Service to CSCM. Overall, Bus and Rail Services staff levels are expected to increase by 27 or 0.7 percent and 21 or 0.5 percent, respectively. In total, these staffing changes will enhance the safety of Metro as well as offer a higher level of customer service.

The average annual pay increased for FY2011 by \$4,904 or 7.3 percent. This is due to a 1.1 percent increase in staffing levels and a 3.0 percent budgeted increase for unionized staff.

Chapter 2. Budget Summary

BUDGET PROCESS

Metro begins planning its budget in August of the previous fiscal year. The budget is adopted in June and the fiscal year begins on July 1. Budgeting for the fiscal year is divided into four phases: budget formulation and preparation, budget reviews, budget adoption and budget implementation/amendments.

Budget Formulation and Preparation

- Initial planning, development of assumptions, preparation of instructions and training materials began in August.
- FY2011 budget kickoff meeting and system training classes were held with all departments in September 2009.
- Departments submitted their operating budget requests to the Office of Management and Budget Services (OMBS) in October 2009.

• Capital Program expense and labor requests were submitted by departments to the assigned budget office for approval prior to being included in the department's budget.

Budget Review

- The capital program was developed concurrently with the annual operating budget. Recommendations for the update to the Capital Program were reviewed with executive management in November 2009.
- Project and departmental level reviews of budget requests were completed in February 2010.
- Operating reviews were done by OMBS, executive leadership and General Manager.

Public Hearings

- Budget hearings took place in March 2010 and April 2010 for the participating jurisdictions in Maryland, Virginia and Washington, DC.
 - March 22 Fairfax, Virginia and Washington, DC
 - o March 24 Washington, DC
 - March 29 Prince George's County, MD
 - March 31 Arlington, VA
 - April 1 Washington, DC and Montgomery County, MD

Budget Approval/Adoption

- The proposed budget document was released to the Board of Directors and public in January 2010.
- The budget was discussed at the Finance and Administration Committee meeting in March, with authorization requested and granted on March 25, 2010 to conduct public hearings on mechanisms to fill a projected FY2011 budget gap.
- The Annual Budget, Capital Program and fare increases were approved and adopted at the June 24, 2010 meeting of the Board of Directors.

Budget Implementation

- The FY2011 budget is effective on July 1, 2010.
- Monthly budget variance reports are prepared by Financial Services to enable management to monitor and control the budget.
- Monthly fiscal reports are prepared by Finance and presented by the General Manager to the Board of Directors.
- These reports monitor financial performance and ensure compliance with the approved budget.

Amendments

- Budget amendments to the budget are presented to the Finance and Administration Committee
- The Board approves the amendments presented from the Finance and Administration Committee.

Budget Basis

The Budget is based upon the provisions of Generally Accepted Accounting Principles (GAAP), as applicable to government entities in the United States of America. Annual budgets are adopted in accordance with GAAP with the following exceptions:

- Depreciation and amortization is excluded, and
- Net actuarially determined post employment benefit obligation recognized under Government Accounting Standards Board (GASB) Statement No. 45, which was implemented by Metro in FY2008, has been excluded from the budget expenses. Such costs are included in operating expenses in the annual financial statements but are not budgeted.

Budget Policies and Procedures

Metro's annual budget serves as the foundation for its financial planning and control. The General Manager and staff prepare and submit the budget to the Board for approval. The annual budget consists of two budgets: an operating budget and a capital budget. For FY2011, Metro has an approved annual budget of approximately \$2.20 billion with the largest portion, \$1.45 billion, including debt service, dedicated to operating the system. The budget contains 10,974 authorized staff positions of which 10,372 are for operating and 602 for capital.

It is the responsibility of each department to administer its operation in such a manner to ensure that the use of the funds is consistent with the goals and programs authorized by the Board and that approved spending levels are not exceeded.

The annual budget is developed on the basis of the combination of two budget methodologies. Continuation level budgeting is used to develop the funding and resources necessary to sustain critical operating, special programs and previously approved capital projects. The agency uses incremental-cost budgeting methodology to determine resources for new programs and capital projects as well as general and administrative expenses. Metro's chart of accounts is reviewed and supplemented on an as-needed basis. In accordance with the Financial Standards, the Finance department monitors revenues and budget expenditures throughout the fiscal year.

Balanced Operating Budget

Metro is required to annually adopt a balanced budget operating budget where operating revenues and subsidies equal expected operating expenses for the fiscal

year. In accordance with Article VIII of Metro's Compact, the Board annually adopts a current expense budget for each fiscal year. Based on the Compact, such budget include the Board's estimated expenditures for administration, operation, maintenance and repairs, debt service requirements and payments to be made into any funds required to be maintained.

The total of such expenses is balanced by the Board's estimated revenues and receipts from all sources, excluding funds included in the capital budget or otherwise earmarked for other purposes. At the end of the fiscal year, if there is an operating deficit, the jurisdictions – Maryland, Virginia and Washington, DC are billed on July 1 for their respective contributions.

Metro's Enterprise Fund

The Enterprise Fund is the sole fund for Metro. Within the Fund, funds are classified in one of six categories: passenger fares and parking, Federal funds, state and local funds, business revenues, other sources and debt. Passenger fares and parking is the largest of the six categories. Federal funds consist of Federal grants and funds to support the capital program. State and local funds provide funding for the capital program, as well as debt service and the operating budget subsidy. Business revenues include funds such as advertising and joint development, among others.

Capital Budget

In accordance with Article VIII, paragraph 26 of Metro's Compact, the Board annually adopts a capital budget, including all capital projects it proposes to undertake or continue during the budget period, containing a statement of the estimated cost of each project and the method of financing.

Capital Expenditure

Capital expenditure is defined as expenditures creating future benefits. A capital expenditure is incurred when a business spends money either to buy fixed assets or to add to the value of an existing fixed asset with a useful life that extends beyond the taxable year.

Developing the Budget

Metro began the process of developing the FY2011 budget shortly after the adoption of the FY2010 budget. As part of the budget development process, FY2010 budget variances were studied and additional assumptions that needed to be modified were identified. Some of those assumptions were fuel prices, negotiated union wages and benefits and fare revenues.

Upon analysis of the FY2010 forecast data, Metro assigned targets to each department and held the department manager responsible for meeting the target. Simultaneously, Metro aggressively pursued additional Federal, state and local revenue and grants. The FY2010 budget was balanced through a combination of expense reductions, fare revenue increases and minor reductions in service levels.

BUDGET CALENDAR FY2011

August	
	 Initial planning, development of assumptions, preparation of instructions and training materials began in August 2009. Budget book for previous year's budget is prepared and published. Budget monitoring begins.
September	
	• A FY2011 budget kickoff meeting and system training classes were held with all departments in September 2009.
October	
	 Departments submitted their budget requests to the Office of Management and Budget in October 2009. Capital Program expense and labor requests were submitted by departments to the assigned project manager for approval prior to being included in the department's budget request to the appropriate Executive Officer.
November /December	
	 The Capital Program was developed concurrently with the annual operating budget. Recommendations for update to the Capital Program were reviewed with executive management in November 2009.
February	
	Presentation of proposed budget to the Board.

March/April	
	 Arranged, published dates in the newspaper and held public hearings in participating jurisdictions – Maryland, Virginia and Washington, DC.
	• Findings from public hearings put together and presented to the Board.
	Updated fare structure and fees.
]
May/June	
	Board discussion of budget proposals to fill budget gap.
	• Updated Operating and Capital Budgets were prepared for

- Board approval.
- Approval of the annual budget on June 24, 2010.

The \$2.2 billion annual budget, as adopted by the Board of Directors, is the authority to obligate and spend funds. It includes all operating, capital and debt service requirements of Metro for the fiscal year, July 1, 2010 to June 30, 2011.

The focus of the operating budget is on the people, supplies and services needed to operate Metrobus, Metrorail, and MetroAccess. Budgetary issues for the operating budget center on the cost of continuing operations, expanding services to meet growing demand, and improving efficiency of service. Funding for the operating budget comes primarily from passenger fares and subsidies from Metro's state and local government partners.

The capital budget comprises the assets and infrastructure needed to support the operations of bus, rail, and paratransit services. Assets and infrastructure include, but are not limited to, Metro's:

- Buses
- Rail cars
- Stations
- Track
- Maintenance facilities
- Power systems

Budgetary issues for the capital budget focus on the condition of Metro's current assets and infrastructure and what is needed to maintain them in a safe and reliable condition. Without the capital budget, the reliable, continuous and safe operation of each mode (Metrobus, Metrorail and MetroAccess) would not be possible, impacting the smooth execution of the operating budget. Funding for the capital budget comes from Federal grants, Metro's state and local government partners, and debt issuances. The underlying financial statements guiding this budget process have been prepared in accordance with Generally Accepted Accounting Principles (GAAP.) In accordance with Governmental Accounting Standards Board Statement No. 34 (Basic financial Statements – and Management's Discussion and Analysis – For State and Local Governments), all financial information is consolidated into business-type activities that make up Metro's sole fund, the Enterprise Fund. These businesses-type activities include transit operating and capital costs, infrastructure construction and debt activities.

FINANCIAL STANDARDS

The Financial Standards are divided into three sections: general, business planning and debt parameters. The purpose of the general standards is to ensure that Metro prudently manages its financial affairs and establishes appropriate cash reserves. The business planning parameters provide management with a framework for developing the following year's budget and other longer range financial plans and establishing future business targets for management to achieve. The purpose of debt standards is to limit the level of debt that may be incurred and to ensure that debt assumptions are based on financial parameters similar to or more conservative than those that would be placed on Metro by the financial marketplace. Actual debt covenants may differ from these standards. In accordance with the debt policy, the actual covenants will be disclosed in the Board report supporting debt issuance.

Financial Standards – General

<u>GAAP</u>

• Complete and accurate accounting records are maintained in accordance with Generally Accepted Accounting Principles (GAAP) as required by the Government Accounting Standards Board.

Revenue and Expenditure Recognition

- Revenues are recognized in the period that they are earned and expenses are recognized in the period in which they are incurred. Metro distinguishes between operating and non-operating revenues and expenses in its financial statements.
- The principal source of revenues is from passengers making up approximately 95.0 percent of revenues.

Fiscal Year

• The fiscal year-end for financial reporting purposes is June 30. The Board approves the budget for the following fiscal year by June 30 of each year.

Audited Comprehensive Annual Financial Report (CAFR)

 An independent certified public accounting firm performs an examination of Metro's consolidated financial statements, including Single Audit requirements. The goal is to receive an unqualified opinion on the financial statements and an opinion that Metro is in compliance with the Federal Single Audit requirements in all material respects and to receive the Government Finance Officers Association (GFOA) award for excellence in reporting.

Other Financial Policies and Guidelines

- Funds are invested within the guidelines of the Board's approved investment policies and in compliance with the investment guidelines in Metro's Compact.
- In accordance with Board Resolution No. 81-36, certain Metro officials are empowered to open, close or authorize changes to accounts and authorized to designate individuals as official signatories for financial accounts.
- An annual actuarial analysis is performed on all Metro-administered retirement plans. Based on the results of such analysis, Metro makes contributions as required in agreement with the terms of each plan.
- Appropriate insurance coverage is maintained to mitigate the risk of material loss. For self-insured retentions, Metro records the liabilities, including losses incurred but not reported, at 100 percent of the net present value.
- The budget includes operating, capital, and other components necessary to implement the policy directions contained in previously Board-adopted longer-term plans. The operating and capital budgets lapse at the end of one year. The budget is prepared in a fashion to clearly describe the projects and programs for the period.
- Metro engages in regional long-range transportation planning for the Washington Metropolitan area in conjunction with the National Capital Region Transportation Planning Board (TPB) and other jurisdictional partners. Staff provides transit system inputs to TPB for the Constrained Long-Range Plan (CLRP) and identifies changes affecting the major financial assumptions of the plan and progress toward the implementation of new projects and programs.

- Metro also engages in short-range transit planning for the Washington Metropolitan area. Staff provides inputs to the region's six-year Transportation Improvement Program (TIP) and identifies the capital investment needs to support the existing regional transit system and regional service expansion.
- Metro's management maintains a cost-effective system of internal control to adequately safeguard assets based cost of control against the expected benefit to be derived from its implementation.
- Management develops an audit plan each year prior to the adoption of the annual budget. The Board's Audit and Investigations Sub-committee provides input and approves the audit plan. Furthermore, completed internal audits are submitted to the Board via the Board's Finance and Administration Committee.
- Recommendations for improvements are based on audits performed by the Office of the Inspector General (OIG) that are performed in accordance with the generally accepted governmental auditing standards. These recommendations, management's action plans and progress toward implementation are periodically reported to directly to the Board. Semi-annual reports to the Board and significant stakeholders provide an overview of work performed by the OIG as related to the audit work plan.

Financial Standards – Business Planning Parameters

- Passenger revenue forecasts are derived from historical actual revenues. During periods affected by actual or proposed fare structure changes, the impacts on ridership and average fare forecasts are estimated conservatively.
- The Board reviews and updates the fare policy on a regular cycle. From time to time, management may propose fare modification to achieve transit ridership improvements and to maintain financial viability.
- Service plan assumptions for bus operations are based on demonstrated needs as defined through the short-range planning.
- Capital programs are funded according to the terms of the laws, regulations and/or discretionary procedures approved by the Board. The capital program covers Metro's assets including major transportation projects, and is included in

each annual budget. This includes funding for asset replacement and expansion projects.

- Metro applies for and receives discretionary Federal and state funding. Discretionary funding is requested for major system expansion projects or extraordinary transit capital needs. Discretionary funding levels are estimated by project, based on appropriate state and Federal criteria and the likelihood of obtaining approvals.
- The Board approves all discretionary state and Federal funding requests by project or program each year.

Financial Standards – Debt Policy

- Metro may not enter into a debt or financing arrangement unless the transaction is in full compliance with all applicable provisions of Metro's Compact.
- Pursuant to Metro's Compact, Article IX paragraph 27, Metro may borrow money in pursuit of its mission. All such bonds and evidences of indebtedness is authorized by resolution of the Board and is payable solely out of the properties of revenues of Metro. The bonds and other debt obligations of Metro, except as may be otherwise provided in the indenture under which they are issued, are direct and general obligations of Metro and the full faith and credit of Metro are pledged for the prompt payment of the debt service.
- There is no borrowing limit set in Metro's Compact.
- Long-term debt may be included in the budget or long range plans; however, no such debt is incurred without the specific approval of the Board.
- The average life of debt instruments is approximately equal to or less than the average of the useful lives of the assets financed.
- Reserve funds that may be required by the financial markets for each debt issuance are maintained. Cash and securities, insurance or surety bonds may fund these reserves. For financial planning purposes, reserve requirements are included in the face value of debt issued.

The sources of funding both the operating and capital budgets are broken down by categories. These categories are:

- Fares and parking (\$789.5 million)
- Federal funding (\$241.4 million unrestricted and \$150 million restricted)
- State and local jurisdictions (total of \$958.6 million, consisting of operating \$620.7 million, \$19.0 million operating reimbursable and capital \$320.9 million)
- Other revenue such as advertising, fiber optics and joint development projects (\$43.6 million)

SOURCES AND USES OF FUNDS

For FY2011, Metro had approximately \$239.8 million in funds carried forward from the capital budget. Metro plans to have a balanced budget for both capital and operating. This information is provided in the summary below.

Chapter 3. Sources of Funds

This chapter provides information on sources of funds for the Approved Fiscal Year 2011 Annual Budget. Also included is an explanation of the allocation of the operating subsidy and capital budget contribution provided to Metro by state and local government partners.

FISCAL YEAR 2011 APPROVED REVENUES

Total approved operating revenue for FY2011 is \$831.2 million, consisting of FY2011 baseline passenger revenues of \$626.6 million, fare increase revenue of \$108.1 million, baseline non-passenger revenue of \$95.8 million and non-passenger increase revenue of \$0.7 million.

Passenger Revenue

Based on the volatility in FY2010 revenues and ridership, the approved FY2011 budget used the FY2009 actual ridership as a base. This was appropriate because the revenue and ridership results for the first part of FY2010 for bus and rail were significantly below projections with minimal year-over-year growth. FY2010 actual revenue was anticipated to be at FY2009 levels; the current budget assumes ridership growth above the totals for FY2009 of two percent for rail and 1.5 percent for bus. However, because of fare and ridership initiatives implemented on January 8, 2008 and the second half of FY2009, adjustments have been made to annualize those fare initiatives and adjustments that affected passenger revenues in the approved FY2011 budget. The FY2009 initiatives included termination of fare integration, elimination of the \$0.90 rail-to-bus transfer discount, implementation of the balanced transfer, and elimination of paper transfers for all bus-to-bus trips not paid with a SmarTrip[®] card.

Non-Passenger Revenue

The economic downturn negatively affected some non-passenger revenue sources and made it difficult to negotiate favorable long term advertising contracts during FY2010. This trend is projected to continue through FY2011. The effect of the downturn at Metro is year-over-year decreases in some categories of non-passenger revenue. The approved budget includes less revenue in FY2011 than the previous year, primarily from deterioration in interest revenue and declining revenue from parking transactions, as well as less favorable revenue than in previous budget cycles for long-term contracts for advertising and advertising-related revenue.

Passenger Revenues

Total passenger revenue for FY2011 is \$734.7 million. This includes \$136.9 million in bus passenger revenue, \$592.0 million in rail passenger revenue, and MetroAccess revenue of \$5.8 million. Parking revenue for the year is budgeted at \$47.8 million, \$2.3 million less than the budget for parking revenues in FY2010. Other revenue, mainly from District of Columbia School subsidy, totals \$7.0 million inclusive of \$2.0 million in reimbursements (see Table 3.2).

Metrobus

Bus passenger revenue budget for FY2011 of \$136.9 million is \$20.2 million more than the approved budget for FY2010 of \$116.7 million. Actual FY2009 bus passenger revenue of \$111.3 million was adjusted for elimination of paper transfers and

implementation of the balanced transfer. The process of fare integration where \$14 million annually was transferred from rail passenger to bus passenger revenue was discontinued during the second half of FY2009, and was removed from FY2009 base revenue. However, the impact of revenue lost by discontinuing fare integration was offset by six months of revenue, or \$2.7 million, generated by implementation of the balanced transfer, and six months of revenue, or \$3.5 million, from the elimination of paper transfers. The balanced transfer on bus provides a discount off the bus fare for all rail-bus trips. This discount is provided to all rail-to-Metrobus trips, as well as all rail-bus trips on jurisdictions bus system for trips paid with a SmarTrip[®] card.

FY2011 base bus system ridership growth is budgeted at 1.5 percent above the total in FY2009 and is expected to generate revenue of \$1.7 million and 2.0 million additional bus trips from the FY2009 level of 133.8 million trips to 135.8 million trips for FY2011 (see Table 3.3).

The fare increase implemented on June 27, 2010 for the FY2011 budget year is budgeted to increase bus passenger revenue by \$24.7 million for the year, with a loss of 8.2 million bus trips, bringing total bus passenger revenue for F2011 to \$136.9 million with annual bus system ridership of 127.6 million trips.

Metrorail

Rail passenger revenue in FY2011 is \$592.0 million, \$66.1 million above the FY2010 budget of \$525.9 million. Before the effects of the rail fare increase, rail ridership for FY2011 was expected to grow two percent above the normalized total for FY2009 of 221.5 million trips by 5 million trips to 226.5 million trips, but the ridership losses associated with the fare elasticity of the June 27, 2010 fare increase is expected to reduce annual rail ridership by 6.5 million trips, bringing the budgeted rail ridership for the fiscal year to 220 million trips. This total is further reduced by the elasticity of the implementation of the peak-of-the-peak surcharge, bringing total budgeted rail ridership for FY2011 to 219 million trips.

Total rail revenue in FY2009 was \$506.2 million. This total included increased revenue and ridership from non-recurring events associated with the President Obama Inauguration and the revenue generated from the sale of additional fare media of \$6 million during that period. Conversely, total baseline revenue in FY2009 must also be adjusted by \$0.8 million to account for the revenue loss associated with the decrease of approximately 360,000 trips between June 22 and the end of FY2009 due to the June 22, 2009 Red Line accident. In addition, rail revenue for FY2009 was also annualized for the fare policy adjustments that took place on January 8, 2008. The first adjustment required adding back into rail revenue \$7.0 million that was transferred to bus revenue for fare integration between July and December, the first six months of FY2009. Additionally, \$4.5 million was removed from rail revenue to annualize implementation of the balanced transfer. The balanced transfer policy provides a discount of \$0.50 off the rail fare for all bus-rail trips. The annual off-set to rail revenue from this policy is \$9.0 million, \$5.5 million to Metrobus and the balance of \$3.5 million to jurisdictional bus systems (see Table 3.3).

Rail ridership growth is estimated to increase 5 million trips above the normalized FY2009 ridership of 221.5 million trips to 226.5 million trips. This is a revenue increase of \$11.4 million to the base revenue in FY2011, bringing the total to \$514.9 million. However, this normalized rail revenue, plus revenue growth must be adjusted for two factors; the proposed reduction in unused fare media reserve balance from \$28.1 million to \$17.0 million, a reduction of \$11.1 million, and additional revenue of \$6 million from the retirement of the elevator/escalator program debt, for a net decrease in revenue of \$5.1 million.

The fare increase that was implemented on June 27, 2010 for the FY2011 budget year is budgeted to increase rail passenger revenue by \$82.2 million for the year, bringing total bus passenger revenue for F2011 to \$592.0 million.

MetroAccess

MetroAccess passenger revenue is budgeted at \$5.8 million with 2.7 million trips. The July 27, 2010 fare increase package is budgeted to increase MetroAccess revenue by \$1.2 million.

Other Passenger Revenue

District of Columbia School Subsidy

The total District of Columbia School Subsidy for FY2011 is \$5.0 million, \$2.9 million for Metrobus and \$2.1 million for Metrorail. This revenue category also includes an additional \$2 million reimbursement for reduced fares in the District of Columbia.

Charter

Due to revised Federal Transit Administration (FTA) regulations implemented in April 2008, Metro is severely restricted from providing charter services. This service historically contributed approximately \$2 million annually to operating budget revenues, but was eliminated from the budget in FY2009.

Parking

Parking revenue for FY2011 is \$47.8 million, a reduction of \$2.3 million below the budgeted amount for FY2010 of \$50.1 million. This reduction reflects reductions in the use of the reserved parking program that occurred in FY2010, as well as low utilization of parking meters. The June 27, 2010 fare increase included no increase in parking rates, but increased reserved parking fees from \$55.00 to \$65.00, resulting in an annual revenue increase of \$0.5 million.

Advertising

The advertising contract for FY2010 expired at the end of the fiscal year, and a new contract was negotiated. The new contract amount for FY2011 is \$15 million, \$27 million less than advertising revenue in FY2010. This budgeted revenue includes two elements; the first is the minimum value of Metro's advertising inventory valued at \$13.0 million. The second component is the advertising component of what was the supplemental inventory from Safe Clean Reliable Funding (SCRF), valued at \$2 million.

Safe Clean Reliable Funding

The TIIF portion of Clean Safe Reliable Funding (SCRF) budget of \$7 million expired in FY2010. The advertising portion of this account earmarked for safety and customer services initiatives on the bus and rail systems is valued at \$2.0 million is included in advertising revenue as the supplemental advertising inventory.

Joint Development

The FY2011 Joint Development revenue allocated to the operating budget is \$6.5 million, an increase of \$0.7 million above the budgeted amount for FY2010.

Other Revenue

Other revenues in the approved FY2011 budget include vending, retail, pay telephones, cellular telephones, bike locker revenue, subrogation collections, car sharing revenue, neutral host, antenna revenue and employee parking. These combined revenue sources contribute \$4.6 million to the FY2011 non-passenger revenues.

The Southeastern Garage Offset Program which budgeted funds to offset the additional bus miles incurred due to the additional deadheading required for the replacement of the Southeastern Bus Garage has been discontinued. The budgeted amount was \$5.1 million in FY2010.

Car Sharing Revenue

FY2011 is the second year of car sharing revenue which is expected to generate slightly more than \$340,000 over the five years of the contract, for the use of car sharing spaces at Metro Kiss & Ride locations throughout the Metrorail system. The budgeted revenue for FY2011 is \$57,000.

Employee Parking

Employee parking revenue for FY2011 includes no change over FY2010, and reflects parking fees at the Jackson Graham Building which are consistent with parking fees at Metrorail parking facilities.

Interest Revenue

For FY2011, the approved budget for interest revenue is \$0.5 million. This is a decrease of \$2.6 million below the budgeted amount for FY2010 of \$3.2 million, due to declining interest rates.

Fiber Optics

Initiated in September 1986, the Metro Fiber Optic Program was designed to allow for the installation, operation and maintenance of a fiber optic-based telecommunication network which utilized the excess capacity within the Metro right-of-way. As part of the compensation package, Metro receives, in a separate fiber optic cable, a number of fibers for its own use. For FY2011, fiber optic revenue is \$14.8 million, an increase of \$2.7 million above the budget for FY2010 of \$12.1 million.

Fare Increase Revenue

For FY2011, the Metro Board of Directors approved a fare increase across all modes, along with several other changes to the Metro fare structure (see Table 3.4). This fare increase is budgeted to increase operating revenues by a total of \$108.8 million in FY2011, including \$82.2 million in rail revenue, \$24.7 million in bus revenue, \$1.2 million in MetroAccess revenue, and \$0.7 million from other revenue sources.

Metrorail Fare Increase

The approved fare increase on Metrorail increases rail fares between 11 and 18 percent during peak periods, between 17 and 19 percent during off-peak periods, and implements a new peak-of-the-peak surcharge of \$0.20 along with a corresponding increase in the maximum fare from \$4.50 to \$5.00, excluding the peak-of-the-peak surcharge.

The fare changes increased the boarding fare on Metrorail from \$1.65 to \$1.95 during peak periods and also increased mileage charges during peak periods. The mileage charge for composite miles between three and six miles increased from \$0.26 to \$0.299, while charges for travel over 6 miles increased from \$0.23 to \$0.265. The maximum fare increased from \$4.50 to \$5.00, and peak period fares were extended to the period from midnight to closing. In addition, for the first time in the history of the rail system, the Metro Board implemented peak-of-the-peak pricing, an additional charge of \$0.20 between the hours of 7:30 to 9:00 AM and 4:30 to 6:00 PM. The implementation of peak-of-the-peak pricing increases the maximum charge of a rail trip from \$4.50 in FY2010 to \$5.20 in FY2011 for trips paid with a SmarTrip[®] card. These fare increase changes for peak period travel is budgeted to generate \$59.9 million annually with a loss of 2.9 million trips. An additional charge of \$0.25 was also implemented for all trips paid by paper farecards.

During off-peak periods, the boarding charge for the first seven composite miles increased from \$1.35 to \$1.60, representing an increase of 19 percent. There were also corresponding fare increases in the first and second mileage tiers. Fares increased \$0.30, from \$1.85 to \$2.15 for off-peak hours travel between 7 and 10 composite miles, and \$0.40, from \$2.35 to \$2.75 for travel over 10 composite miles. Changes to the off-peak fare structure are expected to increase passenger revenues by \$19.2 million with a loss of 2.4 million rail trips.

Other structural changes include a reduction in the time allotted to make rail-to-bus transfers from 3 to 2 hours, and also changes in the pricing of unlimited rail passes to make them consistent with the increases in boarding charges. The revenue implication of these fare changes to rail is an increase in revenue of \$82.2 million with an annual decrease in rail ridership of 6.5 million trips from regular fare elasticity, and an additional one million trips from the implementation of peak-of-the-peak pricing, for a total loss of 7.5 million annual trips.

Metrobus Fare Increase

The approved changes to the Metrobus fare structure increases the boarding charge from \$1.25 to \$1.50 for SmarTrip[®] and \$1.35 to \$1.70 for cash transactions, as well as an increase in the boarding charge by \$0.65 on express buses, along with a cash/SmarTrip[®] differential of \$0.20 when paying with cash. Also included is an increase in the bus fare on the 5A to Dulles and the B-30 to BWI Airport from \$3.10 to \$6.00.

Other changes to the Metrobus fare structure that became effective on June 27, 2010, include a reduction in the time allotted for bus-to-bus transfers from 3 hours to 2 hours, changes to the Senior and Disabled fares on express buses, and an increase in the price of the One-Week bus pass from \$11.00 to \$15.00, ten times the approved bus boarding fare for SmarTrip[®] of \$1.50. The revenue implication for the bus portion of the fare increase is an increase in bus revenue of \$24.7 million with an expected annual decrease in bus ridership of 8.2 million trips.

MetroAccess Fare Increase

The budget also increased the MetroAccess fare from \$2.50 to twice the equivalent fixed route fare, up to a maximum fare of \$7.00, and is expected to increase revenue yields by \$1.1 million. Another change to the MetroAccess fare structure increases the supplemental fares in zones one through four by \$1.00 each, and is expected to generate \$0.08 million, with no loss in MetroAccess ridership.

Other Fare Increases

Additional fare changes include an increase in the bicycle locker yearly rental fee from \$70.00 to \$200.00, and an increase in the reserved parking fee from \$55.00 to \$65.00. These changes are expected to generate an additional \$0.7 million for FY2011.

Other Fare Adjustment Options

Cumulatively, the passenger and non-passenger fare changes are expected to generate \$108.8 million in FY2011 with a loss of 14.7 million rail and bus trips. In addition to the General Manager's fare increase proposal, many other fare suggestions and options were evaluated from revenue and operational perspectives to determine their viability for increasing revenue to help balance the FY2011 budget. Suggestions were solicited from a variety of sources. The Riders' Advisory Council (RAC), Metroriders.Org and Greater Washington were engaged and involved in the process along with Metro's unions and jurisdictional partners, who provided a wide range of options for analysis. Several of their suggestions were incorporated into the approved fare package.

Non-Metro Rider parking fees	\$8.25-\$25.00

Other Fees

Bicycle locker rental

\$200.00 (annual)

¹ Regular fares are in effect from opening through 9:30 a.m., from 3:00 to 7:00 p.m. Monday through Friday, and from midnight until closing Friday and Saturday nights, except on national holidays.

² Reduced fares are in effect from 9:31 a.m. through 2:59 p.m. and from 7:01 p.m. until closing,

Monday through Thursday. Reduced fares are in effect from 7:01 p.m. until 11:59 p.m. Fridays and apply all day Saturday (except for midnight to close), Sunday, and national holidays.

³ From June 27, 2010 through July 31, 2010, the weekly short trip pass was \$30.35, weekly fast pass was \$45.00 and the Transit Link Card on MARC and VRE was \$92.00. On August 1, 2010, the pass prices increased.

⁴ Metro's portion of the Transit Link Cards on VRE, MARC and MTA.

⁵ MetroAccess fare is twice the equivalent fixed route fare.

Table 3.6 Current Transit Pass Program

Weekly Metrobus Flash Pass	Valid for unlimited travel on regular Metrobus service during the designated seven day period and valid for base fare towards Express fare.	\$15.00
Weekly Senior Metrobus Flash Pass	Valid for unlimited travel by eligible patrons on Metrobus during the designated seven day period on regular and express service.	\$7.50
Weekly Disabled Metrobus Flash Pass	Valid for unlimited travel by eligible patrons on Metrobus during the designated seven day period on regular and express service.	\$7.50

Metrorail/Metrobus Passes

SmartStudent Pass (Monthly)	Unlimited travel on Metrobus and Metrorail for students under 19 years of age who live and attend school in the District of Columbia. Passes accepted in the District as payment of regular fare.	\$30.00
Student SmarTrip® Card	Offered to students traveling primarily by bus to and from school. Initially sold for \$6.25, the price of ten school tokens. Token script must be presented and the card must be registered to the student. Each student will be limited to a single card. If lost the card will cost \$5.00 to replace. The card acts as a stored value card and will deduct a student fare with each ride. It can be used for student fares on both bus and rail. The card can be reloaded on a bus or in the rail system and the student should no longer need to purchase other student fare media.	\$7.50

Table 3.6 Cont'd Current Transit Pass Program

Metrorail Passes

One Day Pass	Valid for unlimited travel for one day. The pass is valid after 9:30 a.m. on weekdays and all day on Saturday, Sunday, and national holidays.	\$9.00
Weekly Short Trip Pass	Valid for trips costing up to \$3.05 during regular fare hours (a.m. opening - 9:30 a.m. and 3:00 p.m7:00 p.m. on weekdays, 2:00 a.m. to 3:00 a.m. Fridays and Saturdays) Good for any full fare trip at all other times. If a trip costs more than \$3.05 during regular fare hours, patrons must use the Exitfare machine to add the additional fare. The week starts with the first gate entry and includes the next six days.	\$30.35
Weekly Fast Pass	Valid for unlimited travel throughout the Metrorail system. The week starts with the first gate entry and includes the next six days.	\$45.00

Table 3.7 Other Fare Products and Policies

SmarTrip®	A re-usable contactless smart card which is designed for long-term use on Metrorail, Metrobus, and Metro Parking. Sold for \$5 and when registered can be replaced with existing value if lost or stolen. The card will hold a maximum of \$300.00. Functions just like a regular farecard. The price is scheduled to be decreased in the fall of 2010.
Senior Farecards	Available to qualified seniors (age 65 or older) with a Metro senior ID card, or valid Medicare card and photo ID are required for purchase
Disabled Farecards	Available to qualified people with disabilities. A MetroAccess Photo ID card, Metro Disabled ID card, or valid Medicare card and photo ID are required for purchase. Patrons should be encouraged to purchase and use SmarTrip®.
Student Farecards	Available for \$9.50 to qualified students at selected Metro Sales Outlets. For locations refer to the applicable section in the General Rules and Regulations section of this document. The farecards are good for ten rides within the District of Columbia.
MetroAccess Farecards	Five pre-encoded, \$3.00 farecards packaged and sold to MetroAccess customers for \$15.00. These cards are intended to replace tokens which had been used previously to pay fares.
Pre-encoded Farecards	Sold through authorized sales outlets for \$10.00 and \$20.00.
Tokens/Regular	Regular adult tokens are on sale for all patrons at \$1.70 per token. However, with the elimination of paper transfers, bus-to-bus transfers are not allowed for bus trips paid with tokens. Tokens are sold in packages of ten (10) at a cost of \$17.00.

Table 3.7 (continued) Other Fare Products and Policies

Transit Link Cards	Fare media sold by MARC, VRE, and MTA providing for monthly multi-modal travel valid for unlimited Metrorail and regular Metrobus during the month of issue. These passes may be used for Metro Express Service by paying an additional \$2.15 per boarding.
SmartBenefits®	Provides for the electronic delivery of monthly transit benefits from employers to employees and transit providers. Program is designed to be easily maintainable and to deliver benefits as specified by the employer on monthly basis to the employees' designated SmarTrip® card. Vanpool participants are able to use this facility to designate their benefit to the van operator.
SmartBenefits® Vouchers	Replaced Metrocheks, in December 2008, for use by transit benefit providers. Sold in denominations of \$1.00, \$10.00, and \$30.00. Vouchers contain no Metrorail value and are transferable only for the purchase of fare media from authorized transit providers or their sales agents.
Permit Parking	Monthly reserved program provides permit holders a guaranteed space on weekdays at a specified lot until 10:00 a.m. Reserved permits are sold for \$65.00 per month. Reserved parking patrons pay the established daily rate for the lot upon exit or entry. Reserved parking patrons (arriving before 10:00 a.m.) unable to find a reserved space may park at a parking meter but must pay the metered rate.
Early Opening and Late Closing for Special Events	Metro has established a fixed fee to be charged to event organizers based on the cost of operating the Metrorail system for early openings and late closings. The fee is adjusted periodically to reflect changes in operating costs. For FY2011, the fixed fee of \$29,500 per hour is charged for the incremental cost of keeping the rail system open for an additional hour. Event organizers make a deposit with Metro based on the number of hours of additional service requested, and Metro reimburses the event organizer for any incremental passenger revenue that are collected, not to exceed the amount deposited.

Allocation of State and Local Support

State and local funds account for approximately 40 percent of the funding for Metro's annual operating and capital budgets. A series of calculations and contractual agreements allocate this support among Metro's jurisdictional funding partners.

Operating Budget

The operating budget subsidy is allocated to the jurisdictional funding partners using six subsidy allocation formulas:

- 1. Regional bus subsidy allocation
- 2. Non-regional bus subsidy allocation
- 3. Rail maximum fare subsidy allocation
- 4. Rail base subsidy allocation
- 5. Paratransit subsidy allocation
- 6. Debt service allocation

Formulas 1 and 2: Regional and Non-Regional Bus Subsidy Allocations

The Metrobus subsidy is allocated using two distribution formulas. All bus routes are classified as being either <u>regional</u> or <u>non-regional</u>, based on route characteristics. Regional bus routes generally provide transportation between jurisdictions. Regional bus routes may also include bus routes that serve major activity centers that operate on major arterial streets, and carry high volumes of riders either in one jurisdiction or in multiple jurisdictions. The following are the specific criteria used by the Regional Mobility Panel to classify bus routes.

- Interjurisdictional routes are defined as regional. Defining characteristics of interjurisdictional routes:
 - o Cross a jurisdictional (independent city, county, state) boundary;
 - Penetrate at least two jurisdictions by more than one-half mile in each; and
 - Operate "open door" (allows boarding and alighting) over at least a portion of the line in two or more jurisdictions.
- If a route does not qualify as regional under the interjurisdictional definition, then it must meet at least two of the following three criteria to be regional:
 - Arterial Streets. Operates for a considerable distance on an arterial street and a substantial portion (usually a majority) of riders use stops on the arterial street. Routes which operate for a short distance on an arterial incidental to their service area are not included.
 - Regional Activity Center. Serves one or more regional activity centers. A conservative definition of regional activity centers is used, including only those where there is virtually universal agreement as to their regional character. Routes which feed Metrorail stations, but which do not directly serve any regional activity center, are not considered to be regional.

• Cost Effectiveness. Annual boardings per annual platform hour greater than 30 applied consistently in all jurisdictions.

Routes which do not meet the criteria described above are classified as non-regional. Regional and non-regional bus subsidy is allocated to the jurisdictions using the following formulas.

• **Regional Bus Subsidy Allocation**. The distribution of regional bus subsidy to the jurisdictions is based on a weighted, four-factor formula in the following proportions:

1.	Density weighted population	25%
2.	Revenue hours	25%
3.	Revenue miles	35%
4.	Average weekday ridership	15%

Density weighted population is determined by taking the urbanized area population distribution for the compact area (50 percent weighting) and combining that with the weighted population density (urbanized population divided by area). Basically, the formula prorates the urbanized population distribution by people per square mile.

The revenue hours factor is determined by taking the annual revenue hours assigned to each jurisdiction divided by the total regional revenue hours. The revenue miles factor is determined by taking total revenue miles (end-of-year schedule) assigned to each jurisdiction divided by the total regional revenue miles. Ridership is determined by taking the average weekday ridership (month of May sample) for each jurisdiction divided by the total average weekday ridership.

- **Non-Regional Bus Subsidy Allocation**. The distribution of non-regional bus subsidy to the jurisdictions is computed as follows:
 - 1. Identify the costs of all Metrobus service, regional and non-regional.
 - 2. Identify the costs which would accrue for regional Metrobus service if no non-regional bus service were provided.
 - 3. Determine the costs of non-regional service by subtracting the regional Metrobus costs from the costs of all Metrobus service.
 - 4. Divide the costs of non-regional service as computed in step three by total platform hours for non-regional service.
 - 5. Identify the non-regional platform hours for each jurisdiction.
 - 6. Multiply the platform hours for each jurisdiction by the hourly rate.
 - 7. Determine the revenue for each jurisdiction.
 - 8. Subtract from costs the revenue as determined in step seven.

Formulas 3 and 4: Rail Maximum Fare and Base Subsidy Allocations

The rail subsidy consists of two components: the maximum fare component and the base rail component. The total maximum fare subsidy is deducted from the total rail subsidy, and the result is allocated based on the base subsidy formula.

• Maximum Fare Subsidy Allocation. The maximum fare portion of the rail subsidy is designed to recognize the "taper" and "cap" features of the Metrorail fare structure. The taper feature is reflected in the diminishing cost per mile for trips greater than six miles, and the cap is reflected in the maximum fare of \$5.00. The subsidy for the maximum fare is calculated as the difference between the regular fare that would have been paid if the taper and cap features were not available, and the actual fare paid with the taper and cap.

Once the maximum fare subsidy is calculated, the benefiting jurisdictions are allocated one-half the calculated amount, based on the percent of riders from the individual jurisdiction who benefit from the taper and cap. These percentages are calculated from the data taken from the Metrorail Passenger Survey. The remaining half of the maximum fare subsidy is incorporated into the rail base subsidy.

- **Rail Base Subsidy Allocation**. The base subsidy allocation for Metrorail service is based on three elements in equal proportions:
 - 1. Density weighted population 33.3%
 - 2. Number of rail stations 33.3%
 - 3. Average weekly ridership33.3%

Density weighted population is determined by taking the urbanized area population distribution for the compact area (50 percent weighted) and combining that with the weighted population density (urbanized population divided by area). This calculation is the same for the regional bus subsidy allocation as it is for the rail base subsidy allocation. The rail stations factor is calculated by taking the number of stations, or portions of stations, assigned to each jurisdiction, divided by the total number of stations in the system. Ridership is calculated by taking the system average weekday ridership (month of May sample) times the jurisdictional ridership distribution, as determined by the rail passenger survey. Only persons who reside in the compact area are included in the distribution.

Formula 5: Paratransit Subsidy Allocation

Paratransit subsidy is allocated to the jurisdictions using a two factor formula with suballocations used for the Virginia jurisdictions.

- 1. Direct Costs. The contract carriers' actual per trip, reservation and eligibility charges will be allocated directly to the jurisdictions.
- 2. Overhead Costs. All other (non-direct) costs of the paratransit program will be allocated in proportion to the direct costs.

Virginia sub-allocations of direct costs require that per trip charges be adjusted to reflect the average time of trips provided for each jurisdiction. Overhead costs assigned to Virginia jurisdictions will be sub-allocated based on the direct cost allocation as calculated above.

Formula 6: Rail Construction Debt Service Allocation

Debt service charges are allocated to the jurisdictions based on the rail construction formula for the Adopted Regional System, using data developed for the Approved Financial Plan, August 1978. The local shares remain as set forth in the Ancillary Bond Repayment Agreements, and were not revised as the data used for the rail construction was updated.

Capital Budget

Metro's jurisdictional partners support the capital budget by providing the required local match on federal formula grants, federal dedicated funding, and federal discretionary funding, and by providing "system performance funds" which allows Metro to have a larger capital budget than would otherwise be possible with only federal funding and required local matches. The allocation of this support (both the match and the system performance funds) to the specific jurisdictions is governed by the Capital Funding Agreement which was adopted by the local jurisdictions and the Metro Board of Directors in June 2010.

Under the terms of the Capital Funding Agreement, each jurisdiction's percent contribution, as determined by the formula used to compute the Metro FY2011 capital budget, will be recalculated every three years to reflect the then-current approved Operating Budget allocation and applied prospectively to the three subsequent Annual Work Plans. The FY2011 Operations Allocation formula allocated Metrobus, Metrorail, Paratransit, and Dedicated Funding costs as follows:

- The Rail allocation formula will apply to Rail projects and debt issued for Rail projects.
- The Bus allocation formula will apply to Bus projects and debt issued for Bus projects.
- The Paratransit formula will apply to Paratransit projects and debt issued for Paratransit projects.
- An average of the Rail and Bus allocation formulas will apply to general financing expenditures and for project expenditures that cannot be allocated to Rail, Bus, or Paratransit.
- Dedicated Funding projects will be divided equally among the District of Columbia, State of Maryland, and Commonwealth of Virginia subject to the provisions of the various state laws establishing dedicated funding sources to match federal funds made available under the Passenger Rail Investment and Improvement Act (PRIIA) of 2008.

Capital Grants

Federal grants support the Capital Improvement Program (CIP) and have expedited the initiation of additional projects through the American Recovery and Reinvestment Act of 2009 (ARRA) and the Passenger Rail Investment and Improvement Act of 2008 (PRIIA). Annual, PRIIA, and ARRA grants have been allocated to Metro primarily through long-standing federal formulas. For the formula allocation, annual and PRIIA grants require a match while ARRA grants are fully funded by the Federal government. Additional federal support for the CIP comes from the discretionary earmark related to the Largo Full Funding Grant Agreement and from federal highway funds flexed to FTA on behalf of the Commonwealth of Virginia.

Summary of State and Local Contributions for Capital

Debt Service

In October 2003, Metro issued \$163.5 million of Gross Revenue Transit Refunding Bonds, Series-2003, to refund the callable portion of Metro's outstanding Gross Revenue Transit Refunding Bonds, Series-1993. The final maturity for the 1993 bonds is in FY2011 and FY2015 for the 2003 bonds. The annual jurisdictional debt service payment on these two bond series is \$27,484,194.

In November 2003, Metro issued \$35.6 million of Gross Revenue Transit Bonds, Series 2003-B. The bonds provide for semi-annual payments of interest and annual principal payments, with final maturity in FY2011. Annual debt service is approximately \$6 million, to be paid from passenger fares. The proceeds of the bonds were used to accelerate the vertical transportation modernization program. The vertical transportation modernization program is an integral part of Metro's Capital Improvement Program designed to provide for system-wide escalator maintenance, escalator rehabilitation and elevator rehabilitation. The terms of the new bond issuances are set forth in the Gross Revenue Transit Bond Refunding Resolution and Official Statement and the Gross Revenue Transit Bond Resolution and Official Statement.

In June 2009, Metro issued \$243.0 million of Gross Revenue Transit Refunding Bonds, Series 2009-A and \$55.0 million of Build America Bonds, Series 2009-B. Bond proceeds net of premiums/discounts totaled \$309.9 million. The bonds provide for semiannual payments of interest and annual payments of principal, with final maturity in July 2034. The net annual jurisdictional debt service payment on the bonds is \$21.2 million, reflecting an annual credit of \$1.4 million for the Series B, Build America Bonds. Five jurisdictions opted out of the bond issuance and provided \$115.0 million in funding to bring total proceeds related to the bond issuance to \$425.0 million.

Metro had maintained a \$330 million commercial paper program to provide funds for the Metro Matters Program. Payment of all maturing commercial paper was guaranteed by an irrevocable letter of credit. In June 2009, Metro retired the \$330.0 million commercial paper program. At the time of bond settlement commercial paper outstanding totaled \$314.5 million. All proceeds from the Series 2009-A Bond issuance and a portion of the jurisdiction opt out were utilized to retire the commercial paper. The remaining \$107.5 million from the jurisdiction opt out and Series 2009-B proceeds will finance non-complete Metro Matters capital projects.

In addition, Metro increased its line of credit availability from \$100 million to \$250 million. The lines of credit may be used to fund operating and capital cash flow needs.

Metro is required to make semi-annual payments of principal and interest on each Series of Bonds. There are certain covenants associated with these outstanding bonds with which Metro must comply. The most significant are:

- Metro must punctually pay principal and interest according to provisions in the bond document.
- Except for certain instances, Metro cannot sell, mortgage, lease or otherwise dispose of transit system assets without filing a certification by the General

Manager and Treasurer with the Trustee and Bond Insurers that such action will not impede or restrict the operation of the transit system.

• Metro must at all times maintain certain insurance or self-insurance covering the assets and operations of the transit system.

Debt Policy/Metro's Borrowing Powers

As per Metro's Compact, Metro may borrow money in pursuit of its mission. All such bonds and evidences of indebtedness are payable solely out of the properties of revenues of Metro. The bonds and other obligations of Metro, except as may be otherwise provided in the indenture under which they were issued, are direct and general obligations of Metro and the full faith and credit of Metro are pledged for the prompt payment of the debt service.

New Capital Bonds

The Capital Improvement Program (CIP) is a six-year program (FY2011-FY2016) for \$4.9 billion. To support the CIP, long-term borrowing maybe required. This borrowing is not anticipated to happen until FY2015.

Table 3.10 provides a summary of Metro's gross revenue refunding bonds and gross revenue transit bonds.

Washington Metropolitan Area Transit Authority Rebuilding the Foundation

Table 3.13

Table 3.14

Grants

In FY2011, Metro enters a new era in grant funding with the addition of \$150 million in Federal funds to be accompanied by \$150 million in dedicated local match funds. With the Federal annual formula allocations, grant funding for the capital program will approach \$400 million or over half of the total budget for the Capital Improvement Program (CIP). During Metro Matters, grant funding remained below \$275 million per year and less than half of the budget.

Metro will continue to pursue smaller federal grants that are awarded as earmarks or through competition or regional cooperation. Numerous grant-funded projects will be ongoing in FY2011 for capital and operational security enhancements.

Operating Grants

Additional funding for the operating budget may be awarded through competitive or cooperative grants. Currently, two departments pursue funding to enhance operations through grants, the Departments of Access Services and Metro Transit Police. Both departments participate in regional planning organizations for their respective disciplines. The regional planning bodies cooperatively establish priorities for grant funds that are allocated to the region from federal agencies. With the assistance of the Grants Management Branch in the Office of the Treasurer, the departments create grant applications in order to compete for a portion of the federal awards to the National Capital region.

Capital Grants

Federal grants support the CIP and have expedited the initiation of additional projects through the American Recovery and Reinvestment Act of 2009 (ARRA). Annual and ARRA grants have been allocated to Metro primarily through long-standing federal formulas. For the formula allocation, annual grants require a match while ARRA grants are fully funded by the federal government. Additional federal support for the CIP comes from federal highway funds flexed to FTA on behalf of the Commonwealth of Virginia.

LOCAL MATCH REQUIREMENTS

Matching funds requirements for grants varies by grantor, program, and purpose. Federal Transit Administration (FTA) formula grants require matching funds for 20 percent of the cost, PRIIA grants require matching funds for 50 percent of the cost, and while Metro's primary discretionary grant from FTA requires a 40 percent match. The ARRA allocation is an exception where formula funds require no matching funds. Competitive grants from FTA require zero to 20 percent local match. Security grants, which fund both capital and operating activities, usually require no local share.

FTA GRANTS (AUTHORIZED BY U.S.C. 49)

Formula

- Large Urbanized Area Formula Grant Program (Section 5307)
 - Capital Improvement Program activities include but are not limited to planning, engineering, bus and rail vehicle purchase and rehabilitation, construction of maintenance and passenger facilities, rail track, signals, communications acquisitions and upgrades, and preventive maintenance.
 - Some Americans with Disabilities Act complementary paratransit service costs are considered capital costs under 5307.
 - At least one percent of the funding apportioned to each area must be used for transit enhancement activities (i.e. historic preservation, landscaping, public art, pedestrian access, bicycle access, and enhanced access for persons with disabilities).
- Rail Modernization and Fixed Guideway (Section 5309)

Capital improvement projects may include modernization and improvement of rail and bus fixed guideway systems (i.e. purchase and rehabilitation of rolling stock, track, line equipment, structures, signals and communications, power equipment and substations, passenger stations and terminals, security equipment and systems, maintenance facilities and equipment, operational support equipment, computer hardware and software, system extensions, and preventive maintenance).

Dedicated Funding

• Passenger Rail Investment and Improvement Act of 2008 (P.L. 110-432)

The Federal FY2010 appropriation requires that Metro place highest priority on "investments that will improve the safety of the system, including but not limited to fixing the track signal system, replacing the 1000 series cars, installing guarded turnouts, purchasing equipment for the wayside worker protection, and

installation of rollback protection on rails cars lacking this upgraded safety feature.

Competitive

- Job Access and Reverse Commute program (JARC) (Section 5316) and New Freedom (Section 5317)
 - Provides funding for six trainers to deliver two-week long intensive training courses for using transit.
 - Research, Development, Demonstration, and Deployment Projects (Section 5312)
 - Energy Storage Demonstration Program for Rail Transit Vehicle Operation will examine the feasibility and cost-effectiveness of installing an energy storage system capable of using regenerated brake energy.

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009 (ARRA)

Formula

- ARRA Transit Capital Assistance
 - Funds were allocated according to the formula for Section 5307 funds.
 - ARRA projects are subject to the same eligibility requirements as the projects funded by annual appropriations under Section 5307.
 - One-percent of the grant must be spent on transit enhancements.
- ARRA Fixed Guideway Infrastructure Improvement
 - There are seven tiers within Section 5309 for funding allocation. Due to insufficient funding only tiers one, two, three and four received allocation. ARRA projects are subject to the same eligibility requirements as the projects funded by annual appropriations under Section 5309.

SECURITY GRANTS

- Competitively awarded by the Department of Homeland Security based on cooperatively determined regional security priorities:
 - Transit Security Grant Program (TSGP) is funding enhancement of the alternate operations control center coupled with surveillance on bus and rail among other projects.
 - Urbanized Area Security Initiative (UASI) funds are enhancing communications systems that are shared among Metro and other emergency responders in the region.

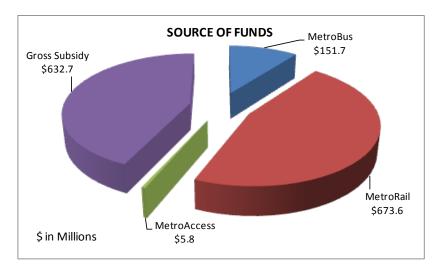

Chapter 4. Operating Budget

This chapter provides information on Metro's three primary services – Metrobus, Metrorail and MetroAccess. Operating expenses, anticipated revenues and subsidy are provided for each service. Operating expenses for each service include its share of administrative costs. More specific department-by-department data is provided in Chapter 5.

Sources and Uses of Funds by Modes Operating Budget Fiscal Year 2011 Approved: \$1.5 Billion

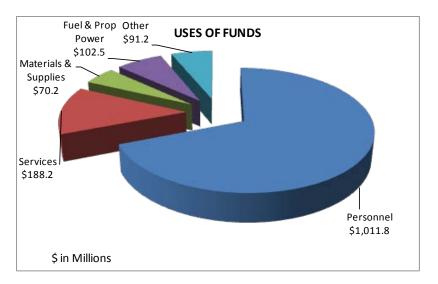

Where it Comes From

The largest source of funding comes from Metrorail for the amount of \$673.6 million or 46.0 percent followed by gross subsidy of \$632.7 million or 43.2 percent. For FY2011, it should be noted that authority-wide, \$741.7 million or 50.7 percent of funds comes from passengers.

Where it Goes

Personnel costs make up the largest expenditure category at \$1,011.8 million or 69.1 percent followed by services with expenses totaling \$188.2 million or 12.9 percent.

Note: Excludes Reimbursable Operating Projects

Preventative maintenance, as per FTA Circular C 5010.1D, is defined as all maintenance costs related to vehicles and non-vehicles. Specifically, it is defined as all the activities, supplies, materials, labor, services, and associated costs required to preserve or extend the functionality and serviceability of the asset in a cost effective manner, up to and including the current state of the art for maintaining such an asset.

For the period under review (FY2008 to FY2011), total passenger revenue continues to be the main source of revenue growing by \$56.0 million or 9.8 percent and \$135.2 million or 22.3 percent in FY2009 and FY2011, respectively. For FY2010, there was a fall in passenger revenue by \$22.4 million or 3.6%. Gross subsidy grew over the period, by \$115.7 million or 24.5 percent, \$36.6 million or 6.2 percent, \$8.3 million or 1.3 percent for FY2009, FY2010 and FY2011, respectively.

Personnel costs continue to be the largest user of funds, growing by \$61.4 million or 7 percent, \$30.9 million or 1.7 percent and 43.9 million or 4.5 percent in FY2009, FY2010 and FY2011, respectively. These cost increases are driven by a combination of union contract increases and changes in staffing levels. Services expense has grown by \$30.0 million or 24.4 percent, \$17.3 million or 6.6 percent and \$18.2 million or 15.7 percent in FY2009, FY2010 and FY2011, respectively. These increases are due mainly to the additional demand for paratransit service.

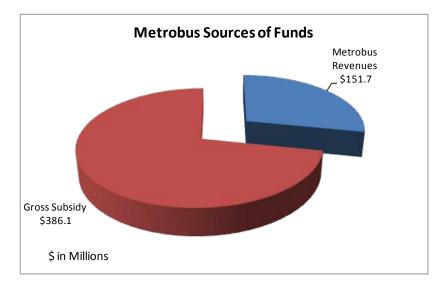

Operating Budget by Mode: Metrobus

Metrobus Fiscal Year 2011 Approved: \$537.9 Million

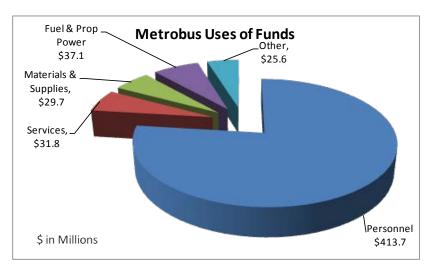

Where it Comes From

For FY2011, Metrobus is funded mainly by gross subsidy of \$386.1 million or 71.8 percent.

Where it Goes

Personnel expenses make up the largest portion of the budget at \$413.7 million or 76.9 percent for FY2011.

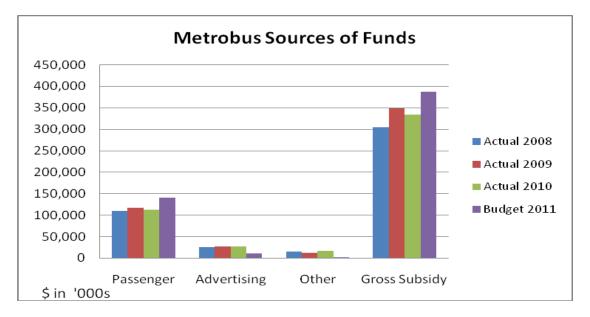

Note: Excludes reimbursable operating projects

Gross subsidy is the main source of funding for Metrobus. Subsidy grew by \$43.8 million or 14.4 percent and \$52.2 million or 15.6 percent in FY2009 and FY2011, respectively. There was a decline of \$14.4 million or 4.1 percent in FY2010.

Personnel costs grew by \$22.5 million or 6.62 percent, \$2.6 million or 0.7 percent and \$25.5 million or 6.6 percent for FY2009, FY2010 and FY2011, respectively. Other expenses remained relatively flat with the exception of casualty and liability insurance which grew by \$3.8 million or 60.3 percent in FY2009 and \$3.1 million or 32.5 percent in FY2011.

Metrobus Revenue Vehicle Fleet Management Plan

The Metrobus Revenue Vehicle Fleet Management Plan is a statement of the processes and practices by which Metro establishes its current and projected Metrobus revenue vehicle fleet size requirements and operating spare ratio. It includes a description of revenue service planned to accommodate growth in Metrobus ridership, as well as an assessment and projection of needs for bus vehicle maintenance. The information that follows reflects the most current data from the Federal Transit Administration Approved Plan. The most current Plan can be found online at: http://www.wmata.com/pdfs/planning/2010_Bus_Fleet_Plan_07222010.pdf.

Regional and Non-Regional Metrobus Routes

Metrobus routes are designated as either regional or non-regional. The cost of providing Metrobus service on regional routes is allocated to all of the Metro contributing jurisdictions. Costs associated with non-regional are allocated to a greater degree to the jurisdiction receiving the benefit of the non-regional route.

The Metro Board of Directors approves the designation of regional or non-regional Metrobus routes. The factors used in making the determination of regional and non-regional routes are:

- the alignment of inter-jurisdictional routes
- routes operating on arterial streets
- routes that serve specific regional activity centers and
- route cost effectiveness

The Metrobus subsidy is allocated using one of two formulas: the Regional Bus Subsidy Allocation formula for routes designated as regional routes that serve major activity centers and carry high volume of riders either in one jurisdiction or in multiple jurisdictions, or second the Non-Regional Bus Subsidy Allocation which distributes the subsidy for non-regional Metrobus routes. The Non-Regional Bus subsidy is applied to routes which do not meet the criteria of regional designation and is allocated primarily to the individual jurisdiction in which the route is operated. The cost of non-regional Metrobus service is computed at a slightly lower rate than regional service, because some fixed costs for Metrobus operations, including costs such as salaries and associated fringes, utilities, professional/technical services and miscellaneous costs are applied only to the regional route calculations.

Metrobus operating cost is measured in terms of cost per platform hour. Platform hours represent the amount of time between when a bus leaves its maintenance and storage facility and when it returns at the end of the day. For the approved FY2011 budget, the cost per platform hour for regional routes is \$140.83; for non-regional routes the cost per hour platform is \$101.14.

The following tables show the Metrobus regional and non-regional routes by major jurisdictions.

Table 4.13 Metrobus Regional and Non-Regional Route Summary

Operating Budget by Mode: Metrorail

Metrorail Fiscal Year 2011 Approved: \$822.3 Million

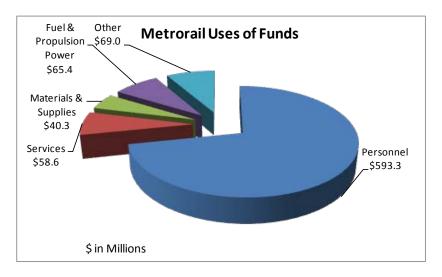

Where it Comes From

Revenues from Metrorail of \$673.6 million are the main source of funding. This represents 81.9 percent of the budget.

Where it Goes

Personnel expenses make up the largest portion of the budget at \$593.3 million or 72.2 percent for FY2011.

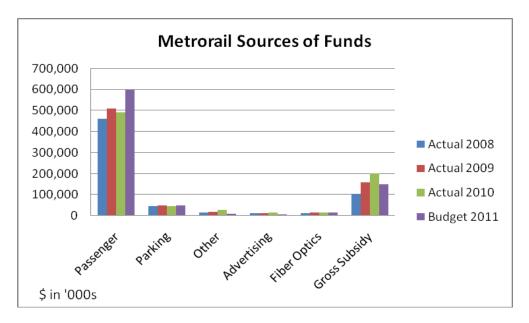

Note: Excludes reimbursable operating Projects

- From FY2008 to FY2011passenger revenue continues to be the main source of revenue growing by \$48.6 million or 10.6 percent and \$106.0 million or 21.6 percent in FY2009 and FY2011, respectively.
- For FY2010, there was a fall in passenger revenue by \$18.7 million or 3.7 percent.
- Gross subsidy grew over the period by \$55.2 million or 52.9 percent and \$37.3 million or 23.4 percent FY 2009 and FY2010, respectively.
- For FY2011, the gross subsidy is expected to be lower by \$48.1 million or 24.5 percent.

- Personnel costs grew by \$34.8 million or 6.8 percent, \$28.1 million or 5.2 percent and \$18.3 million or 3.2 percent for FY2009, FY2010 and FY2011, respectively.
- Other areas with significant variances were:
 - Material and Supplies with increases of \$2.6 million or 5.9% and \$8.4 million in FY2009 and FY2010. For FY2011, there is an expected savings of \$14.3 million or 26.2%.
 - Fuel and Propulsion expense increased by \$19.7 million or 42.1 percent and \$8.1 million or 14.2 percent in FY2009 and FY2011, respectively. There was a decrease in FY2010 by \$9.3 million or 13.9 percent due to locked in prices.
 - Casualty and Liability Insurance which grew by \$6.2 million or 54.5 percent in FY2009, \$0.4 million or 4.2 percent in FY2010 and \$6.9 million or 37.9 percent in FY2011.

Metrorail Revenue Vehicle Fleet Management Plan

The Metrorail Revenue Vehicle Fleet Management Plan is a statement of the processes and practices by which Metro establishes its current and projected Metrorail revenue vehicle fleet size requirements and operating spare ratio. It includes a description of revenue service planned to accommodate growth in Metrorail ridership, as well as an assessment and projection of needs for rail vehicle maintenance. The information that follows reflects the most current data from the Federal Transit Administration Approved Plan. The most current plan can be found online at:

http://www.wmata.com/pdfs/planning/Rail_Fleet_Management_Plan_Revised_2007060 1.pdf.

Operating Budget by Mode: MetroAccess

MetroAccess Fiscal Year 2011 Approved: \$103.7 Million

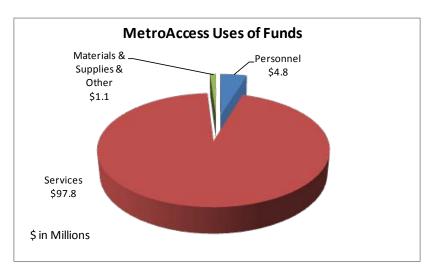

Where it Comes From

For FY2011, MetroAccess is funded mainly by gross subsidy of \$97.9 million or 94.4 percent of budget.

Where it Goes

For FY2011, the majority of the budget is related to the paratransit services mainly with MV Transportation. Services is expected to be \$97.8 million or 94.3 percent of the budget.

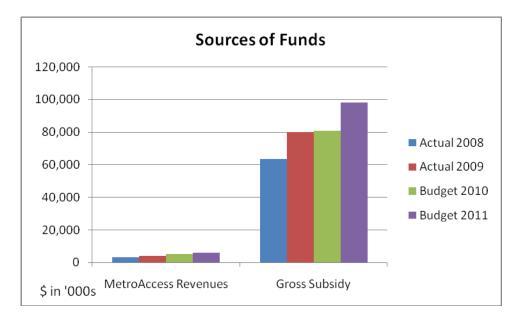

Note: Excludes reimbursable operating projects

Table 4.26

MetroAccess Revenue Vehicle Fleet Management Plan

The MetroAccess Revenue Vehicle Fleet Management Plan is a statement of the processes and practices by which Metro establishes its current and projected MetroAccess revenue vehicle fleet size requirements and operating spare ratio. It includes a description of revenue service planned to accommodate growth in MetroAccess ridership, as well as an assessment and projection of needs for paratransit vehicle maintenance. The information that follows reflects the most current data from the Federal Transit Administration Approved Plan. The most current plan can be found online at:

http://www.wmata.com/pdfs/planning/MACS%202008%20FLEET%20PLAN%20(4%202 9%202009I)final.pdf - 2010-02-09.

Chapter 5. Department Budgets

This chapter provides detailed goals, objectives, staffing and line-item budgets for each department in the fiscal year 2011 operating budget.

Note: Historical data (FY2008-FY2011) presented may not accurately reflect the Departments' previous budget/actual due to corporate reorganization. This does not affect the total for Metro.

In the following tables which display "operating cost by *mode*," mode and operating unit are synonymous.

Independent Offices

General Manager

Richard Sarles manages the second largest rail transit system and the sixth largest bus network in the United States with more than 10,000 employees, a \$1.45 billion operating budget and a \$0.7 million Capital Improvement Program (FY2011). He was appointed Interim General Manager by the Metro Board of Directors effective April 3, 2010. Most recently, he served as Executive Director of New Jersey Transit. The General Manager is committed to providing the best transit service in the most efficient and cost-effective manner without sacrificing safety and service for customers.

The staff complement to support the General Manager is eight persons.

Inspector General

Introduction

The Office of Inspector General (OIG) is an independent office that reports to the Metro Board of Directors. OIG is modeled after the Federal Office of Inspector General to advance Metro's goals of accountability and transparency. OIG conducts audits, program evaluations, and investigations of Metro operations and activities, while keeping the Board fully and currently informed about any deficiencies or fraud identified, as well as the necessity for and progress of corrective action.

Mission Statement

The Office of Inspector General (OIG) supervises and conducts independent and objective audits, investigations, and other reviews of the Washington Metropolitan Area Transit Authority's programs and operations to promote economy, efficiency, and effectiveness, as well as to prevent and detect fraud, waste, and abuse in its programs and operations. OIG provides advice to the Board and General Manager to assist in achieving the highest levels of program and operational performance in Metro.

To carry out these functions, OIG has a staff complement of 29 persons.

General Counsel

General Counsel's (COUN) role is not only to protect the Metro's legal interests, but to serve as a pro-active problem-solving and problem-avoidance resource for Metro's policymakers and managers. Counsel's organizational structure and staffing of 40 have been developed specifically to meet these objectives and to provide an effective mechanism for providing required legal services at the lowest possible cost.

Mission Statement

The Mission of the Office of General Counsel is to plan, direct, and provide substantially all of the legal services provided to Metro.

The Office of General Counsel:

- Renders legal advice on procurement/contractual matters.
- Prepares agreements between the Metro and public or private organizations.
- Actively participates in the joint development process.
- Defends Metro in litigation.
- Renders legal advice on specific policy and operational matters.
- Interprets the Metro's Compact.
- Assists in the acquisition and sale of real property.
- Provides day-to-day legal advice to the Metro's Board of Directors, officers, and managers on a wide range of issues.
- Renders legal advice on employment matters.

Board Secretary

The Office of the Secretary (SECT) is an independent office that reports to the Metro Board of Directors. SECT is responsible for the coordinating, reviewing and distributing of Metro Board materials; recording and maintaining official records of Board actions and resolutions at meetings; publishing legal notices and arranging public hearings approved by the Board; working proactively with the General Manager and his staff to carry out the policies, goals and initiatives of the Metro Board; and serving as liaison between the Board, the Riders' Advisory Council, Metro, and its riders.

Mission Statement

The mission of the Office of the Secretary is to provide high-quality, comprehensive and administrative support services to the Metro Board of Directors; including responsive, accurate and timely guidance to the Board, the Riders' Advisory Council, and Metro staff with a focus on accountability, transparency, regionalism and customer value.

This department has a staff complement of five persons.

Deputy General Manager Operations

Introduction

The Deputy General Manager directs the daily operation of the Metrorail, MetroAccess, and elevators and escalators; and manages the Metro Capital Improvement Program (CIP) which includes infrastructure renewal, engineering, and design. This department has a staff complement of 5,452 positions:

- Deputy General Manager 82
- Track, Infrastructure and Engineering Systems 1,204
- Rail Services 4,111
- Access Services 38
- Office of Performance 17

Mission Statement

The mission of the Deputy General Manager's office is to provide the safest, most reliable, cleanest, most professional and efficient transportation service for those customers who use the system in the Washington Metropolitan region.

Goals and Objectives

The Deputy General Manager's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goals are: Create a Safety Culture, Use Every Resource Wisely and Maintain and Enhance Metro's Image. The strategic frameworks used to achieve these goals and their respective measures to assess progress are as follows:

- Target investments/initiatives that reduce operating/capital costs and/or generate revenue by reducing non-scheduled overtime by 15 percent by December 2010 (FY2009 is the baseline).
- Manage the safe operations of Metrorail, MetroAccess, elevators and escalators on an ongoing basis.

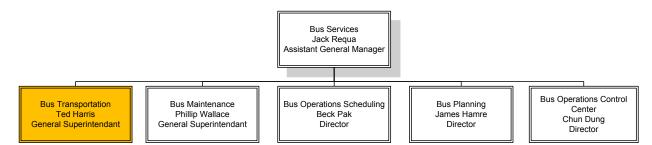

The performance measures are reflected in Appendix D showing the achievements of Metro's operating departments.

Bus Services

Introduction

The Department of Bus (BUS) is responsible for all functions of bus operations: providing assistance in "Rebuilding the Foundation," maintenance, service planning and scheduling. To provide this service, Bus is staffed by 3,920 positions.

Mission Statement

The mission of BUS is to provide signature service for the national capital region by setting the industry standard for safety, reliability, cleanliness, and customer relations.

Goals and Objectives

The Department of Bus measures are linked to Metro's five strategic goals and related 12 objectives. The applicable departmental goals are: Deliver Quality Service and Use Every Resource Wisely. The strategic framework used to achieve these goals and their respective measures to assess progress are:

- Improve reliability of service by achieving 80 percent on-time performance.
- To target a level of 6,000 miles mean distance between failures.
- Continuous improvement in safety.

Appendix D evaluates the performance of Metrobus against these important measurements.

Rail Transportation

Introduction

The Department of Rail Transportation is responsible for all facets of rail operations: providing "Rebuilding the Foundation", maintenance, and scheduling of all revenue service delivery. The staff complement to support this operation is 4,111 positions.

Mission

The mission of the Rail Transportation is to provide the nation's best transit service to our customers and improve the quality of life in the Washington Metropolitan region.

Goals and Objectives

The Department of Rail's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goal is: Deliver Quality Service. The strategic framework used to achieve this goal and its respective measure to assess progress is:

- On time performance of 87 percent.
- Continuous improvement in safety for both customers and employees.

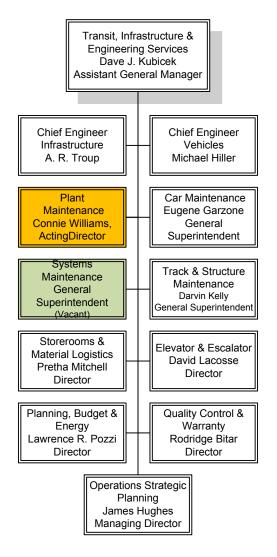

Appendix D evaluates the performance of Metrorail against these important measurements.

Transit Infrastructure and Engineering Services

Introduction

The Department of Transit Infrastructure and Engineering Services (TIES) is responsible for the infrastructure and maintenance of all facets of rail operations: facilitating "Rebuilding the Foundation", maintaining the rail infrasctructure, and scheduling of all revenue service delivery. In pursuing its functions, TIES is staffed by 1,204 persons.

Mission

The mission of TIES is to provide the nation's best transit service to our customers and improve the quality of life in the Washington Metropolitan region.

Goals and Objectives

The Department of Transit Infrastructure and Engineering Services' measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goal is: Deliver Quality Service. The strategic framework used to achieve this goal and their respective measures to assess progress are:

- Availability of 93 percent of escalators.
- Availability of 97 percent elevators.
- Continuous improvement in safety for both customers and employees.

Appendix D evaluates the performance of TIES against these important measurements.

Access Services

Introduction

The Department of Access Services (ACCS) ensures the accessibility of public transportation for people with disabilities and senior citizens. The staff complement of Access Services is 38 persons.

Mission Statement

The mission of Access Services is to promote accessibility of Metrobus, Metrorail, and vertical transportation by working to obtain and maintain ADA compliant facilities, equipment, operating procedures, and training; provide ADA quality assurance and coordinate Metro activities with the disability community and stakeholders.

Goals and Objectives

The Department of Access Services' measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goals are: Deliver Quality Service and Use Every Resource Wisely. The strategic framework used to achieve these goals and their respective measures to assess progress are as follows:

- On time performance of 92 percent.
- Passenger injury rate of zero.
- Continuous improvement in safety for both customers and employees.

Appendix D evaluates the performance of MetroAccess against these important measurements.

Office of Performance

Introduction

The Office of Performance (CPO) is responsible for developing and tracking organizational performance measures and metrics that are tied to Metro's strategic plan; process improvement and reengineering; organizational structure; and alignment of employee performance management programs with organizational goals. This department also represents the organization in labor relation related engagements which comprise of collective bargaining; providing guidance on Metro's policies and procedures which impact the unionized workforce; grievance arbitration representation; and all other labor relations related responsibilities. To carry out these functions, CPO has a staff complement of 17 persons.

Mission Statement

The mission of the Office of Performance is to use performance information to guide actions, to promote Metro's benefits in the region and to unify employees to accomplish the goals of the organization.

Goals and Objectives

The Department of Office of Performance's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goals are: Deliver Quality Service and Use Every Resource Wisely. The strategic framework used to achieve these goals and their respective measures to assess progress are:

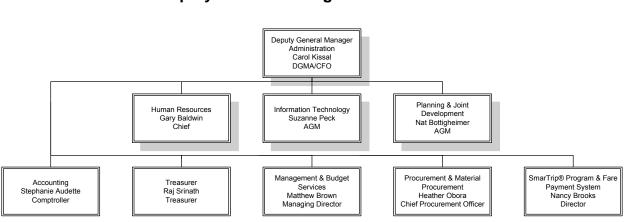

- Guide the development of execution plans.
- Create performance based reports for all departments in the form of a monthly report.
- Analyze performance data and benchmark to other peer agencies.
- Generate monthly scorecard of key performance indicators (KPIs).

Deputy General Manager/Administration

Introduction

The Deputy General Manager Administration/Chief Financial Officer (DGMA/CFO) is responsible for the financial integrity and the administrative functions of Metro, including the collection of revenues and other income, purchasing all goods and services required by the Metro, accounting for the financial transactions of assets and liabilities, information technology and planning and development. In addition, the DGMA/CFO is responsible for Federal grants management, as well as, cash and risk management. DGMA is further broken down into departments of Financial Services (CFO), Information Technology (IT), Human Resources (HR) and Planning and Joint Development (PLJD). Each of these departments has its own budget. These departments have staff complements:

- Financial Services (CFO) 321
- Information Technology (IT) 201
- Human Resources (HR) 132
- Planning and Joint Development (PLJD) 44

Financial Services

Introduction

The Department of Financial Services (CFO) is responsible for the financial integrity of Metro, including the collection of revenues and other income, purchasing all goods and services required by Metro, and accounting for the financial transactions of assets and liabilities. In addition, the CFO department is also responsible for Federal grants management, as well as, cash and risk management. The responsibilities and duties are carried out by a staff complement of 321 persons.

Mission Statement

The mission of Financial Services is to establish an integrated finance organization which turns around the current burdened transactional business model to a Value Analyzing Business Focus by connecting mission critical systems, workflow and processes which support the financial and administrative operations of Metro.

This will result in creating a resource efficient organization, which adds value in delivering quality service, maintaining and enhancing Metro's image and retaining and recruiting the best and recruiting the best and the brightest. An integrated organization will be effective in managing Risk Scenario's and the Development of Mission Critical Systems which support the Safety Goal.

Goals and Objectives

The Department of Financial Services' measures are linked to Metro's five strategic goals and related objectives. The strategic framework used to achieve these goals and their respective measures to assess progress are:

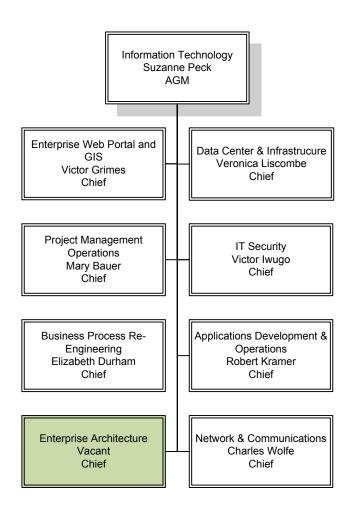

- Manage the agency's assets efficiently by completing the year financial at budget; receive guidance from the Board for the development of the FY2012 Operating and Capital budgets in the Fall of 2010, present Proposed Budget to the Board by January 2011 and gain approval by June 30, 2011.
- Manage agency assets by presenting to the Board a financial methodology to evaluate performance based upon return-on-investment and cost-benefit analysis, which links strategic goals to the day to day operations.
- Target investments/initiatives that generate revenue by identifying at least one new revenue generating initiative in FY2011.
- Apply concepts and framework to use in development of performance objectives and targets:
 - Simplify operation
 - Integrate mission critical systems which support operations
 - Establish standards in process and workflow
 - Create leadership opportunities for employees
 - o Access resources, cross functional departments and outside experts
 - Build operating dexterity providing cross function and specialized training and development
 - o Be responsive to the customer
 - o Get connected to the customer
 - Develop appropriate performance measures and mitigate and analyze risk

Information Technology

Introduction

The Department of Information Technology (IT) ensures that Metro has the technical infrastructure required to support continuous safety and operational improvements as well as the tools to communicate more effectively with our riders. IT has 201 employees for supporting the operations and capital programs of Metro.

Mission Statement

The mission of IT is to serve as a strategic asset for Metro as it embarks on its mission to provide Rebuilding the Foundation.

Goals and Objectives

The Department of Information Technology's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goals in which IT Services will play a role of material support are: Deliver Quality Service and Use Every Resource Wisely. IT will support these goals by:

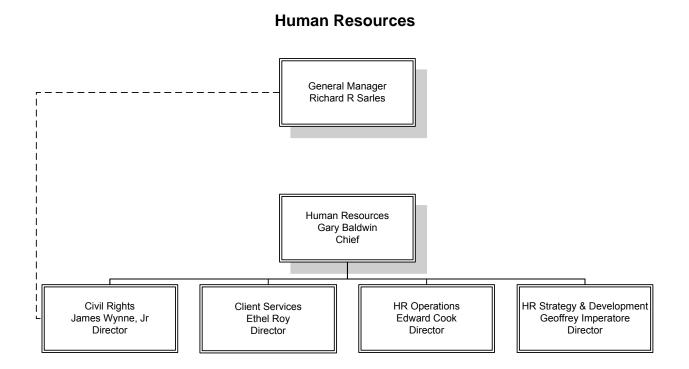

- Assuring that Metro's website aids external and internal customers, as well as, supporting the SmarTrip[®] website.
- Provide IT infrastructure that supports Metro's mission and implement standards for hardware and software utilities.
- Improve the use of technology use throughout Metro.
- Maintain Geographic Information System for the Washington Metropolitan area.
- Safeguard Metro's IT system.
- Manage and implement ongoing IT projects.

Introduction

The Department of Human Resources (HR) provides:

- · Administrative guidance and oversight of personnel management
- Organizational development
- Workforce training

HR has a staff complement of 132 persons to support the continued operations of Metro.

Mission Statement

The mission of the Department of Human Resources Services is to coordinate, plan, develop, implement, and supervise all aspects of the Division of Workforce Development and Administration.

Goals and Objectives

The Department of Human Resources' measures are linked to Metro's five strategic goals and related 12 objectives. The applicable departmental goals are: Use Every

Resource Wisely and Retain and Attract the Best and the Brightest. The strategic framework used to achieve these goals and their respective measures to assess progress are as follows:

- Support workforce development by tracking and improving hiring cycle times by an average of 10 percent.
- Develop, provide funding for, and implement an annual employee awards program to recognize the top one percent of the employee population for safety and other performance achievements subject to budgetary constraints.
- Review and update human resource policies and procedures to align with industry best practices and reflect Metro's strategic goals and objectives.
- Review training needs for new and existing employees.
- Administer employee benefits programs.

Planning and Joint Development

Introduction

The Department of Planning and Joint Development (PLJD) is responsible for:

- Developing transit and land development plans and studies that advance the vision of "Rebuilding the Foundation."
- Executing mobility improvements through participation in regional and local planning activities.
- Planning studies and technical analyses to identify, evaluate, and advance transit improvement projects that are best aligned with Metro's vision and strategic goals.
- Acquiring, managing, developing, and disposing of real property in support of Metrorail, Metrobus, and MetroAccess.
- Implementing innovative programs that generate revenue and promote transit use.

PLJD has a staff complement of 44 persons to execute the goals and objectives of the department.

Mission Statement

The mission of Planning and Joint Development is to develop and support a long-range vision for transit services and land development that enhances livable communities and promotes Metro's role in the region.

Goals and Objectives

The Department of Planning and Joint Development measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goals are: Deliver Quality Service, Use Every Resource Wisely, and Retain and Maintain and Enhance

Metro's Image. The strategic framework used to achieve these goals and their respective measures to assess progress are:

- Develop a Long-Range Regional Transit Plan through the year 2030 to clearly communicate Metro's role in the area's mobility to the year 2030 and beyond.
- Manage the agency's assets efficiently by delivering a prioritized FY2011-FY2020 Capital Improvement Plan (CIP).

Metro Transit Police

Introduction

The Metro Transit Police Department (MTPD) is nationally accredited through the Commission on Accreditation for Law Enforcement Agencies, Inc. and officer candidates are trained to the standards established for police in the District of Columbia, Maryland, and Virginia. MTPD detectives are tasked with:

- Investigating open crimes and bringing them to closure.
- Riding as uniformed and plainclothes officers on Metrobus at random in areas where problems have been reported.
- Patrolling trains, stations, and parking lots.

MTPD police officers have tri-state jurisdiction with responsibility for a variety of law enforcement and public safety functions in transit facilities throughout the Washington, DC Metropolitan area.

There are 622 positions approved for FY2011.

Mission Statement

The mission of the Metro Transit Police Department is to provide protection for Metro patrons, personnel, transit facilities, and revenue.

Goals and Objectives

The Metro Transit Police Department's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goal is: Create a Safety Culture. The strategic framework used to achieve these goals and its respective measures to assess progress are:

Improve customer security for customers and employees with no or low levels of crime.

- Execute policies and procedures for violation of laws applicable to users of Metro's facilities.
- Foster an environment for public safety.
- Continuous improvement in safety for both customers and employees.

Appendix D evaluates the performance of Metro Transit Police Department's security achievements.

Introduction

The Department of Safety (SAFE) services the Metro System with:

- Providing identification, eliminating and properly disposing of chemical, environment, and other related hazards.
- Apprising and updating Metro regarding the local and Federal safety requirements.
- Recommending the design and fabrication of safety equipment.
- Conducting a systematic proactive approach to analysis and surveillance of operational safety for passengers and employees as well as all agency facilities, operational work areas, and equipment.

The Department of Safety has a staff complement of 58 to promote the high priority focus of Metro's strategic safety goals. For FY2011, Metro's initiatives are centered on a safety culture. To pursue safety goals and objectives, an additional \$6 million has been allocated to FY2011 budget to fill positions within the Department of Safety, close out many of our open corrective action plans based on National Transportation Safety Board (NTSB), respond to the findings outlined in the latest FTA audit, develop a new roadway worker protection manual to improve incident tracking, complete new right-of-way worker protection manual and revise Metrorail Safety Rules and Procedures Handbook.

Mission Statement

The mission of the Safety Department is to ensure that Metro's Bus, Rail, and MetroAccess systems and all other facilities are operationally safe and environmentally sound for all employees and the riding public.

Goals and Objectives

The Safety department's measures are linked to Metro's five strategic goals and related objectives. The applicable departmental goal is: Create a Safety Culture. The strategic framework used to achieve this goal and its respective measure to assess progress is as follows:

- Improve customer and employee safety by achieving zero work related fatalities through June 2011.
- To foster a safe work environment for Metro's employees and customers.
- Continue to implement safety initiatives recommended by National Transportation Safety Board (NTSB).

Appendix D evaluates the performance of Department of Safety's key performance indicators.

Customer Service, Communications and Marketing

Introduction

The Department of Customer Service, Communications and Marketing (CSCM) is responsible for the coordinated implementation, within a single department, of important functions including customer service, public relations, government relations and marketing. The consolidation of these functions helps Metro provide consistent, coordinated messages to a variety of internal and external audiences. This department has 142 positions to support the operations of Metro.

Office of Public Relations (PREL)

The Office of Public Relations develops key messages and communications strategies to ensure a consistent approach and consistent messages are provided for internal and external communications. In particular, this office:

- Provides information to media outlets as the official "spokesperson" for the General Manager and other Metro officials.
- Responds promptly to news media inquiries to provide accurate information about Metro services and activities.
- Writes and disseminates internal newsletters to inform employees about Metro priorities and key activities.
- Prepares communications for customers using social media.

Office of Marketing and Advertising (MKTG)

Metro marketing communications are designed to attract new customers and revenue to the Metro system and to encourage expanded use of the system among existing customers. In particular, the Office of Marketing and Advertising:

- Undertakes customer research including customer feedback surveys.
- Develops messages for customers.
- Provides creative design of materials for customer communications and advertising campaigns.
- Manages public information campaigns.

- Manages the sale of advertising space in the Metro system.
- Promotes the SmartBenefits[®] program to encourage employers to provide transit benefits for their employees to use the Metro system.

Replication and Digitizing Services (RADS)

RADS is a separate budget center within the Office of Marketing and Advertising. Operating the in-house printing plant, RADS provides responsive, timely, efficient and cost-effective printing services for internal Metro customers. Printing jobs include:

- Pocket Guides
- Brochures about using the Metro system
- Bus pocket timetables
- System maps
- Internal Metro forms for use by operations and support offices
- Printed materials to support special events

Office of Customer Service (CSVC)

The Office of Customer Service:

- Manages the Trip Planner to help customers plan their trips on Metrorail and Metrobus.
- Provides service information to customers through the call center.
- Handles customer comments received by the call center, web site, and emails.
- Manages the lost-and-found program for items lost in the Metro system.
- Manages Metro's central telephone switchboard.

Office of Government Relations (GOVR)

The Office of Government Relations:

- Builds ongoing relationships with Metro's funding partners in federal, state and local governments.
- Provides information to the Board of Directors and Metro managers on important federal, state and local government issues that affect Metro.
- Facilitates obtaining sufficient funding for Metro to provide safe and efficient public transportation for the national capital region.

Community Relations (CREL)

The Community Relations staff:

• Reaches out to the communities that Metro serves to develop relationships and seek community input to Metro's decision-making processes.

- Promotes public understanding of, and support for, Metro policies, initiatives and activities.
- Works with external organizations about transit services needed to support special events being planned in the national capital region.

Mission

The mission of the Department of Customer Service, Communications and Marketing is to build trust, confidence and loyalty in the Metro brand.

Goals and Objectives

CSCM supports all five of Metro's strategic goals:

- Create a safer organization;
- Deliver quality service;
- Use every resource wisely;
- Retain, attract and reward the best and the brightest; and
- Maintain and enhance Metro's image.

The department's additional objectives are to:

- Deliver consistent, coordinated messages through integrated strategic communications and marketing plans.
- Lead customer service improvement with research, trend analysis and involvement.
- Inform Metro customers through more direct communications.
- Drive ridership growth and new market development.
- Tell Metro's story proactively while managing day-to-day incidents
- Enhance employee communications.
- Improve immediate information distribution through digital media.
- Support Metro's government affairs agenda.
- Foster community pride in Metro.
- Collaborate within Metro to be responsive to internal partners.

Chapter 6. Capital Program

This chapter provides information on the capital program for the Approved Fiscal Year 2011 annual budget. It focuses on the six-year Capital Improvement Program (CIP) for FY2011 to FY2016.

DEVELOPMENT OF THE FY2011 – FY2016 CAPITAL IMPROVEMENT PLAN

The ten year Capital Needs Inventory (FY2011 – FY2020) was developed based on outreach to each department, accounting for life-cycle costs, current conditions, and future demand. This agency-wide, "bottom-up" inventory was designed to produce a comprehensive picture of Metro's future capital needs. The over \$11 billion Capital Needs Inventory was prioritized based on agency goals and strategic objectives and presented to the Board on October 8, 2009.

Subsequently, the prioritized ten-year Capital Needs Inventory (CNI) effort was used to create a constrained \$4.9 billion six-year Capital Improvement Program (FY2011 – FY2016) that addresses Metro's most critical capital funding needs. Indeed, the Capital Improvement Program as a whole reflects a higher portion of "state of good performance" projects than the Capital Needs Inventory.

Due to fiscal constraints, the initial FY2011 budget call of \$839.7 million in December 2009 was trimmed down to \$709.3 million. Projects in the FY2011 capital budget reflect the same emphasis placed on "state of good performance" projects as does the overall six-year Capital Improvement Program.

Capital Improvement Program

The \$4.9 billion Capital Improvement Program (CIP) is a six-year program (FY2011 – FY2016) based on the 10-year \$11.4 billion Capital Needs Inventory (CNI) prioritization results, committed project funding, and other policy considerations. The goal of the CIP is to provide safe, reliable, and clean service.

The Capital Improvement Program (CIP) is the fundable, executable CNI program. It is developed under the assumption that current expenditure-based budgeting will continue under a new six-year agreement. The CIP provides a blue print of the annual planned work and its cost.

The program addresses Metro's physical assets. The CIP has adopted the CNI categories structure. The eight CIP categories are (1) Vehicles/Vehicle Parts, (2) Rail System Infrastructure Rehabilitation, (3) Maintenance Facilities, (4) Systems and Technology, (5) Track and Structure, (6) Passenger Facilities, (7) Maintenance Equipment, and (8) Other Facilities.

Funds to support the CIP come from three primary sources: Federal appropriations, state and local contributions, and long and short-term borrowing. Federal appropriations include two Federal Transit Administration formula grants and dedicated Federal funds. The dedicated federal funds were approved under the Passenger Rail Investment and Improvement Act (PRIIA) of 2008 (P.L. 110-432, sometimes known as the "dedicated funding bill"). It authorized \$1.5 billion over ten years for Metro's capital and preventive maintenance projects, to be matched dollar-for-dollar by the Metro Compact

jurisdictions. The Appropriations Act placed certain conditions on the use of those funds, requiring that Metro place the highest priority on "investments that will improve the safety of the system, including but not limited to fixing the track signal system, replacing the 1000 series rail cars, installing guarded turnouts, buying equipment for wayside worker protection, and installing rollback protection on cars that are not equipped with this safety feature."

The Capital Needs Inventory (CNI) and Project Prioritization

In September 2008, Metro staff presented to the Board the Capital Needs Inventory (CNI), which outlined over \$11.4 billion in needs over the next 10 years (FY2011 to FY2020). The CNI included Performance projects (\$7.6 billion, or 67% of total) and Customer/Demand projects (\$3.8 billion, or 33% of total). Performance projects maintain and replace assets on a life cycle basis. They promote safety and reliability and preserve the current levels of service. These projects keep Metro in a "State of Good Performance" - assets are not simply replaced with an exact replica, but with assets that take advantage of the latest technology and materials for greater efficiency. Customer/Demand projects help meet growing ridership requirements and improve the rider`s experience. Safety needs are included throughout the CNI.

Together, Performance and Customer/Demand capital needs address Metro's physical assets, including vehicles, fleet maintenance facilities, operating systems, information technology, rail system track, passenger facilities, maintenance equipment and support facilities. Not included in the CNI are system expansion projects (new entrances, stations or rail lines), transit projects entirely funded by jurisdictions, and other needs identified in the future by federal oversight agencies.

The CNI established Metro's capital needs baseline. To address the impact of funding constraints and to identify which projects should be fixed first, Metro staff conducted a rigorous prioritization process based on agency goals: (1) create a safer organization, (2) deliver quality service, (3) use every resource wisely, (4) retain and attract the best and the brightest, and (5) maintain and enhance Metro's image. In this process, Metro staff analyzed each CNI project based on its linkages to Metro's five strategic goals and their relative priority to other projects in the two CNI asset categories. The analysis also took into account project budget, asset age and policy considerations. In October 2009, Metro staff presented the prioritization results to the Board highlighting which capital needs should be funded first and which would need to be deferred to beyond FY2020.

The original CNI identified \$11.4 billion in capital needs over the next 10 years. Table 6.5 illustrates what portion of \$11.4 billion will be funded in the next six years.

Summary of the Financial Plan

The Financial Plan for the Capital Improvement Program is built on the following assumptions:

- Federal Formula Grants assume a 1-5% growth rate.
- <u>Federal Dedicated Funds</u> assume \$150.0 million from the federal government and \$150.0 million from state and local contributors.
- <u>System Performance Funds (previously called Local Additional Funds)</u> are \$107.6 million each year.
- <u>State and Local Contributions</u> for formula grants and local additional were estimated by grouping projects into bus, rail, bus/rail, and access categories and distributing the cost based on the FY2010 operating subsidy percentage.
- <u>Miscellaneous CIP Funding</u> is the anticipated proceeds from sale of real estate.
- <u>Debt</u> assumes the issuance of a 25-year, tax-exempt, gross transit revenue bond.

Reimbursable Projects

The reimbursable Project Development Program funds planning studies for new transit services for high priority corridors, station access and capacity improvements, and predevelopment planning in support of joint development in the District of Columbia, Maryland, and Virginia. Each jurisdiction contributes to the \$3.0 million funding level and approves the program priorities.

Budget Authority for FY2011

To provide the most up-to-date information on the Capital Program, this document includes the adopted budget for FY2011 of \$712.3 million with \$709.3 million for CIP and \$3.0 million for reimbursable projects. The FY2011 adopted budget, along with forecasted expenditures for FY2012 through FY2016, provides a complete overview of the Capital Improvement Program.

Automatic Vehicle Location Equipment Replacement CIP 002 Project: ID:

Management Information	
Sponsor Department:	BUS
Managing Department:	BMNT
Project Manager:	Jonathan Walker

Project Description

This project will begin the replacement of Automatic Vehicle Location (AVL) equipment on buses that was installed on buses in 2002. The equipment, which allows monitoring of bus locations, supports Next Bus, and provides computer aided dispatch information. The equipment has a life span of 7-10 years and is at the end of its useful life.

Operating Impact

Maintenance savings of approximately \$1,000,000 per year in FY 2013 - 2016 based on anticipated warranty vs. current costs to maintain.

FY2011 Deliverables • Complete SOW, solicitation, and issue NTP.

Complete backend infrastructure requirements. • Complete design and begin testing new dispatch and AVL systems.

Planned Activities (6 Year Program)

- Installation of new AVL on 1715 transit buses.
 Completed installation of advanced on board electronics for the entire fleet.
- Upgraded Bus Operations Control Center systems with New Computer Alded Dispatch.

Project Manager:	

Project Description

This project will help Metro expand bus service and increase transit market share penetration due to expected ridership growth of 10-15% between 2010 and 2020. Plans include possible corridor growth buses for use specifically along the Bus Priority Corridors, as well as buses needed to meet the projected demand between 2011-2020.

Project:	Bus Repair Equipment
ID:	CIP 004

Management Information	
Sponsor Department:	BUS
Managing Department:	BMNT
Project Manager:	Darin Welt

Project Description

This project will replace existing bus repair equipment which is past its useful life. It is more affordable to replace the equipment then repair it. It also provides new equipment needed to improve performance. This equipment is used by personnel for repair and maintenance of the bus and non-revenue fleets.

Operating Impact

Rehabilitated components are cheaper to maintain then those that fail regularly. This project will save approximately \$8,000 per engine and \$5,000 per transmission (\$4,400,000 annually).

.

- 100 Rehabilitate approximately 100 buses per year. 300 Overhaul approximately 300 engines per year.
 - .
 - 400 Transmissions overhaul. .
 - Electronics rebuild for destination signs, fare boxes, and other electronics. Rebuild engine components such as alternators, axles, steering knuckles. .

- Rebuild approximately 100 buses per year.
- Rebuild approximately 100 does par year.
 Rebuild approximately 300 engines per year.
 Rebuild approximately 400 transmissions per year.
 Rebuild electronic components.
 Rebuild small components.

Project Description

This project provides the components necessary to rehabilitate buses. The bus rehabilitation components are the repairable supply items such as fare box assemblies, radiator assemblies, alternators, and driver seats when the core is beyond economical repair or when the composition of the fleet changes. Bus rehabilitation components are also needed for engines and transmissions when technical changes are dictated by EPA regulations.

Operating Impact

These parts and assemblies extend the useful life of buses.

FY2011 Deliverables

Project supplies bus components to replenish inventory as they are depleted. .

Planned Activities (6 Year Program)

 Replace repairable bus components no longer repairable or past their useful life including but not limited to: alternators, Replace repairable bus components no longer repairable or past their userul line including but not infinite to: auternators, transmissions, coolers, driver's seats, radiator assemblies, cylinder heads, door and fan motors. Specific elements of the program include: replacement of engines as part of mid-life overhaul; destination sign replacement; hybrid/electric battery replacement as part of the mid-life overhaul; replacement of fare boxes during mid-life overhaul; and replacement of soot filters as part of mid-life overhaul.

Operating Impact

Upgrades to the remote monitoring system will reduce operation and maintenance costs.

FY2011 Deliverables

Installations and upgrades of storm water/waste water pre-treatment systems, installation of monitoring systems ٠ for underground/above ground storage tanks (UST/AST) and installation of an above ground storage tank.

Planned Activities (6 Year Program)

- Above-ground storage tanks (AST) Jackson Graham Building (JGB) install generator tank leak detection system and Under-ground storage tanks (UST) Bladensburg/2250 Connect used oil tank to leak detection system. ASTS Bladensburg/2250 Connect used oil tank to leak detection system. ASTS Bladensburg/2250 Connect used oil tank to leak detection system.

- ASTs Bladensburg/2251 Install used oil AST.
- Storm water management Largo Install vacuum line (pump room to grade).
- Wastewater Bladensburg/2250 Upgrade pretreatment system.
- USTs Four Mile Run Replace storm oil water system (OWS) vent.

Underground Storage Tank Replacement Project: CIP 011 ID:

Management Information		Useful Life
Sponsor Department:	SAFE	Years: 30
Managing Department:	ESVC	
Project Manager:	Diana Bowdry	

Project Description

This project will replace Underground Storage Tanks (UST) which fuel service vehicles, track equipment and buses. USTs also store engine oils, fluids. It will replace USTs at the end of their warranty periods and rehabilitate systems at their mid-life using the latest technologies available. Upgrades and replacements are required to minimize potential liabilities.

Operating Impact

Further degradation of tanks may lead to mitigation costs.

FY2011 Deliverables

.

Replace underground storage tanks as they reach the end of their 30 year warranty period. Includes tanks for fuel, engine oil, transmission fluid, antifreeze, and heating oil.

Planned Activities (6 Year Program)

 Design and replace six (6) underground storage tanks at the end of their 30 year warranty period. Location: Southern Avenue four (4), Bladensburg two (2).

Operating Impact

There is no net reduction to the MetroAccess operating contract since there are no additional funds available for the purchase of vehicles. MetroAccess operating contract expense would be greatly increased if vehicle acquisitions are not capitalized. Capitalizing fleet purchases improves reliability and sustainability of the fleet by maintaining an average fleet age of four years. Maintenance costs are lower for newer vehicles.

FY2011 Deliverables
 235 Replacement of MetroAccess vehicles and ancillary equipment.

Planned Activities (6 Year Program)

 Purchase a total of 1,145 MetroAccess revenue vehicles along with ancillary equipment (including DriveCams, MDTs and vehicle assembly line inspections) at approximately \$54,805 per vehicle from FY 2011 to FY 2016. 200 replacement vehicles will be acquired during FY 2011. Vehicles being replaced are model year 2005 and 2006 Ford E-350 vans, Ford Crown Victoria and Taurus sedans. Capitalizing fleet purchases creates substantial savings to Metro by removing vehicle purchases from operating contracts. This eliminates sales and excise taxes, as well as additional markups charged by a paratransit contractor.

Track Welding Program Project: **CIP 018** ID:

Management Information	
Sponsor Department:	
Managing Department:	
Project Manager:	

Project Description This project will improve the electrical conductivity of the rail, reduce and repair joint defects, reduce noise and wear, reduce the project will improve the electrical conductivity of the rail, reduce and repair joint defects, reduce noise and wear, reduce maintenance and inspection costs, and help reduce cross tie fires by reducing the number of open rail joints throughout the rail maintenance and inspection costs, and near reduce cross the mes by reducing the namber of open rail joints biroughout the rail system. Currently there are approximately 1,750 open rail joints system wide. As a result of running rail replacement, approximately 400 new open joints are created each year. The flash butt welding approach enables open joints to be welded at a much faster rate. In addition, the flash butt welding process allows for thermal adjustment to our track system, reducing the occurrences of track buckling and track pull parts, thus reducing delays and shutdown.

Replacement of Rail Track Signage Project: ID: CIP 020

Management Information

Sponsor Department:	
Managing Department:	
Project Manager:	

Project Description

oiect Description This project will replace old, illegible rail track graphic signs and various other signs indicating locations and warnings to employees, emergency responders, and the general public. Track graphics are essential for safe operations and emergency responses. Many signs throughout the Metrorail System are approximately 30 years old. Some of these signs require upgrading because they are damaged, deteriorated, or obsolete. The Right of Way (ROW) graphic signs are system wide (on the ROW fence, chain markers, warning signs on tunnel vent shaft doors, third rail power warning signs, and track identification signs).

Track Pad/Shock Absorber Rehabilitation Project: ID: CIP 021

Management Information Sponsor Department:	TSSM	Useful Life Years: Various	
Managing Department: Project Manager:	TSSM Larry E. Lee		

Project Description

Otex Description This project will maintain track structure integrity by rehabilitating the grout/plinth pads. In addition, sections of track structure require rehabilitation to accept the new fasteners, switches, and switch machines required needed to sustain safe and efficient rail operations. Metro has an inventory of approximately 160 miles of grout pads (844,800 linear feet). Rehabilitation of the aerial grout pads is limited to the spring, summer, and fall. During the winter months, rehabilitates the grout pads in the Metro tunnels. The track geometry, cross-level, and gauge are maintained by the rail fasteners. The grout/plinth pads provide elevation and elevation and support the number of the number of the rail fasteners. support for the running rails and are the main support for the rail fasteners.

Track Structural Rehabilitation Project: ID: CIP 022

Management Information Sponsor Department: Managing Department:	TSSM TSSM	, *	<u>Useful Life</u> Years:	Various
Project Manager:	Larry E. Lee			

Project Description

This project will rehabilitate structural components and restore the track structures, such as elevated platforms, bridges, and retaining walls to their designed load carrying capacity. These rehabilitations are critical, as the loss of one of these structures could result in the functional loss of an entire Metrorail line segment.

Management Information	
Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Michael Brown

Project Description

This project will fund the procurement of material and specialized equipment to facilitate the removal and installation of the track and In sproject will rund the procurement or material and specialized equipment to racilitate the removal and installation of the track and switch panels which prevents service delays and speed restrictions. Track components require replacement when, based on industry standards, they become worn or unserviceable due to deterioration, excessive wear, or defects. Track infrastructure is rehabilitated by replacing running rail, cross ties, direct fixation fasteners, third rail insulators, and turnouts annually.

Track Maintenance Equipment Project: CIP 025 ID:

Management Information	
Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Michael Brown

Project Description

This project funds the rehabilitation / replacement of heavy-duty track equipment. Track maintenance equipment is essential to deliver quality service and for the safe and efficient execution of the track rehabilitation work. Timely rehabilitation and replacement of self-propelled track equipment will ensure equipment reliability, reduce the probability of delays due to equipment breakdowns, and allow for efficient use of the right-of-way track time. This project funds the replacement of heavy-duty track equipment that has reached the end of its useful lifecycle and is no long economically feasible to maintain.

Operating Impact

Additional infrastructure will require greater operational support. Lower dead heading costs.

FY2011 Deliverables

Closeout of West Ox Bus Garage.

Planned Activities (6 Year Program)

- Planning and design.
- Completed facilities will require environmental assessment, planning and design, and acquisition of land prior to construction. Construction of 2 additional bus garages. Planning and design for the maintenance of the storage of large articulated buses.

Project Description

OBEC DESCRIPTION This project will modernize and integrate systems for communicating with customers and regional partners in a wide variety of circumstances including normal operations, minor delays, major delays, and emergencies. The current Metro IT environment has arisen over the past 30 years in an ad-hoc manner. This project solves this daunting enterprise problem by developing and deploying an enterprise-wide Service Oriented Architecture (SOA) that will integrate information sharing authority-wide.

Data Centers and Infrastructures Project: ID: **CIP 045**

Management Information

Sponsor Department: Managing Department: Project Manager:

Veronica Lipscombe

Useful Life 10 Years:

Project Description

This project will bring the Data Center infrastructure up to date including an upgrade of the data center facility, the computer rooms, transition of enterprise platforms from mainframe to client-server, enterprise storage and the consolidation of redundant and costly server infrastructure. Without this investment, Metro's current applications and all the applications considered in this capital plan will suffer from unnecessary failures possibly impacting visible transit operations such as rail control, fare collection or passenger information services.

.

This will result in increased productivity and efficiency in accounting, treasury, budget, procurement and cash management functions.

FY2011 Deliverables

- Re-architecture and upgrade of various modules of PeopleSoft Financials to version 9.1
 - System upgrade of Accounts Receivable, Payable, General Ledger, Cash Management, Billing, Purchasing, Strategic Sourcing, and Asset Management
- Sourcing, and Asset Management New implementation of Commitment Control in budgeting, Project Costing, Grants Management, and Customer
- Contracts. Re-architecture of integration between PeopleSoft and Maximo.

- Upgrade Metro's Human Capital Management system to current version to align with re-architected business processes.
 Upgrade the technical infrastructure (Operating systems, databases, middleware and hardware).
- Replace the legacy training system with an integrated learning management system to incorporate training and reporting requirements.
- Automate Metro's paper-intensive employee performance management system.
- Enable Metro's data warehousing capabilities with establishment of a corporate data warehouse.
- Provide the Treasury department with tools to automate cash forecasting.
- Provide the Procurement department with tools for vendor and solicitation management.

Project Description

This project maintains a one-stop desktop services center for remote support and trouble-shooting, software and hardware This project maintains a one-stop desktop services center for remote support and trouble-shooting, software and hardware installation, electronic software distribution, and MS applications support. In order to achieve the overall desktop support mission the Authority requires a fully functioning IT Help Desk utilizing industry best practices. The Help Desk will be staffed by three tiers of highly skilled support technicians, desktop equipment inventory specialists, business analyst, and appropriate management. These staff will ensure that the Help Desk is operating in the most efficient manner, utilizing best practices to achieve agreed upon service levels, while delivering on it's basic mission to provide day-to-day technical assistance to Metro employees, including the receiving and deployment of new and replacement equipment (refresh) as well as addressing interoperability issues on all standard refursed endowed acress exclored. software deployed across systems.

Operating Impact

Better trained support - Support staff will have access to up-to-date procedures and problem solutions. Faster, more consistent problem resolution - Support staff will be able to trouble-shoot and identify problems more effectively and implement tried and true solutions. Process and service improvements will be supported by direct input from customers and staff. Accurate and up-todate analysis of performance will facilitate timely process improvements and increase service levels. Software licensing will remain un-to-date.

FY2011 Deliverables

- KnowledgeBase tool that will serve as an on-line repository for maintaining Help Desk procedures, solutions to identified problems, and guides for trouble-shooting specific issues.
 - Business analytics that will allow the Help Desk team to track performance against services levels identify trends,
- and identify opportunities for process improvements. Customer outreach strategy that engages customers, fosters partnerships, and builds confidence in our service provisions.

- Identify and prioritize issues and challenges faced by customers and technology support staff.
- Evaluate commercial knowledge base, business analytics, and remote desktop technologies to assist with build or buy decisions.
- Develop and implement knowledgebase content.
- Develop and implement remote control software applications based on identified opportunities.
- Identify best practice metrics, quality reporting, and customer surveys.
- Support the ordering, deployment and surplussing of desktop computer equipment.

Project Description

This project provides for the annual procurement of major repairable rail car components to support the maintenance of the fleet in a state of good performance. Major railcar components must be switched out on a regular basis. While these assemblies can sometimes be refurbished and re-used, eventually they will have to be removed from use completely. Therefore, a certain quantity of new components must be acquired each year. Approximately one-fifth of the fleet or 225 cars are subject to heavy overhaul annually. Major heavy overhaul components include replacement of wheels, brake systems, traction motors and truck overhaul.

Installation of Parking Lot Credit Card Readers Project: ID: **CIP 074**

Management Information	
Sponsor Department:	
Managing Department:	
Project Manager:	

Project Description

UNSCL PERSIDUALI This project will expand credit card readers at all remaining parking garages and surface parking lots. Bank card / credit card readers will allow more customers to use payment cards to pay for parking and make the system easier to use for visitors and first time users. Infrequent users of the daily parking facilities find the cash-less SmarTrip-only payment requirement frustrating and confusing.

Operating Impact

Cost to maintain new equipment should be the same as maintaining existing equipment.

FY2011 Deliverables

Develop scope, D&F for sole source procurement, RPF to award contract. Utilize outside engineering services as required.

- Calculate narrow banding effect on Comprehensive Radio Communication System (CRCS) radio coverage. Define needs for additional remote radio frequency (RF) sites and desired locations. Specify equipment and system
- Obtain leases for new remote RF sites. Complete design, implementation plan, drawings, and test procedures.
- Develop new remote sites. Procure equipment. Reconfigure equipment at existing remote RF sites. Reconfigure CRCS prime site and master control systems. Install and reconfigure remaining equipment at remote RF sites. Perform coverage test for above ground and below ground radios. Provide training, spares, as built drawings, and documentation.

- Engineering and program management to develop scope of work, Sole source justification, prepare request for proposals (RFP), negotiate/issue contract.
- Outside engineering services will be utilized in FY 2011 and FY 2012 with implementation beginning FY 2012.

Rail Mileage Based Asset Management Project: ID: **CIP 140**

Management Information

Sponsor Department: Managing Department: Project Manager:

Michael Smith

Project Description

The WMATA Maintenance Modernization Project seeks technical expertise and assistance with four objectives: 1) Create the infrastructure to capture actual miles traveled from rail cars and upload the mileage to Maximo whenever the rail car enters the rail yard. 2) Implement Maximo Asset Configuration Manager in a Maximo 7 environment. 3) Obtain consulting services to provide assistance to WMATA in implementing Mileage Based Preventive Maintenance for the Rail Car Fleet. 4) Implement handheld tools via a Mobile Maximo solution to introduce field capabilities for inventory management and work management tasks.

Operating Impact

FY2011 Deliverables

- 500 Deliver DuraCor proof of concept
- 300 Deriver Duracor provide or concept
 370 Installation of DuraCor Device on 2000/3000, 5000 and 6000 Series Railcars
 13,200 Asset configuration Manager implementation in Maximo 7 environment

- 1,000 Test DuraCor data integration to Maximo 7 application 1,600 WLAN equipment installation to facilitate DuraCor data feed to Maximo 1,400 Move from time based PM to mileage based PM cycle in Maximo 7 for rail car fleet
- 14,000 implement mobile Maximo inventory solution in Maximo 7 environment

Planned Activities (6 Year Program)

Secure engineering and consulting services for project

- Purchase and install 370 DuraCor devices on 2000/3000, 5000 and 6000 Series Railcar.
- Perform BPR of railcar preventive maintenance process.
- Purchase WLAN equipment for wireless upload

Appendix A. Capital Program

This appendix includes information on four previously approved capital programs: the American Recovery and Reinvestment Act (ARRA) Capital Program, Reimbursable Projects, Other Capital Projects, and the Metro Matters Program.

American Recovery and Reinvestment Act (ARRA) Capital Program

The American Recovery and Reinvestment Act (ARRA) was signed into law by President Obama on February 17, 2009. The legislation provides significant federal funding to infrastructure projects around the nation and stimulates the economy on both national and local levels.

The projects selected receive 100 percent federal funding; no local match is required. Metro's portion of the regional allocation is \$201.8 million. The Board approved the budget in March 2009. The legislation specifies that these projects be pursued expeditiously; to that end it is expected that these projects will be completed within three years. A total of \$82 million was expended in FY2010. It is anticipated that \$119.8 million will be expended in FY2011. Projects were prioritized and selected according to Metro's goals and the ability to meet the specific legislation requirements.

There are seven categories of ARRA projects as follows:

- Vehicles & Vehicle Parts includes replacement buses, MetroAccess vehicles, bus parts, and service vehicle replacements.
- Maintenance Facility projects replace, repair, and expand maintenance and garage capacity to maintain the existing fleet and meet growing transit demand.
- Passenger Facilities projects improve the safety and efficiency of stations.
- Safety and Security projects provide for an even safer environment for customers and employees.
- Replacement of Maintenance and Repair Equipment that has reached the end of its useful life is necessary in order to provide reliable service.
- Operations Systems are important for employee and customer safety, service efficiency, and exchange of reliable real-time information.
- Information Technology projects enhance system recovery in disaster situations and improve system efficiency.

Because the entire \$201.8 million ARRA Capital Program was adopted by the Board in FY2009, no additional budget authority is required for FY2011. A forecast of expenditures for FY2011 is provided for informational purposes.

Please note: this table reflects final FY 2010 expenditures that were higher than previously forecast.

Reimbursable Projects

Reimbursable projects are those unique projects for which separate funding has been arranged with Metro's jurisdictional partners. The most common of these projects are Metrorail station enhancements and parking facilities paid for by one of Metro's state and local government partners. It is anticipated that \$145.2 million will be expended in FY2011.

Reimbursable projects in this chapter were authorized by prior Board actions and are displayed for informational purposes. Information for these existing reimbursable projects includes actual expenditures for FY2008, FY2009 and FY2010 and the new budget authority for FY2011. Although no additional budget authority is required for FY2011, an expenditure forecast is provided for informational purposes.

New reimbursable projects or existing reimbursable projects requesting additional budget for FY2011 that require Board authority are reflected in Appendix A. Capital Program.

Other Capital Projects

In addition to the capital projects that are found in Capital Improvement Program (CIP), the Metro Matters Program, the American Recovery and Reinvestment Act (ARRA), and Reimbursable programs, there are a small number of other capital projects that are active. Most of these other capital projects began prior to the start of the Metro Matters Program in FY2005, and are in the process of being completed. It is anticipated that \$12.2 million will be expended in FY2011.

A number of infrastructure renewal projects began before the Metro Matters Program, will continue to draw towards completion in FY2011. The Emergency Rail Rehabilitation Program (ERRP), begun in FY1999, enters its final phase in FY2011 with the rehabilitation of the heating, ventilation, and air conditioning (HVAC) systems on the 1000-Series rail cars. Previously under ERRP, the propulsion and braking systems of the 1000-Series rail cars were rehabilitated.

The projects found under Other Capital Projects were all authorized by the Board of Directors in prior fiscal years. Although no additional budget authority is required for FY2011, an expenditure forecast is provided for informational purposes.

Metro Matters Program

The Metro Matters Program, began in Metro's FY2005, had a total multi-year budget of \$3.9 billion, including debt service and security projects. Although most project work was completed during the funded six-year period FY2005 to FY2010, repaying the necessary debt, including long-term bonds, will extend for multiple years into the future. This section provides data for all years of the Metro Matters program.

This program consisted of three main program elements as follows:

- A. Infrastructure Renewal Program (IRP) reduced service delays caused by infrastructure decay on components such as elevator and escalator rehabilitation, track maintenance, improved station amenities, communications and information technology improvements. Most projects were completed by the end of FY2010 but some will continue into FY2011 and beyond.
- B. Eight-Car Train Capital Initiative increased passenger carrying capacity and reduced crowding on station platforms by procuring an 184 6000-Series rail cars and expanded the Bentwood, Greenbelt, and Shady Grove Rail Yards, which allow for upgrades to 50 percent 8-car trains fleets.
- C. Bus Improvement Capital Initiative. Procured 25 expansion buses and the West Ox Bus Facility was constructed jointly in partnership with Fairfax County.

Funds to support the Metro CIP come from three primary sources:

- Federal funds
- State and local contributions
- Long and short-term borrowing

Federal funds include two Federal Transit Administration formula grants, discretionary funds authorized by Congress, and Homeland Security grants.

All Metro Matters activities and funding in FY2011 and beyond are included in the CIP.

that was to be entirely funded by the federal government. This was incorporated into the agreement though federal funds were not identified at the time. In the interving period, WMATA staff have sought federal security funding. To date this effort has resulted in significantly less funding than was hoped for. For this reason, a revised Metro Matters Security Program is presented. Please note that this does not include federal security grants received by WMATA prior to the adoption of the Metro Matters Funding Agreement in October, 2004.	jovernm jovernm it federa Program iding Ag	ent.] secur is pre reeme	This waiting furning the control of	as inco Iding. Operating Impact

- FY2011 Deliverables

 BPR: Scheduling and OPS operational review for implementation.

 Improve rail scheduling process.

 Integrate with ACS Orbital, Clever Devices system.

 WMATA work practices operational review, in terms of line based or route based scheduling

 FX Interface software for data exchange between Trapeze FX, OrbCAD, and Clever BusTool.

 Trapeze OPS-MON Interface for ACS, to be provided directly to WMATA.

 Revised training program plan and training courses

 Implement automated driver sign-on and self service for daily assignments.

 Develop new reports and redesign some of the existing reports for better management reporting.

 Train IT for internal Trapeze support.

Planned Activities

- need Activities Upgrade trapeze to version 9. Business process review and implementation. Training, upgrade and integration. Trapeze FX interface. Trapeze OPS interface (MON). Trapeze ATIS data loader. OPC data in terminal

- OPS sign-in terminal.
 Custom reports bus infrastructure review.

Operating Impact

- FY2011 Deliverables

 •
 Re-architecture and upgrade of various modules of PeopleSoft Financials to version 9.1.

 •
 System upgrade of Accounts Receivable, Payable, General Ledger, Cash Management, Billing, Purchasing, Strategic Sourcing, and Asset Management.

 •
 New implementation of Commitment Control in budgeting, Project Costing, Grants Management, and Customer Contracts.

 •
 Re-architecture of integration between PeopleSoft and Maximo.

 •
 New business process for project costing and grants management.

 •
 Revised business process and workflow for procurement function.

Planned Activities

- Upgrade Metro's Human Capital Management system to current version to align with re-architected business processes.
 Upgrade the technical infrastructure (Operating systems, databases, middleware, and hardware).
 Replace the legacy training system with an integrated learning management system to incorporate training and reporting requirements.
 Automate Metro's paper-intensive employee performance management system.
 Enable Metro's data warehousing capabilities with establishment of a corporate data warehouse.
 Provide the treasury department with tools to automate cash forecasting.
 Provide the procurement department with tools for vendor and solicitation management.

Operating Impact Do not expect an increase maintenance costs. Life cycle cost should better that of current tiles. Liability due to slip and fall may decrease because of better slip resistance.

FY2011 Deliverables
 Remove deteriorated platform structural slab in 8'-4" sections and replace with new slab at Rockville and Shady Grove stations.
 Begin installation of granite edge and replace existing quarry tiles with concrete pavers.

Planned Activities

 Replace six other crumbling platform under Red Line Rehabilitation contract and four platforms under Orange-Blue Line Rehabilitation contract.

Bus Replacement Components Project: ID:

ID:	CL_RPBL	
	nent Information	BMNT
	or Department: ing Department:	BMNT
	t Manager:	Welt, Darin R.

Useful Life Years: 5

Project Description This project provides the components necessary to maintain the bus fleet. The bus components to be purchased are needed to replace the repairable supply of replacement items such as fare box assemblies, radiator assemblies, alternators, and driver seats when the core is beyond economical repair or when the composition of the fleet changes.

Force Account Management Plan

FTA Grant Application Requirements:

In compliance with Grant Management Requirements, Circular 5010.1D, FTA review of a force account plan and justification are required where the total estimated cost of force account work to be performed under the grant is greater than \$10,000,000.

Basis for Reimbursement: To be eligible for reimbursement for force account work, the grantee must provide the following before incurring costs:

- 1. Justification for using grantee forces.
- 2. Preparation of a force account plan.
- 3. Description of the Scope of Work.
- 4. Construction plans and specifications which includes: cost estimates, schedule and budget, and proposed cooperative agreement when another public agency is involved.
- 5. Documentation equivalent to a sole source justification stating the basis for a determination that no private sector contractor has the expertise to perform the work. In addition, the required documentation must provide the basis for the grantee decision to use force account labor including the following information.
- 6. Present worth of the estimated cash drawdown for both the force account and private sector contract options. In the analysis, use the current interest rate paid on one-year Treasury Bills as the discount rate,
- 7. Cost of preparing documents; cost of administration and inspection; cost of labor, materials and specialized equipment; cost of overhead; and profit for private contract.
- 8. Unit prices for labor; materials and equipment; overhead; and profit, if applicable for private contract.
- 9. Certification that costs presented is fair and reasonable.
- 10. Analysis of force account labor availability, considering normal operations and maintenance activities as well as other programmed and existing capital projects. This must be consistent with costs of labor, material, and specialized equipment.

11. Relevant citations from labor union agreements and an analysis of how it pertains to the work in question.

WMATA Force Account Management Plan Process:

In compliance with Grant Management Requirements, Circular 5010.1D, the Office of Management and Budget Services (OMBS) conducts an annual budget call for planned expenditures and activities on all capital projects. As part of the annual budget call, project offices submit Force Account Plan data.

Project Offices will certify the cost of direct labor by WMATA office (Operations Mode 33 detailed by Capital Project).

Project Offices provide detailed staffing cost plans by project. Where necessary, plans should include overtime plans, as well as straight time by hours. Indicate projected time and labor by project (where applicable):

- ✓ internal labor by costs;
- ✓ straight time; and
- ✓ overtime

Project Offices provide justification for each project (where applicable) related to:

- ✓ Safety Security;
- ✓ Union Agreement;
- ✓ Exclusive Expertise; and/or
- ✓ Cost Savings

OMBS staff compiles the Force Account Management Plan which is reviewed by the OMBS Director and approved by of the CFO. The Force Account Management Plan file will be maintained by OMBS.

OMBS staff will monitor Force Account expenditures on an ongoing basis and compile a quarterly report. This report will be used to work with project offices as necessary to develop a corrective action plan in any instance where expenditures vary from the Force Account Plan.

WMATA Force Account Plan - Summary Fiscal Year 2011

Washington Metropolitan Area Transit Authority Rebuilding the Foundation

Project: Cheverly Abutment ID: CIP 141

Management Information

Sponsor Department:	ESVC
Managing Department:	ESVC
Project Manager:	John Thomas

Project Description

Repair damage to a bridge abutment and restore track to its original alignment and install permanent stability structure for protection against future problems.

Force Account Summary

Cost:	\$ 850,000
Straight Time Hours:	10,000
Overtime Hours:	6,500
Total Hours:	16,500

Justification

Safety & Security

Safety considerations drive the need for this effort. The abutment must be repaired and structurally enhanced to maintain safe operating conditions.

Union Agreement

Exclusive Expertise

Washington Metropolitan Area Transit Authority Force Account Plan - FY2011

Project: Bus Rehabilitation Program ID: CIP 005

Management Information

Sponsor Department:	BUS
Managing Department:	BMNT
Project Manager:	Phil Wallace

Project Description

This project will provide components necessary to rehabilitate buses, including but not limited to, electrical and mechanical parts. Programs include the Bus rehab, Transmission Overhaul, Engine Overhaul, Electronic Rebuild, and Small Components Rebuild.

Force Account Summary

Cost:	\$ 14,000,000
Straight Time Hours:	350,000
Overtime Hours:	
Total Hours:	350,000

Justification

Safety & Security

Union Agreement Project supports approximately 100 local union employees.

Exclusive Expertise

Project: Underground Storage Tank Replacement ID: CIP 011

Management Information

Sponsor Department:	SAFE
Managing Department:	ESVC
Project Manager:	Diana Bowdry

Project Description

This project will replace Underground Storage Tanks (UST) which fuel service vehicles, track equipment and buses. USTs also store engine oils, fluids. It will replace USTs at the end of their warranty periods and rehabilitate systems at their mid-life using the latest technologies available. Upgrades and replacements are required to minimize potential liabilities.

Force Account Summary

Cost:	\$ 20,000
Straight Time Hours:	237
Overtime Hours:	152
Total Hours:	388

Justification

Safety & Security

Union Agreement

Exclusive Expertise

Personnel specializes in scheduling installation and preparing work site safely to prevent interruption to operations.

Project: Track Welding Program ID: CIP 018

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Michael Brown

Project Description

This project will improve the electrical conductivity of the rail, eliminate joint defects, reduce noise and wear, reduce maintenance and inspection costs, and help reduce cross tie fires by reducing the number of open rail joints throughout the rail system. This is an ongoing project. Currently there are approximately 1,750 open rail joints systemwide. As a result of running rail replacement, approximately 400 new open joints are created each year. The Flash Butt welding approach enables open joints to be welded at a much faster rate. In addition, the flash butt welding process allows for thermal adjustment to our track system, reducing the occurrences of track buckling and track pull parts, thus reducing delays and shutdown.

Force Account Summary

Cost:	\$ 996,865
Straight Time Hours:	15,360
Overtime Hours:	3,400
Total Hours:	18,760

Justification

Safety & Security

Union Agreement

Agreement between Washington Metropolitan Area Transit Authority and Local Union 689 of the Amalgamated Transit Union AFL-CIO – Section 110 – Subcontracting: The Authority shall not contract out or subcontract any work normally performed by the employees within the bargaining unit defined in this Agreement which would result in a lay-off, transfer or demotion of these employees.

Michael Brown

Project: Track Floating Slab Rehabilitation ID: CIP 019

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Michael Brown

Project Description

This project will prevent service delays and speed restrictions due to differential settlement of the track structure and reduce noise and vibration to the surrounding building and structures by replacing failed isolation pads and restore the track structure to the proper elevation. Metro has an inventory of 45,530 linear feet of floating slabs.

Force Account Summary

Cost:	\$	956,868
Straight Time Hours:		18,720
Overtime Hours:		625
Total Hours:	100 100	19,345

Justification

Safety & Security

Union Agreement

Agreement between Washington Metropolitan Area Transit Authority and Local Union 689 of the Amalgamated Transit Union AFL-CIO – Section 110 – Subcontracting: The Authority shall not contract out or subcontract any work normally performed by the employees within the bargaining unit defined in this Agreement which would result in a lay-off, transfer or demotion of these employees.

Project: Replacement of Rail Track Signage CIP 020 ID:

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Larry E. Lee

Project Description

This project will replace old, illegible rail track graphic signs and various other signs indicating locations and warnings to employees, emergency responders, and the general public. Track graphics are essential for safe operations and emergency responses. Many signs throughout the Metrorail System are approximately 30 years old. Some of these signs require upgrading because they are damaged, deteriorated, or obsolete. The Right of Way (ROW) graphic signs are systemwide (on the ROW fence, chain markers, warning signs on tunnel vent shaft doors, third rail power warning signs, track identification signs, etc.).

Force Account Summary

Cost:	\$ 714,377
Straight Time Hours:	12,480
Overtime Hours:	1,260
Total Hours:	13,740

Justification

Safety & Security

Union Agreement

Agreement between Washington Metropolitan Area Transit Authority and Local Union 689 of the Amalgamated Transit Union AFL-CIO – Section 110 – Subcontracting: The Authority shall not contract out or subcontract any work normally performed by the employees within the bargaining unit defined in this Agreement which would result in a lay-off, transfer or demotion of these employees.

ignature Project Managers

Project: Track Pad/Shock Absorber Rehabilitation ID: CIP 021

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Larry E. Lee

Project Description

This project will maintain track structure integrity by rehabilitating the grout/plinth pads. In addition, sections of track structure require rehabilitation to accept the new fasteners, switches, and switch machines required needed to sustain safe and efficient rail operations. Metro has an inventory of approximately 160 miles of grout pads (844,800 linear feet). Rehabilitation of the aerial grout pads is limited to the spring, summer and fall. During the winter months, STRC rehabilitates the grout pads in the Metro tunnels. The track geometry, cross-level, and gauge are maintained by the rail fasteners. The grout/plinth pads provide elevation and support for the running rails and are the main support for the rail fasteners.

Force Account Summary

Cost:	\$ 1,631,214
Straight Time Hours:	29,120
Overtime Hours:	2,500
Total Hours:	31,620

Project: Track Structural Rehabilitation ID: CIP 022

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Larry E. Lee

Project Description

This project will rehabilitate structural components and restore the track structures, such as elevated platforms, bridges, and retaining walls to their designed load carrying capacity. These rehabilitations are critical, as the loss of one of these structures could result in the functional loss of an entire Metrorail line segment.

Force Account Summary

Cost:	\$ 1,152,286
Straight Time Hours:	18,720
Overtime Hours:	3,030
Total Hours:	21,750

Justification

Safety & Security

Union Agreement

Agreement between Washington Metropolitan Area Transit Authority and Local Union 689 of the Amalgamated Transit Union AFL-CIO – Section 110 – Subcontracting: The Authority shall not contract out or subcontract any work normally performed by the employees within the bargaining unit defined in this Agreement which would result in a lay-off, transfer or demotion of these employees.

Project: Track Rehabilitation ID: CIP 024

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Michael Brown

Project Description

This project will fund the procurement of material and specialized equipment to facilitate the removal and installation of the track and switch panels which prevents service delays and speed restrictions. Track components require replacement when, based on industry standards, they become worn or unserviceable due to deterioration, excessive wear, or defects. TSSM rehabilitates the track infrastructure by replacing running rail, cross ties, direct fixation fasteners, third rail insulators, and turnouts annually.

Force Account Summary

Cost:	\$ 20,318,843

Safety & Security

Union Agreement

Agreement between Washington Metropolitan Area Transit Authority and Local Union 689 of the Amalgamated Transit Union AFL-CIO – Section 110 – Subcontracting: The Authority shall not contract out or subcontract any work normally performed by the employees within the bargaining unit defined in this Agreement which would result in a lay-off, transfer or demotion of these employees.

Exclusive Expertise

The station and tunnel leaks will be repaired by Metro's workforces who are trained to work in underground electrical railroad stations and tunnels. These employees have been trained to operate the leak repair equipment and work trains that are used to travel to and from the work locations. Also, they are certified in Metro's safety and operational procedures, including emergency power removal and train flagging procedures to prevent accidents and injuries. This exclusive expertise, the safety and efficiency of the tunnel leak repair activity, and Metrorail Operations require the use of in-house forces.

Cost Savings

Project Manager Signature

Project: Switch Machine Rehabilitation Project ID: CIP 027

Management Information

Sponsor Department:	TSSM
Managing Department:	TSSM
Project Manager:	Michael Savina

Project Description

This project will improve the safety and reliability of the interlocking track structure by replacing selected switch machines as scheduled or as related to service delays. This work is necessary to ensure Metrorail system reliability.

Force Account Summary

Cost:	\$ 414,901
Straight Time Hours:	8,320
Overtime Hours:	 -
Total Hours:	8,320

Justification

Project Manager:	Arthur Noyes

Project Description

This project will provide for the partial rehabilitation of the Jackson Graham Building (JGB), most notably the Power Distribution Unit (PDU). Many internal systems, including the PDU that provides power for the bus and rail operational control centers, are obsolete and unreliable. Replacement and rehabilitation will prevent future outages of critical operating and information systems.

Project: Track Fasteners ID: CIP 089

Management Information

Sponsor Department:	ESVC
Managing Department:	ESVĆ
Project Manager:	Douglas Gibson

Project Description

This project replaces track fasteners that, when worn out, cause stray current and have often been found to be the cause of fires on the system. Track fasteners are an integral structural component of the track system that needs to be replaced periodically. Metro has an inventory of 504, 514 fasteners systemwide.

Force Account Summary

Cost:	\$ 2,000,000
Straight Time Hours:	-
Overtime Hours:	26,900
Total Hours:	26,900

Justification

Safety & Security

Union Agreement

Agreement between Washington Metropolitan Area Transit Authority and Local Union 689 of the Amalgamated Transit Union AFL-CIO – Section 110 – Subcontracting: The Authority shall not contract out or subcontract any work normally performed by the employees within the bargaining unit defined in this Agreement which would result in a lay-off, transfer or demotion of these employees.

Exclusive Expertise

The Right of Way track fasteners will be rehabilitated by Metro's workforces who have been trained in specialized Metro's safety and operational procedures for working in the track bed and along the right-of-way of the Metrorail system. These procedures include establishment of track rights, removal and restoration of third rail power, and train flagging to prevent accidents and injuries. This experience is required to ensure operational safety and to minimize the adverse impact on Metrorail operations.

SUBJECT: USE OF OPERATING RESERVE

2003-50 RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, By resolution #97-35 the Board established a \$7.9 million reserve to provide a contingency for potential shortfalls in federal operating assistance; and

WHEREAS, The Authority experienced a \$3.3 million budget shortfall, subject to audit, in FY03 due primarily to excess expense and revenue losses associated with the record Presidents Day snowstorm, as well as lower than planned tourist ridership; and

WHEREAS, The Authority has requested reimbursements from the Federal Emergency Management Agency to offset eligible expenses associated with the snow storm, as well as from the Office for Domestic Emergency Preparedness to offset extra security costs during the war in Iraq, but will not likely receive these funds until FY2004 or beyond; now, therefore, be it

RESOLVED, That the WMATA Board approves the conversion of the existing reserve for loss of federal operating assistance into an operating reserve, to be used only upon approval of the Board; and be it further

RESOLVED, That the WMATA Board authorizes the continued financial support of this reserve such that it will, when feasible, be maintained at a balance not to exceed 1% of the current year operating expense budget; and be it further

RESOLVED, That if, at the end of any fiscal year, the Operating Budget concludes with a subsidy surplus, the first distribution of said surplus shall be directed to this reserve in order to satisfy the authorized balance; and be it further

RESOLVED, That the WMATA Board authorizes the use of the aforementioned reserve to offset the FY03 operating budget shortfall of approximately \$3.3 million, subject to audit; and be it further

RESOLVED, That any reimbursements received to cover prior year operating costs will be reported to the Board and used to replenish the reserve; and be it further

RESOLVED, That the status of this reserve shall be reviewed with the Board as part of the budget review and approval process; and be it further

RESOLVED, That this resolution shall be effective immediately.

SUBJECT: IMPLEMENTATION OF A DEMONSTRATION BUS SERVICE PROJECT, LIMITED STOP METROBUS ROUTE S9, ON 16TH STREET IN THE DISTRICT OF COLUMBIA AND AMEND THE FY09 OPERATING BUDGET AND ADJUST THE FY10 PROPOSED BUDGET

2009-16

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Metrobus 16th Street Line has the third highest ridership of any Metrobus line with over 16,000 daily riders providing bus service from Silver Spring along 16th Street, NW to Downtown at Federal Triangle and Potomac Park/State Department; and

WHEREAS, The 16th Street Line suffers from continuing performance-related problems including schedule adherence, bus bunching, passenger crowding and traffic congestion; and

WHEREAS, Between April and December 2008, the Washington Metropolitan Area Transit Authority, in partnership with the District Department of Transportation, studied ways of improving transit service along Metrobus Routes S1, S2 and S4 (collectively called the 16th Street Line); and

WHEREAS, This study process included substantial public input and participation in developing recommendations to respond to customer needs, minimize costs and enhance line effectiveness and performance; and

WHEREAS, As the first phase of service improvements on the 16th Street Line, it is proposed to add Route S9 limited-stop peak period service on weekdays between 6:30 A.M. and 10:00 A.M. and between 3:00 P.M. and 7:00 P.M. at a frequency of every 10 minutes; and

WHEREAS, The District of Columbia is providing funding support for rapid bus/limitedstop services including \$407,500 in FY09 and \$1,630,000 in FY10 for the 16th Street service; now, therefore be it

RESOLVED, That the Board of Directors approves the implementation of peak period limited-stop service on Route S9 as a demonstration project, fully funded by the District of Columbia during the demonstration period, effective March 29, 2009; and be it further

RESOLVED, That the Board of Directors amends the FY09 budget to increase the Metrobus subsidy by \$407,500 in FY09 to be paid by the District of Columbia; and be it further

RESOLVED, That the Board of Directors directs Staff to include \$1,630,000 in the final FY10 budget for this demonstration program to be paid by the District of Columbia and that the project be continued as a District of Columbia project in the FY11 budget development unless other regional funds become available; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: APPROVAL TO NEGOTIATE AND EXECUTE ONE OR MORE LINES OF CREDIT FOR AN AMOUNT NOT TO EXCEED \$250 MILLION

2009-18

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, In 2004, the Washington Metropolitan Area Transit Authority (Metro) and its sponsoring jurisdictions entered into a multiyear capital funding and construction agreement known as the Metro Matters Funding Agreement; and

WHEREAS, The Metro Matters Funding Agreement permitted Metro to enter into short-term financing vehicles to provide cash flows to smooth out differences between capital construction cash requirements and jurisdictional capital contributions; and

WHEREAS, Metro previously established both a Commercial Paper facility and a short-term loan with Wachovia Bank to meet those cash flow requirements; and

WHEREAS, There is a need for further short-term financing pending the issuance of longterm bonds and to smooth out any differences between Metro's cash requirements and jurisdictional contributions; and

WHEREAS, There exists the possibility of temporary shortfalls in the Operating budget which can be ameliorated by the short-term use of the Lines of Credit; and

WHEREAS, Staff has explored the renewal of the Wachovia short-term loan and the development of similar loans with other financial institutions to meet Metro's short-term loan requirements; and

WHEREAS, Wachovia Bank, JP Morgan Chase Bank and Bank of America have expressed interest in providing short-term loans and/or lines of credit to Metro; now, therefore, be it

RESOLVED, That the Board of Directors authorizes the General Manager, the Chief Financial Officer and the Treasurer to negotiate revolving lines of credit and/or loans with one or more of Wachovia Bank, JP Morgan Chase Bank and Bank of America with the following terms: duration to be no more than 364 days; an aggregate amount of \$250 million for all such lines of credit/short-term loans; an interest rate not to exceed the one month LIBOR rate plus 150 basis points, such additional fees and in such amounts as are contained in the existing Wachovia Bank short-term loan approved by the Board in Resolution 2008-23;

and closing costs including legal fees as were paid to close the existing Wachovia shortterm loan; and be it further

RESOLVED, That the documentation of all such lines or credit or short-term loans approved of in this Resolution shall be in substantially the form as agreed to in the existing Wachovia short-term loan approved by the Board of Directors in Resolution No. 2008-23, and John B. Catoe, Jr., Carol D. Kissal, and Raj Srinath are, and each of them hereby is, authorized to execute all required documents to implement the lines of credit and/or short-term loans approved of in this Resolution in the name of and on behalf of Metro with such changes as the person who executes the same may approve (provided such changes, when viewed as a whole, do not have a materially adverse effect on the interests of Metro), the execution of such documents to be conclusive evidence of such person's approval of all such changes; and be it further

RESOLVED, That the Board of Directors approves of granting the same indemnifications to Wachovia Bank, JP Morgan Chase Bank and Bank of America in connection with the lines of credit and/or short-term loans approved of in this Resolution as were granted to Wachovia Bank in Resolution 2008-26 in connection with the existing short-term loan; and be it further

RESOLVED, That the Board of Directors authorizes Staff to use the lines of credit and/or short-term loan for short periods of time to ameliorate the impact of any shortfall in the Operating budget provided, however, that all costs of such usage (including interest) shall be payable solely out of the Operating budget and charged to the jurisdiction or jurisdictions causing the need to use the line of credit or short-term loan and not from any capital funds provided by the funding jurisdictions or from federal grants; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: AMENDED FISCAL 2009 REIMBURSABLE PROJECTS' BUDGET FOR POTOMAC YARD STATION PROJECT

2009-22

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, On June 26, 2008, the Board of Directors approved the Fiscal 2009 Reimbursable Projects budget totaling \$20,050,000; and

WHEREAS, The City of Alexandria has requested Metro technical support for the study of the feasibility of constructing an in-fill station on the Blue-Yellow Line to service the development called Potomac Yard; and

WHEREAS, The City of Alexandria has identified its allocated TIIF funds as the source of the initial budget of \$1,500,000 for this project; now, therefore be it

RESOLVED, That the Board of Directors approves establishment of a reimbursable project entitled Potomac Yard Metro Rail Station; and

RESOLVED, That the Board of Directors approves establishment of an initial Project Budget of \$1.5 million using the City of Alexandria's TIIF account at Metro; and be it further

RESOLVED, That the Board of Directors approves an increase to the Fiscal 2009 Reimbursable Projects' budget by \$1,500,000 from \$20,050,000 to \$21,550,00 for this project; and be it further

RESOLVED, That the Board of Directors authorizes staff to negotiate and execute a reimbursable agreement with the City of Alexandria; and be it further

AUTHORIZE TERMINATION OF THE TRANSPORTATION INFRASTRUCTURE SUBJECT: FINANCE AND INNOVATION ACT GUARANTEED LOAN AGREEMENT

2009-36

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, In Resolution No. 99-58, the Board of Directors authorized the execution of the documents necessary to establish a Guaranteed Loan facility of up to \$600 million under the Transportation Infrastructure Finance and Innovation Act of 1998; and

WHEREAS, The purpose of the Transportation Infrastructure Finance and Innovation Act Guaranteed Loan facility was to provide obligational authority for various capital projects in advance of funding by the jurisdictions; and

WHEREAS, In 2004, Metro and its funding jurisdictions signed the Metro Matters Funding Agreement that set up a capital program for FY2005-FY2010 and serves as the obligational authority for those projects, thereby making the Transportation Infrastructure Finance and Innovation Act an excess agreement; and

WHEREAS, The Guaranteed Lender under the Transportation Infrastructure Finance and Innovation Act, Lehman Commercial Paper, Inc., has gone into bankruptcy and must be changed; and

WHEREAS, The Transportation Infrastructure Finance and Innovation Act Guaranteed Loan facility will expire on January 28, 2010 and will be unavailable for new usage as of June 28, 2009; now, therefore be it

RESOLVED, That the Board of Directors approves of the early termination of the Transportation Infrastructure Finance and Innovation Act Guaranteed Loan facility to be effective as soon as possible; and be it further

RESOLVED, That the General Manager, the Chief Financial Officer and the Treasurer are each authorized to negotiate and sign all necessary documents to effectuate this termination; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: ACCEPTANCE OF STAFF REPORT AND BOARD OF DIRECTORS ACTION ON 2009 HEARINGS ON PROPOSED SERVICE REDUCTION

2009-37

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Washington Metropolitan Area Transit Authority (Metro) provides Metrobus, Metrorail and MetroAccess services to the residents of the region; and

WHEREAS, These systems combine to provide about 1.3 million passenger trips daily; and

WHEREAS, The Washington metropolitan region has come to rely on the services of the Metrorail, Metrobus, and MetroAccess systems to provide safe and reliable service to respond to the mobility and accessibility travel needs of the region for work and discretionary activities; and

WHEREAS, The cost of Metrobus, Metrorail and MetroAccess services is funded in part by passenger revenues and in part by subsidies provided by the District of Columbia, the State of Maryland, local jurisdictions in Virginia and the Commonwealth of Virginia; and

WHEREAS, The General Manager's estimated FY2010 operating budget for Metrobus, Metroraii and MetroAccess currently includes a \$154 million shortfall; and

WHEREAS, The General Manager has recommended a series of internal actions that have reduced the projected shortfall to \$29 million; and

WHEREAS, On March 26, 2009, the Board of Directors authorized public hearings on a proposed service reduction, in accordance with Section 62 of the WMATA Compact; and

WHEREAS, Six public hearings were conducted between April 13–17, 2009, to solicit public comment on the proposed service reduction and the FY2010 budget; and

WHEREAS, The proposed service adjustments had support from one person, five respondents were neutral and the remaining 2,678 respondents opposed some portion of the proposal; and

WHEREAS, A majority of respondents (54%) commented on a lack of equity in the proposal in regards to the effect on people who are transit dependent; now, therefore be it

RESOLVED, That the Board of Directors has considered the public comments reflected in the staff report and has determined to limit the service reductions for FY2010 to the following:

Maryland

Implement J7, J9 fare change (express) Eliminate L7, add L8 trips Eliminate weekday, midday service on Z2 Eliminate C7, 9 Implement W19 fare change (express)

Virginia

<u>City of Alexandria</u> Restructure 21A, B, C, D, and F

Arlington County

Transfer 22B and 24P from Metro to Arlington County (to be taken over by Arlington Transit); and be it further

RESOLVED, That the FY2010 Operating Budget will be balanced by using the existing Operating Reserve to provide credits of \$5.138 million to subsidy or services in the State of Maryland; \$5.060 million to subsidy or services in the District of Columbia; and \$3.141 million to subsidy or services in the Commonwealth of Virginia; and be it further

RESOLVED, That any subsidy surplus achieved in the FY2009 will be used to replenish the Operating Reserve; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: AMEND FY2010 REIMBURSABLE PROJECT BUDGET FOR DULLES RAIL EXTENSION PHASE II

2010-04

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, Metro and the Metropolitan Washington Airports Authority (MWAA) have an existing reimbursable agreement that defines the terms of the parties involvement in the Dulles Metro Rail Extension Phase I; and

WHEREAS, The existing agreement does not address aspects of the Dulles Metro Rail Extension Phase II ("Phase II"); and

WHEREAS, MWAA is commencing with advancement of preliminary engineering for Phase II and has asked that an agreement be put in place to address the role of Metro staff in Phase II; and

WHEREAS, The proposed Phase II PE Reimbursable Agreement sets forth Metro's design criteria and standards applicable to preliminary engineering for Phase II, establishes a budget and provides for a process to evaluate deviations from Metro's design criteria and standards; and

WHEREAS, It is essential, as the future owner and operator of Phase II, that Metro review and approve designs prepared during preliminary engineering to ensure compliance with Metro's design criteria and standards and operating requirements; and

WHEREAS, A new reimbursable project needs to be established for Phase II as well as a budget of \$3.5M; and

WHEREAS, Metro and MWAA have negotiated a reimbursable project agreement, subject to approval by the Board of Directors; now, therefore be it

RESOLVED, That the Board of Directors authorizes the General Manager to negotiate and execute a reimbursable agreement with the Metropolitan Washington Airports Authority for Phase II of the Dulles Metro Rail Extension; and be it further

SUBJECT: CINDER BED ROAD AGREEMENTS AND FINANCING

2010-05

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, In August 2008, Metro received an unsolicited proposal to replace the Royal Street Bus Garage with a new facility at Cinder Bed Road; and

WHEREAS, In September 2009, the Board of Directors approved the public hearing report and amended the mass transit plan to include a new facility on Cinder Bed Road in Fairfax County to replace the Royal Street Bus Garage; and

WHEREAS, In order to continue planning for a new Cinder Bed Road facility, a master development agreement with Iskalo CBR, LLC for exclusivity, fee arrangements, and provisions for land acquisition and pre-site acquisition activities must be executed; and

WHEREAS, The pre-acquisition activities for the Cinder Bed Road site will require \$2M; and

WHEREAS, A design-build agreement for the new facility with Iskalo CBR, LLC will be executed only when funding is authorized by the Board of Directors in the FY 2011 Capital Budget; and

WHEREAS, Failure to aggressively pursue the pre-acquisition activities will jeopardize the ability to complete the Fairfax County Special Exception/Site Approval process and the ability to close on the land prior to December 31, 2010, as stipulated in the purchase agreement; and

WHEREAS, The Phase I closing on the sale of the Arlington Bus Garage site produced \$12M in revenue with the remaining phase(s) expected to generate approximately \$14.5M in revenue; and

WHEREAS, \$20M of the total revenue from the sale of the Arlington Bus Garage site will be returned to the Metro Matters Capital Budget which will leave approximately \$6.5M to be budgeted for grant eligible capital projects; and

WHEREAS, The Royal Street Bus Garage has exceeded its useful life, has no potential for expansion, and is not compatible with the surrounding neighborhood; and

WHEREAS, A modern well-designed facility will help to attract new employees, advancing Metro's goal of attracting and retaining the best and the brightest; and

WHEREAS, The ability to provide service with new technology buses from an expanded facility will improve the quality of bus service, thereby enhancing Metro's image; now, therefore be it

RESOLVED, That the Board of Directors authorizes the General Manager to enter into a master development agreement with Iskalo CBR, LLC for exclusivity, fee arrangements, and provisions for the land acquisition and pre-site acquisition activities with closing on the site contingent on the Board's approval of a financial plan; and be it further

RESOLVED, That the Board of Directors authorizes the use of \$2M in proceeds from the sale of the Arlington Bus Facility for the Cinder Bed Road project to fund pre-closing activities; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: FY2010 FARE INCREASE AND BUDGET MEASURES

2010-06

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Washington Metropolitan Area Transit Authority (Metro) provides Metrobus, Metrorail and MetroAccess services to the residents of the region; and

WHEREAS, These systems combine to provide about 1.3M passenger trips daily; and

WHEREAS, The Washington metropolitan region has come to rely on the services of the Metrorail, Metrobus, and MetroAccess systems to provide safe and reliable service to respond to the mobility and accessibility travel needs of the region for work and discretionary activities; and

WHEREAS, The cost of Metrobus, Metrorail and MetroAccess services is funded in part by passenger revenues and in part by subsidies provided by the District of Columbia, the State of Maryland, local jurisdictions in Virginia, and the Commonwealth of Virginia; and

WHEREAS, Metro's revenue has declined as a result of the economic challenges facing the region and the nation; and

WHEREAS, A \$40M funding gap is projected for Metro's 2010 Operating Budget and this gap must be closed to maintain a balanced budget; and

WHEREAS, The Board of Directors has considered the comments of the public; now, therefore be it

RESOLVED, That the Board of Directors

1. Approves increases to the Metrobus, Metrorail and MetroAccess fares to begin on or about February 28, 2010 and to terminate at 2:00 A.M. July 1, 2010, all as detailed in Attachment A to this Resolution; and

2. Determines that the value of transfers from local bus services shall follow the procedures applied in the WMATA Tariff whereby the local bus fare paid is the value of the transfer on Metrobus with any required step-up fare, if required, to be paid by the customer; and 3. Approves the use of \$10M of ARRA federal funds, in accordance with Federal Transit Administration guidelines, to pay for preventive maintenance that otherwise would have been funded in the Operating Budget; and

4. Approves the use of \$6M from the insurance settlement covering the rail cars involved in the June 22, 2009 incident; and

5. Approves the General Manager's proposal to reduce administrative costs by \$2.2M and authorizes the use of the Operating Reserve as needed; and

6. The Board further directs the General Manager to propose an amendment to the FY2010 Operating Budget to reduce spending by \$6M in such a manner that will not reduce service levels or impact the FY2010 approval Capital Budget; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

FARE ADJUSTMENTS FOR METRORAIL, METROBUS AND METROACCESS AND CHANGES TO PARTS CAPITALIZATION AND PREVENTIVE MAINTENANCE

I. METRORAIL

1. Metrorail Regular Fare Changes

- a. Implement a surcharge of \$0.10 that increases the base boarding charge from \$1.65 to \$1.75 for the period from March 1, 2010 to June 30, 2010.
- b. Implement a surcharge of \$0.10 that increases the max fare on the rail system from \$4.50 to \$4.60 for the period from March 1, 2010 to June 30, 2010.
- b. Implement a surcharge of \$0.10 on Senior/Disabled rail trips which are currently one-half the regular fare for the period from March 1, 2010 to June 30, 2010 but not to exceed one-half of the regular fare including the surcharge.

2. Metrorail Reduced Fare Changes

- a. Implement a surcharge of \$0.10 that increases the charge for the first 7 composite miles of travel during off-peak periods from \$1.35 to \$1.45 for the period from March 1, 2010 to June 30, 2010.
- b. Implement a surcharge of \$0.10 that increases the charge for travel between 7 and 10 composite miles of travel during off-peak periods from \$1.85 to \$1.95 for the period from March 1, 2010 to June 30, 2010.
- c. Implement a surcharge of \$0.10 that increases the charge for travel over 10 composite miles during off-peak periods from \$2.35 to \$2.45 for the period from March 1, 2010 to June 30, 2010.

II. METROBUS

1. Metrobus Fare Changes

 a. Increase the cash boarding charge by a surcharge of \$0.10, from \$1.35 to \$1.45 for the period from March 1, 2010 to June 20, 2010. The boarding charge for fares paid by SmarTrip[®] would also increase from \$1.25 to \$1.35 for the period from March 1, 2010 to June 30, 2010.

2. Metrobus Express Service Fare Changes

a. Increase the cash boarding charge by a surcharge of \$0.10 from \$3.10 to \$3.20 for all express buses. The boarding charge for fares paid by SmarTrip[®] would also increase by a surcharge of up to

\$0.10, from \$3.00 to \$3.10 for the period from March 1, 2010 to June 30, 2010.

- 3. Increase Special Reduced Metrobus Fares in the District of Columbia
 - a. Increase the charge for reduced Metrobus routes in the District of Columbia by a surcharge of \$0.10, for the period from March 1, 2010 to June 30, 2010

4. Increase Senior and Disabled Metrobus Fares

a. Increase the Senior and Disabled Metrobus fare by a surcharge of \$0.10. The Senior and Disabled Metrobus fare is currently \$0.60 and will increase to \$0.70 for the period from March 1, 2010 to June 30, 2010.

III. METROACCESS

1. Increase the MetroAccess fare by a surcharge of \$0.10, from \$2.50 to \$2.60 for the period from March 1, 2010 to June 30, 2010.

IV. FARE MEDIA – PASSES – Equivalent of 10 cents

- 1. Changes to Metrorail Fare Media
 - a. Increase the price of the Metrorail One Day Pass from to \$7.80 to \$8.30 for the period from March 1, 2010 to June 30, 2010.
 - b. Increase the price of the Metrorail Weekly Short Trip Pass from \$26.40 to \$27.90 for the period from March 1, 2010 to June 30, 2010.
 - c. Increase the price of the Metrorail Weekly Fast Pass from \$39.00 to \$40.50 for the period from March 1, 2010 to June 30, 2010.
 - d. Increase the price of the Metrorail SmartStudent Pass from \$26.00 to \$27.50 for the period from March 1, 2010 to June 30, 2010.
 - e. Increase the price of the Metrorall Transit Link Card on MARC and VRE from \$80.00 to \$84.00 for the period from March 1, 2010 to June 30, 2010.
 - f. Increase the price of the Metrorail Transit Line Card on MTA from \$135.00 to \$139.00 for the period from March 1, 2010 to June 30, 2010.
 - g. Increase the price of DC Student farecards from \$8.00 for 10 trips

to \$8.80 for ten trips for the period from March 1, 2010 to June 30, 2010.

- 2. Changes to Metrobus Fare Media
 - a. Increase the price of the Metrobus weekly flash pass from \$11.00 to \$12.00 for the period from March 1, 2010 to June 30, 2010.
 - b. Increase the price of DC student tokens from \$6.25 to \$6.85 for the period from March 1, 2010 to June 30, 2010.
 - c. Increase the price of the weekly Senior Flash Pass from \$6.00 to \$6.60 for the period from March 1, 2010 to June 30, 2010.
 - d. Increase the price of the weekly Disabled Flash Pass from \$6.00 to \$6.60 for the period from March 1, 2010 to June 30, 2010.

Items 1.d, 1.g, and 2.b will become effective upon receipt of approval from the District of Columbia Department of Transportation.

SUBJECT: EISENHOWER AVENUE METRO STATION IMPROVEMENT PROJECT

2010-16

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Hoffman Company owns several parcels of land immediately surrounding the Eisenhower Avenue Metro Station in the City of Alexandria, which it is planning to develop in stages over the next 10 years; and

WHEREAS, At full build-out, the Hoffman Company development will total approximately seven million square feet of mixed-use commercial space; and

WHEREAS, The City of Alexandria desires to acquire approximately 1.47 acres of Metro property at the Eisenhower Avenue Metro Station to construct certain infrastructure improvements to support transit oriented development on the adjacent Hoffman Company property (the "Eisenhower Avenue Metro Station Improvement Project); and

WHEREAS, Metro Board Resolution 2008-29, provides for the transfer of Authority real estate to local jurisdictions and state governments for reimbursable and other transit projects; and

WHEREAS, The proposed Eisenhower Avenue Metro Station Improvement Project satisfies the six conditions for a no-cost transfer of Metro property for a jurisdictional transportation project as outlined in Board Resolution 2008-29; and

WHEREAS, The City of Alexandria requests that Metro enter into a Memorandum of Understanding with the City of Alexandria and the Hoffman Company regarding the proposed improvements to the Eisenhower Avenue Metro Station including new streets serving the station, consolidated bus facilities, relocated Kiss & Ride facilities, new canopies over the bus bay platform and Kiss & Ride drop-off lane and bus shelters; and

WHEREAS, The proposed improvements will bring the station up to current Metro design standards; and

WHEREAS, The proposed improvements will be constructed at no cost to Metro by the Hoffman Company and the City of Alexandria; and

WHEREAS, The proposed improvements will not change the level of service at the station, but will change the configuration and reduce the area of the Eisenhower

Avenue Metro Station by approximately 1.47 acres, thereby necessitating an amendment to the General Plans for the Station; now, therefore be it

RESOLVED, That the Board of Directors approves amending the General Plans for the Eisenhower Avenue Metro station to reflect reconfiguration consistent with the plans shown on Attachment A and a decrease in acreage resulting from the proposed Eisenhower Avenue Metro Station Improvement Project; and be it further

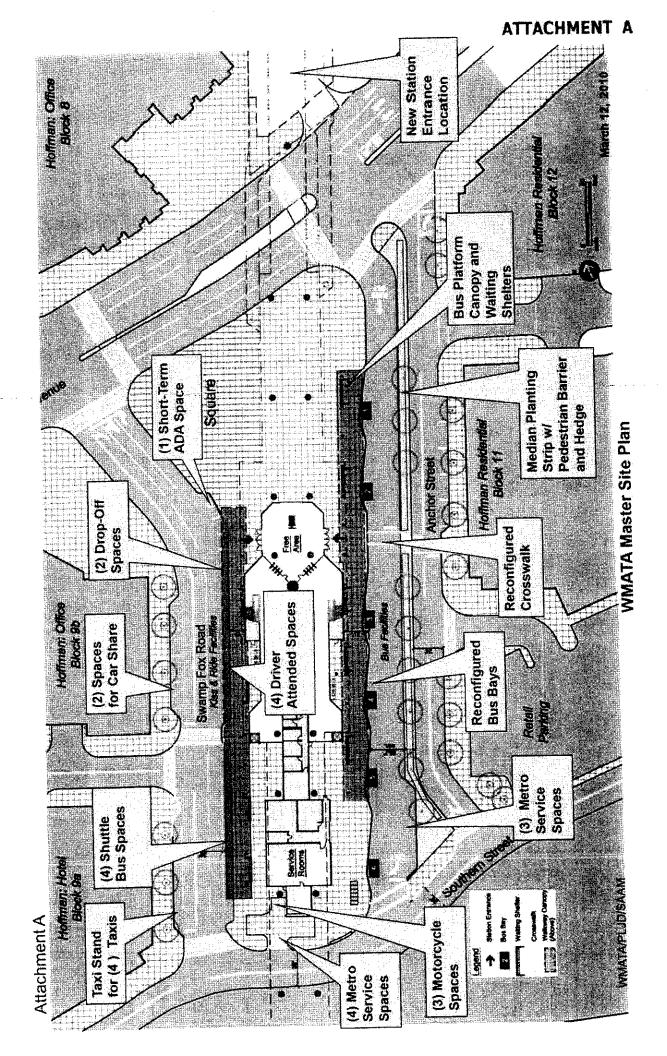

RESOLVED, That the Board of Directors authorizes staff to negotiate and execute a Memorandum of Understanding with the City of Alexandria and The Hoffman Company for the Eisenhower Avenue Metro Station Improvement Project which shall include the following conditions:

- 1. The conveyance of property for the Urban Square, shown on Attachment A, shall be limited as to the use of the property so as to protect the Metro Aerial Structure, the use of the Metrorail Station and to allow for the installation of additional Metro infrastructure as may be needed for the construction of a new station entrance north of Eisenhower Avenue; and
- 2. The conveyance of Metro property shall not occur until the improvements to be made on that property have been completed; and
- 3. No access shall be allowed to Metro property until the appropriate Releases, Deeds, Amendments and Vacations sufficient to document, perfect, record and implement: a) WMATA's access to the Tie Breaker Station on the north side of Eisenhower Avenue, including the installation of an access driveway; and b) the Realignment of Utilities Under the Aerial Tracks on the north side of Eisenhower Avenue have been executed by all necessary entities; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: LABOR CONTRACT SETTLEMENT LOCAL 922, INTERNATIONAL BROTHERHOOD OF TEAMSTERS

2010-17

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, A majority of the Operating, Maintenance, Clerical, and Administrative Personnel of the Washington Metropolitan Area Transit Authority's (Metro) Landover Bus Division are represented for purposes of collective bargaining by Local 922 International Brotherhood of Teamsters; and

WHEREAS, The 2004-2008 Labor Agreement covering the wages, hours and working conditions of these employees expired June 30, 2008; and

WHEREAS, Metro and Local 922 returned to the bargaining table to negotiate the terms of the 2008-2012 Collective Bargaining Agreement; and

WHEREAS, A settlement between the parties has been tentatively reach by Metro and the Union; and

WHEREAS, The significant provisions of the Memorandum of Understanding (MOU), attached hereto as Attachment A, are described in the fact sheet attached hereto as Attachment B; and

WHEREAS, A majority of the voting union membership ratified the MOU on February 27, 2010; now, therefore be it

RESOLVED, That the tentative Memorandum of Understanding reached between Metro and Local 922 of the International Brotherhood of Teamsters covering the wages, hours, and working conditions of these employees is approved by the Board of Directors, and be it further

RESOLVED, That the General Manager is authorized to execute a new Collective Bargaining Agreement completing the terms of the 2008-2012 Labor Agreement until replaced by a successor agreement; and be finally

RESOLVED, That this Resolution shall be effective immediately,

Reviewed as to form and legal sufficiency,

Carol B. O'Keeffe

General Counsel

MEMORANDUM OF UNDERSTANDING

BETWEEN

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

AND

LOCAL 922, OF THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS REGARDING AMENDMENTS TO COLLECTIVE BARGAINING AGREEMENT

The Washington Metropolitan Area Transit Authority (the "Authority") and Local 922, International Brotherhood of Teamsters (the "Union") hereby agree to amend the existing collective bargaining agreement (the "CBA") and the supplemental agreement (the "NSA" or "Supplemental Agreement") between the parties that was previously extended until October 31, 2008 by a Memorandum of Understanding dated January 6, 2005. This agreement is contingent upon approval by both the Authority's Board of Directors and ratification by the Union membership. References to sections and subsections are to those contained in the CBA or NSA, as the case may be. All sections and subsections not amended by this Memorandum of Understanding (other than any provision that was scheduled to expire at the end of the contract term absent agreement to the contrary) shall continue in effect without change. Unless specifically provided otherwise, all changes are effective as of the date of both Union ratification and Board of Directors approval.

The CBA shall be amended as follows:

1. Contract Duration:

The term of this agreement is from November 1, 2008 through October 31, 2012.

2. Wages, Health and Welfare, and Pension Reopener:

Notwithstanding Section 1 above, either party to this agreement may reopen this agreement for the purposes of negotiating wages rates, health and welfare, and pension benefits to become effective November 1, 2009, November 1, 2010, and November 1, 2011, provided they so notify the other party in writing by March 30, 2011. Failing receipt by the Authority or the Union, on the date specified, of such written notice to reopen, the terms of this agreement will continue in full force and effect for the duration of the agreement.

3. Section 8 – Probation:

Section 8(b) shall be amended to read as follows:

(b) The Union will have no liability under this provision for the cost of CDL training for any member.

4. Section 9 - Seniority:

Section 9(c) shall be amended to read as follows:

(c) Employees returning to work from inactive status forty-five (45) days prior to the pick, will not pick or cause a bump down, but will work the Extra Board, hold down a run at their seniority level/until the next scheduled pick or successfully bid on any advertised run.

New Section – Bus Maintenance:

A new section will be added as follows:

Bus Maintenance employees in inactive status will not be allowed to participate in the quarterly work selections. Employees returning to work from inactive status between picks will be allowed to select work in their classification in accordance with their seniority. Any other employee affected will also have the right to bump any junior employee within their classification. Such selection must be made within 48 hours after notification. Employees whose work schedule is affected by this bumping process will be given a minimum of 10 calendar day's notice of the effective date of their new work schedule.

New Section – Labor Management Committee:

There shall be a new Labor-Management Committee consisting of up to three members for the Union selected by the Union and three members of the Authority selected by the Authority. The Committee will meet at least quarterly for the purpose of discussing, exploring and considering matters of mutual concern. The dates and times shall be determined mutually by the parties.

BMNT Promotion Policy - May 18, 2009:

The BMNT Promotion Policy dated May 18, 2009, will be extended to Local 922 members.

Drug Testing:

The Authority shall provide transportation to an employee subject to drug and alcohol testing to the appropriate testing site or to the nearest rail station.

5. <u>Wages</u>:

Effective November 1, 2008: 2% lump sum payment

To receive the 2% lump sum payment as provided above, the employee must have been on the employment rolls on the date of this agreement. The lump sum payment shall be based upon the total straight-time hourly wage earnings (including scheduled run overtime for Operators) between November 1, 2008 and October 31, 2009. This lump sum payment shall also be payable on the same basis to any employee who retired on or after November 1, 2008.

6. Contract Administration and Other Changes:

- (a) When so requested, the Authority will provide to the Union the identity and contact information of passenger or public complainants at Step 3 of the grievance procedure in disciplinary cases.
- (b) An employee whose disciplinary actions were reversed by settlement agreement or arbitration shall have all reference to such action immediately removed from the employee's work record.
- (c) If the job requires a special license or endorsement, the Authority shall reimburse the employee for the cost.

Miscellaneous:

The Authority agrees to publish procedures for EXTS runs.

Executed this _____ day of April 2010

FACT SHEET TENTATIVE AGREEMENT BETWEEN WMATA and LOCAL 922 ATU

PARTIES IN AGREEMENT:	Washington Metropolitan Area Transit Authority and Local 922, International Brotherhood of Teamsters		
CONTRACT PERIOD:	November 1, 2008 through October 31, 2012		
CONTRACT FEATURES:			
Wages Across the Board	Wage Increase	Effective Date	
a and and a second s	2.0% lump sum	_ March 1, 2010	

Health and Welfare

The per capita monthly contribution established in November 2007 of \$800.00 will remain the same for FY09.

Reopening Provision

The parties agree to reopen this agreement for the purposes of negotiating wages rates, health and welfare, and pension benefits to become effective November 1, 2009, November 1, 2010, and November 1, 2011, provided they so notify the other party in writing by March 30, 2011. Failing receipt by Metro or the Union, on the date specified, of such written notice to reopen, the terms of this agreement will continue in full force and effect for the duration of the agreement.

Non-Economic Highlights of Tentative Agreement

The following changes closely track earlier work rule changes agreed to with Local 689 ATU:

Contract Administration and Other Changes:

- (a) When so requested, Metro will provide to the Union the identity and contact information of passenger or public complainants at Step 3 of the grievance procedure in disciplinary cases.
- (b) An employee whose disciplinary actions were reversed by settlement agreement or arbitration shall have all reference to such action immediately removed from the employee's work record.
- (c) If the job requires a special license or endorsement, Metro shall reimburse the employee for the cost.

SUBJECT: AMEND FISCAL YEAR 2010 REIMBURSABLE PROJECTS' BUDGET FOR CRYSTAL CITY-POTOMAC YARD TRANSITWAY PROJECT

2010-19

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, On behalf of Arlington County and the City of Alexandria, Metro and its planning services consultant had prepared environmental documentation for the Crystal City–Potomac Yard Transitway in Fiscal Years 2006 and 2007, using Federal Transit Administration (FTA) grant funds; and

WHEREAS, On February 17, 2010, the U.S. Department of Transportation awarded a TIGER grant of \$8,500,000 for the construction of a section of the Transitway in the City of Alexandria, which the City will implement; and

WHEREAS, The City of Alexandria has requested Metro technical support for the update of past environmental documentation for the Crystal City–Potomac Yard Transitway in order to meet FTA grant requirements; and

WHEREAS, On June 25, 2009, the Board of Directors approved the Fiscal Year 2010 Reimbursable Projects budget totaling \$34,707,000; and

WHEREAS, The City of Alexandria has identified \$300,000 in Regional Surface Transportation Program funds via the Northern Virginia Transportation Commission to fund the costs of Metro involvement in this project; now, therefore be it

RESOLVED, That the Board of Directors approves establishment of a reimbursable project entitled Crystal City-Potomac Yard Transitway–Alexandria Update; and be it further

RESOLVED, That the Board of Directors approves establishment of a project budget of \$300,000 using Regional Surface Transportation Program funds at the Northern Virginia Transportation Commission; and be it further

RESOLVED, That the Board of Directors amends the Fiscal Year 2010 Reimbursable Projects' budget from \$45,926,554 to \$46,226,554 for this project; and be it further

RESOLVED, That the Board of Directors authorizes staff to negotiate a reimbursable agreement with the City of Alexandria and authorizes the General Manager to execute the resulting agreement; and be it further

RESOLVED, That the Board of Directors approves issuance of tasks to Metro's on-call planning services consultant for the technical support; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: TRACKING OF SAFETY FINDINGS AND RECOMMENDATIONS BY OVERSIGHT AGENCIES

2010-21

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Board of Directors expects to receive reports on the status of safety findings and recommendations made to the Authority by various oversight agencies, including the Tri-State Oversight Committee (TOC), National Transportation Safety Board (NTSB), Federal Transit Administration (FTA), etc., on a periodic basis; and

WHEREAS, The Board of Directors requires the General Manager to keep the Board and the Office of Inspector General informed of the progress of Corrective Actions to address those findings and recommendations on a frequent basis; now, therefore be it

RESOLVED, That the General Manager and staff shall:

- Design and develop a mechanism for tracking all safety findings and recommendations including those made by various oversight agencies, such as the TOC, NTSB, FTA, etc; and
- Provide the Customer Service, Operations, and Safety Committee and the Office of Inspector General quarterly updates on the status of Corrective Actions to address the findings and recommendations, including planned and expected completion dates; and
- Inform the Customer Service, Operations, and Safety Committee of any significant delays, omissions, issues, or problems regarding the status of findings and recommendations made by oversight agencies; and be it further

RESOLVED, That the Inspector General and staff shall:

 Track continuously the safety findings and recommendations made by oversight agencies and inform the Customer Service, Operations, and Safety Committee immediately of any significant delays, omissions, issues, or problems regarding the completion of those actions; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

Carol B. O'Keeffe General Counsel

Motioned by Mr. Zimmerman, seconded by Mrs. Hudgins Ayes: 7 - Mr. Benjamin, Mrs. Hudgins, Mr. Giancola, Mr. Downey, Ms. Hewlett, Mr. Zimmerman and Mr. Graham SUBJECT: AMEND RAILCAR BUDGET; AMEND INTERGOVERNMENTAL COOPERATIVE AGREEMENT; AUTHORIZE CONTRACT AWARD AND AUTHORIZE INTERNATIONAL TRAVEL FOR THE DULLES METRORAIL CORRIDOR PROJECT

2010-25

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Washington Metropolitan Area Transit Authority (WMATA) has solicited and received proposals for a consolidated railcar procurement and proposes to award 1) 64 Railcars for Phase I of the Dulles Metrorail Corridor Project; 2) 300 Railcars for replacement of the 1000 series railcars; and 3) 64 Railcars for Phase II of the Dulles Metrorail Corridor Project; and

WHEREAS, WMATA and the Metropolitan Washington Airport Authority (MWAA) have entered into an intergovernmental Cooperative Agreement to fund and purchase railcars for the Dulles Metrorail Corridor Project; and

WHEREAS, WMATA and MWAA have agreed to increase the number of railcars to be purchased for the Dulles Metrorail Corridor Project from 64 railcars to 128 railcars; and

WHEREAS, WMATA has agreed to participate in the funding of the Design and Development Cost associated with the railcars; and

WHEREAS, These changes require an amendment to the Dulles Railcar Budget from \$189,490,200 to \$395,358,200; and

WHEREAS, These changes require an amendment to the WMATA–MWAA Intergovernmental Cooperative Agreement; and

WHEREAS, Proper management of the contract for the purchase of railcars requires foreign travel for inspection and verification of the work performed by the vendor; now, therefore be it

RESOLVED, That the Board of Directors authorizes the award of a contract in the amount of \$885,780,492 for purchase of Base 64 Railcars (Dulles Phase I); Option #4 300 Railcars (1000 Series Replacement); and Option #1 64 Railcars (Dulles Phase II), subject to the execution of an amended Dulles Cooperative Agreement; the Board's adoption of the FY2011 capital budget and of a multi-year funding agreement for

2011-16 and availability of funding; and also subject to FTA approval to the extent required, and; be it further

RESOLVED, That the Board of Directors approves adjusting the Dulles Railcar Budget from \$189,490,200 to \$395,358,200; and be it further

RESOLVED, That the General Manager is authorized to amend the Intergovernmental Cooperative Agreement with MWAA dated 9/14/2007 to increase the number of railcars purchased for the Dulles Metrorail Corridor Project from 64 to 128 and to provide for cost sharing between WMATA and MWAA for the design and development costs of the railcars; and be it further

RESOLVED, That the General Manager is authorized to approve foreign travel verified as necessary in support of the railcar purchase, provided that quarterly reports of authorized travel are made to the Board of Directors; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

SUBJECT: APPROVAL OF FY2011 BUDGET AND FARE INCREASE

2010-31

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Board of Directors has received and considered the General Manager's proposed FY2011 Budget and has conducted public hearings on proposed service and fare changes and made a determination concerning the proposed changes; and

WHEREAS, As required by Title VI of the Civil Rights Act of 1964, Metro staff has evaluated the proposed adjustments to fares and service throughout the decision making process to determine whether these changes would have a disparate impact on minority and low-income populations, and has determined there is no significant disparate impact on minority and low-income populations at the system-wide level; now, therefore be it

RESOLVED, That the Board of Directors approves the FY2011 Budget of \$2.18 billion as detailed in Attachment A; and be it further

RESOLVED, That the FY2011 operating portion of the Budget totals \$1.4 billion with operating revenue, expense and subsidy as detailed in Attachments B-1 and B-2; and be it further

RESOLVED, That the 103-mile rail construction debt service portion of the FY2011 Budget totals \$27.5 million and is allocated to the jurisdictions as detailed in Attachment B-2; and be it further

RESOLVED, That \$21.2 million of debt service expenditures resulting from the issuance of Metro Matters bonds are subsumed within the FY2011 Budget and are allocated to the jurisdictions as detailed in Attachment B-2; and be it further

RESOLVED, That the FY2011 capital portion of the Budget totals \$0.71 billion as detailed in Attachments C-1, C-2 and C-3; and be it further

RESOLVED, That the new Budget for reimbursable program projects totals \$19.0 million for the operating portion and \$3.0 million for the capital portion; non-Capital Improvement Program projects and prior-year reimbursable program project budgets already have Board of Directors approval and are detailed in Attachments D-1 and D-2; and be it further

RESOLVED, That the Board of Directors:

- 1. Approves increases to the Metrobus, Metrorail and MetroAccess fares to begin on or about Sunday, June 27, 2010, prior to the beginning of Sunday service as detailed in Attachments E-1 and E-2 to this resolution;
- 2. Directs that the changes listed on Attachment E-1 relating to the "peak of the peak" and the special surcharge for non-SmarTrip[®] rail transactions will become effective when the fare collection system can technologically accommodate the fares;
- 3. Approves the reduction of the bus-to-bus transfer period, the bus-to-rail transfer period and the rail-to-bus transfer period from three hours to two hours;
- 4. Approves increases in the reserved parking monthly fee by \$10.00 to \$65.00;
- 5. Approves the institution of special fares of no more than five times the normal rate for fares and passes on bus and rail and to charge up to \$25 for parking for special events;
- 6. Approves the increase of District of Columbia student fares, fare media and fare passes to begin on or about Sunday, June 27, 2010, prior to the beginning of Sunday service as detailed in Attachment E-2 to this resolution;
- 7. Approves of the use of capital funds of \$30.0 million for rail and bus lifecycle overhaul and \$30.7 million for preventative maintenance; if fare revenue exceeds the amount budgeted, expenditure savings are achieved, including those from wage increases currently in arbitration, or unanticipated subsidies become available, any excess (up to \$60.7 million) will be transferred to the capital budget after Board approval to fund up to \$60.7 million of additional capital project expenditures;
- 8. Determines that the value of transfers from local bus services shall follow the procedures applied in the WMATA Tariff whereby the local bus fare paid is the value of the transfer on Metrobus, with any required step-up fare, if required, to be paid by the customer;
- Directs that the ³/₄ mile zone for the provision of MetroAccess service be strictly enforced starting June 26, 2010, with the exception of those MetroAccess customers who currently take MetroAccess trips outside of the ³/₄ mile corridor;

- 10. Directs that the changes listed on Attachment E-1 relating to the MetroAccess fare of twice the equivalent fixed route fare up to a maximum of \$7.00 will become effective when Metro can technologically accommodate the fares; between Sunday, June 27, 2010 and such time, Metro will charge twice the new bus fare (\$1.50) of \$3.00 per trip plus applicable supplemental fares up to a maximum of \$7.00;
- 11. Directs that on or after June 27, 2010, new and recertifying MetroAccess customers shall be eligible for the "Free Ride Program" only if they are determined to be conditionally eligible for paratransit service; provided that existing MetroAccess customers (and one personal care attendant per customer) may continue participating in the Free Ride Program until their current period of paratransit eligibility expires; and be it further

RESOLVED, That as part of the adoption of the annual budget, the Board of Directors approves the annual Plan of Contracts such that the General Manager is authorized to initiate and award all procurement actions presented in the Plan of Contracts as detailed in Attachments F-1 and F-2; and be it further

RESOLVED, That the Board of Directors authorizes the distribution of up to 25,000 free SmarTrip[®] cards to local social services agencies in the Compact jurisdictions for distribution to their clients on a one-time, limited-offer basis; and be it further

RESOLVED, That the Board of Directors approves a \$0.05 surcharge on entry and exit at up to two stations in each jurisdiction (Virginia, Maryland and the District of Columbia) for the purpose of funding station-specific capital improvements to Metro facilities at the stations where the surcharge is levied; provided that each jurisdiction receives approval for its proposed two stations from the Board prior to implementation; and be it further

RESOLVED, That in order to implement the elements of the Capital Improvement Program, the General Manager, the Chief Financial Officer and the Treasurer are authorized to (1) file and execute grant applications on behalf of Metro for funds from the federal government and any other public or private entity consistent with the Capital Improvement Program; and (2) execute and file the annual Federal Transit Administration Certifications and Assurances; and be it further

RESOLVED, That the General Manager or his designee is authorized to conduct public hearings in furtherance of the implementation of the Capital Improvements Program; and be it further

RESOLVED, That subject to the successful completion of the regional pass pilot, verification of technical capabilities, the development of a successful distribution plan, and the resolution of any budget issues, the launch of a regional pass and the arrangements for the reconciliation of fare revenues among the regional partners will begin on October 17, 2010, in accordance with the terms of the SmarTrip[®] Operations Funding Agreement and the revenue sharing model developed by Metro and the regional partners; and be it further

RESOLVED, That staff are directed to reduce the price of the SmarTrip[®] card to the customers and to provide a report to the Board of Directors in July on the implementation of the reduction; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

Carol B. O'Keeffe General Counsel

NOTES:

1) Does not include Metro Matters Debt Service.

2) Allocated based on six-year project expenditures using FY10 allocation. All modes use FY10 modal allocation (e.g. bus allocation for bus projects).

3) Previous methodology used a blended/average bus and rail allocation.

SUBJECT: AMEND THE FY2010 BUDGET TO INCLUDE THE ENERGY STORAGE DEMONSTRATION PROJECT

2010-34

RESOLUTION OF THE BOARD of DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Washington Metropolitan Area Transit Authority (Metro) has been awarded a Federal Transit Administration grant totaling \$300,000; and

WHEREAS, The grant is 100% Federal funding and does not require any local jurisdictional matching funds; and

WHEREAS, The grant provides support to examine the feasibility and cost-effectiveness of installing a wayside energy storage system to capture and reuse regenerated brake energy that is currently being lost; and

WHEREAS, The grant will fund project organization, procurement and management; installation; data collection and evaluation; and final report and recommendation costs; now, therefore be it

RESOLVED, That the Board of Directors increases the FY2010 Beyond Metro Matters Capital Budget from \$0 to \$300,000; and be it further

RESOLVED, That the Board of Directors authorizes the General Manager to initiate and award one or more competitive contracts to partner with one or more suppliers to provide, on a demonstration basis and at no cost to Metro, a wayside battery storage system with installation support which is hoped will increase the stability and reliability of the Traction Power Substations; and be it further

RESOLVED, That the Board of Directors authorizes the use of federal grant funds referenced in this Resolution to fund project organization, procurement and management; installation of the demonstration equipment; data collection and evaluation; and final report and recommendation costs which will include an assessment of the cost savings and determine the return on investment through simulations and actual testing; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

B. Mue Carol B. O'Keeffe

General Counsel

Motioned by Mrs. Hudgins, seconded by Mr. Graham 471

SUBJECT: AMENDMENT OF THE WMATA RETIREMENT PLAN - COST OF LIVING ADJUSTMENTS

2010-37

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Washington Metropolitan Area Transit Authority Retirement Plan ("the Plan") addresses the calculation of annual Cost Of Living Adjustments (COLA) for benefits payable to retired participants under Article XX of the Plan, and the annual COLA is calculated through the use of a ratio of the previous year's Consumer Price Index (CPI) over the CPI from a year earlier; and

WHEREAS, The calculation under Article XX typically results in an increase to benefits; and

WHEREAS, The recent economic downturn resulted in a decrease to the CPI which in turn would produce a ratio resulting in a decrease to retiree benefits; and

WHEREAS, The Plan Trustees have determined that Article XX contemplates only increasing benefits via COLA, does not authorize a COLA that decreases benefits, and does not authorize accounting for a COLA decrease in subsequent years; and

WHEREAS, Failing to account for a COLA decrease in subsequent years would result in artificially high benefit payments; and

WHEREAS, The Plan Trustees have approved a proposed amendment to Article XX (attached to this Resolution as Attachment A and shown in redline) that permits deferring COLA decreases to subsequent years to offset COLA increases; and

WHEREAS, The Plan § 10.01 requires that all Plan amendments be made by a written Resolution of the Board of Directors; now, therefore be it

RESOLVED, That Article XX of the Metropolitan Area Transit Authority Retirement Plan is amended consistent with Attachment A to this Resolution, to permit deferring cost of living adjustments that would result in a decrease in benefits and offsetting those decreases against COLA increases in subsequent years; and be it finally *RESOLVED,* That this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

.

B.laral 1 10 Carol B. O'Keeffe

General Counsel

ARTICLE XX

Cost of Living Adjustments

20.01 Benefits Eligible for Cost of Living Adjustments. All benefits payable under Articles III, IV, V, VI, VII, VIII, XIV, XV, XVI, or XVII of this Plan shall be eligible for an annual Cost of Living Adjustment as computed under section 20.02 of this Plan.

20.02 Computation of Annual Cost of Living Adjustment. The annual benefit adjustment for Participants who retire from the Washington Metropolitan Area Transit Authority shall be computed as set forth in this section. The monthly pension benefit of all parties receiving benefits will be adjusted, as required by this section, effective with the benefit payment to be made January 1st of the following year₁₂.

- (a) to be the amount determined by multiplying the benefit payment that would otherwise have been paid on January 1 st of the following year by the <u>A</u> ratio shall be determined with a numerator consisting of (1) the Consumer Price Index for the month of September of the latest year, to (2)and a denominator consisting of the Consumer Price Index for the month of September, one year earlier.
 - (b) If the ratio determined in part (a) is less than one, then there shall be no annual benefit adjustment that year, except as described in this part (b). The carry-over for such a year is the number resulting when one (1) is subtracted from the ratio, which difference is carried-over to the following year. For example, if the ratio in year A is .98, then the carry-over for the following year B is -.02 (.98-1=-.02).
 - (i) During the year following a year (or following two consecutive years) resulting in carry-over, the carry-over shall be added to the ratio. If the resulting sum is not less than one, then the benefit adjustment shall be computed in accordance with part (c). If the resulting sum is less than one, the number resulting when one (1) is subtracted from the sum shall be the carry-over for the following year. For example, if the ratio in year A is .98, in year B is .99 and in year C is 1.03, then there shall be no benefit adjustment in year A (.98-1.0=-.02 carry-over for year B), no benefit adjustment in year B (.99-.02=.97, .97-1.0=-.03 carry-over for year C) and an adjustment computed with a ratio of 1.0 in year C (1.03-.03=1.0), which adjustment shall be computed as set forth in part (c).
 - (ii) In the year following two consecutive years with no benefit increase computed under part (c), there shall be a benefit adjustment rather than applying the carryover to the following year. The sum of the ratio and the carry-over shall be used to compute the adjustment, even if the result is a decrease to monthly benefits. For example, if the ratio in year A is .96, in year B is 1.01 and in year C is 1.02, then there shall be no benefit adjustment in year A (.96-1.0=-.04 carry-over for year B), no adjustment in year B (1.01-.04=-.97, .97-1.0=-.03 carry-over for year C), and an adjustment computed with a ratio of .99 in year C (1.02-.03=.99).

which adjustment shall be computed as set forth in part (c).

(c) If the ratio determined in part (a), including any carry-over from part (b), is not less than one, or if the ratio is less than one and there has been no adjustment under this part for the prior two years as described in part (b)(ii), then <u>The the exact portion of the increase adjustment</u> so determined that is <u>payable applied</u> to the <u>each</u> Participant's monthly benefit will be computed as follows:

- (a)(i) One hundred percent (100%) of the adjustment computed aboveratio (including carry-over from part (b)) will be applied to the dollar value of the monthly benefit accrued before July 1, 1997, which is added to
- (b)(ii) eighty percent (80%) of the adjustment computed aboveratio (including carryover from part (b)), which is applied to the dollar value of the monthly benefit accrued after June 30, 1997.

The resulting number obtained from adding subsections subparts (ai) and (bii) of this section part will be the adjustment due thefor each Participant under this Articlepart.

(d) As used in this Plan the Consumer Price Index will be defined as the total Consumer Price Index (CPI-U) for the greater Washington Metropolitan Area or any other local index which geographically embraces the greater Washington Metropolitan Area. Should the Consumer Price Index no longer report data as of September, then the data for the month closest to September which is reported in the Consumer Price Index will be used.

SUBJECT: FY2011 DISADVANTAGED BUSINESS ENTERPRISE GOAL

2010-41

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, The Washington Metropolitan Area Transit Authority (WMATA) is a recipient of federal assistance from the U.S. Department of Transportation (DOT) and the Federal Transit Administration (FTA); and

WHEREAS, It is the policy of WMATA that businesses owned and controlled by socially and economically disadvantaged individuals shall have the opportunity to participate in WMATA federally-assisted contracts; and

WHEREAS, Under DOT regulation 49 C.F.R. Part 26, as amended February 3, 2010, WMATA, as a recipient of federal financial assistance, is required to submit a revised Disadvantaged Business Enterprise (DBE) goal every three years on a schedule established by the FTA and that schedule requires WMATA to submit its 2011 federal fiscal year goal on August 1, 2010; and

WHEREAS, The DBE goal is required to be bifurcated between race-conscious and raceneutral measures; and

WHEREAS, In accordance with 49 C.F.R. Part 26.45 and Board of Directors approval, WMATA has provided for public participation in the goal-setting process by publishing notice of the proposed goal, providing a public comment period from May 28 to July 12, 2010, and holding a public meeting on June 30, 2010; now, therefore be it

RESOLVED, That the Board of Directors affirms the policy of nondiscrimination and compliance with federal requirements for engaging in affirmative action in contracting; and be it further

RESOLVED, That it is the policy of the Board of Directors that neither WMATA, nor any of its contractors or vendors, shall discriminate on the basis of race, color, national origin, sex or any other unlawful basis in the award and performance of contracts or subcontracts; and be it further

RESOLVED, That the Board of Directors adopts a final DBE goal of 25% for Federal Fiscal Year 2011 for implementation of the DOT regulations for federally-funded contracts, recognizing that the overall goal will be achieved through 19% race-conscious and 6% race-neutral measures and be established on a contract-by-contract basis; and be it further

RESOLVED, That the General Manager is hereby authorized to submit the foregoing goal to the FTA; and be it finally

RESOLVED, That this Resolution shall be effective immediately.

Reviewed as to form and legal sufficiency,

SUBJECT: AMENDED FISCAL 2011 CAPITAL BUDGET FOR MOBILE EMERGENCY RESPONSE VEHICLE CABINETS

2010-42

RESOLUTION OF THE BOARD OF DIRECTORS OF THE WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

WHEREAS, Under the FY2007 Urban Area Security Initiative (UASI) grant, Arlington County received funding to purchase motorized Mobile Emergency Response Vehicles (MERV) customized for use on Metrorail tracks; and

WHEREAS, The MERV carts have been purchased and delivered, but industrial strength cabinets with a dedicated power source are needed for storage; and

WHEREAS, On June 8, 2010, the DC Homeland Security and Emergency Management Agency has issued a sub-grant award to Metro to procure and install the necessary cabinets for the MERV carts under the FY2008 UASI grant program in the amount of \$175,000; now, therefore be it

RESOLVED, That the Board of Directors approves the increase to the FY2011 Capital Budget by \$175,000, from \$709.3 million to \$709.5 million; and be it further

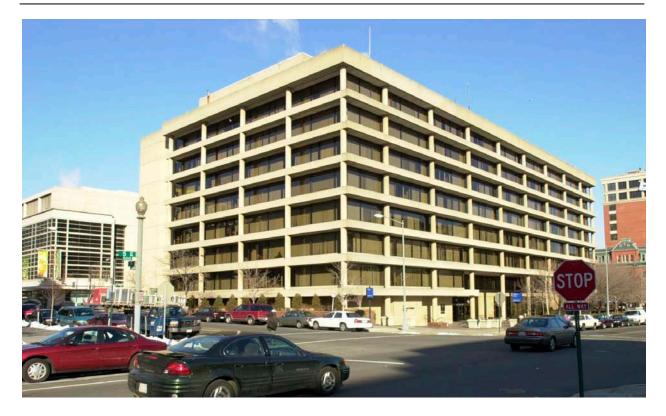

RESOLVED, That the Board of Directors approves establishment of a project entitled Mobile Emergency Response Vehicle Cabinet Project, and that this project does not require a local grant match; and be it further

RESOLVED, That the Board of Directors authorizes staff to award a contract to design, fabricate, and install 24 Mobile Emergency Response Vehicle cabinets; and be it finally

RESOLVED, That this Resolution shall be effective immediately

Reviewed as to form and legal sufficiency,

Carol B. O'Keeffe General Counsel

Appendix D. Key Performance Indicators (KPI)

This appendix includes information on Metro's performance for the prior year. Metro reports on Key Performance Indicators (KPI's) to measure what is working well, what is not, and what actions are being taken to improve performance.

These KPI's focus on critical safety and security measures and the core operational performance for Metro's three modes of transportation: Metrobus, Metrorail and MetroAccess.

All KPI's have targets for accountability purposes and for transparency reasons the actual results are presented monthly to Metro's Board of Directors and published as a scorecard on Metro's wmata.com web site.

Each of the KPI's is tied to Metro's Strategic Framework which contains Metro's five strategic goals and associated objectives, as discussed in Chapter 1.

KPI Year End Review

- Metrobus on-time performance remained relatively consistent throughout the year with roughly three out of every four buses being able to adhere to published schedules.
- The Metrobus fleet performed well during the year with reliability rates exceeding the targets very consistently during the latter half of the year.
- Metrorail on-time performance recovered by mid-year to reach a consistent level but never achieved its target due to the system not running on automatic train control for safety reasons.

- MetroAccess service achieved its performance target very consistently throughout the year. The only notable exception was associated with extreme winter weather and shutdown of regional roadways for snow clearing activities.
- Escalator and elevator reliability continued steady trends. Escalator availability did not achieve its target but elevator availability did. An outside consultant is evaluating elevator and escalator performance with a report expected out during the upcoming year.
- The bus and rail customer injury rate hovered consistently low all year at approximately one injury per million passenger trips. February was the exception, again due to extreme snow and ice storms causing a higher number of slips and falls.
- The MetroAccess passenger injury rate experienced volatility through the year but displayed an overall trend of improvement with a gradual decline in the number of accidents.
- The employee injury rate did not consistently reach its target during the year but there is a general trend of improvement with a gradual decrease in the rate of claims filings.
- Crime on board Metrobus remained very low with approximately one report per million passenger trips. Crime in the Metrorail system and in parking lots had both ups and downs throughout the year but by year end the rates were trending favorably.

Summary

Reporting on performance is a key first step toward improving performance. The KPI's displayed here are also publicly reported monthly along with analysis if results and detailed actions to improve performance. This sets up a continuous loop of monitoring performance, studying results to learn, and taking action to improve performance.

KPI's that Score How Metro is Performing

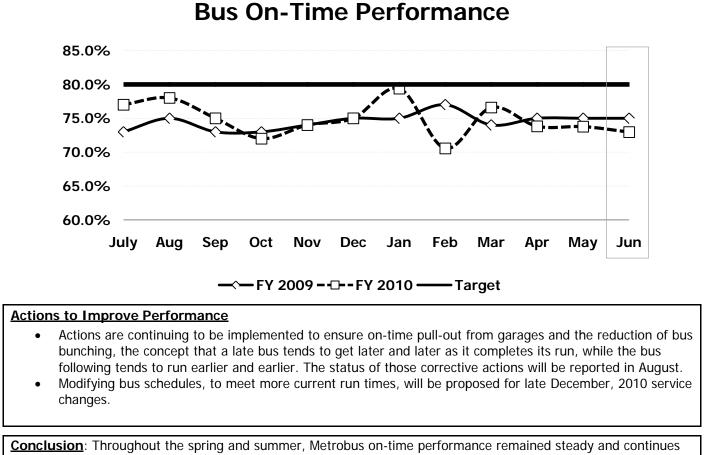

KPI: Bus On-Time Performance (June)

Objective 2.1 Improve Service Reliability

Reason to Track: This indicator illustrates how closely Metrobus adheres to published route schedules on a system-wide basis. Factors which affect on-time performance are traffic congestion, inclement weather, scheduling, vehicle reliability, and operational behavior. Bus on-time performance is essential to delivering quality service to the customer.

Why Did Performance Change?

• Approximately three out of every four buses adhered to the published schedule in June. The June, on-time performance of 73.0% was down slightly from the prior two months and prior year June activity. Approximately one out of every four buses did not adhere to the published schedule, but ran late 20% of the time or early 7% of the time. Late performance was influenced by the conditions of the summer: heavier traffic, increased construction, and special events – such as June 5th, Race for the Cure. These special events create additional congestion in the downtown corridors.

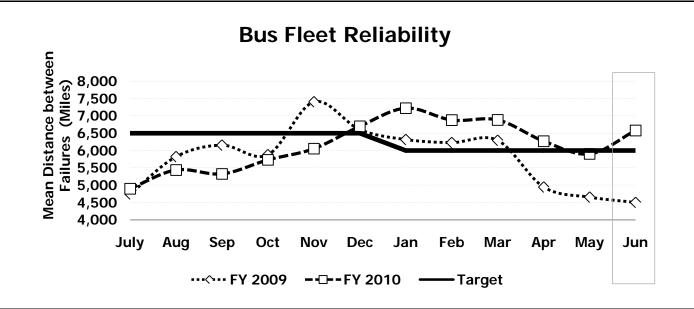

KPI: Bus Fleet Reliability (June) (Mean Distance Between Failures)

Objective 2.1 Improve Service Reliability

Reason to Track: One source of reliability problems are vehicle breakdowns that cause buses to go out of service. This key performance indicator communicates service reliability and is used to monitor trends in vehicle breakdowns and to plan corrective actions. Factors that influence bus fleet reliability are the quality of a maintenance program, vehicle age, original vehicle quality, and road conditions. For this measure higher miles are better, meaning that the vehicle goes farther without breaking down.

Why Did Performance Change:

- Bus fleet reliability exceeded the target⁽¹⁾ for the month of June. Performance improved as a result of replacing 19 older, less reliable buses. Even with record high temperatures, the maintenance program's success is evident when assessing the reliability performance of the bus fleet.
- The incorporation of an automatic vehicle monitoring system on new buses supports reliability efforts by continuously measuring, monitoring, and reporting the status of critical maintenance needs; as well as aiding in the avoidance of service interruptions.

Actions to Improve Performance

- Continue to place 148 new buses in service, removing the older, less reliable buses.
- Improve monitoring service interruptions to identify trends and develop actions to reduce or eliminate repeat failures.
- Stay abreast of new technologies that can be tested for enhanced reliability and customer satisfaction.

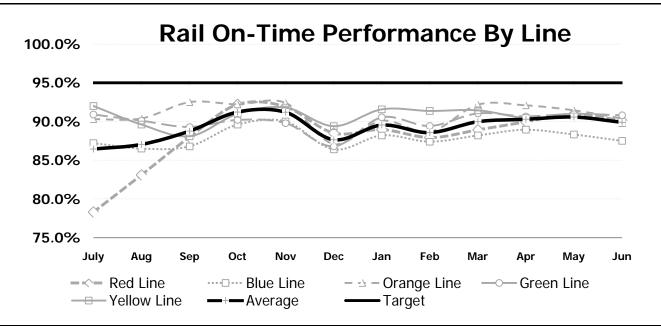

Conclusion: Bus Reliability returned to its earlier five consecutive month pattern of outperforming the target. Also, as bus fleet reliability continues to improve, lost trips will be reduced. In June, lost trips improved by 46% when compared to June of the prior year and 11% when compared to the prior month. FY10 ended with a mean distance between failures of 6,054 miles. With the continual arrival of new buses, retiring the oldest buses and having awarded the option for 52 new buses for FY11, the bus fleet reliability target will be revised to 6,700 miles.

KPI: Rail On-Time Performance by Line (June) Objective 2.1 Improve Service Reliability

Reason to Track: On-time performance measures the adherence to weekday headways, the time between trains. Factors that can affect on-time performance include track conditions resulting in speed restrictions, the number of passengers accessing the system at once, dwell time at stations, equipment failures and delays such as sick passengers or offloads. On-time performance, along with other measures, is a component of customer satisfaction.

Why Did Performance Change:

- Time needed to isolate "hot cars" in record summer heat, door delays due to heavy passenger loads, and necessary track maintenance work negatively impacted rail on-time performance in June.
- Of the total door delays, 49% occurred on the Blue and Orange Lines and 29% occurred on the Red Line. The Green and Yellow Lines each experienced 11% and the remainder did not get attributed to a particular line. Door delays are often caused by passengers entering vehicles after the door closing process has begun.
- A quarter of the Red Line delays were due to insulator repair work on the third rail.
- All lines continue to operate in manual mode, which reduces the maximum achievable on-time performance.
- Daily availability of trains is made more complex with 1000 Series cars used only in the middle of trains. 1000 Series cars comprise 26% of Metro's rail car fleet.

Actions to Improve Performance

- Evaluate and adjust train schedules and spacing to address crowded platforms during peak periods. For example, a Red Line schedule change will be implemented in July 2010 to better maintain scheduled headways.
- During the summer months, perform additional inspections as necessary on the HVAC systems, which may impact on-time performance if cars are put into isolation.
- Make announcements to customers to spread out and use all doors and all cars on the trains. This will help even the number of passengers per car and improve door performance.
- Replacement of the 1000 Series railcars is underway (vehicle delivery starts in 2013). See Board of Directors Meeting May 27, 2010, Action Item 12: Approval to Award Contract for 7000 Series Railcar Purchase.

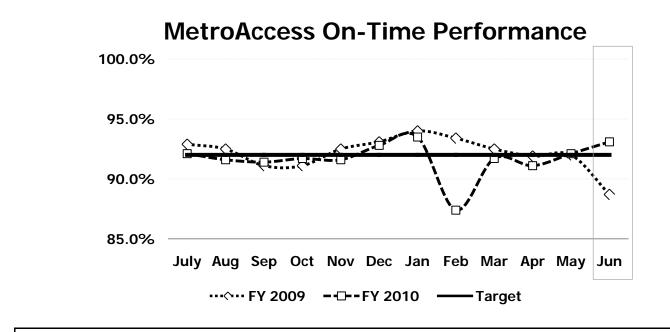

<u>Conclusion</u>: In spite of the hottest June on record and increased passenger activity, system-wide Metrorail ontime performance remains near 90 percent.

KPI: MetroAccess On-Time Performance (June) Objective 2.1 Improve Service Reliability

Reason to Track: On-time performance is a critical measure of MetroAccess service reliability and customer expectations. Adhering to the customer's scheduled pick-up window is comparable to Metrobus adhering to scheduled timetables. Factors which affect on-time performance are traffic congestion, inclement weather, scheduling, vehicle reliability and operational behavior. MetroAccess on-time performance is essential to delivering quality service to customers.

Why Did Performance Change?

• In June, on-time performance exceeded the target of 92% of delivered trips being performed within the pick-up window. Dispatcher refresher training and streamlined dispatch procedures at the division level positively impacted performance during June.

Actions to Improve Performance

• Continue to monitor implementation of streamlined procedures and gains made from refresher training.

• Continue to ensure that all dispatchers are monitoring the delivery of service proactively, so that good on-time performance can be maintained.

Conclusion: MetroAccess delivered 93.1% of trips on-time for June 2010, exceeding its target of 92.0%. MetroAccess on-time performance shows consistent delivery of service within customer expectations.

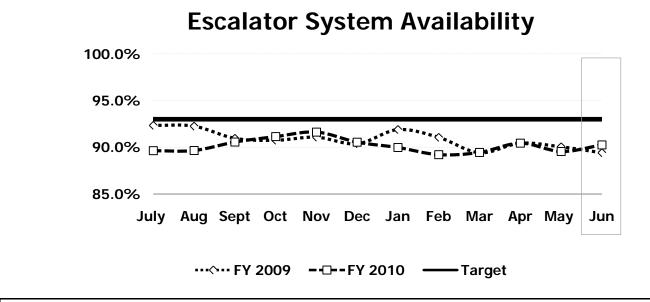

KPI: Escalator System Availability (June)

Objective 2.1 Improve Service Reliability

Reason to Track: Riders access Metrorail stations via escalators to the train platform. An out-of-service escalator requires walking up or down a stopped escalator, which can add to the rider's total travel time and may make stations inaccessible to some customers. Escalator availability is a key component of customer satisfaction with Metrorail service.

Why Did Performance Change?

- System availability improved in June by an equivalent of 5 escalators due to a decrease in unscheduled repairs and faster response time by maintenance staff (12% faster from May to June).
- Nineteen escalators were out of service due to major rehabilitation during some or all of June: one each at Bethesda, Federal Triangle, Van Ness-UDC, Virginia Square-GMU and Woodley Park-Zoo/Adams Morgan, two each at Franconia-Springfield and Tenleytown-AU, three at Gallery PI-Chinatown and seven "walkers" (units that are turned off so that these stations remained accessible by foot).
- The outside assessment of elevator/escalator maintenance continued in June with visits to Foggy Bottom-GWU and Columbia Heights stations.

Actions to Improve Performance

- Metro will take over maintenance of 55 contractor maintained escalators (9% of escalators in system) on July 1st in order to improve response time. As maintenance teams address any necessary repairs to these units, system availability is expected to temporarily decline slightly over the next few months.
- Examine key escalator/elevator maintenance, rehabilitation and parts procurement processes to reduce re-work and improve customer satisfaction, incorporating recommendations from outside consultant in September.
- Two additional maintenance employees received certification as master technicians. These employees will focus on conducting maintenance inspections that proactively identify maintenance issues, reducing instances of units going out of service unexpectedly.

Conclusion: Metrorail escalators were available for 307,261 hours in June (equivalent to an average of 532 out of 588 escalators in operation systemwide). This represents a 1% increase in availability from May to June when an average of 527 units were available.

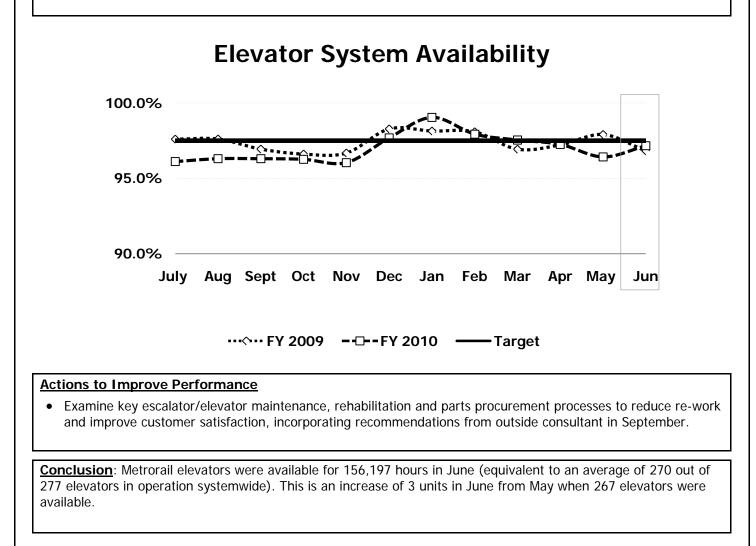

KPI: Elevator System Availability (June)

Objective 2.1 Improve Service Reliability

<u>Reason to Track</u>: Metrorail elevators provide an accessible path of travel for persons with disabilities, seniors, customers with strollers, travelers carrying luggage and other riders. When an elevator is out of service, Metro is required to provide alternative services, which may include a shuttle bus service to another station.

Why Did Performance Change?

- Elevator system availability improved slightly in June, approaching the target. Improvements resulted from a decrease in unscheduled repairs and faster response time by maintenance staff (39% faster from May to June).
- The outside assessment of elevator/escalator maintenance continued in June with visits to Foggy Bottom-GWU and Columbia Heights stations.

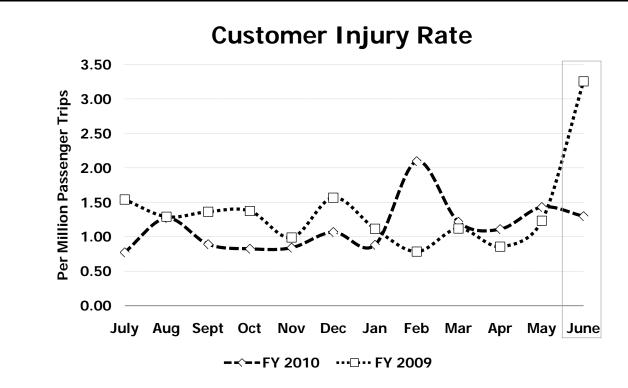

KPI: Customer Injury Rate (Metrorail & Metrobus) (June)

Objective 1.1 Improve Customer and Employee Safety and Security

<u>Reason to Track</u>: Customer safety is the highest priority for Metro and a key measure of quality service. Customers expect a safe and reliable ride each day. The customer injury rate is an indicator of how well the service is meeting this safety objective.

Why Did Performance Change?

- This month marked the one year anniversary of the June 22, rail collision.
- The overall customer injury rate decreased from last month by 0.13 injuries per million trips, or one less injury for every 8 million passenger trips provided.
- Last month the largest rate of customer injuries occurred in rail transit facilities caused by slips and falls. This month rail transit facility injuries decreased from last month by 12.5%.

Actions to Improve Performance

- Developed a new Safety Measurement System designed to aid in root cause analysis.
- Worked with National Transportation Safety Board, and the Tri-State Oversight Committee to close 202 of 256 safety action plans or followed through recommendations that were received by these agencies.
- DriveCam, a tool used to improve driving behavior and assess collision environment, will be installed in the entire Metro bus fleet.

<u>Conclusion</u>: Safety remains Metro's number one priority and everyone in the Metro family is committed to preventing accidents.

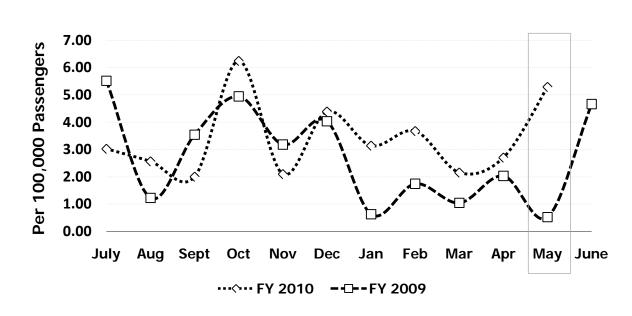

KPI: MetroAccess Passenger Injury Rate (May) (Per 100,000 Passengers)

Objective 1.1 Improve Customer and Employee Safety and Security

<u>**Reason to Track</u>**: Safely transporting passengers is the highest priority for Metro. MetroAccess transports customers with disabilities who require the most assistance of all of Metro's riders.</u>

Why Did Performance Change?

• Of the eleven injuries in May, four of the passenger injuries occurred during separate collisions, where a MetroAccess vehicle was struck by a privately owned vehicle. Three other injuries were related to passenger assistance and three were related to securing mobility devices such as wheelchairs or scooters. The remaining injury was the result of rough road conditions. All reported injuries resulted in either an observatory visit to a medical facility or treatment for minor injuries.

MetroAccess Passenger Injury Rate

Actions to Improve Performance

- MetroAccess operators will receive enhanced refresher training in defensive driving, which includes the following modules: following distance, intersections, distracted driving, fixed objects/mirror settings, railroad crossings, and pre-trip/post trip safety checks.
- MetroAccess operators are currently being recertified in how to secure mobility devices (e.g. wheelchairs).
- Mandatory operator safety meetings will highlight passenger assistance, focusing on how to respectfully discuss safety procedures with customers and verbally inform customers of potential obstacles in their path of travel.
- MetroAccess is continuing its customer safety awareness campaign and education initiative and will invite the participation of the Accessibility Advisory Committee. The importance of accepting assistance in boarding and alighting vehicles and following safety related customer policies and guidance is being emphasized.
- MetroAccess Safety Director will conduct new four-hour safety seminars with all division general managers and safety, operations, and maintenance management personnel. Topics include hiring, training, and risk-reducing techniques.

<u>Conclusion</u>: MetroAccess will continue to work toward improving its overall passenger safety performance through greater service monitoring, employee training, and customer education and awareness.

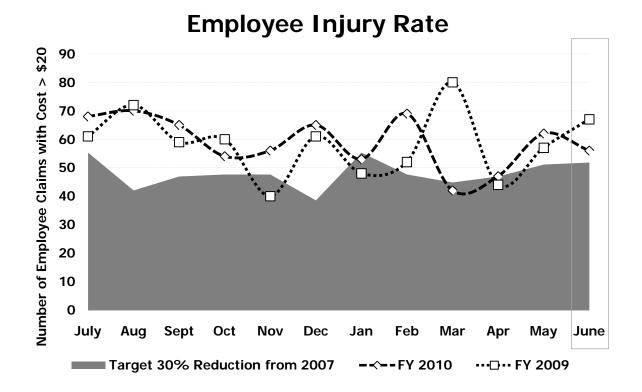

Employee Injury Rate (June) KPI: (Worker's Compensation Claims with Cost of More than \$20)

Objective 1.1 Improve Customer and Employee Safety and Security

<u>Reason to Track</u>: Worker's compensation claims are a key indicator of how safe employees are in the workplace. This measure captures all of the types of claims filed where there is a cost of more than \$20.

Why Did Performance Change?

- Employee injury claims decreased by 10% when compared to the prior month of May, and decreased by 14% when compared to the base year of 2007. There is an average of 59 claims per month.
- According to the National Safety Council, more than 25,000 accidents per day are attributed to slips and falls. New bus operator footwear requirements were adopted to address this safety concern.
- Three additional safety officers have been employed to address the need for additional inspections, training, and analysis.

Actions to Improve Performance

- Implementing roadway worker protection program (Fall 2010); this program will effectuate rules regarding notification to train operators to prevent accidents and/or casualties caused by moving trains and maintenance vehicles.
- In July, an employee safety survey will be conducted. It is anticipated that this survey will be used to better understand the workforce safety culture and environment and establish benchmarks to aid in improving performance.

<u>Conclusion</u>: Employee injuries while at work decreased in June. Progress is being made through improved communications, updated rules and procedures, and increased safety training. Employee injuries on the job are the primary measure of success of these activities.

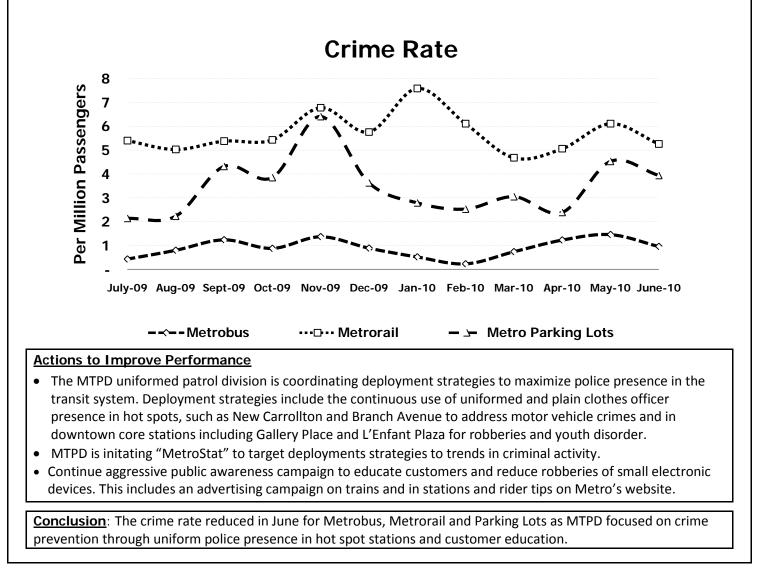

KPI: Crime Rate (June) (Per Million Passengers)

Objective 1.2 Strengthen Metro's Safety and Security Response

<u>Reason to Track</u>: This measure provides an indication of the perception of safety and security customers experience when traveling the Metro system. Increases or decreases in crime statistics can have a direct effect on whether customers feel safe in the system.

Why Did Performance Change?

- The Metro crime rate decreased in all transit venues.
- Robberies decreased 20% which was largely attributed to a 28% reduction in small electronic device robberies.
- Outdoor crimes continue to drive the number of larcenies. In June, half of larcenies were thefts from autos (54 of 111, 49%), primarily GPS devices from parked vehicles. The balance were largely bicycle thefts (44 of 111, 40%).
- Aggravated assaults returned down to monthly trends of between 7 and 10 events reported.
- Patrol commanders used various deployment strategies to reduce crime in partnership with local, state and federal law enforcement agencies, including high visibility details in stations and decoy cars in parking lots.

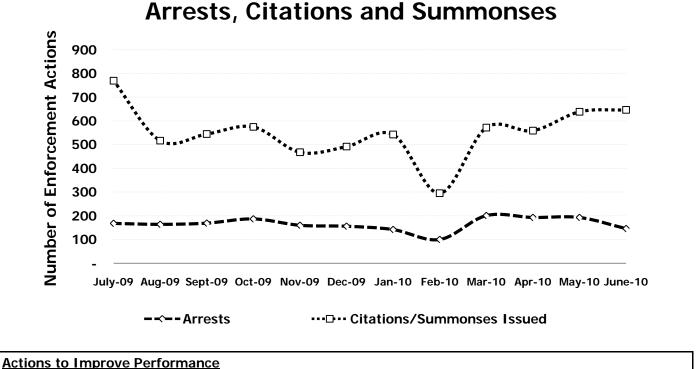

KPI: Arrests, Citations and Summonses (June)

Objective 1.2 Strengthen Metro's Safety and Security Response

<u>Reason to Track</u>: This measure reflects actions by the Metro Transit Police Department to keep the Metro system safe. This includes arrests of individuals breaking the law within the Metro system and citations/summonses issued by transit police officers. Examples of citations/summonses include fare evasion and public conduct violations.

Why Did Performance Change?

- Arrests were down from 193 in May to 146 in June. During June, a number of these arrests were made by officers patrolling platforms in an effort to reduce robberies of small electronic devices.
- Citations/summonses stayed consistent with May, with citations exceeding over 600 in each month. Almost 7% more citations/summonses were issued for public conduct ordinances in FY2010 (July 1, 2009 to June 30, 2010) compared to FY2009. The target was a 5% increase for FY2010.
- Fare evasion citations made up 58% of June 2010 citations/summonses. Compared with the same month in 2009, fare evasion citations increased by 25%.

Actions to Improve Performance

- Continue focusing attention on station platforms and trains to reduce robberies of small electronic devices during rush hours.
- Deploy youth disorder details to maintain order in stations and trains particularly during evenings and weekends. Continue attention on decreasing public conduct offenses by issuing citations/summonses.

Conclusion: MTPD's targeted efforts to patrol platforms, address youth disorder and decrease public conduct offenses can be seen in recent arrest, citation and summon trends.

Definitions for Key Performance Indicators

Bus On-Time Performance – Metrobus adherence to scheduled service.

Calculation: For delivered trips, difference between scheduled time and actual time arriving at a time point based on a window of no more than 2 minutes early or 7 minutes late. Sample size of observed time points varies by route.

Bus Fleet Reliability (Bus Mean Distance between Failures) – The number of revenue miles traveled before a mechanical breakdown. A failure is an event that requires the bus to be removed from service or deviate from the schedule.

Calculation: Number of failures / miles

Rail On-Time Performance by Line – Rail on-time performance is measured by line during weekday peak and off-peak periods. During peak service (AM/PM), station stops made within the scheduled headway plus two minutes are considered on-time. During non-peak (mid-day and late night), station stops made within the scheduled headway plus no more than 50% of the scheduled headway are considered on-time.

Calculation: Number of Metrorail station stops made up to the scheduled headway plus 2 minutes / total Metrorail station stops for peak service. Number of Metrorail station stops made up to 150% of the scheduled headway / total Metrorail station stops for off-peak service.

<u>MetroAccess On-Time Performance</u> – The number of trips provided within the on-time pick-up window of the trips that were actually dispatched into service (delivered). This includes trips where the vehicle arrived, but the customer was not available to be picked up. Vehicles arriving at the pick-up location after the end of the 30-minute on-time window are considered late. Vehicles arriving more than 30 minutes after the end of the on-time window are regarded as very late.

Calculation: The number of vehicle arrivals at the pick-up location within the 30-minute on-time window / the total number of trips delivered.

<u>Elevator and Escalator System Availability</u> – Percentage of time that the Metrorail escalator or elevator system is in service during operating hours.

Calculation: Hours in service / operating hours. Hours in service = operating hours – hours out of service (both scheduled and unscheduled). Operating hours = revenue hours per unit * number of units.

<u>Customer Injury Rate (per Million Passenger Trips)</u> – The number of customers injured and requiring medical transport from the rail and bus system for every one million passenger trips. Customer injuries per million passenger trips is used to demonstrate the relative proportion of safe service which is provided.</u> **Calculation:** Bus passenger injuries, rail passenger injuries, rail facility injuries, including escalator injuries / (passenger trips / 1,000,000).

<u>MetroAccess Passenger Injury Rate (per 100,000 Passengers)</u> – The number of passengers injured and requiring medical transport for every one hundred thousand passengers transported by Metro Access. **Calculation:** Passenger injuries requiring medical transport / total passengers. **Employee Injury Rate (Worker's Compensation Claims with Cost > \$20)** – The number of worker's compensation claims made by employees per month. This measure compares the base year of FY 2007 and the target reduction of 30% fewer than the base year number of claims, and is a measure of improving the safe behavior of employees throughout the agency.

Calculation: Number of Worker's Compensation Claims with Cost > \$20 per month as compared with the target of 30% less than the number of claims made in FY 2007 by month.

<u>Crime Rate (per Million Passengers)</u> – Crimes reported to Metro Transit Police Department on bus, rail, or at parking lots, Metro facilities, bus stops and other locations in relation to Metro's monthly passenger trips. Reported by Metrobus, Metrorail, and Metro parking lots.

Calculation: Number of crimes / (passenger trips / 1,000,000)

<u>Arrests, Citations and Summonses</u> – The number of arrests and citations/summonses issued by the Metro Transit Police Department. Examples of citations/summonses include minor misdemeanors, fare evasion and public conduct violations.

Appendix F. Glossary of Terms

AAC (Accessibility Advisory Committee)	Metro's committee that was created to address the needs of senior citizens and customers with disabilities. Its efforts have resulted in numerous service upgrades including gap reducers, which make it easier for customers who use wheelchairs to board Metrorail trains.
Accounting Basis	The accounting principles and methods appropriate for a government enterprise fund. Financial statements are prepared on the accrual basis of accounting under which revenues and expenses are recognized when earned or incurred.
Accrual	Basis of Accounting where revenues are recognized when they are measurable and earned. Expenses are recorded when incurred.
ADA (Americans With Disabilities Act)	Refers to Federal civil rights legislation passed in 1990 that requires public transportation services to be accessible to, and usable by, persons with disabilities. In compliance, Washington Metropolitan Area Transit Authority (Metro) operates Metrobus with a bus fleet equipped with passenger lifts and wheelchair tie downs, Metrorail with elevators and platforms that are ADA compliant and MetroAccess a fleet of over 500 vans and sedans also equipped with lifts and tie downs.
Approved Budget	The revenue and expenditure plan approved by the Board of Metro for a specific one year period starting on July 1.
ART	Refers to the bus service that operates within Arlington County, providing access to Metrorail

	and supplementing Metrobus with smaller, neighborhood-friendly vehicles.
Articulated bus Also see "Slinky" bus	Refers to buses that have an "accordion" section in the middle that allows the bus to bend and flex (articulate). Articulated bus has more passenger capacity than standard 40-foot buses.
AGM (Assistant General Manager)	An executive who usually reports directly to one of two Deputy General Managers of Metro.
Assets	Property owned by Metro which has monetary value with a future benefit.
Balanced Budget	Refers to a budget where estimated revenues are equal to or greater than estimated expenses.
Board of Directors	The Board of Directors is a 16-member body composed of eight voting and eight alternate members responsible for corporate governance of Metro.
Bond	A written promise to pay a specified sum of money (face value) at a specified future date and the proposed means of financing them.
Bond Proceeds	Refers to additional local capital funds raised, when necessary, by issuance of revenue bonds in the municipal markets.
Budget	Refers to a financial operation embodying an estimate of revenues and expenditure for a fiscal period of 12 months or longer. This can be an operating or capital budget.
Budget Calendar	Refers to a schedule of key dates for specific milestones in the preparation and approval of a budget.
Budget Document	Refers to the official written statement and the supporting numbers prepared by the Financial staff for presentation for approval by the Board.
Budget Message	Refers to the general discussion of the budget

	document presented in writing as an overview of the budget document usually by the head of the organization.
Bus Shelter	A shelter for riders to wait for the bus, a canopy area with or without bench seating. In addition, the shelter includes a display case with bus information for Metrobus riders and is equipped with a trash receptacle.
Bus Stop	Refers to a stop indicated by a sign for riders to wait for the bus.
CAFR (Comprehensive Annual Financial Report)	A report containing financial statements and statistical data that provides full disclosure of all material financial operations of Metro in conformity with generally accepted accounting principles.
Capital Assets	Assets of a material value and having a useful life of more than one year. Also called fixed assets.
Capital Budget	The portion of the budget that provides for the funding of improvements, projects and major equipment purchases.
Capital Improvement Plan	The six-year plan of capital projects to be completed by Metro.
Cash Basis	Basis for keeping accounts whereby revenue and expense are recorded on the books of account when received and paid, respectively, without regard to the period to which they apply.
Compact	Refers to interstate compact creating Metro; this is a special type of contract or agreement between the three jurisdictions within which the organization operates.
Compressed Natural Gas (CNG)	A natural gas fuel used in a clean engine technology.
Contingency Funds	Operating and capital funds reserved for

Cost Allocation	unexpected expenditures during the fiscal year which were not addressed in the annual budget. Refers to the assignment of expenses accounted for in one fund to another fund. For example, certain operating expenses of a division may be charged to a capital grant.
COLA (Cost of Living Adjustment)	Cost of Living Adjustment (COLA) for inflation for employees.
Department	A major organizational unit that has overall responsibility for an operation or a group of operations within a functional area.
DGM (Deputy General Manager)	An executive who reports directly to the General Manager.
Deficit	Refers to an excess of Assets over Liabilities or Expenses over Revenue.
DC Circulator	Refers to a bus route funded by the DC Government with support from Metro to take persons to Washington, DC's premier cultural, shopping, dining, and business destinations.
Diesel fuel	Fuel composed of petroleum distillates that has a boiling point and specific gravity higher than gasoline.
Division	Refers to a garage and yard facility where buses are stored, maintained, and dispatched into service.
The Fairfax Connector	The bus system that runs seven days a week with service throughout Fairfax County and to Metrorail Stations on the Orange, Blue and Yellow lines, including the Pentagon.
Fare box recovery ratio	Refers to the ratio of passenger fares (including inter-agency agreements related to fares) to total operating costs.
Farecard	Refers to a paper pass to ride Metrorail. A

pass is gate-activated the first time it is used and prints the last valid date on the pass. Farecards contain a set value. Trip values are subtracted from the farecard upon exiting the station gate.

Flash Pass Four-point securement system	Metrobus pass valid for unlimited use for a designated seven-day period. Refers to an onboard securement system for wheelchairs, three-wheel and four-wheel scooters. The system incorporates four seatbelt type straps that attach to the frame of a mobility device as a way to keep it from moving or rolling while on the bus.
FTA (Federal Transit Authority)	A federal administration within the US Department of Transportation. The FTA provides stewardship of combined formula and discretionary programs totaling more than \$10 billion to support a variety of locally planned, constructed, and operated public transportation systems throughout the United States.
GAAP (Generally Accepted Accounting Principles)	Accounting standards, revised periodically, to which both private and public organizations within the United States are expected to conform.
General Manager (<i>GM)</i>	The chief executive officer of Metro who reports directly to the Board.
Head sign	Refers to the sign above the front windshield of a bus describing the line number or letter, its line name, and destination.
Headway Also see Frequency	Refers to time intervals between vehicles moving in the same direction on a particular route. Headway can change on a line during the day as rider demand changes.
JCC (The Jurisdictional Coordinating Committee)	The staff members from the jurisdictions supporting Metro. The JCC was established by the Board of Directors to facilitate the exchange of information between jurisdictions and Metro staff.
KPI (Key Performance Indicator)	A measurement used to assess the performance of operations and support departments based on targets set for management and staff. They may be financial and non-financial benchmarks used to monitor performance and efficiency.

Kiss and ride	Refers to an area within a station where commuters are driven by private car and dropped off to board Metrobus or Metrorail.
Kneeling bus Also see Passenger lift	Refers to a feature on all buses that lowers the floor to the curb or to near-curb level to make it easier for passengers to board, especially for seniors and persons with disabilities.
Layover time (Also known as Spot time)	Refers to time built into a schedule between arrival and departure for bus drivers to rest; minimum times are set by union contract. Layovers normally occur at each end of a route to allow for a driver's break and schedule recovery, but they may be scheduled at other points to allow for timed transfer connections.
Liability	A debt or legal obligation arising from transactions in the past which must be liquidated, renewed or refunded at a future date.
Linked/Unlinked trip	A linked a trip is where a rider may transfer between types of vehicles (e.g., Metrobus and Metrorail), or multiple stops, such as stopping at a daycare center or store along a commute trip. An unlinked trip is a passenger trip taken on a single vehicle, such as a single bus ride.
Loop	Refers to a portion of a bus line where the driver operates a segment in one direction only. Passengers may only board on one side of the loop. Loops are sometimes required due to lack of pavement accessibility, or when no off street turn-around is available.
Loundon County Transit	The weekday bus service for Loudon County to Washington D.C., the Pentagon and Rosslyn from stops in Purcellville, Hamilton, Leesburg and Sterling. A reverse commute bus service is now available from West Falls Church to Loudoun County.

MARC (Maryland Area Regional Commuter) See Also VRE	A commuter rail system whose service areas include Harford County, Maryland; Baltimore City; Washington D.C.; Brunswick, Maryland; Frederick, Maryland and Martinsburg, West Virginia.
MDBF (Mean Distance Between Failures)	A key performance indicator that measures performance for bus, rail and paratransit. It measures the probability of failure per unit of time of items in operation; sometimes estimated as a ratio of the number of failures to the accumulated operating time for the items.
MDBSI (Mean Distance Between Service Interruptions)	A key performance indicator that measures performance for bus, rail and paratransit. It measures the miles traveled between any incident which caused the customer to transfer between buses/rails for any reason, i.e. maintenance, accidents, occurrences, etc.
MetroAccess	The operating unit of Washington Metropolitan Area Transit Authority (Metro) that offers service for eligible people with disabilities who are unable to use regular accessible Metrorail, Metrobus and local bus service (fixed route). Federal civil rights legislation passed in 1990 that requires public transportation services to be accessible to, and usable by, persons with disabilities. In compliance, MetroAccess operates a fleet of over 500 vans and sedans. The vans are equipped with passenger lifts and wheelchair tie-downs.
Metrobus	The operating unit of Washington Metropolitan Area Transit Authority (Metro) that offers bus service on 332 routes on 180 lines throughout the Metro region utilizing 12,216 bus stops and 2,477 shelters. Buses currently running are made by Flxible, Orion, New Flyer, Neoplan and NABI.

Metrorail	The operating unit of Washington Metropolitan Area Transit Authority (Metro) that offers a subway system that consists of 106.3 route miles (subway, aerial and surface) and 86 passenger stations and a fleet of over 1,100 rail cars. Fleet consists of 1000, 2000, 3000, 4000, 5000 and 6000 Series cars. The 7000 Series cars are currently under initial development.
Modified Accrual Basis	An accounting method that combines accrual- basis accounting with cash-basis accounting. Modified accrual accounting recognizes revenues when they become available and measurable and, with a few exceptions, recognizes expenditures when liabilities are incurred.
Multimodal	Refers to the availability of multiple transportation options, especially within a system or corridor. A multimodal approach to transportation planning focuses on the most efficient way of getting people or goods from place to place by means other than privately owned vehicles; by bus, trolley, light rail, streetcar, cable car, and/or ferry systems.
MTA (Maryland Transit Administration)	Refers to the bus, light rail, and subway services in Maryland. MTA also operates the MARC train service.
NextBus	Refers to the application that uses satellite technology for Metrobus locations to track the arrival times for bus operators and customers.
Office	An organizational until that falls under the structure of a department.
Operations Control Center (OCC)	The operations center that facilitates monitoring and communications for Metrorail operations.
Park and Ride	Refers to the parking facility available for riders at Metrorail stations.

Passenger Information Display System (PIDS)	Refers to signs located on each platform and mezzanine of every rail station to provide information to let customers know when the next trains are scheduled to arrive, alert customers to service delays, provide information about elevator outages, and identify how to make free shuttle arrangements when elevators are out of service.
Paratransit	Refers to scheduled service for people who cannot use regular fixed-route bus service. MetroAccess uses vans and sedans to provide this service in the Washington Metropolitan Area.
Passenger lift Also see Kneeling bus	A mechanical device, either a lift or ramp, that allows wheelchair or scooter users, as well as other mobility-impaired passengers, to board a bus without climbing the steps. By law, passenger lifts must be capable of lifting at least 600 pounds.
Peak service	Refers to weekday a.m. and p.m. service during commute hours that carries a maximum number of passengers. For Metrorail, peak hours are defined as the time between opening and 9:30 a.m. in the morning, and between 3 p.m. and 7 p.m. at night.
Personnel Services	Refers to expenditure in the operating budget for salaries and wages paid for services performed by Metro employees as well as fringe benefits costs associated with their employment.
Platform hours	The total scheduled time a bus spends from pull- out to pull-in at the division. Platform hours are used as a benchmark to calculate the efficiency of service by comparing "pay to platform" hours.
Proposed Budget	Refers to the Budget prepared with preliminary estimates by the GM for the consideration of the Metro Board.
Programmed Reader	A machine that is attached to the fare gate/fare box where magnetic fare media can be read on Metrorail and Metrobus.

Revenue	An increase in fund assets from operational activity such as passenger fares, parking and advertising.
Revenue Bonds	A bond on which debt service is payable solely from a restricted revenue source.
Revenue Hours (Also known as Revenue Service)	Refers to all scheduled time a bus/rail spends serving passengers, which can also be defined as platform hours minus deadhead and layover time.
Revenue Passengers	Refers to passengers who enter the system through the payment of a fare.
Revenue trip Also see Linked/Unlinked trip	Refers to any linked or unlinked trip that generates revenue by cash payment, use of a pass, and/or any other means of payment.
Ride-On	Refers to Montgomery County Regional bus transit system in Maryland.
RAC (Riders' Advisory Council)	A committee established by the Metro Board. The council allows Metro customers an unprecedented level of input on bus, rail and paratransit service. The 21-member council includes six representatives from Maryland, Virginia, and the District of Columbia, two at- large members, and the chair of Metro's Accessibility Advisory Committee.
Round trip (Also known as a cycle)	Refers to one inbound, plus one outbound trip (unless a loop route), equals one round trip or cycle.
"Slinky" bus Also see Articulated bus	Refers to a nickname used by many passengers for the articulated bus.
SmartTrip [®]	Refers to a technology built and designed by Cubic Transportation Systems, Inc., a subsidiary of San Diego-based Cubic Corporation to add

	programmed reader on Metrobuses and at fare gates on Metrorail.
SmartStudent Pass	A monthly pass for unlimited travel on Metrobus and Metrorail for students under the age of 19 years of age who live and attend school in the District of Columbia.
Strategic buses	Refers to spare buses available for service in the event that a bus in route becomes out of service.
Subsidy	Refers to funding received from jurisdictional funding partners in the Washington Metropolitan area consisting of Washington, D.C., suburban Maryland (Montgomery County and Prince Georges County) and Northern Virginia counties of Arlington, Fairfax and Loudon and the Cities of Alexandria, Fairfax and Falls Church.
TheBus	A weekday service between Upper Marlboro and Metrorail Stations in Prince Georges County, MD.
Transit advertising	Refers to ads posted on the exterior and interior of buses and rail cars.
TSI (Transportation Safety Institute)	A Federal Transit Administration-sponsored institute that conducts a full range of training programs in rail and bus safety and accident investigation. Its headquarters is in Oklahoma City.
Trunk line Also see Feeder line and Headway	A route operating along a major corridor that carries a large number of passengers and operates at headway frequencies of 15 minutes or less.
VRE (Virginia Railway Express) See Also MARC	The commuter rail service that connects the Northern Virginia suburbs to Union Station in Washington, D. C., via two lines: the Fredericksburg Line from Fredericksburg, Virginia, and the Manassas Line from Broad Run/Airport station in Bristow, Virginia.

WMATA (Also known as Metro)

Refers to the acronym used for Washington Metropolitan Area Transit Authority serving the Washington Metropolitan area which consists of Washington, D.C., suburban Maryland (Montgomery County and Prince Georges County) and Northern Virginia counties of Arlington, Fairfax and Loudon and the cities of Alexandria, Fairfax and Falls Church consisting of a population of five million people and three million jobs. Metro operates the second largest rail/subway system and the sixth largest bus system in the nation.
